SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549
FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended July 2, 2017
TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____
Commission File Number 1-13699

RAYTHEON COMPANY
(Exact name of Registrant as Specified in its Charter)

Delaware 95-1778500
(State or Other Jurisdiction of Incorporation or Organization) (I.R.S. Employer Identification No.)
870 Winter Street, Waltham, Massachusetts 02451
(Address of Principal Executive Offices) (Zip Code)
(781) 522-3000
(Registrant’s telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company
Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Number of shares of common stock outstanding as of July 24, 2017 was 290,249,000.

Cautionary Note Regarding Forward-Looking Statements

This Form 10-Q contains forward-looking statements within the meaning of federal securities laws, including information regarding our financial outlook, future plans, objectives, business prospects, trends and anticipated financial performance, including with respect to our liquidity and capital resources; our capital expenditures; our bookings and backlog; our expected tax payments; our pension expense and funding; the impact of new accounting pronouncements; our unrecognized tax benefits; our expectations regarding customer contracts; our international sales; our recognition of revenue on certain performance obligations; the impact of acquisitions, investments and other business arrangements and the tax deductibility of goodwill; the impact and outcome of audits and legal and administrative proceedings, claims, investigations and commitments and contingencies; and the impact of changes in foreign currency rates. You can identify these statements by the fact that they include words such as “will”, “believe”, “anticipate”, “expect”, “estimate”, “intend”, “plan”, or variations of these words, or similar expressions. These forward-looking statements are not statements of historical facts and represent only our current expectations regarding such matters. These statements inherently involve a wide range of known and unknown uncertainties. Our actual actions and results could differ materially from what is expressed or implied by these statements. Specific factors that could cause such a difference include, but are not limited to, those set forth under Item 1A. “Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2016 and other important factors disclosed previously and from time to time in our other filings with the Securities and Exchange Commission. Given these factors, as well as other variables that may affect our operating results, you should not rely on forward-looking statements, assume that past financial performance will be a reliable indicator of future performance, or use historical trends to anticipate results or trends in future periods. We expressly disclaim any obligation or intention to provide updates to the forward-looking statements and the estimates and assumptions associated with them, except as required by law.

RAYTHEON COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Note 1: Basis of Presentation

We prepared the accompanying unaudited consolidated financial statements of Raytheon Company and all wholly-owned, majority-owned or otherwise controlled subsidiaries on the same basis as our annual audited financial statements. We condensed or omitted certain information and footnote disclosures normally included in our annual audited financial statements, which we prepared in accordance with U.S. Generally Accepted Accounting Principles (GAAP). Our quarterly financial statements should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2016. As used in this report, the terms “we”, “us”, “our”, “Raytheon” and the “Company” mean Raytheon Company and its subsidiaries, unless the context indicates another meaning.

In the opinion of management, our financial statements reflect all adjustments, which are of a normal recurring nature, necessary for presentation of financial statements for interim periods in accordance with U.S. GAAP and with the instructions to Form 10-Q in Article 10 of Securities and Exchange Commission Regulation S-X. The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions about future events that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of our financial statements and the reported amounts of revenue and expenses during the reporting periods. Actual results could differ from those estimates, and any such differences may be material to our financial statements.

As previously announced, effective January 1, 2017, we elected to early adopt the requirements of Accounting Standards Update (ASU) 2014-09, Revenue from Contracts with Customers (Topic 606) using the full retrospective method as discussed below in "Note 2: Accounting Standards". All amounts and disclosures set forth in this Form 10-Q reflect these changes.

Note 2: Accounting Standards

In May 2014, the Financial Accounting Standards Board (FASB) issued ASU 2014-09, Revenue from Contracts with Customers (Topic 606), which replaces numerous requirements in U.S. GAAP, including industry-specific requirements, and provides companies with a single revenue recognition model for recognizing revenue from contracts with customers. The core principle of the new standard is that a company should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. The two permitted transition methods under the new standard are the full retrospective method, in which case the standard would be applied to each prior reporting period presented and the cumulative effect of applying the standard would be recognized at the earliest period shown, or the modified retrospective method, in which case the cumulative effect of applying the standard would be recognized at the date of initial application. In July 2015, the FASB approved the deferral of the new standard's effective date by one year. The new standard is effective for annual reporting periods beginning after December 15, 2017. The FASB permits companies to adopt the new standard early, but not before the original effective date of annual reporting periods beginning after December 15, 2016.

Table of Contents

Effective January 1, 2017, we elected to early adopt the requirements of Topic 606 using the full retrospective method. The impact to our fiscal quarters and year-ended 2016 and year-ended 2015 income from continuing operations after taxes, net income and basic and diluted earnings per share (EPS) was as follows:

(In millions, except per share amounts)	Three Months Ended				Twelve Months Ended	
	Dec 31, 2016	Oct 2, 2016	Jul 3, 2016	Apr 3, 2016	Dec 31, 2016	Dec 31, 2015
Income from continuing operations after taxes	\$12	\$18	\$9	\$	-\$39	\$40
Net income	12	18	9	—	39	40
Basic EPS attributable to Raytheon Company common stockholders:						
Income from continuing operations after taxes	\$0.04	\$0.05	\$0.02	\$	-\$0.10	\$0.12
Net income	0.04	0.05	0.02	—	0.11	0.11
Diluted EPS attributable to Raytheon Company common stockholders:						
Income from continuing operations after taxes	\$0.03	\$0.05	\$0.03	\$	-\$0.11	\$0.12
Net income	0.04	0.05	0.03	—	0.11	0.11

In addition, the cumulative impact to our retained earnings at January 1, 2015 was \$13 million.

