NTT DoCoMo, Inc.

(Translation of registrant's name into English)

Sanno Park Tower 11-1, Nagata-cho 2-chome

Chiyoda-ku, Tokyo 100-6150

Japan

Edgar Filing: NTT DOCOMO INC - Form 6-K

(Address of principal executive offices)

Indicate by check mark whether the registrant files or will file annual reports under cover Form 20-F or Form 40-F.

Form 20-F **Form 40-F**

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1):

Note: Regulation S-T Rule 101(b)(1) only permits the submission in paper of a Form 6-K if submitted solely to provide an attached annual report to security holders.

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7):

Note: Regulation S-T Rule 101(b)(7) only permits the submission in paper of a Form 6-K if submitted to furnish a report or other document that the registrant foreign private issuer must furnish and make public under the laws of the jurisdiction in which the registrant is incorporated, domiciled or legally organized (the registrant's home country), or under the rules of the home country exchange on which the registrant's securities are traded, as long as the report or other document is not a press release, is not required to be and has not been distributed to the registrant's security holders, and, if discussing a material event, has already been the subject of a Form 6-K submission or other Commission filing on EDGAR.

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes **No**

If **Yes** is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82-

NTT DoCoMo, Inc.

Earnings Release for the Six Months Ended September 30, 2005

Consolidated financial results of NTT DoCoMo, Inc. (the Company) and its subsidiaries (collectively we or DoCoMo) for the six months ended September 30, 2005 (April 1, 2005 to September 30, 2005), are summarized as follows.

<< Highlights of Financial Results >>

For the six months ended September 30, 2005, operating revenues were ¥2,373.5 billion (down 3.2% compared to the same period of the prior year), operating income was ¥558.4 billion (up 2.4% compared to the same period of the prior year), income before income taxes was ¥633.1 billion (up 16.1% compared to the same period of the prior year) and net income was ¥385.3 billion (up 14.9% compared to the same period of the prior year).

Earnings per share were ¥8,387.80 and EBITDA margin* was 38.2%, up 1.6 points compared to the same period of the prior year, and ROCE* was 11.5%, down 0.1 points compared to the same period of the prior year.

Operating revenues, operating income, income before income taxes and net income for the fiscal year ending March 31, 2006, are forecasted to be ¥4,784.0 billion (down 1.3% year-on-year), ¥830.0 billion (up 5.8% year-on-year), ¥942.0 billion (down 26.9% year-on-year) and ¥604.0 billion (down 19.2% year-on-year), respectively.

Notes:

1. Consolidated financial statements in this release are unaudited.
2. Amounts in this release are rounded off, excluding non-consolidated financial statements, where amounts are truncated.
3. The forecasts of consolidated financial results for the fiscal year ending March 31, 2006, are forward-looking statements and are subject to certain risks and uncertainties. Please refer to page 10.

* EBITDA and EBITDA margin, as we use them, are different from EBITDA as defined in Item 10(e) of Regulation S-K and may not be comparable to similarly titled measures used by other companies. For an explanation of our definition of EBITDA, see the reconciliations to the most directly comparable financial measures calculated and presented in accordance with GAAP on page 39. See page 39 for the definition of ROCE.

Table of Contents<< Comment from Masao Nakamura, President and CEO >>

In the first six months of the fiscal year ending March 31, 2006, we have worked continuously to enhance our overall service offerings through strategic rate revisions, enrichment of our handset lineup, further improvement of network quality and reinforcement of after-sales support, building on the measures implemented during the last fiscal year. These measures have delivered favorable results; we have successfully maintained our cellular churn rate at the same low level as the record low in the first quarter, and we sustained cellular MOU and ARPU at higher levels than expected.

Although operating revenues for the first six months of this fiscal year dropped ¥78.5 billion from the same period of last fiscal year to ¥2,373.5 billion, the decline in cellular services revenues for the first six months marked ¥9.6 billion year on year, and the pace of decline began to slow compared to the first quarter. Operating income, on the other hand, increased ¥12.9 billion year-on-year to ¥558.4 billion. Based on the first half results, we decided to revise our full-year operating income forecast to ¥830 billion, up ¥20 billion from our initial guidance. Also, we recognize network quality enhancement as important in order to further strengthen our competitiveness. Accordingly, we revised our full-year capital expenditures forecast upwards by ¥23 billion to ¥871 billion.

In conjunction with the release of the 701i series handsets, on September 9, 2005, we launched a new service dubbed *i-channel*, a convenient and easy-to-use push information delivery service designed to boost the usage of low-usage i-mode subscribers. We aim to further increase the uptake of this service by embedding it as a standard feature in the 902i series handsets and subsequent models. The 902i series handsets, planned for release in the winter of this fiscal year, will carry various new services including *Push Talk*, a new walkie-talkie style communication service, and *ToruCa* information capture service to be added onto the i-mode FeliCa chip. Through these new offerings, we aim to further enhance our competitiveness.

While the competitive environment is expected to become harsher, we will continue to operate our business from a customer-centric viewpoint and endeavor to respond adequately to the needs of users to achieve a sustainable growth toward the future.

Table of Contents**1. Business Overview**

(1) Operating revenues totaled ¥2,373.5 billion (down 3.2% compared to the same period of the prior year).

Cellular (FOMA+mova) services revenues decreased to ¥2,085.6 billion (down 0.5% compared to the same period of the prior year). Although cellular (FOMA+mova) services revenues decreased due to a decline in average revenue per unit (ARPU) resulting from our rate reductions, such as the enrichment of the discount in our Family Discount program, the pace of the revenue decrease began to slow down from the second quarter due to the subscriber growth as a result of the acquisition of new subscribers and lowered churn rate driven by the expansion of our handset lineup.

Voice revenues from FOMA services increased to ¥506.6 billion (up 170.2% compared to the same period of the prior year) and packet communications revenues from FOMA services increased to ¥258.7 billion (up 168.5% compared to the same period of the prior year) owing to a significant increase in the number of FOMA services subscribers which resulted from the release of new handsets such as the FOMA 701i series and further improvements in our coverage areas.

Equipment sales revenues decreased to ¥222.5 billion (down 22.8% compared to the same period of the prior year) due to a decrease in the number of handsets sold.

<Breakdown of operating revenues>	Billions of yen			
	(UNAUDITED)		(UNAUDITED)	
	Six months ended	Six months ended	Increase	
	September 30, 2005	September 30, 2004	(Decrease)	
Wireless services	¥ 2,151.0	¥ 2,163.8	¥ (12.8)	(0.6%)
Cellular (FOMA+mova) services revenues (i)	2,085.6	2,095.1	(9.6)	(0.5%)
- Voice revenues (ii)	1,539.2	1,556.2	(17.1)	(1.1%)
Including: FOMA services	506.6	187.5	319.1	170.2%
- Packet communications revenues	546.4	538.9	7.5	1.4%
Including: FOMA services	258.7	96.3	162.3	168.5%
PHS services revenues	23.2	31.5	(8.3)	(26.4%)
Other revenues (i)	42.2	37.2	5.0	13.6%
Equipment sales	222.5	288.1	(65.7)	(22.8%)
Total operating revenues	¥ 2,373.5	¥ 2,452.0	¥ (78.5)	(3.2%)

Notes:

- (i) For periods beginning after March 31, 2005, Quickcast services revenues, which were presented separately in the past, are included in Other revenues, and international services revenues, which were previously included in Other revenues, are included in Cellular (FOMA+mova) services revenues. However, international services revenues related to FOMA services are not included in FOMA services revenues for the six months ended September 30, 2004 because such information was not previously maintained. (Quickcast services revenues are reclassified and included in Other revenues for the six months ended September 30, 2004.)

Edgar Filing: NTT DOCOMO INC - Form 6-K

(ii) Voice revenues include data communications revenues through circuit switching system.

(2) Operating expenses were ¥1,815.1 billion (down 4.8% compared to the same period of the prior year).

Personnel expenses were ¥122.7 billion (down 1.8% compared to the same period of the prior year). The number of employees as of September 30, 2005 was 22,181.

Non-personnel expenses decreased to ¥1,135.5 billion (down 7.0% compared to the same period of the prior year) mainly due to a decrease in revenue-linked variable expenses (down 8.5% compared to the same period of the prior year), such as commissions paid to agent resellers, reflecting a decrease in the number of handsets sold.

Impairment loss represents the impairment of PHS related assets, which were acquired during the six months ended September 30, 2005.

Table of Contents

<Breakdown of operating expenses>	Billions of yen

Total operating expenses	¥ 1,815.1	¥ 1,906.5	¥ (91.4)	(4.8%)

- (3) Operating income increased to ¥558.4 billion (up 2.4% compared to the same period of the prior year). Income before income taxes, net of other income (expense), including a gain on sale of Hutchison 3G UK Holdings Limited shares (¥62.0 billion), increased to ¥633.1 billion (up 16.1% compared to the same period of the prior year).
- (4) Net income was ¥385.3 billion (up 14.9% compared to the same period of the prior year).

2. Segment Information

- (1) Mobile phone business

Operating revenues were ¥2,332.7 billion and operating income was ¥559.1 billion.

Cellular (FOMA) services

In June 2005, we released our high-end models, the FOMA 901iS series handsets. We also released our standard models such as the FOMA 700iS series handsets in July 2005, and the FOMA 701i series handsets, which are compatible with i-channel service, the subscribers of which can automatically receive various information, such as news and weather, delivered to the handsets standby screen as scrolling ticker, in September 2005. In July 2005, we released the FOMA M1000 handset, targeted for business consumers, that provides full access to the websites for PCs and is compatible with public wireless LANs and our international roaming-out service. In August 2005, we also released a FOMA handset called DOLCE, which features ease of use and unique design using artificial leather, and the FOMA Raku Raku PHONE II handset which is equipped with a function which slows down the speed of voice heard through the handset. The number of FOMA services subscribers surpassed 15 million in August 2005 and reached 16.77 million as of September 30, 2005.

Edgar Filing: NTT DOCOMO INC - Form 6-K

Voice ARPU, packet ARPU and aggregate ARPU of cellular (FOMA) services were ¥5,980, ¥3,090 and ¥9,070, respectively.

Cellular (mova) services

In May 2005, we released the premini-II S, a compact and easy-to-use handset which features unique design and a music player function. Due to the continuous migration of the subscribers from mova services to FOMA services, the number of cellular (mova) services subscribers as of September 30, 2005, decreased to 33.13 million.

Voice ARPU, i-mode ARPU and aggregate ARPU of cellular (mova) services were ¥4,810, ¥1,360 and ¥6,170, respectively.

