## Edgar Filing: NOVARTIS AG - Form 6-K

1 lc Local currencies

All product names appearing in italics are trademarks of Novartis Group Companies

Unless otherwise stated, growth rates are in USD and comments refer to full-year 2004 figures

*Group net sales up 14% (+9% lc) with both Pharmaceuticals and Consumer Health growing at double-digit rates in US dollars*

*Pharmaceuticals continues to gain market share, net sales rise 15% (+10% lc)*

## Edgar Filing: NOVARTIS AG - Form 6-K

*Consumer Health net sales advance 10% (+5% lc) as OTC, Medical Nutrition and Animal Health gain market share and offset slower net sales growth in Sandoz, affected by comparison to strong 2003*

*Operating income climbs 11% due to robust business expansion*

*Net income up 15% based on strong operating performance*

*Earnings per share rises 16% in USD, proposed 2004 dividend per share increases to CHF 1.05*

**Basel, January 20, 2005** Commenting on the full-year results published today, Dr. Daniel Vasella, Chairman and CEO of Novartis, said, "Our innovation-focused strategy of bringing novel medicines to patients and the expertise and commitment of our associates delivered another record year of sustained, above-market growth. Pharmaceuticals, led by our innovative and fast-growing cancer and cardiovascular franchises, posted a double-digit rise in sales and operating income, with market share expanding globally. We have continued to enhance R&D productivity, resulting in a pipeline ranked as one of the most valuable in the industry. Despite challenging industry conditions, our outlook for 2005 remains strong, and we expect to deliver again a competitive performance with record sales and strong earnings."

### **Net sales**

#### **Group net sales up 14% to USD 28.2 billion**

Net sales rose 14% (+9% in local currencies, or lc) to USD 28.2 billion as strong results were recorded in both Pharmaceuticals and Consumer Health, where OTC and Medical Nutrition offset lower net sales growth in the Sandoz generics business. Volume increases were the primary driver, contributing eight percentage points to net sales growth. Currency benefits added five percentage points, while acquisitions added one percentage point and price increases across the Group were insignificant (<1%). Pharmaceuticals accounted for 65% of total Group net sales and Consumer Health 35%. Geographically, the US accounted for 40% of total Group net sales, Europe 36% and other regions for 24%.

#### **Pharmaceuticals net sales rise 15% to USD 18.5 billion**

The Pharmaceuticals Division, bolstered by the five blockbusters *Diovan*, *Gleevec/Glivec*, *Lamisil*, *Zometa* and *Neoral*, reported a net sales increase of 15% (+10% lc) amid outstanding performances from top-selling prescription drugs in both the Primary Care and Specialty Medicines portfolios and above-average growth in several key markets. Most therapeutic areas expanded at double-digit rates in US dollars. Volume expansion contributed 10 percentage points, while currency benefits added five percentage points. Price changes had little impact.

Total net sales of strategic franchise products (Pharmaceutical sales excluding mature products) rose 21% (+16% lc) to USD 15.4 billion as seven of the top ten drugs delivered robust double-digit sales increases. Primary Care (excluding Mature Products) reported a net sales increase of 21% (+17% lc), led by the strong cardiovascular franchise (+21%, +17% lc), with the ongoing growth of the antihypertensive medicines *Diovan*, the No. 1 angiotensin receptor blocker (ARB) and No. 2 branded antihypertensive worldwide that exceeded USD 3 billion in yearly sales, and *Lotrel*, the No. 1 branded US combination high blood pressure treatment. Net sales in Specialty Medicines, which includes our activities in Oncology, Transplantation & Immunology, and Ophthalmics, rose 22% (+15% lc) and accounted for 33% of Pharmaceuticals net sales versus 31% in 2003. The Oncology franchise reported a 28% (+22% lc) advance, ranking as one of the fastest-growing businesses in its sector. The key oncology drugs *Gleevec/Glivec*, *Zometa* and *Femara* delivered dynamic growth as new data were presented during 2004 that continued to demonstrate benefits to patients. Mature products reported a 7% decline (-12% lc) in net sales to USD 3.1 billion.

