Notes to Condensed Consolidated Financial Statements

(in thousands of United States Dollars, except share and per share data, unaudited)

(1) Organization and basis of presentation

Peak International Limited (the Company) was incorporated as an exempted company with limited liability in Bermuda under the Companies Act 1981 of Bermuda (as amended) on January 3, 1997. The subsidiaries of the Company are principally engaged in the manufacture and sale of precision engineered packaging products, such as matrix and disk drive trays, reels and carrier tapes, leadframe boxes and interleaves used in the storage and transportation of semiconductor devices and other electronic components. In March 2005, the Company exited the production and sale of shipping tubes. The Company s principal production facilities are located in the People s Republic of China (the PRC) and the Company maintains offices in Hong Kong, Malaysia, Singapore, Taiwan, and the United States of America.

The unaudited condensed consolidated financial statements include the accounts of the Company and its subsidiaries. All significant intra-group balances and transactions have been eliminated on consolidation.

The accompanying condensed consolidated financial information has been prepared by the Company without being audited, in accordance with the instructions to Form 10-Q and therefore does not include all information and footnotes necessary for a fair presentation of financial position, results of operations and cash flows in accordance with accounting principles generally accepted in the United States of America.

The preparation of financial statements in conformity with generally accepted accounting principles requires the use of estimates and assumptions that affect reported amounts of certain assets, liabilities, revenues and expenses as of and for the reporting periods. Actual results could differ from those estimates. Differences from those estimates are reported in the period they become known.

The unaudited condensed consolidated financial statements reflect all adjustments (including normal recurring adjustments) which in the opinion of management are required for a fair presentation of the Company s interim results. The results for interim periods are not necessarily indicative of the results that may be achieved in the entire year. These condensed consolidated financial statements and notes thereto should be read together with the consolidated financial statements and notes thereto included in the Company s Annual Report on Form 10-K for the year ended March 31, 2005.

New Accounting Standards

In May 2005, the FASB issued FASB Statement No. 154, *Accounting Changes and Error Corrections*, which requires entities that voluntarily make a change in accounting principle to apply that change retrospectively to prior periods financial statements, unless this would be impracticable. SFAS No.154 supersedes APB Opinion No.20, *Accounting Changes*, which previously required that most voluntary changes in accounting principle be recognized by including in the current period s net income the cumulative effect of changing to the new accounting principle. SFAS No.154 also makes a distinction between retrospective application of an accounting principle and the restatement of financial statements to reflect the correction of an error. SFAS No.154 is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005, which would be fiscal 2007, beginning April 1, 2006 for the Company. The adoption of SFAS No.154 is not expected to have a material effect on the Company s consolidated financial position or results of operations.

In March 2005, the SEC issued Staff Accounting Bulletin (SAB) No.107. SAB 107 provides guidance related to share-based payment transactions with non-employees, the transition from nonpublic to public entity status, valuation methods (including assumptions such as expected volatility and expected term), the accounting for certain redeemable financial instruments issued under share-based payment arrangements, the classification of compensation expense, non-GAAP financial measures, first-time adoption of Statement 123(R) in an interim period, capitalization of compensation cost related to share-based payment arrangements, the accounting for income tax effects of share-based payment arrangements upon adoption of Statement 123(R), the modification of employee share options prior to adoption of Statement 123(R) and disclosures in Management s Discussion and Analysis (MD&A) subsequent to adoption of Statement 123(R). In December 2004, the FASB issued FASB Statement No.123 (revised 2004), Share-Based Payment, or Statement 123(R), which is a revision of FASB Statement No.123, Accounting for Stock-Based Compensation . Statement 123(R) supersedes APB Opinion No.25, Accounting for Stock Issued to Employees or Opinion 25. Generally, the approach in Statement 123(R) is similar to the approach described in the unrevised Statement 123. However, Statement 123(R) requires all

Notes to Condensed Consolidated Financial Statements (continued)

(in thousands of United States Dollars, except share and per share data, unaudited)

share-based payments to employees, including grants of employee stock options, to be recognized in the income statement based on their fair values. Pro forma disclosure is no longer an alternative. In April 2005, the SEC deferred the effective date of Statement 123(R) so that companies may now adopt its provisions at the beginning of their first annual period beginning after June 15, 2005 which would be fiscal 2007, beginning April 1, 2006 for the Company. As permitted by the unrevised Statement 123, the Company currently accounts for share-based payments to employees using Opinion 25 s intrinsic value method, under which the Company generally does not record compensation cost for employee stock options. Accordingly, the adoption of Statement 123(R) s fair value method will have a significant impact on the Company s results of operations, although it will have no impact on the Company s overall financial position. The impact of adoption of Statement 123(R) cannot be predicted at this time because it will depend, in part, on levels of share-based payments granted in the future. However, had the Company adopted Statement 123(R) in prior periods, the impact of that standard would have approximated the impact of Statement 123 as described in the disclosure of pro forma net loss and loss per share in Note 10 to our Condensed Consolidated Financial Statements.

In December 2004, the FASB issued SFAS No.153, Exchanges of Nonmonetary Assets, an amendment of APB Opinion No.29. SFAS No.153 addresses the measurement of exchanges of nonmonetary assets and redefines the scope of transactions that should be measured based on the fair value of the assets exchanged. SFAS No.153 is effective for nonmonetary asset exchanges occurring in fiscal periods beginning after June 15, 2005, which would be our second quarter of fiscal 2006. The adoption of SFAS No.153 is not expected to have a material effect on our consolidated financial position or results of operations.

(2) Cost of goods sold

Included therein was $64 (unaudited) and $372 (unaudited) respectively (2004-$58 and 166, unaudited) write-off of machinery and molds due to technological obsolescence for the quarter and for the nine months ended December 31, 2005.

In April 2005, the PRC tax authorities began an investigation into the withholding and payment of income taxes by the factory in Shenzhen (Factory) that is operated pursuant to a processing agreement with an unaffiliated party for certain current and former employees of the Company, its affiliates or other companies who performed services at the Factory but may not have paid income taxes in the PRC and for whom the Factory may not have withheld and paid income taxes. The PRC tax authorities will likely seek to collect unpaid income taxes on salaries and expense allowances of certain current and former employees of the Company, its affiliates or other companies who performed services in the PRC based on the worker s relationship with the Factory and interest and penalties on such amounts. Since some of these claims are based on income earned over several years, the amount of such taxes, accrued interest and penalties could be substantial. The Company does not believe that it is liable for such claims, but in the event the PRC tax authorities determine payments for back taxes, interest and penalties are owed, the potential consequences include substantial monetary claims against the Factory or the seizure of the Factory and the Company s assets at the Factory and the termination of substantially all of the Company s production operations. In the event the PRC authorities asserted claims for such taxes against the Factory, the Company may make such payments on a voluntary basis in order to avoid the seizure of the Factory or the Company s assets at the Factory and to keep it operational. The Company engaged tax advisors to assist the Company in assessing the Factory s and the Company s obligations with respect to the withholding and payment of income taxes by the Factory. In addition to the amount of $2,003 that was estimated and accrued for during the six months ended September 30, 2005, upon completion of the assessment, the tax advisors concluded that the additional amount of unpaid income tax for certain former employees stationed at or employed by the Factory that could be estimated with a reasonable basis was approximately $180. At this point, the Company does not believe the Factory has sufficient assets to pay such amounts. As a result, the Company anticipates it may have to pay such amount and has accrued $180 as additional manufacturing costs for the quarter ended December 31, 2005. Penalties on the above unpaid income tax and liability for income and other taxes, interest and penalties for certain other individuals associated with the Factory could not be reasonably estimated. Accordingly, the Company has not accrued for these in the quarter ended December 31, 2005. See note 12(b) Contingencies**.**

(3) Delivery and freight expenses

For the quarter and for the nine months ended December 31, 2005, the Company incurred delivery and freight expenses of approximately $858 (unaudited) and $2,320 (unaudited) (2004 $893 and $2,656, unaudited) respectively, which have been included as part of selling and marketing expenses.

(4) Income Tax (Expenses) Benefit

Income is subject to taxation in the various countries in which the Company and its subsidiaries operate.

