Forward-Looking Statements

Certain matters discussed in this Quarterly Report contain or incorporate statements that we believe are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the Exchange Act), and Rule 175 promulgated thereunder, and Section 21E of the Securities Exchange Act of 1934, as amended, and Rule 3b-6 promulgated thereunder. These statements relate to our financial condition, results of operations, plans, objectives, future performance or business. They usually can be identified by the use of forward-looking language, such as will likely result, may, are expected to, is anticipated, estimate, forecast, projected, intends to, or may include other similar phrases, such as believes, remain, or similar expressions, or future or conditional verbs, such as will, plans, trend. objective, continue, should, could, might, can, or similar verbs. You should not place undue reliance on these statements, as they are subject to risks and uncertainties, including, but not limited to, those described in the documents incorporated by reference. When considering these forward-looking statements, you should keep in mind these risks and uncertainties, as well as any cautionary statements we make. Moreover, you should treat these statements as speaking only as of the date they are made and based only on information then actually known to us.

There are a number of important factors that could cause future results to differ materially from historical performance and these forward-looking statements. Factors that might cause such a difference include, but are not limited to:

• our ability to manage the loan portfolio acquired from FDIC-assisted acquisitions within the limits of the loss protection provided by the FDIC;

- changes in our borrowers performance on loans;
- changes in the commercial and consumer real estate markets;
- changes in our costs of operation, compliance and expansion;
- changes in the U.S. economy, including inflation;
- changes in government interest rate policies;
- changes in laws or the regulatory environment;
- changes in the economy of and monetary policy in the People s Republic of China;
- changes in critical accounting policies and judgments;

• changes in accounting policies or procedures as may be required by the Financial Accounting Standards Board or other regulatory agencies;

- changes in the equity and debt securities markets;
- changes in competitive pressures on financial institutions;
- effect of additional provision for loan losses;

•	fluctuations of our stock price;
•	success and timing of our business strategies;
• and liquidity;	impact of reputational risk created by these developments on such matters as business generation and retention, funding
•	impact of the European debt crisis;
•	impact of potential federal tax increases and spending cuts;
•	impact of adverse judgments or settlements in litigation against the Company;
•	changes in our ability to receive dividends from our subsidiaries; and
• economic conditions.	political developments, wars or other hostilities may disrupt or increase volatility in securities or otherwise affect

For a more detailed discussion of some of the factors that might cause such differences, see the Company s 2012 Form 10-K under the heading ITEM 1A. RISK FACTORS and the information set forth under RISK FACTORS in this Form 10-Q. The Company does not undertake, and specifically disclaims any obligation to update any forward-looking statements to reflect the occurrence of events or circumstances after the date of such statements except as required by law.

EAST WEST BANCORP, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

NOTE 1 BASIS OF PRESENTATION

The condensed consolidated financial statements include the accounts of East West Bancorp, Inc. (referred to herein on an unconsolidated basis as East West and on a consolidated basis as the Company) and its wholly-owned subsidiaries, East West Bank and subsidiaries (East West Bank or the Bank) and East West Insurance Services, Inc. Intercompany transactions and accounts have been eliminated in consolidation. East West also has seven wholly-owned subsidiaries that are statutory business trusts (the Trusts). In accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 810, the Trusts are not consolidated into the accounts of East West Bancorp, Inc.

The interim condensed consolidated financial statements, presented in accordance with accounting principles generally accepted in the United States of America (GAAP), are unaudited and reflect all adjustments that, in the opinion of management, are necessary for a fair statement of financial condition and results of operations for the interim periods. All adjustments are of a normal and recurring nature. Results for the three months ended March 31, 2013 are not necessarily indicative of results that may be expected for any other interim period or for the year as a whole. Certain information and note disclosures normally included in annual financial statements prepared in accordance with GAAP have been condensed or omitted. Events subsequent to the condensed consolidated balance sheet date have been evaluated through the date the financial statements are issued for inclusion in the accompanying financial statements. The unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes included in the Company s Annual Report on Form 10-K for the year ended December 31, 2012.

Certain prior year balances have been reclassified to conform to current year presentation.

