SOUTHSIDE BANCSHARES, INC. AND SUBSIDIARIES

NOTES TO FINANCIAL STATEMENTS

1. Basis of Presentation

The term "Company" is used throughout this report to refer to Southside Bancshares, Inc. and its subsidiaries. The term "Bank" is used to refer to Southside Bank wherever a distinction between Southside Bancshares, Inc. and Southside Bank aids in the understanding of this report.

The consolidated balance sheet as of March 31, 2006, and the related consolidated statements of income, shareholders' equity, cash flow and notes to the financial statements for the three month period ended March 31, 2006 and 2005 are unaudited; in the opinion of management, all adjustments necessary for a fair presentation of such financial statements have been included. Such adjustments consisted only of normal recurring items. Interim results are not necessarily indicative of results for a full year. These financial statements should be read in conjunction with the financial statements and notes thereto in the Company's latest annual report on Form 10-K. All share data has been adjusted to give retroactive recognition to stock splits and stock dividends. For a description of the Company's significant accounting and reporting policies, refer to Note 1 of the Notes to Financial Statements in the Company's Form 10-K for the year ended December 31, 2005.

2. Earnings Per Share

Earnings per share on a basic and diluted basis has been adjusted to give retroactive recognition to stock splits and stock dividends and is calculated as follows (in thousands, except per share amounts):

	Three Months Ended March 31,	
	2006	2005
Basic Earnings and Shares:		
Net income	\$ 3,228	\$ 3,575
Weighted-average basic shares outstanding	12,196	12,040
Basic Earnings Per Share:		
Net income	\$ 0.26	\$ 0.29
Diluted Earnings and Shares:		
Net income	\$ 3,228	\$ 3,575
Weighted-average basic shares outstanding	12,196	12,040
Add: Stock options	482	675
Weighted-average diluted shares outstanding	12,678	12,715
Diluted Earnings Per Share:		
Net income	\$ 0.25	\$ 0.28

For the quarters ended March 31, 2006 and 2005, there were no antidilutive shares.

3. Comprehensive Loss

The components of other comprehensive loss are as follows (in thousands):

	Three Months Ended March 31, 2006		
	Before-Tax Amount	Tax (Expense) Benefit	Net-of-Tax Amount
Unrealized losses on securities:			
Unrealized holding losses arising during period	\$ (7,683)	\$ 2,612	\$ (5,071)
Less: reclassification adjustment for gains included in net income	123	(42)	81
Net unrealized losses on securities	(7,806)	2,654	(5,152)
Other comprehensive loss	\$ (7,806)	\$ 2,654	\$ (5,152)

	Three Months Ended March 31, 2005		
	Before-Tax Amount	Tax (Expense) Benefit	Net-of-Tax Amount
Unrealized losses on securities:			
Unrealized holding losses arising during period	\$ (7,148)	\$ 2,430	\$ (4,718)
Less: reclassification adjustment for losses included in net income	(216)	73	(143)
Net unrealized losses on securities	(6,932)	2,357	(4,575)
Other comprehensive loss	\$ (6,932)	\$ 2,357	\$ (4,575)

4. Allowance for Probable Loan Losses

The summaries of the Allowance for Loan Losses are as follows (in thousands):

	Three Months Ended March 31,	
	2006	2005
Balance at beginning of period	\$ 7,090	\$ 6,942
Provision for loan losses	281	235
Loans charged off	(703)	(642)
Recoveries of loans charged off	525	349
Balance at end of period	\$ 7,193	\$ 6,884

5. Employee Benefit Plans

The components of net periodic benefit cost are as follows (in thousands):

	Three Months Ended March 31,			
	Defined Benefit Pension Plan		Restoration Plan	
	2006	2005	2006	2005
Service cost	\$ 322	\$ 487	\$ 18	\$ 19
Interest cost	547	496	49	37
Expected return on assets	(581)	(531)	N/A	N/A
Transition (asset) obligation recognition			1	1
Net loss recognition	189	152	50	40
Prior service cost amortization				
Net periodic benefit cost	\$ 477	\$ 604	\$ 118	\$ 97

Employer Contributions

The Company previously disclosed in its financial statements for the year ended December 31, 2005, that it expected to contribute \$1.5 million to its defined benefit pension plan and \$86,000 to its post retirement benefit plan in 2006. As of March 31, 2006, no contributions have been made to the defined benefit pension plan, and \$20,000 of contributions were made to the post retirement benefit plan.

6. Incentive Stock Options

In April 1993, the Company adopted the Southside Bancshares, Inc. 1993 Incentive Stock Option Plan (the ISO Plan), a stock-based incentive compensation plan. The ISO Plan expired March 31, 2003. Prior to January 1, 2006, the Company applied APB Opinion 25 and related Interpretations in accounting for the ISO Plan and discloses the pro forma information required by FAS 123 and FAS 148. There was no compensation expense recognized for the stock options.

As of January 1, 2006, the Company transitioned to fair value based accounting for stock-based compensation using a modified version of prospective application in accordance with Statement of Financial Accounting Standards No. 123R, (FAS 123R), Share-Based Payment. The compensation cost that has been charged against income for the ISO Plan was \$7,000 for the three months ended March 31, 2006. In addition, prior to the adoption of FAS 123R, the financial statements for the three months ended March 31, 2005 have not been restated and do not reflect the recognition of the compensation cost related to the stock options.

A summary of the status of the Company's nonvested shares as of March 31, 2006 is as follows:

	# Shares of Underlying Options	Weighted Average Grant-Date Fair Value
Nonvested at beginning of the period	19,697	\$ 4.91
Granted		
Vested	(6,559)	\$ 4.91
Forfeited		
Nonvested at end of period	13,138	\$ 4.91

As of March 31, 2006, there was \$54,000 of total unrecognized compensation cost related to the nonvested ISO Plan for stock granted in the March 2003 grant. The cost is expected to be recognized over a weighted-average period of 2.0 years.

Edgar Filing: SOUTHSIDE BANCSHARES INC - Form 10-Q

The fair value of each stock option granted is estimated on the date of grant using the Black-Scholes method of option pricing with the following weighted-average assumptions for grants in 2003: dividend yield of 1.93%; risk-free interest rate of 4.93%; the expected life of 6 years; the expected volatility is 28.90%.

Pro Forma Net Income and Net Income Per Common Share

Had the compensation cost for the Company's stock based compensation plan been determined consistent with the requirements of FAS 123R, the Company's net income and net income per common share for the three month periods ending March 31, 2005 would approximate the pro forma amounts below (in thousands, except per share amounts, net of taxes):

	Three Months Ended March 31,	
	As Reported 2005	Pro Forma 2005
FAS 123R Charge	\$	\$ 20
Net Income	\$ 3,575	\$ 3,555
Net Income per Common Share-Basic	\$ 0.29	\$ 0.29
Net Income per Common Share-Diluted	\$ 0.28	\$ 0.28

The effects of applying FAS 123R in this pro forma disclosure are not indicative of future amounts.

Under the ISO Plan, the Company was authorized to issue shares of Common Stock pursuant to Awards granted in the form of incentive stock options (intended to qualify under Section 422 of the Internal Revenue Code of 1986, as amended). Before the ISO Plan expired, awards were granted to selected employees and directors of the Company or its subsidiaries. No stock options have been available for grant under the ISO Plan since its expiration in March 2003. Currently, the Company does not offer share-based payment programs to its employees.

