MEASUREMENT SPECIALTIES, INC.

(EXACT NAME OF REGISTRANT AS SPECIFIED IN ITS CHARTER)

New Jersey

(STATE OR OTHER JURISDICTION OF

22-2378738

(I.R.S. EMPLOYER

INCORPORATION OR ORGANIZATION) IDENTIFICATION NO.)

1000 LUCAS WAY, HAMPTON, VA 23666

(ADDRESS OF PRINCIPAL EXECUTIVE OFFICES)

(757) 766-1500

(REGISTRANT'S TELEPHONE NUMBER, INCLUDING AREA CODE)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No .

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No .

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Securities Exchange Act of 1934. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Securities Exchange Act of 1934). Yes No .

Indicate the number of shares outstanding of each of the issuer's classes of stock, as of the latest practicable date: On January 28, 2013, the number of shares outstanding of the Registrant's common stock was 15,437,824.

MEASUREMENT SPECIALTIES, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS

FOR THE THREE AND NINE MONTHS ENDED DECEMBER 31, 2012 AND 2011

(UNAUDITED)

(Currency amounts in thousands, except share and per share amounts)

1. DESCRIPTION OF BUSINESS

Interim financial statements: The information presented as of December 31, 2012 and for the three and nine months ended December 31, 2012 and 2011 is unaudited, and reflects all adjustments (consisting only of normal recurring adjustments) which Measurement Specialties, Inc. (the “Company,” “MEAS,” or “we”) considers necessary for the fair presentation of the Company’s financial position as of December 31, 2012, the results of its operations for the three and nine months ended December 31, 2012 and 2011, and cash flows for the nine months ended December 31, 2012 and 2011. The Company’s March 31, 2012 consolidated condensed balance sheet information was derived from the audited consolidated financial statements for the year ended March 31, 2012, which is included as part of the Company’s Annual Report on Form 10-K.

The consolidated condensed financial statements included herein have been prepared in accordance with U.S. generally accepted accounting principles (“U.S. GAAP”) and the instructions to Form 10-Q and Regulation S-X. Accordingly, certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles have been condensed or omitted. These consolidated condensed financial statements should be read in conjunction with the Company’s audited consolidated financial statements for the year ended March 31, 2012, which are included as part of the Company’s Annual Report on Form 10-K.

Description of business: Measurement Specialties, Inc. is a global leader in the design, development and manufacture of sensors and sensor-based systems for original equipment manufacturers (“OEM”) and end users, based on a broad portfolio of proprietary technology and typically characterized by the MEAS brand name. We are a global business and we believe we have a high degree of diversity when considering our geographic reach, broad range of products, number of end-use markets and breadth of customer base. The Company is a multi-national corporation with fifteen primary manufacturing facilities strategically located in the United States, China, France, Ireland, Germany, Switzerland and Scotland, enabling the Company to produce and market globally a wide range of sensors that use advanced technologies to measure precise ranges of physical characteristics. These sensors are used for engine and vehicle, medical, general industrial, consumer and home appliance, military/aerospace, environmental water

monitoring, and test and measurement applications. The Company's products include sensors for measuring pressure, linear/rotary position, force, torque, piezoelectric polymer film sensors, custom microstructures, load cells, vibrations and acceleration, optical absorption, humidity, gas concentration, gas flow rate, temperature, fluid properties and fluid level. The Company's advanced technologies include piezo-resistive silicon, polymer and ceramic piezoelectric materials, application specific integrated circuits, micro-electromechanical systems ("MEMS"), foil strain gauges, electromagnetic force balance systems, fluid capacitive devices, linear and rotational variable differential transformers, anisotropic magneto-resistive devices, electromagnetic displacement sensors, hygroscopic capacitive structures, ultrasonic measurement systems, optical measurement systems, negative thermal coefficient ("NTC") ceramic sensors, 3-6 DOF (degree of freedom) force/torque structures, complex mechanical resonators, magnetic reed switches, high frequency multipoint scanning algorithms, and high precision submersible hydrostatic level detection.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

Principles of consolidation: The consolidated condensed financial statements include the accounts of the Company and its wholly-owned subsidiaries (the "Subsidiaries"). All significant intercompany balances and transactions have been eliminated in consolidation.

The Company accounts for its 50 percent ownership interest in Nikkiso-THERM (“NT”), a joint venture in Japan and the Company’s one variable interest entity (“VIE”), under the equity method of accounting. Under the equity method of accounting, the Company does not consolidate the VIE but recognizes its proportionate share of the profits and losses of the unconsolidated VIE.

Use of estimates: The preparation of the consolidated condensed financial statements, in accordance with U.S. generally accepted accounting principles, requires management to make estimates and assumptions which affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and revenues and expenses during the reporting period. Significant items subject to such estimates and assumptions include the useful lives of fixed assets, carrying amount and analysis of recoverability of property, plant and equipment, asset held for sale, acquired intangibles, goodwill, deferred tax assets, valuation allowances for receivables, inventories, income tax uncertainties and other contingencies, including acquisition earn-outs, and stock based compensation. Actual results could differ from those estimates.

Recently adopted accounting pronouncements: In June 2011, the FASB issued new accounting standards for reporting comprehensive income. The new accounting standards revise only the presentation of comprehensive income in financial statements and require that net income and other comprehensive income be reported either in a single, continuous statement of comprehensive income or in two separate, but consecutive, statements. Presentation of components of comprehensive income in the statements as changes in stockholders’ equity will no longer be allowed. In December 2011, the FASB issued an amendment to the new accounting standards for reporting comprehensive income with the Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive, which defers the changes that relate to the presentation of reclassification adjustments. These new reporting requirements were effective for fiscal years, and interim periods within those years, beginning after December 15, 2011, which is the Company’s 2013 fiscal year. Early adoption of the standard was permitted. The Company applied the new reporting requirements effective April 1, 2012.

3. STOCK BASED COMPENSATION AND PER SHARE INFORMATION

Non-cash equity-based compensation expense for the three months ended December 31, 2012 and 2011 was \$1,500 and \$1,162, respectively, and for the nine months ended December 31, 2012 and 2011 was \$3,744 and \$3,662, respectively. During the nine months ended December 31, 2012, the Company granted 409,050 stock awards from the 2010 Equity Incentive Plan (the “2010 Plan”). The estimated fair value of stock options and restricted stock units granted during the nine months ended December 31, 2012 approximated \$6,123, net of expected forfeitures and is being recognized over the respective vesting periods. During the three and nine months ended December 31, 2012, the Company recognized \$834 and \$1,789, respectively, of expense related to these stock awards.

The Company has five share-based compensation plans for which equity awards are currently outstanding. These plans are administered by the compensation committee of the Board of Directors, which approves grants to individuals eligible to receive awards and determines the number of shares and/or options subject to each award, the terms, conditions, performance measures, and other provisions of the award. The Chief Executive Officer can also grant

individual awards up to certain limits as approved by the compensation committee. Awards are generally granted based on the individual's performance. Terms for stock option awards include pricing based on the closing price of the Company's common stock on the award date, and generally vest over three to five year requisite service periods using a graded vesting schedule or subject to performance targets established by the compensation committee. Shares issued under stock option plans are newly issued common stock. Readers should refer to Note 13 of the consolidated financial statements in the Company's Annual Report on Form 10-K for the fiscal year ended March 31, 2012 for additional information related to the five share-based compensation plans under which awards are currently outstanding.

The Company uses the Black-Scholes-Merton option pricing model to estimate the fair value of equity-based awards with the following assumptions for the indicated periods.

10

	Three months ended December 31,		Nine months ended December 31,			
	2012	2011	2012	2011	2012	2011
Dividend yield	-	-	-	-	-	-
Expected volatility	61.1	68.6	60.8	68.6		
Risk free interest rate	0.7	1.8	0.7	1.8		
Expected term after vesting (in years)	2.0	2.0	2.0	2.0		
Weighted-average grant-date fair value	\$ 16.61	\$ 17.79	\$ 15.49	\$ 17.79		

The assumptions above are based on multiple factors, including historical exercise patterns of employees with respect to exercise and post-vesting employment termination behaviors, expected future exercise patterns for these employees and the historical volatility of our stock price. The expected term of options granted is derived using company-specific, historical exercise information and represents the period of time that options granted are expected to be outstanding. The risk-free interest rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of grant.

During the nine months ended December 31, 2012, a total of 321,676 stock awards were exercised yielding \$4,950 in cash proceeds and excess tax benefit of \$1,145 recognized as additional paid-in capital. At December 31, 2012, there was \$4,997 of unrecognized compensation cost adjusted for estimated forfeitures related to share-based payments, which is expected to be recognized over a weighted-average period of approximately 1.51 years.

Per share information: Basic and diluted per share calculations are based on net income. Basic per share information is computed based on the weighted average common shares outstanding during each period. Diluted per share information additionally considers the shares that may be issued upon exercise or conversion of stock options, less the shares that may be repurchased with the funds received from their exercise. Outstanding awards relating to approximately 347,860 and 139,902 weighted shares were excluded from the calculation for the three months ended December 31, 2012 and 2011, respectively, and outstanding awards relating to approximately 259,063 and 417,635 weighted shares were excluded from the calculation for the nine months ended December 31, 2012 and 2011, as the impact of including such awards in the calculation of diluted earnings per share would have had an anti-dilutive effect.

The computation of the basic and diluted net income per common share is as follows:

	Net income (Numerator)	Weighted Average Shares in thousands (Denominator)	Per-Share Amount
Three months ended December 31, 2012:			
Basic per share information	\$ 6,096	15,352	\$ 0.40
Effect of dilutive securities	-	735	(0.02)
Diluted per-share information	\$ 6,096	16,087	\$ 0.38

Edgar Filing: Measurement Specialties Inc - Form 10-Q

Three months ended December 31, 2011:

Basic per share information	\$ 4,695	15,040	\$ 0.31
Effect of dilutive securities	-	778	(0.01)
Diluted per-share information	\$ 4,695	15,818	\$ 0.30

Nine months ended December 31, 2012:

Basic per share information	\$ 25,073	15,348	\$ 1.63
Effect of dilutive securities	-	778	(0.08)
Diluted per-share information	\$ 25,073	16,126	\$ 1.55

Nine months ended December 31, 2011:

Basic per share information	\$ 19,360	15,059	\$ 1.29
Effect of dilutive securities	-	859	(0.07)
Diluted per-share information	\$ 19,360	15,918	\$ 1.22

4. INVENTORIES

Inventories are valued at the lower of cost or market (“LCM”) using the first-in first-out method. Inventories and inventory reserves for slow-moving, obsolete and lower of cost or market exposures at December 31, 2012 and March 31, 2012 are summarized as follows:

	December 31, 2012	March 31, 2012
Raw Materials	\$ 32,349	\$ 30,419
Work-in-Process	10,259	11,929
Finished Goods	22,383	19,613
	64,991	61,961
Inventory Reserves	(4,329)	(4,257)
	\$ 60,662	\$ 57,704

5. PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment are stated at cost. Equipment under capital leases is stated at the present value of minimum lease payments. Property, plant and equipment are summarized as follows:

	December 31, 2012	March 31, 2012	Useful Life
Production equipment and tooling	\$ 67,433	\$ 60,144	3-10 years
Building and leasehold improvements	35,601	26,390	39 to 45 years or lesser of useful life or remaining term of lease
Furniture and equipment	17,237	15,890	3-10 years
Construction-in-progress	5,224	12,943	
Total	125,495	115,367	
Less: accumulated depreciation and amortization	(60,213)	(54,883)	
	\$ 65,282	\$ 60,484	

Included in construction in progress at December 31, 2012 and March 31, 2012 was approximately \$288 and \$8,375, respectively, related to the construction of new facilities in France and China. Total depreciation expense was \$2,334 and \$2,267 for the three months ended December 31, 2012 and 2011, respectively. Total depreciation expense was \$6,885 and \$6,503 for the nine months ended December 31, 2012 and 2011, respectively. Property and equipment included \$37 and \$60 in capital leases at December 31, 2012 and March 31, 2012, respectively.

6. ACQUISITIONS, ACQUIRED INTANGIBLES AND ASSET HELD FOR SALE

Acquisitions: The Company continually evaluates potential acquisitions that either strategically fit with the Company's existing portfolio or expand the Company's portfolio into new and attractive business areas. The Company has completed a number of acquisitions that have been accounted for as purchases and have resulted in the recognition of goodwill in the Company's financial statements. This goodwill arises because the purchase prices for these businesses reflect a number of factors, including the future earnings and cash flow potential of these businesses, and other factors at which similar businesses have been purchased by other acquirers, the competitive nature of the process by which the Company acquired the business, and the complementary strategic fit and resulting synergies these businesses bring to existing operations.

Goodwill balances presented in the consolidated condensed balance sheets of foreign acquisitions are translated at the exchange rate in effect at each balance sheet date; however, opening balance sheets used to calculate goodwill and acquired intangible assets are based on purchase date exchange rates, except for earn-out payments, which are recorded at the exchange rates in effect on the date the earn-out is accrued or adjusted. The following table shows the roll forward of goodwill reflected in the financial statements for the nine months ended December 31, 2012:

Accumulated goodwill	\$ 147,808
Accumulated impairment losses	(3,353)
Balance March 31, 2012	144,455
Attributable to 2012 acquisitions	1,189
Attributable to 2013 acquisitions	8,843
Effect of foreign currency translation	125
Balance December 31, 2012	\$ 154,612

The following briefly describes the Company's acquisitions since March 31, 2011.

Eureka: On July 8, 2011, the Company acquired certain assets of Eureka Environmental, Inc. ("Eureka"), a sensor company based in Austin, Texas, for \$2,250. The transaction was funded from available cash on hand. Eureka manufactures a range of multi-probe pressure sensors mainly used for monitoring water quality. The water monitoring industry is large and a significant growth opportunity for the Company. The sellers have the potential to receive additional amounts in the form of a contingent payment based on certain earnings thresholds through calendar 2013, for which the Company initially recorded as part of purchase price the fair value estimate of \$2,100. During the three months ended September 30, 2012, the Company determined that Eureka's earnings were expected to be below initially estimated earn-out levels, as a result of changes in certain assumptions based on current economic and market conditions in the water monitoring industry. Accordingly, the Company recorded a fair value adjustment of \$1,883, decreasing the acquisition earn-out liability to \$309, and recognized the adjustment in the Consolidated Condensed Statements of Operations.

