NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

Note 1. Summary of Significant Accounting Policies

Description of Business and Change in Control

Prior to December 31, 1997, Seamless Wi-Fi, Inc formerly known as Alpha Wireless Broadband, Inc. "the Company" was in the food product manufacturing business and formerly known as International Food and Beverage, Inc. In November 1998, new stockholders bought majority control from the previous Chief Executive Officer through a private transaction. Immediately thereafter, the former CEO resigned and the new stockholders assumed the executive management positions. In December 1998, after new management was in place, a decision was made to change the Company's principal line of business from manufacturing to high technology. The Company changed its name from International Food & Beverage, Inc. to Internet Business's International, Inc., and reincorporated the Company on December 8, 1998 in the state of Nevada. During April of 1999, the Company announced the opening of its first e-commerce site and engaged in the development, operation and marketing of a number of commercial web sites. The Company's subsidiaries consisted of: Lending on Line (providing real estate loans and equipment leasing), Internet Service Provider (providing national Internet access dial-up service, wireless high speed Internet, and Internet web design and hosting), E. Commerce (providing Auction sites), and Direct Marketing (providing direct marketing of long distance phone service, computers with Internet access, and Internet web design hosting). The Company ceased operations during the fiscal year ended June 30, 2003. During the fiscal year ended June 2004 changed its name to Alpha Wireless Broadband, Inc, and started a new wireless operation through it's wholly owned subsidiary Skyy-Fi, Inc a Nevada Corporation. Skyy-Fi began providing access to the Internet, by installing equipment in locations such as hotels and coffee shops for use by their patrons. These locations are commonly known as Wi-Fi Hotspots

The Company, through its wholly owned subsidiary Seamless Skyy-Fi, Inc., has 30 Wi-Fi locations installed. Seamless Skyy-Fi, Inc has installed wireless Internet access equipment at businesses allowing their patron's access to the Internet for a fee.

In January 2005, the Company acquired the assets of Seamless P2P, LLC and contributed these assets to its 80% owned subsidiary Seamless Peer 2 Peer, Inc., which is a developer and provider of a patent pending software program Phenom

Encryption Software that encrypts Wi-Fi transmissions based upon RSA's

government certified 256 bit AES encryption coupled with RSA's Public Key

Infrastructure flexible telecom data and voice transport solutions.

In May 2005 the Company changed its name to Seamless Wi-Fi, Inc and changed Skyy-Fi, Inc., to Seamless Skyy-Fi, Inc.

The Company has three offices in Nevada and excluding Officers and Directors uses the services of 10 independent contractors.

Principles of Consolidation

The financial statements include the accounts of the Company and its wholly owned subsidiaries and majority-owned subsidiary. The minority interest represents outstanding voting stock of the subsidiary not owned by the Company. All significant intercompany accounts and transactions have been eliminated in consolidation.

Edgar Filing: INTERNET BUSINESS INTERNATIONAL INC - Form 10QSB

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Significant estimates include allowances for doubtful accounts and notes and mortgage loans receivable. Actual results could differ from those estimates.

Cash and Cash Equivalents

The Company considers all short-term, highly liquid investments with an original maturity date of three months or less to be cash equivalents.

8

Property and Equipment

Property and equipment is stated at cost and depreciated using the straight-line method over the estimated useful life of the assets, which is generally three to five years for computers and computer related equipment and five to seven years for furniture and other non-computer equipment. Leasehold improvements are amortized using the straight-line method over the shorter of their estimated useful lives or the term of the lease, ranging from one to five years.

Investments

Investments are stated at the lower of cost or market value.

Proprietary Software in Development

In accordance with SFAS No. 86, accounting for the Cost of Computer Software to be Sold, Leased, or Otherwise Marketed Software ("FAS 86"), the Company has capitalized certain computer software development costs upon the establishment of technological feasibility. Technological feasibility is considered to have occurred upon completion of a detailed program design which has been confirmed by documenting and tracing the detail program design is not pursued, upon completion of a working model that has been confirmed by testing to be consistent with the product design. Amortization is provided based on the greater of the ratios that current gross revenues for a product bear to the total of current and anticipated future gross revenues for that product, The estimated useful life for the straight-line method is determined to be 2 to 5 years.

