NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements include the accounts of Aptargroup, Inc. and its subsidiaries. The terms "Aptargroup" or "Company" as used herein refer to Aptargroup, Inc. and its subsidiaries. All significant intercompany accounts and transactions have been eliminated.

In the opinion of management, the unaudited condensed consolidated financial statements include all adjustments, consisting of only normal recurring adjustments, necessary for a fair statement of consolidated financial position, results of operations, changes in equity and cash flows for the interim periods presented. The accompanying unaudited condensed consolidated financial statements have been prepared by the Company, pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC"). Certain information and footnote disclosure normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") have been condensed or omitted pursuant to such rules and regulations, although the Company believes that the disclosures made are adequate to make the information presented not misleading. Accordingly, these unaudited condensed consolidated financial statements and related notes should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2009. The results of operations of any interim period are not necessarily indicative of the results that may be expected for the year.

ADOPTION OF RECENT ACCOUNTING PRONOUNCEMENTS

The Financial Accounting Standards Board ("FASB") issued new standards for improving disclosures about fair value measurements. This guidance requires enhanced disclosures regarding transfers in and out of the levels within the fair value hierarchy. Separate disclosures are required for transfers in and out of Level 1 and 2 fair value measurements, and the reasons for the transfers must be disclosed. The new disclosures and clarifications of existing disclosures are effective for interim and annual reporting periods beginning after December 15, 2009. As this standard is disclosure related, it did not have a material impact on our financial statements.

The Company has also adopted a new accounting standard which provides amendments to previous guidance on the consolidation of variable interest entities. This standard clarifies the characteristics that identify a variable interest entity ("VIE") and changes how a reporting entity identifies a primary beneficiary that would consolidate the VIE from a quantitative risk and rewards calculation to a qualitative approach based on which variable interest holder has a controlling financial interest and the ability to direct the most significant activities that impact the VIE's economic performance. This statement requires the primary beneficiary assessment to be performed on a continuous basis. The standard is effective for fiscal years beginning after November 15, 2009. The adoption did not have an impact on our financial statements and disclosures.

INCOME TAXES

The Company computes taxes on income in accordance with the tax rules and regulations of the many taxing authorities where the income is earned. The income tax rates imposed by these taxing authorities may vary substantially. Taxable income may differ from pretax income for financial accounting purposes. To the extent that these differences create differences between the tax basis of an asset or liability and its reported amount in the financial statements, an appropriate provision for deferred income taxes is made.

Edgar Filing: APTARGROUP INC - Form 10-Q

The Company has expressed the intention to reinvest the undistributed earnings of its non-U.S. subsidiaries. In its determination of which foreign earnings are permanently reinvested in foreign operations, the Company considers numerous factors, including the financial requirements of the U.S. parent company and those of its foreign subsidiaries, the U.S. funding needs for dividend payments and stock repurchases, and the tax consequences of remitting earnings to the U.S. From this analysis, current year repatriation decisions are made in an attempt to provide a proper mix of debt and shareholder capital both within the U.S. and for non-U.S. operations. Undistributed earnings will continue to be reinvested indefinitely and could become subject to additional tax if they were remitted as dividends or lent to a U.S. affiliate, or if the Company should sell its stock in the subsidiaries. It is not practicable to estimate the amount of additional tax that might be payable on these undistributed non-U.S. earnings. The Company will continue to periodically evaluate if it will repatriate non-U.S. subsidiary current year earnings or a portion thereof. The Company repatriated approximately \$80 million of current year earnings in the second quarter of 2010.

The Company provides a liability for the amount of tax benefits realized from uncertain tax positions. This liability is provided whenever the Company determines that a tax benefit will not meet a more-likely-than-not threshold for recognition. See Note 12 for more information.

EMPLOYER CONTRIBUTIONS

In order to meet or exceed minimum funding levels required by U.S. law, the Company has contributed \$7.4 million, as of September 30, 2010, to its domestic defined benefit plans. The Company also expects to contribute approximately \$6.7 million to its foreign defined benefit plans in 2010, and as of September 30, 2010, has contributed approximately \$0.6 million.

NOTE 5 DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

The Company maintains a foreign exchange risk management policy designed to establish a framework to protect the value of the Company's non-functional denominated transactions from adverse changes in exchange rates. Sales of the Company's products can be denominated in a currency different from the currency in which the related costs to produce the product are denominated. Changes in exchange rates on such inter-country sales or intercompany loans impact the Company's results of operations. The Company's policy is not to engage in speculative foreign currency hedging activities, but to minimize its net foreign currency transaction exposure defined as firm commitments and transactions recorded and denominated in currencies other than the functional currency. The Company may use foreign currency forward exchange contracts, options and cross currency swaps to economically hedge these risks.

The Company maintains an interest rate risk management strategy to minimize significant, unanticipated earnings fluctuations that may arise from volatility in interest rates.

For derivative instruments designated as hedges, the Company formally documents the nature and relationships between the hedging instruments and the hedged items, as well as the risk management objectives, strategies for undertaking the various hedge transactions, and the method of assessing hedge effectiveness. Additionally, in order to designate any derivative instrument as a hedge of an anticipated transaction, the significant characteristics and expected terms of any anticipated transaction must be specifically identified, and it must be probable that the anticipated transaction will occur.

