NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

(1) BASIS OF PRESENTATION

Interim Financial Statements

The consolidated financial statements and accompanying financial information as of September 30, 2002 and for the three and nine months ended September 30, 2002 and 2001 are unaudited and, in the opinion of management, include all adjustments (consisting only of normal recurring adjustments) which Predictive Systems, Inc. (the "Company" or "Predictive") considers necessary for a fair presentation of the financial position of the Company at such dates and the operating results and cash flows for those periods. The financial statements included herein have been prepared in accordance with generally accepted accounting principles and the instructions of Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted. These financial statements should be read in conjunction with the Company's financial statements for the year ended December 31, 2001 contained in its Annual Report on Form 10-K. Results for interim periods are not necessarily indicative of results for the entire year.

Recently Issued Accounting Pronouncements

In July 2001, the FASB issued Statement of Financial Accounting Standards No. 141, "Business Combinations" (SFAS 141) and No. 142, "Goodwill and Other Intangible Assets" (SFAS 142). SFAS 141 requires all business combinations initiated after June 30, 2001 to be accounted for using the purchase method of accounting. Under SFAS 142, goodwill and intangible assets with indefinite lives are no longer amortized but are reviewed annually (or more frequently if

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

impairment indicators arise) for impairment. Separable intangible assets that are not deemed to have indefinite lives will continue to be amortized over their useful lives (but with no maximum life). The amortization provisions of SFAS 142 apply to goodwill and intangible assets acquired after June 30, 2001. The Company adopted the provisions of SFAS 142 effective January 1, 2002. As required by the transitional provisions of SFAS 142, the Company evaluated goodwill and intangible assets with indefinite lives for impairment as of January 1, 2002. This evaluation was completed during the second quarter of 2002. As a result of this transitional testing, the Company recorded a noncash impairment charge of \$23,307,626 to reduce the carrying value of its goodwill and other indefinite lived intangible assets. Such charge is reflected as a cumulative effect of change in accounting principle in the accompanying consolidated statements of operations for the nine months ended September 30, 2002.

In July 2001, the FASB issued Statement of Financial Accounting Standard No. 143, "Accounting for Asset Retirement Obligations" (SFAS 143), which is effective for fiscal years beginning after June 15, 2002. SFAS 143 requires, among other things, the accounting and reporting of legal obligations associated with the retirement of long-lived assets that result from the acquisition, construction, development or normal operation of a long-lived asset. The Company believes the adoption of SFAS 143 will not have a material impact on its financial position or results of operations.

In August 2001, the FASB issued Statement of Financial Accounting Standard No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets" (SFAS 144). This statement supersedes Statement of Financial Accounting Standard No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of" (SFAS 121) and Accounting Principles Board Opinion No. 30, "Reporting Results of Operations - Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions." The Statement retains the fundamental provisions of SFAS 121 for recognition and measurement of impairment, but amends the accounting and reporting standards for segments of a business to be disposed of. The Company adopted the provisions of SFAS 144 effective January 1, 2002. Given the decline in revenues and market capitalization of the Company and the overall deterioration of market conditions in the enterprise sector, the Company reviewed its long-lived assets for impairment during the second quarter of 2002. Based on this review, the Company recognized an impairment charge to reduce the carrying value of its finite lived intangible assets and property and equipment of \$8,743,545 and \$4,510,193, respectively. Such charges are reflected in the accompanying consolidated statements of operations for the nine months ended September 30, 2002.

In November 2001, the Emerging Issues Task Force (EITF) of the FASB concluded that reimbursements received for "out-of-pocket" expenses should be classified as revenue, and correspondingly cost of services, in the income statement. This accounting treatment should be applied in financial reporting periods (years) beginning as early as the first quarter of 2002. Upon application of the pronouncement, comparative financial statements for prior periods must also be reclassified in order to ensure consistency among all periods presented. The Company adopted this pronouncement effective January 1, 2002 and has separately disclosed the impact of adoption in the consolidated statements of operations.

In April 2002, the FASB issued Statement of Financial Accounting Standard No. 145 "Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections" (SFAS 145). This statement eliminates the automatic classification of gain or loss on an extinguishment of

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

debt as an extraordinary item of income and requires that such gain or loss be evaluated for extraordinary classification under the criteria of Accounting Principles Board No. 30 "Reporting Results of Operations." This statement also requires sales-leaseback accounting for certain lease modifications that have economic effects that are similar to sales-leaseback transactions, and makes various other technical corrections to existing pronouncements. This statement will be effective for the Company for the year ending December 31, 2003. The Company is currently assessing, but has not yet determined the effect, if any, of SFAS 145 on its financial position or results of operations.

In July 2002, the Financial Accounting Standards Board issued Statement of Financial Accounting Standard No. 146, "Accounting for Costs Associated with Exit or Disposal Activities" (SFAS 146). SFAS 146 will supersede EITF No. 94-3, "Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)." SFAS 146 requires that costs associated with an exit or disposal plan be recognized when incurred rather than at the date of a commitment to an exit or disposal plan. SFAS 146 is to be applied prospectively to exit or disposal activities initiated after December 31, 2002. The Company is currently assessing, but has not yet determined the effect, if any, of SFAS 146 on its financial position or results of operations.

Reclassification

Certain prior year amounts have been reclassified to conform to their current year presentation.

(2) NET INCOME (LOSS) PER SHARE

Basic net income (loss) per share is computed by dividing net income (loss) available to common stockholders by the weighted average number of common shares outstanding. Diluted net income (loss) per share reflects the potential dilution that would occur if securities or other contracts to issue common stock were exercised or converted into common stock, unless they are anti-dilutive.

The conversion of 11,809,524 and 14,145,705 outstanding options as of September 30, 2002 and 2001, respectively, were not considered in the calculation of diluted net loss per common share for the respective three and nine month period ended September 30, 2002 and 2001 as the effect would be anti-dilutive.

5

(3) COMPREHENSIVE INCOME (LOSS)

The components of comprehensive income (loss) for the three and nine months ended September 30, 2002 and 2001 are as follows:

	Three Months Ended September 30,	
	2002	2001
	(unaudited)	
Net loss	\$ (2,076,396)	\$ (84,248,390)

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

Unrealized gain (loss) on investments	1,653	3,931
Foreign currency translation adjustment	9,582	320,445
Comprehensive loss	\$ (2,065,161)	\$ (83,924,014)

(4) RESTRICTED CASH

In August 2002, the Company was required under the terms of a customer contract to provide a letter of credit for the value of services to be performed. The credit facility agreement used to provide this financial guarantee places restrictions on the Company's cash and cash equivalents until the services are rendered to the customer. The services are expected to be fully rendered by the end of the fourth quarter of 2002. Restricted cash of \$1,036,869 as of September 30, 2002 was pledged as collateral under this agreement and has been reflected on the balance sheet as a current asset.

(5) BUSINESS CONCENTRATIONS AND CREDIT RISK

For the three months ended September 30, 2002 and 2001, approximately 14% and 17%, respectively, of revenues before reimbursed expenses were from one customer who is a related party (Note 8). Two other customers accounted for approximately 32% of revenues before reimbursed expenses for the three months ended September 30, 2002, whereas one customer accounted for approximately 13% of revenues before reimbursed expenses for the three months ended September 30, 2001.

For the nine months ended September 30, 2002 and 2001, approximately 16% and 19%, respectively, of revenues before reimbursed expenses were from one customer who is a related party (Note 8). One other customer accounted for approximately 14% of revenues before reimbursed expenses for the nine months ended September 30, 2002. There were no other customers that accounted for more than 10% of revenues before reimbursed expenses for the nine months ended September 30, 2001.

(6) GOODWILL AND INTANGIBLE ASSETS

In July 2001, the FASB issued SFAS No. 141, "Business Combinations" and SFAS No. 142, "Goodwill and Other Intangible Assets." SFAS No. 141 requires that all business combinations subsequent to June 30, 2001 be accounted for under the purchase method of accounting. SFAS No. 141 also requires that the fair value of an assembled workforce acquired be included in the amount initially recorded as goodwill. The Company reclassified into goodwill \$2,947,748 initially recorded as other intangible assets related to the value of the assembled workforce of Synet Service Corporation ("Synet") and Global Integrity Corporation ("Global Integrity") as required by this statement. SFAS No. 142 requires that upon adoption, amortization of goodwill and indefinite lived intangibles cease, and instead, the carrying value of goodwill be evaluated for impairment on at least an annual basis.

The Company adopted this standard effective January 1, 2002. The Company evaluated goodwill and its tradename intangible asset for impairment during the second quarter of 2002 and determined that an impairment of \$23,307,626 existed at January 1, 2002. Accordingly, the Company restated the results for the three

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

months ended March 31, 2002 to reflect the adoption of SFAS 142 as follows:

	Three Months Ended March 31, ----- 2002 -----
Originally reported net loss	\$ (8,252,271)
Cumulative effect of change in accounting principle	(23,307,626)
 Net loss as restated	 \$ (31,559,897) =====
 Originally reported basic and diluted net loss per common share	 \$ (0.22)
Cumulative effect of change in accounting principle	(0.63)
 Basic and diluted net loss per common share as restated	 \$ (0.85) =====

The Company's reporting units utilized for evaluating the recoverability of goodwill are the same as its operating segments.

The following table reports the amounts that loss and loss per basic and diluted common share before the cumulative effect of change in accounting principle would have been in all periods presented, exclusive of the amortization of goodwill and indefinite lived intangibles recognized in those periods.

	Three Months Ended September 30, -----		Nine Months E September 3 -----	
	2002	2001	2002	2001
Reported loss before cumulative effect of change in accounting principle	\$ (2,076,396)	\$ (84,248,390)	\$ (35,676,685)	\$
Add: Goodwill amortization	--	5,055,276	--	--
Add: Assembled workforce amortization	--	388,836	--	--
Add: Tradename amortization	--	126,500	--	--
 Adjusted loss before cumulative effect of change in accounting principle	 \$ (2,076,396) =====	 \$ (78,677,778) =====	 \$ (35,676,685) =====	 \$ =====
 Reported basic and diluted loss per common share before cumulative effect of change in accounting principle	 \$ (0.06)	 \$ (2.33)	 \$ (0.96)	 \$
Add: Goodwill amortization	--	0.14	--	--
Add: Assembled workforce amortization	--	0.01	--	--
Add: Tradenames amortization	--	--	--	--

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

Adjusted basic and diluted loss per common share before cumulative effect of change in accounting principle	\$ (0.06)	\$ (2.18)	\$ (0.96)	\$
	=====	=====	=====	=====

Changes in the carrying amount of goodwill for the nine months ended September 30, 2002, by operating segment, are as follows:

	US Consulting	Managed Security Services	Internal Consulting
	-----	-----	-----
Balance as of January 1, 2002	\$ 14,071,908	\$ 7,485,804	\$ 2,230,000
Cumulative effect of change in accounting principle	(14,071,908)	(7,485,804)	
Balance as of September 30, 2002	\$ --	\$ --	\$ 2,230,000
	=====	=====	=====

7

As of September 30, 2002 and December 31, 2001, the Company's intangible assets and related accumulated amortization consisted of the following:

	As of September 30, 2002			As of December 31, 2001	
	Gross Carrying Value	Accumulated Amortization	Net	Gross Carrying Value	Accumulated Amortization
	-----	-----	-----	-----	-----
Amortized intangible assets					
Customer list	\$ --	\$ --	\$ --	\$ 4,500,000	\$ 1,629,168
Developed technology	--	--	--	9,575,000	1,994,789
Assembled workforce	--	--	--	4,666,000	1,718,252
Total	--	--	--	18,741,000	5,342,209
Indefinite lived intangible assets					
Tradenames	--	--	--	2,530,000	527,084
Total	--	--	--	2,530,000	527,084
Total	\$ --	\$ --	\$ --	\$21,271,000	\$ 5,869,293
	=====	=====	=====	=====	=====

The aggregate amortization expense for other intangible assets was approximately \$1,369,086 during the three months ended September 30, 2001 and \$1,960,500 and \$4,107,331 during the nine months ended September 30, 2002 and 2001,

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

respectively. As of September 30, 2002, the Company had no intangible assets subject to amortization.

