EXPLANATORY NOTE

This Amendment on Form 10-QSB/A (this "Amendment") amends the Company's Quarterly Report on Form 10-QSB for the three-month period ended June 30, 2004, originally filed on August 19, 2004 ("Original Filing"), solely for the purpose of making the amendments set forth herein, which include (i) deletion of language concerning certain parties' relationship to American Business Funding Corp. to make it consistent with the Company's disclosure in a Current Report on Form 8-K filed subsequent to the Original Filing to clarify the statements made and these relationships; (ii) additional disclosure concerning the Company's Stockholder Rights Plan; (iii) a reconciliation of the amounts disclosed under Results of Operations with the Company's unaudited financial statements to correct inconsistencies; (iv) the refiling of certain exhibits to include a conformed signature to demonstrate that these agreements had been validly executed; and (v) refiling the Exhibit 32 certification listing the CEO as the acting CFO at the time of the filing. In addition, in connection with the filing of this Amendment and pursuant to the rules of the Securities and Exchange Commission, the Company is including with this Amendment certain currently dated certifications.

Except as described above, no other changes have been made to the Original Filing. This Amendment continues to speak as of the date of the Original Filing, and the registrant has not updated the disclosures contained therein to reflect any events that occurred at a date subsequent to the filing of the Original Filing. The filing of this Form 10-KSB/A is not a representation that any statements contained in items of the Original Filing other than that information being amended are true or complete as of any date subsequent to the date of the Original Filing. The filing of this Form 10-KSB/A shall not be deemed an admission that the original filing or the amendments made thereto, when made, included any untrue statement of a material fact or omitted to state a material fact necessary to make a statement not misleading.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS

For a description of our significant accounting policies and an understanding of the significant factors that influenced our performance during the three and nine months ended June 30, 2004, this "Management's Discussion and Analysis" should be read in conjunction with the Consolidated Financial Statements, including the related notes, appearing in Item 1 of this Quarterly Report.

Forward-Looking Statements

This portion of this Quarterly Report on Form 10-QSB, includes statements that constitute "forward-looking statements." These forward-looking statements are often characterized by the terms "may," "believes," "projects," "expects," or "anticipates," and do not reflect historical facts. Specific forward-looking statements contained in this portion of the Annual Report include, but are not limited to the Company's: (i) belief that the new methodology of counting IAP advertisers is more accurate and can be more consistently applied to each period; (ii) belief that tracking and disclosing the numbers of its activated customers provides greater clarity into its business; (iii) belief that its ability to bill customers on their local telephone bill enables it to realize a greater average rate of collections than direct invoice-billing; (iv) expectation that the trend of increasing ACH as a billing method relative to LEC billing will continue and escalate; (v) expectation that LEC billing will become a smaller component of the Company's overall billing methodology; (vi) expectation that the dilution and costs to implement its new billing method will be reduced to more normal levels over the next few quarters; (vii) belief that its recent attempts at addressing corporate governance issues will help it to preserve the financial and operational integrity that the Company and its stockholders have experienced in the past; (viii) belief that Mr. Bergmann's background in the management of advertising businesses and marketing will be helpful to the Company; (ix) expectation that management will focus significant attention on dealing with the issue of increased dilution; (x) expectation that sales and marketing costs will continue to increase; (xi) expectation that capital expenditures will not grow at the same rate in future fiscal periods.

Forward-looking statements involve risks, uncertainties and other factors, which may cause our actual results, performance or achievements to be materially different from those expressed or implied by such forward-looking statements. Factors and risks that could affect our results and achievements and cause them to materially differ from those contained in the forward-looking statements include those identified in the section below titled "Risk Factors," as well as other factors that we are currently unable to identify or quantify, but may exist in the future.

In addition, the foregoing factors may affect generally our business, results of operations and financial position. Forward-looking statements speak only as of the date the statement was made. We do not undertake and specifically decline any obligation to update any forward-looking statements.

Executive Overview

Business Summary

We use a business model similar to print Yellow Page publishers. We publish basic directory listings, free of charge, exclusively on the Internet. Like Yellow Page publishers, we generate virtually all of our revenues from those advertisers that desire increased exposure for their businesses by purchasing our Internet Advertising Package , or IAP. Our basic listings contain the business name, address and phone number for almost 18 million U.S. businesses. We strive to maintain a listing for almost every business in America in this format.

To generate revenues, certain advertisers pay us a monthly fee for our IAP in the same manner that advertisers pay additional fees to traditional print Yellow Page providers for enhanced advertisement font, location or display. The IAP includes, Mini-Webpage , map directions, a toll-free calling feature, a link to the advertiser's own webpage and, at no additional charge, a priority or preferred placement on our website. The users of our website(s) are prospective IAP advertisers for our advertisers.

We also offer other ancillary services and products that currently account for less than 5% of our revenue. These ancillary services and products include website design and hosting, and dial-up Internet access.

Sales and Marketing

We employ a direct mail marketing program to solicit our IAP advertisers. Currently, our direct mail marketing program includes a promotional incentive currently in the form of a \$3.25 activation check that a solicited business simply deposits with its bank to activate the service and become an IAP advertiser on a monthly basis. As a method of third-party verification, the potential IAP advertiser's bank verifies that the depositing party is in fact the solicited business. Upon notice of activation by the IAP advertiser's bank, we contact the business to confirm the order. Within 30 days of activation, we also send a confirmation card to the business. We offer a cancellation period of 120 days with a full refund. Our direct mail marketing program complies with and, in many instances, exceeds the United States Federal Trade Commission, or FTC, requirements as established by an agreement between our company and the FTC.

In June 2004, we implemented our National Accounts Program. Unlike other IAP advertisers, these accounts are not obtained through our direct mail program. These accounts represent large national organizations that purchase their advertising in "bulk" for their many locations. These are sophisticated advertisers for whom a "per click" revenue model is effective, desired and expected. We have built a software model that allows us to implement and bill these customers on a per click basis. We host their information on a separate spot on our search results page (beside the standard IAP listings) to give them high priority while allowing our smaller advertisers to compete directly when consumers are searching for products.

IAP advertisers

In September 2003, we revised the method by which we count our IAP advertisers. We now differentiate between "paying IAP advertisers" and "activated IAP advertisers." Paying IAP advertisers, as the name implies, are those advertisers that are actually currently paying for the IAP service. The terms activated IAP advertisers or activated advertisers are broader and more inclusive terms. They include those advertisers that are currently paying for the IAP service, as well as those advertisers that either have signed-up for the IAP service but have not yet been billed or have been billed but have not yet remitted to us their fees. We include National Accounts as paying IAP advertisers.

We believe that the new methodology is more accurate and can be more consistently applied to each period. We also believe that tracking and disclosing the numbers of our activated IAP advertisers, in addition to our paying IAP advertisers, provides greater clarity into our business by providing an indication or forecast of how many activated IAP advertisers may eventually become paying IAP advertisers. Our average retention rate for paying IAP advertisers is approximately 29 months, which, in turn, approaches the average operating life expectancy of 36 months for a small business in the U.S., according to the U.S. Small Business Administration.

Methods of Billing

We bill most of our IAP advertisers on their local telephone bill through their Local Exchange Carrier, or "LEC." We are one of only a few independent Internet advertisers that are permitted to utilize this unique and cost-efficient method of billing. By billing our IAP advertisers on their local telephone bill, we believe we are able to realize a greater average rate of collection than direct invoice-billing. The amount and frequency of collections on invoice-billed IAP advertisers historically has been significantly lower than for IAP advertisers billed on their monthly telephone bill. Accordingly, our revenues can be negatively impacted if the billing method used to bill an IAP advertiser converts from monthly telephone bill invoicing to direct invoicing.

We are not permitted to bill our IAP advertisers through Competitive Local Exchange Carriers, or CLECs. Recently, the CLECs have been participating in providing local telephone services to IAP advertisers at an increasing rate. We have begun to address this problem and we are implementing data filters to reduce the effects of the CLECs. We have also sought other billing methods to reduce the adverse effects of the CLEC billings, including credit cards and Automated Clearing House, or ACH, which is direct debit from the IAP advertiser's bank account. ACH billing now accounts for approximately 12% of our total billings and is our second highest billing method. ACH billing has reduced some of our dependency on LEC billing. We expect this trend to continue and escalate.

Accounting Policies and Procedures

We bill our services monthly and recognize revenue for services billed in that month. We utilize outside billing companies, or billing aggregators, to transmit billing data, much of which is forwarded to the LECs for inclusion on the IAP advertiser's monthly local telephone bill. Because we have a 120-day cancellation policy on new advertiser sign-ups, we accrue for such refunds as a liability and net such anticipated refunds against revenue to report a net revenue number in our financial statements.

The billing aggregators and, subsequently, the LECs, filter all billings that we submit to them. We recognize as revenue and accounts receivable the net billings accepted by the LECs. The billing aggregators remit payments to us on the basis of cash that the billing aggregators ultimately receive from the LECs. The billing aggregators and LECs charge fees for their services, which generally are 3% to 7% each on a monthly basis. These fees, in turn, are netted against the gross accounts receivable balance. The billing aggregators and LECs also apply holdbacks to the remittances for potentially uncollectible accounts due to bad telephone numbers and other indications of uncollectibility. We account for these holdbacks and fees as a dilution expense on our financial statements because they significantly "dilute" or reduce our gross billings and, therefore, may significantly affect our cash flow.

Due to the periods of time for which adjustments may be reported by the LECs and the billing aggregators, we estimate and accrue for dilution of our gross billings and fees reported subsequent to year-end for initial billings related to services provided for periods within the fiscal year. The amounts attributable to the dilution of our gross billings will vary due to numerous factors. Accordingly, we may not be certain as to the actual amounts of dilution on any specific billing submittal until several months after that submittal. We estimate the amount of these fees and holdbacks based on historical experience and subsequent information received from the billing aggregators. We also estimate uncollectible account balances and provide an allowance for such estimates.

