Table of Contents**FEDERAL TRUST CORPORATION AND SUBSIDIARIES****Notes to Condensed Consolidated Financial Statements (Unaudited)****(1) Description of Business and Basis of Presentation**

General. Federal Trust Corporation (Federal Trust) is a unitary savings and loan holding company. Federal Trust has two wholly-owned subsidiaries, Federal Trust Bank (the Bank) and Federal Trust Statutory Trust I (the Trust). Federal Trust 's primary investment, however, is the ownership of the Bank. The Bank is a federally-chartered stock savings bank that provides a wide range of banking services to individual and corporate customers through its six offices located in Orange, Seminole and Volusia Counties, Florida. The Bank opened its sixth branch office in Orange City, Volusia County, Florida during September 2003. The Trust was formed in September 2003 for the sole purpose of issuing \$5,000,000 of trust preferred securities as more fully described in Note 6. The Bank has one wholly-owned subsidiary, FTB Financial Services, Inc., that was formed to provide investment services to customers of the Bank. In September 2003, FTB Financial Services, Inc. ceased operations and is currently inactive.

The condensed consolidated financial statements, include the accounts of Federal Trust, the Bank, the Trust and the Bank 's subsidiary (collectively, the Company). All significant intercompany accounts and transactions have been eliminated in consolidation.

In the opinion of management, the accompanying condensed consolidated financial statements contain all adjustments (principally consisting of normal recurring accruals) necessary to present fairly the financial position as of September 30, 2003, the results of operations for the three- and nine-month periods ended September 30, 2003 and 2002 and cash flows for the nine-month periods ended September 30, 2003 and 2002. The results of operations for the three- and nine-month periods ended September 30, 2003, are not necessarily indicative of the results to be expected for the entire year ended December 31, 2003. These statements should be read in conjunction with the consolidated financial statements included in the Company 's Annual Report on Form 10 - KSB for the year ended December 31, 2002.

| Average net recorded investment in impaired loans | \$ 6,845 | \$ 4,824 | \$ 6,078 | \$ 4,209 |

The activity in the allowance for loan losses is as follows (in thousands):

| | Three Months | | Nine Months | |
|--------------------------------|---------------|----------|---------------|----------|
| | Ended | | Ended | |
| | September 30, | | September 30, | |
| | 2003 | 2002 | 2003 | 2002 |

| Balance at end of period | \$ 2,520 | \$ 1,813 | \$ 2,520 | \$ 1,813 |

A provision for loan losses is charged to earnings based upon management's evaluation of the potential losses in its loan portfolio. During the three and nine months ended September 30, 2003, management made provisions of \$70,000 and \$395,000, respectively, based on its evaluation of the loan portfolio, as compared to the provisions of \$30,000 and \$190,000, respectively, made in the comparable periods in 2002. Management believes that the allowance is adequate, primarily as a result of the overall quality, and the high percentage of residential single family home loans, in the portfolio.

Table of Contents**FEDERAL TRUST CORPORATION AND SUBSIDIARIES****Notes to Condensed Consolidated Financial Statements (Unaudited), Continued****(3) Regulatory Capital**

The Bank is subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Bank's and the Company's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines that involve quantitative measures of the Bank's assets, liabilities and certain off-balance-sheet items as calculated under regulatory accounting practices. The Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Bank to maintain minimum amounts and percentages (set forth in the table below) of total and Tier I capital (as defined in the regulations) to risk-weighted assets and Tier I capital to average adjusted assets (as defined in the regulations). Management believes, as of September 30, 2003, that the Bank exceeds the minimum capital adequacy requirements to which it is subject.

In addition, as of September 30, 2003, the Bank met the requirements to be categorized as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain total risk-based, Tier I risk-based and Tier I leverage percentages as set forth in the table. There are no conditions or events since September 30, 2003 that management believes would change the institution's categorization as well capitalized. The following table summarizes the capital thresholds for each prompt corrective action capital category. An institution's capital category is based on whether it meets the threshold for all three capital ratios within the category. The Bank's actual capital amounts and percentages are also presented in the table (\$ in thousands).

| | Actual | | For Capital Adequacy Purposes | | To Be Well Capitalized Under Prompt Corrective Action Provisions | |
|---|-----------|-------|-------------------------------|------|--|-------|
| | Amount | % | Amount | % | Amount | % |
| | | | | | | |