(7) IMPAIRMENT OF LONG-LIVED ASSETS

As a result of the Company's operating performance for the six months ended June 30, 2002, the corresponding decline in its market capitalization, the general economic environment, and its forecasted operating results for the foreseeable future, the Company evaluated the carrying value of the long lived assets of its US Consulting and Managed Security Services reporting units for impairment in accordance with the provisions of SFAS 144 as of June 30, 2002. An impairment loss under SFAS 144 is recognized if the carrying amount of a long-lived asset group is not recoverable and exceeds its fair value. The carrying amount of a long-lived asset group is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset group. An impairment is measured as the amount by which the carrying amount of a long-lived asset group exceeds its fair value. Given the projected operating performance over the remaining useful lives of the definite lived intangible assets and other long-lived assets for the US Consulting and Managed Security Services reporting units, it was determined that the carrying value of these assets were not recoverable as of the end of the second quarter of 2002. As a result of these determinations, the Company recorded a charge in June 2002 for the impairment of intangibles and the impairment of property and equipment of \$8,743,545 and \$4,510,193, respectively. The fair value of the asset groups was determined based on the discounted cash flows expected to be generated from such asset groups over the estimated remaining useful life of the principle asset in each group. There were no events or changes in circumstances that caused the Company to review for impairment its long-lived assets during the three months ended September 30, 2002.

The following is a summary of the impairment charges for the nine months ended September 30, 2002:

	US Consulting	Managed Security Services	Total
Impairment of intangibles:			
Customer lists	\$1,254,585	\$ 866,249	\$2,120,834
Developed technology	2,185,495	4,437,216	6,622,711
	\$3,440,080	\$5,303,465	\$8,743,545
Impairment of property and equipment:			
Computer equipment	\$1,587,881	\$ 285,779	\$1,873,660
Office furniture	268,624	--	268,624
Capitalized software	2,217,879	--	2,217,879
Leasehold improvements	150,030	--	150,030
	\$4,224,414	\$ 285,779	\$4,510,193

There were no impairment charges recognized during the three months ended September 30, 2002.

(8) RELATED PARTIES

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

In June 2002 the Company entered into a consulting agreement with Meyer Capital Partners LLC to assist management of the Company in the analysis, valuation and screening process of potential merger and/or acquisition opportunities. A director of the Company is the managing member of Meyer Capital Partners LLC. For the three and nine months ended September 30, 2002, the Company recognized expense of \$30,000 for such services. As of September 30, 2002, the amounts due to Meyer Capital Partners LLC was \$10,000. Such amount is included in accrued expenses and other current liabilities.

8

The Company provides network consulting services to Cisco Systems, Inc. ("Cisco") pursuant to a consulting services agreement. This agreement provides that if the Company gives more favorable rates to another client it will inform Cisco and Cisco will have the right to terminate this agreement. One of the Company's directors is also an officer of Cisco. For the three and nine months ended September 30, 2002 and 2001, the Company recognized revenues of approximately \$0, \$28,000, \$87,000 and \$691,000, respectively, from services performed for Cisco. As of September 30, 2002, amounts due from Cisco were \$447. Such amount is included in related party receivables. There were no amounts due from Cisco as of December 31, 2001.

The Company provides network consulting services to BellSouth Corporation ("BellSouth") pursuant to a consulting services agreement. One of the Company's directors is also an officer of BellSouth. For the three and nine months ended September 30, 2002 and 2001, the Company recognized revenues of approximately \$1,700,000, \$6,100,000, \$2,600,000 and \$10,100,000, respectively, from services performed for BellSouth. As of September 30, 2002 and December 31, 2001, amounts due from BellSouth were \$1,269,121 and \$994,322, respectively. Such amounts are included in related party receivables.

The Company provided network consulting services to Riversoft PLC pursuant to a consulting services agreement. Additionally, the Company purchased approximately \$500,000 of software inventory from Riversoft in 2001. Two of the Company's directors served on Riversoft PLC's Board of Directors, one of which served until December 19, 2001. One of the directors is also a general partner for a venture capital firm, which owned approximately 10% of Riversoft PLC. In 2002, Riversoft PLC was sold in an all cash transaction. For the nine months ended September 30, 2001, the Company recognized revenues of approximately \$70,000 from services performed for Riversoft PLC. No revenues were recognized for the three and nine months ended September 30, 2002 or the three months ended September 30, 2001. As of December 31, 2001, amounts due from Riversoft PLC were \$50,343. Such amount is included in related party receivables.

The Company and Science Application International Corporation ("SAIC") provide network and security consulting services to each other pursuant to existing agreements. For the three and nine months ended September 30, 2002 and 2001, revenues from SAIC were approximately \$19,000, \$151,000, \$49,000 and \$177,000, respectively, and the Company purchased approximately \$0, \$4,000, \$29,000 and \$105,000, respectively, in consulting services from SAIC. Additionally, SAIC provided the Company with various services relating to alarm, telecommunications and IT support functions and the Company rented certain of its office space from SAIC. For the three and nine months ended September 30, 2002 and 2001, the Company paid approximately \$583,000, \$1,124,000, \$198,000 and \$740,000, respectively, for such services and the rental of office space including the buyout of the real estate lease in August 2002. Of the amounts paid for the nine months ended September 30, 2002, approximately \$136,000 was expensed. There were no amounts expensed for the three months ended September 30, 2002. The remaining amounts paid were accrued in the prior year in connection with our acquisition

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

plan. In addition, the Company and SAIC license certain of their respective intellectual property to the other. The Company believes that these transactions are on terms that are no less favorable than those that could be obtained from unaffiliated third parties. As of September 30, 2002, \$155,147 was due from SAIC. Such amount is included in related party receivables. There were no amounts due from SAIC as of December 31, 2001.

On December 22, 2000, the Company purchased a \$1,000,000 12% Convertible Promissory Note (the "Note") issued by Paradigm4, Inc. ("Paradigm4") which the Company recorded as a long-term investment in related party. The Note was payable 90 days from the date of purchase. The Company received a stock purchase warrant (the "Warrant") to purchase up to 0.7692% of the outstanding shares of Paradigm4 on a fully diluted basis at a price equal to \$.01 per share. The Warrant was exercisable immediately and expires on December 22, 2005. On March 22, 2001, Paradigm4 filed for federal bankruptcy protection. This action created significant uncertainty regarding the Company's investment in Paradigm4. As a result, the Company recorded a loss of \$1,000,000 on its investment for the nine months ended September 30, 2001.

On October 6, 2000, the Company purchased 1,000,000 shares of Series A Preferred Stock in Three Pillars, which the Company had recorded as a long-term investment in related party. At the time of the investment, Three Pillars had 3,800,000 shares of Series A Preferred Stock and 8,100,000 shares of common stock outstanding, giving the Company an 8.4% interest on an as converted basis. The Series A Preferred Stock has certain antidilution rights, but converts initially on a one for one basis into common stock. The Series A Preferred Stock has a liquidation preference equal to \$1.00 per share plus a 10% cumulative dividend. The Company also received certain registration rights with respect to the shares purchased. During the nine months ended September 30, 2001, the Company recognized a loss on its \$1,000,000 investment in Three Pillars due to management's determination that the value of the investment was impaired. The Company did not recognize any revenues from Three Pillars for the nine months ended September 30, 2002 and 2001.

Receivables from employees and stockholders represent short term lending to such parties entered into in the normal course of business.

(9) RESTRUCTURING AND OTHER CHARGES

In February 2001, the Company's management foresaw the need to lower the operating costs of the business given its near-term revenue projections. Therefore, the Company established a plan that included the following: (1) a reduction in its workforce for both domestic and international operations related to professional consultant employees that had been underutilized for several months and also to employees that held various management, sales and administrative positions deemed to be duplicative functions; (2) the closing of several domestic and international regional offices located in geographic areas that no longer cost justified remaining open; and (3) the discontinuance of electronic equipment leases and other expenses related to the reduction in workforce.

In December 2001, the Company formed a strategic alliance with an unaffiliated third party to outsource the monitoring services provided by its Managed Security Services division. As a result of this alliance, the Company established a restructuring plan that included the following: (1) a reduction of the Company's workforce; (2) the write-off of equipment and software development costs associated with the Company's security operations center which was no

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

longer needed as a result of the outsourcing; and (3) the incurrence of nonrecoverable costs to convert clients to the alliance partner.

In January 2002, the Company's management foresaw the need to continue to lower the operating costs of the business given continuing difficult market conditions in the enterprise sector. Therefore, the Company established a 2002 restructuring plan that included the following: (1) a reduction in its workforce for both domestic and international operations related to professional consultant employees that had been underutilized for several months and also to employees that held various management, sales and administrative positions deemed to be duplicative functions; (2) the closing of additional domestic regional offices located in geographic areas that no longer cost justified remaining open; and (3) the discontinuance of electronic equipment leases and other expenses related to the reduction in workforce.

For the three months ended September 30, 2002, the Company recorded restructuring charges of \$82,740 in connection with its 2002 restructuring plan. Such charges consisted of \$647,404 in severance benefits and other related expenses for a reduction in headcount of 41 employees and \$18,159 for exit costs related to the closing of domestic offices. These charges were offset by a reduction to previously accrued exit costs in the amount of \$582,823 resulting from favorable and unfavorable settlements and changes to subtenant assumptions for leased domestic offices. For the three months ended September 30, 2001, the Company recorded restructuring charges of \$4,571,028 in connection with its 2001 restructuring plan. Such charges consisted of \$951,917 in severance benefits and other related expenses for a reduction in headcount of 86 employees and \$3,619,111 in exit costs related to real estate and electronic equipment. These charges have been reflected as operating expenses of the Company.

For the nine months ended September 30, 2002, the Company recorded restructuring charges of \$4,319,344 in connection with its 2002 restructuring plan. Such charges consisted of \$2,738,751 in severance benefits and other related expenses for a reduction in headcount of 147 employees, \$1,621,775 in exit costs related to real estate and electronic equipment for the closing of domestic offices, and an increase to previously accrued exit costs in the amount of \$108,818 resulting from favorable and unfavorable settlements and changes to subtenant assumptions for leased domestic offices. These charges were offset by \$150,000 received for equipment written-off to restructuring charges in 2001 in connection with the outsourcing of the Company's monitoring services provided as part of the Managed Security Services division. For the nine months ended September 30, 2001, the Company recorded restructuring charges of \$7,846,061 in connection with its 2001 restructuring plan. Such charges consisted of \$2,768,336 in severance benefits and other related expenses for a reduction in headcount of 191 employees and \$5,077,725 in exit costs related to real estate and electronic equipment. These charges have been reflected as operating expenses of the Company. As of September 30, 2002, restructuring charges of \$2,108,464 remained unpaid and are included in accrued expenses and other current liabilities on the accompanying consolidated balance sheet.

A summary of the restructuring charges for the nine months ended September 30, 2002 were as follows:

	Balance as of 12/31/01	Expense	Utilization Non-Cash	Cash	Balance as of 6/30/02
	-----	-----	-----	-----	-----
Severance	\$ 17,320	\$2,738,751	--	\$2,051,270	\$ 704,801

In June 2001, the Company wrote off \$1,029,732 related to the abandonment of internal software management tools that no longer suited the business needs of the Company.

(10) INDUSTRY SEGMENT INFORMATION

The Company's reportable segments are US Consulting, International Consulting, and Managed Security Services. Revenues and cash flows in the US Consulting and International Consulting segments are generated by providing the following services: network design and engineering, network and systems management, integrated customer service, performance management, information security, and business integration services.