In August 2016, the FASB issued ASU 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments. This ASU is intended to reduce diversity in practice in how certain transactions are classified in the statement of cash flows by providing guidance on eight specific cash flow issues, including requirements that cash payments for debt prepayment or debt extinguishment costs be classified as cash outflows for financing activities and proceeds from the settlement of corporate-owned life insurance policies be classified as cash inflows from investing activities. The provisions of ASU 2016-15 are effective for years beginning after December 15, 2017, with early adoption permitted. We elected to early adopt the requirements of the new standard in the first quarter of 2017 using the retrospective transition method, as required by the new standard. The adoption of this ASU had an immaterial impact to our consolidated statements of cash flows.

In November 2016, the FASB issued ASU 2016-18, Statement of Cash Flows (Topic 230): Restricted Cash, which requires that restricted cash be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts shown on the statement of cash flows. The provisions of ASU 2016-18 are effective for years beginning after December 15, 2017, with early adoption permitted. We elected to early adopt the requirements of the new standard in the first quarter of 2017 using the retrospective transition method, as required by the new standard. The adoption of this ASU had an immaterial impact to our consolidated statements of cash flows.

The following table provides a reconciliation of cash and cash equivalents, and restricted cash reported within the consolidated balance sheets that sum to the total of such amounts in the consolidated statements of cash flows:

(In millions)	Jul 2, 2017	Dec 31, 2016
Cash and cash equivalents	\$2,167	\$3,303
Restricted cash	8	—
Cash, cash equivalents and restricted cash shown in the consolidated statements of cash flows	\$2,175	\$3,303

In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842), which requires lessees to recognize a right-of-use asset and lease liability for most lease arrangements. The new standard is effective for annual reporting periods beginning after December 15, 2018 with early adoption permitted, and must be adopted using the modified

retrospective approach. We are currently evaluating the potential changes from this ASU to our future financial reporting and disclosures. We expect the standard to have an impact of approximately \$1 billion on our assets and liabilities for the addition of right-of-use assets and lease liabilities, but we do not expect it to have a material impact to our results of operations or liquidity.

In March 2017, the FASB issued ASU 2017-07, Compensation - Retirement Benefits (Topic 715), which changes certain presentation and disclosure requirements for employers that sponsor defined benefit pension and other postretirement benefit (PRB) plans.

Table of Contents

This requires the service cost component of the net benefit cost to be in the same line item as other compensation in operating income and the other components of net benefit cost to be presented outside of operating income on a retrospective basis. In addition, only the service cost component will be eligible for capitalization when applicable, on a prospective basis. The provisions of ASU 2017-07 are effective for years beginning after December 15, 2017. We are currently evaluating the potential changes from this ASU to our future financial reporting and disclosures. We expect the standard to increase 2016 and 2017 operating income due to the removal of the non-service component of Financial Accounting Standards (FAS) pension expense by \$601 million and an estimated \$800 million, respectively, and to decrease non-operating income by the same amount with zero impact to net income in both periods. We do not expect a material impact from the new requirement to only allow capitalization of the service cost component of net benefit cost.

Other new pronouncements issued but not effective until after July 2, 2017 are not expected to have a material impact on our financial position, results of operations or liquidity.

Note 3: Significant Accounting Policies Update

Our significant accounting policies are detailed in "Note 1: Summary of Significant Accounting Policies" of our Annual Report on Form 10-K for the year ended December 31, 2016. Significant changes to our accounting policies as a result of adopting Topic 606 are discussed below:

Revenue Recognition—The vast majority of our revenues are from long-term contracts associated with the design, development, manufacture or modification of complex aerospace or defense equipment or related services. These contracts primarily are with the U.S. government (including foreign military sales contracted through the U.S. government). Our contracts with the U.S. government typically are subject to the Federal Acquisition Regulation (FAR) and are priced based on estimated or actual costs of producing goods or providing services. The FAR provides guidance on the types of costs that are allowable in establishing prices for goods and services provided under U.S. government contracts. The pricing for non-U.S. government contracts is based on the specific negotiations with each customer.