(4) Earnings Per Share of Common Stock

The Company follows the provisions of Financial Accounting Standards No. 128, Earnings Per Share (SFAS No. 128). SFAS No. 128 provides accounting and reporting standards for calculating earnings per share. Basic earnings per share of common stock has been computed by dividing the net earnings for the period by the weighted-average number of shares outstanding. Diluted earnings per share is computed by dividing net earnings by the weighted-average number of shares outstanding including the dilutive effect of stock options computed using the treasury stock method. The following table presents the calculation of basic and diluted earnings per share of common stock (in thousands, except per share amounts):

(6) Guaranteed Preferred Beneficial Interest in Junior Subordinated Debentures

Edgar Filing: FEDERAL TRUST CORP - Form 10QSB

On September 17, 2003, the Trust sold adjustable-rate Trust Preferred Securities due September 17, 2033 in the aggregate principal amount of \$5,000,000 (the Trust Preferred Securities) in a pooled trust preferred securities offering. The interest rate on the Trust Preferred Securities adjusts quarterly, to a rate equal to the then current three-month London Interchange Bank Offering Rate (LIBOR), plus 295 basis points. In addition, Federal Trust contributed capital of \$155,000 to the Trust for the purchase of the common securities of the Trust. The proceeds from these sales were paid to Federal Trust in exchange for \$5,155,000 of its adjustable-rate Junior Subordinated Debentures (the Debentures) due September 17, 2033. The Debentures have the same terms as the Trust Preferred Securities. Federal Trust used a portion of the proceeds to pay down its line of credit. The sole asset of the Trust, the obligor on the Trust Preferred Securities, is the Debentures.

Table of Contents**FEDERAL TRUST CORPORATION AND SUBSIDIARIES****Notes to Condensed Consolidated Financial Statements (Unaudited), Continued****(6) Guaranteed Preferred Beneficial Interest in Junior Subordinated Debentures, Continued**

Federal Trust has guaranteed the Trust's payment of distributions on, payments on any redemptions of, and any liquidation distribution with respect to, the Trust Preferred Securities. Cash distributions on both the Trust Preferred Securities and the Debentures are payable quarterly in arrears on March 17, June 17, September 17 and December 17 of each year. Issuance costs of approximately \$65,000 associated with the Trust Preferred Securities have been capitalized by Federal Trust and are being amortized over ten years (in thousands).

| Name | Trust Preferred Securities Outstanding at September 30, 2003 | Prepayment Option Date |
|---------------------------------|--|---------------------------|
| Federal Trust Statutory Trust I | \$ 5,000 | September 17, 2008 |

The Trust Preferred Securities are subject to mandatory redemption: (i) in whole, but not in part, upon repayment of the Debentures at stated maturity or, at the option of Federal Trust, their earlier redemption in whole upon the occurrence of certain changes in the tax treatment or capital treatment of the Trust Preferred Securities, or a change in the law such that the Trust would be considered an investment company; and (ii) in whole or in part at any time on or after September 17, 2008 contemporaneously with the optional redemption by Federal Trust of the Debentures in whole or in part. The Debentures are redeemable prior to maturity at the option of Federal Trust: (i) on or after September 17, 2008, in whole at any time or in part from time to time; or (ii) in whole, but not in part, at any time within 90 days following the occurrence and continuation of certain changes in the tax treatment or capital treatment of the Trust Preferred Securities, or a change in law such that the Trust would be considered an Investment Company, required to be registered under the Investment Company Act of 1940.

(7) Stock Option Plans

Federal Trust has two stock options plans. The Key Employee Stock Compensation Program (the "Employee Plan") is authorized to issue up to 475,000 shares as either incentive stock options, compensatory stock options, stock appreciation rights or performance shares. All awards granted under the Employee Plan have been incentive stock options. These options have ten year terms and vest ratably over various terms up to five years. At September 30, 2003, Federal Trust had 137,554 shares remaining under the Employee Plan available for future grants.

The Directors' Stock Option Plan (the "Director Plan") is authorized to issue up to 140,000 shares. All options granted under the Director Plan have ten year terms, vest immediately and are not exercisable for a period of six months after the grant date. At September 30, 2003, Federal Trust had 36,939 shares remaining under the Director Plan available for future grants.

(continued)

Table of Contents**FEDERAL TRUST CORPORATION AND SUBSIDIARIES****Notes to Condensed Consolidated Financial Statements (Unaudited), Continued****(7) Stock Option Plans, Continued**

During 1998, 350,000 options were granted under both stock option plans at an exercise price less than the then market price. This amount was being expensed over the related vesting periods of options still outstanding. These options were fully vested during the second quarter of 2003, consequently there was no compensation costs relating to these options during the three months ended September 30, 2003. Compensation costs relating to these options was approximately \$7,000 for the three months September 30, 2002 and \$10,000 and \$20,000 for the nine months ended September 30, 2003 and 2002, respectively.