We process our billings through two primary billing aggregators PaymentOne, Inc. and ACI Communications, Inc. PaymentOne provides the majority of our billings, collections, and related services. The receivable due from PaymentOne at June 30, 2004 was \$10,249,831, net of an allowance for doubtful accounts of \$3,581,737. The net receivable from PaymentOne for billing at June 30, 2004 represented approximately 73% of our total net accounts receivable.

With respect to our alternative billing methods, we recognize revenue for ACH billings when they are accepted. We recognize revenue for direct-invoice billings based on estimated future collections on such billings. We continuously review these estimates for reasonableness based on our collection experience. At June 30, 2004, the receivable due from PaymentOne for ACH revenue was \$614,825

Our cost of services increased dramatically during the period ended June 30, 2004. Specifically, our cost of services increased 344% for the three-month period ended June 30, 2004 compared to the same period in the prior fiscal year, 236% for the nine-month period ended June 30, 2004 compared to the same period in the prior fiscal year, and 38% compared to our prior quarterly fiscal period ended March 31, 2004. While our net revenues have also increased significantly in the corresponding periods, our cost of services as a percentage of our net revenues in each period have also increased significantly.

The increase in our cost of services is directly attributable to an increase in our dilution expense. This dilution expense has escalated from \$2,573,490 for our first fiscal quarter ended November 30, 2003, and \$3,826,875 for our second fiscal quarter ended March 31, 2004, to \$6,154,908 in our third fiscal quarter ended June 30, 2004.

The telephony industry as a whole is changing with more and more competition being experienced by the local exchange carriers, or LECs, also known as the Regional Bell Operating Companies. We bill most of our customers through the LECs. However, the LECs are losing market share at a substantial rate due to the existence of competitive Local Exchange Carriers, or CLECs, which, in turn, has an adverse effect on our business. When one of our IPA customers changes their telephone carrier to a CLEC, we do not count this customer as a paying subscriber until we receive direct payment. When that phone number is returned by the LEC because they are no longer customers of that LEC we count it as dilution. Recent large price increases by the LECs have caused business customers to look for alternative telephony suppliers. This has resulted in significant short-term dilution for us. Recent management changes at the Company have reduced our ability, in the short-run, to address these matters. However, as we emerge from our recent challenges we expect to focus significant attention in this area. This dilution is also a direct result of our attempt to modify and enhance our LEC billing processes so that more accounts would be accepted by the LECs. Many accounts have been accepted. However, this has reached its culmination during the quarter ended June 30, 2004 and these dilution costs have begun to drop in the fiscal fourth quarter beginning July 1, 2004.

For those accounts that could not be billed through the LEC during the above process we have expanded our ACH billing. This means we have taken significant steps to reduce our dependence on LEC billing during the most recent quarter and will continue to do so in future quarters. We have purchased new software that more quickly identifies the phone numbers that are active with the LECs so that we are able to more efficiently bill our clients by omitting accounts that have switched to a CLEC. We have begun to acquire direct debit information from at least 40% of new accounts as we acquire them so that if they switch phone companies we are able to seamlessly switch billing methods. We are processing all of our invoice customers to obtain more direct billing information in an effort to switch them to ACH billing. This process will take most of the fourth quarter. While LEC billing will remain our dominant billing method for the foreseeable future, it will eventually become a smaller component because our advertisers do not expect to pay for yellow page advertising on their phone bill. ACH billing has higher initial dilution but the dilution drops to insignificant levels after two months and then is less expensive to process than LEC billing.

However, while we expect this dilution and the costs to implement our new billing method to be reduced to more normal levels over the next few quarters as this process runs its course through the billing system it has significantly increased our costs in the near term.

Subscription receivables that result from direct-invoice billing are valued and reported at the estimated future collection amount. Generally these receivables are what we expect to collect (based on prior experience) in one to two months. Determining the expected collections requires an estimation of both uncollectible accounts and refunds. The net subscriptions receivable at June 30, 2004 was \$157,299.

Our cost of services is comprised, primarily, of variable costs, including the following:

- allowances for bad debt, which are based upon historical experience and reevaluated monthly;
- billing fees, such as the fees charged by our billing aggregators and the Local Exchange Carriers;
 - billing aggregator inquiry fees, which generally are 1% on a monthly basis;
- dilution resulting from fees and holdbacks due to items such as wrong telephone numbers and other indications of uncollectibility;
 - Internet expenses, such as dial-up expenses; and
 - direct mailer marketing costs and the amortization of such costs.

Our general and administrative expenses are comprised, primarily, of fixed costs, including compensation expenses, which generally equate to 5% to 10% of net. We recognize revenue for direct-invoice billings based on estimated future collections on such billings. We continuously review these estimates for reasonableness based on our collection experience. revenue, as well as other expenses, such as lease payments, telephone, professional fees, and office supplies.

Recent Developments

Challenges and Solutions

We have faced a number of significant challenges over the past few months and have recently experienced substantial turnover in our management and Board of Directors. However, we believe that the progress the Company has made in addressing these challenges and adopting enhanced corporate governance practices will help us to preserve the financial and operational integrity that the Company and our stockholders have experienced in the past. This progress is marked by the following examples:

- In keeping with our goal to end all related party transactions, we have terminated the Company's Executive Consulting Agreements pursuant to which the offices of Chief Executive Officer, Chief Financial Officer and other executive positions were provided through consulting companies.
- We have revamped our management team and have filled the positions of Chief Executive Officer and Chief Financial Officer with highly qualified individuals, as described in greater detail below.
- We have recomposed our Board of Directors to include more independent directors, as described in greater detail below, and we continue to seek qualified independent candidates.
 - We have formed an audit committee, adopted its charter and appointed its chairman.
 - We have adopted a comprehensive code of ethics.
 - We have revisited and updated our insider trading policies.
 - We have identified and designated the Board of Directors' qualified financial expert.
- We have terminated our previous loan obligations to our two largest stockholders, Morris & Miller, Ltd. and Mathew and Markson, Ltd., which came about as a byproduct of the acquisition of our wholly-owned subsidiary (Telco Billing) and operating unit through which virtually all our revenue is generated. Moreover, we have negotiated the acceleration of three repayments, totaling an aggregate of \$1,600,000, from these stockholders on their existing debt to the Company, which is well ahead of their scheduled repayment dates.
- We have obtained and publicly shared the beneficial ownership of Morris & Miller, Ltd. and Mathew and Markson, Ltd. as provided to us in sworn affidavits by their managing director, the Swiss Consul to Antigua.
 - We have recently paid our second consecutive quarterly cash dividend to our stockholders.
 - We have established a new credit facility.
- We have adopted a Stockholder Rights Plan, which is described in greater detail below, to protect the Company from unsolicited offers and to provide the Board with the leverage and ample opportunity to negotiate the greatest value for the stockholders if another person wishes to acquire the Company.

We have begun paying dividends to our common shareholders.

Management and Board Changes

On May 28, 2004, our Chief Executive Officer, Angelo Tullo, resigned as an officer and director of our company. Our board of directors appointed Peter J. Bergmann to succeed Mr. Tullo as Chairman, President and Chief Executive Officer. Mr. Bergmann had previously been an independent director of our company since May 2002. Mr. Tullo's resignation was prompted by the fact that on May 27, 2004, federal indictments were handed down alleging that the former management of American Business Funding Corp., including Mr. Tullo, had engaged in fraud and conspiracy in connection with the factoring of receivables. American Business Funding Corp. is not and has never been affiliated with or related to our company.

Our board of directors believed that even though the indictments against Mr. Tullo were not related to our company or its business, so long as Mr. Tullo remained an officer and director of our company the indictments against him would adversely impact our business reputation and perception in the public markets and detract from our ability to expand our business. Accordingly, Mr. Tullo and the board of directors determined that it was in the best interests of our stockholders for Mr. Tullo to resign as an officer and director of our company. As described below under *Termination Agreements*, we also later terminated the executive consulting agreement with Mr. Tullo's company, Sunbelt Financial Concepts, Inc., or Sunbelt.

Upon Mr. Tullo's resignation as Chairman and CEO, the board of directors determined that Mr. Bergmann was the most qualified candidate to replace him because of Mr. Bergmann's familiarity with our business, his business expertise, and his public company experience. We believe that Mr. Bergmann's background in the management of advertising and marketing companies will be helpful to our company, given our advertising focus.

Since January 1999, Mr. Bergmann has served as the President of Perfect Timing Media, Inc., a television development and production company that he founded. Mr. Bergmann received his PhD from New York University and has served as head of a number of companies and divisions, including:

- principal of Century Media Inc, a Santa Monica, California, based direct-response advertising agency and media buying company;

- head of the television division of Major Arts, Inc.;

- president of Coast Productions, where he engineered the merger of Coast Productions, Inc., with Odyssey Entertainment, Inc., which subsequently became Odyssey Filmmakers, Inc.;

- president of The Film Company, Inc.; and

- various capacities with the American Broadcasting Company (ABC), including Executive Vice President and Special Assistant to the Chairman of the Board.

On June 9, 2004, Gregory Crane, Vice President of Marketing, resigned as an officer and director in an effort to assist the Company in recomposing management and the Board. As described under "Termination Agreements," below, we also later terminated the Executive Consulting Agreement with Mr. Crane's company, Advertising Management & Consulting Services, Inc., or AMCS.