NOTE 2 SIGNIFICANT ACCOUNTING POLICIES

Recent Accounting Standards

In October 2012, the FASB issued ASU 2012-06, *Business Combinations (Topic 805): Subsequent Accounting for an Indemnification Asset Recognized at the Acquisition Date as a Result of a Government-Assisted Acquisition of a Financial Institution*. ASU 2012-06 clarifies the applicable guidance for subsequently measuring an indemnification asset recognized as a result of a government-assisted acquisition of a financial institution. The standard instructs that when a reporting entity recognizes an indemnification asset, it should subsequently account for the change in the measurement of the indemnification asset on the same basis as the change in the assets subject to indemnification. Any amortization of changes in value should be limited to the contractual term of the indemnification agreement. The amended guidance is effective

for interim and annual periods beginning on or after December 15, 2012. The adoption of this guidance did not have a material effect on the Company s condensed consolidated financial statements, as the Company had applied this methodology prior to the issuance of this ASU.

In January 2013, the FASB issued ASU 2013-01, *Balance Sheet (Topic 210): Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities.* ASU 2013-01 clarifies that the scope of ASU 2011-01 applies to derivatives, repurchase agreements, and securities lending transactions to the extent that they are (1) offset in the financial statements or (2) subject to an enforceable master netting arrangement or similar agreement. The amended guidance is effective for interim and annual periods beginning on or after January 1, 2013. The adoption of this guidance did not have a material effect on the Company s condensed consolidated financial statements.

Table of Contents

In February 2013, the FASB issued ASU 2013-02, *Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income*. ASU 2013-02 enhances the reporting of reclassifications out of accumulated other comprehensive income by requiring entities to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income if the amount being reclassified is required under GAAP to be reclassified in its entirety to net income. For other amounts that are not required under GAAP to be reclassified in their entirety to net income in the same reporting period, an entity is required to cross-reference other disclosures required under GAAP that provide additional detail about those amounts. The amendments do not change the current requirements for reporting net income or other comprehensive income in financial statements. The amendments are effective for interim and annual periods beginning on or after December 15, 2012. The adoption of this guidance did not have a material effect on the Company s condensed consolidated financial statements.

NOTE 3 FAIR VALUE

Fair value is defined as the price that would be received to sell an asset or be paid to transfer a liability in an orderly transaction between market participants at the measurement date. In determining fair value, the Company uses various methods including market and income approaches. Based on these approaches, the Company utilizes certain assumptions that market participants would use in pricing the asset or liability. These inputs can be readily observable, market corroborated, or generally unobservable inputs. The Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. Based on the observability of the inputs used in the valuation techniques, the Company is required to provide the following information according to the fair value hierarchy noted below. The hierarchy is based on the quality and reliability of the information used to determine fair values. The hierarchy gives the highest priority to quoted prices available in active markets and the lowest priority to data lacking transparency. Financial assets and liabilities carried at fair value will be classified and disclosed in one of the following three categories:

• Level 1 Quoted prices for identical instruments that are highly liquid, observable and actively traded in over-the-counter markets. Level 1 financial instruments typically include U.S. Treasury securities.

• Level 2 Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations whose inputs are observable and can be corroborated by market data. Level 2 financial instruments typically include U.S. Government debt and agency mortgage-backed securities, municipal securities, corporate debt securities, single issuer trust preferred securities, equity swap agreements, foreign exchange options, interest rate swaps, impaired loans and other real estate owned (OREO).

• Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation. This category typically includes pooled trust preferred securities, impaired loans and derivatives payable.

Table of Contents

The Company records investment securities available-for-sale, equity swap agreements, derivative liabilities, foreign exchange options, interest rate swaps and short-term foreign exchange contracts at fair value on a recurring basis. Certain other assets such as impaired loans, other real estate owned, loans held for sale, goodwill, premiums on acquired deposits and other investments are recorded at fair value on a nonrecurring basis. Nonrecurring fair value measurements typically involve assets that are periodically evaluated for impairment and for which any impairment is recorded in the period in which the remeasurement is performed.

In determining the appropriate hierarchy levels, the Company performs a detailed analysis of assets and liabilities that are subject to fair value disclosure. The following tables present both financial and nonfinancial assets and liabilities that are measured at fair value on a recurring and nonrecurring basis. These assets and liabilities are reported on the condensed consolidated balance sheets at their fair values as of March 31, 2013 and December 31, 2012. Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to their fair value measurement. There were no transfers in and out of Levels 1 and 3 or Levels 2 and 3 during the first three months of 2013 and 2012.

⁽¹⁾ Covered OREO results from the WFIB and UCB FDIC-assisted acquisitions for which the Company entered into shared-loss agreements with the FDIC whereby the FDIC will reimburse the Company for 80% of eligible losses. As such, the Company s liability for losses is 20% of the \$126 thousand in losses, or \$25 thousand, and 20% of the \$6.4 million in losses, or \$1.3 million, for the three months ended March 31, 2013 and 2012, respectively.

