Date                    24 July 2003

Number 24/03

## BHP BILLITON PRODUCTION REPORT FOR THE QUARTER ENDED 30 JUNE 2003

BHP Billiton today released its production report for the quarter ended 30 June 2003.

- **Record annual Western Australian Iron Ore production of 76.5 million tonnes and record annual shipments of 80.3 million tonnes (100 per cent basis).**
- **Record quarterly plant throughput of 1.18 million tonnes achieved at Ekati(TM) (Canada) (100 per cent basis).**
- **Record annual nickel production of 78,100 tonnes.**

### • **Total Petroleum Products -**

Total production for the June 2003 quarter was 30 million barrels of oil equivalent, 7 per cent higher than the March 2003 quarter and 10 per cent lower than the June 2002 quarter. Total production for the year ended 30 June 2003 was 122 million barrels of oil equivalent, a decrease of 9 per cent compared with the year ended 30 June 2002.

- ◆ **Oil and Condensate -** Production for the June 2003 quarter was 15.6 million barrels, 2 per cent higher than the 15.3 million barrels produced in the March 2003 quarter, mainly due to a full quarter of production from Boris (US), increased condensate production from Bass Strait (Australia) as a result of increased gas demand and a higher proportion of wet gas from Bream, along with improved reliability and successful infill drilling at Liverpool Bay (UK). This was partly offset by natural field decline in Laminaria (Australia) and Griffin (Australia). As expected, production for the quarter was lower than the 19.7 million barrels produced in the June 2002 quarter, mainly due to natural field decline in Bass Strait, Laminaria, Griffin, Liverpool Bay and Typhoon (US). Typhoon performance was also affected by well workovers largely offset by the commencement of production from Boris.
- ◆ **Natural Gas -** Production for the June 2003 quarter was 72.9 billion cubic feet, 9 per cent higher than the 67.0 billion cubic feet produced in the March 2003 quarter. Seasonal conditions led to increased demand for Bass Strait natural gas during the June 2003 quarter, which was partly offset by maintenance shut downs at Bruce (UK). Production for the quarter was 3 per cent higher than the 70.7 billion cubic feet produced in the June 2002 quarter due to increased demand for North West Shelf (Australia) LNG and domestic gas and higher sales from Liverpool Bay. This was partly offset by lower demand from Bass Strait driven by milder weather conditions and natural field decline in West Cameron (US).

### • **Alumina -**

Production for the June 2003 quarter was 1.1 million tonnes, compared with 1.0 million tonnes in the June 2002 and March 2003 quarters. Production increased at Worsley (Australia) with hydrate stockpiled in the previous quarter being processed. Higher year on year production mainly reflects a return to full production at Alumar (Brazil) following the end of government enforced power rationing in the March 2002 quarter.

### • **Aluminium**

- Production for the June 2003 quarter was 273,000 tonnes, compared with 263,000 tonnes in the June 2002 quarter and 267,000 tonnes in the March 2003 quarter. The increase mainly reflects the ramp up of production from the Mozal 2 (Mozambique) expansion where first metal was cast in April 2003, six months ahead of schedule. Higher year on year production also reflects increased tonnages from Hillside (South Africa) due to the success of the capacity creep program, completion of the pot relining program in June 2002 and non-recurrence of the September 2001 power outage, combined with a return to full production at Alumar and Valesul (Brazil) following the end of government enforced power rationing in the March 2002 quarter.

• **Copper -**

Production for the June 2003 quarter was 229,200 tonnes, 7 per cent higher than the 213,500 tonnes produced in the June 2002 quarter. This scheduled increase mainly reflects the ramp up of the Escondida (Chile) Phase IV expansion.

• **Iron Ore -**

Record annual Western Australian production of 76.5 million tonnes (100 per cent basis) was 6 per cent higher than the previous year, in response to strong demand in all Asian markets, particularly China. A new annual shipping record was set during the year in Western Australia, where despatches to customers were 80.3 million tonnes (100 per cent basis), an increase of 13 per cent compared with the 2002 year. Annual production from Samarco (Brazil) of 7.9 million tonnes was 40 per cent higher than the previous year, a reflection of strong customer demand resulting in the restart of previously idled pelletising capacity. Total iron ore production for the June 2003 quarter was 19.4 million tonnes (BHP Billiton share), 14 and 13 per cent higher than the June 2002 and March 2003 quarters respectively.