The Company also recently concluded its relationship with MAR & Associates, Inc., or MAR, the entity that provided us with services associated with the position of Chief Financial Officer through MAR's President, David Iannini. The Company originally decided to transition MAR into an investment banking or strategic advisory role. Ultimately, however, in keeping with the goal of eliminating all related party transactions, the Board determined that this was not in the best interests of the stockholders. As described under "Termination Agreements," below, we also terminated the Executive Consulting Agreement with MAR.

On August 3, 2004, we hired W. Chris Broquist as our new Chief Financial Officer. Mr. Broquist brings 23 years of business experience including 14 years of a business banking background to YP Corp. Most recently, he served as Vice President & CFO of Gold Graphics Manufacturing Co., a medium-sized, Los Angeles-based manufacturer. Prior to Gold Graphics, Mr. Broquist held the senior financial position at Century Media Group where he was a key member of the team that successfully negotiated its acquisition to a public entity. Mr. Broquist was also with The Summit Group for five years, where he lead the Businesses Services Group, which was responsible for providing business and financial planning services as well as developing access to capital for small and medium sized businesses. He holds a BA in Business Administration with a concentration in finance from California State University, Fullerton. He completed his graduate work at The University of Washington, Pacific Coast Banking School in 1990.

On July 30, 2004, John Langdon stepped down as a director of the Company. Mr. Langdon cited the growing demands as a director of the Company resulting from the many changes we are undertaking and his inability to meet those time commitments.

As part of our continuing effort to recompose our Board of Directors, however, John T. Kurtzweil and Paul Gottlieb have been appointed as independent members of the Board. Messrs. Kurtzweil and Gottlieb have also accepted appointment to the Audit and Compensation Committees. Mr. Kurtzweil has agreed to serve as the Chairman of the Audit Committee and its qualified financial expert.

Mr. Kurtzweil brings more than 25 years of high-level corporate management background to our Board. Mr. Kurtzweil currently serves as the Senior Vice-President and Chief Financial Officer of Cirrus Logic, Inc., a publicly-held corporation that is a premier supplier of high-performance analog, mixed-signal and digital processing solutions for consumer entertainment electronics, automotive entertainment and industrial product applications. He possesses a strong financial background, including public company experience with such industry leaders as ON Semiconductor and Honeywell, Inc. Mr. Kurtzweil maintains active CPA and CMA licenses and earned his MBA from the University of St. Thomas in St. Paul, MN and his Accounting Degree from Arizona State University in Tempe, AZ.

Mr. Gottlieb is an attorney with Pomeranz, Gottlieb & Mushkin in New York City. His practice involves estate planning, tax, corporate and securities matters. Mr. Gottlieb received his undergraduate degree from Queens College of City University of New York, after which he served as a journalist in the United States Army. Upon completion of his military service, Mr. Gottlieb attended New York Law School, where he received his law degree. Mr. Gottlieb worked as a senior attorney with the Internal Revenue Service before entering private practice.

Termination Agreements

After Messrs. Tullo's and Crane's personal resignations, the Company entered into Termination Agreements with respect to (i) the termination of the Executive Consulting Agreement between the Company and Sunbelt, of which Mr. Tullo is President, and (ii) the Executive Consulting Agreement between the Company and AMCS, of which Mr. Crane is President. Each of these Termination Agreements provide for payments payable over two years in amounts that are well below the amounts that the Company otherwise would have been required to pay under the Executive Consulting Agreements. The required amounts that would have been payable under the Executive Consulting Agreement with Sunbelt and AMCS were approximately \$2.6 million and \$1.9 million, respectively. However, under the Termination Agreements, these payouts were reduced to \$960,000 and \$697,010, respectively.

Specifically, the amounts owed under the Termination Agreement with Sunbelt are payable as follows:

- a. \$150,000 upon signing of the Termination Agreement with Sunbelt;
- b. \$17,500 payable at the beginning of each month for 24 months commencing August 1, 2004;
- c. \$120,000 on October 1, 2004;
- d. \$150,000 on the one-year anniversary of the signing of the agreement; and
- e. \$120,000 no later than October 1, 2005. This payment must be made upon Sunbelt's written request at any time between the July 1, 2005 and the October 1, 2005 payment. The Company will be obligated to make such early payment so long as it retains 30 days operating capital after making the payment, which is defined as a current ratio of 1-to-1.

The amounts owed under the Termination Agreement with AMCS are payable as follows:

- a. \$130,000 upon signing of Termination Agreement with AMCS;
- b. \$10,709 payable at the beginning of each month for 24 months commencing August 1, 2004;
- c. \$110,000 on October 1, 2004;

- d. \$110,000 on the one-year anniversary of the signing of the agreement; and
- e. \$90,000 no later than October 1, 2005. This payment must be made upon AMCS' written request at any time between the July 1, 2005 and the October 1, 2005 payment. Company will be obligated to make such early payment so long as it retains 30 days operating capital after making said payment, which is defined as a current ratio of 1-to-1.

Upon a change of control or the sale of all or substantially all of the assets of the Company, all the foregoing payments to Sunbelt and AMCS will be immediately due and payable.

Additionally, pursuant to the Termination Agreements, each of Sunbelt and AMCS, and their respective officers, directors and affiliates have agreed not to compete with or solicit customers or employees of the Company for a period of six years. Finally, the Termination Agreements require Messrs. Tullo, Crane, and other officers and employees of Sunbelt and AMCS to make themselves available to the Company and our officers, directors and employees for consultation as needed.

In connection with the conclusion of our relationship with MAR, we entered into a Separation and Settlement Agreement with MAR, whereby the Executive Consulting Agreement between the Company and MAR was terminated. Under the arrangement, we will pay MAR \$120,000 in equal monthly payments over the six months commencing August 1, 2004. This amount is well below the approximately \$750,000 that would have been payable under the Executive Consulting Agreement with MAR. Despite the conclusion of our relationship with MAR, we will continue to explore various strategic alternatives, including the possible sale of the Company.

Termination of M&M Credit Facility

As of April 9, 2004, we terminated certain loan obligations that we owed to Morris & Miller, Ltd. and Mathew and Markson, Ltd., our two largest stockholders. Under this termination agreement, we made final advances to these stockholders totaling an aggregate of \$1,050,000 at an annual interest rate of 8%. The stockholders agreed to forego the final advance of \$250,000. The aggregate of all advances made by the Company to these stockholders is to be repaid to the Company at the end of three years, along with accrued interest. To date, however, we have received \$1,600,000 in negotiated accelerated repayments.

Cash Dividends

In connection with our termination of the loan obligations to Morris & Miller and Mathew and Markson, we have begun paying a \$0.01 per share dividend each quarter, subject to compliance with applicable laws. We paid the first dividend on April 30, 2004 and the second dividend on August 6, 2004.

Disclosure of M&M Beneficial Ownership

On May 27, 2004, we issued a press release disclosing the beneficial ownership of Morris & Miller and Mathew and Markson, as provided to us in sworn affidavits by Ms. Ilse Cooper, the Managing Director of these entities. Ms. Cooper also serves as the Swiss Consul to Antigua. She has recently been promoted by the Swiss Ambassador to the role of General Consul and is awaiting confirmation of that appointment from the Queen of England as Antigua is part of the Commonwealth. Specifically, it was disclosed that Ms. Cooper herself, as well as her sister, are the beneficial owners of these entities. It was further disclosed that both Ms. Cooper and her sister are cancer survivors and that any assets of Morris & Miller and Mathew and Markson remaining after their deaths will be bequeathed to the Swiss Institute for Experimental Cancer Research, a large not-profit-organization partially funded by the Swiss government.

New Credit Facility

On April 13, 2004, we entered into a one year, renewable revolving credit facility agreement with Merrill Lynch Business Financial Services, Inc. for a maximum principal amount of \$1,000,000. We may request advances under the credit facility up to the full amount of the line. Interest on outstanding advances is payable monthly in arrears at the per annum rate of the one-month LIBOR as published in The Wall Street Journal, plus 3.0%. Outstanding advances are secured by all of our existing and after-acquired tangible and intangible assets located in the United States.

We paid Merrill Lynch a \$10,000 fee in connection with the initiation of the credit facility. A \$10,000 line maintenance fee is payable to Merrill Lynch upon each annual renewal. At this time, we do not have any current plans or need to draw down any funds under the credit facility.

The credit facility requires us to maintain a "Leverage Ratio" (total liabilities to tangible net worth) that does not exceed 1.5-to-1 and a "Fixed Charge Ratio" (earnings before interest, taxes, depreciation, amortization and other non-cash charges minus any internally financed capital expenditures divided by the sum of debt service, rent under capital leases, income taxes and dividends) that is not less than 1.5-to-1 as determined quarterly on a 12-month trailing basis. The credit facility includes additional covenants governing permitted indebtedness, liens, and protection of collateral.

Stockholder Rights Plan

In May 2004, our board of directors declared a dividend distribution of one right on each outstanding share of our common stock. Each right will entitle stockholders to buy one one-thousandth of a share of our newly created Series A Junior Participating Preferred Stock at an initial exercise price of \$36.50 per one one-thousandth share.

The rights will enable our board of directors to control the terms and timing of its response if a third party makes an unsolicited bid to acquire control of the Company. The rights are designed to protect the interests of our stockholders, to ensure that all stockholders of the Company receive fair and equal treatment in the event of any proposed takeover of the Company, and to guard against partial tender offers, open market accumulations and other tactics designed to gain control of the Company without paying all stockholders a fair price. The rights accomplish these goals by creating the potential for an unacceptable level of dilution if an acquirer takes certain actions without the board of directors' approval. The bidder will therefore be more likely to negotiate with the board of directors, which has the ability to redeem the rights or exempt the bidder from the rights' dilutive effect if the bidder's proposal is acceptable to the board. The rights were not distributed in response to any specific effort to acquire the Company.