All regions performed well despite challenging market conditions. The US reported a 12% net sales increase. In Europe, net sales rose 19% (+8% lc), while net sales were up 16% (+8% lc) in Japan and 18% (+18% lc) in Latin America. Net sales in many of these regions outpaced local market average growth rates. Novartis increased its share of the global health-care market to 4.5% for the first 11 months of 2004, up from 4.42% in the year-ago period, according to IMS Health, which reported a 6.6% increase in worldwide pharmaceutical sales for the same period in 2004.

### Consumer Health net sales up 10% to USD 9.8 billion

Net sales rose 10% (+5% lc) to USD 9.8 billion as a double-digit net sales expansion in US dollars in OTC, Animal Health and Medical Nutrition offset slower growth in Sandoz, Infant & Baby and CIBA Vision. Volume expansion overall in Consumer Health contributed two percentage points to growth, while currencies added five percentage points and acquisitions three percentage points. Price increases, on average, were insignificant. Sandoz net sales rose 5% (-1% lc) to USD 3.0 billion following an exceptionally strong 2003 performance driven by the launch of the antibiotic *AmoxC* in the US. Competitive pricing pressures also emerged during 2004, especially in the US and Germany. Strong performances from key strategic brands led to higher net sales in OTC, while Animal Health net sales were supported by double-digit growth in the companion animal franchise. Medical Nutrition net sales rose particularly fast following the successful completion of the Mead Johnson acquisition in February 2004. Infant & Baby net sales outpaced industry growth. CIBA Vision net sales advanced due to growth of the *Dailies*® and *Night&Day* contact lenses.

	Q4 2004		Q4 2003		Change in %
	USD m	% of net sales	USD m	% of net sales	
Pharmaceuticals	1 251	25.2	1 174	26.8	7
Consumer Health	184	7.1	330	14.0	-44
Corporate income & expense, net	99		102		-3
<b>Total</b>	<b>1 534</b>	<b>20.2</b>	<b>1 606</b>	<b>23.9</b>	<b>-4</b>

### Group operating income up 11% to USD 6.5 billion

Operating income advanced 11%, supported by strong volume expansion of leading Pharmaceutical products. Most categories of functional expenses had a positive impact on the operating margin. Cost of Goods Sold (COGS) rose 12%, but declined as a percentage of net sales by 0.2 percentage points to 23.5%, owing mainly to efficiency gains and better product mix in Pharmaceuticals. Marketing & Sales fell 0.2 percentage points to 31.4% of net sales based primarily on sales-force productivity improvements, while Research & Development rose by 12% to USD 4.2 billion, but declined 0.2 percentage points to 14.9% of net sales following fewer upfront development costs. General & Administrative expenses also rose at a slower pace than net sales, accounting for 5.5% of net sales. The

Group operating margin, however, fell 0.6 percentage points to 23.1% from 23.7% in 2003 based mainly on one-time charges in Sandoz, Medical Nutrition and Animal Health that led to higher Other Expenses.

**Pharmaceuticals operating income climbs 19% to USD 5.3 billion**

In Pharmaceuticals, operating income expanded significantly faster than net sales, rising 19% to USD 5.3 billion. This resulted in a margin expansion of 0.8 percentage points to 28.4% of net sales from 27.6% in 2003. An improvement of 0.8 percentage points in Cost of Goods Sold (COGS) as a percentage of net sales, mainly from productivity gains and improved product mix, was an important contributor. Marketing & Sales expenses as a percentage of net sales fell 0.2 percentage points to 33.0% of net sales based in part on sales-force productivity improvements, particularly in the US. Research & Development expenses rose 13% on investments in the Novartis Institutes for BioMedical Research (NIBR) and late-stage clinical trial programs. However, R&D expenses declined 0.4 percentage points to 18.8% of net sales as fewer upfront development costs were paid compared to 2003. Other Operating Expenses increased 56% as a result of several factors, including a decline of USD 171 million in hedging gains and lower income from product divestments compared to 2003, which included a one-time gain of USD 178 million from the sale of the *Fioricet/Fiorinal* product line. General & Administrative costs fell to 3.5% of net sales from 3.6% in 2003.

