SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 20-F

REGISTRATION STATEMENT PURSUANT TO SECTION 12 (b) OR (g) OF THE SECURITIES EXCHANGE ACT OF 1934

OR

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended: June 30, 2007

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number: 0-29190

**CRESUD SOCIEDAD ANONIMA COMERCIAL INMOBILIARIA
FINANCIERA Y AGROPECUARIA**

(Exact name of Registrant as specified in its charter)

CRESUD INC.

(Translation of Registrant's name into English)

Republic of Argentina
(Jurisdiction of incorporation or organization)

Moreno 877, 23 Floor,
(C1091AAQ) Buenos Aires, Argentina
(Address of principal executive offices)

Edgar Filing: CRESUD INC - Form 20-F

Securities registered or to be registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
American Depositary Shares, each representing ten shares of Common Stock	Nasdaq National Market of the Nasdaq Stock Market
Common Stock, par value one Peso per share	Nasdaq National Market of the Nasdaq Stock Market*

* Not for trading, but only in connection with the registration of American Depositary Shares, pursuant to the requirements of the Securities and Exchange Commission.

Securities registered or to be registered pursuant to Section 12(g) of the Act: None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act: None

The number of outstanding shares of Common Stock of Cresud Sociedad Anónima Comercial, Inmobiliaria, Financiera y Agropecuaria as of June 30, 2007 was:

Shares of Common Stock 309,576,220

Indicate by check mark if the registrant is a well known seasoned issuer, as defined in Rule 405 of the Securities Act: Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15 (d) of the Securities Exchange Act of 1934. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act (check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark which financial statement item the registrant has elected to follow. Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

DISCLOSURE REGARDING FORWARD-LOOKING INFORMATION

The Private Securities Litigation Reform Act of 1995 provides a Safe Harbor for forward looking statements.

This Form 20-F report contains or incorporates by reference statements that constitute forward-looking statements, regarding the intent, belief or current expectations of our directors and officers with respect to our future operating performance. Such statements include any forecasts, projections and descriptions of anticipated cost savings or other synergies. Words such as anticipate, expect, intend, plan, believe, seek, variations of such words, and similar expressions are intended to identify such forward-looking statements. You should be aware that any such forward-looking statements are not guarantees of future performance and may involve risks and uncertainties, and that actual results may differ from those set forth in the forward-looking statements as a result of various factors (including, without limitations, the actions of competitors, future global economic conditions, market conditions, foreign exchange rates, and operating and financial risks related to managing growth and integrating acquired businesses), many of which are beyond our control. The occurrence of any such factors not currently expected by us would significantly alter the results set forth in these statements.

Factors that could cause actual results to differ materially and adversely include, but are not limited to:

changes in general economic, business or political or other conditions in Argentina or changes in general economic or business conditions in Latin America;

changes in capital markets in general that may affect policies or attitudes toward lending to Argentina or Argentine companies;

changes in exchange rates or regulations applicable to currency exchanges or transfers;

unexpected developments in certain existing litigation;

increased costs;

unanticipated increases in financing and other costs or the inability to obtain additional debt or equity financing on attractive terms; and

the factors discussed under Risk Factors .

You should not place undue reliance on such statements, which speak only as of the date that they were made. Our independent public accountants have not examined or compiled the forward-looking statements and, accordingly, do not provide any assurance with respect to such statements. These cautionary statements should be considered in connection with any written or oral forward-looking statements that we might issue in the future. We do not undertake any obligation to release publicly any revisions to such forward-looking statements after filing of this Form to reflect later events or circumstances or to reflect the occurrence of unanticipated events.

CERTAIN MEASURES AND TERMS

As used throughout this Form 20-F, the terms Cresud , Company , we , us , and our refer to Cresud Sociedad Anónima Comercial, Inmobiliaria Financiera y Agropecuaria, together with our consolidated subsidiaries, except where we make clear that such terms refer only to the parent company.

References to Tons , tons or Tns. are to metric tons, to kgs are to kilograms, to ltrs are to liters and Hct are to hectares. A metric ton is equal to 1,000 kilograms. A kilogram is equal to approximately 2.2 pounds. A metric ton of wheat is equal to approximately 36.74 bushels. A metric ton of corn is equal to approximately 39.37 bushels. A metric ton of soybean is equal to approximately 36.74 bushels. One gallon is equal to 3.7854

Edgar Filing: CRESUD INC - Form 20-F

liter. One hectare is equal to approximately 2.47 acres. One kilogram of live weight beef cattle is equal to approximately 0.5 to 0.6 kilogram of carcass (meat and bones).

Table of Contents

PRESENTATION OF FINANCIAL AND CERTAIN OTHER INFORMATION

In this Form 20-F, references to US\$ and U.S. dollars are to United States Dollars, and references to Ps. , Peso or Pesos are to Argentine Pesos.

This Form 20-F contains our audited consolidated financial statements as of June 30, 2007 and 2006 and for the years ended June 30, 2007, 2006 and 2005. Our consolidated financial statements have been audited by Price Waterhouse & Co. S.R.L. Buenos Aires Argentina, member firm of PricewaterhouseCoopers, an independent registered public accounting firm, whose report is included herein. We prepare our consolidated financial statements in Pesos and in conformity with generally accepted accounting principles used in Argentina, as set forth by the Federación Argentina de Consejos Profesionales de Ciencias Económicas (FACPCE) and as implemented, adapted, amended, revised and/or supplemented by the Consejo Profesional de Ciencias Económicas de la Ciudad Autónoma de Buenos Aires (CPCECABA) (collectively Argentine GAAP). In addition, we must comply with the regulations of the Comisión Nacional de Valores (CNV), the National Securities Commission in Argentina, which differ in certain significant respects from generally accepted accounting principles in the United States of America (US GAAP). Such differences involve methods of measuring the amounts shown in the consolidated financial statements as well as additional disclosures required by US GAAP and Regulation S-X of the Securities and Exchange Commission (SEC). See Note 17 to our consolidated financial statements for a description of the principal differences between Argentine GAAP and U.S. GAAP, as they relate to us, and a reconciliation to U.S. GAAP of net income and shareholders' equity.

As discussed in Note 2.d), in order to comply with regulations of the CNV, we discontinued inflation accounting as from February 28, 2003. The application of this CNV regulation represented a departure from Argentine GAAP. However, such departure has not had a material effect on our consolidated financial statements.

In addition, in accordance with the CNV regulations, deferred income taxes have been accounted for on an undiscounted basis. The CNV resolution represented a departure from Argentine GAAP. Such departure did not have a significant impact on our consolidated financial statements. However, as further discussed below, the CPCECABA issued revised accounting standards. One of these standards requires companies to account for deferred income taxes on an undiscounted basis, thus aligning the accounting to that of the CNV. Since the CNV adopted the CPCECABA standards effective July 1, 2006, there is no longer a difference on this subject between Argentine GAAP and the CNV regulations.

Effective July 1, 2006, we adopted Technical Resolution No. 22 Agricultural Activities (RT No. 22). RT No. 22 prescribes the accounting treatment, financial statement presentation, and disclosures related to agricultural activity. Agricultural activity is the management by an entity of the biological transformation of living animals or plants (biological assets) for sale, into agricultural produce, or into additional biological assets. RT No. 22 prescribes, among other things, the accounting treatment for biological assets during the period of growth, degeneration, production, and procreation, and for the initial measurement of agricultural produce at the point of harvest. It requires measurement at fair value less estimated point-of-sale costs from initial recognition of biological assets up to the point of harvest, other than when fair value cannot be measured reliably on initial recognition. RT No. 22 requires that a change in fair value less estimated point-of-sale costs of a biological asset be included in profit or loss for the period in which it arises. RT No. 22 also requires that gains or losses arising on initial recognition of agricultural produce at fair value less estimated point-of-sale costs to be included in profit or loss for the period in which it arises. In agricultural activity, a change in physical attributes of a living animal or plant directly enhances or diminishes economic benefits to the entity. RT No. 22 is applied to agricultural produce, which is the harvested product of the entity's biological assets, only at the point of harvest. Accordingly, RT No. 22 does not deal with the processing of agricultural produce after harvest; for example, the processing of milk into cheese.

Biological transformation comprises the processes of growth, degeneration, production, and procreation that cause qualitative or quantitative changes in a biological asset. Harvest is the detachment of produce from a biological asset or the cessation of a biological asset's life processes. Biological transformation results in the

Table of Contents

following types of outcomes: asset changes through (i) growth (an increase in quantity or improvement in quality of an animal or plant), (ii) degeneration (a decrease in the quantity or deterioration in quality of an animal or plant), or (iii) procreation (creation of additional living animals or plants).

The adoption of RT No. 22 did not have a significant impact in our measurement and recognition of biological transformation. Rather, it changed the format of our income statement. Under RT No. 22 we disclose certain components of our costs as separate line items in the income statement. There was no change in our gross profit for any of the periods presented.

Prior to the adoption of RT No. 22 gains or losses arising from initial recognition of biological assets and agricultural produce as well as changes in fair value of biological assets were included as a deduction of costs of sales. Under RT No. 22 these changes are disclosed separately in the income statement under the line item titled "Production income" in our income statement.

Also, prior to the adoption of RT No. 22, costs directly related to the transformation of biological assets and agricultural produce were also included as an addition to costs of sales. Under RT No. 22, these costs are disclosed separately in the income statement under the line item titled "Cost of production" in our income statement due to the direct relationship to the transformation of biological assets and agricultural produce.

The adoption of RT No. 22 did not affect our recognition of revenue which is included in the line item titled "Sales" in our income statement. See Note 3 a) for our revenue recognition policies. As a result of the adoption of RT No. 22, our costs of sales only show certain direct costs related to the sales of agricultural produce other than selling expenses. RT No. 22 intends to purport that costs of sales are not significant in agricultural activities while costs of biological transformation into agricultural produce represent the major costs of these activities.

In addition, under RT No. 22, Exhibits Cost of Sales and Cost of production included in Note 18 e) and f) to our income statement present a reconciliation of changes in the carrying amount of biological assets between the beginning and the end of the current period. This reconciliation includes (a) the gain or loss arising from changes in fair value less estimated point-of-sale costs; (b) increases due to purchases; (c) decreases attributable to sales and biological assets classified as held for sale; (d) decreases due to harvest; (e) increases resulting from business combinations, if any; (f) other changes.

Adoption by CNV of CPCECABA standards

The CNV issued General Resolutions 485 and 487 on December 29, 2005 and January 26, 2006, respectively which adopted, with certain modifications, the new accounting standards previously issued by the CPCECABA through its Resolution CD 93/2005. These standards were effective for our fiscal year ended June 30, 2007.

The most significant changes included in the accounting standards adopted by the CNV relate to (i) changes in the impairment test of long-lived assets and (ii) changes to deferred income tax accounting. The new standards provide for the accounting treatment of differences between the tax basis and book basis of non-monetary items for deferred income tax calculation purposes when companies prepare price-level restated financial statements. The new accounting standard mandates companies to treat these differences as temporary. However, the standard allows a one-time accommodation to continue treating these differences as permanent if this policy had been applied by the Company prior to the adoption of the standard. As such, we elected to continue treating differences as permanent. In addition, deferred income taxes should be accounted on an undiscounted basis.

Also, under the new standards, the carrying value of a long-lived asset is considered impaired when the expected cash flows from such asset is separately identifiable and less than its carrying value. Expected cash flows are determined primarily using the anticipated cash flows discounted at a rate commensurate with the risk involved.

As mentioned in Note 4.b) to our consolidated financial statements, as of June 30, 2007 we owned a 25.01% equity interest in Inversiones y Representaciones Sociedad Anónima (IRSA).

Table of Contents

Also contained in this Form 20-F are the consolidated financial statements of IRSA, as of June 30, 2007 and 2006 and for the years ended June 30, 2007, 2006 and 2005, which have been audited by Price Waterhouse & Co. S.R.L. Buenos Aires Argentina, member firm of PriceWaterhouseCoopers, an independent registered public accounting firm, whose report is included herein. As of June 30, 2007, IRSA has a significant investment in *Banco Hipotecario S.A.* that accounts for approximately 7.3% of IRSA's total consolidated assets.

IRSA prepares its financial statements in Pesos and in conformity with Argentine GAAP and the regulation of the *Comisión Nacional de Valores*, which differ in certain significant respects from U.S. GAAP. Such differences involve methods of measuring the amounts shown in the consolidated financial statements, as well as additional disclosures required by U.S. GAAP and Regulation S-X of the SEC. See Note 27 to IRSA's consolidated financial statements contained elsewhere in this annual report for a description of the main differences between Argentine GAAP and U.S. GAAP as they relate to IRSA, and a reconciliation with U.S. GAAP of net income and shareholders' equity.

As discussed in Note 3.m. to IRSA's financial statements, in order to comply with *Comisión Nacional de Valores* regulations, IRSA recognized deferred income tax assets and liabilities on a non-discounted basis. This accounting practice represented a departure from Argentine GAAP. However, such departure has not had a material effect on the IRSA's consolidated financial statements.

Additionally, as discussed in Notes 2.c. to IRSA's financial statements, in order to comply with regulations of the CNV, We discontinued inflation accounting as from February 28, 2003. The application of this CNV regulation represented a departure from Argentine GAAP. However, such departure has not had a material effect on our consolidated financial statements.

Certain amounts which appear in this annual report (including percentage amounts) may not sum due to rounding. You should not construe the translations as a representation that the amounts shown could have been, or could be, converted into U.S. Dollars at that or any other rate.

References to fiscal years 2003, 2004, 2005, 2006 and 2007 are to the fiscal years ended June 30 of each such year.

MARKET DATA

Market data used throughout this annual report were derived from reports prepared by unaffiliated third-party sources. Such reports generally state that the information contained therein has been obtained from sources believed by such sources to be reliable. Certain market data which appear herein (including percentage amounts) may not sum due to rounding.

Table of Contents**PART I****Item 1. Identity of directors, Senior Management and Advisers**

This item is not applicable.

Item 2. Offer statistics and expected timetable

This item is not applicable.

Item 3. Key information**A. SELECTED CONSOLIDATED FINANCIAL DATA**

The following selected consolidated financial data has been derived from our consolidated financial statements as of the dates and for each of the periods indicated below. This information should be read in conjunction with and is qualified in its entirety by reference to our consolidated financial statements and the discussion in Operating and Financial Review and Prospects included elsewhere in this Form 20-F. The selected consolidated statement of income data for the years ended June 30, 2007, 2006 and 2005 and the selected consolidated balance sheet data as of June 30, 2007 and 2006 have been derived from our consolidated financial statements which have been audited by Price Waterhouse & Co. S.R.L. Buenos Aires Argentina, member firm of PricewaterhouseCoopers, Buenos Aires, Argentina, an independent registered public accounting firm.

The selected consolidated statement of income data for the years ended June 30, 2004 and 2003 and the selected consolidated balance sheet data as of June 30, 2005 and 2004 have been derived from our audited consolidated financial statements as of June 30, 2005 and 2004 and for the three years in the period ended June 30, 2005 which are not included herein.

Certain reclassifications have been made to the consolidated financial statements as of June 30, 2005 and 2004 and for the three years in the period ended June 30, 2005 to conform to current year presentation.

The selected consolidated balance sheet data as of June 30, 2003 has been derived from our audited consolidated financial statements as of June 30, 2004 and 2003 and for the three years in the period ended June 30, 2004 which are not included herein.

Certain reclassifications have been made to the consolidated financial statements as of June 30, 2004 and 2003 and for the three years in the period ended June 30, 2004 to conform to current year presentation.

(1) We have complied with the *Comisión Nacional de Valores* resolution in connection with the discontinuance of inflation accounting and accordingly have recorded the effects of inflation until February 28, 2003. We have restated comparative figures until that date. In addition, in fiscal year 2003, as required by Argentine GAAP, we restated the prior year's financial statements to give retroactive effect to new accounting standards adopted in that year, except for certain valuation and disclosure criteria that in accordance with the transition provisions were applied prospectively. See notes 2.d and 3 to our audited consolidated financial statements included elsewhere in this Form 20-F.

(2) Solely for the convenience of the reader, we have translated Peso amounts into U.S. dollars at the exchange rate quoted by Banco de La Nación Argentina for June 30, 2007 which was Ps.3.093 = US\$1.00. We make no representation that the Peso or U.S. dollar amounts actually represent, could have been or could be converted into U.S. dollars at the rates indicated, at any particular rate or at all. See

Edgar Filing: CRESUD INC - Form 20-F

Exchange Rates.

- (3) Basic net income per share is computed by dividing the net income available to common shareholders for the period by the weighted average common shares outstanding during the period.
- (4) Diluted net income per share is computed by dividing the net income for the period by the weighted average number of common shares assuming the total conversion of outstanding notes. See Notes 13 and 17.II.f) to our audited consolidated financial statements included elsewhere in this Form 20-F for details on the computation of earning per share under Argentine GAAP and U.S. GAAP, respectively.
- (5) Determined by multiplying per share amounts by ten (one ADS equals ten common shares).
- (6) The shareholders meeting held on October 10, 2007 approved by majority the distribution of a cash dividend amounting to Ps. 8.25 million.
- (7) Includes the purchase of farms and other property and equipment.
- (8) This table is intended to present cash flows from operating, investing and financing activities under Argentine GAAP but following the classification guidelines of SFAS No. 95 under U.S. GAAP. See Note 17.II.e) to our audited consolidated financial statements included elsewhere in this Form 20-F for details of the differences in classifications affecting the categories of cash flows.
- (9) Gross profit divided by the sum of production income and sales.
- (10) Operating income divided by the sum of production income and sales.
- (11) Net income divided by the sum of production income and sales.

Table of Contents**Exchange Rates**

In April 1991, Argentine law established a fixed exchange rate according to which the Central Bank was statutorily obliged to sell U.S. dollars to any individual at a fixed exchange rate of Ps.1.00 per US\$1.00. On January 7, 2002, the Argentine congress enacted the Public Emergency Law, abandoning over ten years of fixed Peso-U.S. dollar parity at Ps.1.00 per US\$1.00. After devaluing the Peso and setting the official exchange rate at Ps.1.40 per US\$1.00, on February 11, 2002, the government allowed the Peso to float. The shortage of U.S. dollars and their heightened demand caused the Peso to further devalue significantly in the first half of 2002. Since June 30, 2002, the Peso has appreciated versus the U.S. dollar from an exchange rate of Ps.3.79.=US\$1.00 to an exchange rate of Ps.3.140=US\$1.00 at December 17, 2007 as quoted by *Banco de la Nación Argentina* at the U.S. dollar selling rate. The Central Bank may indirectly affect this market through its active participation.

The following table presents the high, low, average and period closing exchange rate for the purchase of U.S. dollars stated in *nominal* Pesos per U.S. dollar.

Nominal Exchange Rates

	Exchange Rate ⁽⁴⁾			
	High ⁽¹⁾	Low ⁽²⁾	Average ⁽³⁾	Period Closing

Table of Contents

D. RISK FACTORS

You should consider the following risks associated with our business, taking into account the instability of the country in which we operate.

We may also face additional risks and uncertainties that are not presently affecting us, or that we currently deem immaterial, which may materially impair our business. In general, investing in companies which operate in emerging markets such as Argentina is more risky than investing in companies which operate in more stable markets such as the United States.

Risks Related to Argentina

Argentina's current growth and stabilization may not be sustainable.

During 2001 and 2002, Argentina experienced a period of severe political, economic and social crisis. Although the economy has recovered significantly over the past three years, uncertainty remains as to whether the current growth and relative stability are sustainable. Sustainable economic growth is dependant on a variety of factors, including international demand for Argentine exports, the stability and competitiveness of the Peso against foreign currencies, confidence among consumers as well as foreign and domestic investors and stable and relatively low inflation.

The Argentine economy remains fragile for the following reasons:

unemployment remains high;

the availability of long-term fixed rate credit is limited;

investment as a percentage of GDP remains low;

the current fiscal surplus could become a fiscal deficit;

inflation has risen recently and threatens to accelerate;

the country's public debt remains high and international financing is limited; and

the recovery has depended to some extent on high commodity prices, which are volatile and outside the control of the country, and excess capacity, which has reduced considerably.

A substantial part of our operations, properties and customers are located in Argentina. As a result, our business is to a very large extent dependent upon the economic conditions prevailing in Argentina.

The continuing rise of inflation may have an adverse effect on the economy.

After several years of price stability, the devaluation of the Peso in January 2002 imposed pressures on the domestic price system that generated high inflation throughout 2002. In 2003, inflation substantially stabilized. However, inflationary pressures have since reemerged with consumer prices increasing by 6.1% during 2004 and increasing by 12.3% in 2005. As a result of the execution of fixed price agreements and restrictions on, and in certain cases, suspension of, exports, consumer prices only increased by 9.8% in 2006. As of November, 30, 2007, according to the Argentine statistics and census agency, or INDEC, consumer prices index increased by 8.5% on an annualized basis.

Edgar Filing: CRESUD INC - Form 20-F

In the past, inflation has materially undermined the Argentine economy and the government's ability to create conditions conducive to growth. A return to a high inflation environment could slow the rebound in the long term credit market and real estate market and may also undermine Argentina's foreign competitiveness by diluting the effects of the Peso devaluation and negatively impacting the level of economic activity and employment.

Table of Contents

If inflation remains high or continues to rise, Argentina's economy may be negatively impacted which could have an adverse effect on our business.

Argentina's ability to obtain financing from international markets is limited which may affect its ability to implement reforms and foster economic growth.

In the first half of 2005, Argentina restructured part of its sovereign debt that had been in default since the end of 2001. As of March 31, 2007, the Argentine government announced that as a result of the restructuring, it had approximately US\$136.3 billion in total outstanding debt remaining. Of this amount, approximately US\$26.5 billion are defaulted bonds owned by creditors who did not participate in the restructuring of the external financial debt.

Some noteholders in the United States, Italy and Germany have filed legal actions against Argentina, and holdout creditors may initiate new suits in the future. Additionally, foreign shareholders of certain Argentine companies have filed claims in excess of US\$17 billion before the International Centre for the Settlement of Investment Disputes, or ICSID, alleging that certain government measures are inconsistent with the fair and equitable treatment standards set forth in various bilateral treaties to which Argentina is a party.

Argentina's past default and its failure to restructure completely its remaining sovereign debt and fully negotiate with the holdout creditors may prevent Argentina from reentering the international capital markets. Litigation initiated by holdout creditors as well as ICSID claims may result in material judgments against the Argentine government and could result in attachments of, or injunctions relating to, assets of Argentina that the government intended for other uses. As a result, the government may not have the financial resources necessary to implement reforms and foster growth which could have a material adverse effect on the country's economy and, consequently, our business.

Significant devaluation of the Peso against the U.S. dollar may adversely affect the Argentine economy as well as our financial performance.

Despite the positive effects of the real depreciation of the Peso in 2002 on the competitiveness of certain sectors of the Argentine economy, it has also had a far-reaching negative impact on the Argentine economy and on businesses and individuals' financial condition. The devaluation of the Peso has had a negative impact on the ability of Argentine businesses to honor their foreign currency-denominated debt, initially led to very high inflation, significantly reduced real wages, had a negative impact on businesses whose success is dependent on domestic market demand, such as utilities and the financial industry, and adversely affected the government's ability to honor its foreign debt obligations.

If the Peso devalues significantly, all of the negative effects on the Argentine economy related to such devaluation could recur, with adverse consequences to our business. Moreover, it would likely result in a decline in the value of our common shares and the ADSs as measured in U.S. dollars.

Significant appreciation of the Peso against the U.S. dollar may adversely affect the Argentine economy.

A substantial increase in the value of the Peso against the U.S. dollar also presents risks for the Argentine economy. The appreciation of the Peso against the U.S. dollar negatively impacts the financial condition of entities whose foreign currency-denominated assets exceed their foreign currency-denominated liabilities, such as us. In addition, in the short term, a significant real appreciation of the Peso would adversely affect exports. This could have a negative effect on GDP growth and employment as well as reduce the Argentine public sector's revenues by reducing tax collection in real terms, given its current heavy reliance on taxes on exports. The appreciation of the Peso against the U.S. dollar could have an adverse effect on the Argentine economy and our business.

Government measures to preempt or respond to social unrest may adversely affect the Argentine economy.

During its crisis in 2001 and 2002, Argentina experienced social and political turmoil, including civil unrest, riots, looting, nationwide protests, strikes and street demonstrations. Despite Argentina's ongoing

Table of Contents

economic recovery and relative stabilization, social and political tension and high levels of poverty and unemployment continue. Future government policies to preempt, or in response to, social unrest may include expropriation, nationalization, forced renegotiation or modification of existing contracts, suspension of the enforcement of creditors' rights, new taxation policies, including royalty and tax increases and retroactive tax claims, and changes in laws and policies affecting foreign trade and investment. Such policies could destabilize the country and adversely and materially affect the economy, and thereby our business.

Exchange controls and restrictions on transfers abroad and capital inflow restrictions have limited, and can be expected to continue to limit, the availability of international credit.

In 2001 and 2002, Argentina imposed exchange controls and transfer restrictions substantially limiting the ability of companies to retain foreign currency or make payments abroad. These restrictions have been substantially eased, including those requiring the Central Bank's prior authorization for the transfer of funds abroad in order to pay principal and interest on debt obligations. However, Argentina may re-impose exchange control or transfer restrictions in the future, among other things, in response to capital flight or a significant depreciation of the Peso. In addition, the government issued Decree No. 616/2005 in June 2005 that established new controls on capital inflows that could result in less availability of international credit. Pursuant to such Decree, the Ministry of Economy's Resolution No. 292/2005 was repealed and it was established that any indebtedness in favor of foreign creditors by individuals and legal entities residing in Argentina and conducting business in the private sector must be settled in Argentina and must mature no earlier than 365 days irrespective of the manner of settlement, except in the following cases: transactions related to foreign trade financing and original issuances of debt instruments admitted to public offering and listed in self-regulated stock exchanges.

Therefore, (a) any cash inflows in the domestic foreign exchange market arising from debts incurred with foreign creditors by individuals or legal entities in the private sector and (b) transfers by non-residents to acquire financial assets or liabilities of any kind in the financial and non-financial private sector, excluding direct foreign investment and original issuances of debt instruments admitted to public offering and listed on self-regulated stock exchanges, must meet the following requirements: (i) they may be remitted abroad only after expiration of a term of at least 365 days counted after the date on which such funds officially entered the Argentine foreign exchange market; (ii) the amounts resulting from the exchange rate settlement transaction are to be deposited in an account opened at an Argentine banking system institution, (iii) a non-transferable, non-interest bearing deposit of 30% of the amount being settled is to be made in the name of the depositor for a term of 365 days and (iv) such deposit is to be held in U.S. dollars at one of the Argentine banking system institutions and may not be used as guarantee or collateral of any loan. Non-compliance with the requirements laid down in Decree 616/2005 shall be punished in accordance with the Criminal Foreign Exchange Regime.

Additional controls could have a negative effect on the economy and our business if imposed in an economic environment where access to local capital is substantially constrained. Moreover, in such event, restrictions on the transfers of funds abroad may impede your ability to receive dividend payments as a holder of ADSs.

Payment of dividends to non-residents has been limited in the past and may be limited again.

Beginning on February 2002, any payment of dividends, irrespective of amount, outside Argentina needed prior authorization from the Central Bank. In December 2002 the rule was amended through Communication A 3845 which required Argentine companies to obtain prior authorization from the Central Bank to purchase currency in excess of US\$150,000 (in the aggregate) per calendar month. This rule applied, among others, to the payment of dividends.

On January 7, 2003, the Central Bank issued communication A 3859 which is still enforceable and pursuant to which Argentine companies have no limitation on their ability to purchase foreign currency and transfer it outside Argentina to pay dividends, to the extent such dividend payments result from an approved and audited financial statement. In the future, similar restrictions may be enacted by the Argentine government or the Central Bank again and, if this were to occur, it could have an adverse effect on the value of our common shares and the ADSs.

Table of Contents

The stability of the Argentine banking system is uncertain.

During 2001 and the first half of 2002, a very significant amount of deposits were withdrawn from financial institutions. This massive withdrawal of deposits was largely due to the loss of confidence of depositors in the Argentine government's ability to repay its debts, including its debts within the financial system, and to maintain peso-dollar parity in the context of its solvency crisis.

To prevent a run on the U.S. dollar reserves of local banks, the government restricted the amount of money that account holders could withdraw from banks and introduced exchange controls restricting capital outflows. The government subsequently imposed new restrictions and released a schedule stating how and when deposits would become available.

These measures taken by the government to protect the solvency of the banking system, in particular the emergency laws that converted certain U.S. dollar-denominated debts into Pesos, generated significant opposition directly against banks from depositors frustrated by the loss of their savings. Many depositors instituted court challenges, eventually at the Supreme Court level, on constitutional grounds seeking restitution of their deposits in their original currency. Under Argentine law, Supreme Court rulings are limited to the particular facts and defendants in the case, although lower courts tend to follow precedent set by the Supreme Court. Initial Supreme Court rulings struck down on constitutional grounds pesification pursuant to Law No. 25,561 (the Public Emergency Law). However, the Supreme Court has found in subsequent holdings that emergency laws enacted by the Argentine Congress were necessary to mitigate the crisis, the regulations were not disproportionate to the emergency, and the measures did not violate the constitutional property rights of those affected. For instance, the Supreme Court held on December 27, 2006 in *Massa, Juan Agustin vs. Poder Ejecutivo Nacional y Otro* that banks should repay deposits originally denominated in U.S. dollars in Pesos at an exchange rate of Ps.1.40 per US\$1.00, subject to CER or *Coeficiente de Estabilización de Referencia* indexation, plus interest, at a 4% annual rate. Notwithstanding the foregoing, however, numerous other cases challenging the constitutionality of the pesification pursuant to the Public Emergency Law are still pending. We cannot assure you that the Supreme Court will consistently uphold the views expressed in its latest rulings, or that future rulings will not negatively affect the banking system as a whole. If the Argentine government is called upon to provide additional financial assistance to the banks through the issuance of additional government debt, this could add to Argentina's outstanding debt and would increase the burdens of the public sector.

While the condition of Argentina's financial system has improved and depositors affected by the restrictions imposed in 2001 and 2002 have regained access to their deposits, albeit mainly in Pesos and subject to certain restrictions, you should not underestimate the long-term implications of the most recent crisis for Argentina's economy and the credibility of its financial system. Adverse economic developments, even if not related to or attributable to the financial system, could easily result in deposits flowing out of the banks and into the foreign exchange market, as depositors seek to shield their financial assets from a new crisis. Any run on deposits could create liquidity or even solvency problems for financial institutions and bring about similar measures or other government interventions.

The Argentine economy could be adversely affected by economic developments in other global markets.

Financial and securities markets in Argentina are influenced, to varying degrees, by economic and market conditions in other global markets. Although economic conditions vary from country to country, investors' perception of the events occurring in one country may substantially affect capital flows into and securities from issuers in other countries, including Argentina. The Argentine economy was adversely impacted by the political and economic events that occurred in several emerging economies in the 1990s, including Mexico in 1994, the collapse of several Asian economies between 1997 and 1998, the economic crisis in Russia in 1998 and the Brazilian devaluation in January 1999. In addition, Argentina continues to be affected by events in the economies of its major regional partners. Furthermore, the Argentine economy may be adversely affected by events in developed economies which are trading partners or that impact the global economy.

In the future, political and economic crises in the international markets can be expected to adversely affect the Argentine economy and its financial system and therefore our business.

Table of Contents

Recent Presidential and Congressional elections may adversely affect the Argentine economy.

On October 28, 2007, presidential and congressional elections took place in Argentina. Cristina Fernández de Kirchner was elected as President, the ruling party maintained the majority in Congress and as a result, there exists uncertainty regarding the economic policy to be carried out by the new government. There are no assurances that future uncertainties preceding and resulting from the Congressional and the Presidential elections will not negatively impact the Argentine economy and/or local bonds and stock markets.

Risks Relating to Brazil

The Brazilian government has exercised and continues to exercise influence over the Brazilian economy, which together with Brazil's historically volatile political and economic conditions could adversely affect our financial condition and results of operations.

Our business is dependent to some extent on the economic conditions in Brazil. As of June 30, 2007, approximately 6.4% of our consolidated assets were located in Brazil through our affiliate BrasilAgro.

Historically, the Brazilian government has changed monetary, credit, tariff, and other policies to influence the course of Brazil's economy. Such government actions have included increases in interest rates, changes in tax policies, price controls, currency devaluations, as well as other measures such as imposing exchange controls and limits on imports and exports.

Our operations in Brazil may be adversely affected by changes in public policy at federal, state and municipal levels with respect to public tariffs and exchange controls, as well as other factors, such as:

fluctuation in exchange rates in Brazil;

monetary policy;

exchange controls and restrictions on remittances outside Brazil, such as those which were imposed on such remittances (including dividends) in 1989 and early 1990;

inflation in Brazil;

interest rates;

liquidity of the Brazilian financial, capital and lending markets;

fiscal policy and tax regime in Brazil; and

other political, social and economical developments in or affecting Brazil.

Actions of the Brazilian government in the future could have a significant effect on economic conditions in Brazil, which could adversely affect private sector companies such as BrasilAgro, and thus, could adversely affect us.

Although inflation in Brazil has stabilized in recent years, increased inflation may adversely affect the operations of BrasilAgro which could adversely impact our financial condition and results of operations.

Edgar Filing: CRESUD INC - Form 20-F

Brazil has experienced high and generally unpredictable rates of inflation for many years in the past. Inflation itself, as well as governmental policies to combat inflation, have had significant negative effects on the Brazilian economy in general. Inflation, government efforts to control inflation, and public speculation about future governmental actions have had, and can be expected to continue to have, significant impact on the Brazilian economy and on our operations in Brazil. As measured by the Brazilian *Índice Nacional de Preços au Consumidor* (National Consumer Price Index), or INPC, inflation in Brazil was 6.1%, 5.1%, 2.8% and 2.1% in 2004, 2005, 2006 and for the six-month period ended June 30, 2007, respectively. We cannot assure you that

Table of Contents

levels of inflation in Brazil will not increase in future years and have a material adverse effect on our business, financial condition or results of operations. Inflationary pressures may lead to further government intervention in the economy, including the introduction of government policies that could adversely affect the results of operations of BrasilAgro and consequently our financial condition and results of operations and the market price of our common shares and ADSs.

The Brazilian real is subject to depreciation and exchange rate volatility which could adversely affect our financial condition and results of operations.

Brazil's rate of inflation and the government's actions to combat inflation have also affected the exchange rate between the *real* and the U.S. dollar. As a result of inflationary pressures, the Brazilian currency has been devalued periodically during the last four decades. Throughout this period, the Brazilian federal government has implemented various economic plans and utilized a number of exchange rate policies, including sudden devaluations, periodic mini devaluations (during which the frequency of adjustments has ranged from daily to monthly), floating exchange rate systems, exchange controls and dual exchange rate markets. During 2005 and 2006, the *real* appreciated 11.8% and 8.7%, respectively, against the U.S. dollar. Despite the recent appreciation there can be no assurance that the *real* will not depreciate against the U.S. dollar in the future, or that the rate of exchange between the *real* and the dollar will not fluctuate significantly. In the event of a devaluation of the *real*, the financial condition and results of operations of our Brazilian subsidiary could be adversely affected.

Depreciation of the *real* relative to the U.S. dollar may increase the cost of servicing foreign currency-denominated debt that we may incur in the future, which could adversely affect our financial condition and results of operations. In addition, depreciation of the *real* could create additional inflationary pressures in Brazil that may adversely affect our results of operations. Depreciation generally curtails access to international capital markets and may prompt government intervention. It could also reduce the U.S. dollar value of BrasilAgro's revenues, distributions and dividends, and the U.S. dollar equivalent of the market price of our common shares. On the other hand, the appreciation of the *real* against the U.S. dollar may lead to the deterioration of Brazil's public accounts and balance of payments, as well as to lower economic growth from exports.

The Brazilian government imposes certain restrictions on currency conversions and remittances abroad which could affect the timing and amount of any dividend or other payment we receive.

Brazilian law guarantees foreign shareholders of Brazilian companies the right to repatriate their invested capital and to receive all dividends in foreign currency provided that their investment is registered with the *Banco Central do Brazil*, or the Brazilian Central Bank. We registered our investment in BrasilAgro with the Brazilian Central Bank on April 28, 2006. Although dividend payments related to profits obtained subsequent to April 28, 2006 are not subject to income tax, after the sum of repatriated capital and invested capital exceeds the investment amount registered with the Brazilian Central Bank, repatriated capital is subject to a capital gains tax of 15%. There can be no assurance that the Brazilian government will not impose additional restrictions or modify existing regulations that would have an adverse effect on an investor's ability to repatriate funds from Brazil nor can there be any assurance of the timing or duration of such restrictions, if imposed in the future.

Widespread uncertainties, corruption and fraud relating to ownership of real estate may adversely affect our business.

There are widespread uncertainties, corruption and fraud relating to title ownership of real estate in Brazil. In Brazil, ownership of real property is conveyed through filing of deeds before the relevant land registry. In certain cases, land registry recording errors, including duplicate and/or fraudulent entries, and deed challenges frequently occur, leading to judicial actions. Property disputes over title ownership are frequent, and, as a result, there is a risk that errors, fraud or challenges could adversely affect us, causing the loss of all or substantially all of our properties.

In addition, our land may be subject to expropriation by the Brazilian government. An expropriation could materially impair the normal use of our lands or have a material adverse effect on our results of operations. In addition, social movements, such as *Movimento dos Trabalhadores Rurais Sem Terra* and *Comissão Pastoral*

Table of Contents

da Terra, are active in Brazil. Such movements advocate land reform and mandatory property redistribution by the government. Land invasions and occupations of rural areas by a large number of individuals is common practice for these movements, and, in certain areas, including some of those in which we are likely to invest, police protection and effective eviction proceedings are not available to land owners. As a result, we cannot give you any assurance that our properties will not be subject to invasion or occupation by these groups. A land invasion or occupation could materially impair the normal use of our lands or have a material adverse effect on us or the value of our common shares or ADRs.

The lack of efficient transportation, and adequate storage or handling facilities in certain of the regions in which we operate may have a material adverse effect on our business.

One of the principal disadvantages of the agriculture industry in some of the regions of Brazil is that they are located a long distance from major ports in some cases, nearly 1,500 kilometers. Efficient access to transportation infrastructure and ports is critical to the profitability in the agricultural industry. Furthermore, as part of our business strategy, we intend to acquire and develop land in specific areas where existing transportation is poor. A substantial portion of agricultural production in Brazil is currently transported by truck, a means of transportation significantly more expensive than the rail transportation available to the U.S. and other international producers. As a result, we may be unable to obtain efficient transportation to make our production reach our most important markets in a cost-effective manner, if at all.

Risks Relating to Our Region

Our business is dependent on economic conditions in the countries where we intend to operate.

We intend to make future investments in farmland in Argentina, Brazil and possibly other countries in and outside Latin America. Because demand for agricultural products and farmland usually is correlated to economic conditions prevailing in the local market, which in turn is dependent on the macroeconomic condition of the country in which the market is located, our financial condition and results of operations are, to a considerable extent, dependent upon political and economic conditions prevailing from time to time in the countries where we operate. Latin American countries have historically experienced uneven periods of economic growth, as well as recession, periods of high inflation and economic instability. Certain countries have experienced severe economic crises, which may still have future effects. As a result, governments may not have the financial resources necessary to implement reforms and foster growth. Any of these adverse economic conditions could have a material adverse effect on our business. Some of the countries where we intend to operate are recovering from recent economic crises. Notwithstanding the positive economic results recorded recently in such countries, we cannot assure you that economic conditions will continue to improve or that our operations will experience positive results in the future.

We face the risk of political and economic crises, instability, terrorism, civil strife, expropriation and other risks of doing business in emerging markets.

In addition to Argentina and Brazil, we intend to conduct our operations in other Latin-American countries. Economic and political developments in these countries, including future economic changes or crises (such as inflation or recession), government deadlock, political instability, terrorism, civil strife, changes in laws and regulations, expropriation or nationalization of property, and exchange controls could adversely affect our business, financial condition and results of operations.

Although economic conditions in one country may differ significantly from another country, we cannot assure that events in one country alone will not adversely affect our business or the market value of, or market for, our common shares or ADRs.

Governments in the countries where we intend to operate exercise significant influence over their economies.

Emerging market governments, including governments in the countries where we intend to operate, frequently intervene in the economies of their respective countries and occasionally make significant changes in policy and regulations. Governmental actions to control inflation and other policies and regulations have often

Table of Contents

involved, among other measures, price controls, currency devaluations, capital controls and limits on imports. Our business, financial condition, results of operations and prospects may be adversely affected by changes in government policies or regulations, including factors, such as:

exchange rates and exchange control policies;

inflation rates;

interest rates;

tariff and inflation control policies;

import duties on information technology equipment;

liquidity of domestic capital and lending markets;

electricity rationing;

tax policies; and

other political, diplomatic, social and economic developments in or affecting the countries where we intend to operate.

An eventual reduction of foreign investment in any of the countries where we intend to operate may have a negative impact on such country's economy, affecting interest rates and the ability of companies such as us to access financial markets.

Local currencies used in the conduct of our business may be subject to exchange rate volatility and exchange controls.

The currencies of many countries in Latin America have experienced substantial volatility in recent years. Currency movements, as well as higher interest rates, have materially and adversely affected the economies of many Latin American countries, including countries in which we operate or intend to operate. The depreciation of local currencies creates inflationary pressures that may have an adverse effect on us generally, and may restrict access to international capital markets. On the other hand, the appreciation of local currencies against the U.S. dollar may lead to deterioration in the balance of payments of the countries where we intend to operate, as well as to a lower economic growth.

In addition, we may be subject to exchange control regulations in these Latin-American countries which might restrict our ability to convert local currencies into U.S. dollars.

Inflation and certain government measures to curb inflation may have adverse effects on the economies of the countries where we intend to operate, our business and our operations.

Most countries where we intend to operate have historically experienced high rates of inflation. Inflation and some measures implemented to curb inflation have had significant negative effects on the economies of Latin American countries. Governmental actions taken in an effort to curb inflation, coupled with speculation about possible future actions, have contributed to economic uncertainty at times in most Latin American countries. The countries where we intend to operate may experience high levels of inflation in the future that could lead to further government intervention in the economy, including the introduction of government policies that could adversely affect our results of operations. In addition, if any of these countries experience high rates of inflation, we may not be able to adjust the price of our services sufficiently to offset the effects

of inflation on our cost structures. A high inflation environment would also have negative effects on the level of economic activity and employment and adversely affect our business and results of operations.

Table of Contents

Developments in other markets may affect the Latin American countries where we intend to operate, and as a result our financial condition and results of operations may be adversely affected.

The market value of securities of companies such as us, may be, to varying degrees, affected by economic and market conditions in other global markets. Although economic conditions vary from country to country, investors' perception of the events occurring in one country may substantially affect capital flows into and securities from issuers in other countries, including Latin American countries. Various Latin American economies have been adversely impacted by the political and economic events that occurred in several emerging economies in recent times. Furthermore, Latin American economies may be affected by events in developed economies which are trading partners or that impact the global economy.

Land in Latin-American countries may be subject to expropriation or occupation.

Our land may be subject to expropriation by governments of the countries where we operate and intend to operate. An expropriation could materially impair the normal use of our lands or have a material adverse effect on our results of operations. In addition, social movements, such as *Movimento dos Trabalhadores Rurais Sem Terra* and *Comissão Pastoral da Terra* in Brazil, are active in certain of the countries where we operate or intend to operate. Such movements advocate land reform and mandatory property redistribution by governments. Land invasions and occupations of rural areas by a large number of individuals is common practice for these movements, and, in certain areas, including some of those in which we are likely to invest, police protection and effective eviction proceedings are not available to land owners. As a result, we cannot give you any assurance that our future properties will not be subject to invasion or occupation by these groups. A land invasion or occupation could materially impair the normal use of our lands or have a material adverse effect on us or the value of our common shares or ADRs.

Risks Relating to Our Business

Fluctuation in market prices for our agriculture products could adversely affect our financial condition and results of operations.

Prices for cereals, oilseeds and by-products, like those of other commodities, can be expected to fluctuate significantly. The prices that we are able to obtain for our agriculture products depend on many factors beyond our control, including:

prevailing world prices, which historically have been subject to significant fluctuations over relatively short periods of time, depending on worldwide demand and supply;

changes in the agricultural subsidy levels in certain important countries (mainly the United States and countries in the European Union) and the adoption of other government policies affecting industry market conditions and prices; and

demand for and supply of competing commodities and substitutes.

Our financial condition and results of operations could be materially and adversely affected if the prices of grains and agricultural by-products were to decline below current levels.

Unpredictable weather conditions may have an adverse impact on our crop and beef cattle production.

The occurrence of severe adverse weather conditions, especially droughts, hail or floods, is unpredictable and may have a potentially devastating impact upon our crop production and, to a lesser extent, our beef cattle production. The occurrence of severe adverse weather conditions may reduce yields on our farms or require us to increase our level of investment to maintain yields. As a result, we cannot assure you that future severe adverse weather conditions will not adversely affect our operating results and financial condition.

Table of Contents

Disease may strike our crops without warning potentially destroying some or all of our yields.

The occurrence and effect of crop disease and pestilence can be unpredictable and devastating to crops, potentially destroying all or a substantial portion of the affected harvests. Even when only a portion of the crop is damaged, our results of operations could be adversely affected because all or a substantial portion of the production costs for the entire crop have been incurred. Although some crop diseases are treatable, the cost of treatment is high, and we cannot assure that such events in the future will not adversely affect our operating results and financial condition.

Our cattle are subject to diseases.

Diseases among our cattle herds, such as tuberculosis, brucellosis and foot-and-mouth disease, can have an adverse effect on milk production and fattening, rendering cows unable to produce milk or meat for human consumption. Outbreaks of cattle diseases may also result in the closure of certain important markets, such as the United States, to our cattle products. Although we abide by national veterinary health guidelines, which include laboratory analyses and vaccination, to control diseases among the herds, especially foot-and-mouth disease, we cannot assure that future outbreaks of cattle diseases will not occur. A future outbreak of diseases among our cattle herds may adversely affect our beef cattle and milk sales which could adversely affect our operating results and financial condition.

We may be exposed to material losses due to volatile crop prices since we hold significant uncovered futures and options positions to hedge our crop price risk.

Due to the fact that we do not have 100% of our crops hedged, we are unable to have minimum price guarantees for all of our production and are therefore exposed to significant risks associated with the level and volatility of crop prices. We are subject to fluctuations in crop prices which could result in receiving a lower price for our crops than our production cost. We are also subject to exchange rate risks related to our crops that are hedged, because our futures and options positions are valued in U.S. dollars, and thus are subject to exchange rate risk.

In addition, if severe weather or any other disaster generates a lower crop production than the position already sold in the market, we may suffer material losses in the repurchase of the sold contracts.

The creation of new export taxes may have an adverse impact on our sales.

In order to prevent inflation and variations in the exchange rate from adversely affecting prices of primary and manufactured products (including agricultural products), and to increase tax collections and reduce Argentina's fiscal deficit, the Argentine government has imposed new taxes on exports. Pursuant to Resolution No. 11/02 of the Ministry of Economy and Production, as amended by Resolution 35/02, 160/2002, 307/2002 and 530/2002, effective as of March 5, 2002, the Argentine government imposed a 20%, 10% and 5% export tax on primary and manufactured products. On November 12, 2005, pursuant to Resolution No. 653/2005, the Ministry of Economy and Production increased the tax on beef cattle exports from 5% to 10%, and on January 2007 increased the tax on soybean exports from 23.5% to 27.5%. Pursuant to Resolutions No. 368/07 and 369/07 both dated November 12, 2007, the Ministry of Economy and Production further increased the tax on soybean exports from 27.5% to 35.0% and also the tax on wheat and corn exports from 20.0% to 28.0% and from 20.0% to 25.0%, respectively.

Export taxes might have a material and adverse effect on our sales. We produce exportable goods and, therefore, an increase in export taxes is likely to result in a decrease in our products' price, and, therefore, may result in a decrease of our sales. We cannot guarantee the impact of those or any other future measures that might be adopted by the Argentine government on our financial condition and result of operations.

Government intervention in our markets may have a direct impact on our prices.

The Argentine government has set certain industry market conditions and prices in the past. In order to prevent a substantial increase in the price of basic products as a result of inflation, the Argentine government is adopting an interventionist policy. In March 2002, the Argentine government fixed the price for milk after

Table of Contents

a conflict among producers and the government. During 2005, the Argentine government adopted measures in order to increase the domestic availability of beef and reduce domestic prices. The Argentine government increased the withholding rate and established a minimum weight requirement for animals to be slaughtered. In March 2006, the foreign sales of cuts of beef cattle were momentarily suspended. The latter measure was softened once prices decreased. There can be no assurance that the Argentine government will not interfere in other areas by setting prices or regulating other market conditions. Accordingly, we cannot assure you that we will be able to freely negotiate all our products' prices in the future or that the prices or other market conditions that the Argentine government could impose will allow us to freely negotiate the price of our products.

We may increase our crop price risk since we could have a long position in crop derivatives.

In order to improve the use of land and capital allocation, we may have a long position in crops in addition to our own production. This strategy increases our crop price risk, generating material losses in a downward market.

We do not maintain insurance on our crop storage facilities; therefore, if a fire or other disaster damages some or all of our harvest, we will not receive any compensation.

We store a significant portion of our grain production during harvest due to the seasonal drop in prices that normally occurs at that time. Currently, we have approximately 15,341 tons of storage capacity at various farms and plan to further increase our storage capacity. We do not maintain insurance on our storage facilities. Although our storage capacity is in several different locations, and it is unlikely that a natural disaster affects all of our silos simultaneously, a fire or other natural disaster which damages the stored grain, particularly if such event occurs shortly after harvesting, could have an adverse effect on our operating results and financial condition.

Worldwide competition in the markets for our products could adversely affect our business and results of operations.

We experience substantial worldwide competition in each of our markets and in many of our product lines. The market for cereals, oil seeds and by-products is highly competitive and also sensitive to changes in industry capacity, producer inventories and cyclical changes in the world's economies, any of which may significantly affect the selling prices of our products and thereby our profitability. Due to the fact that many of our products are agricultural commodities, they compete in the international markets almost exclusively on the basis of price. Many other producers of these products are larger than us, and have greater financial and other resources. Moreover, many other producers receive subsidies from their respective countries while we do not receive any such subsidies from the Argentine government. These subsidies may allow producers from other countries to produce at lower costs than us and/or endure periods of low prices and operating losses for longer periods than we can. Any increased competitive pressure with respect to our products could materially and adversely affect our financial condition and results of operations.

If we are unable to maintain our relationship with our customers, particularly with the single customer who purchases our entire raw milk production each month, our business may be adversely affected.

Though our cattle sales are diversified, we are and will continue to be significantly dependent on a number of third party relationships, mainly with our customers for crop and milk sales. In 2007, we sold our products to approximately 140 customers. Sales to our ten largest customers represented approximately 71% of our net sales for the fiscal year ended June 30, 2007. Of these customers, our biggest three customers, Cargill S.A., Mastellone Hnos. S.A. and Quickfood S.A, represented, in the aggregate, approximately 46% of our net sales, while the remaining seven customers in the aggregate represented approximately 26% of our net sales in fiscal 2007.

In addition, we currently sell our entire raw milk production to one customer in Argentina, Mastellone Hnos. S.A. For the year ended June 30, 2007, these sales represented approximately 8.8% of our total revenues. There can be no assurance that this customer will continue to purchase our entire raw milk production or that, if it fails to do so, we could enter into satisfactory sale arrangements with new purchasers in the future.

Table of Contents

We sell our crop production mainly to exporters and manufacturers that process the raw materials to produce meal and oil, products that are sent to the export markets. The Argentine crop market is characterized by a few purchasers and a great number of sellers. Although most of the purchasers are international companies with strong financial conditions, we cannot assure you that this situation will remain the same in the future or that this market will not get more concentrated in the future.

We may not be able to maintain or form new relationships with customers or others who provide products and services that are important to our business. Accordingly, we cannot assure you that our existing or prospective relationships will result in sustained business or the generation of significant revenues.

Our business is seasonal, and our revenues may fluctuate significantly depending on the growing cycle.

Our agribusiness business is highly seasonal in nature. The harvest and sale of crops (corn, soybean and sunflower) generally occurs from February to June. Wheat is harvested from December to January. Our operations and sales are affected by the growing cycle of the crops we process and by decreases during the summer in the price of the cattle we fatten. As a result, our results of operations have varied significantly from period to period, and are likely to continue to vary, due to seasonal factors.

Our principal shareholder has the ability to direct our business and affairs, and its interests could conflict with yours.

As of November 30, 2007, our largest shareholder, Mr. Eduardo S. Elsztain, was the beneficial owner of 31.8% of our common shares. As of November 30, 2007, such beneficial ownership consisted of 102,013,754 of our common shares owned through Inversiones Financieras del Sur S.A., or IFISA, a company of which, our director, Mr. Elsztain is the largest beneficial owner. As a result of his significant influence over us, Mr. Elsztain, through IFISA, has been able to elect a majority of the members of our board of directors, direct our management and determine the result of substantially all resolutions that require shareholders' approval, including fundamental corporate transactions and our payment of dividends by us.