At each reporting period, all assets and liabilities for which the fair value measurement is based on significant unobservable inputs are classified as Level 3. The following tables provide a reconciliation of the beginning and ending balances for major asset and liability categories measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the three months ended March 31, 2013 and 2012:

		Investment Securities Available-for-Sale Corporate Debt Securities Non-Investment Grade (In thousands)	Derivatives Payable

⁽¹⁾ Total gains or losses represent the total realized and unrealized gains and losses recorded for Level 3 assets and liabilities. Realized gains or losses are reported in the condensed consolidated statements of income.

(2) Unrealized gains or losses on investment securities are reported in accumulated other comprehensive income (loss), net of tax, in the condensed consolidated statements of comprehensive income.

(3) Purchases, issuances, sales, and settlements represent Level 3 assets and liabilities that were either purchased, issued, sold, or settled during the period. The amounts are recorded at their end of period fair values.

¹⁴

Valuation Methodologies

Investment Securities Available-for-Sale The fair values of available-for-sale investment securities are generally determined by prices obtained from independent external pricing service providers who have experience in valuing these securities or by comparison to the average of at least two quoted market prices obtained from independent external brokers. In obtaining such valuation information from third parties, the Company has reviewed the methodologies used to develop the resulting fair values.

The Company s Level 3 available-for-sale securities include four pooled trust preferred securities. The fair values of these investment securities represent less than 1% of the total available-for-sale investment securities. The fair values of the pooled trust preferred securities have traditionally been based on the average of at least two quoted market prices obtained from independent external brokers since broker quotes in an active market are given the highest priority. As a result of the continued illiquidity in the pooled trust preferred securities market, it is the Company s view that current broker prices (which are typically non-binding) on certain pooled trust preferred securities are based on forced liquidation or distressed sale values in very inactive markets that are not representative of the fair value of these securities. As such, the Company considered what weight, if any, to place on transactions that are not orderly when estimating fair value.

For the pooled trust preferred securities, the fair value was derived based on discounted cash flow analyses (the income method) prepared by management. In order to determine the appropriate discount rate used in calculating fair values derived from the income method for the pooled trust preferred securities, the Company has made assumptions using an exit price approach related to the implied rate of return which have been adjusted for general changes in market rates, estimated changes in credit risk and liquidity risk premium, specific nonperformance, and default experience in the collateral underlying the securities. Significant increases (decreases) in any of those inputs in isolation would result in a significantly lower (higher) fair value measurement. Generally, a change in the assumption used for the probability of default is accompanied by a directionally similar change in the assumption used for credit risk and liquidity risk. The actual Level 3 unobservable assumption rates used as of March 31, 2013 include: a constant prepayment rate of 0% for year 1-5 and 1% thereafter, a constant default rate of 1.2% for year 1-5 and 0.75% thereafter, and a recovery assumption of 0% for existing deferrals/defaults and 15% for future deferrals with a recovery lag of 60 months. Losses arising during the period, if any, are recognized in noninterest income.

Derivative Liabilities The Company s derivative liabilities include derivatives payable that fall within Level 3 and all other derivative liabilities which fall within Level 2. The derivatives payable are recorded in conjunction with certain certificates of deposit (host instrument). These CDs pay interest based on changes in either the Chinese currency Renminbi (RMB) or the Hang Seng China Enterprises Index (HSCEI), as designated, and are included in interest-bearing deposits on the condensed consolidated balance sheets. CDs paying interest based on changes in the HSCEI matured during the fourth quarter of 2012. The fair value of these embedded derivatives is based on the income approach. The payable is divided by the portion under FDIC insurance coverage and the non-insured portion. For the FDIC insured portion the Company applied a risk premium comparable to an agency security risk premium. For the non-insured portion, the Company considered its own credit risk in determining the valuation by applying a risk premium based on our institutional credit rating, which resulted in a nominal adjustment to the valuation of the derivative liabilities for the three months ended March 31, 2013. Significant increases (decreases) in any of those inputs in isolation would result in a significant inputs used in deriving the fair value of these derivative contracts are not directly observable. The actual Level 3 unobservable input used as of March 31, 2013 was a credit risk adjustment with a range of 1.17% to 1.25%. The Level 2 derivative liabilities are mostly comprised of the offsetting interest rate swaps with other counterparties. Refer to *Interest Rate Swaps* within this footnote for complete discussion.