Table of Contents

For both FOMA and mova services, in May 2005, we made the monthly charge for our Nuisance Call Blocking Service free, and launched a service which allows the members of DoCoMo Premier Club to save the charges for out-of-warranty repairs. In July 2005, we announced the introduction of new simple and clear billing plans and the further expansion of the Ichinen Discount by providing our long-term subscribers with more favorable discount rates starting from November 1, 2005. We started accepting applications for these new plans from September 2005. In July 2005, to enhance the convenience of our customers, we launched My DoCoMo, the customer-support portal site for PCs, which integrates the websites for our customer support such as providing billing information and accepting service orders. The aggregate number of FOMA and mova services subscribers increased to 49.9 million.

Voice ARPU, packet ARPU and aggregate ARPU of cellular (FOMA+mova) services were ¥5,150, ¥1,850 and ¥7,000, respectively.

Churn rates of cellular (FOMA+mova) services for the three months and for the six months ended September 30, 2005 were both 0.81%, decreased by 0.27 points and 0.26 points compared to the same period of the prior year, respectively.

i-mode services

In July 2005, we launched a new billing service which enables our customers to include the bills for their online shopping via i-mode in their monthly mobile phone bills. Also in July 2005, we signed an agreement with East Japan Railway Company (JR East) to discuss joint development and operation of common infrastructure for JR East's Suica e-money and our upcoming Osaifu-Keitai* credit card service. The number of subscribers using i-mode-FeliCa-compatible handsets reached approximately 6.5 million and the numbers of Osaifu-Keitai* compatible shops and vending machines increased to approximately 25,000, and 6,000, respectively. The number of i-mode services subscribers increased to 45.14 million at September 30, 2005.

In terms of our global development, starting from June 2005, COSMOTE Mobile Telecommunications S.A. (COSMOTE), a Greek carrier, announced the launch of the first i-mode services outside Japan that run on a third generation mobile network using W-CDMA technology. Following COSMOTE, Far EasTone Telecommunications Co., Ltd., a Taiwanese carrier, and Telstra Corporation Limited, an Australian carrier, also launched i-mode services that run on third generation mobile networks in July and September 2005, respectively. In addition, Cellcom Israel Ltd., an Israeli carrier, and Mobile TeleSystem OJSC, a Russian carrier, launched i-mode services in September 2005. We have been steadily expanding our strategic partnerships through i-mode licensing arrangement. As a result, i-mode services are now rolled out in 12 countries and areas including Japan, and the aggregate number of cellular service subscribers of all carriers which participate in the i-mode service alliance exceeded 200 million as of September 30, 2005.

* *Osaifu-Keitai refers to mobile phones equipped with a contactless IC chip, as well as the useful function and services enabled by the IC chip. With this function, a mobile phone can be utilized as electronic wallet, a credit card, an electronic ticket, a membership card, an airline ticket, and more.*

International services

In July 2005, we launched an international multimedia messaging service (MMS) which enables i-mode users to exchange data such as text and images with MMS users of foreign carriers. We have steadily expanded our FOMA videophone call destination of our international dialing service WORLD CALL, and Taiwan, Germany, Italy, Australia, France and Spain were added to the destinations in the months of July to September 2005. Furthermore, we added countries such as Korea to the areas where our international roaming-out services, WORLD WING and WORLD WALKER, are available over the third generation mobile network. As of September 30, 2005, we expanded the service area of international roaming-out services for voice calls and SMS to 127 countries and areas; for packet communications to 51 countries and areas; and for videophone calls to 16 countries and areas.

Note:

ARPU: Average monthly revenue per unit

Average monthly revenue per unit, or ARPU, is used to measure average monthly operating revenues attributable to designated services on a per user basis. ARPU is calculated by dividing various revenue items included in operating revenues from our wireless services, such as monthly charges, voice transmission charges and packet transmission charges, from designated services which are incurred consistently each month, by number of active subscribers to the relevant services. Accordingly, the calculation of ARPU excludes revenues that are not representative of monthly average usage such as activation fees. We believe that our ARPU figures provide useful information regarding the average usage of our subscribers. The revenue items included in the numerators of our ARPU figures are based on our U.S. GAAP results of operations. This definition applies to all ARPU figures hereinafter.

See page 38 for the details of the calculation methods.

Table of Contents

<Number of subscribers by services>	Thousand subscribers			
	September 30, 2005	March 31, 2005	Increase (Decrease)	
Cellular (FOMA) services	16,770	11,501	5,269	45.8%

Mobile phone business operating income	559.1	558.2	1.0	0.2%

Note:

For periods beginning after March 31, 2005, international services, which were previously included in Miscellaneous businesses, are included in Mobile phone business. As a result thereof, certain reclassifications are made to the operating results for the six months ended September 30, 2004.

(2) PHS business

Operating revenues were ¥23.7 billion and operating loss was ¥1.0 billion.

In order to concentrate our business resources on FOMA services, we ceased accepting new PHS subscriptions on April 30, 2005. We will consider terminating the service while monitoring the usage trend of current subscribers.

PHS ARPU was ¥3,310.

Note:

See page 38 for the details of the ARPU calculation methods.

Table of Contents

(3) Miscellaneous businesses

Operating revenues were ¥17.0 billion and operating income was ¥0.3 billion.

In addition to our public wireless LAN service Mzone, we launched a plan called U public wireless LAN course for FOMA services subscribers as a part of our internet access service mopera U in June 2005. In July 2005, in the aim to efficiently build out our wireless LANs, we entered into an agreement with NTT Broadband Platform, Inc (NTT BP), Nippon Telegraph and Telephone East Corporation (NTT East), and Nippon Telegraph and Telephone West Corporation (NTT West) that NTT East, NTT West and we integrate and share the wireless LAN access points, which were previously held individually, under the ownership and operation by NTT BP. In July 2005, seventy-one private-railway stations in the Tokyo metropolitan area were added to the hot spots of our service. As a result, the number of our domestic hot spots increased to 719 as of September 30, 2005.

In April 2005, considering the continuous decline in the number of Quickcast services subscribers, we decided to terminate the services on March 31, 2007.

For periods beginning after March 31, 2005, Quickcast business, which were presented separately in the past, are included in Miscellaneous businesses. As a result thereof, certain reclassifications are made to the operating results for the six months ended September 30, 2004.

3. Capital Expenditures

Total capital expenditures were ¥405.9 billion.

We expanded the coverage areas of FOMA services including a rollout of FOMA Plus Area, which enables calls in mountainous areas, where previous FOMA handsets could not make calls; reinforced our FOMA network to meet the increase in demand; and constructed networks and equipment to provide new services. On the other hand, we continued our efforts to make our capital expenditures more efficient and less costly by reducing the acquisition costs of equipment and improving the design and construction process. Because we had completed the construction of four buildings for telecommunications equipment during the six months ended September 30, 2004, total capital expenditures during the six months ended September 30, 2005 decreased by 6.3% compared to the same period of the prior year.

Table of Contents**4. Cash Flow Conditions**

Net cash provided by operating activities was ¥858.9 billion (up 50.0% compared to the same period of the prior year). Net cash provided by operating activities increased mainly owing to a decrease in the payment of income taxes, which was ¥319.1 billion in the same period of the prior year, to ¥81.1 billion and refund of income taxes of ¥93.1 billion. These tax treatments were caused by the realization of the impairment of our investment in AT&T Wireless Services, Inc. as a result of the sale of the shares.

Net cash used in investing activities was ¥598.7 billion (up 46.6% compared to the same period of the prior year). Net cash used in investing activities increased mainly due to an increase in investments such as an investment in Sumitomo Mitsui Card Company, Limited, which increased net cash used in investing activities by ¥98.0 billion. Changes in investments for cash management purposes also increased net cash used in investing activities by ¥100.0 billion.

Net cash used in financing activities was ¥340.5 billion (down 34.8% compared to the same period of the prior year). Net cash used in financing activities decreased mainly due to a decrease in repayments of outstanding long-term debt. During the six months ended September 30, 2005, we repurchased our own stock for ¥16.9 billion in the stock market and ¥259.2 billion through a tender offer.

Free cash flows were ¥260.2 billion. Free cash flows excluding changes in investments for cash management purposes* (¥100.0 billion) were ¥360.2 billion.

Financial measures improved compared to the same period of the prior year due to an increase in shareholders' equity, a decrease in interest bearing liabilities and an increase in net cash provided by operating activities.

Notes:

Edgar Filing: NTT DOCOMO INC - Form 6-K

Free cash flows = Net cash provided by (used in) operating activities + Net cash provided by (used in) investing activities

Changes in investments for cash management purposes = Changes by purchases, redemptions and disposal of financial instruments for cash management purposes with original maturities of longer than 3 months.

Equity ratio = Shareholders' equity / Total assets

Market equity ratio* = Market value of total share capital / Total assets

Debt ratio = Interest bearing liabilities / (Shareholders' equity + Interest bearing liabilities)

Debt payout period (years) = Interest bearing liabilities / Cash flows from operating activities **

** To annualize, the amounts of Cash flows from operating activities are doubled.

Interest coverage ratio = Cash flows from operating activities / Interest expense***

*** Interest expense is cash interest paid, which are disclosed in Supplemental disclosures of cash flow information for consolidated statement of cash flows on page 22.

* See the reconciliations to the most directly comparable financial measures calculated and presented in accordance with GAAP on page 39.

5. **Profit Distribution**

The Company plans to pay ¥2,000 per share as an interim dividend for the six months ended September 30, 2005.

Notes:

The Company plans to begin paying an interim dividend from November 22, 2005.

Table of Contents<< Prospects for the Fiscal Year Ending March 31, 2006 >>

Competition in the Japanese cellular phone market is expected to become increasingly fierce in the future, as carriers enrich their handset portfolio, offer a wider range of value-added services and introduce reduced rate plans to respond to diversifying user needs as the cellular penetration rate rises in the run-up to the introduction of mobile number portability scheduled for the fiscal year ending March 31, 2007.

Under these market conditions and in light of better trends than expected in our communications traffic and the number of our net additions in the first six months of this fiscal year ending March 31, 2006, we have decided to amend our full-year forecasts as follows: Operating revenues forecast was revised downwards by ¥21 billion from the initial guidance to ¥4,784 billion due to a decline by ¥89 billion in equipment sales revenues reflecting a decrease in the number of handsets sold, despite an upward revision in cellular services revenues of ¥61 billion from the original forecast. We are lowering our operating expenses forecast due to a projected decline in revenue-linked expenses by ¥69 billion from the original forecast due to a decrease in handset sales, despite incurring approximately ¥14 billion in costs related to the dissolution of our capital tie-up with KPN Mobile and increasing the projected amount of depreciation and amortization by approximately ¥23 billion in view of its planned replacement of some of our equipment. As a result, the projected operating income in our new full-year guidance was revised to ¥830 billion, up ¥20 billion from the initial forecast.