**Consumer Health operating income declines 11% to USD 1.2 billion**

Operating income declined 11% to USD 1.2 billion despite strong expansion in OTC, Animal Health and CIBA Vision. One-off charges of USD 120 million were recorded, which included USD 37 million in restructuring charges and related impairments on property, plant & equipment at Sandoz, a one-time inventory write-down of USD 18 million in Animal Health, one-time costs of USD 14 million associated with the acquisition of Mead Johnson and the creation of a USD 51 million provision in Medical Nutrition to cover legal liabilities related to an investigation by the US Department of Justice in the US enteral pump market. Novartis Nutrition Corporation is currently in the process of negotiating a possible settlement of that portion of the investigation directed against it. Excluding these one-off items, operating income would have declined 1% to USD 1.3 billion and the operating margin would have been 13.3% of net sales compared to 14.9% in 2003.

**Group net income up 15% to USD 5.8 billion**

Net income grew 15% to USD 5.8 billion in 2004 from USD 5.0 billion in 2003. As a percentage of net sales, net income rose to 20.4% compared to 20.2% in the year-ago period based on the strong improvement in operating income.

**Group outlook (barring any unforeseen events)**

Novartis expects to gain further market share in 2005 and remain one of the fastest-growing pharmaceutical companies, delivering high single-digit net sales growth for the Group and Pharmaceuticals in local currencies.

In 2005, Novartis anticipates to expense share-based compensation. Barring any unforeseen events, Group operating and net income should reach new record levels on a comparable basis.

## Pharmaceutical business and key product highlights

(Note: All net sales percentage figures refer to full-year 2004 results)

### Primary Care

**Diovan** (+28%; +22% lc; +20% US) maintained a strong growth rate in 2004 in the US and worldwide with sales exceeding USD 3 billion, reaffirming its position as the world's leading angiotensin receptor blocker (ARB) and one of the fastest-growing branded hypertension medicines. In the US, *Diovan* reached 2.6% of the US broad antihypertension market segment and 38.5% of the ARB therapeutic category (IMS Health data as of December 2004), which is expected to remain one of the most dynamic pharmaceutical categories in the coming years. Net sales growth has been driven primarily by data from recent successful outcome trials, the global rollout of more effective doses and the recent launch of a Novartis-sponsored hypertension awareness program in the US. Novartis recently received an approvable letter from the US Food and Drug Administration (FDA) for *Diovan* to treat high-risk heart attack patients, an indication already approved in 27 countries, including the UK. Approval is pending further discussions with the FDA.

**Lotrel** (+18% US), the No. 1 US fixed combination treatment for hypertension, delivered double-digit net sales growth in 2004 amid an increased focus on the efficacy of antihypertension agents in the US. *Lotrel* has expanded its position as the No. 1 branded combination therapy, a position held since 2002, based on greater awareness of the need for patients to achieve lower blood pressure goals set by national guidelines. *Lotrel*, which is sold only in the US, also benefited from the US hypertension awareness program.

**Lamisil** (+19%; +14% lc; +23% US), the leading treatment worldwide for fungal nail infections, achieved net sales of more than USD 1 billion for the first time after extending its US market segment leadership position to a high of 72% (IMS Health data as of November 2004). Higher disease awareness in the US and in leading European markets were key growth drivers.

**Elidel** (+49%; +47% lc; +36% US), the world's No. 1 branded prescription agent for eczema, outperformed the market segment growth (+54% *Elidel* vs. 7.8% IMS top 16 countries as of October 2004) to deliver excellent net sales. In 2004, the influential UK National Institute for Clinical Excellence (NICE) recommended the use of *Elidel*, which is now available in approximately 90 countries worldwide, for treating appropriate cases of eczema.

**Zelnorm/Zelmac** (+81%; +80% lc +89% US), a breakthrough therapy for irritable bowel syndrome (IBS) with constipation (IBS-C) and the first and only prescription medicine for chronic idiopathic constipation, reached USD 299 million in net sales. A key driver has been increasing patient and physician awareness of the availability of a medicine to treat these diseases effectively. Results of the ZENSAA study published in 2004 showed the treatment to be highly effective as a repeat treatment for women with IBS and additionally demonstrated dramatic improvements in important quality of life measures. This study was the basis for resubmission in the European Union in October 2004, with a decision expected in 2005. The US Food and Drug Administration (FDA) granted approval in August 2004 for the additional indication of treating chronic idiopathic constipation in both men and women under age 65.