10

Revenues and cash flows in the Managed Security Services segment are generated by providing the following services: response and threat advisory through Information Sharing and Analysis Centers, remote monitoring and management of firewalls, and the provision of Open Source Intelligence programs.

The accounting policies for the segments are the same as those described in the "Summary of Significant Accounting Policies," included in the Company's Annual Report on Form 10-K for the year ended December 31, 2001. The Company evaluates the performance of its segments based on their operating income (loss), which represents segment revenues less direct costs of operation, excluding the allocation of corporate expenses. Identifiable assets of the operating segments principally consist of net accounts receivable, unbilled revenues, inventory held for resale and work in process - hardware and software. Accounts receivable and unbilled revenues for US Consulting and Managed Security Services are managed on a combined basis. All other identifiable assets not attributable to industry segments are included in corporate assets. The Company does not track expenditures for long-lived assets on a segment basis. The table below presents information on the revenues and operating income (loss) for each segment for the three and nine months ended September 30, 2002 and 2001, and items which reconcile segment operating income (loss) to the Company's reported loss before cumulative effect of change in accounting principle.

(11) CONTINGENCIES

Except as set forth below, we are not a party to any material legal proceedings.

On November 13, 2001, a securities class action complaint was filed in the United States District Court for the Southern District of New York against Predictive, four investment banks that underwrote the Company's initial public offering, and three of the Company's former officers and directors. This action has been coordinated with over three hundred virtually identical actions against other companies and the investment banks that underwrote their initial public offerings. The complaint filed against the Company generally alleged that the underwriters obtained excessive and undisclosed commissions from customers who received allocations of shares in the Company's initial and secondary public offerings and that the underwriters maintained artificially inflated prices in the after market through "tie-in" arrangements, which required customers to buy additional shares of the Company's stock at pre-determined prices in excess of the offering prices. The complaint further alleged that the Company and certain of its officers and directors violated Sections 11, 12(a)(2) and 15 of the Securities Act of 1933 because the Company's registration statement did not disclose the underwriters' purported misconduct. On April 20, 2002, the

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

plaintiffs amended their complaint, abandoning the Section 12(a)(2) claim, but alleging violations of Sections 10(b) and 20(a) of the Securities Exchange Act, and of Rule 10b-5 promulgated thereunder. Plaintiffs seek an unspecified amount of damages on behalf of persons who purchased the Company's stock pursuant to the registration statements. On July 15, 2002, the Company and the three former officers and directors joined a motion to dismiss filed on behalf of the issuer defendants. The Company believes that the allegations against it are without merit and intends to defend the case vigorously.

(12) OTHER INCOME (EXPENSE)

Other income (expense) for the three and nine months ended September 30, 2002 included a reduction in an acquisition related exit cost accrual of approximately \$921,000 as a result of the negotiation of a favorable buyout of an existing lease which was assumed in connection with the Global Integrity acquisition. The liability for such lease had been fully accrued for as part of the acquired assets and assumed liabilities of Global Integrity in fiscal 2001. This income was offset by approximately \$213,000 and \$1,700,000, respectively, for the three and nine months ended September 30, 2002 of inventory held for resale which was no longer deemed saleable. As the Company was acting as an agent of the supplier in the arrangement for the resale of this inventory and the revenues were recognized on a net basis, such write-off has been classified as other expense. Other income for the three and nine months ended September 30, 2001 primarily consisted of interest income.

(13) SUBSEQUENT EVENTS

Stock Option Exchange Program

In October 2002, the Company implemented an employee voluntary stock option exchange program whereby the Company would exchange certain outstanding options to purchase shares of the Company's common stock held by eligible employees of the Company, with exercise prices per share greater than or equal to \$0.80, for new options to purchase shares of the Company's common stock (the "Offer to Exchange"). Under the terms of the Offer to Exchange, the 193 participating employees had certain of their existing options to purchase 4,085,860 shares of the Company's common stock cancelled as of October 18, 2002 and received options to purchase 3,089,424 shares of our common stock with an exercise price equal to the closing market price of \$0.22 per share on October 18, 2002. All new options were granted under the 1999 Stock Incentive Plan, as amended. Each new option vests in equal monthly installments in accordance with a four year vesting schedule beginning on the date of grant. However, the vesting period will be accelerated based on years of service with the Company measured at the date of grant. Employees holding over 500,000 options, the maximum number of options that may be issued per year to a single employee pursuant to the Company's 1999 Stock Incentive Plan, were only permitted to tender up to 500,000 of their currently outstanding options in exchange for 500,000 new options. Therefore, the Company also re-priced 1,500,000 of its Chief Executive Officer's outstanding options to give these options the same terms as if he had been able to fully participate in the option exchange program.

Adoption Of SFAS 123

In October 2002, the Company adopted Statement of Financial Accounting Standards No. 123, "Accounting for Stock-Based Compensation" (SFAS 123). SFAS 123 established a fair-value-based method of accounting for stock-based compensation plans. Pursuant to the transition provisions of SFAS 123, the Company will be required to apply the fair value method of accounting to all option grants issued on or after January 1, 2002. The fair value method will not be applied to stock option awards granted in fiscal years prior to 2002. Such awards will continue to be accounted for under the intrinsic value method pursuant to APB

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

25, except to the extent that prior years' awards are modified subsequent to January 1, 2002. The Company is currently assessing, but has not yet determined, the effect of adoption of SFAS 123 on its financial position or results of operations.

12

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

THIS REPORT CONTAINS FORWARD-LOOKING STATEMENTS RELATING TO FUTURE EVENTS AND FUTURE PERFORMANCE OF THE COMPANY WITHIN THE MEANING OF SECTION 27A OF THE SECURITIES ACT OF 1933 AND SECTION 21E OF THE SECURITIES EXCHANGE ACT OF 1934, INCLUDING, WITHOUT LIMITATION, STATEMENTS REGARDING THE COMPANY'S EXPECTATIONS, BELIEFS, INTENTIONS OR FUTURE STRATEGIES THAT ARE SIGNIFIED BY THE WORDS EXPECTS, ANTICIPATES, INTENDS, BELIEVES OR SIMILAR LANGUAGE. ACTUAL RESULTS COULD DIFFER MATERIALLY FROM THOSE ANTICIPATED IN SUCH FORWARD-LOOKING STATEMENTS. ALL FORWARD-LOOKING STATEMENTS INCLUDED IN THIS DOCUMENT ARE BASED ON INFORMATION AVAILABLE TO THE COMPANY ON THE DATE HEREOF, AND THE COMPANY ASSUMES NO OBLIGATION TO UPDATE ANY FORWARD LOOKING STATEMENTS. THE COMPANY CAUTIONS INVESTORS THAT ITS BUSINESS AND FINANCIAL PERFORMANCE ARE SUBJECT TO SUBSTANTIAL RISKS AND UNCERTAINTIES. IN EVALUATING THE COMPANY'S BUSINESS, PROSPECTIVE INVESTORS SHOULD CAREFULLY CONSIDER THE INFORMATION SET FORTH BELOW UNDER THE CAPTION "RISK FACTORS" IN ADDITION TO THE OTHER INFORMATION SET FORTH HEREIN AND ELSEWHERE IN THE COMPANY'S OTHER PUBLIC FILINGS WITH THE SECURITIES AND EXCHANGE COMMISSION.

OVERVIEW

The principal source of our revenues is fees from professional services. We provide network and security consulting services to our clients on either a project outsource or collaborative consulting basis. We derive revenues from these services on both a fixed-price, fixed-time basis and on a time-and-expense basis. We also provide managed security services to our clients. We derive revenues from these services on a subscription basis. We use our BusinessFirst approach to estimate and propose prices for our fixed-price projects. The estimation process accounts for standard billing rates particular to each project, the client's technology environment, the scope of the project and the project's timetable and overall technical complexity. A member of our senior management team must approve all of our fixed-price proposals in excess of \$500,000. For these contracts, we recognize revenue using a percentage-of-completion method primarily based on hours incurred. We make provisions for estimated losses on uncompleted contracts on a contract-by-contract basis and recognize such provisions in the period in which the losses are determined. Professional services revenues for time-and-expense based projects are recognized as services are performed. Revenues for subscription-based contracts are recognized on a straight-line basis over the period of service. Any payments received in advance of services performed are recorded as deferred revenue. Our clients are generally able to reduce or cancel their use of our professional services without penalty and with little or no notice. We also derive revenues from the sale of hardware and software.

Since we recognize professional services revenues only when our consultants are engaged on client projects, the utilization of our consultants is important in determining our operating results. In addition, a substantial majority of our operating expenses, particularly personnel and related costs, depreciation and rent, are relatively fixed in advance of any particular quarter. As a result, any underutilization of our consultants may cause significant variations in our operating results in any particular quarter and could result in losses for such quarter. Factors which could cause underutilization include:

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

- the reduction in size, delay in commencement, interruption or termination of one or more significant projects;
- the completion during a quarter of one or more significant projects;
- the miscalculation of resources required to complete new or ongoing projects; and
- the timing and extent of training, weather related shut-downs, vacations and holidays.

Our cost of revenues consist of costs associated with our professional services and hardware and software purchases. Costs of revenues associated with professional services primarily include compensation and benefits for our consultants and project-related travel expenses. Costs of hardware and software consist of acquisition costs of third-party hardware and software resold.

Given the continuing uncertainty in the professional network consulting services marketplace, we believe that our quarterly revenue and operating results are likely to vary significantly in the future and that period-to-period comparisons of our operating results are not necessarily meaningful and should not be relied on as indications of future performance.

In February 2001, the Company's management foresaw the need to lower the operating costs of the business given its near-term revenue projections. Therefore, the Company established a plan that included the following: (1) a reduction in its workforce for both domestic and international operations related to professional consultant employees that had been underutilized for several months and also to employees that held various management, sales and administrative positions deemed to be duplicative functions; (2) the closing of several domestic and international regional offices located in geographic areas that no longer cost justified remaining open; and (3) the discontinuance of electronic equipment leases and other expenses related to the reduction in workforce.

13

In December 2001, the Company formed a strategic alliance with an unaffiliated third party, to outsource the monitoring services provided by its Managed Security Services division. As a result of this alliance, the Company established a restructuring plan that included the following: (1) a reduction of the Company's workforce; (2) the write-off of equipment and software development costs associated with the Company's security operations center which was no longer needed as a result of the outsourcing; and (3) the incurrence of nonrecoverable costs to convert clients to the alliance partner.

In January 2002, the Company's management foresaw the need to continue to lower the operating costs of the business given continuing difficult market conditions in the enterprise sector. Therefore, the Company established a 2002 restructuring plan that included the following: (1) a reduction in its workforce for both domestic and international operations related to professional consultant employees that had been underutilized for several months and also to employees that held various management, sales and administrative positions deemed to be duplicative functions; (2) the closing of additional domestic regional offices located in geographic areas that no longer cost justified remaining open; and (3) the discontinuance of electronic equipment leases and other expenses related to the reduction in workforce.

For the three months ended September 30, 2002, the Company recorded

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

restructuring charges of \$82,740 in connection with its 2002 restructuring plan. Such charges consisted of \$647,404 in severance benefits and other related expenses for a reduction in headcount of 41 employees and \$18,159 for exit costs related to the closing of domestic offices. These charges were offset by a reduction to previously accrued exit costs in the amount of \$582,823 resulting from favorable and unfavorable settlements and changes to subtenant assumptions for leased domestic offices. For the three months ended September 30, 2001, the Company recorded restructuring charges of \$4,571,028 in connection with its 2001 restructuring plan. Such charges consisted of \$951,917 in severance benefits and other related expenses for a reduction in headcount of 86 employees and \$3,619,111 in exit costs related to real estate and electronic equipment. These charges have been reflected as operating expenses of the Company.