The interests of our principal shareholder and management may differ from, and could conflict with, those of our other shareholders. Pursuant to a consulting agreement we pay a management fee equal to 10% of our annual net income to Consultores Asset Management S.A., formerly known as Dolphin Fund Management S.A. (Consultores Asset Management), a company whose capital stock is 85% owned by Eduardo Elsztain and 15% owned by Saúl Zang, the first vice-chairman of our board of directors. This performance based fee could be viewed as an incentive for Consultores Asset Management to favor riskier or more speculative investments than would otherwise be the case. In addition, as of November 30, 2007 Mr. Elsztain was the beneficial owner, due to his indirect shareholding through Cresud of approximately 35.8% of the common shares of IRSA, an Argentine company that currently owns approximately 62.5% of the common shares of its subsidiary Alto Palermo whose chief executive officer is Mr. Alejandro G. Elsztain, Mr. Eduardo Elsztain's brother and our chief executive officer of Cresud. We cannot assure you that our principal shareholders will not cause us to forego business opportunities that their affiliates may pursue or to pursue other opportunities that may not be in our interest, all of which may adversely affect our business, results of operations and financial condition and the value of our common shares and the ADSs.

We depend on our chairman and senior management.

Our success depends, to a significant extent, on the continued employment of Eduardo S. Elsztain, our president and chairman of the board of directors, and Alejandro G. Elsztain, our chief executive officer. The loss of their services for any reason could have a material adverse effect on our business. If our current principal shareholders were to lose their influence on the management of our business, our principal executive officers could resign or be removed from office.

Our future success also depends in part upon our ability to attract and retain other highly qualified personnel. We cannot assure you that we will be successful in hiring or retaining qualified personnel, or that any of our personnel will remain employed by us.

Table of Contents

The Investment Company Act may limit our future activities.

Under Section 3(a)(3) of the Investment Company Act of 1940, as amended, an investment company is defined in relevant part to include any company that owns or proposes to acquire investment securities that have a value exceeding 40% of such company's unconsolidated total assets (exclusive of U.S. government securities and cash items). Investments in minority interests of related entities as well as majority interests in consolidated subsidiaries which themselves are investment companies are included within the definition of investment securities for purposes of the 40% limit under the Investment Company Act.

Companies that are investment companies within the meaning of the Investment Company Act, and that do not qualify for an exemption from the provisions of such Act, are required to register with the Securities and Exchange Commission and are subject to substantial regulations with respect to capital structure, operations, transactions with affiliates and other matters. In the event such companies do not register under the Investment Company Act, they may not, among other things, conduct public offerings of their securities in the United States or engage in interstate commerce in the United States. Moreover, even if we desired to register with the Commission as an investment company, we could not do so without an order of the Commission because we are a non-U.S. corporation, and it is unlikely that the Commission would issue such an order.

In recent years we have made a significant minority investment in the capital stock of IRSA, an Argentine company engaged in a range of real estate activities. As of September 30, 2007, we owned approximately 31.9% of IRSA's outstanding shares. As of June 30, 2007, our total investment in IRSA represented approximately 35.7% of our total assets. Although we believe we are not an investment company for purposes of the Investment Company Act, our belief is subject to substantial uncertainty, and we cannot give you any assurance that we would not be determined to be an investment company under the Investment Company Act. As a result, the uncertainty regarding our status under the Investment Company Act may adversely affect our ability to offer and sell securities in the United States or to U.S. persons. The United States capital markets have historically been an important source of funding for us, and our future financing ability may be adversely affected by a lack of access to the United States capital markets. If an exemption under the Investment Company Act is unavailable to us in the future and we desire to access the U.S. capital markets, our only recourse would be to file an application to the SEC for an exemption from the provisions of the Investment Company Act which is a lengthy and highly uncertain process.

Moreover, if we offer and sell securities in the United States or to U.S. persons and we were deemed to be an investment company and not exempted from the application of the Investment Company Act, contracts we enter into in violation of, or whose performance entails a violation of, the Investment Company Act, including any such securities, may not be enforceable against us.

We hold Argentine securities which are more volatile than U.S. securities and carry a greater risk of default.

We currently have and in the past have had certain investments in Argentine government debt, corporate debt, and equity securities. In particular, we hold a significant interest in IRSA, an Argentine company that has suffered material losses, particularly during fiscal years 2001 and 2002. Although our holding of these investments, excluding IRSA, tends to be short term, investments in such securities involve certain risks, including:

market volatility, higher than those typically associated with U.S. government and corporate securities; and

loss of principal.

Some of the issuers in which we have invested and may invest, including the Argentine government, have in the past experienced substantial difficulties in servicing their debt obligations, which have led to the restructuring of certain indebtedness. We cannot assure that the issuers in which we have invested or may invest will not be subject to similar or other difficulties in the future which may adversely affect the value of our investments in such issuers. In addition, such issuers and, therefore, such investments, are generally subject to many of the risks that are described in this section with respect to us, and, thus, could have little or no value.

Table of Contents

We could be adversely affected by our investment in IRSA if IRSA's value decreases.

We currently own 34.4% of IRSA's outstanding shares. As of June 30, 2007, we owned 25.0% of IRSA's outstanding shares which represented an investment of Ps.344.6 million through the purchase of shares and the conversion of convertible notes. In addition, as of such date, we owned 12.5 million of IRSA's warrants. As of June 30, 2007, our investment in IRSA was Ps.382.1 million, representing 35.7% of our total consolidated assets.

Our investment in IRSA is subject to risks common to investments in commercial and residential properties in general, many of which are not within IRSA's control. Any one or more of these risks might materially and adversely affect IRSA's business, financial condition or results of operations. The yields available from equity investments in real estate depend on the level of sales or rental income generated and expenses incurred. In addition, other factors may affect the performance and value of a property adversely, including local economic conditions where the properties are located, macroeconomic conditions in Argentina and the rest of the world, competition from other real estate developers, IRSA's ability to find tenants, tenant default or rescission of leases, changes in laws and governmental regulations (including those governing usage, zoning and real property taxes), changes in interest rates (including the risk that increased interest rates may result in decreased sales of lots in the residential development properties) and the availability of financing. IRSA may also be unable to respond effectively to adverse market conditions or may be forced to sell one or more of its properties at a loss because the real estate market is relatively illiquid. Certain significant expenditures, such as debt service, real estate taxes, and operating and maintenance costs, generally are not reduced in circumstances resulting in a reduction in income from the investment.

It is possible that these or other factors or events will impair IRSA's ability to respond to adverse changes in the performance of its investments, causing a material decline in IRSA's financial condition or results of operations which could adversely affect our financial condition and results of operations.

While IRSA's share price increased during fiscal years 2005 and 2006, we cannot assure you that the share price will not decline in the future. Given the relative size of our investment in IRSA, any decline could have a material adverse effect on our financial condition and results of operations.

We could be materially and adversely affected by our investment in BrasilAgro.

As of June 30, 2007, our investment in BrasilAgro represented 6.4% of our total consolidated assets. BrasilAgro was formed on September 23, 2005 to exploit opportunities in the Brazilian agricultural sector. BrasilAgro seeks to acquire and develop future properties to produce a diversified range of agricultural products (which may include sugarcane, grains, cotton, forestry products and livestock). BrasilAgro is a startup company that has been operating for one year. As a result, it has a developing business strategy and limited track record. BrasilAgro's business strategy may not be successful, and if not successful, BrasilAgro may be unable to successfully modify its strategy. BrasilAgro's ability to implement its proposed business strategy may be materially and adversely affected by many known and unknown factors. If we were to write-off our investments in BrasilAgro, this would likely materially and adversely affect our business. As of June 30, 2007, we owned 7.4% of the outstanding common shares of BrasilAgro.

We may invest in countries other than Argentina and Brazil and cannot give you any current assurance as to the countries in which we will ultimately invest, and we could fail to list all risk factors for each possible country.

We have a broad and opportunistic business strategy and you should understand that we may invest in countries other than Argentina and Brazil including countries in other emerging markets outside Latin America such as Africa. As a result, it is not possible at this time to identify all risk factors that may affect our future operations and the value of our common shares and ADSs.

Table of Contents

We will be subject to extensive environmental regulation.

Our activities are subject to a wide set of federal, state and local laws and regulations relating to the protection of the environment, which impose various environmental obligations. Obligations include compulsory maintenance of certain preserved areas in our properties, management of pesticides and associated hazardous waste and the acquisition of permits for water use. Our proposed business is likely to involve the handling and use of hazardous materials that may cause the emission of certain regulated substances. In addition, the storage and processing of our products may create hazardous conditions. We could be exposed to criminal and administrative penalties, in addition to the obligation to remedy the adverse affects of our operations on the environment and to indemnify third parties for damages, including the payment of penalties for non-compliance with these laws and regulations. Since environmental laws and their enforcement are becoming more stringent in Argentina, our capital expenditures and expenses for environmental compliance may substantially increase in the future. In addition, due to the possibility of future regulatory or other developments, the amount and timing of environmental-related capital expenditures and expenses may vary substantially from those currently anticipated. The cost of compliance with environmental regulation may result in reductions of other strategic investments which may consequently decrease our profits. Any material unforeseen environmental costs may have a material adverse effect on our business, results of operations, financial condition or prospects.

As of June 30, 2007, we owned land reserves in excess of 329,828 hectares, most of which is located in under-utilized areas where agricultural production is not fully developed. Existing or future environmental regulations may prevent us from completely developing our land reserves, requiring us to maintain a portion of such land as unproductive land reserves. In accordance with legislative requirements, we have applied for approval to develop parts of our land reserves, to the extent allowed. We cannot assure you that current or future development applications will be approved, and if so, to what extent we will be allowed to develop our land.

Increased energy prices could adversely affect our operations.

We require substantial amounts of fuel oil and other resources for our harvest activities and transport of our agricultural products. We rely upon third parties for our supply of the energy resources consumed in our operations. The prices for and availability of energy resources may be subject to change or curtailment, respectively, due to, among other things, new laws or regulations, imposition of new taxes or tariffs, interruptions in production by suppliers, worldwide price levels and market conditions. The prices of various sources of energy may increase significantly from current levels. An increase in energy prices could materially adversely affect our results of operations and financial condition.

Risks Related to IRSA's Business

IRSA's performance is subject to risks associated with its properties and with the real estate industry.

IRSA's economic performance and the value of its real estate assets, and consequently the value of its securities, are subject to the risk that if IRSA properties do not generate sufficient revenues to meet its operating expenses, including debt service and capital expenditures, IRSA's cash flow and ability to pay distributions to its shareholders will be adversely affected. Events or conditions beyond IRSA's control that may adversely affect IRSA's operations or the value of its properties include:

downturns in the national, regional and local economic climate;

volatility and decline in discretionary spending;

competition from other office, industrial and commercial buildings;

local real estate market conditions, such as oversupply or reduction in demand for office, or other commercial or industrial space;

changes in interest rates and availability of financing;

Table of Contents

the exercise by its tenants of their legal right to early termination of their leases;

vacancies, changes in market rental rates and the need to periodically repair, renovate and re-lease space;

increased operating costs, including insurance expense, utilities, real estate taxes, state and local taxes and heightened security costs;

civil disturbances, earthquakes and other natural disasters, or terrorist acts or acts of war which may result in uninsured or underinsured losses;

significant expenditures associated with each investment, such as debt service payments, real estate taxes, insurance and maintenance costs which are generally not reduced when circumstances cause a reduction in revenues from a property;

declines in the financial condition of IRSA's tenants and IRSA's ability to collect rents from its tenants;

changes in IRSA's ability or its tenants' ability to provide for adequate maintenance and insurance, possibly decreasing the useful life of and revenue from property; and

law reforms and governmental regulations (such as those governing usage, zoning and real property taxes).

If any one or more of the foregoing conditions were to affect IRSA's business, it could have a material adverse effect on IRSA's financial condition and results of operations.

IRSA's investment in property development or redevelopment may be less profitable than IRSA anticipates.

IRSA is engaged in the development and construction of office space, retail and residential properties, frequently through third-party contractors. Risks associated with IRSA's development, re-development and construction activities include the following, among others:

abandonment of development opportunities and renovation proposals;

construction costs of a project may exceed its original estimates for reasons including raises in interest rates or increases in the costs of materials and labor, making a project unprofitable;

occupancy rates and rents at newly completed properties may fluctuate depending on a number of factors, including market and economic conditions, resulting in lower than projected rental rates and a corresponding lower return on IRSA's investment;

pre-construction buyers may default on their purchase contracts or units in new buildings may remain unsold upon completion of construction;

the unavailability of favorable financing alternatives in the private and public debt markets;

Edgar Filing: CRESUD INC - Form 20-F

sale prices for residential units may be insufficient to cover development costs;

construction and lease-up may not be completed on schedule, resulting in increased debt service expense and construction costs; and

Table of Contents

IRSA may be unable to obtain, or may face delays in obtaining, necessary zoning, land-use, building, occupancy and other required governmental permits and authorizations, or IRSA may be affected by building moratoria and anti-growth legislation.

The real estate industry in Argentina is increasingly competitive.

IRSA's real estate and construction activities are highly concentrated in the Buenos Aires metropolitan area, where the real estate market is highly competitive due to a scarcity of properties in sought-after locations and the increasing number of local and international competitors.

Furthermore, the Argentine real estate industry is generally highly competitive and fragmented and does not have high-entry barriers restricting new competitors from entering the market. The main competitive factors in the real estate development business include availability and location of land, price, funding, design, quality, reputation and partnerships with developers. A number of residential and commercial developers and real estate services companies compete with IRSA in seeking land for acquisition, financial resources for development and prospective purchasers and tenants. Other companies, including joint ventures of foreign companies and local companies, have become increasingly active in the real estate business in Argentina, further increasing this competition. To the extent that one or more of IRSA's competitors are able to acquire and develop desirable properties, as a result of greater financial resources or otherwise, IRSA's business could be materially and adversely affected. If IRSA is not able to respond to such pressures as promptly as its competitors, or the level of competition increases, IRSA's financial condition and results of its operations could be adversely affected.

In addition, many of IRSA's shopping centers are located in close proximity to other shopping centers, numerous retail stores and residential properties. The number of comparable properties located in the vicinity of IRSA's properties could have a material adverse effect on its ability to lease retail space in IRSA's shopping centers or sell units in its residential complexes and on the rent price or the sale price that IRSA is able to charge. We cannot assure you that other shopping center operators, including international shopping center operators, will not invest in Argentina in the near future. As additional companies become active in the Argentine shopping center market, such increased competition could have a material adverse effect on IRSA's results of operations.

IRSA faces risks associated with property acquisitions.

IRSA has in the past acquired, and intends to acquire in the future, properties, including large properties (such as the acquisition of Abasto de Buenos Aires or Alto Palermo Shopping) that would increase IRSA's size and potentially alter its capital structure. Although IRSA believes that the acquisitions that IRSA has completed in the past and that it expects to undertake in the future, have, and will, enhance IRSA's future financial performance, the success of such transactions is subject to a number of uncertainties, including the risk that:

IRSA may not be able to obtain financing for acquisitions on favorable terms;

acquired properties may fail to perform as expected;

the actual costs of repositioning or redeveloping acquired properties may be higher than IRSA's estimates;

acquired properties may be located in new markets where IRSA may have limited knowledge and understanding of the local economy, absence of business relationships in the area or unfamiliarity with local governmental and permitting procedures; and

IRSA may not be able to efficiently integrate acquired properties, particularly portfolios of properties, into its organization and to manage new properties in a way that allows us to realize cost savings and synergies.

Table of Contents

Some of the land IRSA has purchased is not zoned for development purposes, and IRSA may be unable to obtain, or may face delays in obtaining the necessary zoning permits and other authorizations.

IRSA owns several plots of land which are not zoned for development purposes or for the type of developments IRSA intends to propose, including Santa María del Plata, Puerto Retiro and Terrenos de Caballito. In addition, IRSA does not yet have the required land-use, building, occupancy and other required governmental permits and authorizations. IRSA cannot assure you that it will continue to be successful in its attempts to rezone land and to obtain all necessary permits and authorizations, or that rezoning efforts and permit requests will not be unreasonably delayed. Moreover, IRSA may be affected by building moratoria and anti-growth legislation. If IRSA is unable to obtain all of the governmental permits and authorizations it needs to develop its present and future projects as planned, IRSA may be forced to make unwanted modifications to such projects or abandon them altogether.

Acquired properties may subject IRSA to unknown liabilities.

Properties that IRSA acquire may be subject to unknown liabilities for which IRSA would have no recourse, or only limited recourse, to the former owners of such properties. As a result, if a liability were asserted against IRSA based upon ownership of an acquired property, IRSA might be required to pay significant sums to settle it, which could adversely affect its financial results and cash flow. Unknown liabilities relating to acquired properties could include:

liabilities for clean-up of undisclosed environmental contamination;

law reforms and governmental regulations (such as those governing usage, zoning and real property taxes); and

liabilities incurred in the ordinary course of business.

Some potential losses are not covered by insurance, and certain kinds of insurance coverage may become prohibitively expensive.

IRSA currently carries liability, fire, business interruption, flood, extended coverage and rental loss insurance on all of its properties. Although IRSA believes the policy specifications and insured limits of these policies are generally customary, there are certain types of losses, such as lease and other contract claims and terrorism and acts of war that generally are not insured. Should an uninsured loss or a loss in excess of insured limits occur, IRSA could lose all or a portion of the capital it has invested in a property, as well as the anticipated future revenue from the property. In such an event, IRSA might nevertheless remain obligated for any mortgage debt or other financial obligations related to the property. We cannot assure you that material losses in excess of insurance proceeds will not occur in the future. If any of IRSA's properties were to experience a catastrophic loss, it could seriously disrupt IRSA's operations, delay revenue and result in large expenses to repair or rebuild the property.

In addition, we cannot assure you that IRSA will be able to renew insurance coverage in an adequate amount or at reasonable prices. Insurance companies may no longer offer coverage against certain types of losses, such as losses due to terrorist acts and mold, or, if offered, these types of insurance may be prohibitively expensive. Moreover, IRSA does not purchase life or disability insurance for any of its key employees. If any of IRSA's key employees were to die or become incapacitated, IRSA could experience losses caused by a disruption in its operations which will not be covered by insurance, and this could have a material adverse effect on its financial condition and results of operations.

Demand for IRSA's premium properties which target the high-income demographic may be insufficient.

IRSA has focused on development projects intended to cater to affluent individuals and has entered into property swap agreements pursuant to which IRSA contributes its undeveloped properties to ventures with developers who will deliver to IRSA units in full-service apartments in premium locations of downtown Buenos Aires, such as the Renoir towers. These developments are currently estimated to be completed in 2008 and will

Table of Contents

bring to the market over 11,500 square meters of high quality residential apartments. At the time the developers return these properties to IRSA, demand for premium apartments could be significantly lower than IRSA currently projects. In such case, IRSA would be unable to sell these apartments at the prices or in the time frame IRSA estimated, which could have a material adverse effect on IRSA's financial condition and results of operations.

It may be difficult to buy and sell real estate quickly and transfer restrictions apply to some of IRSA's properties.

Real estate investments are relatively illiquid and this tends to limit IRSA's ability to vary its portfolio promptly in response to changes in economic or other conditions. In addition, significant expenditures associated with each equity investment, such as mortgage payments, real estate taxes and maintenance costs, are generally not reduced when circumstances cause a reduction in income from the investment. If income from a property declines while the related expenses do not decline, IRSA's business would be adversely affected. A significant portion of IRSA's properties are mortgaged to secure payment of indebtedness, and if IRSA is unable to meet its mortgage payments, IRSA could lose money as a result of foreclosure on the properties by the various mortgagees. In addition, if it becomes necessary or desirable for IRSA to dispose of one or more of the mortgaged properties, it might not be able to obtain a release of the lien on the mortgaged property without payment of the associated debt. The foreclosure of a mortgage on a property or inability to sell a property could adversely affect IRSA's business. In transactions of this kind, IRSA may also agree, subject to certain exceptions, not to sell the acquired properties for significant periods of time.

IRSA's level of debt may adversely affect its operations and its ability to pay its debt as it becomes due.

IRSA has had, and expects to continue to have, substantial liquidity and capital resource requirements to finance its business. As of June 30, 2007, IRSA's consolidated financial debt was Ps.1,414.5 million (including accrued and unpaid interest and deferred financing costs). The fact that IRSA is leveraged may affect its ability to refinance existing debt or borrow additional funds to finance working capital, acquisitions and capital expenditures. This would require IRSA to allocate a substantial portion of cash flow to repay principal and interest, thereby reducing the amount of money available to invest in operations, including acquisitions and capital expenditures. IRSA's leverage could place IRSA at a disadvantage compared to its competitors who are less leveraged and limit its ability to react to changes in market conditions, changes in the real estate industry and economic downturns. Although IRSA has successfully restructured its debt, we cannot assure you that IRSA will not relapse and become unable to pay its obligations.

IRSA may not be able to generate sufficient cash flows from operations to satisfy its debt service requirements or to obtain future financing. If IRSA cannot satisfy its debt service requirements or if IRSA defaults on any financial or other covenants in its debt arrangements, the holders of IRSA's debt will be able to accelerate the maturity of such debt or cause defaults under the other debt arrangements. IRSA's ability to service debt obligations or to refinance them will depend upon its future financial and operating performance, which will, in part, be subject to factors beyond IRSA's control such as macroeconomic conditions and regulatory changes in Argentina. If IRSA cannot obtain future financing, it may have to delay or abandon some or all of its planned capital expenditures, which could adversely affect IRSA's ability to generate cash flows and repay its obligations.

IRSA is subject to risks inherent to the operation of shopping centers that may affect its profitability.

Shopping centers are subject to various factors that affect their development, administration and profitability. These factors include:

the accessibility and the attractiveness of the area where the shopping center is located;

the intrinsic attractiveness of the shopping center;

the flow of people and the level of sales of each shopping center rental unit;

Table of Contents

increasing competition from internet sales;

the amount of rent collected from each shopping center rental unit; and

the fluctuations in occupancy levels in the shopping centers.

An increase in operating costs, caused by inflation or other factors, could have a material adverse effect on IRSA if its tenants are unable to pay higher rent due to the increase in expenses. Moreover, the shopping center business is closely related to consumer spending and to the economy in which customers are located. All of IRSA's shopping centers are in Argentina, and, as a consequence, their business could be seriously affected by potential recession in Argentina. For example, during the economic crisis in Argentina, spending decreased significantly, unemployment, political instability and inflation significantly reduced consumer spending in Argentina, lowering tenants' sales and forcing some tenants to leave IRSA's shopping centers. If this were to occur again, it could have a material adverse effect on the revenues from the shopping center activity.

The loss of significant tenants could adversely affect both the operating revenues and value of IRSA's shopping center and other rental properties.

If certain of IRSA's most important tenants were to experience financial difficulties, including bankruptcy, insolvency or a general downturn of business, or if IRSA simply failed to retain their patronage, its business could be adversely affected. IRSA's shopping centers and, to a lesser extent, its office buildings are typically anchored by significant tenants, such as well known department stores who generate shopping traffic at the mall. A decision by such significant tenants to cease operations at IRSA's shopping centers or office buildings could have a material adverse effect on the revenues and profitability of the affected segment and, by extension, on IRSA's financial condition and results of operations. The closing of one or more significant tenants may induce other tenants at an affected property to terminate their leases, to seek rent relief and/or cease operating their stores or otherwise adversely affect occupancy at the property. If IRSA is not able to successfully lease the affected space again, the bankruptcy and/or closure of significant tenants, could have an adverse effect on both the operating revenues and underlying value of the properties involved.

IRSA is subject to payment default risks due to its investments in credit card businesses through its subsidiary Alto Palermo.

IRSA's subsidiary Alto Palermo owns an 80% interest in Tarshop S.A. or Tarshop, a credit card company that originates credit card accounts to promote sales from Alto Palermo's tenants and other selected retailers. During the fiscal year ended June 30, 2007, Tarshop had net revenues of Ps.213.0 million, representing 44.1% of Alto Palermo's revenues and 28.8% of IRSA's consolidated revenues for such fiscal year. Credit card businesses such as Tarshop are adversely affected by defaults or late payments by card holders on credit card accounts, difficulties enforcing collection of payments, fraudulent accounts and the writing off of past due receivables. The present rates of delinquency, collection proceedings and loss of receivables may vary and be affected by numerous factors beyond IRSA's control, which, among others, include:

adverse changes in the Argentine economy;

adverse changes in the regional economies;

political instability;

increases in unemployment; and

erosion of real and/or nominal salaries.

These and other factors may have an adverse effect on rates of delinquency, collections and receivables, any one or more of which could have a material adverse effect on the results of operations of Tarshop's credit card business. In addition, if IRSA's credit card business is adversely

affected by one or more of the above

Table of Contents

factors, the quality of IRSA's securitized receivables is also likely to be adversely affected. Therefore, IRSA could be adversely affected to the extent that IRSA holds an interest in any such securitized receivables.

IRSA's subordinated interest in Tarshop's securitized assets may have no value.

Tarshop S.A., an Alto Palermo subsidiary, is a credit card company that originates credit card accounts to promote sales from Alto Palermo's tenants and other selected retailers. Tarshop's accounts receivables, which consist of cash flows from consumer financing and personal loans, are placed into a number of trust accounts that securitize those receivables. Tarshop sells beneficial interests in these trust accounts through the sale of debt certificates, but remains a beneficiary of these trust accounts by holding Ps. 77.8 million in debt certificates as of June 30, 2007.

We cannot assure you that collection of payments from credit card accounts will be sufficient to distribute earnings to holders of participation certificates, which would reduce Tarshop's earnings. In addition, local authorities might increase credit card or trust account regulations, negatively affecting Tarshop's revenues and results of operation.

IRSA is subject to risks affecting the hotel industry.

The full-service segment of the lodging industry in which IRSA's hotels operate is highly competitive. The operational success of IRSA's hotels is highly dependant on IRSA's ability to compete in areas such as access, location, quality of accommodations, rates, quality food and beverage facilities and other services and amenities. IRSA's hotels may face additional competition if other companies decide to build new hotels or improve their existing hotels to increase their attractiveness.

In addition, the profitability of IRSA's hotels depends on:

IRSA's ability to form successful relationships with international and local operators to run its hotels;

changes in tourism and travel patterns, including seasonal changes; and

taxes and governmental regulations affecting wages, prices, interest rates, construction procedures and costs.

IRSA's business is subject to extensive regulation and additional regulations may be imposed in the future.

IRSA's activities are subject to federal, state and municipal laws, and to regulations, authorizations and licenses required with respect to construction, zoning, use of the soil, environmental protection and historical patrimony, consumer protection and other requirements, all of which affect IRSA's ability to acquire land, develop and build projects and negotiate with customers. In addition, companies in this industry are subject to increasing tax rates, the creation of new taxes and changes in the taxation regime. IRSA is required to obtain licenses and authorizations with different governmental authorities in order to carry out its projects. Maintaining IRSA's licenses and authorizations can be a costly provision. In the case of non-compliance with such laws, regulations, licenses and authorizations, IRSA may face fines, project shutdowns, cancellation of licenses and revocation of authorizations.

In addition, public authorities may issue new and stricter standards, or enforce or interpret existing laws and regulations in a more restrictive manner, which may force IRSA to make expenditures to comply with such new rules. Development activities are also subject to risks relating to potential delays or an inability to obtain all necessary zoning, environmental, land-use, development, building, occupancy and other required governmental permits and authorizations. Any such delays or failures to obtain such government approvals may have an adverse effect on IRSA's business.

Table of Contents

In the past, the Argentine government imposed strict and burdensome regulations regarding leases in response to housing shortages, high rates of inflation and difficulties in accessing credit. Such regulations limited or prohibited increases on rental prices and prohibited eviction of tenants, even for failure to pay rent. Most of IRSA's leases provide that the tenants pay all costs and taxes related to their respective leased areas. In the event of a significant increase in the amount of such costs and taxes, the Argentine government may respond to political pressure to intervene by regulating this practice, thereby negatively affecting IRSA's rental income. We cannot assure you that the Argentine government will not impose similar or other regulations in the future. Changes in existing laws or the enactment of new laws governing the ownership, operation or leasing of properties in Argentina could negatively affect the Argentine real estate market and the rental market and materially and adversely affect IRSA's operations and profitability.

Lease Law No. 23,091 imposes restrictions that limit IRSA's flexibility.

Argentine laws governing leases impose certain restrictions, including the following:

lease agreements may not contain inflation adjustment clauses based on consumer price indexes or wholesale price indexes. Although many of IRSA's lease agreements contain readjustment clauses, these are not based on an official index nor do they reflect the inflation index. In the event of litigation it may be impossible for us to adjust the amounts owed to IRSA under its lease agreements;

residential leases must comply with a mandatory minimum term of two years and retail leases must comply with a mandatory minimum term of three years except in the case of stands and/or spaces for special exhibitions;

lease terms may not exceed ten years, except for leases regulated by Law No. 25,248 (which provides that leases containing a purchase option are not subject to term limitations); and

tenants may rescind commercial lease agreements after the initial six-month period.

As a result of the foregoing, IRSA is exposed to the risk of increases of inflation under its leases and the exercise of rescission rights by its tenants could materially and adversely affect IRSA's business and we cannot assure you that IRSA's tenants will not exercise such right, especially if rent values stabilize or decline in the future.

Eviction proceedings in Argentina are difficult and time consuming.

Although Argentine law permits a summary proceeding to collect unpaid rent and a special proceeding to evict tenants, eviction proceedings in Argentina are difficult and time-consuming. Historically, the heavy workloads of the courts and the numerous procedural steps required have generally delayed landlords' efforts to evict tenants. Eviction proceedings generally take between six months and two years from the date of filing of the suit to the time of actual eviction.

Historically, delinquency regarding IRSA's office rental space has been very low, approximately 2%, and IRSA has usually attempted to negotiate the termination of lease agreements with defaulting tenants after the first few months of non-payment in order to avoid legal proceedings. Delinquency may increase significantly in the future, and such negotiations with tenants may not be as successful as they have been in the past. Moreover, new Argentine laws and regulations may forbid or restrict eviction proceedings, and in such case, they would likely have a material and adverse effect on IRSA's financial condition and results of operation.

IRSA's assets are concentrated in the Buenos Aires area.

IRSA's principal properties are located in the City of Buenos Aires and the Province of Buenos Aires and a substantial portion of its revenues are derived from such properties. For the fiscal year ended June 30, 2007, more than 87% of IRSA's consolidated revenues were derived from properties in the Buenos Aires metropolitan

Table of Contents

area including the City of Buenos Aires. Although IRSA owns properties and may acquire or develop additional properties outside Buenos Aires, IRSA expects to continue to depend to a large extent on economic conditions affecting those areas, and therefore, an economic downturn in those areas could have a material adverse effect on its financial condition and results of operations.

IRSA faces risks associated with potential expansion to other Latin American markets.

From 1994 to 2002, IRSA had substantial investments outside of Argentina, including Brazil Realty, which was sold in 2002, and Fondo de Valores Inmobiliarios in Venezuela, which was sold in 2001. IRSA continues to believe that Brazil and other Latin American countries offer attractive opportunities for growth in the real estate sector. IRSA will continue to consider investment opportunities outside of Argentina as they arise.

Investments in Brazil and other Latin American countries are subject to significant risks including sovereign risks and risks affecting these countries' real estate sectors. These risks include competition by well-established as well as new developers, unavailability of financing or financing on terms that are not acceptable to IRSA, exchange rate fluctuations, lack of liquidity in the market, rising construction costs and inflation, extensive and potentially increasing regulation and bureaucratic procedures to obtain permits and authorizations, political and economic instability that may result in sharp shifts in demand for properties, risks of default in payment and difficulty evicting defaulting tenants.

If the bankruptcy of Inversora Dársena Norte S.A. is extended to IRSA's subsidiary Puerto Retiro, IRSA will likely lose a significant investment in a unique waterfront land reserve in the City of Buenos Aires.

On November 18, 1997, in connection with the acquisition of IRSA's subsidiary Inversora Bolívar S.A. or Inversora Bolívar, IRSA indirectly acquired 35.2% of the capital stock of Puerto Retiro. Inversora Bolívar had purchased such shares of Puerto Retiro from Redona Investments Ltd. N.V. in 1996. In 1999, IRSA, through Inversora Bolívar, increased its interest in Puerto Retiro to 50.0% of its capital stock. On April 18, 2000, Puerto Retiro received notice of a complaint filed by the Argentine government, through the Ministry of Defense, seeking to extend the bankruptcy of Inversora Dársena Norte S.A. (Indarsa). Upon filing of the complaint, the bankruptcy court issued an order restraining the ability of Puerto Retiro to dispose of, in any manner, the real property it had purchased in 1993 from Tandanor S.A. (Tandanor). Puerto Retiro appealed the restraining order which was confirmed by the court on December 14, 2000.

In 1991, Indarsa had purchased 90% of Tandanor, a formerly government owned company, which owned a large piece of land near Puerto Madero of approximately 8 hectares, divided into two spaces: Planta 1 and 2. After the purchase of Tandanor by Indarsa, in June 1993 Tandanor sold Planta 1 to Puerto Retiro, for a sum of US\$18 million pursuant to a valuation performed by J.L. Ramos, a well-known real estate brokerage firm in Argentina. Indarsa failed to pay to the Argentine government the outstanding price for its purchase of the stock of Tandanor. As a result the Ministry of Defense requested the bankruptcy of Indarsa. Since the only asset of Indarsa was its holding in Tandanor, the Argentine government is seeking to extend the bankruptcy to the companies or individuals which, according to its view, acted as a single economic group. In particular, the Argentine government has requested the extension of the bankruptcy to Puerto Retiro which acquired Planta 1 from Tandanor.

The time for producing evidence in relation to these legal proceedings has expired. The parties have submitted their closing arguments and are awaiting a final judgment. However, the judge has delayed his decision until a final judgment in the criminal proceedings against the former Defense Minister and former directors of Indarsa has been delivered. We cannot give you any assurance that IRSA will prevail in this proceeding, and if the plaintiff's claim is upheld by the courts, all of the assets of Puerto Retiro would likely be used to pay Indarsa's debts and IRSA's investment in Puerto Retiro, valued at Ps.54.9 million as of June 30, 2007. As of June 30, 2007, IRSA had not established any reserve in respect of this contingency.

Table of Contents***Property ownership through joint ventures may limit IRSA's ability to act exclusively in its interest.***

IRSA develops and acquires properties in joint ventures with other persons or entities when it believes circumstances warrant the use of such structures. For example, in the Shopping Center segment, IRSA owns 62.5 % of Alto Palermo, while Parque Arauco S.A. owns 29.5 %. In the Development and Sale segment, IRSA has majority ownership interests in various properties, including 100% ownership of Pereiraola S.A. and 100% of Caballito. IRSA also has ownership of 50% in Puerto Retiro and Cyrsa. In the Hotel operations segment, IRSA owns 50% of the Llao Llao Hotel, while another 50% is owned by the Sutton Group. IRSA owns 80% of the Hotel Libertador, while 20% is owned by Hoteles Sheraton de Argentina S.A. In the financial services sector, IRSA owns 11.8% of Banco Hipotecario, while the Argentine government has a controlling interest in it.

IRSA could become engaged in a dispute with one or more of its joint venture partners that might affect its ability to operate a jointly-owned property. Moreover, IRSA's joint venture partners may, at any time, have business, economic or other objectives that are inconsistent with its objectives, including objectives that relate to the timing and terms of any sale or refinancing of a property. For example, the approval of certain of the other investors is required with respect to operating budgets and refinancing, encumbering, expanding or selling any of these properties. In some instances, IRSA's joint venture partners may have competing interests in its markets that could create conflicts of interest. If the objectives of IRSA's joint venture partners are inconsistent with its own objectives, IRSA will not be able to act exclusively in its interests.

If one or more of the investors in any of IRSA's jointly owned properties were to experience financial difficulties, including bankruptcy, insolvency or a general downturn of business, there could be an adverse effect on the relevant property or properties and in turn, on IRSA's financial performance. Should a joint venture partner be declared bankrupt, IRSA could become liable for its partner's share of joint venture liabilities.

IRSA may not be able to recover the mortgage loans it has provided to purchasers of units in its residential development properties.

In recent years, IRSA has provided mortgage financing to purchasers of units in its residential development properties. Before January 2002, IRSA's mortgage loans were U.S. dollar-denominated and accrued interest at a fixed interest rate generally ranging from 10% to 15% per year and for terms generally ranging from one to fifteen years. However, on March 13, 2002, the Central Bank converted all U.S. dollar denominated debts into Peso denominated debts at the exchange rate of Ps.1.00 =US\$1.00. In addition, the Central Bank imposed maximum interest rates of 3% for residential mortgage loans to individuals and 6% for mortgage loans to businesses. These regulations adversely affected the U.S. dollar value of IRSA's outstanding mortgages.

Beside risks normally associated with providing mortgage financing, including the risk of default on principal and interest, other regulatory risks such as suspension of foreclosure enforcement proceedings could adversely affect IRSA's cash flow. Argentine law imposes significant restrictions on IRSA's ability to foreclose and auction properties. Thus, when there is a default under a mortgage, IRSA does not have the right to foreclose on the unit. Instead, in accordance with Law No. 24,441, in order to reacquire a property IRSA is required to purchase it at a court ordered public auction, or at an out-of-court auction. However, the Public Emergency Law temporarily suspended all judicial and non-judicial mortgage and pledge enforcement actions. Several laws and decrees extended this mortgage foreclosure suspension period. On June 14, 2006, a new suspension period was approved, which established a 180-day suspension period for mortgage foreclosure proceedings affecting debtors only dwellings and where the original loan was no higher than Ps.100,000.

Law No. 25,798 enacted November 5, 2003, and implemented by Decrees No. 1284/2003 and No. 352/2004, among others, sets forth a system to restructure delinquent mortgage payments to prevent foreclosures on a debtor's only dwelling (the Mortgage Refinancing System). The Mortgage Refinancing System establishes a trust over assets contributed by the Argentine government and income from restructured mortgage loans. *Banco de la Nación Argentina*, in its capacity as trustee of said trust, enters into debt restructuring agreements with delinquent mortgage debtors establishing the following terms: (i) a grace period on the mortgage loan of one year and (ii) monthly installment payments on the mortgage loan not to exceed 30% of the aggregate income of the family living in the mortgaged property. Banco de la Nación Argentina then

Table of Contents

subrogates the mortgagee's rights against the debtor, by issuing notes delivered to the mortgagee to settle the amounts outstanding on the mortgage loan. The sum restructured under the Mortgage Refinancing System may not exceed the appraisal value of the property securing the mortgage after deducting any debts for taxes and maintenance. The Mortgage Refinancing System was established for a limited period of time, during which parties to a mortgage loan agreement could opt to participate in it. However, it was extended by a number of decrees and laws.

Law No. 26,167, enacted in November, 2006 established a special proceeding to replace ordinary trials regarding the enforcement of mortgage loans. Such special proceedings give creditors ten days to inform the debtor of the amounts owed to them and later agree with the debtor on the amount and terms of payment. If the parties fail to reach an agreement, payment conditions are to be determined by the judge.

We cannot assure you that laws and regulations relating to foreclosure on real estate will not continue to change in the future or that any changes will not adversely affect IRSA's business, financial condition or result of operations.

IRSA is dependent on its chairman Eduardo Elsztain and certain other senior managers.

IRSA's success depends on the continued employment of Eduardo S. Elsztain, IRSA's chief executive officer, president and chairman of the board of directors, who has significant expertise and knowledge of IRSA's business and industry. The loss of or interruption in his services for any reason could have a material adverse effect on its business. IRSA's future success also depends in part upon IRSA's ability to attract and retain other highly qualified personnel. We cannot assure you that IRSA will be successful in hiring or retaining qualified personnel. A failure to hire or retain qualified personnel may have a material adverse effect on IRSA's financial condition and results of operations.

IRSA may face potential conflicts of interest relating to its principal shareholders.

IRSA's largest beneficial owner is Mr. Eduardo S. Elsztain, through his indirect shareholding through us. As of November 30, 2007, such beneficial ownership consisted of: (i) 199,312,028 shares held by us, (ii) 7,998,522 shares held by IFISA, (iii) 586,000 shares held by Consultores Venture Capital Limited, a stock corporation organized under the laws of Cayman Islands, (iv) 1,154,279 held by Dolphin Fund PLC, a limited liability company organized under the laws of Isle of Man and (v) 311,367 shares held directly by Mr. Elsztain.

Conflicts of interest between IRSA's management, IRSA and IRSA's affiliates may arise in the performance of IRSA's respective business activities. As of November 30, 2007, Mr. Elsztain also beneficially owned (i) approximately 31.8% of Cresud's common shares and (ii) approximately 62.5% of the common shares of IRSA's subsidiary Alto Palermo. Although Mr. Elsztain does not have a majority of IRSA's shares, he is IRSA's largest shareholder and exercises substantial influence over IRSA. If Mr. Elsztain were considered the beneficial owner of IRSA due to his substantial influence over IRSA, he would be the beneficial owner of 62.5% of IRSA's subsidiary Alto Palermo shares.

We cannot assure you that IRSA's principal shareholders and their affiliates will not limit or cause IRSA to forego business opportunities that their affiliates may pursue or that the pursuit of other opportunities will be in IRSA's interest.

Due to the currency mismatches between its assets and liabilities, IRSA has significant currency exposure.

As of June 30, 2007, the majority of IRSA's liabilities, such as its unsecured loan agreement, IRSA's Series 3 secured floating rate notes due 2009, IRSA's 8.5% notes due 2017, Alto Palermo's Series I Notes, the mortgage loan to IRSA's subsidiary Hoteles Argentinos S.A., IRSA's convertible notes and Alto Palermo's convertible notes are denominated in U.S. dollars while IRSA's revenues and most of its assets as of June 30, 2007, are denominated in Pesos. This currency gap exposes IRSA to a risk of exchange rate volatility, which would negatively affect its financial results if the dollar were to appreciate against the Peso. Any further depreciation of the Peso against the U.S. dollar will correspondingly increase the amount of IRSA's debt in Pesos, with further adverse effects on its results of operation and financial condition and may increase the collection risk of IRSA's leases and other receivables from its tenants and mortgage debtors, most of whom have Peso-denominated revenues.

Table of Contents

Risks Relating to IRSA's Investment in Banco Hipotecario

IRSA's investment in Banco Hipotecario is subject to risks affecting Argentina's financial system.

As of June 30, 2007, IRSA owned 11.8% of Banco Hipotecario which represented 7.3% of IRSA's consolidated assets at such date. Substantially all of Banco Hipotecario's operations, properties and customers are located in Argentina. Accordingly, the quality of its loan portfolio, its financial condition and results of operations depend to a significant extent on economic and political conditions prevailing in Argentina. The political and economic crisis in Argentina during 2002 and 2003 and the Argentine government's actions to address it have had and may continue to have a material adverse effect on Banco Hipotecario's business, financial condition and results of operations.

Financial institutions are subject to significant regulation relating to functions that historically have been mandated by the Central Bank and other regulatory authorities. Measures adopted by the Central Bank have had, and future regulations may have, a material adverse effect on Banco Hipotecario's financial condition and results of operations.

On July 25, 2003, the Central Bank announced its intention to adopt new capital adequacy requirements that it will implement gradually through to 2009. In addition, the IMF and other multilateral agencies encouraged the Argentine government to impose minimum capital adequacy, solvency and liquidity requirements consistent with international standards, which could impose material operating restrictions on Banco Hipotecario.

Laws and decrees implemented during the economic crisis in 2001 and 2002 have substantially altered contractual obligations affecting Argentina's financial sector. Recently, the Argentine Congress has considered various initiatives intended to reduce or eliminate a portion of the mortgage loan portfolio on the debt owed to Banco Hipotecario. Also, there have been certain initiatives intended to review the terms pursuant to which Banco Hipotecario was privatized. As a result, we cannot assure you that the Argentine legislature will not enact new laws that will have a significant adverse effect on Banco Hipotecario's shareholders' equity or that the Argentine government would compensate Banco Hipotecario for the resulting loss. These uncertainties could have a material adverse effect on the value of IRSA's investment in Banco Hipotecario.

Banco Hipotecario relies heavily on mortgage lending and the value of IRSA's investment in it depends in part on its ability to implement successfully its new business diversification strategy.

Historically, Banco Hipotecario has been engaged exclusively in mortgage lending and related activities. As a result, factors having an adverse effect on the mortgage market have a greater adverse impact on Banco Hipotecario than on its more diversified competitors. Due to its historic concentration in this recession-sensitive sector, Banco Hipotecario is particularly vulnerable to adverse changes in economic and market conditions in Argentina due to their adverse effect on (i) demand for new mortgage loans and (ii) the asset quality of outstanding mortgage loans. The last economic crisis had a material adverse effect on its liquidity, financial conditions and results of operations. In addition, a number of governmental measures that apply to the financial sector have had a material adverse effect particularly on Banco Hipotecario, impairing its financial condition.

In light of the economic conditions in Argentina for the foreseeable future, Banco Hipotecario cannot rely exclusively on mortgage lending and related services. Accordingly, Banco Hipotecario has adapted its business strategy to confront the challenges of these new market conditions. Banco Hipotecario's ability to diversify its operation will depend on how successfully it diversifies its product offerings and transforms itself into a financial institution that no longer relies solely on mortgage lending.

In the past years Banco Hipotecario has made several investments that are designed to enable it to develop retail banking activities. Banco Hipotecario must overcome significant challenges to achieve this goal including, among others, its lack of experience and client relationships outside the mortgage sector, the existence

Table of Contents

of large, well-positioned competitors and significant political, regulatory and economic uncertainties in Argentina. As a result, we cannot give you any assurance that Banco Hipotecario will be successful in developing significant retail banking activities in the foreseeable future, if at all. If Banco Hipotecario is unable to diversify its operations by developing its retail banking activities and other non-mortgage banking activities, the value of IRSA's substantial investment in Banco Hipotecario would likely be materially and adversely affected.

Banco Hipotecario's mortgage loan portfolio is not adequately indexed for inflation and any significant increase in inflation could have a material adverse effect on its financial condition.

In accordance with Emergency Decree No. 214/02 and its implementing regulations, pesified assets and liabilities were adjusted for inflation as of February 3, 2002 by application of the Coeficiente de Estabilización de Referencia, or CER, a consumer price inflation coefficient. On May 6, 2002, the Executive Branch issued a decree providing that mortgages originally denominated in U.S. dollars and converted into Pesos pursuant to Decree No. 214/2002 and mortgages on property constituting a borrower's sole family residence may be adjusted for inflation only pursuant to a coefficient based on salary variation, the CVS, which during 2002 was significantly less than inflation as measured by the wholesale price index, or WPI. Through December 31, 2002, the WPI and the CVS posted cumulative increases of 118.2% and 0.2%, respectively, and the CER increased 41.4%. During 2003, inflation rose by 4.3% as measured by the WPI, 3.7% as measured by the CER and 15.8% as measured by the CVS. As a result, only 10% of Banco Hipotecario's mortgage loans are adjusted for inflation in accordance with the CER, 30% are adjusted in accordance with the CVS and 60% remain entirely unindexed. Additionally, pursuant to Law No. 25,796, Section 1, repealed effective April 1, 2004, the CVS as an indexation mechanism applied to the relevant portion of Banco Hipotecario's mortgages loans. The CVS increased until it was repealed by 5.3%, whereas the increase in CER was 5.5% as of December 31, 2004 and the WPI increased by 7.9%. During 2005 the CER was 11.75% and the WPI 10.7%, while in 2006 the CER and WPI increased by 10.3% and 7.1%, respectively.

Argentina's history prior to the adoption of the Convertibility Law raises serious doubts as to the ability of the Argentine government to maintain a strict monetary policy and control inflation. As a result of the high inflation in Argentina from 2002 onwards, Banco Hipotecario's mortgage loan portfolio experienced a significant decrease in value and if inflation were to increase significantly once again, it might continue to undergo a major decrease in value. Accordingly, an increase in Banco Hipotecario's funding and other costs due to inflation might not be offset by indexation, which could adversely affect its liquidity and results of operations.

Legislation limiting Banco Hipotecario's ability to foreclose on mortgaged collateral may have an adverse effect on it.

Like other mortgage lenders, the ability to foreclose on mortgaged collateral to recover on delinquent mortgage loans impacts the conduct of Banco Hipotecario's business. In February 2002, the Argentine government amended Argentina's Bankruptcy Law, suspending bankruptcies and foreclosures on real estate that constitutes the debtor's primary residence, initially for a six-month period and subsequently extended until November 14, 2002. Since 2003, the Argentine government has approved various laws that have suspended, in some cases, foreclosures for a period of time in accordance with Law No. 25,972 enacted on December 18, 2004, and, in some cases, temporarily suspended all judicial and non-judicial mortgage and pledge enforcement actions. Several laws and decrees extended this mortgage foreclosure suspension period. Most recently, on June 14, 2006, Argentine Law 26,103 was enacted which established a 180-day suspension period for mortgage foreclosure proceedings affecting debtors where the subject mortgage related to the debtor's sole residence and where the original loan was not greater than Ps.100,000.

Law No. 25,798, enacted November 5, 2003, and implemented by Decrees No. 1284/2003 and No. 352/2004, among others, sets forth a system to restructure delinquent mortgage payments to prevent foreclosures on a debtor's sole residence (the Mortgage Refinancing System). The Mortgage Refinancing System establishes a trust composed of assets contributed by the Argentine government and income from restructured mortgage loans. *Banco de la Nación Argentina*, in its capacity as trustee of said trust, enters into debt restructuring agreements with delinquent mortgage debtors establishing the following terms: (i) a grace period on the mortgage loan of one year and (ii) monthly installment payments on the mortgage loan not to exceed 30% of the aggregate

Table of Contents

income of the family living in the mortgaged property. *Banco de la Nación Argentina* then subrogates the mortgagee's rights against the debtor, by issuing notes delivered to the mortgagee to settle the amounts outstanding on the mortgage loan. The sum restructured under the Mortgage Refinancing System may not exceed the appraisal value of the property securing the mortgage after deducting any debts for taxes and maintenance. The Mortgage Refinancing System was established for a limited period of time, during which parties to mortgage loan agreements could opt to participate and was subsequently extended by a number of decrees and laws.

Law No. 26,167, enacted on November 29, 2006, suspended foreclosures and also established a special proceeding for the enforcement of certain mortgage loans. Such special proceedings give creditors a 10-day period to inform the court of the amounts owed under the mortgage loan. Soon thereafter, the judge will call the parties for a hearing in order to reach an agreement on the amount and terms of payment thereunder. In case of failure by the parties to reach such agreement, they will have a 30-day negotiation period, and if the negotiations do not result in an agreement, then, payment and conditions will be determined by the courts.

On November 29, 2006, Law No. 26,177 created the *Unidad de Reestructuración*, a government agency responsible for the revision of each of the mortgage loans granted by the state-owned Banco Hipotecario Nacional, the predecessor of Banco Hipotecario, before the enactment of the Convertibility Law in 1991. The *Unidad de Reestructuración* also makes non-binding recommendations to facilitate the restructuring of such mortgage loans. If no agreement is reached, the *Unidad de Reestructuración* will submit a proposal to the National Congress, which may recommend forgiveness or other write-off of such loans, extensions of their scheduled maturities or other subsidies that adversely affect Banco Hipotecario's ability to foreclose on such mortgage loans.

Recently enacted Law No. 26,313 established mandatory restructuring of certain mortgage loans granted by the former Banco Hipotecario Nacional prior to April 1, 1991. The language of the law is to a certain degree unclear as concern its scope of application. Neither the Ministry of Economy nor the Central Bank have issued corresponding regulations explaining the application of the law as yet. Banco Hipotecario's management interpretation is that the law only applies to non-performing mortgage loans granted before April 1, 1991, which were already restructured according to former regulations. However, although we regard the following scenario as unlikely, if the regulations to be issued under the law were to interpret or provide that the new recalculation is applicable to all mortgage loans granted prior to April 1, 1991, including performing loans, depending on the way in which such regulations were made, Banco Hipotecario S.A., as legal successor to the former Banco Hipotecario Nacional, might suffer a material financial loss to the extent that the law has not contemplated the payment of any damages or compensation to the Bank in such regard.

We cannot assure you that the Argentine government will not enact further new laws restricting Banco Hipotecario's ability to enforce its rights as creditors. Any such limitation on its ability to successfully implement foreclosures could have a material adverse effect on its financial condition and results of operations.

Banco Hipotecario's non-mortgage loan portfolio has grown rapidly and is concentrated in the low- and middle-income segments.

As a result of Banco Hipotecario's strategy to diversify its banking operations and develop retail and other non-mortgage banking activities, in recent years its portfolio of non-mortgage loans has grown rapidly. During the period between December 31, 2004 and June 30, 2007, Banco Hipotecario's portfolio of non-mortgage loans grew 799.3% from Ps.232.2 million to Ps.1,855.9 million. A very substantial portion of its portfolio of non-mortgage loans consists of loans to low- and middle-income individuals and, to a lesser extent, middle-market companies. These individuals and companies are likely to be more seriously affected by adverse developments in the Argentine economy than high income individuals and large corporations. Consequently, in the future Banco Hipotecario may experience higher levels of past due non-mortgage loans that would likely result in increased provisions for loan losses. In addition, large-scale lending to low- and middle-income individuals and middle-market companies is a new business activity for Banco Hipotecario, and as a result its experience and loan-loss data for such loans are necessarily limited. Therefore, we cannot assure you that the levels of past due non-mortgage loans and resulting charge-offs will not increase materially in the future.