• **Metallurgical Coal -**

Production for the June 2003 quarter of 9.0 million tonnes was in line with the June 2002 quarter and 5 per cent higher than the March 2003 quarter. Annual production of 34.6 million tonnes, while 3 per cent lower than in the corresponding period, reflects stronger customer demand in the second half of the year, offset by adverse mining conditions at the Crinum mine (Australia) and the closure of Tower Colliery (Australia). Annual shipments of Queensland Coal (Australia) were in line with the previous year. Annual shipments of Illawarra Coal (Australia) were 7.2 million tonnes, 7 per cent higher, also reflecting strong customer demand.

• **Manganese**

- Annual ore production of 4.1 million tonnes was 16 per cent higher than 2002 in response to strong customer demand, particularly from China. Full year alloy production of 737,000 tonnes was 19 per cent higher than 2002 also due to increased customer demand.

• **Ekati(TM) Diamonds -**

Record plant throughput of 1.18 million tonnes (100 per cent basis) was achieved at Ekati(TM) (Canada) during the June 2003 quarter, reflecting benefits of a processing plant de-bottlenecking program. Combined with improved ore grade, quarterly production of 1.30 million carats and annual production of 4.34 million carats were 27 per cent and 19 per cent respectively higher than for the corresponding period last year.

• **Energy Coal -**

Production for the June 2003 quarter was 22.0 million tonnes, compared with 20.6 million tonnes in the June 2002 quarter and 19.7 million tonnes in the March 2003 quarter. The increase mainly reflects higher production at Mount Arthur North (Australia) where deliveries to both the export and domestic thermal coal markets were in accordance with the ramp up plan, and higher production at Cerrejon Coal (Colombia) largely reflecting strong demand from the

European market during the June 2003 quarter.

• **Nickel**

- Record annual production of 31,200 tonnes was achieved at the QNI Yabulu refinery (Australia) during 2003, 9 per cent higher than production during the previous year. This mainly reflects ore processing enhancements resulting from operating excellence initiatives. Cerro Matoso (Colombia) also achieved record production, reflecting the ramp-up of Line 2 and benefits from ongoing improvement programs. Total Nickel production for the June 2003 quarter was 21,000 tonnes, compared with 17,700 tonnes in the June 2002 quarter and 18,600 tonnes in the March 2003 quarter, a result of operating excellence initiatives at both sites.

• **Ferrochrome**

- Annual production of 990,000 tonnes was 18 per cent higher than in the previous year, driven by the restart of idle furnaces in response to increased market demand. Production for the June 2003 quarter was 259,000 tonnes, compared with 223,000 tonnes in the June 2002 quarter and 263,000 tonnes in the March 2003 quarter.

(a) Metal production is reported on the basis of payable metal.									
(b) Sulphide production at Escondida and Tintaya was reduced in November 2001 and January 2002 respectively due to weak market conditions. Commercial production of copper cathode commenced at Tintaya in June 2002. The Escondida Phase IV expansion was commissioned in October 2002.									
(c) Antamina commenced commercial production in October 2001.									
(d) BHP Billiton announced the sale of its interest in Alumbra in March 2003. The sale transaction reached closure in June 2003.									

Participation in the joint venture ceased on 2 April 2003.									
(e) Production ceased, ahead of mine closure, in February 2003.									
(f) Coal production is reported on the basis of saleable product. Production figures include some thermal coal.									
(g) BHP Billiton acquired its share of South Blackwater in July 2001. South Blackwater is equally owned by BHP Billiton and									
Mitsubishi Development Pty Ltd. Effective January 2002, South Blackwater production is reported in BMA.									
(h) Shown on 100% basis before 20% outside equity interest.									
(i) Shown on 100% basis. BHP Billiton interest in saleable production is 60%.									
(j) Boodarie Iron recommenced production in July 2002 following the suspension of operations due to a tube failure in a gas									
re-heating furnace.									
(k) Production shown on 86.5% basis after allowing for Indonesian state owned corporation's 13.5% share of production.									
BHP Billiton sold its interest in the Senakin and Satui mines effective 30 November 2001. Mining operations									
at Petangis ceased in October 2002.									
(l) BHP Billiton increased its interest in Cerrejon Zona Norte to 33.3% from 16.7% effective February 2002.
