NetLogic Microsystems, Inc.

Notes to Condensed Consolidated Financial Statements

(Unaudited)

1. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements of NetLogic Microsystems, Inc. (we , us , our and the Company) have been prepared in accordance with accounting principles generally accepted in the United States of America and with the instructions for Form 10-Q and Regulation S-X statements. Accordingly, they do not include all of the information and notes required for complete financial statements. In the opinion of management, all adjustments, consisting of only normal recurring items, considered necessary for a fair statement of the results of operations for the periods shown.

These unaudited financial statements should be read in conjunction with the audited financial statements and accompanying notes included in our Annual Report on Form 10-K for the year ended December 31, 2005. Operating results for the three and six-month period ended June 30, 2006 are not necessarily indicative of the results that may be expected for the year ending December 31, 2006.

Stock-Based Compensation Expense

On January 1, 2006, the Company adopted Statement of Financial Accounting Standards No. 123 (revised 2004), Share-Based Payment, (SFAS 123(R)) which requires the measurement and recognition of compensation expense for all share-based payment awards, including employee stock options and employee stock purchases, based on estimated fair values. SFAS 123(R) supersedes the Company's previous accounting under Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees (APB 25) for periods beginning in fiscal 2006. In March 2005, the Securities and Exchange Commission issued Staff Accounting Bulletin No. 107 (SAB 107) relating to SFAS 123(R). The Company has applied the provisions of SAB 107 in its adoption of SFAS 123(R). The Company adopted SFAS 123(R) using the modified prospective transition method, which requires the application of the accounting standard as of January 1, 2006, the first day of the Company's fiscal year 2006. The Company's Condensed Consolidated Financial Statements as of and for the three and six months ended June 30, 2006 reflect the adoption of SFAS 123(R).

Stock-based compensation expense recognized under SFAS 123(R) for the three and six months ended June 30, 2006 was \$3.1 million and \$5.6 million, respectively, related to employee stock options and employee stock purchase rights. Under the modified prospective transition method, the Company's Consolidated Financial Statements for prior periods need not be restated to reflect or include the effect of SFAS 123(R). Accordingly, there was no stock-based compensation expense related to employee stock options and employee stock purchase rights recognized in prior periods presented, other than stock-based compensation expense recognized and disclosed previously.

SFAS 123(R) requires companies to estimate the fair value of option and ESPP awards on the date of grant using an option-pricing model. The value of the portion of the award that is ultimately expected to vest is recognized as expense over the requisite service periods in the Company's Consolidated Statement of Operations. Prior to the adoption of SFAS 123(R), the Company accounted for stock-based awards using the intrinsic value method in accordance with APB 25 as allowed under Statement of Financial Accounting Standards No. 123, Accounting for Stock-Based Compensation (SFAS 123). Under the intrinsic value method, no stock-based compensation expense for options had been recognized in the Company's Consolidated Statement of Operations if the exercise price of the Company's stock options granted to employees and directors equaled the fair market value of the underlying stock at the date of grant.

Stock-based compensation expense recognized during the period is based on the value of the portion of share-based payment awards that is ultimately expected to vest. Stock-based compensation expense recognized in the Company's Unaudited Condensed Consolidated Statement of Operations for the three and six months ended June 30, 2006 included compensation expense for share-based payment awards granted prior to, but not yet vested as of December 31, 2005 based on the grant date fair value estimated in accordance with the pro forma provisions of SFAS 123 and compensation expense for the share-based payment awards granted subsequent to December 31, 2005 based on the grant date fair value estimated in accordance with the provisions of SFAS 123(R). The Company attributes the value of stock-based compensation to expense on a straight-line single option method for the awards granted subsequent to December 31, 2005, while the accelerated method is being used for awards granted on or prior to December 31, 2005. As stock-based compensation expense recognized in the Unaudited Condensed Consolidated Statement of Operations for the three and six months ended June 30, 2006 is based on awards ultimately expected to vest, it has been reduced for estimated

Table of Contents

forfeitures. SFAS 123(R) requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. In the Company's pro forma information required under SFAS 123 for the periods prior to fiscal 2006, the Company accounted for forfeitures as they occurred.

The Company uses the Black-Scholes-Merton option-pricing model (Black-Scholes model) as its method of valuation for share-based awards granted beginning in fiscal 2006, the same model used for the Company's pro forma information required under SFAS 123. The Company's determination of fair value of share-based payment awards on the date of grant using an option-pricing model is affected by the Company's stock price as well as assumptions regarding a number of subjective variables. These variables include, but are not limited to, the Company's expected stock price volatility over the term of the awards as well as actual and projected employee stock option exercise behaviors.

Critical Accounting Policies and Estimates

The preparation of our unaudited condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We base these estimates and assumptions on historical experience and evaluate them on an on-going basis to ensure they remain reasonable under current conditions. Actual results could differ from these estimates. There were no changes to our critical accounting policies and estimates except as noted below.

Stock-based Compensation: We estimate the fair value of stock options using the Black-Scholes-Merton valuation model (the Black-Scholes model), consistent with the provisions of SFAS 123(R), SAB 107 and our prior period pro forma disclosures of net income, including stock-based compensation (determined under a fair value method as prescribed by SFAS 123). Option-pricing model requires the input of highly subjective assumptions, including the option's expected life and the price volatility of the underlying stock. The expected stock price volatility assumption was determined using the historical volatility of the Company's common stock. Changes in the subjective assumptions required in the valuation models may significantly affect the estimated value of the awards, the related stock-based compensation expense and, consequently, our results of operations.

Revenue Recognition: We derive revenue mainly from product sales and, to a lesser extent, from engineering services. Revenue from product sales is recognized upon shipment (except for shipments to a distributor) when persuasive evidence of an arrangement exists, legal title and risk of ownership has transferred, the price is fixed or determinable, and collection of the resulting receivables is reasonably assured. Our sales agreements do not provide for any customer acceptance provisions or return rights. We have no obligation to provide any modification or customization, upgrades, enhancements, post-contract customer support, additional products or enhancements. Customers, other than the distributor discussed below, have no rights of return unless the product does not perform according to specifications. Provisions for warranty expenses are recorded when revenue is recognized.

From time to time we perform engineering services for third parties. Engineering service revenue is recognized as services are performed, agreed-upon milestones are achieved and customer acceptance, if required, is received from the customer.

As a consequence of the acquisition of NSE business assets from Cypress, we began selling our products to a distributor in February 2006. We offer price protection and limited stock rotation rights to the distributor. Given the uncertainties associated with the levels of returns and price protection and other credits potentially issuable to the distributor, revenues and costs relating to the distributor sales are deferred, on a gross basis, until such rights lapse, which is generally upon receiving notification from the distributor that it has resold the products to our end customer.

2. Basic and Diluted Net Income (Loss) Per Share

We compute net income (loss) per share in accordance with SFAS 128, Earnings per Share. Basic net income (loss) per share is computed by dividing net income attributable to common stockholders (numerator) by the weighted average number of common shares outstanding (denominator) during the period. Diluted net income per share gives effect to all dilutive potential common shares outstanding during the period including stock options and warrants using the treasury stock method.

Table of Contents

The following is a reconciliation of the weighted average common shares used to calculate basic net income (loss) per share to the weighted average common and potential common shares used to calculate diluted net income (loss) per share for the three and six months ended June 30, 2006 and 2005 (in thousands, except per share data):

	Three months ended		Six months ended	
	June 30, 2006	June 30, 2005	June 30, 2006	June 30, 2005
Numerator:				
Net income (loss)	\$ 2,938	\$ 2,425	\$ (4,386)	\$ 7,848
Denominator:				
Common shares outstanding	19,990	17,780	19,460	17,724
Less: shares subject to repurchase	(67)	(161)	(67)	(160)
Shares used in calculation - basic	19,923	17,619	19,393	17,564
Stock options and warrants	1,518	993		937
Shares subject to repurchase	67	161		160
Shares used in calculation - diluted	21,508	18,773	19,393	18,661
Net income (loss) per share:				
Basic	\$ 0.15	\$ 0.14	\$ (0.23)	\$ 0.45
Diluted	\$ 0.14	\$ 0.13	\$ (0.23)	\$ 0.42

For the three and six months ended June 30, 2006 and 2005, employee stock options to purchase the following number of common shares were excluded from the computation of diluted net income (loss) per share as their effect would be anti-dilutive (in thousands):

	Three months ended		Six months ended	
	June 30, 2006	June 30, 2005	June 30, 2006	June 30, 2005
	634	11	3,394	29

3. Business Combination

On February 15, 2006, we completed the acquisition of net assets of the Network Search Engine business of Cypress Semiconductor Corp. (Cypress) including the Ayama 10000, Ayama 20000, and NSE70000 Network Search Engine families as well as the Sahasra 50000 Algorithmic Search Engine family (the Business). The Sahasra algorithmic technology complements our Layer 7 processing initiative and is a beneficial building block in driving towards low-cost Layer 7 applications acceleration and security processing solutions. In addition, the NSE70000, Ayama 10000 and Ayama 20000 expanded our product offerings in the high-volume, entry-level Layer 3 switch market. These factors contributed to a purchase price in excess of the fair value of net tangible assets acquired from Cypress and as a result, we have recorded goodwill in connection with this transaction. The results of operations relating to the Business have been included in our results of operations from the acquisition date.

Under terms of the agreement, we paid \$1,000 in cash and issued 1,488,063 shares of our common stock valued at \$49.7 million on February 15, 2006. In addition, we agreed to pay Cypress up to an additional \$10.0 million in cash and up to an additional \$10.0 million in shares of our common stock if certain revenue milestones associated with the Business are achieved in the twelve-month period after the close of the transaction.

Edgar Filing: NETLOGIC MICROSYSTEMS INC - Form 10-Q

On April 11, 2006, we issued an additional 165,344 shares of our common stock to Cypress upon Cypress furnishing to us the audited financial statements related to the NSE Assets. The value of the additional shares of \$6.5 million was considered additional purchase price and recorded as an increase to goodwill during the three months ended June 30, 2006.