In general, the rights become exercisable if a person or group becomes an "Acquiring Person," or commences or announces a tender or exchange offer to acquire 15% or more of the outstanding Common Stock, at which time each right will entitle its holder to purchase, at the right's exercise price, a number of shares of common stock having a market value at that time of twice the right's exercise price. Rights held by an Acquiring Person will become void. In general, a person will become an Acquiring Person by acquiring 15% or more of the Company's outstanding Common Stock. Certain other shareholders that already own in excess of 15% will become an Acquiring Person if they exceed higher thresholds.

Results of Operations

Net revenue for the three-month period ended June 30, 2004, was \$16,917,361 compared to \$8,013,845 for the three-month period ended June 30, 2003, an increase of approximately 111%. For the nine-month period ended June 30, 2004, net revenue was \$47,179,181 compared to \$20,604,344 for the nine-month period ended June 30, 2003, an increase of approximately 129%. This increase in net revenue is primarily the result of two factors: (1) an increase in the number of our IAP advertisers and (2) an increase in our monthly pricing. These two factors are discussed further below

Our activated IAP advertiser count increased to approximately 320,296 at June 30, 2004 compared to approximately 235,162 at June 30, 2003, an increase of approximately 36%. Our paying IAP advertiser count increased to approximately 224,474 at June 30, 2004 compared to approximately 161,000 at June 30, 2003, an increase of approximately 39%.

Our paying subscriber base actually declined in the three month period ended June 30, 2004 from the period ended March 31, 2004. This is due in large part to the increased competition in the telephony market and the targeting by CLEC's of small and mid-sized companies (our primary market) to switch their services from the long-established LEC's to themselves. When that switch occurs the company is unable immediately bill that customer and so deducts their number as a paying subscriber while retaining them as a customer until they pay an invoice or an alternative billing method is found. To combat this the company is transferring many of these CLEC customers to alternative billing methods such as ACH billing. While subsequent to the quarters end, the company has seen a decline in CLEC conversions, the company is progressing strongly with its ACH conversion that will take at least another 90 days.

The increase in activated IAP advertisers described above equates to average monthly growth of 5,100 activated IAP advertisers for the three-month period ended June 30, 2004. This remains within our targeted net growth of 5,000 to 10,000 new activated IAP advertisers per month.

Relating to our price increases, in March 2003 we increased our monthly fees for the IAP product from \$17.95 to \$21.95 for new customers. At the same time, for existing customers, the monthly fee for the IAP product was increased to \$24.95 upon their first twelve-month anniversary of paying the \$17.95 service fee. In January 2004, we began charging new customers monthly fees of \$29.95 for the IAP product. In addition, in March 2004, the monthly fee on the IAP product for existing customers was increased to \$29.95 upon their first six-month anniversary of paying the previous fee.

Regarding our cost of services, between August 2003 and June 30, 2004, we converted approximately 45,000 direct-invoice IAP advertisers, out of an approximate target of 70,000, to telephone billing. However, in the fiscal quarter ended June 30, 2004, we continued to experience short-term dilution of our gross billings and chargebacks resulting from those direct-invoice IAP advertisers that we were unable to convert to LEC billing. Dilution is generally attributable to IAP advertiser credits and other receivable write-downs, such as unbillable telephone numbers. It does not necessarily mean that we have lost a customer. We merely seek alternative billing methods for these customers. This level of dilution has been higher in the quarter ended June 30, 2004 than in the prior quarter ended June 30, 2003 resulting in higher cost of services. During July 2004 we have seen a marked drop in this dilution as it relates to "unbills." Unbills are phone numbers, or BTNs, that due to any number of variables can not be billed to a customer's phone bill. We expect this downward trend to continue and more customers to pay us as more invoice customers are converted to ACH billing. This increase in dilution accounts for virtually all of the change in our cost of services.

Cost of services for the three-month periods ended June 30, 2004 and June 30, 2003 was \$8,195,264 and \$2,061,229, respectively, an increase of approximately 298%. Cost of services for the nine-month periods ended June 30, 2004 and June 30, 2003 was \$19,696,203 and \$5,732,345, respectively, an increase of approximately 244%.

Our cost of services as a percentage of net revenue was approximately 48% for the three months ended June 30, 2004 compared to approximately 26% for the same period in the prior fiscal year. Our cost of services as a percentage of net revenue was approximately 42% for the nine months ended June 30, 2004 compared to approximately 28% for the same period in the prior fiscal year.

As explained in greater detail above under "Executive Overview - *Accounting Policies and Procedures*," these increased costs of services resulted, primarily, from increased dilution expense, as well as increased IAP advertiser counts.

Amortization of direct marketing costs included in sales and marketing costs is \$1,336,927 for the three months ended June 30, 2004 and \$829,405 for the prior-year period. Amortization of direct marketing costs included in cost of sales is \$3,566,122 for the nine months ended June 30, 2004 and \$1,953,457 for the prior-year period.

Gross profits increased to \$8,722,097 for the three months ended June 30, 2004 from \$5,952,616 for the prior-year period, an increase of approximately 47%. Gross margins decreased to approximately 52% of net revenues in the three months ended June 30, 2004 compared to approximately 74% of net revenues in the prior-year period. Gross profits increased to \$27,482,978 for the nine months ended June 30, 2004 from \$14,771,999 for the prior-year period, an increase of approximately 86%. Gross margins decreased to approximately 58% of net revenues in the nine months ended June 30, 2004 compared to approximately 72% of net revenues in the prior-year period. The increase in our gross profits was due to increased revenues resulting from the previously mentioned increased IAP advertiser counts and price increases, offset by increased dilution discussed above.

Our general and administrative expense for the three-month periods ended June 30, 2004 and June 30, 2003 were \$3,298,624 and \$2,561,499, respectively, an increase of approximately 29%. Our general and administrative expense for the nine-month periods ended June 30, 2004 and June 30, 2003 were \$9,223,889 and \$5,603,685, respectively, an increase of approximately 65%. These general and administrative expenses increased due to an increase in employees and other expenses relating to our growth in IAP advertisers, our Quality Assurance and Outbound marketing initiatives, as well as an increase in certain officers' compensation relating to employment contracts with such officers.

As a percentage of net revenue, general and administrative expenses were approximately 20% for the three months ended June 30, 2004 compared to 32% for the same period in 2003. As a percentage of net revenue, general and administrative expenses were approximately 20% for the nine months ended June 30, 2004 compared to 27% for the same period in 2003. The reduction in general and administrative expenses as a percentage of net revenue is the result of increasing revenue associated with the leveraging of our fixed cost infrastructure over a larger IAP advertiser base. Sales and marketing expenses for the three-month periods ended June 30, 2004 and June 30, 2003 were \$1,667,040 and \$1,069,576, respectively, an increase of approximately 56%. Sales and marketing expenses for the nine-month periods ended June 30, 2004 and June 30, 2003 were \$4,385,430 and \$2,564,950, respectively, an increase of approximately 71%. The primary reason for the increase in sales and marketing is due to the re-institution of our marketing solicitation program and the implementation of new market strategies and modification of direct mail marketing pieces. Such marketing has resulted in the increase in IAP advertisers cited previously. We expect these sales and marketing costs to continue to increase as our marketing efforts increase and as we continue to roll out our branding campaign. We capitalize certain direct marketing expenses and amortize those costs over an 18-month period based on the analyzed IAP advertiser attrition rates.

As a percentage of net revenues, sales and marketing expenses were approximately 10% and 13% for the three-month periods ended June 30, 2004 and 2003, respectively. As a percentage of net revenues, sales and marketing expenses were approximately 9% and 12% for the nine-month periods ended June 30, 2004 and 2003, respectively.

Depreciation and amortization primarily relates to the amortization of our intellectual property and depreciation of equipment. Amortization relating to the capitalization of our direct mail marketing costs is included in cost of sales, as discussed previously.

Our depreciation and amortization expense was \$243,261 in the three months ended June 30, 2004 compared to \$166,523 for the three months ended June 30, 2003. Our depreciation and amortization expense was \$639,173 in the nine months ended June 30, 2004 compared to \$464,761 for the nine months ended June 30, 2003. Depreciation and amortization increased in the current periods compared to the comparable periods in 2003 due to additional purchases of equipment relating to our upgrade in infrastructure in the information technology department, hardware purchased relating to our Quality Assurance and Outbound Marketing initiatives, as well as our agreement to license the "YP.Com" Uniform Resource Locator, or URL, from OnRamp Access, Inc.

Regarding our other intellectual property, the cost of our "Yellow-Page.net" URL license was capitalized at \$5,000,000. This URL is amortized on an accelerated basis over the twenty-year term of the agreement. Amortization expense on this URL was \$79,276 and \$90,369 for the three-month periods ended June 30, 2004 and June 30, 2003, respectively. Amortization expense on this URL was \$243,276 and \$76,808 for the nine-month periods ended June 30, 2004 and June 30, 2003, respectively. As a result of the significant equipment purchases relating to the previously-mentioned infrastructure additions, depreciation expense is expected to be greater in the fourth quarter of fiscal 2004 compared to the prior-year periods. However, we do not anticipate capital expenditures to grow at the same rate in future fiscal periods compared to the prior fiscal year.

Operating income for the three-month period ended June 30, 2004 was \$3,513,172 compared to \$2,155,018 in the prior-year period, an increase of approximately 63%. Operating margins decreased to approximately 21% of net revenue from approximately 27% in the prior-year period. Operating income for the nine-month period ended June 30, 2004 was \$13,234,486 compared to \$6,238,603 in the prior-year period, an increase of approximately 112%.