The ISO Plan provided that the exercise price of any stock option not be less than the fair market value of the Common Stock on the date of grant. The outstanding stock options have contractual terms of 10 years. All options vest on a graded schedule, 20% per year for 5 years, beginning on the first anniversary date of the grant date.

A summary of the status of the Company's stock options as of March 31, 2006 and 2005 and the changes during the three months ended on those dates is presented below:

	2006		2005	
	# Shares of Underlying Options	Weighted Average Exercise Prices	# Shares of Underlying Options	Weighted Average Exercise Prices
Outstanding at beginning of the period	725,942	\$ 5.96	970,553	\$ 5.65
Granted				
Exercised	(44,932)	\$ 4.62	(71,065)	\$ 4.42

Edgar Filing: SOUTHSIDE BANCSHARES INC - Form 10-Q

Forfeited					
Expired					
Outstanding at end of period	681,010	\$	6.05	899,488	\$ 5.75
Exercisable at end of period	667,872	\$	5.91	810,568	\$ 5.58

The following table summarizes information about stock options outstanding and exercisable at March 31, 2006:

Range of Exercise Prices	Number Outstanding	Options Outstanding		Options Exercisable	
		Weighted Avg. Remaining Contract Life (Years)	Weighted Avg. Exercise Price	Number Exercisable	Weighted Avg. Exercise Price
\$ 5.44 to \$ 6.18	651,946	3.27	\$ 5.73	651,946	\$ 5.73
\$13.24 to \$13.24	29,064	7.00	\$ 13.24	15,926	\$ 13.24
\$ 5.44 to \$13.24	681,010	3.43	\$ 6.05	667,872	\$ 5.91

7. Accounting Pronouncements

SFAS No. 155, Accounting for Certain Hybrid Financial Instruments. SFAS 155 amends SFAS 133, Accounting for Derivative Instruments and Hedging Activities and SFAS 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities. SFAS 155 (i) permits fair value remeasurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation, (ii) clarifies which interest-only strips and principal-only strips are not subject to the requirements of SFAS 133, (iii) establishes a requirement to evaluate interests in securitized financial assets to identify interests that are freestanding derivatives or that are hybrid financial instruments that contain an embedded derivative requiring bifurcation, (iv) clarifies that concentrations of credit risk in the form of subordination are not embedded derivatives, and (v) amends SFAS 140 to eliminate the prohibition on a qualifying special purpose entity from holding a derivative financial instrument that pertains to a beneficial interest other than another derivative financial instrument. SFAS 155 is effective for the Company on January 1, 2007. The Company does not expect the adoption of SFAS 155 to have a material impact on its consolidated financial statements.

8. Off-Balance-Sheet Arrangements, Commitments and Contingencies

Financial Instruments with Off-Balance-Sheet-Risk. In the normal course of business, the Company is a party to certain financial instruments, with off-balance-sheet risk, to meet the financing needs of its customers. These off-balance-sheet instruments include commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount reflected in the financial statements. The contract or notional amounts of these instruments reflect the extent of involvement and exposure to credit loss the Company has in these particular classes of financial instruments.

Commitments to extend credit are agreements to lend to a customer provided that the terms established in the contract are met. Commitments generally have fixed expiration dates and may require payment of fees. Since some commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Standby letters of credit are conditional commitments issued to guarantee the performance of a customer to a third party. These guarantees are primarily issued to support public and private borrowing arrangements. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan commitments to customers.

The Company had outstanding unused commitments to extend credit of \$92.4 million and \$83.8 million at March 31, 2006 and 2005, respectively. Each commitment has a maturity date and the commitment expires on that date with the exception of credit card and ready reserve commitments which have no stated maturity date. Unused commitments for credit card and ready reserve at March 31, 2006 and 2005 were \$11.3 million and \$9.6 million, respectively and are reflected in the due after one year category. The Company had outstanding standby letters of credit of \$3.7 million and \$2.4 million at March 31, 2006 and 2005, respectively.

The scheduled maturities of unused commitments as of March 31, 2006 and 2005 were as follows (in thousands):

	2006	March 31,	2005
Unused commitments:			
Due in one year or less	\$	56,487	\$ 50,807
Due after one year		35,901	32,997
Total	\$	92,388	\$ 83,804

The Company applies the same credit policies in making commitments and standby letters of credit as it does for on-balance-sheet instruments. The Company evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary, upon extension of credit is based on management's credit evaluation of the borrower. Collateral held varies but may include cash or cash equivalents, negotiable instruments, real estate, accounts receivable, inventory and property, plant, and equipment.

Lease Commitments. The Company leases certain branch facilities and office equipment under operating leases. It is expected that certain leases will be renewed or equipment replaced with new leased equipment as these leases expire.

Securities. In the normal course of business the Company buys and sells securities. There were no unsettled trades to purchase securities at March 31, 2006. At December 31, 2005, the Company had recorded in its balance sheet unsettled trades to purchase \$7.5 million in securities.

Litigation. The Company is involved with various litigation in the normal course of business. Management of the Company, after consulting with its legal counsel, believes that any liability resulting from litigation will not have a material effect on the financial position and results of operations and the liquidity of the Company.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following is a discussion of the consolidated financial condition, changes in financial condition, and results of operations of the Company, and should be read and reviewed in conjunction with the financial statements, and the notes thereto, in this presentation and in the Company's latest report on Form 10-K.

The Company reported a decrease in net income for the three months ended March 31, 2006 compared to the same period in 2005. Net income for the three months ended March 31, 2006 was \$3.2 million compared to \$3.6 million for the same period in 2005.

All share data has been adjusted to give retroactive recognition to stock splits and stock dividends.

Forward Looking Information

Edgar Filing: SOUTHSIDE BANCSHARES INC - Form 10-Q

Certain statements of other than historical fact that are contained in this document and in written material, press releases and oral statements issued by or on behalf of the Company, a bank holding company, may be considered to be forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995. These forward-looking statements are not guarantees of future performance, nor should they be relied upon as representing management's views as of any subsequent date. These statements may include words such as expect, estimate, project, anticipate, believe, could, should, may, intend, probability, risk, target, objective, plans, potential, and similar. Forward-looking statements are subject to significant risks and uncertainties and the Company's actual results may differ materially from the results discussed in the forward-looking statements. For example, certain market risk disclosures are dependent on choices about key model characteristics and assumptions and are subject to various limitations. By their nature, certain of the market risk disclosures are only estimates and could be materially different from what actually occurs in the future. As a result, actual income gains and losses could materially differ from those that have been estimated. Other factors that could cause actual results to differ materially from forward-looking statements include, but are not limited to, the following:

general economic conditions, either globally, nationally, in the State of Texas, or in the specific markets in which the Company operates;

legislation or regulatory changes which adversely affect the businesses in which the Company is engaged;

adverse changes in Government Sponsored Enterprises (the GSE) status or financial condition impacting the GSE guarantees or ability to pay or issue debt;

economic or other disruptions caused by acts of terrorism in the United States, Europe or other areas;

changes in the interest rate yield curve such as flat, inverted or steep yield curves, or changes in the interest rate environment which impact interest margins and may impact prepayments on the mortgage-backed securities portfolio;

unexpected outcomes of existing or new litigation involving the Company,

changes impacting the leverage strategy;

significant increases in competition in the banking and financial services industry;

changes in consumer spending, borrowing and saving habits;

technological changes;

the Company's ability to increase market share and control expenses;

the effect of changes in federal or state tax laws;

the effect of compliance with legislation or regulatory changes;

the effect of changes in accounting policies and practices; and

the costs and effects of unanticipated litigation.