The acquisition was accounted for as a purchase business combination. The purchase price of the Business, including the additional 165,344 shares issued on April 11, 2006, was approximately \$57.0 million, which has been determined as follows (in 000 s):

Cash	\$ 1
Value of NetLogic common stock issued	56,201
Estimated direct transaction costs	753
Total estimated purchase price	\$ 56,955

Table of Contents

The value of the 1,488,063 shares of our common stock issued on February 15, 2006 was determined based on the average price of our common stock over a five-day period including the two days before and after January 25, 2006 (the date the definitive agreement was signed and announced), or \$33.43 per share. The value of the additional 165,344 shares of our common stock issued on April 11, 2006 upon Cypress furnishing to us the audited financial statements related to the NSE Assets was determined based on the closing price of our common stock on that date, or \$39.03 per share.

Under the purchase method of accounting, the total estimated purchase price is allocated to the Business net tangible and intangible assets based on their estimated fair values as of the date of the completion of the acquisition. Based on management estimates of the fair values, the estimated purchase price was allocated as follows (in thousands):

Tangible assets	\$ 1,576
Amortizable intangible assets:	
Developed technology	6,500
Backlog	836
In-process research and development	10,700
Goodwill	37,343
Total estimated purchase price allocation	\$ 56,955

Developed technology comprises products which have reached technological feasibility and includes the Ayama10000, Ayama 20000, and NSE70000 Network Search Engine product families. The value assigned to developed technology was based upon future discounted cash flows related to the existing products projected income streams using a discount rate of 20%. The Company believes the discount rate was appropriate given the business risks inherent in marketing and selling these products. Factors considered in estimating the discounted cash flows to be derived from the existing technology include risks related to the characteristics and applications of the technology, existing and future markets and an assessment of the age of the technology within its life span. The company expects to amortize the existing technology intangible asset on a straight-line basis over an estimated life of five years.

The backlog intangible asset represents the value of the sales and marketing costs required to establish the order backlog and was valued using the cost savings approach. We expect these orders to be delivered and billed within six months from the acquisition date, which is the period over which the asset is amortized.

Of the total estimated purchase price, an estimate of \$10.7 million has been allocated to in-process research and development (IPRD) based upon management s estimate of the fair values of assets acquired and was charged to expense in the six months ended June 30, 2006. We acquired only one IPRD project, which is related to the Sahasra algorithmic technology that has not reached technological feasibility and has no alternative use. The Sahasra algorithmic technology complements our Layer 7 processing initiative and is a beneficial building block in driving towards low-cost Layer 7 applications acceleration and security processing solutions.

The fair value assigned to IPRD was determined using the income approach, under which we considered the importance of products under development to our overall development plans, estimated the costs to develop the purchased IPRD into commercially viable products, estimated the resulting net cash flows from the products when completed and discounted the net cash flows to their present values. We used a discount rate of 23% in the present value calculations, which we derived from a weighted-average cost of capital analysis, adjusted to reflect additional risks related to the products development and success as well as the products stage of completion. The estimates used in valuing IPRD were based upon assumptions believed to be reasonable but which are inherently uncertain and unpredictable. Those assumptions may be incomplete or inaccurate, and unanticipated events and circumstances may occur. Accordingly, actual results may vary from the projected results.

To date, there have been no significant differences between the actual and estimated results of the IPRD project. As of June 30, 2006, we have incurred total post-acquisition costs of approximately \$0.4 million related to the IPRD project and estimate that an additional investment of approximately \$2.7 million will be required to complete the project. We expect to complete the project by June 2007 and to benefit from the IPRD project beginning in fiscal 2008, which is consistent with our original estimate.

Table of Contents

Of the total estimated purchase price, approximately \$37.3 million has been allocated to goodwill. Goodwill represents the excess of the purchase price of an acquired business over the fair value of the underlying net tangible and intangible assets and is deductible for tax purposes. In accordance with the Statement of Financial Accounting Standards No. 142, Goodwill and Other Intangible Assets, goodwill will not be amortized but instead will be tested for impairment at least annually (more frequently if certain indicators are present). In the event that management determines that the value of goodwill has become impaired, we will incur an accounting charge for the amount of impairment during the fiscal quarter in which the determination is made.

Unaudited pro forma results of operations

Summarized below are the unaudited pro forma results of the Company as though the acquisition described above occurred at the beginning of the periods indicated. Adjustments have been made for the estimated amortization of intangibles and other appropriate pro forma adjustments. The charges for purchased in-process research and development are not included in the pro forma results, because they are non-recurring. The information presented does not purport to be indicative of the results that would have been achieved had the acquisition been made as of those dates nor of the results which may occur in the future.

(in thousands, except per share amounts)	Three months ended June 30, 2005	Six months ended June 30, 2005	Six months ended June 30, 2006
Revenue	\$ 21,184	\$ 44,572	\$ 49,965
Net income (loss)	\$ (2,967)	\$ (2,481)	\$ 4,864
Net income (loss) per share - basic	\$ (0.16)	\$ (0.13)	\$ 0.25
Net income (loss) per share - diluted	\$ (0.16)	\$ (0.13)	\$ 0.23

4. Goodwill and Other Intangible Assets

The following table summarizes the components of goodwill, other intangible assets and related accumulated amortization balances, which were recorded as a result of business combination described in Note 3 (in thousands):

	Gross Carrying Amount	June 30, 2006 Accumulated Amortization	Net Carrying Amount
Goodwill	\$ 37,343	\$	\$ 37,343
Other intangible assets:			
Developed technology	6,500	(488)	6,012
Backlog	836	(627)	209
Total	\$ 7,336	\$ (1,115)	\$ 6,221

Backlog, with an estimated useful life of six months, is classified within prepaid expenses and other current assets on the accompanying condensed consolidated balance sheet as of June 30, 2006. For the three and six months ended June 30, 2006, amortization expense related to other intangible assets was \$0.7 million and \$1.1 million, respectively, all of which was included in cost of sales as they related to the products sold during such periods. As of June 30, 2006, the estimated future amortization expense of other intangible assets in the table above is as follows (in thousands):

Fiscal Year	Estimated Amortization
Remainder of 2006	\$ 859
2007	1,300
2008	1,300
2009	1,300
2010 and thereafter	1,462

Total

\$ 6,221

Table of Contents

In accordance with SFAS 142, the Company evaluates goodwill for impairment at least on an annual basis or whenever events and changes in circumstances suggest that the carrying amount may not be recoverable from its estimated future cash flow. No assurances can be given that future evaluations of goodwill will not result in charges as a result of future impairment.

5. Cash and Cash Equivalents

We consider all highly liquid investments purchased with a remaining maturity of three months or less at the date of purchase to be cash equivalents. At June 30, 2006 and December 31, 2005, our cash and cash equivalents of \$76.0 million and \$65.8 million, respectively, consisted of cash, cash equivalents and money market funds.

6. Balance Sheet Components

The components of our inventory at June 30, 2006 and December 31, 2005 were as follows (in thousands):

	June 30, 2006	December 31, 2005
Inventories:		
Finished goods	\$ 1,783	\$ 2,108
Work-in-progress	9,361	6,714
	\$ 11,144	\$ 8,822

The components of our accrued liabilities at June 30, 2006 and December 31, 2005 were as follows (in thousands):

	June 30, 2006	December 31, 2005
Accrued liabilities:		
Accrued payroll and related expenses	\$ 2,687	\$ 2,489
Accrued inventory purchases	1,399	692
Accrued warranty	1,501	531
Accrued professional services	796	991
Accrued adverse purchase commitments	138	931
Other accrued expenses	1,884	1,800
	\$ 8,405	\$ 7,434

7. Product Warranties

We provide a limited product warranty of one year from the date of sale. We provide for the estimated future costs of repair or replacement upon shipment of the product. Our warranty accrual is estimated based on actual and historical claims compared to historical revenue and assumes that we have to replace products subject to a claim. The following table summarizes activity related to product warranty liability during the three and six months ended June 30, 2006 and 2005 (in thousands):

	Three months ended		Six months ended	
	June 30, 2006	June 30, 2005	June 30, 2006	June 30, 2005
Warranty accrual:				
Beginning balance	\$ 1,265	\$ 545	\$ 531	\$ 381

Edgar Filing: NETLOGIC MICROSYSTEMS INC - Form 10-Q

Provision for warranty	256	271	1,028	984
Settlements made during the period	(20)	(226)	(58)	(775)
Ending balance	\$ 1,501	\$ 590	\$ 1,501	\$ 590

During the three and six months ended June 30, 2006, we provided an additional warranty reserve of \$0.2 million and \$0.9 million, respectively, to address a warranty issue related to specific devices sold to one of our international

Table of Contents

customers. The devices were tested by both us and the customer and passed quality assurance inspection at the time they were sold. The customer subsequently identified malfunctioning systems that included our devices. We believe that our devices continue to meet the Product Specification; however, we are currently working with the customer to determine the cause of the system malfunctions and have established a warranty reserve for the products that may be replaced.

We entered into a master purchase agreement with Cisco in November 2005 under which we provided Cisco and its contract manufacturers a warranty period of as much as five years (in the case of epidemic failure). The extended warranty period in the master purchase agreement with Cisco has not had a material impact on our results of operations or financial condition based on our warranty analysis, which included an evaluation of our historical warranty cost information and experience.

8. Commitments and Contingencies

Purchase Commitments

At June 30, 2006, we had approximately \$7.6 million in firm, non-cancelable and unconditional purchase commitments with our suppliers, including \$0.1 million of adverse purchase commitments, which was included in accrued liabilities as of June 30, 2006.

Contingencies

We may be party to claims and litigation proceedings arising from time to time in the normal course of business. Although the legal responsibility and financial impact with respect to such claims and litigation cannot currently be ascertained, we do not believe that we currently have any matters that will result in the payment of monetary damages, net of any applicable insurance proceeds, that, in the aggregate, would be material in relation to our consolidated financial position or results of operations. There can be no assurance, however, that any such matters will be resolved without costly litigation in a manner that is not adverse to our financial position, results of operations or cash flows, or without requiring royalty payments in the future, which may adversely impact gross margins.

Indemnities, Commitments and Guarantees

In the normal course of business, we have made certain indemnities, commitments and guarantees under which we may be required to make payments in relation to certain transactions. These indemnities include intellectual property indemnities to our customers in connection with the sales of our products, indemnities for liabilities associated with the infringement of other parties' technology based upon our products, indemnities to various lessors in connection with facility leases for certain claims arising from such facility or lease, and indemnities to our directors and officers to the maximum extent permitted under the corporation laws of Delaware. The duration of each of these indemnities, commitments and guarantees varies and, in certain cases, is indefinite. We have not recorded any liability for these indemnities, commitments and guarantees in the accompanying balance sheets. We do, however, accrue for losses for any known contingent liability, including those that may arise from indemnification provisions, when future payment is probable.