Table of Contents

Given the current valuation criteria of the Central Bank for the recording of BODEN and other public securities on Banco Hipotecario's balance sheets, its most recent financial statements may not be indicative of its current financial condition.

Banco Hipotecario prepares its financial statements in accordance with Central Bank accounting rules which differ in certain material respects from Argentine GAAP. During 2002, Central Bank accounting rules were modified in several respects that materially increased certain discrepancies between Central Bank accounting rules and Argentine GAAP. In accordance with Central Bank accounting rules, Banco Hipotecario's consolidated balance sheet as of June 30, 2007 includes US\$816.6 million of BODEN issued by the Argentine government as compensation for pesification, as well as an US\$84.4 million asset representing its right to acquire additional BODEN. Banco Hipotecario's consolidated balance sheet at June 30, 2007 also includes Ps.218.0 million representing Central Bank borrowings which Banco Hipotecario incurred to finance its acquisition of the additional BODEN. Also, since September 30, 2005 Banco Hipotecario has subscribed BODEN 2012 for US\$773.5 million and reduced Central Bank borrowings for Ps.1,844.0 million. Additionally, its most recent consolidated annual income statements include the accrual of interest to be received on BODEN not yet received and interest to be paid adjusted by CER on Central Bank borrowings.

In accordance with Central Bank accounting rules, the BODEN reflected on its consolidated balance sheets as of June 30, 2007 have been recorded at 100% of face value. However, the BODEN are unsecured debt obligations of the Argentine government which has defaulted on a significant portion of its indebtedness although the government is current in respect of payments due on the BODEN and has restructured a substantial portion of its sovereign debt. As of June 30, 2007, the BODEN were not rated and were trading in the secondary market at a price of approximately US\$97.20 for every US\$100 of outstanding value. Carrying BODEN at a value equal to their full face value, which is in excess of their current market value, has the effect of increasing Banco Hipotecario's total assets recorded on its consolidated balance sheet. In this important respect, its most recent consolidated audited annual financial statements are not comparable to its historic financial statements and have been prepared according to accounting principles that differ materially from Argentine GAAP.

Due to interest rate and currency mismatches of its assets and liabilities, Banco Hipotecario has significant currency exposure.

As of June 30, 2007, Banco Hipotecario's foreign currency-denominated liabilities exceeded its foreign-currency-denominated assets by approximately US\$118 million. Substantially all of Banco Hipotecario's foreign currency assets consist of dollar-denominated BODEN, but Banco Hipotecario's liabilities in foreign currencies are denominated in both U.S. Dollars and Euros. This currency gap exposes Banco Hipotecario to risk of exchange rate volatility which would negatively affect Banco Hipotecario's financial results if the U.S. Dollar were to depreciate against the Peso and/or the Euro. We cannot assure you that the U.S. Dollar will not appreciate against the Peso, or that we will not be adversely affected by Banco Hipotecario's exposure to risks of exchange rate fluctuations.

Because of its large holdings of BODEN and guaranteed government loans, Banco Hipotecario has significant exposure to the Argentine public sector.

On December 23, 2001, the Argentine government declared the suspension of payments on most of its sovereign debt, which as of December 31, 2001, totaled approximately US\$144.5 billion, a substantial portion of which was restructured by the issuance of new bonds in the middle of 2005. Additionally, the Argentine government has incurred, and is expected to continue to incur, significant new debt obligations, including the issuance of compensatory bonds to financial institutions. As of June 30, 2007 Banco Hipotecario had a total of US\$901.1 million of BODEN issued by the Argentine Government. At that same date, Banco Hipotecario also had a total of approximately US\$0.2 million of guaranteed government loans. Given Banco Hipotecario's BODEN holdings, Banco Hipotecario has a significant exposure to the Argentine government's solvency. Further, defaults by the Argentine government on its debt obligations, including the BODEN and other government securities (such as the guaranteed government loans) held by Banco Hipotecario, would materially and adversely affect its financial condition which would in turn affect IRSA's investment.

Table of Contents

Banco Hipotecario operates in a highly regulated environment, and its operations are subject to regulations adopted, and measures taken, by the Central Bank, the Comisión Nacional de Valores and other regulatory agencies.

Financial institutions are subject to significant regulation relating to functions that historically have been mandated by the Central Bank and other regulatory authorities. Measures adopted by the Central Bank have had, and future regulations may have, a material adverse effect on Banco Hipotecario's financial condition and results of operations. For example, on July 25, 2003, the Central Bank announced its intention to adopt new capital adequacy requirements that it will implement gradually through to 2009. In addition, the IMF and other multilateral agencies encouraged the Argentine Government to impose minimum capital adequacy, solvency and liquidity requirements consistent with international standards, which could impose material operating restrictions on Banco Hipotecario.

Similarly, the *Comisión Nacional de Valores*, which authorizes Banco Hipotecario's offerings of securities and regulates the public markets in Argentina, has the authority to impose sanctions on Banco Hipotecario and its board of directors for breaches of corporate governance. Under applicable law, the *Comisión Nacional de Valores* has the authority to impose penalties that range from minor regulatory enforcement sanctions to significant monetary fines, to disqualification of directors from performing board functions for a period of time, and (in an extreme case) prohibiting issuers from making public offerings, if they were to determine that there was wrongdoing or material violation of law. Although Banco Hipotecario is not currently party to any proceeding before the *Comisión Nacional de Valores*, we cannot assure you that the *Comisión Nacional de Valores* will not initiate new proceedings against Banco Hipotecario, its shareholder or directors or impose further sanctions.

Commencing in early 2002, laws and decrees have been implemented that have substantially altered the prevailing legal regime and obligations established in contract. In the recent past, various initiatives have been presented to Congress intended to reduce or eliminate the debt owed to Banco Hipotecario on a portion of its mortgage loan portfolio and there were initiatives intended to review the terms pursuant to which Banco Hipotecario Nacional was privatized. As a result, we cannot assure you that the legislative branch will not enact new laws that will have a significant adverse impact on Banco Hipotecario's shareholders' equity or that, if this were to occur, the Argentine government would compensate us for the resulting loss.

The Argentine government may prevail in all matters to be decided at a Banco Hipotecario's general shareholders meeting.

According to the Privatization Law and Banco Hipotecario's by-laws, holders of Class A and Class D Shares have special voting rights relating to certain corporate decisions. Whenever such special rights do not apply (with respect to the Class A Shares and the Class D Shares) and in all cases (with respect to the Class B Shares and the Class C Shares), each share of common shares entitles the holder to one vote. Pursuant to Argentine regulations, Banco Hipotecario may not issue new shares with multiple votes.

The holders of Class D Shares have the right to elect nine of Banco Hipotecario's board members and their respective alternates. In addition, for so long as Class A Shares represent more than 42.0% of Banco Hipotecario's capital, the Class D Shares shall be entitled to three votes per share, provided that holders of Class D Shares will be entitled to only one vote per share in the case of a vote on:

- a fundamental change in Banco Hipotecario's corporate purpose;
- a change in Banco Hipotecario's domicile outside of Argentina;
- dissolution prior to the expiration of Banco Hipotecario's corporate existence;
- a merger or spin-off after which Banco Hipotecario would not be the surviving corporation;
- a total or partial recapitalization following a mandatory reduction of capital; and

Table of Contents

approval of voluntary reserves, other than legally mandated reserves, when their amount exceeds Banco Hipotecario's capital stock and its legally mandated reserves.

In addition, irrespective of what percentage of Banco Hipotecario's outstanding capital stock is represented by Class A Shares, the affirmative vote of the holders of Class A Shares is required to adopt certain decisions. Class D Shares will not be converted into Class A Shares, Class B Shares or Class C Shares by virtue of their reacquisition by the Argentine government, PPP or Programa de Propiedad Participada (the Shared Property Program) participants or companies engaged in housing development or real estate activities.

According to the Privatization Law, there are no restrictions on the ability of the Argentine government to dispose of its Class A shares, and all but one of such shares could be sold to third parties in a public offering. If the Class A shares represent less than 42% of Banco Hipotecario's total voting stock as a result of the issuance of new shares other than Class A shares or otherwise, the Class D shares IRSA holds will automatically lose their triple voting rights. If this were to occur, IRSA would likely lose its current ability, together with IRSA's affiliates that also hold Class D shares of Banco Hipotecario, to exercise substantial influence over decisions submitted to the vote of Banco Hipotecario's shareholders.

Banco Hipotecario will continue to consider acquisition opportunities which may not be successful.

From time to time in recent years, Banco Hipotecario has considered certain possible acquisitions or business combinations, and Banco Hipotecario expects to continue considering acquisitions that it believes offer attractive opportunities and are consistent with its business strategy. We cannot assure you, however, that Banco Hipotecario will be able to identify suitable acquisition candidates or that Banco Hipotecario will be able to acquire promising target financial institutions on favorable terms. Additionally, its ability to obtain the desired effects of such acquisitions will depend in part on its ability to successfully complete the integration of those businesses. The integration of acquired businesses entails significant risks, including:

unforeseen difficulties in integrating operations and systems;

problems assimilating or retaining the employees of acquired businesses;

challenges retaining customers of acquired businesses;

unexpected liabilities or contingencies relating to the acquired businesses; and

the possibility that management may be distracted from day-to-day business concerns by integration activities and related problem solving.

Risks Related to Our ADSs and Common Shares

Shares eligible for sale could adversely affect the price of our common shares and American Depositary Shares.

The market prices of our common shares and American Depositary Shares (ADS) could decline as a result of sales by our existing shareholders of common shares or ADSs in the market, or the perception that these sales could occur. These sales also might make it difficult for us to sell equity securities in the future at a time and at a price that we deem appropriate.

The ADSs are freely transferable under US securities laws, including shares sold to our affiliates. Inversiones Financieras del Sur S.A., which as of November 30, 2007, owned approximately 31.8% of our common shares (or approximately 101,963,754 common shares which may be exchanged for an aggregate of 10,196,375 ADSs), is free to dispose of any or all of its common shares or ADSs at any time in its discretion. Sales of a large number of our common shares and/or ADSs would likely have an adverse effect on the market price of our common shares and the ADS.

Table of Contents

We are subject to certain different corporate disclosure requirements and accounting standards than domestic issuers of listed securities in the United States.

There is less publicly available information about the issuers of securities listed on the Buenos Aires Stock Exchange than information publicly available about domestic issuers of listed securities in the United States and certain other countries. In addition, all listed Argentine companies must prepare their financial statements in accordance with Argentine GAAP and the regulations of the *Comisión Nacional de Valores* which differ in certain significant respects from U.S. GAAP. For this and other reasons, the presentation of Argentine financial statements and reported earnings may differ from that of companies in other countries in this and other respects.

We are exempted from the rules under the Exchange Act prescribing the furnishing and content of proxy statements, and our officers, directors and principal shareholders are exempted from the reporting and short-swing profit recovery provisions contained in Section 16 of the Exchange Act.

Investors may not be able to effect service of process within the U.S., limiting their recovery of any foreign judgment.

We are a publicly held corporation (*sociedad anónima*) organized under the laws of Argentina. Most of our directors and our senior managers, and most of our assets are located in Argentina. As a result, it may not be possible for investors to effect service of process within the United States upon us or such persons or to enforce against us or them, in United States courts, judgments obtained in such courts predicated upon the civil liability provisions of the United States federal securities laws. We have been advised by our Argentine counsel, Zang, Bergel & Viñes, that there is doubt as to whether the Argentine courts will enforce to the same extent and in as timely a manner as a US or foreign court, an action predicated solely upon the civil liability provisions of the United States federal securities laws or other foreign regulations brought against such persons or against us.

If we are considered to be a passive foreign investment company for United States federal income tax purposes, U.S. holders of our equity securities would suffer negative consequences.

Based on the current composition of our income and the valuation of our assets, including goodwill, we do not believe we were a passive foreign investment company (PFIC) for United States federal income tax purposes for the taxable year ending June 30, 2007. The determination of whether we are a PFIC is made annually. Accordingly, it is possible that we may be a PFIC in the current or any future taxable year due to changes in our asset or income composition. The volatility and instability of Argentina's economic and financial system may substantially affect the composition of our income and assets. Specifically, for any taxable year we will be classified as a PFIC for United States tax purposes if either (i) 75% or more of our gross income in that taxable year is passive income or (ii) the average percentage of our assets by value in a taxable year which produce or are held for the production of passive income is at least 50%. If we own at least 25% by value of the stock of another corporation, we will be treated, for purposes of the PFIC tests, as owning our proportionate share of that other corporation's assets and receiving our proportionate share of its income. If we become a PFIC, U.S. holders of our equity securities will be subject to certain United States federal income tax rules that have negative consequences for U.S. holders such as additional tax and an interest charge upon certain distributions by us or upon a sale or other disposition of our equity securities at a gain, as well as additional reporting requirements. Please see [Taxation](#) for a more detailed discussion of the consequences if we are deemed a PFIC. You should consult your own tax advisors regarding the application of the PFIC rules to your particular circumstances.

Under Argentine law, shareholder rights may be fewer or less well defined than in other jurisdictions.

Our corporate affairs are governed by our by-laws and by Argentine corporate law, which differ from the legal principles that would apply if we were incorporated in a jurisdiction in the United States, such as the States of Delaware or New York, or in other jurisdictions outside Argentina. In addition, your rights or the rights of holders of our common shares to protect your or their interests in connection with actions by our board of directors may be fewer and less well defined under Argentine corporate law than under the laws of those other

Table of Contents

jurisdictions. Although insider trading and price manipulation are illegal under Argentine law, the Argentine securities markets are not as highly regulated or supervised as the US securities markets or markets in some other jurisdictions. In addition, rules and policies against self dealing and regarding the preservation of shareholder interests may be less well defined and enforced in Argentina than in the United States, putting holders of our common shares and ADSs at a potential disadvantage.

The protections afforded to minority shareholders in Argentina are different from and more limited than those in the United States and may be more difficult to enforce.

Under Argentine law, the protections afforded to minority shareholders are different from, and much more limited than, those in the United States and some other Latin American countries. For example, the legal framework with respect to shareholder disputes, such as derivative lawsuits and class actions, is less developed under Argentine law than under U.S. law as a result of Argentina's short history with these types of claims and few successful cases. In addition, there are different procedural requirements for bringing these types of shareholder lawsuits. As a result, it may be more difficult for our minority shareholders to enforce their rights against us or our directors or controlling shareholder than it would be for shareholders of a US company.

Holders of common shares may determine to not pay any dividends.

In accordance with Argentine corporate law we may pay dividends to shareholders out of net and realized profits, if any, as set forth in our audited financial statements prepared in accordance with Argentine GAAP. The approval, amount and payment of dividends are subject to the approval by our shareholders at our annual ordinary shareholders meeting. The approval of dividends requires the affirmative vote of a majority of the shareholders entitled to vote at the meeting. As a result, we cannot assure you that we will be able to generate enough net and realized profits so as to pay dividends or that our shareholders will decide that dividends will be paid.

Our ability to pay dividends is limited by law and by certain loan agreement covenants.

In accordance with Argentine corporate law, we may pay dividends in Pesos out of retained earnings, if any, to the extent set forth in our audited financial statements prepared in accordance with Argentine GAAP. In addition, we are party to a loan agreement which imposes restrictions on our ability to pay dividends in excess of US\$5 million per calendar year.

Risks Related to IRSA's Global Depositary Shares and the Shares

Shares eligible for sale could adversely affect the price of IRSA's common shares and Global Depositary Shares.

The market prices of IRSA's common shares and GDS could decline as a result of sales by IRSA's existing shareholders of common shares or GDSs in the market, or the perception that these sales could occur. These sales also might make it difficult for IRSA to sell equity securities in the future at a time and at a price that IRSA deem appropriate.

The GDSs are freely transferable under US securities laws, including shares sold to IRSA's affiliates. Our company, which as of November 30, 2007, owned approximately 34.4% of IRSA's common shares (or approximately 199,312,028 common shares which may be exchanged for an aggregate of 19,931,202 GDSs), is free to dispose of any or all of our common shares or GDSs at any time in our discretion. Sales of a large number of IRSA's common shares and/or GDSs would likely have an adverse effect on the market price of IRSA's common shares and the GDS.

Table of Contents

IRSA is subject to certain different corporate disclosure requirements and accounting standards than domestic issuers of listed securities in the United States.

There is less publicly available information about the issuers of securities listed on the *Bolsa de Comercio de Buenos Aires* than information publicly available about domestic issuers of listed securities in the United States and certain other countries. In addition, all listed Argentine companies must prepare their financial statements in accordance with Argentine GAAP and the regulations of the *Comisión Nacional de Valores* which differ in certain significant respects from U.S. GAAP. Holders of common shares may determine not to pay any dividends.

In accordance with Argentine corporate law IRSA may pay dividends to shareholders out of net and realized profits, if any, as set forth in IRSA's audited financial statements prepared in accordance with Argentine GAAP. The approval, amount and payment of dividends are subject to the approval by IRSA's shareholders at their annual ordinary shareholders meeting. The approval of dividends requires the affirmative vote of a majority of the shareholders entitled to vote at the meeting. As a result, IRSA cannot assure you that they will be able to generate enough net and realized profits so as to pay dividends or that IRSA's shareholders will decide that dividends will be paid.

IRSA's ability to pay dividends is limited by law, by their by-laws and by certain restrictive covenants in their debt instruments.

In accordance with Argentine corporate law, IRSA may pay dividends in Pesos only out of retained earnings, if any, to the extent set forth in IRSA's audited financial statements prepared in accordance with Argentine GAAP. In addition, IRSA's ability to pay dividends on their common shares is limited by certain restrictive covenants in their debt instruments.

On February 2, 2007, IRSA issued 8.5% notes due 2017 in an aggregate principal amount of US\$150.0 million. These bonds contain a covenant limiting their ability to pay dividends which may not exceed the sum of:

50% of IRSA's cumulative consolidated net income; or

75% of IRSA's cumulative consolidated net income if their consolidated interest coverage ratio for their most recent four consecutive fiscal quarters is at least 3.0 to 1; or

100% of cumulative consolidated net income if IRSA's consolidated interest coverage ratio for their most recent four consecutive fiscal quarters is at least 4.0 to 1; or

100% of the aggregate net cash proceeds (with certain exceptions) and the fair market value of property other than cash received by IRSA or by their restricted subsidiaries from (a) any contribution to IRSA's equity capital or to the capital stock of their restricted subsidiaries or issuance and sale of IRSA's qualified capital stock or the qualified capital stock of their restricted subsidiaries subsequent to the issue of IRSA's notes due 2017, or (b) any issuance and sale subsequent to the issuance of IRSA's notes due 2017, of their indebtedness, or of the indebtedness of IRSA's restricted subsidiaries that has been converted into or exchanged for their qualified capital stock.

Table of Contents

As a result, IRSA cannot give you any assurance that in the future they will pay any dividends in respect of their common shares.

Item 4. Information on the Company

A. HISTORY AND DEVELOPMENT OF CRESUD

General Information

Our legal name is Cresud Sociedad Anónima Comercial, Inmobiliaria, Financiera y Agropecuaria. We were incorporated and organized on December 31, 1936 under Argentine law as a stock corporation (sociedad anónima) and were registered with the Public Registry of Commerce of the City of Buenos Aires (*Inspección General de Justicia*), or IGJ on February 19, 1937 under number 26, on page 2, book 45 of National By-laws Volume. Pursuant to our bylaws, our term of duration expires on July 6, 2082. Our headquarters are located at Moreno 877, (C1091AAQ), Buenos Aires, Argentina. Our telephone is +54 (11) 4814-7800, and our website is www.cresud.com.ar.

Information contained in or accessible through our website is not a part of this annual report on Form 20-F. All references in this annual report on Form 20-F to this or other internet sites are inactive textual references to these URLs, or uniform resource locators and are for your information reference only. We assume no responsibility for the information contained on these sites.

History

We were incorporated in 1936 as a subsidiary of *Credit Foncier*, a Belgian company engaged in the business of providing rural and urban loans in Argentina. We were incorporated to administer real estate holdings foreclosed by *Credit Foncier*. *Credit Foncier* was liquidated in 1959, and as a part of such liquidation, our shares were distributed to *Credit Foncier*'s shareholders and in 1960 were listed on the Buenos Aires Stock Exchange. During the 1960s and 1970s, our business shifted to exclusively agricultural activities.

During 1993 and 1994, Consultores Asset Management acquired on behalf of certain investors approximately 22% of our outstanding shares on the Buenos Aires Stock Exchange. In late 1994, an investor group led by Consultores Asset Management (and including Dolphin Fund plc.) purchased additional shares increasing their aggregate shareholding to approximately 51.4% of our outstanding shares. In 1995, we increased our capital through a rights offering and global public offering of ADRs representing our common shares and listed such ADRs on the NASDAQ.

At June 30, 2007, we invested approximately Ps.263.7 million to acquire approximately 25.0% of the outstanding common shares of IRSA. On September 30, 2007, we exercised 20.5 million of our warrants to acquire an additional 37.6 million common shares of IRSA for a total cost of US\$24.6 million. Additionally, on October 25, 2007, we exercised 12.5 million of our warrants to acquire an additional 22.9 million common shares for a total cost of US\$ 15.0 million. On September 25, 2007, we converted US\$ 12.0 million of IRSA's convertible notes into 22.0 million common shares of IRSA. After this exercise of warrants and conversion of convertible notes, we have no outstanding warrants or convertible notes of IRSA. The term for the exercise of IRSA's outstanding warrants and the conversion of IRSA's outstanding convertible notes issued on November 21, 2002 expired on November 14, 2007. Throughout the conversion and exercise periods, holders of IRSA's warrants and convertible notes exercised an aggregate of 99,896,806 warrants and converted an aggregate of 99,942,343 convertible notes, respectively, increasing IRSA's capital stock to 578,676,460 issued and outstanding shares. As of the date of this Form 20-F, there are no outstanding warrants or convertible notes to acquire IRSA's shares. As a result of these exercises and conversions, our investment in IRSA's common shares increased from 25.0% on June 30, 2007 to 34.4% on November 30, 2007.

From 2000 to November 30, 2007, we invested approximately Ps.428.6 million to acquire approximately 34.4% of the outstanding common shares of IRSA, one of Argentina's largest real estate companies.

Table of Contents

Business acquisitions

Year Ended June 30, 2007

On May 15, 2007, a bill of purchase was signed for a surface area of 90,000 hectares in the 8 de Julio farm, located south of the Deseado River in the Province of Santa Cruz. The transaction was agreed for a price of US\$2.4 million. Upon execution of the bill of purchase a payment was made for US\$1.2 million and possession over the farm was taken. On August 13, 2007, we paid US\$0.24 million and the balance shall be paid in September 2008, and also on that date the deed shall be executed. This farm offers excellent potential for sheep production, both in terms of wool and mutton production. In addition, it has future potential as a tourist attraction and for leisure activities.

Year Ended June 30, 2006

On December 27, 2005, we and Inversiones Ganaderas S.A. (solely as nominee for Argentine legal purposes) acquired 100% of the shares of Agropecuaria Cervera S.A. (Agropecuaria Cervera), whose main asset is the concession for the start-up of production pertaining to a comprehensive biological, economic and social development project over various properties located in Anta, Province of Salta, and it is duly authorized to implement a large-scale project covering agricultural, cattle breeding and forestry activities. The concession agreement covers 162,000 hectares for a 35-year period with an option to extend it for another 29 years. In the framework of the concession, there is a development project aimed at applying 35,000 hectares to agricultural uses. As of June 30, 2007, we had not commenced significant land development activities. We surrendered 3.6 million of IRSA's convertible notes and paid Ps 3.17 million in cash for the acquisition of the concession.

Land development is also expected to continue in the framework of a project consisting of a total of 35,000 hectares which has been approved by the Secretariat of Environment and Sustainable Development of the Province of Salta.

On September 1, 2005, we signed the deed for the purchase of the San Pedro farm of 6,022 hectares located in the Department of Uruguay, Province of Entre Ríos. The purchase price was US\$16 million, of which US\$9.5 million was paid when signed the deed, US\$4.0 million was paid on December 14, 2005 and US\$0.73 million was paid on September 1, 2006. The remaining balance of US\$1.7 million plus interest of US\$0.1 million will be paid in September 2008.

Formation of Companies

In March 2006, we and other parties founded BrasilAgro for the purpose of expanding our business to Brazil. The Company contributed cash in the amount of Ps. 63.1 million in exchange for shares and 104,902 warrants to purchase additional shares. The Company's equity interest in BrasilAgro is 7.3%. BrasilAgro's shares went public in the Brazilian Stock Exchange (Bovespa) in May 2006. Warrants vest in one-thirds starting May 2, 2007 and are exercisable for a period of up to 15 years at an exercise price equivalent to the initial public offering price adjusted by the Brazilian IPCA inflation index. Should the Company exercise the warrants, the equity interest would be increased to 14.1%. Moreover, an additional 104,902 warrants were issued which can only be exercised, at the Company's option, in the event of a tender offer. These warrants are exercisable through the year 2021 at an exercise price equivalent to the purchase price of the tender offer by the acquirer of BrasilAgro.

Year Ended June 30, 2005

On March 9, 2005 the Company signed a preliminary purchase agreement to acquire 72 hectares located in the Province of Buenos Aires, for a total consideration of Ps. 0.8 million. The transaction is subject to certain closing conditions.

On June 24, 2005 the Company acquired El Invierno farm covering 1,946 hectares located in the Province of La Pampa, for a total purchase price of US\$ 3.0 million.

Table of Contents
Farm Sales*Year Ended June 30, 2007*

On June 6, 2007, we signed a sales deed for the 20,833 hectare Tapenagá farm, located in the Province of Chaco. This deal was consummated for US\$7.3 million. The property was valued in the Company's books at US\$97.5 per hectare. Therefore, the transaction generated a US\$5.0 million profit. We have collected US\$3.7 million as of June 6, 2007 while the remaining balance of US\$3.7 million will be collected in equal payments in May of each of 2008, 2009 and 2010.

In addition, we signed a sales deed for a 14,516 hectare piece of the Los Pozos farm, located in Joaquín V. González, Province of Salta. The price of the transaction was US\$2.2 million, or US\$150 per hectare. The book value of the lot sold was US\$7 per hectare. Therefore, this sale generated a US\$2.0 million profit.

Lastly, we signed a sales deed for a 50 hectare piece of the El Recreo farm, located in Recreo, Province of Catamarca, for Ps.0.7 million, which generated a Ps.0.5 million profit.

On August 28, 2006, IGSA signed a preliminary sale contract of 1,800 hectares of the establishment called El Recreo of its property, in the amount of US\$0.15 million. As advance payment we have received US\$0.05 million. As of June 30, 2007 this sale has not been reflected in the financial statements as the property of the land has not yet been transferred.

Year Ended June 30, 2006

On July 25, 2005 the Company sold El Gualicho farm, covering 5,727 hectares, located in the Province of Córdoba, for a total sales price of US\$ 5.7 million, resulting in a gain of US\$ 3.4 million. The company collected US\$ 2.9 million and will collect the balance in five equal annual installments through July 2010.

Year Ended June 30, 2005

On February 1, 2005, the Company sold Ñacurutú farm, covering 30,350 hectares, located in the Province of Santa Fe, for a total sales price of US\$ 5.6 million, resulting in a gain of Ps. 7.6 million.

On June 8, 2005 the Company sold San Enrique farm, covering 977 hectares, located in the Province of Santa Fe, for a total sales price of US\$ 5.0 million, resulting in a gain of Ps. 12.3 million.

Capital Expenditures

Capital expenditures totaled Ps.29.3 million, Ps.55.8 million and Ps.25.9 million for the fiscal years ended June 2007, 2006 and 2005, respectively, including property and equipment acquired in business combinations. Our capital expenditures consisted of the acquisition and improvement of productive agricultural assets, as well as purchases of farms.

Our future capital expenditures for fiscal year 2008 will depend on the prevailing prices of land for agriculture and cattle as well as the evolution of commodity prices.

For the fiscal year ended June 30, 2007, our main investments consisted of Ps.9.7 million in the acquisition of real estate (including Ps.5.7 million in development of land reserve, Ps.3.9 million as partial payment for the purchase of 8 de Julio farm and Ps.0.1 million in forestry activities), Ps.1.5 million in improvements (including Ps.0.6 million in wire fences, Ps.0.3 million in watering troughs, Ps.0.2 million in roads, Ps.0.2 million in improvements in third parties buildings and Ps.0.2 million in corrals and leading lanes), Ps.0.9 million in facilities, Ps.0.3 million in vehicles, Ps.14.6 million for construction in progress (including Ps.10.8 million in development of land reserve, Ps.2.4 million in dairy farm and Ps.1.3 million in wire fences, new pastures, improvement in the main house and water extractions), Ps.0.8 million in machinery, Ps.0.6 million in computer and communication accessories, Ps.0.7 million in construction, Ps.0.1 million in forest products post and Ps.0.1 million in advances.

Table of Contents

For the fiscal year ended June 30, 2006, our main investments consisted of Ps.49.2 million in the acquisition of real estate (including Ps.39.3 million as partial payment for the purchase of San Pedro farm, Ps.9.7 million in development of land reserve and Ps.0.2 million in forestry activities), Ps.0.6 million in improvements, Ps.0.1 million in furniture and equipment, Ps.1.2 million in facilities (including Ps.0.8 million in general machinery and Ps.0.4 million in milking facility), Ps.1.3 million in new pastures, Ps.0.9 million in vehicles, Ps.0.2 million in construction, Ps.1.13 million in machinery (including Ps.0.8 million in general machinery and Ps.0.3 million in milking machinery), Ps.0.3 million in computer and communication accessories, Ps.0.9 million in construction in progress, Ps.0.1 million in feed lot and Ps.0.7 million in advances.

For the fiscal year ended June 30, 2005, our main investments consisted of Ps.12.5 million in the acquisition of real estate (including Ps.8.9 million in the purchase of El Invierno farm, Ps.1.1 million in the additional purchase of 72 hectares of La Adela farm, Ps.2.3 million in development of land reserve and Ps.0.2 million in forestry activities), Ps.0.2 million in improvements, Ps.0.1 million in furniture and equipment, Ps.4.2 million in facilities (including Ps.1.9 million in irrigation facilities, Ps.1.8 million in milking facilities and Ps.0.5 million in general facilities), Ps.1.1 million in new pastures, Ps.0.3 million in vehicles, Ps.0.6 million in construction, Ps.1.8 million in machinery (including Ps.1.2 million in irrigation machinery, Ps.0.4 million in milking machinery and Ps.0.1 million in general machinery), Ps.0.3 million in computer and communication accessories, Ps.4.6 million in construction in progress (including Ps.2.2 million in development of land reserve, Ps.1.0 million in watering troughs, Ps.0.6 million in roads and Ps.0.6 million in wire fences), Ps.0.1 million in feed lot and Ps.0.1 million in advances.

Recent Developments

Exercise of our warrants and conversion of our convertible notes. The term for the exercise of our outstanding warrants and the conversion of our outstanding convertible notes issued on November 21, 2002 expired on November 14, 2007. Throughout the conversion and exercise periods, holders of our warrants and convertible notes exercised an aggregate of 49,867,018 warrants and converted an aggregate of 49,910,874 convertible notes, respectively, increasing our capital stock to 320,774,772 issued and outstanding shares. As of the date of this annual report, there are no outstanding warrants or convertible notes to acquire our shares.

Cactus. The Cactus farm is a 170-hectare farm owned by our affiliate Cactus in Villa Mercedes, Province of San Luis. Cactus is a joint venture between us, Cactus Feeders Inc., one of the largest feed lot companies in the United States, and Tyson Foods, a leading beef and poultry meat processing company. The feed lot began to operate in September 1999. On October 12, 2007, the administrative authority of Villa Mercedes, Province of San Luis, where the feed lot is located, ordered the partial closure of Cactus due to the emission of odors related to the number of animals accommodated. In addition, it ordered Cactus to file a Mitigation Plan in connection with the emission of the said odors. On December 5, 2007, the aforementioned administrative authority discharged the closure, authorizing the accommodation of up to 18,000 heads of cattle.

Partial sale of Los Pozos farm. On October 22, 2007 we signed a deed for the transfer of 4,974 hectares of our Los Pozos farm, in the Province of Salta. The aggregate sale price was US\$1.1 million, of which we collected US\$0.34 on August 22, 2007 and US\$0.68 on October 25, 2007. The balance of US\$0.10 million plus accrued interest at a variable rate of LIBOR plus 600 basis points, is payable on August 21, 2008. We acquired Los Pozos farm at a purchase price of approximately US\$9.75 per hectare and was sold at approximately US\$225 per hectare, resulting in a gain of approximately US\$1.0 million.

Capital increase. On our shareholders meeting held on October 10, 2007, our shareholders approved a capital increase by a nominal amount of up to Ps.180,000,000, through the issuance of up to 180,000,000 of new common shares, par value Ps.1.00. On September 12, 2007, we filed a Registration Statement with the SEC and on October 7, 2007, we filed an amendment to such Registration Statement. As of the date of this Form 20-F, the final terms of this rights offering are pending of approval and we cannot give any assurance in relation to the proposed timing of the offering about the issue date of the new common shares.

Table of Contents

Minimum Environmental Budgets for the Protection of Native Forests Law. On December 19, 2007, was enacted Law No. 26,331, known as the Forests Law, which sets forth the minimum budgets for environmental protection, restoration, conservation and, use and sustainable management of native forests. The Forests Law prevents the owners of lands, including native forests from deforesting or converting forested areas to non-forest lands for other commercial uses without a prior permit from each local government, which requires the preparation and evaluation of an environmental impact report. The Forests Law establishes that each jurisdiction shall set forth its territorial planning within one year and that no deforestations shall be permitted prior to this.

In addition, the Forests Law also sets forth a national policy for the rational and sustainable use of native forests, which aims to guarantee the preferential use of native forests by aboriginal and farming communities that reside nearby. In this case, the relevant provincial authority shall not grant permits without the formal written consent by such communities and which is to be declared at a public hearing.

Purchase of additional hectares of La Adela . On December 17, 2007, we signed a purchase agreement to acquire the remaining undivided 25% of the 72 hectare of La Adela farm, which amounts to 18 hectares. The transaction was agreed at a price of US\$0.14 million, which was paid upon the execution of the agreement.

Agreement with Cyrela Brazil Realty. On August 14, 2007, IRSA signed an agreement with Cyrela Brazil Realty S.A. Empreendimentos e Participações (Cyrela) pursuant to which IRSA and Cyrela propose to develop residential projects in Argentina targeted to diverse market segments. IRSA and Cyrela formed a new company, Cyrsa S.A., to carry out the proposed development projects, and have each agreed to make an initial investment of US\$30 million in such company. Cyrela is a public company in Brazil and is one of the largest developers of residential real estate in the cities of Sao Paulo and Rio de Janeiro. We and IRSA have a long-standing commercial relationship with Cyrela as reflected by IRSA's substantial investment in Brazil Realty S.A. from 1994 to 2002 and our recent investment in BrasilAgro, a company focused on agricultural opportunities in Brazil that was founded by, among others, us and another company owned by Mr. Elie Horn, Cyrela's controlling shareholder and current chief executive officer.

Cyrsa is currently developing a parcel of land in Vicente Lopez, province of Buenos Aires.

Acquisition of BankBoston Tower. On August 27, 2007, IRSA signed a deed that entitles it to an undivided 50% ownership interest in an office building known as the BankBoston Tower, located at 265 Carlos Maria Della Paolera in the City of Buenos Aires. This modern property was designed by the recognized Architect Cesar Pelli and has a gross leasable area of 31,670 square meters. The transaction was consummated for an aggregate purchase price of US\$108million (including taxes), of which IRSA paid US\$54million.

Neuquén Project. On September 20, 2007 the Municipality of Neuquén declared the urban project and environmental impact study are feasible. Shopping Neuquén S.A. has 150 days to submit the work plans from the date of the declaration. See IRSA's Business Development and Sale of Properties Land Reserves in Other Provinces.

Patio Olmos Building. On September 25, 2007 IRSA signed the transfer deed to purchase the real estate in which the Patio Olmos commercial center is currently operating from the Government of the Province of Córdoba. IRSA also signed the transfer deed to purchase the related concession contract relating to the use the property. The balance of Ps. 22.7 million for the property and the concession was also paid on this date.

Table of Contents

Torres Rosario, City of Rosario. IRSA owns a plot of land spanning a surface of approximately 50,000 square meters in the City of Rosario in the same place where IRSA's local Shopping Center, Alto Rosario, is located.

On October 11, 2007, IRSA entered into a barter agreement with Condominios del Alto S.A. whereby Condominios del Alto S.A. proposed to acquire plot G, located in the City of Rosario, Province of Santa Fe, Argentina, which belongs to IRSA, for the construction at its own expense and under its own responsibility of a housing building. As consideration for the barter over the plot, Condominios de Alto S.A. agreed to deliver: (i) fifteen housing units, with a total constructed surface of 1,504.45 square meters, which will represent upon completion in aggregate 14.85% of the area of housing units to build in plot G (ii) fifteen garages, which will represent upon completion in aggregate 15% of the area of garage own units to be build in the same building.

As additional consideration for IRSA, Condominios del Alto S.A. will pay IRSA US\$15,300 and guarantee its obligations: (i) Condominios del Alto S.A. granted a first degree mortgage in favor of IRSA on plot G in the amount of US\$1,100,000; (ii) established a security insurance of which IRSA will be assigner of the insured amount of US\$1,600,000, and (iii) the shareholders of Condominios del Alto S.A. are the guarantors of the obligations of the latter up to the amount of US\$800,000.

Finally, IRSA granted to Condominios del Alto S.A. an option to enter into a barter agreement on Plot 2h, close to the transferred plot G.

National Congress enacted the Law No. 26,313. Recently enacted Law No. 26,313, established mandatory restructuring of certain mortgage loans granted by the former Banco Hipotecario Nacional prior to April 1, 1991. Neither the Ministry of Economy nor the Central Bank have issued corresponding regulations explaining the application of the law as yet. Banco Hipotecario's management interpretation is that this law only applies to non-performing mortgage loans granted before April 1, 1991, which are restructured convertibility period. However, it is possible that the regulations will provide for the restructuring of all mortgage loans granted prior to April 1, 1991, including performing loans.

Incorporation of Financel. On September 25, 2007, IRSA formed a new company, Financel Communications S.A. (Financel), with its partner Prisma Investments S.A. with ownership of 80% and 20%, respectively. Financel's purpose is to create innovative solutions for collections and payments in Argentina through the use of mobile telephony. Financel, together with CTI Móvil and Tarshop, have set-up Compra Móvil, the first shopping system for mobile telephones in Argentina which we believe will allow CTI customers to expand their options in an easy and secure way for payments of consumer purchasers through the use of their mobile telephones.

Exercise of IRSA's Warrants and Conversion of Convertible Notes. On September 30, 2007, we exercised 20.5 million of our warrants to acquire an additional 37.6 million common shares of IRSA for a total cost of US\$24.6 million. Additionally, on October 25, 2007, we exercised 12.5 million of our warrants to acquire an additional 22.9 million common shares for a total cost of US\$ 15.0 million. On September 25, 2007, we converted US\$ 12.0 million of IRSA's convertible notes into 22.0 million common shares of IRSA. After this exercise of warrants and conversion of convertible notes, we have no outstanding warrants or convertible notes of IRSA. The term for the exercise of IRSA's outstanding warrants and the conversion of IRSA's outstanding convertible notes issued on November 21, 2002 expired on November 14, 2007. Throughout the conversion and exercise periods, holders of IRSA's warrants and convertible notes exercised an aggregate of 99,896,806 warrants and converted an aggregate of 99,942,343 convertible notes, respectively, increasing IRSA's capital stock to 578,676,460 issued and outstanding shares. As of the date of this annual report, there are no outstanding warrants or convertible notes to acquire IRSA's shares. As a result of these exercises and conversions, our investment in IRSA's common shares increased from 25% on June 30, 2007 to 34.4% on November 16, 2007.

Prepayment of IRSA's Outstanding Indebtedness. On October 21, 2007 IRSA notified the holders of its secured floating rate notes due November 2009 and the lenders under its US\$51 million syndicated bank loan

Table of Contents

agreement of its intention to redeem such notes and repay such loans in full, together with interest accrued to the redemption and repayment date, as applicable. On October 29, 2007 IRSA prepaid US\$ 24.3 million of principal and US\$0.35 million of accrued interest under the notes, and US\$14.95 million of principal and US\$0.21 million of accrued interest under the loans.

IRSA's Capital increase. At IRSA's shareholders' meeting held on October 10, 2007, IRSA's shareholders approved a capital increase by a nominal amount of up to Ps.280,000,000, through the issuance of up to 280,000,000 of new common shares, par value Ps.1.00. On September 25, 2007, IRSA filed a Registration Statement with the SEC. As of the date of this Form 20-F, the final terms of this rights offering are pending and IRSA cannot give any assurance in relation to the proposed timing of the offering about the issue date of the new common shares.

Torres Renoir, Dock III. On September 7, 2004, IRSA entered into a barter and option agreement with DYPSA under which IRSA (i) exchanged an undeveloped parcel of land which forms part of IRSA's property, Dock III (identified as plot 1c) for the future delivery of residential units, parking lots and storage spaces representing an aggregate of 28.5% of the housing area of a 37-storey building to be constructed by DYPSA on plot 1c within 36 months or less and (ii) granted an option to DYPSA to acquire an undeveloped plot of land of Dique III (identified as plot 1e) of its property within 548 days or less from the date of signing the deed of conveyance for plot 1c and subject to the completion of certain work-in-progress in the 37-storey building. As a result, IRSA signed the deed of conveyance of plot 1c at a price of US\$8.0 million and the option for plot 1e at US\$10.8 million in November 2004. As guarantee for the first transaction, DYPSA set up a first degree mortgage on plot 1c in IRSA's favor for the total value of the property. In May 2006, DYPSA exercised the option to acquire plot 1e and both parties increased their valuation of the barter agreement to US\$ 13.5 million. As consideration for plot 1e, DYPSA would deliver housing units, individual storage spaces and parking lots representing an aggregate 31.5% of the housing area of a 40-storey building to be constructed by DYPSA on plot 1e within 36 months or less. As guarantee for this transaction, DYPSA set up a first degree mortgage on plot 1e in IRSA's favor for the original value of the respective transaction. On November 2, 2007, IRSA and the developer decided to replace the barter agreement for plot 1e for a payment of US\$18.2 million, US\$4.6 million of which were paid on that date and the balance of which will be paid to IRSA over the next six months. The income resulting from this transaction amounts to approximately US\$4.7 million.

Solares de Santa María, City of Buenos Aires (ex Santa María del Plata).*Background*

In 1997, IRSA acquired the property which the National Executive Branch declared would be used as the athletic residences for the Olympic Games if Buenos Aires was selected to host the Olympic Games (former Boca Juniors Football Club sports town), currently owned by IRSA's subsidiary Solares de Santa María S.A. Since purchasing the property, IRSA has sought approval for a mixed use development project (hereinafter the Project) to be built in the lot, including filing the dossier and meeting all the requirements set forth in the Rule passed by the Legislative Branch of the City of Buenos Aires in 1992 (Ordinance 45,665/92). This rule passed by the City Council of the City of Buenos Aires provides general urban standards in relation to the development of a lot and requires that the site design be submitted to the approval of the Urban Planning Council (Consejo de Planificación Urbana - COPUA) (Executive Branch).

The Project met the requirements under the Rule and was recently approved under Decree 1584/2007, issued by the Executive Branch of the Government of the City of Buenos Aires. Under the Planning Code 50% of the Lot shall be donated for public use and convenience, (357,975m²) inside which a common, nautical and recreation areas, roads, pedestrian lanes and so forth will be found.

Table of Contents

Evolution of Approval Instances

Since commencing the Project, IRSA has made various changes and filed an application for final approval, in response to changes in the building regulations and the interpretation of other legal requirements by the various authorities in office since commencing the Project. IRSA has been dealing with a different of authorities and regulatory bodies in order to obtain the final authorization of the Project. For example:

In 2000, IRSA filed a Master Plan for Santa María del Plata site, which was assessed by COPUA and submitted to the Town Treasurer's Office, who takes part in the process to grant final approve of the Project.

In 2002, by Decree 405/02, the government issued a notice of public hearing to be held in June 2002, which was carried out with presence of several professional and private entities and assessed by all Competent Agencies.

In June 2003, IRSA prepared an environmental impact statement in accordance with Resolution 1004- SSEPyDU-03.

On August 12, 2003, IRSA filed a plan to amend the Project in response to the recommendations made by the public hearing.

In December 2005, the Hydraulic General Bureau gave its consent to the project.

In July 2006, COPUA made some recommendations in relation to the project.

On December 13, 2006, IRSA filed an amendment to the Project to adjust it to the recommendations made by COPUA, that included the following:

1. The project met the Guidelines of the Environmental Urban Plan
2. The project was comprised within the proposals for the strategic development of the City's Southern Area.
3. A perimetrical pedestrian lane was designed along the entire site on the *Río de la Plata* bank.
4. Maximum integration with the city was planned, continuing with the surrounding urban landscape, designing a shore park on *Río de la Plata* bank and providing vehicle access to the avenues surrounding the site.
5. Donation of 50% of the Lot to the GCBA was proposed for Public Use and Convenience, which is the maximum amount set forth in the Planning Code.
6. The specific ruling within the scope of Ordinance N° 45,665/92, Law 23,738/89 and Decree 5783/92 was proposed.

Edgar Filing: CRESUD INC - Form 20-F

On March 29, 2007, COPUAM, an advisory body of government composed of advisors from the legislative and executive branches) released the 145-COPUAM-07 REPORT, in which it states that it has no objections in relation to the Project and requested the General Treasury issue a decision concerning the ruling scope proposed.

In May 2007, the Traffic Undersecretary took part at the request of the General Treasury, requesting a new traffic study for the area.

In July and November 2007, the General Treasury carried out a comprehensive studies of the urban proposal and bill of Decree submitted for consideration, stating that there is no legal challenge the Bill of Decree .

Prior to its enactment, the Decree was reviewed and approved by the Minister of Planning and Public Works, the Traffic and Transport Undersecretary, the Treasury Department and the General Technical Administrative and Legal Bureau of the Ministry of Planning and Public Works.

Having complied with all legal and technical requirements during the last 11 years since dossier was prepared and during 15 years, from the date when the general ruling on the site was passed by the Town Council, the Chief of Government of the City passed Decree No 1584/07 on November 9, 2007, which provides with the required approval for the Project.

Table of Contents

On December 1, 2007, Decree No 1584 was published in the Official Gazette No. 2815, fulfilling all legal rules in force.

Next steps

Notwithstanding the issuance of Decree No. 1584/07, other matters concerning operation and implementation of the Project, under the different sectors of urban agencies of the City of Buenos Aires, are still pending.

IRSA has also learned that the Decree has been judicially challenged on formal and procedural aspects. At the time of this report, IRSA has not been duly notified about any decision issued by the authorities concerning said objections.

In that sense, and if appropriate, IRSA will eventually evaluate what measures to take in order to protect the acquired rights.

B. BUSINESS OVERVIEW

General

We are a leading Argentine agricultural company with a growing presence in the Brazilian agricultural sector through our investment in BrasilAgro Companhia Brasileira de Propriedades Agrícola (BrasilAgro). We are currently involved in a range of activities including crop production, cattle raising and milk production. Our business model, which we seek to roll out abroad, taking into account the specific conditions of each country, focuses on the acquisition, development and exploitation of properties having attractive prospects for agricultural production and/or value appreciation and the selective disposition of such properties where appreciation has been realized. Our shares are listed on the Buenos Aires Stock Exchange, and our ADSs are listed on the NASDAQ Global Select Market.

As of June 30, 2007, we owned 17 farms with approximately 449,991 hectares. Approximately 21,704 hectares of the land we own are used for crop production, approximately 84,889 hectares are for beef cattle production, 2,609 hectares are for milk production and approximately 10,961 hectares are leased to third parties for crop and beef cattle production. The remaining 329,828 hectares of land reserve are primarily natural woodlands. In addition, through Agropecuaria Cervera S.A. we have the rights to 162,000 hectares of land for a 35-year period that can be extended for another 29 years. Also, during fiscal year 2007, we leased 25,307 hectares from third parties for crop production and 29,208 hectares for beef cattle production.

During the fiscal years ended June 30, 2005, 2006 and 2007, we had consolidated sales of Ps.78.2 million, Ps.112.3 million and Ps.110.3 million, production income of Ps.67.5 million, Ps.65.4 million and Ps.102.8 million and consolidated net income of Ps.76.8 million, Ps.32.9 million and Ps.49.4 million, respectively. During the three-year period from June 30, 2005 to June 30, 2007, our total consolidated assets increased 44.2% from Ps.743.4 million to Ps.1,071.9 million, and our consolidated net worth increased 57.7% from Ps.523.1 million to Ps.825.0 million.

Table of Contents

The following table sets forth, at the dates indicated, the amount of land used for each production activity (including owned and leased land):

	2005 ⁽¹⁾	At June 30, 2006 ⁽¹⁾ 2007 ^{(1) (4)}	
	(in hectares)		
Crops ⁽²⁾	39,831	41,283	53,579
Beef cattle	96,380	129,946	114,097
Milk	1,776	1,698	2,609
Natural woodlands ⁽³⁾	263,177	258,477	325,728
Owned farmlands leased to others	9,978	14,229	13,771
Total	411,142	445,633	509,784

(1) Includes 35.7% of approximately 8,299 hectares owned by Agro Uranga S.A., an affiliated Argentine company in which we own a non-controlling 35.7% interest. See Organizational Structure Subsidiaries and Affiliated Companies.

(2) Includes wheat, corn, sunflower, soybean, sorghum and others.

(3) We use part of our land reserves to produce fence posts, rods and charcoal.

(4) Includes 24.0% of approximately 170 hectares owned by Cactus Argentina S.A., an affiliated Argentine company in which we have a non-controlling 24.0% interest. See Organizational Structure Subsidiaries and Affiliated Companies.

We are also indirectly engaged in the Argentine real estate business through our holding of 34.4% of the common shares of IRSA, one of Argentina's largest real estate companies. IRSA is engaged in a range of diversified real estate activities including residential properties, office buildings, shopping centers and luxury hotels in Argentina. A majority of our directors are also directors of IRSA, and we are under common control by the same group of controlling shareholders. As of June 30, 2007, our investment in IRSA represented approximately 35.7% of our total consolidated assets, and during the fiscal year ended on June 30, 2007, our gain from our investment in IRSA was Ps.33.1 million.

In September 2005, we, together with certain Brazilian partners, founded BrasilAgro, a startup company organized to exploit opportunities in the Brazilian agricultural sector. In April 2006, BrasilAgro increased its capital through a global and domestic offering of common shares, and as of June 30, 2007, we owned 7.4% of the outstanding common shares of BrasilAgro. As of June 30, 2007, our investment in BrasilAgro represented approximately 6.4% of our total consolidated assets.

Strategy

We seek to maximize our return on assets and overall profitability by (i) identifying, acquiring and exploiting agricultural properties having attractive prospects for agricultural production and/or long-term value appreciation and selectively disposing of properties as appreciation is realized, (ii) optimizing the yields and productivity of our agricultural properties through the implementation of state-of-the-art technologies and agricultural techniques and (iii) preserving the value of our significant long-term investment in the urban real estate sector held through our affiliate IRSA.

Focus on maximizing value of our agricultural real estate assets

We conduct our agricultural activities with a focus on maximizing the value of our real estate assets. We seek to rotate our portfolio of properties over time by purchasing large parcels of land which we believe have a high potential for appreciation and selling them selectively as opportunities arise to realize attractive capital gains. We believe that our ability to realize gains from appreciation of our farmlands is based on the following principles:

Edgar Filing: CRESUD INC - Form 20-F

Acquiring under-utilized properties and enhancing their land use: We seek to purchase under-utilized properties at attractive prices and transform them to achieve more productive uses. We seek to do so by (i) transforming non-productive land into cattle feeding land, (ii) transforming cattle feeding land into land suitable for more productive agricultural uses or (iii) enhancing the value of agricultural lands by changing their use to more profitable agricultural activities or (iv) reaching to the final stage

Table of Contents

of the real estate development cycle by transforming rural properties into urban areas as the boundaries of urban development continue to extend into rural areas. To do so, we generally focus on acquisitions of properties outside of highly developed agricultural regions and/or properties whose value we believe is likely to be enhanced by proximity to existing or expected infrastructure.

Applying modern technologies to enhance operating yields and property values. We believe that an opportunity exists to improve the productivity and long-term value of inexpensive and/or underdeveloped land by investing in modern technologies such as genetically modified and high yield seeds, direct sowing techniques, machinery, crop yield optimization through land rotation, irrigation and the use of fertilizers and agrochemicals. To enhance our cattle production, we use genetic technology and have a strict animal health plan controlled periodically through traceability systems. In addition, we have introduced a feedlot to optimize our beef cattle management and state-of-the-art milking technologies in our dairy business.