Additional information concerning the Company and its business, including additional factors that could materially affect the Company's financial results, is included in the Company's filings with the Securities and Exchange Commission. The Company disclaims any obligation to update any factors or to announce publicly the result of revisions to any of the forward-looking statements included herein to reflect future events or developments.

Critical Accounting Estimates

The accounting and reporting estimates of the Company conform with accounting principles generally accepted in the United States and general practices within the financial services industry. The preparation of financial statements in conformity with generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates. The Company considers its critical accounting policies to include the following:

Allowance for Losses on Loans. The allowance for losses on loans represents management's best estimate of probable losses inherent in the existing loan portfolio. The allowance for losses on loans is increased by the provision for losses on loans charged to expense and reduced by loans charged-off, net of recoveries. The provision for losses on loans is determined based on management's assessment of several factors: reviews and evaluations of specific loans, changes in the nature and volume of the loan portfolio, and current economic conditions and the related impact on specific borrowers and industry groups, historical loan loss experience, the level of classified and nonperforming loans and the results of regulatory examinations.

The loan loss allowance is based on the most current review of the loan portfolio at that time. The servicing officer has the primary responsibility for updating significant changes in a customer's financial position. Each officer prepares status updates on any credit deemed to be experiencing repayment difficulties which, in the officer's opinion, would place the collection of principal or interest in doubt. The internal loan review department for the Company is responsible for an ongoing review of the Company's loan portfolio with specific goals set for the loans to be reviewed on an annual basis.

At each review of a credit, a subjective analysis methodology is used to grade the respective loan. Categories of grading vary in severity to include loans which do not appear to have a significant probability of loss at the time of review to grades which indicate a probability that the entire balance of the loan will be uncollectible. If full collection of the loan balance appears unlikely at the time of review, estimates or appraisals of the collateral securing the debt are used to allocate the necessary allowances. A list of loans or loan relationships of \$50,000 or more, which are graded as having more than the normal degree of risk associated with them, is maintained by the internal loan review department. This list is updated on a periodic basis, but no less than quarterly, in order to properly allocate necessary allowance and keep management informed on the status of attempts to correct the deficiencies noted in the credit.

Loans are considered impaired if, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. The measurement of impaired loans is generally based on the present value of expected future cash flows discounted at the historical effective interest rate stipulated in the loan agreement, except that all collateral-dependent loans are measured for impairment based on fair value of the collateral. In measuring the fair value of the collateral, management uses assumptions (e.g., discount rates) and methodologies (e.g., comparison to the recent selling price of similar assets) consistent with those that would be utilized by unrelated third parties.

Changes in the financial condition of individual borrowers, economic conditions, historical loss experience and the conditions of the various markets in which collateral may be sold may all affect the required level of the allowance for losses on loans and the associated provision for loan losses.

Edgar Filing: SOUTHSIDE BANCSHARES INC - Form 10-Q

As of March 31, 2006, the Company's review of the loan portfolio indicated that a loan loss allowance of \$7.2 million was adequate to cover probable losses in the portfolio.

Refer to Part 1, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations - Loan Loss Experience and Allowance for Loan Loss and Note 1 Summary of Significant Accounting and Reporting Policies in the Company's latest report on Form 10-K for a detailed description of the Company's estimation process and methodology related to the allowance for loan losses.

Estimation of Fair Value. The estimation of fair value is significant to a number of the Company's assets, including investment, mortgage-backed and marketable equity securities and other real estate owned. These are all recorded at either fair value or at the lower of cost or fair value. Furthermore, GAAP requires disclosure of the fair value of financial instruments as a part of the notes to the consolidated financial statements. Fair values are volatile and may be influenced by a number of factors, including market interest rates, prepayment speeds, discount rates and the shape of yield curves.

Fair values for most investment, mortgage-backed and marketable equity securities are based on quoted market prices, where available. If quoted market prices are not available, fair values are based on the quoted prices of similar instruments. The fair value of fixed rate loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities. Nonperforming loans are estimated using discounted cash flow analyses or underlying value of the collateral where applicable. Fair values for fixed rate certificates of deposits are estimated using a discounted cash flow calculation that applies interest rates currently being offered for deposits of similar remaining maturities. The fair value of Federal Home Loan Bank (FHLB) advances is estimated by discounting the future cash flows using rates at which advances would be made to borrowers with similar credit ratings and for the same remaining maturities. The fair values of other real estate owned are typically determined based on appraisals by third parties, less estimated costs to sell.

Defined Benefit Pension Plan. The plan obligations and related assets of the defined benefit pension plan are presented in Note 12 Employee Benefits of the Notes to Consolidated Financial Statements in the Company's latest report on Form 10-K. Plan assets, which consist primarily of marketable equity and debt instruments, are valued using market quotations. Plan obligations and the annual pension expense are determined by independent actuaries and through the use of a number of assumptions. Key assumptions in measuring the plan obligations include the discount rate, the rate of salary increases and the estimated future return on plan assets. In determining the discount rate, the Company utilized a cash flow matching analysis to determine a range of appropriate discount rates for the Company's defined benefit pension and restoration plans. In developing the cashflow matching analysis, a portfolio of high quality non-callable bonds (rated AA- or better) was constructed to match as close as possible the timing of future benefit payments of the plans at March 31, 2006. Based on this cash flow matching analysis, the Company was able to determine an appropriate discount rate to use.

Salary increase assumptions are based upon historical experience and anticipated future management actions. The expected long-term rate of return assumption reflects the average return expected based on the investment strategies and asset allocation on the assets invested to provide for the Plan's liabilities. The Company considered broad equity and bond indices, long-term return projections, as well as actual long-term historical Plan performance when evaluating the expected long-term rate of return assumption. At March 31, 2006, the weighted-average actuarial assumptions of the Company's plan were: discount rate 5.625%; long-term rate of return on plan assets 7.875%; and assumed salary increases 4.50%. Material changes in pension benefit costs may occur in the future due to changes in these assumptions. Future annual amounts could be impacted by changes in the number of plan participants, changes in the level of benefits provided, changes in the discount rates, changes in the expected long-term rate of return, changes in the level of contributions to the plan and other factors.

Impairment of Investment Securities and Mortgage-backed Securities. Investment and mortgage-backed securities classified as available for sale (AFS) are carried at fair values and the impact of changes in fair value are recorded as an unrealized gain or loss in Accumulated other comprehensive income (loss), a separate component of equity. In addition, securities classified as AFS or held to maturity (HTM) are subject to the Company's review to identify when a decline in value is other than temporary. Factors considered in determining whether a decline in value is other than temporary include: whether the decline is substantial; the duration of the decline; the reasons for the decline in value; credit event

or interest rate related; the Company's ability and intent to hold the investment for a period of time that will allow for a recovery of value; and the financial condition and near-term prospects of the issuer. When it is determined that a decline in value is other than temporary, the carrying value of the security is reduced to its estimated fair value, with a corresponding charge to earnings.