In addition, under the master purchase agreement signed with Cisco in November 2005, we have agreed to indemnify Cisco and its contract manufacturers for costs incurred in rectifying epidemic failures, up to the greater of (on a per claim basis) 25% of all amounts paid to us by Cisco during the preceding 12 months or \$9.0 million, plus replacement costs. If we are required to make payments under this indemnity obligation, our operating results, financial condition and cash flows may be adversely affected.

9. Stock Option Plans

We have two stock option plans, the 2004 Equity Incentive Plan and the 2000 Stock Plan (collectively, the *Plans*). The Plans provide for the granting of stock options to employees and consultants. Options granted under the Plans may be either incentive stock options or nonqualified stock options. Incentive stock options (*ISO*) may be granted only to our employees (including officers and directors who are also employees). Nonqualified stock options (*NSO*) may be granted to our employees and consultants. We no longer grant options under the 2000 Stock Plan. A total of 5,823,191 shares of common stock have been reserved for awards issuable under the 2004 Equity Incentive Plan, which further provides for an annual increase of 150,000 shares on each January 1.

Options under the Plans may be granted for periods of up to ten years. Under the Plans the exercise price of (i) an ISO shall not be less than 100% of the estimated fair value of the shares on the date of grant, and (ii) an ISO granted to a 10% stockholder shall not be less than 110% of the estimated fair value of the shares on the date of grant. The exercise

Table of Contents

price of an NSO under the 2004 Plan may be any price as determined by the board of directors. Options granted under the 2000 Stock Plan were exercisable immediately subject to repurchase options held by us which lapse over a maximum period of five years at such times and under such conditions as determined by the board of directors. We have an option to repurchase, in the event of a termination of the optionee's employment relationship, any unvested shares at a price per share equal to the original exercise price per share for the option. When the unvested shares were issued with a promissory note, we have a right to repurchase these unvested shares at the lower of the fair market value of our common stock as of the time the repurchase option is exercised and the original purchase price per share. To date, options granted generally vest over four years. As of June 30, 2006, approximately 67,000 shares of common stock granted under the 2000 Stock Plan were subject to repurchase.

The 2004 Plan also allow for the grant of restricted common stock. During the six months ended June 30, 2006, the Board of Directors granted 0.2 million shares of restricted common stock to certain employees. No shares of restricted common stock were granted in 2005. We calculated deferred compensation expense for restricted stock granted during the six months ended June 30, 2006 based on the fair value of the common stock on the date of grant. We amortize such deferred compensation expense over the vesting period of 2 years.

At the Company's 2006 Annual Meeting of Stockholders held on May 18, 2006, the Company's stockholders approved an increase in the number of shares reserved for issuance under the 2004 Equity Incentive Plan by adding an additional 1,500,000 shares and transferring to the 2004 Equity Incentive Plan an additional 700,000 shares currently available for issuance under the Company's 2004 Employee Stock Purchase Plan (the 2004 ESPP). They also approved the material terms of the 2004 Equity Incentive Plan for the purposes of Internal Revenue Code Section 162(m).

A summary of all options activity under the Plans is presented below (number of shares in thousands):

	Shares Available for Grant	Options Outstanding Number of Shares Outstanding	Options Outstanding Weighted Average Exercise Price
Balances at December 31, 2005	1,526	3,140	\$ 12.63
Additional shares authorized	2,350		
Options granted	(636)	636	34.93
Restricted shares granted	(216)		
Options exercised		(318)	9.68
Options forfeited	64	(64)	27.63
Balances at June 30, 2006	3,088	3,394	16.81

Exercise Price	Number of Shares	Options Outstanding at June 30, 2006			Options Exercisable at June 30, 2006		
		Weighted-Average Remaining Contractual Life (in Years)	Weighted-Average Exercise Price	Aggregate Intrinsic Value (in thousands)	Number of Shares	Weighted-Average Exercise Price	Aggregate Intrinsic Value (in thousands)
\$0.80 - \$2.00	550	6.81	\$ 1.97	\$ 16,654	352	\$ 1.96	\$ 10,662
\$2.00 - \$12.00	670	8.20	9.50	15,243	240	9.77	5,395
\$12.00 - \$15.28	623	8.47	12.84	12,092	207	12.90	4,005
\$15.28 - \$21.34	523	9.18	19.25	6,799	56	18.64	762
\$21.34 - \$27.85	435	9.37	24.78	3,249	205	27.23	1,029
\$27.85 - \$40.43	593	9.58	34.94	115		35.80	
	3,394	8.57	16.80	\$ 52,437	1,060	11.64	\$ 21,854

The aggregate intrinsic value in the table above represents the total pretax intrinsic value, based on the Company's closing stock price of \$32.25 as of June 30, 2006, which would have been received by the option holders had all option holders exercised their options as of that date. The total number of in-the-money options exercisable as of June 30, 2006 was 1.1 million.

Table of Contents

The total intrinsic value of options exercised and total cash received from employees for those exercises during the three and six months ended June 30, 2006 and 2005 were as follows (in thousands):

	Three months ended June 30,		Six months ended June 30,	
	2006	2005	2006	2005
Total intrinsic value of options exercised	\$ 3,515	\$ 1,281	\$ 8,239	\$ 2,722
Total cash received for option exercises	\$ 1,062	\$ 329	\$ 3,078	\$ 609

Deferred Stock-Based Compensation

During the three months ended June 30, 2005, we recorded deferred stock-based compensation of \$0.7 million due to the difference between the exercise price and the estimated fair value of common stock. Deferred-stock based compensation is being amortized over the vesting period of four years. Beginning in fiscal 2006, stock-based compensation expense is calculated based on an estimated fair value under SFAS 123(R) and recognized over the remaining vesting periods. However, as the deferred stock-based compensation recorded as of December 31, 2005 related to the awards granted prior to our becoming a publicly traded company, the remaining balance of deferred stock-based compensation will continue to be accounted for under APB 25 and be amortized for the remaining vesting period. During the three and six months ended June 30, 2006, we amortized \$0.2 million and \$0.5 million, respectively, of deferred stock-based compensation, which is included in the total stock-based compensation expense of \$3.1 million and \$5.6 million, respectively, for the same periods.

2004 Employee Stock Purchase Plan

In July 2004, we adopted the 2004 ESPP, which complies with the requirements of Section 423 of the Internal Revenue Code. The shares reserved under the 2004 ESPP are subject to an automatic increase on January 1 of each year in the number of shares equal to the lesser of 75,000 shares or 0.5% of the outstanding shares of our common stock at the end of the preceding fiscal year. The 2004 ESPP permits eligible employees (as defined in the plan) to purchase up to \$25,000 worth of our common stock annually over the course of two six-month offering periods, other than the initial two-year offering period which commenced on July 8, 2004. The purchase price to be paid by participants is 85% of the price per share of our common stock either at the beginning or the end of each six-month offering period, whichever is less. At our 2006 Annual Meeting of Stockholders held on May 18, 2006, our stockholders approved the reduction in the number of shares reserved under the 2004 ESPP by 700,000 shares, and the transfer of those reserved shares to our 2004 Equity Incentive Plan. As of June 30, 2006, approximately 57,000 shares had been issued under the Purchase Plan, and approximately 143,000 shares remain available for future issuance. The 2004 ESPP terminates in May 2014.

Stock-Based Compensation under SFAS No. 123(R)

On January 1, 2006, the Company adopted SFAS 123(R), on the modified prospective application method, which requires the measurement and recognition of compensation expense for all share-based awards made to the Company's employees and directors including employee stock options and employee stock purchases outstanding as of and awarded after January 1, 2006. The total stock-based compensation expense recognized for the three and six months ended June 30, 2006 was allocated as follows (in thousands):

	Three months ended June 30, 2006		Six months ended June 30, 2006	
Cost of revenues	\$	131	\$	148
Research and development		1,972		3,565
Selling, general and administrative		956		1,878
Total stock-based compensation expense	\$	3,059	\$	5,591

We capitalized approximately \$0.2 million of stock-based compensation into inventory as of June 30, 2006, which represented indirect manufacturing expenses related to our inventory.

As of June 30, 2006, there was approximately \$19.2 million of total unrecognized stock-based compensation cost, after estimated forfeitures, related to unvested employee stock options, restricted common stock and ESPP, which is expected to be recognized over an estimated weighted

average amortization period of 3.01 years. The tax benefit, and the

Table of Contents

resulting effect on cash flows from operations and financing activities, related to stock-based compensation expense was not recognized as the Company currently provides a full valuation allowance for its deferred tax assets.

The method of valuation for share-based awards granted beginning in fiscal 2006 is the Black-Scholes model which was also the method used for the Company's pro forma information required under FAS 123. The expected term of the awards represents the weighted-average period the stock options are expected to remain outstanding which assumes that the employees' exercise behavior is a function of the option's remaining contractual life and the extent to which the option is in-the-money (i.e., the average stock price during the period is above the strike price of the stock option). The Company's expected volatility assumption uses the historical volatility of the Company's stock, as applicable for the expected term. The Company also used its historical stock price to determine the fair value of awards for purposes of its pro forma information under FAS 123. Since the Company does not pay dividends, the expected dividend yield is zero. The risk-free interest rate assumption is based upon observed interest rates appropriate for the term of the Company's employee stock options. The post-vesting forfeiture rate is based on the Company's historical option cancellation and employee exercise information as well as the historical information of similar sized companies in the same industry.