Under the typical payment terms of our U.S. government fixed-price contracts, the customer pays us either performance-based payments (PBPs) or progress payments. PBPs are interim payments up to 90% of the contract price based on quantifiable measures of performance or on the achievement of specified events or milestones. Progress payments are interim payments up to 80% of costs incurred as the work progresses. Because the customer retains a small portion of the contract price until completion of the contract, our U.S. government fixed-price contracts generally result in revenue recognized in excess of billings which we present as contract assets on the balance sheet. Amounts billed and due from our customers are classified as receivables on the balance sheet. The portion of the payments retained by the customer until final contract settlement is not considered a significant financing component because the intent is to protect the customer. For our U.S. government cost-type contracts, the customer generally pays us for our actual costs incurred within a short period of time. For non-U.S. government contracts, we typically receive interim payments as work progresses, although for some contracts, we may be entitled to receive an advance payment. We recognize a liability for these advance payments in excess of revenue recognized and present it as contract liabilities on the balance sheet. The advance payment typically is not considered a significant financing component because it is used to meet working capital demands that can be higher in the early stages of a contract and to protect us from the other party failing to adequately complete some or all of its obligations under the contract.

To determine the proper revenue recognition method for contracts for complex aerospace or defense equipment or related services, we evaluate whether two or more contracts should be combined and accounted for as one single contract and whether the combined or single contract should be accounted for as more than one performance obligation. This evaluation requires significant judgment and the decision to combine a group of contracts or separate the combined or single contract into multiple performance obligations could change the amount of revenue and profit

recorded in a given period. For most of our contracts, the customer contracts with us to provide a significant service of integrating a complex set of tasks and components into a single project or capability (even if that single project results in the delivery of multiple units). Hence, the entire contract is accounted for as one performance obligation. Less commonly, however, we may promise to provide distinct goods or services within a contract in which case we separate the contract into more than one performance obligation. If a contract is separated into more than one performance obligation, we allocate the total transaction price to each performance obligation in an amount based on the estimated relative standalone selling prices of the promised goods or services underlying each performance obligation. We infrequently sell standard products with observable standalone sales. In cases where we do, the observable standalone sales are used to determine the standalone selling price. More frequently, we sell a customized customer specific solution, and in these cases we typically use the expected cost plus a margin approach to estimate the standalone selling price of each performance obligation.

We account for a contract when it has approval and commitment from both parties, the rights of the parties are identified, payment terms are identified, the contract has commercial substance and collectability of consideration is probable. For certain contracts that meet the foregoing requirements, primarily international direct commercial sale contracts, we recognize revenue before

Table of Contents

obtaining all regulatory approvals where receipt of those regulatory approvals is virtually certain based upon all known facts and circumstances.

We generally recognize revenue over time as we perform because of continuous transfer of control to the customer. For U.S. government contracts, this continuous transfer of control to the customer is supported by clauses in the contract that allow the customer to unilaterally terminate the contract for convenience, pay us for costs incurred plus a reasonable profit and take control of any work in process. Similarly, for non-U.S. government contracts, the customer typically controls the work in process as evidenced either by contractual termination clauses or by our rights to payment for work performed to date plus a reasonable profit to deliver products or services that do not have an alternative use to the Company.

Because of control transferring over time, revenue is recognized based on the extent of progress towards completion of the performance obligation. The selection of the method to measure progress towards completion requires judgment and is based on the nature of the products or services to be provided. We generally use the cost-to-cost measure of progress for our contracts because it best depicts the transfer of control to the customer which occurs as we incur costs on our contracts. Under the cost-to-cost measure of progress, the extent of progress towards completion is measured based on the ratio of costs incurred to date to the total estimated costs at completion of the performance obligation. Revenues, including estimated fees or profits, are recorded proportionally as costs are incurred. Costs to fulfill include labor, materials and subcontractors' costs, other direct costs and an allocation of indirect costs including pension and any other postretirement benefit (PRB) expense under U.S. government Cost Accounting Standards (CAS).

Due to the nature of the work required to be performed on many of our performance obligations, the estimation of total revenue and cost at completion (the process described below in more detail) is complex, subject to many variables and requires significant judgment. It is common for our long-term contracts to contain award fees, incentive fees, or other provisions that can either increase or decrease the transaction price. These variable amounts generally are awarded upon achievement of certain performance metrics, program milestones or cost targets and can be based upon customer discretion. We estimate variable consideration at the most likely amount to which we expect to be entitled. We include estimated amounts in the transaction price to the extent it is probable that a significant reversal of cumulative revenue recognized will not occur when the uncertainty associated with the variable consideration is resolved. Our estimates of variable consideration and determination of whether to include estimated amounts in the transaction price are based largely on an assessment of our anticipated performance and all information (historical, current and forecasted) that is reasonably available to us.

Contracts are often modified to account for changes in contract specifications and requirements. We consider contract modifications to exist when the modification either creates new or changes the existing enforceable rights and obligations. Most of our contract modifications are for goods or services that are not distinct from the existing contract due to the significant integration service provided in the context of the contract and are accounted for as if they were part of that existing contract. The effect of a contract modification on the transaction price and our measure of progress for the performance obligation to which it relates, is recognized as an adjustment to revenue (either as an increase in or a reduction of revenue) on a cumulative catch-up basis.