Notes to Condensed Consolidated Financial Statements (continued)

(in thousands of United States Dollars, except share and per share data, unaudited)

(5) Inventories

	December 31, 2005	March 31, 2005
	(Unaudited)	
Raw materials	$ 5,395	$ 8,394
Finished goods	7,524	5,345
	$ 12,919	$ 13,739

(6) Other Deposit

This represents the security bond placed at a Taiwanese court in order to obtain an anti-injunction order in respect of a potential patent dispute in Taiwan. See Note 12(a) Litigation . Management of the Company does not expect the case to be settled within 12 months and therefore the amount was classified as a non-current asset.

(7) Stock Options

Option activity relating to the Company s stock option plan is summarized as follows (unaudited):

	Outstanding Options	
	Number of Shares	Weighted average exercise price per share
Outstanding at April 1, 2005	2,362,679	$ 5.48
Granted	216,000	3.41
Exercised		
Forfeited	(30,798)	4.98
Outstanding at June 30, 2005	2,547,881	5.36
Granted	28,000	3.01
Exercised		
Forfeited	(318,914)	5.77

Outstanding at September 30, 2005	2,256,967	5.27
Granted	57,000	2.99
Exercised		
Forfeited	(50,938)	3.67
Outstanding at December 31, 2005	2,263,029	5.25

	Outstanding Options	
	Number of Shares	Weighted average exercise price per share
Outstanding at April 1, 2004	2,810,313	$ 5.99
Granted	396,420	5.10
Exercised	(58,210)	3.96
Forfeited	(49,900)	7.93
Outstanding at June 30, 2004	3,098,623	5.88
Granted		
Exercised	(2,559)	3.52
Forfeited	(382,335)	7.33
Outstanding at September 30, 2004	2,713,729	5.68
Granted	50,000	3.98
Exercised	(1,750)	3.48
Forfeited	(31,236)	7.11
Outstanding at December 31, 2004	2,730,743	5.63

Notes to Condensed Consolidated Financial Statements (continued)

(in thousands of United States Dollars, except share and per share data, unaudited)

(8) Earning (Loss) Per Share

The following is a reconciliation of the numerator and the denominator of the basic earning (loss) per share:

	Three Months Ended December 31,	
	2005	**2004**
	(Unaudited)	**(Unaudited)**
Numerator:		
Net income (loss)	$ 212	$ (4,170)
Denominator:		
Weighted average number of shares outstanding		
Basic	12,420,388	12,408,176
Assumed exercise of stock options	293	
Diluted	12,420,681	12,408,176

	Nine Months Ended December 31,	
	2005	**2004**
	(Unaudited)	**(Unaudited)**
Numerator:		
Net loss	$ (3,556)	$ (5,343)
Denominator:		
Weighted average number of shares outstanding		
Basic	12,420,388	12,388,475
Assumed exercise of stock options		
Diluted	12,420,388	12,388,475

For the quarter ended December 31, 2004 and nine months ended December 31, 2005 and 2004, exercise of all outstanding stock options would have been anti-dilutive and such stock options were therefore not included in the computation of diluted loss per share.

Notes to Condensed Consolidated Financial Statements (continued)

(in thousands of United States Dollars, except share and per share data, unaudited)

(9) Comprehensive Income (Loss)

The Company s comprehensive income (loss) consists of the following:

	Three Months Ended December 31,	
	2005	**2004**
	(Unaudited)	**(Unaudited)**
Net income (loss):	$ 212	$ (4,170)
Other comprehensive loss:		
Foreign currency translation	(22)	(41)
Comprehensive income (loss)	$ 190	$ (4,211)

	Nine Months Ended December 31,	
	2005	**2004**
	(Unaudited)	**(Unaudited)**
Net loss:	$ (3,556)	$ (5,343)
Other comprehensive loss:		
Foreign currency translation	(19)	
Comprehensive loss	$ (3,575)	$ (5,343)

	December 31, 2005	**March 31, 2005**
	(Unaudited)	
Accumulated other comprehensive loss		
Foreign currency translation	$ (1,280)	$ (1,261)

(10) Employee Stock Purchase and Option Plans

During the quarter ended December 31, 2005, the Company issued options for 50,000 and 7,000 shares under the 1998 Stock Option Plan at an exercise price of $3.065 and $2.460 per share respectively to employees of the Company. The Company did not issue any shares under the 1997

Stock Option Plan nor 2000 Employee Stock Purchase Plan to employees of the Company during the quarter ended December 31, 2005.

The Company accounts for stock-based compensation awarded to employees using the intrinsic value method prescribed in Accounting Principles Board Opinions (APB) No. 25 Accounting for Stock Issued to Employees and related interpretations.

No stock-based employee compensation cost is reflected in net income (loss), as all options granted under those plans had an exercise price equal to the market value of the underlying common stock on the date of grant.

If the Company had accounted for its stock option plans and the stock purchase plan by recording compensation based on the fair value at grant date for such awards consistent with the method of Statement of Financial Accounting Standards (SFAS) No. 123 Accounting for Stock-Based Compensation , the Company s net income (loss) and earning (loss) per share would have been decreased as follows:

Notes to Condensed Consolidated Financial Statements (continued)

(in thousands of United States Dollars, except share and per share data, unaudited)

	Three months ended December 31,	
	2005	2004
	(Unaudited)	(Unaudited)
Net income (loss), as reported	$ 212	$ (4,170)
Add: compensation expenses recognized under SFAS no. 123, net of tax	$ (147)	$ (264)
Pro forma net income (loss)	$ 65	$ (4,434)
Pro forma earning (loss) per share		
- Basic	$ 0.01	$ (0.36)
- Diluted	$ 0.01	$ (0.36)

	Nine months ended December 31,	
	2005	2004
	(Unaudited)	(Unaudited)
Net loss, as reported	$ (3,556)	$ (5,343)
Add: compensation expenses released under SFAS no. 123, net of tax	$ 82	$ 402
Pro forma net loss	$ (3,474)	$ (4,941)
Pro forma loss per share		
- Basic	$ (0.28)	$ (0.40)
- Diluted	$ (0.28)	$ (0.40)

(11) Share Repurchase

In September 2000, the Board of Directors of the Company authorized the repurchase by the Company of up to $10,000 of its common stock at prices not to exceed 150% of the Company s net asset value per share. Common stock repurchased will be cancelled immediately. The excess of purchase price over par value is charged to additional paid-in capital.

There was no repurchase of shares for the quarter and nine months ended December 31, 2005 and 2004.

(12) Commitments and Contingencies

(a) Litigation

R.H. Murphy Co., Inc. (Murphy) is the owner of U.S. Reexamined Patent 5,400,904 C1 and certain corresponding foreign patents, which patents are directed to specific features in trays used to carry integrated circuits. Murphy previously notified the Company and certain of its customers that it believed these patents were infringed by certain integrated circuit trays that the Company provided to its customers, and indicated that licenses to these patents were available. On January 17, 2006, a decision was reached in R.H. Murphy vs Illinois Tool Works in the United States District Court for the District of Massachusetts finding Murphy s patent invalid. While it is possible that R.H. Murphy may appeal this decision, or may proceed against the Company in Taiwan or other jurisdictions, the Company does not expect R.H. Murphy to assert any claim against Peak for infringement of this patent.