	Billions of yen			
	Year ending	Year ended		Increase
	March 31, 2006	March 31, 2005		
	(Forecasts)	(Actual results)	(Decrease)	
Operating revenues	¥ 4,784.0	¥ 4,844.6	¥ (60.6)	(1.3%)
Operating income	830.0	784.2	45.8	5.8%
Income before income taxes	942.0	1,288.2	(346.2)	(26.9%)
Net income	604.0	747.6	(143.6)	(19.2%)
Capital expenditures	871.0	861.5	9.5	1.1%
Free cash flows excluding changes in investments for cash management purposes *	630.0	1,003.6	(373.6)	(37.2%)
EBITDA *	1,609.0	1,625.7	(16.7)	(1.0%)
EBITDA margin *	33.6%	33.6%		
ROCE *	17.1%	16.2%		0.9 points
ROCE after tax effect *	10.1%	9.6%		0.5 points

The financial forecasts for the year ending March 31, 2006, were based on the forecasts of the following operation data.

	March 31, 2006	March 31, 2005		Increase
	(Forecasts)	(Actual results)	(Decrease)	
	Number of cellular (FOMA) services subscribers (Thousands)	23,500	11,501	11,999
Number of cellular (mova) services subscribers (Thousands) (i)	27,400	37,324	(9,924)	(26.6%)

Edgar Filing: NTT DOCOMO INC - Form 6-K

Number of i-mode subscribers (Thousands) (ii)	46,300	44,021	2,279	5.2%
Number of PHS subscribers (Thousands)	740	1,314	(574)	(43.7%)
Aggregate ARPU (cellular (FOMA and mova) services)	¥ 6,850	¥ 7,200	(350)	(4.9%)
Voice ARPU	¥ 5,000	¥ 5,330	(330)	(6.2%)
Packet ARPU	¥ 1,850	¥ 1,870	(20)	(1.1%)

Notes: (i) Number of DoPa Single Service subscribers has been included in the number of mova subscribers starting with the results for the first six months of the fiscal year ended March 31, 2005.

(ii) The number of i-mode subscribers includes the number of cellular (FOMA) and cellular (mova) i-mode subscribers.

(iii) International services revenues, which had not been included in previous reports, have been included the ARPU data calculation starting with the forecasts for the fiscal year ending March 31, 2006, in view of their growing contribution to total revenues.

ARPU generated from International services for the fiscal year ending March 31, 2006: ¥40

See page 38 for the details of the ARPU calculation methods.

DoCoMo expects to pay a total annual dividend of ¥4,000 per share for the year ending March 31, 2006, consisting of an interim dividend of ¥2,000 per share and a year-end dividend of ¥2,000 per share.

* EBITDA and EBITDA margin, as we use them, are different from EBITDA as defined in Item 10(e) of Regulation S-K and may not be comparable to similarly titled measures used by other companies. For an explanation of our definition of Free cash flows excluding changes in investments for cash management purposes, EBITDA, EBITDA margin, ROCE and ROCE after tax effect, see the reconciliations to the most directly comparable financial measures calculated and presented in accordance with GAAP on the page 39.

Special Note Regarding Forward-Looking Statements

This Earnings Release contains forward-looking statements such as forecasts of results of operations, management strategies, objectives and plans, forecasts of operational data such as expected number of subscribers, and expected dividend payments. All forward-looking statements that are not historical facts are based on management's current plans, expectations, assumptions and estimates based on the information currently available. Some of the projected numbers in this report were derived using certain assumptions that are indispensable for making such projections in addition to historical facts. These forward-looking statements are subject to various known and unknown risks, uncertainties and other factors that could cause our actual results to differ materially from those contained in or suggested by any forward-looking statement. Potential risks and uncertainties include, without limitation, the following:

Competition from other cellular service providers or other technologies could limit our acquisition of new subscribers, retention of existing subscribers and average revenue per unit (ARPU), or may lead to an increase in our costs and expenses.

The new services and usage patterns introduced by our corporate group may not develop as planned, which could limit our growth.

The introduction or change of various laws or regulations or the application of such laws and regulations to our corporate group may adversely affect our financial condition and results of operations.

The introduction of number portability in Japan may increase our expenses, and may lead to a decrease in our number of subscribers if our subscribers choose to switch to other cellular service providers.

Limitations in the amount of frequency spectrum or facilities made available to us could negatively affect our ability to maintain and improve our service quality and level of customer satisfaction.

The W-CDMA technology that we use for our 3G system and/or mobile multimedia services may not be introduced by other overseas operators, which could limit our ability to offer international services to our subscribers.

Our domestic and international investments, alliances and collaborations may not produce the returns or provide the opportunities we expect.

Our PHS business, which is expected to operate at a loss until the service is terminated, may incur greater losses than we project.

As electronic payment capability and many other new features are built into our cellular phones, and services of parties other than those belonging to our corporate group are provided through our cellular handsets, potential problems resulting from malfunctions, defects, or missing of handsets or imperfection of services provided by such other parties may arise, which could have an adverse effect on our financial condition and results of operations.

Social problems that could be caused by misuse or misunderstanding of our products and services may adversely affect our credibility or corporate image.

Inadequate handling of subscriber information by our corporate group or contractors may adversely affect our credibility or corporate image.

Edgar Filing: NTT DOCOMO INC - Form 6-K

Owners of intellectual property rights that are essential for our business execution may not grant us the right to license or otherwise use such intellectual property rights on acceptable terms or at all, which may limit our ability to offer certain technologies, products and/or services, and we may also be held liable for damage compensation if we infringe the intellectual property rights of others.

Earthquakes, power shortages, malfunctioning of equipment, and software bugs, computer viruses, cyber attacks and other problems could cause systems failures in our networks, handsets or other networks required for the provision of service, disrupting our ability to offer services to our subscribers.

Concerns about wireless telecommunications health risks may adversely affect our financial condition and results of operations.

Our parent company, Nippon Telegraph and Telephone Corporation (NTT), could exercise influence that may not be in the interests of our other shareholders.

i-mode, i-channel, Push Talk, Osai-fu-Keitai, ToruCa, FOMA, mova, Quickcast, premini, Premier Club, WORLD CALL, WORLD WALKER, Mzone, mopera U, pake-hodai, and DoPa are trademarks or registered trademarks of NTT DoCoMo, Inc. Table of Contents

<< Condition of the Corporate Group >>

NTT DoCoMo, Inc. primarily engages in mobile telecommunications services as a member of the NTT group, with Nippon Telegraph and Telephone Corporation (NTT) as the holding company.

The Company, its 98 subsidiaries and 14 affiliates constitute the NTT DoCoMo group (DoCoMo group), the largest mobile telecommunications services provider in Japan.

The business segments of the DoCoMo group and the corporate position of each group company are as follows.

[Business Segment Information]

<u>Business</u>	<u>Main service lines</u>
Mobile phone business	Cellular (FOMA) services, cellular (mova) services, packet communications services, satellite mobile communications services, international dialing services, and sales of handsets and equipment for each service
PHS business	PHS services and sales of PHS handsets and equipment
Miscellaneous businesses	Radio paging (Quickcast) service, sales of Quickcast handsets and equipment, wireless LAN services and other miscellaneous businesses

(Note) For periods beginning after March 31, 2005, Quickcast business is included in miscellaneous businesses, and international businesses, which were previously included in miscellaneous businesses, has been reclassified into mobile phone business.

[Position of Each Group Company]

- (1) The Company engages in Mobile phone, PHS and other businesses in the Kanto-Koshinetsu region of Japan. The Company also provides nationwide services such as satellite mobile communications. The Company is solely responsible for DoCoMo group's overall research and development activities in the area of mobile telecommunications business as well as the development of services and information processing systems. The Company provides the results of such research and development to its eight regional subsidiaries, each of which operates in one of eight regions in Japan (DoCoMo Regional Subsidiaries).
- (2) Each of the DoCoMo Regional Subsidiaries engages in Mobile phone (excluding satellite mobile communications services), PHS and other businesses in their respective regions.
- (3) Twenty-nine other subsidiaries of the Company, each of which is entrusted with certain services by the Company and/or DoCoMo Regional Subsidiaries, operate independently to maximize their expertise and efficiency. They are entrusted with part of the services

Edgar Filing: NTT DOCOMO INC - Form 6-K

provided by, or give assistance to, the Company and DoCoMo Regional Subsidiaries.

- (4) There are 61 other subsidiaries and 14 affiliates, including, among others, some overseas units established for the purpose of global expansion of the third-generation mobile communications system based on W-CDMA, and joint ventures set up to launch new business operations.

The following chart summarizes the above.

Table of Contents

12

Table of Contents

<< Management Policies >>

1. Basic Management Policies

Under the corporate philosophy of creating a new world of communications culture, DoCoMo aims to contribute to the realization of a rich and vigorous society by reinforcing its core business with a focus on popularizing FOMA services, and promoting mobile multimedia services by offering services that are useful for customers' daily lives and businesses. It also seeks to maximize its corporate value in order to be greatly trusted and highly valued by its shareholders and customers.

2. Medium- and Long-Term Management Strategies

The competition amongst carriers in the Japanese cellular phone market is expected to intensify even further in the future due to increases in the market penetration rate, diversification of customer needs and the scheduled introduction of mobile number portability in Japan during the fiscal year ending March 31, 2007.

Against this backdrop, DoCoMo will seek to reinforce its core businesses by taking comprehensive measures to improve its offerings in the areas of handsets, services, rate plans, network coverage and quality as well as after-sales support, in an effort to react swiftly and adequately to the diverse needs of customers from a customer-centric perspective. At the same time, we will review under-performing businesses, and continue our endeavors to boost our operational efficiency through the reduction of handset procurement and network costs and a more efficient allocation of distributor commissions, in order to strengthen our competitive position.

To create new channels for revenue generation, we will actively work to expand our business domains based on the three principal growth strategies of multimedia, ubiquity and globalization.

(1) Multimedia

To further increase the use of i-mode and FOMA services, which enable the transmission of large amounts of data at high speeds, we plan to add more handsets tailored to users' needs in our product lineup, and will strive to develop and provide a wide array of sophisticated non-voice services, including visual communications and video/text delivery services. We also embarked on the development of High-Speed Downlink Packet Access (HSDPA) system, a technology that further enhances the packet transmission speeds supported by the FOMA network.

(2) Ubiquity

In addition to our conventional effort to expand usages by promoting services, such as remote control over intelligent home appliances and information distribution for automobiles (Telematics), we intend to promote the linkage with brick-and-mortar services, together with other related companies, combining our mobile services with various types of commercial transactions through an active use of external interface capabilities embedded in cellular handsets including contactless IC chips, bar codes and infrared data transmission.