We have a companywide standard and disciplined quarterly Estimate at Completion (EAC) process in which management reviews the progress and execution of our performance obligations. As part of this process, management reviews information including, but not limited to, any outstanding key contract matters, progress towards completion and the related program schedule, identified risks and opportunities and the related changes in estimates of revenues and costs. The risks and opportunities include management's judgment about the ability and cost to achieve the schedule (e.g., the number and type of milestone events), technical requirements (e.g., a newly-developed product versus a mature product) and other contract requirements. Management must make assumptions and estimates regarding labor productivity and availability, the complexity of the work to be performed, the availability of materials,

the length of time to complete the performance obligation (e.g., to estimate increases in wages and prices for materials and related support cost allocations), execution by our subcontractors, the availability and timing of funding from our customer and overhead cost rates, among other variables. These estimates also include the estimated cost of satisfying our industrial cooperation agreements, sometimes referred to as offset obligations, required under certain contracts.

Based on this analysis, any quarterly adjustments to net sales, cost of sales, and the related impact to operating income are recognized as necessary in the period they become known. These adjustments may result from positive program performance, and may result in an increase in operating income during the performance of individual performance obligations, if we determine we will be successful in mitigating risks surrounding the technical, schedule and cost aspects of those performance obligations or realizing related opportunities. Likewise, these adjustments may result in a decrease in operating income if we determine we will not be successful in mitigating these risks or realizing related opportunities. Changes in estimates of net sales, cost of sales and the related impact to operating income are recognized quarterly on a cumulative catch-up basis, which recognizes in the current period the cumulative effect of the changes on current and prior periods based on a performance obligation's percentage of completion. A significant change in one or more of these estimates could affect the profitability of one or more of our performance obligations.

Table of Contents

When estimates of total costs to be incurred exceed total estimates of revenue to be earned, on a performance obligation related to complex aerospace or defense equipment or related services, or product maintenance or separately priced extended warranty, a provision for the entire loss on the performance obligation is recognized in the period the loss is recorded.

Net EAC adjustments had the following impact on our operating results:

	Three Months Ended		Six Months Ended	
(In millions, except per share amounts)	Jul 2, 2017	Jul 3, 2016	Jul 2, 2017	Jul 3, 2016
Operating income	\$112	\$134	\$166	\$155
Income from continuing operations attributable to Raytheon Company	73	87	108	112
Diluted EPS from continuing operations attributable to Raytheon Company	\$0.25	\$0.29	\$0.37	\$0.38

In addition, net revenue recognized from our performance obligations satisfied in previous periods was \$139 million and \$147 million in the second quarters of 2017 and 2016, respectively, and \$214 million and \$192 million in the first six months of 2017 and 2016, respectively. This primarily relates to EAC adjustments that impacted revenue.

We also sell security software through our Forcepoint™ segment. For the majority of these arrangements, we recognize revenue over the term of the agreement because the software requires continuous updates to provide the intended security functionality. To a lesser extent in all of our business segments, we enter into other types of contracts including service arrangements and non-subscription software and licensing agreements. We recognize revenue for these arrangements over time or at a point in time depending on our evaluation of when the customer obtains control of the promised goods or services. For software arrangements that include multiple performance obligations, including hardware, perpetual software licenses, subscriptions, term licenses and maintenance and/or services, we allocate revenue to each performance obligation based on estimates of the price that we would charge the customer for each promised product or service if it were sold on a standalone basis.

Receivables, Net—Receivables, net, include amounts billed and currently due from customers. The amounts due are stated at their net estimated realizable value. We maintain an allowance for doubtful accounts to provide for the estimated amount of receivables that will not be collected. The allowance is based upon an assessment of customer creditworthiness, historical payment experience, the age of outstanding receivables and collateral to the extent applicable.

Contract Assets—Contract assets include unbilled amounts typically resulting from sales under long-term contracts when the cost-to-cost method of revenue recognition is utilized and revenue recognized exceeds the amount billed to the customer, and right to payment is not just subject to the passage of time. Amounts may not exceed their net realizable value. Contract assets are generally classified as current.

Deferred Commissions—Our incremental direct costs of obtaining a contract, which consist of sales commissions primarily for our security software sales at Forcepoint, are deferred and amortized over the period of contract performance or a longer period, generally the estimated life of the customer relationship, if renewals are expected and the renewal commission is not commensurate with the initial commission. We classify deferred commissions as current or noncurrent based on the timing of when we expect to recognize the expense. The current and noncurrent portions of deferred commissions are included in prepaid expenses and other current assets and other assets, net, respectively, in our consolidated balance sheets. At both July 2, 2017 and December 31, 2016, we had \$32 million of deferred commissions. We had \$5 million and \$3 million of amortization expense related to deferred commissions in the second quarters of 2017 and 2016, respectively, and \$10 million and \$5 million in the first six months of 2017 and

2016, respectively.

Contract Liabilities—Our contract liabilities consist of advance payments and billings in excess of revenue recognized and deferred revenue. We may also receive up-front payments related to software license sales primarily for Forcepoint, which in most cases we recognize ratably over the license term. Our contract assets and liabilities are reported in a net position on a contract-by-contract basis at the end of each reporting period. We classify advance payments and billings in excess of revenue recognized as current, and deferred revenue as current or noncurrent based on the timing of when we expect to recognize revenue. The noncurrent portion of deferred revenue is included in accrued retiree benefits and other long-term liabilities in our consolidated balance sheets.