There were 15,000 stock options granted during the nine months ended September 30, 2003. There were no stock option transactions during the nine months ended September 30, 2002.

SFAS No. 123 requires pro forma fair value disclosures if the intrinsic value method is being utilized to calculate the fair value of options. For purposes of pro forma disclosures, the estimated fair value is included in expense in the period vesting occurs. The proforma information has been determined as if the Company had accounted for its stock options under the fair value method of SFAS No. 123. The Company accounts for its stock option plans under the recognition and measurement principles of APB No. 25. No stock-based employee compensation cost is reflected in net earnings, except for those options granted in 1998 as discussed above, as all stock options granted under the plans had an exercise price equal to the market value of the underlying common stock on the date of grant. The following table illustrates assumptions used in calculating the grant-date fair value and the effect on net earnings and basic and diluted earnings per share as if the Company had applied the fair value recognition provisions of SFAS No. 123 to stock-based employee compensation (\$ in thousands, except per share amounts):

The Board of Directors

Federal Trust Corporation

Sanford, Florida:

We have reviewed the accompanying condensed consolidated balance sheet of Federal Trust Corporation and Subsidiaries (the Company) as of September 30, 2003, the related condensed consolidated statements of earnings for the three- and nine-month periods ended September 30, 2003 and 2002 and the related condensed consolidated statements of stockholders' equity and cash flows for the nine-month periods ended September 30, 2003 and 2002. These financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with standards established by the American Institute of Certified Public Accountants. A review of interim financial information consists principally of applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with auditing standards generally accepted in the United States of America, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with auditing standards generally accepted in the United States of America, the consolidated balance sheet as of December 31, 2002, and the related consolidated statements of earnings, stockholders' equity and cash flows for the year then ended (not presented herein); and in our report dated February 11, 2003 we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2002, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

**Item 2. Management's Discussion and Analysis of
Financial Condition and Results of Operations**

Comparison of September 30, 2003 and December 31, 2002

General

Federal Trust Corporation (Federal Trust) is a unitary savings and loan holding company. Federal Trust has two wholly-owned operating subsidiaries, Federal Trust Bank (the Bank) and Federal Trust Statutory Trust I (the Trust). Federal Trust's primary investment is the ownership of the Bank. The Bank is a federally-chartered stock savings bank that provides a wide range of banking services to individual and corporate customers through its six offices located in Orange, Seminole and Volusia Counties, Florida. The Bank opened its sixth branch office in Orange City, Volusia County, Florida during September 2003. The Trust was formed in September 2003 for the sole purpose of issuing \$5,000,000 of trust preferred securities as more fully described in Note 6. The Bank has one wholly-owned subsidiary, FTB Financial Services, Inc., that was formed to provide investment services to customers of the Bank. In September 2003, FTB Financial Services, Inc., ceased operations and is currently inactive.

Forward Looking Statements

Readers should note, in particular, that this document contains forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act), that involve substantial risks and uncertainties. When used in this document, or in the documents incorporated by reference herein, the words anticipate, believe, estimate, may, intend and expect and similar expressions identify certain of such forward-looking statements. Actual results, performance or achievements could differ materially from those contemplated, expressed or implied by the forward-looking statements contained herein. Actual results may differ materially, depending upon a variety of important factors, including competition, inflation, general economic conditions, changes in interest rates and changes in the value of collateral securing loans we have made, among other things.

Capital Resources

During the nine months ended September 30, 2003, the Company's primary source of funds consisted of net increases in Federal Home Loan Bank advances of \$38.0 million and deposits of \$24.2 million, principal repayments and sales of securities available for sale of \$17.4 million, trust preferred securities of \$5.0 million and net cash provided by operating activities of \$14.4 million. The Company used its capital resources principally to purchase and originate loans, net of principal repayments of \$71.7 million and to purchase securities available for sale of \$34.6 million.

Off-Balance Sheet Arrangements and Aggregate Contractual Obligations

The Company is a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit, unused lines of credit, standby letters of credit and loans in process. These instruments involve, to varying degrees, elements of credit and interest-rate risk in excess of the amounts recognized in the condensed consolidated balance sheet. The contract amounts of those instruments reflect the extent of the Company's involvement in particular classes of financial instruments.