Celesco: On September 30, 2011, the Company completed the acquisition of all of the capital stock of Transducer Controls Corporation, a sensor company doing business as Celesco ("Celesco") based in Chatsworth, California, for \$37,375, including an estimated \$2,375 in acquired cash. The purchase price was subsequently increased by \$220 based on final calculations of established working capital levels. The transaction was funded from borrowings under the Company's Senior Secured Credit Facility, as defined in Note 8 below. Celesco is a leading supplier to OEMs of a range of position sensors, including short and long stroke string pot, linear potentiometer and rotary sensors. In fiscal year 2013, the Company recorded certain adjustments to goodwill mainly related to income taxes to finalize purchase price allocation for the Celesco acquisition.

Gentech: On October 31, 2011, the Company completed the acquisition of all of the capital stock of Timesquest Limited, a holding company and the sole shareholder of Gentech International Limited ("Gentech"), for £6,500 or approximately \$10,500, net of cash acquired, based on foreign currency exchange rates at the date of the acquisition. The transaction was funded from borrowings under the Company's Senior Secured Credit Facility. Gentech is a level sensor and non-contact level switch company based in Ayrshire, Scotland. The seller can earn up to an additional £1,500 or approximately \$2,400 if certain sales performance goals are achieved for the two year period ending December 31, 2013, for which the Company initially recorded as part of purchase price a fair value estimate of £1,387 or approximately \$2,200 based on exchange rates at the date of acquisition. During the three months ended September 30, 2012, the Company determined that Gentech's sales were expected to be below initially estimated earn-out levels as a result of changes in certain assumptions based on current sales trends. Accordingly, the Company

recorded a fair value adjustment of £1,171 or approximately \$1,892 (based on the weighted average exchange rate for the nine months ending December 31, 2012) decreasing the acquisition earn-out liability to £216 or approximately \$317 at December 31, 2012, and recognized the adjustment in the Consolidated Condensed Statements of Operations. The acquisition of Gentech is expected to allow the Company to compete in the urea tank market with combined level and quality sensors. In fiscal year 2013, the Company recorded certain adjustments to goodwill mainly related to income taxes to finalize purchase price allocation for the Gentech acquisition.

Cosense: On April 2, 2012, the Company acquired the assets of Cosense, Inc. (“Cosense”), a Long Island, New York based manufacturer of ultrasonic sensors and switches used in semiconductor, medical, aerospace and industrial applications for \$11,500. The Company paid \$10,013 at close in cash from a combination of available cash on hand and from borrowings under the Company’s Senior Secured Credit Facility, and the Company will pay an additional \$1,500 on April 2, 2013, subject to offset for certain indemnification rights. The acquisition of Cosense provides the Company with an ultrasonic sensor used for single-point, multi-point and continuous liquid level measurement, along with entrained bubble detection, which is considered an innovative solution complementary to the Company’s existing product offering, particularly within the high purity semiconductor, medical infusion pump and commercial aerospace markets. For the nine months ended December 31, 2012, approximately \$5,533 in net sales, approximately \$588 in net income and transaction related costs of approximately \$24 related to Cosense were recorded as a component of selling, general and administrative expenses in the Company’s consolidated condensed financial statements. The purchase price allocation for the Cosense acquisition is subject to certain adjustments and will be finalized within the permitted measurement period. The Company’s preliminary purchase price allocation related to the Cosense acquisition is as follows:

Assets:	
Inventory	\$470
Plant and equipment	30
Acquired intangible assets	7,155
Goodwill	3,831
Total purchase price	11,486
Deferred acquisition payment	(1,473)
Cash paid	\$10,013

RTD: On October 1, 2012, the Company acquired the assets of Resistance Temperature Detector Company, Inc. and its parent company, Cambridge Technologies, Inc. (collectively “RTD”), a designer and manufacturer of temperature sensors and probes based in Ham Lake, Minnesota. The Company paid \$17,225 in cash at close from a combination of available cash on hand and from borrowings under the Company’s Senior Secured Credit Facility. The purchase price was subsequently increased by \$58 based on final calculations of established working capital levels. The seller has the potential to receive up to \$1,500 in additional consideration if certain sales targets are achieved during calendar 2013, for which the Company initially recorded as part of purchase price a fair value estimate of \$1,200. The RTD acquisition is expected to provide both operational and strategic synergies in that RTD adds to the Company’s temperature portfolio with a presence in the motor/generator market, and services all of the major OEMs in that space, as well as custom temperature sensors for factory automation, medical and general industrial markets. For the nine months ended December 31, 2012, approximately \$3,747 in net sales, approximately \$470 in net income and transaction related costs of approximately \$148 were recorded as a component of selling, general and administrative expenses related to RTD and were included in the Company’s consolidated condensed financial statements for the nine months ended December 31, 2012. The purchase price allocation for the RTD acquisition is subject to certain adjustments and will be finalized within the permitted measurement period. The Company’s preliminary purchase price allocation related to the RTD acquisition is as follows:

Assets:	
Cash	\$50
Accounts receivable	2,456
Inventory	2,076

Prepaid and other	15
Plant and equipment	1,018
Acquired intangible assets	8,465
Goodwill	5,012
Total purchase price	19,092
Accounts payable	(609)
	18,483
Accrued earn-out contingency	(1,200)
Cash paid	\$17,283

Asset held for sale: The Company completed the consolidation of the former PSI facility into the existing MEAS Hampton facility during the quarter ended June 30, 2011. The PSI facility is no longer utilized for manufacturing and is held for sale. Accordingly, the former PSI facility is classified as an asset held for sale in the consolidated condensed balance sheet, since it meets the held for sale criteria under the applicable accounting guidelines. Based on continued softening of the real-estate market in Hampton, Virginia, the Company re-assessed the market value of the asset held for sale and as a result, the Company recorded an impairment charge of \$489 during the three months ended September 30, 2012 to write-down the asset to its estimated fair value. The carrying value of the former PSI facility is \$940 as of December 31, 2012, and approximates fair value less cost to sell.

Acquired intangible assets: In connection with all acquisitions, the Company acquired certain identifiable intangible assets, including customer relationships, proprietary technology, patents, trade-names, order backlogs and covenants-not-to-compete. Additionally, the Company has purchased certain identifiable intangible assets as asset acquisitions.

Sentelligence: On August 31, 2011, the Company acquired a license to certain intellectual property rights related to fluid property sensors utilizing optical spectral technology for \$1,717 through a 10 year license agreement with Sentelligence, Inc. The Company recorded the \$1,717 payment as an acquired intangible asset subject to amortization over the life of the license agreement. Additionally, the license agreement includes annual royalty payments based on a percentage of net sales with certain annual minimum royalty requirements to maintain exclusive rights under the license agreement. As part of the cost of the intellectual property, the Company initially recorded \$617 for the present value of the minimum royalty liability.

The gross amounts and accumulated amortization, along with the range of amortizable lives, are as follows:

	Weighted-Average Life in years	December 31, 2012			March 31, 2012		
		Gross Amount	Accumulated Amortization	Net	Gross Amount	Accumulated Amortization	Net
Amortizable intangible assets:							
Customer relationships	10	\$69,782	\$ (25,467)	\$44,315	\$58,735	\$ (21,547)	\$37,188
Patents	15	4,029	(2,000)	2,029	4,058	(1,781)	2,277
Tradenames	2	2,640	(2,576)	64	2,562	(2,428)	134
In-process research & development	Indefinite	-	-	-	230	-	230
Backlog	1	5,488	(5,350)	138	4,910	(4,910)	-
Covenants-not-to-compete	3	1,326	(1,123)	203	1,202	(1,071)	131
Proprietary technology	11	15,977	(4,004)	11,973	12,469	(3,051)	9,418
		\$99,242	\$ (40,520)	\$58,722	\$84,166	\$ (34,788)	\$49,378

Amortization expense for acquired intangible assets for the three months ended December 31, 2012 and 2011 was \$2,119 and \$2,501, respectively, and amortization expense for the nine months ended December 31, 2012 and 2011 was \$6,116 and \$5,167, respectively. Annual amortization expense for the years ending December 31 is estimated as follows:

Year	Amortization Expense
2013	\$ 7,313

2014	6,930
2015	6,850
2016	6,521
2017	6,385
Thereafter	24,723
	\$ 58,722

Pro forma Financial Data (Unaudited): The following represents the Company's pro forma consolidated condensed income from continuing operations, net of income taxes, for the three and nine months ended December 31, 2012 and 2011, based on purchase accounting information assuming the Eureka, Celesco, Gentech, Cosense and RTD acquisitions occurred as of April 1, 2011, giving effect to purchase accounting adjustments. The pro forma data is for informational purposes only and may not necessarily reflect results of operations had the acquired companies been operated as part of the Company since April 1, 2011.

	Three months ended		Nine months ended	
	December 31, 2012	2011	December 31, 2012	2011
Net sales	\$ 81,628	\$ 85,630	\$ 264,908	\$ 253,178
Net income	\$ 6,096	\$ 7,064	\$ 26,491	\$ 24,876
Net income per share:				
Basic	\$ 0.40	\$ 0.47	\$ 1.73	\$ 1.65
Diluted	\$ 0.38	\$ 0.45	\$ 1.64	\$ 1.56

7. FAIR VALUE MEASUREMENTS:

Accounting standards define fair value based on an exit price model, establish a framework for measuring fair value where the Company's assets and liabilities are required to be carried at fair value and provide for certain disclosures related to the valuation methods used within a valuation hierarchy as established within the accounting standards. This hierarchy prioritizes the inputs into three broad levels as follows. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs are quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets in markets that are not active, or other observable characteristics for the asset or liability, including interest rates, yield curves and credit risks, or inputs that are derived principally from or corroborated by observable market data through correlation. Level 3 inputs are unobservable inputs based on the Company's assumptions. A financial asset or liability's classification within the hierarchy is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular input to the fair value measurement requires judgment, and may affect the valuation of fair value of assets and liabilities and their placement within the fair value hierarchy levels.

A summary of financial assets and liabilities that are measured at fair value on a recurring basis as of December 31, 2012 and March 31, 2012 are as follows:

	Quoted prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Total
December 31, 2012				
Liabilities:				
Foreign currency exchange contracts	\$ -	\$ -	\$ -	\$-

Edgar Filing: Measurement Specialties Inc - Form 10-Q

Acquisition earn-out contingencies	-	-	1,826	1,826
March 31, 2012				
Assets:				
Foreign currency exchange contracts	\$ -	\$ 11	\$ -	\$11
Liabilities:				
Acquisition earn-out contingencies	-	-	4,317	4,317

The table below provides a reconciliation of the fair value of the acquisition earn-out contingencies measured on a recurring basis for which the Company has designated as Level 3:

Beginning April 1, 2012	\$4,317
Attributable to 2013 acquisitions	1,200
Changes in fair value	(3,775)
Effect of foreign currency translation	84
Balance at December 31, 2012	\$1,826

The foreign currency exchange contracts do not qualify for hedge accounting, and as a result, changes in the fair value of the currency swap are reflected in the accompanying consolidated condensed statements of operations. The fair value of the Company's foreign currency contracts was based on Level 2 measurements in the fair value hierarchy. The fair value of the foreign currency contracts is based on forward exchange rates relative to current exchange rates which were obtained from independent financial institutions reflecting market quotes. The fair value of the acquisition earn-out contingencies is determined using a modeling technique based on significant unobservable inputs calculated using a probability-weighted income approach. Key assumptions include discount rates for present value factor of 16% for Eureka, 3.36% for Gentech and for 4.0% for RTD, which are based on industry specific weighted average cost of capital, adjusted for, among other things, time and risk, as well as forecasted annual earnings before interest, taxes, depreciation and amortization of \$1,039 for Eureka and forecasted annual revenues of £10,800 for Gentech over the life of the earn-outs. The estimated fair value of acquisition earn-out contingencies could differ significantly from actual amounts. Adjustments to the fair value of earn-outs are recorded to earnings with that portion of the adjustment relating to the time value of money as interest expense and the non-interest portion of the change in earn-outs as a separate non-operating item in the statement of operations. During the three months ended September 30, 2012, as a result of the assessment of actual and projected earnings and sales scenarios, the Company determined that Eureka's earnings and Gentech's sales were expected to be below originally estimated earn-out levels. Accordingly, the Company recorded fair value adjustments of \$1,883 and \$1,892 decreasing the acquisition earn-out liabilities for Eureka and Gentech, respectively, and recognized the adjustments in the Consolidated Condensed Statements of Operations.

There were no transfers between Level 1, Level 2 and Level 3 of the fair value hierarchy during the nine months ended December 31, 2012.

Fair Value of Financial Instruments: In addition to the fair value disclosure requirements related to financial instruments carried at fair value, accounting standards require interim disclosures regarding the fair value of all of the Company's financial instruments. The methods and significant assumptions used to estimate the fair value of financial instruments and any changes in methods or significant assumptions from prior periods are also required to be disclosed.

The fair values and carrying amounts of other financial instruments as of December 31, 2012 and March 31, 2012 are as follows:

	December 31, 2012		March 31, 2012	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Liabilities:				
Short-term borrowings and notes payable	\$-	\$-	\$1,867	\$1,867
Capital leases	37	37	60	60
Revolver	86,000	86,000	80,251	80,251

Term debt	20,736	20,736	20,834	20,834
-----------	--------	--------	--------	--------

For promissory notes payable, capital lease obligations, and long-term debt, the fair value is determined as the present value of expected future cash flows discounted at the current interest rate, which approximates rates currently offered by lending institutions for loans of similar terms and comparable maturities to companies with comparable credit risk. These are considered Level 2 inputs. The fair value of the revolver approximates carrying value due to the variable interest nature of the debt. There were no changes in the methods or significant assumptions to estimate fair value of the Company's financial instruments from prior periods.

