SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 6-K

REPORT OF FOREIGN PRIVATE ISSUER

PURSUANT TO RULE 13a-16 OR 15d-16

UNDER THE SECURITIES EXCHANGE ACT OF 1934

FOR THE MONTH OF October 2007

COMMISSION FILE NUMBER: 1-07628

HONDA GIKEN KOGYO KABUSHIKI KAISHA

(Name of registrant)

HONDA MOTOR CO., LTD.

(Translation of registrant's name into English)

1-1, Minami-Aoyama 2-chome, Minato-ku, Tokyo 107-8556, Japan

(Address of principal executive offices)

Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F:

Form 20-F Form 40-F

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1): _____

Note: Regulation S-T Rule 101(b)(1) only permits the submission in paper of a Form 6-K if submitted solely to provide an attached annual report to security holders.

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7): _____

Indicate by check mark whether by furnishing the information contained in this Form, the registrant is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes No

If Yes is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82-_____

Honda Issues Third-Annual North American Environmental Report

TORRANCE, Calif., U.S.A., October 4, 2007 Honda released its third annual report on the company's environmental performance in North America, with a special emphasis on global warming and energy sustainability as two of the most critical environmental challenges Honda is seeking to address through its many product, manufacturing and facilities initiatives.

The 2007 North American Environmental Report primarily covers the company's operations during the period April 1, 2006 to March 31, 2007 (FY 2007). The report looks at the environmental performance of the company's automobile, power sports and power equipment products, its 14 major manufacturing plants in North America, and the corporate activities of 15 Honda group companies in the region.

We are pleased to provide our many customers and stakeholders with this report on Honda's ongoing efforts to reduce the environmental footprint of its operations in the North American region," said Tetsuo Iwamura, chief operating officer of Honda's North American Regional Operation. As Honda's largest region for automobile sales and production, North America plays an important role in contributing to our company's global initiative to advance its environmental performance.

The 2007 North American Environmental Report is available for viewing and download at the company's corporate Web site at www.honda.com, and its media web site at www.hondanews.com.

Following are highlights of the 2007 report:

Honda and Acura Automobiles

The company maintained its position as America's most fuel-efficient car company with an industry-leading U.S. corporate average fuel economy (CAFE) for model year 2006 Honda and Acura cars and light trucks of 29.1 miles per gallon. The company is seeking to increase its CAFE by five percent over 2005 levels by model year 2010.

Every model year 2007 Honda and Acura automobile designed and assembled in North America has achieved 90 percent or greater design recyclability¹.

Honda expanded sales of its ultra-clean, natural gas-powered Civic GX and the Phill home refueling appliance to additional Honda dealers in California and 20 dealers in New York.

The company has committed to the introduction of new, more efficient gasoline, gas-electric hybrid, and clean diesel powertrain technologies over the next several years.

100 percent of model year 2007 Honda and Acura automobiles sold in the U.S. met or exceeded both California's and the U.S. EPA's stringent Tier 2 Bin 5 exhaust emissions standards, without the use of fleet averaging.

¹ Vehicle recyclability calculated using Honda's own internal methods, based on the Japan Automobile Manufacturers' Association (JAMA) standard.

Power Sports Products

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

The company has applied cleaner, quieter and more efficient 4-stroke engine technology to the breadth of its North American power sports product lineup and is expanding the use of programmable fuel injection (PGM-FI) for further improvements in emissions and fuel efficiency.

Power Equipment and Marine Products

The company has applied 4-stroke engine technology to its complete North American power equipment line, and in the U.S. is applying the more stringent California emissions standards to products sold in all 50 states.

Table of Contents

North American Manufacturing (Green Factory)

Thirteen of the 14 major North American manufacturing plants operating during FY2007 were third-party certified to the ISO 14001:2004 environmental management standard.

CO₂ emissions from automobile manufacturing² increased about 37 percent to 1.07 million metric tons from an FY2001 baseline of 0.78 million metric tons, due in large part to increased production activity.

CO₂ emissions intensity, as measured by average CO₂ emissions per automobile produced, increased slightly from the FY2001 baseline of 709 kg to 711 kg in FY2007, but fell significantly from a seven-year high of 761 kg in FY2005, as the company moved to increase the utilization of its production capacity in the region.

Total energy used for each automobile produced fell 4.5 percent to 6.6 gigajoules from an FY2001 baseline of 6.9 gigajoules, due to ongoing efforts aimed at improving energy efficiency, as well as more efficient utilization of production capacity.

Emissions of volatile organic compounds from auto body painting (accounting for roughly 60 percent of all manufacturing-related VOC emissions) continued their decline from a seven-year high of 28.7 grams/meter² (g/m²) in FY2001 to 15.6 g/m² in FY 2007.

Auto-specific chemical releases, reported to the TRI and NPRI inventories for U.S. and Canada manufacturing facilities, declined 45 percent on a per-auto basis from FY2000 levels. Total chemical release fell 27 percent in the same time period.

Water consumed for each automobile produced in North America fell 7.6 percent to 730 gallons in FY2007 from 790 gallons in FY2006, but was up slightly from the FY2001 baseline of 700 gallons.

Waste to landfills per automobile produced fell 66 percent to 5.9 kilograms in FY2007 from a seven-year high of 17.4 kg in FY2001, as four Honda plants achieved zero waste to landfills.

As a result of Honda's Green Purchasing program, 80 percent of Honda's more than 600 North American OEM suppliers are now third-party certified to the ISO 14001 environmental management standard.

² CO₂ emissions from electricity and natural gas consumed in the manufacturing process.

Minimization of Waste and Toxic Substances

Two Honda facilities in North America attained Leadership in Energy and Environmental Design (LEED) Gold certification from the U.S. Green Building Council: Honda R&D Americas' central plant in Raymond, Ohio; and, American Honda's Northwest Regional Facility in Gresham, Oregon. The company is working to achieve Gold certification for two new buildings in FY2008: the Acura Design Studio, in Torrance, California; and, the Midwest Consolidation Center in Troy, Ohio.

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

Honda is engaged in projects to further reduce the end-of-life impact of its products, including hybrid battery recycling. The company is also researching ways to reduce automobile shredder residue (ASR); improve the recycling of catalytic converters; and, methods for end-of-life treatment of plastic fuel tanks.

Efforts to reduce or eliminate use of substances of concern were continued in FY2007, including reductions in the use of lead in circuit boards, the phase out of octa- and penta-polybrominated diphenyl ethers (PBDEs), and the reduction in the number of interior and exterior parts made with PVC.

Additional information on Honda's environmental performance outside of North America can be found in Honda Motor Company's Environmental Report, published annually since 1999, with a focus on Honda's activities in Japan available at world.honda.com. Also, an environmental report covering Honda's Asia/Oceania Region, has been published by Honda in Thailand, since 2000. In 2006, a newly compiled Corporate Social Responsibility Report covers environmental efforts in that region together with various aspects of a responsible corporate citizen.

Honda in North America

Honda began operations in North America in 1959, with the establishment of American Honda Motor Co., Inc., Honda's first overseas subsidiary. Honda now employs more than 35,000 associates in North America and operates 14 major manufacturing plants producing automobiles, motorcycles, all-terrain vehicles, personal watercraft, engines, transmissions and other components. Many of these products are designed and developed at Honda's U.S. R&D centers in Ohio, Los Angeles and North Carolina. Honda annually purchases more than \$16 billion in parts and materials from suppliers in North America.

Honda Announces Automobiles to be Displayed

at the 40th Tokyo Motor Show 2007

October 9, 2007 Honda Motor Co., Ltd. today announced that it will exhibit production and concept automobiles and a number of technologies at the 40th Tokyo Motor Show (sponsored by Japan Automobile Manufacturers Association, Inc.), to be held from Saturday, October 27 to Sunday, November 11, 2007, at Makuhari Messe in Chiba, Japan.

The theme for Honda's automobile booth for this year is: For the endless joy of mobility on our earth. Based on this theme, Honda will display a variety of advanced environmental technologies that address environmental issues such as a reduction in CO₂ emissions, together with the fun of mobility.

Two concept models will make their world premiere at the motor show. The CR-Z is a next-generation lightweight sports car equipped with Honda's original gas-electric hybrid system which achieves both clean performance and a high level of torque. The PUYO is a fuel cell vehicle which was designed based on out-of-box thinking to provide fun for both the vehicle owner and people around them as well. Also on display will be a model of the i-DTEC next-generation diesel engine, first announced in September at the Frankfurt Motor Show, which delivers both outstanding environmental performance and engine performance characteristics.