Anticipating market trends. We seek to anticipate market trends in the agribusiness sector by (i) identifying opportunities generated by economic development at local, regional and worldwide levels, (ii) detecting medium- and long-term increases or decreases in supply and demand caused by changes in the world's food consumption patterns and (iii) using land for the production of food and energy and for residential use, in each case in anticipation of such market trends.

International expansion. Although most of our properties are located in different areas of Argentina, we are actively analyzing various expansion opportunities in other Latin American countries. We believe that an attractive opportunity exists to acquire and develop agricultural properties outside Argentina, and our objective is to replicate our business model in such other countries which include, among others, Brazil, Bolivia, Paraguay and Uruguay. For example, in 2005 we and several Brazilian partners founded BrasilAgro, a startup company organized to exploit opportunities in the Brazilian agricultural sector. As of June 30, 2007, Brasilagro had acquired and committed purchases for over 80,000 hectares of land.

Increase and optimize production yields

We seek to increase and improve our production yields through the following initiatives:

Implementation of technology. We seek to continue using state-of-the-art technology to increase production yields. We plan to make further investments in machinery and the implementation of agricultural techniques such as direct sowing to improve cereal production. We believe that we may improve crop yields by using high-potential seeds (GMOs) and fertilizers and by introducing advanced land rotation techniques. In addition, we intend to continue installing irrigation equipment in some of our farms to achieve higher output levels.

We seek to continue improving beef cattle production through the use of advanced breeding techniques and technologies related to animal health. We plan to improve the use of pastures and expect to make further investments in infrastructure, including installation of watering troughs and electrical fencing.

We have implemented an individual animal identification system, using plastic tags for our beef cattle and RFID tags for our dairy cattle, to comply with national laws on traceability. Also, we acquired software from Westfalia Co. which enables us to store individual information about each of our dairy cows. In the beef cattle business, we recently initiated Argentina's first vertically integrated beef cattle processing operation by entering into a partnership with Cactus Feeders and Tyson Foods to set up Cactus Argentina S.A. (Cactus), a feedlot and slaughterhouse operator.

In connection with our milk production, we plan to continue developing our activities through the use of state-of-the-art technology and advanced feeding and techniques relating to animal health. For example, we have recently opened one of the most modern dairy production facilities in Argentina, achieving a daily production capacity of more than 40,000 litres.

Table of Contents

Increased production. We seek to increase our crop, beef cattle and milk production in order to achieve economies of scale by:

Increasing our owned land in various regions of Argentina by taking advantage of attractive land purchase opportunities as they arise.

Leasing productive properties to supplement our expansion strategy, using our liquidity to make productive investments in our principal agricultural activities. We believe that leasing enhances our ability to diversify our production and geographic focus, in particular in areas not offering attractive prospects for appreciation of land value.

Developing productive properties in areas where agricultural production is not developed to its full potential. As of June 30, 2007, we owned land reserves in excess of 329,828 hectares, which is located in under-utilized areas where agricultural production is not yet fully developed. We believe that technological tools are available to improve the productivity of such land and enhance its long-term value. However, existing or future environmental regulations may prevent us from completely developing our land reserves, requiring us to maintain a portion of such land as unproductive land reserves.

Diversifying market and weather risk by expanding our product and land portfolio. We seek to continue diversifying our operations to produce a range of different agricultural commodities in different markets, either directly or in association with third parties. We believe that a diversified product mix mitigates our exposure to seasonality, commodity price fluctuations, extreme weather conditions and other factors affecting the agricultural sector. To achieve this objective in Argentina, we expect to continue to own and lease farmlands in various regions with differing weather patterns and to continue to seed a range of diversified products. Moreover, we believe that continuing to expand our agricultural operations outside of Argentina will enhance our ability to produce new agricultural products, further diversifying our mix of products, and mitigate further our exposure to regional weather conditions and country-specific risks.

Preservation of long-term value of our investment in IRSA

We seek to maintain the long-term value of our significant investment in the urban real estate sector through IRSA. We believe that IRSA is an ideal vehicle through which to participate in the urban real estate market due to its substantial and diversified portfolio of residential and commercial properties, the strength of its management and what we believe are its attractive prospects for future growth and profitability.

Our Principal Business Activities

During the fiscal year ended June 30, 2007, we conducted our operations on 17 owned farms and 40 leased farms. Some of the farms we own are engaged in more than one productive activity at the same time. The following table sets forth, for the periods indicated, our production volumes by principal product line:

	Year ended June 30,		
	2005 ⁽¹⁾	2006 ⁽¹⁾	2007 ⁽¹⁾
Crops ⁽²⁾	149,785	106,867	175,455
Beef cattle ⁽³⁾	10,657	9,803	9,913
Milk ⁽⁴⁾	7,312	14,588	16,663

(1) Does not include production from Agro-Uranga S.A.

(2) Production measured in tons.

Table of Contents

(3) Production measured in tons of live weight. Production is the sum of the net increases (or decreases) during a given period in live weight of each head of beef cattle owned by us.

(4) Production measured in thousands of liters.

Crop Production

Our agriculture production is mainly based on crops and oilseeds. Our crop production includes mainly wheat, corn, soybean and sunflower. Other crops, as sorghum, are sown occasionally and only represent a small percentage of total sown land.

The following table shows, for the periods indicated, our crop production volumes:

	Crop Production		
	Year ended June 30,		
	2005⁽¹⁾	2006⁽¹⁾	2007⁽¹⁾
	(in tons)		
Wheat	23,719	21,788	16,651
Corn	65,777	31,558	80,728
Sunflower	5,024	7,300	6,797
Soybeans	48,730	42,797	61,283
Other	6,535	3,424	9,996
Total	149,785	106,867	175,455

(1) Does not include production from Agro-Uranga S.A.

The following table sets forth, for the periods indicated below, our owned and leased sown land for crop production:

	Sown Land for Crop Production ⁽¹⁾		
	Year ended June 30,		
	2005⁽²⁾	2006⁽²⁾	2007^{(2) (3)}
	(in hectares)		
Owned	24,423	24,279	28,272
Leased	16,299	17,004	25,307
Total	40,722	41,283	53,579

(1) Sown land may differ from Uses of Land, since some hectares are sown twice and therefore are counted twice.

(2) Includes hectares from Agro-Uranga S.A. See Organizational Structure Subsidiaries and Affiliated Companies.

(3) Includes Agropecuaria Cervera's hectares.

As of June 30, 2007, our crop stocks consisted in 6,705 tons of wheat, 34,172 tons of corn, 27,890 tons of soybean, 2,203 tons of sorghum and 3,580 tons of sunflower; whereas as of June 30, 2006 such stocks consisted in 11,426 tons of wheat, 4,538 tons of corn, 11,662 tons of soybean, 193 tons of sorghum and 479 tons of sunflower. As of June 30, 2007, the surface of leased land was 47% of the total sown land.

We seek to diversify our mix of products and the geographic location of our farmlands to achieve an adequate balance between the two principal risks associated with our activities: weather conditions and the fluctuations in the prices of commodities. In order to reduce such risks, we own and lease land in several areas of Argentina with different climate conditions to permit us to be able to sow a diversified range of products. Our

Edgar Filing: CRESUD INC - Form 20-F

leased land for crops is located in pampa region, a favorable area for crop production. The leased farms are previously studied by technicians who analyze future production expectations based on the historic use of the land. The initial duration of lease agreements is typically one or three seasons. Leases of farms for production of grains generally consist of lease agreements with payments based on a fixed amount of Pesos per hectare or crop sharing agreements (*aparcería*) with payments in kind based on a percentage of the crops obtained or a fixed

Table of Contents

amount of tons of grains obtained or their equivalent value in Pesos. The principal advantage of leasing farms is that leases do not require us to commit large amounts of capital to the acquisition of lands but permit us to obtain results similar to those generated by our owned farms.

Also, this strategy allows us to increase our scale in short term, reduce the risk of inclement weather and is also more profitable than farming exclusively on land that we own. The disadvantage of this strategy is that the cost of leasing can increase over time, in part, because increased demand for leased land increases the price of leased land.

Wheat seeding takes place from June to September, and harvesting takes place in December and January. Corn, soybean and sunflower are sown from September to December and are harvested from February to June. Grains are available to be sold as commodities after the harvest from December to June and we usually store part of our production until prices recover after the drop that normally takes place during the harvesting campaign. A major part of production, specially wheat and sunflower seeds, corn and sorghum is sold and delivered to buyers pursuant to agreements in which price conditions are fixed by reference to the market price at a specific time in the future that we determine. The rest of the production is either sold at current market prices or delivered to cover any futures contract that we may have entered into.

During fiscal year 2007, we invested approximately Ps 2.1 million in irrigation equipment, machinery and technology application through no till sowing.

Beef Cattle Production

Our beef cattle production involves the breeding and fattening of our own animals. In some cases, if market conditions are favorable, we also purchase and fatten cattle which we sell to slaughterhouses and supermarkets. As part of our strategy to expand our activities within the beef cattle production chain, during 2003 we started to slaughter our own cattle after obtaining the needed licenses. As of June 2007, our beef cattle aggregated 83,727 heads, and we had a total surface area of 84,848 hectares dedicated to this business activity.

During the fiscal year ended June 30, 2007, our beef cattle activities generated sales of Ps.32.0 million, representing 29.0% of our consolidated sales, and our production was 9,913 tons, an increase of 1.1% compared to the previous fiscal year.

This small increase in production was primarily due to a diminution of drought and improved availability of grass during fiscal year 2007, compared with the adverse weather conditions during fiscal year 2006.

The following table sets forth, for the periods indicated below, the beef cattle production volumes:

	Year ended June 30,		
	2005⁽¹⁾	2006⁽¹⁾	2007⁽¹⁾
Beef cattle production (in tons) ⁽²⁾	10,657	9,803	9,913

(1) Does not include production from *Agro-Uranga S.A.*

(2) Production measured in tons of live weight. Production is the sum of the net increases (or decreases) during a given period in live weight of each head of beef cattle owned by us.

Management by lot in our pastures is aided by electrical fencing which may be easily relocated to supplement our land-rotation cycles. Our cattle herd is subject to a 160 kg to 360 kg fattening cycle by grazing in pastures located in our north farmlands where conditions are adequate for initial fattening. Cattle are subsequently fattened until they reach 430 kg in our San Luis feedlot. The feedlot fattening system leads to homogeneity in production and beef of higher quality and tenderness because of the younger age at which animals are slaughtered.

Table of Contents

Our cattle breeding activities are carried out with breeding cows and bulls and its fattening activities apply to steer, heifers and calves. Breeding cows calve approximately once a year and their productive lifespan is from six to seven years. Six months after birth, calves are weaned and transferred to fattening pastures. Acquired cattle are directly submitted to the fattening process. Upon starting this process, cattle have been grazing for approximately one year to one and a half year in order to be fattened for sale. Steer and heifers are sold when they have achieved a weight of 380 430 kilograms and 280 295 kilograms, respectively, depending on the breed.

Pregnancy levels, which have been improving over the years, showed satisfactory levels of efficiency notwithstanding the adverse weather conditions. Genetics and herd management is expected to further improve pregnancy levels in the coming years. The breeding herd reproduction rate which has improved year after year, recorded satisfactory efficiency levels despite the adverse weather conditions during 2007. The implementation of technologies improved the reproductive indicators such as cattle still on technique, females artificial insemination with cattle genetic especially selected to the stock which is purchased from specialized companies in meat quality semen elaboration. Although it was implemented an strict sanitation calendar, adapted to each zone, animal category and month of the year. We use veterinarians products of the principal nationals and internationals laboratories. It is important to emphasize the work of a veterinarians advisers committee, who are external to us and they visit each establishment monthly to control and agreed tasks.

Currently, the cattle raising farms are officially registered as export farmlands pursuant to the identification and traceability rules in force in Argentina. Animals are individually identified, thus allowing for the development of special businesses in this area. Although the cattle farms have been qualified with the EurepGap N, which allows us to sell animals for consumption in Europe.

Within the process of de-commoditization and technological innovation, we implemented a self-developed identification and tracing system in compliance with European and the National Service of the Sanitation and Quality for Agricultural Food Products (*Servicio Nacional de Sanidad y Calidad Agroalimentaria*, or SENASA) standards. With the purpose of distinguishing our production and obtaining higher prices in production sales, we plan to extend the use of the tracing system to our whole herd.

Our beef cattle stock is organized into breeding and fattening activities. The following table indicates, for the periods indicated, the number of head of beef cattle for each activity:

	Year ended June 30,		
	2005 ⁽²⁾	2006 ⁽²⁾	2007 ⁽²⁾
Breeding ⁽¹⁾	57,775	63,015	62,181
Fattening	25,816	17,654	21,546
Total	83,591	80,669	83,727

(1) For classification purposes, upon birth, all calves are considered to be in the breeding process.

(2) Does not include head of beef cattle from Agro-Uranga S.A. and Cactus. See Organizational Structure Subsidiaries and Affiliated Companies.

We seek to improve beef cattle production and quality in order to obtain a higher price through advanced breeding techniques. We cross breed our stock of Indicus, British (Angus and Hereford) and Continental breeds to obtain herds with characteristics better suited to the pastures in which they graze. To enhance the quality of our herds even further, we plan to continue improvement of our pastures through permanent investment in seeds and fertilizers, an increase in the watering troughs available in pastures, and the acquisition of round bailers to cut and roll grass for storage purposes.

Our emphasis on improving the quality of our herd also includes the use of animal health-related technologies. We comply with national animal health standards that include laboratory analyses and vaccination aimed at controlling and preventing disease in our herd, particularly FMD (Foot and mouth disease).

Table of Contents

Direct costs of beef production consist primarily of seeds for pasture (for instance, gaton panic, oats and barley) and purchases of cattle for fattening purposes.

During the fiscal year 2007 we invested approximately Ps.3.8 million in equipment, machinery, pastures and genetic improvement in relation to cattle production.

Milk Production

We conduct our milk business in three dairy facilities in two farms, La Juanita and El Tigre. We have a total capacity of 3,300 cows in milking per day and seek to increase total production through the application of last generation technologies including genetic improve management for milk production, feeding strategic planification based on cattle specific requirement and the use of individual traceability to know the productivity history of each animal. Also we use computer science in milk business to make more efficient the manual labor by developing the information created from the farms.

Our milk production is based on a herd of Holando Argentina dairy cows, genetically selected through the use of imported frozen semen of North American Holando bulls. Male calves are sold, at calving, for a given amount per head, whereas female calves are weaned after 24 hours, spend approximately 60 days in raising and approximately 100 being days fed on the basis of grass, grains and supplements. Young heifers then graze for an additional 12 to 15 month period, prior to artificial insemination at the age of 18 to 20 months and they calve nine months later. Heifers are subsequently milked for an average of 300 days. Milking dairy cows are once again inseminated during the 60 to 90 day period following. This process is repeated once a year during six or seven years. The pregnancy rate for our dairy cows is 80-90%.

Our dairy herd is milked mechanically twice a day. The milk obtained is cooled to less than five degrees centigrade and is then stored in a tank for delivery once a day to trucks sent by buyers. Dairy cows are fed mainly with grass, supplemented as needed with grains, hay and silage. For winter grazing, corn stubbles are also used.

We have invested in certain technologies that focus on genetic improvement, animal health and feeding in order to improve our milk production. These investments include imports of top quality frozen semen from genetically improved North American Holstein bulls, agricultural machinery and devices such as feed-mixer trucks, use of dietary supplements and the installation of modern equipment to control milk cooling. We are currently acquiring dietary supplements for our dairy cows and have made investments with the aim of increasing the quantity and quality of forage (pasture, alfalfa and corn silage) in order to reduce feeding costs.

During fiscal year ended June 30, 2007, milk production was 14.2% higher than in the prior fiscal year because an increase in the quantity of dairy cows and their individual production. In our farm named El Tigre we milk 2,000 cows per day. With a merry-go-round structure, which required a significant investment of Ps.3.9 million, we believe it is one of the largest dairy farms in Argentina.

The following table sets forth, for the periods indicated, the total number of our milking cows, average daily production per cow and our total milk production:

	Year Ended June 30,		
	2005 ^{(1) (2)}	2006 ^{(1) (2)}	2007 ^{(1) (2)}
Average milking cows	1,212	2,410	2,677
Daily production (liters per cow)	16.5	16.5	17.1
Total production (thousands of liters)	7,312	14,588	16,663

(1) Does not include production from Agro-Uranga S.A. See Organizational Structure Subsidiaries and Affiliated Companies.

(2) Includes production of new dairy farm El Tigre, as from March 1, 2005.

Table of Contents

During fiscal year 2005, we had 4,203 heads of cattle on 1,583 hectares involved in the production of milk. During fiscal year 2006, we had 6,214 heads of cattle on 1,505 hectares involved in the production of milk. As of June 30, 2007 we applied 6,507 heads of cattle on 2,376 hectares to milk production.

During fiscal year 2007, we invested an approximate amount of Ps.3.5 million (including the milking yard in La Juanita farm) in equipment, machinery and survey, pastures and development for our milk rodeo.

Land Acquisitions

We intend to increase our farmland portfolio by acquiring large surfaces of land with high appreciation potential. We also intend to transform the land acquired from non-productive to cattle breeding, from cattle breeding to farming, or applying last generation technology to improve farming yields so as to generate higher appreciation.

In our view, the sector's potential lies in developing marginal areas and/or underutilized areas. As a result of current technology, we may achieve similar yields with higher profitability than core areas; this may result in the appreciation of land values.

At present, prices of farmlands used in agricultural production have increased in the southern hemisphere (mainly South America) but continue to be relatively low compared to the northern hemisphere (U.S. and Europe). Our financial strength relative to other Argentine producers enables us to increase our land holdings at attractive prices, increase our production scale and create potential for capital appreciation.

Several important intermediaries, with whom we usually work, bring farmlands available for sale to our attention. The decision to acquire farmlands is based on the assessment of a number of factors. In addition to the land's location, we normally carry out an analysis of soil and water, including the quality of the soil and its suitability for our intended use (crops, beef cattle, or milk production), classify the various sectors of the lot and the prior use of the farmland; analyze the improvements in the property, any easements, rights of way or other variables in relation to the property title; examine satellite photographs of the property (useful in the survey of soil drainage characteristics during the different rain cycles) and detailed comparative data regarding to neighboring farms (generally covering a 50-km area). Based on the foregoing factors, we assess the farmland in terms of the sales price compared against the production potential of the land and the appreciation potential of the capital. We consider that competition for the acquisition of farmlands is, in general, limited to small farmers for the acquisition of smaller lots, and that there is scarce competition for the acquisition of bigger lots.

In addition, we may consider the acquisition of farmlands in marginal zones and their improvement by irrigation in non-productive areas as well as the installation of irrigation devices in order to obtain attractive production yields and to create potential for capital appreciation.

On September 1, 2005, we signed the deed for the purchase of the San Pedro farm of 6,022 hectares located in the Department of Uruguay, Province of Entre Ríos. The purchase price was US\$16 million, of which US\$9.5 million was paid when signed the deed, US\$4.0 million was paid on December 14, 2005 and US\$0.73 million was paid on September 1, 2006. The remaining balance of US\$1.7 million plus interest of US\$0.1 million will be paid in September 2008.

On May 15, 2007, a bill of purchase was signed for a surface area of 90,000 hectares in the 8 de Julio farm, located south of the Deseado River in the Province of Santa Cruz. The transaction was agreed for a price of US\$2.4 million. Upon execution of the bill of purchase a payment was made for US\$1.2 million and possession over the farm was taken. On August 13, 2007, we paid US\$0.24 million and the balance shall be paid in September 2008, and also on that date the deed shall be executed. This farm offers excellent potential for sheep production, both in terms of wool and mutton production. In addition, it has future potential as a tourist attraction and for leisure activities.

Table of Contents

The following chart shows, for the periods indicated below, certain information concerning our land acquisitions:

Fiscal year ended June 30	Number of farmlands	Amount of acquisitions (Ps. millions)
1997(1)	2	10.2
1998(2)	8	31.5
1999		
2000		
2001		
2002		
2003(3)	1	25.0
2004		
2005(4)	2	9.3
2006(5)	1	45.9
2007(6)	1	7.3

(1) Includes the acquisition of San Luis and La Sofia farms of 706 hectares and 4,926 hectares, respectively

(2) Includes the acquisition of Ñacurutú, Tapenaga, Santa Bárbara y La Gramilla, La Sofia, La Suiza, La Esmeralda and Tourné farms of 30,350 hectares, 27,312 hectares, 7,052 hectares, 1,223 hectares, 41,993 hectares, 11,841 hectares and 19,614 hectares, respectively. It also includes the acquisition of Las Vertientes which is a silo plant.

(3) Includes the acquisition of El Tigre farm of 8,360 hectares.

(4) La Adela and El Invierno 72 hectares and 1,946 hectares, respectively.

(5) San Pedro farm of 6,022 hectares.

(6) Includes the acquisition of 8 de Julio farm of 90,000 hectares.

Land Sales

We periodically sell properties that have reached a considerable appraisal to reinvest in new farms with higher appreciation potential. We analyze the possibility of selling based on a number of factors, including the expected future yield of the farmland for continued agricultural and livestock exploitation, the availability of other investment opportunities and cyclical factors that have a bearing on the global values of farmlands.

The following chart shows, for the periods indicated below, certain information concerning our land sales:

Fiscal year	Number of farmlands	Gross proceeds from sales (Ps. million)	Profit/(Loss) ⁽¹⁾ (Ps. million)
1997(2)	1	2.6	1.0
1998(3)	1	6.8	4.1
1999(4)	2	27.8	9.4
2000			

Edgar Filing: CRESUD INC - Form 20-F

2001(5)	2	9.0	3.0
2002(6)	3	40.6	14.8
2003(7)	2	12.0	4.9
2004(8)	2	4.1	1.7
2005(9)	2	29.8	20.0
2006(10)	1	16.1	9.9
2007(11)	3	29.9	22.3

-
- (1) Includes the difference between the gross proceeds from sales (net all taxes and commissions) and the book value of the assets sold.
 - (2) Includes the sale of Siete Arboles farm of 7,975 hectares.
 - (3) Includes the sale of Moroti and Santa Rita farm of 7,878 hectares.
 - (4) Includes the sale of El Meridiano and Runciman farms of 6,302 and 3,128 hectares, respectively.
 - (5) Includes the sale of El Bañadito and Tourne farms of 1,789 and 19,614 hectares, respectively.
 - (6) Includes the sale of El Silencio, La Sofía and El Coro farms of 397 hectares, 6,149 hectares and 10,321 hectares, respectively.

Table of Contents

- (7) Includes the sale of Los Maizales and San Luis farms of 618 and 706 hectares, respectively.
- (8) Includes the sale of 41-42 farm of 6,478 hectares and 5,997 hectares of IGSA's land reserves.
- (9) Includes the sale of Ñacurutu and San Enrique farms, of 30,350 and 977 hectares, respectively. It also includes the results of the sale of a two-hectares parcel belonging to IGSA.
- (10) Includes the sale of El Gualicho farm, of 5,727 hectares
- (11) Includes the sale of Tapenagá, partially Los Pozos and partially El Recreo farms of 20,833 hectares, 14,516 hectares and 50 hectares, respectively.
- On June 6, 2007, we signed a sales deed for the 20,833 hectare Tapenagá farm, located in the Province of Chaco. This deal was consummated for US\$7.3 million. The property was valued in the Company's books at US\$97.5 per hectare. Therefore, the transaction generated a US\$5.0 million profit. We have collected US\$3.7 million as of June 6, 2007 while the remaining balance of US\$3.7 million will be collected in equal payments in May of each of 2008, 2009 and 2010.

In addition, we signed a sales deed for a 14,516 hectare piece of the Los Pozos farm, located in Joaquín V. González, Province of Salta. The price of the transaction was US\$2.2 million, or US\$150 per hectare. The book value of the lot sold was US\$7 per hectare. Therefore, this sale generated a US\$2.0 million profit.

Lastly, we signed a sales deed for a 50 hectare piece of the El Recreo farm, located in Recreo, Province of Catamarca, for Ps.0.7 million, which generated a Ps.0.5 million profit.

On August 28, 2006, IGSA signed a preliminary sale contract of 1,800 hectares of the establishment called El Recreo of its property, in the amount of US\$0.15 million. As advance payment we have received US\$0.05 million. As of June 30, 2007 this sale has not been reflected in the financial statements as the property of the land has not yet been transferred.

On July 25, 2005 we sold El Gualicho farm located in the Province of Córdoba, covering 5,727 hectares, for a total sales price of US\$5.7 million. This sale resulted in a gain of US\$3.4 million. We collected US\$3.4 million and will collect the balance in five equal annual installments through July 2010.

Farms

As of June 30, 2007, we owned, together with our subsidiaries, 17 farms, with a total surface area of 449,991 hectares.

Table of Contents

The following table sets forth our farm portfolio as of June 30, 2007:

	Owned Farms at June 30, 2007			
	Province	Gross Size (in hectares)	Date of Acquisition	Primary Current Use
La Adela	Buenos Aires	1,054	Original	Crop
La Juanita	Buenos Aires	4,302	Jan. 96	Crop/Milk
San Pedro	Entre Ríos	6,022	Sep. 05	Crop/Beef Cattle
Las Vertientes	Córdoba	4		Silo
La Esmeralda	Santa Fe	11,841	Jun. 98	Crop/Beef Cattle
La Suiza	Chaco	41,993	Jun. 98	Beef Cattle Crops under
Santa Bárbara/Gramilla	San Luis	7,052	Nov. 97	irrigation
Cactus (2)	San Luis	41	Dec. 97	Feed lot Beef Cattle/Natural
Tali Sumaj / El Recreo (3)	Catamarca	26,922	May. 95	Woodlands Beef Cattle/Crop/
Los Pozos	Salta	247,484	May	95Natural Woodlands
El Invierno	La Pampa	1,946	Jun. 05	Crop
San Nicolás / Las Playas (4)	Sta.Fe/Cba	2,965	May. 97	Crop/Beef Cattle
El Tigre	La Pampa	8,365	Apr. 03	Crop/Milk Natural Woodlands/Sheep
8 de Julio	Santa Cruz	90,000	May. 07	Production
Total		449,991		

La Adela. Located 60 kilometers northwest of Buenos Aires, La Adela is one of our original farms. In December 2001, La Adela's dairy parlor was closed down. Its total surface area is used for agricultural purposes. During the fiscal year ended June 30, 2007, 959 hectares were used for wheat, corn and soybean crops for high-yielding grain production. In March 2005, 72 hectares were bought and added to the existing 982 hectares.

La Juanita. La Juanita, located 440 kilometers southwest of Buenos Aires, was acquired in January 1996. As of June 30, 2007, 3,179 head of cattle were grazing in 716 hectares of sown and natural pastures, and 1,684 hectares were used in the production of grains. This farm produced 7.66 million liters of milk during the fiscal year ended June 30, 2007, with an average of 1,170 dairy cows being milked and 17.9 liters per cow per day.

El Recreo. Weather conditions in the El Recreo farm, located 970 kilometers northwest of Buenos Aires, in the province of Catamarca, and acquired in May 1995, are similar to the Tali Sumaj farm, with semi-arid climate and annual rainfall not in excess of 400 mm. This farm is maintained as a productive reserve.

On August 28, 2006, we signed a preliminary sale contract of 1,800 hectares of the farm called El Recreo in the amount of US\$0.15 million. As advance payment we have received US\$0.05 million. This sale has not been shown in our financial statements as the property of the land has not yet been transferred.

On January 19, 2007 we entered into a preliminary sales contract for 50 hectares of El Recreo farm owned by us and Arcor Sociedad Anónima Industrial y Comercial in the amount of Ps.0.7 million. The purchase price has been fully paid to us. This sale has been recognized as the possession of the plot of land was effected at the time of signing the preliminary sales contract.

Edgar Filing: CRESUD INC - Form 20-F

Tali Sumaj. The Tali Sumaj farm, located 1,000 kilometers northwest of Buenos Aires, in the province of Catamarca, was acquired in May 1995 and it is located in a semi-arid area. As of June 30, 2007, Tali Sumaj had 4,367 cattle head in approximately 12,700 hectares of pasture. The farm is divided into 16 lots with peripheral fencing and watering troughs with a reserve of 1,000,000 liters of water.

Table of Contents

Los Pozos. The Los Pozos farm, located 1,600 kilometers northwest of Buenos Aires, in the Province of Salta, was acquired in May 1995. This property is located in a semi-arid area with average rainfall of 500 mm. The area is naturally suited to cattle raising and forestry activities (poles and wood coal), and it has agricultural potential for summer crops such as sorghum and corn, among others. For the fiscal year ended June 30, 2007, we used 1,240 hectares in agricultural production. We completed the development of tropical pastures in approximately 28,741 hectares. As of June 30, 2007, there were 30,992 head of cattle in this farm. This farm has shown major growth through a complete cycle in the production of beef by succeeding in raising, re-raising and fattening steer to be sold at an average weight of 392 kg. In addition, this farm is expected to sow prairies totaling a surface area of 63,000 hectares by the end of fiscal year 2008. On June 5, 2007 we signed the deed of sale of a surface area of 14,516 hectares of the farm Los Pozos. The agreed sale price was US\$2.2 million, which we have received. The sale generated a gain of US\$2.0 million. *San Nicolás.* The San Nicolás farm is a 4,005 hectares farm owned by Agro-Uranga S.A., and is located in the Province of Santa Fe, approximately 45 kilometers from the Port of Rosario. As of June 30, 2007, approximately 5,736 hectares were in use, including double crops for agricultural production. The farm has two plants of silos with storage capacity of 14,950 tons.

Las Playas. The Las Playas farm has a surface area of 4,294 hectares and is owned by Agro-Uranga S.A. Located in the Province of Córdoba, it is used for agricultural and milk purposes. As of June 30, 2007, the farm had 540 hectares of pasture used for milk production and a sown surface area of 6,192 hectares including double crops, for grain production.

La Gramilla and Santa Bárbara. These farms have a surface area of 7,052 hectares in Valle del Conlara, in the Province of San Luis. Unlike other areas in the Province of San Luis, this valley has a high quality underground aquifer which makes these farms well suited for agricultural production after investments were made in the development of lands, pits and irrigation equipment. In the course of 2006/2007, a total of 689 hectares was sown under contractual arrangement with seed producers, and we leased 1,727 hectares to third parties.

La Suiza. La Suiza has a surface area of 41,993 hectares and is located in Villa Ángela in the Province of Chaco. It is used for raising cattle. As of June 30, 2007, La Suiza had a stock of approximately 24,344 heads of cattle.

La Esmeralda. La Esmeralda has a surface area of 11,841 hectares and is located in Ceres in the Province of Santa Fe. This farm, acquired in June 1998, has potential for both agricultural production and cattle raising. During the 2006/2007 farm season, we used a total area of 1,787 hectares for production of corn, sunflower and sorghum. We also leased 3,662 hectares to third parties for grain production. As of June 30, 2007, La Esmeralda had 9,937 head of cattle on 6,147 hectares. Our objective is to enhance its cattle raising efficiency and increase its surface area devoted to agriculture.

El Tigre. El Tigre was acquired on April 30, 2003 and has a surface area of 8,365 hectares. It is located in Trenel in the Province of La Pampa. As of June 30, 2007, 6,505 hectares were devoted to agriculture production. This farm produced 9.01 million liters of milk in the twelve-month period ended June 30, 2007, with 1,507 cows being milked and an average daily production of 16.4 liters per cow.

El Invierno. El Invierno was acquired on June 24, 2005 and has a surface area of 1,946 hectares. It is located in Rancul in the Province of La Pampa, 621 kilometers to the west of Buenos Aires. During the fiscal year ended June 30, 2007, we used the land exclusively for agricultural production.

San Pedro. The farm in San Pedro was purchased on September 1, 2005. It has a surface area of 6,022 hectares and is located in Concepción del Uruguay, Province of Entre Ríos, which is 305 kilometers north of the province of Buenos Aires. During the fiscal year ended June 30, 2007, 1,100 hectares were used for livestock activities, and 5,344 hectares were used for agricultural production.

Table of Contents

8 de Julio. The 8 de Julio farm was acquired on May 15, 2007 and has a surface area of 90,000 hectares. It is located in the department of Deseado in the Province of Santa Cruz. This farm offers potential possibilities for sheep production. In addition, we believe the land has potential for future tourism and recreational activities, as the southeast border of the farm is on 20 kilometers of coast. As of June 30, 2007, all the hectares were maintained as undeveloped land reserve. In the future we may use this farm for sheep production.

Cactus. The Cactus farm is a 170-hectare farm owned by Cactus and is located in Villa Mercedes, province of San Luis. Cactus is a joint venture between us, Cactus Feeders Inc., one of the largest feed lot companies in the United States, and Tyson Foods, a leading beef and poultry meat processing company. The feed lot began to operate in September 1999.

Las Vertientes. Las Vertientes farm is our largest storage facility with a surface area of 4 hectares and 10,000 tons capacity, located in Las Vertientes, Río Cuarto in the Province of Cordoba.

Lease of Farms

We conduct our business on owned and leased land. Rental payments increase our production costs, as the amounts paid as rent are accounted for as operating expenses. As a result, production costs per hectare of leased land are higher than for the land owned by us.

Our land leasing policy is designed to supplement our expansion strategy, using our liquidity to make productive investments in our principal agricultural activities. On the other hand, our leasing strategy provides us with an added level of flexibility in the share of each of our products in total production, providing for greater diversification.

The initial duration of lease agreements is typically one campaign. Leases of farms for production of grains consist in lease agreements with payments based on a fixed amount of Pesos per hectare or crop sharing agreements (*aparcería*) with payments in kind based on a percentage of the crops obtained or a fixed amount of tons of grains obtained or their equivalent value in Pesos. Leases of farmlands for cattle breeding consist in lease agreements with fixed payments based on a fixed amount of Pesos per hectare or steer kilograms or capitalization agreements with payments in kind or in cash based on the weight gain in kilograms.

During fiscal year 2007, we have leased a total of 40 fields covering 53,059 hectares, of which 25,307 hectares were assigned to farming production, including the double harvest, and 29,208 hectares to cattle.

The following table shows the breakdown of the amount of hectares owned and leased land used for each of our principal production activities:

	Year ended June 30,					
	2005 ⁽¹⁾		2006 ⁽¹⁾		2007 ⁽¹⁾	
	Owned ⁽²⁾	Leased	Owned ⁽²⁾	Leased	Owned ⁽²⁾	Leased
Crops	19,994	16,299	20,018	17,004	22,712	25,307
Cattle	126,879		97,299	3,425	84,848	29,208
Milk	1,583		1,505		2,376	

(1) Does not include the hectares of Agro-Uranga S.A.

(2) The land assigned to crops may differ from sown land, as some hectares are sown twice and therefore are counted twice as sown land. During the fiscal year 2007, a total 25,307 hectares were leased from third parties for agricultural production, primarily at a fixed price prior to harvest. Only a small percentage were crop sharing agreements.

Due to the rise in the price of land, we adopted a policy of not validating such prices and only leasing land at values that would ensure appropriate margins. For the 2007/2008 season, we leased 33,043 hectares of agricultural production.

Table of Contents

Storage Facilities

As of June 30, 2007, we had an approximate storage capacity of 15,341 tons (including 35.723% of the 14,950 tons available at Agro-Uranga S.A.).

The following table sets forth, at the dates, the capacity of our storage facilities:

	Storage Capacity		
	At June 30,		
	2005	2006	2007
	(in tons)	(in tons)	(in tons)
San Enrique	660		
El Gualicho	2,000		
Las Vertientes	10,000	10,000	10,000
San Nicolás (1)	5,341	5,341	5,341
Total	18,001	15,341	15,341

(1) Owned through Agro-Uranga S.A. (representing 35.723% of the capacity).

Land Management

In contrast to traditional Argentine farms, run by a family, we centralize policy making in an executive committee that meets on a weekly basis in Buenos Aires. Individual farm management is delegated to farm managers who are responsible for farm operations. The executive committee lays down commercial and production rules based on sales, market expectations and risk allocation.

We rotate the use of our pasture lands between agricultural production and cattle feeding and the frequency depends on the location and characteristics of the farmland. The use of land rotates in four-year periods of cattle feeding and four to twelve years of agricultural production, according to the region. The use of preservation techniques (including exploitation by no till sowing) frequently allows us to extend agricultural exploitation periods.

Subsequent to the acquisition of the properties, we make investments in technology in order to improve productivity and to increase the value of the property. It may be the case that upon acquisition, a given extension of the property is sub-utilized or the infrastructure may be in need of improvement. We have invested in traditional fencing and in electrical fencing, watering troughs for cattle herds, irrigation equipment and machinery, among other things.

Principal Markets

Crops

Our grains production is entirely sold in the local market. The prices of our grains are based on the market prices quoted in Argentine grains exchanges such as the Bolsa de Cereales de Buenos Aires and the Bolsa de Cereales de Rosario that take as a reference the prices in international grains exchanges. The largest part of this production is sold to exporters who offer and ship this production to the international market. Prices are quoted in relation to the month of delivery and the port in which the product is to be delivered. Different conditions in price, such as terms of storage and shipment, are negotiated between the end buyer and ourselves.

Cattle

Our cattle production is sold in the local market. The main buyers are slaughterhouses and supermarkets.

Prices in the cattle market in Argentina are fixed in the Liniers Market (on the outskirts of the province of Buenos Aires) where live animals are sold by auction on a daily basis. At Liniers Market, prices are negotiated by

Table of Contents

kilogram of live weight and are mainly determined by local supply and demand. Prices tend to be lower than in industrialized countries. Some supermarkets and meat packers establish their prices by kilogram of processed meat; in these cases, the final price is influenced by processing yields.

Milk

During the fiscal years 2006 and 2007 we sold our entire milk production to the largest Argentine dairy company, Mastellone S.A., which in turn manufactures a range of mass consumption dairy products sold in Argentina and abroad. We negotiated with this company the prices of raw milk on a monthly basis in accordance with domestic supply and demand. We understand that other major dairy companies in Argentina would be willing and in a position to buy our milk production, in whole or in part, if we decided to diversify our sales of milk. The price of the milk we sell is mainly based on the percentage of fat and protein that it contains and the temperature at which it is cooled. The price we obtain from our milk also rises or drops based on the content of bacteria and somatic cells.

Customers

In 2007 our sales were Ps.110.3 million and were made to approximately 140 customers. Sales to our ten largest customers represented approximately 72% of our net sales in 2006 and approximately 71% for the fiscal year ended June 30, 2007. Of these customers, our biggest three customers, Cargill S.A., Mastellone Hnos. S.A. and Quickfood S.A., represented, in the aggregate, approximately 46% of our net sales, while the remaining seven customers in the aggregate represented approximately 26% of our net sales in fiscal 2007. We have signed non-binding letters of intent with some of our largest customers that allow us to estimate the volume of the demand for certain products and to plan production accordingly. We generally enter into short-term agreements with a term of less than a year.

Marketing Channels and Sales Methods

Grains

We normally work with grains brokers and other intermediaries to trade in the exchanges. We sell part of our production in advance through futures contracts and buy and sell options for protection against a drop in prices. Approximately 30% of the futures and options contracts are closed through the Bolsa de Granos de Buenos Aires (Buenos Aires Grains Exchange) and 70% in the Chicago Board of Trade.

Our storage capabilities allow us to condition and storage grains with no third-party involvement and thus to capitalize the fluctuations in the price of commodities. Our largest storage facilities, with capacity for 10,000 tons are located in Las Vertientes, close to Río Cuarto, Province of Córdoba.

Beef cattle

We sell directly to local meat processors and supermarkets, such as Quickfood S.A., Frigorífico La Pellegrinense S.A., Friar S.A., Swift Armour S.A., Coto S.A., Supermercados Norte S.A., Finexcor S.A., Forestal Andina S.A., Madelan S.A., Frigorífico Bermejo S.A. and Frigorífico Amancay S.A. at prices based on the price determined at Liniers Market.

We usually are responsible for the costs of the freight to the market and, in general, we do not pay commissions on our transactions.

Raw Materials

The current direct cost of our production of grains varies in relation to each crop and normally includes the following costs: tillage, seeds, agrochemicals and fertilizers. We buy in bulk and store seeds, agrochemicals and fertilizers to benefit from discounts offered during off-campaign sales.

Table of Contents

Competition

The agricultural and livestock sector is highly competitive with a huge number of producers. Cresud is one of Argentina's leading producers. However, if we compare the percentage of Cresud's production to the country's total figures, Cresud's production would appear as extremely low. Our leading position improves our bargaining power with suppliers and customers. In general, we obtain discounts in the region in the acquisition of supplies and an excess price in our seeds and cattle.

Historically, there have been few companies competing for the acquisition and leases of farmlands for the purpose of benefiting from land appreciation and optimization of yields in the different commercial activities. However, we anticipate the possibility that new companies, some of them international, may become active players in the acquisition of farmlands and the leases of sown land, which would add players to the market in coming years.

Seasonality

As is the case with any company in the agro-industrial sector, our business activities are inherently seasonal. Harvest and sales of grains (corn, soybean and sunflower) in general take place from February to June. Wheat is harvested from December to January. Other segments of our activities, such as our sales of cattle and milk and our forestry activities tend to be more of a successive character than of a seasonal character. However, the production of beef and milk is generally higher during the second quarter, when pasture conditions are more favorable. In consequence, there may be significant variations in results from one quarter to the other.

Our Investments

BrasilAgro Companhia Brasileira de Propiedades Agrícolas

BrasilAgro was created in September 2005 in order to replicate our business in Brazil. BrasilAgro activities are engaged mainly in four business segments: (i) sugar cane, (ii) grains and cotton, (iii) forestry activities (iv) livestock. We created BrasilAgro together with our founding partners, Cape Town Llc, Tarpon Investimentos S.A., Tarpon Agro Llc, Agro Investments S.A. and Agro Managers S.A.

Cape Town Llc is a limited company incorporated under the laws of the State of Delaware, wholly owned by Mr. Elie Horn, the controlling shareholder and chief executive officer of Cyrela Brazil Realty S.A. Empreendimentos e Participações. Tarpon Investimentos S.A. is an independent Brazilian asset manager engaged in the management of mutual funds focusing primarily on Brazilian equities. Tarpon Agro Llc is a company incorporated in the United States of America under the laws of the State of Delaware, and is owned by Tarpon Investimentos S.A.'s shareholders and certain of its affiliates.

Part of the knowledge and experience required to implement BrasilAgro's proposed business plan will be initially provided pursuant to a consulting agreement with Paraná Consultora do Investimentos S.A., a special purpose advisory company, 50% owned by Tarpon BR, 37.5% owned by Consultores Asset Management, a company controlled by Mr. Eduardo Elsztain and 12.5% owned by Mr. Alejandro Elsztain. Tarpon BR is a joint venture between Tarpon and Mr. Elie Horn. We entered into a shareholder agreement with Tarpon Investimentos S.A., Tarpon Agro Llc, Cape Town LLC and Elie Horn stipulating, among other things, that both parties should have a joint vote at shareholders' meetings and that both parties have a preemptive right to acquire shares of the other party.

BrasilAgro's board of directors is composed of nine members. We, as founder of BrasilAgro, appointed three members. Tarpon and Cape Town appointed three more members and, in addition, BrasilAgro has three independent directors.

On May 2, 2006, BrasilAgro's shares were listed in the Novo Mercado of the Brazilian Stock Exchange (BOVESPA) with the symbol AGRO3. Its shares were placed jointly with Banco de Investimentos Credit Suisse (Brazil) S.A. in the Brazilian market through investment mechanisms regulated by controlling authorities and

Table of Contents

with sales efforts pursuant to an exception from registration under the US Securities Act of 1933. The amount originally offered was Reais 432 million, equivalent to 432,000 book-entries, common shares at a price of Reais 1,000 per share of BrasilAgro.

In addition, as is customary in the Brazilian market, BrasilAgro had an option to increase the size of the issuance by 20% and Banco de Investimentos Credit Suisse (Brazil) S.A. had another option to increase it by 15% (Green shoe). Given the high demand shown by the placement, both BrasilAgro and Banco de Investimentos Credit Suisse (Brazil) S.A. exercised such options increasing the placement up to 583,200 shares equivalent to Reais 583.2 million, which were fully placed and paid in.

In addition to the funds we originally contributed, we purchased shares in the offering for Reais 42.4 million (approximately US\$20.6 million). Following such contribution we now hold a total amount of 42,705 shares, equivalent to 7.4% of BrasilAgro's capital.

On January 19 and 22, 2007, we acquired 400 and 100 shares of BrasilAgro, respectively. Due to these new acquisitions, we increased our holding amounts to 43,205 shares which is equivalent to 7.4% of the capital stock of BrasilAgro.

When we founded BrasilAgro, we contributed Ps.63.1 million in cash in exchange for shares and 104,902 warrants to purchase additional BrasilAgro shares for 15 years and at the same price as was established in the initial public offering, Reais 1,000, adjusted by the Consumer Price Index Amplified, or IPCA. Should we decide to exercise such warrants, we might acquire 59,850 additional shares, thereby holding 14.1% of BrasilAgro's diluted capital stock. One third of these warrants may be exercised starting the first anniversary of the placement; another third may be exercised starting the second anniversary and the balance starting the third anniversary.

In addition, we received, at no cost, a second series of warrants for a total of 104,902, which may only be exercised at our discretion in the event of a tender offer. The exercise price of these warrants shall be the same price as the price offered in any such tender offer by the acquirer of BrasilAgro. The second series of warrants matures in the year 2021.

As of June 30, 2007, BrasilAgro had acquired its first four properties and it had entered into agreements for the acquisition of three additional properties in the first fiscal period of 2008:

On April 20, 2007, BrasilAgro signed a purchase commitment to acquire 75% of the estancia Araucaria, which has a total area of 15.543 hectares and is located in the municipality of Mineiros, Goiás. The property will be used for sugar cane growth. The total purchase price was 80 million Reais, payable in three installments. The first installment of 32 million Reais was paid on April 20, 2007 and the other installments are due at six month intervals after the first one.

On August 3, 2007, BrasilAgro entered into a purchase commitment to acquire the estancia Alto Taquarí which has a total area of 5.266 hectares and is located in the municipality of Alto Taquarí, Mato Grosso. This property will also be used for grow sugar cane and was purchased for 34 million Reais, payable in two installments. The first installment of 6.8 million Reais was paid on August 3, 2007 and the balance is due in May 2008.

In August 2007, BrasilAgro entered into two separate conditional purchase commitments, subject to due diligence, to acquire a total area of 37.799 hectares in the municipality of Correntina, Bahia. The area will be used for cattle-breeding and grain growing. The aggregate purchase price for both properties is 47.1 million Reais.

Sao Pedro is a farm in Chapadao do Sul (MS). With a surface area of 2,443 hectares, Sao Pedro was bought for US\$4.7 million. Located 1,000 km. from a major port, this farm was acquired at a price significantly lower than the average in the region. Its potential production area is 1,740 hectares. In our opinion, this land offers high potential for appreciation as a result of the sugar cane premises scheduled to be installed in the region.

Table of Contents

Cremaq is a farm in Bahía Grande do Ribeiro (Piauí). Acquired for US\$19.7 million and with a surface area of 32,375 hectares, this farm has 3,000 hectares already in production and 16,000 hectares undergoing land clearing activities. It is estimated that the total production area will be 23,000 hectares. The farm is close to the Itaqui Port and to the Norte-Sul railway. Weather and topographic conditions in the area are quite suited to soybean, corn and cotton crops. This property has also been bought for a value lower than average in the region and it offers major appreciation potential.

Engenho is a farm in Maracaju, in the State of Mato Grosso do Sul. The farm was acquired for US\$4.7 million and it has 2,022 hectares. This farm is presently under a lease agreement and it yields amounts equivalent to 7.5 or 8 tons of sugar cane per year per hectare. Once the lease agreements currently in force are terminated, BrasilAgro is planning to develop sugar cane operations.

Jatobá is a farm in the Jaborandi district, in the State of Bahia. The acquisition price was US\$17.2 million and it has 31,603 hectares. BrasilAgro plans to start large-scale production of crops and cotton.

BrasilAgro will continue to focus its activities on agricultural real estate and on the development of its four main business lines: sugar cane; crops and cotton; forestry and cattle breeding.

Futuros y Opciones.Com

In May 2000, we acquired 70% of the shares and an irrevocable purchase option for the 30% of the shares of Futuros y Opciones.Com S.A. (Futuros y Opciones.Com) for Ps.3.5 million. During the fiscal years 2001 and 2002, we made capital contributions for Ps.3.0 million. The site was launched in November 1999 and is aimed at becoming the most important agriculture business community in Latin America. Futuros y Opciones.Com has launched its e-commerce strategy in March 2001, in order to sell products, buy inputs, ask for loans, and obtain insurance, among other things. The main activity of Futuros y Opciones.Com is the grain brokerage.

The areas with the greatest potential for growth are: input commercialization, grain businesses and beef cattle operations. Regarding input commercialization, the business volume was concentrated in a smaller number of suppliers, the agreements with the suppliers were improved in order to increase the margin of the business, and contracts of direct distribution were achieved. In terms of grains, the brokerage department was created, with the purpose of participating directly in the business by trading and offering services. In beef cattle, Futuros y Opciones.Com had created an alliance with a leading broker in the sector, which will allow it to obtain use of its clients' database and technological knowledge.

On May 31, 2005, the Ordinary Shareholders' Meeting of Futuros y Opciones.Com decided that its capital stock should be increased by Ps.0.2 million with no additional paid-in capital and Ps.0.04 million with an additional paid-in premium of Ps.0.9 million, thus raising Futuros y Opciones.Com's capital stock from Ps.0.01 million to Ps.0.3 million. The capital stock was further increased by Ps.0.1 million through the issuance of 100,000 preferred shares.

This capitalization was conducted after absorbing unappropriated losses of Ps.4.3 million against the Irrevocable Contributions account for a total amount of Ps.2.1 million and the Adjustment to Irrevocable Contributions account for an amount of Ps.2.2 million. The corporate bylaws have thus been amended to incorporate the resolution adopted by the Shareholders' Meeting, which delegated its implementation on the board of directors.

As a result of such capital increase, Cresud's investment has increased by Ps.0.6 million. This effect has been recognized in the additional paid-in capital account, pursuant to section 33 of the Argentine Corporation Law No. 19,550 under the Shareholders' Equity section.

As of June 30, 2007, Futuros y Opciones.Com total revenues increased by 105% compared to the previous fiscal year, with 48% growth in the revenues yielded by its main business, the grains brokerage. In addition, the business consisting in sales of inputs grew by 431%, widely surpassing the budget projections.

Table of Contents

During the fiscal year 2007, Futuros y Opciones.Com started to trade futures and options: it acquired a share in the Buenos Aires forward market Mercado a Término de Buenos Aires and has also become a dealer. Trading volumes have surpassed expectations and the service consisting in hedging with futures has turned into an essential tool for our customers to manage their price risks.

The portal keeps consolidating as the leading site for the agricultural and cattle-beef sector where various private polls have agreed that it is the most visited site by farmers engaged in both agricultural and cattle-beef activities. The site presently has an average of 15,000 visitors per day and it is strengthening its position as a leading supplier of market information for the sector.

Futuros y Opciones.Com's goal is to become a leading company in the supply of financial and commercial services. To attain such objective, we shall continue to enhance the range of products we offer to the sector in the coming fiscal years.

Cactus Argentina

Cactus was a joint venture operation between us and Cactus Feeders Inc., one of the largest feed lot companies in the United States. The operations site is located in Villa Mercedes, in the Province of San Luis and covers 170 hectares. The feed lot began operations in September 1999.

During fiscal year 2007, Cactus entered into a joint venture with Tyson Foods, Inc, a leading meat processing company, pursuant to which Tyson acquired an equity interest in Cactus to establish the first integrated cattle operation in Argentina. On January 11, 2007, Cactus and us (solely as nominee for Argentine legal purposes) acquired 100% of the Exportaciones Agroindustriales Argentinas S.A. (EAASA) shares for Ps.16.8 million. EAASA owns a meat packing plant in Santa Rosa, Province of La Pampa with capacity to slaughter and process approximately 9,500 cattle heads per month. The idea of Cactus is to expand in the future the slaughter capacity to 15,000 heads per month.

Consequently, Cactus's new share structure is as follows: Cactus Feeders Inc. holds a 24% interest, Cresud holds a 24% interest, Tyson holds a 52% interest through Provomex Holdings LLP.

Argentina's beef production is going through a change in which the best quality beef is produced in the central part of the country while the marginal areas are generating beef produced by animals adjusted to more difficult geographic and environmental situations. The location of the packing plant is unique, surrounded by a big beef production area and not far away from the feed lot that Cactus owns in Villa Mercedes, San Luis.

Cactus became the first integrated company in the beef sector. Cattle produced at the feedlot are being processed at the packing plant for the domestic and the foreign markets.

Since December 31, 2006, we have stopped the application of the proportional consolidation method with Cactus due to the reduction of our interest in Cactus from 50% to 24%.

Cactus, has been a pioneer in feed lot service with a 25,000 head capacity, depending on the size of the cattle. During fiscal year 2007 the average occupation level reached 70%. Such level showed signs of recovery towards the end of the period reaching 100%.