FAIR VALUE HEDGES

The Company has an interest rate swap to convert a portion of its fixed-rate debt into variable-rate debt. Under the interest rate swap contract, the Company exchanges, at specified intervals, the difference between fixed-rate and floating-rate amounts, which is calculated based on an agreed upon notional amount.

As of September 30, 2010, the Company recorded the fair value of the interest rate swap as \$0.3 million in miscellaneous other assets with a corresponding increase to debt related to the fixed-to-variable interest rate swap agreement with a notional principal value of \$5 million. No gain or loss was recorded in the income statement in 2009 or for the three and nine months ended September 30, 2010 as any hedge ineffectiveness for the period was immaterial.

CASH FLOW HEDGES

Edgar Filing: APTARGROUP INC - Form 10-Q

As of September 30, 2010, the Company had one foreign currency cash flow hedge. A French entity of Aptargroup, Aptargroup Holding SAS, has hedged the risk of variability in Euro equivalent associated with the cash flows of an intercompany loan granted in Brazilian Real. The forward contracts utilized were designated as a hedge of the changes in the cash flows relating to the changes in foreign currency rates relating to the loan and related forecasted interest. The notional amount of the foreign currency forward contracts utilized to hedge cash flow exposure was 2.7 million Brazilian Real (\$1.6 million) as of September 30, 2010. The notional amount of the foreign currency forward contracts utilized to hedge cash flow exposure was 4.2 million Brazilian Real (\$2.4 million) as of September 30, 2009.

During the nine months ended September 30, 2010, the Company did not recognize any net gain (loss) as any hedge ineffectiveness for the period was immaterial, and the Company did not recognize any net gain (loss) related to the portion of the hedging instrument excluded from the assessment of hedge effectiveness. The Company's foreign currency forward contracts hedge forecasted transactions for less than two years.

HEDGE OF NET INVESTMENTS IN FOREIGN OPERATIONS

A significant number of the Company's operations are located outside of the United States. Because of this, movements in exchange rates may have a significant impact on the translation of the financial condition and results of operations of the Company's foreign entities. A strengthening U.S. dollar relative to foreign currencies has a dilutive translation effect on the Company's financial condition and results of operations. Conversely, a weakening U.S. dollar has an additive effect. The Company in some cases maintains debt in these subsidiaries to offset the net asset exposure. The Company does not otherwise use derivative financial instruments to manage this risk. In the event the Company plans on a full or partial liquidation of any of its foreign subsidiaries where the Company's net investment is likely to be monetized, the Company will consider hedging the currency exposure associated with such a transaction.

OTHER

As of September 30, 2010, the Company has recorded the fair value of foreign currency forward exchange contracts of \$0.7 million in prepayments and other, \$2.0 million in accounts payable and accrued liabilities, and \$2.5 million in deferred and other

non-current liabilities in the balance sheet. All forward exchange contracts outstanding as of September 30, 2010 had an aggregate contract amount of \$81.2 million.

Table of ContentsNOTE 6 COMMITMENTS AND CONTINGENCIES

The Company, in the normal course of business, is subject to a number of lawsuits and claims both actual and potential in nature. Management believes the resolution of these claims and lawsuits will not have a material adverse or positive effect on the Company's financial position, results of operations or cash flow.

Under its Certificate of Incorporation, the Company has agreed to indemnify its officers and directors for certain events or occurrences while the officer or director is, or was serving, at its request in such capacity. The maximum potential amount of future payments the Company could be required to make under these indemnification agreements is unlimited; however, the Company has a directors' and officers' liability insurance policy that covers a portion of its exposure. As a result of its insurance policy coverage, the Company believes the estimated fair value of these indemnification agreements is minimal. The Company had no liabilities recorded for these agreements as of September 30, 2010.

NOTE 7 STOCK REPURCHASE PROGRAM

During the three and nine months ended September 30, 2010, the Company repurchased approximately 600 thousand and 1.4 million shares for aggregate amounts of \$25.8 million and \$58.8 million, respectively. As of September 30, 2010, the Company has a remaining authorization to repurchase 2.3 million additional shares. The timing of and total amount expended for the share repurchase depends upon market conditions. There is no time limit on the repurchase authorization.

NOTE 9 SEGMENT INFORMATION

The Company operates in the packaging components industry, which includes the development, manufacture and sale of consumer product dispensing systems. The Company is organized into three reporting segments. Operations that sell spray and lotion dispensing systems primarily to the personal care, fragrance/cosmetic and household markets form the Beauty & Home segment. Operations that sell dispensing systems to the pharmaceutical market form the Pharma segment. Operations that sell closures to each market served by Aptargroup form the Closures segment.

The accounting policies of the segments are the same as those described in Note 1, Summary of Significant Accounting Policies in the Company's Annual Report on Form 10-K for the year ended December 31, 2009. The Company evaluates performance of its business segments and allocates resources based upon earnings before interest expense in excess of interest income, stock option and certain corporate expenses, income taxes and unusual items (collectively referred to as Segment Income). Financial information regarding the Company's reportable segments is shown below:

NOTE 10 ACQUISITIONS

Edgar Filing: APTARGROUP INC - Form 10-Q

In March 2010, the Company acquired certain equipment, inventory and intellectual property rights for approximately \$3.0 million in cash. No debt was assumed in the transaction. The purchase price approximated the fair value of the assets acquired and therefore no goodwill was recorded. The results of operations subsequent to the acquisition are included in the reported income statement. The assets acquired are included in the Closures reporting segment.