Moreover, the all-new Fit, which will go on sale in Japan in late October, will be on display. Since it was first introduced in 2001, the Fit has been widely acclaimed for its style, functionality, and outstanding fuel economy, with worldwide sales topping two million units. The all-new Inspire equipped with a new Variable Cylinder Management system, scheduled to go on sale in Japan later this year, will also be on display. Honda will exhibit a total of 18 vehicles representing 11 different models, including vehicles already on the market, those soon to be introduced, and future concept models.

In addition, a Next Energy display will showcase Honda's latest initiatives in new energy development, including technology for producing bio-ethanol from rice straw and the environmentally responsible next-generation thin-film solar cells, which will go on sale nationwide in Japan. Moreover, Honda's F1 and other racing machines that symbolize the challenge to realize new dreams and other advanced environmental technologies that enable people to enjoy mobility into the future will also be on display. Through these exhibits, Honda will propose a new direction for the future of mobility.

PUYO

CR-Z

- 1 -

Table of Contents

◆CR-Z

CR-Z stands for Compact Renaissance Zero an expression intended to capture the idea of a renaissance in the design of compact cars that begins anew from fundamentals.

This design research model of a lightweight hybrid sports car features advanced technologies that deliver enjoyable driving for all while reducing the vehicle's environmental footprint.

<Exterior design>

Designed to be Futuristic and Dynamic, the CR-Z combines powerful performance in a compact form with a futuristic image. For its frontal view, an over-sized grill with a high-performance look is offset by openings on each side that lighten the overall feel. In the rear, tube-shaped rear combination lamps ensure better rearward visibility. Design details emphasizing the CR-Z's advanced image include door mirrors that provide high visibility in a stylish form, LED headlights patterned after luminous bodies to convey a sharp impression, and jaunty fin-shaped sub-lights. Large, 19-inch wheels are ready for dynamic driving performance.

<Interior design>

The key words for the CR-Z's interior design are Hi-tech and Sporty. The goal was to create an all-new sporty interior that fuses the liberating feel of airy spaciousness with an advanced interface that brings out the fun of the drive. Mesh material on a simple framework construction is used throughout the interior to convey a light, sophisticated image without being oppressive. In the cockpit, the meter unit conveys the image of advanced technology enscathed in a piece of glass artwork, offering the functionality of immediate recognition while enhancing the driving experience with a futuristic and exhilarating feeling.

◆PUYO

PUYO is a Japanese onomatopoeia that expresses the sensation of touching the vehicle's soft body. It is meant to convey a warm, friendly impression.

The PUYO represents a new idea in mobility that brings together clean, safe and fun functionality in an environmentally responsible, people-friendly minimalist design featuring an ultra-high efficiency, small frame and fuel cell technology to please both users and onlookers alike.

<Exterior design>

The development theme for the PUYO exterior was to create a cornerless, Seamless Soft Box form that is kind to both people and the environment. The goal was to create a personable design with the feel of an adorable pet, while taking advantage of the maximum spaciousness of the box-shaped design. The PUYO's gel body features soft materials to promote greater real-world safety. Moreover, the body has been made luminescent to guide people into the proper operating position and notify them of the vehicle's condition, facilitating a more intimate relationship between people and their cars.

<Interior design>

Developed to have a Silky Feel, the PUYO's interior is designed to provide a refreshing, people-friendly space imbued with a feeling of transparency. Features such as an instrument panel monitor, controls that take advantage of the elastic qualities of cloth to rise up when the vehicle starts up, luminous fluid meter displays, and a joystick for intuitive operation are all designed to gently support occupants' senses and sensibilities.

Honda to Begin Sales of the All-New Fit in Japan

October 18, 2007 Honda Motor Co., Ltd. today announced plans to begin sales on Friday, October 26, 2007, in Japan of the all-new, completely redesigned Honda Fit. The Fit has gained popularity as a small car that features outstanding packaging, excellent fuel economy, and advanced styling.

The second-generation Fit was developed following the tradition of Honda's *man maximum, machine minimum*^{*1} concept with the goal of creating the ideal small car for a new age. To provide values which exceed customer expectations for a small car and to set a new benchmark in the highly competitive small car segment, packaging, utility and driving performance have been further advanced with the all-new Fit.

The packaging of the new Fit is based on Honda's innovative center tank layout, with a longer wheelbase and wider track for enhanced interior space and practicality, combined with the small-car maneuverability of a 4.7-meter minimum turning radius. The front pillar has been moved forward to create a spacious interior, while the exterior boasts exhilarating styling. An ingenious interior layout helped create a comfortable cabin with space equivalent to a mid-sized sedan. The new Fit's practicality has also been enhanced with four-mode Ultra Seat² and three-mode Ultra Luggage² storage spaces.

The new Fit's dynamic performance is made possible by a newly developed 1.3-liter *i*-VTEC engine that delivers maximum output of 73kW (100PS). Combined with a continuously variable transmission (CVT) and newly developed torque converter, the engine provides enjoyable driving and class-leading^{*3} 24 km/l fuel economy^{*4}. The body rigidity and crash safety performance were also enhanced while maintaining weight equivalent to the previous model. Moreover, the newly designed chassis also helps achieve superior comfort and steady handling.

Newly added to the Fit lineup is a Road Sailing (RS) version which highlights a sportier and sophisticated character with a newly developed 1.5-liter *i*-VTEC engine and a specially designed suspension with enhanced styling and a richer feel.

Honda Fit was first introduced in Japan in June 2001. It is now being produced in six factories in five countries and sold in approximately 115 countries around the world, with cumulative sales of more than two million units^{*5}.

*1 Honda's *man maximum, machine minimum* concept is a basic approach to car design that calls for maximizing the space available for humans and minimizing the space occupied by mechanical components.

*2 Standard equipment on Types L and RS, factory option on Type G.

*3 1.3-liter class

*4 Figures for Type G (FF) Fit, based on results of 10-15 mode fuel-efficiency testing by Japanese Ministry of Land, Infrastructure and Transport.

*5 Honda calculations

Fit 1.3 G (FF)

Fit RS (FF)

Monthly sales targets in Japan:

12,000 units

Table of Contents

Manufacturer's suggested retail pricing for Japan indicates models shown in photos

Type	Engine	Transmission	Drive	Price	
				(including Consumption Tax)	(before tax)
G	1.3 -liter	CVT	FF	¥1,197,000	¥1,140,000
		5AT	4WD	¥1,407,000	¥1,340,000
L	SOHC	CVT	FF	¥1,344,000	¥1,280,000
		i-VTEC	5AT	4WD	¥1,554,000
RS	1.5 -liter	CVT	FF	¥1,575,000	¥1,500,000
		5MT		¥1,785,000	¥1,700,000
		SOHC			
	i-VTEC	5AT	4WD	¥1,785,000	¥1,700,000

* Prices are for reference only and do not include insurance, taxes (except consumption tax), registration, or other fees.

* A separate recycling fee will be levied.

* The recycling fee includes a recycling deposit (to cover expenses required to recycle shredder dust, air bags, and fluorocarbons, plus an information management fee) and a capital management charge.

* For Premium Deep Violet Pearl, Premium Yellow Pearl, and Premium White Pearl body colors, add ¥31,500 (¥30,000 before consumption tax).

‡ Body colors (12 colors, including 5 new colors)

Brilliant Sky Metallic (new), Premium Deep Violet Pearl (new), Sherbet Blue Metallic (new),

Cool Rose Metallic (new), Deep Sapphire Blue Pearl (new), Premium Yellow Pearl,

Premium White Pearl, Nighthawk Black Pearl, Alabaster Silver Metallic, Milano Red,

Storm Silver Metallic, Taffeta White

‡ Interior colors (2 colors)

Type G & L: Black Blue (Main material: Emboss print jersey)

Type RS: Black (Main material: Suede-type fabric)

◆ **Key features of the New Fit**

Exterior styling

The exterior styling is intended to express both spaciousness and dynamic motion, with front pillars moved forward for an advanced, super-forward form. The fuel lid dovetails seamlessly with the monoform styling thanks to Honda's first application of a push-lift opener. The door mirrors provide greater visibility with 30%^{*6} more surface area supported by a compact mount located at the base of the front quarter light. The addition of five new colors brings the total available body colors to twelve.

*6 Honda calculations; compared to the previous model

- 2 -

Table of Contents

Packaging

The center tank layout was carried over from the previous model to help maintain the maneuverability expected of a small car while allowing enhancement of cabin space and practicality. The overall length has been increased 55 mm^{*7} to 3,900 mm and the width 20 mm^{*7} to 1,695 mm, while the 1,525 mm^{*7} height remains the same as the previous model, allowing for use of tower parking.