These unamortized computer software and computer software development costs were \$1,150,570 at September 30, 2005. The amounts charged to expense for the amortization of these capitalized software costs and for amounts written down to net realizable were zero. There were no research and developments costs incurred for the development of computer software in 2005 and 2004.

Intangible Assets

Intangible assets consist primarily of acquired customer bases, long-term marketing agreements, goodwill, and other items. Customer bases acquired directly are valued at cost, which approximates fair value at the time of purchase. When material intangible assets, such as customer bases and goodwill are acquired in conjunction with the purchase of a company, the Company undertakes a study by an independent third party to determine the allocation of

Edgar Filing: INTERNET BUSINESS INTERNATIONAL INC - Form 10QSB

the total purchase price to the various assets acquired and the liabilities assumed. The costs assigned to intangible assets are being amortized on a straight-line basis over the estimated useful lives of the assets, which is normally 36 months. Goodwill and other intangible assets are periodically reviewed for impairment to ensure they are appropriately valued. Conditions that may indicate an impairment issue exists include an economic downturn, changes in the churn rate of subscribers or a change in the assessment of future operation. In the event that a condition is identified that may indicate an impairment issue exists, an assessment is performed using a variety of methodologies, including cash flow analysis, estimates of sales proceeds and independent appraisals. During this fiscal year ended June 2005, the Company charged off \$450,625 of intangible assets.

Revenue Recognition

For current Company operations, providing wireless Internet access, fees are charged either to the proprietor of the WI-Fi hotspot location or the customer using the services. The fees paid by a proprietor for services provided on a month-to-month basis are billed at the end of each month for which the service is contracted. The fees paid by customers using the wireless Internet access are paid at the time service is provided.

Advertising Expense

All advertising costs are expensed when incurred.

Concentration of Credit Risk

The Company is subject to credit risk through trade receivables. Monthly Internet access fees and web hosting are generally billed to the customer's credit card, thus reducing the credit risk. The Company routinely assesses the financial strength of significant customers and this assessment, combined with the large number and geographic diversity of its customers, limits the Company's concentration of risk with respect to trade accounts receivable.

9

Income Taxes

The Company accounts for income taxes under the asset and liability approach of reporting for income taxes. Deferred taxes are recorded based upon the tax impact of items affecting financial reporting and tax filings in different periods. A valuation allowance is provided against net deferred tax assets where the Company determines realization is not currently judged to be more likely than not. The Company, its subsidiaries, and its 80% owned subsidiary file a consolidated federal income tax return. Although income tax returns have not been filed since 1999, the Company has no material tax liability due to its losses during these periods. The Company is currently having these income tax returns prepared.

Earnings (Loss) per Share ("EPS")

Basic EPS is computed by dividing income (loss) by the weighted average number of common shares outstanding for the period. Diluted EPS is computed giving effect to all dilutive potential common shares that were outstanding during the period. Dilutive potential common shares consist of incremental shares issuable upon conversion of preferred stock outstanding.

Reverse Stock Split

Edgar Filing: INTERNET BUSINESS INTERNATIONAL INC - Form 10QSB

The Company's Board of Directors effected a 1 for 1,000 reverse stock split of its common stock \$.001 par value on June 3, 2005. Accordingly all shares information included in the consolidated financial statements has been adjusted to reflect the reverse stock split. The reverse stock split did not change the ratio for the conversion of the preferred stock which remained at 1 share of Series A preferred stock converts into 10,000 of common stock.