Operating margins decreased to approximately 28% of net revenue from approximately 30% in the prior-year period. The increase in operating income is the result of the increased revenue discussed above. Operating margins decreased slightly due to the significant increase in our cost of services resulting from increased dilution expense, partially offset by increased revenues and the leveraging of certain fixed expenses over a larger IAP advertiser base.

Interest income, net of interest expense, for the three-month period ended June 30, 2004 was \$103,897. This compares to interest income, net of interest expense, of \$27,994 for the three months ended June 30, 2003. Interest income, net of interest expense, for the nine-month periods ended June 30, 2004 was \$253,595. This compares to interest income, net of interest expense, of \$40,783 for the nine months ended June 30, 2003. The increase in interest income, net of interest expense, primarily results from our increased average cash position resulting, in turn, from our increased profitability, as well as increased interest income resulting from the increase in advances to affiliates.

Net income before taxes for the three-month periods ended June 30, 2004 and June 30, 2003 was \$4,048,533 and \$2,352,869, respectively, an increase of approximately 72%. Pre-tax margins decreased to approximately 24% of net revenue in the current period compared to approximately 29% of net revenue in the prior-year period. Net income before taxes for the nine-month periods ended June 30, 2004 and June 30, 2003 were \$14,265,698 and \$6,679,038, respectively, an increase of approximately 114%. Pre-tax margins decreased to approximately 30% of net revenues in the current period compared to approximately 32% of net revenues in the prior-year period. The increase in pre-tax income is a result of those factors that resulted in the increase in operating income in addition to the increased interest income and other income discussed above.

The income tax provision was \$1,416,986 in the three months ended June 30, 2004 compared to \$676,039 in the prior-year period. The income tax provision was \$4,992,994 in the nine months ended June 30, 2004 compared to \$2,404,486 in the prior-year period. The increase in the income tax provision is the result of our increased profitability in current-year periods compared to the previous year periods, as well as the fact that we were able to utilize our net operating loss carry-forwards for the prior-year periods that were unavailable in the three- and nine-month periods ended June 30, 2004.

Net income for the three-month periods ended June 30, 2004 and June 30, 2003 was \$2,631,547, or \$.05 per diluted share, and \$1,676,830, or \$.04 per diluted share, respectively, an increase in net income of approximately 57%. Net income as a percentage of net revenues for the three months ended June 30, 2004 was approximately 16%, compared to approximately 21% for the same prior-year period. Net income for the nine-month periods ended June 30, 2004 and June 30, 2003 was \$9,272,704, or \$.19 per diluted share, and \$4,274,552, or \$.10 per diluted share, respectively, an increase in net income of approximately 117%. Net income as a percentage of net revenues for the nine months ended June 30, 2004 was approximately 20% compared to approximately 21% for the same prior-year period.

Liquidity And Capital Resources

Net cash provided by operating activities for the nine-month period ended June 30, 2004, was \$2,870,002 compared to \$3,513,826 for the nine-month period ended June 30, 2003. The increase in cash generated from operations is primarily due to a significant increase in net income resulting from an increase in IAP advertisers, as well as an increase in income tax payable, offset by an increase in the accounts receivable balance from such growth and funds expended for mailings related to our direct marketing efforts.

Cash used in investing activities was \$2,202,736 for the nine-month period ended June 30, 2004. The primary component of cash used in investing activities was advances to affiliates of \$2,725,000. All advances to affiliates have ceased as of April 9, 2004 and these affiliates have begun early repayment of those advances. In the nine-month period ended June 30, 2003, cash used in investing activities was \$1,544,673 which consisted primarily of purchases of equipment of \$537,912 and lower advances to affiliates of \$1,000,000.

Cash used or provided by financing activities for the nine-month period ended June 30, 2004 was \$499,983 of dividends paid, compared to cash used in financing activities of \$307,000 for the nine-month period ended June 30, 2003. The cash used in financing activities represents total payments of \$585,167 to reduce the principal balances of our outstanding debt, offset by financing of \$278,167 under our trade acceptance draft program with AcTrade Financial Technologies, Ltd., or AcTrade.

We had working capital of \$12,645,133 as of June 30, 2004, compared to \$4,684,466 as of June 30, 2003. The increase is due primarily to increases in cash to \$2,546,130, and accounts receivable to \$13,926,934 offset by increases in accrued liabilities and income taxes payable.

In the past, we had borrowed under two credit facilities. These credit facilities were maintained primarily for safety and security back-up purposes as our cash flow generally is more than sufficient to maintain and grow our business. In April 2004, we established a \$1,000,000 credit facility with Merrill Lynch Business Financial Services, Inc. This facility is for one year and is renewable. The applicable interest rate on borrowings, if any, will be a variable rate of the one-month LIBOR rate (as published in the *Wall Street Journal*), plus 3%. The facility required an annual line fee of \$10,000, payable whether or not we have drawn any funds on the line. We have terminated our previous credit facilities with the Bank of the Southwest and AcTrade Financial Technologies, Ltd. We utilized our new credit facility with Merrill Lynch and repaid the balance during the quarter ended June 30, 2004 in order to test its functioning and reporting requirements. There was no balance outstanding on June 30, 2004.

The new credit facility requires us to maintain a "Leverage Ratio" (total liabilities to tangible net worth) that does not exceed 1.5-to-1 and a "Fixed Charge Ratio" (earnings before interest, taxes, depreciation, amortization and other non-cash charges minus any internally financed capital expenditures divided by the sum of debt service, rent under capital leases, income taxes and dividends) that is not less than 1.5-to-1 as determined quarterly on a 12-month trailing basis. The credit facility includes additional covenants governing permitted indebtedness, liens, and protection of collateral.

We owed \$115,868 to Mathew & Markson Ltd. on a note related to the original acquisition of the "Yellow Page.net" URL.

As previously described, collections on accounts receivable are received primarily through the billing service aggregators under contracts to administer this billing and collection process. The billing service aggregators generally do not remit funds until they are collected. The billing companies maintain holdbacks for refunds and other uncertainties. Generally, cash is collected and remitted to us over a 60 to 120 day period subsequent to the billing dates. Under our current agreement with our primary billing service provider, PaymentOne, cash is remitted to us on a sixty day timetable.

Effective as of April 9, 2004, per the December 22, 2003 agreement, we terminated certain loan agreements whereby we were obligated to loan or advance money to Morris & Miller, Ltd. and Mathew and Markson, Ltd., our two largest stockholders, secured by Company stock held by these stockholders. Under this termination agreement, we made final advancements to these stockholders of approximately \$1,050,000. An additional final advance of \$250,000 was not paid as the stockholders decided to forego this payment. The aggregate of all advances made by the Company to these stockholders is to be repaid to the Company at the end of three years, along with accrued interest. During the quarter ended June 30, 2004, however, these stockholders began advanced repayments of those loans. The stockholders were not obligated to begin repayments until April 2007 but during this quarter they repaid \$1,600,000.

In connection with our termination of the loan obligations, we have begun paying a \$0.01 per share dividend each quarter, subject to available cash and compliance with applicable laws. The first dividend was paid on April 30, 2004 to holders of record on March 20, 2004. The second dividend of \$0.01 per common share was paid on August 6, 2004 to holders of record on June 21, 2004.

Risk Factors

An investment in our common stock involves a substantial degree of risk. Before making an investment decision, you should give careful consideration to the following risk factors in addition to the other information contained in this report. The following risk factors, however, may not reflect all of the risks associated with our business or an investment in our common stock only if you can afford to lose your entire investment.

Risks Related to Our Business

We have a relatively limited operating history upon which investors can evaluate the likelihood of our success.

We have been engaged in the Internet-based Yellow Pages industry through our subsidiary, Telco Billing, since 1997. As a result, an investor in our securities must consider the uncertainties, expenses, and difficulties frequently encountered by companies such as ours that are in the early stages of development. Investors should consider the likelihood of our future success to be highly speculative in light of our relatively limited operating history, as well as the challenges, limited resources, expenses, risks, and complications frequently encountered by similarly situated companies in the early stages of development, particularly companies in new and rapidly evolving markets such as Internet Yellow Pages. To address these risks and to sustain profitability, we must, among other things:

- maintain and increase our base of advertisers;
- increase the number of users who visit our web sites for online directory services;
- implement and successfully execute our business and marketing strategy;
- continue to develop and upgrade our technology;
- continually update and improve our service offerings and features;
- provide superior IAP advertiser service;
- respond to industry and competitive developments;
- successfully manage our growth while controlling expenses; and
- attract, retain, and motivate qualified personnel.

We may not be successful in addressing these risks. If we are unable to do so, our business, prospects, financial condition, and results of operations would be materially and adversely affected.

Our success depends upon our ability to establish and maintain relationships with our advertisers.

Our ability to generate revenue depends upon our ability to maintain relationships with our existing advertisers, to attract new advertisers to sign up for revenue-generating services, and to generate traffic to our advertisers' websites. We primarily use direct marketing efforts to attract new advertisers. These direct marketing efforts may not produce satisfactory results in the future. We attempt to maintain relationships with our advertisers through IAP advertiser service and delivery of traffic to their businesses. An inability to either attract additional advertisers to use our service or to maintain relationships with our advertisers could have a material adverse effect on our business, prospects, financial condition, and results of operations.

If we do not introduce new or enhanced offerings to our advertisers and users, we may be unable to attract and retain those advertisers and users, which would significantly impede our ability to generate revenue.