Certain assets and liabilities are measured at fair value on a nonrecurring basis after initial recognition. That is, the assets and liabilities are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances, for example, when there is evidence of impairment. No circumstances were identified, including evidence of impairment, during the nine months ending December 31, 2012, except for the triggering event requiring an impairment analysis for asset held for sale for which the Company recorded an impairment charge of \$489 during the three months ended September 30, 2012 to write-down an asset held for sale to its estimated fair value, less cost to sell. The fair value measurement of this asset was determined using relevant market data, which are classified as Level 2 inputs.

Derivative instruments and risk management: The Company is exposed to market risks from changes in interest rates, commodities, credit and foreign currency exchange rates, which could impact its results of operations and financial condition. The Company attempts to address its exposure to these risks through its normal operating and financing activities. In addition, the Company's relatively broad-based business activities help to reduce the impact that volatility in any particular area or related areas may have on its operating results as a whole. Readers should refer to Note 7 in the Annual Report for the fiscal year ended March 31, 2012 for additional information related to the Company's exposures to market risks for interest rates, commodities and credit.

Foreign currency exchange rate risk: Foreign currency exchange rate risk arises from the Company's investments in subsidiaries owned and operated in foreign countries, as well as from transactions with customers in countries outside the U.S. and transactions denominated in currencies other than the applicable functional currency.

The effect of a change in currency exchange rates on the Company's net investment in international subsidiaries is reflected in the "accumulated other comprehensive income" component of shareholders' equity. The Company does not hedge the Company's net investment in subsidiaries owned and operated in countries outside the U.S.

Although the Company has a U.S. dollar functional currency for reporting purposes, it has manufacturing and operating sites throughout the world and a large portion of its sales are generated in foreign currencies. A substantial portion of the Company's revenue is priced in U.S. dollars, and most of its costs and expenses are priced in U.S. dollars, with the remaining priced in Chinese RMB, Euros, Swiss francs and British pounds. Sales by subsidiaries operating outside of the United States are translated into U.S. dollars using exchange rates effective during the respective period. As a result, the Company is exposed to movements in the exchange rates of various currencies against the U.S. dollar. Accordingly, the competitiveness of its products relative to products produced locally (in foreign markets) may be affected by the performance of the U.S. dollar compared with that of our foreign customers' currencies. Refer to Note 10, Segment Information, for details concerning net sales invoiced from our facilities within the U.S. and outside of the U.S., as well as long-lived assets. Therefore, both positive and negative movements in currency exchange rates against the U.S. dollar will continue to affect the reported amount of sales, profit, and assets and liabilities in the Company's consolidated condensed financial statements.

During the nine months ended December 31, 2012, the RMB did not fluctuate significantly relative to the U.S. dollar. The RMB appreciated approximately 3.6% and 4.0%, respectively, relative to the U.S. dollar during fiscal 2012 and 2011. The Chinese government no longer pegs the RMB to the U.S. dollar, but established a currency policy letting the RMB trade in a narrow band against a basket of currencies. The Company has more expenses in RMB than sales (i.e., short RMB position), and as such, if the U.S. dollar weakens relative to the RMB, our operating profits will decrease. We continue to consider various alternatives to hedge this exposure, and we are attempting to manage this exposure through, among other things, forward purchase contracts, pricing and monitoring balance sheet exposures for payables and receivables.

Fluctuations in the value of the Hong Kong dollar have not been significant since October 17, 1983, when the Hong Kong government tied the value of the Hong Kong dollar to that of the U.S. dollar. However, there can be no assurance that the value of the Hong Kong dollar will continue to be tied to that of the U.S. dollar.

The Company's French, Irish and German subsidiaries have more sales in Euros than expenses in Euros and the Company's Swiss subsidiary has more expenses in Swiss francs than sales in Swiss francs, and as such, if the U.S. dollar weakens relative to the Euro and Swiss franc, our operating profits increase in France, Ireland and Germany, but decrease in Switzerland. The Company's British subsidiary has more expenses in British pounds than sales in British pounds, and as such, if the U.S. dollar weakens relative to the British pound, our operating profits decrease in the United Kingdom.

The Company has a number of foreign currency exchange contracts in Asia for the purposes of hedging the Company's short-position exposure to the RMB. At December 31, 2012, the Company has a number of RMB/U.S. dollar currency contracts with notional amounts totaling \$13,600 and exercise dates through December 31, 2013 at average exchange rates of 0.1577 (RMB to U.S. dollar conversion rate). With the RMB/U.S. dollar contracts, for every 10 percent depreciation of the RMB, the Company would be exposed to approximately \$1,360 in additional foreign currency exchange losses. Since these derivatives are not designated as hedges for accounting purposes, changes in their fair value are recorded in results of operations, not in other comprehensive income. To manage our exposure to potential foreign currency transaction and translation risks, we may purchase additional foreign currency exchange forward contracts, currency options, or other derivative instruments, provided such instruments may be obtained at suitable prices.

Fair values of derivative instruments not designated as hedging instruments are as follows:

Financial position:	December 31, March 31,		Location
	2012	2012	
Foreign currency contracts - RMB	\$ -	\$ 11	Other assets (liabilities)

The effect of derivative instruments not designated as hedging instruments on the statements of operations and cash flows for the three and nine months ended December 31, 2012 and 2011 is as follows:

Results of operations:	Three months ended		Nine months ended		Location
	December 31, 2012	December 31, 2011	December 31, 2012	December 31, 2011	
Foreign currency contracts - RMB	\$ (217)	\$ 8	\$ (4)	\$ (149)	Foreign currency exchange (gain) loss
Foreign currency exchange contracts - Japanese yen	-	1	-	-	
Total	\$ (217)	\$ 9	\$ (4)	\$ (149)	

Cash flows from operating activities: Source (Use)	Nine months ended		Location
	December 31, 2012	December 31, 2011	
Foreign currency exchange contracts - RMB	\$ 15	\$ 277	Prepaid expenses (Accrued expenses)
Total	\$ 15	\$ 277	

8. LONG-TERM DEBT:

Long-term debt and revolver: The Company entered into a Credit Agreement (the "Senior Secured Credit Facility") dated June 1, 2010, among JPMorgan Chase Bank, N.A., as administrative agent and collateral agent (in such capacity, the "Senior Secured Facility Agents"), Bank America, N.A., as syndication agent, HSBC Bank USA, N.A., as document agent, and certain other parties thereto (the "Credit Agreement") to refinance the Amended and Restated Credit Agreement effective as of April 1, 2006 among the Company, General Electric Capital Corporation ("GE"), as agent and a lender, and certain other parties thereto and to provide for the working capital needs of the Company including to effect permitted acquisitions.

The Senior Secured Credit Facility, as amended, consists of a \$110,000 revolving credit facility (the "Revolving Credit Facility") with a \$75,000 accordion feature enabling expansion of the Revolving Credit Facility to \$185,000. The Revolving Credit Facility has a variable interest rate based on the LIBOR, EURIBOR or the ABR Rate (prime based rate) with applicable margins ranging from 1.25% to 2.00% for LIBOR and EURIBOR based loans or 0.25% to 1.00% for ABR Rate loans. The applicable margins may be adjusted quarterly based on a change in the leverage ratio of the Company. The Senior Secured Credit Facility also includes the ability to borrow in currencies other than U.S. dollars, such as the Euro and Swiss Franc, up to \$66,000. Commitment fees on the unused balance of the Revolving Credit Facility range from 0.25% to 0.375% per annum of the average amount of unused balances. The Revolving Credit Facility will expire on November 8, 2016 and all balances outstanding under the Revolving Credit Facility will be due on such date. The Company has provided a security interest in substantially all of the Company's U.S. based assets as collateral for the Senior Secured Credit Facility and private placement of credit facilities entered into by the Company from time to time not to exceed \$50,000, including the Prudential Shelf Facility (as defined below). The Senior Secured Credit Facility includes an inter-creditor arrangement with Prudential and is on a *pari passu* (equal force) basis with the Prudential Shelf Facility.

The Senior Secured Credit Facility, as amended, includes specific financial covenants for maximum leverage ratio and minimum fixed charge coverage ratio, as well as customary representations, warranties, covenants and events of default for a transaction of this type. Consolidated earnings before interest, taxes, depreciation and amortization ("EBITDA") for debt covenant purposes is the Company's consolidated net income determined in accordance with GAAP minus the sum of income tax credits, interest income, gain from extraordinary items for such period, any non-cash gains, and gains due to fluctuations in currency exchange rates, plus the sum of any provision for income taxes, interest expense, loss from extraordinary items, any aggregate net loss during such period arising from the disposition of capital assets, the amount of non-cash charges for such period, amortized debt discount for such period, losses due to fluctuations in currency exchange rates and the amount of any deduction to consolidated net income as the result of any grant to any members of the management of the Company of any equity interests. The Company's leverage ratio consists of total debt less unrestricted cash maintained in U.S. bank accounts which are subject to control agreements in favor of JPMorgan Chase Bank, N.A., as Collateral Agent, to Consolidated EBITDA. Adjusted fixed charge coverage ratio is Covenant EBITDA less capital expenditures for the last twelve months, excluding capital expenditures for the last twelve months in connection with the facilities being constructed in France in an aggregate amount up to \$11,000 through March 31, 2013 and China in an aggregate amount up to \$6,000 through March 31, 2016, divided by fixed charges. Fixed charges are the last twelve months of scheduled principal payments, taxes paid in cash and consolidated interest expense. All of the aforementioned financial covenants are subject to various adjustments, many of which are detailed in the Credit Agreement.

As of December 31, 2012, the Company utilized the LIBOR based rate for \$86,000 of the Revolving Credit Facility. The weighted average interest rate applicable to borrowings under the Revolving Credit Facility was approximately 1.8% at December 31, 2012. As of December 31, 2012, the outstanding borrowings on the Revolving Credit Facility, which is classified as non-current, were \$86,000. The Company's borrowing capacity is limited by financial covenant ratios, including earnings ratios, and as such, our borrowing capacity is subject to change. At December 31, 2012, the Company could have borrowed an additional \$24,000 under the Revolving Credit Facility.

On June 1, 2010, the Company entered into a Master Shelf Agreement (the "Prudential Shelf Facility") with Prudential Investment Management, Inc. ("Prudential") whereby Prudential agreed to purchase up to \$50,000 of senior secured notes (the "Senior Secured Notes") issued by the Company. Prudential purchased two Senior Secured Notes each for \$10,000 and the remaining \$30,000 of such Senior Secured Notes may be purchased at the discretion of Prudential or one or more of its affiliates upon the request of the Company. The Prudential Shelf Facility has a fixed interest rate of 5.70% and 6.15% for each of the two \$10,000 Senior Secured Notes issued by the Company and the Senior Secured Notes issued thereunder are due on June 1, 2015 and 2017, respectively. The Prudential Shelf Facility includes specific financial covenants for maximum total leverage ratio and minimum fixed charge coverage ratio consistent with the Senior Secured Credit Facility, as well as customary representations, warranties, covenants and events of default. The Prudential Shelf Facility includes an inter-creditor arrangement with the Senior Secured Facility Agents and is on a *pari passu* (equal force) basis with the Senior Secured Facility.

The Company was in compliance with its debt covenants at December 31, 2012.

Deferred financing costs: Amortization of deferred financing costs totaled \$70 and \$79 for the three months ended December 31, 2012 and 2011, respectively, and for the nine months ended December 31, 2012 and 2011, amortization of deferred financing costs totaled \$210 and \$269, respectively. Annual amortization expense of deferred financing costs associated with the refinancing is estimated to be approximately \$280.

China credit facility: On November 3, 2009, the Company's subsidiary in China ("MEAS China") entered into a two year credit facility agreement (the "China Credit Facility") with China Merchants Bank Co., Ltd ("CMB"). On December 23, 2011, MEAS China renewed the China Credit Facility and extended the expiration to November 25, 2013. The China Credit Facility permits MEAS China to borrow up to RMB 68,000 (approximately \$10,700). Specific covenants include customary limitations, compliance with laws and regulations, use of proceeds for operational purposes, and timely payment of interest and principal. MEAS China has pledged its Shenzhen facility to CMB as collateral. The interest rate will be based on the London Inter-bank Offered Rate ("LIBOR") plus a LIBOR spread, depending on the term of the loan when drawn. The purpose of the China Credit Facility is primarily to provide additional flexibility in funding operations of MEAS China. At December 31, 2012, MEAS China had not borrowed any amounts under the China Credit Facility.

European credit facility: On July 21, 2010, the Company's subsidiary in France ("MEAS Europe") entered into a five year credit facility agreement (the "European Credit Facility") with La Societe Bordelaise de Credit Industriel et Commercial ("CIC"). The European Credit Facility permits MEAS Europe to borrow up to €2,000 (approximately \$2,600). Specific covenants include certain financial covenants for maximum leverage ratio and net debt to equity ratio, as well as customary limitations, compliance with laws and regulations, use of proceeds, and timely payment of interest and principal. MEAS Europe has pledged its Les Clayes-sous-Bois, France facility to CIC as collateral. The interest rate is based on the EURIBOR interest rate plus a spread of 1.8%. The EURIBOR interest rate will vary depending on the term of the loan when drawn. The purpose of the European Credit Facility is primarily to provide additional flexibility in funding operations of MEAS Europe. At December 31, 2012, MEAS Europe had not borrowed any amounts under the European Credit Facility.

Long-term debt and promissory notes: Below is a summary of the long-term debt and promissory notes outstanding at December 31, 2012 and March 31, 2012:

	December 31, 2012	March 31, 2012
Term notes at 5.70% due in full on June 1, 2015	\$ 10,000	\$ 10,000
Term notes at 6.15% due in full on June 1, 2017	10,000	10,000
Governmental loans from French agencies at no interest and payable based on R&D expenditures	736	834
	20,736	20,834
Less current portion of long-term debt	198	123
	\$ 20,538	\$ 20,711

The annual principal payments of long-term debt, promissory notes and revolver as of December 31, 2012 are as follows:

Years ending December 31,	Term	Other	Subtotal	Revolver	Total
2013	\$-	\$ 198	\$ 198	\$-	\$ 198
2014	-	132	132	-	132
2015	10,000	-	10,000	-	10,000
2016	-	-	-	86,000	86,000
2017	10,000	406	10,406	-	10,406
Total	\$20,000	\$ 736	\$ 20,736	\$ 86,000	\$ 106,736

9. COMMITMENTS AND CONTINGENCIES:

Litigation:

Pending Legal Matters

There are currently no material pending legal proceedings. From time to time, the Company is subject to legal proceedings and claims in the ordinary course of business. The Company currently is not aware of any such legal proceedings or claims that the Company believes will have, individually or in the aggregate, a material adverse effect on the Company's business, financial condition, or operating results.