In order to determine revenue recognized in the period from contract liabilities, we first allocate revenue to the individual contract liability balance outstanding at the beginning of the period until the revenue exceeds that balance.

13

Table of Contents

Remaining Performance Obligations—Remaining performance obligations represents the transaction price of firm orders for which work has not been performed and excludes unexercised contract options and potential orders under ordering-type contracts (e.g., indefinite-delivery, indefinite-quantity (IDIQ)). As of July 2, 2017, the aggregate amount of the transaction price allocated to remaining performance obligations was \$36 billion. The Company expects to recognize revenue on approximately half and three-quarters of the remaining performance obligations over the next 12 and 24 months, respectively, with the remainder recognized thereafter.

Note 4: Earnings Per Share (EPS)

We compute basic and diluted EPS using actual income from continuing operations attributable to Raytheon Company common stockholders, income (loss) from discontinued operations attributable to Raytheon Company common stockholders, net income attributable to Raytheon Company and our actual weighted-average shares outstanding rather than the numbers presented within our unaudited consolidated financial statements, which are rounded to the nearest million. As a result, it may not be possible to recalculate EPS as presented in our unaudited consolidated financial statements. Furthermore, it may not be possible to recalculate EPS attributable to Raytheon Company common stockholders by adjusting EPS from continuing operations by EPS from discontinued operations.

We include all unvested stock awards that contain non-forfeitable rights to dividends or dividend equivalents, whether paid or unpaid, in the number of shares outstanding in our basic EPS calculation as they are considered participating securities. As a result, we have included all of our outstanding unvested restricted stock awards (RSAs), as well as restricted stock units (RSUs) and Long-term Performance Plan (LTPP) awards that meet the retirement eligible criteria in our calculation of basic EPS. We disclose EPS for common stock and unvested stock-based payment awards, and separately disclose distributed and undistributed earnings. Distributed earnings represent common stock dividends and dividends earned on unvested RSAs and stock-based payment awards of retirement eligible employees. Undistributed earnings represent earnings that were available for distribution but were not distributed. Common stock and unvested stock-based payment awards earn dividends equally.

As described in "Note 8: Forcepoint Joint Venture", we record redeemable noncontrolling interest related to Vista Equity Partners' interest in Forcepoint. We reflect the redemption value adjustments for redeemable noncontrolling interest in both the basic and diluted EPS calculation for the portion of redemption value that is in excess of the fair value of noncontrolling interest.

EPS from continuing operations attributable to Raytheon Company common stockholders and unvested stock-based payment awards was as follows:

	Three Months Ended		Six Months Ended	
	Jul 2, 2017	Jul 3, 2016	Jul 2, 2017	Jul 3, 2016
Basic EPS attributable to Raytheon Company common stockholders:				
Distributed earnings	\$0.80	\$0.73	\$1.59	\$1.46
Undistributed earnings	1.10	1.68	2.03	2.38
Total	\$1.90	\$2.41	\$3.62	\$3.84
Diluted EPS attributable to Raytheon Company common stockholders:				
Distributed earnings	\$0.79	\$0.73	\$1.59	\$1.46
Undistributed earnings	1.10	1.68	2.03	2.37
Total	\$1.89	\$2.41	\$3.62	\$3.83

Basic and diluted EPS from discontinued operations attributable to Raytheon Company common stockholders and unvested stock-based payment awards was a loss of less than \$0.01 in the second quarters of 2017 and 2016, and

earnings of \$0.01 and earnings of less than \$0.01 in the first six months of 2017 and 2016, respectively.

Table of Contents

Income attributable to participating securities was as follows:

(In millions)	Three Months Ended		Six Months Ended	
	Jul 2, 2017	Jul 3, 2016	Jul 2, 2017	Jul 3, 2016
Income from continuing operations attributable to participating securities	\$ 6	\$ 9	\$ 13	\$ 17
Income (loss) from discontinued operations, net of tax attributable to participating securities ⁽¹⁾	—	—	—	—
Net income attributable to participating securities	\$ 6	\$ 9	\$ 13	\$ 17

Income (loss) from discontinued operations, net of tax attributable to participating securities was a loss of less than (1)\$1 million in the second quarters of 2017 and 2016, and income of less than \$1 million in the first six months of 2017 and 2016.

The weighted-average shares outstanding for basic and diluted EPS were as follows:

(In millions)	Three Months Ended		Six Months Ended	
	Jul 2, 2017	Jul 3, 2016	Jul 2, 2017	Jul 3, 2016
Shares for basic EPS ⁽¹⁾	291.7	297.3	292.1	298.2
Dilutive effect of LTPP and RSUs	0.3	0.3	0.3	0.4
Shares for diluted EPS	292.0	297.6	292.4	298.6

⁽¹⁾ Includes 3.3 million and 3.8 million participating securities in the second quarters of 2017 and 2016, respectively, and 3.7 million and 4.3 million participating securities in the first six months of 2017 and 2016, respectively.