(3) Globalization

As the arena of competition in mobile communications business expands to a global scale, DoCoMo intends to enhance user's convenience and increase its revenue opportunities by further enlarging the i-mode alliance and offering W-CDMA-based global handsets. Also, in view of global competition, we will widely look into opportunities for revenue growth, including the possibility of making investments in or forming alliances with not only telecommunications carriers, but also enterprises owning promising technologies as well as companies engaged in mobile communications-related peripheral businesses, while taking into consideration the overall synergies projected from such alliances.

Table of Contents

Furthermore, in pursuit of transforming our cellular handsets into a multifunctional tool for everyday life and business, we intend to evolve our cellular services by equipping the handsets with electronic money, credit card payment, transportation tickets and other features, and thereby aim to create new revenue sources that are independent from the traditional framework of volume-based communication charges.

To keep abreast with and react dynamically to the intensified competition and changes in the market, we plan to advance our cellular services on a continual basis, aggressively expand our business domains and seek to enhance our enterprise value as a consequence.

3. Basic Policies for Profit Distribution

Believing that providing adequate returns to shareholders is one of the most important issues in corporate management, the Company plans to pay dividends by taking into account its consolidated results and operating environment, based on the principle of stable dividend payments. The Company will also continue to take a flexible approach regarding share repurchases in order to plow back profits to shareholders. During the first six months of the fiscal year ending March 31, 2006, based on an authorization by a resolution adopted at the Ordinary General Meetings of Shareholders, the Company repurchased 1,663,603 shares of its own common stock at an aggregate price of ¥276.1 billion. The Company intends to keep the shares repurchased as treasury shares and in principle limit the amount of such treasury shares to approximately 5% of its total issued shares, and will consider retiring any treasury shares held in excess of this limit around the end of the fiscal year or at other appropriate times.

In addition, the Company will allocate internal reserves to active research and development efforts, capital expenditures and other investments in response to the rapidly changing market environment. The Company will endeavor to boost its corporate value by introducing new technologies, offering new services and expanding its global businesses through alliances with new partners.

4. Basic Policies Regarding Corporate Governance, Measures and Implementation

Recognizing the importance of having an effective corporate governance structure to consistently boost its enterprise value, DoCoMo has been working to reinforce its governance system based on the Principles of Corporate Governance for Listed Companies compiled by the Tokyo Stock Exchange, Inc., as one of its important managerial challenges.

As an entity engaged in a business offering public telecommunications services to a wide range of customers, in order to ensure business management based on the customers' perspective, we believe that it is essential to involve the members of the board of directors in the decision-making process pertaining to important matters, and execute business through collaboration among the officers in charge. To ensure sound and proper business execution under such a system, we also adopted an auditor system believing that it is desirable to have a mechanism that enables mutual supervision amongst board members assigned the responsibility for business execution, and management audit by corporate auditors (including external auditors).

Following the Ordinary General Meeting of Shareholders in June 2005, we reduced the number of board members from 24 to 13, and introduced a corporate officer system with the aim of clarifying the board's supervision function and further reinforcing the Company's business execution capability. In putting a corporate officer system in place, we appointed new 21 corporate officers, and some of the business execution rights that were previously enjoyed by the board of directors were transferred to representative directors and corporate officers.

Table of Contents

We believe this will allow flexible business execution by the responsible corporate officers, and lead to a further improvement in the board's flexibility, allowing it to make decisions more speedily and properly through active discussions. In an arrangement to ensure that the mutual supervision function of board members continues to work effectively in our business execution, eight of the board members were assigned the responsibility to serve concurrently as corporate officers. One member of the board of directors is an external director (an employee of our parent company, NTT).

The board of corporate auditors consists of five members, of which external auditors (three members) account for the majority. One of the three external auditor posts is assigned to a university professor who does not have any employment history with DoCoMo or other NTT Group companies. We seek to further reinforce our audit structure by increasing the number of accounting experts working under the corporate auditors and cooperating with auditors of its subsidiaries. Audits are performed efficiently through collaboration between our internal audit personnel and our registered public accountants. As part of our internal audit functions, we established an Internal Audit Office, which investigates and evaluates from a position independent from business execution whether each division, branch or others, has executed business in compliance with the management policies/plans defined by the Company and/or relevant laws, rules and regulations, as well as the effectiveness and efficiency of their execution, in order to achieve improvements where necessary. With the goal to further reinforce the internal audit capabilities at our overseas offices and ensure compliance with the U.S. Sarbanes-Oxley Act, we have decided to reorganize our Internal Audit Office into an Internal Audit Department, effective November 1, 2005.

Masanori Sato, Hideki Amano and Takuji Kanai of KPMG AZSA & Co., who are certified public accountants in Japan, engage in the audit of the Company's financial statements. Takuji Kanai has engaged in the audit of the Company for ten years and the fiscal year ending March 31, 2006 is expected to be the last term of his engagement in the audit of the Company. In addition to the above, eight other certified public accountants in Japan, five junior certified public accountants and eight others assist in the audit of our financial statements.

We set up an Advisory Board in February 1999, to obtain opinions and proposals of experts from diverse fields concerning managerial challenges facing the Company. The Advisory Board, which entered its fourth term in April 2005, basically meets every month. We also established a US Advisory Board in December 2000, to receive advice from a more global perspective. The US Advisory Board commenced its third term in December 2004, and holds meetings twice a year. The views and proposals from the advisors have been reflected in the management of the Company.

Table of Contents

The Company's business execution and management supervision mechanisms are summarized in the figure below:

To ensure lawful and appropriate business operations, we introduced an internal control system to ensure compliance with relevant laws, regulations and codes of conduct, and clarified the rules pertaining to the compliance structure, report and consultation system, handling of emergencies and training of employees to improve its effectiveness. Furthermore, the Company defined and published "NTT DoCoMo Group Code of Ethics" to present unified guidelines concerning the ethical standard to be observed by all employees, in an endeavor to boost the awareness of the management and employees of their ethical obligations.

In conjunction with the full-fledged implementation of Personal Information Protection Law in April 2005, we established an Information Security Department, a unit overseeing the Company's overall information security issues, which leads and manages our activities pertaining to the protection of customers' personal information, countermeasures against possible information leakage, development of our internal information control policies, and establishment and/or revisions of internal rules and codes. We have employed various measures to ensure the security of information, for example, by thoroughly administering terminals containing personal information, providing education to employees who handle personal information, supervising contracted companies, and strengthening the checking on the level of technical security employed. We have also established controls and procedures concerning disclosure of corporate information in accordance with domestic and overseas laws and regulations, and will disclose information in a timely, appropriate and proactive way to shareholders and investors to improve transparency.

5. Relationship with the Parent Company

- (1) The Company operates independently within the NTT Group, mainly in the field of mobile telecommunications. NTT, which currently owns 62.0% of the voting rights of the Company, can influence the managerial decisions of the Company by exercising its directorship rights as majority shareholder.

Table of Contents

- (2) The Company and NTT concluded a contract for basic research and development conducted by NTT. Under the agreement, NTT offers services and benefits to the Company concerning basic research and development, and the Company pays compensation to NTT for such services and benefits.
- (3) The Company and NTT also entered into a contract regarding group management and operations run by NTT. Under the agreement, NTT provides services and benefits regarding group management and operations to DoCoMo group, and the Company pays compensation to NTT for such services and benefits.

(As of September 30, 2005)

<u>Parent company</u>	<u>Ownership of voting rights</u>	<u>Securities exchange, where shares are listed</u>
Nippon Telegraph and Telephone Corporation	62.0%	Tokyo Stock Exchange, Inc. (First Section) Osaka Stock Exchange, Co. Ltd. (First Section) Nagoya Stock Exchange, Inc. (First Section) Fukuoka Stock Exchange Sapporo Stock Exchange New York Stock Exchange London Stock Exchange

6. Target Management Indicators

Now that the Japanese mobile telecommunications market has entered a period of stable growth, DoCoMo regards EBITDA margin* as an important management indicator, given the company's emphasis on profit, to further enhance its management effectiveness. DoCoMo also considers ROCE* an important management indicator to promote efficiency in its invested capital (shareholders' equity + interest bearing liabilities). DoCoMo will attempt to maximize its corporate value by doing its utmost to achieve an EBITDA margin* of at least 35% and an ROCE* of at least 20%.

Notes:

$$\text{EBITDA margin}^* = \text{EBITDA}^* / \text{Operating revenues}$$

$$\text{EBITDA}^* = \text{Operating income} + \text{Depreciation and amortization} + \text{Losses on sale or disposal of property, plant and equipment} + \text{Impairment loss}$$

Edgar Filing: NTT DOCOMO INC - Form 6-K

ROCE* = Operating income / (Shareholders' equity + Interest bearing liabilities)

Shareholders' equity and interest bearing liabilities are the average of the amounts as of March 31, 2005 and September 30, 2005

* EBITDA and EBITDA margin, as we use them, are different from EBITDA as defined in Item 10(e) of Regulation S-K and may not be comparable to similarly titled measures used by other companies. For an explanation of our definition of EBITDA, see the reconciliations to the most directly comparable financial measures calculated and presented in accordance with GAAP on page 39. See page 39 for the definition of ROCE.

[Corporate Social Responsibility: CSR]

To help create a society comfortable for all through our business operations, we established a CSR Committee to more strongly promote DoCoMo group's overall CSR-related activities. In August 2005, we published our CSR Report 2005, which introduces the actions undertaken by DoCoMo in the three areas of social, environmental and economic contributions. Now that mobile communications have become a lifeline service indispensable for the society, we have consistently implemented various measures to ensure stable and highly reliable services; these measures include the adoption of earthquake-resistant structures in our buildings accommodating telecommunications facilities, the use of double routes and loops in the transport network, and securing redundancy or decentralization of our communications facilities. In the event of natural disasters, we operate the i-mode Disaster Message Board Service to enable emergency contacts and safety confirmation. From the start of its operation, the service has posted some 510,000 messages on a cumulative basis as of September 30, 2005.

As part of our measures to tackle social problems resulting from the use of cellular phones, we have continuously worked to prevent unsolicited bulk emails in order to provide a safe and comfortable environment for accessing the Internet from cellular handsets.

In our environmental initiatives, we have been taking actions to alleviate the burdens on the earth, including green equipment procurement a practice to purchase equipment taking into account the impact on the environment, collecting and recycling used mobile phone handsets and accessories to build a recycling society, and saving on paper resources by offering an e-billing service which provides customers bill through our website or by e-mail message. In addition, we expanded our DoCoMo Woods forestation campaign to 25 locations in Japan, and started reforestation activities in Northern Sumatra, Indonesia in April 2005 jointly with the local community.