Contingency: Exports of technology necessary to develop and manufacture certain of the Company's products are subject to U.S. export control laws and similar laws of other jurisdictions, and the Company may be subject to adverse regulatory consequences, including government oversight of facilities and export transactions, monetary penalties and other sanctions for violations of these laws. In certain instances, these export control regulations may prohibit the Company from developing or manufacturing certain of its products for specific end applications outside the United States. In late May 2009, the Company became aware that certain of its piezo products when designed or modified for use with or incorporation into a defense article are subject to the International Traffic in Arms Regulations ("ITAR") administered by the United States Department of State. Certain technical data relating to the design of the products may have been exported to China without authorization from the U.S. Department of State. As required by the ITAR, the Company conducted a thorough investigation into the matter. Based on the investigation, the Company filed in December 2009 a final voluntary disclosure with the U.S. Department of State relating to that matter, as well as to exports and re-exports of other ITAR-controlled technical data and/or products to Canada, India, Ireland, France, Germany, Italy, Israel, Japan, the Netherlands, South Korea, Spain and the United Kingdom, which disclosure has since been supplemented. In the course of the investigation, the Company also became aware that certain of its products may have been exported from France without authorization from the relevant French authorities. The Company investigated this matter thoroughly. In December 2009, it also voluntarily submitted to French customs authorities a list of products that may have required prior export authorization, which has since been supplemented to exclude certain products. The French authorities have confirmed no fine or penalty associated with the French export issues will be imposed because the French authorities consider the matter closed and the period of time for enforcement under French statute of limitations expired in December 2012. In addition, the Company has taken steps to mitigate the impact of potential violations, and we are in the process of strengthening our export-related controls and procedures. The U.S. Department of State and other regulatory authorities encourage voluntary disclosures and generally afford parties mitigating credit for submitting such voluntary disclosures. The Company nevertheless could be subject to potential regulatory consequences related to these possible violations ranging from a no-action letter, government oversight of facilities and export transactions, monetary penalties, and in extreme cases, debarment from government contracting, denial of export privileges and/or criminal penalties. It is not possible at this time to predict the precise timing or probable outcome of any potential regulatory consequences related to these possible violations. Moreover, due to the unpredictable nature of the probable outcome of these voluntary proceedings, the Company cannot make a reasonable estimate of the possible loss or range of losses at this time. The Company has incurred cumulatively through December 31, 2012 approximately \$575 in legal fees associated with the French customs and ITAR matters.

Acquisition Earn-Outs: The Company has an earnings based earn-out in connection with the Eureka acquisition, for which the Company initially recorded an estimated fair value of \$2,100 on July 8, 2011. The Company has a sales based earn-out in connection with the Gentech acquisition, for which the Company initially recorded a fair value estimate of £1,387 or approximately \$2,200, based on exchange rates at the date of acquisition. The Company has a sales based earn-out in connection with the RTD acquisition, for which the Company initially recorded a fair value estimate of \$1,200. During the three months ended September 30, 2012, the Company determined that Eureka's earnings and Gentech's sales were expected to be below initially estimated earn-out levels. Accordingly, the Company recorded fair value adjustments of \$1,883 and £1,171 or approximately \$1,892 (based on the weighted average exchange rate for the nine months ending December 31, 2012) decreasing the acquisition earn-out liabilities for Eureka and Gentech, respectively. At December 31, 2012, the acquisition earn-out liabilities for Eureka, Gentech and RTD totaled \$309, £216 or approximately \$317, and \$1,200, respectively.

10. SEGMENT INFORMATION:

The Company continues to have one reporting segment, a sensor business, under applicable accounting guidelines for segment reporting. For a description of the products and services of the Sensor business, see Note 1. Management continually assesses the Company's operating structure, and this structure could be modified further based on future circumstances and business conditions.

Geographic information for revenues based on country from which invoiced and long-lived assets based on country of location, which includes property, plant and equipment, but excludes intangible assets and goodwill, net of related depreciation and amortization follows:

	Three months ended December 31,		Nine months ended December 31,	
	2012	2011	2012	2011
Net Sales:				
United States	\$ 32,339	\$ 26,734	\$ 98,300	\$ 79,699
France	14,357	13,023	45,663	39,606
Germany	3,338	4,246	10,870	15,242
Ireland	6,375	6,219	20,964	21,581
Switzerland	3,982	4,971	12,128	13,420
Scotland	2,751	2,459	9,556	2,459
China	18,486	18,689	60,525	54,761
Total:	\$ 81,628	\$ 76,341	\$ 258,006	\$ 226,768

December 31, 2012 March 31, 2012

Long Lived Assets:		
United States	\$ 9,179	\$ 7,375
France	18,688	16,962
Germany	3,114	3,294
Ireland	3,055	3,216
Switzerland	3,082	2,928
Scotland	379	323
China	27,785	26,386
Total:	\$ 65,282	\$ 60,484

11. SUBSEQUENT EVENT:

On February 1, 2013, the Company entered into Amendment No. 4 to the Credit Agreement (the "Credit Agreement Amendment") among the Company, the financial institutions party thereto and JPMorgan Chase Bank, N.A., as administrative agent to amend the Company's senior secured facility (the "Senior Secured Facility") under that certain Credit Agreement dated as of June 1, 2010, among the Company, the lenders party thereto from time to time, and JPMorgan Chase Bank, N.A., as administrative agent. The Credit Agreement Amendment increased the aggregate commitment to \$185,000 from \$110,000, reset the accordion feature to \$75,000 for future expansion and added PNC Bank to the group of lenders.

On February 1, 2013, the Company entered into a Fourth Amendment to Note Purchase Agreement (the "Prudential Amendment") among Prudential Insurance Company of America ("Prudential") other note-holders party thereto, the

Company, and certain subsidiaries of the Company party thereto to amend that certain Note Purchase and Private Shelf Agreement dated June 1, 2010, among the Company, Prudential and other note-holders party thereto (the “Note Purchase Agreement”). The Prudential Amendment amended the Note Purchase Agreement to provided conformity with the Credit Agreement Amendment since the Prudential Shelf Agreement is on a pari passu (equal force) basis with the Senior Secured Facility.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

(Amounts in thousands, except per share data)

Information Relating To Forward-Looking Statements

This report includes forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended. Certain information included or incorporated by reference in this Quarterly Report, in press releases, written statements or other documents filed with or furnished to the Securities and Exchange Commission (“SEC”), or in our communications and discussions through webcasts, phone calls, conference calls and other presentations and meetings, may be deemed to be “forward-looking statements” within the meaning of the federal securities laws. All statements other than statements of historical fact are statements that could be deemed forward-looking statements, including statements regarding: projections of revenue, margins, expenses, tax provisions (or tax benefits), earnings or losses from operations, cash flows, synergies or other financial items; plans, strategies and objectives of management for future operations, including statements relating to potential acquisitions, executive compensation and purchase commitments; developments, performance or industry or market rankings relating to products or services; future economic conditions or performance; future compliance with debt covenants; expectations concerning estimated fair value of acquisition earn-out contingencies; the outcome of outstanding claims or legal proceedings; assumptions underlying any of the foregoing; and any other statements that address activities, events or developments that Measurement Specialties, Inc. (“MEAS,” the “Company,” “we,” “us,” “our”) intends, expects, projects, believes or anticipates will or may occur in the future. Forward-looking statements may be characterized by terminology such as “forecast,” “believe,” “anticipate,” “should,” “would,” “intend,” “plan,” “will,” “expects,” “estimates,” “positioned,” “strategy,” and similar expressions. These statements are based on assumptions and assessments made by our management in light of their experience and perception of historical trends, current conditions, expected future developments and other factors they believe to be appropriate.

Any such forward-looking statements are not guarantees of future performance and involve a number of risks and uncertainties, many of which are beyond our control. Actual results, developments and business decisions may differ materially from those envisaged by such forward-looking statements. These forward-looking statements speak only as of the date of the report, press release, statement, document, webcast or oral discussion in which they are made. Factors that might cause actual results to differ materially from the expected results described in or underlying our forward-looking statements include:

- Conditions in the general economy, including risks associated with the current financial markets and worldwide economic conditions and demand for products that incorporate our products;
- Competitive factors, such as price pressures and the potential emergence of rival technologies;
- Compliance with export control laws and regulations;
- Fluctuations in foreign currency exchange and interest rates;

Edgar Filing: Measurement Specialties Inc - Form 10-Q

· Interruptions in supply chain, distribution systems, suppliers' operations or the refusal of our suppliers to provide us or our customers with component materials, particularly in light of the current economic conditions, natural or man-made disasters and potential for suppliers to fail;

· Timely development, market acceptance and warranty performance of new products;

· Changes in product mix, costs and yields;

· Uncertainties related to doing business in Europe and China;

· Legislative initiatives, including tax legislation and other changes in the Company's tax position;

· Legal proceedings;

· Product liability, warranty and recall claims;

· Compliance with debt covenants, including events beyond our control;

· Conditions in the credit markets, including our ability to raise additional funds;

· Adverse developments in the housing industry and other markets served by us;

·

Changes in estimated fair value of acquisition earn-out contingencies due to changes in assumptions and expected results of applicable financial criteria; and

The risk factors listed from time to time in the reports we file with the SEC, including those described below under “Item 1A. Risk Factors” in this Quarterly Report on Form 10-Q.

This list is not exhaustive. Except as required under federal securities laws and the rules and regulations promulgated by the SEC, we do not intend to update publicly any forward-looking statements after the filing of this Quarterly Report on Form 10-Q, whether as a result of new information, future events, changes in assumptions or otherwise.

Overview

Measurement Specialties, Inc. is a global leader in the design, development and manufacture of sensors and sensor-based systems for OEM and end users, based on a broad portfolio of proprietary technology and typically characterized by the MEAS brand name. We are a global business and we believe we have a high degree of diversity when considering our geographic reach, broad range of products, number of end-use markets and breadth of customer base. The Company is a multi-national corporation with fifteen primary manufacturing facilities strategically located in the United States, China, France, Ireland, Germany, Switzerland and Scotland, enabling the Company to produce and market globally a wide range of sensors that use advanced technologies to measure precise ranges of physical characteristics. These sensors are used for engine and vehicle, medical, general industrial, consumer and home appliance, military/aerospace, environmental water monitoring, and test and measurement applications. The Company’s products include sensors for measuring pressure, linear/rotary position, force, torque, piezoelectric polymer film sensors, custom microstructures, load cells, vibrations and acceleration, optical absorption, humidity, gas concentration, gas flow rate, temperature, fluid properties and fluid level. The Company’s advanced technologies include piezoresistive silicon, polymer and ceramic piezoelectric materials, application specific integrated circuits, MEMS, foil strain gauges, electromagnetic force balance systems, fluid capacitive devices, linear and rotational variable differential transformers, anisotropic magneto-resistive devices, electromagnetic displacement sensors, hygroscopic capacitive structures, ultrasonic measurement systems, optical measurement systems, negative thermal coefficient (“NTC”) ceramic sensors, 3-6 DOF (degree of freedom) force/torque structures, complex mechanical resonators, magnetic reed switches, high frequency multipoint scanning algorithms and high precision submersible hydrostatic level detection. We compete in growing global market segments driven by demand for products that are smarter, safer, more energy-efficient, and environmentally-friendly. We deliver a strong value proposition to our customers through our willingness to customize sensor solutions, leveraging our innovative portfolio of core technologies and exploiting our low-cost manufacturing model based on our 17 year presence in China.

Executive Summary

Our vision is to be the supplier of choice to OEMs and select end-users for all their physical sensing needs. To that end, MEAS continues to expand our market position as a leading global sensor supplier. The Company's strong recovery since fiscal 2010 reflects the positive returns from our significant investments in research and development for new programs and the \$278,500 invested in our 20 acquisitions since June 2004, expanding our product offerings and geographic reach.

The Company remains focused on creating long-term shareholder value through continued development of innovative technologies and strengthening our market position by expanding customer relationships. To accomplish this goal, we continue to take measures we believe will result in sales performance in excess of the overall market and generation of positive earnings before interest, tax, depreciation and amortization ("EBITDA"). A core tenant of our long-term strategy to increase profitability is to grow the size and scale of the Company in order to improve our leverage of SG&A expenses. Accordingly, we believe we can achieve 19% to 20% EBITDA Margin (EBITDA as a percent of Net Sales) in fiscal 2013 and improve this metric as we grow sales at a higher rate than costs in fiscal 2014 and beyond. We have implemented aggressive actions that continue to position the Company for future growth in sales and profitability, all of which we ultimately expect to translate to enhanced shareholder value. We believe we continue to have one of the strongest product development pipelines in the history of the Company, which we expect to lay the foundation for future sales growth. Research and development will continue to play a key role in our efforts to maintain product innovations for new sales and to improve profitability. Our broad range of products and geographic diversity provide the Company with a variety of opportunities to leverage technology, products, manufacturing base and our financial performance.