### Specialty Medicines

#### Oncology

**Gleevec/Glivec** (+45%; +36% lc; +23% US), for all stages of Philadelphia-chromosome positive (Ph+) chronic myeloid leukemia (CML) and certain forms of gastro-intestinal stromal tumors (GIST), continued to grow dynamically amid further penetration of both the CML and GIST markets as well as continued increases in the average daily dose. New data presented at the American Society of

Hematology meeting in December demonstrated that most newly diagnosed patients with Ph+ CML receiving 400 mg daily maintained their response to therapy long term. A separate study found patients receiving 800 mg daily had better outcomes compared to patients receiving 400 mg daily. In addition, encouraging data on the use of *Gleevec/Glivec* in the treatment of Ph+ acute lymphoblastic leukemia (ALL) and glioblastoma multiforme (GBM) were presented at major medical meetings in the fourth quarter. The *Glivec* International Patient Assistance Program is now open in 71 countries, and the combined *Gleevec/Glivec* patient assistance programs are providing treatments to more than 10,000 patients worldwide who otherwise would not have access to this innovative therapy.

*Zometa* (+21%; +17% lc; +10% US), the top intravenous bisphosphonate for bone metastases, achieved blockbuster status in 2004 by continuing to post solid growth despite challenges related to US Medicare reimbursement policy and increasing competition as well as high penetration rates in breast cancer and myeloma. *Zometa* continued to make progress on increasing the use of intravenous (IV) bisphosphonates in the treatment of prostate and lung cancer patients, two of the most common forms of cancer worldwide.

*Femara* (+70%; +62% lc; +137% US), a leading therapy for early and advanced breast cancer in postmenopausal women, generated high double-digit growth in 2004. *Femara* has now been approved in 20 countries, including the US, for a new indication as the only post-tamoxifen treatment for early breast cancer based on the landmark MA-17 study, which showed *Femara* significantly increases a woman's chance of staying cancer-free following five years of adjuvant (post-surgery) tamoxifen therapy. Important new data from the BIG 1-98 study comparing *Femara* with tamoxifen during the first five years following breast cancer surgery are planned to be presented on January 26, 2005, at the Primary Therapy of Early Breast Cancer conference in St. Gallen, Switzerland.

#### **Ophthalmics**

Net sales rose 25% (+19% lc) based on a continued strong performance from *Visudyne* (+25%; +20% lc; +15% US), the world's leading treatment for "wet" AMD (age-related macular degeneration), the leading cause of blindness in people over age 50 in developed countries. Improved US Medicare reimbursement for additional lesion types supported US sales growth, while sales in Europe remained strong.

#### **Transplantation**

Sales rose 1% (-5% lc) as the *Neoral/Sandimmune* franchise (-1%; -7% lc; -17% US) maintained relatively flat net sales worldwide amid market share gains in the US liver transplant segment and despite an overall slow erosion by generic competition in the US and some other key markets. *Myfortic*, an immunosuppressant used in kidney transplant patients, was launched in over 40 countries, including the US, and continued to gain market share. *Certican*, a novel proliferation signal inhibitor, received European Union Mutual Recognition Procedure review from 10 new EU accession countries and was approved in Australia. Novartis celebrated its 20 years of experience in transplantation in 2004 at the International Society of Transplantation meeting in Vienna.

#### **Corporate**

##### **Corporate income & expense, net**

Net corporate income totaled USD 105 million in 2004 compared to income of USD 146 million in 2003, primarily the result of lower pension income.

### **Financial income, net**

Despite the ongoing low-yield environment, net financial income was USD 227 million compared to USD 379 million in 2003. The overall return on net liquidity was 3.4% compared to 5.2% in the year-ago period.