Note 5: Inventories

Inventories consisted of the following:

(In millions)	Jul 2, 2017	Dec 31, 2016
Materials and purchased parts	\$ 67	\$ 66
Work in process	500	532
Finished goods	14	10
Total	\$ 581	\$ 608

Precontract costs are costs incurred to fulfill a contract prior to contract award. Precontract costs, including general and administrative expenses that are specifically chargeable to the customer, are deferred in inventories if we determine that the costs are probable of recovery under a specific anticipated contract. All other precontract costs, including start-up costs, are expensed as incurred. Costs that are deferred are recognized as contract costs upon the receipt of the anticipated contract. We included deferred precontract costs of \$170 million and \$189 million in inventories as work in process at July 2, 2017 and December 31, 2016, respectively.

Note 6: Contract Assets and Contract Liabilities

Our contract assets consist of unbilled amounts typically resulting from sales under long-term contracts when the cost-to-cost method of revenue recognition is utilized and revenue recognized exceeds the amount billed to the customer. Our contract liabilities consist of advance payments and billings in excess of costs incurred and deferred revenue. The noncurrent portion of deferred revenue is included in accrued retiree benefits and other long-term liabilities in our consolidated balance sheets.

Net contract assets (liabilities) consisted of the following:

(In millions, except percentages)	Jul 2, 2017	Dec 31, 2016	\$ change	% change
Contract assets	\$5,728	\$5,041	\$ 687	14 %
Contract liabilities—current	(2,704)	(2,646)	(58)	2 %
Contract liabilities—noncurrent	(113)	(128)	15	(12)%
Net contract assets (liabilities)	\$2,911	\$2,267	\$ 644	28 %

The \$644 million increase in our net contract assets (liabilities) from December 31, 2016 to July 2, 2017 was due to a \$687 million increase in our contract assets, primarily due to timing of payments on certain international programs.

Table of Contents

In the second quarter and first six months of 2017, we recognized revenue of \$340 million and \$952 million, respectively, related to our contract liabilities at January 1, 2017. In the second quarter and first six months of 2016, we recognized revenue of \$312 million and \$958 million, respectively, related to our contract liabilities at January 1, 2016.

Impairment losses recognized on our receivables and contract assets were de minimis in the second quarters and first six months of 2017 and 2016.

Note 7: Acquisitions and Goodwill

In pursuing our business strategies, we acquire and make investments in certain businesses that meet strategic and financial criteria.

In February 2017, our Forcepoint business acquired the Skyfence cloud access security broker business for \$39 million in cash, net of cash received, and exclusive of retention payments. Vista Equity Partners contributed 19.7% of the purchase price, which is reflected in contribution from noncontrolling interest in Forcepoint in our consolidated statements of cash flows. Skyfence solutions help companies to determine which cloud applications are in use by employees, analyze content in real-time to prevent malicious or unauthorized leakage and quickly identifies and blocks cyber-attacks. Skyfence will be integrated into our Forcepoint business to expand and enhance Forcepoint's strategy to deliver cybersecurity systems that help customers understand people's behaviors and intent as they interact with data and intellectual property wherever it may reside, including in the fast-growing cloud. In connection with this acquisition, we recorded \$35 million of goodwill, primarily related to expected synergies from combining operations and the value of the existing workforce, all of which is expected to be deductible for tax purposes, and \$5 million of intangible assets, primarily related to technology, with a weighted-average life of six years. We completed the purchase price allocation process in the second quarter of 2017.

Pro forma financial information and revenue from the date of acquisition has not been provided for this acquisition as it is not material.

A rollforward of goodwill by segment was as follows:

(In millions)	Integrated Defense Systems	Intelligence, Information and Services	Missile Systems	Space and Airborne Systems	Forcepoint ⁽¹⁾	Total
Balance at December 31, 2016	\$ 1,702	\$ 2,966	\$ 4,154	\$ 4,106	\$ 1,860	\$14,788
Acquisitions	—	—	—	—	35	35
Effect of foreign exchange rates and other	3	1	—	—	—	4
Balance at July 2, 2017	\$ 1,705	\$ 2,967	\$ 4,154	\$ 4,106	\$ 1,895	\$14,827

At July 2, 2017, Forcepoint's fair value is estimated to exceed its net book value by approximately \$410 million. As (1)discussed in "Note 8: Forcepoint Joint Venture", we are required to determine Forcepoint's fair value on a quarterly basis due to the accounting related to the redeemable noncontrolling interest.

Note 8: Forcepoint Joint Venture

In May 2015, we created Forcepoint, a new cybersecurity joint venture company (with Vista Equity Partners), through a series of transactions by which we acquired Websense from Vista Equity Partners and combined it with Raytheon Cyber Products, formerly part of our Intelligence, Information and Services (IIS) segment. We then sold 19.7% of the equity interest in the combined company to Vista Equity Partners for \$343 million.