(b) Contingencies

In April 2005, the PRC tax authorities began an investigation into the withholding and payment of income taxes by the factory in Shenzhen (Factory) that is operated pursuant to a processing agreement with an unaffiliated party for certain current and former employees of the Company, its affiliates or other companies who performed services at the Factory but may not have paid income taxes in the PRC and for whom the Factory may not have withheld and paid income taxes. The PRC tax authorities will likely seek to collect unpaid income taxes on salaries and expense allowances of certain current and former employees of the Company, its affiliates or other companies who performed services in the PRC based on the worker s relationship with the Factory and interest and penalties on such amounts. Since some of these claims are based on income earned over several years, the amount of such taxes, accrued interest and penalties could be substantial. The Company does not believe that it is liable for such claims, but in the event the PRC tax authorities determine payments for back taxes, interest and penalties are owed, the potential consequences include substantial monetary claims against the Factory or the seizure of the Factory and the Company s assets at

Notes to Condensed Consolidated Financial Statements (continued)

(in thousands of United States Dollars, except share and per share data, unaudited)

the Factory and the termination of substantially all of the Company s production operations. In the event the PRC authorities asserted claims for such taxes against the Factory, the Company may make such payments on a voluntary basis in order to avoid the seizure of the Factory or the Company s assets at the Factory and to keep it operational. The Company engaged tax advisors to assist the Company in assessing the Factory s and the Company s obligations with respect to the withholding and payment of income taxes by the Factory. In addition to the amount of $2,003 that was estimated and accrued for during the six months ended September 30, 2005, upon completion of the assessment, the tax advisors concluded that the additional amount of unpaid income tax for certain former employees stationed at or employed by the Factory that could be estimated with a reasonable basis was approximately $180. The Company does not believe the Factory has sufficient assets to pay such amounts. As a result, the Company anticipates it may have to pay such amounts and has accrued $180 as additional manufacturing costs for the quarter ended December 31, 2005. At present, the potential penalty for the unpaid income and other taxes and interest, as well as the amount of tax payable and interest thereon for some other current and former employees of the Company, its affiliates or other companies, cannot be estimated with reasonable particularity and therefore no impact to the financial statements has been reflected in these respects.

(c) Commitments

At December 31, 2005, the Company had commitments for capital expenditures of approximately $259.

(14) Asset to be disposed of by sale/Other income

A former subsidiary of the Company owned an industrial building under construction in the PRC. In view of its production needs and the market conditions, the completion of the building under construction was delayed. During the fourth quarter of the year ended March 31, 2001, management reassessed the fair value of the building given the downturn in the industrial property market in which the building is located and a provision of $759 was recorded to reduce the carrying value of the building.

During the quarter ended June 30, 2002, the industrial building under construction and the related land use right in the PRC, which has an assigned period for 50 years commencing May 1993, were reclassified as asset to be disposed of by sale following management s decision to dispose of the property as a general purpose industrial building. As a result, the property has been written down to its fair market value less costs to sell pursuant to SFAS No. 144 Accounting for the Impairment of Disposal of Long-Lived Assets , resulting in an asset impairment charge of $13,378 during the year ended March 31, 2003. The net book value of the property and the land use right were $4,071 and $1,159 respectively as of March 31, 2005, 2004 and 2003.

The Company entered into a contract with an independent third party for the sale of the subsidiary of the Company that held title to this building and the associated land use rights in the PRC. The sale was completed on April 13, 2005 for approximately $7,692 in cash. Approximately $1,282 of the sale proceeds is held in escrow as restricted cash (see note 15, Restricted Cash) to fund contingencies and will not be available for use by the Company over the period ending first quarter of fiscal 2008. At present, management is unaware of any contingency that will result in the forfeiture of either the full or part of the amount. A net gain on disposal of approximately $2,189 was recognized in the quarter ended June 30, 2005.

(15) Restricted cash

Apart from $1,282 of the sale proceeds held in escrow as restricted cash in note 14, Asset to be disposed of by sale/Other income, on October 14,2005, the Company entered into escrow arrangements appointing an independent third party as an escrow agent (Escrow Agent) for a total of $2,501 deposited as restricted cash by the Company. In September 2005, a shareholder of the Company stated its intention to replace the Company s senior management and effect a merger of the Company with another corporation. The escrows were set up to ensure that obligations of the Company to the officers under their employment contracts would be honored in the future. The Company has deposited an amount equal to estimated severance payments and anticipated administrative costs in the escrows. Funds in escrow will not be available for use by the Company until March 15, 2007 or earlier in accordance with the provisions of the escrow agreements.. In November 2005, the shareholder reported that it no longer planned to effect such changes.

Item 2. ***Management s Discussion and Analysis of Financial Condition and Results of Operations***

General

The following management s discussion and analysis of financial condition and results of operations is based upon and should be read together with the consolidated financial statements of the Company and notes thereto included in this Report and the Registrant s Annual Report on Form 10-K for the year ended March 31, 2005.

Forward-Looking Statements

Management s discussion and analysis of financial condition and results of operations and other sections of this Report contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. We intend for the forward-looking statements to be covered by the safe harbor provisions for forward-looking statements in these sections. These statements, which include statements regarding the Company s belief that it is not contractually obligated to pay amounts owed by the factory at which the Company s products are manufactured and its expectations regarding the assessment of any penalties on such amounts, the Company s expected financial position, business and financing plans, our beliefs that our existing cash and cash equivalents and anticipated cash flow from operations will be sufficient to meet our anticipated cash needs in the ordinary course of business for at least the next 12 months, our beliefs regarding foreign currency fluctuations and the potential impact of currency fluctuations on the Company, our expectation that we will be able to renegotiate the terms and conditions of our processing agreement, our beliefs that our operations in the PRC are now in compliance with the applicable PRC legal and regulatory requirements, statements regarding intellectual property rights of third parties, statements regarding our critical accounting policies, and statements regarding the validity of lawsuits against the Company are forward-looking statements. Such forward-looking statements are identified by use of forward-looking words such as anticipates, believes, plans, estimates, expects, and inte words or phrases of similar expression. These forward-looking statements are subject to various assumptions, risks and uncertainties, including but not limited to, changes in political and economic conditions in general , economic conditions in the semiconductor and disk drive industries, any future economic downturn, demand for the Company s products, acceptance of new products, technology developments affecting the Company s products, the Company s ability to raise additional capital if necessary, the price and availability of raw materials, fluctuations in currency markets, the outcome of lawsuits by and against the Company, difficulties related to working in the PRC, including regional government and processing partner relations and contracts, foreign currency exchange laws, taxation and health issues, the outcome of any investigations by the PRC authorities, amounts the Company may have to pay for back taxes, interest and penalties to the PRC tax authorities, the Company s ability to continue to be listed on the Nasdaq Stock Market, and those discussed in the Company s filings with the Securities and Exchange Commission. Actual results could differ materially from those contemplated by the forward-looking statements as a result of these factors and those set forth under Factors Which May Affect Operating Results below. These forward-looking statements speak only as of the date hereof. The Company expressly disclaims any obligation or undertaking to release publicly any updates or revisions to any forward-looking statements contained herein to reflect any change in the Company s expectations with regard hereto or any change in events, conditions or circumstances on which any such statement is based.

All references to the Company, Peak, we, us or our herein are references to Peak International Limited, a company incorporated under Berm law on January 3, 1997, and, unless the context otherwise requires, its subsidiaries and predecessors. All references to Peak (HK) herein are to Peak Plastic & Metal Products (International) Limited, a company incorporated in Hong Kong and a wholly-owned subsidiary of the Company and, unless the context otherwise requires, its subsidiaries and predecessors. References in this Quarterly Report on Form 10-Q (Quarterly Report) to our historical business and operations assume that the corporate reorganization in 1997 (the Restructuring) by which, among other things, Peak (HK) became a wholly-owned subsidiary of the Company and the Company acquired its other subsidiaries, had already occurred as of the times to which the references relate. Any discrepancies in the tables included in this Quarterly Report between the amounts indicated and the totals thereof are due to rounding. All references to US Dollars, US$ or $ herein are to United States dollars, references to HK Dollars or HK$ are to Hong Kong dollars.

Results of Operations

Net Sales. Net sales increased by approximately 2.4% to $17.2 million in the third quarter of fiscal 2006 from $16.8 million in the same quarter of fiscal 2005. The increase was primarily due to an increase in sales of semiconductor trays, tapes and reels which was offset by a decrease in sales of our tubes, whose production and sale we exited in March 2005. For the third quarter of fiscal 2006, net sales of semiconductor trays increased by 9.1% over the same period last year reflecting a 7.9% increase in sales volume, and a 1.1% increase in average selling price. Net sales of tapes and reels increased by 18.9% compared to the third quarter of fiscal 2005, primarily due to a 7.5% increase in sales volume combined with a 10.6% increase in average selling price. Net sales for tubes decreased by 100%, or $1.1 million compared to the same quarter last year as we exited the production and sale of tubes in March 2005. Net sales for disk drive trays decreased by 21.5% compared to the same quarter last year, driven by a volume decrease of 32.1% and an increase in average selling price by 15.6%. Our disk drive tray sales have generally been to one major customer or to subcontractors supporting that customer. These sales are largely dependent on the introduction of new products by that customer. New product introductions are difficult to forecast both with respect to timing as well as demand. We produced new custom molds for that customer, which led to an increase in production orders in the third quarter of fiscal 2006 as compared to the third quarter of fiscal 2005. Mature products, while requiring some replacement trays, do not generally generate a sustainable high level of revenue. As a result, revenue from sales of our disk drive trays has, and will in the future, fluctuate dramatically with the corresponding fluctuations in the introduction of new products.