### **Result from associated companies**

Income from associated companies increased to USD 142 million from an expense of USD 200 million in 2003. The Group's 42.5% interest in Chiron (at December 31, 2004) contributed pre-tax income of USD 33 million compared to USD 134 million in 2003. The reduction was a result of manufacturing production issues at a Chiron site in the United Kingdom that prevented Chiron from delivering flu vaccines to the US for the 2004/2005 flu season. An interest of just under one-third of the Roche voting shares, which represents a 6.3% interest in the total equity of Roche, generated pre-tax income of USD 97 million following a pre-tax loss of USD 354 million in 2003 as Roche's results improved significantly. The pre-tax income for 2004 reflects an estimate of the Group's share of Roche's 2004 pre-tax income, which is USD 399 million (including a positive prior-year adjustment of USD 30 million), reduced by a goodwill and intangible amortization charge of USD 302 million arising from the allocation of the purchase price to property, plant & equipment, intangible assets and goodwill. Any differences between the estimates for 2004 pre-tax income from Roche and Chiron and actual results will be adjusted in 2005.

### **Strong balance sheet**

Novartis debt continues to be rated by Standard & Poor's and Moody's as AAA and Aaa for long-term maturities and A1+ and P1 for short-term debt, respectively, making the Group one of the few non-financial companies worldwide to have attained the highest rating from these two benchmark rating agencies.

Total long-term assets increased by USD 2.8 billion, principally due to the acquisition of Sabex Inc. and the adult medical nutrition business of Mead Johnson as well as translation effects. The Group's equity increased by USD 3.4 billion during 2004 to USD 33.8 billion at December 31, 2004, as a result of net income (USD 5.8 billion), positive translation adjustments (USD 1.1 billion), valuation differences on marketable securities, cash-flow hedges and other items (USD 0.4 billion), which were offset by the acquisition of treasury shares (USD 1.9 billion) and the dividend payment (USD 2.0 billion). Total financial debts increased by USD 0.9 billion. The valuation differences on available-for-sale marketable securities and deferred cash-flow hedges increased to unrealized gains of USD 377 million at December 31, 2004 from unrealized gains of USD 81 million at December 31, 2003. The year-end debt/equity ratio stabilized at 0.20:1, the same level as in 2003.

In August 2004, Novartis announced the completion of the third share-repurchase program and the start of a fourth program to repurchase shares via a second trading line on the SWX Swiss Exchange. To complete the third program, a total of 22.8 million shares were repurchased in 2004 for USD 1.0 billion. Since the start of the fourth program, a total of 15.2 million shares have been repurchased for USD 0.8 billion. Overall in 2004, a total of 41 million shares were repurchased for USD 1.9 billion. The Novartis Board of Directors intends to ask shareholders at the Annual General Meeting on March 1, 2005, to approve the retirement of the shares bought through the repurchase programs via the second trading line.

### **Cash flow**

Cash flow from operating activities increased by USD 73 million (+1%) to USD 6.7 billion. Depreciation, amortization and impairment charges remained at approximately the 2003 level of USD 1.4 billion, while current tax payments rose USD 241 million compared to the previous year.

## **Dividend**

The Board of Directors proposes a dividend payment of CHF 1.05 per share for 2004, up from CHF 1.00 in 2003 for approval at the next Annual General Meeting on March 1, 2005. This dividend increase, which represents a 16% rise in USD (translated at year-end USD/CHF exchange rates 2004 vs. 2003), marks the eighth consecutive increase in the dividend payment per share since the creation of Novartis in December 1996. If shareholders approve the 2004 dividend proposal, dividends paid out on the outstanding shares are expected to total approximately USD 2.2 billion compared to USD 2.0 billion in 2003, resulting in a payout ratio of 39% of Group net income, unchanged from 2003. Based on the 2004 year-end share price of CHF 57.30, the Novartis dividend yield would be 1.8%, the same as in 2003. The payment date for the 2004 dividend has been set for March 4, 2005. All issued shares are dividend bearing, with the exception of 291 million Treasury shares.