Cactus' customer base changed during fiscal year 2007, as many companies related to the beef sector bought yearling cattle to be fed at the feed yard. To assure themselves a constant supply of high quality beef, these companies keep an inventory of cattle on feed.

During fiscal year 2007, Cactus recorded income as a result of the services supplied to farmers and investors and the profits generated by its own fattened cattle.

Table of Contents

Cactus continues to receive cattle from farmers that repeat their productive process whereby they breed and re-breed their animals in their own farms and finish them at Cactus.

Agropecuaria Cervera

On December 27, 2005, we and Inversiones Ganaderas S.A. (solely as nominee for Argentine legal purposes) acquired 100% of the shares of Agropecuaria Cervera S.A. (Agropecuaria Cervera), whose main asset is the concession for the start-up of production pertaining to a comprehensive biological, economic and social development project over various properties located in Anta, Province of Salta, and it is duly authorized to implement a large-scale project covering agricultural, cattle breeding and forestry activities. The concession agreement covers 162,000 hectares for a 35-year period with an option to extend it for another 29 years. In the framework of the concession, there is a development project aimed at applying 35,000 hectares to agricultural uses. As of June 30, 2007, we had not commenced significant land development activities. We surrendered 3.6 million of IRSA's convertible notes and paid Ps 3.17 million in cash for the acquisition of the concession.

Land development is also expected to continue in the framework of a project consisting of a total of 35,000 hectares which has been approved by the Secretariat of Environment and Sustainable Development of the Province of Salta.

REGULATION AND GOVERNMENT SUPERVISION

Farming and Animal Husbandry Agreements

Agreements relating to farming and animal husbandry activities are regulated by Argentine law, the Argentine Civil Code and local customs.

According to the Law No. 13,246, all lease agreements related to rural properties and land are required to have a minimum duration of 3 years. Upon death of the tenant farmer, the agreement may continue with his successors. Upon misuse of the land by the tenant farmer or default on payment of the rent, the land owner may initiate an eviction proceeding.

Law No. 13,246 also regulates agreements for crop sharing pursuant to which one of the parties furnishes the other with farm animals or land with the purpose to share benefits between tenant farmer and land owner. These agreements are required to have a minimum term of duration of 3 years. The tenant farmer must perform himself the obligations under the agreement and may not, assign it under any circumstances. Upon the death, incapacity or impossibility of the tenant farmer, the agreement will be terminated.

Quality control of Grains and Cattle

The quality of the grains and the health measures of the cattle are regulated and controlled by the *Servicio Nacional de Sanidad y Calidad Agroalimentaria*, which is an entity within the Ministry of Economy and Production that oversees the farming and animal sanitary activities.

Argentine law establishes that the brands should be registered with each provincial registry and that there cannot be brands alike within the same province.

Sale and Transportation of Cattle

Even though the sale of cattle is not specifically regulated, general contract provisions are applicable. Further, every province has its own rural code regulating the sale of cattle.

Argentine law establishes that the transportation of cattle is lawful only when it is done with the respective certificate that specifies the relevant information about the cattle. The required information for the certificate is established by the different provincial regulations, the inter-provinces treaties and the regulations issued by the *Servicio Nacional de Sanidad y Calidad Agroalimentaria*.

Table of Contents

Exportation Restriction of Beef

The Argentine Agriculture department (Secretaria de Agricultura Ganadería, Pesca y Alimentos), an entity within the Ministry of Economy and Production, oversees the farming and animal sanitary activities.

In addition the Secretaria de Agricultura Ganadería, Pesca y Alimentos is in charge of the distribution in Argentina of the annual regular quota of top quality chilled beef without bones, the Cuota Hilton. The destination of the Cuota Hilton is the European Union.

In June 2007, pursuant to Resolution No 269/2007 the Secretaria de Agricultura Ganadería, Pesca y Alimentos granted to our subsidiary Exportaciones Agroindustriales Argentinas S.A. to export up to 423.6 tons of beef under the authorized export quotas to Europe, known as *Cuota Hilton*.

Environment

The development of our agribusiness depends on a number of federal, state and municipal laws and regulations related to environmental protection.

We may be subject to criminal and administrative penalties, including taking action to reverse the adverse impact of our activities on the environment and to reimburse third parties for damages resulting from contraventions of environmental laws and regulations. Based on the Argentine Criminal Code, persons (including directors, officers and legal entity managers) who commit crimes against public health, such as poisoning or dangerously altering water, food or medicine used for public consumption and selling products that are dangerous to health, without the necessary warnings, may be subject to fines, imprisonment or both. Some courts have utilized these provisions in the Argentine Criminal Code to sanction the discharge of substances which are hazardous to human health. At the administrative level, the penalties vary from notices and fines to the full or partial suspension of the activities, which may include the revocation or annulment of tax benefits, cancellation or interruption of credit lines granted by state banks and a restriction on entering into contracts with public entities.

The Forestry Legislation of Argentina prohibits the devastation of forest and forest land, as well as the irrational use of forest products. Landowners, tenants and holders of natural forests require an authorization from the Forestry Competent Authority for the cultivation of forest land. The legislation also promotes the formation and conservation of natural forests in properties used for agriculture and farmer purposes.

As of June 30, 2007, we owned land reserves in excess of 329,828 hectares, which is located in under-utilized areas where agricultural production is not yet fully developed. We believe that technological tools are available to improve the productivity of such land and enhance its long-term value. However, existing or future environmental regulations may prevent us from completely developing our land reserves, requiring us to maintain a portion of such land as unproductive land reserves.

In accordance with legislative requirements, we have applied for approval to develop certain parts of our land reserves, to the extent allowed. We cannot assure you that current or future development applications will be approved, and if so, to what extent we will be allowed to develop our land reserves. We intend to use genetically modified organisms in our agricultural activities. In Argentina, the cultivation of genetically modified organisms is subject to special laws and regulations and specific authorizations.

Property and Transfer Taxes

Value Added Tax. Under Argentine law, the sale of cattle and grains are taxable at a rate equal to 10.5% of the sale price. The sale of milk is taxable at a rate equal to 21%. The sale of land is not taxable.

Table of Contents

Gross Sales Tax. A local transfer tax is imposed on the sale price of cattle, grains and milk at a general rate of 1%. In some provinces the sale of primary goods is not taxable.

Stamp Tax. This is a local tax that 23 provinces and the City of Buenos Aires collect based on similar rules regarding subject matter, tax base and rates. In general, this tax is levied on acts validated by documents, (e.g. acts related to the constitution, transmission, or expiration of rights, contracts, contracts for sales of stock and company shares, public deeds relating to real property, etc.).

In the City of Buenos Aires (federal district) the stamp tax only applies to public deeds for the transfer of real estate, or for any other contract whereby the ownership of real property is transferred and commercial leases. The purchase and sale of real estate through public deed is not taxable if the real estate will be used for housing. In the City of Buenos Aires the tax rate is 2.5%. In the Province of Buenos Aires, the tax rate is 3% for public deeds of transfer of real property.

IRSA's Business**Overview**

IRSA is one of Argentina's leading real estate companies in terms of total assets. IRSA is engaged, directly and indirectly through subsidiaries and joint ventures, in a range of diversified real estate related activities in Argentina, including:

the acquisition, development and operation of shopping centers;

the origination and securitization of credit card loans;

the acquisition and development of residential properties and undeveloped land reserves for future development and sale;

the acquisition, development and operation of office and other non-shopping center properties primarily for rental purposes; and

the acquisition and operation of luxury hotels.

As of June 30, 2007, IRSA had total assets of Ps.4,144.9 million and shareholders' equity of Ps.1,646.7 million. IRSA's net income for the fiscal years ended June 30, 2005, 2006, and 2007 was Ps.103.2 million, Ps.96.6 million, Ps.107.1 million, respectively. IRSA is the only Argentine real estate company whose shares are listed on the Buenos Aires Stock Exchange and whose GDSs are listed on the New York Stock Exchange.

(1) Shopping centers do not include income for sales and developments.

(2) Revenues do not include IRSA's income from Financial operations and others segment.

Shopping Centers. IRSA is engaged in purchasing, developing and managing shopping centers through its subsidiary Alto Palermo. Alto Palermo operates and owns majority interests in ten shopping centers, six of which are located in the Buenos Aires metropolitan area, and the other four of which are located in the Provinces of Mendoza, Rosario, Córdoba and Salta. IRSA's Shopping Center segment had assets of Ps.1,375.2 million as of June 30, 2007, representing 33.2% of its consolidated assets at such date, and generated operating income of Ps.124.8 million during IRSA's 2007 fiscal year, representing 62.9% of its consolidated operating income for such year.

Credit Cards. IRSA operates a credit card consumer finance business through its majority-owned subsidiary, Tarshop. IRSA's Credit card operations consist primarily of lending and servicing activities relating to the credit card products IRSA offers to consumers at shopping centers, hypermarkets and street stores. IRSA finances a substantial majority of its credit card activities through securitization of the receivables underlying the accounts it originates. IRSA's revenues from credit card transactions are derived from interest income generated by financing and lending activities, merchants' fees, insurance charges for life and disability insurance, and fees for processing and printing cardholders' account statements. IRSA's Credit Card segment had assets of Ps.158.4 million as of June 30, 2007, representing 3.8% of its consolidated assets at such date, and generated operating income of Ps.32.6 million during IRSA's 2007 fiscal year, representing 16.4% of its consolidated operating income for such year.

Residential Properties. The acquisition and development of residential apartment complexes and residential communities for sale is another of IRSA's core activities. IRSA's development of residential apartment complexes consists of the construction of high-rise towers or the conversion and renovation of existing structures, such as factories and warehouses. In residential communities, IRSA acquires vacant land, develops infrastructure such as roads, utilities and common areas, and sell plots of land for construction of single-family homes. IRSA's Development and Sale of Properties segment had assets of Ps.539.3 million as of June 30, 2007, representing 13.0% of its consolidated assets at such date, and generated operating income of Ps.6.2 million during IRSA's 2007 fiscal year, representing 3.1% of its consolidated operating income for such year.

Office Buildings. In December 1994, IRSA launched its office rental business by acquiring three prime office towers in Buenos Aires: Libertador 498, Maipú 1300 and Madero 1020. As of June 30, 2007, IRSA,

Table of Contents

directly and indirectly, owned interests in 24 offices and other non-shopping center leased properties in Argentina that in the aggregate represented 234,320 square meters of gross leasable area. IRSA's Offices and Other Non-Shopping Center leased properties segment had assets of Ps.700.0 million as of June 30, 2007, representing 16.9% of IRSA's consolidated assets at such date, and generated operating income of Ps.19.6 million during IRSA's 2007 fiscal year, representing 9.9% of its consolidated operating income for such year.

Hotels. In 1997, IRSA acquired the Hotel Llao Llao and an indirect controlling interest in the Hotel Intercontinental in Buenos Aires. In March 1998, IRSA acquired the Hotel Sheraton Libertador in Buenos Aires. During fiscal year 1999, IRSA sold a 20% interest in the Hotel Libertador to Hoteles Sheraton de Argentina S.A., and during the fiscal year 2000, IRSA sold 50% of its interest in the Hotel Llao Llao to the Sutton Group. IRSA's Hotels segment, which consists of these three hotels, had assets of Ps.208.4 million as of June 30, 2007, representing 5.0% of its consolidated assets at such date, and generated income of Ps.14.7 million during IRSA's 2007 fiscal year, representing 7.4% of its consolidated operating income for such year.

Banco Hipotecario. IRSA currently owns 11.8% of Banco Hipotecario, Argentina's leading mortgage lender in terms of outstanding mortgage loans. IRSA acquired 2.9% of Banco Hipotecario for Ps.30.2 million when it was privatized in 1999. During 2003 and 2004, IRSA increased its investment in Banco Hipotecario to 11.8% by acquiring additional shares, and by acquiring and exercising warrants, for an aggregate purchase price of Ps.33.4 million. In May 2004, IRSA sold Class D shares representing 1.9% of Banco Hipotecario to IFISA, one of IRSA's controlling shareholders, for Ps.6.0 million, generating a loss of Ps.1.6 million. IRSA's 11.8% investment in Banco Hipotecario is held in the form of Class D shares, which are currently entitled to three votes per share, affording IRSA the right to vote approximately 18.36% of the total votes that can be cast at Banco Hipotecario's shareholders' meetings. As of June 30, 2007, IRSA's investment in Banco Hipotecario represented 7.3% of its consolidated assets, and during IRSA's fiscal years ended June 30, 2005, 2006 and 2007, this investment generated gains of Ps.55.2 million, Ps.47.0 million and Ps.41.4 million, respectively.

Business Strategy

IRSA seeks to take advantage of its position as a leading company in Argentina dedicated to owning, developing and managing real estate. IRSA's business strategy seeks to (i) generate stable cash flows through the operation of its real estate rental assets (shopping centers, office buildings, hotels), (ii) achieve long-term appreciation of IRSA's asset portfolio by selectively acquiring strategically located properties by taking advantage of development opportunities, and (iii) enhance the margins of IRSA's sales and developments segment through timely transformation of its land reserves into developed residential and commercial properties.

Shopping centers. In recent years, the Argentine shopping center industry has benefited from improved macroeconomic conditions and a significant expansion in consumer credit. IRSA believes that the Argentine shopping center sector offers attractive prospects for long-term growth due to, among other factors, (i) a continuing evolution of consumer preferences in favor of shopping malls (away from small neighborhood shops) and (ii) a level of shopping center penetration that IRSA considers low compared to many developed countries. IRSA seeks to improve its leading position in the shopping center industry in Argentina by taking advantage of economies of scale to improve the operating margins of its diversified portfolio of existing shopping centers and by developing new properties at strategic locations in Buenos Aires and other important urban areas, including in Argentine provinces and elsewhere in Latin America. The shopping center business is at present the strongest source of cash generation of IRSA's business segments.

Credit cards. IRSA believes that its credit card operations complement its shopping center business and offer attractive prospects for long-term growth due to improved macroeconomic conditions and an expansion in consumer credit. IRSA seeks to grow its credit card business and intend to maintain low levels of credit exposure through continuing securitization of its credit card loans. From time to time IRSA considers strategic alternatives with respect to its investment in Tarshop which, due to its recent growth in size and profitability, competes increasingly with domestic and international banks and credit card companies that are substantially larger than Tarshop. As a result, IRSA is considering alternatives to maximize the value of its investment in Tarshop including its possible merger with, or sale to, another financial institution actively engaged in the Argentine credit card industry. Although IRSA is actively considering a range of such strategic alternatives, we cannot give you any assurance if or when any of them will be in fact be implemented.

Table of Contents

Residential property. During the economic crisis in Argentina in 2001 and 2002 and its aftermath, a scarcity of mortgage financing restrained growth in middle class home purchases. As a result, IRSA decided to focus on projects for affluent individuals who do not need to finance their home purchases. IRSA believes that there are attractive opportunities in the residential segment, as construction costs have remained low and property values have recovered significantly. IRSA seeks to take advantage of this opportunity, as well as of improvements in highway and other transportation infrastructure in and around Buenos Aires, by focusing on the development of residential properties for medium- and high-income individuals. In urban areas, IRSA seeks to purchase undeveloped properties in densely-populated areas and build apartment complexes offering greenspace for recreational activities. IRSA recently entered into a partnership with Cyrela Brazil Realty S.A. Empreendimentos e Participações, a leading Brazilian developer of residential real estate, to develop residential real estate projects in Argentina and to increase IRSA's presence in such business. In suburban areas, IRSA seeks to develop residential communities by acquiring undeveloped properties with convenient access to Buenos Aires, developing roads and other basic infrastructure such as power and water, and then selling lots for the construction of residential units.

Office buildings. During the Argentine economic crisis in 2001 and 2002, little new investment was made in high-quality office buildings in Buenos Aires and, as a result, IRSA believes there is currently substantial demand for desirable office space in Buenos Aires. IRSA seeks to purchase, develop and operate premium office buildings in strategically-located business districts in the City of Buenos Aires and other locations that IRSA believes offer potential for rental income and long-term capital gain. IRSA expects to continue its focus on attracting premium corporate tenants to its office buildings and will consider opportunities to acquire existing properties or construct new buildings depending on the location and circumstances.

Hotels. IRSA believes its portfolio of three luxury hotels is positioned to take advantage of future growth in tourism and business travel in Argentina. IRSA seeks to continue its strategy of investing in high-quality properties which are operated by leading international hotel companies to capitalize on their operating experience and international reputation. IRSA currently intends to renovate and expand Hotel Llao Llao and to remodel the Hotel Sheraton Libertador.

Banco Hipotecario. IRSA believes that its investment in Banco Hipotecario has attractive prospects for long-term appreciation. After the 2002 economic crisis in Argentina mortgage loan originations have increased, and IRSA believes they are likely to continue to increase as salaries, consumer purchasing power and investments in residential construction grow. IRSA believes that, unlike certain other countries in Latin America, Argentina has a low level of mortgages outstanding, particularly if measured in terms of GDP and believe that Banco Hipotecario is currently valued at a level that is attractive compared to most other Argentine listed banks. Finally, IRSA believes that the mortgage origination business and its real estate development business (which IRSA expects to be bolstered through its recent partnership with Cyrela mentioned above) may potentially experience synergies that enhance operational efficiencies and cross selling opportunities that may promote the development of IRSA's undeveloped land reserves.

Land reserves. IRSA continuously seeks to acquire undeveloped land at locations it considers attractive inside and outside Buenos Aires. In all cases, IRSA's intention is to purchase land with significant development or appreciation potential for subsequent sale. IRSA believes that holding a portfolio of desirable undeveloped plots of land enhances its ability to make strategic long-term investments and affords IRSA a valuable pipeline of new development projects for upcoming years.

International. In the past, IRSA has made significant real estate investments outside of Argentina, including investments in Brazil Realty S.A. in Brazil and Fondo de Valores Inmobiliarios in Venezuela which it disposed of in 2002 and 2001, respectively. Although we cannot assure you that IRSA will make further investments outside of Argentina, IRSA believes that Brazil and certain other Latin American countries offer certain interesting real estate opportunities. IRSA expects to continue to evaluate actively such regional opportunities as they arise.

Table of Contents**Shopping Centers****Overview**

IRSA is engaged in purchasing, developing and managing shopping centers through its subsidiary Alto Palermo. As of June 30, 2007, Alto Palermo operated and owned majority interests in ten shopping centers, five of which are located in the City of Buenos Aires, one of which is located in the greater Buenos Aires metropolitan area and the remaining are located in the interior Argentine cities of Salta, Rosario, Mendoza and Córdoba.

As of September 30, 2007, IRSA owned approximately 62.5% of Alto Palermo, and Parque Arauco S.A. (Parque Arauco) owned 29.6%. The remaining shares are held by the public and traded on the Bolsa de Comercio de Buenos Aires and on the Nasdaq National Market (USA) under the symbol APSA. In addition, as of September 30, 2007, IRSA owned US\$31.7 million of Alto Palermo's convertible notes due 2014. If IRSA and all other holders of such convertible Notes were to exercise its option to convert the convertible notes into shares of Alto Palermo's common stock, IRSA's shareholding in Alto Palermo would increase to 65.6% of its fully diluted capital.

At June 30, 2007, Alto Palermo's shopping centers comprised a total of 224,138 square meters of gross leasable area (excluding certain space occupied by hypermarkets which are not Alto Palermo's tenants and the surface area of the Panamerican Mall that includes several projects one of which is the construction of a shopping center). For the year ended June 30, 2007, the average occupancy rate of Alto Palermo's shopping center portfolio was approximately 97.0%.

In December 2006, Alto Palermo acquired a 100% of Empalme S.A. which owns Córdoba Shopping, a shopping center covering 35,000 square meters of surface area, having 160 commercial stores, 12 movie theatres and parking lot for 1,500 vehicles, located in the Villa Cabrera neighborhood of Córdoba City.

As a result of IRSA's acquisition of several shopping centers and a corporate reorganization of Alto Palermo, IRSA recently centralized management of its shopping centers in Alto Palermo. Alto Palermo is responsible for providing common area electrical power, a main telephone switchboard, central air conditioning and other basic common area services.

The following table shows certain information concerning IRSA's shopping centers.

	Date of Acquisition	Leaseable Area sqm ⁽¹⁾	Alto Palermo's Effective Interest ⁽³⁾	Occupancy Rate ⁽²⁾	Annual Rental Income for the fiscal years ⁽⁴⁾			Book Value (in thousand Ps.) ⁽⁵⁾

Mendoza Plaza	203.2	353.8	455.6

(1) Annual / six month rental price per gross leasable square meter reflects the sum of base rent, percentage rent, stands and revenues from admission rights (excluding any applicable tax on sales) divided by gross leasable square meters.

Principal Terms of IRSA's Leases

Under Argentine Law, terms of commercial leases must be between three to ten years, with most leases in the shopping center business having terms of no more than five years. IRSA's lease agreements are generally denominated in Pesos.

Leasable space in IRSA's shopping centers is marketed through an exclusive arrangement with its real estate broker Fibesa S.A. IRSA has a standard lease agreement, the terms and conditions of which are described below, which it uses for most tenants. However, IRSA's largest tenants generally negotiate better terms for their respective leases. No assurance can be given that lease terms will be as set forth in the standard lease agreement.

IRSA charges its tenants a rent which consists of the higher of (i) a monthly base rent (the Base Rent) and (ii) a specified percentage of the tenant's monthly gross sales in the store (the Percentage Rent) (which generally ranges between 4% and 8% of tenant's gross sales). Furthermore, pursuant to the rent escalation clause in most leases, a tenant's Base Rent generally increases between 4% and 7% each year during the term of the

Table of Contents

lease. Although many of IRSA's lease agreements contain readjustment clauses, these are not based on an official index nor do they reflect the inflation index. In the event of litigation, there can be no assurance that IRSA may be able to enforce such clauses contained in its lease agreements. See Risk Factors Risks Related to IRSA's Business for a more detailed discussion.

In addition to rent, IRSA charges most of its tenants an admission right, which is required to be paid upon entering into a lease agreement and upon a lease agreement renewal. The admission right is normally paid in one lump sum or in a small number of monthly installments. If the tenant pays this fee in installments, it is the tenant's responsibility to pay for the balance of any such amount unpaid in the event the tenant terminates its lease prior to its expiration. In the event of unilateral termination and/or resolution for breach of duties by the tenant, a tenant will not be refunded its admission right without its consent.

IRSA is responsible for supplying each shopping center with the electrical power connection and provision, a main telephone switchboard, central air conditioning connection and a connection to a general fire detection system. Each rental unit is connected to these systems. IRSA also provides the food court tenants with sanitation and with gas systems connections. Each tenant is responsible for completing all the necessary installations within its own rental unit, in addition to the direct expenses generated by these items within each rental unit. These direct expenses generally include: electricity, water, gas, telephone and air conditioning. Tenants must also pay for a percentage of total charges and general taxes related to the maintenance of the common areas. IRSA determines this percentage based on the tenant's gross leasable area and the location of its store. The common area expenses include, among others, administration, security, operations, maintenance, cleaning and taxes.

IRSA carries out promotional and marketing activities to increase attendance to its shopping centers. These activities are paid for with the tenants' contributions to the Common Promotional Fund (CPF), which is administered by IRSA. Every month tenants contribute to the CPF an amount equal to approximately 15% of their rent (Base Rent plus Percentage Rent), in addition to rent and expense payments. IRSA may increase the percentage that tenants must contribute to the CPF, but the increase cannot exceed 25% of the original amount set forth in the corresponding lease agreement for the contributions to the CPF. IRSA may also require tenants to make extraordinary contributions to the CPF to fund special promotional and marketing campaigns or to cover the costs of special promotional events that benefit all tenants. IRSA may require tenants to make these extraordinary contributions up to four times a year provided that each such extraordinary contribution may not exceed 25% of the preceding monthly rental payment of the tenant.

Each tenant leases its rental unit as a shell without any fixtures. Each tenant is responsible for the interior design of its rental unit. Any modifications and additions to the rental units must be pre-approved by IRSA. IRSA has the option to decide tenants' responsibility for all costs incurred in remodeling the rental units and for removing any additions made to the rental unit when the lease expires. Furthermore, tenants are responsible for obtaining adequate insurance for their rental units, which must include, among other things, coverage for fire, glass breakage, theft, flood, civil liability and workers' compensation.

Table of Contents**Sources of Shopping Center Revenues**

Set forth below is a breakdown of the sources of IRSA's shopping center revenues for its fiscal years ended June 30, 2005, 2006 and 2007.

	Fiscal Year ended June 30,		
	2005	2006	2007
	(in Pesos)		
Fixed monthly minimum rent	78,701,727	104,548,288	129,594,156

Description of each Shopping Center

Set forth below is information regarding IRSA's principal shopping centers.

Alto Palermo Shopping, City of Buenos Aires. Alto Palermo Shopping is a 150-store shopping center that opened in 1990 and is located in the well known and densely populated neighborhood of Palermo in the City of Buenos Aires. Alto Palermo Shopping is located only a few minutes from downtown Buenos Aires and with nearby subway access. Alto Palermo Shopping has a total constructed area of 64,574 square meters that consists of 18,210 square meters of gross leasable area. The shopping center has a food court with 21 restaurants. Alto Palermo Shopping is spread out over four levels and has a 647 car-parking lot. Tenants in this shopping center generated average estimated monthly retail sales of approximately Ps.2,298 per square meter for the fiscal year ended June 30, 2007. Principal tenants currently include Zara, Frávega, Garbarino, Just For Sport and Musimundo. Alto Palermo Shopping's five largest tenants (in terms of sales in this shopping center) accounted for approximately 15.4% of its gross leasable area at June 30, 2007 and approximately 9.6% of its annual base rent for the fiscal year ended on such date.

Alto Avellaneda, Avellaneda, Greater Buenos Aires. Alto Avellaneda is a 145-store shopping center that opened in October 1995 and is located in the densely populated neighborhood known as Avellaneda, on the southern border of Buenos Aires. Alto Avellaneda has a total constructed area of 97,655 square meters that includes 27,336 square meters of gross leasable area. Alto Avellaneda includes several anchor stores, a six-screen multiplex movie theatre, a Wal-Mart superstore, an entertainment area, a bowling alley, a 16-restaurant food court and an outdoor parking lot. Wal-Mart purchased the space it now occupies. Tenants in this shopping center generated average estimated monthly retail sales of approximately Ps.1,275 per square meter for the fiscal year ended June 30, 2007. Principal tenants currently include Frávega, Rodo, Bingo, Garbarino and Compumundo. Alto Avellaneda's five largest tenants (in terms of sales in this shopping center) accounted for approximately 14.4% of its gross leasable area at June 30, 2007 and approximately 12.4% of its annual base rent for the fiscal year ended on such date.

Paseo Alcorta, City of Buenos Aires. Paseo Alcorta is a 113-store shopping center that opened in 1992 and is located in the residential neighborhood of Palermo Chico, one of the most exclusive areas in the City of Buenos Aires, within a short drive from downtown Buenos Aires. Paseo Alcorta has a total constructed area of approximately 54,728 square meters that consists of 14,403 square meters of gross leasable area. The three-level shopping center includes a four-screen multiplex movie theatre, a 17 restaurant food court, a Carrefour hypermarket, and a free parking lot with approximately 1,300 spaces. Carrefour purchased the space it now occupies but it pays a share of the expenses of the shopping center. Tenants in this shopping center generated average estimated monthly retail sales of approximately Ps.1,863 per square meter for the fiscal year ended June 30, 2007. Principal tenants currently include Zara, Frávega, Musimundo, Kartun and Etiqueta Negra. Paseo Alcorta's five largest tenants (in terms of sales in this shopping center) accounted for approximately 17.3% of Paseo Alcorta's gross leasable area at June 30, 2007 and approximately 9.3% of its annual base rent for the fiscal year ended on such date.

Table of Contents

Abasto Shopping, City of Buenos Aires. Shopping is a 171-store shopping center located in the City Buenos Aires. Abasto Shopping is directly accessible by subway, railway and highway. Abasto Shopping opened in November 1998. The principal building is a landmark building which during the period 1889 to 1984 operated as the primary fresh produce market for the City of Buenos Aires. The property was converted into a 115,905 square meter shopping center, with approximately 39,683 square meters of gross leasable area. Abasto Shopping is located across from Torres de Abasto residential apartment development. The shopping center includes a food court with 24 restaurants covering an area of 5,600 square meters, a 12-screen multiplex movie theatre, entertainment facilities and the Museo de los Niños Abasto, a museum for children. Abasto Shopping is spread out over five levels and has a 1,200-car parking lot. Tenants in this shopping center generated estimated average monthly sales of approximately Ps.1,205 per square meter for the fiscal year ended June 30, 2007. Principal tenants currently include Zara, Hoyts Cinemas, Frávega, Hiper Rodo and Garbarino. Abasto Shopping Center's five largest tenants (in terms of sales in this shopping center) accounted for approximately 11.3% of the annual base rent for the fiscal year ended on June 30, 2007.

Patio Bullrich, City of Buenos Aires. Patio Bullrich is an 83-store shopping center located in Recoleta, a popular tourist zone in City of Buenos Aires a short distance from the Caesar Park, Four Seasons and Hyatt hotels. Patio Bullrich has a total constructed area of 28,211 square meters that consists of 10,978 square meters of gross leasable area. The four-story shopping center includes a 14 restaurant food court, an entertainment area, a six-screen multiplex movie theatre and a parking lot with 212 spaces. Tenants in this shopping center generated estimated average monthly sales of approximately Ps.1,717 per square meter for the fiscal year ended June 30, 2007. Principal tenants currently include Etiqueta Negra, Rapsodia, Christian Dior, Casa López and Rouge International. Patio Bullrich's five largest tenants (in terms of sales in the shopping center) accounted for approximately 14.9% of Patio Bullrich's gross leasable area at June 30, 2007, and approximately 9.4% of its annual base rent for the fiscal year ended on such date.

Alto Noa, Salta, Province of Salta. Alto Noa is an 84 store shopping center located in the City of Salta, the capital of the Province of Salta. The shopping center consists of approximately 41,700 square meters of total constructed area that consists of 18,831 square meters of gross leasable area and includes a 13-restaurant food court, a large entertainment center, a supermarket, an eight-screen movie theatre and parking facilities for 551 cars. Tenants in this shopping center generated estimated average monthly sales of approximately Ps.577 per square meter for the fiscal year ended June 30, 2007. Principal tenants currently include Supermercado Norte, Frávega, Garbarino, Y.P.F. and Slots. Alto Noa's five largest tenants (in terms of sales in this shopping center) accounted for approximately 32.8% of Alto Noa's gross leasable area at June 30, 2007, and approximately 8.0% of its annual base rent for the fiscal year ended on such date.

Buenos Aires Design, City of Buenos Aires. Buenos Aires Design is a 61-store shopping center intended for specialty interior, home decorating and restaurants that opened in 1993. Alto Palermo owns Buenos Aires Design through a 54% interest in Emprendimientos Recoleta, which owns the concession to operate the shopping center. Buenos Aires Design is located in Recoleta, one of the most popular tourist zone in Buenos Aires City. Buenos Aires Design has a total constructed area of 31,645 square meters that consists of 13,988 square meters of gross leasable area. The shopping center has 6 restaurants, is divided into two floors and has a 174-car parking lot. Tenants in this shopping center generated estimated average monthly sales of approximately Ps.1,660 per square meter for the fiscal year ended June 30, 2007. Principal tenants currently include Morph, Barugel Azulay, Garbarino, Hard Rock Café and Prima Fila. Buenos Aires Design's five largest tenants (in terms of sales in this shopping center) accounted for approximately 29.5% of Buenos Aires Design's gross leasable area and 17.6% of its annual base rent for the fiscal year ended on such date.

Alto Rosario, Santa Fe, City of Rosario. Alto Rosario is a shopping center of 146 stores, located in City of Rosario, Province of Santa Fe. It was inaugurated in November 2004 and has 105,809 square meters of fully covered surface, and 30,261 square meters of gross leasable area. This center is primarily devoted to clothing and entertainment and includes a food patio with 18 stores, a childrens' entertainment area, a 14-cinema complex and

Table of Contents

parking lot for almost 1,736 vehicles. Tenants in this shopping center generated average monthly sales of approximately Ps.563 per square meter, for fiscal year ended June 30, 2007. Principal tenants are Frávega, Sport 78, McDonald's, Compumundo and Red Megatone. Alto Rosario's five largest tenants (in terms of sales in this shopping center) accounted for approximately 6.5% of Alto Rosario's gross leasable area and 6.9% of its annual base rent for the fiscal year ended on such date.

Mendoza Plaza, Mendoza, Province of Mendoza. Mendoza Plaza is a 148-store shopping center located in the City Mendoza in the Province of Mendoza. It consists of 39,392 square meters of gross leasable area. Mendoza Plaza has a multiplex movie theatre covering an area of approximately 3,659 square meters, the Chilean department store Falabella, a food court, with 23 stores, an entertainment center and a supermarket which is also a tenant. Tenants in this shopping center generated estimated average monthly sales of approximately Ps.715 per square meter for the fiscal year 2007. During the year 2005 a 68.8% interest was acquired to Pérez Cuesta, increasing up to 85.4%. Principal tenants currently include Falabella, Super Plaza Veá, Frávega, Garbarino and Red Megatone. Mendoza Plaza's five largest tenants (in terms of sales in this shopping center) accounted for approximately 33.7% of Mendoza Plaza's gross leasable area at June 30, 2007, and approximately 22.3% of its annual base rent for the fiscal year ended on such date.

Córdoba Shopping, Villa Cabrera, Córdoba. Córdoba Shopping is a 106 shops commercial center located in Villa Cabrera, Province of Córdoba. The Córdoba Shopping center has 11,056 square meters of gross locative area. The Córdoba Shopping has a movie theatre complex with 12 units and approximately 6,929 square meters, a food patio and an entertainment area. Tenants in this shopping center generated estimated average monthly sales of approximately Ps.115 per square meter for the fiscal year 2007. Principal lessees are New Sport, Musimundo, Dexter, McDonald's and Plenty.

Ex Escuela Gobernador Vicente de Olmos, Córdoba, Province of Córdoba. In November 2006 IRSA participated in a public bidding of the Corporación Inmobiliaria Córdoba S.A. for the sale of the building known as Ex Escuela Gobernador Vicente de Olmos, located in the City of Córdoba. The building has 5,147 square meters of surface area. Inside the building there is a part of the Patio Olmos shopping center, which operates four commercial plants and two underground parking lots. This shopping center also includes two neighbor buildings with cinemas and a commercial annex connected to the bidding sector and legally related through easement contracts. The building is under a concession contract, effective for a 40-year term expiring in February 2032, in which IRSA acts as grantor. Such contract establishes a monthly payment which is increased by Ps.2,513 every 47 months. As of the date of this Form 20-F (i) the concession is in its 181st month with a monthly payment of Ps.10,052, being the next monthly increase in the 186th month to Ps.12,565, and (ii) the transfer deed document is not yet effective. IRSA's offer bid was for Ps.32.5 million, of which Ps.9.7 million was paid on the awarding of the building and Ps.22.8 million was paid on the date of the execution of the transfer deed. On November 20, 2006, IRSA was notified that the bid was awarded to it, and it paid the 30% of the offer bid in accordance with the terms and conditions established in the bid.

IRSA was ordered by the Corporación Inmobiliaria Córdoba S.A. to execute the deed documents on May 15, 2007. IRSA answered such order by indicating its willingness to sign the related deed documents for the purchase and sale agreement and the assignment of the concession agreement, respectively, provided the bidding terms are respected.

On January 15, 2007 IRSA was notified of two claims filed against it before the Argentine Antitrust Authority, one by a private individual and the other one by the licensee of the shopping center, both opposing this transaction. On February 1, 2007 IRSA responded the claims.

On June 26, 2007, IRSA was advised that the Argentine Antitrust Authority initiated a summary proceeding to determine whether their prior consent was required to complete this transaction. As of the date of this Form 20-F the result of this proceeding is yet to be determined.

On September 25, 2007, IRSA purchased the building known as Ex Escuela Gobernador Vicente de Olmos from the Corporación Inmobiliaria Córdoba S.A., pursuant to the terms and conditions of Bid No. 10/06

Table of Contents

for the sale of the property located in the Province of Cordoba . The aggregate purchase price was Ps.32.5 million. As part of this transaction, the Province of Cordoba has also assigned its rights and obligations to IRSA under the concession contract.

Panamerican Mall Project. In December 2006 IRSA entered into a series of agreements for the construction, marketing and management of a new shopping center to be developed in the neighborhood of Saavedra, City of Buenos Aires, by Panamerican Mall S.A., a recently formed company in which IRSA's subsidiary Alto Palermo has an 80% shareholding. The project includes the construction of a shopping center, a hypermarket, a cinema complex and an office building and/or housing building. This is currently one of IRSA's most significant development projects. IRSA has started the construction of this shopping center and currently seeks to complete it during its fiscal year ending June 30, 2009.

Credit Card Operations

Through its 80% owned subsidiary Tarshop, IRSA is engaged in the credit card business through the issuance of its Tarjeta Shopping and Tarjeta Shopping Metroshop credit cards which have a strong presence in IRSA's shopping centers and nearby hypermarkets and street stores. In addition to increasing sales and traffic in IRSA's shopping centers, it also seeks to achieve a financial return by facilitating access to credit for an underbanked segment of the Argentine population.

IRSA targets all customers of its shopping centers as well as customers in nearby hypermarkets and street stores. IRSA attracts customers by offering a credit card which is easy to obtain and use and by promotions suited to the commercial needs of its tenants and that are also regarded by customers as more convenient than other means of payment. One of the most important benefits granted to customers is the welcome discount which provides a 10% discount on all purchases made on the customer's first day. One of the most aggressive promotions includes offering up to a 20% discount at stores designated at random, and as a result, affording accessible prices to a wide range of customers. Many of Tarjeta Shopping's customers also have access to the Banelco and Link ATM networks, allowing them to make cash withdrawals from any ATM in Argentina.

IRSA is currently considering strategic alternatives with respect to its investment in Tarshop which, due to its recent growth in size and profitability, competes increasingly with credit card companies that are substantially larger. As a result, IRSA is currently considering alternatives to maximize the value of its investment in Tarshop, including its possible merger with, or sale to, another entity engaged in the credit card industry.

History of IRSA's Credit Card Business

The credit card business in Argentina started in the 1960s, but its development was limited until companies such as Visa and Mastercard entered the Argentine market in the early 1980s. During this first stage, and as a consequence of an inflationary economy, the surcharges imposed by merchants for credit card sales were high, burdensome and curtailed the growth of the credit card business in Argentina. With the implementation of the Convertibility Plan in April 1991 the inflation was curbed, and the consumer financing market, in pesos as well as in dollars, rapidly developed.

The *Tarjeta Shopping* card was introduced in 1996 mainly to develop a private credit card that would be offered to customers of the Alto Avellaneda shopping center and accepted at all its stores, including the Wal-Mart Avellaneda superstore located next to Alto Avellaneda. In light of the initial success of the *Tarjeta Shopping* card in Alto Avellaneda, IRSA determined to use it as its platform for expanding its credit card business to IRSA's other shopping centers.

In late 2004, IRSA introduced its Tarjeta Shopping Metroshop credit card through a 50.0% owned joint venture with Metronec S.A., a company which issues the Tarjeta Subtecard credit card. The *Tarjeta Shopping Metroshop* credit card has the same characteristics and benefits as IRSA's *Tarjeta Shopping* card as well as the *Tarjeta Subtecard*. The *Tarjeta Shopping Metroshop* credit card allows IRSA access to the users of the subway of the City of Buenos Aires and the General Urquiza Railway. Holders of the *Tarjeta Shopping Metroshop* credit

Table of Contents

card can pay credit card bills at Metroshop's branches, subway stations ticket counters and through other collection agents, and are entitled to participate in exclusive promotions and specially designed financing plans. This alliance allows IRSA to develop a consumer credit business using the captive customer base, experience and know how in the marketing of financial products in high-transit areas and its use in the more than 30,000 participating stores, the best chains and the Banelco and Link ATM networks.

Metroshop currently has 11 branches distributed in the main stations of the A, B, C, and D and E subway lines in the City of Buenos Aires, one in the City of Mar del Plata and more than twenty outsourced participating points of sale located in the subway network of the City of Buenos Aires.

Since 2003, IRSA's credit card business has expanded its customer base and its area of influence, particularly in the south area of Buenos Aires and in other provinces. For the fiscal years ended June 30, 2000, 2003, 2006 and 2007 the evolution of Tarshop's customers base was as follows:

Fiscal year ended June 30,	Shopping Centers	Street Stores and Other Non-Shopping Center Stores
2000	87.0%	13.0%
2003	56.0%	44.0%
2006	16.0%	84.0%
2007	13.9%	73.7%

IRSA's Tarjeta Shopping card has become one of the main credit cards in Alto Avellaneda shopping center with more than 33% of the credit card sales made, and in Abasto de Buenos Aires with a share exceeding 15%. In addition, IRSA has increased its *Tarjeta Shopping* customer base to almost 600,000 accounts by the end of 2006, with an activation of more than 70%, sales of almost \$1 billion in the year and more than 30,000 participating stores.

The table below sets forth information with respect to the growth of IRSA's credit card business during the periods indicated:

	For the Fiscal year ended June 30,	
	2005	2006
	(in millions of Ps.)	
Revenues:		
Interest income	14.8	29.9
Merchants' commissions	14.5	22.7
Other fees and commissions	0.0	0.1
Compensatory, punitive and other interest	3.1	5.9
Account maintenance charges	12.7	22.2
Charges for life and disability insurance	19.4	41.6
Income from Metroshop	0.1	0.4
Other services	0.0	0.1
Credit cards reissued	0.0	0.1
Total	64.6	123.0
Credit card receivables ⁽¹⁾	209.2	384.6
Credit cards issued	0.4	0.5

Table of Contents

The table below sets forth information with respect to the growth of IRSA's credit card business during fiscal year 2007, considering the last classification of revenues in Tarshop's financial statements:

	For the Fiscal year ended June 30, 2007 (in million of Ps.)
Revenues	
Merchants' commissions	38.2
Income for services	74.2
Interest income	63.8
Other fees and commissions	2.6
Credit card reissued	1.5
Account maintenance charges	32.0
Income from Metroshop	0.7
Total	213.0
Credit card receivables (1)	723.6
Credit card issued	0.7
Branches (2)	23
Participating stores (2)	38.2

(1) Including the securitized portion.

(2) In units.

Distribution Network

Today, Tarjeta Shopping has 22 branches, including in IRSA's Alto Avellaneda, Alto Palermo, Abasto and Paseo Alcorta shopping centers, as well as street offices such as the ones located in the Avellaneda District, in the downtown area of Buenos Aires, and in the cities of Lomas de Zamora, Morón and Quilmes, among others. This growth has been accompanied by the significant expansion throughout the rest of the country by the opening of branches in the provinces of Córdoba, Tucumán, Salta and San Salvador de Jujuy. In addition, IRSA has stands for promotion, opening of accounts and distribution of cards at the Wal-Mart Avellaneda superstore and the Coto supermarkets located in the cities of Lanús, Sarandí and Temperley. IRSA has also entered into strategic alliances at the point of sale of certain important household appliance and motorcycle stores where it is possible to obtain instant credit through the so-called "First Transaction" scheme where no card is needed for the first purchase.

Each branch is organized as an autonomous and independent business unit that handles the resources necessary to achieve its business goals, such as invoicing and number of accounts opened. In addition, *Tarjeta Shopping* has its own ATM structure for payment of bills and extension of automatic cash loans to customers in its branches, applying facilities and procedures for the management and movement of cash comparable to those used by bank branches.

Credit Risk Management***Credit Approval Process***

Applications for issue of credit cards submitted are subjected to an evaluation process that undergoes various controls. First, the applicant's identity is verified and its credit information is collected from credit bureau agencies. Based on the information filed by the applicant and the credit bureau data obtained, in the absence of any negative background, the applicant is given a card with a provisional limit set according to its score level. Simultaneously, the data provided by the applicant himself are verified directly and by cross-checking by means of inquiries to credit databases and governmental agencies, and if necessary, telephone verifications and validations are made at the relevant domicile.

Credit Limits

Edgar Filing: CRESUD INC - Form 20-F

The credit limit assigned to each card applicant is determined on the basis of the family income and other requirements established by Tarshop based on its experience up to a maximum of Ps.20,000. The credit limit is the maximum amount of unmatured installment payments available to the client and its additional cardholders to make purchases, services and cash advances, after having analyzed the client's indebtedness to other financial institutions.

Table of Contents

Applications to increase credit limits are evaluated on the basis of the applicant's seniority and payment behavior and financial condition vis-à-vis other financial institutions. In addition, Tarshop from time to time reviews the card's limit based on the card holder's payment behavior.

Payment Plans

Tarshop handles a single billing cycle that matures on the 25th day of each month. The bill contemplates a grace period for non-interest accruing payments that expires on the 9th day of the following month, and a second due date subject to delayed payment charges on the 20th day of the following month. Bills are payable at any Tarshop office and in IRSA's major collection facilities.

Accounts with unpaid bills as of the 20th day of each month fall in arrears, and are blocked until payment is effected. During the first 30 days of arrears, the client receives automatic and manual calls and letters of reminder. As from the 31st day of arrears, telephone collection officers arrange an interview with the delinquent client at the branches, so as to continue collection activities in person.

Credit Monitoring and Collection Procedures

Delinquent collection management proceedings start with a reminder call sent to clients who have failed to pay on the first due date, by using an automatic call system. Approximately 40 to 120 days after the due date, the actions involve a combination of telephone calls, interviews with collection officers at the Tarshop's branches and home visits, aimed at obtaining a discharge of the debt or a payment rescheduling, accompanied by the execution of a debt acknowledgment instrument by the client. Finally, accounts with arrears of more than 120 days are transferred to the attorneys for the filing of legal actions, unless there is evidence of the debtor's insolvency.

Tarshop's collection procedures are similar to those established in the trust, see Funding and Securitization Activities below.

As concerns loan loss provisions, the policies IRSA applies are similar to those established by the Argentine Central Bank. IRSA makes provisions in relation to the credit portfolio category based on the following:

Performing	Provision
Past due:	
0-30 days	1.0%
31-89 days	5.0%
90-180 days	25.0%
181-365 days	50.0%

The table below sets forth information with respect to the credit card receivables (including the securitized portion):

	2005		As of June 30, 2006		2007	
	Ps.	%	Ps.	%	Ps.	%
Portfolio Status						
Performing ⁽¹⁾	264.1	90.5	338.6	88.2	627.4	86.7
Past due:						
31-89 days	8.1	2.8	13.3	3.5	26.2	3.6
90-180 days	10.2	3.5	16.8	4.4	37.8	5.2
181-365 days	9.4	3.2	15.0	3.9	32.2	4.5
Total	291.8	100.0	383.7	100.0	723.6	100.0
Over 365 days and legal proceedings ⁽²⁾	30.9		35.5		55.0	
Loan loss allowance as % of past due loans		37.8		29.5		20.3
Loan loss allowance as % of all loans		3.5		3.5		2.7

(1) Performing loans not past due more than 30 days.

Table of Contents

(2) These claims are subject to a 100% loan loss allowance.

Funding and Securitization Activities

Tarshop's main liquidity needs and capital resources include: payment of sales made by retail stores, working capital needs, investment in new technology, the opening and improvement of branches and holding of cash to take advantage of opportunities that may arise. Tarshop has significantly expanded its business by securitizing its credit card receivables pursuant to the Tarjeta Shopping Trust Program. By resorting to this innovative financial engineering mechanism, Tarjeta Shopping has led one of the largest issues in the market and successfully placed 29 series for more than Ps.1,250 million, and was assigned the highest rating by Standard & Poor's.

Throughout its history, Tarshop has incurred liabilities mainly in local currency and to a lesser extent in foreign currency, and leveraged twice the coverage for its commitments incurred in foreign currency.

Receivables Portfolio Securitization

Tarshop has its own \$450 million Trust Security Program. An application was filed with the *Comisión Nacional de Valores* to obtain authorization for extending this amount to \$900 million in order to accompany the expected growth of its business.

To date, 29 series have been issued aggregating Ps.1,265 million in bonds and certificates of participation. In 2006, 9 series were issued for \$ 348 million, and in 2005 8 series were issued for \$ 210 million. Total terms under each issue range from 20 to 30 months. The applicable nominal interest rates for Class A and B Bonds are approximately 13% and 15%, respectively. The interest accrued on both Bonds is subject to a floor and ceiling rates. Class A Bonds in both the revolving and non-revolving structures have an AAA rating granted by S&P.

Liquidity Policies

Tarshop's policy is to maintain cash and bank account balances for an average of approximately \$ 1.5 million, and to invest any excess in interest-accruing accounts and in mutual investment funds redeemable upon request within 48 or 24 hours. All balances and reserves are denominated in local currency.

Technology

Information systems are an essential element for credit card companies, as the processing of a large number of transactions in constant expansion is required. This has prompted Tarjeta Shopping to procure state-of-the-art technology, and for this reason the current data and transaction processing systems maintain all branches linked through its local intranet, allowing expediency and confidentiality in the handling and transmission of data. In addition, its administrative headquarters are capable of being connected via PosNetworks to the participating stores, ensuring the possibility of adding stores and carrying out transactions around the clock.

The expansion of the call center and IRSA's credit department required a significant investment in technology and communications, resulting in an aggressive growth in the number of transactions and inquiries attended and increase in processing speed. The Area has four sectors: Systems Development, Technology, New Projects and Server Management and IT Security. Tarjeta Shopping operates with proprietary information systems, developed and suited to the company's business. Its main systems are developed in 4GL language with Informix DS Data Base Engine, currently, migrating to a new context developed under .net under Oracle DFG Data Base. The main systems' platform is composed of SUN Spark servers, with Solaris 10 operating system.

Table of Contents

All business processes, from origination to account opening, issue of plastics, transaction validation, loan management, customer management, generation and printing of bills, payments, collections, delinquency management and processing, are supported by these system.

The systems allow the on-line capturing and validation of purchases, receiving transactions through Posnet, LaPos (Visa), and direct communication with the major Shopping Center, Hypermarket and Department Store chains, and cash withdrawal transactions through Banelco and Link ATMs.

Tarjeta Shopping s equipment and IT systems are comparable to those used by large-scale credit card companies, which will allow it to respect its current cost structure while still maintaining the speed in the growth of accounts and portfolio it has been showing so far.

Table of Contents**Summary Balance Sheet and Other Data**

The following table sets forth certain balance sheet and other data for Tarshop as of June 30, 2005, 2006 and 2007:

Development and Sale of Properties

The acquisition and development of residential apartment complexes and residential communities for sale is one of IRSA's core activities. IRSA's development of residential apartment complexes consists of the new construction of high-rise towers or the conversion and renovation of existing structures such as factories and warehouses. In connection with IRSA's development of residential communities, IRSA frequently acquires

Table of Contents

vacant land, develop infrastructure such as roads, utilities and common areas, and sell plots of land for construction of single-family homes. IRSA may also develop or sell portions of land for others to develop complementary facilities such as shopping areas within residential developments.

In IRSA's fiscal year ended June 30, 2007, revenues from IRSA's Sales and Development segment were Ps.75.8 million, compared to Ps.104.0 million in fiscal year 2006. The local currency remained stable throughout the 2007 fiscal year; the real estate market was promoted by the increase in the demand for all types of properties, whether office buildings, housings, retail premises or other. Likewise, the current framework provides incentives for the development of projects linked to IRSA's real estate activity. Therefore, during the 2008 fiscal year IRSA expects to complete the projects under development, as well as to analyze new undertakings.

Construction and renovation works on IRSA's residential development properties is currently performed, under IRSA's supervision, by independent Argentine construction companies that are selected through a bidding process. IRSA enters into turnkey contracts with the selected company for the construction of residential development properties pursuant to which the selected company agrees to build and deliver the development for a fixed price and at a fixed date. IRSA is generally not responsible for any additional costs based upon the turnkey contract. All other aspects of the construction including architectural design are performed by third parties.

Another modality for the development of residential undertakings is the exchange of land for constructed square meters. In this way, IRSA delivers undeveloped pieces of land and another firm is in charge of building the project. Eventually, IRSA receives finished square meters for commercialization, without taking part in the construction works.

Prior to the commencement of construction of a residential project, IRSA conducts an advertising program that continues after the launching of the sales of the units.