For the nine months ended September 30, 2002, the Company recorded restructuring charges of \$4,319,344 in connection with its 2002 restructuring plan. Such charges consisted of \$2,738,751 in severance benefits and other related expenses for a reduction in headcount of 147 employees, \$1,621,775 in exit costs related to real estate and electronic equipment for the closing of domestic offices, and an increase to previously accrued exit costs in the amount of \$108,818 resulting from favorable and unfavorable settlements and changes to subtenant assumptions for leased domestic offices. These charges were offset by \$150,000 received for equipment written-off to restructuring charges in 2001 in connection with the outsourcing of the Company's monitoring services provided as part of the Managed Security Services division. For the nine months ended September 30, 2001, the Company recorded restructuring charges of \$7,846,061 in connection with its 2001 restructuring plan. Such charges consisted of \$2,768,336 in severance benefits and other related expenses for a reduction in headcount of 191 employees and \$5,077,725 in exit costs related to real estate and electronic equipment. These charges have been reflected as operating expenses of the Company. As of September 30, 2002, restructuring charges of \$2,108,464 remained unpaid and are included in accrued expenses and other current liabilities on the accompanying consolidated balance sheet.

Critical Accounting Policies and Estimates

This discussion and analysis of our financial condition and results of operations are based on our consolidated financial statements that have been prepared under generally accepted accounting principles. The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires our management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could materially differ from those estimates. We have disclosed all significant accounting policies in note 2 to the consolidated financial statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2001. The consolidated financial statements and the related notes thereto should be read in conjunction with the following discussion of our critical accounting policies. Our critical accounting policies and estimates are:

- o Revenue recognition
- o Valuation of goodwill, intangible assets and other long-lived assets
- o Stock based compensation
- o Income taxes

Revenue Recognition: We currently recognize revenue from professional services. As described below, significant management judgments and estimates must be made

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

and used in determining the amount of revenue recognized in any given accounting period. Material differences may result in the amount and timing of our revenue for any given accounting period depending upon judgments made or estimates utilized by management.

14

We recognize revenue for fixed price contracts in accordance with SOP 81-1, "Accounting for Performance of Construction Type and Certain Production Type Contracts" (SOP 81-1). When reliable estimates are available for the costs and efforts necessary to complete the consulting services and those services do not include contractual milestones or other acceptance criteria, we recognize revenue under the percentage of completion method based upon input measures, such as hours. When such estimates are not available, we defer all revenue recognition until we have completed the contract and have no further obligations to the customer. Under each arrangement, revenues are recognized when an agreement has been signed and the customer acknowledges an unconditional obligation to pay, the services have been delivered, there are no uncertainties surrounding customer acceptance, the fees are fixed and determinable, and collection is considered probable.

Goodwill and Indefinite Lived Intangibles: Goodwill consists of the excess purchase price over the fair value of identifiable net assets of acquired businesses. Indefinite lived intangibles consist of the Company's tradename intangible. The carrying value of goodwill and indefinite lived intangibles are evaluated for impairment on an annual basis. Management also reviews goodwill and its indefinite lived intangibles for impairment whenever events or changes in circumstances indicate that their carrying amount may be impaired. If it is determined that an impairment in value has occurred, goodwill and indefinite lived intangibles will be written down to the present value of the expected future operating cash flows to be generated by the respective reporting unit. Upon adoption of SFAS 142, the Company evaluated goodwill and its tradename intangible for impairment as required by that statement and determined that an impairment of \$23,307,626 existed at January 1, 2002. The Company's reporting units utilized for evaluating the recoverability of goodwill and the indefinite lived intangibles are the same as its operating segments.

Other Intangible Assets: Other intangible assets are carried at cost less accumulated amortization and are amortized on a straight-line basis over their expected lives, which are estimated to be three to five years. Other intangible assets of the Company are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. Management also reevaluates the periods of amortization of other intangible assets to determine whether events and circumstances warrant revised estimates of useful lives. The Company evaluates the carrying value of its long-lived assets in relation to the operating performance and future undiscounted cash flows of the asset when indications of impairment are present. If it is determined that an impairment in value has occurred, the excess of the value of the asset will be written down to the present value of the expected future operating cash flows to be generated by the asset. The Company determined that its customer list and developed technology intangibles were impaired as of June 30, 2002 and recorded an impairment charge of \$8,743,545.

Impairment of Long-Lived Assets: Long-lived assets of the Company are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. Management also reevaluates the periods of amortization of long-lived assets to determine whether events and circumstances warrant revised estimates of useful lives. The Company evaluates the carrying value of its long-lived assets in relation to the future undiscounted cash flows of an asset when indications of impairment are present.

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

If it is determined that an impairment in value has occurred, the excess of the value of the asset will be written down to the present value of the expected future operating cash flows to be generated by the asset. Based on the continuing difficult market conditions in the enterprise sector and the Company's decline in revenue from current periods, the Company determined that indications of impairment were present and reviewed its long-lived assets for impairment during the second quarter of 2002. The Company determined that property and equipment of its US Consulting and Managed Security Services segments were impaired and recorded a \$4,510,193 asset impairment charge as of June 30, 2002.

Stock-Based Compensation: The Company accounts for its stock-based compensation arrangements with its employees using the intrinsic value method in accordance with the provisions of Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees" and complies with the disclosure provisions of SFAS 123, "Accounting for Stock-based Compensation." In October 2002, the Company adopted SFAS 123. SFAS 123 established a fair-value-based method of accounting for stock-based compensation plans. Pursuant to the transition provisions of SFAS 123, the Company will be required to apply the fair value method of accounting to all option grants issued on or after January 1, 2002. The fair value method will not be applied to stock option awards granted in fiscal years prior to 2002. Such awards will continue to be accounted for under the intrinsic value method pursuant to APB 25, except to the extent that prior years' awards are modified subsequent to January 1, 2002. The Company is currently assessing, but has not yet determined, the effect of adoption of SFAS 123 on its financial position or results of operations.

Income Taxes: Operating losses in prior periods have generated significant state and federal tax net operating losses, or NOL carryforwards. Generally accepted accounting principles in the United States require that we record a valuation allowance against the deferred tax asset associated with this NOL if it is "more likely than not" that we will not be able to utilize it to offset future taxes. Due to our history of unprofitable operations, we have recorded a valuation allowance equal to 100% of these deferred tax assets. It is possible, however, that we could be profitable in the future at levels which cause management to conclude that it is more likely than not that we will realize all or a portion of the NOL carryforward. Upon reaching such a conclusion, we would record the estimated net realizable value of the deferred tax asset at that time and would then provide for income taxes at a rate equal to our combined federal and state effective rates. Subsequent revisions to the estimated net realizable value of the deferred tax asset could cause our provision for income taxes to vary significantly from period to period, although our cash tax payments would remain unaffected until the benefit of the NOL is utilized.

15

RESULTS OF OPERATIONS

Three Months Ended September 30, 2002 and 2001

REVENUES. Our principal source of revenues is fees from professional services. Revenues decreased 18.9% to \$12.5 million in the three months ended September 30, 2002 from \$15.4 million in the three months ended September 30, 2001. Revenues from professional services decreased 28.0% to \$10.3 million in the three months ended September 30, 2002 from \$14.4 million in the three months ended September 30, 2001. This decrease was primarily due to difficult market conditions in the enterprise sector. Reimbursed expenses decreased to \$290,000 in the three months ended September 30, 2002 from \$405,000 in the three months

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

ended September 30, 2001. This decrease was primarily attributable to the nature of the customer contracts in addition to the overall decline in professional services revenues. Revenues from hardware and software sales increased 179.6% to \$1.9 million in the three months ended September 30, 2002 from \$677,000 in the three months ended September 30, 2001. This increase was primarily due to a client request for us to supply all hardware and software associated with a professional services project that commenced in June 2002. For the three months ended September 30, 2002 and 2001, approximately 14.3% and 17.4%, respectively, of revenues before reimbursed expenses were from one customer who is a related party. Two other customers accounted for approximately 31.8% of revenues before reimbursed expenses for the three months ended September 30, 2002, whereas one customer accounted for approximately 12.7% for the three months ended September 30, 2001. The number of our billable consultants decreased from approximately 370 at September 30, 2001 to approximately 212 at September 30, 2002.

GROSS PROFIT. Gross profit increased 36.1% to \$3.6 million in the three months ended September 30, 2002 from \$2.6 million in the three months ended September 30, 2001. As a percentage of revenues, gross profit increased to 28.6% in the three months ended September 30, 2002 from 17.0% in the three months ended September 30, 2001. Gross profit on professional services for the three months ended September 30, 2002 was \$3.4 million or 33.2% compared to \$2.6 million or 17.9% for the three months ended September 30, 2001. The increase in gross profit as a percentage of professional services revenues is primarily a result of reductions in billable headcount in connection with our restructuring plans. Gross profit on hardware and software sales for the three months ended September 30, 2002 was \$148,000 or 7.8% compared to \$60,000 or 8.8% for the three months ended September 30, 2001. The decrease in gross profit as a percentage of hardware and software sales is a result of a professional services project that commenced in June 2002 with a lower resale margin. Costs of revenues decreased 30.1% to \$8.9 million in the three months ended September 30, 2002 from \$12.8 million in the three months ended September 30, 2001. Costs of revenues attributable to professional services decreased 41.4% to \$6.9 million for the three months ended September 30, 2002 from \$11.8 million for the three months ended September 30, 2001. This decrease was due primarily to a decrease in compensation and benefits paid to consultants as a result of reductions in billable headcount in connection with our restructuring plans and a salary reduction for employees effective in July 2002. Costs of revenues attributable to hardware and software sales increased 182.7% to \$1.7 million for the three months ended September 30, 2002 from \$618,000 for the three months ended September 30, 2001. This increase was primarily due to a client request for us to supply all hardware and software associated with a professional services project that commenced in June 2002.

SALES AND MARKETING EXPENSES. Sales and marketing expenses decreased 52.0% to \$1.7 million in the three months ended September 30, 2002 from \$3.6 million in the three months ended September 30, 2001. As a percentage of revenues, sales and marketing expenses decreased to 13.9% in the three months ended September 30, 2002 from 23.5% in the three months ended September 30, 2001. The decrease in absolute dollars was primarily due to a decrease of \$1.2 million in compensation and benefits paid due to reductions in headcount in connection with our restructuring plans and a salary reduction for employees effective in July 2002. The remaining \$700,000 decrease in sales and marketing expenses was a result of decreased expenditures for marketing and selling efforts, such as conferences and mailings, and an overall decline in travel costs as part of our cost cutting measures taken in 2002.

GENERAL AND ADMINISTRATIVE EXPENSES. General and administrative expenses decreased 55.6% to \$4.6 million in the three months ended September 30, 2002 from \$10.3 million in the three months ended September 30, 2001. As a percentage of revenues, general and administrative expenses decreased to 36.7% in the three months ended September 30, 2002 from 66.9% in the three months ended September 30, 2001. The decrease in absolute dollars was primarily due to a decrease of

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

\$1.5 million in compensation and benefits costs as a result of reductions in headcount in connection with our restructuring plans and a salary reduction for employees effective in July 2002, a decrease of \$397,000 in travel and entertainment and training costs also as a result of reductions in headcount, a decrease of \$2.5 million in bad debt expense, and a decrease of \$670,000 in facilities and equipment leases in connection with our restructuring plans. The remaining decrease of \$592,000 was attributable to a reduction in professional services and other administrative costs primarily as a result of nonrecurring search fees for management level positions and human resource consulting fees recorded for the three months ended September 30, 2001.

DEPRECIATION AND AMORTIZATION. Depreciation and amortization decreased 82.2% to \$104,000 in the three months ended September 30, 2002 from \$583,000 in the three months ended September 30, 2001. The decrease was attributable to a reduction in the carrying value of property and equipment due to the write-off of property and equipment in connection with our restructuring plans and our evaluation of the carrying value of the long-lived assets of our US Consulting and Managed Security Services reporting units as of June 30, 2002 in accordance with the provisions of SFAS 144. Such evaluation resulted in an impairment charge of \$4.5 million relating to property and equipment.