Table of Contents

Equity Swap Agreements The Company has entered into equity swap agreements to hedge against market fluctuations in a promotional equity index certificate of deposit product offered to bank customers. This deposit product, which has a term of 5 years, which matured during the fourth quarter of 2012, and paid interest based on the performance of the HSCEI. The fair value of these equity swap agreements is based on the income approach. The fair value is based on the change in the value of the HSCEI and the volatility of the call option over the life of the individual swap agreement. The option value is derived based on the volatility, the interest rate and the time remaining to maturity of the call option. The valuation of equity swap agreements falls within Level 2 of the fair value hierarchy due to the observable nature of the inputs used in deriving the fair value of these derivative contracts. The fair value of the derivative contracts is provided by a third party.

Foreign Exchange Options The Company has entered into foreign exchange option contracts with major investment firms. The settlement amount is determined based upon the performance of the Chinese currency RMB relative to the U.S. Dollar (USD) over the 5-year term of the contract. The performance amount is computed based on the average quarterly value of the RMB per the USD as compared to the initial value. The fair value of the derivative contract is provided by third parties and is determined based on the change in the RMB and the volatility of the option over the life of the agreement. The option value is derived based on the volatility of the option, interest rate, currency rate and time remaining to maturity. The Company s consideration of the counterparty s credit risk resulted in a nominal adjustment the valuation of the foreign exchange options for the three months ended March 31, 2013. The valuation of the option contract falls within Level 2 of the fair value hierarchy due to the observable nature of the inputs used in deriving the fair value of this derivative contract.

Interest Rate Swaps The Company has entered into pay-fixed, receive-variable swap contracts with institutional counterparties to hedge against interest rate swap products offered to bank customers. This product allows borrowers to lock in attractive intermediate and long-term interest rates by entering into a pay-fixed, receive-variable swap contract with the Company, resulting in the customer obtaining a synthetic fixed rate loan. The Company has also entered into pay-variable, receive-fixed swap contracts with institutional counterparties to hedge against certificates of deposit issued. This product allows the Company to lock in attractive floating rate funding. The fair value of the interest rate swap contracts is based on a discounted cash flow approach. The Company s consideration of the counterparty s credit risk resulted in a \$0.4 million adjustment to the valuation of the interest rate swaps for the three months ended March 31, 2013. The valuation of the interest rate swap falls within Level 2 of the fair value hierarchy due to the observable nature of the inputs used in deriving the fair value of this derivative contract.

Short-term Foreign Exchange Contracts The Company entered into short-term foreign exchange contracts to purchase/sell foreign currencies at set rates in the future. These contracts economically hedge against foreign exchange rate fluctuations. The Company enters into contracts with institutional counterparties to hedge against foreign exchange products offered to bank customers. These products allow customers to hedge the foreign exchange risk of their deposits and loans denominated in foreign currencies. The Company does not assume any foreign exchange rate risk as the contract with the customer and the contract with the institutional party mirror each other. The fair value is determined at each reporting period based on the change in the foreign exchange rate. Given the short-term nature of the contracts, the counterparties credit risks are considered nominal and resulted in no adjustments to the valuation of the short-term foreign exchange contracts for the three months ended March 31, 2013. The valuation of the contract falls within Level 2 of the fair value hierarchy due to the observable nature of the inputs used in deriving the fair value of this derivative contract.

Impaired Loans The Company s impaired loans are generally measured using the fair value of the underlying collateral, which is determined based on the most recent valuation information received. The fair values may be adjusted as needed based on factors such as the Company s historical knowledge and changes in market conditions from the time of valuation. Impaired loans fall within Level 2 or Level 3 of the fair value hierarchy as appropriate. Level 2 values are measured at fair value based on the most recent valuation information received on the underlying collateral. Level 3 values, additionally include adjustments by the Company for historical knowledge and for changes in market conditions.

Table of Contents

Other Real Estate Owned The Company's OREO represents properties acquired through foreclosure or through full or partial satisfaction of loans and are recorded at estimated fair value less cost to sell at the time of foreclosure and at the lower of cost or estimated fair value less cost to sell subsequent to acquisition. The fair values of OREO properties are based on third party appraisals, broker price opinions or accepted written offers. These valuations are reviewed and approved by the Company's appraisal department, credit review department, or OREO department. OREO properties are classified as Level 2 assets in the fair value hierarchy.

Loans Held for Sale The Company s loans held for sale are carried at the lower of cost or market value. These loans are currently comprised of mostly student loans. For these loans, the fair value of loans held for sale is derived from current market prices and comparative current sales. For the remainder of the loans held for sale, which fall within Level 2, the fair value is derived from third party sale analysis, existing sale agreements, or appraisal reports on the loans underlying collateral. As such, the Company records any fair value adjustments on a nonrecurring basis.