In August 2009, the Company acquired Covit do Brasil Componentes de Alumínio para Perfumaria Ltda. (Covit do Brasil) for approximately \$7.6 million in cash. Covit do Brasil has been operating in Brazil since 2005 developing and supplying anodized aluminum parts primarily for the fragrance/cosmetic market. Covit do Brasil generally supplies parts to other companies within Aptargroup. No debt was assumed in the transaction. Covit do Brasil's annual revenues were approximately \$7.0 million, of which approximately \$6.0 million were with Aptargroup subsidiaries. The excess purchase price over the fair value of assets acquired was allocated to Goodwill. Goodwill of approximately \$0.7 million was recorded on the transaction. The results of operations subsequent to the acquisition are included in the reported income statement. Covit do Brasil is included in the Beauty & Home reporting segment.

Neither of these acquisitions had a material impact on the results of operations in 2010 or 2009 and therefore no proforma information is presented.

Table of ContentsNOTE 11 STOCK-BASED COMPENSATION

The Company issues stock options and restricted stock units to employees under Stock Awards Plans approved by shareholders. Stock options are issued to non-employee directors for their services as directors under Director Stock Option Plans approved by shareholders. Options are awarded with the exercise price equal to the market price on the date of grant and generally become exercisable over three years and expire 10 years after grant. Restricted stock units generally vest over three years.

Compensation expense recorded attributable to stock options for the first nine months of 2010 was approximately \$9.8 million (\$7.0 million after tax), or \$0.10 per share (basic and diluted). The income tax benefit related to this compensation expense was approximately \$2.9 million. Approximately \$8.8 million of the compensation expense was recorded in selling, research & development and administrative expenses and the balance was recorded in cost of sales. Compensation expense recorded attributable to stock options for the first nine months of 2009 was approximately \$8.4 million (\$6.3 million after tax), or \$0.09 per share (basic and diluted). The income tax benefit related to this compensation expense was approximately \$1.7 million. Approximately \$7.6 million of the compensation expense was recorded in selling, research & development and administrative expenses and the balance was recorded in cost of sales.

The Company uses historical data to estimate expected life and volatility. The weighted-average fair value of stock options granted under the Stock Awards Plans was \$9.18 and \$7.33 per share in 2010 and 2009, respectively. These values were estimated on the respective dates of grant using the Black-Scholes option-pricing model with the following weighted-average assumptions:

Stock Awards Plans:

Nine months ended September 30,	2010	2009
Dividend Yield	1.8%	1.6%
Expected Stock Price Volatility	22.7%	24.2%
Risk-free Interest Rate	3.7%	2.2%
Expected Life of Option (years)	6.9	6.9

The fair value of stock options granted under the Director Stock Option Plan was \$10.07 and \$7.90 per share in 2010 and 2009, respectively. These values were estimated on the respective date of the grant using the Black-Scholes option-pricing model with the following weighted-average assumptions:

Director Stock Option Plans:

Nine months ended September 30,	2010	2009
Dividend Yield	1.7%	1.7%
Expected Stock Price Volatility	22.6%	24.9%

Compensation expense recorded attributable to restricted stock unit grants for the first nine months of 2010 and 2009 was approximately \$452 and \$136 thousand, respectively. The fair value of units vested during the nine months ended September 30, 2010 and 2009 was \$298 and \$323 thousand, respectively. The intrinsic value of units vested during the nine months ended September 30, 2010 and 2009 was \$330 and \$319 thousand, respectively. As of September 30, 2010 there was \$136 thousand of total unrecognized compensation cost relating to restricted stock unit awards which is expected to be recognized over a weighted average period of 1.7 years.

NOTE 12 INCOME TAX UNCERTAINTIES

The Company had approximately \$11.6 and \$10.8 million recorded for income tax uncertainties as of September 30, 2010 and December 31, 2009, respectively. The \$0.8 million change in income tax uncertainties was primarily the result of a \$1.4 million decrease related to the favorable settlements of foreign tax audits and lapse of applicable statute of limitations and \$2.3 million increase related to changes in estimate on prior period tax uncertainties for certain foreign jurisdictions. The amount, if recognized, that would impact the effective tax rate is \$10.7 and \$10.0 million, respectively. The Company does not anticipate any significant changes to the amount recorded for income tax uncertainties over the next 12 months.

NOTE 13 FAIR VALUE

Authoritative guidelines require the categorization of assets and liabilities into three levels based upon the assumptions (inputs) used to price the assets or liabilities. Level 1 provides the most reliable measure of fair value, whereas Level 3 generally requires significant management judgment. The three levels are defined as follows:

- Level 1: Unadjusted quoted prices in active markets for identical assets and liabilities.
- Level 2: Observable inputs other than those included in Level 1. For example, quoted prices for similar assets or liabilities in active markets or quoted prices for identical assets or liabilities in inactive markets.

Edgar Filing: APTARGROUP INC - Form 10-Q

- Level 3: Unobservable inputs reflecting management's own assumptions about the inputs used in pricing the asset or liability.