Net sales decreased by approximately 4.2% to $49.2 million for the nine months ended December 31, 2005 from $51.4 million for the nine months ended December 31, 2004. Net sales of semiconductor trays decreased by 3.4% comparing the nine months ended December 31, 2005 to the nine months ended December 31, 2004, primarily due to a decrease in sales volume by 6.0% and a 2.8% increase in average selling price. Net sales of tapes and reels increased by 3.9% over the same period primarily due to a 2.1% decrease in sales volume and a 6.2% increase in average selling price. Net sales of tubes decreased by 100%, or $3.3 million during the same period as we exited the production and sale of tubes in March 2005. Net sales of disk drive trays increased by 63.8% during the same period primarily due to a 19.3% increase in sales volume combined with and a 37.3% increase in average selling price. Our disk drive tray sales have generally been to one major customer or to subcontractors supporting that customer. These sales are largely dependent on the introduction of new products by that customer. New product introductions are difficult to forecast both with respect to timing as well as demand. We produced new custom molds for that customer, which led to an increase in production orders in the nine months ended December 31, 2005 as compared to the nine months ended December 31, 2004. Mature products, while requiring some replacement trays, do not generally generate a sustainable high level of revenue. As a result, revenue from sales of our disk drive trays has, and will in the future, fluctuate dramatically with the corresponding fluctuations in the introduction of new products.

Gross Profit. Gross profit increased to $4.5 million in the third quarter of fiscal 2006 from a gross loss of $73,000 in the third quarter of fiscal 2005. Gross profit margin improved significantly as a percentage of sales to 26.2% in the third quarter of fiscal 2006 from a gross loss margin, 0.4%, in the same quarter of fiscal 2005. The significant improvement in gross profit and gross margin percentage were attributable to more efficient factory utilization as volume increased as well as technological improvements. We successful recycled approximately $0.7 million of materials, the cost of which had been recognized in a prior period. In the same quarter last year, we wrote off approximately $0.9 million of recycled trays that could not be economically utilized. In the third quarter of fiscal 2006, there was a favorable write-back of inventory reserve of about $0.3 million as a result of pricing trends of reel and tape for the third quarter of fiscal 2006. In the same quarter last year, there was a favorable write-back of inventory reserve of about $0.3 million as a result of pricing trends of reel and tape, as well as tube. We exited the tube business in March 2005.

An amount of $0.1 million was incurred as severance payments for a group of terminated workers at the factory in Shenzhen (the Factory) that is operated pursuant to a processing agreement with an unaffiliated party. Some of these workers were terminated because their jobs were outsourced. In the same quarter last year, we incurred $0.3 million of severance payments.

During the three months ended December 31,2005, $0.2 million was accrued for income taxes for certain former employees of Peak, its affiliates or other companies who performed services at the Factory, as described below. In the same period last year, $1.3 million was accrued for both taxes and social insurance contributions for workers at the Factory.

In addition to the above, lower materials usage and labor costs, change in product mix, as well as increased sales for the three months ended December 31, 2005 resulted in an increase in gross profit for the third quarter of fiscal 2006.

Gross profit decreased to $6.8 million for the nine months ended December 31, 2005 from $8.0 million for the nine months ended December 31, 2004. Gross profit margin as a percentage of sales dropped to 13.9% for the nine months ended December 31, 2005 from 15.7% for the nine months ended December 31, 2004. The gross profit for the nine months ended

December 31, 2005 included the successful recycling of approximately $0.9 million of materials, the cost of which had been recognized in a prior period and a favorable write-back of inventory reserve of about $0.6 million as a result of pricing trends of reel and tape. Gross profit for the nine months ended December 31, 2004 included an increase in inventory reserves associated with approximately $1.3 million for certain slow moving or non usable inventories, and a favorable write-back of inventory reserve of about $0.1 million because of pricing trends for reel and tape, disk drive trays and tube. We exited the tube business in March 2005.

An amount of $0.4 million was incurred as severance payments to a group of terminated workers at the Factory for the nine months ended December 31, 2005. The amount of $0.3 million was incurred as severance payments for the nine months ended December 31, 2004. Higher materials usage and labor costs as a result of changes in product mix, cost of raw materials and labor overtime resulted in an adverse impact for the nine months ended December 31, 2005. For the nine months ended December 31, 2005, the gross profit was also adversely impacted by the decrease in sales, the fee for tax advisors of $0.2 million and write-off of leasehold improvement on the expiration of a leased warehouse of $0.1 million.

During the nine months ended December 31, 2005, $2.2 million was accrued for income taxes for certain former employees of Peak, its affiliates or other companies who performed services at the Factory, as described below. $1.3 million was accrued for both taxes and social insurance contributions for workers at the Factory during the nine months ended December 31, 2004.

Our gross profit for the three and nine months ended December 31, 2005 was impact as a result of accruals we took in connection with any investigation in the PRC. In April 2005, the PRC tax authorities began an investigation into the withholding and payment of income taxes by the Factory for certain current and former employees of Peak, its affiliates or other companies who performed services at the Factory but may not have paid income taxes in the PRC and for whom the Factory may not have withheld and paid income taxes. The PRC tax authorities will likely seek to collect unpaid income taxes on salaries and expense allowances of certain current and former employees of Peak, its affiliates or other companies who performed services in the PRC based on the worker s relationship with the Factory and interest and penalties on such amounts. Since some of these claims are based on income earned over several years, the amount of such taxes, accrued interest and penalties could be substantial. We do not believe that we are liable for such claims, but in the event the PRC tax authorities determine payments for back taxes, interest and penalties are owed, the potential consequences include substantial monetary claims against the Factory or the seizure of the Factory and our assets at the Factory and the termination of substantially all of our production operations. In the event the PRC authorities asserted claims for such taxes against the Factory, we may make such payments on a voluntary basis in order to avoid the seizure of the Factory or our assets at the Factory and to keep it operational. We engaged tax advisors to assist us in assessing the Factory s and our obligations with respect to the withholding and payment of income and other taxes by the Factory. In addition to the $2.0 million that was estimated and accrued for during the six months ended September 30 2005, upon completion of this assessment, the tax advisors concluded that the additional amount of unpaid income tax for certain former employees stationed at or employed by the Factory that could be estimated with a reasonable basis was approximately $0.2 million. At this point, we do not believe the Factory has sufficient assets to pay such amounts. As a result, we anticipate we may have to pay such amount and we have accrued $0.2 million as additional manufacturing costs for the quarter ended December 31, 2005. Penalties on the above unpaid income taxes and liability for income and other taxes, interest and penalties for certain other individuals associated with the Factory could not be reasonably estimated. Accordingly, we have not accrued for these in the quarter ended December 31, 2005.

Income (Loss) from Operations. An operating income of $41,000 was recorded in the third quarter of fiscal 2006 compared to operating loss of $4.8 million in the third quarter of fiscal 2005. Operating margin improved from 28.7% of operating loss margin in the third quarter of fiscal 2005 to 0.2% of operating profit margin in the third quarter of fiscal 2006. The improvement of operating margin was due primarily to the improvement in gross margin of $4.6 million. and the decrease in selling and marketing expenses of $0.4 million. .

The loss from operations remained steady at approximately $6.4 million for the nine months ended December 31, 2005 and 2004.

Selling and Marketing. Selling and marketing expenses decreased by 13.3% to $2.6 million in the third quarter of fiscal 2006 from $3.0 million in the third quarter of fiscal 2005, primarily as a result of cost savings from reorganizing the sales and logistics function of approximately $0.3 million During the first two quarters of fiscal 2006, we had a consolidation on certain of our sales and distribution facilities in Singapore, Malaysia and China. This consolidation contributed to the decrease in selling and marketing expenses.