Fair Value of Financial Instruments

The carrying amounts and fair values of the Company s financial instruments as of March 31, 2013 and December 31, 2012 were as follows:

	Mai	rch 31, 2013	Decemb	per 31, 2012
	Carrying Amount or Notional Amount	Estimated Fair Value	Carrying Amount or Notional Amount	Estimated Fair Value

Other borrowings		20,000			20,000			
Accrued interest payable		10,855			10,855			
Long-term debt		83,762			83,762			

The methods and assumptions used to estimate the fair value of each class of financial instruments for which it is practicable to estimate that value are explained below:

Cash and Cash Equivalents The carrying amounts approximate fair values due to the short-term nature of these instruments. Due to the short-term nature, the estimated fair value is considered to be within Level 1 of the fair value hierarchy.

Table of Contents

Short-Term Investments The fair values of short-term investments generally approximate their book values due to their short maturities. Due to the observable nature of the inputs used in deriving the estimated fair value of these instruments, the estimate is considered to be within Level 2 of the fair value hierarchy.

Securities Purchased Under Resale Agreements Securities purchased under resale agreements with original maturities of 90 days or less are included in cash and cash equivalents. The fair value of securities purchased under resale agreements with original maturities of more than 90 days is estimated by discounting the cash flows based on expected maturities or repricing dates utilizing estimated market discount rates. Due to the observable nature of the inputs used in deriving the estimated fair value of these instruments, the estimate is considered to be within Level 2 of the fair value hierarchy.

Investment Securities Available-for-Sale The fair values of the investment securities available-for-sale are generally determined by reference to the average of at least two quoted market prices obtained from independent external brokers or independent external pricing service providers who have experience in valuing these securities. In obtaining such valuation information from third parties, the Company has reviewed the methodologies used to develop the resulting fair values. For pooled trust preferred securities, fair values are based on discounted cash flow analyses. Due to the unobservable inputs used within the discounted cash flow analysis, the estimate for pooled trust preferred securities is considered to be within Level 3 of the fair value hierarchy. The remainder of the portfolio is classified within Level 1 and Level 2, as discussed earlier in this footnote.

Loans Held for Sale The fair value of loans held for sale is derived from current market prices and comparative current sales or from third party sale analysis, existing sale agreements, or appraisal reports on the loans underlying collateral, as applicable. Due to the observable nature of the inputs used in deriving the estimated fair value of these instruments, the estimate is considered to be within Level 2 of the fair value hierarchy.

Loans Receivable, net (includes covered and non-covered loans) The fair value of loans is determined based on a discounted cash flow approach considered for an entry price value. The discount rate is derived from the associated yield curve plus spreads, and reflects the offering rates in the market for loans with similar financial characteristics. No adjustments have been made for changes in credit within any of the loan portfolios. It is management s opinion that the allowance for loan losses pertaining to performing and nonperforming loans results in a fair valuation of credit for such loans. Due to the unobservable nature of the inputs used in deriving the estimated fair value of these instruments, the estimate is considered to be within Level 3 of the fair value hierarchy.

Investment in Federal Home Loan Bank Stock and Federal Reserve Bank Stock The carrying amount approximates fair value, as the stock may be sold back to the Federal Home Loan Bank and the Federal Reserve Bank at carrying value. The valuation of these instruments is the carrying amount as these investments can only be sold and purchased from the Federal Home Loan Bank and Federal Reserve Bank respectively. The valuation of these investments is considered to be within Level 2 of the fair value hierarchy, as the restrictions and value of the investments are the same for all financial institutions which are required to hold these investments.

Accrued Interest Receivable The carrying amounts approximate fair values due to the short-term nature of these instruments, as such, due to the observable nature of the inputs used in deriving the estimated fair value, these instruments are considered to be within Level 2 of the fair value hierarchy.

Equity Swap Agreements Equity swap agreements matured during the fourth quarter of 2012. The fair value of the derivative contracts is provided by a third party and is determined based on the change in value of the HSCEI and the volatility of the call option over the life of the individual swap agreement. The option value is derived based on the volatility of the option, interest rate, and time remaining to maturity. We also considered the counterparty s credit risk in determining the fair value. Due to the observable nature of the inputs used in deriving the estimated fair value of these instruments, the estimate is considered to be within Level 2 of the fair value hierarchy.

