

Edgar Filing: AGENUS INC - Form 8-K

On January 24, 2011, Agenus Inc. announced it has entered into a research agreement with Memorial Sloan-Kettering Cancer Center using Agenus' proprietary cancer vaccine technology. The collaboration will test Agenus' cancer vaccine in combination with antibodies that are intended to target specific markers on tumor cells, such as CTLA-4 and PDL-1. This group of antibodies represents a new class of immunotherapeutic agents that are thought to have complementary mechanisms of action with cancer vaccines.

The full text of the press release issued in connection with the announcement is being furnished as Exhibit 99.1 to this current report on Form 8-K.

Item 9.01. Financial Statements and Exhibits.