## **Disclaimer**

This release contains certain forward-looking statements relating to the Group's business, which can be identified by the use of forward-looking terminology such as "anticipate", "outlook", "expect", "should", "planned", "will be", "intends to", or similar expressions, or express or implied discussions regarding potential future sales of new or existing products, potential new products or potential new indications for existing products, or by other discussions of strategy, plans or intentions. Such statements reflect the current views of the Group with respect to future events and are subject to certain risks, uncertainties and assumptions. There can be no guarantee that any products will reach any particular sales levels, or that any new products will be approved for sale in any market, or that any new indications will be approved for existing products in any market. In particular, management's expectations could be affected by, among other things, new clinical data; unexpected clinical trial results; unexpected regulatory actions or delays or government regulation generally; the Group's ability to obtain or maintain patent or other proprietary intellectual property protection; competition in general; government, industry, and general public pricing pressures and other risks and factors referred to in the Group's current Form 20-F on file with the US Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein as anticipated, believed, estimated or expected. Novartis is providing the information in this press release as of this date and does not undertake any obligation to update any forward-looking statements contained in this press release as a result of new information, future events or otherwise.

*An advance version of our Annual Report is available on our website at [www.novartis.com](http://www.novartis.com). The final version of the Annual Report will be posted on our website and available to shareholders as of March 1, 2005.*

## **About Novartis**

Novartis AG (NYSE: NVS) is a world leader in pharmaceuticals and consumer health. In 2004, the Group's businesses achieved sales of USD 28.2 billion and net income of USD 5.8 billion. The Group invested approximately USD 4.2 billion in R&D. Headquartered in Basel, Switzerland, Novartis Group companies employ about 81,400 people and operate in over 140 countries around the world.

**Notes to the financial report for the year ended December 31, 2004**

**1. Basis of preparation**

This financial report has been prepared in accordance with the accounting policies set out in the 2004 Annual Report.

**2. Changes in the scope of consolidation and other significant transactions**

The following significant transactions were made during 2004 and in 2003:

**2004**

**Pharmaceuticals**

On July 21, Idenix completed an Initial Public Offering (IPO) of its shares. Novartis retained its existing stake at 57%. As a result, Group liquidity increased by USD 60 million.

**Sandoz**

On June 30, Novartis acquired the Danish generics company Durascan A/S from AstraZeneca plc. Goodwill of USD 23 million has been recorded on this transaction.

On August 13, Novartis completed the acquisition of Sabex Holdings Ltd., a Canadian generic manufacturer with a leading position in generic injectables, for USD 565 million in cash. Based on a preliminary estimate, goodwill of USD 329 million has been recorded on this transaction.

A total of USD 61 million in net sales were recorded since the closure of these two transactions in 2004.

**Medical Nutrition**

On February 13, Novartis completed the acquisition of Mead Johnson & Company's global adult medical nutrition business for USD 385 million in cash. These activities are included in the consolidated financial statements from that date with USD 220 million of net sales being recorded in 2004. Goodwill of USD 183 million has been recorded on this transaction.

**Corporate**

In 2004, Group financial income, net, benefited from an exceptional recycled translation gain of USD 301 million from the partial repayment of capital of a subsidiary offset by USD 180 million of realized losses on marketable securities and the additional impairment charge of USD 101 million from the change in accounting estimate on available-for-sale securities.

**2003**

**Pharmaceuticals**

On February 11, Novartis announced the completed sale of the US rights to its *Fioricet* and *Fiorinal* lines (tension headache treatments) to Watson Pharmaceuticals, Inc. for USD 178 million.

On April 23, the urinary incontinence treatment *Enblex/Emselex* (darifenacin) was acquired from Pfizer for a total of up to USD 225 million, part of which is conditional on certain marketing approvals in the US. *Enblex* received approval in both the US and EU in 2004.

On May 8, an additional 51% of the fully diluted capital stock of Idenix Pharmaceuticals Inc. was acquired for an initial payment of USD 255 million in cash. This company is included in the

consolidated financial statements from that date. Goodwill of USD 297 million has been recorded on this transaction.

### 5. Significant differences between IFRS and US Generally Accepted Accounting Principles (US GAAP)

The Group's consolidated financial statements have been prepared in accordance with IFRS, which, as applied by the Group, differs in certain significant respects from US GAAP. The effects of the application of US GAAP to net income and equity are set out in the tables below.

Edgar Filing: NOVARTIS AG - Form 6-K