As part of our social contribution programs, from May 2005 we started DoCoMo Keitai Safety School, which will be carried out at a total of 200 elementary, junior high and high schools in the Kanto-Koshinetsu region by the end of this fiscal year. The intent of this program is to instruct children on even safer mobile phone practices, providing tips regarding the rules and proper manners for using cellular phones, and measures to avoid unsolicited emails and other potential troubles to promote safe phone usage. We also sponsored the Cross-Cultural Tales by Children international workshop a commemorative event for the 2005 EU-Japan Year of People-to-People Exchanges. In addition, we provided support for other welfare activities and encouraged employees to actively take part in community works as volunteers to help build a more affluent society. We established a non-profit Mobile Communications Fund to contribute to the development of the Japanese mobile communications industry and fostering young researchers, and granted assistance to citizens groups engaged in activities aimed at the protection of children. Furthermore, the Company inaugurated Mobile Society Research Institute with an aim to contribute to the society and customers by carrying out in-depth analyses on both the bright and dark sides of cellular phone services. The institute convened forum on the theme of Children and Mobile Media in July 2005, to plow back its research results to the society. In addition, we participated in the reconstruction of elementary schools and radio stations in the areas devastated by 2004 Sumatra earthquake, and extended fiscal support through donations to those affected by Hurricane Katrina, to help the restoration of the disaster-stricken areas.

Notes to Unaudited Consolidated Financial Statements

Basis of Presentation:

The accompanying unaudited consolidated financial information of NTT DoCoMo, Inc. and its subsidiaries (collectively DoCoMo) has been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP).

1. Summary of significant accounting and reporting policies:

(1) Significant accounting policies

Use of estimates

The preparation of DoCoMo's consolidated financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities, as well as the reported amounts of revenues and expenses. Actual results could differ from those estimates.

Inventories

Inventories are stated at the lower of cost or market. The cost of equipment sold is determined by the first-in, first-out method.

Property, plant and equipment

Property, plant and equipment is stated at cost and includes capitalized interest expense incurred during construction periods. It is depreciated over the estimated useful lives of respective assets using the declining-balance method with the exception of buildings that are depreciated using the straight-line method.

Investments in affiliates

The equity method of accounting is applied for investments in affiliates where DoCoMo owns an aggregate interest of 20% to 50% and/or is able to exercise significant influence over the affiliate.

DoCoMo evaluates the recoverability of the carrying value of its investments in affiliates, which includes investor level goodwill, when there are indicators that a decline in value below its carrying amount may be other than temporary. In the event of a determination that a decline in value is other than temporary, the amount of the loss is recognized in earnings, and a new cost basis in the investment is established.

Marketable securities

DoCoMo accounts for its marketable securities in accordance with Statement of Financial Accounting Standards (SFAS) No. 115, Accounting for Certain Investments in Debt and Equity Securities.

Goodwill and other intangible assets

DoCoMo accounts for goodwill and other intangible assets in accordance with SFAS No. 142, Goodwill and Other Intangible Assets, SFAS No. 86, Accounting for the Costs of Computer Software to Be Sold, Leased, or Otherwise Marketed, and American Institute of Certified Public Accountants (AICPA) Statement of Position 98-1, Accounting for the Costs of Computer Software Developed or Obtained for Internal Use.

Impairment of long-lived assets

In accordance with SFAS No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets, DoCoMo's long-lived assets other than goodwill, including property, plant and equipment, software and other intangibles, are reviewed for impairment, and if the asset is determined to be impaired, the amount of the loss is recognized.

Table of Contents

Hedging activities

DoCoMo accounts for derivative instruments in accordance with SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, as amended by SFAS No. 138 and No. 149.

Employee benefit plans

Pension benefits earned during the year, as well as interest on projected benefit obligations, are accrued currently. Prior service costs and credits resulting from changes in plan benefits are amortized over the average remaining service period of the employees expected to receive benefits.

Revenue recognition

Base monthly charges and airtime charges are recognized as revenues as service is provided to the subscribers. DoCoMo's monthly rate plans for cellular (FOMA and mova) services generally include a certain amount of allowances (free minutes and/or packets), and the used amount of the allowances is subtracted from total usage in calculating the airtime revenue from a subscriber for the month. Prior to November 2003, the total amount of the base monthly charges was recognized as revenues in the month they were charged as the subscribers could not carry over the unused allowances to the following months. In November 2003, DoCoMo introduced a billing arrangement, called Nikagetsu Kurikoshi (two-month carry over), in which the unused allowances are automatically carried over up to the following two months. DoCoMo also introduced a new arrangement which enables the unused allowances offered in and after December 2004 that have been carried over for two months to be automatically used to cover the airtime and/or packet fees exceeding the allowances of the other lines in the Family Discount group, a discounted billing arrangement for families with two to ten DoCoMo subscriptions. With the introduction of these new billing arrangements, DoCoMo has deferred revenues based on the portion of unused allowances that are estimated to be utilized prior to expiration. As DoCoMo does not have sufficient empirical evidence to reasonably estimate such amounts, DoCoMo currently defers all revenues corresponding to unused allowances. The deferred revenues are recognized as revenues as the subscribers make calls or data communications, similar to the way airtime revenues are recognized.

Certain commissions paid to purchasers (primarily agent resellers) are recognized as a reduction of revenue upon delivery of the equipment to the purchasers (primarily agent resellers) in accordance with Emerging Issues Task Force No. 01-09 (EITF 01-09), Accounting for Consideration Given by a Vendor to a Customer (Including a Reseller of the Vendor's Products).

Upfront activation fees are deferred and recognized as revenues over the estimated average period of the customer relationship for each service. The related direct costs are also deferred to the extent of the related upfront fee amount and are amortized over the same periods.

Income taxes

Income taxes are accounted for under the asset and liability method.

(2) Reclassifications

Certain reclassifications have been made to the prior periods consolidated financial statements to conform to the presentation used for the six months ended September 30, 2005.

March 31, 2005				
Operating revenues	¥ 4,755,815	¥ 63,095	¥ 25,700	¥ 4,844,610
Operating expenses	3,880,433	148,976	31,035	4,060,444
Operating income (loss)	¥ 875,382	¥ (85,881)	¥ (5,335)	¥ 784,166

Effective from the six months ended September 30, 2005, DoCoMo partly changed its segment configuration as described below. Quickcast business, which were presented separately in the past, have been reclassified to Miscellaneous businesses, and international dialing and roaming services, which were previously classified as Miscellaneous businesses, have been reclassified to Mobile phone business. As a result of these reclassification, the segment results for the six months ended September 30, 2004 and for the year ended March 31, 2005 have been restated to conform to the presentation for the six months ended September 30, 2005.

DoCoMo does not disclose geographical segments, since operating revenues generated outside Japan are immaterial.

DoCoMo evaluates the recoverability of long-lived assets in accordance with SFAS No. 144. Because DoCoMo estimated that future net cash flows from PHS business would be negative, DoCoMo wrote-down the entire carrying value of long-lived assets related to the PHS business during the year ended March 31, 2005. As a result, DoCoMo recognized a non-cash impairment loss of long-lived assets of ¥60,399 million, which were recorded in operating expenses of PHS business segment for the year ended March 31, 2005. DoCoMo also wrote-down the entire carrying value of long-lived assets related to the PHS business which DoCoMo acquired during the six months ended September 30, 2005. Therefore, DoCoMo recognized an impairment loss of long-lived assets of ¥432 million and recorded in operating expenses of PHS business segment for the six months ended September 30, 2005.

Table of Contents**2. Marketable securities and other investments:**

Marketable securities and other investments as of September 30, 2005 and 2004, and March 31, 2005 comprised the following:

	Millions of yen		
	September 30, 2005	September 30, 2004	March 31, 2005
Marketable securities:			
Available-for-sale	¥ 203,743	¥ 40,410	¥ 223,107
Held-to-maturity			7
Other investments	20,292	14,305	19,955
Total	¥ 224,035	¥ 54,715	¥ 243,069

Debt securities, which were classified as current assets because the maturities at the end of fiscal periods were one year or less, were included in the above table in addition to marketable securities recorded as a non-current item, Marketable securities and other investments, on the consolidated balance sheets.

DoCoMo has no debt securities classified as held to maturities at September 30, 2005.

Maturities of debt securities classified as available for sale at September 30, 2005 are as follows:

	Millions of yen	
	September 30, 2005	
	Carrying amounts	Fair value
Due within 1 year	¥	¥
Due after 1 year through 5 years	150,295	150,295
Due after 5 years through 10 years		
Due after 10 years		
Total	¥ 150,295	¥ 150,295

Actual maturities may differ from contractual maturities because some issuers have the right to call or prepay obligations.

Edgar Filing: NTT DOCOMO INC - Form 6-K

The aggregate fair value, gross unrealized holding gains and losses and cost by type of marketable security at September 30, 2005 and 2004, and March 31, 2005 are as follows:

Millions of yen				
September 30, 2005				
	Cost / Amortized cost	Gross unrealized holding gains	Gross unrealized holding losses	Fair value
Available-for-sale:				
Equity securities	¥ 21,764	¥ 32,287	¥ 603	¥ 53,448
Debt securities	150,398		103	150,295
Held-to-maturity:

Millions of yen				
September 30, 2004				
	Cost / Amortized cost	Gross unrealized holding gains	Gross unrealized holding losses	Fair value
Available-for-sale:				
Equity securities	¥ 21,473	¥ 19,265	¥ 328	¥ 40,410
Debt securities				
Held-to-maturity:				
Debt securities				

Table of Contents

Millions of yen				
March 31, 2005				
	Cost /	Gross unrealized	Gross unrealized	
	Amortized cost	holding gains	holding losses	Fair value
Available-for-sale:				
Equity securities	¥ 37,782	¥ 35,087	¥ 327	¥ 72,542
Debt securities	150,509	56		150,565
Held-to-maturity:				
Debt securities	7	0		7

The proceeds and gross realized gains (losses) from the sale of available-for-sale securities and other investments are as follows:

Millions of yen			
	Six months ended	Six months ended	Year ended
	September 30, 2005	September 30, 2004	March 31, 2005
Proceeds	¥ 275	¥ 26,946	¥ 27,046
Gross realized gains	227	14	17
Gross realized losses		(1,118)	(1,118)

Other investments includes long-term investments in various privately held companies. The aggregate carrying amount of DoCoMo's cost method investments included in other investments totaled ¥16,512 million, ¥13,152 million and ¥15,954 million as of September 30, 2005 and 2004, and March 31, 2005, respectively.

3. Subsequent event:

Dissolution of capital alliance with KPN Mobile N.V.

On October 24, 2005, DoCoMo dissolved its capital alliance with KPN Mobile N.V. (KPNM). The i-mode license agreement between DoCoMo and KPNM will be maintained.

