In September 2006, the Statement of Financial Accounting Standards No. 157 - Fair Value Measurements- (SFAS 157), was issued and is effective for fiscal years beginning after November 15, 2007. SFAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS 157 requires disclosure surrounding the various inputs that are used in determining the value of the Fund s investments. These inputs are summarized into the three broad levels listed below.

- · Level 1 quoted prices in active markets for identical securities
- · Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- · Level 3 significant unobservable inputs (including the Fund s own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used as of September 30, 2008, in valuing the Fund s assets and liabilities carried at fair value (amounts in thousands):