Off-Balance-Sheet Arrangements, Commitments and Contingencies

Details of the Company's off-balance-sheet arrangements, commitments and contingencies as of March 31, 2006 and 2005, are included in Note 8 Off-Balance-Sheet Arrangements, Commitments and Contingencies in the accompanying Notes to Financial Statements included in this report.

Leverage Strategy

In May 1998, the Company implemented a leverage strategy designed with the potential to enhance its profitability by maximizing the use of the Company's capital with acceptable levels of credit, interest rate and liquidity risk. The leverage strategy consists of borrowing a combination of long and short-term funds from the FHLB and when determined appropriate, issued brokered CDs. These funds are invested primarily in premium mortgage-backed securities, and to a lesser extent, long-term municipal securities and mortgage-backed securities purchased at a discount. Although mortgage-backed securities often carry lower yields than traditional mortgage loans and other types of loans the Company makes, these securities generally increase the overall quality of the Company's assets by virtue of the securities' underlying insurance or guarantees, are more liquid than individual loans and may be used to collateralize the Company's borrowings or other obligations. While the strategy of investing a substantial portion of the Company's assets in mortgage-backed and municipal securities has resulted in lower interest rate spreads and margins, the Company believes that the lower operating expenses and reduced credit risk combined with the managed interest rate risk of this strategy have enhanced its overall profitability over the last several years. At this time, the Company maintains the leverage strategy for the purpose of enhancing overall profitability by maximizing the use of the Company's capital.

Risks associated with the asset structure the Company maintains are a lower net interest rate spread and margin when compared to its peers, changes in the yield curve, which can reduce the Company's net interest rate spread and margin and increased interest rate risk. In low long-term interest rate environments the amortization expense for premium mortgage-backed securities is associated with substantially higher prepayments experienced and reduces the overall yields of the premium mortgage-backed securities portfolio. As long-term interest rates increase, amortization expense associated with the premium mortgage backed securities decreases as the overall duration of these securities increases. See Item 1A, Risk Factors Risks Related to the Company's Business in the Company's latest report on Form 10K. During 2005, short-term interest rates increased significantly while long-term interest rates increased less, creating a relatively flat yield curve. During the first four months of 2006, short-term and long-term interest rates have increased approximately 50 to 70 basis points. Should this trend in the yield curve continue or should the yield curve invert, the Company may not see prepayment speeds on all of its premium mortgage-backed securities slow. In addition, the Company will see its funding costs rise which would most likely reduce the Company's net interest margin. The Company's asset structure, spread and margin requires an increase in the need to monitor the Company's interest rate risk. An additional risk is the change in market value of the AFS securities portfolio as a result of changes in interest rates. Significant increases in interest rates, especially long-term interest rates, could adversely impact the market value of the AFS securities portfolio which could also impact the Company's equity capital significantly.

In conjunction with the leverage strategy, the Company will attempt to manage the securities portfolio as a percentage of earning assets in combination with adequate quality loan growth. If adequate quality loan growth is not available to achieve the Company's goal of enhancing profitability by maximizing the use of the Company's capital, as described above, then securities as a percentage of earning assets could increase through the purchase of additional securities if securities can be purchased at what the Company believes are acceptable overall economics. In light of the current interest rate environment, the Company will continue to evaluate the overall economics of replacing any or all of the current securities portfolio roll-off. Should the Company determine increasing the securities portfolio or replacing the current securities portfolio roll-off does not appear to maintain or enhance the overall economics at any given point in time, the Company could adjust the level of securities through maturities, principal payments on mortgage-backed securities or sales. During the three months ended March 31, 2006, the Company's loan growth was sufficient to allow the securities portfolio as a percentage of total assets to decrease. At March 31, 2006, the securities portfolio as a percentage of total assets decreased slightly to 53.6% from 54.5% at December

31, 2005. On the liability side, the Company will continue to utilize a combination of FHLB advances and deposits to achieve its strategy of minimizing cost while achieving overall interest rate risk objectives as well as the objectives of the Company's Asset/Liability Committee (ALCO). During the first quarter ended March 31, 2006, the Company issued \$54.1 million of callable brokered CDs, where the Company controls numerous options to call the CDs before the final maturity date, to replace a portion of the FHLB funding. During the three months ended March 31, 2006, the Company's FHLB borrowings decreased 8.0%, or \$41.5 million. At March 31, 2006, callable brokered CDs totaled \$73.9 million. These brokered CDs have maturities from two to five years and have calls that the Company controls from three months to one year. The Company is currently utilizing long-term brokered CDs in place of long-term FHLB funding as the brokered CDs better match overall ALCO objectives by using a long-term funding vehicle that assists in protecting the bank should interest rates increase, but allows the bank to call the funding should interest rates decrease. The Company's current policy allows for a maximum of \$100 million in brokered CDs. The potential higher interest cost and lack of customer loyalty are risks associated with the use of brokered CDs. The FHLB funding and the brokered CDs represent wholesale funding sources for the Company. Due to the dollar amount of brokered CDs issued during the first quarter of 2006, the Company's total wholesale funding as a percentage of deposits not including brokered CDs increased slightly to 49.6% at March 31, 2006, from 49.5% at December 31, 2005.

The leverage strategy is dynamic and requires ongoing management. As interest rates, yield curves, funding costs and security spreads change, the Company's determination of the proper securities to own, proper amount of securities to own and funding needs and sources must be re-evaluated. Management has attempted to design the leverage strategy so that in a rising interest rate environment, where both long and short-term interest rates increased, the interest income earned on the premium mortgage-backed securities may increase to help offset the increase in funding costs. If the flattening yield curve cycle trend discussed above continues or the yield curve inverts, the overall yield on the mortgage-backed securities may not increase and could decrease. If all interest rates were to decrease, the interest income on the premium mortgage-backed securities may decrease due to increased prepayments on these securities as funding costs decrease. Due to the unpredictable nature of mortgage-backed securities prepayments, the length of interest rate cycles, and the slope of the interest rate yield curve, net interest income could fluctuate more than simulated under the scenarios modeled by the ALCO and described under Item 3. Quantitative and Qualitative Disclosures about Market Risk included in this report.

Net Interest Income

Net interest income for the three months ended March 31, 2006 was \$10.6 million, an increase of \$190,000, or 1.8%, when compared to the same period in 2005. Average interest earning assets increased \$151.5 million, or 9.8%, while the net interest spread decreased from 2.50% at March 31, 2005 to 2.08% at March 31, 2006 and the net margin decreased from 2.98% at March 31, 2005 to 2.72% at March 31, 2006. Net interest income increased as a result of increases in the Company's average interest earning assets during the first quarter of 2006 when compared to the same period in 2005, which more than offset the decrease in the Company's net interest spread and margin during the same period. Future changes in interest rates could impact prepayment speeds on the Company's mortgage-backed securities which could influence the Company's net interest margin and spread during the coming quarters. Future changes in interest rates in which the yield curve continues to flatten or inverts could also influence the Company's net interest margin and spread during the coming quarters.