16

INTANGIBLES AMORTIZATION. As a result of the analysis of our finite lived intangible assets in accordance with the provisions of SFAS 144 at June 30, 2002, we recognized an impairment charge for the entire carrying value of our finite lived intangible assets. As such, no amortization expense for our finite intangible assets was recorded for the three months ended September 30, 2002. Additionally, there was no amortization recorded for goodwill and our indefinite lived tradename intangible for the three months ended September 30, 2002 as these assets are no longer amortized but are reviewed annually (or more frequently if impairment indicators arise) for impairment under the provisions of SFAS 142, which was adopted by the Company on January 1, 2002. Intangibles amortization of \$6.4 million for the three months ended September 30, 2001 consisted of amortization for all intangible assets, including goodwill, assembled workforce and tradenames.

LOSS ON EQUIPMENT. For the three months ended September 30, 2001, we recognized a loss of \$443,000 for equipment that was not in service and deemed to have no salvage value.

IMPAIRMENT OF INTANGIBLES. During 2001, we integrated the acquisitions of Synet and Global Integrity, which were acquired in the fourth quarter of 2000. As we approached the completion of the integration phase in the third quarter of 2001, and in combination with revenue declines in the acquired companies in relation to prior periods and forecasted earnings and the overall deterioration of market conditions in the enterprise sector, we reviewed goodwill and the intangible assets for impairment. For the three months ended September 30, 2001, we recognized an impairment loss of \$18.2 million and \$42.3 million for the difference between the estimated fair value of Synet and Global Integrity, respectively, based on future discounted cashflows and the carrying amount of each of their assets and liabilities, including goodwill.

RESTRUCTURING AND OTHER CHARGES. For the three months ended September 30, 2002, we recorded restructuring charges of \$83,000 in connection with our 2002 restructuring plan. Such charges consisted of \$647,000 in severance benefits and other related expenses for a reduction in headcount of 41 employees and \$18,000 for exit costs related to the closing of domestic offices. These charges were offset by a reduction to previously accrued exit costs in the amount of \$583,000 resulting from favorable and unfavorable settlements and changes to subtenant

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

assumptions for leased domestic offices. For the three months ended September 30, 2001, we recorded restructuring charges of \$4.6 million in connection with our 2001 restructuring plan. Such charges consisted of \$1.0 million in severance benefits and other related expenses for a reduction in headcount of 86 employees and \$3.6 million in exit costs related to real estate and electronic equipment.

LOSS ON LONG-TERM INVESTMENTS IN RELATED PARTIES. For the three months ended September 30, 2001, we recognized a loss on our \$1.0 million investment in Three Pillars due to management's determination that the value of the investment was impaired.

NONCASH COMPENSATION EXPENSE. During 1999, we granted options to purchase shares of common stock at exercises prices that were less than the fair market value of the underlying shares of common stock, resulting in deferred compensation. During 2000, in connection with our acquisitions of Synet and Global Integrity, we issued options to Synet and Global Integrity optionholders in exchange for their Synet and Global Integrity options. The unvested portion of the Synet and Global Integrity options resulted in deferred compensation. These transactions result in noncash compensation expense over the period that these specific options vest. During the three months ended September 30, 2002 and 2001, we recorded approximately \$29,000 and \$83,000, respectively, of noncash compensation expense related to these options. The decrease in noncash compensation expense is a result of the cancellation of options as a result of reductions in headcount in connection with our restructuring plans.

OTHER INCOME (EXPENSE). Other income for the three months ended September 30, 2002 primarily consisted of a reduction in an acquisition related exit cost accrual of approximately \$921,000 as a result of the negotiation of a favorable buyout of an existing lease which was assumed in connection with the Global Integrity acquisition. The liability for such lease had been fully accrued as part of the acquired assets and assumed liabilities of Global Integrity in fiscal 2001. This income was offset by approximately \$213,000 of inventory held for resale which was no longer deemed saleable. As the Company is acting as an agent of the supplier in the arrangement for the resale of this inventory and the revenues are recognized on a net basis, such write-off has been classified as other expense. Other income for the three months ended September 30, 2001 primarily consisted of interest income.

Nine Months Ended September 30, 2002 and 2001

REVENUES. Our principal source of revenues is fees from professional services. Revenues decreased 29.0% to \$39.5 million in the nine months ended September 30, 2002 from \$55.7 million in the nine months ended September 30, 2001. Revenues from professional services decreased 31.5% to \$36.0 million in the nine months ended September 30, 2002 from \$52.6 million in the nine months ended September 30, 2001. This decrease was primarily due to difficult market conditions in the enterprise sector. Reimbursed expenses decreased to \$1.0 million in the nine months ended September 30, 2002 from \$1.5 million in the nine months ended September 30, 2001. This decrease was primarily attributable to the nature of the customer contracts in addition to the overall decline in professional services revenues. Revenues from hardware and software sales increased 59.0% to \$2.5 million in the nine months ended September 30, 2002 from \$1.6 million in the nine months ended September 30, 2001. This increase was primarily due to a client request for us to supply all hardware and software associated with a professional services project that commenced in 2002. For the nine months ended September 30, 2002 and 2001, approximately 15.9% and 18.7%, respectively, of revenues before reimbursed expenses were from one customer who is a related party. One other customer accounted for approximately 13.7% of revenues before reimbursed expenses for the nine months ended September 30, 2002. There were no other customers that accounted for more than 10.0% of revenues before reimbursed expenses for the nine months ended September 30, 2001. The number of our billable consultants decreased from approximately 370 at September 30, 2001 to

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

approximately 212 at September 30, 2002.

17

GROSS PROFIT. Gross profit decreased 16.5% to \$10.2 million in the nine months ended September 30, 2002 from \$12.2 million in the nine months ended September 30, 2001. As a percentage of revenues, gross profit increased to 25.9% in the nine months ended September 30, 2002 from 22.0% in the nine months ended September 30, 2001. Gross profit on professional services for the nine months ended September 30, 2002 was \$10.0 million or 27.9% compared to \$12.5 million or 23.7% for the nine months ended September 30, 2001. The increase in gross profit as a percentage of professional services revenues is primarily a result of reductions in billable headcount in connection with our restructuring plans. Gross profit on hardware and software sales for the nine months ended September 30, 2002 was \$194,000 or 7.8% compared to \$(226,000) or (14.4%) for the nine months ended September 30, 2001. Included in gross profit for the nine months ended September 30, 2001 is \$500,000 for the write-off of software inventory, which was no longer considered saleable. Excluding the impact of this write-off, gross profit on hardware and software sales was \$274,000 or 17.4% for the nine months ended September 30, 2001. The decrease in gross profit as a percentage of hardware and software sales, excluding the impact of the software inventory write-off, is a result of a professional services project that commenced in June 2002 with a lower resale margin. Costs of revenues decreased 32.5% to \$29.3 million in the nine months ended September 30, 2002 from \$43.4 million in the nine months ended September 30, 2001. Costs of revenues attributable to professional services decreased 35.2% to \$26.0 million for the nine months ended September 30, 2002 from \$40.1 million for the nine months ended September 30, 2001. This decrease in cost of revenues was due primarily to a decrease in compensation and benefits paid to consultants as a result of reductions in billable headcount in connection with our restructuring plans and a salary reduction for employees effective in July 2002. Costs of revenues attributable to hardware and software sales increased 28.2% to \$2.3 million for the nine months ended September 30, 2002 from \$1.8 million for the nine months ended September 30, 2001. This increase was primarily due to a client request for us to supply all hardware and software associated with a professional services project that commenced in June 2002.

SALES AND MARKETING EXPENSES. Sales and marketing expenses decreased 48.0% to \$6.7 million in the nine months ended September 30, 2002 from \$12.9 million in the nine months ended September 30, 2001. As a percentage of revenues, sales and marketing expenses decreased to 17.0% in the nine months ended September 30, 2002 from 23.2% in the nine months ended September 30, 2001. The decrease in absolute dollars was primarily due to a decrease of \$4.2 million in compensation and benefits paid due to reductions in headcount in connection with our restructuring plans and a salary reduction for employees effective in July 2002, and a decrease of \$571,000 in commissions paid as a result of declining revenues for professional services and the merging of two separate sales forces for US Consulting and Managed Security Services in 2002. The remaining \$1.4 million decrease in sales and marketing expenses was a result of decreased expenditures for marketing and selling efforts, such as conferences and mailings, and an overall decline in travel costs as part of our cost cutting measures taken in 2002.

GENERAL AND ADMINISTRATIVE EXPENSES. General and administrative expenses decreased 48.5% to \$17.5 million in the nine months ended September 30, 2002 from \$34.0 million in the nine months ended September 30, 2001. As a percentage of revenues, general and administrative expenses decreased to 44.4% in the nine months ended September 30, 2002 from 61.2% in the nine months ended September 30, 2001. The decrease in absolute dollars was primarily due to a decrease of \$6.6 million in compensation and benefits costs as a result of reductions in

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

headcount in connection with our restructuring plans and a salary reduction for employees effective in July 2002, a decrease of \$2.4 million in travel and entertainment and training costs also as a result of reductions in headcount, a decrease of \$4.2 million in bad debt expense, and a decrease of \$1.5 million in facilities and equipment leases in connection with our restructuring plans. The remaining decrease of \$1.8 million was attributable to a reduction in professional services and other administrative costs primarily as a result of nonrecurring search fees for management level positions, human resource consulting fees, and legal liabilities which were both probable and estimatable.

DEPRECIATION AND AMORTIZATION. Depreciation and amortization decreased 30.0% to \$1.6 million in the nine months ended September 30, 2002 from \$2.3 million in the nine months ended September 30, 2001. The decrease was attributable to a reduction in the carrying value of property and equipment due to the write-off of property and equipment in connection with our restructuring plans and our evaluation of the carrying value of the long-lived assets of our US Consulting and Managed Security Services reporting units as of June 30, 2002 in accordance with the provisions of SFAS 144. Such evaluation resulted in an impairment charge of \$4.5 million relating to property and equipment.

INTANGIBLES AMORTIZATION. Amortization of intangibles decreased to \$2.0 million for the nine months ended September 30, 2002 from \$19.1 million for the nine months ended September 30, 2001. For the nine months ended September 30, 2002, the amount consisted of amortization for intangible assets deemed to have finite lives pursuant to the provisions of SFAS 142 which was adopted effective January 1, 2002. Such intangible assets consisted of customer lists and developed technology. As a result of the analysis of our finite lived intangible assets in accordance with the provisions of SFAS 144 at June 30, 2002, we recognized an impairment charge for the entire carrying value of our finite lived intangible assets. As such, no amortization expense for intangible assets was recorded since June 30, 2002. Intangibles amortization for the nine months ended September 30, 2001 consisted of amortization for all intangible assets, including goodwill, assembled workforce and tradenames.

18

LOSS ON EQUIPMENT. For the nine months ended September 30, 2001, we recognized a loss of \$443,000 for equipment that was not in service and deemed to have no salvage value.

IMPAIRMENT OF INTANGIBLES. During 2001, we integrated the operations of Synet and Global Integrity, which were acquired in the fourth quarter of 2000. As we approached the completion of the integration phase in the third quarter of 2001, and in combination with revenue declines in the acquired companies in relation to prior periods and forecasted earnings and the overall deterioration of market conditions in the enterprise sector, we reviewed goodwill and the intangible assets for impairment. For the nine months ended September 30, 2001, we recognized an impairment loss of \$18.2 million and \$42.3 million for the difference between the estimated fair value of Synet and Global Integrity, respectively, based on the future expected discounted cashflows and the carrying amount of each of their assets and liabilities, including goodwill. We adopted the provisions of SFAS 144 effective January 1, 2002. Given the continued decline in revenues and our market capitalization, the overall deterioration of market conditions in the enterprise sector, and our forecasted operating results for the foreseeable future, we reviewed our long-lived assets for impairment as of June 30, 2002. Based on this review, we recognized an impairment loss for the nine months ended September 30, 2002 of \$8.7 million to reduce the carrying value of our finite lived intangible assets, consisting of customer lists and developed technology.