Table of Contents

Table of Contents

Notes:

- (1) Cost of acquisition plus total investment made and/or planned if the project has not been completed, adjusted for inflation until 02/28/03.
- (2) Total area devoted to sales upon completion of the development or acquisition and before the sale of any of the units (including parking and storage spaces, but excluding common areas). In the case of Land Reserves the land area was considered.
- (3) Represents the total units or plots upon completion of the development or acquisition (excluding parking and storage spaces).
- (4) The percentage sold is calculated dividing the square meters sold by the total saleable square meters.
- (5) Includes only the cumulative sales consolidated by the RT21 method adjusted for inflation until 02.28.03.
- (6) Corresponds to IRSA's total sales consolidated by the RT4 method adjusted for inflation until 02.28.03. Excludes turnover tax deduction.
- (7) Cost of acquisition plus improvement, plus activated interest of properties consolidated in portfolio at June 30, 2007, adjusted for inflation at 02/28/03.
- (8) Indirectly owned through Alto Palermo.
- (9) Indirectly owned through Inversora Bolivar.
- (10) Includes the following properties: Dorrego 1916 through IRSA, Yermal 855 and Arcos 2343 through Baldovinos (fully sold).
- (11) Directly through IRSA and indirectly through Inversora Bolivar. Includes sale of Abril shares.
- (12) Includes the following land reserves: Torre Jardín IV, Padilla 902 and Terreno Pilar (through IRSA), Pontevedra, Mariano Acosta, Merlo, Intercontinental Plaza II and Isla Sirgadero (through Inversora Bolivar) and Caballito, Torres Rosario and the Coto Project (through Alto Palermo).
- (13) Includes the following properties: Puerto Madero Dock XIII and Dique II, Sarmiento 517, Income from Termination, Alto Palermo's Real Properties Sales and Rivadavia 2768 (fully sold through IRSA).
- (14) Corresponds to the Sales and Developments business unit mentioned in Note 4 to IRSA's consolidated financial statements.

(15) Corresponds to receivables from swaps disclosed as Inventories in the consolidated financial statements.

Residential Apartments

In the apartment building market, IRSA acquired undeveloped properties strategically located in densely populated areas of the City of Buenos Aires, particularly properties located next to shopping centers and hypermarkets or those to be constructed. IRSA then develops multi-building high-rise complexes targeting the middle-income market. These are equipped with modern comforts and services, such as open green areas, swimming pools, sports and recreation facilities and 24-hour security. In the loft buildings market, IRSA's strategy is to acquire old buildings no longer in use located in areas with a significant middle and upper-income population. The properties are then renovated into unfinished lofts allowing buyers the opportunity to design and decorate them according to their preferences.

Apartment Projects Under Development

Torre Caballito, City of Buenos Aires. This undeveloped 1.8 hectare property is situated in the northern area of Caballito's residential neighborhood in the City of Buenos Aires. On May 4, 2006, IRSA and Koad S.A. (Koad), an Argentine developer, entered into an asset exchange agreement valued at US\$7.5 million pursuant to which IRSA sold to Koad plot number 36 of Terrenos de Caballito in exchange for Koad's agreement to construct, at its sole expense, a residential complex to be named Caballito Nuevo. Koad has agreed to develop a residential complex consisting of two 34-story towers containing 220 apartments each, consisting of one, two and three bedroom residential units with surface areas ranging from 40 to 85 square meters. The proposed apartment complex is currently expected to offer a wide variety of amenities and services. The total area of this apartment complex that will be for sale is estimated to be approximately 28,000 square meters. On August 2009, IRSA will be entitled to ownership of 26.7% of the total square meters and 25% of the parking lots of the entire complex, representing 118 apartments and 55 parking lots located in Tower 1. As a result of an incentive scheme agreed to with Koad, the number of square meters IRSA will receive could vary according to the project's date of completion. As a result of this transaction, Koad granted to IRSA a first lien mortgage on the property to secure up to US\$7.4 million of its obligations to IRSA and posted a surety bond in IRSA's favor supporting an additional US\$2.0 million of Koad's obligations to IRSA.

Table of Contents

Dock IV, City of Buenos Aires. This luxury office building has a total surface area of approximately 22,000 square meters, and will offer 11,000 square meters of large and versatile office space for lease. The building's layout welcomes both companies requiring smaller office space, averaging 200 square meters, and corporations in need of an entire floor. The building's development is currently at its first stage, bid submission for the foundations and lobby. The building will have nine floors with offices and commercial shops on the first floor. Paper work seeking permits for bid submissions for the second stage is still pending.

Torres Renoir, Dock III. On November 25, 2004 a deed of conveyance of title for a certain plot known as plot 1.c. was executed in favor of Desarrollos y Proyectos Sociedad Anónima (DYPESA). This deed establishes in kind consideration for the sale, and at the same time granted DYPESA the option to acquire in barter another plot known as plot 1.e. This option acts as an alternative to the construction of the 13th floor of the building to be developed on plot 1.c. As a guaranty for this transaction, DYPESA established a first lien mortgage for US\$8.03 on plot 1.c. and for US\$10.8 on plot 1.e. DYPESA contracted an obligation to transfer 4.642 square meters at the building constructed on certain plot known as plot 1.c., representing 28.5% of the apartment surface of such building, and 6.421 square meters at the building constructed on certain plot known as plot 1.e., representing 31.5% of the total apartment surface of that building. During December 2006 IRSA began the sales of the available units.

On May 18, 2005, Buenos Aires Trade & Finance Center S.A. (Trade) signed a purchase agreement relating to certain plot known as plot 1.d., with then owner of this plot, DYPESA. On that date Trade paid DYPESA US\$2.15 million. On January 19, 2006, a partial payment of the outstanding balance of US\$1.0 million was made.

On July 17, 2006 we received the balance of the purchase price, executed the transfer deed and took possession of plot 1.d. together with Alvear Palace Hotel S.A. and Desarrollos Premium Plus S.A.

To provide for the sustained increase in the demand for residential apartments in the Puerto Madero area, during fiscal year 2006 IRSA has entered into bartering contracts allowing to start the construction of these two exclusive dwelling towers of 37 and 40-storey. In line with the boom of developments in the area, the market has great expectations on the project given its exceptional features. On September 30, 2006 due to the interest shown in this project, the marketing of plot 1.c. was launched as the rate of progress was 78.3%. During fiscal year 2007 preliminary sales contracts were signed for 76.4% of the units available. In respect of plot 1.e. works started and the percentage of work completed is 4.5%. On November 2, 2007, the company and the developer decided to replace the swap agreement for plot 1.e. for a payment of US\$18.2 million, US\$4.6 million of which were paid on that date and the balance will be received by the company over the next six months. The income resulting from this transaction amounts to approximately US\$4.7 million.

Completed Apartment Projects

Torres Jardín, City of Buenos Aires. Torres Jardín is a high-rise residential complex located in the Buenos Aires neighborhood of Villa Crespo, approximately five minutes from Abasto Shopping. Torres Jardín I, II and III have been completed and consist of 490 one, two and three-bedroom residential apartments. The complex also includes 295 spaces of underground parking. As of June 30, 2007 there is one apartment and 35 parking spaces pending sale. The project originally

Table of Contents

included four 23-story towers targeting the middle-income market, but IRSA decided not to construct Torres Jardín IV and may consider a barter transaction with a third party for its construction.

Torres de Abasto, City of Buenos Aires. Torres de Abasto is a 545-apartment high-rise residential apartment complex developed through IRSA's subsidiary Alto Palermo, located one block from Abasto Shopping. The project consists of three 28-story buildings and one 10-story building targeted to the middle-income market. The apartments were completed in May 1999. The complex has a swimming pool, a terrace, 24-hour security, four retail stores on the ground floor of one of the buildings and 310 underground parking spaces. As of June 30, 2007, 100% of the units in the complex had been sold.

Edificios Cruceros, City of Buenos Aires. Edificios Cruceros is a project located in the Puerto Madero area. This dwelling building covers 6,400 square meters of surface area of which 3,633 belong to IRSA, and it is close to the Edificios Costeros office building. This project targets the high-income segment of the population and all its common areas have views of the river. This development was partially financed through the anticipated sale of its apartments. Works are 100% finished and as of June 30, 2007 more than 90% of the units had been sold.

Barrio Chico, City of Buenos Aires. In March 2003 IRSA purchased a plot of land on San Martin de Tours Street in the district of Barrio Parque, an exclusive residential zone in the City of Buenos Aires. At the time the sales contract was signed, US\$0.08 million were prepaid. In June 2003 at the time the deed of title was transferred, US\$0.23 million were paid. At that time, the property was mortgaged to Providence for US\$0.75 million, to guarantee 25% of the housing units IRSA was obligated to deliver upon the building's completion. IRSA financed with its own working capital the construction of this luxury residential complex designed for high-income customers. This is a unique Project located in Barrio Parque, an exclusive residential zone in the City of Buenos Aires. During May 2006 the successful marketing of this project was launched. The image of the product was previously developed with the name of Barrio Chico with advertisements in the most important media. As of June 30, 2007, the project is finished and only 3 units remain to be sold.

Palacio Alcorta, City of Buenos Aires. Palacio Alcorta is a 191-loft units residential property that IRSA converted from a former Chrysler factory in the residential neighborhood of Palermo Chico, one of the most exclusive areas of Buenos Aires City, located just a ten-minute drive from downtown Buenos Aires. The loft units range from 60 to 271 square meters. This development project targets the upper-income market. Palacio Alcorta also has seven retail units and 165 parking spaces. As of June 30, 2007, all of the loft units in the complex had been sold.

Concepción Arenal 3000, City of Buenos Aires. Concepción Arenal 3000 is a 70-loft residential property located in the north-central area of the City of Buenos Aires. Each loft unit has a salable area of 86 square meters and a parking space. Lofts in this building are targeted towards the middle-income market. As of June 30, 2007, 98.9% of the units had been sold.

Alto Palermo Park and Plaza, City of Buenos Aires. Alto Palermo Park is one of two 34-story apartment buildings located two blocks from Alto Palermo Shopping in the exclusive neighborhood of Palermo. Apartments in this building are targeted primarily towards the upper-income market. Alto Palermo Park is located next to its twin building, Alto Palermo Plaza. Both buildings are comprised of three- and four-bedroom apartments with an average area of 158 square meters in the case of Alto Palermo Park and of 294.5 square meters, in the case of Alto Palermo Plaza. Each unit includes an average of 18 and 29 square meter parking/storage space, respectively.

Table of Contents

These buildings were included in the assets IRSA acquired in November 1997 from Pérez Companc S.A. As of June 30, 2007, 100% of Alto Palermo Plaza was sold and there was only one unit to be sold in the Alto Palermo Park.

Villa Celina, Greater Buenos Aires. Villa Celina is a 400-plot residential community for the construction of single family homes located in the residential neighborhood of Villa Celina on the southwestern edge of the City of Buenos Aires. IRSA has been developing this property in several stages since 1994. The first three stages involved 219 lots, each measuring on average 347 square meters and the last two stages involve 181 lots. As of June 30, 2007, 100% of the residential community had been sold.

Residential Communities

In the residential communities market, IRSA acquired undeveloped properties located in suburban areas or neighborhoods near the large cities to develop private neighborhoods and country clubs in which to sell vacant lots for the construction of single family homes. In these properties IRSA builds streets and roads and arrange for the provision of basic municipal services and amenities such as open spaces, sports facilities and security. IRSA seeks to capitalize on improvements in transportation and communication around the City of Buenos Aires, the growing suburbanization of the region and the shift of the population moving to countryside-type residential communities.

An important factor in the trend towards living in suburban areas has been the improvements and additions to the Autopista Panamericana, Avenida General Paz and Acceso Oeste highways, which significantly reduce traveling time, encouraging a significant number of families to move to the new residential neighborhoods. Furthermore, improvements in public train, subway and bus transportation since their privatization has also influenced the trend to adopt this lifestyle.

As of June 30, 2007, IRSA's residential communities for the construction of single-family homes for sale in Argentina had a total of 62,990 square meters of salable area in the Abril, residential communities located in the province of Buenos Aires.

Abril, Hudson, Greater Buenos Aires. Abril is a 312-hectare private residential community located near Hudson City, approximately 34 kilometers south of the City of Buenos Aires. IRSA has developed this property into a private residential community for the construction of single family homes targeting the upper-middle income market. The project includes 20 neighborhoods subdivided into 1,273 lots of approximately 1,107 square meters each. Abril also includes an 18-hole golf course, 130 hectares of woodlands, a 4,000 square meter mansion and entertainment facilities. A bilingual school, horse stables and sports centers and the construction of the shopping center were concluded in 1999. The neighborhoods have been completed, and as of June 30, 2007, 95.5% of the property had been sold for an aggregate of Ps.217.41 million, with 62,900 square meters left to be sold.

Benavidez, Tigre. In the district of Benavidez, Municipality of Tigre, 35 km north from downtown Buenos Aires, IRSA is developing a 99.8 hectares gated residential complex known as El Encuentro, which will have a privileged front access to Highway No. 9, allowing an easy way to and from the city. On May 21, 2004 an exchange deed was signed whereby DEESA agreed to pay US\$3.98 million to Inversora Bolívar, of which US\$0.98 million were paid and the balance of US\$3.0 million will be paid through the exchange of 110 residential plots already chosen and identified in the option contract signed in December 3, 2003. Furthermore, through the same act,

Table of Contents

DEESA set up a first mortgage in favor of Inversora Bolívar on real property amounting to US\$3.0 million in guarantee of compliance with the operation and delivered US\$0.5 million to Inversora Bolívar corresponding to a deposit in guarantee of performance on the obligations undertaken. This balance will not accrue interest in favor of DEESA, and will be returned as follows: 50% of the outstanding balance at the time of certification of 50% of the progress of work and the remaining upon certification of 90% of work progress. Considering the high price of the plots in the north of the province of Buenos Aires, mostly in the place in which this enterprise is placed, IRSA has great expectations for marketing the land through the bartering system. IRSA estimates that the sale of the units may be launched in early 2008. As of June 30, 2007, the work progress degree is 90%.

Land Reserves

IRSA has acquired large undeveloped properties as land reserves located in strategic areas for the future development of office and apartment buildings, shopping centers and single family housing. IRSA has acquired what it believes to be two of the largest and most important undeveloped river front plots in Buenos Aires, Puerto Retiro and Santa María del Plata, for the future development of residential and office spaces. In addition, IRSA has benefited from the improvement of land values during periods of economic growth. As of June 30, 2007, IRSA's land reserves totaled 17 properties consisting of approximately 3079 hectares (including Rosario, Caballito, Vicente Lopez and Coto C.I.C.S.A. (Coto) air space owned by Alto Palermo).

Land Reserves in the City of Buenos Aires

Solares de Santa María, City of Buenos Aires (ex Santa María del Plata). Solares de Santa María is a 70 hectares property facing the Río de la Plata in the South of Puerto Madero, 10 minutes from the National Government House. This is an urbanization project developed through IRSA's subsidiary Solares de Santa María S.A. (Solares de Santa María), which was recently incorporated. This project has a residential profile and mixed uses, it is currently expected to have offices, stores, hotels, sport and nautical clubs, service areas with schools, supermarkets, parking lots, etc.

The project ultimately submitted for approval to government authorities included various proposals made by advisors of the Urban Environmental Plan Council (*Consejo del Plan Urbano Ambiental*) and contemplates the assignment of 358,000 square meters to become public parks including a 90,000 square meter green sector, boulevards designated for access to and walking around the neighborhood and the transference of all water areas (especially the zone in front of the commercial area) for public use. The river presence in this part of the city has been reserved for general public use, including space for a marina which may be built in the future.

While IRSA awaits the city government approvals and authorizations, IRSA has contacted national and international investors with experience in this type of real state developments.

As part of the project, IRSA sold 31,491,932 shares for US\$10.6 million to Mr. Israel Sutton Dabbah, who is part of the Sutton Group. This sale represents the 10% of Solares de Santa María capital stock and is to be paid as follows: (i) an initial payment of US\$1,500,000; and (ii) the balance of US\$9,100,000 payable on December 26, 2007. Under the purchase agreement a first grade pledge on certain assets owned by the buyer was granted to IRSA and its subsidiary Palermo Invest S.A., the sellers, in order to secure the payment price.

Table of Contents

Puerto Retiro. Puerto Retiro is an 8.3 hectare undeveloped riverside property bounded by the Catalinas and Puerto Madero office zones to the west, the transportation hub Retiro to the north and the Río de la Plata to the south and east. One of the only two significant privately owned waterfront properties in The City of Buenos Aires, Puerto Retiro may currently be utilized only for port activities. IRSA has initiated negotiations with municipal authorities in order to rezone the area. IRSA's plan is to develop a 360,000 square meter financial center. The launching date has not been settled and consequently, the estimated cost and financing method are not decided. IRSA owns a 50% interest in Puerto Retiro through its wholly-owned subsidiary Inversora Bolívar S.A. (Inversora Bolívar). See Legal Proceedings Puerto Retiro.

Caballito, Ferro Project. This is a property of approximately 25,539 square meters in the City of Buenos Aires, neighborhood of Caballito, one of the most densely populated of the city, which Alto Palermo purchased in October 1998. This plot would allow developing a shopping center having 30,000 square meters, a hypermarket, a cinema complex, and several recreation and entertainment activity areas. IRSA is currently working to define the commercial project. The approval of the authorization of the government of the City of Buenos Aires for the development of a shopping center, an office building and a private hospital in this plot has not been granted.

Terreno Figueroa Alcorta. With respect to the plot located in the Figueroa Alcorta avenue, in front of Paseo Alcorta on December 22, 2005, IRSA's subsidiary Alto Palermo subscribed a preliminary purchase contract with possession, by which Alto Palermo sold to RAGHSA S.A. the plot denominated Alcorta Plaza for a total price of US\$7.7 million. The terms and conditions of payment agreed were determined in four installments of US\$1.9 million, the first installment to be due at the date of the preliminary sales contract and the second one collected on March 30, 2006, date on which the final deed was signed. The third installment was paid in March 2007 and the fourth installment is due in March 2008.

Land Reserves in the Province of Buenos Aires

Pereiraola, Hudson. Through Inversora Bolivar, IRSA owns a 100.0% interest in Pereiraola S.A., a company whose principal asset is a 130 hectare undeveloped property adjacent to IRSA's Abril community. IRSA intends to use this property to develop a private community for the construction of single family homes targeted at the middle-income market. IRSA has not yet established the costs and financing method for this proposed project, but IRSA has already obtained the necessary municipal permits. The plot's book value is estimated to be Ps.21.7 million as of June 30, 2007.

Pilar. Pilar is a 74 hectare undeveloped land reserve property located close to Pilar City, 55 kilometers northwest of downtown of the City of Buenos Aires. The property is easily accessible due to its proximity to the Autopista del Norte. The Pilar area is one of the most rapidly developing areas of the country. IRSA is considering several alternatives for this property including the development of a residential community or the sale of this property as it is and, therefore, IRSA does not have a cost estimate or a financing plan. The plot's book value is estimated to be Ps.3.4 million as of June 30, 2007.

Vicente López, Olivos, Provincia de Buenos Aires. On January 16, 2007, IRSA acquired the total shares of Rummaala S.A. (Rummaala), the main asset of which is a plot of land located in Vicente Lopez, Province of Buenos Aires. The purchase price was US\$21.17 million, payable as follows: (i) US\$4.25 million in cash and (ii) by delivering certain units of the building to be constructed in the land owned by Rummaala in the amount of US\$16.92 million, within a 4-year term as from the approval date of the plans by the related authorities or when the facilities be vacated, whichever last occurs.

Table of Contents

As security for compliance with the construction of the future building and transfer of the future units, the shares acquired were pledged.

Simultaneously with the former transaction, Rummaala acquired a plot of land adjacent to its own property for a total consideration of US\$15.00 million, payable as follows: (i) US\$0.50 million in cash; (ii) by delivering certain units of buildings Cruceros I and II in the amount of US\$1.25 million and (iii) by delivering certain units of the building to be constructed in the land acquired for a total consideration of US\$13.25 million, within a 40-month term considered as from the approval date of the plans by the related authorities or when the facilities be vacated, whichever last occurs.

Other Undeveloped Plots in the City and Province of Buenos Aires. IRSA's land reserve portfolio also includes nine land reserve properties located in Buenos Aires and its surrounding areas. These properties are projected for future developments of offices, shopping centers, apartment buildings and residential communities. The main properties under this category include Merlo, Mariano Acosta and Ponedvedra.

Land Reserves in Other Provinces

Torres Rosario Project, City of Rosario, Province of Santa Fe. IRSA's subsidiary Alto Palermo owns a plot of land covering approximately 50,000 square meters of surface area in the city of Rosario, in the place in which the Alto Rosario Shopping Center is located. A residential complex will be built in this plot of land.

Neuquén Project, Province of Neuquén. On July 6, 1999, Alto Palermo acquired a 94.6% share in Shopping Neuquén amounting to Ps.4.2 million. Alto Palermo paid Ps.0.9 million on September 1, 1999, and the remaining Ps.3.3 million were to be paid on July 5, 2001, or at the time of the opening of the shopping center to be constructed in the building owned by Shopping Neuquén, whichever happened first. As of June 30, 2007, the remaining was paid.

The only asset of Shopping Neuquén is a plot of land of 50,000 square meters approximately, in which IRSA hopes to build a shopping center. On September 20, 2007 the Municipality of Neuquén declared the urban project and environmental impact study are feasible. Shopping Neuquén S.A. has 150 days to submit the work plans from the date of the declaration. See Legal Proceedings Legal issues with the City Hall of Neuquén.

Canteras Natal Crespo, Province of Córdoba. The first guidelines for development of this project are in process on the basis of the Master Plan of the Chilean architect firm called URBE. Also, preliminary presentations have been submitted to the Municipality of La Calera and to the Provincial Government.

This undertaking is characterized by an attractive and varied residential offer of land, dwelling areas of low and medium density, and commercial and social areas. Each one of the quarters will have a full service infra-structure and will be distinguished by the particularities of the land in the outstanding natural environment of the Sierras Chicas of the Province of Córdoba.

Canteras Natal Crespo S.A. is a company located in the Province of Córdoba that will have as main activity the urbanization of own or third parties plots of land, the so-called countries, lots for sale or rent, production of quarries, real estate business and construction of houses.

Table of Contents**Offices and Other Non-shopping Center Leased Properties****Overview**

IRSA is engaged in the acquisition, development and management of offices and other rental properties in Argentina. As of June 30, 2007, IRSA directly and indirectly, owned interests in 24 office and other rental properties in Argentina which comprised 234,320 square meters of gross leaseable area. Of these properties, 17 were office properties which comprised 138,315 square meters of gross leaseable area. For fiscal year 2007, IRSA had revenues from office and non-shopping center leases properties of Ps.55.7 million.

All IRSA's office rental property in Argentina is located in Buenos Aires City. All of these properties are rented to various different premium tenants. For the year ended June 30, 2007 the average occupancy rate for all IRSA's properties in the Offices and other rental property segment was approximately 97.37%. Seven different tenants accounted for approximately 26.75% of IRSA's monthly office rental and 28.91% of IRSA's total revenues for fiscal year 2007 for the same concept. IRSA's seven main office rental tenants are: Grupo Total Austral, Finterbusch Pickenhayn Sibille S.C. (KPMG), Microsoft Argentina S.A., Techint Cia. Tecnica Int. SACeI, Occidental Argentina, Exploration and Production Inc., Marval & O'Farrel and Cisco Systems Argentina S.A.

Management. IRSA generally acts as the managing agent of the office properties in which it owns an interest. These interests consist primarily of the ownership of entire buildings or a substantial number of floors in a building. The buildings in which IRSA owns floors are generally managed pursuant to the terms of a condominium agreement that typically provides for control by a simple majority of the interests (based on the area owned) in the building. As the managing agent of operations, IRSA is responsible for handling services, such as security, maintenance and housekeeping. These services are generally contracted to third party providers. The cost of the services are passed-through and paid for by the tenants, except in the case of IRSA's units not rented, in which case it absorbs the cost. IRSA's leaseable space is marketed through commissioned brokers, the media and directly by IRSA.

Leases. IRSA leases its offices and other properties pursuant to contracts with an average term of three years, with the exception of a few contracts with terms of five years. These contracts are renewable for two or three additional years at the tenant's option. Contracts for the rental of property not located in shopping malls are generally stated in U.S. dollars, and in accordance with Argentine law they are not subject to inflation adjustment. Rental rates for renewed periods are negotiated at market value.

Properties

The following table sets forth certain information regarding IRSA's direct and indirect ownership interest in offices and other non-shopping center leased properties.

Others ⁽⁴⁾	219	285	429

(1) Calculated considering Annual Leases to total leaseable office area, in accordance with IRSA's percentage of ownership in each building.

(2) Lease agreement beginning in the fourth quarter of fiscal year 2005.

Edgar Filing: CRESUD INC - Form 20-F

(3) Lease agreement beginning in the third quarter of fiscal year 2007, consequently income is for only three months.

(4) Includes the following buildings: Madero 942, Av. De Mayo 595, Av. Libertador 602, Sarmiento 517 and Rivadavia 2768.

Properties

Set forth below you will find information regarding IRSA's principal currently owned office properties, including the names of the tenants occupying 5% or more of the gross leasable area of each property.

Intercontinental Plaza, City of Buenos Aires. Intercontinental Plaza is a modern 24-story building located next to the Intercontinental Hotel in the historic neighborhood of Monserrat in

Table of Contents

downtown City of Buenos Aires. IRSA owns the entire building which has floors averaging 900 square meters with 324 parking spaces. The principal tenants currently include Total Austral S.A., Danone Argentina S.A., Occidental Argentina Exploration and Production Inc, IRSA, Alto Palermo and Cresud.

Bouchard 710, City of Buenos Aires. Bouchard 710 is an office building acquired by IRSA in June 2005, located in the Retiro area. The building is a 12-story tower, with an average area per floor of 1,251 square meters, with 180 units for car parking. Tenants are Unilever de Argentina S.A., Finterbusch Pickenhayn Sibille S.C. (KPMG), and Microsoft de Argentina S.A.

Bouchard 551, City of Buenos Aires. Bouchard 551 is a Class A office building IRSA acquired in March 2007, for a total price of US\$84.1 million, located in the Retiro area close to the intersection of the Leandro N. Alem and Córdoba avenues and the Plaza Roma. The building is a 23-story tower covering a surface area of 2,900 square meters in the low floors that becomes smaller as it goes higher up to 900 square meters approximately, and parking for 177 units. Principal lessees include *La Nación* S.A., Price Waterhouse & Co., AS. EM. S.R.L. and Techint Cía. Técnica Internacional S.A.C.e I.

Dock del Plata, City of Buenos Aires. Dock del Plata is a Class A office building IRSA acquired in November 2006, for a total purchase price of US\$8.8 million, located in the Puerto Madero area at Alicia Moreau de Justo 400. The building is 4-story high, with an average surface per plant of 1,500 square meters and parking lot for 309 units. The principal lessees are Veco S.A., Davila 380 S.A., Farmacity S.A., Rosso Alba, Francia y Ruiz Romero, Converse Argentina S.A., AT & T Communications Serv. S.R.L., MCO LEX S.R.L., Garfin Agropecuaria S.A., CA Argentina S.A. and Dell América Latina Corp.

Libertador 498, City of Buenos Aires. Libertador 498 is a 27-story office tower located at the intersection of three of the most important fares thorough of the City of Buenos Aires, making it accessible from the north, west and south of the city. IRSA owns 17 floors with an average area per floor of 620 square meters and 281 parking spaces. The building has a singular cylindrical design and a highly visible circular neon billboard that makes it a landmark in the Buenos Aires skyline. The principal tenants in this building currently include MTV Networks Argentina S.R.L., Epon Argentina S.A., Cervecería y Maltería Quilmes, Yara Argentina S.A., Alfaro Abogados S.C., Julius Baer Financial Consultancy S.A., LG Electronics Argentina S.A., Eastman Chemical Argentina S.R.L., Allergan Productos Farmaceuticos S.A. and Alto Palermo s subsidiary, Tarshop S.A.

Maipú 1300, City of Buenos Aires. Maipú 1300 is a 23-story office tower located on the San Martín Plaza, a prime office zone. The building is also located within walking distance of the Retiro commuter train station, Buenos Aires most important public transportation hub, connecting rail, subway and bus transit. IRSA owns the entire building which has an average area per floor of 440 square meters. The building s principal tenants currently include Allende & Brea, Carlson Wagonlint Travel Argentina S.A. and PPD Argentina S.A.

Laminar Plaza, City of Buenos Aires. Laminar Plaza is a 20-story office building located in Catalinas, the City of Buenos Aires most exclusive office district. Each floor has an average area of 1,453 square meters, including common areas. IRSA owns 5 floors and 66 parking spaces. The main tenants, among others, are as follows: Cisco Systems, Telefónica Mviles de Argentina S.A., Chubb Argentina de Seguros S.A., Hewitt Associates S.A., Apache Petrolera Argentina S.A., Natural Energy S.A. and Bank Hapoalim B.M.

Table of Contents

Madero 1020, City of Buenos Aires. Madero 1020 is a 25-story office tower located in the center of Catalinas, an important office area, with views of the Port of Buenos Aires, the Río de la Plata and the city's downtown area. As of June 30, 2007, IRSA owns a 215-square meter lockup.

Suipacha 652/64, City of Buenos Aires. Suipacha 652/64 is a 7-story office building located in the office district of the City of Buenos Aires. IRSA owns the entire building and 70 parking spaces. The building has unusually large floor, most measuring 1,580 square meters. This property underwent substantial renovations shortly after IRSA acquired the deed in 1991 to prepare the building for rental. The building's principal tenants currently include Gameloft Argentina S.A., Monitor de Medios Publicitarios S.A, Organización de Servicios Director Empresarios (OSDE) and Alto Palermo's subsidiary, Tarshop S.A.

Reconquista 823/41, City of Buenos Aires. Reconquista 823/41 is a 15-story office tower located in the Catalinas area. IRSA owns the entire building which is made up of three basements, space for 52 cars in the car parks, the ground floor and 15 floors of office space. The building has floors with an average area of 540 square meters. As of June 30, 2007, IRSA has an occupancy rate of 100.0%. The building's principal tenants include Marval & O Farrel and Tracker S.R.L.

Edificios Costeros, Dique II, City of Buenos Aires. Costeros A and B are two four-story buildings developed by IRSA and located in the Puerto Madero area. IRSA owns the two buildings which have a gross leasable area of 6,319 square meters. In September 1999 IRSA completed their construction and in April 2000 began to market the office spaces and 147 parking spaces. The main tenants of these properties are as follows: Leo Burnett Worldwide Invest. Inc., Reckitt Benckiser Argentina S.A., Martina Di Trento S.A., Loyalty Marketing Group S.A., Italcred S.A., Minera Agua Rica L.L.C. and Somos Tres S.R.L.

Edificios Costeros, Dique IV, City of Buenos Aires. On August 29, 2001, IRSA signed the deed of purchase of Section C of the office complex known as Puerto del Centro that includes buildings 5 and 6. The property is located in the Puerto Madero area and has approximately 5,500 square meters of gross leasable area and 50 parking spaces. The building's principal tenants currently include Nextel Argentina S.A., Consultora de Estudios Bonaerense S.R.L., London Supply S.A.C.I.F.I., Techint Cía. Técnica Internacional S.A.C.I. and Trafigura Argentina S.A.

Other office properties. IRSA also has interests in three smaller office properties, all of which are located in the City of Buenos Aires. These properties are either entire buildings or portions of buildings, none of which contributed more than Ps.0.8 million in annual rental income for fiscal year 2006. Among these properties are Madero 942, Libertador 602, Av. de Mayo 595, Rivadavia 2768 and Sarmiento 517.

Retail and other properties. IRSA's portfolio of non-shopping center leased properties includes nine non-shopping center leased properties that are leased as street retail, a warehouse, two leased undeveloped plots of land and various other uses. Most of these properties are located in the City of Buenos Aires, although some are located in other cities in Argentina. These properties include Constitución 1111, Edificio Crucero I, Abril commercial stores, Thames and Santa María del Plata.

Hotels

At the end of the 1997 fiscal year, IRSA acquired the Hotel Llao Llao, its first luxury hotel. Some months later, as part of the acquisition from Pérez Companc of the Old Alto Palermo, IRSA acquired an indirect 50% interest in the Hotel Intercontinental in Buenos Aires which IRSA owns through its subsidiary Inversora Bolívar. In March 1998, IRSA acquired the Hotel Libertador.

Table of Contents

During fiscal year 1999, IRSA sold a 20% interest in the Hotel Libertador to Hoteles Sheraton de Argentina S.A., (Hoteles Sheraton de Argentina) and during the fiscal year 2000, IRSA sold 50% of IRSA's interest in the Hotel Llao Llao to the Sutton Group. During fiscal year 2007 IRSA increased its share in Inversora Bolivar by 100% and obtained an indirect share in the Hotel Intercontinental of 76.34%.

The following chart shows certain information regarding IRSA's hotels:

Hotel	Date of Acquisition	IRSA's effective interest	Number of rooms	Average Occupancy % ⁽¹⁾	Average	Sales in Ps.000 as of June 30 of fiscal ⁽³⁾			Book value as of 06/30/07
					price per room Ps. ⁽²⁾	(in thousands Ps.)

- (4) Indirectly owned through Hoteles Argentinos S.A.
- (5) Indirectly owned through Llao Llao Resorts S.A.

Hotel Llao Llao, San Carlos de Bariloche, Province of Rio Negro. In June 1997 IRSA acquired the Hotel Llao Llao from Llao Llao Holding S.A. 50% is currently owned by the Sutton Group. The Hotel Llao Llao is located on the Llao Llao peninsula, 25 kilometers from San Carlos de Bariloche and is one of the most important tourist hotels in Argentina. Surrounded by mountains and lakes, this hotel was designed and built by the famous architect Bustillo in a traditional alpine style and first opened in 1938. The hotel was renovated between 1990 and 1993 and has a total constructed surface area of 15,000 square meters and 158 rooms. The hotel-resort also includes an 18-hole golf course, tennis courts, health club, spa, game room and swimming pool. The hotel is a member of The Leading Hotels of the World, Ltd., a prestigious luxury hospitality organization representing 430 of the world's finest hotels, resorts and spas. The Hotel Llao Llao is currently being managed by Compañía de Servicios Hoteleros S.A. which manages the Alvear Palace Hotel, a luxury hotel located in the Recoleta neighborhood of Buenos Aires.

Currently, the hotel is being expanded at an expected cost of approximately US\$12.7 million. The number of suites in the hotel is being increased to 200 rooms, improvements are being made in the kitchen and laundry room, and a high technology water purifying plant is to be constructed. The first stage of construction is in the final process, and the second stage of the construction, which includes reinforced concrete, masonry and facilities, started in December 2005. As of June 30, 2007, the progress of the works is 70.68% and works are estimated to be completed by the first quarter of fiscal year 2008. 18 rooms have been opened to the public and 25 more are expected to be available by the end of December 2007.

Hotel Intercontinental, City of Buenos Aires. In November 1997, IRSA acquired 51% of the Hotel Intercontinental from the Pérez Companc S.A. The Hotel Intercontinental is located in the downtown City of Buenos Aires neighborhood of Monserrat, adjacent to the Intercontinental Plaza office building. Intercontinental Hotels Corporation, a United States corporation, currently owns 25% of the Hotel Intercontinental. The hotel's meeting facilities include eight meeting rooms, a convention center and a divisible 588 square meter ballroom. Other amenities include a restaurant, a business center, a spa and a fitness facility with swimming pool. The hotel was completed in December 1994 and has 309 rooms. The hotel is managed by the Intercontinental Hotels Corporation.

Table of Contents

Hotel Sheraton Libertador, City of Buenos Aires. In March 1998 IRSA acquired 100% of the Hotel Sheraton Libertador from Citicorp Equity Investment for an aggregate purchase price of US\$23 million. This hotel is located in downtown Buenos Aires. The hotel contains 193 rooms and 7 suites, eight meeting rooms, a restaurant, a business center, a spa and fitness facilities with a swimming pool. In March 1999, IRSA sold 20% of its interest in the Sheraton Libertador Hotel for US\$4.7 million to Hoteles Sheraton de Argentina. The hotel is currently managed by Sheraton Overseas Management Corporation, a United States corporation.

The hotel is currently under renovation. IRSA is upgrading the hotel's guest rooms and meeting rooms, and are soliciting bids for the improvement of its elevators. In addition, IRSA is improving the hotel's corridors and the lobby bar and are replacing the carpets in the main reception area. IRSA currently believes that the total cost of these improvements is likely to be approximately US\$5.0 million works are estimated to be completed by the end of year 2008.

Terreno Bariloche, El Rancho, San Carlos de Bariloche, Province of Río Negro. On December 14, 2006, through IRSA's hotel operator subsidiary, Llao Llao Resorts S.A., IRSA acquired a land covering 129,533 square meters of surface area in the City of San Carlos de Bariloche in the Province of Río Negro. The total price of the transaction was US\$7.0 million, of which US\$4.2 million were paid cash and the balance of US\$2.8 million was financed by means of a mortgage to be paid in 36 monthly, equal and consecutive installments of US\$0.086 million each. The land is in the border of the Lago Gutiérrez, close to the Hotel Llao Llao in an outstanding natural environment and it has a large cottage covering 1,000 square meters of surface area designed by the architect Ezequiel Bustillo.

IRSA's Investment in Banco Hipotecario

IRSA has a significant investment in Banco Hipotecario which represented 7.3% of its consolidated assets as of June 30, 2007. Established in 1886 by the Argentine government and privatized in 1999, Banco Hipotecario has historically been Argentina's leading mortgage lender, provider of mortgage-related insurance and mortgage loan services. All of its operations and customers are located in Argentina where it operates a nationwide network of 33 branches and 47 sales offices.

Banco Hipotecario is a full-service commercial bank offering a wide variety of banking activities and related financial services to individuals, small- and medium-sized companies and large corporations. As of June 30, 2007, Banco Hipotecario ranked second in the Argentine financial system in terms of shareholders' equity, second in terms of net income and ninth in terms of total assets. As of June 30, 2007, Banco Hipotecario's shareholders' equity was Ps.2,711.3 million, its assets were Ps.10,167.6 million, and its net income for the first six months of 2007 was Ps.149.8 million. Since 1999, Banco Hipotecario's shares have been listed on the Buenos Aires Stock Exchange in Argentina, and since 2006 it has had a Level I GDR program.

Banco Hipotecario's business strategy is focused on leveraging its financial position and developing a diversified banking business built on its existing mortgage franchise. Since its debt restructuring in 2004, it began to make progress in this diversification strategy, growing its lending business and developing new business lines, implementing integrated technological solutions to enable its entry into retail banking, extending its marketing network and creating back-office services to support its new operations.

Table of Contents

In 2004, as part of its business diversification strategy, Banco Hipotecario expanded its product offerings and began offering personal loans, resumed mortgage lending and launched asset-backed loans. It expanded its corporate loan product offerings and implemented certain customer loyalty strategies. In response to demand for retail and wholesale time deposits and savings accounts, Banco Hipotecario started offering personal checking accounts and launched the Visa Banco Hipotecario credit card which has steadily grown in terms of market penetration and transaction size. Banco Hipotecario also continued its strategy of expanding the offering of non-mortgage related insurance products it offers, including combined family, life, unemployment, health, personal accident and ATM theft insurance.

As of June 2007, it continued expanding these business lines, as non-financial private sector loans increased to Ps.748.6 million, principally as a result of retail and consumer loan originations which more than doubled compared to June 2006. Commercial loans to the private sector also increased 55.7% during the same period.

Banco Hipotecario seeks to achieve a balanced portfolio of mortgage loans, consumer financing and corporate credit lines, while maintaining an adequate risk management policy. As of June 30, 2007, its portfolio of non-mortgage loans increased to 51.2% of its total loan portfolio compared to 36.9% as of June 30, 2006.

During 2006 and 2007, Banco Hipotecario also experienced continued growth in deposits, including savings accounts and time deposits.

The following table sets forth Banco Hipotecario's sources of funding as of the dates indicated.

	As of December 31,		As of June 30,	
	2005	2006	2007	2007
Checking accounts	Ps. 21.1	Ps. 18.7	Ps. 39.3	
Saving accounts	126.1	165.6	183.9	
Time deposits	358.2	428.6	613.4	
Other deposit accounts	19.2	23.4	27.9	
Accrued interest payable	3.1	3.6	4.1	
Total	Ps. 527.7	Ps. 639.9	Ps. 868.6	
Seasonality				

Mainly IRSA's business unit of "shopping centers" is directly related to the seasonality which affects the level of sales of IRSA's tenants. During the summer holiday season (January and February) IRSA's tenants experience their minimum sales levels, compared to the winter holiday season (July) and December (Christmas) when sales of IRSA's tenants tend to reach their peak. Clothing and footwear tenants tend to change their collections in the spring and fall. This has a positive effect on the sales of stores. Discount sales at the end of each season are also a major source of impact on IRSA's business.

Table of Contents**Competition****Shopping centers**

In the shopping center sector IRSA competes through its subsidiary Alto Palermo. Because most of IRSA's shopping centers are located in developed and highly populated areas, there are competing shopping centers within, or in close proximity to, its targeted areas. The number of shopping centers in a particular area could have a material effect on IRSA's ability to lease space in its shopping centers and on the amount of rent that IRSA is able to charge. IRSA believes that due to the limited availability of large plots of land and zoning restrictions in the City of Buenos Aires, it will be difficult for other companies to compete with IRSA in areas through the development of new shopping center properties. IRSA's principal competitor is Cencosud S.A. which owns and operates Unicenter shopping center and the Jumbo hypermarket chain, among others.

The following chart shows certain information relating to the most important owners and operators of shopping centers in Argentina:

Company	Shopping Center	Location ⁽¹⁾	Leasable gross area	Shops	% Overall national leasable area ⁽²⁾	% Shop ⁽²⁾

(4) Alto Palermo has an effective interest of 54% in ERSA, a company that operates the concession of this building.

(5) Includes total leaseable area occupied by supermarkets and hypermarkets.

Source: Argentine Chamber of Shopping Centers.

Credit Card Operations

The credit card market in Argentina is highly competitive due to (i) the active participation in this market of substantially all international and domestic banks conducting business in Argentina, most of which have substantially greater financial resources than IRSA does and (ii) the strong market position of both Visa and Mastercard in Argentina. IRSA's principal competitors in various segments of the credit card market include:

International and domestic Cards: Visa, Master, AMEX, Cabal, Diners and Carta Franca.

Regional cards: Naranja, Provencred, Efectivo Sí and Credilogros.

Zonal cards: Italcred, Carta Sur, Crédito Actual and Credial.

Closed cards: Falabella, Garbarino, Frávega, Musimundo, Carrefour and Century.

Banks: Columbia, Itaú, Comafi, Privado and others.

International financial companies: GE Capital and Cetelem.

Development and Sale of Properties

A large number of companies are currently competing with IRSA in the development and sale of properties in Argentina. This segment is highly fragmented, and an increasing number of companies are taking advantage of low construction costs and attractive property values, making this segment highly competitive. In addition, there is a substantial supply of comparable properties in the vicinity of IRSA's developed properties which may adversely affect its ability to sell IRSA's developed properties at prices that generate a positive return on its investment.

Offices and Other Non-Shopping Center Rentals

Substantially all of IRSA's office and other non-shopping center rentals are located in developed urban areas. There is a great number of office buildings, shopping malls, retail and residential premises in the areas where IRSA's properties are located. This is a highly fragmented market, and the abundance of comparable properties in IRSA's vicinity may adversely affect its ability to rent or sell office space and other real estate and may affect the sale and lease price of IRSA's premises.

In the future, both national and foreign companies may participate in Argentina's real estate development market, competing with IRSA for business opportunities. Moreover, in the future IRSA may participate in the development of real estate in foreign markets, potentially encountering well established competitors.

Table of Contents

Hotels

IRSA owns three luxury hotels in Argentina which are managed through strategic alliances by international operators including Sheraton Overseas Management Corporation, Intercontinental Hotels Corporation and the local operator Compañía de Servicios Hoteleros S.A. which manages the Hotel Alvear. The Hotel Llao Llao is unique for its landscape and beauty, and IRSA's other two hotels, Hotel Intercontinental and Hotel Sheraton Libertador, are located in the City of Buenos Aires. IRSA competes with many other leading luxury hotels in the City of Buenos Aires including, among others: Abasto Plaza, Alvear Palace, Caesar Park, Claridge, Emperador, Feirs Park, Four Seasons, Hilton, Loi Suites, Marriot Plaza, Meliá, NH City, Panamericano, Sheraton, Sofitel, Madero, MayFlower, Etoile, Faena, and Regal Pacific.

Regulation and Government Supervision

The laws and regulations governing the acquisition and transfer of real estate, as well as municipal zoning ordinances, are applicable to the development and operation of IRSA's properties.

Currently, Argentine law does not specifically regulate shopping center lease agreements. Since IRSA's shopping center leases generally differ from ordinary commercial leases, IRSA has created standard provisions that govern the relationship with its shopping center tenants.

Leases

Argentine law imposes certain restrictions on landlords, including:

a prohibition to include price adjustment clauses based on inflation increases in lease agreements; and

the imposition of a three-year minimum lease term for retail property, except in the case of stands and/or spaces in markets and fairs. Although IRSA's lease agreements were U.S. dollar-denominated, Decree No. 214/2002, Decree No. 762/2002 and Law N° 25,820 that amended the Public Emergency Law, provided that monetary obligations in force as of January 7, 2002 arising from agreements governed by private law and which provided for payments in U.S. dollars were subject to the following rules:

financial obligations were to be paid in Pesos at the exchange rate of Ps.1.00 = US\$1.00 plus the CER for commercial leases;

from October 1, 2002 and until March 31, 2004 for residential leases, the obligations where the tenant is an individual and the dwelling is used as the family residence of permanent use were to be paid in Pesos at the exchange rate of Ps.1.00 = US\$1.00 plus the CVS;

if because of the application of these provisions, the amount of the installment were higher or lower than the amount at the moment of the payment, any of the parties could require an equitable adjustment of the price. If the parties did not reach an agreement, the judicial courts could decide about the difference in each particular case; and

pursuant to Decree No. 117/2004 and Law No. 25,796 that amends Law No. 25,713, the CVS became unenforceable since April 1, 2004.

Under the Argentine Civil Code and the Lease Law No. 23,091, lease terms may not exceed ten years, except for leases regulated by Law No. 25,248 (which provides that real estate leases containing purchase options - *leasing inmobiliario*- are not subject to term limitations). Generally, terms in IRSA's lease agreements go from 3 to 10 years.

Table of Contents

Lease Law No. 23,091, as amended by Law No. 24,808 provides that tenants may rescind commercial lease agreements after the first six months by sending a written notice at least 60 days before the termination of the contract. Such rescission is subject to penalties which range from one to one and a half months of rent. If the tenant rescinds during the first year of the lease the penalty is one and a half month's rent and if the rescission occurs after the first year of lease the penalty is one month's rent.

While current Argentine government policy discourages government regulation of lease agreements, there can be no assurance that additional regulations will not be imposed in the future by the Argentine Congress, including regulations similar to those previously in place. Furthermore, most of IRSA's leases provide that the tenants pay all costs and taxes related to the property in proportion to their respective leasable areas. In the event of a significant increase in the amount of such costs and taxes, the Argentine government may respond to political pressure to intervene by regulating this practice, thereby negatively affecting IRSA's rental income. On August 16, 2006, economy minister Felisa Miceli announced a loosening of requirements on mortgage loans up to Ps.300,000. Banks were enabled to finance 100 percent of house purchases on property valued at up to Ps.200,000 and 90 percent of purchases of property worth up to Ps.300,000. The duration of these loans will be up to 30 years. These measures were taken in response to the escalating cost of leases and the difficulties in accessing the mortgage loan market. These measures became effective in September, 2006.

The Argentine Civil and Commercial Procedure Code enables the lessor to pursue what is known as an executory proceeding where lessees fail to pay rent. In executory proceedings debtors have fewer defenses available to prevent foreclosure, making these proceedings substantially shorter than ordinary ones. In executory proceedings the origin of the debt is not under discussion; the trial focuses on the instrument of the debt itself. The aforementioned code also permits special eviction proceedings, which are carried out in the same way as ordinary proceedings. The Argentine Civil Code enables judges to summon tenants who fall two months in arrears to vacate the property they are renting within 10 days of having received notice to such effect. However, historically, large court dockets and numerous procedural hurdles have resulted in significant delays to evictions proceedings, which generally last from six months to two years from the date of filing of the suit to the time of actual eviction.

On February 4, 2003, the Argentine government enacted Decree No. 204/2003 establishing a mediation procedure for a limited period of 90 days. On May 2003, the Argentine Congress enacted Law No. 25,737 which suspended foreclosures for an additional period of 90 days, which ended in May 2003. On September 2003, several financial institutions voluntarily agreed not to foreclose on their mortgage loans. On November 2005, the Argentine congress enacted Law No. 26,062 that extended the foreclosures suspension for an additional 120 days period, which was extended for 90 days more by Law No. 26,084 and for 180 days more by Law No. 26,103. Pursuant to these successive extensions, foreclosure on mortgaged property will be suspended until December 2006.

On November 6, 2003 Law No. 25,798 was enacted. It established a mechanism to reschedule debts resulting from unpaid mortgages, by creating a trust by means of which the Executive Branch will refinance the mortgage debts and reschedule the maturity date. Financial institutions were given until a period of 60 business days from the enactment of the law to accept said terms. This law was partially modified by Law No. 25,908 (enacted on July 13, 2004) which

Table of Contents

included various conditions referring to the incorporation into this system of the mortgage loans that were in judicial or private execution proceedings. The parties to secured loan agreements were given a term to express their adhesion System. The term for financial institutions to accept the mechanism was extended in several occasions by Decree No. 352/2004, Law No. 26,062, Decree No. 352/2004, Law No. 26,062, Law No. 26,084 and Law No. 26,103.

This term was however extended twice first by Decree No. 352/2004 and then by Law No. 26,062 effective as of November 4, 2005. The above mentioned law extends the term 120 days as of the day of its publication and suspends foreclosure proceedings for an additional 120 days period. In addition, Law No. 26,103 extended the duration of these measures to 180 days from the expiration of the extension established by Law 26,062. Recently enacted Law No. 26,167 established a special proceeding to replace ordinary trials for the enforcement of some mortgage loans. Such special proceedings give creditors ten days to inform to the debtor the amounts owed to them and thereafter agree with the debtor on the amount and terms of payment. In case of failure by the parties to reach an agreement, payment conditions are to be determined by the judge.

Development and Land Use

Buenos Aires Urban Planning Code. IRSA's real estate activities are subject to several municipal zoning, building and environmental regulations. In the city of Buenos Aires, where the vast majority of IRSA's real estate properties are located, the Buenos Aires Urban Planning Code (*Código de Planeamiento Urbano de la Ciudad de Buenos Aires*) generally restricts the density and use of property and controls physical features of improvements on property, such as height, design, set-back and overhang, consistent with the city's urban landscape policy. The administrative agency in charge of the Urban Planning Code is the Secretary of Urban Planning of the City of Buenos Aires.

Buenos Aires Building Code. The Buenos Aires Building Code (*Código de la Edificación de la Ciudad de Buenos Aires*) complements the Buenos Aires Urban Planning Code and regulates the structural use and development of property in the city of Buenos Aires. The Buenos Aires Building Code requires builders and developers to file applications for building permits, including the submission to the Secretary of Work and Public Services (*Secretaría de Obras y Servicios Públicos*) of architectural plans for review, to assure compliance therewith.

IRSA believes that all of its real estate properties are in material compliance with all relevant laws, ordinances and regulations.

Sales and Ownership

Real Estate Installment Sales Law. The Real Estate Installment Sales Law No. 14,005, as amended by Law No. 23,266 and Decree No. 2015/1985, imposes a series of requirements on contracts for the sale of subdivided plots of land regarding, for example, the sale price which is paid in installments and the deed, which is not conveyed until final payment. The provisions of this law require, among other things:

the registration of the intention to sell the property in subdivided plots in the Real Estate Registry (*Registro de la Propiedad Inmueble*) corresponding to the jurisdiction of the property. Registration will only be possible with regards to unencumbered property. Mortgaged property may only be registered where creditors agree to divide the debt in accordance with the subdivided plots. However, creditors may be judicially compelled to agree to the division.

Table of Contents

the preliminary registration with the Real Estate Registry of the purchase instrument within 30 days of execution of the agreements. Once the property is registered, the installment sale may not occur in a manner inconsistent with the Real Estate Installment Sales Act, unless seller registers his decision to desist from the sale in installments with the Real Estate Registry. In the event of a dispute over the title between the purchaser and third-party creditors of the seller, the installment purchaser who has duly registered the purchase instrument will obtain the deed to the plot. Further, the purchaser can demand conveyance of title after at least 25% of the purchase price has been paid, although the seller may demand a mortgage to secure payment of the balance of the purchase price.

After payment of 25% of the purchase price or the construction of improvements on the property equal to at least 50% of the property value, the Real Estate Installment Sales Act prohibits the rescission of the sales contract for failure by the purchaser to pay the balance of the purchase price. However, in such event the seller may take action under any mortgage on the property.

Consumer Protection Law No. 24,240, as amended, regulates several issues concerning the protection of consumers in the arrangement and execution of contracts. The Consumer Protection Law purports to prevent potential abuses deriving from the strong bargaining position of sellers of goods and services in a mass-market economy where standard form contracts are widespread. As a result, the Consumer Protection Law deems void and unenforceable certain contractual provisions in consumer contracts, including those which:

warranty and liability disclaimers;

waiver of consumer rights;

extension of seller rights; and

shifting of the burden of proof against consumers.

In addition, the Consumer Protection Law imposes penalties ranging from fines to closing down of establishments in order to induce compliance from sellers.

The Consumer Protection Law defines consumers or users, as the individuals or legal entities that contract for a price for final use or that of their own benefit or their family or social group:

the acquisition or rental of movable property;

the supply of services; and

the acquisition of new real estate intended for housing, including plots of land acquired with the same purpose, when the offer is public and directed to undetermined persons.

