Guidance for full year organic operating profit growth maintained at 7%

Free cash flow forecast to be in line with that achieved in prior year

£1.4 billion returned to shareholders in the financial year

Dividend payments of £864 million in the year

The second half of the financial year has seen continued strong growth by the global priority brands, in particular Johnnie Walker and Smirnoff. Consistent delivery by these key growth drivers together with stronger performance in International, partly driven by innovation successes, has resulted in further improvement in the rate of organic top line growth. For the full year organic net sales growth is expected to be 6%.

This strong top line growth has enabled marketing investment to be increased ahead of net sales growth and increased input costs to be absorbed, while delivering organic operating profit growth in line with the previous guidance of 7% reiterated at the time of the interim financial results.

Diageo has continued to generate strong cash flow in the year. The actual level of tax payments in the second half has been below that which was planned and as a result free cash flow for the year is likely to be broadly in line with that achieved in the prior year; this is ahead of previous guidance.

**Paul Walsh, CEO of Diageo, said:**

As the year closes we have successfully delivered on our objectives. We are building a superior position in North America, investing strongly behind our brands in International and continuing to reduce costs in Europe. As our excellent top line growth shows, we are gaining share in many markets.

The strength of our brands and our broad based geographic exposure continue to provide us with opportunities. We expect that relentless focus on proven brand and market building strategies will ensure that this level of top and bottom line organic growth together with continued strong cash generation remain the consistent themes of Diageo's performance.

---

Therefore, looking ahead to the year ending 30 June 2007, we expect that organic net sales growth will be in line with that achieved in the current year. We will continue to grow investment in marketing at a rate above that of net sales growth. Even with this rate of investment, and with continued pressure on input costs we expect to deliver organic operating profit growth at least equal to that achieved in the year ending 30 June 2006.

As previously announced, we have doubled our share buyback programme year on year, returning a further £1.4 billion to shareholders this year, and we plan to return a further £1.4 billion to shareholders in the new financial year.

#### **Net sales**

Spirits growth has been broadly based with continued, strong growth of: the global priority brands; the local priority Scotch whisky brands and very strong growth of the Reserve brands. The overall growth of Diageo's beer brands has been constrained by the weakness of the Irish beer market. Diageo's wine brands continue to grow despite an increasingly competitive environment. The performance of the ready to drink brands is a mix of continued decline in European markets partially offset by strong growth in International.

In North America, the priority brands continue to grow strongly and outperform the market. Diageo continues to benefit from the consumer trend towards premium brands across all beverage alcohol categories. Strong growth across Diageo's priority spirits brands remains the key driver of the performance in North America. Diageo's beer brands, which are positioned in the premium import segment, have delivered good growth and in wine, Beaulieu Vineyard and Sterling Wines continue to perform well. Price increases have been successfully implemented on a number of brands as effective marketing campaigns have steadily built the position of the brands with consumers.

In Europe, the consumer environment remains subdued which together with increased regulation continues to have a negative impact on beverage alcohol sales. Top line growth is in line with that achieved in the first half. While improved sales execution and successful marketing campaigns have delivered better top line performance and share gains, for example on Guinness in Great Britain and on J& B in France, these improvements have been offset by the decline in the Scotch whisky market in Spain and by the disruption in the spirits market in Russia caused by the introduction of new excise duty strip stamps.

In International, strong top line performance continues to be led by the growth of the priority spirit brands, ready to drink and new product innovations. While each of the major hubs, Latin America, Africa and Asia, are delivering double-digit top line growth, it is Latin America which is the key driver of the very strong overall performance in International.

#### **Interest**

It is estimated that in the year ending 30 June 2006 Diageo's average net and closing debt will be approximately £4.0 billion. The effective interest rate for the year ending 30 June 2006 is expected to be approximately 4.9%. As a result of the increase in interest rates which has occurred during the year, the effective interest rate for the year ending 30 June 2007 is currently expected to increase by 0.6 percentage points year on year.

#### **Exchange rate movements**

---

The impact of exchange rate movements on reported profit before exceptional items and tax is expected to be about £30 million for the year ending 30 June 2006. Operating profit is expected to be negatively impacted by £25 million and interest to be negatively impacted by approximately £5 million.

For the year ending 30 June 2007 the impact of exchange rate movements, based on current exchange rates, is estimated to have an adverse impact of £35 million on operating profit and a positive impact of £5 million on interest. For the full year, each one cent movement from current rates for either the US dollar or the Euro impacts profit before exceptionals and tax by approximately £3 million respectively.

#### **Return of capital to shareholders**

Consistent with previous guidance Diageo has returned a further £1,400 million to shareholders in the financial year through the repurchase of 164 million shares. The number of shares in issue at the year end will be 2,757 million, excluding 294 million shares, mainly treasury shares. The weighted average number of shares which will be used to calculate eps for the year ending 30 June 2006 will be 2,841 million shares.

As announced on 15 June 2006 Diageo has put in place an irrevocable non- discretionary programme to buy back shares during the closed period which ends on 1 September 2006.