¹⁹

Table of Contents

Foreign Exchange Options The fair value of the derivative contracts is provided by third parties and is determined based on the change in the RMB and the volatility of the option over the life of the agreement. The option value is derived based on the volatility of the option, interest rate, and time remaining to maturity. We also considered the counterparty s credit risk in determining the fair value. Due to the observable nature of the inputs used in deriving the estimated fair value of these instruments, the estimate is considered to be within Level 2 of the fair value hierarchy.

Interest Rate Swaps The fair value of the interest rate swap contracts is provided by a third party and is determined based on a discounted cash flow approach. The Company also considered the counterparty s credit risk in determining the fair value. Due to the observable nature of the inputs used in deriving the estimated fair value of these instruments, the estimate is considered to be within Level 2 of the fair value hierarchy.

Short-term Foreign Exchange Contracts The fair value of short-term foreign exchange contracts is determined based on the change in foreign exchange rate. We also considered the counterparty s credit risk in determining the fair value. Due to the observable nature of the inputs used in deriving the estimated fair value of these instruments, the estimate is considered to be within Level 2 of the fair value hierarchy.

Customer Deposit Accounts The carrying amounts approximate fair value for demand and interest checking deposits, savings deposits, and certain money market accounts as the amounts are payable on demand at the reporting date. Due to the observable nature of the inputs used in deriving the estimated fair value these instruments are considered to be within Level 2 of the fair value hierarchy. For time deposits, the cash flows are based on the contractual runoff and are discounted by the Bank s current offering rates, plus spread. Due to the unobservable nature of the inputs used in deriving the estimated fair value of these instruments, the estimate is considered to be within Level 3 of the fair value hierarchy.

Federal Home Loan Bank Advances The fair value of Federal Home Loan Bank (FHLB) advances is estimated based on the discounted value of contractual cash flows, using rates currently offered by the FHLB of San Francisco for advances with similar remaining maturities at each reporting date. Due to the observable nature of the inputs used in deriving the estimated fair value of these instruments, the estimate is considered to be within Level 2 of the fair value hierarchy.

Securities Sold Under Repurchase Agreements For securities sold under repurchase agreements with original maturities of 90 days or less, the carrying amounts approximate fair values due to the short-term nature of these instruments. At March 31, 2013 and December 31, 2012, most of the securities sold under repurchase agreements are long-term in nature and the fair values of securities sold under repurchase agreements are calculated by discounting future cash flows based on expected maturities or repricing dates, utilizing estimated market discount rates, and taking into consideration the call features of each instrument. Due to the observable nature of the inputs used in deriving the estimated fair value of these instruments, the estimate is considered to be within Level 2 of the fair value hierarchy.

Other Borrowings The carrying amounts approximate fair values due to the short-term nature of these instruments, as such, due to the observable nature of the inputs used in deriving the estimated fair value, these instruments are considered to be within Level 2 of the fair value hierarchy.

Accrued Interest Payable The carrying amounts approximate fair values due to the short-term nature of these instruments, as such, due to the observable nature of the inputs used in deriving the estimated fair value, these instruments are considered to be within Level 2 of the fair value hierarchy.

Table of Contents

Long-Term Debt The fair values of long-term debt are estimated by discounting the cash flows through maturity based on current market rates the Bank would pay for new issuances. Due to the observable nature of the inputs used in deriving the estimated fair value of these instruments, the estimate is considered to be within Level 2 of the fair value hierarchy.

Derivatives Liabilities The Company s derivative liabilities include derivatives payable and all other derivative liabilities. The Company s derivatives payable are recorded in conjunction with certain certificates of deposit (host instrument). These CD s pay interest based on changes in RMB or the HSCEI, as designated. CDs paying interest based on changes in the HSCEI matured during the fourth quarter of 2012. The fair value of derivatives payable is estimated using the income approach. Additionally, we considered our own credit risk in determining the valuation. The other derivative liabilities are mostly comprised of the off-setting interest rate swaps. The fair value of the interest rate swap contracts is provided by a third party and is determined based on a discounted cash flow approach. The Company also considered the counterparty s credit risk in determining the fair value. Due to the observable nature of the inputs used in deriving the estimated fair value of the interest rate swaps within derivative liabilities, the estimate is considered to be within Level 2 of the fair value hierarchy. Due to the unobservable nature of the inputs used in deriving the estimate is considered to be within Level 3 of the fair value hierarchy.

The fair value estimates presented herein are based on pertinent information available to management as of each reporting date. Although we are not aware of any factors that would significantly affect the estimated fair value amounts, such amounts have not been comprehensively revalued for purposes of these financial statements since that date, and therefore, current estimates of fair value may differ significantly from the amounts presented herein.