The joint venture agreement between Raytheon and Vista Equity Partners provides Vista Equity Partners with certain rights to require Forcepoint to pursue an initial public offering at any time after four years and three months following

the closing date of May 29, 2015, or pursue a sale of the company at any time after five years following the closing date. In either of these events, Raytheon has the option to purchase all (but not less than all) of Vista Equity Partners' interest in Forcepoint for cash at a price equal to fair value as determined under the joint venture agreement. Additionally, Vista Equity Partners has the ability to liquidate its ownership through a put option, which became exercisable on May 29, 2017. The put option allows Vista Equity Partners to require Raytheon to purchase all (but not less than all) of Vista Equity Partners' interest in Forcepoint for cash at a price equal to fair value as determined under the joint venture agreement. Lastly, at any time on or after three years following the closing date, Raytheon has the option to purchase all (but not less than all) of Vista Equity Partners' interest in Forcepoint at a price equal to fair value as determined under the joint venture agreement. The joint venture agreement provides for the process under which the parties would determine the fair value of the interest and could result in a payment by Raytheon shortly after the exercise of the put option; however, the ultimate timing will depend on the actions of the parties and other factors. The estimate of fair value for purposes of presenting the redeemable noncontrolling interest in our consolidated balance sheets could differ from the parties' determination of fair value for the put option under the joint venture agreement.

Table of Contents

Vista Equity Partners' interest in Forcepoint is presented as redeemable noncontrolling interest, outside of stockholders' equity, in our consolidated balance sheets. The redeemable noncontrolling interest is recognized at the greater of the estimated redemption value as of the balance sheet date, which was \$349 million at July 2, 2017, or the carrying value, defined as the initial value adjusted for Vista Equity Partners' share of the cumulative impact of net income (loss), other changes in accumulated other comprehensive income (loss) and additional contributions, which was \$321 million at July 2, 2017. Adjustments to the redemption value over the period from the date of acquisition to the date the redemption feature becomes puttable are immediately recorded to retained earnings.

A rollforward of redeemable noncontrolling interest was as follows:

(In millions)	Six Months Ended	
	Jul 2, 2017	Jul 3, 2016
Beginning balance	\$449	\$355
Net income (loss)	(12)	(13)
Other comprehensive income (loss), net of tax ⁽¹⁾	1	—
Contribution from noncontrolling interest	8	11
Adjustment of noncontrolling interest to redemption value	(97)	(10)
Ending balance	\$349	\$343

(1) Other comprehensive income (loss), net of tax, was a loss of less than \$1 million in the first six months of 2016.

Note 9: Derivatives and Other Financial Instruments

Derivatives—Our primary market exposures are to foreign exchange rates and interest rates, and we use certain derivative financial instruments to help manage these exposures. We execute these instruments with financial institutions that we judge to be credit-worthy, and the majority of our foreign currency forward contracts are denominated in currencies of major industrial countries. We do not hold or issue derivative financial instruments for trading or speculative purposes.

The fair value of asset derivatives included in other assets, net and liability derivatives included in other current liabilities in our consolidated balance sheets related to foreign currency contracts were \$40 million and \$25 million, respectively, at July 2, 2017 and \$53 million and \$48 million, respectively, at December 31, 2016. The fair values of these derivatives are Level 2 in the fair value hierarchy at July 2, 2017 and December 31, 2016 because they are determined based on a market approach utilizing externally quoted forward rates for similar contracts.

We use foreign currency forward contracts to fix the functional currency value of specific commitments, payments and receipts. The aggregate notional amount of the outstanding foreign currency forward contracts was \$1,097 million and \$1,277 million at July 2, 2017 and December 31, 2016, respectively. The net notional exposure of these contracts was approximately \$197 million and \$342 million at July 2, 2017 and December 31, 2016, respectively.

Our foreign currency forward contracts contain offset or netting provisions to mitigate credit risk in the event of counterparty default, including payment default and cross default. At July 2, 2017 and December 31, 2016, the fair value of our counterparty default exposure was less than \$1 million and spread across numerous highly rated counterparties.

There were no interest rate swaps outstanding at July 2, 2017 and December 31, 2016.

Other Financial Instruments—We invest in marketable securities in accordance with our short-term investment policy and cash management strategy. These marketable securities are classified as available-for-sale and are recorded at fair value as short-term investments in our consolidated balance sheets. These investments are deemed Level 2 assets

under the fair value hierarchy at July 2, 2017 and December 31, 2016, as their fair value is determined under a market approach using valuation models that utilize observable inputs, including maturity date, issue date, settlement date and current rates. At July 2, 2017 and December 31, 2016, we had short-term investments of \$410 million and \$100 million, respectively, consisting of highly rated bank certificates of deposit with a minimum long-term debt rating of A or A2 and a minimum short-term debt rating of A-1 and P-1. As of July 2, 2017, our short-term investments had an average maturity of approximately one month. The amortized cost of these securities closely approximated their fair value at July 2, 2017 and December 31, 2016. There were no securities deemed to have other than temporary declines in value in the second quarter of 2017. In the second quarter and first six months of 2017, we recorded unrealized gains on short-term investments of less than \$1 million, net of tax, in accumulated other comprehensive loss (AOCL). In the second quarter and first six months of 2016, we recorded unrealized losses on short-term investments of less than \$1 million, net of tax, in AOCL, and unrealized gains on short-term investments of less than \$1 million, net of tax, in AOCL, respectively. We did not have any sales of short-term investments in the second quarters and first six months of 2017 and 2016. For purposes of computing realized gains and losses on available-for-sale securities, we determine cost on a specific identification basis.