Selling and marketing expenses decreased by 14.1% to $7.9 million for the nine months ended December 31, 2005 from $9.2 million for the nine months ended December 31, 2004, primarily as a result of cost savings from reorganizing the sales and logistics function. During the nine months ended December 31, 2005, we consolidated certain of our sales and distribution facilities in Singapore, Malaysia and China. This consolidation contributed to the decrease in selling and marketing expenses.

General and Administrative. General and administrative expenses increased slightly from $1.7 million in the third quarter of fiscal 2005 to $1.8 million in the third quarter of fiscal 2006. The increase was primarily due to an increase in costs associated with an increase in consultants and related fees.

General and administrative expenses increased slightly from $5.1 million for the nine months ended December 31 2004 to $5.2 million for the nine months ended December 31, 2005 primarily as a result of increased costs associated with additional consultants of the Company.

Other Income net. This primarily represented differences in realized and unrealized exchange gains that we recorded arising from transactions in foreign currencies. During the third quarter of fiscal 2006, a net exchange gain of $107,000 was recorded compared to $212,000 that was recorded in the third quarter of fiscal 2005. The gain in the third quarter of fiscal 2006 was primarily due to favorable movements of New Taiwan Dollars and Singapore Dollars against the US Dollar.

For the nine months ended December 31, 2005, we completed the disposal of one of our subsidiaries to an independent third party. The disposed subsidiary holds title to an incomplete factory in the PRC. The sale was completed on April 13, 2005 providing a net gain on disposal of approximately $2.2 million.

Interest Income. Interest income remained steady at approximately $68,000 for the third quarter of fiscal 2006 and 2005.

Interest income increased by 96.6% to $285,000 for the nine months ended December 31, 2005 from $145,000 for the nine months ended December 31, 2004, primarily due to increase in bank deposit interest rates.

Income Tax (Expense) Benefit. An income tax expense of $4,000 was recorded for the third quarter of fiscal 2006, compared to a benefit of $378,000 recorded in the third quarter of fiscal year 2005. This is primarily due to an income before income taxes of $216,000 for the third quarter of fiscal 2006 and a loss before income taxes of $4,548,000 for the third quarter of fiscal 2005.

A $529,000 tax benefit was recorded for the nine months ended December 31, 2005, compared with a tax benefit of $817,000 which included a net gain of $340,000 recognized as a result of settlement with the IRD for prior years tax disputes for the same period last year.

Net Income (Loss). We had a net income of approximately $212,000 for the third quarter of fiscal 2006, compared to a net loss of $4.2 million for the same quarter of fiscal 2005, reflecting the effects of the previously discussed factors.

We had a net loss of approximately $3.6 million for the nine months ended December 31, 2005, compared to a net loss of $5.3 million for the nine months ended December 31, 2004, as a result of the forgoing factors.

Earning (Loss) Per Share. Diluted earning per share for the third quarter of fiscal 2006 was $0.02, compared to a diluted loss per share of $0.34 for the same period last year, reflecting the effects of the forgoing factors.

Diluted loss per share for the nine months ended December 31, 2005 was $0.29, compared to a diluted loss per share of $0.43 for the same period last year, reflecting the effects of the forgoing factors.

Liquidity and Capital Resources

Our net cash used in operating activities was $2.3 million for the nine months ended December 31, 2005, compared to net cash provided by operating activities of $7.2 million for the nine months ended December 31, 2004. The increase in net cash used in operating activities for the nine months ended December 31, 2005 was primarily due to a deposit of approximately $2.5 million into an escrow to fund certain contingent obligations under existing contracts with senior management and $1.4 million cash used in accounts payable-trade; whereas $3.3 million deposit received in advance for disposal of a subsidiary of the Company for the nine months ended December 31, 2004.

Net cash used in investing activities was $1.1 million for the nine months ended December 31, 2005, compared to net cash used in investing activities of $3.8 million for the nine months ended December 31, 2004. Net cash used in investing activities during the nine months ended December 31, 2005, included $3.3 million used in the acquisition of plant and equipment, offset by net proceeds of $2.3 million on the disposal of a subsidiary in April 2005.

Net cash provided by financing activities of $0.4 million for the nine months ended December 31, 2004 , primarily the result of the issuances of shares of our common stock We did not have any issuances or repurchases of common stock for the nine months ended December 31, 2005.

As of December 31, 2005, we had commitments for capital expenditures of $0.3 million and had no outstanding bank borrowings. Our cash and cash equivalents balance at December 31, 2005 was $18.9 million. We believe that our existing cash and cash equivalents and anticipated cash flow from operations will be sufficient to meet our anticipated cash needs in the ordinary course of business for at least the next 12 months. If our existing cash and cash equivalents and cash generated from operations are insufficient to satisfy our liquidity requirements, we may seek to sell additional public or private equity securities or obtain debt financing. There can be no assurance that additional funding will be available at all, or if available, will be obtainable on terms favorable to us. Additional financing may also be dilutive to our existing shareholders.

Critical Accounting Policies

In preparing our consolidated financial statements in conformity with accounting principles generally accepted in the United States of America, we must make a variety of estimates that affect the reported amounts and related disclosures. The following accounting policies are currently considered most critical to the preparation of our financial statements. If actual results differ significantly from management s estimates and projections, there could be a material effect on our financial statements.

Revenue Recognition. Our revenue is recognized when product has been shipped and title to the product has transferred to the customer. Title to the product may transfer to the end customer or distributor when shipped or when received by the customer based on a specific agreement. We evaluate the provision for estimated returns monthly, based on historical sales and returns. To date we have not experienced significant returns. Any increase in the level of returns could have a material and adverse effect on our financial statements.

Allowance for Doubtful Accounts. Allowance for doubtful accounts is made against accounts receivable to the extent they are considered to be doubtful. Accounts receivable in the balance sheet are stated net of such provision. We evaluate the collectability of our accounts receivable based on a combination of factors. In circumstances where we are aware of a specific customer s inability to meet its financial obligation to us, we record a specific reserve for bad debts against amounts due. A provision is also made based on the aging of the receivables. If circumstances change, such as the incurrence of higher than expected defaults or an unexpected material adverse change occurs regarding a major customer s ability to meet its financial obligations to us, our estimates of the recoverability of amounts due to us could be reduced by a material amount.

Inventory Valuation. We write down our inventory for estimated obsolescence or unmarketable inventory equal to the difference between the cost of inventory and the estimated market value based upon assumptions about future demand and market conditions. At each balance sheet date, inventory on hand in excess of one year s demand or usage or those that were produced more than twelve months ago, are written down to zero. If actual future demand or market conditions are less favorable than those projected by management, additional write-downs may be required.

Valuation of Long-lived Assets. We assess the carrying value of long-lived assets whenever events or changes in circumstances indicate that the carrying value may be impaired. Factors we consider important which could trigger an impairment review include the following:

significant under-performance relative to expected historical or projected future operating results;

significant changes in the manner of our use of the asset;

significant negative industry or economic trends; and

our market capitalization relative to net book value.

Upon the existence of one or more of the above indicators of impairment, we assess the potential impairment of such assets. The carrying value of a long-lived asset is considered impaired when the estimated future cash flows, undiscounted, is less than the asset s carrying value. In that event, a loss is recognized based on the amount by which the carrying value exceeds the fair market value of the long-lived asset. Fair market value is determined primarily using the anticipated cash flows discounted at a rate commensurate with the risk involved.

Asset to be Disposed of By Sale. Asset to be disposed of by sale represents the factory under construction in Shenzhen, the PRC, together with the land use right on which the building is built and is stated at fair value less cost to sell as of the balance sheet date in accordance with SFAS No. 144 Accounting for the Impairment of Disposal of Long-Lived Assets. Fair value was calculated on the basis of a professional valuation report on the property provided by an independent appraiser.