NOTE 4 STOCK-BASED COMPENSATION

During the three months ended March 31, 2013, total compensation expense recognized in the condensed consolidated statements of income related to both stock options and restricted stock awards reduced income before taxes by \$2.5 million and net income by \$1.5 million.

During the three months ended March 31, 2012, total compensation expense recognized in the condensed consolidated statements of income related to both stock options and restricted stock awards reduced income before taxes by \$3.6 million and net income by \$2.1 million.

The Company received \$442 thousand and \$1.5 million during the three months ended March 31, 2013 and March 31, 2012, respectively, in cash proceeds from stock option exercises. The net tax benefit recognized in equity for stock compensation plans was \$2.6 million and \$29 thousand for the three months ended, March 31, 2013 and March 31, 2012, respectively.

As of March 31, 2013, there are 4,115,745 shares available to be issued, subject to the Company s current 1998 Stock Incentive Plan, as amended.

The Company issues fixed stock options to certain employees, officers, and directors. Stock options are issued at the current market price on the date of grant with a three-year or four-year vesting period and contractual terms of 7 or 10 years. The Company issues new shares upon the exercise of stock options.

²¹

A summary of activity for the Company s stock options as of and for the three months ended March 31, 2013 is presented below:

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value (In thousands)
Outstanding at beginning of period	677,708	\$ 28.41		
Granted				
Exercised	(23,584)	18.73		
Expired	(141,291)	36.90		
Outstanding at end of period	512,833	\$ 26.52	1.56 years	\$ 1,786
Vested or expected to vest at end of period	512,833	\$ 26.52	1.56 years	\$ 1,786
Exercisable at end of period	512,833	\$ 26.52	1.56 years	\$ 1,786

A summary of changes in unvested stock options and related information for the three months ended March 31, 2013 is presented below:

	Shares	Weighted Average Grant Date Fair Value (per share)
Unvested at January 1, 2013	14,502 \$	3.00
Granted		
Vested	(14,502)	3.00
Forfeited		
Unvested at March 31, 2013	\$	

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option-pricing model with the following assumptions: 1) the expected term (estimated period of time outstanding) of stock options granted is estimated using the historical exercise behavior of employees; 2) the expected volatility is based on historical volatility for a period equal to the stock option s expected term; 3) the expected dividend yield is based on the Company s prevailing dividend rate at the time of grant; and 4) the risk-free rate is based on the U.S. Treasury strips in effect at the time of grant equal to the stock option s expected term. The Company did not issue any stock options during the three months ended March 31, 2013 and 2012.

During the three months ended March 31, 2013 and 2012, information related to stock options is presented as follows:

	Three Mon Marc	ed	
	2013	2012	
Weighted average grant date fair value of stock options granted			
during the period (1)	N/A		N/A
Total intrinsic value of options exercised (in thousands)	\$ 127	\$	575

Edgar Filing: EAST WEST BANCORP INC - Form 10)-Q
---	-----

Total fair value of options vested (in thousands)\$363\$3,001

(1) The Company did not issue any stock options during the three months ended March 31, 2013 and 2012.

As of March 31, 2013, all stock options are fully vested and all compensation cost related to stock options have been recognized.

Restricted Stock Awards

In addition to stock options, the Company also grants restricted stock awards to directors, officers and employees. The restricted stock awards fully vest after one to five years of continued employment from the date of grant; some of the awards are also subject to achievement of certain established financial goals. The Company becomes entitled to an income tax deduction in an amount equal to the taxable income reported by the holders of the restricted stock when the restrictions are released and the shares are issued. Restricted stock awards are forfeited if officers and employees terminate prior to the lapsing of restrictions or if established financial goals are not achieved. The Company records forfeitures of issued restricted stock as treasury share repurchases.