Table of Contents

In addition to the financial instruments discussed above, we hold other financial instruments, including cash and cash equivalents, notes receivable, commercial paper and long-term debt. The carrying amounts for cash and cash equivalents, notes receivable and commercial paper approximated their fair values. The carrying value of long-term debt was recorded at amortized cost. The estimated fair value of long-term debt was determined based on quoted prices in inactive markets, which falls within Level 2 of the fair value hierarchy. The carrying value and estimated fair value of long-term debt were as follows:

(In millions)	Jul 2, 2017	Dec 31, 2016
Carrying value of long-term debt	\$4,747	\$5,335
Fair value of long-term debt	5,288	5,848

In addition, we did not have any transfers of assets or liabilities between levels of the fair value hierarchy during the first six months of 2017.

In the second quarter of 2017, we received net proceeds of \$300 million from the issuance of short-term commercial paper and we exercised our call rights to repurchase, at prices based on fixed spreads to the U.S. Treasury rates, \$591 million of our long-term debt due March and December 2018 at a loss of \$39 million pretax, \$25 million after tax, which is included in other (income) expense, net. The commercial paper notes outstanding have original maturities of not more than 90 days from the date of issuance. At July 2, 2017, short-term commercial paper borrowings outstanding were \$300 million, which had a weighted average interest rate and original maturity period of 1.221% and 25 days, respectively. At December 31, 2016, there were no commercial paper borrowings outstanding.

Note 10: Commitments and Contingencies

Environmental Matters—We are involved in various stages of investigation and cleanup related to remediation of various environmental sites. Our estimate of the liability of total environmental remediation costs includes the use of a discount rate and takes into account that a portion of these costs is eligible for future recovery through the pricing of our products and services to the U.S. government. We consider such recovery probable based on government contracting regulations and our long history of receiving reimbursement for such costs, and accordingly have recorded the estimated future recovery of these costs from the U.S. government within prepaid expenses and other current assets, in our consolidated balance sheets. Our estimates regarding remediation costs to be incurred were as follows:

(In millions, except percentages)	Jul 2, 2017	Dec 31, 2016
Total remediation costs—undiscounted	\$210	\$219
Weighted average discount rate	5.2 %	5.2 %
Total remediation costs—discounted	\$146	\$147
Recoverable portion	95	92

We also lease certain government-owned properties and generally are not liable for remediation of preexisting environmental contamination at these sites. As a result, we generally do not provide for these costs in our consolidated financial statements.

Due to the complexity of environmental laws and regulations, the varying costs and effectiveness of alternative cleanup methods and technologies, the uncertainty of insurance coverage and the unresolved extent of our responsibility, it is difficult to determine the ultimate outcome of environmental matters. However, we do not expect any additional liability to have a material adverse effect on our financial position, results of operations or liquidity.

Financing Arrangements and Other—We issue guarantees, and banks and surety companies issue, on our behalf, letters of credit and surety bonds to meet various bid, performance, warranty, retention and advance payment obligations of us or our affiliates. These instruments expire on various dates through 2025. Additional guarantees of project

performance for which there is no stated value also remain outstanding. The stated values outstanding consisted of the following:

(In millions)	Jul 2, 2017	Dec 31, 2016
Guarantees	\$ 208	\$ 190
Letters of credit	2,560	2,345
Surety bonds	127	127

Included in guarantees and letters of credit described above were \$208 million and \$45 million, respectively, at July 2, 2017, and \$180 million and \$44 million, respectively, at December 31, 2016, related to our joint venture in Thales-Raytheon Systems Co. Ltd. (TRS). As previously disclosed in our Form 10-K for the year ended December 31, 2016, the joint venture agreement for the

Table of Contents

TRS joint venture was amended and restated in 2016, reducing the scope of the joint venture to Thales-Raytheon Systems Air and Missile Defense Command and Control S.A.S. (TRS AMDC2) only. We provide these guarantees and letters of credit to TRS AMDC2 and other affiliates to assist these entities in obtaining financing on more favorable terms, making bids on contracts and performing their contractual obligations. While we expect these entities to satisfy their loans and meet their project performance and other contractual obligations, their failure to do so may result in a future obligation to us. We periodically evaluate the risk of TRS AMDC2 and other affiliates failing to meet their obligations described above. At July 2, 2017, we believe the risk that TRS AMDC2 and other affiliates will not be able to meet their obligations is minimal for the foreseeable future based on their current financial condition. All obligations were current at July 2, 2017. We had an estimated liability of \$3 million at July 2, 2017 and December 31, 2016 related to these guarantees and letters of credit.

As discussed in "Note 8: Forcepoint Joint Venture", under the joint venture agreement between Raytheon Company and Vista Equity Partners, Raytheon may be required to purchase Vista Equity Partners' interest in Forcepoint.

We have entered into industrial cooperation agreements, sometimes referred to as offset agreements, as a condition to obtaining orders for our products and services from certain customers in foreign countries. At July 2, 2017, the aggregate amount of our offset agreements, both agreed to and anticipated to be agreed to, had an outstanding notional value of approximately \$8.8 billion. These agreements are designed to return economic value to the foreign country by requiring us to engage in activities