Valuation Assumptions

For the three and six months ended June 30, 2006, the fair value of employee stock options granted under the 2004 Equity Incentive Plan and ESPP was estimated using the following weighted average assumptions:

	Three months ended		Six months ended	
	June 30, 2006		June 30, 2006	
	Stock Options	Purchase Plan	Stock Options	Purchase Plan
Stock Option Plans:				
Risk-free interest rate	4.86%	4.14%	4.59%	4.14%
Expected life of options	4.42 years	0.5 years	4.25 years	0.5 years
Expected dividend yield	0%	0%	0%	0%
Volatility	59%	56%	56%	56%

The weighted average fair value of employee stock options and shares purchased under the 2004 ESPP for the three and six months ended June 30, 2006 were as follows:

	Three months ended		Six months ended	
	June 30, 2006		June 30, 2006	
	Stock Options	Purchase Plan	Stock Options	Purchase Plan
Weighted average estimated fair value	\$ 17.50	\$ 6.93	\$ 17.12	\$ 6.93

Table of Contents**Pro Forma Information under SFAS No. 123 for Periods Prior to Fiscal 2006**

Prior to adopting SFAS No. 123(R), we made pro forma disclosures of the effects of stock-based compensation under SFAS No. 123 and SFAS No. 148, Accounting for Stock-Based Compensation, Transition and Disclosure. The pro forma effects of recognizing compensation expense under the fair value method on our net income per share for the three and six months ended June 30, 2005 was as follows (in thousands, except per share data):

	Three months ended	Six months ended
	June 30, 2005	June 30, 2005
Net income - as reported	\$ 2,425	\$ 7,848
Add: stock-based compensation expense included in reported net income	473	1,124
Deduct: stock-based compensation expense determined under fair value based method for all awards	(2,185)	(3,966)
Net income - pro forma	\$ 713	\$ 5,006
Net income per common share		
As reported:		
Basic	\$ 0.14	\$ 0.45
Diluted	\$ 0.13	\$ 0.42
Pro forma:		
Basic	\$ 0.04	\$ 0.29
Diluted	\$ 0.04	\$ 0.27

For the three and six months ended June 30, 2005, the fair value of employee stock options granted under the 2004 Equity Incentive Plan and ESPP was estimated using the following weighted average assumptions:

	Three months ended		Six months ended	
	June 30, 2005		June 30, 2005	
	Stock Options	Purchase Plan	Stock Options	Purchase Plan
Stock Option Plans:				
Risk-free interest rate	3.65% - 4.04%	2.43%	3.47% - 4.16%	2.43%
Expected life of options	4 years	0.5 years	4 years	0.5 years
Expected dividend yield	0%	0%	0%	0%
Volatility	80%	80%	80%	80%

The weighted average fair value of employee stock option grants was \$8.32 and \$7.95 for the three and six months ended June 30, 2005, respectively.

10. Comprehensive Income

Comprehensive income (loss) is defined as the change in equity of a business enterprise during a period from transactions and other events and circumstances from non-owner sources. The components of comprehensive income (loss) are as follows:

Edgar Filing: NETLOGIC MICROSYSTEMS INC - Form 10-Q

	Three months ended		Six months ended	
	June 30,		June 30,	
	2006	2005	2006	2005
Net income (loss)	\$ 2,938	\$ 2,425	\$ (4,386)	\$ 7,848
Currency translation adjustments	48		59	
Comprehensive income (loss)	\$ 2,986	\$ 2,425	\$ (4,327)	\$ 7,848

11. Related Party Transactions

We lease our headquarters facility in Mountain View, California from an affiliate of Berg & Berg Enterprises, LLC, which holds shares of common stock of the Company. During the three and six months ended June 30, 2006, we made

Table of Contents

lease payments of approximately \$175,000 and \$350,000, respectively, under this lease. On May 8, 2006, we and the landlord amended the lease agreement to increase the leased premises to approximately 42,000 square feet with an additional estimated cost of \$1.4 million over five years.

12. Operating Segments and Geographic Information

We operate in one business segment. We sell our products directly to customers in the United States, Asia and Europe. Sales for geographic regions reported below are based upon the customer headquarter locations. The following is a summary of geographic information related to revenue for the three and six months ended June 30, 2006 and 2005:

	Three months ended		Six months ended	
	June 30,		June 30,	
	2006	2005	2006	2005
Revenue:				
United States	41%	50%	45%	65%
Malaysia	36%	32%	31%	21%
Asia, excluding Malaysia	15%	13%	19%	11%
Other	8%	5%	5%	3%
	100%	100%	100%	100%

As of June 30, 2006 and December 31, 2005, the following customers accounted for more than 10% of our total accounts receivable:

	June 30, 2006	December 31, 2005
Solectron Corporation	52%	51%
Mitsui Comtek Corporation		12%
Flextronics International	10%	4%
Sanmina Corporation	10%	1%

13. Recent Accounting Pronouncements

In June 2006, the FASB issued FASB Interpretation (FIN) 48, Accounting for Uncertainty in Income Taxes. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB SFAS 109, Accounting for Income Taxes. This Interpretation defines the minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. FIN 48 is effective for fiscal years beginning after December 15, 2006. We are currently evaluating the effect that the adoption of FIN 48 will have on our financial position and results of operations.

Table of Contents**Item 2: Management's Discussion and Analysis of Financial Condition and Results of Operations****Forward-looking Statements**

This report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which include, without limitation, statements about the market for our technology, our strategy and competition. Such statements are based upon current expectations that involve risks and uncertainties. Any statements contained herein that are not statements of historical fact may be deemed forward-looking statements. For example, the words believes, anticipates, plans, expects, intends and similar expressions are intended to identify forward-looking statements. Our actual results and the timing of certain events may differ significantly from the results discussed in the forward-looking statements. Factors that might cause such a discrepancy include, but are not limited to, those discussed below under the headings Overview, Results of Operations, Liquidity and Capital Resources and under the discussions of Risk Factors set forth under Item 1A of our Annual Report on Form 10-K filed with the Securities and Exchange Commission on February 28, 2006 and under Part II, Item 1A below. All forward-looking statements in this document are based on information available to us as of the date hereof and we assume no obligation to update any such forward-looking statements. The following discussion should be read in conjunction with our condensed financial statements and the accompanying notes contained in this quarterly report. Unless expressly stated or the context otherwise requires, the terms we, our, us and NetLogic Microsystems refer to NetLogic Microsystems, Inc.

ACQUISITION OF CYPRESS SEMICONDUCTOR'S NETWORK SEARCH ENGINE PRODUCTS

On February 15, 2006, we completed the acquisition of Cypress Semiconductor Corporation's (Cypress) Network Search Engine products pursuant to an Agreement for the Purchase and Sale of Assets entered into on January 25, 2006, as amended. Upon closing the transaction, we acquired assets relating to Cypress' network search engine (NSE) business, including all intellectual property related primarily to the acquired NSE business (including all intellectual property related to the Sahasra algorithmic technology), the NSE70000 and Ayama product families and all inventory and fixed assets for those product families. We did not acquire any of Cypress' TCAM1, TCAM2, TCAM2-CR, TurboCAM or Toy Cam products and inventory.

To date we have paid Cypress approximately \$56.2 million in shares of common stock for the acquired assets. We may be required to pay an additional \$10.0 million in cash and up to approximately \$10.0 million in shares of common stock if we achieve specific revenue objectives as outlined in the agreement.

The Sahasra algorithmic technology complements our Layer 7 processing initiative and is a beneficial building block in driving towards low-cost Layer 7 applications acceleration and security processing solutions. In addition, the NSE70000, Ayama 10000 and Ayama 20000 expanded our product offerings in the high-volume, entry-level Layer 3 switch market. The discussions in this section of the Quarterly Report on Form 10-Q, as well as the financial statements contained herein, include the effects of this acquisition from February 15, 2006, the date on which the transaction was completed.

Overview

We are a semiconductor company that designs, develops and markets high performance knowledge-based processors for a variety of advanced Internet, corporate and other networking systems, such as routers, switches, network security appliances, network access equipment and networked storage devices. Knowledge-based processors are integrated circuits that employ an advanced processor architecture and a large knowledge database containing information on the network, as well as applications and content that run on the network to make complex decisions about individual packets of information traveling through the network. Our knowledge-based processors significantly enhance the ability of networking original equipment manufacturers, or OEMs, to supply network service providers with systems offering more advanced functionality for the Internet, such as voice transmission over the Internet, or VoIP, unified threat management, or UTM, virtual private networks, or VPNs, and streaming video and audio.

Our knowledge-based processors incorporate advanced technologies that enable rapid processing, such as a superscalar architecture, which uses parallel-processing techniques, and deep pipelining, which segments processing tasks into smaller sub-tasks, for higher decision throughput. These technologies enable networking systems to perform a broad range of network-aware and content-aware processing functions, such as application-based routing, UTM network

Table of Contents

security, intrusion detection and prevention, virus inspection, access control for network security, prioritization of traffic flow to maintain quality of service, or QoS, and statistical measurement of Internet traffic for transaction billing.

In January 2006, we announced the launch of our NETL7 family of Layer 7 knowledge-based processors. The first product in the NETL7 family is the NLS1000 content processor that accelerates pattern and signature recognition tasks for enterprise and carrier-class networks, and is used to perform 10 Gigabits per second wire-speed content inspection of packets traveling through the network. The NLS1000 content processor extends the processing capabilities of our knowledge-based processors into the packet payload, thereby enabling the design and deployment of next-generation networking systems that can make packet processing decisions based on an awareness of the packet content. Typical applications for the NLS1000 content processor include Layer 7 application switches and routers, unified threat management appliances, intrusion detection and prevention systems and anti-virus gateways. We recently started shipping revenue-generating development kits to customers, and expect to obtain design wins for the NETL7 products in the second half of this year.

Since the second half of 2003, we have experienced significant revenue growth caused by a rapid rise in new customer orders for our knowledge-based processors. Our total revenue increased by 253% from \$13.5 million for fiscal 2003 to \$47.8 million for fiscal 2004, and by 71% from fiscal 2004 to \$81.8 million for fiscal 2005.

As a fabless semiconductor company, our business model is less capital intensive than other businesses because we rely on third parties to manufacture, assemble, and test our products. In general, we do not anticipate making significant capital expenditures. In transitioning from a design and development company to volume production as a fabless semiconductor company, we have required significant funds to ramp up in production to support increased sales of our knowledge-based processors. In the future, as we launch new products or expand our operations, we may require additional funds to procure product mask sets, order elevated quantities of wafers from our foundry partners, perform qualification testing and assemble and test those products.

We employ a direct sales force as well as a sales representative network to sell our products. The majority of our revenue comes from customers headquartered in the United States; however, an increasing amount is from customers headquartered in Asia. All revenue to date has been denominated in U.S. dollars.

