**BLADEX'S FIRST QUARTER 2014 NET INCOME TOTALED \$23.5 MILLION, OR \$0.61 PER SHARE,
ON HIGHER NET INTEREST INCOME & MARGINS**

PANAMA CITY, April 22, 2014 – Banco Latinoamericano de Comercio Exterior, S.A. (NYSE: BLX, “Bladex”, or “the Bank”) announced today its results for the First Quarter ended March 31, 2014.

First Quarter 2014 Business Highlights

First quarter 2014 Net Income ⁽¹⁾ totaled \$23.5 million, or \$0.61 per share, compared to \$23.9 million, or \$0.62 per share, in the fourth quarter 2013, and \$16.3 million, or \$0.43 per share, in the first quarter 2013. The \$7.2 million, or 44%, year-on-year increase was mainly driven by higher net interest income and fee income.

The Commercial Division's average portfolio balances totaled \$6.6 billion, up \$0.1 billion, or 1%, compared to the previous quarter, and up \$0.7 billion, or 12%, year-on-year, as demand in the Bank's client base of Corporations and Financial Institutions remained robust (+15% YoY). Quarterly end of period Commercial Portfolio balances reached \$6.6 billion in the first quarter 2014 (nearly unchanged QoQ; +6% YoY). Credit quality remained solid with a ratio of 0.05% of non-performing loans to total loan portfolio as of March 31, 2014.

First quarter 2014 net interest income reached \$32.1 million, a \$6.1 million, or 23%, year-on-year increase, mainly driven by higher average interest-earning asset balances (+11%). The \$1.0 million, or 3%, quarter-on-quarter increase resulted primarily from higher average lending yields (+6 bps), along with lower rates paid on short-term liabilities leading to a 5 bps decrease in average rates on interest-bearing liabilities. Net interest margin reached 1.79% in the first quarter 2014 (+10 bps QoQ; +17 bps YoY).

Fees and commissions totaled \$4.3 million in the first quarter 2014, a \$1.9 million, or 78%, year-on-year increase mostly from higher fees from loan intermediation generated from mandated structured transactions, and greater activity in the letters of credit business. The 10% quarter-on-quarter increase from loan intermediation fee activities was offset by seasonally lower commissions from the letters of credit business, resulting in an overall \$0.4 million or 9% decrease in fees and commissions compared to the fourth quarter 2013.

Operating expenses totaled \$13.5 million in the first quarter 2014 (-1% QoQ; nearly unchanged YoY), as the Bank continued to focus on operating efficiency. The Bank's first quarter 2014 efficiency ratio improved to 37%, compared to 43% in the previous quarter 2013, and 45% in the first quarter 2013, as operating revenues grew and operating

expenses decreased and remained steady, respectively. Excluding non-core revenues and expenses from investment funds, the Business Efficiency Ratio was 35% for both the first quarter 2014 and the fourth quarter 2013, compared to 44% in the first quarter 2013.

CEO's Comments

Mr. Rubens V. Amaral, Jr., Bladex's Chief Executive Officer, stated the following regarding the Bank's First Quarter 2014 results: "We are pleased to present solid business results this quarter. In a traditional slower quarter, Bladex was able to keep the momentum and traction gained at the closing of last year. We continued with our focus to strengthen the margins, thus working selectively in terms of growth in our Commercial Portfolio. While credit demand from corporations and banks continued to be healthy, liquidity in the Region's markets returned to previous highs, as some of the market volatility seen in recent quarters receded. With that, the quarterly results validate the Bank's cautious approach as average net margins improved and overall asset quality remained strong. At the same time, fee income diversification continued as our syndication platform achieved a significant increase in scope and scale of transactions. Costs remained well under control, helping improve efficiency.

The business environment in the Region is certainly not without its challenges. However, we remain confident about credit demand across the universe of countries and clients served by Bladex. We have a diversified and strong pipeline of new deals, which should fuel origination and asset growth over the coming quarters within our target of continuing to improve margins gradually," Mr. Amaral concluded.

RESULTS BY BUSINESS SEGMENT

COMMERCIAL DIVISION

The Commercial Division incorporates the Bank's business of financial intermediation and fee generation relating to the Commercial Portfolio. Net Income includes net interest income from loans, fee income, allocated operating expenses, reversals or provisions for loan and off-balance sheet credit losses, and any recoveries, net of impairment of assets.

The Commercial Portfolio includes the loan portfolio, equity investments, customer liabilities under acceptances, and contingencies (including confirmed and stand-by letters of credit, and guarantees covering commercial risk and credit commitments).