A summary of the activity for the Company s time-based and performance-based restricted stock awards as of March 31, 2013, including changes during the three months then ended, is presented below:

	March 31, 2013 Restricted Stock Awards										
	Tin	Time-Based Perform									
			Weighted Average	a.		Weighted Average					
	Shares		Price	Shares		Price					
Outstanding at beginning of											
period	1,512,396	\$	16.30	694,838	\$	22.43					
Granted	11,432		22.31	477,165		25.25					
Vested	(677,815)		15.66	(170,427)		22.58					
Forfeited	(20,262)		17.54	(6,419)		22.65					
Outstanding at end of period	825,751	\$	16.87	995,157	\$	23.75					

Restricted stock awards are valued at the closing price of the Company s stock on the date of award. The weighted average fair values of time-based restricted stock awards granted during the period ended March 31, 2013 and 2012 were \$22.31 and \$20.98, respectively. The weighted average fair value of performance-based restricted stock awards granted during the period ended March 31, 2013 and 2012 were \$25.25 and \$22.05, respectively. The total fair value of time-based restricted stock awards vested for the three months ended March 31, 2013 and 2012 was \$16.3 million and \$1.8 million, respectively. The total fair value of performance-based restricted stock awards vested during the three months ended March 31, 2013 and 2012 was \$4.3 million and \$1.9 million, respectively.

As of March 31, 2013, total unrecognized compensation cost related to time-based and performance-based restricted stock awards amounted to \$6.7 million and \$20.7 million, respectively. This cost is expected to be recognized over a weighted average period of 1.4 years and 2.4 years, respectively.

NOTE 5 INVESTMENT SECURITIES

An analysis of the investment securities available-for-sale portfolio is presented as follows:

		Amortized Cost			Gross Unrealized Gains (In tho	usands)	Gross Unrealized Losses	Estimated Fair Value

⁽¹⁾ For the three months ended March 31, 2013, the Company did not record any OTTI. The Company recorded \$99 thousand, on a pre-tax basis, of the credit portion of OTTI through earnings and \$5.1 million of the non-credit portion of OTTI for pooled trust preferred securities in other comprehensive income for the year ended December 31, 2012.

The Company did not have any investment securities held-to-maturity as of March 31, 2013 and December 31, 2012.

The fair values of investment securities are generally determined by reference to the average of at least two quoted market prices obtained from independent external brokers or prices obtained from independent external pricing service providers who have experience in valuing these securities. The Company performs a monthly analysis on the pricing service quotes and the broker quotes received from third parties to ensure that the prices represent a reasonable estimate of fair value. The procedures include, but are not limited to, initial and ongoing review of third party pricing methodologies, review of pricing trends, and monitoring of trading volumes. The Company assesses whether the prices received from independent brokers represent a reasonable estimate of fair value through the use of internal and external cash flow models developed that are based on spreads and, when available, market indices. As a result of this analysis, if the Company determines there is a more appropriate fair value based upon available market data, the price received from third parties is adjusted accordingly.

Table of Contents

Prices from third party pricing services are often unavailable for securities that are rarely traded or are traded only in privately negotiated transactions. As a result, certain securities are priced via independent broker quotations that utilize inputs that may be difficult to corroborate with observable market based data. Additionally, the majority of these independent broker quotations are non-binding.

As a result of the ongoing financial crisis in the U.S. and global markets, the market for the pooled trust preferred securities has been distressed since mid-2007. It is the Company s view that current broker prices (which are typically non-binding) on these securities are based on forced liquidation or distressed sale values in very inactive markets that are not representative of the fair value of these securities. As such, the Company considered what weight, if any, to place on transactions that are not orderly when estimating fair value. For the pooled trust preferred securities the Company determined their fair values using the methodologies set forth in Note 3 to the Company s condensed consolidated financial statements presented elsewhere in this report.

The following table shows the Company s rollforward of the amount related to OTTI credit losses for the periods shown:

	Three Months Ended March 31,							
		2013	(anda)	2012				
Beginning balance, January 1,	\$	(In thou) 115,511	(sands)	115,412				
Addition of other-than-temporary impairment that was not previously recognized	Ψ	113,311	ψ	115,712				
Additional increases to the amount related to the credit loss for which								
an other-than-temporary impairment was previously recognized				99				
Reduction for securities sold								
Ending balance	\$	115,511	\$	115,511				

During the three months ended March 31, 2013, the Company recorded \$5.6 million of gross gains and no gross losses resulting in a net income statement impact of \$5.6 million of gain on sale of investment securities. During the three months ended March 31, 2012, the Company recorded \$1.7 million of gross gains and \$1.2 million of gross losses resulting in a net income statement impact of \$483 thousand of gain on sale of investment securities available-for-sale amounted to \$2.3 million and \$203 thousand for the three months ended March 31, 2013 and 2012, respectively. Total net proceeds for these sales were \$196.9 million and \$260.3 million for the three months ended March 31, 2013 and 2012, respectively.

The following tables show the Company s investment portfolio s gross unrealized losses and related fair values, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, as of March 31, 2013 and December 31, 2012:

	Less Than 12 Months				12 Month	Aore	Total