Interim Financial Information

The unaudited balance sheet, the unaudited statements of income and cash flows have been prepared in accordance with United States generally accepted accounting principles for interim financial information. In our opinion, all adjustments (consisting solely of normal recurring accruals) considered necessary for a fair presentation of the financial position, results of operations and cash flows as of September 30, 2005, and 2004, have been included. Readers of these financial statements should note that the interim results for the three month periods ended September 30, 2005, and September 30, 2004, are not necessarily indicative of the results that may be expected for the fiscal year as a whole.

Note 8. Stockholders' Equity

Issuance of Common Stock and Preferred Stock

The Board of Directors of the Corporation may from time to time authorize by resolution the issuance of any or all shares of the Common Stock and the Preferred Stock herein authorized in accordance with the terms and conditions set forth in the Articles of Incorporation for such purposes, in such amounts, to such persons, corporations, or entities, for such consideration and in the case of the Preferred Stock, in one or more series, all as the Board of Directors in its discretion may determine and without any vote or either action by the stockholders, except as otherwise required by law. The Board of Directors, from time to time also may authorize by resolution, options, warrants and other rights convertible into Common or Preferred stock (collectively "securities"). The securities must be issued for such consideration, including cash, property, or services, as the Board of Directors may deem appropriate, subject to the requirement that the value of such consideration be less than the par value of the shares issued. Any shares issued for which the consideration so fixed paid or delivered shall be fully paid stock and the holder of such shares shall not be liable for any further call of assessment or any other payment thereon, provided that the actual value of such consideration is not less than par value of the shares so issued. The Board of Directors may issue shares Common Stock in the form of a distribution or distributions pursuant to a stock dividend or split-up of the shares of the Common Stock only to ten holders of

Edgar Filing: INTERNET BUSINESS INTERNATIONAL INC - Form 10QSB

the outstanding shares of the Common Stock.

Authorized Shares

During November 2004 the board of directors amended the articles of incorporation to increase the authorized to 20,000,000,000 shares (par value of \$.001) of which 19,990,000,000 are common shares and 10,000,000 are preferred. There are three classes of preferred stock which are as follows; Class A Preferred of 5,000,000 shares of which one (1) share of preferred converts to 10,000 shares of common stock, Class B Preferred of 3,000,000 shares of which (1) share of preferred converts to 1,000 shares of common stock, and Class C Preferred of 2,000,000 shares. As of this date the Company has not updated its articles of incorporation with the state of Nevada, which shows only 11,000,000,000 shares authorized.

The company plans to amend the previous resolution decreasing the authorized to 10,000,000 shares so no amendment to the Articles of Incorporation will have to be filed with the state of Nevada.

On September 30, 2004 the Company amended its Certificate of Incorporation and authorized 2,000,000 shares of Class C Preferred stock, \$1.00 par value, convertible, with a stated value of \$1.00 per share for conversion purposes. The Class C Preferred stock is convertible at the option of the holder into common shares of the Company at the end of 12 months from the date of its issuance based upon the ten day average trading price of the common stock just prior to the end of the 12 month holding period. Therefore One Dollar (\$1.00) of Preferred Stock (which is one share of Class C Preferred) will be converted

12

Seamless Skyy-Fi, Inc., that is providing "Wireless Internet" access at business locations. This service is referred to as Wireless Fidelity or Wi-Fi, for short. Wi-Fi also refers to wireless equipment that meets published 802.11(x) standards. Wi-Fi equipment operates in 2.4 and 5.8 GHz which are unlicensed frequencies. There are many wireless Internet systems available but they all have universal compatibility. The Wi-Fi POP is commonly referred to as a "Wi-Fi Hotspot". Wireless Internet refers to radio frequencies that may either be licensed (which is above 5.8 GHz "gigahertz") and or unlicensed frequency (which is between 2.4 to 5.8 GHz). Its web site is www.skyyfi.com .

Seamless Peer 2 Peer, Inc., which is a developer and provider of a software program 'Phenom' that encrypts Wi-Fi transmissions based upon RSA's government certified 256 bit AES encryption coupled with RSA's Public Key Infrastructure flexible telecom data and voice transport solutions. Its web site is www.seamlessp2p.net .