As of March 31, 2014, the Commercial Division's end-of-period portfolio balances totaled \$6.6 billion, nearly unchanged compared to the previous quarter, and a \$0.4 billion, or 6%, increase from the balances as of March 31, 2013. The year-on-year increase was mainly attributable to growing demand in the Bank's client base of financial institutions (+24%).

On an average basis, the Commercial Portfolio's balances reached \$6.6 billion in the first quarter 2014, a 1% increase compared to the fourth quarter 2013, and a \$0.7 billion, or 12%, increase compared to the first quarter 2013.

The Commercial Portfolio continued to be short-term and trade-related in nature: \$4.7 billion, or 71%, of the Commercial Portfolio matures within one year. Trade financing operations represented 57% of the portfolio, while the remaining balance consisted primarily of lending to banks and corporations involved in foreign trade.

The following graphs illustrate the geographic distribution of the Bank's Commercial Portfolio, highlighting the portfolio's diversification by country of risk, and the diversification of corporate and middle-market companies across industry segments:

Refer to Exhibit VIII for additional information relating to the Bank's Commercial Portfolio distribution by country of risk.

1Q14 vs. 4Q13

The Commercial Division's first quarter 2014 Net Income totaled \$22.4 million, compared to \$25.5 million in the fourth quarter 2013. The \$3.1 million, or 12%, decrease was mostly driven by a \$2.7 million in reversals of provision for credit losses recorded in the fourth quarter 2013, while the Division's Net Operating Income decreased 1% as higher net interest income (+\$0.2 million, or 1%), was offset by lower non-interest operating income (-\$0.5 million, or -10%) due to lower fees from the letters of credit business.

1Q14 vs. 1Q13

The Division's quarterly Net Income increased \$2.3 million, or 11%, compared to \$20.1 million achieved in the first quarter 2013 as a result of: (i) a \$1.9 million, or 68%, increase in non-interest operating income, mainly attributable to higher commissions from loan intermediation activities and the letters of credit business, (ii) a \$0.6 million, or 2%, increase in net interest income, mainly from higher average loan portfolio balances (+10%), and (iii) a \$0.3 million decrease in provision requirements associated with improved credit risk profiles in terms of client and country risks, partially offset by (iv) a \$0.5 million, or 5%, increase in operating expenses mainly attributable to higher variable compensation.

TREASURY DIVISION

The Treasury Division is responsible for the Bank's funding and liquidity management, along with the management of its activities in investment securities, which comprise trading assets, securities available-for-sale, and securities held-to-maturity, as well as the management of the Bank's interest rate, liquidity, price, and currency risks. Following the sale of the former Bladex Asset Management unit in April of 2013, the Treasury Division also incorporates the Bank's remaining participation in investment funds. As of March 31, 2014, Bladex consolidated its participation in the Alpha4X Offshore Feeder Fund ("Feeder Fund") under prevailing accounting rules as its participation exceeded 50%. Bladex's participation in the Feeder Fund was 55.87% as of March 31, 2014, the same level as of December 31, 2013, and compared to 98.74% as of March 31, 2013.

The Division's Net Income is presented net of allocated operating expenses, and includes net interest income on Treasury activities and net other income (loss) relating to Treasury activities.

The Bank's liquid assets⁽¹²⁾ totaled \$573 million as of March 31, 2014, compared to \$831 million as of December 31, 2013, and \$572 million as of March 31, 2013. As of these dates, the liquid assets to total assets ratio was 8.0%, 11.1%, and 8.3%, respectively.

As of March 31, 2014, the securities available-for-sale portfolio totaled \$316 million, compared to \$334 million as of December 31, 2013, and \$299 million as of March 31, 2013. As of March 31, 2014, the available-for-sale portfolio consisted of readily-quoted Latin American securities, 62% of which were multilateral, sovereign, or state-owned risk (refer to Exhibit IX for a per-country risk distribution of the Treasury portfolio). The available-for-sale portfolio is marked-to-market, with the impact recorded in stockholders' equity through the Other Comprehensive Income (Loss) Account ("OCI").

Deposit balances stood at \$2.5 billion as of March 31, 2014, a 6% quarter-on-quarter increase, and a 3% year-on-year decrease. Deposits represented 40% of total liabilities at the end of the first quarter 2014, compared to 36% at the end of the fourth quarter 2013, and 43% at the end of the first quarter 2013. Short-term borrowings and debt, including Repos, totaled \$2.4 billion as of March 31, 2014, a 19% quarter-on-quarter decrease, and a 36% year-on-year increase, while long-term borrowings and debt totaled \$1.2 billion as of March 31, 2014, a 7% quarter-on-quarter increase and a 24% year-on-year decrease, as the Bank opted in 2013 to pre-pay medium-term obligations with remaining tenors of less than a year. Consequently, quarterly weighted average funding costs decreased to 1.11% in the first quarter 2014, compared to 1.16% in the fourth quarter 2013, and 1.59% in the first quarter 2013.

