## Management Comments

“It was a strong and well-executed quarter for Nova as we delivered significant growth in revenue and non-gaap profitability, exceeding our guidance,” commented Eitan Oppenheim, President and Chief Executive Officer of Nova. “Strong demand across the entire breadth of our product offering in multiple segments drove record quarterly revenue, reinforcing our confidence in a strong second-half and positions us for another growth year. We are encouraged by our expanding market position, as we continue to solidify our Foundry presence while making significant inroads into the Memory space. This progress is evident by this quarter’s diversified customer mix that included four customers contributing more than 10% each to the quarterly products revenues, including two leading memory customers.”

Mr. Oppenheim added, “During the quarter we continued to leverage our financial strength to maximize shareholder value, signing a royalty buyout agreement with the Israeli Office of the Chief Scientist, eliminating approximately \$24 million in future obligations. The agreement, coupled with our efficient operational model, will enhance our financial flexibility and will allow us to invest in sustainable, profitable growth. As evident from this quarter’s results, our efforts are already bearing fruit, demonstrating that we are on a clear path toward achieving our long-term profitability target.”