The Company made three acquisitions and entered into a license agreement for certain intellectual property rights during fiscal 2012, and made two acquisitions during fiscal 2013. On July 8, 2011, the Company purchased the assets of Eureka Environmental (“Eureka”), a manufacturer of a multi-probe sensor for monitoring water quality. On September 30, 2011, the Company purchased the stock of Transducer Controls Corporation, also known as Celesco, a manufacturer of a range of position sensors, including short and long stroke “string pot,” linear potentiometer and rotary sensors. On October 31, 2011, the Company completed the acquisition of all of the capital stock of Timesquest Limited, a holding company and the sole shareholder of Gentech International Limited (“Gentech”), a designer and manufacturer of position sensors used largely for tank liquid level measurement, including urea tank level in heavy truck SCR systems sensor based in Ayrshire, Scotland. On August 31, 2011, the Company acquired certain intellectual property rights for fluid property sensors utilizing optical spectral technology through a license agreement with Sentelligence. On April 2, 2012, the Company acquired the assets of Cosense, Inc. (“Cosense”), a Long Island, New York based manufacturer of ultrasonic sensors and switches used in semiconductor, medical, aerospace and industrial applications. On October 1, 2012, the Company acquired the assets of Resistance Temperature Detector Company, Inc. and its parent company, Cambridge Technologies, Inc., (collectively “RTD”), a designer and manufacturer of temperature sensors and probes based in Ham Lake, Minnesota. The RTD acquisition is expected to provide both operational and strategic synergies in that RTD adds to the Company’s temperature portfolio with a presence in the motor/generator market, and services all of the major OEMs in that space, as well as custom temperature sensors for factory automation, medical and general industrial markets. Acquisitions are a key component of the Company’s growth strategy, though there is no specific timetable for any additional acquisitions.

Trends

There are a number of trends that we expect to materially affect our future operating results, including changing global economic conditions with the resulting impact on our sales, profitability, and capital spending, changes in foreign currency exchange rates relative to the U.S. dollar, shifts in our taxable income between tax jurisdictions and the resulting impact on our overall effective tax rate, changes in our debt levels and applicable interest rates, and prices of raw materials and other costs, such as labor. Additionally, our earnings could be impacted by changes in the fair value of acquisition earn-out contingencies and sales and results of operations could be impacted by additional acquisitions.

The sensor market remains an attractive space in which to operate. As OEMs continue to add features that drive improvements in efficiency, safety and user convenience, sensor content increases. Our strategy has been to increase our product breadth, geographic footprint and engineering capabilities in order to more completely address the sensing needs of our target OEMs. We remain active on hundreds of development projects at any given time. We believe this strategy, coupled with the overall sensor content growth, will allow us to maintain strong organic sales for the foreseeable future. The global macro-economic indicators remain mixed and cause our customers to remain cautious, due to, among other factors, the euro-zone debt crisis, slowdown in China, fears of a double-dip recession and high unemployment. As a result of limited customer visibility in product demand, we have set our outlook for sales accordingly: Including sales from recent acquisitions, the Company expects to generate sales ranging from \$346,000 to \$348,000 for fiscal 2013. We remain positive with regard to sales contribution coming from product developments and expect strong contributions in fiscal 2013 and in future periods. Additionally, we expect the sensor market will continue to perform well relative to the overall economy as a result of the increase in sensor content in various products across most end markets in the U.S., Europe and Asia.

The following graph details the Company's quarterly net sales and adjusted EBITDA over the previous two years.

Adjusted EBITDA is a non-GAAP financial measure that is not in accordance with, or an alternative to, measures prepared in accordance with GAAP. The Company believes certain financial measures which meet the definition of non-GAAP financial measures provide important supplemental information. The Company considers Adjusted EBITDA an important financial measure because it provides a financial measure of the quality of the Company's earnings from a cash flow perspective (prior to taking into account the effects of changes in working capital and purchases of property and equipment and debt service). Other companies may calculate Adjusted EBITDA differently than we do, which might limit its usefulness as a comparative measure. Adjusted EBITDA is used by management in addition to and in conjunction with the results presented in accordance with GAAP. Additionally, we believe quarterly Adjusted EBITDA provides the current run-rate for trending purposes rather than a trailing twelve month historical amount. The following table details quarterly net sales and also provides a non-GAAP reconciliation of quarterly Adjusted EBITDA to the applicable GAAP financial measures.

Quarter Ended	Net Sales	Quarterly Adjusted EBITDA*	Quarterly Income (Loss) Adjusted from		Interest	Foreign Currency Exchange Loss (Gain)	Depreciation and Amortization	Income Taxes	Share-based Compensation	Other*
			Margin	Operations						
12/31/2010	\$71,687	\$14,176	20 %	\$ 7,499	\$ 753	\$ (63)	\$ 4,106	\$ 893	\$ 974	\$ 14
3/31/2011	\$76,766	\$15,691	20 %	\$ 8,330	\$ 650	\$ 305	\$ 3,667	\$1,383	\$ 1,356	\$-
6/30/2011	\$77,184	\$15,277	20 %	\$ 8,008	\$ 579	\$ 399	\$ 3,520	\$1,453	\$ 1,245	\$ 73
9/30/2011	\$73,243	\$13,685	19 %	\$ 6,656	\$ 548	\$ (378)	\$ 3,581	\$1,630	\$ 1,254	\$394
12/31/2011	\$76,341	\$13,057	17 %	\$ 4,695	\$ 806	\$ 27	\$ 4,847	\$1,187	\$ 1,162	\$333
3/31/2012	\$86,436	\$16,625	19 %	\$ 8,345	\$ 642	\$ (222)	\$ 4,787	\$1,883	\$ 602	\$588
6/30/2012	\$88,613	\$17,155	19 %	\$ 8,589	\$ 722	\$ 39	\$ 4,372	\$2,566	\$ 856	\$ 11
9/30/2012	\$87,758	\$17,671	20 %	\$ 10,406	\$ 662	\$ 202	\$ 4,316	\$3,503	\$ 1,388	\$(2,806)
12/31/2012	\$81,628	\$14,015	17 %	\$ 6,096	\$ 688	\$ (7)	\$ 4,523	\$1,075	\$ 1,500	\$140

* - Adjusted EBITDA = Income from Continuing Operations before Interest, Foreign Currency Exchange Loss (Gain), Depreciation and Amortization, Income Taxes, Share-based Compensation and Other. Other represents legal fees incurred related to certain International Traffic in Arms Regulations matters, professional fees related to acquisitions, impairment of asset held for sale and fair value adjustments to earn-out contingencies. Adjusted EBITDA Margin = Adjusted EBITDA divided by Net Sales. For the quarter ended September 30, 2012, professional fees were \$185, impairment of asset held for sale \$489, restructuring costs of \$242 and income from the fair value adjustments to earn-out contingencies was \$3,722. For the quarter ended December 31, 2012, restructuring costs totaled \$120 and professional fees were \$20.

The primary factors that impact our costs of sales include production and sales volumes, product sales mix, foreign currency exchange rates, changes in the price of raw materials and the impact of various cost control measures. Although we expect continued pressures on our gross margins given our expectation that costs, including raw material and labor costs, will increase, we expect product mix to improve, largely due to slower Sensata sales growth relative to other more profitable product lines, and increased leverage of our fixed manufacturing overhead. We expect our overall gross margins during fiscal 2013 to range from approximately 40% to 42%, though gross margins for certain quarters could be outside this expected range. As with all manufacturers, our gross margins are sensitive to the overall volume of business (i.e., economies of scale) in that certain costs are fixed. During the year ended March 31, 2012, the RMB appreciated approximately 3.6%, and during fiscal 2011, the RMB appreciated approximately 4.0% relative to the U.S. dollar. During the nine months ended December 31, 2012, the RMB remained relatively stable relative to the U.S. dollar on a trailing quarterly basis, but there are indications that the trend of appreciation is will continue. We estimate in 2013 for every 10% increase in the value of the RMB relative to the U.S. dollar, our gross margins decline by approximately \$2,667.

Total selling, general and administrative expenses (“Total SG&A”) as a percentage of net sales were higher in fiscal 2012 as compared to the prior year, mainly reflecting increases in acquisition related expenses and amortization of acquired intangible assets, as well as higher research and development costs. Long-term, the Company plans to continue to control costs and leverage our SG&A expenses by growing sales at a higher rate than SG&A expenses. As a percent of sales, Total SG&A was approximately 28.7%, 28.6% and 34.1% in fiscal years 2012, 2011 and 2010, respectively. During the first nine months of fiscal 2013, total SG&A as a percent of net sales was approximately 29.3%. In 2013, we expect a decrease in organic SG&A as a percentage of net sales, mainly due to higher organic sales, which we expect to be partially offset by continued investment in R&D for new programs. Organic SG&A and organic sales are defined as SG&A and sales excluding SG&A and sales from recent acquisitions consummated during the current and previous fiscal years. Total SG&A expenses are expected to increase in fiscal 2013 due to higher acquisition related expenses, amortization expense from recent acquisitions and non-cash equity based compensation.

Amortization of acquired intangible assets and deferred financing costs increased over the past three years mainly due to acquisitions. Amortization is disproportionately loaded more in the initial years of the acquisition, and therefore amortization expense is higher in the quarters immediately following a transaction, and declines in later years based on how various intangible assets are valued and the differing useful lives for which the respective intangible assets are amortized. For example, backlog is amortized over a period less than 1 year and patents are generally amortized over a weighted average life of approximately 15 years. Amortization of acquired intangible assets for fiscal 2013 is expected to approximate the level of amortization expense in fiscal 2012, assuming, among other factors, preliminary purchase accounting estimates for the Cosense acquisition, excluding the impact of other new acquisitions and no significant changes in foreign currency exchange rates.

In addition to margin exposure, the Company also has foreign currency exchange exposures related to balance sheet accounts. When foreign currency exchange rates fluctuate, there is a resulting revaluation of assets and liabilities denominated and accounted for in foreign currencies other than the subsidiary’s functional currency, resulting in foreign currency exchange (“fx”) losses or gains. For example, our Swiss company, which uses the Swiss franc or “CHF” as its functional currency, holds cash denominated in foreign currencies (U.S. dollar and Euro). As the Swiss franc

appreciates against the U.S. dollar and/or Euro, the cash balances held in those denominations are devalued when stated in terms of Swiss francs. These fx transaction gains and losses are reflected in our "Foreign Currency Exchange Gain or Loss." Aside from cash, our foreign entities generally hold receivables and payables in foreign currencies. During the nine months ended December 31, 2012, the Company recorded net fx loss of approximately \$235 and recorded net fx gain of \$175 in fiscal 2012 and net fx losses of \$439 in fiscal 2011. The Company's operations outside of the U.S. and the volume of business denominated in other currencies have expanded over the years from acquisitions. We expect to see continued fx losses or gains associated with volatility of foreign currency exchange rates.

The Company uses and may continue to use foreign currency contracts to hedge these fx exposures. The Company does not hedge all of its fx exposures, but has accepted some exposure to exchange rate movements. The Company does not apply hedge accounting when derivative financial instruments are used to manage these fx exposures. Since the Company does not apply hedge accounting, the changes in the fair value of those derivative financial instruments are reported in earnings in the fx gains or losses caption. We expect the value of the U.S. dollar will continue to fluctuate relative to the RMB, Euro, Swiss franc and British pound. Therefore, both positive and negative movements in currency exchange rates relative to the U.S. dollar will continue to affect the reported amounts of sales, profits, and assets and liabilities in the Company's consolidated condensed financial statements.

We believe the Company has a relatively low overall effective cash tax rate with the utilization of our NOLs, as well as an overall low effective tax rate due to the low tax rates afforded to the Company in several tax jurisdictions in which we operate, including China, Ireland and Switzerland. Our overall effective tax rate will continue to fluctuate as a result of the shift in earnings among the various taxing jurisdictions in which we operate and their varying tax rates. This is particularly challenging due to the different timing and rates of economic activity around the world. We expect our 2013 overall estimated effective tax rate without discrete tax adjustments to range from approximately 21% to approximately 24%, an increase as compared to the prior year. The increase in the estimated overall effective tax rate mainly reflects the shift of taxable earnings to tax jurisdictions with higher tax rates. The overall estimated effective tax rate is based on expectations and other estimates and involves complex domestic and foreign tax issues, which the Company monitors closely, but accordingly are subject to change.

In fiscal 2010, the Company's subsidiary in China, MEAS China, received approval from the Chinese authorities for High New Technology Enterprise ("HNTE") status. HNTE status decreased the tax rate for MEAS China from 18% to 15% through December 31, 2011. The Company is working with Chinese authorities for renewal of HNTE status, and based on current tax law and our existing tax status, management believes it is probable MEAS China will obtain recertification for HNTE status. Accordingly, the Company continues to record income taxes in China at the 15% tax rate. To qualify for this reduced rate the Company must continue to meet various criteria in regard to its operations related to sales, research and development activity, and intellectual property rights. If the Company does not continue to receive HNTE status, the Company's income tax rate in China would increase to 25%.

The Company plans to continue investing in various capital projects in fiscal 2013 to generate higher sales in new and expanded programs, and expects these expenditures to range between 3.5% and 4.5% of sales, excluding investments in Greenfield manufacturing facilities. The Company's investment in the new Greenfield manufacturing facility in Chengdu, China will continue through fiscal 2016. The construction of the new Toulouse facility has been completed and the Company has transitioned to the new building. The cost of the new Toulouse facility was approximately \$10,000, excluding value added taxes ("VAT"), of which cost approximately \$8,375 was incurred during fiscal 2012. The Chengdu facility is expected to be built by March 2016 at a cost of approximately \$6,000, excluding land and VAT, of which approximately \$288 has been incurred to date. As part of the transition to new facilities, the Company expects to temporarily increase certain inventory levels.

Results of Operations

Three Months Ended December 31, 2012 Compared to Three Months Ended December 31, 2011

The following table sets forth certain items from operations in our consolidated condensed statements of operations for the three months ended December 31, 2012 and 2011, respectively:

	Three months ended			Percent
	December 31,		Change	Change
	2012	2011		
Net sales	\$ 81,628	\$ 76,341	\$ 5,287	6.9
Cost of goods sold	49,074	47,470	1,604	3.4
Gross profit	32,554	28,871	3,683	12.8
Operating expenses:				
Selling, general, and administrative	21,184	18,664	2,520	13.5
Non-cash equity based compensation	1,500	1,162	338	29.1
Amortization of acquired intangibles and deferred financing costs	2,189	2,580	(391)	(15.2)
Total selling, general and administrative expenses	24,873	22,406	2,467	11.0
Operating income	7,681	6,465	1,216	18.8
Interest expense, net	688	806	(118)	(14.6)
Foreign currency exchange loss (gain)	(7)	27	(34)	(125.9)
Equity income in unconsolidated joint venture	(143)	(240)	97	(40.4)
Other expense (income)	(28)	(10)	(18)	180.0
Income before income taxes	7,171	5,882	1,289	21.9
Income tax expense	1,075	1,187	(112)	(9.4)
Net income	\$ 6,096	\$ 4,695	\$ 1,401	29.8

Net sales: For the three months ended December 31, 2012, net sales totaled \$81,628, representing an increase of \$5,287 or 6.9% over the corresponding period last year. Organic sales, defined as net sales excluding sales attributed to the Gentech, Cosense and RTD acquisitions of \$8,059 for the three months ended December 31, 2012 and net sales of \$2,459 for Gentech during the prior year, decreased \$313 or 0.5%. There were decreases in sales with Sensata, vibration, position and optical. Sales to Sensata, a large automotive sensor supplier and our largest customer, declined due to an insourcing requirement whereby a portion of our business is manufactured by Sensata under a royalty program. Also impacting sales during our third fiscal quarter is the continued uncertainty and cautiousness with customers across most markets, particularly with the instability in Europe, as well as significant destocking in the supply chain. There were sales increases with humidity, pressure/force and piezo product lines reflecting continued new sales from broader product adoptions and new programs.