Deferred Taxes. As part of the process of preparing our consolidated financial statements, we are required to estimate our income taxes and tax bases of assets and liabilities in each of the jurisdictions in which we operate. This process involves us estimating our current tax exposure together with assessing temporary differences resulting from differing treatment of items for tax and accounting purposes. These differences result in deferred tax assets and liabilities, which are included in our consolidated balance sheet. We must then assess the likelihood that our deferred tax assets will be recovered from future taxable income, and, to the extent we believe that recovery is more unlikely than likely, we must establish a valuation allowance. To the extent we establish a valuation allowance or increase this allowance in a period, we must include an expense within the tax provision in the statement of operations. Any change in the future recoverability of the deferred tax assets could significantly affect the results of our operations or cash flows.

Property, plant and equipment, net Property, plant and equipment is stated at cost less accumulated depreciation. Gains or losses on disposals are reflected in current operations. Major expenditures for betterments and renewals are capitalized. All ordinary repairs and maintenance costs are expensed as incurred. Depreciation is provided using the straight-line method over the estimated useful lives.

The useful lives of property, plant and equipment adopted for depreciation purposes are as follows:

Buildings	10 years
Plant, machinery and equipment	5-10 years
Molds	3-5 years
Leasehold improvements, furniture, fixtures and motor vehicles	5-10 years

Factors that May Affect Operating Results

The risks and uncertainties described below are not exhaustive. If an adverse outcome of any of the following risks occurs, our business, financial condition or results of operations could be materially and adversely affected. In evaluating our business, shareholders should consider carefully the following factors in addition to the other information presented herein.

Our operating results are difficult to predict and are likely to fluctuate significantly based on several factors, which can cause our stock price to decline.

Our operating results are affected by a wide variety of factors that could materially affect net sales and profitability or lead to significant fluctuations in our quarterly or annual operating results. These factors include, among others:

- the price of raw materials, the majority of which are petroleum derivatives. Prices of these raw materials are significantly affected by oil prices which recently have become volatile;

- factors relating to conditions in the semiconductor, disk drive and electronic industries including:

  - lower demand for products;

increased price competition;

downturns and deterioration of business conditions;

technological changes and the introduction of new products; and

changes in production processes in the semiconductor and electronic industries which could require changes in packaging products;

although we do not believe that it is our liability, the need for us to pay and the amounts that we might pay on a voluntary basis for certain tax, social insurance contributions and potential penalties on behalf of the Factory at which our products are manufactured in order to avoid the seizure of the Factory s assets and keep it operational, as well as claims resulting from employee lawsuits against the Factory;

capital requirements and the availability of funding;

difficulties in recycling trays manufactured using our proprietary plastic compounds;

the lack of long-term purchase or supply agreements with customers;

the loss of key personnel or the shortage of available skilled employees;

international political or economic events or developments, including those relating to Hong Kong and the PRC;

our relationship with our processing partner in the PRC and the ability of the government of the PRC to seize the assets and shut down our factory operated in the PRC;

production volume fluctuations and the management of our inventories;

currency fluctuations and foreign exchange rules and regulations in the PRC;

the recurrence of SARS or other major health issues in Asia;

the outcome of patent litigation in Taiwan; and

the imposition of fines, penalties and bonds arising from violations of rules and regulations in the PRC relating to customs regulations, foreign currency exchange rules, taxation, the withholding of taxes for employees and other laws and regulations.

Unfavorable changes in the above or other factors could substantially harm our results of operations or financial condition. We believe that period to period comparisons of our results of operations will not necessarily be meaningful. You should not rely on these comparisons as an indication of our future performance. If our results of operations in one or more periods fail to meet or exceed the expectations of securities analysts or investors, the trading price of our common stock may decline, possibly by a significant amount.

We depend on the health of the semiconductor, disk drive and electronics industries, which are highly cyclical and the decline in demand for products in these industries could severely affect our net sales and financial results.

Our net sales depend on the demand for our products from manufacturers of semiconductor, disk drive and electronic components. Any deterioration of business conditions in the semiconductor industry, including lower demand for semiconductor products, decreased unit volume of semiconductor products shipped, other factors resulting in decreased demand for packaging products, or increased price competition in the semiconductor industry could result in increased price pressure on suppliers to the semiconductor industry, and could have a material adverse effect on our net sales. The industries we serve are characterized by rapid technological change leading to more complex products, evolving industry standards, intense competition and fluctuations in demand. From time to time, demand for electronic systems, which generally include both semiconductors and electronic components, has suffered significant downturns, which in some cases have been prolonged. For example, during 2002 and 2003, demand for our products decreased as the overall economy and the electronics industry experienced a general downturn in business. These downturns have been characterized by diminished product demand, product over-capacity and accelerated erosion of average selling prices. Any future downturn in the semiconductor or disk drive or electronics industries may substantially harm our results of operations or financial condition.

Our customer base is concentrated and the loss of one or more of our key customers would harm our business.

Our top 10 customers together accounted for 67.8%, 64.4% and 60.0% of our net sales in fiscal 2005, fiscal 2004 and fiscal 2003, respectively. We are dependent upon a single customer, Seagate Technology, for substantially all sales of our disk drive trays, with whom we have no long-term contract. In addition, for the nine months ended December 31, 2005, StatsChippac accounted for 10.3% of our net sales. Like Seagate Technology, we do not have a long-term contract with StatsChippac. Our ability to maintain close, mutually beneficial relationships with our leading customers is important to the ongoing growth and profitability of our business. Although our sales to specific customers have varied from year to year, our results of operations have been dependent on a number of significant customers and the conditions of their respective industries. All of our customers operate in the global semiconductor, disk drive and electronic industries, which historically have been highly cyclical. As a result of the concentration of our customer base, the loss or cancellation of business from, or significant changes in scheduled deliveries or decreases in the prices of products or services provided to, any of these customers could materially and adversely affect our results of operations and financial condition. Our sales are made pursuant to purchase orders, and therefore, we generally have no agreements with or commitments from our customers for the purchase of products. Although customers typically provide us with forecasts of their requirements, these forecasts are not binding. Our customers may not maintain or increase their sales volumes or orders for our products and we may be unable to maintain or add to our existing customer base.

Our operations are concentrated in the People s Republic of China and we are subject to the risks associated with international operations, which may negatively affect our business.

As of December 31, 2005, substantially all of our fixed assets and inventories were located in Shenzhen, the PRC. Our main production facilities are located in Shenzhen, the PRC and are operated pursuant to a processing agreement with an unaffiliated PRC company (the Factory) that obligates it to provide all of the personnel for the operation of our facilities and to render assistance in dealing with matters relating to the import of raw materials and the export of our products. We are dependent on continued good relations with our processing partner in order to supervise the operation of the Factory and its employees. The Factory is located on land leased from the PRC government by one of our wholly-owned subsidiaries under land use certificates and agreements with a remaining term of approximately 37 years. Our assets and facilities located in the PRC and the PRC company s operation of the Factory are subject to the laws and regulations of the PRC and our results of operations in the PRC are subject to the economic and political situation in the PRC. In January 2005, we entered into negotiations with our processing partner to revise and update our agreement regarding the operation of the Factory. While these negotiations have been suspended, we expect to be able to renegotiate some of the terms and conditions of the processing agreement. There are no assurances that we will be able to do so, which could lead to increased costs and harm our business. In addition, during the third fiscal quarter of 2005, we discovered discrepancies, which were at our main production facilities in Shenzhen and not at Peak, in the computation and withholding of both taxes and social insurance contributions for workers at the Factory. Upon discovery of these discrepancies, we conducted an internal review of the Factory s practices and we concluded that the Factory had a duty to correct certain of these discrepancies. We may in the future need to make additional payments on a voluntary basis in order to avoid the seizure of the Factory or our assets at the Factory and to keep it operational. Voluntary payments by us on behalf of the Factory to the PRC tax authorities could diminish a significant portion of our current cash reserves and materially harm our operating results and business.

The operations of our production facilities in Shenzhen, the PRC may be harmed by changes in the laws and regulations of the PRC or the interpretation thereof, such as those relating to taxation, import and export tariffs, environmental regulations, land use rights, property, foreign currency exchange regulations and other matters. Prior to September 2002, we exported all the products manufactured at our production facilities in Shenzhen, the PRC. Accordingly, we were not subject to certain PRC taxes and are exempt from customs duties on imported raw materials and exported products. During the fourth quarter of fiscal 2003, we finished the procedure of setting up a wholly owned subsidiary in the PRC and hence a small portion of our products was sold locally in the PRC. This PRC subsidiary is subject to PRC taxes and customs duties on materials imported for such PRC sales. This PRC subsidiary has ceased manufacturing operations.