As of September 30, 2010, the fair values of our financial assets and liabilities were categorized as follows:

	Total	Level 1	Level 2	Level 3
Assets				
Interest rate swap (a)	\$ 302	\$	\$ 302	\$
Forward exchange contracts (b)	668		668	
Total assets at fair value	\$ 970	\$	\$ 970	\$
Liabilities				
Forward exchange contracts (b)	\$ 4,539	\$	\$ 4,539	\$
Total liabilities at fair value	\$ 4,539	\$	\$ 4,539	\$

As of December 31, 2009, the fair values of our financial assets and liabilities were categorized as follows:

(b) Based on observable market transactions of spot and forward rates

Table of Contents

Based on the variable borrowing rates currently available to the Company for long-term obligations with similar terms and average maturities, the fair value of the Company's long-term obligations approximates its book value.

NOTE 14 FACILITIES CONSOLIDATION AND SEVERANCE

In the second quarter of 2009, the Company announced a plan to consolidate two French dispensing closure manufacturing facilities and several sales offices in North America and Europe and has subsequently expanded the program to include additional headcount reductions. The total costs associated with the consolidation/severance programs are \$7.9 million. The plan has been substantially completed, subject to the settlement of remaining reserve balances.

As of September 30, 2010 we have recorded the following activity associated with our consolidation/severance programs:

NET SALES

Net sales for the quarter and nine months ended September 30, 2010 were \$518 million and \$1.5 billion, respectively, representing increases of 9% and 15%, respectively, over the same periods a year ago. The average U.S. dollar exchange rate was stronger compared to the Euro in the third quarter of 2010 compared to 2009, and as a result, changes in exchange rates negatively impacted sales by approximately 5% for the quarter. For the nine months ended September 30, 2010, the exchange rate impact was insignificant. The remaining 14% and 15% of sales increases for the three and nine months ended September 30, 2010, were due primarily to higher product and custom tooling sales to our customers.

For further discussion on net sales by reporting segment, please refer to the segment analysis of net sales and operating income on the following pages.

The following table sets forth, for the periods indicated, net sales by geographic location:

COST OF SALES (EXCLUSIVE OF DEPRECIATION SHOWN BELOW)

Our cost of sales as a percent of net sales decreased to 66.2% in the third quarter of 2010 compared to 67.7% in the third quarter of 2009.

The following factors reduced our cost of sales percentage in the third quarter of 2010:

Improved Utilization of Overhead Costs in Certain Operations. Several of our business operations, especially within the Beauty & Home business segment, saw an increase in unit volumes produced and sold. As a result of these higher production levels, overhead costs were better utilized, thus positively impacting cost of goods sold as a percentage of net sales.

Strengthening of the U.S. Dollar. We are a net importer from Europe into the U.S. of products produced in Europe with costs denominated in Euros. As a result, when the U.S. dollar or other currencies strengthen against the Euro, products produced in Europe (with costs denominated in Euros) and sold in currencies that are stronger compared to the Euro, have a positive impact on cost of sales as a percentage of net sales.

The following factors increased our cost of sales percentage in the third quarter of 2010:

Increasing Raw Material Costs. Raw material costs, in particular plastic resin, increased in the third quarter of 2010 over 2009. While the majority of these cost increases are passed along to our customers in our selling prices, we experienced the usual lag in the timing of passing on these cost increases.

Table of Contents

Mix of Products Sold. Compared to the prior year, our Pharma segment sales represented a smaller percentage of our overall sales. This negatively impacts our cost of sales percentage as margins on our pharmaceutical products typically are higher than the overall company average.

Our cost of sales as a percent of net sales decreased to 65.9% in the first nine months of 2010 compared to 66.8% in the first nine months of 2009. The decrease is primarily due to the same factors mentioned above, except that the change in U.S. Dollar currency had little impact on the results for the first nine months of 2010 compared to 2009.

SELLING, RESEARCH & DEVELOPMENT AND ADMINISTRATIVE

Our Selling, Research & Development and Administrative expenses (SG&A) increased by approximately \$6.7 million in the third quarter of 2010 compared to the same period a year ago. On a constant currency basis, the increase would have been approximately \$9.9 million in the quarter. The majority of the increase is due to general compensation and professional fee increases. SG&A as a percentage of net sales remained relatively consistent at 13.7% compared to 13.6% in the same period of the prior year.

SG&A increased by approximately \$16.0 million for the nine months ended September 30, 2010 compared to the same period a year ago. On a constant currency basis, the increase would have been approximately \$17.8 million for the year. The increase is due primarily to the reason mentioned above as well as higher stock option expense in the first nine months of 2010 versus the prior year. SG&A as a percentage of net sales decreased primarily as a result of leveraging costs compared to the increased sales. For the nine months ended September 30, 2010, the percentage decreased to 14.3% compared to 15.2% of net sales in the same period of the prior year.

DEPRECIATION AND AMORTIZATION

Depreciation and amortization expenses decreased approximately \$0.7 million in the third quarter of 2010 to \$32.4 million compared to \$33.1 million in the third quarter of 2009. On a constant currency basis, the expense would have increased by approximately \$1.2 million in the quarter. The majority of this increase is related to the roll-out of our global enterprise resource planning system, which was first placed into service during the third quarter of 2009. Depreciation and amortization as a percentage of net sales decreased to 6.3% in the third quarter of 2010 compared to 7.0% for the same period a year ago due to the increase in sales.

Depreciation and amortization expenses increased approximately \$4.3 million in the first nine months of 2010 to \$98.9 million compared to \$94.6 million for the first nine months of 2009. On a constant currency basis, the expense would have increased by approximately \$5.8 million for the year. As with the quarter, the majority of this increase is related to the roll-out of our global enterprise resource planning system, which was first placed into service during the third quarter of 2009. Depreciation and amortization as a percentage of net sales decreased to 6.4% for the nine months ended September 30, 2010 compared to 7.0% in the same period of the prior year.