While the wheelbase has been increased 50 mm^{*7} to 2,500 mm, the tread size has also been increased to help optimize the steering angle and maintain the minimum turning radius of the previous model at 4.7 meters.

An emergency tire repair kit is provided instead of a spare tire, freeing up 64 liter^{*8} of storage space beneath the floor. Combined with the space in the luggage room this brings the total available luggage space to an amazing 427 liter^{*8}.

The rear hatch opening is located 605 mm from the ground, making it easy to load and unload luggage. The rear doors also open to a wide 80° angle, providing even easier access for passengers and facilitating loading and unloading of luggage.

*7 Honda calculations; compared to the previous model

*8 Honda calculations in accordance with the VDA method

Interior

The cabin features an ingenious layout with equivalent space as one of Honda's middle-class sedans, providing passengers a natural feeling of comfort.

The large three-meter cluster provides superior visibility with permanent illumination. The speedometer, located in the center of the cluster, features a large LED display providing of a broad range of information, including current fuel economy and range indications.

To ensure a comfortable driving position for all drivers, a tilt and telescopic steering column^{*9} as well as a ratchet-operated seat height adjuster^{*10} have been applied.

The front quarter windows are three times^{*11} of the size of those in the previous model, and the width of the front pillar has been reduced by 20 mm^{*11} to provide enhanced visibility. A new Sky Roof provides even more sense of space and comfort in the cabin. The power sun shield can be opened and closed with the touch of a switch for a comfortable cabin all year round.

The front seat is based on the seat frame of a middle-class sedan and fitted with springs and padding optimized for seat hold and ride comfort. The rear seats are 20 mm wider^{*11}, 15 mm deeper^{*11}, and have cushions 10 mm thicker^{*11} for enhanced ride comfort. The left and right headrests fit into the seat back for easy seat arrangement and 30%^{*11} better rearward visibilities.

*9 Standard equipment on Type L and RS.

*10 Standard equipment on Type L and RS; factory option on Type G.

*11 Honda calculation; compared to the previous model

Table of Contents

Utility

The four modes of Ultra Seat provide enhanced utility.

- Utility mode: Easy one-motion dive down and release operation of the rear seats. The luggage space can be extended to a maximum length of 1,720 mm*¹² thanks to the spacious full-flat floor.
- Long mode: In Utility mode, place the passenger seat in the full reclining position to create a space up to 2,400 mm long to carry long objects.
- Tall mode: Fold up the rear seat cushions to take advantage of Fit's 1,280 mm roof height the perfect way to make space for tall items like house plants.
- Refresh mode: Remove the front seat headrests and put the front seats in full reclining position to stretch out across the front and rear seats for a rest.

The three Ultra Luggage modes provide added practicality to Fit's cargo space.

- Upper/Lower mode: Lift the flexible luggage board from the floor to separate the luggage space into upper and lower partitions. The net used to create the upper space is perfect for carrying irregularly shaped objects that won't sit flat.
- Tall mode: Open the flexible luggage board to create enough space to load tall objects.
- Regular mode: The under floor space is perfect for storing sports gear or raincoats and umbrellas. And once the lid is on, you won't have to worry about soiling your other luggage.

The Fit interior is replete with practical utility, starting with 10 cup-holders and a wide range of easy-to-use storage spaces.

A Honda HDD InterNavi*¹³ navigation system equipped with a 7-inch wide display and a 40GB hard disk is available as a factory option. And with the new Fit Honda introduces two new services to enhance the driving experience of members of the InterNavi Premium Club: New Road Data and Earthquake Information System.

*¹² As measured with the passenger seat moved all the way forward

*¹³ Equipped with rear-camera, 7-inch wide display, TV (one-segment broadcasting), AM/FM tuner, DVD/CD player, AV input terminals, illuminated Audio Remote Control Switch, 4 speakers

Table of Contents

Powertrain

The new Fit comes with either of two new engines: a 1.3 liter i-VTEC or a 1.5 liter i-VTEC. In addition to the superior low-rpm torque of its predecessors, the new 1.3/ i-VTEC brings more power to the high rpm range and delivers enhanced fuel economy in everyday driving. The new four-valve configuration with enhanced intake performance and drive-by-wire technology combine to help achieve a power rating of 73 kW(100PS). The use of only one of the two intake valves at low rpm increases EGR efficiency, helping the Fit achieve a class-leading*¹⁴ 24 km per liter*¹⁵ fuel economy.

The new 1.5 liter i-VTEC delivers superior fuel economy combined with lively dynamic performance and plentiful torque throughout all speed ranges. Intake valve timing and clearance settings switch to match for low- and high-speed driving and optimized valve overlap in the low-, mid-, and high speed ranges enhances intake and exhaust efficiency for power output of 88 kW(120PS) and superior fuel economy of 19.6 km per liter*¹⁶.

The Fit's continuous variable transmission delivers enhanced drive and off-the-line acceleration thanks to the implementation of a new torque converter. Higher gear ratios also help improve fuel economy by keeping rpms low during cruising. The low-friction, high-efficiency oil pump and pulleys as well as a new creep control system provide optimized creep control at low speeds and during idling for improved fuel economy.

*¹⁴ 1.3 liter class

*¹⁵ Calculations for Type G (FF) Fit, based on results of 10-15 mode fuel efficiency testing by Japanese Ministry of Land, Infrastructure and Transport.

*¹⁶ Calculations for Type RS (FF w/CVT) Fit, based on results of 10-15 mode fuel efficiency testing by Japanese Ministry of Land, Infrastructure and Transport.

Body

Body construction and design have been ingeniously modified to improve body rigidity and crash safety performance even while maintaining the same weight as the previous model. Noise and vibration during idling as well as booming noise while cruising are quieter than ever thanks to highly efficient connections of structural members and enhanced body stiffness.

The implementation of sound-absorbing acoustic materials in the roof, carpet, and dashboard insulation contribute both to greater quietness and to lower weight. The RS Type is equipped with special damping and acoustic materials to achieve quietness expected of more expensive vehicles.

Chassis

The newly designed chassis realizes both superior ride comfort and steady handling. The rigid body and supple suspension provide an exceptional dynamic performance.

The new Fit features a McPherson strut front suspension.

The H-shaped torsion beam rear suspension achieves the maximum possible space for the rear seats and cargo area as well as supple ride comfort and steady handling.

The new electric power steering has more capacity than the previous model, and improvements to steering gear box rigidity and attachment points provide a more direct steering feel.

Table of Contents

Safety Performance

The RS Type comes with Honda's vehicle stability assist (VSA) system, which is the first implementation of VSA with a manual transmission vehicle in this class*¹⁷. In addition, engine torque control and DBW throttle control enable precise control of the vehicle in driving.

A side curtain air bag system function with the front seat i-side air bag system to provide added protection against head injuries during side collisions. Honda's Advanced Compatibility Engineering Body provides enhanced self-protection and better compatibility in collisions with other vehicles. Honda pedestrian-injury reduction body design helps protect pedestrians from injury in the event of a collision.

All Fit models are equipped with an electronic brake distribution ABS system plus brake assist functionality as standard equipment. In addition to an ISO FIX child seat bar, tether anchors are provided in both the left and right rear seats as standard equipment.

*¹⁷ Both 1.3 liter and 1.5 liter classes

Environmental Performance

All types have been certified by the Japanese Ministry of Land, Infrastructure, and Transport as having achieved a 75% reduction with respect to emissions regulations for 2005. All types equipped with CVT*¹⁸ exceed Japanese fuel economy standards for 2010 by 20%; G- and L-Type equipped with 4WD as well as RS-Type equipped with 5MT exceed Japanese fuel economy standards for 2010 by 5%; RS-Type equipped with 4WD comply with Japanese fuel economy standards for 2010.

The use of VOCs in the cabin has been reduced to a minimum, and all types comply with indoor density guidelines set out by the Japanese Ministry of Health, Labor and Welfare.

*¹⁸ Type RS (FF/CVT) equipped with factory options exceed Japanese fuel economy standards for 2010 by 10%.

Rotating passenger seat

A rotating passenger seat is available to take full advantage of Fit's ease of access. Incorporating the same styling, ride comfort, and bolstering as the base model, this exclusive seat has been designed with a specially contoured seat cushion for enhanced ease of access. Oversized bearings help ensure smooth rotation.

295 mm of foot space during rotation – a full 65 mm more than the previous model – has been achieved together with a seat height of 585 mm for enhanced ease of access.