Under the agreement, DoCoMo transferred all of its 2.16% holding of KPNM shares to Koninklijke KPN N.V. (KPN), the parent company of KPNM. KPN agreed to cooperate with DoCoMo in the smooth operation of the global i-mode alliance, through the use of KPN's i-mode-related patents and know how, for example, and has paid cash of 5 million (approximately ¥690 million) to DoCoMo.

Edgar Filing: NTT DOCOMO INC - Form 6-K

As a result of this transaction, DoCoMo expects to record a gain on a sale of investment securities of ¥40.0 billion, including a foreign currency translation adjustment, as an other income for the year ending March 31, 2006. DoCoMo also expects to account for the balance between the fair value of the transferred shares and the amount of cash received, approximately ¥14 billion, which DoCoMo regards as the consideration for the arrangement that will enable DoCoMo to continue the development and expansion of i-mode services, as an operating expense.

Table of Contents

Accounting Basis for the Non-Consolidated Financial Statements

Basis of Presentation:

The accompanying unaudited non-consolidated financial statements of NTT DoCoMo, Inc. (the Company) have been prepared in accordance with accounting principles generally accepted in Japan.

1. Depreciation and amortization of non-current assets

(1) Property, plant and equipment

Depreciation of property, plant and equipment is computed by the declining balance method with the exception of buildings, which are depreciated on a straight-line basis.

(2) Intangible assets

Intangible assets are amortized on a straight-line basis.

Internal-use software is amortized over the estimated useful lives (5 years or less) on a straight-line basis.

2. Valuation of certain assets

(1) Securities

Investments in subsidiaries and affiliates are stated at cost, which is determined by the moving average method.

Available-for-sale securities whose fair value is readily determinable are stated at fair value as of the end of the semi-annual period. The holding gains and losses, net of applicable deferred tax assets/liabilities, are not reflected in earnings, but directly reported as a separate component of shareholders' equity. The cost of securities sold is determined by the moving-average method with the exception of the cost of debt securities sold, which are determined by the first-in, first-out method.

Available-for-sale securities whose fair value is not readily determinable are stated at moving-average cost.

(2) Derivative instruments

Derivative instruments are stated at fair value as of the end of the semi-annual period.

(3) Inventories

Inventories are stated at cost. The cost of terminal equipment to be sold is determined by the first-in, first-out method. The cost of other inventories is determined by the specific identification method.

3. Allowance for doubtful accounts, liability for employees' retirement benefits, reserve for directors' and corporate auditors' retirement benefits, reserve for point loyalty programs and provision for loss on PHS business

(1) Allowance for doubtful accounts

The Company provides for doubtful accounts principally in an amount computed based on the historical bad debt ratio during a certain reference period plus the estimated uncollectable amount based on the analysis of certain individual accounts, including claims in bankruptcy.

(2) Liability for employees' retirement benefits

In order to provide for employees' retirement benefits, the Company accrues the liability as of the end of semi-annual period in an amount calculated based on the estimated projected benefit obligation and plan assets at the end of the fiscal year.

Actuarial losses (gains) are recognized as incurred at the end of the fiscal year.

Prior service cost is amortized on a straight-line basis over the average remaining service periods of employees at the time of recognition.

(Change in Accounting Policy)

Effective from the six months ended September 30, 2005, the Company adopted Amendment of Accounting Standards for Retirement Benefits (Accounting Standard No. 3, which was issued on March 16, 2005) and Application Guidance on Amendment of Accounting Standards for Retirement Benefits (Accounting Standard Application Guidance No. 7, which was issued on March 16, 2005). As a result of the adoption, operating income, recurring profit and income before income taxes increased by ¥768 million compared with those accounted for under the previous method for the six months ended September 30, 2005.

Table of Contents

(3) Reserve for directors and corporate auditors retirement benefits

The Company allocates the amount necessary for payment as of the end of the semi-annual period based on our internal regulations, so as to prepare for the payment of retirement benefits to directors and corporate auditors.

(Additional Information)

Effective from the six months ended March 31, 2005, the Company changed its method of accounting for its directors and corporate auditors retirement benefits, which were previously recognized as cost at the time of payment, to record a reserve for the benefits to the amount necessary for payment as of the end of the fiscal period based on our internal regulations.

As a result thereof, operating income, recurring profit and income before income taxes for the six months ended September 30, 2004 would decrease by ¥406 million if the Company accounted for these amounts under the current method.

(4) Reserve for point loyalty programs

The costs of awards under the point loyalty programs called DoCoMo Point Service and DoCoMo Premium Club that are reasonably estimated to be redeemed by the customers in the future based on historical data are accounted for as reserve for point loyalty programs.

(5) Provision for loss on PHS business

In order to provide for the loss resulting from PHS business, the Company makes necessary provision for the estimated future loss.

4. Foreign currency translation

Foreign currency monetary assets and liabilities are translated into Japanese yen at the current spot rate at the end of the semi-annual period and the resulting translation gains or losses are included in net income.

5. Leases

Finance leases other than those deemed to transfer ownership of properties to lessees are not capitalized and are accounted for in a similar manner as operating leases.

6. Hedge accounting

(1) Hedge accounting

Japanese GAAP provides for two general accounting methods for hedging financial instruments. One method is to recognize the changes in fair value of a hedging instrument in net income in the period of the change as gain or loss together with the offsetting loss or gain on the hedged item attributable to the risk being hedged. The other method is to defer the gain or loss over the period of the hedging contract together with offsetting loss or gain deferral of the hedged items. The Company has adopted the latter accounting method.

However, when an interest rate swap contract meets certain conditions, the net amount to be paid or received under the contract is added to or deducted from the interest on the hedged items.

In addition, when any of foreign currency swap contracts meet certain conditions, they are accounted for in the following manner:

- (a) The difference between the Japanese yen nominal amounts of the foreign currency swap contract translated using the spot rate at the transaction date of the hedged item and the spot rate at the date of inception of the contract, if any, is recognized in the non-consolidated statement of income in the period which includes the inception date of the contract; and
- (b) The discount or premium on the contract (for instance, the difference between the Japanese yen amounts of the contract translated using the contracted forward rate and the spot rate at the date of inception of the contract) is recognized over the term of the contract.

Table of Contents

(2) Hedging instruments and hedged items

Hedging instruments:
Interest rate swap contracts
Foreign currency swap contracts

Hedged items:
Corporate bonds
Bonds in foreign currency

(3) Hedging policy

The Company uses financial instruments to hedge risks such as market fluctuation risks in accordance with its internal policies and procedures.

(4) Assessment method of hedge effectiveness

The Company periodically evaluates hedge effectiveness by comparing cumulative changes in cash flows from hedged items or changes in fair value of hedged items, and the corresponding changes in the hedging instruments. However, the Company automatically assumes that the hedge will be highly effective at achieving offsetting changes in cash flows or in fair value for any transaction where important terms and conditions are identical between hedging instruments and hedged items.

7. Consumption tax

Consumption tax is separately accounted for by excluding it from each transaction amount.

Change in Accounting Policy

Accounting standards for impairment of long-lived assets

Effective from the six months ended September 30, 2005, the Company adopted the accounting standards for impairment of long-lived assets, Statement of Opinion on Establishment of Accounting Standards for Impairment of Long-lived Assets (issued by Accounting Standards Board of Japan on August 9, 2002) and Application Guidance on Accounting Standards for Impairment of Long-lived Assets (Accounting Standard Application Guidance No. 6, which was issued on October 31, 2003). The adoption of these standards had no impact on income before income taxes for the six months ended September 30, 2005.

The accumulated impairment losses were directly deducted from the amounts of related assets in accordance with the amended Interim Financial Statements Regulations.

Change in Presentation

Edgar Filing: NTT DOCOMO INC - Form 6-K

Investment securities, which was included in Other investments and other assets as of September 30, 2004, is separately stated in the non-consolidated balance sheets as of September 30, 2005 because the amount of Investment securities exceeded five percent of total assets as of September 30, 2005.

The amount of Investment securities, which was included in Other investments and other assets, was ¥44,788 million as of September 30, 2004.

Additional Information

In accordance with Article 2-2 of the amended Securities and Exchange Law of Japan, the investments in limited liability investment partnerships, which were included as Investment in capital in Other investments and other assets in the previous semi-annual period, is included in investment securities as of September 30, 2005.

The amount of investments in limited liability investment partnerships, which was included in Investment in capital, was ¥1,119 million as of September 30, 2004.

Table of Contents**Notes to Non-consolidated Balance Sheets:**

1. Non-current assets for telecommunication businesses include those used in supplementary businesses, because these amounts are not significant.
2. Accumulated depreciation of property, plant and equipment

	Millions of yen		
	September 30, 2005	September 30, 2004	March 31, 2005
Accumulated depreciation	1,527,151	1,387,134	1,448,357

3. Accounts payable, other, as of September 30, 2005, and September 30, 2004 includes consumption tax payable, net, of ¥6,339 million and ¥2,046 million, respectively.
4. Guarantee

The Company provides a counter indemnity of a performance guarantee up to HK\$24,099 thousand (¥351 million) guaranteeing performance by Hutchison Telephone Company Limited, an affiliate of the Company, with respect to certain contracts or obligations owed to its governmental authorities in relation to its business. The Company had HK\$919 thousand (¥13 million), HK\$1,293 thousand and HK\$919 thousand indemnity outstanding as of September 30, 2005 and 2004, and March 31, 2005, respectively.

5. Share repurchase

During the six months ended September 30, 2005, the Company repurchased its own shares in order to improve its capital efficiency and to implement flexible capital policies in response to the changing business environment.

Brief description of the repurchase is as follows:

(1) Class of shares repurchased:	Shares of common stock of the Company
(2) Aggregate number of shares repurchased:	1,663,605 shares (3.42% of issued shares)
(3) Aggregate amount of repurchase price:	¥276,078 million
(4) Method of repurchase:	Purchase in the market (102,383 shares), cash tender offer (1,561,220 shares) and repurchase of the fractional shares

Table of Contents**Notes to Non-consolidated Statements of Income:**

1. Depreciation and amortization expense included in operating expenses:

	Millions of yen		
	Six months ended	Six months ended	Year ended
	September 30, 2005	September 30, 2004	March 31, 2005
Property, plant and equipment	108,665	110,025	242,429
Intangible assets	76,667	69,568	144,693

2. Major components of non-operating revenues:

	Millions of yen		
	Six months ended	Six months ended	Year ended
	September 30, 2005	September 30, 2004	March 31, 2005
Dividends received	120,731	14,026	43,605
Interest income	3,260	370	1,822

3. Major components of non-operating expenses:

	Millions of yen		
	Six months ended	Six months ended	Year ended
	September 30, 2005	September 30, 2004	March 31, 2005
Interest expenses (including bond interest)	4,008	4,543	8,778

4. Income taxes

Current and deferred income taxes for this semi-annual period is calculated considering addition and withdrawal of appropriation for accelerated depreciation on tax which are expected to implement at the end of the fiscal year ending March 31, 2006.