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

IMPAIRMENT OF PROPERTY AND EQUIPMENT. We adopted the provisions of SFAS 144 effective January 1, 2002. Given the decline in revenues and our market capitalization, the overall deterioration of market conditions in the enterprise sector, and our forecasted operating results for the foreseeable future, we reviewed our long-lived assets for impairment at June 30, 2002. Based on this review, we recognized an impairment loss for the nine months ended September 30, 2002 of \$4.5 million to reduce the carrying value of our property and equipment, consisting of computer equipment, furniture and fixtures, capitalized software and leasehold improvements.

RESTRUCTURING AND OTHER CHARGES. For the nine months ended September 30, 2002, we recorded restructuring charges of \$4.3 million in connection with our 2002 restructuring plan. Such charges consisted of \$2.7 million in severance benefits and other related expenses for a reduction in headcount of 147 employees, \$1.6 million in exit costs related to real estate and electronic equipment for the closing of domestic offices, and an increase to previously accrued exit costs in the amount of \$109,000 resulting from favorable and unfavorable settlements and changes to subtenant assumptions for leased domestic offices. These charges were offset by \$150,000 received for equipment written off to restructuring charges in 2001 in connection with the outsourcing of our monitoring services provided as part of the Managed Security Services division. For the nine months ended September 30, 2001, we recorded restructuring charges of \$7.8 million in connection with our 2001 restructuring plan. Such charges consisted of \$2.8 million in severance benefits and other related expenses for a reduction in headcount of 191 employees and \$5.1 million in exit costs related to real estate and electronic equipment.

Additionally, included in the financial statement caption for the nine months ended September 30, 2001 is \$1.0 million related to the write-off of internal software management tools that no longer suit the business needs of the Company.

LOSS ON LONG-TERM INVESTMENTS IN RELATED PARTIES. On March 22, 2001, Paradigm4, Inc. filed for federal bankruptcy protection. This action created significant uncertainty regarding the carrying value of our investment in Paradigm4. As a result, we recognized a loss on our \$1.0 million investment in Paradigm4 for the nine months ended September 30, 2001. For the nine months ended September 30, 2001, we also recognized a loss on our \$1.0 million investment in Three Pillars due to management's determination that the value of the investment was impaired.

NONCASH COMPENSATION EXPENSE. During 1999, we granted options to purchase shares of common stock at exercises prices that were less than the fair market value of the underlying shares of common stock, resulting in deferred compensation. During 2000, in connection with our acquisitions of Synet and Global Integrity, we issued options to Synet and Global Integrity optionholders in exchange for their Synet and Global Integrity options, respectively. The unvested portion of the Synet and Global Integrity options resulted in deferred compensation. These transactions result in noncash compensation expense over the period that these specific options vest. During the nine months ended September 30, 2002 and 2001, we recorded approximately \$102,000 and \$301,000, respectively, of noncash compensation expense related to these options. The decrease in noncash compensation expense is a result of the cancellation of options as a result of reductions in headcount in connection with our restructuring plans.

OTHER INCOME (EXPENSE). Other expense for the nine months ended September 30, 2002 primarily consisted of the write-off of approximately \$1.7 million of inventory held for resale which was no longer deemed saleable. As the Company is acting as an agent of the supplier in the arrangement for the resale of this inventory and the revenues are recognized on a net basis, such write-off has been classified as other expense. This expense was offset by other income which primarily consisted of a reduction in an acquisition related exit cost accrual of approximately \$921,000 as a result of the negotiation of a favorable buyout of an existing lease which was assumed in connection with the Global Integrity

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

acquisition. The liability for such lease had been fully accrued as part of the acquired assets and assumed liabilities of Global Integrity in fiscal 2001. Other income for the nine months ended September 30, 2001 primarily consisted of interest income.

19

CUMULATIVE EFFECT OF CHANGE IN ACCOUNTING PRINCIPLE. Upon adoption of SFAS 142, we recorded a noncash charge of \$23.3 million to reduce the carrying value of our goodwill and other indefinite lived intangible assets, primarily consisting of acquired tradenames.

LIQUIDITY AND CAPITAL RESOURCES. We have financed our operations through the sale of equity securities and cash flows from operations. As of September 30, 2002, we had approximately \$17.5 million in cash and cash equivalents and \$2.4 million in restricted cash backing letters of credit issued pursuant to certain operating real estate and equipment lease agreements and a customer contract.

Net cash used in operating activities decreased to \$24.1 million for the nine months ended September 30, 2002 from \$31.9 million for the nine months ended September 30, 2001. This decrease was primarily attributable to a reduction in the operating loss for the nine months ended September 30, 2002 as compared to the nine months ended September 30, 2001. We experienced a decrease in accounts payable and accrued expenses and other current liabilities for the nine months ended September 30, 2002 of approximately \$7.8 million as compared to an increase in accounts payable and accrued expenses and other current liabilities for the nine months ended September 30, 2001 of approximately \$442,000. Such decrease included approximately \$2.4 million paid for the purchase of software inventory for resale, approximately \$982,000 for the payment of retention bonuses to employees of Global Integrity prior to the acquisition who achieved their one year anniversary with the Company and therefore qualified for the retention bonus, and approximately \$574,000 in lease termination fees for office space abandoned in 2001. We also experienced an increase in restricted cash of \$1.6 million in 2002 related to a new equipment operating lease and a contractual obligation in connection with a customer contract entered into in 2002. These net outflows of cash were offset by net inflows of cash as a result of decreases in accounts receivable and unbilled revenues of approximately \$461,000. The decrease in accounts receivable was primarily attributable to increased collection efforts and declining revenues due to difficult market conditions.

Net cash used in investing activities was \$876,000 and \$9.1 million, respectively, for the nine months ended September 30, 2002 and 2001. Capital expenditures were \$909,000 for the nine months ended September 30, 2002 and primarily consisted of computer equipment and leasehold improvements. Capital expenditures were \$7.2 million for the nine months ended September 30, 2001 and consisted of computer equipment, office furniture, capitalized software and leasehold improvements in connection with the investment in our infrastructure.

Net cash provided by financing activities was \$929,000 and \$1.9 million, respectively, for the nine months ended September 30, 2002 and 2001. Cash provided by financing activities primarily resulted from the receipt of proceeds from the exercise of options and the sale of common stock in connection with our Employee Stock Purchase Plan.

We have a demand loan facility, secured by a lien on all of our assets, under which we may borrow up to the lesser of \$5.0 million or 80.0% of our accounts receivable. At September 30, 2002 there were no amounts outstanding under this facility. Amounts outstanding under the facility bear interest at the lender's base rate which was 4.75% as of September 30, 2002.

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

For the three months ended September 30, 2002 the Company negotiated favorable buyouts of two existing real estate operating leases for approximately \$574,000. As a result of such buyouts, the Company reduced its expected future minimum lease payment obligation by approximately \$2.7 million.

Based on our current revenue projections and continued cost-cutting efforts, we believe that we will achieve positive cash flow in 2003. We believe that our existing cash, cash equivalents and marketable securities will be sufficient to meet our anticipated needs for working capital and capital expenditures for at least the next twelve months. If cash generated from operations is insufficient to satisfy our liquidity requirements, we may seek to sell additional equity or debt securities or to obtain additional credit facilities. The sale of additional equity or convertible debt securities could result in dilution to our stockholders. The incurrence of indebtedness would result in increased fixed obligations and could result in operating covenants that would restrict our operations. We cannot assure you that financing will be available in amounts or on terms acceptable to us, if at all.

In October 2002, the Company implemented an employee voluntary stock option exchange program whereby the Company would exchange certain outstanding options to purchase shares of the Company's common stock held by eligible employees of the Company, with exercise prices per share greater than or equal to \$0.80, for new options to purchase shares of the Company's common stock (the "Offer to Exchange"). Under the terms of the Offer to Exchange, the 193 participating employees had certain of their existing options to purchase 4,085,860 shares of the Company's common stock cancelled as of October 18, 2002 and received options to purchase 3,089,424 shares of our common stock with an exercise price equal to the closing market price of \$0.22 per share on October 18, 2002. All new options were granted under the 1999 Stock Incentive Plan, as amended. Each new option vests in equal monthly installments in accordance with a four year vesting schedule beginning on the date of grant. However, the vesting period will be accelerated based on years of service with the Company measured at the date of grant. Employees holding over 500,000 options, the maximum number of options that may be issued per year to a single employee pursuant to the Company's 1999 Stock Incentive Plan, were only permitted to tender up to 500,000 of their currently outstanding options in exchange for 500,000 new options. Therefore, the Company also re-priced 1,500,000 of its Chief Executive Officer's outstanding options to give these options the same terms as if he had been able to fully participate in the option exchange program.

20

Recent Accounting Pronouncements

In July 2001, the FASB issued Statement of Financial Accounting Standards No. 141, "Business Combinations" (SFAS 141) and No. 142, "Goodwill and Other Intangible Assets" (SFAS 142). SFAS 141 requires all business combinations initiated after June 30, 2001 to be accounted for using the purchase method of accounting. Under SFAS 142, goodwill and intangible assets with indefinite lives are no longer amortized but are reviewed annually (or more frequently if impairment indicators arise) for impairment. Separable intangible assets that are not deemed to have indefinite lives will continue to be amortized over their useful lives (but with no maximum life). The amortization provisions of SFAS 142 apply to goodwill and intangible assets acquired after June 30, 2001. The Company adopted the provisions of SFAS 142 effective January 1, 2002. As required by the transitional provisions of SFAS 142, the Company evaluated goodwill and intangible assets with indefinite lives for impairment as of January 1, 2002. This evaluation was completed during the second quarter of 2002. As a result of this transitional testing, the Company recorded a noncash

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

impairment charge of \$23,307,626 to reduce the carrying value of its goodwill and other indefinite lived intangible assets. Such charge is reflected as a cumulative effect of change in accounting principle in the accompanying consolidated statements of operations for the nine months ended September 30, 2002.

In July 2001, the FASB issued Statement of Financial Accounting Standard No. 143, "Accounting for Asset Retirement Obligations" (SFAS 143), which is effective for fiscal years beginning after June 15, 2002. SFAS 143 requires, among other things, the accounting and reporting of legal obligations associated with the retirement of long-lived assets that result from the acquisition, construction, development or normal operation of a long-lived asset. The Company believes the adoption of SFAS 143 will not have a material impact on its financial position or results of operations.

In August 2001, the FASB issued Statement of Financial Accounting Standard No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets" (SFAS 144). This statement supersedes Statement of Financial Accounting Standard No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of" (SFAS 121) and Accounting Principles Board Opinion No. 30, "Reporting Results of Operations - Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions." The Statement retains the fundamental provisions of SFAS 121 for recognition and measurement of impairment, but amends the accounting and reporting standards for segments of a business to be disposed of. The Company adopted the provisions of SFAS 144 effective January 1, 2002. Given the decline in revenues and market capitalization of the Company and the overall deterioration of market conditions in the enterprise sector, the Company reviewed its long-lived assets for impairment during the second quarter of 2002. Based on this review, the Company recognized an impairment charge to reduce the carrying value of its finite lived intangible assets and property and equipment of \$8,743,545 and \$4,510,193, respectively. Such charges are reflected in the accompanying consolidated statements of operations for the nine months ended September 30, 2002.

In November 2001, the Emerging Issues Task Force (EITF) of the FASB concluded that reimbursements received for "out-of-pocket" expenses should be classified as revenue, and correspondingly cost of services, in the income statement. This accounting treatment should be applied in financial reporting periods (years) beginning as early as the March 2002 quarter. Upon application of the pronouncement, comparative financial statements for prior periods must also be reclassified in order to ensure consistency among all periods presented. The Company adopted this pronouncement effective January 1, 2002 and has separately disclosed the impact of adoption in the consolidated statements of operations.