The tip up configuration of the ULTR SEAT Tall mode enables easy loading and unloading of a wheelchair through the rear seats.

HONDA MOTOR CO., LTD. REPORTS

CONSOLIDATED FINANCIAL RESULTS

FOR THE FISCAL SECOND QUARTER AND

THE FIRST HALF ENDED SEPTEMBER 30, 2007

Tokyo, October 25, 2007 Honda Motor Co., Ltd. today announced its consolidated financial results for the fiscal second quarter and the fiscal first half ended September 30, 2007.

Second Quarter Results

Honda's consolidated net income for the fiscal second quarter ended September 30, 2007 totaled JPY 208.4 billion (USD 1,806 million), an increase of 63.0% from the same period in 2006. Basic net income per Common share for the quarter amounted to JPY 114.94 (USD 1.00), an increase of JPY 44.89 from JPY 70.05 for the corresponding period in 2006. One Honda's American Depository Share represents one Common Share.

Consolidated net sales and other operating revenue (herein referred to as revenue) for the quarter amounted to JPY 2,971.3 billion (USD 25,742 million), an increase of 12.9% from the same period in 2006. Honda estimates that if calculated at the same exchange rate as the same period in 2006, revenue for the quarter would have increased by approximately 7.9%.

Consolidated operating income for the quarter totaled JPY 286.3 billion (USD 2,481 million), an increase of 48.3% compared to the same period in 2006. This increase in operating income was primarily due to the increased profit attributable to higher revenue, continuing cost reduction efforts and the positive impact of the currency effects caused by the depreciation of the Japanese yen which offset the negative impact of increased raw material costs and the increased depreciation expenses, SG&A expenses and R&D expenses.

Consolidated income before income taxes, minority interest and equity in income of affiliates for the quarter totaled JPY 269.9 billion (USD 2,339 million), an increase of 65.0% from the same period in 2006.

Equity in income of affiliates amounted to JPY 26.2 billion (USD 227 million) for the quarter, a decrease of 4.4% from the same period in 2006.

Table of Contents

Business Segment

With respect to Honda's sales for the fiscal second quarter by business segment, unit sales of motorcycles totaled 2,333 thousand units, which was a decrease of 17.2% from the same period in 2006. Unit sales in Japan totaled 107 thousand units, an increase of 9.2% from the same period in 2006. Overseas unit sales was 2,226 thousand units, a decrease of 18.1% from the same period in 2006*, due mainly to the decreased unit sales of parts for local production at Honda's affiliates accounted for under the equity method in Asia, more than offsetting an increase in unit sales in other regions especially in Latin America. Revenue from external customers increased 13.8%, to JPY 381.6 billion (USD 3,306 million) from the same period in 2006, due mainly to the positive impact of the currency translation effects, offsetting the negative impact of the decreased unit sales. Operating income increased by 15.4% to JPY 37.0 billion (USD 321 million) from the same period in 2006, due mainly to the positive currency effects caused by the depreciation of the Japanese yen, offsetting the negative impact of the increased sales incentives in North America, the increased SG&A expenses and R&D expenses.

* Net sales of Honda-brand motorcycle products that are manufactured and sold by overseas affiliates accounted for under the equity method, are not included in net sales and other operating revenue when no parts were supplied by Honda or its subsidiaries, in conformity with U.S. generally accepted accounting principles. Accordingly, these unit sales are not included in the financial results. Sales of such products amounted to approximately 1,020 thousand units for the quarter.

Honda's automobile unit sales totaled 937 thousand units, an increase of 6.0% from the same period in 2006. In Japan, unit sales amounted to 143 thousand units, a decrease of 16.4% from the same period in 2006. Overseas unit sales increased 11.4% to 794 thousand units from the same period in 2006, due mainly to the increased unit sales of the CR-V in North America, Europe, Asia and the increased unit sales in other regions. Revenue from external customers increased 12.3% to JPY 2,356.4 billion (USD 20,415 million) from the same period in 2006, due mainly to the increased unit sales and the positive impact of the currency translation effects. Operating income increased 62.8% to JPY 213.0 billion (USD 1,846 million) from the same period in 2006, due mainly to the positive impact of the increased profit attributable to higher revenue, continuing cost reduction efforts and the positive currency effects caused by the depreciation of the Japanese yen, offsetting the negative impact of the increase of sales incentives in North America, increased raw material costs, the increased depreciation expenses, SG&A expenses and R&D expenses.

Table of Contents

Revenue from external customers in financial services business increased 36.4% to JPY 133.7 billion (USD 1,159 million) from the same period in 2006, due mainly to the increased finance receivables, the positive impact of the currency translation effects and the increased operating lease revenues. Operating income increased 29.7% to JPY 29.3 billion (USD 254 million) from the same period in 2006, due primarily to the increased profit attributable to higher revenue, the decreased SG&A expenses and the positive currency effects caused by the depreciation of the Japanese yen.

Honda's power products unit sales totaled 1,258 thousand units, an increase of 6.0% from the same period in 2006. In Japan, unit sales totaled 141 thousand units, an increase of 11.0% from the same period in 2006. Overseas unit sales totaled 1,117 thousand units, an increase of 5.4% from the same period in 2006, due mainly to increased unit sales of lawnmowers in Europe, increased unit sales in Asia, including the increased unit sales of general-purpose engines in China and increased unit sales in other regions, offsetting decreased unit sales of lawnmowers in the United States. Revenue from external customers in power product and other businesses increased by 1.0% to JPY 99.4 billion (USD 862 million) from the same period in 2006, due mainly to the increased unit sales of power products and the positive impact of the currency translation effects. Operating income decreased 6.5% to JPY 6.9 billion (USD 60 million) from the same period in 2006. This was primarily due to the increased R&D expenses, offsetting the positive impact of the decreased SG&A expenses and the currency effects caused by the depreciation of the Japanese yen.

Table of Contents

Geographical Information

With respect to Honda's sales for the fiscal second quarter by geographic areas, in Japan, revenue for domestic and exports sales totaled JPY 1,215.5 billion (USD 10,530 million), up by 3.4% compared to the same period in 2006, due primarily to the increased revenue from exports in automobile business and the positive currency effects caused by the depreciation of the Japanese yen, which offset the negative impact of the decreased unit sales of automobiles in Japan. Operating income totaled JPY 73.3 billion (USD 635 million), up by 6.3% from the same period in 2006, due primarily to the increased profit attributable to higher revenue, continuing cost reduction efforts, the decreased SG&A expenses and the positive currency effects caused by the depreciation of the Japanese yen, offsetting increased raw material costs, the increased depreciation expenses and R&D expenses.

In North America, revenue increased by 9.6% to JPY 1,557.1 billion (USD 13,490 million) from the same period in 2006, due mainly to the increased unit sales in automobile business and the positive impact of the currency translation effects. Operating income increased by 21.2% to JPY 116.0 billion (USD 1,005 million) from the same period in 2006, due primarily to the positive impact of increased profit attributable to higher revenue mainly in automobile and financial services businesses, continuing cost reduction efforts and the currency effects caused by the depreciation of the Japanese yen, which offset the negative impact of the change in model mix, the increased sales incentives in motorcycle and automobile business, increased raw material costs and the increased depreciation expenses.

In Europe, revenue increased by 25.8% to JPY 390.8 billion (USD 3,386 million), from the same period in 2006, due primarily to the increased unit sales in automobile business and the positive impact of the currency translation effects. Operating income increased by 84.7% to JPY 16.7 billion (USD 145 million) from the same period in 2006, due primarily to the increased profit attributable to higher revenue, continuing cost reduction efforts and the positive currency effects caused by the depreciation of the Japanese yen, which offset the increased SG&A expenses.

Table of Contents

In Asia, revenue increased by 32.6% to JPY 415.6 billion (USD 3,601 million) from the same period in 2006, due primarily to the increased unit sales in automobile business and the positive impact of the currency translation effects. Operating income increased by 82.9% to JPY 33.4 billion (USD 289 million) from the same period in 2006, due mainly to the increased profit attributable to higher revenue and the positive currency effects caused by the depreciation of the Japanese yen, which offset the negative impact of increased SG&A expenses.

In Asia, in addition to subsidiaries, many affiliates accounted for under the equity method manufacture and sell Honda-brand products. Operating income does not include income from these affiliates. Income from these affiliates is recorded as equity in income of affiliates and reflected in net income. Accounting terms of some of the affiliates differ from the Company's.