(A) PLAN OF OPERATION

The Company has three offices in Nevada and not including Officers and Directors; has 10 independent contractor employees

The Company is currently a start up operation. As of this date the Company has 34 Wi-Fi locations for its Seamless Skyy-Fi, Inc., Wi-Fi subsidiary, and has installed two of its Phenom Software Encryption Program at six locations and 4 additional beta test agreements for the software to be deployed for its Seamless Peer 2 Peer, Inc., software developer subsidiary.

(B) MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

With the Company starting up a business it is important to note that the following discussion and analysis of the Company's financial condition and results of operations should be read with the consolidated financial statements and related notes included elsewhere in this Report.

The selected financial data for the First Quarter of Fiscal years ended June 30, 2006, 2005, are derived from the financial statements of the Company and should be read in conjunction with the audited financial statements included in the June 30, 2006 and 2005 10K/SB. These are restated based upon the change in revenue recognition. See Note 2 of the footnotes to the financial statements titled "Change in Revenue Recognition". The change only impacted the stated "Revenues" and not the "Net income".

Results of Operations

In accordance with SFAS No. 131, "Disclosure about Segments of an Enterprise and Related Information," management had determined that there were three reportable segments, (all of which have ceased operations in the fourth quarter for fiscal year ended June 2003), based on the customers served by each segment: Full service internet service provider (ISP), which ceased operation during the fiscal year ended June 2003. The current wireless internet service business-to-consumer ("B2C") provider primarily consisted of direct marketing of

Edgar Filing: INTERNET BUSINESS INTERNATIONAL INC - Form 10QSB

the Companies services and products. Such determination was based on the level at which executive management reviews the results of operations in order to make decisions regarding performance assessment and resource allocation.

Certain general expenses related to advertising and marketing, information systems, finance and administrative groups are not allocated to the operating segments and are included in "other" in the reconciliation of operating income reported below. The accounting policies of the segments are the same as those described in the summary of significant accounting policies (Note 1).

Analysis of Financial Condition

Revenues; for the three months ended September 30, 2005 were \$ 6,408 as compared with \$0 for the corresponding period in 2004, an increase of \$ 6,408.

Selling, general and administrative expenses; for the three months ended September 30, 2005 was \$1,984,188 as compared to \$1,213,222 for the same period in 2004, a increase of \$770,966 or approximately 164 %.

The continued high cost of the selling, general and administrative expenses reflect the impact of stock that was preferred stock that was converted common stock after the company defaulted on its loans to Windsor. The loans proceeds were used to compensate needed services by various professionals. Thus far, during 2005 the quarter ended September 31, 2005 the Company received an additional \$200,743 from its funding line these funds will be used to maintain growth and cover expenses during this quarter. The company plans to continue to pursue revenue growth and expects to utilize additional private placements or other equity financing during the remainder of 2005.

Other Income; is either extraordinary income from payment in full on debt for a reduced amount (with the difference represented as income) and from the sale of fully or partially depreciated equipment where the income from the sale is greater than the amount depreciated. Since there are no expectations that furthers sales will occur and that the revenues from previous operations are dissimilar therefore there will be no comparison of the quarters.

Net Loss; for the three months ended September 30, 2005 was \$1,907,077 as compared to \$1,212,602 for the same period in 2004 an increase of \$694,475 or approximately 157%.

Management believes these results are a direct reflection of continued higher expenses due to the continued expansion of the business and new acquisition and its related expenses. These expenses are not expected to remain high however sales for both the Wi-Fi and software programs will continue to increase which should result in a decrease in the net operating loss.