FACILITIES CONSOLIDATION AND SEVERANCE

Facilities consolidation and severance expenses were \$381 thousand in the third quarter of 2010. The amount represents the recognition of expenses related to the Company's previously announced plan to consolidate several facilities and reduce headcount and changes in estimates. The cumulative total amount since the program was initiated during the second quarter of 2009 is \$7.9 million.

OPERATING INCOME

Operating income increased approximately \$18.2 million in the third quarter of 2010 to \$71.1 million compared to \$52.9 million in the same period in the prior year. Strong increases in sales volumes at each segment and improved capacity utilization in our Beauty & Home segment contributed to the rise in operating income. This, combined with our cost containment efforts and the reduction in facilities consolidation and severance program charges, led to the improvement in operating income. Operating income as a percentage of net sales increased to 13.7% in the third quarter of 2010 compared to 11.2% for the same period in the prior year.

Operating income increased approximately \$65.3 million in the first nine months of 2010 to \$206.8 million compared to \$141.5 million in the same period in the prior year. The increase is primarily due to the same reasons mentioned above for the third quarter results. Operating income as a percentage of sales increased to 13.4% in the first nine months of 2010 compared to 10.5% for the same period in the prior year.

NET OTHER EXPENSE

Net other expenses in the third quarter of 2010 decreased to \$3.0 million from \$3.4 million in the same period in the prior year. The majority of this difference is related to a decrease in interest expense of \$0.5 million due to lower interest rates on borrowings.

Net other expenses for the nine months ended September 30, 2010 decreased slightly to \$10.9 million from \$11.2 million in the same period in the prior year. A \$2.0 million decrease in interest expense was largely offset by a corresponding \$0.8 million

Table of Contents

decrease in interest income due to lower interest rates on our investments as well as a \$1.0 million increase in miscellaneous expense mainly due to higher foreign exchange losses.

EFFECTIVE TAX RATE

The reported effective tax rate decreased to 31.0% and increased to 32.2% for the three and nine months ended September 30, 2010, respectively, compared to 32.5% and 32.0% for the same periods ended September 30, 2009. The quarter decrease is related to the favorable settlements of certain foreign tax audits and lapse of applicable statute of limitations and additional tax benefits recognized in Brazil offset by changes in estimate on prior period tax uncertainties for certain foreign jurisdictions recorded in the quarter. The nine month increase reflects a higher dividend repatriation amount in 2010 compared to 2009.

NET INCOME ATTRIBUTABLE TO APTARGROUP, INC.

We reported net income attributable to Aptargroup, Inc. of \$47.0 million and \$132.7 million in the third quarter and nine months ended September 30, 2010, respectively, compared to \$33.5 million and \$88.6 million for the same periods in the prior year.

BEAUTY & HOME SEGMENT

Operations that sell spray and lotion dispensing systems primarily to the personal care, fragrance/cosmetic and household markets form the Beauty & Home segment.

(1) The Company evaluates performance of its business units and allocates resources based upon Segment Income. Segment Income is defined as earnings before interest expense in excess of interest income, stock option and certain corporate expenses, income taxes and unusual items. For a reconciliation of Segment Income to income before income taxes, see Note 9 Segment Information to the Condensed Consolidated Financial Statements in Item 1.

Net sales for the quarter ended September 30, 2010 increased 11% to \$266.8 million compared to \$239.6 million in the third quarter of the prior year. Exchange rate changes negatively impacted sales by approximately 5% during the quarter. Excluding changes in exchange rates, sales increased 16% in the third quarter of 2010 compared to the same quarter of the prior year. Sales, excluding foreign currency changes, to the

Edgar Filing: APTARGROUP INC - Form 10-Q

fragrance/cosmetics and personal care markets increased approximately 25% and 4% respectively in the third quarter of 2010 compared to the same period in the prior year. General market improvement as well as the lack of inventory destocking that occurred in 2009 led to this increase.

Net sales increased 19% in the first nine months of 2010 to \$794.0 million compared to \$665.2 million in the first nine months of the prior year. The stronger U.S. dollar compared to the Euro negatively impacted sales by approximately 1%. Excluding changes in exchange rates, sales increased 20% for the first nine months of 2010 compared to the same period of the prior year. Sales of our products, excluding foreign currency changes, to the fragrance/cosmetic and personal care markets increased approximately 23% and 17%, respectively, in the first nine months of 2010 compared to the first nine months of 2009 primarily due to the reasons noted above.

Segment Income for the third quarter of 2010 increased approximately 82% to \$30.6 million compared to \$16.8 million reported in the same period in the prior year. Profitability increased primarily due to higher sales, capacity utilization and leveraging of our cost structure from increased unit volumes and cost containment efforts. Segment Income for the third quarter of 2009 includes a \$1.2 million charge for consolidation/severance expenses. Excluding this charge, Beauty & Home Segment Income increased 70% or \$12.6 million in the third quarter of 2010 compared to the third quarter of 2009.

Segment Income for the first nine months of 2010 increased approximately 126% to \$87.8 million compared to \$38.8 million reported in the same period in the prior year. The profitability increase for the first nine months of 2010 is due to the same reasons mentioned above for the third quarter. Segment Income for the first nine months of 2009 includes a \$1.5 million charge for consolidation/severance expenses. Excluding this charge, Beauty & Home Segment Income increased 118% or \$47.5 million for the first nine months of 2010 compared to the first nine months of 2009.