Our product sales cycles can take up to 24 months to complete and volume production can take an additional six months to be achieved, if at all. Cancellations of customer orders or changes in product specifications might result in the loss of anticipated sales without allowing us sufficient time to reduce our inventory or operating expenses. Our recent rapid revenue growth makes it difficult for us to assess the impact of seasonal factors on our business.

We recognize revenue at the time of shipment (except for shipments to a distributor) to our customers or our international stocking sales representatives. Our revenue consists primarily of sales of our knowledge-based processors to networking OEMs and contract manufacturers. Initial sales of our products for a new design are usually made directly to networking OEMs. Once a design enters production, a networking OEM often outsources its manufacturing to contract manufacturers that purchase products directly from us.

As a consequence of the acquisition of NSE business assets from Cypress, we began selling our products to a distributor in February 2006. We offer price protection and limited stock rotation rights to this distributor. Given the uncertainties associated with the levels of returns and price protection and other credits potentially issuable to the distributor, revenues and costs relating to the distributor sales are deferred, on a gross basis, until such rights lapse, which is generally upon receiving notification from the distributor that it has resold the products to our end customer.

Because we purchase all wafers from suppliers with fabrication facilities and outsource the assembly and testing to third party vendors, a significant portion of our costs of revenue consists of payments to our third party vendors. We do not have long-term agreements with any of our suppliers and rely upon them to fulfill our orders.

We entered into a master purchase agreement with Cisco in November 2005 under which we provided Cisco and its contract manufacturers a warranty period of as much as five years (in the case of epidemic failure). The extended warranty period in the master purchase agreement with Cisco has not had a material impact on our results of operations or financial condition based on our warranty analysis, which included an evaluation of our historical warranty cost information and experience.

Research and development expenses consist primarily of compensation and related costs for personnel as well as costs related to new and existing product development, depreciation, software maintenance and facilities costs. All research and development costs are expensed in the period incurred. In order for us to remain competitive, we believe a

Table of Contents

significant portion of our operating expenses will continue to be related to research and development efforts. We also believe research and development headcount will increase in the future, and that research and development costs will increase in absolute dollars but decline as a percentage of revenue.

Selling expenses consist primarily of compensation and related costs for sales and marketing personnel, marketing programs, travel, facilities overhead and bonuses and commissions for independent sales representatives. General and administrative expenses consist primarily of compensation and related costs for finance and accounting, patent and corporate legal expenses, and facilities overhead.

Our operating expenses are denominated primarily in U.S. Dollars, except for expenses incurred by our wholly owned subsidiary in India, which are denominated in the local currency. The expenses incurred by our subsidiary in India were included in research and development expenses.

Beginning fiscal 2006, our cost of revenue and operating expenses include stock-based compensation recorded in accordance with FAS 123R. For the three and six months ended June 30, 2006, our cost of revenue, research and development and selling, general and administrative expenses included stock-based compensation of \$3.1 million and \$5.6 million, respectively.

Critical Accounting Policies and Estimates

The preparation of our condensed unaudited financial statements in conformity with accounting principles generally accepted in the United States of America requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We base these estimates and assumptions on historical experience and evaluate them on an on-going basis to ensure they remain reasonable under current conditions. Actual results could differ from those estimates. There were no changes to our critical accounting policies and estimates included in our 2005 Annual Report on Form 10-K, except as noted below.

Stock-based Compensation: We estimate the fair value of stock options using the Black-Scholes-Merton valuation model (the Black-Scholes model), consistent with the provisions of SFAS 123(R), SAB 107 and our prior period pro forma disclosures of net income, including stock-based compensation (determined under a fair value method as prescribed by SFAS 123). Option-pricing model requires the input of highly subjective assumptions, including the option's expected life and the price volatility of the underlying stock. The expected stock price volatility assumption was determined using the historical volatility of the Company's common stock. Changes in the subjective assumptions required in the valuation models may significantly affect the estimated value of the awards, the related stock-based compensation expense and, consequently, our results of operations.

Revenue Recognition: We derive revenue mainly from product sales and, to a lesser extent, from engineering services. Revenue from product sales is recognized upon shipment when persuasive evidence of an arrangement exists, legal title and risk of ownership has transferred, the price is fixed or determinable, and collection of the resulting receivables is reasonably assured. Our sales agreements do not provide for any customer acceptance provisions or return rights. We have no obligation to provide any modification or customization, upgrades, enhancements, post-contract customer support, additional products or enhancements. Customers, other than the distributor discussed below, have no rights of return unless the product does not perform according to specifications. Provisions for warranty expenses are recorded when revenue is recognized.

From time to time we perform engineering services for third parties. Engineering service revenue is recognized as services are performed, agreed-upon milestones are achieved and customer acceptance, if required, is received from the customer.

As a consequence of the acquisition of NSE business assets from Cypress, we began selling our products to a distributor in February 2006. We offer price protection and limited stock rotation rights to the distributor. Given the uncertainties associated with the levels of returns and price protection and other credits potentially issuable to the distributor, revenues and costs relating to the distributor sales are deferred, on a gross basis, until such rights lapse, which is generally upon receiving notification from the distributor that it has resold the products to our end customer.

Table of Contents**Results of Operations****Comparison of Three Months Ended June 30, 2006 to Three Months Ended June 30, 2005****Revenue, cost of revenue and gross profit**

The table below sets forth the fluctuations in revenue, cost of revenue and gross profit data for the three months ended June 30, 2006 and the three months ended June 30, 2005 (in thousands, except percentage data):

	Three Months		Three Months		Year-to-Year Increase	Increase Percentage
	ended June 30, 2006	Percentage of Revenue	ended June 30, 2005	Percentage of Revenue		
Revenue	\$ 25,831	100.0%	\$ 18,707	100.0%	\$ 7,124	38.1%
Cost of revenue	10,094	39.1%	8,220	43.9%	1,874	22.8%
Gross profit	\$ 15,737	60.9%	\$ 10,487	56.1%	\$ 5,250	50.1%

Revenue. The increase in total revenue during the three months ended June 30, 2006 resulted from the continued growth in sales of our knowledge-based processors and from sales of products associated with the purchase of the Cypress NSE business. During the three months ended June 30, 2006, the volume of our knowledge-based processor shipments increased approximately 71% over the same period a year ago. The increase in our knowledge-based processor sales for the three months ended June 30, 2006 was driven by a \$1.2 million increase in the sales of our NL6000 products, which were introduced in early 2005, as well as a \$3.4 million increase in the sales of our NL5000 products over the same period last year. Revenue for the three months ended June 30, 2006 also included approximately \$2.1 million of the acquired NSE products sales. The increase in revenue due to the growth of knowledge-based processor shipments and the addition of the NSE products sales were offset by a decrease in the average selling price over the same period attributable in part to the lower average selling prices of the acquired NSE products, which was 73% lower than that of our knowledge-based processor products during the period.

Revenue from sales to Cisco and its contract manufacturers represented 61% of total revenue for the three months ended June 30, 2006 compared to 73% during the three months ended June 30, 2005.

Revenue for the three months ended June 30, 2006 also included \$0.6 million of non-recurring engineering (NRE) revenue. No such revenue was recorded in the same period last year. We do not expect to generate this type of revenue regularly, however, we may enter into agreements that will generate NRE revenue from time to time.

Cost of Revenue/Gross Profit/Gross Margin. The increase in cost of revenue and gross profit during the three months ended June 30, 2006 was primarily due to the continued growth in sales of our knowledge-based processors, as well as improvements in our production yields. During the three months ended June 30, 2006 and 2005, we recorded a provision for excess and obsolete inventory reserve of \$1.0 million and \$2.0 million, respectively, for inventory that is not saleable. The cost of revenue during the three months ended June 30, 2006 and 2005 included an additional provision of warranty reserve of \$0.3 million and \$0.3 million, respectively. The warranty provision during the three months ended June 30, 2006 included additional warranty reserve of \$0.2 million to address a warranty issue related to specific devices sold to one of our international customers. The devices were tested by both us and the customer, and passed quality assurance inspection at the time they were sold. The customer subsequently identified malfunctioning systems that included our devices. We believe that our devices continue to meet the Product Specification; however, we are currently working with the customer to determine the cause of the system malfunctions and have established a warranty reserve for products that may be replaced. Our warranty accrual is estimated normally based on historical claims compared to historical revenue and based on an assumption that we have to replace products subject to a claim.

The cost of revenue for the three months ended June 30, 2006 included \$0.7 million of amortization of intangible assets acquired in connection with the acquisition of the Cypress NSE business.

The NRE revenue of \$0.6 million for the three months ended June 30, 2006 had no associated cost, and accordingly generated 100% gross margin.

Table of Contents**Operating expenses**

The table below sets forth operating expense data for the three months ended June 30, 2006 and the three months ended June 30, 2005 (in thousands, except percentage data):

	Three Months		Three Months		Year-to-Year Increase	Increase Percentage
	ended June 30, 2006	Percentage of Revenue	ended June 30, 2005	Percentage of Revenue		
Operating expenses:						
Research and development	\$ 9,703	37.6%	\$ 5,719	30.6%	\$ 3,984	69.7%
Selling, general and administrative	3,996	15.5%	2,479	13.3%	1,517	61.2%
Total operating expenses	\$ 13,699	53.0%	\$ 8,198	43.8%	\$ 5,501	67.1%

Research and Development Expenses. Research and development expenses increased during the three months ended June 30, 2006, as compared to the same period in 2005, primarily due to increases in stock-based compensation expense of \$1.8 million, product development and qualification expenses of \$0.1 million, payroll related expenses of \$1.0 million, of which \$0.5 million was due to the acquisition of the Cypress NSE business, and consulting expenses of \$1.0 million as we continue to invest in the development of the next generation knowledge-based processor products and other products. Depreciation expense increased by \$0.2 million during the three months ended June 30, 2006 as we purchased software and other tools to support our research and development efforts. The increase in stock-based compensation expense was due to the adoption of SFAS No.123(R) effective January 1, 2006. The remainder of the fluctuation in research and development expenses was caused by individually minor items.