In other regions, revenue increased by 36.4% to JPY 267.9 billion (USD 2,321 million) compared to the same period in 2006, due mainly to the increased unit sales in all of the business segments and the positive impact of the currency translation effects. Operating income increased by 40.7% to JPY 30.1 billion (USD 261 million) from the same period in 2006, due mainly to the increased profit attributable to higher revenue, continuing cost reduction efforts and the positive currency effects caused by the depreciation of the Japanese yen, offsetting the negative impact of the increased SG&A expenses.

Table of Contents

First Half-Year Results

Honda's consolidated net income for the fiscal first half year ended September 30, 2007 totaled JPY 374.6 billion (USD 3,245 million), an increase of 38.1% from the same period in 2006. Basic net income per Common share for the period amounted to JPY 206.26 (USD 1.79), an increase of JPY 57.74 from JPY 148.52 for the same period in 2006.

Consolidated revenue for the period amounted to JPY 5,902.4 billion (USD 51,135 million), an increase of 12.8% from the same period in 2006. Honda estimates that if calculated at the same exchange rate as the same period in 2006, revenue for the quarter would have increased by approximately 6.9%.

Consolidated operating income for the period totaled JPY 508.0 billion (USD 4,401 million), an increase of 28.1% compared to the same period in 2006. This increase in operating income was primarily due to the increased profit attributable to higher revenue, continuing cost reduction efforts and the positive currency effects caused by the depreciation of the Japanese yen, which offset increased raw material costs, the increased depreciation expenses, SG&A expenses and R&D expenses.

Consolidated income before income taxes, minority interest and equity in income of affiliates for the period totaled JPY 488.2 billion (USD 4,230 million), an increase of 37.5% from the same period in 2006.

Equity in income of affiliates amounted to JPY 63.2 billion (USD 548 million) for the period, an increase of 9.8% from the same period in 2006.

Table of Contents

Business Segment

With respect to Honda's sales for the fiscal first half by business segment, unit sales of motorcycles totaled 4,586 thousand units, a decrease of 11.7% from the same period in 2006. Unit sales in Japan totaled 191 thousand units, an increase of 2.1%. Overseas unit sales was 4,395 thousand units, a decrease of 12.3%*, due mainly to the decreased units sales of parts for local production at Honda's affiliates accounted for under the equity method in Asia, offsetting an increase in unit sales in other regions especially in Latin America. Revenue from external customers increased 16.2%, to JPY 749.9 billion (USD 6,497 million) from the same period in 2006, due mainly to the positive impact of the currency translation effects. Operating income increased by 50.7% to JPY 68.1 billion (USD 591 million) from the same period in 2006, due mainly to the positive currency effects caused by the depreciation of the Japanese yen, offsetting the increased SG&A expenses and R&D expenses.

* Of the net sales of Honda-brand motorcycle products that are manufactured and sold by overseas affiliates accounted for under the equity method, those with respect to which parts for manufacturing were not supplied from Honda or its subsidiaries are not included in net sales and other operating revenue, in conformity with U.S. generally accepted accounting principles. Accordingly, these unit sales are not included in the financial results. Sales of such products amounted to approximately 2,120 thousand units for the period.

Honda's unit sales of automobiles was 1,883 thousand units, increased by 5.8% from the same period in 2006. In Japan, unit sales decreased 14.7% to 279 thousand units. Overseas unit sales increased 10.4% to 1,604 thousand units, due mainly to the increased unit sales in North America, Europe, Asia and other regions. Revenue from external customers increased 11.7% to JPY 4,683.7 billion (USD 40,576million) from the same period in 2006, due to the increased unit sales and the positive impact of the currency translation effects. Operating income increased 28.6% to JPY 361.3 billion (USD 3,131 million) from the same period in 2006.

Revenue from external customers in financial services business increased 38.1% to JPY 259.6 billion (USD 2,249 million) from the same period in 2006, due mainly to the increased operating lease revenues. Operating income increased 22.5% to JPY 63.5 billion (USD 550 million) from the same period in 2006, due mainly to the increased profit attributable to higher revenue and the positive currency effects caused by the depreciation of the Japanese yen, which offset the negative impact of the increased SG&A expenses.

Honda's unit sales of power products was 2,787 thousand units, down by 4.3% from the same period in 2006. In Japan, unit sales totaled 276 thousand units, an increase of 4.5%. Overseas unit sales decreased 5.1%, to 2,511 thousand units, due mainly to the declined unit sales in North America. Revenue from external customers in power product and other businesses increased by 3.3% to JPY 209.1 billion (USD 1,812 million) from the same period in 2006, due mainly to the positive impact of the currency translation effects. Operating income was JPY 14.9 billion (USD 130 million), a decrease of 19.1% from the same period in 2006, due mainly to the increased R&D expenses, which offset the positive impact of the decreased SG&A expenses and the positive currency effects caused by the depreciation of the Japanese yen.

Table of Contents

Geographical Information

With respect to Honda's sales for the fiscal first half by geographical segment, in Japan, revenue for domestic and exports sales was JPY 2,391.8 billion (USD 20,721 million), up by 4.7% compared to the same period in 2006, due primarily to the increased revenue from exports in automobile business and the positive currency effects caused by the depreciation of the Japanese yen, which offset the negative impact of the decreased unit sales of automobile business in Japan. Operating income was JPY 133.9 billion (USD 1,161 million), up by 13.6% from the same period in 2006, due primarily to higher revenue, continuing cost reduction efforts and the positive currency effects caused by the depreciation of the Japanese yen, which offset increased raw material costs, the increased depreciation expenses, SG&A expenses and R&D expenses.

In North America, revenue increased by 8.7% to JPY 3,140.5 billion (USD 27,207 million) from the same period in 2006, due mainly to the increased unit sales in automobile business and the positive impact of the currency translation effects. Operating income increased by 1.4% to JPY 213.0 billion (USD 1,846 million) from the same period in 2006.

In Europe, revenue increased by 24.4% to JPY 791.0 billion (USD 6,853 million) compared to the same period in 2006, due primarily to the increased unit sales in automobile and power product businesses and the positive impact of the currency translation effects. Operating income increased by 74.4% to JPY 27.0 billion (USD 234 million) from the same period in 2006.

In Asia, revenue increased by 34.6% to JPY 808.9 billion (USD 7,008 million) from the same period in 2006, due primarily to the increased unit sales in automobile business and the positive impact of the currency translation effects. Operating income increased by 86.7% to JPY 70.3 billion (USD 610 million) from the same period in 2006, due mainly to the positive impact of the increased profit attributable to higher revenue and the currency effects caused by the depreciation of the Japanese yen, which offset the negative impact of the increased SG&A expenses.

In other regions, revenue increased by 32.4% to JPY 494.2 billion (USD 4,282 million) compared to the same period in 2006, due mainly to the increased unit sales in automobile business and the positive impact of the currency translation effects. Operating income increased by 41.5% to JPY 51.9 billion (USD 450 million) from the same period in 2006.

Table of Contents

Consolidated Statements of Cash Flows for the Fiscal First Half

Consolidated cash and cash equivalents at the end of the period from April 1, 2007 through September 30, 2007 decreased by JPY 81.9 billion (USD 710 million) from March 31, 2007, to JPY 863.6 billion (USD 7,482 million). The reasons for the increases or decreases for each cash flow activity are as follows.

Cash flows from operating activities

Net cash provided by operating activities amounted to JPY 547.5 billion (USD 4,743 million) for the fiscal first half ended September 30, 2007, mainly attributable to the increase in net income, the increase in depreciation and the decrease in trade accounts and notes receivable, which offset the decrease in trade accounts and notes payable. Cash inflows from operating activities increased by JPY 86.6 billion (USD 751 million) compared with the same period in 2006.

Cash flows from investing activities

Net cash used in investing activities amounted to JPY 894.3 billion (USD 7,748 million), due mainly to capital expenditures, the acquisitions of finance subsidiaries-receivables, which exceeded collections of and proceeds from sales of finance subsidiaries-receivables and the purchase of operating lease assets. Cash outflows from investing activities increased by JPY 109.2 billion (USD 946 million) compared with the same period in 2006.

Cash flows from financing activities

Net cash provided by financing activities amounted to JPY 225.7 billion (USD 1,956 million), which was attributable to proceeds from long-term debt and increase in short-term debt, which exceeded repayment of long-term debt, cash dividends paid and payment for purchase of treasury stock. Cash inflows from financing activities decreased by JPY 118.5 billion (USD 1,027 million) compared with the same period in 2006.