FOR FIRST QUARTER ENDED SEPTEMBER 30, OF FISCAL YEAR ENDED

Critical Accounting Policies

The Securities and Exchange Commission issued Financial Reporting Release No. 60, "Cautionary Advice Regarding Disclosure About Critical Accounting Policies," or FRR 60, suggesting that companies provide additional disclosure and commentary on their most critical accounting policies. The Company believes that of the significant accounting policies used in the preparation of the consolidated financial statements (see Note B to the Financial Statements); the following are critical accounting policies, which may involve a higher degree of judgment, complexity and estimates. The methods, estimates and judgments The Company uses in applying these most critical accounting policies have a significant impact on the results reported in the Company's financial statements.

Actual results could differ from those estimates.

Stock-Based Compensation Arrangements

The Company issues shares of common stock to various individuals and entities for certain management, legal, consulting and marketing services. These issuances are valued at the fair market value of the service provided and the number of shares issued is determined, based upon the closing price of our common stock on the date of each respective transaction. These transactions are reflected as a component of general and administrative expenses in the accompanying statement of operations.

Inflation

The moderate rate of inflation over the past few years has had an insignificant impact on the Company's sales and results of operations during the period.

The words "believe," "expect," "anticipate," "intends," "forecast," "project," and similar expressions identify forward-looking statements. These forward-looking statements are based largely on the Company's expectations and are subject to a number of risks and uncertainties, certain of which are beyond the Company's control. The Company cautions that these statements are further qualified by important factors that could cause actual results to differ materially from those in the forward looking statements, including, among others, the following: reduced or lack of increase in demand for the Company's products, competitive pricing pressures, changes in the market price of ingredients used in the Company's products and the level of expenses incurred in the Company's operations. ITEM 3. CONTROLS AND PROCEDURES

(a) Evaluation of disclosure controls and procedures. We maintain "disclosure controls and procedures," as such term is defined in Rule 13a-14(c) under the Securities Exchange Act of 1934, or the Exchange Act, that are designed to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Treasurer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating our disclosure controls and procedures, management recognized that disclosure controls and procedures, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the disclosure controls and procedures are met. Additionally, in designing disclosure controls and procedures, our management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible disclosure controls and procedures. The design of any disclosure controls and procedures also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will

19

succeed in achieving our stated goals under all potential future conditions. The evaluation revealed certain weaknesses in disclosure controls and procedures. Based on their evaluation as of a date within 90 days prior to the filing date of this Quarterly Report, our Chief Executive Officer and Treasurer have concluded that, subject to the limitations noted above, and except for the weaknesses noted above, our disclosure controls and procedures were effective to

Edgar Filing: INTERNET BUSINESS INTERNATIONAL INC - Form 10QSB

ensure that material information relating to us, including our consolidated subsidiaries, is made known to them by others within those entities, particularly during the period in which this Quarterly Report was being prepared.

(b) Changes in internal controls. We plan to institute greater controls by adding additional staff to allow for greater third person review and verification of all transactions thereby enhancing the accuracy of all records. We are also looking to implement many of the new requirements required under the Sarbanes-Oxley Act of 2002 during the coming year. However, we believe that there were are no significant changes in our internal controls or, to our knowledge, in other factors that could significantly affect these controls subsequent to the date of their evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

As of this date the Company has not updated its articles of incorporation with the state of Nevada, which shows only 11,000,000,000 shares authorized.

The company plans to amend the previous resolution decreasing the authorized to 10,000,000 shares so no amendment to the Articles of Incorporation will have to be filed with the state of Nevada.

On September 30, 2004 the Company amended its Certificate of Incorporation and authorized 5,000,000 shares of Class C Preferred stock, \$0.001 par value, convertible, with a stated value of \$1.00 per share for conversion purposes.

The Class C Preferred stock is convertible at the option of the holder into common shares of the Company at the end of 12 months from the date of its issuance into based upon the ten day average trading price of the common stock just prior to the end of the 12 month holding period. For example if the price per share of the common stock on the date of conversion is \$.10 per share the holder of the Preferred stock will receive 10 shares of common stock for every shares of Class C Preferred stock that is converted into common.