During the three months ended March 31, 2006, average loans, funded by the growth in average deposits, increased \$62.9 million, or 10.0%, compared to the same period in 2005. The average yield on loans increased from 6.09% at March 31, 2005 to 6.51% at March 31, 2006. The increase in the yield on loans was due to the overall increase in interest rates. The rate at which loan yields are increasing has been partially impacted by repricing characteristics of the loans, interest rates at the time the loans repriced, and the competitive loan pricing environment. If long-term interest rates remain at current levels or move lower, the Company anticipates it may be required to continue to meet lower interest rate offers from competing financial institutions in order to retain quality loan relationships, which could impact the overall loan yield and, therefore profitability. The increase in interest income on loans of \$1.6 million, or 18.2%, was the result of the increase in average loans and the average yield. During the first three months

Edgar Filing: SOUTHSIDE BANCSHARES INC - Form 10-Q

ended March 31, 2006, loans increased \$26.0 million, or 3.8%, when compared to the year ended December 31, 2005 primarily as a result of an increase in commercial real estate loans, 1-4 family residential loans and commercial loans.

Average investment and mortgage-backed securities increased \$86.9 million, or 9.9%, for the three months ended March 31, 2006 when compared to the same period in 2005. This increase was funded by the increase in average deposits which included brokered CDs issued by the Company. The overall yield on average investment and mortgage-backed securities increased to 4.97% during the three months ended March 31, 2006, from 4.64% during the same period in 2005. This increase is primarily reflective of decreased prepayment speeds on mortgage-backed securities which led to decreased amortization expense combined with proceeds from lower yielding matured securities being reinvested into higher yielding securities due to the overall higher interest rate environment. The higher overall interest rate environment during 2006 when compared to 2005, contributed to a decrease in residential mortgage refinancing nationwide and in the Company's market area. The decrease in prepayments on mortgage loans combined with a previous restructuring of the securities portfolio reduced overall amortization expense which contributed to the increase in interest income. A return to the low long-term interest rate levels experienced in May and June of 2003 could impact the Company's net interest margin in the future due to increased prepayments and repricing. Interest income from investment and mortgage-backed securities increased \$1.9 million, or 19.8%, compared to the same period in 2005 due to the increase in average balances and the increase in the overall yield.

Interest income from FHLB stock and other investments, federal funds sold and other interest earning assets increased \$137,000, or 60.9%, for the three months ended March 31, 2006, when compared to 2005 as a result of the increase in the average balance and an increase in the average yield from 3.17% in 2005 to 4.73% at March 31, 2006, due to higher short-term interest rates. The Federal Housing Finance Board, the agency that regulates the FHLB, has proposed a regulation that would establish a minimum retained earnings requirement for each FHLB and impose new restrictions on the timing and form of dividends. Due to the fact this is a proposed regulation, the Company is not certain how or if it will impact FHLB dividend payments to the Company in future periods.

Total interest expense increased \$3.5 million, or 41.2%, to \$12.0 million during the three months ended March 31, 2006 as compared to \$8.5 million during the same period in 2005. The increase was primarily attributable to increased funding costs associated with the Company's deposits and FHLB advances due to an increase in these average interest bearing liabilities of \$111.0 million, or 8.7% and an increase in the average yield on interest bearing liabilities from 2.71% at March 31, 2005 to 3.51% at March 31, 2006.

Average interest bearing deposits increased \$127.0 million, or 18.4%, and the average rate paid increased from 2.00% at March 31, 2005 to 3.10% at March 31, 2006. Average short-term interest bearing liabilities, consisting primarily of FHLB advances and federal funds purchased, increased \$118.5 million, or 49.2%, as compared to the same period in 2005. Interest expense associated with short-term interest bearing liabilities increased \$1.6 million, or 83.0%, and the average rate paid increased 74 basis points for the three month period ended March 31, 2006 when compared to the same period in 2005. Average long-term interest bearing liabilities consisting of FHLB advances decreased \$134.5 million, or 41.7%, during the three months ended March 31, 2006 to \$187.9 million as compared to \$322.4 million at March 31, 2005. Interest expense associated with long-term FHLB advances decreased \$1.0 million, or 36.7%, while the average rate paid increased 31 basis points for the three months ended March 31, 2006 when compared to the same period in 2005. The long-term advances were obtained from the FHLB primarily to fund long-term securities and to a lesser extent long-term loans. FHLB advances are collateralized by FHLB stock, securities and nonspecific real estate loans.

Average long-term debt remained the same from March 31, 2005 to March 31, 2006. Interest expense increased \$101,000, or 35.6% as a result of the increase in the three month LIBOR. The long-term debt adjusts quarterly at a rate equal to the three month LIBOR plus 294 basis points.

RESULTS OF OPERATIONS

The analysis below shows average interest earning assets and interest bearing liabilities together with the average yield on the interest earning assets and the average cost of the interest bearing liabilities.

	AVERAGE BALANCES AND YIELDS (dollars in thousands) Three Months Ended

(4) For the purpose of calculating the average yield, the average balance of securities is presented at historical cost.

(5) Southside Statutory Trust III

Note: As of March 31, 2006 and 2005, loans totaling \$1,899 and \$1,835, respectively, were on nonaccrual status. The policy is to reverse previously accrued but unpaid interest on nonaccrual loans; thereafter, interest income is recorded to the extent received when appropriate.

Noninterest Income

Noninterest income was \$5.1 million for the three months ended March 31, 2006 compared to \$4.8 million for the same period in 2005. During the three months ended March 31, 2006, the Company had a gain on the sale of AFS securities of \$123,000 compared to losses of \$216,000 for the same period in 2005. The market value of the AFS securities portfolio at March 31, 2006 was \$723.2 million with a net unrealized loss on that date of \$11.2 million. The net unrealized loss is comprised of \$14.0 million in unrealized losses and \$2.8 million in unrealized gains. The market value of the HTM securities portfolio at March 31, 2006 was \$216.7 million with a net unrealized loss on that date of \$5.2 million, all comprising of unrealized losses. The Company sold securities out of its AFS portfolio to accomplish ALCO and investment portfolio objectives aimed at repositioning a portion of the securities portfolio in an attempt to maximize the total return of the securities portfolio, reduce alternative minimum tax and minimize prepayments on mortgage-backed securities. Sales of AFS securities were the result of changes in economic conditions and a change in the desired mix of the securities portfolio. During the first quarter of 2006, the Company sold tax-free municipal securities to reduce alternative minimum tax, along with selected poor risk reward mortgage backed securities. In addition, the Company sold agency debentures where collateral was no longer needed for public funds deposits.

Other changes to noninterest income included trust income which increased \$75,000, or 22.8%, for the three months ended March 31, 2006 when compared to the same period in 2005 due to growth experienced in the Company's trust department. Other noninterest income decreased \$213,000, or 30.5%, for the three months ended March 31, 2006 primarily as a result of a special distribution received as a result of the merger of the Pulse EFT Association with Discover Financial Services of \$244,000 received during the three months ended March 31, 2005. Increases in other income included increases in Southside Select fee income, credit card fee income, stored value card income, Home Banking fee income, ACH/wire fee income and Travelers Express income.