Selling, General and Administrative Expenses. Selling, general and administrative expenses increased during the three months ended June 30, 2006, as compared to the same period in 2005, primarily due to increases in stock-based compensation expense of \$0.7 million, payroll related expenses of \$0.4 million, and legal expenses of \$0.3 million. The increase in stock-based compensation expense was due to the adoption of SFAS No.123(R) effective January 1, 2006. The increase in payroll related costs was due to the increased headcount to support our growing operations primarily in the sales and marketing areas. The remainder of the fluctuation in selling, general and administrative expenses was caused by individually minor items.

Other items

The table below sets forth other data for the three months ended June 30, 2006 and the three months ended June 30, 2005 (in thousands, except percentage data):

	Three Months ended		Three Months ended		Year-to-Year Change	Change Percentage
	June 30, 2006	Percentage of Revenue	June 30, 2005	Percentage of Revenue		
Other income, net:						
Interest income	\$ 948	3.7%	\$ 319	1.7%	\$ 629	197.18%
Interest expense		0.0%	(68)	-0.4%	68	-100.00%
Other expense, net	(25)	-0.1%	(3)	0.0%	(22)	733.33%
Total interest and other income, net	\$ 923	3.6%	\$ 248	1.3%	\$ 675	272.18%

Interest and Other Income (Expenses), net. The net interest and other income of \$0.9 million generated during the three months ended June 30, 2006 was primarily due to a higher average cash and investment balance during that period and higher market yields for our chosen investments. The higher average cash and investment balance during the three months ended June 30, 2006 as compared to the three months ended June 30, 2005 was primarily due to cash generated from operating activities. Our cash and cash equivalents balance increased from \$51.0 million at

Edgar Filing: NETLOGIC MICROSYSTEMS INC - Form 10-Q

June 30, 2005 to \$76.0 million at June 30, 2006.

Table of Contents**Comparison of Six Months Ended June 30, 2006 to Six Months Ended June 30, 2005****Revenue, cost of revenue and gross profit**

The table below sets forth the fluctuations in revenue, cost of revenue and gross profit data for the six months ended June 30, 2006 and the six months ended June 30, 2005 (in thousands, except percentage data):

	Six Months		Six Months		Year-to-Year Increase	Increase Percentage
	ended June 30, 2006	Percentage of Revenue	ended June 30, 2005	Percentage of Revenue		
Revenue	\$ 49,155	100.0%	\$ 40,509	100.0%	\$ 8,646	21.3%
Cost of revenue	19,030	38.7%	17,704	43.7%	1,326	7.5%
Gross profit	\$ 30,125	61.3%	\$ 22,805	56.3%	\$ 7,320	32.1%

Revenue. The increase in total revenue during the six months ended June 30, 2006 resulted from the continued growth in sales of our knowledge-based processors and from sales of products associated with the purchase of the Cypress NSE business. During the six months ended June 30, 2006, the volume of our knowledge-based processor shipments increased approximately 44% over the same period a year ago. The increase in our knowledge-based processor sales for the six months ended June 30, 2006 was driven by a \$1.9 million increase in the sales of our NL6000 products, which was introduced in early 2005, as well as a \$2.9 million increase in the sales of our NL5000 products over the same period last year. Revenue for the six months ended June 30, 2006 also included approximately \$3.1 million of the acquired NSE products sales. The increase in revenue due to the growth of knowledge-based processor shipments and the addition of the NSE products sales were offset by a decrease in the average selling price over the same period attributable in part to the lower average selling prices of the acquired NSE products, which was 75% lower than that of our knowledge-based processor products during the period.

Revenue from sales to Cisco and its contract manufacturers represented 59% of total revenue for the six months ended June 30, 2006 compared to 80% during the six months ended June 30, 2005.

Revenue for the six months ended June 30, 2006 also included \$0.6 million of NRE revenue. No such revenue was recorded in the same period last year. We do not expect to generate this type of revenue regularly, however, we may enter into agreements that will generate NRE revenue from time to time.

Cost of Revenue/Gross Profit/Gross Margin. The increase in cost of revenue and gross profit during the six months ended June 30, 2006 was primarily due to the continued growth in sales of our knowledge-based processors, as well as improvements in our production yields. During the six months ended June 30, 2006 and 2005, we recorded a provision for excess and obsolete inventory reserve of \$1.4 million and \$2.1 million, respectively, for inventory that is not saleable. The cost of revenue during the six months ended June 30, 2006 and 2005 included an additional provision of warranty reserve of \$1.0 million and \$1.0 million, respectively. During the six months ended June 30, 2006, we provided an additional warranty reserve of \$0.9 million to address a warranty issue related to specific devices sold to one of our international customers, as described above.

Cost of revenue for the six months ended June 30, 2006 also included \$1.1 million of amortization of intangible assets acquired in connection with the acquisition of Cypress NSE business.

The NRE revenue of \$0.6 million during the six months ended June 30, 2006 had no associated cost, and accordingly generated 100% gross margin.

Gross margin for the six months ended June 30, 2005 benefited by \$1.0 million from the sale of products that had been fully reserved in prior periods and accordingly had no associated cost of revenue. This amount represented approximately 2.5% of the gross margin during the six months ended June 30, 2005. There were no comparable sales in the first six months of 2006.

Table of Contents**Operating expenses**

The table below sets forth operating expense data for the six months ended June 30, 2006 and the six months ended June 30, 2005 (in thousands, except percentage data):

	Six Months		Six Months		Year-to-Year Increase	Increase Percentage
	ended June 30, 2006	Percentage of Revenue	ended June 30, 2005	Percentage of Revenue		
Operating expenses:						
Research and development	\$ 17,764	36.1%	\$ 9,813	24.2%	\$ 7,951	81.0%
In-process research and development	10,700	21.8%		0.0%	10,700	100.0%
Selling, general and administrative	7,603	15.5%	5,271	13.0%	2,332	44.2%
Total operating expenses	\$ 36,067	73.4%	\$ 15,084	37.2%	\$ 20,983	139.1%

Research and Development Expenses. Research and development expenses increased during the six months ended June 30, 2006, as compared to the same period in 2005, primarily due to increases in stock-based compensation expense of \$3.1 million, product development and qualification expenses of \$0.8 million, payroll related expenses of \$1.8 million, of which \$0.8 million was due to the acquisition of Cypress NSE business, and consulting expenses of \$1.8 million as we continue to invest in the development of the next generation knowledge-based processor products as well as non-knowledge-based processor products. Depreciation expense increased by \$0.4 million during the six months ended June 30, 2006 as we purchased software and other tools to support our research and development efforts. The increase in stock-based compensation expense was due to the adoption of SFAS No.123(R) effective January 1, 2006. The remainder of the increase in research and development expenses was caused by individually minor items.

In-Process Research and Development. As part of our purchase price allocation in connection with the acquisition of the Cypress NSE business, we recorded an in-process research and development (IPRD) charge of \$10.7 million during the six months ended June 30, 2006 based upon our estimate of the fair values of assets acquired. We acquired only one IPRD project, which is related to the acquired Sahasra algorithmic technology, that has not reached technological feasibility, and has no alternative use. The Sahasra algorithmic technology complements our Layer 7 processing initiative and is a beneficial building block in driving towards low-cost Layer 7 applications acceleration and security processing solutions.

To date, there have been no significant differences between the actual and estimated results of the IPRD project. As of June 30, 2006, we have incurred total post-acquisition costs of approximately \$0.4 million related to the IPRD project and estimate that an additional investment of approximately \$2.7 million will be required to complete the project. We expect to complete the project by June 2007 and to benefit from it beginning in fiscal 2008, which is consistent with our original estimate.

The development of the acquired technology remains a significant risk due to factors including the remaining efforts to achieve technical viability, rapidly changing customer markets, uncertain standards for new products, and competitive threats. The nature of the efforts to develop the acquired technology into commercially viable products consists primarily of planning, designing, experimenting, and testing activities necessary to determine that the technology can meet market expectations, including functionality and technical requirements. Failure to bring these products to market in a timely manner could result in a loss of market share or a lost opportunity to capitalize on emerging markets and could have a material adverse impact on our business and operating results.

Selling, General and Administrative Expenses. Selling, general and administrative expenses increased during the six months ended June 30, 2006, as compared to the same period in 2005, primarily due to increases in stock-based compensation expense of \$1.2 million, payroll related expenses of \$0.6 million, and legal expenses of \$0.5 million. The increase in stock-based compensation expense was due to the adoption of SFAS No.123(R) effective January 1, 2006. The increase in payroll related costs was due to the increased headcount to support our growing operations primarily in the sales and marketing areas. The remainder of the fluctuation in selling, general and administrative expenses was caused by individually minor items.

Table of Contents**Other items**

The table below sets forth other data for the six months ended June 30, 2006 and the six months ended June 30, 2005 (in thousands, except percentage data):

	Six Months ended June 30, 2006	Percentage of Revenue	Six Months ended June 30, 2005	Percentage of Revenue	Year-to-Year Change	Change Percentage
Other income, net:						
Interest income	\$ 1,631	3.3%	\$ 547	1.4%	\$ 1,084	198.2%
Interest expense		0.0%	(135)	-0.3%	135	-100.0%
Other expense, net	(27)	0.0%	(5)	0.0%	(22)	440.0%
Total interest and other income, net	\$ 1,604	3.3%	\$ 407	1.1%	\$ 1,197	294.1%

Interest and Other Income (Expenses), net. The net interest and other income of \$1.6 million generated during the six months ended June 30, 2006 was primarily due to a higher average cash and investment balance during that period and higher market yields for our chosen investments. The higher average cash and investment balance during the six months ended June 30, 2006 as compared to the six months ended June 30, 2005 was primarily due to the cash generated from operating activities. Our cash and cash equivalents balance increased from \$51.0 million at June 30, 2005 to \$76.0 million at June 30, 2006.

Stock-Based Compensation under SFAS No. 123(R)

On January 1, 2006, we adopted SFAS 123(R), on the modified prospective transition method, which requires the measurement and recognition of compensation expense for all share-based awards made to our employees and directors including employee stock options and employee stock purchases outstanding as of and awarded after January 1, 2006. The total stock-based compensation expense recognized for the three and six months ended June 30, 2006 was allocated as follows (in thousands):

	Three months ended June 30, 2006	Six months ended June 30, 2006
Cost of revenue	\$ 131	\$ 148
Research and development	1,972	3,565
Selling, general and administrative	956	1,878
Total	\$ 3,059	\$ 5,591

As of June 30, 2006, there was approximately \$19.2 million of total stock-based compensation expense, after estimated forfeitures, related to unvested employee stock options, restricted common stock and ESPP, which is expected to be recognized over an estimated weighted average amortization period of 3.01 years. The Company capitalized \$0.1 million of stock-based compensation expense relating to indirect manufacturing expenses into inventory as of June 30, 2006. The tax benefit, and the resulting effect on cash flows from operations and financial activities, related to stock-based compensation expense was not recognized as the Company currently provides a full valuation allowance for its deferred tax assets.