Table of Contents*Supplemental information for cash flows*

	FY2006	FY2007	FY2007	FY2008
	Year-end	1st half	Year-end	1st half
Shareholders' equity ratio (%)	38.8	38.5	37.2	38.2
Shareholders' equity ratio (%) on a market price basis	62.9	65.1	62.7	56.0
Repayment period (years)	5.6	4.0	4.4	3.9
Non-financial services businesses (years)	0.4	0.2	0.4	0.4
Interest coverage ratio	6.8	7.7	6.7	5.2
Non-financial services businesses	48.0	56.6	59.3	46.7

Shareholders' equity ratio: shareholders' equity / total assets

Shareholders' equity ratio on a market price basis: issued common stock stated at market price / total assets

Repayment period: interest bearing debt / cash flows from operating activities

Interest coverage ratio: (cash flows from operating activities + interest paid) / interest paid

Explanatory notes:

1. All figures are calculated based on the information included in the consolidated financial statements.

2. Cash flows from operating activities are obtained from the consolidated statement of cash flows.

Interest bearing debt represents Honda's outstanding debt with interest payments, which are included on the consolidated balance sheets.

Certain revisions for misclassifications and reclassifications have been made to the consolidated financial statements for the fiscal first year ended September 30, 2006 to conform to the presentation used for the same period in 2007

Table of Contents**Forecasts for Fiscal Year Ending March 31, 2008**

In regard to the forecasts of the financial results for the fiscal year ending March 31, 2008, Honda projects consolidated results to be as shown below:

FY2008 Forecasts for Consolidated Results**First year ending March 31, 2008**

	Yen (billions)	Changes from FY2007
Net sales and other operating revenue	12,300	+10.9%
Operating income	880	+3.3%
Income before income taxes, minority interest and equity in income of affiliates	870	+9.7%
Net income	640	+8.0%
	Yen	
Basic net income per common share	352.85	

These forecasts are based on the assumption that the average exchange rates for the Japanese yen to the U.S. dollar and the Euro will be JPY 113 and JPY 148, respectively, for the second half of the year ending March 31, 2008, and JPY 116 and JPY 155, respectively, for the full year ending March 31, 2008.

Table of Contents**Profit Redistribution Policy and Dividend per Share of Common Stock for fiscal years 2007 and 2008**

The Company strives to carry out its operations from a global perspective and to increase its corporate value. With respect to the redistribution of profits to our shareholders, which the Company considers to be one of the most important management issues, and its basic policy for dividends is to make distributions after taking into account its long-term consolidated earnings performance.

The Company will also acquire its own shares at the optimal timing with the goal of improving efficiency of the Company's capital structure. The present goal is to maintain a shareholders return ratio (i.e. the ratio of the total of the dividend payment and the repurchase of the Company's own shares to consolidated net income) of approximately 30%. Retained earnings will be allocated toward financing R&D activities that are essential for the future growth of the Company and capital expenditures and investment programs that will expand its operations for the purpose of improving business results and strengthening the Company's financial condition.

The Board of Directors of Honda Motor Co., Ltd., at its meeting held on October 25, 2007, resolved to make the quarterly dividend of JPY 22 per share of common stock, the record date of which is September 30, 2007. It also intends to distribute third quarter and the year-end cash dividends of JPY 22 per share, the record date of which will be December 31, 2007 and March 31, 2008, respectively. The total projected annual dividend per share of common stock for the fiscal year ending March 31, 2008, is JPY 86 per share, an increase of JPY 19 per share from the annual dividends paid for the year ended March 31, 2007.

Details of Quarterly Dividends

Record Date	Dividends Per Share (yen)				
	The End of First Quarter	The End of	The End of Third Quarter	Year-end	Total
		Second Quarter (Interim)			
Performance in Fiscal 2007		30	17	20	67
Performance in Fiscal 2008	20	22			
Projected Dividends			22	22	86

This announcement contains forward-looking statements as defined in Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Such statements are based on management's assumptions and beliefs taking into account information currently available to it. Therefore, please be advised that Honda's actual results could materially differ from those described in these forward-looking statements as a result of numerous factors, including general economic conditions in Honda's principal markets and foreign exchange rates between the Japanese yen and the U.S. dollar, the Euro and other major currencies, as well as other factors detailed from time to time.

Preparing for the Future

A look at the global economy shows there are concerns of a moderate slowdown in the U.S. economy. Europe's economy is expected to recover steadily, Asian economies are expected to grow steadily, and Japan's economy is also expected to maintain its moderate economic recovery. However, the global environment in which Honda's management operates still lacks transparency because of global political and economic uncertainty, fluctuations in oil and raw material prices, and currency, finance and capital markets movements. As a result, the Company expects its operating environment to continue to be severe.

It is under these circumstances that the Company will strengthen its corporate structure quickly and flexibly to meet the requirements of its customers and society and the changes in its business environment. Also, in order to improve the competitiveness of its products, the Company will endeavor to enhance its R&D, production and sales ability. Furthermore, the Company will continue striving to earn even more trust and understanding from society through Companywide activities. The Company recognizes that further enhancing the following specific areas is essential to its success:

1. Research and Development

Along with efforts to develop even more effective safety and environmental technologies, the Company will enhance the creativity in its advanced technology and products, and will create and swiftly introduce new value-added products that meet specific needs in various markets around the world. The Company will also continue efforts in the research of future technologies.

2. Production Efficiency

The Company will establish efficient and flexible production systems and expand production capacity at its global production bases, with the aim of increasing its capability of supplying high-quality products.

3. Sales Efficiency

The Company will continue to make efforts to expand product lines through the innovative use of IT and to upgrade sales and service structure, in order to respond to the various needs of its customers around the world.

Table of Contents

4. Product Quality

Responding to increasing customers' demand, the Company will upgrade its quality control through enhancing the functions of and coordination among the development, purchasing, production, sales and service departments.

5. Safety Technologies

The Company will develop safety technologies for accident prediction and prevention, technologies to reduce injuries to passengers and pedestrians from car accidents, and technologies for reducing aggressivity, as well as expand its line-up of products incorporating such technologies. The Company intends to enhance its contribution to traffic safety in motorized societies both in Japan and in abroad. The Company also intends to remain active in a variety of traffic safety programs, including advanced driving and motorcycling training schemes provided by local dealerships.

6. The Environment

The Company will step up its efforts to create better, cleaner, more fuel-efficient engine technologies and to improve further the recyclability throughout its product lines. The Company will also advance fuel cells and develop Solar cell business. In addition, the Company will continue its efforts to minimize environmental impact, such as setting global targets to reduce the environmental burden as measured by the Life Cycle Assessment*, in all of its business fields, including production, logistics and sales.

* Life Cycle Assessment: A comprehensive system for quantifying the impact Honda's products have on the environment at the different stages in their life cycles, from material procurement and energy consumption to waste disposal.

7. Continuing to Increase Society's Trust in and Understanding toward Honda

In addition to continuing to provide products incorporating Honda's advanced safety and environmental technologies, the Company will continue striving to earn even more trust and understanding from society by, among other things, undertaking activities for corporate governance, compliance, and risk management and contributing to society.

Through these Company-wide activities, the Company will strive to materialize Honda's visions of Value Creation (Creating New Value for our Customers), Globalization (Expanding Regional Operations), and Commitment for the Future (Developing Safety and Environmental Solutions), with the aim of sharing joy with Honda's customers, thus becoming a company that society wants to exist.

Explanatory notes:				

1. The geographical breakdown of net sales is based on the location of external customers.
2. Unit sales are the total of sales of completed products of Honda and its consolidated subsidiaries, and sales of parts for local production at Honda's affiliates accounted for under the equity method.
3. Figures in brackets represent unit sales of motorcycles only.
4. Net sales of power product & other businesses include revenue from sales of power products and relevant parts, leisure businesses and trading businesses.

Table of Contents

Significant Accounting Policies:

1. Consolidated subsidiaries

Number of consolidated subsidiaries: 396

2. Affiliated companies

Number of affiliated companies: 102

3. Changes of consolidated subsidiaries and affiliated companies

Consolidated subsidiaries:

Newly formed consolidated subsidiaries: 9

Reduced through reorganization: 18

Affiliated companies:

Newly formed affiliated companies: 3

Reduced through reorganization: 3

4. The Company prepares its consolidated financial statements in conformity with accounting principles generally accepted in the United States of America, since the Company has listed its American Depositary Shares on the New York Stock Exchange and files reports with the U.S. Securities and Exchange Commission.
5. The average exchange rates for the three months ended September 30, 2007 were ¥117.87=U.S.\$1 and ¥161.88= euro 1. The average exchange rates for the same period last year were ¥116.26=U.S.\$1 and ¥148.16= euro 1. The average exchange rates for the fiscal first half ended September 30, 2007 were ¥119.33=U.S.\$1 and ¥162.30= euro 1 as compared with ¥115.38=U.S.\$1 and ¥145.97= euro 1 for the same period last year.
6. United States dollar amounts have been translated from yen solely for the convenience of the reader at the rate of ¥115.43=U.S.\$1, the mean of the telegraphic transfer selling exchange rate and the telegraphic transfer buying exchange rate prevailing on the Tokyo foreign exchange market on September 28, 2007.
7. Honda's common stock-to-ADS exchange ratio is one share of common stock to one ADS.
8. Inventories are stated at the lower of cost, determined principally by the first-in, first-out method, or market.
- 9.