We will need to introduce new or enhanced products and services in order to attract and retain advertisers and users and remain competitive. Our industry has been characterized by rapid technological change, changes in advertiser and user requirements and preferences, and frequent new product and service introductions embodying new technologies. These changes could render our technology, systems, and website obsolete. We may experience difficulties that could delay or prevent us from introducing new products and services. If we do not periodically enhance our existing products and services, develop new technologies that address our advertisers' and users' needs and preferences, or respond to emerging technological advances and industry standards and practices on a timely and cost-effective basis, our products and services may not be attractive to advertisers and users, which would significantly impede our revenue growth. In addition, our reputation and our brand could be damaged if any new product or service introduction is not favorably received.

Our revenue may decline over time.

We have experienced a decrease in revenue from the Local Exchange Carriers (LEC) from the effects of the Competitive Local Exchange Carriers (CLEC) that are participating in providing local telephone services to IAP advertisers. We have begun to address this problem and we are implementing data filters to reduce the effects of the CLECs. We have also sought other billing methods to reduce the adverse effects of the CLEC billings. These other billing methods may be cheaper or more expensive than our current LEC billing and we have not yet determined if they will be less or more effective. We cannot provide any assurances that our efforts will be successful and may experience future decreases in revenue.

We may continue to experience dilution of LEC billable customers because of changes in the telephony industry.

We have experienced dilution of advertisers that we are able to successfully bill on their business phone bills. Because we only count revenue from customers whose billings are accepted by the Local Exchange Carriers, or LECs, or from those customers that have paid their direct invoice we can experience substantial changes in revenue when a customer's billing is not accepted by the LEC and we wait for payment of the direct billing invoice, which can take as long as 90 days or more. With the competition in the telephony industry, many business customers are finding alternative telephony suppliers, such as Competitive Local Exchange Carriers, or CLECs, that offer less expensive alternatives to the LECs. This shrinking of the LECs business affects us because we are unable to bill these customers on their phone bills. When the LECs effectuate a price increase this causes a rush of LEC customers looking for an alternative phone company, which may be a CLEC.

Our quarterly results of operations could fluctuate due to factors outside of our control, which may cause corresponding fluctuations in the price of our securities.

Our net sales may grow at a slower rate on a quarter-to-quarter basis than we have experienced in recent periods. Factors that could cause our results of operations to fluctuate in the future include the following:

- fluctuating demand for our services, which may depend on a number of factors including
 - o changes in economic conditions and our IAP advertisers' profitability,
 - o varying IAP advertiser response rates to our direct marketing efforts,
 - o our ability to complete direct mailing solicitations on a timely basis each month,
 - o changes in our direct marketing efforts,
 - o IAP advertiser refunds or cancellations, and
- o our ability to continue to bill IAP advertisers on their monthly telephone bills, ACH or credit card rather than through direct invoicing;
- timing of new service or product introductions and market acceptance of new or enhanced versions of our services or products;
- our ability to develop and implement new services and technologies in a timely fashion to meet market demand;
 - price competition or pricing changes by us or our competitors;
 - new product offerings or other actions by our competitors;
- month-to-month variations in the billing and receipt of amounts from Local Exchange Carriers (LECs), such that billing and revenues may fall into the subsequent fiscal quarter;
- the ability of our check processing service providers to continue to process and provide billing information regarding our solicitation checks;
- the amount and timing of expenditures for expansion of our operations, including the hiring of new employees, capital expenditures, and related costs;
 - technical difficulties or failures affecting our systems or the Internet in general;
 - a decline in Internet traffic at our website;

- the cost of acquiring, and the availability of, information for our database of potential advertisers; and
- the fact that our expenses are only partially based on our expectations regarding future revenue and are largely fixed in nature, particularly in the short term.

The fluctuation of our quarterly operating results, as well as other factors, could cause the market price of our securities to fluctuate significantly in the future. Some of these factors include the following:

- the announcement of new IAP advertisers or strategic alliances or the loss of significant IAP advertisers or strategic alliances;
 - announcements by our competitors;
 - sales or purchases of our securities by officers, directors and insiders;
 - government regulation;
- announcements regarding restructuring, borrowing arrangements, technological innovations, departures of key officers, directors or employees, or the introduction of new products;
 - political or economic events and governmental actions affecting Internet operations or businesses; and
- general market conditions and other factors, including factors unrelated to our operating performance or that of our competitors.

Investors in our securities should be willing to incur the risk of such price fluctuations.

Our ability to efficiently process new advertiser sign-ups and to bill our advertisers monthly depends upon our check processing service providers and billing aggregators, respectively.

We currently use three check processing companies to provide us with advertiser information at the point of sign-up for our Internet Advertising Package. One of these processors has indicated that it will be outsourcing this function in the future. Therefore, we have refrained from sending new business to this check processor. Our ability to gather information to bill our advertisers at the point of sign-up could be adversely affected if one or more of these providers experiences a disruption in its operations or ceases to do business with us.

We also depend upon our billing aggregators to efficiently bill and collect monies from the Local Exchange Carriers, or LECs, relating to the LECs' billing and collection of our monthly charges from advertisers. We currently have agreements with two billing aggregators. Any disruption in our billing aggregators' ability to perform these functions could adversely affect our financial condition and results of operations.

The loss of our ability to bill IAP advertisers through Local Exchange Carriers on the IAP advertisers' telephone bills would adversely impact our results of operations.

Our business model depends heavily upon our ability to bill advertisers on their telephone bills through their respective Local Exchange Carriers (LEC). The existence of the LECs is the result of Federal legislation. In the same manner, Congress could pass future legislation that obviates the existence of or the need for the LECs. Additionally, regulatory agencies could limit or prevent our ability to use the LECs to bill our advertisers. Finally, the introduction of and advancement of new technologies, such as WiFi technology or other wireless-related technologies, could render unnecessary the existence of fixed telecommunication lines, which also could obviate the need for and access to the LECs. Our inability to use the LECs to bill our advertisers through their monthly telephone bills would have a material adverse impact on our results of operations.

We depend upon third parties to provide certain services and software, and our business may suffer if the relationships upon which we depend fail to produce the expected benefits or are terminated.

We currently outsource to third parties certain of the services that we provide, including the work of producing usable templates for and hosting of the QuickSites, website templates known as Ezsites, and wholesale Internet access. These relationships may not provide us benefits that outweigh the costs of the relationships. If any strategic supplier demands a greater portion of revenue derived from the services it provides or increases charges for its services, we may decide to terminate or refuse to renew that relationship, even if it previously had been profitable or otherwise beneficial. If we lose a significant strategic supplier, we may be unable to replace that relationship with other strategic relationships with comparable revenue potential. The loss or termination of any strategic relationship with one of these third-party suppliers could significantly impair our ability to provide services to our advertisers and users.

We depend upon third-party software to operate certain of our services. The failure of this software to perform as expected would have a material adverse effect on our business. Additionally, although we believe that several alternative sources for this software are available, any failure to obtain and maintain the rights to use such software would have a material adverse effect on our business, prospects, financial condition, and results of operations. We also depend upon third parties to provide services that allow us to connect to the Internet with sufficient capacity and bandwidth so that our business can function properly and our websites can handle current and anticipated traffic. Any restrictions or interruption in our connection to the Internet would have a material adverse effect on our business, prospects, financial condition, and results of operations.

The market for our services is uncertain and is still evolving.

Internet Yellow Pages services are evolving rapidly and are characterized by an increasing number of market entrants. Our future revenues and profits will depend substantially upon the widespread acceptance and the use of the Internet and other online services as an effective medium of commerce by merchants and consumers. Rapid growth in the use of and interest in the Internet may not continue on a lasting basis, which may negatively impact Internet-based businesses such as ours. In addition, advertisers and users may not adopt or continue to use Internet-based Yellow Pages services and other online services that we may offer in the future. The demand and market acceptance for recently introduced services generally is subject to a high level of uncertainty.

Most potential advertisers have only limited, if any, experience advertising on the Internet and have not devoted a significant portion of their advertising expenditures to Internet advertising. Advertisers may find Internet Yellow Pages advertising to be less effective for meeting their business needs than traditional methods of Yellow Pages or other advertising and marketing. Our business, prospects, financial condition or results of operations will be materially and adversely affected if potential advertisers do not adopt Internet Yellow Pages as an important component of their advertising expenditures.

We may not be able to secure additional capital to expand our operations.

Although we currently have no material long-term needs for capital expenditures, we will likely be required to make increased capital expenditures to fund our anticipated growth of operations, infrastructure, and personnel. We currently anticipate that our cash on hand as of August 1, 2004, together with cash flows from operations, will be sufficient to meet our anticipated liquidity needs for working capital and capital expenditures over the next 12 months. In the future, however, we may seek additional capital through the issuance of debt or equity depending upon our results of operations, market conditions or unforeseen needs or opportunities. Our future liquidity and capital requirements will depend on numerous factors, including the following:

- the pace of expansion of our operations;
- our need to respond to competitive pressures; and
- future acquisitions of complementary products, technologies or businesses.

Our forecast of the period of time through which our financial resources will be adequate to support our operations is a forward-looking statement that involves risks and uncertainties and actual results could vary materially as a result of the factors described above. As we require additional capital resources, we may seek to sell additional equity or debt securities or draw on our existing bank line of credit. Debt financing must be repaid at maturity, regardless of whether or not we have sufficient cash resources available at that time to repay the debt. The sale of additional equity or convertible debt securities could result in additional dilution to existing stockholders. We cannot provide assurance that any financing arrangements will be available in amounts or on terms acceptable to us, if at all.

We must manage our growth and maintain procedures and controls on our business.

We have rapidly and significantly expanded our operations and we anticipate further significant expansion to accommodate the expected growth in our IAP advertiser base and market opportunities. We have increased the number of our personnel from the inception of our operations to the present. This expansion has placed, and is expected to continue to place, a significant strain on our management and operational resources. As a result, we may not be able to effectively manage our resources, coordinate our efforts, supervise our personnel or otherwise successfully manage our resources. We have recently added a number of key managerial, technical, and operations personnel and we expect to add additional key personnel in the future. We also plan to continue to increase our personnel base. These additional personnel may further strain our management resources.