It also establishes that those who acquire, store, utilize or consume goods or services to integrate them into a production, transformation, commercialization or supplying to third parties process will not be considered consumers or users.

Table of Contents

In addition, the Consumer Protection Law defines the suppliers of goods and services as the individuals or legal entities, either public or private that in a professional way, even occasionally, produce, import, distribute or commercialize goods or supply services to consumers or users.

The following are excluded from the application of the Consumer Protection Law:

services supplied by professionals that require a college degree and registration in officially recognized professional organizations or by a governmental authority; and

contracts involving used assets, executed between consumers.

The Consumer Protection Law determines that the information contained in the offer addressed to undetermined prospective consumers, binds the offeror during the period in which the offer takes place and until its public revocation. Further, it determines that specifications included in advertisements, announcements, prospectuses, circulars or other media bind the offeror and are considered part of the contract entered into by the consumer. On June 2005, Resolution No. 104/05, which complements the Consumer Protection Law, adopted MERCOSUR's Resolution on which requires that those who engage in commerce over the Internet (E-Business) to disclose in a precise and clear manner the characteristics of the products and/or services offered and the sale terms.

Buildings Law. Buildings Law No. 19,724, as amended, sets forth a regime for the construction of buildings for later subdivision into condominium (*Propiedad Horizontal*). Under this law, developers must inform potential purchasers of their intention to sell the building as a condominium, as well as of all sale conditions, and the size of each unit in relation to the whole building. The sale of these units is subject to subdivision approval and in order to be included in Buildings Law regime must be registered with the Real Estate Registry (*Registro de la Propiedad Inmueble*). This law also states that, in the event that construction is not completed, all amounts already deposited must be repaid to the purchasers.

Mortgage Regulation. The Argentine Civil Code regulates mortgages both as a contract and as a right over property. There are no special provisions in the Civil Code aimed at protecting mortgagors. Any agreement entered into by a mortgagor and a mortgagee at time of execution of the mortgage or prior to the default of the mortgagor allowing the mortgagee to recover the property without a public auction of the property will not be enforced by the courts as contrary to Argentine public policy.

Until the enactment of Trust Law No. 24,441, the only procedure available to collect unpaid amounts secured by a mortgage was a proceeding regulated by the Civil and Commercial Procedure Code. The heavy caseload on the courts that hear such matters usually delays the proceeding, which currently takes 1 to 2 years to complete.

Chapter V of Trust Law No. 24,441 institutes a new procedure which may expedite collection of unpaid amounts secured by a mortgage. To be applicable, the new rules, which allow an out-of-court auction, need to be expressly agreed to by the parties in the mortgage contract.

Currently, IRSA includes in its mortgages a clause enabling the enforcement of Law No. 24,441. However, there can be no assurance that such collection provisions will accelerate the recovery of unpaid amounts under mortgage guarantees.

Table of Contents

On the other hand, the Public Emergency Law, as amended, established the suspension for the term of 270 days from the enactment of that law, of all the judicial or non-judicial enforcement procedures, including the enforcement of mortgages and pledges, regardless of their origin. On February 14, 2002, Law No. 25,563 amending the Bankruptcy Law (the New Bankruptcy Law) was enacted. Under the New Bankruptcy Law, certain bankruptcies and foreclosures (including foreclosures on mortgage loans) were suspended for a period of 180 days from the law's effective date. Such period was extended for 90 days more by Law No. 25,640 dated September 2002, expiring on February, 2003.

On February 4, 2003, the Executive Branch enacted Decree No. 204/2003 creating a mediation proceeding, for a limited period of 90 days, to be conducted through the Legal Emergency Units (*Unidades de Emergencias Legales*) depending from the Ministry of Labor, Employment and Social Security and the Ministry of Production. Such Legal Emergency Units shall intervene at the request of debtors or creditors in foreclosure cases.

The mediation proceeding is voluntary and free. Proposals and negotiations made by the parties during the mediation proceedings are subject to the confidentiality of ordinary mediations. No mediation proceeding will result in the suspension or interruption of the legal terms running in judicial or out-of-court foreclosure proceedings.

The Legal Emergency Units will attempt to facilitate an agreement between the parties, enabling the debtor the performance of his obligations without lessening the creditor's rights. The intervention of the Legal Emergency Units shall conclude with an agreement or with the impossibility of reaching such agreement. The Decree establishes that the conciliation proceeding shall be in force from the day of its publication in the *Official Gazette* and will have a term of force of 90 days.

Most mortgages executed by IRSA provide that it is empowered to declare the anticipated expiration of the loan upon non-payment of an installment. This enables IRSA to recover the unpaid amounts through the sale of the relevant property pursuant to the Civil and Commercial Procedure Code and Law No. 24,441.

Pursuant to Argentine law, fees and expenses related to collection procedures must be borne by the debtor, and the proceeds from any auction of the property may be used for the settlement of such obligation.

Although IRSA's mortgages are U.S. dollar-denominated, Decree No. 214/2002 and Decree No. 762/2002 that amend the Public Emergency Law provide that monetary obligations in force as of January 7, 2002, resulting from agreements governed by private law and which provide for payments in U.S. dollars are subject to the following rules:

financial obligations were to be paid in Pesos at the exchange rate of Ps.1.00 = US\$1.00 plus the CER for commercial leases;

from October 1, 2002 and until March 31, 2004 for residential leases, the obligations where the tenant is an individual and the dwelling is used as the family residence of permanent use were to be paid in Pesos at the exchange rate of Ps.1.00 = US\$1.00 plus the CVS;

if because of the application of these provisions, the amount of the installment were higher or lower than the amount at the moment of the payment, any of the parties could require an equitable adjustment of the price. If the parties did not reach an agreement, the judicial courts could decide about the difference in each particular case; and

Table of Contents

pursuant to Decree No. 117/2004 and Law No. 25,796 that amends Law No. 25,713, the CVS became unenforceable since April 1, 2004.

Protection for the Disabled Law. The Protection for the Disabled Law No. 22,431, enacted on March 20, 1981, as amended, provides that in connection with the construction and renovation of buildings, obstructions to access must be eliminated in order to enable access by handicapped individuals. In the construction of public buildings, entrances, transit pathways and adequate facilities for mobility impaired individuals must be provided.

Buildings constructed before the enforcement of the Protection for the Disabled Law must be adapted to provide accesses, transit pathways and adequate facilities for mobility-impaired individuals. Those pre-existing buildings, which due to their architectural design may not be adapted to the use by mobility-impaired individuals, are exempted from the fulfillment of these requirements. The Protection for the Disabled Law provides that residential buildings must ensure access by mobility impaired individuals to elevators and aisles.

Credit Cards Law. Law No. 25,065, amended by Law No. 26,010, regulates different aspects of the business known as credit card system. The regulations impose minimum contractual contents and the approval thereof by the Industry, Commerce and Mining Secretary (*Secretaría de Industria, Comercio y Minería de la Nación*), as well as the limitations on the interest to be collected by users and the commissions to the stores adhering to the system. The Credit Card Law applies to banking and non-banking cards, such as Tarjeta Shopping, issued by Tarshop S.A.

Antitrust Law. Law No. 25,156 prevents trust practices and requires administrative authorization for transactions that according to the Antitrust Law constitute an economic concentration. According to this law, mergers, transfers of goodwill, acquisitions of property or rights over shares, capital or other convertible securities, or similar operations by which the acquirer controls or substantially influences a company, are considered as an economic concentration. Whenever an economic concentration involves a company or companies (i) which hold 25% or more of the relevant market or (ii) which exceed the accumulated sales volume by approximately Ps.200.0 million in Argentina or Ps.2,500 million worldwide; then the respective concentration should be submitted for approval to the *Comisión Nacional de Defensa de la Competencia*, or Antitrust Authority. The request for approval may be filed, either prior to the transaction or within a week after its completion.

The Antitrust Law provides that economic concentrations in which the transaction amount and the value of the assets absorbed, acquired, transferred or controlled in Argentina, do not exceed Ps.20.0 million are exempted from the administrative authorization. Notwithstanding the foregoing, when the transactions effected during the prior 12-month period exceed in total Ps.20.0 million or Ps.60.0 million in the last 36 months, these transactions must be notified to the Antitrust Authority. As the consolidated annual sales volume of Alto Palermo and IRSA exceed Ps.200.0 million, IRSA should give notice to the Antitrust Authority of any concentration provided for by the Antitrust Law. After IRSA's acquisition of Bouchard 557, IRSA asked the Argentine Antitrust Authority whether it was necessary to notify it of such acquisition. The Antitrust Authority advised IRSA that IRSA was in fact required to so notify it, and IRSA challenged such opinion in the local courts. IRSA filed a new request for the Antitrust Authority's opinion regarding IRSA's acquisition of Bank Boston Tower on August 30, 2007, and it advised IRSA that IRSA was in fact required to so notify it, and IRSA challenged such opinion in the local courts.

Table of Contents**Organizational Structure**

The following table presents information relating to IRSA's ownership interest and the percentage of IRSA's consolidated total net revenues represented by IRSA's subsidiaries as of June 30, 2007.

Subsidiary	Activity	Country of Incorporation	Ownership percentage ⁽¹⁾	Voting power percentage ⁽¹⁾	Total net income percentage
Ritelco S.A.	Investment	Uruguay	100%	100%	0.0%
Patagonian Investment S.A.	Investment	Argentina	100%	100%	0.0%
Palermo Invest S.A.	Investment	Argentina	100%	100%	0.0%
Rummaala S.A.	Real estate	Argentina	100%	100%	0.0%
Solares de Santa María S.A.	Real estate	Argentina	90%	90%	0.01%
CYRSA	Real estate	Argentina	100%	100%	0.0%
Pereiraola S.A.	Real estate	Argentina	100%	100%	0.0%
Inversora Bolivar S.A. ⁽⁴⁾	Real estate	Argentina	100%	100%	7.75%
Hoteles Argentinos S.A.	Hotel	Argentina	80%	80%	3.97%
Llao Llao Resorts S.A.	Hotel	Argentina	50%	50%	6.51%
Alto Palermo S.A. ⁽²⁾	Shopping Centers	Argentina	62.48%	62.48%	65.41%
Canteras Natal Crespo S.A. ⁽³⁾	Real estate	Argentina	50%	50%	0.01%

(1) It does not contemplate irrevocable contributions.

(2) Alto Palermo's Consolidated Information.

(3) IRSA has joint control of Canteras Natal Crespo S.A., a land reserve for a future development, with ECIPSA. See Note 2.6 to IRSA's audited consolidated financial statements.

(4) Percentage of total net income based upon Inversora Bolivar's consolidated results which include those of Nuevas Fronteras S.A. IRSA has a significant interest in Banco Hipotecario, an Argentine company organized under Argentine Law engaged in banking activity. As of June 30, 2007, IRSA owned 11.76% of Banco Hipotecario, and 5.0% of such ownership was through IRSA's subsidiary Ritelco S.A. Also, as of June 30, 2007, the voting power held by IRSA and Ritelco S.A. in Banco Hipotecario was 18.4%.

Table of Contents

The following is IRSA's organizational chart and principal subsidiaries as of June 30, 2007:

Table of Contents**Employees**

As of June 30, 2007, IRSA had 3,298 employees. IRSA's employees are not represented by any union other than its hotel workers who are members of Unión de Trabajadores del Turismo, Hoteleros y Gastronómicos de la República Argentina (UTHGRA). IRSA has not experienced a strike or significant work stoppage in the last ten years and believe that its relations with its employees are good.

The following table sets forth the number of employees in IRSA's various businesses at the dates indicated:

Date	Argentine Real Estate(1)	Shopping Centers(2)	Hotels(3)	Telecommunication(4)	Credit Cards(5)	Total
As of June 30, 2003	140	605	628	51	222	1,646
As of June 30, 2004	129	681	688	51	390	1,939
As of June 30, 2005	154	872	861	75	556	2,518
As of June 30, 2006	185	966	1,024	0	979	3,154
As of June 30, 2007	228	983	785	0	1,302	3,298

(1) Argentine Real Estate includes IRSA, Inversora Bolívar, Baldovinos, Madero, Libertador 498.

(2) Starting June 2000, Shopping Centers includes Altocity (e-commerce) and does not include Mendoza Plaza prior to fiscal year 2005.

(3) Hotels include Intercontinental, Sheraton, Libertador and Llao Llao.

(4) Telecommunications include Red Alternativa and Alternativa Gratis.

(5) Credit cards include Tarshop.

Property

As of June 30, 2007, all of IRSA's property (consisting of rental properties in the office and retail real estate sectors, development properties primarily in the residential real estate sector, and shopping centers) was located in Argentina. IRSA leases its headquarters, located at Bolívar 108, C1066AAD and Moreno 877, piso 22, C1091AAQ Buenos Aires, Argentina, pursuant to two lease agreements that expire on February 28, 2014 and November 30, 2008, respectively. IRSA does not currently lease any material properties other than its headquarters.

The following table sets forth certain information about IRSA's properties:

(1) Total leaseable area for each property. Excludes common areas and parking spaces.

(2) Cost of acquisition or development (adjusted as discussed in Note 2.c to the consolidated financial statements), plus improvements, less accumulated depreciation, less allowances.

(3) Through IBSA.

(4) Through Alto Palermo. IRSA owns a 54% interest in ERSA. Currently IRSA's shares of Emprendimiento Recoleta S.A. are pledged.

Edgar Filing: CRESUD INC - Form 20-F

- (5) Shopping Alto Palermo (SAPSA) is owned by Alto Palermo. On January 18, 2001, (i) Alto Palermo issued Series A Senior Notes for US\$40 million and (ii) Alto Palermo and SAPSA co-issued Series B Senior Notes for US\$80 million that will be severally paid by Alto Palermo and SAPSA. The Series A and B Senior Notes (the Senior Notes) are due in 2005. The payment of the total amount of the Senior Notes is guaranteed by a Trust Agreement pursuant to which all of Alto Palermo s shares of SAPSA were transferred to a trust. The Trust Agreement was entered into on January 16, 2001 between Alto Palermo and Ritelco, as shareholders of SAPSA and as Trustors, Río Trust S.A., as Trustee, and the holders of the Senior Notes as beneficiaries. At June 30, 2005, IRSA fully cancelled the Senior Notes outstanding.
- (6) Directly through IRSA and indirectly through IBSA.
- (7) Includes the following land reserves: Terrenos Pilar, Padilla 902 and Terreno Torre Jardín IV (through IRSA), Terreno Pontevedra; Isla Sirgadero; Mariano Acosta, Intercontinental Plaza II and Merlo (through IBSA), and Terreno Rosario, Terreno Caballito and the Coto project (through Alto Palermo).
- (8) As security for compliance with the construction of the future building to be constructed in a plot of land in Vicente Lopez, Province of Buenos Aires and transfer of the future units, the company s property located at Suipacha 652 was mortgaged.
- (9) Right over real property granted by a debtor to a creditor whereby the creditor is authorized to receive the income from such property to cancel interest and/or principal under existing debt.

Table of Contents

- (10) Includes the following properties: retail stores in Abril (through IRSA and Inversora Bolivar) and Crucero I (through IRSA).
- (11) Includes the following properties: Torre Jardín, Edificios Cruceros; Barrio Chico, Concepción Arenal, Torre Caballito, Torre Renoir I and II, Lotes de Abril, Villa Celina I, II and III; Rivadavia 2768, Dock XIII and Sarmiento 517 (through IRSA).
- (12) All assets are owned by IRSA or through any IRSA's subsidiary.
- (13) Percentage of occupation of each property. The land reserves are assets that the company remains in the portfolio for future development. On October 29, 2007 IRSA paid US\$ 24.3 million of principal and US\$ 0.35 million of accrued interest of its secured floating rate notes due November 2009 and US\$ 14.95 million of principal and US\$ 0.21 million of accrued interest of its unsecured loan agreement. The payment of such debt produced the cancellation of the mortgages that IRSA had in connection with the issuance of the collateralized notes (13 functional units at Libertador 498, 71 complementary units in Laminar Plaza and 19 complementary units in Dique IV).

Insurance

IRSA carries insurance policies with insurance companies it considers to be financially sound. IRSA employs multi-risk insurance for its shopping centers, which covers fire damage and negligence liability, electrical and water damages, theft and business interruption. IRSA has to make a limited number of claims under IRSA's shopping centers' insurance, including a claim for a fire at Alto Avellaneda Shopping on March 5, 2006 and to date IRSA has been able to recover substantially all of those claims from its insurers.

In IRSA's Development and Sale of properties segment, it only maintains insurance when it retains ownership of the land under development or when it develops the property itself. IRSA's liability and fire insurance policies cover potential risks such as property damages, business interruption, fire, falls, collapse, lightning and gas explosion. Such insurance policies have specifications, limits and deductibles which IRSA believes are customary. IRSA maintains insurance policies for its properties after the end of construction only if it retains ownership, primarily in the Offices and Other Non-Shopping Center Rental Properties segment.

IRSA carries directors and officers' insurance covering management's civil liability, as well as legally mandated insurance, including employee personal injury. IRSA does not provide life or disability insurance for its key employees as benefits. IRSA believes its insurance policies are adequate to protect it against the risks for which it is covered. However, no assurances can be given that the amount of insurance IRSA carries will be sufficient to protect it from material loss. See Risk Factors Risks Related to IRSA's Business Some potential losses are not covered by insurance, and certain kinds of insurance coverage may become prohibitively expensive.

Table of Contents**C. ORGANIZATIONAL STRUCTURE****Subsidiaries and Affiliated Companies**

The following table includes a description of our subsidiaries and affiliated companies, all of which are organized under the laws of Argentina, as of June 30, 2007:

Subsidiaries	Effective Ownership and Voting Power Percentage	Property/Activity
Inversiones Ganaderas S.A.	99.99%	This company owns two farms located in the Province of Catamarca: Tali Sumaj and El Recreo .
Agropecuaria Cervera S.A.	99.99%	This company has the concession for the start-up of production pertaining to a comprehensive biological, economic and social development project in various properties located in the Department of Anta, in the Province of Salta, and it is duly authorized to implement a large-scale project covering agricultural, cattle breeding and forestry activities.
Cactus Argentina S.A.	24.00%	This company represents our strategic alliance with Cactus Feeders Inc. and Tyson Foods Inc. for feed lot production. It owns a 170-hectare farm located in the district of Villa Mercedes in the Province of San Luis. It will have the capacity to support 75,000 head of beef cattle per year, in cycles of approximately 28,000 head each.
Agro-Uranga S.A.	35.72%	An agriculture, dairy and beef cattle company which owns two farms (Las Playas and San Nicolás) covering 8,299 hectares in the provinces of Santa Fe and Córdoba, and approximately 1,642 beef cattle head.
Futuros y Opciones.Com S.A.	70.00%	A leading agricultural web site which provides information about markets and services of economic and financial consulting through the Internet. The company has begun to expand the range of commercial services offered to the agricultural sector by developing direct sales of supplies, grain brokerage services and beef cattle operations.
IRSA Inversiones y Representaciones Sociedad Anónima	25.01%	It is a leading Argentine company devoted to the development and management of real estate.(1)
BrasilAgro Companhia Brasileira de Propiedades Agrícolas	7.40%	BrasilAgro is mainly involved in four areas: sugar cane, grains and cotton, forestry activities, and livestock.
Exportaciones Agroindustriales Argentinas S.A.	0.57%	Exportaciones Agroindustriales Argentinas S.A. (EAASA) a company that owns a cold storage plant in Santa Rosa, Province of La Pampa, with capacity to slaughter and process approximately 9,500 cattle head per month.

- (1) As a result of these exercises and conversions, our investment in IRSA s common shares increased from 25.01% on June 30, 2007 to 34.4% on November 30, 2007.

Table of Contents**D. PROPERTY, PLANT AND EQUIPMENT****Overview of Properties**

The following table sets forth our properties size (in hectares), primary current use and book value. The market value of farmland is generally higher the closer a farm is located to Buenos Aires:

	Province	Gross Size (in hectares)	Date of Acquisition	Primary Current Use	Owned Farms at June 30, 2007	
					Net carrying value (Ps. millions) ⁽¹⁾	Encumbrances (Ps. million)
La Adela	Buenos Aires	1,054	Original	Crop	8.5	
La Juanita	Buenos Aires	4,302	Jan. 96	Crop/Milk	14.1	
San Pedro	Entre Ríos	6,022	Sep. 05	Crop/Beef Cattle	46.4	Mortgage 4.5
Las Vertientes	Córdoba	4		Silo	0.7	
La Esmeralda	Santa Fe	11,841	Jun. 98	Crop/Beef Cattle	12.9	
La Suiza	Chaco	41,993	Jun. 98	Beef Cattle	28.5	
Santa Bárbara / Gramilla	San Luis	7,052	Nov. 97	Crops under irrigation	19.5	
Cactu ⁽²⁾	San Luis	41	Dec. 97	Feed lot	0.7	
Tali Sumaj / El Recreo	Catamarca	26,922	May. 95	Beef Cattle/ Natural Woodlands	5.7	
Los Pozos	Salta	247,484	May 95	Beef Cattle/Crop/Natural Woodlands	38.5	
El Invierno	La Pampa	1,946	Jun. 05	Crop	9.2	
San Nicolás / Las Playas	Sta.Fe/Cba.	2,965	May. 97	Crop/Beef Cattle	12.8	
El Tigre	La Pampa	8,365	Apr. 03	Crop/Milk	33.8	
8 de Julio	Santa Cruz	90,000	May. 07	Natural Woodlands/Sheep production	7.8	
Total		449,991			239.1	

(1) Acquisition costs plus improvements and furniture necessary for the production, less depreciation.

(2) Hectares and carrying amount in proportion to our 24.0% interest in Cactus Argentina S.A.

(3) Hectares and carrying amount in proportion to our 99.99% interest in Inversiones Ganaderas S.A.

(4) Hectares and carrying amount in proportion to our 35.723% interest in Agro-Uranga S.A.

Item 4 A. Unresolved Staff Comments.

This section is not applicable.

Item 5. Operating financial review and prospects

A. CONSOLIDATED OPERATING RESULTS

The following management's discussion and analysis of our financial condition and results of operations should be read together with Selected Consolidated Financial Data and our consolidated financial statements and related notes appearing elsewhere in this annual report. This discussion and analysis contains forward-looking statements that involve risks, uncertainties and assumptions. These forward-looking statements include such words as, expects, anticipates, intends, believes and similar language. Our actual results may differ materially and adversely from those anticipated in these forward-looking statements as a result of many factors, including without limitation those set forth elsewhere in this annual report.

Table of Contents

For purposes of the following discussion, unless otherwise specified, references to fiscal years 2005, 2006 and 2007 relate to the fiscal years ended June 30, 2005, 2006 and 2007, respectively.

We maintain our financial books and records in Pesos. We prepare our consolidated financial statements in conformity with Argentine GAAP and the regulations of the *Comisión Nacional de Valores* which differ in significant respects from U.S. GAAP. These differences involve methods of measuring the amounts shown in the financial statements as well as additional disclosures required by U.S. GAAP and Regulation S-X of the SEC. See Note 17 to our audited consolidated financial statements set forth elsewhere herein for a description of the principal differences between Argentine GAAP and U.S. GAAP, as they relate to us, and a reconciliation to U.S. GAAP of our net income and shareholders' equity.

In order to comply with *Comisión Nacional de Valores* regulations, we discontinued inflation accounting as of March 1, 2003, and we recognized deferred income tax assets and liabilities on a non-discounted basis. These accounting practices represent departures from Argentine GAAP. However, we believe that such departures have not had a material effect on our financial statements.

Effects of Devaluation and Economic Crisis

All of our assets are located and our operations are performed in Argentina. Accordingly, our financial condition and results of operations depend substantially upon economic conditions prevailing in Argentina. Due to the four-year-old recession ended on the second quarter of 2002, the Argentine economy has deteriorated sharply. However, during 2003, certain signs of economic recovery appeared and have continued from 2004 through 2007.

In the fourth quarter of 1998, the Argentine economy entered into a recession that caused the gross domestic product to decrease in real terms by 3.4% in 1999, 0.8% in 2000 and 4.4% in 2001. During the second half of 2001, Argentina's recession worsened significantly, precipitating a serious political and economic crisis. During 2002, the gross domestic product decreased 10.9% compared to 2001, and during the first three quarters of 2003, the gross domestic product increased 7.3%. In 2003, the economy began to recover, closing the year with year on year growth of 11.7%. Exceeding growth expectations, in 2004 the GDP increased 9.0% in comparison with 2003 and during 2005 the economy also expanded strongly at a rate of 9.2%.

On December 23, 2001, President Adolfo Rodríguez Saá declared the suspension of the payment of foreign debt and later President Eduardo Duhalde ratified his decision. On January 6, 2002, the Congress enacted the Public Emergency Law which repeals several provisions of the Convertibility Law which prevailed in Argentina for 10 years, and the executive branch announced the devaluation of the Peso and the establishment of a dual exchange rate system in which certain limited transactions will occur at a fixed rate of Ps.1.4 to US\$1.0 and all other transactions will be settled at a floating market rate depending on supply and demand. This new legislation had a material adverse effect on our financial position and the results of our operations in fiscal year 2002 mainly through its effects in IRSA, which was partially offset during fiscal year 2004, 2005 and 2006.

During fiscal year 2005, the Government of President Néstor Kirchner submitted a proposal to creditors to continue the payments of external debt. The official offer for the sovereign debt exchange obtained very good results and was supported by 76.07% of its creditors. The Government was able to record a partial remission of the debt in terms of current value of 65.2%, which exceeds any remission recorded in any other debt restructuring process in other countries.

Table of Contents

This significant achievement represented an opportunity for the country to recover reliability internationally and gave way to an economic context of higher feasibility. On the other hand, in February 2006, the government paid the total debt to the International Monetary Fund (IMF) through the payment of US\$9.530 million, reducing significantly the sovereign debt of the country.

This significant advancement represented an opportunity for the country to recover the international market reliability and allowed generating an economic context of higher feasibility, which in turn will encourage the concretion of future investments.

Effects of inflation

The Argentine Peso devaluation by the Executive Power carries the risk of a significant inflation increase.

The following are annual inflation rates that reflect the variation with respect to the same month of the previous year published by the Argentine Ministry of Economy:

Year ended June 30,	Consumer Price Index	Wholesale Price Index
2002	30.5%	95.6%
2003	10.2%	8.3%
2004	4.9%	0.1%
2005	9.0%	7.7%
2006	11.0%	12.2%
2007	8.8%	9.3%

The inflationary risk increase may erode macroeconomic stability held at present in the country, causing a negative impact on the development of our operations.

During 2006 retail prices increased significantly, making inflation one of the main economic issues. In order to hold back inflation, the government signed trade agreements, primarily within the food and textile sectors. In this regard, the CPI increased by 3.9% and 7.2% for the Wholesale Price Index (IPIM) for the first semester of 2007. This shows that inflation is one of the most important problems to be solved by the new administration.

Factors Affecting Comparability***Purchase and Sales of Farms***

Our strategy includes the identification, acquisition, exploitation and selective disposition of rural properties that have attractive prospects for long-term value appreciation. As a part of this strategy, from time to time we purchase and sell farms. The acquisition or disposition of farms in any given period may make the production results of that period difficult to compare to those of other periods.

Table of Contents

Seasonality

Our business activities are inherently seasonal. Harvest and sales of grains (corn, soybean and sunflower) in general take place from February to June. Wheat is harvested from December to January. Others segments of our activities, such as our sales of cattle and milk and our forestry activities tend to be more of a successive character than of a seasonal character. However, the production of beef and milk is generally higher during the second quarter, when pasture conditions are more favorable. In consequence, there may be significant variations in results from one quarter to the other.

Revenue Recognition

We derive our revenues primarily from (i) the sale of crops, milk and live beef cattle, (ii) cattle feed lot operations, (iii) leasing of our farms to third parties and (iv) commodity brokerage activities.

Sales. We recognize revenue on sales of crops, milk and beef cattle when persuasive evidence of an arrangement exists, delivery has occurred, the price is fixed or determinable and collectibility is reasonably assured. We recognize revenue from cattle feeding operations, primarily comprised of feeding, animal health and yardage, and revenue from operating leases and brokerage activities as services are performed.

From time to time we sell properties which we consider not essential to our core operations in order to profit from real estate appreciation opportunities. We record farmland sales under the accrual method of accounting and do not recognize such sales until (i) the sale is consummated, (a sale is not considered consummated until (a) the parties are bound by the terms of a contract, (b) all consideration has been exchanged, (c) any permanent financing for which the seller is responsible has been arranged and (d) all conditions precedent to closing have been performed); (ii) we determine that the buyer's initial and continuing investments in the property being sold are adequate to demonstrate its commitment to pay for the property (the adequacy of a buyer's initial investment is measured by (a) its composition and (b) its size compared with the sale value of the property); (iii) the corresponding receivable is not subject to future subordination (our receivable will not be placed in or occupy a lower rank, class or position with respect to other obligations of the buyer) and (iv) we have transferred to the buyer the usual risks and rewards of ownership and have no continuing substantial involvement in the property.

Critical Accounting Policies

In connection with the preparation of our consolidated financial statements included in this annual report, we have relied on variables and assumptions derived from historical experience and various other factors that we deemed reasonable and relevant. Although we review these estimates and assumptions in the ordinary course of business, the presentation of our financial condition and results of operations often requires our management to make judgments regarding the effects of matters that are inherently uncertain on the carrying value of our assets and liabilities. Actual results may differ significantly from those estimated under different variables, assumptions or conditions. We have described each of the following critical accounting policies and estimates in order to provide an understanding about how our management forms judgments and views with respect to such policies and estimates, as well as the sensitivity of such policies and estimates:

investments in affiliates;

impairment of long-lived assets;

Table of Contents

intangible assets concession rights;

derivative instruments; and

deferred income tax.

Investments in affiliates

We use the equity method of accounting for investments in affiliates in which we have significant influence (including both IRSA and BrasilAgro). Critical accounting policies of these affiliates include provision for allowances and contingencies, impairment of long-lived assets, accounting for debt restructuring and accounting for deferred income taxes.

As of June 30, 2007, investments in affiliates were Ps.450.1 million, representing 42.0% of our total assets.

IRSA

As of June 30, 2007, we owned approximately 25.0% of the common shares of IRSA, one of Argentina's largest real estate companies. On September 30, 2007, we exercised 20.5 million of our warrants to acquire an additional 37.6 million common shares of IRSA for a total cost of US\$24.6 million. Additionally, on October 25, 2007, we exercised 12.5 million of our warrants to acquire an additional 22.9 million common shares for a total cost of US\$15.0 million. On September 25, 2007, we converted US\$12.0 million of IRSA's convertible notes into 22.0 million common shares of IRSA. After this exercise of warrants and conversion of convertible notes, we have no outstanding IRSA warrants or convertible notes. The term for the exercise of IRSA's outstanding warrants and the conversion of IRSA's outstanding convertible notes issued on November 21, 2002 expired on November 14, 2007. Throughout the conversion and exercise periods, holders of IRSA's warrants and convertible notes exercised an aggregate of 99,896,806 warrants and converted an aggregate of 99,942,343 convertible notes, respectively, increasing IRSA's capital stock to 578,676,460 issued and outstanding shares. As of the date of this Form 20-F, there are no outstanding warrants or convertible notes to acquire IRSA's shares. As a result of these exercises and conversions, our investment in IRSA's common shares increased from 25% on June 30, 2007 to 34.4% on November 16, 2007.

IRSA is engaged in a range of diversified real estate activities including residential properties, office buildings, shopping centers and luxury hotels in Argentina. A majority of our directors are also directors of IRSA, and we are under common control by the same group of controlling shareholders. At June 30, 2007, our investment in IRSA (including its convertible notes) represented approximately 35.7% of our total consolidated assets, and during the fiscal year ended on June 30, 2007, our gain from our investment in IRSA was Ps.33.1 million.

BrasilAgro

We own 7.4% of BrasilAgro and have the ability to exercise significant influence over such company. We value our investment in BrasilAgro under the equity method of accounting because of (a) our capacity to affect the operational and financial decisions due to the fact that (i) in accordance with BrasilAgro's by-laws, we are entitled to appoint three of BrasilAgro's nine directors (including the president of its board of directors every other two years), (ii) three are designated by BrasilAgro's other shareholders and (iii) the remaining three are independent

Table of Contents

directors appointed jointly by all shareholders and (b) our rights under the shareholders agreement among us, Tarpon Agro Llc, Tarpon Investimentos S.A., Cape Town LLC and Elie Horn which in the aggregate own 12.8% of BrasilAgro's capital and voting stock. Under the terms of this shareholders' agreement, the signatories have agreed to vote together in shareholder meetings in respect of matters related to proposals to change directors' and administrators' fees, increases of capital stock and declaration of dividends, among other issues.

Impairment of long-lived assets

We periodically evaluate the carrying value of our long-lived assets for impairment when events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. We consider the carrying value of a long-lived asset to be impaired when the expected cash flows, from such asset are separately identifiable and less than its carrying value. In that event, a loss would be recognized based on the amount by which the carrying value exceeds the fair market value of the long-lived asset. We determine the fair market value primarily using independent appraisal valuations and utilizing anticipated cash flows discounted at a rate commensurate to the risk involved.

Under Argentine GAAP, the impairment loss is recorded in the income statement against a liability account. This liability account is a contra account to fixed assets which means it is presented on the balance sheet as a direct reduction from the book value of the fixed assets to arrive at the fixed asset's carrying value at any particular point in time. The liability account is depreciated over the useful life of the related asset decreasing depreciation expense each period. Under Argentine GAAP, a previously recognized impairment loss should only be reversed when there is a subsequent change in estimates used to compute the fair market value of the asset. In that event, the new carrying amount of the asset should be the lower of its fair market value or the net carrying amount the asset would have had if no impairment had been recognized. Both the impairment charge and the impairment reversal are recognized in earnings.

We believe that the accounting policy concerning the impairment of long-lived assets is a critical accounting policy, because considerable judgment is necessary to estimate future cash flows and may differ from actual results. For example, farms are non-depreciable assets, and their value could be calculated as a perpetuity (i.e., dividing the expected return of each farm by a discount rate commensurate with the market risk involved). As farming is a low-risk business we used a 6% discount rate for the purposes of the perpetuity value calculation. Even if there had been a 20% reduction in the expected return, it would not have been necessary to recognize any loss for impairment of our farm assets.

Intangible assets - concession rights

We recorded the concession from the Province of Salta received upon our acquisition Agropecuaria Cervera S.A. (Agropecuaria Cervera) as an amortizable intangible asset at its fair value. Concession rights will be amortized over the life of the concession, which was set at 35 years, with an option to extend it for an additional 29-year period. Amortization will start as from the commencement of substantial activities.

This intangible asset will be tested for impairment whenever events or circumstances indicate that impairment may have occurred. If the carrying amount of an intangible asset exceeds its fair value based on estimated future undiscounted cash flows, an impairment loss would be indicated. The amount of the impairment loss to be recorded would be based on the excess of the carrying amount of the intangible asset over its discounted future cash flows. Judgment is used in

Table of Contents

assessing whether the carrying amount of intangible assets is not expected to be recoverable over their estimated remaining useful lives. The determination of fair value requires significant management judgment including estimating future sales volumes, selling prices and costs, changes in working capital, investments in property and equipment and the selection of an appropriate discount rate. Sensitivities of these fair value estimates to changes in assumptions for sales volumes, selling prices and costs are also tested.

Derivative instruments

We record all derivative instruments as assets or liabilities on our balance sheet at fair value. We record changes in the fair value of derivatives either in income or other comprehensive income, as appropriate. The gain or loss on derivatives designated as fair value hedges and the offsetting loss or gain on the hedged item attributable to the hedged risk are included in current income in the period that changes in fair value occur. The gain or loss on derivatives designated as cash flow hedges is included in other comprehensive income in the period that changes in fair value occur and is reclassified to income in the same period that the hedged item affects income.

Deferred income tax

We record income taxes using the deferred tax liability method. Accordingly, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recorded or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. We have treated the differences between the price-level restated amounts of assets and liabilities and their historical basis as permanent differences for deferred income tax calculation purposes.

At the end of the fiscal year there are temporary net liabilities (tax liabilities) mainly originated in the beef cattle valuation and the sale of and reimbursement in fixed assets. Management has made estimations that allow us to recognize this deferred tax.

We believe that the accounting estimate related to deferred income tax is a critical accounting estimate because:

it is highly susceptible to change from period to period because it requires us to make assumptions, such as future revenues and expenses, exchange rates and inflation among others; and

the impact that calculating income tax using this method would have on assets or liabilities reported on our consolidated balance sheet as well as on the income tax result reported in our consolidated statement of income could be material.

Adoption by the *Comisión Nacional de Valores* of CPCECABA standards.

The *Comisión Nacional de Valores* issued General Resolutions 485 and 487 on December 29, 2005 and January 26, 2006, respectively, adopting, with certain modifications, the new accounting standards previously issued by CPCECABA through its Resolution CD 93/2005. These standards became effective for our fiscal year ended June 30, 2007. The most significant changes included in the accounting standards adopted by the *Comisión Nacional de Valores* relate to:

changes in the impairment test of long-lived assets; and

changes to deferred income tax accounting.

Table of Contents

Under the new standards, the carrying value of a long-lived asset is considered impaired by a company when the expected cash flows from such asset is separately identifiable and less than its carrying value. Expected cash flows are determined primarily using the anticipated cash flows discounted at a rate commensurate with the risk involved. The new standards also provide for the accounting treatment of differences between the tax basis and book basis of non-monetary items for deferred income tax calculation purposes when companies prepare price-level restated financial statements. The new accounting standard mandates companies to treat these differences as temporary differences but allows a one-time accommodation to continue treating the differences between the tax basis and indexed book basis of non-monetary items as permanent at the time of adoption of the standard. As a result, we elected to continue treating differences as permanent. In addition, the new standards provide for the recognition of deferred income taxes on a non-discounted basis.

Principal differences between Argentine GAAP and U.S. GAAP

The principal differences, other than inflation accounting, between Argentine GAAP and U.S. GAAP are related to the following:

Effect of U.S. GAAP adjustments on our equity investment in IRSA;

Valuation of inventories;

Deferred income tax;

Elimination of gain on acquisition of minority interest;

Available-for sale securities;

Effect of U.S. GAAP adjustments on our equity investees excluding IRSA;

Accounting for stock options;

Accounting for convertible notes;

Effect of U.S. GAAP adjustments on management fee; and

Effect of changes in the classification of securities.

In addition, certain other disclosures required under U.S. GAAP have been included in the U.S. GAAP reconciliation. See Note 17 to our audited consolidated financial statements included else where in this annual report.

Net income under Argentine GAAP for the years ended June 30, 2005, 2006 and 2007 was approximately Ps.76.8 million, Ps.32.9 million and Ps.49.4 million, respectively, compared to approximately Ps.86.7 million, Ps.27.5 million and Ps.49.3 million, respectively, under U.S. GAAP. Shareholders' equity under Argentine GAAP as of June 30, 2006 and 2007, was Ps.625.9 million and Ps.825.0 million, respectively, compared to Ps.614.1 million and Ps.925.1 million, respectively, under U.S. GAAP.

Table of Contents

Segment Information

We are required to disclose segment information in accordance with RT 18. RT 18 establishes standards for reporting information about operating segments in annual financial statements and requires reporting of selected information about operating segments in interim financial reports issued to shareholders. Operating segments are components of a company about which separate financial information is available that is regularly evaluated by the chief operating decision maker(s) in deciding how to allocate resources and assess performance. The statement also establishes standards for related disclosures about a company's products and services, geographical areas and major customers.

We are primarily engaged in agricultural operations, which are subject to risk, including market prices, weather conditions and environmental concerns. From time to time, we sell properties to profit from real estate appreciation opportunities and which, in the judgment of management, are surplus to the Company's primary operations. Gain on the sale of properties is presented in a separate line within operating income in the consolidated statement of income.

For the years ended June 30, 2005, 2006 and 2007, our principal operations were carried out in Argentina, our country of domicile. As discussed in Note 2.f to our audited consolidated financial statements included elsewhere in this annual report, in September 2005, we formed BrasilAgro to replicate our business strategy in Brazil. The results of this equity investee are included in our Non Operating segment.

We conduct business in five business segments, organized primarily on a product-line basis, with each segment offering a variety of different but interrelated products:

Our Crops segment includes the planting and harvesting and sale of fine and coarse grains and oilseeds, including wheat, corn, soybeans and sunflowers.

Our Beef Cattle segment consists of (i) the raising and fattening of beef cattle from our owned cattle stock and (ii) the purchase and fattening of beef cattle for sale to meat processors.

Our Milk segment consists of the production of milk for sale to dairy companies.

Our Feed lot segment includes our cattle feeding operation.

Our Others segment consists of services and leasing of our farms to third parties, and commodity brokerage activities.

Our Non Operating segment includes gains or losses from equity investees and depreciation for corporate assets. Accordingly, segment information for the fiscal years ended June 30, 2005 and 2006 includes our pro rata portion of the results of our equity interest in Cactus on a line-by-line basis due to our proportional consolidation of such results for such fiscal years. As of January 1, 2007, however, we began accounting for our investment in Cactus under the equity method of accounting. Accordingly, the segment information for the year ended June 30, 2007 includes the gain on this equity investee under the Non Operating segment.

Table of Contents

We evaluate the performance of our business segments based on segment gain which constitutes gross profit less selling expenses plus unrealized gains or losses on inventories. In the column titled Total, total segment gain (the addition of the five operating business segments) does not include gain or loss on equity investees which is included in the Non-operating segment and is not included in the Total for performance evaluation purposes. Accounting policies of the five reportable segments are the same as those described in the summary of significant accounting policies. Intercompany transactions between segments, if any, are eliminated.

Financial information for each segment follows:

Year ended June 30, 2007

	Crops		Beef Cattle		Milk		Feed lot		Others		Non Operating ⁽ⁱ⁾		Total

Cresud's Results of Operations

Effective July 1, 2006, we adopted Technical Resolution No. 22 Agricultural Activities (RT No. 22). RT No. 22 prescribes the accounting treatment, financial statement presentation, and disclosures related to agricultural activity. Agricultural activity is the management by an entity of the biological transformation of living animals or plants (biological assets) for sale, into agricultural produce, or into additional biological assets. RT No. 22 prescribes, among other things, the accounting treatment for biological assets during the period of growth, degeneration, production, and procreation, and for the initial measurement of agricultural produce at the point of harvest. It requires measurement at fair value less estimated point-of-sale costs from initial recognition of biological assets up to the point of harvest, other than when fair value cannot be measured reliably on initial recognition. RT No. 22 requires that a change in fair value less estimated point-of-sale costs of a biological asset be included in profit or loss for the period in which it arises. RT No. 22 also requires that gains or losses arising on initial recognition of agricultural produce at fair value less estimated point-of-sale costs to be included in profit or loss for the period in which it arises. In agricultural activity, a change in physical attributes of a living animal or plant directly enhances or diminishes economic benefits to the entity. RT No. 22 is applied to agricultural produce, which is the harvested product of the entity's biological assets, only at the point of harvest. Accordingly, RT No. 22 does not deal with the processing of agricultural produce after harvest; for example, the processing of milk into cheese.

Biological transformation comprises the processes of growth, degeneration, production, and procreation that cause qualitative or quantitative changes in a biological asset. Biological assets are living unharvested crops, heads of cattle and milking cows. Agricultural produce such as

Edgar Filing: CRESUD INC - Form 20-F

harvested crops, beef milk and raw materials are the harvested product of biological assets. Biological transformation results in the following types of outcomes: asset changes through (i) growth (an increase in quantity or improvement in quality of an animal or plant), (ii) degeneration (a decrease in the quantity or deterioration in quality of an animal or plant), or (iii) procreation (creation of additional living animals or plants).

The adoption of RT No. 22 did not have an impact in our measurement and recognition of biological transformation. Rather, it changed the format of our income statement. Under RT No. 22 we break down the components of our costs as separate line items in the income statement. There was no change in our gross profit for any of the periods presented.

Prior to the adoption of RT No. 22 gains or losses arising from initial recognition of biological assets and agricultural produce as well as changes in biological assets were included as a

Table of Contents

deduction from costs of sales. Under RT No. 22 these changes are disclosed separately in the income statement under the line item titled Production income in our income statement.

Also, prior to the adoption of RT No. 22, costs directly related to the transformation of biological assets and agricultural produce were also included as an addition to costs of sales. Under RT No. 22, these costs are disclosed separately in the income statement under the line item titled Cost of production in our income statement due to the direct relationship to the transformation of biological assets and agricultural produce.

The adoption of RT No. 22 did not affect our recognition of revenue which is included in the line item titled Sales in our income statement. See Note 3 a) to our consolidated financial statements. As a result of the adoption of RT No. 22, our costs of sales show direct costs related to the sales of agricultural produce other than selling expenses. RT No. 22 intends to purport that costs of sales are not significant in agricultural activities while costs of biological transformation into agricultural produce represent the major costs of these activities.

In addition, under RT No. 22, the exhibits titled Cost of Sales and Cost of Production included in Notes 18 e) and f) to our consolidated financial statements present a reconciliation of changes in the carrying amount of biological assets between the beginning and the end of the relevant periods. This reconciliation includes (a) the gain or loss arising from changes in fair value less estimated point-of-sale costs; (b) increases due to purchases; (c) decreases attributable to sales and biological assets classified as held for sale; (d) decreases due to harvest; (e) increases resulting from business combinations, if any; (f) other changes.

The following terms used herein with the meanings specified:

Production Income. We recognize production income when there is a change in biological assets. For example, we recognize production income when crops are harvested or a cow is born or gains a certain amount of weight. Biological assets are living animals or plants, such as unharvested crops, heads of cattle and milking cows. Agricultural produce such as harvested crops, beef, milk and raw materials are the harvested product of biological assets.

Cost of Production. Our cost of production consists of costs directly related to the transformation of biological assets and agricultural produce.

Sales. Our sales consist of revenue on the sales of crops, milk and beef cattle. Sales are recognized when persuasive evidence of an arrangement exists, delivery has occurred, the price is fixed or determinable and collectibility is reasonably assured. Revenue from cattle feeding operations, primarily comprised of feeding, animal health and yardage, and revenue from operating leases and brokerage activities are recognized as services are performed.

Cost of Sales. Our cost of sales consists of certain direct costs related to the sales of agricultural produce other than selling expenses.

Unrealized gain on inventory. Our gain from inventory holding consists of the changes in the carrying amount of biological assets between the beginning and the end of current period.

Table of Contents

Operating Results

Fiscal year ended June 30, 2007 compared to fiscal year ended June 30, 2006.

Production income

Production income was Ps.102.8 million for the fiscal year ended June 30, 2007, 57.3% higher than the amount recorded the previous fiscal year. This was primarily attributable to a Ps.35.4 million increase in our Grains segment and a Ps.3.0 million increase in our Milk segment, partially offset by a Ps.1.0 million decrease in production income of our Cattle segment.

Grains

Production income from our Grains segment increased 95.7%, from Ps.37.0 million for the fiscal year 2006 to Ps.72.4 million for fiscal year 2007, primarily as a result of:

a 64.2% increase in production volumes, from 106,867 tons in our fiscal year 2006 to 175,455 tons in our fiscal year 2007 (the corn and soy production increased 155.8% and 43.2%, respectively, partially offset by decreases of 23.6% and 6.9% in wheat and sunflower production, respectively); and

a 19.2% increase in average prices for our grains.

The 64.2% increase in production volumes from our Grains segment was mainly due to a 29.7% increase in the total sown surface for production, from 37,022 hectares during fiscal year 2006 to 49,244 hectares during fiscal year 2007. Our owned sown surface for production increased from 20,018 hectares during fiscal year 2006 to 22,712 hectares during fiscal year 2007, and our leased sown surface for production increased from 17,004 hectares during fiscal year 2006 to 25,307 hectares during fiscal year 2007. The sown surface for production under concession through our subsidiary Agropecuaria Cervera was 1,225 hectares.

The 64.2% increase in production volumes from our Grains segment was also due to a 23.4% increase in our average yields, from 2.89 tons per hectare in our fiscal year 2006 to 3.56 tons per hectare in our fiscal year 2007. This increase in average total yields was a result of better weather conditions in comparison to the previous fiscal year.

The average prices for our grains (at realizable net value) increased 19.2 % in fiscal year 2007, from Ps.346 per ton in our fiscal year 2006 to Ps.413 per ton in our fiscal year 2007.

The following table sets forth the average board prices as of June 30, 2007 and 2006:

	Grain (Board average price) ⁽¹⁾		
	Year ended June 30,		
	2006	2007	Change
Wheat	312	393	81
Sunflower	513	676	164
Corn	240	343	104
Soybean	508	597	89

⁽¹⁾ Board price Rosario.

Table of Contents

Cattle

Production income from our Cattle segment decreased 4.8%, from Ps.20.5 million for the fiscal year ended June 30, 2006 to Ps.19.5 million for the fiscal year ended June 30, 2007. Production volumes increased slightly 1.1%, from 9,803 tons in fiscal year 2006 to 9,913 tons in fiscal year 2007.

It is worth mentioning that during the current fiscal year, the income and volume of beef cattle production include the proportional consolidation of 50.0% in the subsidiary Cactus for only 6 months up to December 2006 (due to the change of valuation method for decrease in our share participation, from 50.0% to 24.0%) compared to the proportional consolidation of this subsidiary during fiscal 2006.

The increase in volume is mainly due to a higher volume of beef cattle generated in our own fields and to the improvement of weather conditions on the production of grass. These were negatively impacted by the lasting effect of the 2006 drought on this fiscal year. Also, during fiscal year 2007 a lower number of cattle finished in feed lot was noted, as a consequence of the effects of the drought that affected fiscal year 2006.

Although our Cattle segment had a price increase in the rodeo categories, the re-categorization of cattle produced a negative impact on the production income of the current fiscal year which generated a 5.9% decrease in the average value per kilogram of beef cattle produced, from Ps.2.1 in fiscal year 2006 to Ps.2.0 in fiscal year 2007. Consequently, the categories that generated a higher number of kilograms were those that did not suffer a significant price increase. Beef cattle are re-categorized to reflect different stages in their life cycle.

The number of hectares dedicated to beef cattle production increased from 100,724 hectares in fiscal year 2006 (29,222 leased hectares corresponding to contracts expired before closing of fiscal year 2006 are not included) to 114,056 hectares in fiscal year 2007 (41 hectares corresponding to Cactus are not included). This increase was mainly due to a higher number of hectares leased and to the conversion of hectares of land reserve into cattle in the Los Pozos farm during the current fiscal year, negatively compensated by the retirement of cattle hectares due to the sale of the Tapenagá farm.

Milk

Milk production income increased 38.3%, from Ps.7.9 million in fiscal year 2006 to Ps.10.9 million in fiscal year 2007, including Ps.1.2 million generated by the re-categorization of milking yard cattle. Milking yard cattle are re-categorized to reflect different stages in their life cycle. This increase was primarily as a result of (i) a 14.2% increase in production volumes, from 14.6 million liters in fiscal year 2006 to 16.7 million liters in fiscal year 2007, and (ii) a 7.9% increase in average prices of milk, from Ps.0.54 per liter in fiscal year 2006 to Ps.0.58 per liter in fiscal year 2007.

This increase in production income was mainly due to (i) higher production volume of the milk, (ii) an increase in the average number of milking cows (from 2,410 in fiscal year 2006 to 2,677 in fiscal year 2007), in part due to the start of production in the new milking yard of our La Juanita farm, Province of Buenos Aires, which increased its milking capacity to 1,800 cows and (iii) a 2.8% improvement in the efficiency level of average daily milk production per cow (from 16.6 liters in fiscal year 2006 to 17.1 liters in the fiscal year 2007).

Table of Contents

Cost of production

Cost of production increased 25.7%, from Ps.60.4 million in fiscal year 2006 to Ps.75.9 million in fiscal year 2007. This increase is mainly attributable to a Ps.16.6 million increase in our Grains segment and a Ps.2.6 million increase in our Milk segment, partially offset by a Ps.3.7 million decrease in our Cattle segment.

Grains

Cost of production from our Grains segment increased 46.4%, from Ps.35.8 million in fiscal year 2006 to Ps.52.4 million for the fiscal year 2007. This increase is mainly due to a 64.2% increase in the volume of production in our Grains segment as a consequence a 29.7% increase in surface produced in our fiscal year 2007 compared to the previous fiscal year.

Cost of production per ton decreased 12.5 %, from Ps.345 in fiscal year 2006 to Ps.302 in fiscal year 2007, primarily as a result of better yields that had the effect of reducing the cost per ton produced in fiscal year 2007. Cost of production in fiscal year 2006 reflected the negative effects of a drought on certain farms.

Cattle

Cost of production from our Cattle segment decreased 19.9%, from Ps.18.8 million in fiscal year 2006 to Ps.15.1 million for the fiscal year 2007. The direct cost per kilogram produced decreased 30.4%, from Ps.1.28 in fiscal year 2006 to Ps.0.89 in fiscal year 2007 primarily as a result of a higher volume of beef cattle production that allowed diluting the cost per kilogram produced in the current fiscal year.