Table of Contents**FEDERAL TRUST CORPORATION AND SUBSIDIARIES****Item 2. Management's Discussion and Analysis****of Financial Condition and Results of Operations, Continued**

The Company's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit, unused lines of credit and loans in process is represented by the contractual amount of those instruments. The Company uses the same credit policies in making commitments as it does for on-balance-sheet instruments.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total committed amounts do not necessarily represent future cash requirements. The Company evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if it is deemed necessary by the Company upon extension of credit, is based on management's credit evaluation of the counter party.

Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loans to customers.

A summary of the amounts of the Company's financial instruments, with off-balance sheet risk at September 30, 2003, follows (in thousands):

| | Contract Amount |
|------------------------------|----------------------------|
| Commitments to extend credit | \$ 2,137 |
| Unused lines of credit | \$ 4,990 |
| Standby letters of credit | \$ 692 |
| Loans in process | \$ 2,849 |

Management believes the Company has adequate resources to fund all its commitments. At September 30, 2003, the Company had approximately \$142.9 million in time deposits maturing in one year or less. Management also believes that, if so desired, it can adjust the rates on time deposits to retain or obtain new deposits in a changing interest rate environment.

Management believes the Bank was in compliance with all minimum capital requirements which it was subject to at September 30, 2003. See note 3 to the condensed consolidated financial statements.

Management is not aware of any trends, know demands, commitments or uncertainties which are expected to have a material impact on future operating results, liquidity or capital resources.

Table of Contents**FEDERAL TRUST CORPORATION AND SUBSIDIARIES****Comparison of the Three-Month Periods Ended September 30, 2003 and 2002**

General. The Company had net earnings for the three-month period ended September 30, 2003, of \$716,000 or \$.11 per basic and diluted share, compared to \$559,000 or \$.09 per basic and diluted share for the same period in 2002. The increase in net earnings was primarily due to an increase in net interest income, partially offset by a decrease in other income and an increase in other expense.

Interest Income. Interest income increased by \$164,000 or 3.4% to \$5.0 million for the three-month period ended September 30, 2003, from \$4.8 million for the same period in 2002. Interest income on loans increased \$109,000 to \$4.7 million in 2003, primarily as a result of an increase in the average balance of loans outstanding from \$288.0 million in 2002 to \$367.3 million in 2003, partially offset by a decrease in the average yield earned on loans from 6.31% for the three-month period ended September 30, 2002, to 5.07% for the comparable period in 2003. Interest income on securities increased by \$119,000 for the three-month period ended September 30, 2003, over the same period in 2002, primarily as a result of an increase in the average balance of securities owned, partially offset by a decrease in the average yield. Management expects the rates earned on the portfolio to fluctuate with the changes in market interest rates and with general market conditions.

Interest Expense. Interest expense decreased by \$593,000 or 21.2% during the three-month period ended September 30, 2003, compared to the same period in 2002. Interest on deposits decreased \$586,000 or 27.0% to \$1.6 million in 2003 from \$2.2 million in 2002, as a result of a decrease in the average cost of deposits from 3.41% for the three-month period ended September 30, 2002, to 2.14% for the comparable period in 2003, partially offset by an increase in average deposits outstanding from \$254.7 million in 2002 to \$296.2 million in 2003. Interest on other borrowings decreased to \$620,000 in 2003 from \$627,000 in 2002, primarily as a result of the decrease in the average rate paid on other borrowings from 5.00% in 2002 to 2.39% in 2003, mostly offset by an increase in the average amount of other borrowings outstanding from \$50.2 million to \$103.6 million. Management expects to continue to use FHLB advances and other borrowings as a liability management tool.

Provision for Loan Losses. A provision for loan losses is charged to earnings based upon management's evaluation of the losses in its loan portfolio. During the quarter ended September 30, 2003, management recorded a provision for loan losses of \$70,000 based on its evaluation of the loan portfolio, which was an increase of \$40,000 from the same period in 2002. The allowance for loan losses at September 30, 2003 was \$2.5 million or .68% of total loans outstanding, versus \$2.1 million at December 31, 2002, or .68% of total loans outstanding. Management believes the allowance for loan losses at September 30, 2003 is adequate.

Other Income. Other income decreased \$148,000 or 26.7% from \$555,000 for the three-month period ended September 30, 2002, to \$407,000 for the same period in 2003. The decrease in other income was primarily due to a decrease in gain on sale of securities available for sale, partially offset by an increase in gain on sale of loans held for sale. The Company did not sell any securities during the three months ended September 30, 2003. The increase in gain on sale of loans held for sale relates to the sale of a bulk loan package of residential loans to foreign national borrowers during the three-month period ended September 30, 2003.