In April 2002, the FASB issued Statement of Financial Accounting Standard No. 145 "Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections" (SFAS 145). This statement eliminates the automatic classification of gain or loss on an extinguishment of debt as an extraordinary item of income and requires that such gain or loss be evaluated for extraordinary classification under the criteria of Accounting Principles Board No. 30 "Reporting Results of Operations." This statement also requires sales-leaseback accounting for certain lease modifications that have economic effects that are similar to sales-leaseback transactions, and makes various other technical corrections to existing pronouncements. This statement will be effective for the Company for the year ending December 31, 2003. The Company is currently assessing, but has not yet determined the effect, if any, of SFAS 145 on its financial position or results of operations.

In July 2002, the Financial Accounting Standards Board issued Statement of Financial Accounting Standard No. 146, "Accounting for Costs Associated with Exit or Disposal Activities" (SFAS 146). SFAS 146 will supersede EITF No. 94-3,

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

"Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)." SFAS 146 requires that costs associated with an exit or disposal plan be recognized when incurred rather than at the date of a commitment to an exit or disposal plan. SFAS 146 is to be applied prospectively to exit or disposal activities initiated after December 31, 2002. The Company is currently assessing, but has not yet determined the effect, if any, of SFAS 146 on its financial position or results of operations.

RISK FACTORS

An investment in our company involves a high degree of risk. You should carefully consider the risks described below before you decide to buy our common stock. If any of the following risks actually occur, our business, results of operations or financial condition would likely suffer. In this case, the trading price of our common stock could decline.

21

Risks Related to Our Financial Condition and Business Model

Our limited operating history makes it difficult for you to evaluate our business and to predict our future success

We commenced operations in February 1995 and therefore have only a limited operating history for you to evaluate our business. Because of our limited operating history and the fact that many of our competitors have longer operating histories, we believe that the prediction of our future success is difficult. You should evaluate our chances of financial and operational success in light of the risks, uncertainties, expenses, delays and difficulties associated with operating a new business, many of which are beyond our control. You should not rely on our historical results of operations as indications of future performance. The uncertainty of our future performance and the uncertainties of our operating in a new and volatile market increase the risk that the value of your investment will decline.

Adverse market conditions, particularly those affecting the professional services industry, may impair our operating results

Our results depend to a large extent on market conditions affecting the technology industry in general and the telecommunications and enterprise sectors in particular. Adverse market conditions in the sectors in which we operate could delay buying decisions or cause projects to be deferred, reduced in scope or discontinued. These sectors are experiencing a drastic downturn. We can not predict how long this contraction will last, or the timing or strength of a recovery, if any. If market conditions and corporate spending in these sectors do not improve, our operating results will continue to suffer.

Because most of our revenues are generated from a small number of clients, our revenues are difficult to predict and the loss of one client could significantly reduce our revenues

During the nine months ended September 30, 2002, BellSouth Corporation accounted for approximately 15.9% of revenues before reimbursed expenses. One other customer accounted for approximately 13.7% of revenues before reimbursed expenses for the nine months ended September 30, 2002. Our five largest clients accounted for approximately 44.8% of our revenues before reimbursed expenses for the nine months ended September 30, 2002. For the year ended December 31, 2001,

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

our five largest clients accounted for approximately 40.6% of our revenues before reimbursed expenses. If one of our major clients discontinues or significantly reduces the use of our services, we may not generate sufficient revenues to offset this loss of revenues and our net loss will increase. In addition, the non-payment or late payment of amounts due from a major client could adversely affect us. As of September 30, 2002, the accounts receivable from BellSouth and the 13.7% customer were approximately \$1.3 million and \$1.7 million, respectively, which related to work performed in June through September 2002.

Our clients may terminate their contracts with us on short notice

Our services are often delivered pursuant to short-term arrangements and most clients can reduce or cancel their contracts for our services without penalty and with little or no notice. If a major client or a number of small clients terminate our contracts or significantly reduce or modify their business relationships with us, we may not be able to replace the shortfall in revenues. Consequently, you should not predict or anticipate our future revenues based upon the number of clients we have currently or the number and size of our existing projects.

Our operating results may vary from quarter to quarter in future periods, and as a result, we may fail to meet the expectations of our investors and analysts, which may cause our stock price to fluctuate or decline

Our operating results have varied from quarter to quarter. Our operating results may continue to vary as a result of a variety of factors. These factors include:

- o the loss of key employees;
- o the development and introduction of new service offerings;
- o reductions in our billing rates;
- o the miscalculation of resources required to complete new or ongoing projects;
- o the utilization of our workforce;
- o the ability of our clients to meet their payments obligations to us; and
- o the timing and extent of training.

22

Many of these factors are beyond our control. Accordingly, you should not rely on quarter-to-quarter comparisons of our results of operations as an indication of our future performance. In addition, our operating results may be below the expectations of public market analysts or investors in some future quarter. If this occurs, the price of our common stock is likely to decline.

We derive a substantial portion of our revenues from fixed-price projects, under which we assume greater financial risk if we fail to accurately estimate the costs of the projects

We derive a substantial portion of our revenues from fixed-price projects. For the nine months ended September 30, 2002 and the year ended December 31, 2001, fixed-price projects accounted for 38.1% and 48.2% of our

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

revenue, respectively. We assume greater financial risks on a fixed-price project than on a time-and-expense based project. If we miscalculate the resources or time we need for these fixed-price projects, the costs of completing these projects may exceed the price, which could result in a loss on the project and an increase in net loss. We recognize revenues from fixed-price projects based on our estimates of the percentage of each project completed in a reporting period. To the extent our estimates are inaccurate, the revenues and operating profits, if any, that we report for periods during which we are working on a fixed-price project may not accurately reflect the final results of the project and we would be required to record an expense for these periods equal to the amount by which our revenues were previously overstated.

Our operating results may fluctuate due to seasonal factors which could result in greater than expected losses

Our results of operations may experience seasonal fluctuations as businesses typically spend less on network management services during the summer and year-end vacation and holiday periods. Additionally, as a large number of our employees take vacation during these periods, our utilization rates during these periods tend to be lower, which reduces our margins and operating income. Accordingly, we may report greater than expected losses for these periods.

Our long sales cycle makes our revenues difficult to predict and could cause our quarterly operating results to be below the expectations of public market analysts and investors

The timing of our revenues is difficult to predict because of the length and variance of the time required to complete a sale. Before hiring us for a project, our clients often undertake an extensive review process and may require approval at various levels within their organization. Any delay due to a long sales cycle could reduce our revenues for a quarter and cause our quarterly operating results to be below the expectations of public market analysts or investors. If this occurs, the price of our common stock is likely to decline.

We may need to raise additional capital to grow our business, which we may not be able to do

Our future liquidity and capital requirements are difficult to predict because they depend on numerous factors, including the success of our existing and new service offerings and competing technological and market developments. As a result, we may not be able to generate sufficient cash from our operations to meet additional working capital requirements, support additional capital expenditures or take advantage of acquisition opportunities. Accordingly, we may need to raise additional capital in the future. Our ability to obtain additional financing will be subject to a number of factors, including market conditions, our operating performance and investor sentiment. These factors may make the timing, amount, terms and conditions of additional financing unattractive for us. If we are unable to raise additional funds when needed, our ability to operate and grow our business could be impeded.

Risks Related to Our Strategy and Market

We may have difficulty managing the fluctuations in the demand for our services, which could have adverse effects on our business

Our business has recently experienced lower revenues due to decreased customer demand for our services. Since December 31, 2000, to scale back our operations and to reduce our expenses in response to this reduced demand for our services, we have decreased our headcount to 291 employees as of September 30, 2002 from approximately 691 employees as of December 31, 2000. While this action has positively impacted our results of operations, there are several risks inherent in our efforts to transition to a smaller workforce. Reducing the size

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

of our workforce could have adverse effects on our business by reducing our pool of technical talent, making it more difficult for us to respond to customers, limiting our ability to provide increased services quickly if and when the demand for our services increases, and limiting our ability to hire and retain key personnel. A key part of our strategy going forward is to grow our business. In order to achieve this growth, demand for our services must increase. If the opportunity to grow our business arises, we may need to modify our financial and management controls, reporting systems and procedures and to train our work force. We may not be able to do so successfully, causing our earnings to be lower than they might otherwise be.

23

Our management team has experienced significant turnover which could interrupt our business and adversely affect our growth

Our future success depends, in significant part, upon the continued service and performance of our senior management and other key personnel. Neeraj (Berry) Sethi was appointed our Chief Financial Officer in August 2002 and Shawn Kreloff was appointed our Executive Vice President of Sales and Business Development in September 2002. In addition, in connection with our recent reductions in staff, many members of our senior management team have either departed, or been redeployed and given new responsibilities. If the restructuring of our senior management team does not lead to the results we expect, our ability to effectively deliver our services, manage our company, and carry out our business plan may be impaired.

We may not be able to hire and retain qualified network systems and security consultants which could affect our ability to compete effectively

Our continued success depends on our ability to identify, hire, train and retain highly qualified network and security management consultants. These individuals are in high demand and we may not be able to attract and retain the number of highly qualified consultants that we need. If we cannot retain, attract and hire the necessary consultants, our ability to grow, complete existing projects and bid for new projects will be adversely affected.

Competition in the network and security consulting industry is intense, and therefore we may lose projects to our competitors

Our market is intensely competitive, highly fragmented and subject to rapid technological change. We expect competition to intensify and increase over time. We may lose projects to our competitors, which could adversely affect our business, results of operations and financial condition. In addition, competition could result in lower billing rates and gross margins and could require us to increase our spending on sales and marketing.

We face competition from systems integrators, value added resellers, network services firms, security consulting firms, telecommunications providers, and network equipment and computer systems vendors. These competitors may be able to respond more quickly to new or emerging technologies and changes in client requirements or devote greater resources to the expansion of their market share.

Additionally, our competitors have in the past and may in the future form alliances with various network equipment vendors that may give them an advantage in implementing networks using that vendor's equipment.

We also compete with internal information technology departments of

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

current and potential clients. To the extent that current or potential clients decide to satisfy their needs internally, our business will suffer.

If we are unable to find suitable acquisition candidates, our growth could be impeded

A component of our growth strategy is the acquisition of, or investment in, complementary businesses, technologies, services or products. Our ability to identify and invest in suitable acquisition and investment candidates on acceptable terms is crucial to this strategy. We may not be able to identify, acquire or make investments in promising acquisition candidates on acceptable terms. Moreover, in pursuing acquisition and investment opportunities, we may be in competition with other companies having similar growth and investment strategies. Competition for these acquisitions or investment targets could also result in increased acquisition or investment prices and a diminished pool of businesses, technologies, services or products available for acquisition or investment.

Our acquisition strategy could have an adverse effect on client satisfaction and our operating results

Acquisitions, including those already consummated, involve a number of risks, including:

- o integrating the acquired company into our existing business;
- o adverse effects on our reported operating results due to accounting charges associated with acquisitions;
- o increased expenses, including compensation expense resulting from newly hired employees; and
- o potential disputes with the sellers of acquired businesses, technologies, services or products.

Client dissatisfaction or performance problems with an acquired business, technology, service or product could also have a material adverse impact on our reputation as a whole. In addition, any acquired business, technology, service or product could significantly underperform relative to our expectations.

24

Competition for experienced personnel is intense and our inability to retain key personnel could interrupt our business and adversely affect our growth

Our future success depends, in significant part, upon the continued service and performance of our senior management and other key personnel. Losing the services of any of these individuals may impair our ability to effectively deliver our services and manage our company, and to carry out our business plan. In addition, competition for qualified personnel in the network and security consulting industry is intense and we may not be successful in attracting and retaining these personnel. There may be only a limited number of persons with the requisite skills to serve in these positions and it may become increasingly difficult to hire these persons. Our business will suffer if we encounter delays in hiring additional personnel.