1Q14 vs. 4Q13

The Treasury Division reported a Net Income of \$1.1 million in the first quarter of 2014, compared to a Net Loss of \$1.6 million in the fourth quarter of 2013. The \$2.7 million positive variation was mostly attributable to: (i) a \$3.9 million, or 93%, improvement in non-interest operating loss, primarily due to decreased losses from investment funds, partially offset by the related improvement in net loss attributable to the redeemable non-controlling interest, (ii) \$0.8 million, or 24%, increase in net interest income mainly from lower average funding costs, and (iii) a \$0.2 million, or 6%, decrease in operating expenses mainly associated with decreased expenses in the investment funds.

1Q14 vs. 1Q13

The Division's Net Income of \$1.1 million for the first quarter 2014, compared to a Net Loss of \$3.8 million recorded in the first quarter 2013, resulted in a positive variation of \$4.9 million, mostly driven by a \$5.5 million increase in net interest income, primarily from lower average funding costs and higher average investment securities balances and yields, and a \$0.4 million, or 11%, decrease in operating expenses mainly from lower performance-related expenses in the investment funds, both of these positive effects partially offset by a \$1.5 million decrease in non-interest operating income mainly attributable to losses from investment funds, net of the \$0.5 million net loss attributed to the redeemable non-controlling interest.

1Q14 vs. 4Q13

The Bank's net interest income reached \$32.1 million in the first quarter 2014, compared to \$31.1 million in the fourth quarter 2013. The \$1.0 million, or 3%, increase was mostly driven by a \$1.1 million overall increase in net interest income from higher average yields, mainly in the loan portfolio (+6 bps), and lower average rates on interest bearing liabilities, (-5 bps), as a result of lower rates paid on short-term liabilities.

1Q14 vs. 1Q13

Net interest income increased \$6.1 million, or 23%, compared to the first quarter 2013, mostly driven by higher average interest earning asset balances (+11%), mainly from higher average investment securities balances (+35%) and loan portfolio balances (+10%), along with lower interest expense resulting from a shift in the funding base towards shorter original term tenors.

Compared to the \$2.4 million in the first quarter 2013, fees and commissions increased \$1.9 million, or 78%, mostly driven by higher loan intermediation fees activities and increased activity in the letters of credit business.

The year-on-year lower coverage ratio was mainly driven by an improved risk profile of the Bank's portfolio composition in terms of client and country exposures.

As of March 31, 2014, the Bank had \$3.1 million in non-accrual loans (or 0.05% of total loan portfolio balance), the same level as of December 31, 2013, and compared to nil loans in non-accrual status as of March 31, 2013. The Bank's first quarter 2014 efficiency ratio improved to 37%, compared to 43% in the previous quarter 2013, and 45% in the first quarter 2013, as operating revenues grew and operating expenses decreased or remained steady, respectively. The Business Efficiency Ratio, which excludes non-core revenues and expenses from investment funds, stood at 35% for the first quarter 2014 and the fourth quarter 2013, compared to 44% in the first quarter 2013. This press release contains forward-looking statements of expected future developments. The Bank wishes to ensure that such statements are accompanied by meaningful cautionary statements pursuant to the safe harbor established by the Private Securities Litigation Reform Act of 1995. The forward-looking statements in this press release refer to the growth of the credit portfolio, including the trade portfolio, the increase in the number of the Bank's corporate clients, the positive trend of lending spreads, the increase in activities engaged in by the Bank that are derived from the Bank's client base, anticipated operating income and return on equity in future periods, including income derived from the Treasury Division, the improvement in the financial and performance strength of the Bank and the progress the Bank is making. These forward-looking statements reflect the expectations of the Bank's management and are based on currently available data; however, actual experience with respect to these factors is subject to future events and uncertainties, which could materially impact the Bank's expectations. Among the factors that can cause actual performance and results to differ materially are as follows: the anticipated growth of the Bank's credit portfolio; the continuation of the Bank's preferred creditor status; the impact of increasing/decreasing interest rates and of the macroeconomic environment in the Region on the Bank's financial condition; the execution of the Bank's strategies and initiatives, including its revenue diversification strategy; the adequacy of the Bank's allowance for credit losses; the need for additional provisions for credit losses; the Bank's ability to achieve future growth, to reduce its liquidity levels and increase its leverage; the Bank's ability to maintain its investment-grade credit ratings; the availability and mix of future sources of funding for the Bank's lending operations; potential trading losses; the possibility of fraud; and the adequacy of the Bank's sources of liquidity to replace deposit withdrawals.