Noninterest Expense

Noninterest expense was \$11.4 million for the three months ended March 31, 2006, compared to \$10.6 million for the same period of 2005, representing an increase of \$879,000 or 8.3%.

Salaries and employee benefits increased \$562,000, or 8.2%, during the three months ended March 31, 2006 when compared to the same period in 2005. Direct salary expense and payroll taxes increased \$668,000, or 12.2%, as a result of normal salary increases and higher staffing levels associated with both the continued branch expansion and the Company's regional lending initiative for the three months ended March 31, 2006 when compared to the same period in 2005. While continued expansion has and will continue to impact short-term earnings, the Company believes the potential long-term benefits to the Company should greatly outweigh the short-term expense. Retirement expense decreased \$96,000, or 13.2%, for the three months ended March 31, 2006 when compared to the same period in 2005, primarily as a result of the amendments to the plan in the fourth quarter of 2005 effective in 2006. The Company's actuarial assumptions used to determine net periodic pension costs were reduced for 2006 when compared to 2005 and the assumed long-term rate of return is 7.875% and the assumed discount rate is 5.625%. The Company will continue to evaluate the assumed long-term rate of return and the discount rate to determine if either should be changed in the future. If either of these assumptions were decreased, the cost and funding required for the retirement plan could increase.

On November 3, 2005, the Board of Directors of the Company approved amendments to the Plan which affected future participation in the plan and reduced the accrual of future benefits.

The amendments to the Plan approved include the following:

Entrance into the Plan by new employees was frozen effective December 31, 2005;

Benefit accruals for current participants were reduced in future periods. The reduction was effective January 1, 2006 for all individuals who became Plan participants prior to January 1, 2005 and effective January 31, 2006 for all employees hired in 2005 and eligible to participate in the Plan. The current benefit accrual of 2% for the first 20 years of service, 1% for the next 15 years and a formula for the benefit accruals for each service year over 35 years has been changed to reduce future benefit accruals for current participants. The future benefit accrual for current participants will be amended to 90% of 1% for the first 35 years of service and the formula for benefit accruals for each year of service over 35 years will be reduced by 10%.

Health and life insurance expense decreased \$10,000, or 1.5%, for the three months ended March 31, 2006 when compared to the same period in 2005 due to decreased health claims expense and reinsurance costs. The Company has a self-insured health plan which is supplemented with stop loss insurance policies. Health insurance costs are rising nationwide and these costs may increase during the remainder of 2006.

Net occupancy expense increased \$132,000, or 12.7%, for the three months ended March 31, 2006 compared to the same period in 2005 primarily due to branch expansions.

Advertising, travel and entertainment decreased \$94,000, or 17.2%, for the three months ended March 31, 2006 compared to the same period in 2005 due to decreases in direct advertising costs.

ATM expense increased \$30,000, or 21.4%, for the three months ended March 31, 2006 compared to the same period in 2005. The increase occurred primarily due to increased activity and branch expansions.

Professional fees increased \$65,000, or 26.0%, for the three months ended March 31, 2006 compared to the same period in 2005. The increase occurred primarily due to legal fees associated with legal matters and litigation resulting from the normal course of business.

Other expense increased \$149,000, or 13.9%, for the three months ended March 31, 2006 compared to the same period in 2005. The increase occurred primarily due to increases in bank exam fees, computer fees, telephone expense, student loan lender fee expense, and bank analysis fees.

Income Taxes

Income tax expense was \$724,000 for the three months ended March 31, 2006 compared to \$771,000 for the three months ended March 31, 2005. The effective tax rate as a percentage of pre-tax income was 18.3% for the three months ended March 31, 2006 compared to 17.7% for the three months ended March 31, 2005. The increase in the effective tax rate and income tax expense for 2006 was due to the decrease in tax-exempt income as a percentage of pre-tax income for the three months ended March 31, 2006 when compared to March 31, 2005.

The Company decreased its municipal securities portfolio during 2005 and the first quarter of 2006 to reduce the overall level of tax free income from the securities portfolio and to allow the Company the opportunity to grow its municipal loan portfolio. The Company has the ability to and is addressing the appropriate level of tax free income so as to minimize any alternative minimum tax position in the future. Based on this information, management believes this is reversible in the future and no valuation allowance against the related deferred tax asset is deemed necessary at this time.

On October 22, 2004, President Bush signed the American Jobs Creation Act of 2004 (the Act), which includes numerous provisions that may affect business practices and accounting for income taxes. The Act did not impact the Company's income tax expense during the three months ended March 31, 2006.

Capital Resources

Total shareholders' equity for the Company at March 31, 2006, was \$106.5 million, representing a decrease of \$2.8 million from December 31, 2005, and represented 5.9% of total assets at March 31, 2006 compared to 6.1% of total assets at December 31, 2005. The increase of \$5.2 million in accumulated other comprehensive loss and \$1.3 million in dividends paid were the major contributors to the decrease in shareholders' equity at March 31, 2006. Increases to shareholders' equity consisted of net income of \$3.2 million and the issuance of \$427,000 in common stock (53,740 shares) through the Company's incentive stock option and dividend reinvestment plans. The Company's dividend policy requires that any cash dividend payments made by the Company not exceed consolidated earnings for that year. Shareholders should not anticipate a continuation of the cash dividend simply because of the existence of a dividend reinvestment program. The payment of dividends will depend upon future earnings, the financial condition of the Company, and other related factors including the discretion of the Board of Directors.

Under the Federal Reserve Board's risk-based capital guidelines for bank holding companies, the minimum ratio of total capital to risk-adjusted assets (including certain off-balance-sheet items, such as standby letters of credit) is currently eight percent. The minimum Tier 1 capital to risk-adjusted assets is four percent. The Company's \$20 million of trust preferred securities is considered Tier 1 capital by the Federal Reserve Board. The Federal Reserve Board also requires bank holding companies to comply with the minimum leverage ratio guidelines. The leverage ratio is a ratio of bank holding company's Tier 1 capital to its total consolidated quarterly average assets, less goodwill and certain other intangible assets. The guidelines require a minimum average of four percent for bank holding companies that meet certain specified criteria. Failure to meet minimum capital regulations can initiate certain mandatory and possibly additional discretionary actions by regulation, that if undertaken, could have a direct material effect on the Company's financial statements. At March 31, 2006, the Company and the Bank exceeded all regulatory minimum capital requirements.

The Federal Reserve Deposit Insurance Act requires bank regulatory agencies to take prompt corrective action with respect to FDIC-insured depository institutions that do not meet minimum capital requirements. A depository institution's treatment for purposes of the prompt corrective action provisions will depend on how its capital levels compare to various capital measures and certain other factors, as established by regulation.

It is management's intention to maintain the Company's capital at a level acceptable to all regulatory authorities and future dividend payments will be determined accordingly. Regulatory authorities require that any dividend payments made by either the Company or the Bank not exceed earnings for that year.