Partially offsetting the increase in sales is the translation decrease in sales resulting from changes in foreign currency exchange rates. If the average U.S. dollar / Euro exchange rate had not changed during the three months ended December 31, 2012 as compared to the three months ended December 31, 2011, the Company's organic net sales would have been higher by approximately \$731. Since a portion of the Company's sales are denominated in Euros and translated into U.S. dollars, there can be a translation decrease or a translation increase in the Company's net sales depending on changes in exchange rates. The U.S. dollar appreciated relative to the Euro in comparing average exchange rates for the three months ended December 31, 2012 to the three months ended December 31, 2011. For example, €1,000 is translated to \$1,295 based on the three month weighted average exchange rate ended December 31, 2012, but the same €1,000 is translated to \$1,349 using three month average exchange rate ended December 31, 2011.

We expect the sensor market to continue to perform well relative to the overall economy as a result of the increase in sensor content in various products across most end markets in the U.S., Europe and Asia. Sensor content continues to

increase at a faster rate than overall product unit growth, as OEMs add “intelligence” in products across most market verticals to promote improved energy efficiency and cleaner technologies, to meet regulatory compliance requirements and to improve user safety and convenience.

Gross margin: Gross margin (gross profit as a percent of net sales) increased to approximately 39.9% from approximately 37.8%. The increase in gross margin as compared to last year is mainly due to, among other factors, lower levels of scrap and improved direct labor utilization, reflecting, among other things, continued cost control measures, as well as the impact of an improved product sales mix, which were partially offset by the impact of the appreciation of the RMB. In comparing the three months ended December 31, 2012 to corresponding period last year, the RMB appreciated approximately 1.0% relative to the U.S. dollar. This translates to an annualized decrease in profits of approximately \$267 based on an estimate decrease in our operating income of approximately \$2,667 for every 10% appreciation of the RMB against the U.S. dollar.

On a continuing basis, our gross margin may vary due to product mix, sales volume, availability and cost of raw materials, foreign currency exchange rates, and other factors.

Selling, general and administrative: Overall, total selling, general and administrative (“SG&A”) expenses increased \$2,467 or 11.0% to \$24,873. Organic SG&A costs, defined as total SG&A excluding SG&A costs associated with the Gentech, Cosense and RTD acquisitions of \$2,325 for the three months ended December 31, 2012 and \$663 for the three months ended December 31, 2011, increased \$805 or 3.7%. The increase in organic SG&A mainly reflects the increases in compensation related costs. The increase in compensation is due to, among other things, higher headcount and compensation levels, including higher non-cash equity based compensation, as part of the Company’s overall growth.

Total SG&A expenses as a percent of net sales was approximately 30.5%, as compared to 29.3% last year.

Non-cash equity based compensation: Non-cash equity based compensation increased \$338 to \$1,500. The increase in non-cash equity based compensation is because of the timing of the annual award relative to previous year and the ratable recognition of the equity compensation expense in that more expense is recognized in the initial years after the grant. The most recent annual award was granted on July 2, 2012, and the previous annual award was on December 1, 2010. Total compensation cost related to share based payments not yet recognized totaled \$4,997 at December 31, 2012, which is expected to be recognized over a weighted average period of approximately 1.51 years.

Amortization of acquired intangible assets and deferred financing costs: Amortization of acquired intangible assets and deferred financing costs decreased \$391 to \$2,189, as compared to \$2,580 the same period last year. The decrease in amortization expense mainly reflects the scheduled decline in amortization expense of with the disproportionately front loaded amortization of certain intangible assets associated with prior year acquisitions, which were partially offset by the additional amortization expenses from the current year acquisitions of Cosense and RTD.

Interest expense, net: Interest expense decreased \$118 to \$688 from \$806. The decrease in interest expense is primarily due to the decrease in interest rates, partially offset by an increase in average outstanding debt. Interest rates declined to approximately 2.5% for the three months ended December 31, 2012 from 2.9% for the same period last year, reflecting the improved pricing with the amendment to the Senior Secured Credit Facility effective November 8, 2011. Total average outstanding debt increased to approximately \$111,346 for the three months ended December 31, 2012 as compared to \$106,378 for the same period last year, mainly reflecting additional borrowing to fund acquisitions.

Foreign currency exchange gains and losses: Foreign currency exchange gains and losses represent the impact of changes in foreign currency exchange rates with, among other things, the revaluation of balance sheet accounts and

foreign currency contracts. When foreign currency exchange rates fluctuate, there is a resulting revaluation of assets and liabilities denominated and accounted for in foreign currencies other than the business' functional currency. For example, our Irish subsidiary, which uses the Euro as its functional currency, holds cash denominated in foreign currencies, including the U.S. dollar. As the Euro appreciates against the U.S. dollar, the cash balances held in other denominations are devalued when stated in terms of Euro, resulting in a foreign currency exchange loss.

The fluctuation to a foreign currency exchange gain from a loss is mainly due to the foreign currency exchange gains recorded with the fluctuation of the RMB relative to the U.S. dollar, partially offset by the losses with the changes in the European currencies relative to the U.S. dollar during the three months ended December 31, 2012. The Company continues to be impacted by volatility in foreign currency exchange rates, including the impact of the fluctuation of the U.S. dollar relative to the Euro, Swiss franc and British pound, as well as the appreciation of the RMB relative to the U.S. dollar.

Income taxes: Income tax expense for the three months ended December 31, 2012 decreased \$112 to \$1,075 from \$1,187 for the corresponding period last year. The decrease in income tax expense is primarily due to the discrete income tax expense credit, partially offset by the generation of higher profits before taxes and the overall increase in the estimated annual effective tax rate ("estimated ETR").

The Company's overall effective tax rate (income tax expense divided by income before income taxes) for the three months ended December 31, 2012 was approximately 15%, as compared to approximately 20% the same period last year. Income tax expense during interim periods is based on an estimated ETR and any discrete tax adjustments. The estimated ETR without discrete items for fiscal 2013 is approximately 23%, as compared to 21% estimated ETR without discrete items for the three months ended December 31, 2011. The increase in the estimated annual effective tax rate without discrete adjustments mainly reflects a higher proportion of taxable income in tax jurisdictions with higher tax rates, including the U.S. The overall estimated ETR is based on expectations and other estimates and involves complex domestic and foreign tax issues, which the Company monitors closely and are subject to change.

During the three months ended December 31, 2012, the Company recorded discrete income tax credits of approximately \$575 related to the refinement of the estimates between the preparation of the prior year tax provision and the filing of the prior year tax returns for, among other things, R&D tax credits and foreign tax credits related to the previous year.

Nine Months Ended December 31, 2012 Compared to Nine Months Ended December 31, 2011

The following table sets forth certain items from operations in our consolidated condensed statements of operations for the nine months ended December 31, 2012 and 2011, respectively:

	Nine months ended December 31,			Percent
	2012	2011	Change	Change
Net sales	\$ 258,006	\$ 226,768	\$31,238	13.8
Cost of goods sold	151,790	135,449	16,341	12.1
Gross profit	106,216	91,319	14,897	16.3
Operating expenses:				
Selling, general, and administrative	65,457	57,175	8,282	14.5
Non-cash equity based compensation	3,744	3,662	82	2.2
Amortization of acquired intangibles and deferred financing costs	6,326	5,445	881	16.2
Total selling, general and administrative expenses	75,527	66,282	9,245	13.9
Operating income	30,689	25,037	5,652	22.6
Interest expense, net	2,072	1,932	140	7.2
Foreign currency exchange loss	235	47	188	400.0
Equity income in unconsolidated joint venture	(534)	(612)	78	(12.7)
Impairment of asset held for sale	489	-	489	100.0
Acquisition earn-out contingency adjustment	(3,775)	-	(3,775)	100.0
Other expense (income)	(15)	41	(56)	(136.6)
Income before income taxes	32,217	23,629	8,588	36.3
Income tax expense	7,144	4,269	2,875	67.3
Net income	\$ 25,073	\$ 19,360	\$5,713	29.5

Net sales: For the nine months ended December 31, 2012, net sales totaled \$258,006, representing an increase of \$31,238 or 13.8% over the corresponding period last year. Organic sales, defined as net sales excluding sales attributed to the Eureka, Celesco, Gentech, Cosense and RTD acquisitions of \$32,546 for the nine months ended December 31, 2012, and sales of \$7,266 attributed to Eureka, Celesco and Gentech for the nine months ended December 31, 2011, increased \$5,958 or 2.7%. Sales increased in all sensor product lines, except temperature, vibration, and optical, with the largest increases in sales to pressure/force, humidity, Sensata and piezo product lines. The overall increase in organic sales is mainly due to new sales from broader product adoptions and new programs. Sales to Sensata, a large automotive sensor supplier and our largest customer, are expected to decline in future periods because of an insourcing program whereby a portion of our business is manufactured by Sensata under a royalty program. Also impacting sales is the continued uncertainty and cautiousness with customers across most markets, particularly with the instability in Europe, as well as significant destocking in the supply chain during the quarter ended December 31, 2012.

Partially offsetting the increase in sales is the translation decrease in sales resulting from changes in foreign currency exchange rates. If the average U.S. dollar / Euro exchange rate had not changed during the nine months ended December 31, 2012 as compared to the nine months ended December 31, 2011, the Company's net sales would have been higher by approximately \$5,186. Since a portion of the Company's sales are denominated in Euros and translated into U.S. dollars, there can be a translation decrease or a translation increase in the Company's net sales depending on changes in exchange rates. The U.S. dollar appreciated relative to the Euro in comparing average exchange rates for the nine months ended December 31, 2012 to the nine months ended December 31, 2011. For example, €1,000 is translated to \$1,277 based on the nine month weighted average exchange rate ended December 31, 2012, but the same €1,000 is translated to \$1,400 using nine month average exchange rate ended December 31, 2011.

Gross margin: Gross margin (gross profit as a percent of net sales) increased slightly to approximately 41.2% from approximately 40.3%. The increase in gross margin as compared to last year is mainly due to lower levels of scrap and improved direct labor utilization, reflecting, among other things, continued cost control measures, partially offset by the impact of the appreciation of the RMB. In comparing the nine months ended December 31, 2012 to corresponding period last year, the RMB appreciated approximately 1.6% relative to the U.S. dollar. This translates to an annualized decrease in profits of approximately \$427 based on an estimate decrease in our operating income of approximately \$2,667 for every 10% appreciation of the RMB against the U.S. dollar.

On a continuing basis, our gross margin may vary due to product mix, sales volume, availability and cost of raw materials, foreign currency exchange rates, and other factors.

Selling, general and administrative: Overall, total selling, general and administrative ("SG&A") expenses increased \$9,245 or 13.9% to \$75,527. Organic SG&A costs, defined as total SG&A excluding SG&A costs associated with the Eureka, Celesco, Gentech and Cosense acquisitions and acquired intellectual property from Sentelligence of \$9,495 for the nine months ended December 31, 2012 and \$3,075 in SG&A costs for Eureka, Gentech and Sentelligence for the nine months ended December 31, 2011, increased \$2,825 or 4.5%. The increase in organic SG&A mainly reflects the increases in non-cash equity based compensation and research and development costs. The increase in compensation is due to, among other things, higher headcount and compensation levels, including higher non-cash equity based compensation, as part of the Company's overall growth. The increase in research and development costs is mostly due to the Company's continued investment in new programs.

Total SG&A expenses as a percent of net sales was approximately 29.3%, as compared to 29.3% last year.

Non-cash equity based compensation: Non-cash equity based compensation increased \$82 to \$3,744. The increase in non-cash equity based compensation is because of the timing of the annual award relative to previous award and the ratable recognition of the equity compensation expense in that more expense is recognized in the initial years after the grant. The most recent annual award was granted on July 2, 2012, and the previous annual award was on December 1, 2010. Non-cash equity based compensation is expected to increase in future quarters because of the recent grant. Total

compensation cost related to share based payments not yet recognized totaled \$4,997 at December 31, 2012, which is expected to be recognized over a weighted average period of approximately 1.51 years.

Amortization of acquired intangible assets and deferred financing costs: Amortization of acquired intangible assets and deferred financing costs increased \$881 to \$6,326, as compared to \$5,445 the same period last year. The increase in amortization expense is mainly because of the acquisitions of Eureka, Celesco, Gentech, Cosense and RTD and the purchase of acquired intellectual property from Sentelligence.

Interest expense, net: Interest expense increased \$140 to \$2,072 from \$1,932. The increase in interest expense is primarily due to the increase in average outstanding debt, partially offset by a decrease in interest rates. Total average outstanding debt increased to approximately \$106,375 for the nine months ended December 31, 2012 as compared to \$81,275 for the same period last year, mainly reflecting additional borrowing to fund acquisitions. Interest rates declined to approximately 2.6% for the nine months ended December 31, 2012 from 3.4% for the same period last year, reflecting the improved pricing with the amendment to the Senior Secured Credit Facility effective November 8, 2011. Additionally, the Company recorded during the nine months ended December 31, 2012 approximately \$90 in interest expense related to the fair value adjustment of acquisition earn-outs and capitalized approximately \$55 in interest costs with the construction of the facility in Toulouse, France and Chengdu, China. No adjustments to interest expense for acquisition earn-outs were recorded during the same period last year.