The rapid growth of our business could in the future strain our ability to meet IAP advertiser demands and manage our IAP advertiser relationships. This could result in the loss of IAP advertisers and harm our business reputation.

In order to manage the expected growth of our operations and personnel, we must continue maintaining and improving or replacing existing operational, accounting, and information systems, procedures, and controls. Further, we must manage effectively our relationships with our IAP advertisers, as well as other third parties necessary to our business. Our business could be adversely affected if we are unable to manage growth effectively.

We depend upon our executive officers and key personnel.

Our performance depends substantially on the performance of our executive officers and other key personnel. The success of our business in the future will depend on our ability to attract, train, retain and motivate high quality personnel, especially highly qualified technical and managerial personnel. The loss of services of any executive officers or key personnel could have a material adverse effect on our business, results of operations or financial condition. We do not maintain key person life insurance on the lives of any of our executive officers or key personnel.

Competition for talented personnel is intense, and there is no assurance that we will be able to continue to attract, train, retain or motivate other highly qualified technical and managerial personnel in the future. In addition, market conditions may require us to pay higher compensation to qualified management and technical personnel than we currently anticipate. Any inability to attract and retain qualified management and technical personnel in the future could have a material adverse effect on our business, prospects, financial condition, and results of operations.

Our business is subject to a strict regulatory environment.

Existing laws and regulations and any future regulation may have a material adverse effect on our business. For example, we believe that our direct marketing programs meet or exceed existing requirements of the United States Federal Trade Commission (FTC). Any changes to FTC requirements or changes in our direct or other marketing practices, however, could result in our marketing practices failing to comply with FTC regulations. As a result, we could be subject to substantial liability in the future, including fines and criminal penalties, preclusion from offering certain products or services, and the prevention or limitation of certain marketing practices.

We face intense competition, including from companies with greater resources, which could adversely affect our growth and could lead to decreased revenues.

Several companies, including Verizon, Yahoo and Microsoft, currently market Internet Yellow Pages services that directly compete with our services and products. We may not compete effectively with existing and potential competitors for several reasons, including the following:

- some competitors have longer operating histories and greater financial and other resources than we have and are in better financial condition than we are;
- some competitors have better name recognition, as well as larger, more established, and more extensive marketing, IAP advertiser service, and IAP advertiser support capabilities than we have;
- some competitors may supply a broader range of services, enabling them to serve more or all of their IAP advertisers' needs. This could limit our sales and strengthen our competitors' existing relationships with their IAP advertisers, including our current and potential IAP advertisers;
- some competitors may be able to better adapt to changing market conditions and IAP advertiser demand; and
- barriers to entry are not significant. As a result, other companies that are not currently involved in the Internet-based Yellow Pages advertising business may enter the market or develop technology that reduces the need for our services.

Increased competitive pressure could lead to reduced market share, as well as lower prices and reduced margins for our services. If we experience reductions in our revenue for any reason, our margins may continue to decline, which would adversely affect our results of operations. We cannot assure you that we will be able to compete successfully in the future.

We may face risks as we expand our business into international markets.

We currently are exploring opportunities to offer our services in other English-speaking countries. We have limited experience in developing and marketing our services internationally, and we may not be able to successfully execute our business model in markets outside the United States. We will face a number of risks inherent in doing business in international markets, including the following:

- international markets typically experience lower levels of Internet usage and Internet advertising than the United States, which could result in lower-than-expected demand for our services;
- unexpected changes in regulatory requirements;
- potentially adverse tax consequences;
- difficulties in staffing and managing foreign operations;

changing economic conditions;

· exposure to different legal standards, particularly with respect to intellectual property and distribution of information over the Internet;

· burdens of complying with a variety of foreign laws; and

· fluctuations in currency exchange rates.

To the extent that international operations represent a significant portion of our business in the future, our business could suffer if any of these risks occur.

We may be unable to promote and maintain our brands.

We believe that establishing and maintaining the brand identities of our Internet Yellow Pages services is a critical aspect of attracting and expanding a base of advertisers and users. Promotion and enhancement of our brands will depend largely on our success in continuing to provide high quality service. If advertisers and users do not perceive our existing services to be of high quality, or if we introduce new services or enter into new business ventures that are not favorably received by advertisers and users, we will risk diluting our brand identities and decreasing their attractiveness to existing and potential IAP advertisers.

We may not be able to adequately protect our intellectual property rights.

Our success depends both on our internally developed technology and our third party technology. We rely on a variety of trademarks, service marks, and designs to promote our brand names and identity. We also rely on a combination of contractual provisions, confidentiality procedures, and trademark, copyright, trade secrecy, unfair competition, and other intellectual property laws to protect the proprietary aspects of our products and services. Legal standards relating to the validity, enforceability, and scope of the protection of certain intellectual property rights in Internet-related industries are uncertain and still evolving. The steps we take to protect our intellectual property rights may not be adequate to protect our intellectual property and may not prevent our competitors from gaining access to our intellectual property and proprietary information. In addition, we cannot provide assurance that courts will always uphold our intellectual property rights or enforce the contractual arrangements that we have entered into to protect our proprietary technology.

Third parties may infringe or misappropriate our copyrights, trademarks, service marks, trade dress, and other proprietary rights. Any such infringement or misappropriation could have a material adverse effect on our business, prospects, financial condition, and results of operations. In addition, the relationship between regulations governing domain names and laws protecting trademarks and similar proprietary rights is unclear. We may be unable to prevent third parties from acquiring domain names that are similar to, infringe upon or otherwise decrease the value of our trademarks and other proprietary rights, which may result in the dilution of the brand identity of our services.

We may decide to initiate litigation in order to enforce our intellectual property rights, to protect our trade secrets, or to determine the validity and scope of our proprietary rights. Any such litigation could result in substantial expense, may reduce our profits, and may not adequately protect our intellectual property rights. In addition, we may be exposed to future litigation by third parties based on claims that our products or services infringe their intellectual property rights. Any such claim or litigation against us, whether or not successful, could result in substantial costs and harm our reputation. In addition, such claims or litigation could force us to do one or more of the following:

- cease selling or using any of our products that incorporate the challenged intellectual property, which would adversely affect our revenue;
- obtain a license from the holder of the intellectual property right alleged to have been infringed, which license may not be available on reasonable terms, if at all; and
- redesign or, in the case of trademark claims, rename our products or services to avoid infringing the intellectual property rights of third parties, which may not be possible and in any event could be costly and time-consuming.

Even if we were to prevail, such claims or litigation could be time-consuming and expensive to prosecute or defend, and could result in the diversion of our management's time and attention. These expenses and diversion of managerial resources could have a material adverse effect on our business, prospects, financial condition, and results of operations.

Current capacity constraints may require us to expand our infrastructure and IAP advertiser support capabilities.

Our ability to provide high-quality Internet Yellow Pages services largely depends upon the efficient and uninterrupted operation of our computer and communications systems. We may be required to expand our technology, infrastructure, and IAP advertiser support capabilities in order to accommodate any significant increases in the numbers of advertisers and users of our web sites. We may not be able to project accurately the rate or timing of increases, if any, in the use of our services or expand and upgrade our systems and infrastructure to accommodate these increases in a timely manner. If we do not expand and upgrade our infrastructure in a timely manner, we could experience temporary capacity constraints that may cause unanticipated system disruptions, slower response times, and lower levels of IAP advertiser service. Our inability to upgrade and expand our infrastructure and IAP advertiser support capabilities as required could impair the reputation of our brand and our services, reduce the volume of users able to access our website, and diminish the attractiveness of our service offerings to our advertisers.

Any expansion of our infrastructure may require us to make significant upfront expenditures for servers, routers, computer equipment, and additional Internet and intranet equipment, as well as to increase bandwidth for Internet connectivity. Any such expansion or enhancement will need to be completed and integrated without system disruptions. An inability to expand our infrastructure or IAP advertiser service capabilities either internally or through third parties, if and when necessary, would materially and adversely affect our business, prospects, financial condition, and results of operations.

Risks Related to the Internet

We may not be able to adapt as the Internet, Internet Yellow Pages services, and IAP advertiser demands continue to evolve.

Our failure to respond in a timely manner to changing market conditions or client requirements could have a material adverse effect on our business, prospects, financial condition, and results of operations. The Internet, e-commerce, and the Internet Yellow Pages industry are characterized by:

- rapid technological change;

- changes in advertiser and user requirements and preferences;

- frequent new product and service introductions embodying new technologies; and

- the emergence of new industry standards and practices that could render our existing service offerings, technology, and hardware and software infrastructure obsolete.

In order to compete successfully in the future, we must

- enhance our existing services and develop new services and technology that address the increasingly sophisticated and varied needs of our prospective or current IAP advertisers;

- license, develop or acquire technologies useful in our business on a timely basis; and

- respond to technological advances and emerging industry standards and practices on a cost-effective and timely basis.

Our future success may depend on continued growth in the use of the Internet.

Because Internet Yellow Pages is a new and rapidly evolving industry, the ultimate demand and market acceptance for our services will be subject to a high level of uncertainty. Significant issues concerning the commercial use of the Internet and online service technologies, including security, reliability, cost, ease of use, and quality of service, remain unresolved and may inhibit the growth of Internet business solutions that use these technologies. In addition, the Internet or other online services could lose their viability due to delays in the development or adoption of new standards and protocols required to handle increased levels of Internet activity, or due to increased governmental regulation. Our business, prospects, financial condition, and results of operations would be materially and adversely affected if the use of Internet Yellow Pages and other online services does not continue to grow or grows more slowly than we expect.