5. Impairment loss

The Company recorded an impairment loss on the following asset group for the six months ended September 30, 2005.

(1) Place: Operating area of the Company (Kanto Koshinetsu region*)

Edgar Filing: NTT DOCOMO INC - Form 6-K

- (2) Purpose of use: PHS related assets
- (3) Types of assets: Machinery and equipment, antenna facilities and intangible assets such as telecommunication software

The Company groups Mobile phone business and PHS business as major minimal units which are individual sources of cash flows.

As the Company determined that it is to curtail the PHS business and estimated that future cash flows from the PHS business would be negative, the Company wrote-down the entire carrying value of its long-lived assets related to the PHS business, resulting in a impairment loss of ¥19,749 million for the six months ended September 30, 2005.

The impairment loss consists of machinery and equipment of ¥12,647 million, antenna facilities of ¥2,320 million, intangible assets such as telecommunication software of ¥3,601 million and other assets of ¥1,180 million.

Because the amount of the impairment loss equaled to the amount of income from the reversal of Provision for loss on PHS business on long-lived assets, the amounts were netted and the Company did not present an impairment loss on the non-consolidated statements of income for the six months ended September 30, 2005.

As a result, the impairment had no impact on income before income taxes for the six months ended September 30, 2005.

* Kanto Koshinetsu region consists of Tokyo, Kanagawa, Chiba, Saitama, Ibaraki, Tochigi, Gunma, Yamanashi, Nagano and Niigata.

Table of Contents

Marketable Securities:

For the six months ended September 30, 2005 and 2004, and for the year ended March 31, 2005, there were no subsidiaries and affiliates shares directly owned by the Company that had readily determinable market value.

Subsequent event:

Dissolution of capital alliance with KPN Mobile N.V.

On October 24, 2005, DCM Capital NL (UK) Limited (DCM Capital), an investment company of the Company, dissolved its capital alliance with KPN Mobile N.V. (KPNM). The i-mode license agreement between the Company and KPNM will be maintained.

Under the agreement, DCM Capital transferred all of its 2.16% holding of KPNM shares to Koninklijke KPN N.V. (KPN), the parent company of KPNM. KPN agreed to cooperate with the Company in the smooth operation of the global i-mode alliance, through the use of KPN's i-mode-related patents and know how, for example, and has paid cash of 5 million (approximately ¥690 million) to DCM Capital.

As a result, the Company expects to account for the cost of the arrangement with KPNM that will enable the Company to continue the development and expansion of i-mode services of approximately ¥14 billion as an operating expense.

ARPU data in previous reports do not include International service-related revenues. ARPU generated from International services, derived from the revenues thereof, for the relevant periods are as below:

	FY2004 (Ended Mar. 31, 2005)
	Full-year result
Aggregate ARPU (FOMA+mova)	20 yen

*

Edgar Filing: NTT DOCOMO INC - Form 6-K

Please refer to the attached sheet (P.38) for an explanation of the methods used to calculate ARPU, and the number of active subscribers used in calculating ARPU, MOU and Churn Rate.

- (1) Source for other cellular telecommunications operators: Data announced by Telecommunications Carriers Association.
- (2) DoPa Single Service subscribers are included in the calculation.
- (3) Calculation does not include DoPa Single Service-related revenues and DoPa Single Service subscribers.
- (4) Inclusive of circuit-switched data communications.
- (5) MOU (Minutes of Usage): Average communication time per one month per one user
- (6) Sum of FOMA handsets and mova handsets.
- (7) Data on independent sites are from OH!NEW? by Digital Street Inc.
- (8) Not inclusive of data communication time via @FreeD service.
- (9) Percentage of data traffic to total outbound call time
- (10) Included in total cellular subscribers.

Table of Contents

(APPENDIX 2)

ARPU Calculation Methods

1. ARPU (Average monthly revenue per unit)*1

i) ARPU (FOMA + mova)

Aggregate ARPU (FOMA+mova)=Voice ARPU (FOMA+mova) + Packet ARPU (FOMA+mova)

Voice ARPU (FOMA+mova) : Voice ARPU (FOMA+mova) Related Revenues (monthly charges, voice transmission charges) / No. of active cellular phone subscribers (FOMA+mova)

Packet ARPU (FOMA+mova) : {Packet ARPU (FOMA) Related Revenues (monthly charges, packet transmission charges)+ i-mode ARPU (mova) Related Revenues (monthly charges, packet transmission charges)} / No. of active cellular phone subscribers (FOMA+mova)

i-mode ARPU (FOMA+mova) *2 : i-mode ARPU (FOMA+mova) Related Revenues (monthly charges, packet transmission charges) / No. of active cellular phone subscribers (FOMA+mova)

ARPU generated purely from i-mode (FOMA+mova) *3 : i-mode ARPU (FOMA+mova) Related Revenues (monthly charges, packet transmission charges) / No. of active i-mode subscribers (FOMA+mova)

ii) ARPU (FOMA)

Aggregate ARPU (FOMA)=Voice ARPU (FOMA) + Packet ARPU (FOMA)

Voice ARPU (FOMA) : Voice ARPU (FOMA) Related Revenues (monthly charges, voice transmission charges) / No. of active cellular phone subscribers (FOMA)

Packet ARPU (FOMA) : Packet ARPU (FOMA) Related Revenues (monthly charges, packet transmission charges) / No. of active cellular phone subscribers (FOMA)

Edgar Filing: NTT DOCOMO INC - Form 6-K

i-mode ARPU^{*2} (FOMA) : i-mode ARPU (FOMA) Related Revenues (monthly charges, packet transmission charges) / No. of active cellular phone subscribers (FOMA)

ARPU generated purely from i-mode (FOMA) ^{*3} : i-mode ARPU (FOMA) Related Revenues (monthly charges, packet transmission charges) / No. of active i-mode subscribers (FOMA)

iii) ARPU (mova)

Aggregate ARPU (mova)=Voice ARPU (mova) + i-mode ARPU (mova)

Voice ARPU (mova) : Voice ARPU (mova) Related Revenues (monthly charges, voice transmission charges) / No. of active cellular phone subscribers (mova)

i-mode ARPU (mova) ^{*2} : i-mode ARPU (mova) Related Revenues (monthly charges, packet transmission charges) / No. of active cellular phone subscribers (mova)

ARPU generated purely from i-mode (mova) ^{*3} : i-mode ARPU (mova) Related Revenues (monthly charges, packet transmission charges) / No. of active i-mode subscribers (mova)

iv) ARPU (PHS)

ARPU (PHS) : ARPU (PHS) Related Revenues (monthly charges, voice transmission charges) / No. of active PHS subscribers

2. Active Subscribers Calculation Methods^{*1}

No. of active subscribers used in ARPU/MOU/Churn Rate calculations are sum of No. of active subscribers^{*4} for each month.

*1 DoPa single service subscribers and the revenues thereof are not included in the ARPU and MOU calculations.

*2 The denominator used in calculating i-mode ARPU (FOMA+mova, FOMA, mova) is the aggregate number of cellular subscribers to each service (FOMA+mova, FOMA, mova, respectively), regardless of whether i-mode service is activated or not.

*3 ARPU generated purely from i-mode (FOMA+mova, FOMA, mova) is calculated using only the number of active i-mode subscribers as a denominator.

Edgar Filing: NTT DOCOMO INC - Form 6-K

*4 active subscribers = (No. of subscribers at the end of previous month + No. of subscribers at the end of current month) / 2

(APPENDIX 3)

**Reconciliations of the Disclosed Non-GAAP Financial Measures to
the Most Directly Comparable GAAP Financial Measures**

The reconciliations for the year ending March 31, 2006 (forecasts) are provided to the extent available without unreasonable efforts.

1. EBITDA and EBITDA margin

	Billions of yen			
	Year ending			
	March 31, 2006 (Forecasts)	Year ended March 31, 2005	Six months ended September 30, 2005	Six months ended September 30, 2004
a. EBITDA	¥ 1,609.0	¥ 1,625.7	¥ 905.5	¥ 897.2
Depreciation and amortization	(753.0)	(735.4)	(339.1)	(340.3)
Losses on sale or disposal of property, plant and equipment	(26.0)	(45.7)	(7.6)	(11.5)
Impairment loss		(60.4)	(0.4)	
Operating income	830.0	784.2	558.4	545.4
Other income (expense)	112.0	504.1	74.7	(0.3)
Income taxes	(337.0)	(527.7)	(246.7)	(209.9)
Equity in net losses of affiliates	(1.0)	(12.9)	(1.1)	(0.0)
Minority interests in consolidated subsidiaries		(0.1)	0.0	(0.0)
b. Net income	604.0	747.6	385.3	335.2
c. Total operating revenues	4,784.0	4,844.6	2,373.5	2,452.0
EBITDA margin (=a/c)	33.6%	33.6%	38.2%	36.6%
Net income margin (=b/c)	12.6%	15.4%	16.2%	13.7%

Note: EBITDA and EBITDA margin, as we use them, are different from EBITDA as defined in Item 10(e) of regulation

S-K and may not be comparable to similarly titled measures used by other companies.

2. ROCE after tax effect

	Billions of yen			
	Year ending March 31, 2006 (Forecasts)	Year ended March 31, 2005	Six months ended September 30, 2005	Six months ended September 30, 2004
a. Operating income	¥ 830.0	¥ 784.2	¥ 558.4	¥ 545.4
b. Operating income after tax effect {=a*(1-effective tax rate)} (effective tax rate:40.9%)	490.5	463.4	330.0	322.4
c. Capital employed	4,853.7	4,826.4	4,868.2	4,705.3
ROCE before tax effect (=a/c)	17.1%	16.2%	11.5%	11.6%
ROCE after tax effect (=b/c)	10.1%	9.6%	6.8%	6.9%

Notes: Capital employed = Two period ends average of (Shareholders' equity + Interest bearing liabilities)

Interest bearing liabilities = Current portion of long-term debt + Long-term debt

3. Free cash flows excluding changes in investments for cash management purposes

	Billions of yen			
	Year ending March 31, 2006 (Forecasts)	Year ended March 31, 2005	Six months ended September 30, 2005	Six months ended September 30, 2004
Free cash flows excluding changes in investments for cash management purposes	¥ 630.0	¥ 1,003.6	¥ 360.2	¥ 164.4
Changes in investments for cash management purposes		(400.3)	(100.0)	
Free cash flows	630.0	603.3	260.2	164.4
Net cash used in investing activities	(954.0)	(578.3)	(598.7)	(408.4)
Net cash provided by operating activities	1,584.0	1,181.6	858.9	572.8

Note: Changes in investments for cash management purposes were derived from purchases, redemption at maturity and disposals of financial instruments held for cash management purposes with original maturities of longer than three months. Net cash used in investing activities for the six months ended September 30, 2005 and 2004 and the year ended March 31, 2005 include changes in investments for cash management purposes. Net cash used in investing activities for the year ending March 31, 2006 is not taking into account the effect of changes in investments for cash management purposes due to difficulties in forecasting the effect.