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

Honda classifies its debt and equity securities in the following categories: available-for-sale, trading, or held-to-maturity. Debt securities that are classified as held-to-maturity securities are reported at amortized cost. Debt and equity securities classified as trading securities are reported at fair value, with unrealized gains and losses included in earnings. Other marketable debt and equity securities are classified as available-for-sale securities and are reported at fair value, with unrealized gains or losses, net of deferred taxes included in accumulated other comprehensive income (loss) in the stockholders' equity section of the consolidated balance sheets.

10. Goodwill, all of which is allocated to Honda's reporting units, is not amortized but instead is tested for impairment at least annually.
11. Depreciation of property, plant and equipment is calculated principally by the declining-balance method based on estimated useful lives and salvage values of the respective assets.
12. Honda applies hedge accounting for certain foreign currency forward contracts related to forecasted foreign currency transactions between the Company and its subsidiaries.
13. The allowance for credit losses is maintained at an amount management deems adequate to cover estimated losses on finance receivables. The allowance is based on management's evaluation of many factors, including current economic trends, industry experience, inherent risks in the portfolio and the borrower's ability to pay.
14. Finance subsidiaries of the Company purchase insurance to cover a substantial amount of the estimated residual value of vehicles leased to customers. The allowance for losses on lease residual values is maintained at an amount management deems adequate to cover estimated losses on the uninsured portion of the vehicles' lease residual values. The allowance is also based on management's evaluation of many factors, including current economic conditions, industry experience and the finance subsidiaries' historical experience with residual value losses.

Table of Contents

15. Provisions for retirement benefits are provided based on the fair value of both projected benefit obligations and plan assets at the end of the fiscal year to cover for employees' retirement benefits. The Company recognizes its overfunded or underfunded status for the defined benefit postretirement plan as an asset or liability in its consolidated balance sheets and recognizes changes in the funded status in accumulated comprehensive income (loss), net of taxes. Net transition obligation has been amortized over approximately 19 years since the fiscal year ended March 31, 1990. Prior service cost (benefit) is amortized by using the straight-line method and the estimated average remaining service years of employees. Actuarial loss is amortized if unrecognized net gain or loss exceeds ten percent of the greater of the projected benefit obligation or the market-related value of plan assets by using the straight-line method and the estimated average remaining service years of employees.

16. Estimated warranty expenses are provided based on historical warranty claim experience with consideration given to the expected level of future warranty costs as well as current information on repair costs. Included in warranty expenses accruals are costs for general warranties on vehicles Honda sells and product recalls.

Table of Contents**Significant Accounting Policy Change**

1. In September 2006, the Securities and Exchange Commission (SEC) issued Staff Accounting Bulletin No. 108, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements* (SAB No. 108). SAB No. 108 provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying current year misstatements for the purpose of materiality assessment. SAB No. 108 requires that registrants quantify a current year misstatement using an approach that considers both the impact of prior year misstatements that remain on the balance sheet and those that were recorded in the current year income statement. The Company historically quantified misstatements and assessed materiality based on a current year income statement approach. The transition provisions of SAB No. 108 permit the Company to adjust for the cumulative effect on retained earnings of immaterial errors related to prior years.

The Company adopted SAB No. 108 effective beginning of the fiscal year ended March 31, 2007, and adjusted the items described below in the accompanying consolidated financial statements as of the beginning of the fiscal year ended March 31, 2007 to correct the prior year misstatements, which were considered to be immaterial to the consolidated statements of income and consolidated balance sheets in prior years under the income statement approach. The net impact of these adjustments decreased the Company's beginning retained earnings and beginning accumulated other comprehensive loss for 2007 by ¥62,640 million, net of tax effect of ¥31,235 million, and ¥18,149 million, respectively.

The Company adopted the provisions of SAB 108 for the fiscal year ended March 31, 2007. As a result of the adoption, the Company adjusted the beginning retained earnings in the consolidated financial statements for the six months ended September 30, 2006. The impact of misstatements to the consolidated financial statements was immaterial. Accordingly, the Company had not revised the consolidated statement of income and consolidated balance sheet except for beginning retained earnings.

(1) The Company and its certain domestic subsidiaries in Japan historically calculated depreciation of property, plant and equipment, using a salvage value determined as 5% of the acquisition cost. However, since the sales proceeds received for the liquidated assets and their economical value at the end of its useful life historically have been nominal, the Company and its certain domestic subsidiaries assessed the adequacy of the salvage value and concluded that they should have calculated depreciation using the salvage value of ¥1 for its property, plant and equipment. The Company and its certain domestic subsidiaries recalculated depreciation expenses retrospectively considering the corrected salvage value. The reassessment indicated that an accumulated overstatement of property, plant and equipment in the consolidated financial statements had occurred.

(2) Equity in income of affiliates should be recognized based on affiliates' consolidated financial statements in accordance with U.S. generally accepted accounting principles. However, the Company historically recognized equity in income of affiliates based on the results of operations of the parent-only financial statements of the affiliates, as the Company assessed that the difference between the total amounts of equity in income on the consolidation basis and those on the parent-only basis had been immaterial to the Company's consolidated financial statements under the income statement approach. This misstatement resulted in an accumulated understatement of equity in income of affiliates and the carrying value of the investments in affiliates in the consolidated financial statements.

(3) The Company reclassified the residual tax effect of minimum pension liabilities included in accumulated other comprehensive income during the year ended March 31, 2006, which related to corporate tax rate changes in the past based on the proportional allocation over the expiration of unrecognized obligation. However, the residual tax effect should have been reclassified only when the pension plan is liquidated or dissolved under the portfolio approach. This misstatement resulted in an understatement of accumulated other comprehensive loss and corresponding overstatement in income tax benefit.

2. The company adopted the FASB Interpretation (FIN) No. 48, *Accounting for Uncertainty in Income Taxes* as of April 1, 2007. This Interpretation clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with SFAS No. 109, *Accounting for Income Taxes*. This Interpretation prescribes a two step process for the recognition and measurement in the financial statement of a tax position taken or expected to be taken in a tax return. The adoption of FIN 48 had an immaterial impact on the Company's financial statements.

Table of Contents**Notes to Consolidated balance sheets:**

1. The allowance for assets are as follows:

	Mar.31, 2007	Yen (millions) Sep. 30, 2007	Sep. 30, 2006
The allowance for doubtful trade accounts and notes receivables	8,199	7,520	8,259
The allowance for credit losses for finance subsidiaries-receivables	33,512	36,442	37,478
The allowance for losses on lease residual values for financial-subsiidiaries receivables	33,928	26,631	35,243
The allowance for inventory losses and obsolescence	27,521	29,955	29,733

2. Net book value of property, plant and equipment which were subject to specific mortgages securing indebtedness and debt-related mortgages are as follows:

	Mar.31, 2007	Yen (millions) Sep. 30, 2007	Sep. 30, 2006
Mortgage securitized debt			
Property, plant and equipment	23,654	35,338	34,732
A finance subsidiary pledged as collateral finance subsidiaries-receivables	1,931	374	4,569
Debt related mortgages			
Short-term debt	2,882	5,034	7,451
Long-term debt	17,025	12,851	14,403

3. Honda has entered into various guarantee and indemnification agreements which are primarily for employee bank/loans to costs for their housing costs are as follows:

	Mar.31, 2007	Yen (millions) Sep. 30, 2007	Sep. 30, 2006
Bank loans of employees for their housing costs	41,151	38,689	43,585

If an employee defaults on his/her loan payments, Honda is required to perform under the guarantee. The undiscounted maximum amount of Honda's obligation to make future payments in the event of defaults were shown as above. As of September 30, 2007, no amount has been accrued for any estimated losses under the obligations, as it is probable that the employees will be able to make all scheduled payments.