CLOSURES SEGMENT

The Closures segment designs and manufactures primarily dispensing closures. These products are sold primarily to the personal care, household and food/beverage markets.

Segment Income	15,403	10,443	51,890	35,800
Segment Income as a percentage of Net Sales	11.1%	8.4%	12.3%	9.8%

Net sales for the quarter ended September 30, 2010 increased approximately 11% to \$139.0 million compared to \$124.8 million in the third quarter of the prior year. The stronger U.S. dollar compared to the Euro negatively impacted sales by approximately 3%. Therefore, core product sales, excluding changes in foreign currency rates, increased 14%. Higher tooling sales contributed a \$0.6 million increase when comparing the third quarter of 2010 to the same period in the prior year. The pass-through of higher resin costs to customers had a positive impact on sales of \$7.2 million. Product sales, excluding foreign currency changes, to the personal care market increased approximately 7% in the third quarter of 2010 compared to the same period in the prior year, while increases for household and food and beverage markets were 34% and 16%, respectively.

These increases are primarily due to strong demand across all regions and markets.

Net sales for the first nine months of 2010 increased approximately 15% to \$420.8 million compared to \$365.1 million in the first nine months of the prior year. The change in the U.S. dollar compared to the Euro had no impact on the year to date increase. The pass-through of higher resin costs to customers had a positive impact on sales of \$17.3 million. Sales excluding foreign currency changes to the personal care, household and food and beverage markets increased approximately 13%, 29% and 11%, respectively, in the first nine months of 2010 compared to the same period in the prior year. These increases are primarily due to the resin price pass-through, strong demand and lack of inventory destocking as discussed above.

Segment Income in the third quarter of 2010 increased approximately 47% to \$15.4 million compared to \$10.4 million reported in the same period in the prior year. The primary causes for the increase are the positive sales factors noted above along with a decrease relating to consolidation/severance expenses. Consolidation/severance expenses were \$0.4 million in 2010 and \$1.4 million in 2009. Excluding the charge for consolidation/severance expenses, Closures segment Income improved 33% or \$4 million.

Segment Income in the first nine months of 2010 increased approximately 45% to \$51.9 million compared to \$35.8 million reported in the same period of the prior year. As noted above, the reported nine month results were negatively impacted by consolidation/severance costs of \$0.4 million in 2010 and \$4.2 million in 2009. The remaining increase in Segment Income is primarily due to the positive sales factors discussed above as well as the leveraging of fixed costs from increased volumes and successes from our cost savings efforts.

PHARMA SEGMENT

Operations that sell dispensing systems to the pharmaceutical market form the Pharma segment.

Segment Income as a percentage of Net Sales

Net sales for the Pharma segment increased by 2% in the third quarter of 2010 to \$111.8 million compared to \$109.3 million in the third quarter of 2009. The stronger U.S. dollar compared to the Euro negatively impacted sales by approximately 6%. Therefore, core product sales, excluding changes in foreign currency rates, increased 8%. The increase was primarily due to higher custom tooling sales and stronger metered dose valve and pump volumes.

Net sales for the Pharma segment improved by 5% in the first nine months of 2010 to \$331.2 million compared to \$315.7 million in the first nine months of 2009. The stronger U.S. dollar compared to the Euro negatively impacted sales by approximately 2%. Therefore, core product sales, excluding changes in foreign currency rates, increased 7%. The increase is related to both metered dose and pump products.

Segment Income in the third quarter of 2010 increased approximately 12% to \$35.2 million compared to \$31.3 million reported in the same period in the prior year. Segment Income in the first nine months of 2010 increased approximately 6% to \$96.8 million compared to \$91.8 million reported in the same period in the prior year. This increase is mainly attributed to the increase in sales.

FOREIGN CURRENCY

A significant number of our operations are located outside of the United States. Because of this, movements in exchange rates may have a significant impact on the translation of the financial statements of our foreign entities. Our primary foreign exchange exposure is to the Euro, but we have foreign exchange exposure to the British Pound and South American and Asian currencies, among others. We manage our exposures to foreign exchange principally with forward exchange contracts to hedge certain transactions and firm purchase and sales commitments denominated in foreign currencies. A strengthening U.S. dollar relative to foreign currencies has a dilutive translation effect on our financial statements. Conversely, a weakening U.S. dollar has an additive effect. In some cases, we sell products denominated in a currency different from the currency in which the related costs are incurred. Changes in exchange rates on such inter-country sales could materially impact our results of operations.

Table of ContentsQUARTERLY TRENDS

Our results of operations in the last quarter of the year typically are negatively impacted by plant shutdowns in December. In the future, our results of operations in a quarterly period could be impacted by factors such as changes in product mix, changes in material costs, changes in growth rates in the industries to which our products are sold, recognition of equity based compensation expense for retirement eligible employees in the period of grant and changes in general economic conditions in any of the countries in which we do business.