Foreign currency exchange gains and losses: Foreign currency exchange gains and losses represent the impact of changes in foreign currency exchange rates with, among other things, the revaluation of balance sheet accounts and foreign currency contracts. When foreign currency exchange rates fluctuate, there is a resulting revaluation of assets and liabilities denominated and accounted for in foreign currencies other than the business' functional currency. For example, our Irish subsidiary, which uses the Euro as its functional currency, holds cash denominated in foreign currencies, including the U.S. dollar. As the Euro appreciates against the U.S. dollar, the cash balances held in other denominations are devalued when stated in terms of Euro, resulting in a foreign currency exchange loss.

The increase in the foreign currency exchange loss is mainly due to the foreign currency exchange losses recorded with the larger unfavorable fluctuations of the European currencies relative to the U.S. dollar with the Company's European operations. The Company continues to be impacted by volatility in foreign currency exchange rates, including the impact of the fluctuation of the U.S. dollar relative to the Euro, Swiss franc and British pound, as well as the appreciation of the RMB relative to the U.S. dollar.

Impairment of asset held for sale: During the three months ended September 30, 2012, the Company recorded an impairment charge of \$489 to write-down the carrying value of the former PSI facility. The carrying value of the asset held for sale is \$940 as of December 31, 2012, and approximates fair value less cost to sell.

Acquisition earn-out contingency gain: The fair value of acquisition earn-out contingencies is based on expectations and other such estimates related to the specific earn-out target, all of which are subject to modification with changing circumstances until the contingency is resolved. The fair value of acquisition earn-out contingencies is determined using a modeling technique with significant unobservable inputs calculated using a probability-weighted income approach. Key assumptions include discount rates for present value factor, which are based on industry specific weighted average cost of capital, adjusted for, among other things, time and risk, as well as forecasted annual earnings before interest, taxes, depreciation and amortization and forecasted annual revenues over the life of the earn-outs. Adjustments to the fair value of earn-outs are recorded to earnings with that portion of the adjustment relating to the time value of money as interest expense and the non-interest portion of the change in earn-outs as a separate non-operating item in the statement of operations. During the three months ended September 30, 2012, as a result of the assessment of actual and projected earnings and sales scenarios, the Company determined that Eureka's earnings and Gentech's sales were expected to be below originally estimated earn-out levels. Accordingly, the Company recorded fair value adjustments of \$1,883 and \$1,892 decreasing the acquisition earn-out liabilities for Eureka and Gentech, respectively, and recognized the adjustments in the Consolidated Condensed Statements of Operations.

Income Taxes: Income tax expense for the nine months ended December 31, 2012 increased \$2,875 to \$7,144 from \$4,269 for the corresponding period last year. The increase in income tax expense is primarily due to the generation of higher profits before taxes, the overall increase in the estimated annual effective tax rate ("estimated ETR") and the net impact of discrete income tax expense adjustments.

The Company's overall effective tax rate (income tax expense divided by income before income taxes) for the nine months ended December 31, 2012 was approximately 22%, as compared to approximately 18% the same period last year. Income tax expense during interim periods is based on an estimated ETR and discrete tax adjustments. The estimated ETR without discrete items for fiscal 2013 is approximately 23%, as compared to 21% estimated ETR without discrete items for the nine months ended December 31, 2011. The increase in the estimated annual effective tax rate without discrete adjustments mainly reflects a higher proportion of taxable income in tax jurisdictions with higher tax rates, including the U.S. The overall estimated ETR is based on expectations and other estimates and involves complex domestic and foreign tax issues, which the Company monitors closely and are subject to change.

The Company recorded the following discrete income tax adjustments during the nine months ended December 31, 2012, resulting in a net income tax expense adjustment of approximately \$278.

During the three months ended December 31, 2012, the Company recorded a discrete income tax credit of approximately \$575 related to the refinement of the estimates between the preparation of the prior year tax provision and the filing of the prior year tax returns for, among other things, R&D tax credits and foreign tax credits related to the previous year.

During the three months ended September 30, 2012, the Company recorded discrete income tax expense adjustments of approximately \$853 related to certain claw-back provisions for a tax holiday provided to MEAS Switzerland, the Company's subsidiary in Switzerland. The Company believes it is more likely than not that the tax benefits will not be fully realized through the claw-back provision. Accordingly, the Company revalued the Swiss deferred tax liabilities and established a reserve for the claw-back provisions included in the tax holiday which expires in fiscal 2014.

Last year, the Company recorded a non-cash discrete income tax credit of \$612 for the re-measurement of the net deferred tax liabilities in Switzerland with the decrease in the Swiss tax rates, separate from the five year tax holiday discussed in the preceding paragraph. The regional tax rate, or also referred to as the "cantonal" tax rate, for MEAS Switzerland decreased from 20% to 10%.

LIQUIDITY AND CAPITAL RESOURCES

Cash balances totaled \$32,161 at December 31, 2012, a decrease of \$564 as compared to March 31, 2012, reflecting, among other factors, changes in cash flows generated from operating activities, proceeds from stock-option exercises and borrowings from the Company's revolver, which were partially offset by cash used in investing activities for acquisitions and capital expenditures, as well as debt payments and share buy-backs.

The following compares the primary categories of the consolidated condensed statement of cash flows for the nine months ended December 31, 2012 and 2011:

	Nine months ended December 31,		
	2012	2011	Change
Net cash provided by operating activities	\$ 34,785	\$ 27,194	\$ 7,591
Net cash used in investing activities	(38,710)	(56,076)	17,366
Net cash provided by financing activities	2,945	33,289	(30,344)
Effect of exchange rate changes on cash	416	(715)	1,131

Net change in cash and cash equivalents \$(564) \$3,692 \$(4,256)

A key source of the Company's liquidity is its ability to generate positive operating cash flows. Cash flows provided by operating activities increased \$7,591 to \$34,785. The increase in operating cash flows was due to a number of factors, including higher net income and favorable fluctuations in the changes in accrued expenses and accrued compensation, all of which were partially offset by changes in operating working capital (net changes in trade accounts receivable, inventory and accounts payable).

Net income, after adjusting for the impact of non-cash items such as acquisition fair value adjustments and the impairment of an asset held for sale, as well as the favorable increase in non-cash adjustments to reconcile net income to net cash provided by operations, such as depreciation, amortization and non-cash based equity compensation, increased \$3,772. The fluctuation in the change in accrued expenses and accrued compensation relative to the same period last year was favorable by \$6,158. The increase in accrued expenses, accrued compensation and other current liabilities mainly reflects the increase in accrued compensation. Accrued compensation increased because of the accrual related to the incentive compensation plan and the increase in accrued compensation associated with the overall increase in headcount and compensation levels as part of the Company's overall growth. The \$3,766 favorable fluctuation in the change in income tax payable mainly reflects the increase in the income tax payable due to the increase in the current year effective tax rate and levels of taxable income as compared to the corresponding period last year. The change in operating working capital was a decrease of \$7,417 in cash flows from operating working capital. In comparing cash flows generated from operating working capital for the nine months ended December 31, 2012 to the corresponding period last year, the largest drivers of the decrease in cash flows from operating working capital were the fluctuations with trade receivables, trade payables and inventory. The current period net change in accounts receivable was a decrease or a source of cash flows of \$968, as compared to a decrease or a source of cash flows of \$2,142 the same period last year. The fluctuation in the change in trade receivables mainly reflects the receivables related to the Cosense acquisition. Additionally, the number of days sales outstanding (DSO) increased, reflecting the impact of acquisition related receivables. DSO increased to approximately 56 days from 53. DSO is a non-GAAP financial measure and is calculated as follows: $((\text{trade receivables} / \text{respective quarterly net sales annualized}) * 360)$ or $((\$50,360 / (\$81,628 \times 4)) * 360)$. Operating cash flows from accounts payable fluctuated unfavorably by \$8,489, reflecting, among other factors, the timing of payments related to the planned build-up of inventory last quarter with the planned transition to the new Toulouse facility. The net increases in inventory for the current and prior periods were \$686 and \$2,932, respectively. The number of inventory turns declined slightly to 3.2 from 3.3. The number of inventory turns is also a non-GAAP financial measure and is calculated as follows: $(\text{respective quarterly cost of goods sold annualized} / \text{inventory})$ or $((\$49,074 \times 4) / \$60,662)$.

Net cash used in investing activities for the nine months ended December 31, 2012 was \$38,710 as compared to \$56,076 the corresponding period last year. The decrease in cash used in investing activities mainly reflects the higher purchase price and cash outlays for the acquisitions of Eureka and Celesco last year as compared to the acquisition of Cosense and RTD during the current year. The increase in capital expenditures primarily reflects the purchase of equipment for the manufacturing of new products and programs, as well as capital additions related to the new manufacturing facilities in France and China.

Net cash provided by financing activities for the nine months ended December 31, 2012 totaled \$2,945, as compared to \$33,289 in net cash provided in financing activities the same period last year. The Company's credit facilities are mainly utilized to fund acquisitions, and borrowings from the revolver were higher last year due to the higher purchase price for the acquisition of Celesco. The Company funded the Cosense and RTD acquisitions from a combination of cash on hand and borrowings under the Company's revolver. Additionally, the Company made larger repayments of debt during the nine months ended December 31, 2012 as compared to the corresponding period last year, mainly reflecting the utilization of higher operating cash flows. The Company executed a share buy-back plan and purchased approximately \$7,000 in the Company's common stock. Offsetting the revolver and debt payments were the proceeds from the exercise of stock options and the related excess tax benefit from the exercise of stock options. Proceeds from the exercise of stock options totaled \$4,950.

The effect of exchange rate changes on cash is the translation decrease or increase in cash due to the fluctuation of foreign currency exchange rates. The increase in cash for the current year impact of exchange rate changes is primarily due to the fluctuation of the U.S. dollar relative to the European currencies.

Long-term debt: The Company entered into a new Credit Agreement (the "Senior Secured Credit Facility") dated June 1, 2010 among JPMorgan Chase Bank, N.A., as administrative agent and collateral agent (in such capacity, the "Senior Secured Facility Agents"), Bank America, N.A., as syndication agent, HSBC Bank USA, N.A., as document agent, and certain other parties thereto (the "Credit Agreement") to refinance the Amended and Restated Credit Agreement effective as of April 1, 2006 among the Company, General Electric Capital Corporation, as agent and a lender, and certain other parties thereto and to provide for the working capital needs of the Company including to effect permitted acquisitions.

The Senior Secured Credit Facility, as amended, consists of a \$110,000 revolving credit facility (the "Revolving Credit Facility") with a \$75,000 accordion feature enabling expansion of the Revolving Credit Facility to \$185,000. The Revolving Credit Facility has a variable interest rate based on the London Inter-bank Offered Rate ("LIBOR"), Euro Inter-bank Offered Rate ("EURIBOR") or the ABR Rate (prime based rate) with applicable margins ranging from 1.25% to 2.00% for LIBOR and EURIBOR based loans or 0.25% to 1.00% for ABR Rate loans. The applicable margins may be adjusted quarterly based on a change in the leverage ratio of the Company. The Senior Secured Credit Facility also includes the ability to borrow in currencies other than U.S. dollars, such as the Euro and Swiss Franc, up to \$66,000. Commitment fees on the unused balance of the Revolving Credit Facility range from 0.25% to 0.375% per annum of the average amount of unused balances. The Revolving Credit Facility will expire on November 8, 2016 and all balances outstanding under the Revolving Credit Facility will be due on such date. The Company has provided a security interest in substantially all of the Company's U.S. based assets as collateral for the Senior Secured Credit Facility and private placement of credit facilities entered into by the Company from time to time not to exceed \$50,000, including the Prudential Shelf Facility (as defined below). The Senior Secured Credit Facility includes an inter-creditor arrangement with Prudential and is on a *pari passu* (equal force) basis with the Prudential Shelf Facility.

The Senior Secured Credit Facility, as amended, includes specific financial covenants for maximum leverage ratio and minimum fixed charge coverage ratio, as well as customary representations, warranties, covenants and events of default for a transaction of this type. Consolidated EBITDA for debt covenant purposes is the Company's consolidated net income determined in accordance with GAAP minus the sum of income tax credits, interest income, gain from extraordinary items for such period, any non-cash gains, and gains due to fluctuations in currency exchange rates, plus the sum of any provision for income taxes, interest expense, loss from extraordinary items, any aggregate net loss during such period arising from the disposition of capital assets, the amount of non-cash charges for such period, amortized debt discount for such period, losses due to fluctuations in currency exchange rates and the amount of any deduction to consolidated net income as the result of any grant to any members of the management of the Company of any equity interests. The Company's leverage ratio consists of total debt less unrestricted cash maintained in U.S. bank accounts which are subject to control agreements in favor of JPMorgan Chase Bank, N.A., as Collateral Agent, to Consolidated EBITDA. Adjusted fixed charge coverage ratio is Consolidated EBITDA less capital expenditures for the last twelve months, excluding capital expenditures in connection with the facilities being constructed in France in an aggregate amount up to \$11,000 through March 31, 2013 and China in an aggregate amount up to \$6,000 through March 31, 2016, divided by fixed charges. Fixed charges are the last twelve months of scheduled principal payments, taxes paid in cash and consolidated interest expense. All of the aforementioned financial covenants are subject to various adjustments, many of which are detailed in the Credit Agreement.

As of December 31, 2012, the Company utilized the LIBOR based rates for approximately \$86,000 of the Revolving Credit Facility. The weighted average interest rate applicable to borrowings under the Revolving Credit Facility was approximately 1.8% at December 31, 2012. As of December 31, 2012, the outstanding borrowings on the Revolving Credit Facility, which is classified as non-current, were \$86,000. The Company's borrowing capacity is limited by financial covenant ratios, including earnings ratios, and as such, our borrowing capacity is subject to change. At December 31, 2012, the Company could have borrowed an additional \$24,000.