Liquidity and Interest Rate Sensitivity

Liquidity management involves the ability to convert assets to cash with a minimum of loss. The Company must be capable of meeting its obligations to its customers at any time. This means addressing (1) the immediate cash withdrawal requirements of depositors and other funds providers; (2) the funding requirements of all lines and letters of credit; and (3) the short-term credit needs of customers. Liquidity is provided by short-term investments that can be readily liquidated with a minimum risk of loss. Cash, Interest Earning Deposits, Federal Funds Sold and short-term investments with maturities or repricing characteristics of one year or less continue to be a substantial percentage of total assets. At March 31, 2006, these investments were 18.4% of total assets. Liquidity is further provided through the matching, by time period, of rate sensitive interest earning assets with rate sensitive interest bearing liabilities. The Company has three lines of credit for the purchase of overnight federal funds at prevailing rates. Two \$15.0 million and one \$10.0 million unsecured lines of credit have been established with Bank of America, Frost Bank and TIB - The Independent BankersBank, respectively. The Company has obtained a \$12.0 million letter of credit from FHLB as collateral for a portion of the Company's public fund deposits.

Interest rate sensitivity management seeks to avoid fluctuating net interest margins and to enhance consistent growth of new interest income through periods of changing interest rates. The ALCO closely monitors various liquidity ratios, interest rate spreads and margins, interest rate shock reports and market value of portfolio equity (MVPE) with rates shocked plus and minus 200 basis points to ensure a satisfactory liquidity position for the Company. In addition, ALCO utilizes a simulation model to determine the impact of net interest income under several different interest rate scenarios. By utilizing this technology, the Company can determine changes that need to be made to the asset and liability mixes to minimize the change in net interest income under these various interest rate scenarios.

Composition of Loans

One of the Company's main objectives is to seek attractive lending opportunities in East Texas, primarily in the counties in which it operates. Substantially all of the Company's loans are made to borrowers who live in and conduct business in East Texas, with the exception of municipal loans. Municipal loans are made to municipalities and school districts throughout the state of Texas. The majority of the increase from December 31, 2005 to March 31, 2006, was in commercial real estate loans, 1-4 family residential loans and commercial loans. The increase in these loan categories is due to the Company's continued strong commitment in these areas. The Company looks forward to the possibility that its loan growth may begin to accelerate in the future as the Company develops additional strategies to expand its lending territory.

Loan Loss Experience and Allowance for Loan Losses

The loan loss allowance is based on the most current review of the loan portfolio at that time. Several methods are used to maintain the review in the most current manner. First, the servicing officer has the primary responsibility for updating significant changes in a customer's financial position. Accordingly, each officer prepares status updates on any credit deemed to be experiencing repayment difficulties which, in the officer's opinion, would place the collection of principal or interest in doubt. Second, the internal loan review department for the Company is responsible for an ongoing review of the Company's loan portfolio with specific goals set for the loans to be reviewed on an annual basis.

At each review of a credit, a subjective analysis methodology is used to grade the respective loan. Categories of grading vary in severity to include loans which do not appear to have a significant probability of loss at the time of review to grades which indicate a probability that the entire balance of the loan will be uncollectible. If full collection of the loan balance appears unlikely at the time of review, estimates or appraisals of the collateral securing the debt are used to allocate the necessary allowances. A list of loans or loan relationships of \$50,000 or more, which are graded as having more than the normal degree of risk associated with them, is maintained by the internal loan review department. This list is updated on a periodic basis in order to properly allocate necessary allowances and keep management informed on the status of attempts to correct the deficiencies noted in the credit.

Industry experience shows that a portion of the Company's loans will become delinquent and a portion of the loans will require partial or entire charge-off. Regardless of the underwriting criteria utilized, losses may be experienced as a result of various factors beyond the Company's control, including, among other things, changes in market conditions affecting the value of properties and problems affecting the credit of the borrower. Management's determination of the adequacy of allowance for loan losses is based on various considerations, including an analysis of the risk characteristics of various classifications of loans, previous loan loss experience, specific loans which would have loan loss potential, delinquency trends, estimated fair value of the underlying collateral, current economic conditions, the views of the regulators (who have the authority to require additional allowances), and geographic and industry loan concentration.

Edgar Filing: SOUTHSIDE BANCSHARES INC - Form 10-Q

As of March 31, 2006, the Company's review of the loan portfolio indicated that a loan loss allowance of \$7.2 million was adequate to cover probable losses in the portfolio.

For the three months ended March 31, 2006, loan charge-offs were \$703,000 and recoveries were \$525,000, resulting in net charge-offs of \$178,000. For the three months ended March 31, 2005, loan charge-offs were \$642,000 and recoveries were \$349,000, resulting in net charge-offs of \$293,000. The necessary provision expense was estimated at \$281,000 for the three months ended March 31, 2006.

Nonperforming Assets

Nonperforming assets consist of delinquent loans 90 days or more past due, nonaccrual loans, other real estate owned, repossessed assets and restructured loans. Nonaccrual loans are those loans which are 90 days or more delinquent and collection in full of both the principal and interest is in doubt. Additionally, some loans that are not delinquent may be placed on nonaccrual status due to doubts about full collection of principal or interest. When a loan is categorized as nonaccrual, the accrual of interest is discontinued and the accrued balance is reversed for financial statement purposes. Restructured loans represent loans which have been renegotiated to provide a reduction or deferral of interest or principal because of deterioration in the financial position of the borrowers. Categorization of a loan as nonperforming is not in itself a reliable indicator of potential loan loss. Other factors, such as the value of collateral securing the loan and the financial condition of the borrower must be considered in judgments as to potential loan loss. Other Real Estate Owned (OREO) represents real estate taken in full or partial satisfaction of debts previously contracted. The dollar amount of OREO is based on a current evaluation of the OREO at the time it is recorded on the Company's books, net of estimated selling costs. Updated valuations are obtained as needed and any additional impairments are recognized.

Total nonperforming assets at March 31, 2006 were \$2.9 million, a decrease of \$194,000, or 6.3%, from \$3.1 million at December 31, 2005. From December 31, 2005 to March 31, 2006, nonaccrual loans increased \$168,000, or 9.7%, to \$1.9 million. Of the total at March 31, 2006, 28.1% are residential real estate loans, 41.7% are commercial real estate loans, 10.7% are commercial loans, 12.9% are loans to individuals and 6.6% are construction loans. Other real estate owned increased \$18,000, or 12.4%, to \$163,000 at March 31, 2006 from \$145,000 at December 31, 2005. Of the total at March 31, 2006, 38.7% consist of residential dwellings, and 61.3% consist of commercial real estate. The Company is actively marketing all properties and none are being held for investment purposes. Loans 90 days or more past due decreased \$468,000, or 49.5%, to \$477,000. Repossessed assets increased \$67,000, or 670.0%, to \$77,000. Approximately \$39,000 of the repossessed assets at March 31, 2006 represented a loan with an SBA guarantee of approximately 85.0%. Restructured loans increased \$21,000, or 9.3%, to \$247,000.

Expansion

During the three months ended March 31, 2006, the Company opened the following locations:

A traditional branch in Gun Barrel City, Texas in Henderson County;

A full service grocery store branch in Athens, Texas in Henderson County; and

A loan production office in Forney, Texas in Kaufman County.

Accounting Pronouncements

See Note 7 Accounting Pronouncements in the Company's financial statements in this report.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

In the banking industry, a major risk exposure is changing interest rates. The primary objective of monitoring the Company's interest rate sensitivity, or risk, is to provide management the tools necessary to manage the balance sheet to minimize adverse changes in net interest income as a result of changes in the direction and level of interest rates. Federal Reserve monetary control efforts, the effects of deregulation and legislative changes have been significant factors affecting the task of managing interest rate sensitivity positions in recent years.