We generally incur increased stock option expense in the first quarter compared with the rest of the fiscal year. Our estimated stock option expense on a pre-tax basis (in \$ millions) for the year 2010 compared to the prior year is as follows:

	2010		2009	
First Quarter	\$	6.0	\$	5.1
Second Quarter		2.2		1.7
Third Quarter		1.6		1.6
Fourth Quarter (estimated)		1.4		1.4
	\$	11.2	\$	9.8

LIQUIDITY AND CAPITAL RESOURCES

Our primary sources of liquidity are cash flow from operations and our revolving credit facility. Cash and equivalents decreased to \$328.2 million at September 30, 2010 from \$333.0 million at December 31, 2009 due to changes in exchange rates. Total short and long-term interest bearing debt decreased in the first nine months of 2010 to \$320.6 million from \$338.0 million at December 31, 2009. The ratio of our Net Debt (interest bearing debt less cash and cash equivalents) to Net Capital (stockholder's equity plus Net Debt) decreased at the end of September 2010 to (0.6%) compared to 0.4% at December 31, 2009.

In the first nine months of 2010, our operations provided approximately \$178.4 million in cash flow compared to \$222.1 million for the same period a year ago. In both periods, cash flow from operations was primarily derived from earnings before depreciation and amortization. The decrease in cash flow from operations is due primarily to an increase in working capital compared to the prior year to fund the growth of the business. During the first nine months of 2010, we utilized the majority of the operating cash flows to finance capital expenditures and share repurchases.

We used \$89.1 million in cash for investing activities during the first nine months of 2010, compared to \$109.5 million during the same period a year ago. The decrease in cash used for investing activities is due primarily to \$16.0 million less spent on capital expenditures in the first nine months of 2010 compared to the first nine months of 2009. Cash outlays for capital expenditures for 2010 are estimated to be approximately \$130 million but could vary due to changes in exchange rates as well as the timing of capital projects.

We used approximately \$81.1 million in cash on financing activities in the first nine months of 2010 compared to \$26.5 million in cash provided in the first nine months of the prior year. The increase in cash used from financing activities is due primarily to a decrease of \$19.6 million of short term notes payable and an increase of \$47.7 million in repurchases of our common stock.

Our revolving credit facility and certain long-term obligations require us to satisfy certain financial and other covenants including:

	<u>Requirement</u>	<u>Level at September 30, 2010</u>
Debt to total capital ratio	Maximum of 55%	20%

We expect to close on a \$100 million private debt placement in the fourth quarter. The proceeds of this private placement will be used to primarily pay down our revolving credit facility. Based upon the above debt to total capital ratio covenant we had the ability to borrow approximately an additional \$1 billion at September 30, 2010 before the 55% requirement would be exceeded.

Edgar Filing: APTARGROUP INC - Form 10-Q

Our foreign operations have historically met cash requirements with the use of internally generated cash or borrowings. These foreign subsidiaries have financing arrangements with several foreign banks to fund operations located outside the U.S., but all these lines are uncommitted. Cash generated by foreign operations has generally been reinvested locally. The majority of our \$328.2 million in cash and equivalents is located outside of the U.S.

We believe we are in a strong financial position and have the financial resources to meet business requirements in the foreseeable future. We have historically used cash flow from operations as our primary source of liquidity. In the event that customer demand would decrease significantly for a prolonged period of time and negatively impact cash flow from operations, we would have the ability to restrict and significantly reduce capital expenditure levels, which historically have been the most significant use of cash for us. A prolonged and significant reduction in capital expenditure levels could increase future repairs and maintenance costs as well as have a negative impact on operating margins if we were unable to invest in new innovative products.

On October 20, 2010, the Board of Directors declared a quarterly dividend of \$0.18 per share payable on November 24, 2010 to stockholders of record as of November 3, 2010.

OFF-BALANCE SHEET ARRANGEMENTS

We lease certain warehouse, plant and office facilities as well as certain equipment under noncancelable operating leases expiring at various dates through the year 2029. Most of the operating leases contain renewal options and certain equipment

Table of Contents

leases include options to purchase during or at the end of the lease term. Other than operating lease obligations, we do not have any off-balance sheet arrangements.

RECENTLY ISSUED ACCOUNTING STANDARDS

In January 2010, the FASB issued new guidelines and clarifications for improving disclosures about fair value measurements. This guidance requires enhanced disclosures for purchases, sales, issuances, and settlements on a gross basis for Level 3 fair value measurements. These new disclosures are effective for interim and annual reporting periods beginning after December 15, 2010. As this standard is disclosure related, we do not anticipate the adoption will have a material impact on the Company.

OUTLOOK

As we look to the fourth quarter, we are coming up against a more difficult comparison to a record fourth quarter of last year that was influenced by rebounding markets and the strong euro relative to the dollar. The markets are returning to more normal patterns and the euro is in a weaker position than a year ago. We remain confident that our diverse business model will continue to be a buffer should there be any deceleration to the recent economic recoveries in the U.S. and Europe.

We currently expect fourth quarter diluted earnings per share to be in the range of \$.53 to \$.58 per share compared to \$.52 per share reported last year. Last year's earnings per share included the negative effect of \$.02 per share from charges related to our consolidation/severance program.