We may be required to keep pace with rapid technological change in the Internet industry.

In order to remain competitive, we will be required continually to enhance and improve the functionality and features of our existing services, which could require us to invest significant capital. If our competitors introduce new products and services embodying new technologies, or if new industry standards and practices emerge, our existing services, technologies, and systems may become obsolete. We may not have the funds or technical know-how to upgrade our services, technology, and systems. If we face material delays in introducing new services, products, and enhancements, our advertisers and users, may forego the use of our services and select those of our competitors, in which event our business, prospects, financial condition and results of operations could be materially and adversely

affected.

Regulation of the Internet may adversely affect our business.

Due to the increasing popularity and use of the Internet and online services such as online Yellow Pages, federal, state, local, and foreign governments may adopt laws and regulations, or amend existing laws and regulations, with respect to the Internet and other online services. These laws and regulations may affect issues such as user privacy, pricing, content, taxation, copyrights, distribution, and quality of products and services. The laws governing the Internet remain largely unsettled, even in areas where legislation has been enacted. It may take years to determine whether and how existing laws, such as those governing intellectual property, privacy, libel, and taxation, apply to the Internet and Internet advertising and directory services. In addition, the growth and development of the market for electronic commerce may prompt calls for more stringent consumer protection laws, both in the United States and abroad, that may impose additional burdens on companies conducting business over the Internet. Any new legislation could hinder the growth in use of the Internet generally or in our industry and could impose additional burdens on companies conducting business online, which could, in turn, decrease the demand for our services, increase our cost of doing business, or otherwise have a material adverse effect on our business, prospects, financial condition, and results of operations.

We may not be able to obtain Internet domain names that we would like to have.

We believe that our existing Internet domain names are an extremely important part of our business. We may desire, or it may be necessary in the future, to use these or other domain names in the United States and abroad. Various Internet regulatory bodies regulate the acquisition and maintenance of domain names in the United States and other countries. These regulations are subject to change. Governing bodies may establish additional top-level domains, appoint additional domain name registrars or modify the requirements for holding domain names. As a result, we may be unable to acquire or maintain relevant domain names in all countries in which we plan to conduct business in the future.

The extent to which laws protecting trademarks and similar proprietary rights will be extended to protect domain names currently is not clear. We therefore may be unable to prevent competitors from acquiring domain names that are similar to, infringe upon or otherwise decrease the value of our domain names, trademarks, trade names, and other proprietary rights. We cannot provide assurance that potential users and advertisers will not confuse our domain names, trademarks, and trade names with other similar names and marks. If that confusion occurs, we may lose business to a competitor and some advertisers and users may have negative experiences with other companies that those advertisers and users erroneously associate with us. The inability to acquire and maintain domain names that we desire to use in our business, and the use of confusingly similar domain names by our competitors, could have a material adverse affect on our business, prospects, financial conditions, and results of operations in the future.

Our business could be negatively impacted if the security of the Internet becomes compromised.

To the extent that our activities involve the storage and transmission of proprietary information about our advertisers or users, security breaches could damage our reputation and expose us to a risk of loss or litigation and possible liability. We may be required to expend significant capital and other resources to protect against security breaches or to minimize problems caused by security breaches. Our security measures may not prevent security breaches. Our failure to prevent these security breaches or a misappropriation of proprietary information may have a material adverse effect on our business, prospects, financial condition, and results of operations.

Our technical systems could be vulnerable to online security risks, service interruptions or damage to our systems.

Our systems and operations may be vulnerable to damage or interruption from fire, floods, power loss, telecommunications failures, break-ins, sabotage, computer viruses, penetration of our network by unauthorized computer users and "hackers," natural disaster, and similar events. Preventing, alleviating, or eliminating computer viruses and other service-related or security problems may require interruptions, delays or cessation of service. We may need to expend significant resources protecting against the threat of security breaches or alleviating potential or actual service interruptions. The occurrence of such unanticipated problems or security breaches could cause material interruptions or delays in our business, loss of data, or misappropriation of proprietary or IAP advertiser-related information or could render us unable to provide services to our IAP advertisers for an indeterminate length of time. The occurrence of any or all of these events could materially and adversely affect our business, prospects, financial condition, and results of operations.

If we are sued for content distributed through, or linked to by, our website or those of our advertisers, we may be required to spend substantial resources to defend ourselves and could be required to pay monetary damages.

We aggregate and distribute third-party data and other content over the Internet. In addition, third-party websites are accessible through our website or those of our advertisers. As a result, we could be subject to legal claims for defamation, negligence, intellectual property infringement, and product or service liability. Other claims may be based on errors or false or misleading information provided on or through our website or websites of our directory licensees. Other claims may be based on links to sexually explicit websites and sexually explicit advertisements. We may need to expend substantial resources to investigate and defend these claims, regardless of whether we successfully defend against them. While we carry general business insurance, the amount of coverage we maintain may not be adequate. In addition, implementing measures to reduce our exposure to this liability may require us to spend substantial resources and limit the attractiveness of our content to users.

Risks Related to Our Securities

Stock prices of technology companies have declined precipitously at times in the past and the trading price of our common stock is likely to be volatile, which could result in substantial losses to investors.

The trading price of our common stock has risen and fallen significantly over the past twelve months and could continue to be volatile in response to factors including the following, many of which are beyond our control:

- decreased demand in the Internet services sector;
- variations in our operating results;
- announcements of technological innovations or new services by us or our competitors;
- changes in expectations of our future financial performance, including financial estimates by securities analysts and investors;
 - our failure to meet analysts' expectations;
- changes in operating and stock price performance of other technology companies similar to us;
 - conditions or trends in the technology industry;
 - additions or departures of key personnel; and
 - future sales of our common stock.

Domestic and international stock markets often experience significant price and volume fluctuations that are unrelated to the operating performance of companies with securities trading in those markets. These fluctuations, as well as political events, terrorist attacks, threatened or actual war, and general economic conditions unrelated to our performance, may adversely affect the price of our common stock. In the past, securities holders of other companies often have initiated securities class action litigation against those companies following periods of volatility in the market price of those companies' securities. If the market price of our stock fluctuates and our stockholders initiate this type of litigation, we could incur substantial costs and experience a diversion of our management's attention and resources, regardless of the outcome. This could materially and adversely affect our business, prospects, financial condition, and results of operations.

Certain provisions of Nevada law and in our charter may prevent or delay a change of control of our company.

We are subject to the Nevada anti-takeover laws regulating corporate takeovers. These anti-takeover laws prevent Nevada corporations from engaging in a merger, consolidation, sales of its stock or assets, and certain other transactions with any stockholder, including all affiliates and associates of the stockholder, who owns 10% or more of the corporation's outstanding voting stock, for three years following the date that the stockholder acquired 10% or more of the corporation's voting stock except in certain situations. In addition, our amended and restated articles of incorporation and bylaws include a number of provisions that may deter or impede hostile takeovers or changes of control or management. These provisions include the following:

- our board is classified into three classes of directors as nearly equal in size as possible, with staggered three year-terms;
 - the authority of our board to issue up to 5,000,000 shares of serial preferred stock and to determine the price, rights, preferences, and privileges of these shares, without stockholder approval;
- all stockholder actions must be effected at a duly called meeting of stockholders and not by written consent unless such action or proposal is first approved by our board of directors;
- special meetings of the stockholders may be called only by the Chairman of the Board, the Chief Executive Officer, or the President of our company; and
 - cumulative voting is not allowed in the election of our directors.

These provisions of Nevada law and our articles and bylaws could prohibit or delay mergers or other takeover or change of control of our company and may discourage attempts by other companies to acquire us, even if such a transaction would be beneficial to our stockholders.

Our common stock may be subject to the "penny stock" rules as promulgated under the Exchange Act.

In the event that no exclusion from the definition of "penny stock" under the Exchange Act is available, then any broker engaging in a transaction in our common stock will be required to provide its customers with a risk disclosure document, disclosure of market quotations, if any, disclosure of the compensation of the broker-dealer and its sales person in the transaction, and monthly account statements showing the market values of our securities held in the customer's accounts. The bid and offer quotation and compensation information must be provided prior to effecting the transaction and must be contained on the customer's confirmation of sale. Certain brokers are less willing to engage in transactions involving "penny stocks" as a result of the additional disclosure requirements described above, which may make it more difficult for holders of our common stock to dispose of their shares.

ITEM 6. EXHIBITS AND REPORTS ON FORM 8-K UPDATE

(a) The following exhibits are attached hereto.

Exhibit Number Description

| | |
|------|--|
| 4.1 | Shareholder Rights Agreement, dated as of May 6, 2004, between the Registrant and Registrar and Transfer Company |
| 4.2 | Amendment No. 1 to Shareholder Rights Agreement, dated as of May 31, 2004, between the Registrant and Registrar and Transfer Company |
| 10.1 | Loan and Security Agreement, dated April 13, 2004, between the Registrant and Merrill Lynch Business Financial Services, Inc. |
| 31 | Certifications pursuant to SEC Release No. 33-8238, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 |
| 32 | Certifications pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 |

(b) The Registrant filed the following Current Reports on Form 8-K during the three-month period covered by this Quarterly Report:

-On May 18, 2004, the Company filed a Current Report on Form 8-K attaching a press release announcing that its Board of Directors had adopted a Stockholders Rights Plan.

SIGNATURES

In accordance with Section 13 or 15(d) of the Exchange Act, the registrant caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

YP.CORP.

Dated: December 29, 2004

/s/ Peter J. Bergman

Peter J. Bergmann, Chairman of the Board
Chief Executive Officer (Principal Executive Officer and
Acting Principal Financial Officer)