Notes to Consolidated statements of stockholders' equity

The total amount of dividends for the fiscal first half ended September 30, 2007, was 72,748 million yen. The total amount of dividends for the fiscal second quarter, the Board of Directors of Honda Motor Co., Ltd., at its meeting held on October 25, 2007, resolved, was 39,921 million yen.

Table of Contents**Notes to information about per common share :**

Stockholders' equity per common share and basic net income per common share are as follows:

	Mar. 31, 2007	Yen Sep. 30, 2007	Sep. 30, 2006
Stockholders' equity per common share	2,460.28	2,666.67	2,364.61
Basic net income per common share	324.62	206.26	148.52

Stockholders' equity per common share has been computed by dividing stockholders' equity by the number of shares outstanding at the end of each period. The number of common shares, at the end of the year ended March 31, 2007 and fiscal first half ended September 30, 2007 and 2006 were 1,821,992,908, 1,813,782,887 and 1,823,680,974, respectively. Basic net income per common share has been computed by dividing net income available to common stockholders by the weighted average number of shares outstanding during each period. The weighted average number of shares outstanding for the year ended March 31, 2007 and fiscal first half ended September 30, 2007 and 2006 were 1,824,675,228, 1,816,129,778 and 1,826,739,817, respectively. There were no potentially dilutive shares issued during the year ended March 31, 2007 and fiscal first half ended September 30, 2007 and 2006.

Table of Contents

Reclassifications and immaterial revisions of classifications:

Certain revisions for misclassifications have been made to the consolidated financial statements for the fiscal first year ended September 30, 2006 to conform to the presentation used for the same period in 2007, as follows. Certain revisions for misclassifications have already been made to the consolidated financial statements for the fiscal year ended March 31, 2007 in the same way.

1. Minority interest and minority interest in income, which were included in other liabilities and other expenses-other, respectively, have been revised to be disclosed independently in consolidated balance sheets and consolidated statements of income. Minority interest in income and cash dividends paid to minority interests, which were included in other liabilities and other, net, in cash flows from operating activities, have been revised to be disclosed independently in cash flows from operating activities and cash flows from financing activities, respectively, in the consolidated statements of cash flows.
2. Auction rate securities, which were classified as cash equivalents, have been revised to be classified as available-for-sale securities due within one year, which are included in other current assets in the consolidated balance sheets. Payment for purchase of auction rate securities and proceeds from sales of auction rate securities have been revised to be classified in payment for purchase of available-for-sale securities and proceeds from sales of available-for-sale securities in the consolidated statements of cash flows, respectively.
3. The long-term portion of deferred tax liabilities and deferred tax assets related to the lease transactions of finance subsidiaries, which were classified in other current liabilities and deferred income taxes, have been revised to be classified in other liabilities and other assets, respectively.
4. The long-term portion of accrued expenses and prepaid expenses related to pension benefit plans, which were included in accrued expenses and other current assets have been revised to be classified in other liabilities and other assets, respectively. The long-term portion of deferred tax liabilities, which were included in other current liabilities, and deferred tax assets, have also been revised to be classified in other liabilities and other assets.
5. The long-term portion of prepaid expenses, deferred income and accrued expenses related to extended vehicle service contracts of the subsidiaries in the United States, which were included in other current assets, trade payables accounts and accrued expenses, respectively, have been revised to be classified in other liabilities and other assets. The long-term portion of related deferred tax liabilities, which were included in other current liabilities, and deferred income taxes have also been revised to be classified in other liabilities and other assets.

Certain revisions for misclassifications have been made to the consolidated financial statements for the fiscal first half ended September 30, 2006 and the fiscal year ended March 31, 2007 to conform to the presentation used for the fiscal first half ended September 30, 2007, as follows.

1. Investor level goodwill of affiliates, which was classified in other assets, has been reclassified to investments and advances-affiliates.
2. The long-term portion of deferred tax assets related to pension benefit plans, which were included in deferred income taxes in current assets have been reclassified to other assets.

Table of Contents**[7] Segment Information**

Honda has four reportable segments: the Motorcycle business, the Automobile business, the Financial services business and the Power product and other businesses, which are based on Honda's organizational structure and characteristics of products and services. Operating segments are defined as components of Honda's about which separate financial information is available that is evaluated regularly by management in deciding how to allocate resources and in assessing performance. The accounting policies used for these reportable segments are consistent with the accounting policies used in Honda's consolidated financial statements.

Principal products and services, and functions of each segment are as follows:

Segment	Principal products and services	Functions
Motorcycle business	Motorcycles, all-terrain vehicles (ATVs), personal watercrafts and relevant parts	Research & Development, Manufacturing, Sales and related services
Automobile business	Automobiles and relevant parts	Research & Development, Manufacturing Sales and related services
Financial services business	Financial, and insurance services	Retail loan and lease related to Honda products, and Others
Power product & other businesses	Power products and relevant parts, and others	Research & Development, Manufacturing Sales and related services, and Others

**Honda Sets All-Time Record for Worldwide Production
for the First Half of a Fiscal Year**

October 29, 2007 Honda Motor Co., Ltd., today announced a summary of automobile production, Japan domestic sales, and export results for the month of September and the first half of the current fiscal year (April-September 2007), including all-time records for worldwide auto production and production in regions outside of Japan for the first half of the fiscal year.

<Production>

September 2007

Due to a decrease in production for the domestic market, production in Japan experienced a year-on-year decrease for the first time in two months (since July 2007).

Production outside Japan experienced a year-on-year increase for the 26th consecutive month (since August 2005).

Worldwide production experienced a year-on-year decrease for the 26th consecutive month (since August 2005).

Honda set an all-time record for the month of September for production in regions outside of Japan and worldwide production, as well as production in Europe. The production in Asia and China marked an all-time record for any month.

First Half of Current Fiscal Year (April - September 2007)

Due to a decrease in production for the domestic market, total production in Japan for the first half of the current fiscal year experienced a year-on-year decrease for the first time in four years (since the fiscal year ended March 31, 2004).

Due to increased production in North America and Asia, production outside of Japan for the first half of the current fiscal year experienced a year-on-year increase for the eleventh consecutive year (since the fiscal year ended March 31, 1998).

Worldwide production for the first half of the current fiscal year experienced a year-on-year increase for the fourth consecutive year (since the fiscal year ended March 31, 2005).

Honda set all-time fiscal first half records for production in regions outside Japan and worldwide production, as well as for production in North America, the U.S., Europe, Asia and China.

Table of Contents

<Japan Domestic Market Sales>

September 2007

Total domestic sales for the month of September experienced a year-on-year decline for the ninth consecutive month (since January 2007).

New vehicle registrations in September experienced a year-on-year decline for the fifth consecutive month (since May 2007).

Sales of mini-vehicles in September experienced a year-on-year decline for the seventh consecutive month (since March 2007).

<Vehicle registrations - excluding mini-vehicles>

Fit was the industry's second best selling car among new vehicle registrations for the month of September, with sales of 10,745 units. Sales of *StepWGN* totaled 5,525 units.

<Mini-vehicles - under 660cc>

Life was the industry's third best selling car among mini-vehicles for the month of September, with sales of 9,481 units. *Zest* was the industry's eighth best selling mini-vehicle with sales of 5,946 units.

First Half of Current Fiscal Year (April - September 2007)

Total domestic sales for the first half of the current fiscal year experienced a year-on-year decline for the second consecutive year (since the fiscal year ended March 31, 2007).

New vehicle registrations for the first half of the current fiscal year experienced a year-on-year decline for the second consecutive year (since the fiscal year ended March 31, 2007).

Sales of mini-vehicles for the first half of the current fiscal year experienced a year-on-year decline for the first time in four years (since the fiscal year ended March 31, 2004).

<Vehicle registrations - excluding mini-vehicles>

Fit was the industry's third best selling car among new vehicle registrations for the first half of the current fiscal year, with sales of 46,064 units. *Stream* was the industry's tenth best selling car with sales of 29,124 units.

<Mini-vehicles - under 660cc>

Life was the industry's sixth best selling car among mini-vehicles for the first half of the current fiscal year with sales of 40,770 units. *Zest* was the industry's ninth best selling mini-vehicle with sales of 24,388 units.

<Exports from Japan>

September 2007

Due mainly to an increase in exports to North America, Europe and Asia, total exports from Japan in September experienced a year-on-year increase for the third consecutive month (since July 2007).

First Half of Current Fiscal Year (April - September 2007)

Due mainly to increased exports to North America and Asia, total exports from Japan for the first half of the current fiscal year experienced a year-on-year increase for the fourth consecutive year (since fiscal year ended March 31, 2005).