FORWARD-LOOKING STATEMENTS

This Management's Discussion and Analysis and certain other sections of this Form 10-Q contain forward-looking statements that involve a number of risks and uncertainties. Words such as expects, anticipates, believes, estimates, and other similar expressions or future or conditional verbs such as will, should, would and could are intended to identify such forward-looking statements. Forward-looking statements are made pursuant to the safe harbor provisions of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 and are based on our beliefs as well as assumptions made by and information currently available to us. Accordingly, our actual results may differ materially from those expressed or implied in such forward-looking statements due to known or unknown risks and uncertainties that exist in our operations and business environment, including but not limited to:

- economic, environmental and political conditions worldwide;
- changes in customer and/or consumer spending levels;
- the availability of raw materials and components (particularly from sole sourced suppliers) as well as the financial viability of these suppliers;
- the cost of materials and other input costs (particularly resin, metal, anodization costs and transportation and energy costs);
- our ability to increase prices;
- significant fluctuations in foreign currency exchange rates;

Edgar Filing: APTARGROUP INC - Form 10-Q

- our ability to contain costs and improve productivity;
- changes in capital availability or cost, including interest rate fluctuations;
- the timing and magnitude of capital expenditures;
- our ability to identify potential new acquisitions and to successfully acquire and integrate such operations or products;
- our ability to meet future cash flow estimates to support our goodwill impairment testing;
- direct or indirect consequences of acts of war or terrorism;
- changes or difficulties in complying with government regulation;
- work stoppages due to labor disputes;
- fiscal and monetary policy, including changes in worldwide tax rates;
- competition, including technological advances;
- our ability to protect and defend our intellectual property rights;
- the demand for existing and new products;
- our ability to manage worldwide customer launches of complex technical products, in particular in developing markets;
- the success of our customers' products, particularly in the pharmaceutical industry;
- difficulties in product development and uncertainties related to the timing or outcome of product development;
- significant product liability claims;
- our ability to implement the strategic realignment of our businesses during 2010, and
- other risks associated with our operations.

Although we believe that our forward-looking statements are based on reasonable assumptions, there can be no assurance that actual results, performance or achievements will not differ materially from any future results, performance or achievements expressed or implied by such forward-looking statements. Readers are cautioned not to place undue reliance on forward-looking statements. We undertake no obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise. ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

A significant number of our operations are located outside of the United States. Because of this, movements in exchange rates may have a material impact on the translation of the financial condition and results of operations of our entities. Our primary foreign exchange exposure is to the Euro, but we also have foreign exchange exposure to the British Pound and South American and Asian currencies, among others. A strengthening U.S. dollar relative to foreign currencies has a dilutive translation effect on our financial condition and results of operations. Conversely, a weakening U.S. dollar has an additive effect.

Additionally, in some cases, we sell products denominated in a currency different from the currency in which the related costs are incurred. Any changes in exchange rates on such inter-country sales may impact our results of operations.

We manage our exposures to foreign exchange principally with forward exchange contracts to hedge certain firm purchase and sales commitments and intercompany cash transactions denominated in foreign currencies.

The table below provides information as of September 30, 2010 about our forward currency exchange contracts. The majority of the contracts expire before the end of the fourth quarter of 2010 with the exception of a few contracts on intercompany loans that expire in the third quarter of 2013.

As of September 30, 2010, we have recorded the fair value of foreign currency forward exchange contracts of \$2.0 million in accounts payable and accrued liabilities, \$0.7 million in prepayments and other and \$2.5 million in deferred and other non-current liabilities in the balance sheet.

At September 30, 2010, we had a fixed-to-variable interest rate swap agreement with a notional principal value of \$5 million which requires us to pay an average variable interest rate (which was 0.7% at September 30, 2010) and receive a fixed rate of 6.6%. The variable rate is adjusted semiannually based on London Interbank Offered Rates. Variations in market interest rates would produce changes in our net income. If interest rates increase by 100 basis points, net income related to the interest rate swap agreement would decrease approximately \$.03 million assuming a tax rate of 32.0%. As of September 30, 2010, we recorded the fair value of the fixed-to-variable interest rate swap agreement of \$0.3 million in miscellaneous other assets with an offsetting adjustment to debt. No gain or loss was recorded in the income statement in 2010 as any hedge ineffectiveness for the period is immaterial.

ITEM 4. CONTROLS AND PROCEDURES

Edgar Filing: APTARGROUP INC - Form 10-Q

DISCLOSURE CONTROLS AND PROCEDURES

The Company's management has evaluated, with the participation of the chief executive officer and chief financial officer of the Company, the effectiveness of the Company's disclosure controls and procedures (as that term is defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) as of September 30, 2010. Based on that evaluation, the chief executive officer and chief financial officer have concluded that these controls and procedures were effective as of such date.

CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

No change in the Company's internal control over financial reporting (as such term is defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) occurred during the Company's fiscal quarter ended September 30, 2010 that materially affected, or is reasonably like to materially affect, the Company's internal control over financial reporting.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

RECENT SALES OF UNREGISTERED SECURITIES

During the quarter ended September 30, 2010, the FCP Aptar Savings Plan (the Plan) sold 2,647 shares of our common stock on behalf of the participants at an average price of \$43.88 per share, for an aggregate amount of \$116 thousand. At September 30, 2010, the Plan owns 18,200 shares of our common stock. The employees of Aptargroup S.A.S. and Valois S.A.S., our subsidiaries, are eligible to participate in the Plan. All eligible participants are located outside of the United States. An independent agent purchases shares of common stock available under the Plan for cash on the open market and we do not issue shares. We do not receive any proceeds from the purchase of shares of common stock under the Plan. The agent under the Plan is Banque Nationale de Paris Paribas Asset Management. No underwriters are used under the Plan. All shares are sold in reliance upon the exemption from registration under the Securities Act of 1933 provided by Regulation S promulgated under that Act.

ISSUER PURCHASES OF EQUITY SECURITIES