4. Market equity ratio

	Billions of yen			
	Year ending March 31, 2006 (Forecasts)	Year ended March 31, 2005	Six months ended September 30, 2005	Six months ended September 30, 2004

Edgar Filing: NTT DOCOMO INC - Form 6-K

a. Shareholders' equity	¥ 3,907.9	¥ 3,948.2	¥ 3,650.8
b. Market value of total share capital	8,766.0	9,837.4	9,383.7
c. Total assets	6,136.5	6,120.3	5,906.9
Equity ratio (=a/c)	63.7%	64.5%	61.8%
Market equity ratio (=b/c)	142.8%	160.7%	158.9%

Note: Market equity ratio is not forecasted because it is difficult to estimate the market value of total share capital in the future.

SLIDE No. 1

Forward-Looking Statements

The forecasts presented herein are forward-looking statements within the meaning of Section 27A of the U.S. Securities Act of 1933 and Section 21E of the U.S. Securities Act of 1934. Statements made in this presentation with respect to DoCoMo's plans, objectives, projected financials, operational figures, beliefs and other statements that are not historical facts are forward-looking statements about the future performance of DoCoMo which are based on management's expectations, assumptions, estimates, projections and beliefs in light of information currently available to it. These forward-looking statements, such as statements regarding the introduction of new products and services or termination or suspension of existing services, financial and operational forecasts, dividend payments, the growth of the Japanese cellular market and the ubiquitous services market, the growth of data usage, the growth of DoCoMo's cellular phone business, the migration of users to DoCoMo's 3G services and associated improvements in 3G services, improvements in 3G and 2G coverage area, and management goals are subject to various risks and uncertainties that could cause actual results to be materially different from and worse than as described in the forward-looking statements. Potential risks and uncertainties include, without limitation, competition from other cellular service providers or other technologies could limit our acquisition of new subscribers, retention of existing subscribers and average revenue per unit (ARPU), or may lead to an increase in our costs and expenses; the new services and usage patterns introduced by our corporate group may not develop as planned, which could limit our growth; the introduction or change of various laws or regulations or the application of such laws and regulations to our corporate group may adversely affect our financial condition and results of operations; the introduction of number portability in Japan may increase our expenses, and may lead to a decrease in our number of subscribers if our subscribers choose to switch to other cellular service providers; limitations in the amount of frequency spectrum or facilities made available to us could negatively affect our ability to maintain and improve our service quality and level of customer satisfaction; the W-CDMA technology that we use for our 3G system and/or mobile multimedia services may not be introduced by other overseas operators, which could limit our ability to offer international services to our subscribers; our domestic and international investments, alliances and collaborations may not produce the returns or provide the opportunities we expect; our PHS business, which is expected to operate at a loss until the service is terminated, may incur greater losses than we project; as electronic payment capability and many other new features are built into our cellular phones, and services of parties other than those belonging to our corporate group are provided through our cellular handsets, potential problems resulting from malfunctions, defects, or missing of handsets or imperfection of services provided by such other parties may arise, which could have an adverse effect on our financial condition and results of operations; social problems that could be caused by misuse or misunderstanding of our products and services may adversely affect our credibility or corporate image; inadequate handling of subscriber information by our corporate group or contractors may adversely affect our credibility or corporate image; owners of intellectual property rights that are essential for our business execution may not grant us the right to license or otherwise use such intellectual property rights on acceptable terms or at all, which may limit our ability to offer certain technologies, products and/or services, and we may also be held liable for damage compensation if we infringe the intellectual property rights of others; earthquakes, power shortages, malfunctioning of equipment, and software bugs, computer viruses, cyber attacks and other problems could cause systems failures in our networks, handsets or other networks required for the provision of service, disrupting our ability to offer services to our subscribers; concerns about wireless telecommunications health risks may adversely affect our financial condition and results of operations; our parent, NTT, could exercise influence that may not be in the interests of our other shareholders.

Further information about the factors that could affect the company's results is included in Item 3.D: Risk Factors of its annual report on Form 20-F filed with the U.S. Securities and Exchange Commission on June 27, 2005, which is available in the investor relations section of the company's web page at www.nttdocomo.com and also at the SEC's web site at www.sec.gov.

FY2005 FIRST HALF RESULTS HIGHLIGHTS

Table of Contents

SLIDE No. 3

FY2005 First Half Results Highlights

n Financial Results Highlights

- Operating revenues decreased 78.5 billion yen (or 3.2%) from the same period of last fiscal year to 2,373.5 billion yen.

Year-on-year decrease in cellular services revenues was limited to 9.6 billion yen (or 0.5%), indicating a slowdown in the pace of decline.

- Operating income reached 558.4 billion yen, posting an increase of 12.9 billion yen (or 2.4%) from the same period of last fiscal year.

n Improved Operational Results

- Cellular churn rate for FY2005/2Q was 0.81%, and DoCoMo's market share of net additions for FY2005/1H was 50.7%.
- ARPU for FY2005/2Q was 7,050 yen (down 290 yen, or 4.0%, year-on-year), MOU for FY2005/2Q was 152 minutes (down 3 min, or 1.9%, year-on-year)

FY2005 Full-Year Forecasts (Revised)

US GAAP

Principal factors for revision

- ◆ Among the items in operating revenues, estimated full-year cellular services revenues were revised to 4,127 billion yen (up 61 billion yen from initial forecast), because projected cellular ARPU was raised by 80 yen to 6,850 yen, and projected number of net additions was increased by 200,000 to 2.08 million subs, based on the trends in FY2005/1H.
- ◆ Operating expenses were revised to add approx. 14 billion yen in costs related to the dissolution of our capital alliance with KPN Mobile, and to increase the projected amount of depreciation and amortization by approx. 23 billion yen in view of planned replacement of some of our equipments.
- ◆ Accordingly, operating income forecast was revised to 830 billion yen (up 20 billion yen from initial forecast)
- ◆ The financial statements in this document are unaudited.

Corporate Social Responsibility

Launched *Anshin* mission, a campaign aimed at realizing a safe and secure society (Jun. 2005).

Established NTT DoCoMo Group Code of Ethics, the fundamental ethical standard to be observed by all employees to ensure lawful business operations (Apr. 2005).

Published DoCoMo's CSR Report 2005, to accelerate CSR activities and fulfill accountability as a corporate citizen (Aug. 2005).

DoCoMo *Keitai* Safety School for safe phone usage (200 elementary/junior/senior high schools in Kanto-Koshinetsu region)

Actions for

Strengthened measures against spam mails, resulting in reduction of inquiries (120,000 inquiries/month in Jun/01 ⇒ 5,000 inquiries/month in Sept/05, ÷ 96%)

cellular-related social issues

Enhanced Kid's i-mode access control feature to protect children from harmful information sites.

Convened Children and Mobile Media/Mobile Society forum in Jul. 2005 (Mobile Society Research Institute)

DoCoMo *Keitai* Safety School

Operated i-mode Disaster Message Board Service (Typhoon No. 14, etc.)

Supported construction of FM radio stations and day care centers and provided donations to areas affected by Indian Ocean tsunami.

Disaster rehabilitation support

Provided donations to disaster-stricken areas following August 2005 Hurricane Katrina and October 2005 Pakistan earthquake.

Construction of FM radio stations

Expanded DoCoMo Woods forestation campaign by launching one in Aomori Prefecture in Oct. 2005, the 27th site of the program carried out in both Japan and overseas.

Cellular handset using bio-plastic

Environment conservation

Developed a cellular handset using bio-plastic made from corn, and exhibited its prototype in the 2005 Aichi World Expo.

Table of Contents

SLIDE No. 30

Definition and Calculation Methods of MOU and ARPU

n MOU (Minutes of usage) : Average communication time per one month per one user.

n ARPU (Average monthly Revenue Per Unit) :

ARPU is used to measure average monthly revenues attributable to designated services on a per user basis. ARPU is calculated by dividing various revenue items included in operating revenues, such as monthly charges, voice transmission charges, and packet transmission charges from designated services, by the number of active subscribers to the relevant services. Accordingly, the calculation of ARPU excludes revenues that are not representative of monthly average usage such as activation fees. We believe that our ARPU figures calculated in the above way provide useful information regarding the monthly usage of our subscribers. The revenue items included in the numerators of our ARPU figures are based on our US GAAP results of operations.

n Aggregate ARPU (FOMA+mova) : Voice ARPU (FOMA+mova) + Packet ARPU (FOMA+mova)

(mova) Related Revenues (monthly charges, voice transmission charges) / No. of active cellular phone subscribers (FOMA+mova)

(FOMA) Related Revenues (monthly charges, packet transmission charges) + i-mode ARPU (mova) Related Revenues (monthly charges, packet transmission charges) / No.

(FOMA+mova) Related Revenues (monthly charges, packet transmission charges) / No. of active cellular phone subscribers (FOMA+mova)

n Aggregate ARPU (FOMA) : Voice ARPU (FOMA) + Packet ARPU (FOMA)

Voice ARPU (FOMA): Voice ARPU (FOMA) Related Revenues (monthly charges, voice transmission charges) / No. of active cellular phone subscribers (FOMA)

Packet ARPU (FOMA): Packet ARPU (FOMA) Related Revenues (monthly charges, packet transmission charges) / No. of active cellular phone subscribers (FOMA)

i-mode ARPU (FOMA) : i-mode ARPU (FOMA) Related Revenues (monthly charges, packet transmission charges) / No. of active cellular phone subscribers (FOMA)

Number of active subscribers used in ARPU and MOU calculations are as follows:

Quarterly data: sum of No. of active subscribers in each month ** of the current quarter

Half-year data: sum of No. of active subscribers in each month ** of the current half

Full-year data: sum of No. of active subscribers in each month ** of the current fiscal year

No. of active subs. in each month : (No. of subs at end of previous month + No. of subs at end of current month) / 2

Pa Single Service subscribers are not included in the above calculation of ARPU, MOU, revenues and no. of subscribers.

Table of Contents**SLIDE No. 31 Reconciliations of the Disclosed Non-GAAP Financial Measures to the Most Directly Comparable GAAP Financial Measures****1. EBITDA and EBITDA margin**

	Billions of yen			
	Year ending March 31, 2006 (Forecasts)	Year ended March 31, 2005	Six months ended September 30, 2004	Six months ended September 30, 2004