According to customs rules in the PRC, we may be subject to classification by the Chinese customs authorities in a manner that would require us to supply a substantial bond against customs duties that we would have to pay if we were importing material for ultimate sale in the PRC. We may also be subject to significantly higher administrative importation costs generally. These measures could harm our ability to manufacture products at a competitive price and our results of operations could suffer. In addition, if we are required to post a bond in connection with our exemption status from PRC duties on imported raw materials for export sales and exported products, we will experience a substantial drain of our liquid resources. We may not be able to provide the required bond at a commercially feasible cost, or at all.

We may become subject to PRC taxes and may be required to pay customs duties in the future even under the contract processing agreement. If we are required to pay PRC taxes or customs duties, our results of operations could suffer. We believe that our operations in Shenzhen, the PRC are now in compliance with the applicable PRC legal and regulatory requirements for custom duties. However, the central or local governments of the PRC may impose new regulations or interpretations of existing laws, rules and regulations, which could require additional expenditures or preclude the production of products in the PRC by Peak or our processing partner.

The economy of the PRC differs from the economies of many countries in many respects such as structure, government involvement, level of development, growth rate, capital reinvestment, allocation of resources, self-sufficiency, rate of inflation and balance of payments position, among others. In the past, the economy of the PRC has been primarily a planned economy subject to state plans. Since the entry of the PRC into the World Trade Organization in 2002, the PRC government has been reforming its economic and political systems. These reforms have resulted in significant economic growth and social change. We cannot assure, however, that the PRC government s policies for economic reforms will be consistent or effective. Our results of operations and financial position may be harmed by changes in the PRC s political, economic or social conditions.

We, and the Factory at which our products are manufactured, have in the past and may in the future be the subject of investigations by PRC government authorities, which can divert management s attention, lead to fines and penalties, increase our costs and harm our operating results.

We and the Factory have in the past and may in the future be the subject of investigations by PRC government authorities. Such investigations are expensive and time-consuming and could divert management s attention away from running our business. In addition, as a result of such investigations we or the Factory may subject to taxes, fines or penalties, which would increase our costs and harm our operating results. In the event the Factory is unable to pay any fines or penalties assessed against it by PRC authorities, we may voluntarily pay such amounts to avoid the seizure of our assets and the closure of the Factory. For example, in April 2005, the PRC tax authorities began an investigation of the Factory and into the withholding and payment of income taxes by the Factory in Shenzhen for certain current and former employees of Peak, its affiliates or other companies who performed services at the Factory but may not have paid income taxes in the PRC and for whom the Factory may not have withheld and paid income taxes. The PRC tax authorities will likely seek to collect unpaid income taxes on salaries and expense allowances of certain current and former employees of Peak, its affiliates or other companies who performed services in the PRC based on the worker s relationship with the Factory and interest and penalties on such amounts. Since some of these claims are based on income earned over several years, the amount of such taxes, accrued interest and penalties could be substantial. In the event the PRC tax authorities determine payments for back taxes, interest and penalties are owed, the potential consequences include substantial monetary claims against the Factory or the seizure of the Factory and our assets at the Factory and the termination of substantially all of our production operations. In the event the PRC authorities asserted claims for such taxes against the Factory, we may make such payments on a voluntary basis in order to avoid the seizure of the Factory or our assets at the Factory and to keep it operational. . For example, for the nine months ended December 31, 2005, we have estimated and accrued $2.2 million for unpaid income taxed for certain former employees stationed at or employed by the Factory as a result of our belief that the Factory does not have sufficient assets to pay such amounts. Voluntary payments by us on behalf of the Factory to the PRC tax authorities could diminish a significant portion of our current cash reserves and materially harm our operating results and business. In addition, the Factory and the Company may in the future be subject to further investigations by the PRC authorities, including tax authorities, for similar or other claims, including claims for other unpaid taxes, which we may be required to pay in order to avoid seizure of the Shenzhen Factory or some or all of its or our assets.

We have in the past and may in the future, be party to legal proceedings that could have a negative financial impact on us.

We have in the past been involved in litigation relating to securities and employment law, and are currently involved in litigation in Taiwan related to intellectual property, tax and labor disputes in the PRC. While these lawsuits and disputes vary greatly in the materiality of potential liability associated with them, the uncertainty associated with substantial unresolved litigation could seriously harm our business, financial condition and reputation, whether material individually or in the aggregate. In particular, this uncertainty could harm our relationships with existing customers, our ability to obtain new customers and our ability to operate our business.

Litigation and the resolution of disputes also could result in the diversion of our management s time and attention away from business operations, which could harm our business. Negative developments with respect to the litigation could cause the price of our common stock to decline significantly. In addition, we are unable to determine the amount, if any, that we may be required to pay if litigation is not resolved in a favorable manner. For more information about the litigation, please see Part II, Item 1 entitled Legal Proceedings .

A significant portion of our business is conducted in the Asia Pacific region. This concentration could expose us to risks inherent to doing business in the Asia Pacific region that could harm our business.

A significant portion of our net sales are derived from sales to customers in Hong Kong, Singapore, Taiwan, the Philippines and other countries in East and Southeast Asia, or the Asia Pacific region. Accordingly, our financial condition and results of operations and the market price of shares of our common stock may be affected by:

- economic and political instability;
- changes in regulatory requirements, tariffs, customs, duties and other trade barriers;
- transportation delays;

fluctuations in currency exchange rates;

currency convertibility and repatriation;

taxation of our earnings and the earnings of our personnel;

the recurrence of SARS and other major health issues;

amounts we may have to pay in the PRC on behalf of the Factory in Shenzhen for past personal income taxes, interest and penalties that may be imposed by PRC tax authorities on the income of foreign workers who performed services in the Shenzhen Factory;

amounts we may have to pay on behalf of the factory in the PRC as a result of employees litigation against the Factory in Shenzhen; and

other risks relating to changes, administration or new interpretations of laws, regulations and policies in the jurisdictions in which we conduct our business.

None of these factors are within our control. In fiscal 1999, many countries in the Asia Pacific region experienced considerable currency volatility and depreciation, high interest rates, stock market volatility and declining asset values which contributed to net foreign capital outflows, an increase in the number of insolvencies, a decline in business and consumer spending and a decrease in economic growth as compared with prior years.

Consumer demand for products that use semiconductors, disk drives and electronic components generally rises as the overall level of economic activity increases and falls as such activity decreases. In addition, currency devaluations in the Asia Pacific region could result in accelerated price erosion of semiconductor and electronic products as products manufactured in countries whose currencies have devalued significantly against the US dollar become less expensive in US dollar terms. Any adverse effect on the global semiconductor, disk drive and electronic industries as a result of lower demand for products in the Asia Pacific region or accelerated product price erosion arising from currency devaluations in the Asia Pacific region could harm our financial condition or results of operations.

We are incorporated under the laws of Bermuda and there may be potential difficulties in protecting our shareholders rights.

We are incorporated under the laws of Bermuda and our corporate affairs are governed by our Memorandum of Association and Bye-laws and by the laws governing corporations incorporated in Bermuda.

The rights of our shareholders and the responsibilities of members of our Board of Directors under Bermuda law are different from those applicable to a corporation incorporated in the United States and, therefore, our shareholders may have more difficulty protecting their interests in connection with actions by our management, members of our Board of Directors or our principal shareholder than they would as shareholders of a corporation incorporated in the United States.

Our stock price has been and will likely continue to be volatile. A decline in our stock price could result in securities class action litigation against us, which could divert management s attention and harm our business.