On June 1, 2010, the Company entered into a Master Shelf Agreement (the "Prudential Shelf Facility") with Prudential Investment Management, Inc. ("Prudential") whereby Prudential agreed to purchase up to \$50,000 of senior secured notes (the "Senior Secured Notes") issued by the Company. Prudential purchased two Senior Secured Notes each for \$10,000 and the remaining \$30,000 of such Senior Secured Notes may be purchased at the discretion of Prudential or one or more of its affiliates upon the request of the Company. The Prudential Shelf Facility has a fixed interest rate of 5.70% and 6.15% for each of the two \$10,000 Senior Secured Notes issued by the Company and the Senior Secured Notes issued there under are due on June 1, 2015 and 2017, respectively. The Prudential Shelf Facility includes specific financial covenants for maximum total leverage ratio and minimum fixed charge coverage ratio consistent with the Senior Secured Credit Facility, as well as customary representations, warranties, covenants and events of default. The Prudential Shelf Facility includes an inter-creditor arrangement with the Senior Secured Facility Agents and is on a *pari passu* (equal force) basis with the Senior Secured Credit Facility.

The Company was in compliance with its debt covenants at December 31, 2012.

On February 1, 2013, the Company entered into Amendment No. 4 to the Credit Agreement (the “Credit Agreement Amendment”) among the Company, the financial institutions party thereto and JPMorgan Chase Bank, N.A., as administrative agent to amend the Company’s senior secured facility (the “Senior Secured Facility”) under that certain Credit Agreement dated as of June 1, 2010, among the Company, the lenders party thereto from time to time, and JPMorgan Chase Bank, N.A., as administrative agent. The Credit Agreement Amendment increased the aggregate commitment to \$185,000 from \$110,000, reset the accordion feature to \$75,000 for future expansion and added PNC Bank to the group of lenders, providing the Company with added capacity for borrowings.

China credit facility: On November 3, 2009, the Company's subsidiary in China ("MEAS China") entered into a two year credit facility agreement (the "China Credit Facility") with China Merchants Bank Co., Ltd. ("CMB"). On December 23, 2011, MEAS China renewed the China Credit Facility and extended the expiration to November 25, 2013. The China Credit Facility permits MEAS China to borrow up to RMB 68,000 (approximately \$10,800). Specific covenants include customary limitations, compliance with laws and regulations, use of proceeds for operational purposes, and timely payment of interest and principal. MEAS China has pledged its Shenzhen facility to CMB as collateral. The interest rate will be based on the London Inter-bank Offered Rate ("LIBOR") plus a LIBOR spread, depending on the term of the loan when drawn. The purpose of the China Credit Facility is primarily to provide additional flexibility in funding operations of MEAS China. At December 31, 2012, MEAS China had not borrowed any amounts under the China Credit Facility.

European credit facility: On July 21, 2010, the Company's subsidiary in France ("MEAS Europe") entered into a five year credit facility agreement (the "European Credit Facility") with La Societe Bordelaise de Credit Industriel et Commercial ("CIC"). The European Credit Facility permits MEAS Europe to borrow up to €2,000 (approximately \$2,500). Specific covenants include specific financial covenants for maximum leverage ratio and net debt to equity ratio, as well as customary limitations, compliance with laws and regulations, use of proceeds, and timely payment of interest and principal. MEAS Europe has pledged its Les Clayes-sous-Bois, France facility to CIC as collateral. The interest rate is based on the EURIBOR Offered Rate ("EURIBOR") plus a spread of 1.8%. The EURIBOR interest rate will vary depending on the term of the loan when drawn. The purpose of the European Credit Facility is primarily to provide additional flexibility in funding operations of MEAS Europe. At December 31, 2012, MEAS Europe had not borrowed any amounts against the European Credit Facility.

Acquisition earn-outs and contingent payments: The Company has an earnings based earn-out in connection with the Eureka acquisition, for which the Company initially recorded an estimated fair value of \$2,100 on July 8, 2011. The Company has a sales based earn-out in connection with the Gentech acquisition, for which the Company initially recorded a fair value estimate of £1,387 or approximately \$2,200, based on exchange rates at the date of acquisition. The Company has a sales based earn-out in connection with the RTD acquisition, for which the Company initially recorded a fair value estimate of \$1,200. During the three months ended September 30, 2012, the Company determined that Eureka's earnings and Gentech's sales were expected to be below initially estimated earn-out levels. Accordingly, the Company recorded fair value adjustments of \$1,883 and £1,171 or approximately \$1,892 (based on the weighted average exchange rate for the nine months ending December 31, 2012) decreasing the acquisition earn-out liabilities for Eureka and Gentech, respectively. At December 31, 2012, the acquisition earn-out liabilities for Eureka, Gentech and RTD totaled \$309, £216 or approximately \$317, and \$1,200, respectively.

LIQUIDITY: Management assesses the Company's liquidity in terms of available cash, our ability to generate cash and our ability to borrow to fund operating, investing and financing activities. The Company continues to generate cash from operating activities, and the Company remains in a positive financial position with availability under credit facilities. The Company will continue to have cash requirements to support working capital needs, capital expenditures, earn-outs related to acquisitions, and to pay interest and service debt. One of the Company's known cash requirements is for capital expenditure commitments related to the construction of two new facilities in Toulouse, France and Chengdu, China. The final payments related to the new Toulouse facility were made during the quarter ended September 30, 2012 and the total cost approximated \$10,000, excluding value added taxes ("VAT"), of which

approximately \$8,375 had been incurred during fiscal 2012. The Chengdu facility is expected to be built by March 2016 at a cost of approximately \$6,000, excluding land and VAT, of which approximately \$288 has been incurred to date. As part of the transition to new facilities, the Company expects to temporarily increase certain inventory levels. Additionally, the Company executed a share buy-back program for \$7,000 and purchased \$7,000 in the Company's stock during the quarter ended September 30, 2012. We believe the Company's financial position, generation of cash and the existing credit facility, in addition to the potential to refinance or obtain additional financing will be sufficient to meet funding of day-to-day and material short and long-term commitments for the foreseeable future.

At December 31, 2012, we had approximately \$32,161 of available cash and approximately \$24,000 of borrowing capacity, after considering the limitations set on the Company's total leverage under the revolving credit facility. This cash balance includes cash of \$8,405 in China, which is subject to certain restrictions on the transfer to another country because of currency control regulations. Additionally, the Company had approximately \$15,230 of cash in Europe at December 31, 2012. The Company utilizes a variety of tax planning and financing strategies in an effort to ensure that its worldwide cash is available in the locations in which it is needed. Wherever possible, cash management is centralized and intra-company financing is used to provide working capital to the Company's operations. Cash balances held outside the United States could be repatriated to the United States, but, under current law, would be subject to United States federal income taxes, less applicable foreign tax credits. Repatriation of some foreign balances is restricted or prohibited by local laws. Where local restrictions prevent an efficient intra-company transfer of funds, the Company's intent is that cash balances would remain in the foreign country and it would meet United States liquidity needs through ongoing cash flows, external borrowings, or both.

ACCUMULATED OTHER COMPREHENSIVE INCOME: Accumulated other comprehensive income primarily consists of foreign currency translation adjustments, which relate to the Company's European and Asian operations and the effects of changes in the exchange rates of the U.S. dollar relative to the Euro, Chinese RMB, Hong Kong dollar, Japanese Yen, Swiss franc and British pound. Foreign currency translation adjustments are generally not adjusted for income taxes as they relate to indefinite investments in non-U.S. subsidiaries. Accumulated other comprehensive income also includes unrecognized pension costs.

DIVIDENDS: We have not declared cash dividends on our common equity. Additionally, the payment of dividends is restricted under our Senior Secured Credit Facility. We intend to retain earnings to support our growth strategy and we do not anticipate paying cash dividends in the foreseeable future.

At present, there are no material restrictions on the ability of our Hong Kong and European subsidiaries to transfer funds to us in the form of cash dividends, loans, advances, or purchases of materials, products, or services. Chinese laws and regulations, including currency exchange controls, however, restrict distribution and repatriation of dividends by our China subsidiary.

SEASONALITY: As a whole, there is no material seasonality in our sales. However, general economic conditions have an impact on our business and financial results, and certain end-use markets experience certain seasonality. For example, European sales are often lower in summer months and OEM sales are often stronger immediately preceding and following the introduction of new products.

INFLATION: We compete on the basis of product design, features, and value. Accordingly, our prices generally have kept pace with inflation, notwithstanding that inflation in the countries where our subsidiaries are located has been consistently higher than inflation in the United States. We have recently experienced increases in material and labor costs, including the direct impact of changes in foreign currency exchange rates, and as a result, we have had pressure

on our margins.

OFF BALANCE SHEET ARRANGMENTS: We do not have any financial partnerships with unconsolidated entities, such as entities often referred to as structured finance, special purpose entities or variable interest entities which are often established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. The Company does have an unconsolidated joint venture in Japan, N-T, which is not considered to be a special purpose entity or variable interest entity for the purposes of facilitating off-balance sheet arrangements or such limited purposes. Accordingly, we are not exposed to any financing, liquidity, market or credit risk that could arise if we had such relationships.

39

The Company has acquired and divested of certain assets, including the acquisition of businesses and the sale of the Consumer business. In connection with these acquisitions and divestiture, the Company often provides and receives representations, warranties and/or indemnities to cover various risks and unknown liabilities, such as claims for damages arising out of the use of products or relating to intellectual property matters, commercial disputes, environmental matters or tax matters. The Company cannot estimate the potential liability from such representations, warranties and indemnities because they relate to unknown conditions. However, the Company does not believe that the liabilities relating to these representations, warranties and indemnities will have a material adverse effect on the Company's financial position, results of operations or liquidity.

AGGREGATE CONTRACTUAL OBLIGATIONS: As of December 31, 2012, the Company's contractual obligations, including payments due by period, are as follows:

Contractual Obligations:	Payment due by period				
	Total	1 year	2-3 years	4-5 years	> 5 years
Long-term debt obligations	\$106,736	\$198	\$10,132	\$96,406	\$-
Interest obligation on long-term debt	10,710	2,690	5,348	2,672	-
Capital lease obligations	37	26	11	-	-
Operating lease obligations	19,646	4,404	6,631	3,818	4,793
Purchase obligations	11,299	10,667	381	251	-
Other long-term obligations*	5,505	750	3,215	1,110	430
Total	\$153,933	\$18,735	\$25,718	\$104,257	\$5,223

* Other long-term obligations on the Company's balance sheet under GAAP primarily consist of obligations under warranty policies, foreign currency contracts, acquisition earn-outs, certain annual minimum royalty requirements, contractual obligations related to the construction of new facilities, net pension obligations and tax liabilities. The timing of cash flows associated with these obligations is based upon management's estimate over the terms of these arrangements and are largely based on historical experience.

The above contractual obligation table excludes certain contractual obligations, such as possible severance payments to certain executives, since these contractual commitments are not accrued as liabilities at December 31, 2012 or are otherwise indeterminable. These contractual obligations are accrued as liabilities when the respective contingencies are determinable. Additionally, the above contractual obligation table excludes amounts related to the planned transition to a partially self-funded health and welfare benefit plan for employees in the United States because it became effective January 1, 2013.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Since March 31, 2012, the Company experienced the following significant changes to our market risk:

There was a decrease in the notional amount of RMB/U.S. dollar forward currency. For a discussion of market risk affecting us, refer to Part II, Item 7A “Quantitative and Qualitative Disclosures About Market Risk” included in our Annual Report on Form 10-K for the year ended March 31, 2012.

The Company has a number of foreign currency exchange contracts in Asia for the purposes of hedging the Company’s short-position exposure to the RMB. The RMB/U.S. dollar currency contracts have notional amounts totaling \$13,600, with exercise dates through December 31, 2013 at average exchange rates of 0.1577 (RMB to U.S. dollar conversion rate). With the RMB/U.S. dollar contracts, for every 10 percent depreciation of the RMB, the Company would be exposed to approximately \$1,360 in additional foreign currency exchange losses. Since these derivatives are not designated as hedges for accounting purposes, changes in their fair value are recorded in results of operations, not in other comprehensive income. To manage our exposure to potential foreign currency transaction and translation risks, we may purchase additional foreign currency exchange forward contracts, currency options, or other derivative instruments, provided such instruments may be obtained at suitable prices.

ITEM 4. CONTROLS AND PROCEDURES

(Amounts in thousands)

(a) Evaluation of Disclosure Controls and Procedures

The Company's Chief Executive Officer and Chief Financial Officer with the participation of management evaluated the effectiveness of our disclosure controls and procedures as of December 31, 2012. The term "disclosure controls and procedures," as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), means controls and other procedures of a company that are designed to ensure that information required to be disclosed by the company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of our disclosure controls and procedures as of December 31, 2012, our Chief Executive Officer and Chief Financial Officer concluded that, as of such date, our disclosure controls and procedures were effective.

(b) Changes in Internal Control Over Financial Reporting

During the fiscal quarter ended December 31, 2012, management did not identify any changes in the Company's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Management's evaluation of the Company's internal controls and procedures as of December 31, 2012 excluded the evaluation of internal controls for the Company's recent acquisitions of Cosense and RTD. Cosense, which was acquired on April 2, 2012, represented approximately \$11,902 in total assets at December 31, 2012, and \$5,533 of net sales for the nine months ended December 31, 2012. At December 31, 2012, RTD, which was acquired on October 1, 2012, represented approximately \$19,457 in total assets at December 31, 2012, and \$3,747 of net sales for the three months ended December 31, 2012.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Pending Matters: From time to time, the Company is subject to legal proceedings and claims in the ordinary course of business. The Company currently is not aware of any legal proceedings or claims that the Company believes will have, individually or in the aggregate, a material adverse effect on the Company's business, financial condition, or operating results.

ITEM 1A. RISK FACTORS

While we attempt to identify, manage and mitigate risks and uncertainties associated with our business to the extent practical under the circumstances, some level of risk and uncertainty will always be present. Item 1A of our Annual Report on Form 10-K for the year ended March 31, 2012 describes some of the risks and uncertainties associated with our business. These risks and uncertainties have the potential to materially affect our results of operations and our financial condition. We do not believe that there have been any material changes to the risk factors previously disclosed in our Annual report on Form 10-K for the year ended March 31, 2012.

ITEM 6. EXHIBITS

See Exhibit Index.