Our business may suffer if we fail to adapt appropriately to the challenges associated with operating internationally

Operating internationally may require us to modify the way we conduct

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

our business and deliver our services in these markets. We anticipate that we will face the following challenges internationally:

- o the burden and expense of complying with a wide variety of foreign laws and regulatory requirements;
- o potentially adverse tax consequences;
- o longer payment cycles and problems in collecting accounts receivable;
- o technology export and import restrictions or prohibitions;
- o tariffs and other trade barriers;
- o difficulties in staffing and managing foreign operations;
- o cultural and language differences;
- o fluctuations in currency exchange rates; and
- o seasonal reductions in business activity during the summer months in Europe.

If we do not appropriately anticipate changes and adapt our practices to meet these challenges, our growth could be impeded and our results of operations could suffer.

If we do not keep pace with technological changes, our services may become less competitive and our business will suffer

Our market is characterized by rapidly changing technologies, frequent new product and service introductions, and evolving industry standards. As a result of the complexities inherent in today's computing environments, we face significant challenges in remaining abreast of such changes and product introductions. If we cannot keep pace with these changes, we will not be able to meet our clients' increasingly sophisticated network management and security needs and our services will become less competitive.

Our future success will depend on our ability to:

- o keep pace with continuing changes in industry standards, information technology and client preferences;
- o respond effectively to these changes; and
- o develop new services or enhance our existing services.

We may be unable to develop and introduce new services or enhancements to existing services in a timely manner or in response to changing market conditions or client requirements.

If the use of large-scale, complex networks does not continue to grow, we may not be able to successfully increase or maintain our client base and revenues

To date, a majority of our revenues have been from network management and security services related to large-scale, complex networks. We believe that we will continue to derive a majority of our revenues from providing network design, performance, management and security services. As a result, our future success is highly dependent on the continued growth and acceptance of large-scale, complex computer networks and the continued trend among our clients to use third-party service providers. If the growth of the use of enterprise

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

networks does not continue or declines, our business may not grow and our revenues may decline.

25

Risks Related to Intellectual Property Matters and Potential Legal Liability

Unauthorized use of our intellectual property by third parties may damage our brand

We regard our copyrights, trade secrets and other intellectual property as critical to our success. Unauthorized use of our intellectual property by third parties may damage our brand and our reputation. We rely on trademark and copyright law, trade secret protection and confidentiality and/or license and other agreements with our employees, customers, partners and others to protect our intellectual property rights. However existing trade secret, trademark and copyright laws afford us only limited protection. Despite our precautions, it may be possible for third parties to obtain and use our intellectual property without our authorization. The laws of some foreign countries are also uncertain or do not protect intellectual property rights to the same extent as do the laws of the United States.

We may have to defend against intellectual property infringement claims, which could be expensive and, if we are not successful, could disrupt our business

We cannot be certain that our services, the finished products that we deliver or materials provided to us by our clients for use in our finished products do not or will not infringe valid patents, copyrights, trademarks or other intellectual property rights held by third parties. As a result, we may be subject to legal proceedings and claims from time to time relating to the intellectual property of others in the ordinary course of our business. We may incur substantial expenses in defending against these third-party infringement claims, regardless of their merit. Successful infringement claims against us may result in substantial monetary liability and materially disrupt the conduct of our business.

Because our services are often critical to our clients' operations, we may be subject to significant claims if our services do not meet our clients' expectations

Many of our projects are critical to the operations of our clients' businesses. If we cannot complete these projects to our clients' expectations, we could materially harm our clients' operations. This could damage our reputation, subject us to increased risk of litigation or result in our having to provide additional services to a client at no charge. Although we carry general liability insurance coverage, our insurance may not cover all potential claims to which we are exposed or may not be adequate to indemnify us for all liability that may be imposed.

Our stock price is likely to be highly volatile and could drop unexpectedly

The market price of our common stock is highly volatile, has fluctuated substantially and may continue to do so. As a result, investors in our common stock may experience a decrease in the value of their common stock regardless of our operating performance or prospects. In addition, the stock market has, from time to time, experienced significant price and volume fluctuations that have affected the market prices for the securities of technology companies. In the past, following periods of volatility in the market price of a particular company's securities, securities class action litigation was often brought against that company. Many technology-related companies have been subject to

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

this type of litigation. We are currently involved in this type of litigation. Litigation is often expensive and diverts management's attention and resources.

Our common stock could be delisted from Nasdaq

Our common stock currently trades on the Nasdaq National Market, which specifies certain requirements for continued listing. One of the requirements is that the minimum closing bid price per share of our common stock not be less than \$1.00 for a period of 30 consecutive trading days. On July 25, 2002, we received notice from Nasdaq that for the prior 30 consecutive trading days the minimum closing bid price per share of our common stock was less than \$1.00 and, in the event we did not regain compliance by October 23, 2002, Nasdaq would delist our common stock from the Nasdaq National Market.

Due to the fact that our stock price has not met the \$1.00 minimum price requirement of the Nasdaq National Market, we have applied for listing on the Nasdaq SmallCap Market, which deferred the institution of delisting proceeding from the Nasdaq National Market. There can be no assurance that we will be accepted for listing on the Nasdaq SmallCap Market. The Nasdaq SmallCap Market also requires that the minimum closing bid price per share of our common stock not be less than \$1.00 for a period of 30 consecutive trading days. However, in the event that our application for listing is accepted, we will have until January 21, 2002 to regain compliance with the \$1.00 minimum closing bid price per share requirement to remain on the Nasdaq SmallCap Market. At that time, we may be eligible for an additional 180-day period through July 21, 2003, to regain compliance with the \$1.00 minimum bid price requirement provided that we meet the other initial listing requirements for the Nasdaq SmallCap Market. Although we currently meet these initial listing requirements, there is no assurance that we will continue to meet the requirements in the future.

There can be no assurance that we will be accepted for listing on the Nasdaq SmallCap Market. If we are accepted and subsequently delisted, we may be unable to have our common stock listed or quoted on any other organized market. Even if our common stock is quoted or listed on another organized market, an active trading market may not develop.

26

Delisting from Nasdaq would likely make it more difficult for us to raise capital in the future. Delisting could also reduce the ability of holders of our common stock to purchase or sell shares as quickly and as inexpensively as they have done historically. It could have an adverse effect on the trading price of our common stock, regardless of our actual operating performance. Delisting might also adversely affect our relationships with vendors and customers, and may subject our common stock to the "penny stock rules" contained in Section 15(g) of the Securities Exchange Act of 1934.

We are controlled by a small group of our existing stockholders, whose interests may differ from other stockholders

Our directors, executive officers and affiliates currently beneficially own approximately 28% of the outstanding shares of our common stock. Accordingly, these stockholders will have significant influence in determining the outcome of any corporate transaction or other matter submitted to the stockholders for approval, including mergers, acquisitions, consolidations and the sale of all or substantially all of our assets, and also the power to prevent or cause a change in control. The interests of these stockholders may differ from the interests of the other stockholders.

Our charter documents and Delaware law may inhibit a takeover that stockholders

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

may consider favorable

Provisions in our charter and bylaws may have the effect of delaying or preventing a change of control or changes in our management that stockholders consider favorable or beneficial. If a change of control or change in management is delayed or prevented, the market price of our common stock could decline.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

Currency Rate Fluctuations.

Our results of operations, financial position and cash flows are not materially affected by changes in the relative values of non-U.S. currencies to the U.S. dollar. We do not use derivative financial instruments to limit our foreign currency risk exposure.

Market Risk.

Our accounts receivable are subject, in the normal course of business, to collection risks. We regularly assess these risks and have established policies and business practices to protect against the adverse effects of collection risks. As a result, we do not anticipate any material losses in this area.

Interest Rate Risks.

We do not currently have any outstanding indebtedness. In addition, our investments are classified as cash and cash equivalents with original maturities of three months or less. Therefore, we are not exposed to material market risk arising from interest rate changes, nor do such changes affect the value of investments as recorded by us.

ITEM 4. CONTROLS AND PROCEDURES

Based on their evaluation of our disclosure controls and procedures as of a date within 90 days of the filing of this Report, the Chief Executive Officer and Chief Financial Officer have concluded that such controls and procedures are effective.

There were no significant changes in our internal controls or in other factors that could significantly affect such controls subsequent to the date of their evaluation.

27

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Except as set forth below, we are not a party to any material legal proceedings.

On November 13, 2001, a securities class action complaint was filed in the United States District Court for the Southern District of New York against Predictive, four investment banks that underwrote the Company's initial public offering, and three of the Company's former officers and directors. This action has been coordinated with over three hundred virtually identical actions against other companies and the investment banks that underwrote their initial public offerings. The complaint filed against Predictive generally alleged that the underwriters obtained excessive and undisclosed commissions from customers who received allocations of shares in the Company's initial and secondary public offerings and that the underwriters maintained artificially inflated prices in the after market through "tie-in" arrangements, which required customers to buy

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

additional shares of the Company's stock at pre-determined prices in excess of the offering prices. The complaint further alleged that the Company and certain of its officers and directors violated Sections 11, 12(a)(2) and 15 of the Securities Act of 1933 because the Company's registration statement did not disclose the underwriters' purported misconduct. On April 20, 2002, the plaintiffs amended their complaint, abandoning the Section 12(a)(2) claim, but alleging violations of Sections 10(b) and 20(a) of the Securities Exchange Act, and of Rule 10b-5 promulgated thereunder. Plaintiffs seek an unspecified amount of damages on behalf of persons who purchased the Company's stock pursuant to the registration statements. On July 15, 2002, the Company and three former officers and directors joined a motion to dismiss filed on behalf of the issuer defendants. The Company believes that the allegations against it are without merit and intends to defend the case vigorously.

ITEM 2. CHANGES IN SECURITIES AND USE OF PROCEEDS

NONE.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

NONE.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

NONE.

ITEM 5. OTHER INFORMATION

The Audit Committee of the Board of Directors approved the categories of all non-audit services performed by the Company's independent accountants during the period covered by this report.

ITEM 6. EXHIBITS AND REPORT ON FORM 8-K

(a) The following exhibits are filed as part of this report:

10.1 Employment Agreement , dated August 26, 2002, by and between the Registrant and Neeraj Sethi.

10.2 Employment Agreement , dated September 19, 2002, by and between the Registrant and Shawn Kreloff.

10.3 Employment Agreement , dated November 11, 2002, by and between the Registrant and Shirley Howell.

10.4 Employment Agreement , dated November 11, 2002, by and between the Registrant and Gary Papilsky.

99.1 Certification under Section 906 of the Sarbanes-Oxley Act.

(b) The Company filed six reports on Form 8-K during the three months ended September 30, 2002 and one report filed after September 30, 2002 through the date hereof. Information regarding the items reported on is as follows:

July 30, 2002. The Company announced that Braden Kelly had resigned from its Board of Directors.

August 27, 2002. The Company announced that Neeraj Sethi, the Company's acting Chief Financial Officer was named the Company's Chief Financial Officer on a permanent basis.

Edgar Filing: PREDICTIVE SYSTEMS INC - Form 10-Q

September 4, 2002. The Company announced that John Jacobs had resigned from its Board of Directors.

28

September 16, 2002. The Company announced that Howard Morgan had joined its Board of Directors and that Ronald Pettengill had resigned from its Board of Directors.

September 19, 2002. The Company announced that it will expense the cost of stock options by adopting the fair value method of accounting for stock options contained in SFAS No. 123, Accounting for Stock-Based Compensation. The Company also announced that it will offer its employees the opportunity to participate in a voluntary stock option exchange program.

September 23, 2002. The Company announced that it had named Shawn Kreloff as Executive Vice President of Sales and Business Development.

October 22, 2002. The Company announced the completion of its voluntary stock option exchange program and the amendment of certain of its CEO's options to give them the same terms as if they had been eligible for the voluntary option exchange program.