Our stock price has been and is likely to continue to be highly volatile. Between October 1, 2005 and December 31, 2005, our stock price has traded as high as $3.11 on October 6, 2005, and as low as $2.45 on December 12, , 2005. Our stock price could fluctuate significantly due to a number of factors, including:

- variations in our actual or anticipated operating results;
- sales of substantial amounts of our stock;
- announcements about us or about our competitors, including technological innovation or new products or services;
- litigation and other developments relating to patents or other proprietary rights or those of our competitors;
- conditions in the semiconductor, disk drive and electronics industries;

governmental regulation and legislation;

international political or economic events or developments, including those relating to Hong Kong and the PRC;

the recurrence of SARS and other major health issues;

the outcome of current investigations by PRC authorities, amounts we may have to pay in the PRC for past personal income taxes, interest and penalties that may be imposed by PRC tax authorities on the income of foreign workers who performed services in the Shenzhen Factory and the outcome of any future investigation by PRC authorities;

amounts we may have to pay on behalf of the factory in the PRC as a result of employees litigation against the Factory; and

changes in securities analysts estimates of our performance, or our failure to meet analysts expectations.

Many of these factors are beyond our control. In addition, the stock markets in general, and the NASDAQ National Market in particular, have experienced extreme price and volume fluctuations recently. These fluctuations often have been unrelated or disproportionate to the operating performance of these companies. These broad market and industry factors may decrease the market price of our common stock, regardless of our actual operating performance. In the past, companies that have experienced volatility in the market prices of their stock have been the object of securities class action litigation. If we were the object of other securities class action litigation, it could result in substantial costs and a diversion of management s attention and resources, which could harm our business.

If we fail to maintain an effective system of internal controls, we may not be able to accurately or timely report our financial results or prevent fraud. As a result, current and potential shareholders could lose confidence in our financial reporting, which would harm our business and the trading price of our stock.

Effective internal controls are necessary for us to provide reliable financial reports and effectively prevent fraud. If we cannot provide reliable financial reports or prevent fraud, our operating results could be harmed. We have in the past discovered, and may in the future discover, areas of our internal controls that need improvement and we have devoted, and will in the future devote, resources to remediate and improve our internal controls. Although we believe that these efforts have strengthened our internal controls, we are continuing to work to improve our internal controls. We cannot be certain that these measures will ensure that we implement and maintain adequate controls over our financial processes and reporting in the future. Any failure to implement required new or improved controls, or difficulties encountered in their implementation, could harm our operating results or cause us to fail to meet our reporting obligations. Inferior internal controls could also cause investors to lose confidence in our reported financial information, which could have a negative effect on the trading price of our common stock.

Changes to financial accounting standards may affect our results of operations and cause us to change our business practices.

We prepare our financial statements to conform with generally accepted accounting principles, or GAAP, in the United States. These accounting principles are subject to interpretation by the American Institute of Certified Public Accountants, the Securities and Exchange Commission and various bodies formed to interpret and create appropriate accounting policies. A change in those policies can have a significant effect on our reported results and may affect our reporting of transactions completed before a change is announced. Changes to those rules or the questioning of current practices may adversely affect our reported financial results or the way we conduct our business. For example, accounting policies affecting many aspects of our business, including rules relating to employee stock option grants, have recently been revised or are under review. The Financial Accounting Standards Board and other agencies have finalized changes to U.S. generally accepted accounting principles that will require us, starting in our fiscal year 2007, to record a charge to earnings for employee stock option grants and other equity incentives. We may have significant and ongoing accounting charges resulting from option grant and other equity incentive expensing that could reduce our overall net income. In addition, since we historically have used equity-related compensation as a component of our total employee compensation program, the accounting change could make the use of equity-related compensation less attractive to us and therefore make it more difficult to attract and retain employees.

Item 3. ***Quantitative and Qualitative Disclosures about Market Risk***

Currency Exchange Rate Fluctuations

Our sales are primarily denominated in US Dollars while our cost of goods sold are generally incurred in US Dollars, Hong Kong Dollars and Renminbi, and our operating expenses are generally denominated in Renminbi, Hong Kong Dollars, Singapore dollars, New Taiwanese dollars and US Dollars. In addition, a substantial portion of our capital expenditures, primarily for the purchase of equipment, has been and is expected to continue to be denominated in US Dollars, Renminbi, Japanese Yen and the Euro. Consequently, a portion of our costs and operating margins may be affected by fluctuations in exchange rates, primarily between the US Dollar and other currencies. Our results of operations and financial condition could be adversely affected by fluctuations in currency exchange rates or the imposition of new or additional currency controls in the jurisdictions in which we operate. At December 31, 2005 and 2004, we had no outstanding foreign currency exchange contracts.

Many of our competitors are located in countries whose currencies devalued significantly against the US dollar beginning in the second half of 1997. As a result of such devaluation, these competitors products have become less expensive in US dollar terms. This reduction could result in our customers purchasing products from these competitors rather than from us, which would have a material and adverse effect on our net sales and results of operations.

As the Hong Kong dollar is officially pegged to the US dollar and the Renminbi is controlled by the PRC government such that it only trades within a limited range against the US dollar, unless there are significant changes in the policies of the Hong Kong and the PRC government, fluctuations in the exchange rates of the Hong Kong dollar and the Renminbi are not expected to have a significant impact on our results of operations. However, should the PRC government allow the Renminbi to have a wider trading range, resulting in a significant appreciation of the Renminbi against the US dollar, our production costs will increase and our operating margins will erode.

Item 4. ***Controls and Procedures***

(a) ***Evaluation of disclosure controls and procedures. .*** We maintain disclosure controls and procedures, as such term is defined in Rule 13a-15(e) under the Securities Exchange Act of 1934 (the Exchange Act), that are designed to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating our disclosure controls and procedures, management recognized that disclosure controls and procedures, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the disclosure controls and procedures are met. Our disclosure controls and procedures have been designed to meet reasonable assurance standards. Additionally, in designing disclosure controls and procedures, our management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible disclosure controls and procedures. The design of any disclosure controls and procedures also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions.

Based on their evaluation as of the end of the period covered by this Quarterly Report on Form 10-Q, our Chief Executive Officer and Chief Financial Officer have concluded that, as of such date, our disclosure controls and procedures were effective at the reasonable assurance level.

(b) ***Changes in internal control over financial reporting***. There was no significant change in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) identified in connection with management s evaluation during the last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II

OTHER INFORMATION

Item 1. ***Legal Proceedings***

R.H. Murphy Co., Inc. (Murphy) is the owner of U.S. Reexamined Patent 5,400,904 C1 and certain corresponding foreign patents, which patents are directed to specific features in trays used to carry integrated circuits. Murphy previously notified the Company and certain of its customers that it believed these patents were infringed by certain integrated circuit trays that the Company provided to its customers, and indicated that licenses to these patents were available. On January 17, 2006, a decision was reached in R.H. Murphy vs Illinois Tool Works in the United States District Court for the District of Massachusetts finding Murphy s patent invalid. While it is possible that R.H. Murphy may appeal this decision, or may proceed against the Company in Taiwan or other jurisdictions, the Company does not expect R.H. Murphy to assert any claim against Peak for infringement of this patent.

Item 2. ***Unregistered Sales of Equity Securities and Use of Proceeds***

Not applicable.

Item 3. ***Defaults Upon Senior Securities***

Not applicable.

Item 4. ***Submission of Matters to a Vote of Security Holders***

The Company s Annual General Meeting of Shareholders was held on October 11, 2005.

The following actions were taken at the annual general meeting:

1. The proposal to authorize the Board of Directors to fix the remuneration of the directors of the Company was approved.

For	Against	Abstain

11,321,849	110,517	3,700

2. The appointment of BDO McCabe Lo & Company as the Company s independent auditors for the fiscal year ending March 31, 2006 was approved.

For	Against	Abstain
11,405,066	26,500	4,500

3. The proposal to authorize the Board of Directors to fix the remuneration of the independent auditors for the fiscal year ending March 31, 2006 was approved.

For	Against	Abstain
11,386,494	45,072	4,500

Item 5. ***Other Information***

Not applicable.

Item 6. ***Exhibits***

3.1(a)	Memorandum of Association and Bye-Laws of the Registrant (incorporated by reference to Exhibit 3.1 to the Company s Registration Statement on Form F-1, Registration No. 333-6652, filed on March 19, 1997 and declared effective by the Commission on June 20, 1997 (the Company s Initial Public Offering Registration Statement on Form F-1))