Liquidity and Capital Resources

At June 30, 2006, our principal source of liquidity was our cash and cash equivalents which totaled \$76.0 million, which we believe is adequate for our operational needs for the foreseeable future.

Edgar Filing: NETLOGIC MICROSYSTEMS INC - Form 10-Q

The table below (in thousands) sets forth the key components of cash flow for the three months ended June 30, 2006 and June 30, 2005:

	Six months ended June 30, 2006	Six months ended June 30, 2005
Net cash provided by operating activities	\$ 8,644	\$ 10,804
Net cash used in investing activities	\$ (948)	\$ (863)
Net cash provided by (used in) financing activities	\$ 2,547	\$ (367)

Table of Contents

Cash Flows during the Six Months Ended June 30, 2006

During the six months ended June 30, 2006, our operating activities generated net cash of \$8.6 million. During the period, we recorded non-cash items of \$20.2 million primarily consisting of an in-process research and development charge of \$10.7 million related to the acquisition of the Cypress NSE assets, stock-based compensation of \$5.6 million, depreciation and amortization of intangibles of \$2.4 million and provision for inventory reserves of \$1.4 million. Other sources of cash for operating activities during the six months ended March 31, 2006 included an increase in accrued liabilities primarily related to the timing of payments to our vendors. Cash was also generated from an increase in deferred revenue of \$0.3 million relating to the sales of certain products through a distributor. The cash generated was primarily offset by the increase in accounts receivable of \$5.0 million from higher sales of our knowledge-based processor sales during the period and an increase in inventory primarily due to the addition of products acquired from Cypress.

Our investing activities used cash of \$0.9 million during the six months ended June 30, 2006 for the purchase of computer equipment and research and development design tools to support our growing operations. We expect to make capital expenditures of approximately \$1.3 million during the remainder of fiscal 2006. These capital expenditures will be used primarily to support product development activities. We will use our cash and cash equivalents to fund these purchases.

Our financing activities provided net cash of \$2.5 million for the six months ended June 30, 2006, primarily from stock option exercises. Cash provided by financing activities was offset by repayment of software license obligations.

Cash Flows during the Six Months Ended June 30, 2005

During the six months ended June 30, 2005, our operating activities generated net cash of \$10.8 million. For cash provided by operating activities, our primary source of cash was net income of \$7.8 million, which was adjusted for non-cash items of \$4.2 million primarily related to depreciation, amortization of deferred stock-based compensation and provision for inventory reserves. Cash was also generated from the increases in accrued and other long-term liabilities by \$0.5 million and a \$0.5 million decrease in inventory. The cash generated was primarily offset by the increases in prepaid expenses and accounts payable by \$1.0 million and \$1.2 million, respectively. The decrease in inventories during the period was due to increased unit shipments of our knowledge-based processors and the write-off of approximately \$2.0 million of inventory during the second quarter of 2005. The inventory write-off was related to specific inventory that was scrapped because we mutually agreed with our foundry partner that the inventory did not meet specifications. In exchange for the scrapped inventory, we received approximately \$1.9 million in wafer credits that we can apply against future purchases. Accordingly, approximately \$2.0 million of the decrease in our inventories was offset by an increase in prepaid expenses and other assets of approximately the same amount. The increase in accounts payable was primarily due to the growth of our overall operations and timing of vendor invoice payments.

Our investing activities used cash of \$0.9 million during the six months ended June 30, 2005. Cash was used to purchase research and development design tools and computer equipment to support our growing operations.

Our financing activities used net cash of \$0.4 million for the three months ended June 30, 2005. The primary use of cash was repayment of software license obligations. The sources of cash were the proceeds from exercises of stock options and repayment of stockholder notes received during the period.

Capital Resources

We believe that our existing cash and cash equivalents balance of \$76.0 million will be sufficient to meet our anticipated cash needs for at least the next 12 months. Our future capital requirements will depend on many factors, including the amount of revenue we generate, the timing and extent of spending to support product development efforts, the expansion of sales and marketing activities, the timing of introductions of new products, the costs to ensure access to adequate manufacturing capacity, and the continuing market acceptance of our products, and any future business acquisitions that we might undertake. However, if we do not meet our plan, we could be required, or might elect, to seek additional funding through public or private equity or debt financing and additional funds may not be available on terms acceptable to us or at all. We also might decide to raise additional capital at such times and upon such terms as management considers favorable and in the interests of the Company. For this purpose, during the second quarter of 2006, we filed a universal shelf registration statement on Form S-3, which the SEC has declared effective, under which we may sell up to \$150 million of our debt and/or equity securities (before reductions for expenses, underwriting discounts and commissions). We may sell these securities from time to time without prior announcement.

Table of Contents**Contractual Obligations**

The changes to our contractual obligations, other than the changes due to our payments for previously disclosed obligations, during the three months ended June 30, 2006 included:

On April 28, 2006, we entered into a purchase agreement with Synopsys, Inc. and acquired a three-year technology subscription license for a total fee of \$3.2 million to be paid in three annual installments. Remaining obligations related to this agreement as of June 30, 2006 are included in the table below as capital lease and other obligations.

On May 8, 2006, we entered into an amendment of the lease for our principal office located at 1875 Charleston Road, Mountain View, California 94043. Under the terms of the amended lease, we expanded our leased space to approximately 42,000 square feet at an additional estimated cost of \$1.4 million over five years. Remaining obligations related to this lease amendment as of June 30, 2006 are included in the table below as operating lease obligations.

As of June 30, 2006, our principal commitments consisted of operating and capital lease payments, which are summarized below (in thousands):

	Total	Less than 1 year	1-3 years	4-5 years	After 5 years
Operating lease obligations	\$ 4,373	\$ 841	\$ 2,606	\$ 926	\$
Capital lease and other obligations	2,744	1,362	1,382		
Wafer purchases	7,628	7,628			
Total	\$ 14,745	\$ 9,831	\$ 3,988	\$ 926	\$

In addition to the enforceable and legally binding obligations quantified in the table above, we have other obligations for goods and services entered into in the normal course of business. These obligations, however, either are not enforceable or legally binding or are subject to change based on our business decisions.

Off-Balance Sheet Arrangements

As part of our ongoing business, we do not participate in transactions that generate relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, or SPEs, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. As of June 30, 2006, we were not involved in any unconsolidated SPE transactions.

Indemnities, Commitments and Guarantees

In the normal course of business, we have made certain indemnities, commitments and guarantees under which we may be required to make payments in relation to certain transactions. These include agreements to indemnify our customers with respect to liabilities associated with the infringement of other parties' technology based upon our products, obligation to indemnify our lessors under facility lease agreements, and obligation to indemnify our directors and officers to the maximum extent permitted under the corporation laws of Delaware. The duration of such indemnification obligations, commitments and guarantees varies and, in certain cases, is indefinite. We have not recorded any liability for any such indemnification obligations, commitments and guarantees in the accompanying balance sheets. We do, however, accrue for losses for any known contingent liability, including those that may arise from indemnification provisions, when future payment is probable.

In addition, under master purchase agreements signed with Cisco in November 2005, we have agreed to indemnify Cisco and its contract manufacturers for costs incurred in rectifying epidemic failures, up to the greater of (on a per claim basis) 25% of all amounts paid to us by Cisco during the preceding 12 months or \$9.0 million, plus replacement costs. If we are required to make payments under this indemnity obligation, our operating results, financial condition and cash flows may be adversely affected.

Item 3: Quantitative and Qualitative Disclosures About Market Risk

Edgar Filing: NETLOGIC MICROSYSTEMS INC - Form 10-Q

The primary objective of our investment activities is to preserve principal while maximizing the income we receive from our investments without significantly increasing the risk of loss. Some of the securities permitted under our cash

Table of Contents

management policy may be subject to market risk for changes in interest rates. To mitigate this risk, we plan to maintain a portfolio of cash equivalent and short-term investments in a variety of securities which may include investment grade commercial paper, money market funds, government debt issued by the United States of America, state debt, certificates of deposit and investment grade corporate debt. Presently, we are exposed to minimal market risks associated with interest rate changes. We manage the sensitivity of our results of operations to these risks by maintaining investment grade short-term investments. Our cash management policy does not allow us to purchase or hold derivative or commodity instruments or other financial instruments for trading purposes. Additionally, our policy stipulates that we periodically monitor our investments for adverse material holdings related to the underlying financial solvency of the issuer. As of June 30, 2006, our investments consisted of money market funds. Our results of operations and financial condition would not be significantly impacted by either a 10% increase or decrease in interest rates due mainly to the short-term nature of our investment portfolio.

Our exposure to adverse movements in foreign currency exchange rates is primarily related to our wholly owned subsidiary's operating expenses in India, denominated in the local currency. A hypothetical change of 10% in foreign currency exchange rates would not have a material impact on our consolidated financial statements or results of operations. All of our sales are transacted in U.S. dollars.

Item 4: Controls and Procedures

Our management evaluated, with the participation of our Chief Executive Officer and Chief Financial Officer, the effectiveness of our disclosure controls and procedures as of June 30, 2006. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective to ensure that information we are required to disclose in reports that we file or submit under the Securities Exchange Act of 1934, as amended, is (i) recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms, and (ii) accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. During our last fiscal quarter, there were no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1A: Risk Factors

We face many significant risks in our business, some of which are unknown to us and not presently foreseen. These risks could have a material adverse impact on our business, financial condition and results of operations in the future. We have disclosed a number of material risks under Item 1A of our annual report on Form 10-K for the year ended December 31, 2005, which we filed with the Securities and Exchange Commission on February 28, 2006. The following discussion is of material changes to risk factors disclosed in that report.

We expect to derive substantially all of our revenue from sales of our knowledge-based processors, and, if the demand for these products does not grow, we may not achieve our growth and strategic objectives.

