PART II

Item 5. Market for Common Equity and Related Stockholder Matters.

(a) Market Information

Currently, the Company's common stock is listed on the OTCBB. There has been no trading activity of the Company's stock as of the date of this 10K. As of March 11, 2002 the bid was \$.50 and the ask price was \$1.01.

RJV has no common equity that is subject to outstanding options or warrants to purchase, or securities convertible into, common equity of the Company.

(b) Holders

As of March 11, 2002 there were thirty-four (34) common shareholders of record. This included Edward Velton, President and Director, who owns 3,750,000 of the 6,037,000 common shares that are issued and outstanding. The other thirty-three (33) shareholders are non-affiliated, private investors that collectively hold a total of 2,287,000 shares that are freely tradable shares that were registered by the Company within the State of Washington and sold to these investors pursuant to Rule 504 of Regulation D.

(c) Dividends

The Company has never declared any cash dividends.

The current policy of the company is not to pay cash dividends, but instead to retain future earnings, if any, to support the growth of the Company. However, there are no restrictions that limit the ability to pay dividends on common equity when it is lawful to do so.

Item 6. Plan of Operation.

Plan of Operations - General

The Company has been in the process of developing its business plan and raising capital. The plan includes bringing to application an interactive commercial real estate Internet web site that will provide users with sophisticated value-added information relating to the buying, leasing, and selling of commercial real estate properties. Management plans to continue assessing the on-line commercial real estate marketplace, including but not limited to, the competition, current market trends, and current niches that the Company may capitalize upon. There is no guarantee or assurance that the Company will ever benefit from managements assessment and become an operating company.

As of December 31, 2001, RJV had \$ 3,513 cash on hand and in the bank. Management believes this amount will satisfy the cash requirements of RJV for the next twelve months or until such a time additional proceeds are raised to cover administrative costs. However, this amount will not satisfy the capital requirement for developing the completed commercial on-line web site. RJV plans to satisfy future cash requirements by additional equity financing. This will likely be in the form of private placements of common stock. There is no additional offering in the works at present. There can be no assurance that RJV will be successful in raising additional equity financing to direct towards the development of the web site and marketing campaigns, as well as the associated legal and accounting fees.

Edgar Filing: RJV NETWORK INC - Form 10KSB/A

Based upon the amount of cash on hand, RJV is dependent upon raising capital from future financing activities, such as subsequent offerings of our stock. There can be no assurance that RJV will be successful in raising the capital RJV requires. If RJV is unable to raise additional capital it would be detrimental to the business development and management may be required to redirect the plan of the Company. However, management believes that if subsequent private placements are successful, RJV will be able to generate revenue from its proposed online real estate web site and achieve liquidity within the following fourteen to eighteen months thereof.

RJV does not anticipate any further research of any products. RJV does not expect the purchase or sale of plant or any significant equipment, and RJV does not anticipate any change in the number of our employees. RJV has no current material commitments. RJV has generated no revenue since our inception.

RJV has no current plans, preliminary or otherwise, to merge with any other entity.

RJV is still considered to be a development stage company, with no significant revenue, and RJV will be dependent upon the raising of additional capital through placement of our common stock in order to continue with the business plan. There can be no assurance that RJV will be successful in raising the capital RJV requires through the sale of our common stock.

The following step will need to be accomplished in order for RJV to become operational:

- Complete development of the commercial real estate on-line web site.

Management has estimated the time frame to accomplish this to be between six and eight months.

Management has estimated the following administrative costs for the next twelve months and will use the current cash on hand to fund the following:

Printing and postage	\$ 200
Accounting	2,000
Transfer Agent	500
Miscellaneous	300
Total	\$ 3,000

Over the next twelve months RJV plans on using its current cash on hand to fund the administrative costs (estimated at \$3,000). Management plans to continue seeking funding to further its business plan of developing an on-line commercial real estate web site.

If, and when, RJV begins to expand its proposed business, it will likely incur losses. RJV plans on funding these losses through revenues generated through its proposed web site. However, if RJV is unable to satisfy its capital requirements through its revenue production, RJV may seek to raise additional capital through the sale of its securities and or look to borrow funds. However, there can be no assurance or guarantee given that RJV will be able to borrow funds or raise capital successfully. If the Company cannot raise funds it would be detrimental to the business and may result in the demise of the business all together.

Potential investors should be aware that several unforeseen or unanticipated delays might impede RJV from developing its web site. Some examples include, in developing an Internet web site problems may arise with programming and testing that management cannot overcome, creating a time delay and resulting

Edgar Filing: RJV NETWORK INC - Form 10KSB/A

in additional costs to RJV. In developing the means for a second round of financing RJV may find that potential financiers are unreceptive to the business plan and provide no options to raise additional capital. If this should occur then RJV would likely not be able to continue as a going concern and investors could lose all of their investment.

Furthermore, if additional funds are secured by RJV there is no guarantee that the proposed marketing strategy will be effective in accomplishing the goals RJV has set. This may force management to redirect its efforts and create the need for additional time, money, and resources, of which, RJV may not be successful in providing.

The Company

RJV Network, Inc. ("the Company"), a development stage company, was incorporated under the laws of the State of Nevada on December 23, 1999, and began its development stage operations. The Company is involved in the development of an internet-based listing site that will provide detailed commercial real estate property listings and related data. The Company plans to generate revenues by charging a one-time fee or subscription-based access to the website to interested users of the information provided.

As indicated in the accompanying financial statements, the Company's accumulated deficit during the development stage totaled \$16,937 for the period from December 23, 1999, date of inception, to December 31, 2001. The Company has financed this deficit through sales of the Company's stock.

The Company's successful attainment of profitable operations is dependent on future events, including obtaining additional financing to fulfill its development activities.

Cash

Cash consists of funds held in a checking account.

Due to Shareholder

The shareholder loan is unsecured, bears no interest and is due on demand. Based on the amount of the loan and its short-term nature, carrying value approximates fair value.

Taxes on Income

Edgar Filing: RJV NETWORK INC - Form 10KSB/A

The Company accounts for income taxes under an asset and liability approach that requires the recognition of deferred tax assets and liabilities for expected future tax consequences of events that have been recognized in the Company's financial statements or tax returns. In estimating future tax consequences, the Company generally considers all expected future events other than enactments of changes in the tax laws or rates.

Software and Web Site Development Costs

The costs of computer software developed or obtained for internal use, during the preliminary project phase, as defined under Statement of Position 98-1 "Accounting for the Costs of Computer Software Developed or Obtained for Internal Use," will be expensed as incurred. The costs of web site development, during the planning stage, as defined under Emerging Issues Task Force No. 00-2 "Accounting for Web Site Development Costs," will also be expensed as incurred.

Computer software and web site development costs incurred during the application and infrastructure development stage, including external direct costs of materials and services consumed in developing the software, creating graphics and web site content, payroll, and interest costs, will be capitalized and amortized over the estimated useful life, beginning when the software is ready for use and after all substantial testing is completed and the web site is operational.

The Company did not incur any software development costs for the period from December 23, 1999, date of inception, to December 31, 2001.

Costs to be incurred when the web site and related software are in the operating stage will be expensed as incurred.

The weighted average number of shares outstanding was 5,285,445 for the year ended December 31, 2001, 3,750,000 for the period December 23, 1999 to December 31, 2000, and 4,510,430 for the period cumulative during the development stage.