In an attempt to manage its exposure to changes in interest rates, management closely monitors the Company's exposure to interest rate risk through its ALCO. ALCO meets regularly and reviews the Company's interest rate risk position and makes recommendations to the Board for adjusting this position. In addition, the Board reviews on a monthly basis the Company's asset/liability position. The Company primarily uses two methods for measuring and analyzing interest rate risk: Net income simulation analysis and MVPE modeling. Through these simulations the Company attempts to estimate the impact on net interest income of a 200 basis point parallel shift in the yield curve. The Company's policy guidelines seek to limit the estimated change in net interest income to 10 percent of forecasted net income over the succeeding 12 months and 200 basis point parallel rate shock. The Company's policy guidelines limit the change in market value of equity in a 200 basis point parallel rate shock to 20 percent of the base case. The results of the valuation analysis as of March 31, 2006, were within policy guidelines. Due to the level of the Company's interest bearing demand and savings deposit rates at March 31, 2006, some of these rates cannot move down 200 basis points. As part of the overall assumptions, certain assets and liabilities have been given reasonable floors. In the present interest rate environment, management is primarily focusing on the shock down 100 basis points and the shock up 100 and 200 basis points. This type of simulation analysis requires numerous assumptions including but not limited to changes in balance sheet mix, prepayment rates on mortgage-related assets and fixed rate loans, cash flows and repricings of all financial instruments, changes in volumes and pricing, future shapes of the yield curve, relationship of market interest rates to each other (basis risk), credit spread and deposit sensitivity. Assumptions are based on management's best estimates but may not accurately reflect actual results under certain changes in interest rates.

Edgar Filing: SOUTHSIDE BANCSHARES INC - Form 10-Q

The following table provides information about the Company's financial instruments that are sensitive to changes in interest rates. Except for the effects of prepayments and scheduled principal amortization on fixed rate loans and mortgage-backed securities, the table presents principal cash flows and related weighted average interest rates by the contractual term to maturity. Adjustable rate student loans totaling \$5.7 million are classified in the one year category. Callable FHLB Advances are presented based on contractual maturity. Callable brokered CDs are presented based on contractual maturity. Loans held for sale totaling \$4.1 million are classified in the one-year category. Nonaccrual loans totaling \$1.9 million, are not included in total loans. All instruments are classified as other than trading.

Other Borrowings	13,927 5.11%					20,619 7.92%	34,546 6.79%	34,546

Edgar Filing: SOUTHSIDE BANCSHARES INC - Form 10-Q

Total Interest Bearing Liabilities	\$	725,182	\$	158,811	\$	110,898	\$	109,758	\$	68,585	\$	211,475	\$	1,384,709	\$	1,373,103
		3.79%		3.40%		3.89%		4.36%		3.97%		2.66%		3.63%		

Residential fixed rate loans are assumed to have annual prepayment rates between 7% and 45% of the portfolio. Residential adjustable rate loans are assumed to have annual prepayment rates between 15% and 50%. Commercial and multi-family real estate loans are assumed to prepay at an annualized rate between 8% and 40%. Consumer loans are assumed to prepay at an annualized rate between 8% and 30%. Commercial loans are assumed to prepay at an annual rate between 8% and 45%. Municipal loans are assumed to prepay at an annual rate between 6% and 18%. Fixed and adjustable rate mortgage-backed securities, including Collateralized Mortgage Obligations (CMOs) and Real Estate Mortgage Investment Conduits (REMICs), have annual payment assumptions ranging from 6% to 50%. At March 31, 2006, the contractual maturity of substantially all of the Company's mortgage-backed or related securities was in excess of ten years. The actual maturity of a mortgage-backed or related security is less than its stated maturity due to regular principal payments and prepayments of the underlying mortgages. Prepayments that are faster than anticipated may shorten the life of the security and affect its yield to maturity. The yield to maturity is based upon the interest income and the amortization of any premium or discount related to the security. In accordance with GAAP, premiums and discounts are amortized over the estimated lives of the loans, which decrease and increase interest income, respectively. The prepayment assumptions used to determine the amortization period for premiums and discounts can significantly affect the yield of the mortgage-backed or related security, and these assumptions are reviewed periodically to reflect actual prepayments. Although prepayments of underlying mortgages depend on many factors, including the type of mortgages, the coupon rate, the age of mortgages, the geographical location of the underlying real estate collateralizing the mortgages and general levels of market interest rates, the difference between the interest rates on the underlying mortgages and the prevailing mortgage interest rates generally is the most significant determinant of the rate of prepayments. During periods of falling mortgage interest rates, if the coupon rate of the underlying mortgages exceeds the prevailing market interest rates offered for mortgage loans, refinancing may increase and accelerate the prepayment of the underlying mortgages and the related security. At March 31, 2006, of the \$849.6 million of mortgage-backed and related securities held by the Company, \$845.9 million were secured by fixed-rate mortgage loans and \$3.7 million were secured by floating-rate mortgage loans.

The Company assumes 70% of savings accounts and non public fund transaction accounts at March 31, 2006, are core deposits and are, therefore, expected to roll-off after five years. All public fund transaction accounts are assumed to roll-off within one year. The Company assumes 30% of money market accounts at March 31, 2006 are core deposits and are, therefore, expected to roll-off after five years. The Company assumes 10% of its platinum money market accounts are core deposits and are, therefore, expected to roll off after five years. No roll-off rate is applied to certificates of deposit. Fixed maturity deposits reprice at maturity.

In evaluating the Company's exposure to interest rate risk, certain limitations inherent in the method of analysis presented in the foregoing table must be considered. For example, although certain assets and liabilities may have similar maturities or periods to repricing, they may react in different degrees to changes in market interest rates. Also, the interest rates on certain types of assets and liabilities may fluctuate in advance of changes in market interest rates, while interest rates on other types may lag behind changes in market rates. Certain assets, such as adjustable rate mortgages, have features which restrict changes in interest rates. Prepayment and early withdrawal levels associated with mortgage-backed securities may deviate significantly from those assumed in calculating the table. Finally, the ability of many borrowers to service their debt may decrease in the event of an interest rate increase. The Company considers all of these factors in monitoring its exposure to interest rate risk.

ITEM 4. CONTROLS AND PROCEDURES

The Company's Chief Executive Officer and its Chief Financial Officer undertook an evaluation of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934 (the "Exchange Act")) as of the end of the period covered by this report and concluded that the Company's disclosure controls and procedures are effective. There have been no changes in the Company's internal controls over financial reporting (as defined by Rule 13a-15(f) and 15d-15(f) of the Exchange Act) that occurred during the Company's last fiscal quarter that materially affected, or is reasonably likely to materially affect the Company's internal controls over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The Company is a party to legal proceedings arising in the normal course of business. Management of the Company believes that such litigation is not material to the financial position or results of the operations of the Company or the Bank.

ITEM 1A. RISK FACTORS

Information regarding risk factors appears in Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations - Forward Looking Information of this Form 10-Q and in Part II Item 7 of our Report on Form 10-K for the fiscal year ended December 31, 2005. There have been no material changes from the risk factors previously disclosed in our Report on Form 10-K.