Our knowledge-based processors are used primarily in networking systems, including routers, switches, network access equipment and networked storage devices. We derive a substantial portion of our total revenue from sales of our knowledge-based processors in the networking market and expect to continue to derive a substantial portion of our total revenue from this market for the foreseeable future. Sales of our knowledge-based processors accounted for 86% and 93% of our total revenue during the six months ended June 30, 2006 and 2005, respectively. We believe our future business and financial success depends on continued market acceptance and increasing sales of our knowledge-based processors. In order to meet our growth and strategic objectives, networking original equipment manufacturers, or OEMs, must continue to incorporate our products into their systems as their preferred means of enabling network-aware processing of IP packets, and the demand for their systems must grow as well. Thus, our future success depends in large part on factors outside our control, and sales of our knowledge-based processors may not meet our revenue growth and strategic objectives.

Because we rely on a small number of customers for a significant portion of our total revenue, the loss of, or a significant reduction in, orders for our products from these customers would negatively affect our total revenue and business.

To date, we have been dependent upon orders for sales of knowledge-based processors to a limited number of customers, and, in particular, Cisco, for most of our total revenue. During the six months ended June 30, 2006 and 2005,

Table of Contents

Cisco and its contract manufacturers accounted for 59% and 80% of our total revenue, respectively. We expect that our future financial performance will continue to depend in large part upon our relationship with Cisco and several other networking OEMs.

We cannot assure you that existing or potential customers will not develop their own solutions, purchase competitive products or acquire companies that use alternative methods to enable network-aware processing in their systems. We do not have long-term purchase commitments from any of our OEM customers or their contract manufacturers, all of whom do business with us currently only on the basis of short-term purchase orders, which often are cancelable prior to shipment. The loss of orders for our knowledge-based processors for Cisco products or products of other major users of our knowledge-based processors would have a significant negative impact on our business.

We have a history of operating losses, may incur significant operating losses in the future and may not be able to sustain profitability.

We reported a net loss of \$4.4 million during the six months ended June 30, 2006, primarily as a result of the recording of \$10.7 million in-process research and developments costs associated with the acquisition of Cypress Semiconductor's network search engine products. For the year ended December 31, 2005, we reported net income of \$16.4 million. At June 30, 2006, we have an accumulated deficit of approximately \$87.1 million. To operate profitably on a consistent basis, we will have to continue to generate greater total revenue and control costs and expenses. We cannot assure you that we will be able to generate greater total revenue, or limit our costs and expenses, sufficiently to sustain profitability on a quarterly or annual basis.

We do not expect to sustain our recent revenue growth rate.

We have recently experienced significant revenue growth. Specifically, our total revenue increased 21% to \$49.2 million during the six months ended June 30, 2006 from \$40.5 million during the six months ended June 30, 2005. In addition, our total revenue increased 71% to \$81.8 million during the year ended December 31, 2005 from \$47.8 million during the year ended December 31, 2004. We do not expect similar revenue growth rates in future periods. Accordingly, you should not rely on the results of any prior quarterly or annual periods as an indication of the future rate of our revenue growth or our future financial results.

We are dependent on contract manufacturers for a significant portion of our revenue.

Many of our OEM customers, including Cisco, use third party contract manufacturers to manufacture their networking systems. These contract manufacturers represented 72% and 84% of our total revenue for the six months ended June 30, 2006 and 2005, respectively. Contract manufacturers purchase our products directly from us on behalf of networking OEMs. Although we work with our OEM customers in the design and development phases of their systems, these OEM customers are gradually giving contract manufacturers more authority in product purchasing decisions. As a result, we depend on a concentrated group of contract manufacturers for a substantial portion of our revenue. If we cannot compete effectively for the business of these contract manufacturers or if any of the contract manufacturers, which work with our OEM customers, experience financial or other difficulties in their businesses, our revenue and our business could be adversely affected. In particular, if one of our OEM customer's contract manufacturers becomes subject to bankruptcy proceedings, neither we nor our OEM customer may be able to obtain any of our products held by the contract manufacturer. In addition, we may not be able to recover any payments owed to us by the contract manufacturer for products already delivered or recover the products held in the contract manufacturer's inventory when the bankruptcy proceeding is initiated. If we are unable to deliver our products to our OEM customers in a timely manner, our business would be adversely affected.

A failure to successfully address the potential difficulties associated with international business could reduce our growth, increase our operating costs and negatively impact our business.

We conduct a significant amount of our business with companies that operate primarily outside of the United States, and intend to increase sales to companies operating outside of the United States. For example, our customers based outside the United States accounted for 55% of our total revenue during the six months ended June 30, 2006, and for 35% of our total revenue during the same period of 2005. Not only are many of our customers located abroad, but our two wafer foundries are based in Taiwan, and we outsource the assembly and some of the testing of our products to companies based in Taiwan and Hong Kong. We face a variety of challenges in doing business internationally, including:

foreign currency exchange fluctuations;

unanticipated changes in local regulations;

potentially adverse tax consequences, such as withholding taxes;

Table of Contents

timing and availability of export and import licenses;

political and economic instability;

reduced or limited protection of our intellectual property;

protectionist laws and business practices that favor local competition; and

additional financial risks, such as potentially longer and more difficult collection periods.

Because we anticipate that we will continue to rely heavily on foreign companies for our future growth, the occurrence of any of the circumstances identified above could significantly increase our operating costs, delay the timing of our revenue and harm our business and financial condition.

Our operating results could be adversely affected if we have to satisfy product warranty or liability claims.

If our products are defective or malfunction, we could be subject to product warranty or product liability claims that could have significant related warranty charges or warranty reserves in our financial statements. Further, we may spend significant resources investigating potential product design, quality and reliability claims, which could result in additional charges in our financial statements until such claims are resolved. For example, during the six months ended June 30, 2006, we have recorded additional warranty reserves while we investigate reports by one of our international customers of malfunctioning systems that include our knowledge-based processors. We cannot guarantee that the warranty reserves will either increase or decrease in future periods. While we have insurance for product liability claims for matters other than product warranty, we may not have sufficient insurance coverage for all of the claims that may be asserted against us. Moreover, these claims in the future, regardless of their outcome, could adversely affect our business.

We also rely on third parties for other products and services, including the assembly and testing of our products, and any failure by third parties to provide the tools and services we require could limit our growth and adversely affect our future operating results.

All of our products are assembled and tested by third-party vendors and require the use of high performance assembly and test equipment. In addition, in connection with the design of our products, we use software tools, which we obtain from third party software vendors, for simulation, layout and other design purposes. Our reliance on independent assembly, testing, software and other vendors involves a number of risks, including reduced control over delivery schedules, quality assurance and costs. We currently do not have long-term supply contracts with all of these third party vendors. As a result, most of these third party vendors are not obligated to provide products or perform services to us for any specific period, in any specific quantities or at any specific price, except as may be provided in a particular purchase order. The inability of these third party vendors to deliver high performance products or services of acceptable quality and in a timely manner, could lengthen our design cycle, result in the loss of our customers and reduce our revenue.

We also rely on third party component suppliers to provide custom designed integrated circuit packages for our products. In some instances, these package designs are provided by a single supplier. Our reliance on these suppliers involves a number of risks, including reduced control over delivery schedules, quality assurance and costs. We currently do not have long-term supply contracts with all of these package vendors. As a result, most of these third party vendors are not obligated to provide products or perform services to us for any specific period, in any specific quantities or at any specific price, except as may be provided in a particular purchase order. The inability of these third party vendors to deliver packages of acceptable quality and in a timely manner, particularly the sole source vendors, could adversely affect our delivery commitments and adversely affect our operating results or cause them to fluctuate more than anticipated.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(b) The Securities and Exchange Commission declared our first registration statement, filed on Form S-1 under the Securities Act of 1933 (File No. 333-114549) relating to our initial public offering of common stock, effective on July 8, 2004. We realized approximately \$39.2 million after offering expenses.

As of the date of this report, we used the net proceeds of the offering as follows:

We used \$10.5 million to repay existing debt under our credit lines with Silicon Valley Bank;

We used \$7.6 million to repay the convertible promissory notes we issued and sold in March 2004; and

We invested the remaining net proceeds in short-term, interest-bearing instruments, pending their use to fund working capital and other general corporate purposes, including capital expenditures and research and development.

Table of Contents

Item 4. Submission of Matters to a Vote of Stockholders

On May 18, 2006, we held an annual meeting of our stockholders. The stockholders elected two Class II directors to hold office until our 2009 annual meeting of stockholders. Each such director received the number of votes set forth below:

Name	For	Withheld
Douglas Broyles	18,364,172	230,596
Steve Domenik	17,960,979	633,789

Directors Ronald Jankov, Leonard Perham, Norman Godinho and Alan Krock were not subject to election at the annual meeting and will continue to serve on the board of directors after the meeting. An increase in the number of shares reserved for issuance under the Company's 2004 Equity Incentive Plan by adding an additional 1,500,000 shares and transferring to the 2004 Equity Incentive Plan an additional 700,000 shares currently available for issuance under the Company's 2004 Employee Stock Purchase Plan, and to approve the material terms of the 2004 Equity Incentive Plan for the purposes of Internal Revenue Code Section 162(m) was approved by the votes set forth below:

For	Against	Abstentions	Broker Non-Vote
8,885,342	5,612,299	9,874	4,087,253

The ratification of the appointment of PricewaterhouseCoopers LLP, an independent registered public accounting firm, as our independent auditors for the fiscal year ended December 31, 2006, was approved by the votes set forth below:

For	Against	Abstentions	Broker Non-Votes
18,277,774	307,552	9,442	0

The minutes of our 2005 annual meeting was approved by the votes set forth below:

For	Against	Abstentions	Broker Non-Votes
18,594,768	0	0	0

Item 5. Other Information

On August 1, 2006, in accordance with Nasdaq Marketplace rule 4350(i)(1)(A)(iv), our board of directors granted options to purchase a total of 37,500 shares of common stock to 5 new non-executive employees of the Company as an inducement material to each individual s entering into employment with the Company. All the stock options have an exercise price equal to the fair market value on the grant date. The options have a 10 year term and vest over four years as follows: 25 percent on the anniversary of the vesting commencement date, and with respect to one thirty-sixth of the remaining shares subject to such option at the end of each calendar month thereafter, subject in all instances to the optionee s continuous employment with the Company.