Other Expense. Other expense increased \$395,000 or 23.8% to \$2.1 million for the three-month period ended September 30, 2003, from \$1.7 million for the same period in 2002. Salaries and employee benefits increased \$119,000 and occupancy expense increased \$121,000 due to the staffing and opening of two branches in Orange City and Deltona, Florida in 2003, plus the Casselberry branch which opened in December 2002 and the overall growth of the Company.

Edgar Filing: FEDERAL TRUST CORP - Form 10QSB

Income Taxes. Income taxes for the three months ended September 30, 2003 was \$339,000 (an effective rate of 32.1%), compared to \$322,000 (an effective rate of 36.5%) for the same period in 2002. The decrease in the effective tax rate resulted from an increase in tax-exempt income.

Comparison of the Nine-Month Periods Ended September 30, 2003 and 2002

General. The Company had net earnings for the nine-month period ended September 30, 2003, of \$2.1 million or \$.31 per basic and diluted share, compared to \$1.5 million or \$.26 per basic and diluted share for the same period in 2002. The increase in net earnings was primarily due to increases in net interest income, partially offset by increases in the provision for loan losses and other expense.

Interest Income. Interest income increased by \$1.0 million or 6.9% to \$15.5 million for the nine-month period ended September 30, 2003, from \$14.5 million for the same period in 2002. Interest income on loans increased \$779,000 or 5.7% to \$14.5 million in 2003 from \$13.7 million in 2002, primarily as a result of an increase in the average amount of loans outstanding from \$269.7 million in 2002 to \$358.3 million in 2003, partially offset by a decrease in the average yield earned on loans from 6.78% for the nine-month period ended September 30, 2002, to 5.39% for the comparable period in 2003. Interest income on securities increased by \$354,000 for the nine-month period ended September 30, 2003, over the same period in 2002, primarily as a result of an increase in the average balance of securities owned, partially offset by a decrease in the average yield. Management expects the rates earned on the portfolio to fluctuate with the changes in market interest rates and with general market conditions.

Interest Expense. Interest expense decreased by \$830,000 or 10.1% during the nine-month period ended September 30, 2003, compared to the same period in 2002. Interest on deposits decreased \$947,000 or 14.8% to \$5.5 million in 2003 from \$6.4 million in 2002, as a result of a decrease in the average cost of deposits from 3.59% for the nine-month period ended September 30, 2002, to 2.48% for the comparable period in 2003, partially offset by an increase in average deposits outstanding from \$238.3 million in 2002 to \$294.5 million in 2003. Interest on other borrowings increased to \$2.0 million in 2003 from \$1.8 million in 2002, primarily as a result of the increase in the average balance of other borrowings from \$50.6 million for the nine-month period ended September 30, 2002 to \$93.7 million for the comparable 2003 period, mainly offset by a decrease in the average rate paid on other borrowings from 4.83% in 2002 to 2.78% in 2003. Management expects to continue to use FHLB advances and other borrowings as a liability management tool.

Provision for Loan Losses. A provision for loan losses is charged to earnings based upon management's evaluation of the losses in its loan portfolio. During the nine months ended September 30, 2003, management recorded a provision for loan losses of \$395,000 based on its evaluation of the loan portfolio, which was an increase of \$205,000 from the same period in 2002, primarily as a result of the increase in total loans outstanding. The allowance for loan losses at September 30, 2003, was \$2.5 million or .68% of total loans outstanding, versus \$2.1 million at December 31, 2002, or .68% of total loans outstanding. Management believes the allowance for loan losses at September 30, 2003 is adequate.

Other Income. Other income increased \$16,000 or 1.0%. The increase in other income was primarily due to an increase of \$238,000 in gain on sale of securities available for sale, partially offset by a decrease of \$208,000 in other income. The gain on sale of securities available for sale resulted from the Company's decision to sell several securities during the period. The decrease in other income relates to a decrease in servicing income due to the Company's decision to engage a third party servicer of its residential mortgage loans during 2003.

Other Expense. Other expense increased \$909,000 or 16.9% to \$6.3 million for the nine-month period ended September 30, 2003, from \$5.4 million for the same period in 2002. Salary and employee benefits increased \$317,000 and occupancy expense increased \$194,000 due to the staffing and opening of the branches in Orange City and Deltona, Florida in 2003, plus the Casselberry branch which opened in December 2002 and the overall growth of the Company.

Income Taxes. Income taxes for the nine months ended September 30, 2003, was \$989,000 (an effective rate of 32.5%), compared to \$831,000 (an effective rate of 36.0%) for the same period in 2002. The decrease in the effective tax rate resulted from an increase in tax-exempt income.