Lower cost of production from our Cattle business segment as compared to the previous fiscal year is mainly attributable to the increase in feeding and health costs in line with the effects of the drought.

Considering the our total production increase in the current fiscal year, the decrease in costs of production was due to higher number of tons produced per hectare assigned to the activity, from 0.07 ton per hectare in fiscal year 2006 to 0.08 ton per hectare in fiscal year 2007.

Milk

Cost of production from our Milk segment increased 45.0%, from Ps.5.8 million in our fiscal year 2006 to Ps.8.5 million in our fiscal year 2007. Such increase was mainly due to:

a 14.2% increase in milk production in fiscal year 2007, and

the impact of higher feeding costs as a consequence of the increase in corn prices and other raw materials of the milk segment. Cost of production from our Milk business segment per thousand liters increased from Ps.401 in fiscal year 2006 to Ps.509 in fiscal year 2007.

Sales

Sales for the fiscal year ended June 30, 2007 decreased 1.8%, from Ps.112.3 million in fiscal year 2006 to Ps.110.3 million in fiscal year 2007 primarily as a result of a Ps.8.3 million

Table of Contents

decrease in our Grain segment and a Ps.1.7 million decrease in our Cattle segment, partially offset by higher sales in our Milk, Feedlot and Other segments of Ps.1.8 million, Ps.0.4 million and Ps.5.8 million, respectively.

Grain

Sales from our Grain segment decreased 13.4%, from Ps.61.7 million in fiscal year 2006 to Ps.53.4 million in fiscal year 2007 primarily as a result of :

a 24.0% decrease in sales volume, from 164,104 tons in fiscal year 2006 to 124,652 tons in fiscal year 2007, and

a 14.0% increase average prices, from Ps. 376 per ton in fiscal year 2006 to Ps. 428 in fiscal year 2007.

Although the production volume of grain in fiscal year 2007 was 64.2% higher than in fiscal year 2006, our sales volume was lower in fiscal year 2007 than in fiscal year 2006 primarily as a result of lower levels of grain inventories at the beginning of fiscal year 2007 (90,060 tons at the beginning of fiscal year 2006 compared to 28,315 tons at the beginning of fiscal year 2007).

	Grain Inventories (in tons)		
	Year ended June 30,		
	2006	2007	Change
Inventories at the beginning of the fiscal year	90,060	28,315	(61,745)
Purchases	21,182	9,202	(11,980)
Production	106,867	175,455	68,588
Sales	(164,104)	(124,652)	39,452
Transfer of unharvested crops to expenses	(25,690)	(13,757)	11,933
Inventories at the end of the fiscal year	28,315	74,563	46,248

Cattle

Sales from our Cattle segment decreased 5.2%, from Ps.33.7 million in our fiscal year 2006 to Ps.32.0 million in our fiscal year 2007 primarily as a result of a 9.7% decrease in sales volume, from 14,762 tons in fiscal year 2006 to 13,332 tons in fiscal year 2007, which was partially offset by a 5.0% increase in the average price per kilogram, from Ps.2.28 in fiscal year 2006 to Ps.2.40 in fiscal year 2007.

The decrease in the sales volume was mainly due to a lower number of finished cattle in the feedlot, from 21,400 in fiscal year 2006 to 11,900 in fiscal year 2007, as a consequence of lower beef cattle purchases during fiscal year 2007.

The average cattle stock increased from 91,500 heads in fiscal year 2006 to 97,111 in fiscal year 2007.

Table of Contents

Milk

Sales from our Milk segment increased 23.3%, from Ps.7.9 million in our fiscal year 2006 to Ps.9.7 million in our fiscal year 2007, primarily as a result of:

a 14.2% increase in production volume due to an increase in the average number of milking cows and improvement in the efficiency level of average daily milk production per cow; and

a 7.9% increase in average prices of milk, from Ps.0.54 per liter in fiscal year 2006 to Ps.0.58 per liter in fiscal year 2007.

Feedlot

Sales from our Feedlot segment increased 14.0%, from Ps.2.7 million in our fiscal year 2006 to Ps.3.1 million in our fiscal year 2007, primarily as a result of:

an increase in the level of occupation of our feedlot, from 15,400 heads in fiscal year 2006 to 19,400 heads in fiscal year 2007,

an increase in the price of the feed as a consequence of an increase in the price of corn, and

the fact that during fiscal year 2007 the cattle raiser sent for feeding in our feedlot cattle of higher weight which consumed larger feed volumes.

It should be mentioned that, we have changed the valuation method of our investment in Cactus because of a decrease in our share participation in Cactus, from 50.0% to 24.0% compared with the proportional consolidation of this subsidiary during fiscal year 2006.

Other

Sales from our Other segment increased 90.7%, from Ps.6.4 million in fiscal year 2006 to Ps.12.1 million for fiscal year 2007, mainly due to a Ps.0.3 million increase in sales of services, Ps.0.8 increase in sales from leasing of our farms to third parties and Ps.3.4 million increase from commodity brokerage services (from Futuros y Opciones.com). Sales of services to third parties are services for weighing and re-conditioning of cereal and watering.

Although the number of owned hectares leased to third parties during fiscal year 2007 was slightly lower in fiscal year 2007 than in fiscal year 2006, the higher average leasing prices more than compensated for the reduction in hectares leased.

Cost of sales

Cost of sales for our fiscal year 2007 were Ps.99.1 million, 0.6% lower than cost of sale for fiscal year 2006, primarily as a result of lower cost of sales in our Grain and Cattle segments of 5.4% and 8.2%, respectively, which were partially offset by higher cost of sales in our Milk, Feedlot and Other segments of 23.3%, 21.8% and 180.4%, respectively.

Cost of sales as percentage of net sales were 87.8% in fiscal year 2006 and 89.9% in fiscal year 2007.

Table of Contents

Grains

Cost of sales from our Grain segment decreased 5.4%, from Ps.53.3 million in fiscal year 2006 to Ps.50.4 million in fiscal year 2007, primarily as a result of:

a 24.0% reduction in the volume of grain sold in fiscal year 2007 compared to fiscal year 2006; and

a higher average prices of commodities in fiscal year 2007.

The average cost per ton sold in fiscal year 2007 increased 24.6%, from Ps.325 in fiscal year 2006 to Ps.405 in fiscal year 2007.

Cattle

Cost of sales from our Cattle segment decreased 8.2%, from Ps.33.0 million in fiscal year 2006 to Ps.30.3 million in fiscal year 2007, primarily as a result of a 9.7% decrease in production volume of Cattle compared to fiscal year 2006 due to a lower number of finished cattle in the feedlot.

Milk

Cost of sales from our Milk segment increased 23.3%, from Ps.7.9 million in fiscal year 2006 to Ps.9.7 million in fiscal year 2007 primarily as a result of a 14.2% increase in production volume of milk in fiscal year 2007.

Feedlot

Cost of sales from our Feedlot business segment increased 21.8%, from Ps.2.3 million in fiscal year 2006 to Ps.2.8 million in fiscal year 2007, primarily as a result of a 26.0% increase in average occupation of the feedlot in fiscal year 2007 and to higher volumes of feed consumed due to incoming cattle of higher average weight that required higher feeding costs. The price per ton of feed portion increased 37.0%, from Ps.207 in year 2006 to Ps.284 in year 2007, mainly due to an increase in the price of corn during fiscal year 2007. The cost of feedlot services as percentage of sales increased 85.2% in fiscal year 2006 to 91.0% in fiscal year 2007. It should be mentioned that, we have changed the valuation method of our investment in Cactus because of a decrease in our share participation in Cactus, our subsidiary engaged in the feed lot business, from 50.0% to 24.0% compared with the proportional consolidation of this subsidiary during fiscal year 2006.

Other

Cost of sales from our Other segment increased 180.4%, from Ps.2.1 million for the fiscal year 2006 to Ps.5.9 million for the fiscal year 2007 primarily as a result of higher costs arising from Futuros y Opciones.com and costs generated by services to third parties.

Gross profit

As a result of the above mentioned factors, gross profit increased 103.7%, from Ps.18.7 million for fiscal year 2006 to Ps.38.1 million for fiscal year 2007. Our gross margin, calculated as our gross profit divided by the sum of our production income and sales, increased from 10.5% for fiscal year 2006 to 17.9% for fiscal year 2007, primarily as a result of:

a 140.0% increase in gross profit from our Grain segment, from Ps.9.6 million for fiscal year 2006 to Ps.23.0 million for fiscal year 2007;

Table of Contents

a 155.2% increase in gross profit from our Cattle segment, from Ps.2.4 million for fiscal year 2006 to Ps.6.1 million for fiscal year 2007;

a 18.9% increase in gross profit from our Milk segment, from Ps.2.0 million for fiscal year 2006 to Ps.2.4 million for fiscal year 2007;

a 31.0% decrease in gross profit from our Feed Lot segment, from Ps.0.4 million for fiscal year 2006 to Ps.0.3 million for fiscal year 2007; and

a 46.6% increase in gross profit from our Other segment, from Ps.4.3 million for fiscal year 2006 to Ps.6.2 million for fiscal year 2007.

Selling expenses

Selling expenses decreased 1.8%, from Ps.10.2 million in fiscal year 2006 to Ps.10.0 million for fiscal year 2007. Selling expenses of the Grains, Cattle and Other segments represented 77.8%, 11.4% and 10.0%, respectively, of our total selling expenses in fiscal year 2007.

Grains

Selling expenses of Grains as a percentage of sales of Grains increased from 14.1% in fiscal year 2006 to 14.5% in fiscal year 2007 as a result of higher cost of freight, conditioning and storage. Selling expenses per ton of grain sold increased 17.8%, from Ps.53 per ton in fiscal year 2006 to Ps.62 per ton in fiscal year 2007.

Cattle

Selling expenses of Cattle as a percentage of sales of Cattle were 3.1% in fiscal year 2006 and 3.6% in fiscal year 2007.

Milk

Milk sales did not generate significant selling expenses during fiscal years 2006 or 2007, as all the production was marketed directly to dairy producers.

Administrative expenses

Administrative expenses increased 43.8%, from Ps.11.6 million in fiscal year 2006 to Ps.16.6 million in fiscal year 2007, mainly due to the increase in fees and compensations for services (includes consulting fees with respect to Sarbanes-Oxley compliance, accounting, legal and tax fees and migration system), salaries and social contributions, taxes, rates and contributions and office and administration expenses.

Net gain on sale of farms

Net gain on sale of farms increased 124.9%, from Ps.9.9 million for the fiscal year 2006 to Ps.22.3 million for fiscal year 2007, primarily as a result of the following sales:

Table of Contents

Fiscal year 2007:

On June 6, 2007 we sold 20,833 hectares of the Tapenagá farm for Ps.22.0 million, generating a gain of approximately Ps.15.4 million;

On June 5, 2007 we sold a fraction of 14,516 hectares of the Los Pozos farm for Ps.6.7 million, generating a gain of approximately Ps.6.4 million; and

On January 19, 2007 we sold a fraction of 50 hectares of the El Recreo farm for Ps.0.7 million, generating a gain of approximately Ps.0.5 million.

Fiscal year 2006:

On July 25, 2005 we sold 5,727 hectares of the El Gualicho farm in the Province of Córdoba for Ps.17.5 million, generating a gain of Ps.9.9 million.

Gain from inventory holding

Gain from inventory holding increased 1.4%, from Ps.4.2 million in fiscal year 2006 to Ps.4.3 million in fiscal year 2007, primarily as a result of an increase during fiscal year 2007 of prices for our holdings of cattle, grains and raw materials.

Operating income

Operating income increased 242.2%, from Ps.11.1 million in fiscal year 2006 to Ps.38.0 million in fiscal year 2007. Our operating margin, calculated as our operating income divided by the sum of our production income and sales, increased from 6.3% for fiscal year 2006 to 17.8% for fiscal year 2007 primarily as a result of:

a 103.7% increase in gross profit, from Ps.18.7 million for fiscal year 2006 to Ps.38.1 million for fiscal year 2007;

a 1.8% decrease in selling expenses, from Ps.10.2 million for fiscal year 2006 to Ps.10.0 million for fiscal year 2007;

a 43.8% increase in administrative expenses, from Ps.11.6 million for fiscal year 2006 to Ps.16.6 million for fiscal year 2007;

a 124.9% increase in net gain on sale of farms, from Ps.9.9 million for fiscal year 2006 to Ps.22.3 million for fiscal year 2007; and

a 1.4% increase in unrealized gain on inventory, from Ps.4.2 million for fiscal year 2006 to Ps.4.3 million for fiscal year 2007.

Net financial results

We had net financial income of Ps.12.4 million in our fiscal year 2006 compared to a net financial loss of Ps.10.5 million for the fiscal year 2007. The principal differences between both fiscal years were:

Edgar Filing: CRESUD INC - Form 20-F

Ps.14.9 million of income realized in fiscal year 2006 in connection with our exchange of convertible bonds of IRSA for shares of Agropecuaria Cervera;

147

Table of Contents

Ps.5.1 million increase in net interest expense in fiscal year 2007 compared to fiscal year 2006 as a result of higher levels of average debt during fiscal; and

Ps.3.2 million increase in fiscal year 2007 in the loss generated by the differences in exchange rates.

Our net financial loss in fiscal year 2007 arise from (i) a Ps.10.0 million loss generated by the negative impact of interest for debt financing, (ii) a Ps.1.9 million loss generated by the debits and credits tax and (iii) a Ps.1.9 million loss derived from exchange differences and other factors. These losses were partially offset by (i) Ps.1.1 million of income derived from operations with securities and shares and (ii) Ps.2.2 million of interest income from convertible notes issued by IRSA, including interest paid from convertible bonds issued by Cresud and other interest.

Other income and expenses, net

Other income and expenses, net, represented a net expense of Ps.3.4 million in fiscal year 2006 compared to a net expense of Ps.4.3 million in fiscal year 2007, mainly due to a higher negative impact of Ps.0.6 million for the tax on personal assets of our shareholders.

Gain on equity investments

Gain on our equity investments increased 81.6%, from income of Ps.22.1 million in fiscal year 2006 to income of Ps.40.2 million in fiscal year 2007 and the difference was primarily as a result of:

higher income of Ps.9.7 million of gain with respect to our investment in IRSA (including amortization of goodwill of Ps.2.9 million);

higher income of Ps.6.7 million of gain with respect to our investment in BrasilAgro;

higher income of Ps.2.0 million of gain with respect to our investment in Agro Uranga S.A.; and

lower income of Ps.0.3 million with respect to our investments in other subsidiaries and affiliates companies which partially offset the above-mentioned gains.

During fiscal year 2007 our shareholding in Cactus Argentina S.A. decreased from 50.0 % to 24.0% due to the addition of a new shareholder on December 31, 2006; and as a result we consolidated 50.0% of Cactus results of operations through December 31, 2006 and 24% thereafter.

Management Fee

Under the consulting agreement entered into with Consultores Asset Management, we pay a fee equal to 10% of our net income for agricultural advisory services and other management services. The fees amounted to Ps.5.5 million and Ps.3.8 million in the fiscal years 2007 and 2006, respectively.

Income tax expense

Our Income tax expenses increased 54.2%, from Ps.5.4 million in fiscal year 2006 to Ps.8.4 million in fiscal year 2007. We recognized our income tax charge on the basis of the deferred tax

Table of Contents

liability method, thus recognizing temporary differences between accounting and tax assets and liabilities measurements. The main temporary differences derive from cattle stock and fixed assets valuation. For purposes of determining the deferred assets and liabilities, the tax rate expected to be in force at the time of their reversion or use, according to the legal provisions enacted as of the date of issuance of these financial statements (35%) has been applied to the identified temporary differences and tax losses. Our effective tax rate in fiscal year 2007 was 17.0% compared to 16.5% in fiscal year 2006.

Minority interest

During fiscal years 2006 and 2007, a negative participation of third parties of Ps.0.1 million and Ps.0.3 million respectively was recorded to reflect the minority participation in the income of subsidiaries.

Net income

Due to the above-mentioned issues, our net income increased 50.1%, from Ps.32.9 million for fiscal year 2006 to Ps.49.4 million for fiscal year 2007. Our net margin, calculated as our net income for a fiscal year divided by the sum of our production income and sales was 18.5% for fiscal year 2006 and 23.2% for fiscal year 2007.

Fiscal year ended June 30, 2006 compared to fiscal year ended June 30, 2005**Production income**

Production income for our fiscal year 2006 was Ps.65.4 million, 3.2% lower than the amount recorded during fiscal year 2005. The decrease in production income was mainly due to a lower production income in our Grains segment with a decrease of 16.0%, compensated by an increase in Production income in our Cattle and Milk business segments of 2.3% and 127.9%, respectively.

Grains

Production income from our Grains segment decreased 16.0%, from Ps.44.1 million in our fiscal year 2005 to Ps.37.0 million in fiscal year 2006. Production volumes decreased 28.7%, from 149,785 tons in fiscal year 2005 to 106,867 tons in fiscal year 2006 (sunflower production increased 45.3% and wheat, corn and soybean decreased 8.1%, 52.0% and 12.2%, respectively). This overall decrease in production volumes was mainly due to lower yields per crop in the harvest of fiscal year 2006 compared to fiscal year 2005, mainly as a consequence of the drought in fiscal year 2006.

The decrease in production income had a positive impact of 7.2% during fiscal year 2006, as a consequence of the increase in prices of commodities.

The following table sets forth the average Rosario board prices as of June 30, 2005 and 2006:

	Year ended June 30,		
	2005	2006	Change
Wheat	285	312	27
Sunflower	513	513	
Corn	198	240	42
Soybean	478	508	30

Table of Contents

The 28.7% decrease in production volumes in our Grains segment was mainly due to the adverse consequences of the drought during fiscal year 2006, partially offset by a 2.0% increase in the total sown surface for production, from 36,293 hectares during fiscal year 2005 to 37,022 hectares during fiscal year 2006. Our owned sown surface for production increased from 19,994 hectares during fiscal year 2005 to 20,018 hectares during fiscal year 2006, and our leased sown surface for production increased from 16,299 hectares during fiscal year 2005 to 17,004 hectares during year 2006.

Cattle

Production income from our Cattle business segment increased 2.3%, from Ps.20.0 million in fiscal year 2005 to Ps.20.5 million in our fiscal year 2006. Production volumes decreased 8.0%, from 10.657 tons in fiscal year 2005 to 9.803 tons in fiscal year 2006.

This decrease resulted from the effects of the drought that adversely affected the grass in fields where we produce beef cattle at lower price, and lower numbers of finished cattle in the feed lot. The number of privately owned hectares engaged in cattle production decreased 20.6%, from 126,879 hectares in fiscal year 2005 to 100,724 hectares in fiscal year 2006 primarily as a result of our sale of the Ñacurutú and El Gualicho farms, partially offset by our purchase of the San Pedro farm and the conversion of hectares of land reserve to cattle in Los Pozos farm.

The lower production volume was partially offset by a 10.3% increase in average cattle prices during the fiscal year 2006 compared to fiscal year 2005.

Milk

Production income from our Milk business segment increased 127.9%, from Ps.3.5 million in fiscal year 2005 to Ps.7.9 million during our fiscal year 2006, primarily as a result of:

a 99.5% increase in production volumes, from 7.3 million liters in fiscal year 2005 to 14.6 million liters in fiscal year 2006, primarily as a result of (i) our inauguration on March 1, 2005 of a large milking yard in our field El Tigre having last generation technology and (ii) to a lesser extent, a change in the feeding system as a consequence of the drought; and

14.2% increase in average prices of milk in fiscal year 2006 compared to fiscal year 2005.

Cost of production

Cost of production for the fiscal year 2006 was Ps.60.4 million, 12.8% higher than the cost of production recorded during fiscal year 2005. This increase is mainly attributable to a Ps.1.3 million increase in our Grains segment, a Ps.1.8 million increase in our Cattle segment, and a Ps.3.7 million increase in our Milk segment.

Grains

Cost of production from our Grains segment increased 3.9%, from Ps.34.5 million in fiscal year 2005 to Ps.35.8 million in our fiscal year 2006. Direct and indirect costs per ton produced were 53.2% higher in fiscal year 2006 due to a decrease in the production level of cereals respect to the

Table of Contents

previous fiscal year, as a consequence of the drought. Consequently, the cost of production per ton produced was Ps.345 in fiscal year 2006 compared to Ps.225 in fiscal year 2005. This lower volume of cereals production did not allow a higher absorption or dilution of the costs structure. The increase in cost of production was mainly attributable to an increase in the price of raw materials.

Cattle

Cost of production from our Cattle segment increased 10.4%, from Ps.17.0 million in fiscal year 2005 to Ps.18.8 million in our fiscal year 2006. Direct costs per kilogram produced increased 12.1%, from Ps.1.14 in fiscal year 2005 to Ps.1.28 in fiscal year 2006, primarily as a result of (i) higher fattening and health costs as a consequence of the drought and (ii) to a lesser extent, the increase in the price of raw materials during fiscal year 2006 compared to fiscal year 2005. Although our total production volume decreased 8.0% in fiscal year 2006 compared to 2005, the increase in costs of production reflected a lower volume of tons produced per hectare, from 0.08 tons per hectare in fiscal year 2005 to 0.07 tons per hectare in fiscal year 2006.

Milk

Cost of production from our Milk segment increased 179.0%, from Ps.2.1 million in fiscal year 2005 to Ps.5.8 million in our fiscal year 2006, primarily as a result of:

a 99.5% increase in the level of milk production during fiscal year 2006;

a 16.2% increase in the direct and indirect costs as a consequence of the drought during fiscal year 2006; and

inauguration of our milking yard of the El Tigre farm which only generated income during the last four months of fiscal year 2005. Cost of production per thousand liters from the Milk segment increased from Ps.286 in fiscal year 2005 to Ps.401 in fiscal year 2006.

Sales

Sales for our fiscal year 2006 increased 43.7%, from Ps.78.2 million in fiscal year 2005 to Ps.112.3 million in fiscal year 2006, primarily as a result of a Ps.30.8 million increase in our Grain segment, Ps.4.4 million increase in our Milk segment, Ps.0.6 million increase in our Feed Lot segment and a Ps.1.5 million increase in our Other segment, partially offset by a Ps.3.1 million decrease in our Cattle segment.

Grains

Sales from our Grains segment increased 99.6%, from Ps.30.9 million in fiscal year 2005 to Ps.61.7 million in fiscal year 2006, primarily as a result of:

a 86.2% increase in the volume of sales in fiscal year 2006, from 164,104 tons in fiscal 2005 to 88,123 tons in fiscal year 2006; and

a 7.2% increase in average prices in fiscal year 2006, from Ps.351 per ton in fiscal year 2005 to Ps.376 per ton in fiscal year 2006.

Table of Contents

Although our volume of grain production volume was 28.7% lower in fiscal year 2006 than in fiscal year 2005, we had higher sales in this segment due to higher grain inventories at beginning of fiscal year 2006 compared to the beginning of fiscal year 2005.

	Grain Inventories (in tons)		
	Year ended June 30,		
	2005	2006	Change
Inventories at the beginning of the fiscal year	34,424	90,060	55,636
Purchases	18,480	21,182	2,702
Production	149,785	106,867	(42,918)
Sales	(88,123)	(164,104)	(75,981)
Transfer of unharvested crops to expenses	(24,506)	(25,690)	(1,184)
Inventories at the end of the fiscal year	90,060	28,315	(61,745)

Cattle

Sales from our Cattle segment decreased 8.5%, from Ps.36.8 million for fiscal year 2005 to Ps.33.7 million for fiscal year 2006. The decrease of 17.0% in the sales volume from this segment was compensated by an increase of 10.3% in the price of ton sold. Sales volume from this segment decreased from 17,783 tons to 14,762 tons, and the price of sale increased from Ps.2.07 per kilogram in fiscal year 2005 to Ps.2.28 per kilogram in fiscal year 2006. The decrease in the sales volume was mainly due to a lower level of beef cattle production of 854 tons and lower cattle stocks of 4,017 tons at the beginning of the fiscal year 2006 compared to fiscal year 2005. The cattle-beef average stock decreased from 96,231 heads in fiscal year 2005 to 91,500 in fiscal year 2006.

Milk

Sales from the Milk segment increased 127.9%, from Ps.3.5 million in fiscal year 2005 to Ps.7.9 million during fiscal year 2006, primarily as a result of:

a 99.5% increase in the production volume, mainly generated by the inauguration on March 1, 2005 of our milking yard of El Tigre farm; and

a 14.2% increase in average prices for milk, from Ps.474 per thousand liters in fiscal year 2005 to Ps.541 per thousand liters in fiscal year 2006.

Feedlot

Sales from our Feedlot segment increased 27.8%, from Ps.2.1 million in fiscal year 2005 to Ps.2.7 million in our fiscal year 2006, primarily as a result of the fact that during fiscal year 2006 the cattle raiser sent to our feed lot cattle of higher weight which required higher volumes of feed. This positive factor was partially offset by a 5.5% reduction in occupation levels of our feedlot, from an average of 16,300 heads during fiscal year 2005 to an average of 15,400 heads during fiscal year 2006.

Table of Contents

Other

Sales from Other segment increased 30.7%, from Ps.4.9 million during fiscal year 2005 to Ps.6.4 million in our fiscal year 2006, primarily as a result of a higher level of income from watering and other services to third parties and the increase of income arising from Futuros y Opciones.com.

Cost of sales

Cost of sales for our fiscal year 2006 were Ps.98.6 million, 34.8% higher than cost of sale for fiscal year 2005, primarily as a result of higher cost of sales in our Grain, Milk, Feedlot and Other segments of 74.9%, 127.9%, 24.9% and 35.4% respectively, which were partially offset by lower cost of sales in our Cattle segment of 7.9%.

Cost of sales as percentage of net sales were 93.6% in fiscal year 2005 and 87.8% in fiscal year 2006.

Grains

Cost of sales from our Grains segment increased 74.9%, from Ps.30.5 million in fiscal year 2005 to Ps.53.3 million during fiscal year 2006 primarily as a result of:

a 86.2% increase in grains sales volume;

higher average price levels of commodities during fiscal year 2006; and

higher level of grain inventories at the beginning of fiscal year 2006 that reduced our cost of sales for such fiscal year.

Cattle

Cost of sales from our Cattle business segment decreased 7.9%, from Ps.35.8 million in fiscal year 2005 to Ps.33.0 million during fiscal year 2006. This decrease was mainly due to a 17.0% decrease in sales volume compared to the previous fiscal year, as a consequence of the drought that adversely affected agricultural areas by reducing the average number of finished cattle sent to the feed lot. These effects were partially offset by a 10.3% increase in the average price of beef cattle during fiscal year 2006.

Milk

Cost of sales from our Milk segment increased 127.9%, from Ps.3.5 million in fiscal year 2005 to Ps.7.9 million during fiscal year 2006, primarily as a result of a 99.5% increase in milk sales volume during fiscal year 2006.

Feedlot

Cost of sales from our Feedlot segment increased 24.9%, from Ps.1.9 million in fiscal year 2005 to Ps.2.3 million in fiscal year 2006, primarily as a result of:

higher volumes of feed consumed as a consequence of incoming beef cattle of higher weight which consumed more feed, and

Table of Contents

an 8.5% increase in the average price per ton of feed, from Ps.191 in fiscal year 2005 to Ps.207 in fiscal year 2006, as a consequence of the increase in the price of corn during fiscal year 2006.

Cost of sales of this segment as percentage of sales from this segment decreased from 87.1% in fiscal year 2005 to 85.2% during our fiscal year 2006.

Other

Cost of sales from our Other segment increased 35.4%, from Ps.1.6 million in our fiscal year 2005 to Ps.2.1 million in fiscal year 2006, primarily as a result of higher costs arising from Futuros y Opciones.com.

Gross profit

As a result of the above-mentioned issues, our gross profit decreased 1.5%, from Ps.19.0 million during fiscal year 2005 to Ps.18.7 million in fiscal year 2006. Our gross margin, calculated as our gross profit divided by the sum of our production income and sales, decreased from 13.0% for fiscal year 2005 to 10.5% for fiscal year 2006 primarily as a result of:

a 4.4% decrease in gross profit from our Grain segment, from Ps.10.0 million for fiscal year 2005 to Ps.9.6 million for fiscal year 2006;

a 40.2% decrease in gross profit from our Cattle segment, from Ps.4.0 million for fiscal year 2005 to Ps.2.4 million for fiscal year 2006;

a 49.6% increase in gross profit from our Milk segment, from Ps.1.4 million for fiscal year 2005 to Ps.2.0 million for fiscal year 2006;

a 46.9% increase in gross profit from our Feed Lot segment, from Ps.0.3 million for fiscal year 2005 to Ps.0.4 million for fiscal year 2006; and

28.6% increase in gross profit from our Other segment, from Ps.3.3 million for fiscal year 2005 to Ps.4.3 million for fiscal year 2006.

Selling expenses

Selling expenses increased 53.8%, from Ps.6.6 million during fiscal year 2005 to Ps.10.1 million in our fiscal year 2006. Selling expenses from our Grains segment represented 85.4% of our total selling expenses, selling expenses from our Cattle segment represented 10.2% of our total selling expenses, and the remaining 3.9% was represented by selling expenses from our Other segment.

Grains

Selling expenses from the Grains segment as a percentage of sales from the same segment decreased from 15.3% during fiscal year 2005 to 14.1% during fiscal year 2006 as a result of lower cost of freight, conditioning and storage. Selling expenses per ton of grain sold decreased 1.7%, from Ps.54 in fiscal year 2005 to Ps.53 per ton in fiscal year 2006.

Table of Contents

Cattle

Selling expenses from our Cattle segment as percentage of sales from this segment decreased from 4.0% in fiscal year 2005 to 3.1% during fiscal year 2006 due to better commercial agreements with our clients.

Milk

Milk sales did not generate significant selling expenses during fiscal years 2005 or 2006, as all the production was marketed directly to dairy producers.

Administrative expenses

Administrative expenses increased 59.0%, from Ps.7.3 million in fiscal year 2005 to Ps.11.6 million in fiscal year 2006, mainly due to the increase in fees and other payments for services (includes consulting fees with respect to Sarbanes-Oxley compliance, accounting, legal and tax fees and migration system), salaries and social contributions, taxes, rates and contributions and office and administration expenses.

Net gain on sale of farms

Net gain on sale of farms decreased 50.5%, from Ps.20.0 million for the fiscal year 2005 to Ps.9.9 million for fiscal year 2006, primarily as a result of the following sales:

Fiscal year 2006:

On July 25, 2005 we sold 5,727 hectares of the El Gualicho farm in the Province of Córdoba for Ps.17.5 million, generating a gain of approximately Ps.9.9 million.

Fiscal year 2005:

On February 1, 2005 we sold 30,350 hectares of the Ñacurutú farm in the Province of Santa Fe for Ps.16.3 million, generating a gain of Ps.7.6 million;

On June 8, 2005, we sold 977 hectares of the San Enrique farm in the Province of Santa Fe for Ps.14.7 million, generating a gain of Ps.12.3 million; and

On June 29, 2005, we sold 2 hectares located in the Province of Catamarca for Ps.0.06 million, generating a gain of Ps.0.06 million.

Gain from inventory holding

Gain from inventory holding decreased Ps.62.0%, from Ps.11.2 million in fiscal year 2005 to Ps.4.2 million in fiscal year 2006, primarily as a result of an increase during fiscal year 2007 of prices for our holdings of cattle, grains and raw materials.

Operating income

Operating income decreased 69.4%, from Ps.36.3 million in fiscal year 2005 to Ps.11.1 million in fiscal year 2006. Our operating margin, calculated as our operating income divided by the sum of our production income and sales, decreased from 24.9% for fiscal year 2005 to 6.3% for fiscal year 2006 primarily as a result of:

Edgar Filing: CRESUD INC - Form 20-F

a 1.5% decreased in gross profit, from Ps.19.0 million for fiscal year 2005 to Ps.18.7 million for fiscal year 2006;

Table of Contents

a 53.8% increase in selling expenses, from Ps.6.6 million for fiscal year 2005 to Ps.10.2 million for fiscal year 2006;

a 59.0% increase in administrative expenses, from Ps.7.3 million for fiscal year 2005 to Ps.11.6 million for fiscal year 2006;

a 50.5% decrease in net gain on sale of farms, from Ps.20.0 million for fiscal year 2005 to Ps.9.9 million for fiscal year 2006; and

62.0% decrease in gain from inventory holding, from Ps.11.2 million for fiscal year 2005 to Ps.4.2 million for fiscal year 2006.

Net financial results

Our net financial income decreased 80.6%, from Ps.63.8 million in fiscal year 2005 to Ps.12.4 million in fiscal year 2006. The principal differences between both fiscal years were:

a Ps.53.9 million decrease of income realized in connection with a higher sale of notes of IRSA during fiscal year 2005 compared to fiscal year 2006; and

a Ps.3.6 million increase from net effect generated by the difference of exchange and interests

Our net financial income for fiscal year 2006 arose from (i) Ps.14.9 million of income for the sale of notes issued by IRSA and (ii) Ps.2.2 million of income derived from net exchange rate differences. These gains were partially offset by (i) a Ps.2.2 million loss generated by the tax on debits and credits and (ii) a Ps.2.5 million loss derived from interest and other.

Other income and expenses, net

Other income and expenses, net for fiscal year 2006 represented a loss of Ps.3.4 million compared to a loss of Ps.5.1 million during fiscal year 2005, primarily as a result of a lower negative impact of Ps.1.4 million for the personal assets tax on our shareholders.

Gain on equity investments

Income from related companies decreased 21.2%, from income of Ps.28.1 million in fiscal year 2005 to income of Ps.22.1 million during fiscal year 2006, primarily as a result of:

lower income of Ps.3.7 million of gain with respect to our investment in IRSA (including amortization of goodwill of Ps.0.3 million);

a loss of Ps.2.5 million with respect to our investment in BrasilAgro;

lower income of Ps.0.6 million of gain with respect to our investment in Agro Uranga S.A.; and

lower income of Ps.0.8 million with respect to our investments in other subsidiaries and affiliates companies which partially offset the above-mentioned gains.

Table of Contents

Management Fee

Under the consulting agreement entered into with Consultores Asset Management, we pay a fee equal to 10% of our net income for agricultural advisory services and other management services. The fees amounted to Ps.3.8 million and Ps.8.5 million in the fiscal years 2006 and 2005, respectively.

Income tax expense

Our Income tax expenses decreased 85.6%, from Ps.37.8 million in fiscal year 2005 to Ps.5.4 million in fiscal year 2006. We recognized its income tax charge on the basis of the deferred tax liability method, thus recognizing temporary differences between accounting and tax assets and liabilities measurements. The main temporary differences derive from cattle stock and fixed assets valuation. For purposes of determining the deferred assets and liabilities, the tax rate expected to be in force at the time of their reversion or use, according to the legal provisions enacted as of the date of issuance of these financial statements (35%) has been applied to the identified temporary differences and tax losses.

Minority interest

During fiscal years 2005 and 2006, a positive participation of third parties of Ps.0.1 million and a negative participation of third parties of Ps.0.1 million respectively was recorded to reflect the minority participation in the income of subsidiaries.

Net income

Due to the above-mentioned issues, our net income decreased 57.2%, from Ps.76.8 million for fiscal year 2005 to Ps.32.9 million for fiscal year 2006. Our net margin, calculated as our net income for a fiscal year divided by the sum of our production income and sales was 52.7% for fiscal year 2005 and 18.5% for fiscal year 2006.

B. LIQUIDITY AND CAPITAL RESOURCES

Liquidity

Our principal sources of liquidity have historically been:

cash generated by operations;

cash from borrowings and financings arrangements (including cash from the exercise of warrants); and

cash proceeds from the sale of farms.

Our principal cash requirements or uses (other than in connection with our operating activities) have historically been:

capital expenditures for property, plant and equipment (including acquisitions or purchases of farms);

interest payments and repayments of short-term and long-term debt; and

Table of Contents

payments of dividends.

Our liquidity and capital resources include our cash and cash equivalents, proceeds from operating activities, sales of real estate investments, bank borrowing, long-term debt and capital financing.

Cash Flows

The table below shows, for the periods indicated, our cash flows:

	As of end for the year ended June 30,		
	2005	2006	2007
	(in millions of Pesos)		
Net cash (used in) provided by operating activities	(10.1)	(21.5)	(56.1)
Net cash provided by financing activities	1.7	92.3	115.8
Net cash provided by (used in) investing activities	62.7	(110.9)	(0.9)

Net increase (decrease) in cash and cash equivalents 54.3 (40.1) 58.8

As of June 30, 2007, we had cash and cash equivalents of Ps.86.2 million, an increase from the Ps.27.4 million balance as of June 30, 2006. The increase was primarily due to our acquisition and improvement of fixed assets for Ps.29.3 million, cash inflows from the sale of farms for Ps.25.3 million, cash outflows used in operating activities for Ps.56.1 million and dividend payments of Ps.5.5 million, partially offset by cash proceeds from the exercise of warrants for Ps.84.2 million and the net proceeds from short-term and long-term debt for Ps.39.4 million.

As of June, 2006, we had cash and cash equivalents totaling Ps.27.4 million, a decrease from the Ps.67.5 million balance as of June 30, 2005. This decrease was primarily due to our acquisition and improvement of fixed assets for Ps.55.8 million, an increase in investments in related companies of Ps.64.6 million, cash outflows used in operating activities for Ps.21.5 million and dividend payments of Ps.10.0 million, partially offset by cash proceeds from the exercise of warrants for Ps.53.6 million and the net proceeds from short-term and long-term debt for Ps.65.0 million.

*Net Cash (Used in) Provided by Operating Activities**2006/2007*

Net cash used in operations increased from Ps.21.5 million in fiscal year 2006 to Ps.56.1 million in fiscal year 2007. The increase in net cash used in operating activities was primarily due to the increase in current investments of Ps.1.1 million in fiscal year 2006 compared to fiscal year 2007, an increase in trade accounts receivable of Ps.27.2 million, an increase in other payables of Ps.3.8 million and an increase in inventories of Ps.39.6 million, which were partially offset by a Ps.28.7 million decrease in other receivables, in trade accounts payable and in social security payable, charges, taxes payable and advances to customers. Our operating activities resulted in net cash outflows of Ps.56.1 million for fiscal year 2007, essentially due to a decrease in current investments, in social security payable, charges, taxes payable and advances to customers and dividends collect of Ps.13.1 million that was offset by an increase in trade accounts receivable, other receivables, inventories and trade accounts payable amounting to Ps.83.9 million.

Table of Contents*2005/2006*

Net cash used in operations increased from Ps.10.1 million in fiscal year 2005 to Ps.21.4 million in fiscal year 2006. The increase in net cash used in operations activities was primarily due to the increase in other receivables, in trade accounts payable and in social security payable, charges, taxes payable and advances to customers for Ps.40.3 million, which were partially offset by a decrease in current investments of Ps.3.2 million in fiscal year 2005 compared to fiscal year 2006. Our operating activities resulted in net cash outflows of Ps.21.5 million for fiscal year 2006, essentially due to a decrease in current investments, inventories other debts and dividends collect of Ps.23.2 million that was offset by an increase in trade accounts receivable, other receivables, taxes payable, and advances to customers amounting to Ps.51.5 million.

*Net Cash Provided by (Used in) Investing Activities**2006/2007*

Net cash used in investing activities increased from Ps.110.9 million in fiscal year 2006 to a net cash out-flows of Ps.0.9 million in fiscal year 2007. Our investing activities resulted in net cash outflow of Ps.0.7 million in fiscal year 2007 mainly due to the acquisition and upgrading of fixed assets for Ps.29.3 million partially offset by the sale of fixed assets for Ps.25.3 million and collection of secured receivables from sale of farms for Ps.3.9 million.

2005/2006

Net cash used in investing activities decreased from Ps.62.7 million in fiscal year 2005 to a net cash out-flows of Ps.110.9 million in fiscal year 2006. Our investing activities resulted in net cash outflow of Ps.110.9 million in fiscal year 2006 mainly due to investments in related companies of Ps.64.6 million and the acquisition and upgrading of fixed assets for Ps.55.8 million partially offset by the sale of fixed assets for Ps.5.6 million and collection of secured receivables from sale of farms for Ps.5.7 million.

*Net Cash Provided by (Used in) Financing Activities**2006/2007*

Net cash provided from financing activities increased from Ps.92.3 million in fiscal year 2006 to Ps.115.8 million in fiscal year 2007 primarily due to a decrease in proceeds of financial loans for Ps.25.6 million partially offset by the increase by the exercise of warrants for Ps.30.6 million and by the payment of secured payable from the purchase of farms for Ps.14.3 million. Our financing activities resulted in net cash inflows of Ps.115.8 million primarily due to the exercise of warrants and proceeds from financial loans for Ps.168.7 million partially offset by dividend payments and payments of financial loans for Ps.50.6 million.

2005/2006

Net cash provided from financing activities increased from Ps.1.7 million in fiscal year 2005 to Ps.92.3 million in fiscal year 2006 primarily due to a increase in proceeds of financial loans for Ps.72.4 million and by the exercise of warrants for Ps.42.7 million partially offset by the payment of secured payable from the purchase of farms for Ps.16.5 million. Our financing activities resulted in net cash inflows of Ps.92.3 million primarily due to the exercise of warrants and proceeds from financial loans for Ps.137.8 million partially offset by dividend payments, payments of financial loans and payment of secured payable from purchase of farms for Ps.29.0 million.

Table of Contents

We believe our working capital is sufficient for our present requirements. In the event that cash generated from our operations is at any time insufficient to finance our working capital, we would seek to finance such working capital needs through new debt, equity financing or selective asset sales.

Our Indebtedness

Convertible Note due 2007

On November 21, 2002, we issued US\$50.0 million of convertible notes due November 2007. The convertible notes accrue interest at 8% per annum, payable on a semi-annual basis. The conversion price is US\$0.5078 per common share, which means that each Convertible Note may be exchanged for 1.9693 common shares. Additionally each Convertible Note contains a warrant attached that grants an option to acquire 1.9693 shares at a price of US\$0.6093 each.

From the date of issuance through June 30, 2007, the holders of our convertible notes exercised their conversion rights for a total of 47.2 million units with a face value of US\$1.0 each, issuing 92.9 million common shares with a face value of Ps.1.0 each. In addition, from the date of issuance through June 30, 2007, warrants issued by us were exercised for a total amount of 46.9 million, and 92.3 million shares were issued in exchange. We received funds aggregating US\$56.2 million.

As of June 30, 2007, the outstanding amount of our convertible notes and warrants was US\$2.8 million and 3.1 million, respectively, and the amount of our outstanding shares was 309,576,220. The term for the exercise of our outstanding warrants and the conversion of our outstanding convertible notes issued on November 21, 2002 expired on November 14, 2007. Throughout the conversion and exercise periods, holders of our warrants and convertible notes exercised an aggregate of 49,867,018 warrants and converted an aggregate of 49,910,874 convertible notes, respectively, increasing our capital stock to 320,774,772 issued and outstanding shares. As of the date of this annual report, there are no outstanding warrants or convertible notes to acquire our shares.

Credit Suisse Loan Agreement

On May 2, 2006, we entered into a loan agreement with Credit Suisse for a total consideration of US\$8 million. The maturity of this loan agreement is on November 2, 2008, and the interest rate is 3-month LIBOR plus 375 basis points. The Credit Suisse loan agreement was initially secured by a repo with IRSA's convertible bonds for a total of US\$10 million, which were subsequently replaced for 1,834,860 of IRSA's GDRs, plus a U.S. dollar- denominated amount that fluctuates in accordance with the trading price of IRSA's shares.

The Credit Suisse loan agreement imposes certain restrictions on our payment of dividends. We can pay or distribute, directly or indirectly, whether in cash or other property or in obligations to any other person up to US\$5,000,000 for any calendar year:

any dividend or other distribution on our capital stock or any interest on capital, excluding any dividends, distributions or interest paid solely in our capital stock or in options, warrants or other rights to acquire capital stock;

Table of Contents

in respect of the purchase, acquisition, redemption, retirement, defeasance or other acquisition for value of any of our capital stock or any warrants, rights or options to acquire such capital stock;

in respect of the return of any capital to our stockholders as such;

in connection with any distribution or exchange of property in respect of our capital stock, warrants, rights, options, obligations or securities to or with our stockholders as such; or

in return of any irrevocable equity contributions or in payment of interest other.

Other Loans

As a result of the investment opportunities seized in the course of the previous fiscal year, such as our ownership interest in BrasilAgro, the acquisition of farms and the growing investments in developments in Northwestern Argentina in the course of this fiscal year, we have assumed indebtedness for levels higher than those incurred in previous fiscal years, totaling as of June 30, 2007, indebtedness in the amount of Ps.138.7 million without including our convertible notes.

We also have a loan agreement with Banco Patagonia dated August 13, 2007 for US\$2.000.000 at an annual interest rate of 5.9% which is scheduled to mature on February 11, 2008. Pursuant to this agreement, we may not distribute cash dividends in an amount greater than the income resulting from our financial statements for the relevant fiscal year, nor shall we reduce our capital stock, except in case of mandatory reduction due to financial losses. We also have a loan agreement with Banco Santander Rio dated July 11, 2007 for Ps.9.0 million with an annual interest rate of 10.4%, which is scheduled to mature on July 6, 2008.

As of June 30, 2007, we had total loans for Ps.147.4 million, compound by: non-guaranteed loans, for Ps.97.2 million denominated in Pesos and Ps.16.8 million denominated in United States Dollars; Ps.24.7 million are guaranteed loan contracts for the purpose of financing our investment in BrasilAgro; and Ps.8.7 million are our convertible notes.

For the coming fiscal year we intend to match these maturities to our cash flows and do not rule out a reduction in the indebtedness as a result of future cash inflows arising from our ordinary course of business, the sale of assets or the exercise of warrants attached to our convertible notes.

Table of Contents

The following table presents our indebtedness as of June 30, 2007:

	Currency	Timetable of Maturity or Depreciation					Total	Interest rate Annual average %
		Under 1 year	Over 1 year and up to 2 years	Over 2 year and up to 3 years	Over 3 year and up to 5 years	Over 5 years		
Loans								
Non-guaranteed loans								Floating
	Ps.	97.2				97.2	(average 8.17)	
Non-guaranteed loans	US\$	16.8				16.8	5.6	6.05
Guaranteed loan contract	US\$		24.7			24.7	Libor + 3.75	
Cresud convertible notes	US\$	8.7				8.7	8.00	
Total debt		122.7	24.7			147.4		

(1) Exchange rate as of June 30, 2007 US\$1.00 = Ps.3.093.

(2) Includes earned interests

Our Capital Expenditures

Capital expenditures totaled Ps.29.3 million, Ps.55.8 million and Ps.25.9 million for the fiscal years ended June 2007, 2006 and 2005, respectively, including property and equipment acquired in business combinations. Our capital expenditures consisted of the acquisition and improvement of productive agricultural assets, as well as purchases of farms.

Our future capital expenditures for fiscal year 2008 will depend on the prevailing prices of land for agriculture and cattle as well as the evolution of commodity prices.

For the fiscal year ended June 30, 2007, our main investments consisted of Ps.9.7 million in the acquisition of real estate (including Ps.5.7 million in development of land reserve, Ps.3.9 million as partial payment for the purchase of 8 de Julio farm and Ps.0.1 million in forestry activities), Ps.1.5 million in improvements (including Ps.0.6 million in wire fences, Ps.0.3 million in watering troughs, Ps.0.2 million in roads, Ps.0.2 million in improvements in third parties buildings and Ps.0.2 million in corrals and leading lanes), Ps.0.9 million in facilities, Ps.0.3 million in vehicles, Ps.14.6 million for construction in progress (including Ps.10.8 million in development of land reserve, Ps.2.4 million in dairy farm and Ps.1.3 million in wire fences, new pastures, improvement in the main house and water extractions), Ps.0.8 million in machinery, Ps.0.6 million in computer and communication accessories, Ps.0.7 million in construction, Ps.0.1 million in forest products post and Ps.0.1 million in advances.

For the fiscal year ended June 30, 2006, our main investments consisted of Ps.49.2 million in the acquisition of real estate (including Ps.39.3 million as partial payment for the purchase of San Pedro farm, Ps.9.7 million in development of land reserve and Ps.0.2 million in forestry activities), Ps.0.6 million in improvements, Ps.0.1 million in furniture and equipment, Ps.1.2 million in facilities (including Ps.0.8 million in general machinery and Ps.0.4 million in milking facility), Ps.1.3 million in new pastures, Ps.0.9 million in vehicles, Ps.0.2 million in construction, Ps.1.13 million in machinery (including Ps.0.8 million in general machinery and Ps.0.3 million in milking machinery), Ps.0.3 million in computer and communication accessories, Ps.0.9 million in construction in progress, Ps.0.1 million in feed lot and Ps.0.7 million in advances.

For the fiscal year ended June 30, 2005, our main investments consisted of Ps.12.5 million in the acquisition of real estate (including Ps.8.9 million in the purchase of El Invierno farm, Ps.1.1 million in the additional purchase of 72 hectares of La Adela farm, Ps.2.3 million in

Table of Contents

development of land reserve and Ps.0.2 million in forestry activities), Ps.0.2 million in improvements, Ps.0.1 million in furniture and equipment, Ps.4.2 million in facilities (including Ps.1.9 million in irrigation facilities, Ps.1.8 million in milking facilities and Ps.0.5 million in general facilities), Ps.1.1 million in new pastures, Ps.0.3 million in vehicles, Ps.0.6 million in construction, Ps.1.8 million in machinery (including Ps.1.2 million in irrigation machinery, Ps.0.4 million in milking machinery and Ps.0.1 million in general machinery), Ps.0.3 million in computer and communication accessories, Ps.4.6 million in construction in progress (including Ps.2.2 million in development of land reserve, Ps.1.0 million in watering troughs, Ps.0.6 million in roads and Ps.0.6 million in wire fences), Ps.0.1 million in feed lot and Ps.0.1 million in advances.

IRSA's Results of Operations

Overview

IRSA's historical financial results have been, and are expected to continue to be, materially affected by the general level of economic activity and growth of per capita disposable income in Argentina (and in particular in the Buenos Aires metropolitan area where its activities and investments are concentrated). From December 2001 through most of 2002, Argentina experienced a crisis that virtually paralyzed its economy and led to radical changes in government policies. Argentina's trade and fiscal deficits and the rigidity of its fixed exchange rate system (known as the convertibility regime), combined with the country's excessive reliance on foreign capital and with its mounting external debt, resulted in a deep contraction of the economy and in banking and fiscal crises when capital started to leave the country.

In response to the political and economic crisis, the Argentine government undertook a number of far-reaching initiatives that significantly changed the monetary and foreign exchange regime and the regulatory framework for conducting business in Argentina. Between December 2001 and January 2002, Argentina abolished the fixed parity between the Peso and the U.S. dollar, rescheduled bank deposits, asymmetrically pesified debts and suspended payment on a significant portion of its public debt.

Most sectors of the Argentine economy were severely affected by the crisis and regulatory changes. In April 2002, the economy started its path to stabilization and realized a clear improvement of economic variables during the second half of the year, mainly as a result of expanding exports and decreasing imports. While the devaluation of the Peso had significant adverse consequences, it did result in a positive balance for Argentina's current account, which fostered a reactivation of domestic production. The sharp decline in the Peso's value against foreign currencies, together with a decline in production costs in U.S. dollar terms, made Argentine products relatively inexpensive in the export markets. At the same time, the costs of imported goods increased significantly due to the devaluation of the Peso, forcing Argentine consumers to substitute their purchase of foreign goods with domestic products, substantially boosting domestic demand for domestic products.

During the second half of 2002, Argentina's GDP increased 4.4%, and the consumer price index inflation was 8.0% for the six-month period ended December 31, 2002, compared to 30.5% for the six-month period ended June 30, 2002. The improving economic conditions, particularly the reduction of capital outflows from the Argentine economy and the banking system, allowed the government to begin lifting restrictions on bank withdrawals in November 2002.

Table of Contents

Despite the improvement in economic conditions during the second half of 2002, Argentina's overall GDP contracted 10.9% for the full year, receding to 1993 values, investment collapsed (with, for example, negative growth of 43% in the second quarter compared to the second quarter of 2001), and inflation increased sharply. The main impact of the crisis was the tremendous social hardship. Unemployment rose from 12.9% to 19.7% between 1998 and 2002, real wages declined 24% in 2002, and the poverty index increased from 29% of the population in 2000 to 52% in 2002.

In May 2003, Argentina's political environment was reorganized when Dr. Néstor Kirchner took office as president. The economy continued to show indications of recovery, as GDP grew 8.8% in 2003. A combination of sound fiscal and monetary policies kept consumer price inflation under control at 3.5% in 2003. During 2003, Argentina moved towards normalizing its relationship with the IMF, withdrew all the national and provincial governments' quasi-money securities from circulation (amounting to Ps.7.8 billion), and eliminated all deposit restrictions. The trade balance experienced a sustained surplus, aided by the rise in commodity prices and export volumes. Social indicators also improved. The unemployment rate decreased to 17.3% in 2003 and real wages began to recover.

During 2004 and 2005, the Argentine economy continued to grow. GDP grew 9.0% in 2004 and 9.0% in 2005 according to the Central Bank's survey of independent forecasting firms. Inflation remained relatively low in 2004 although it almost doubled to 6.1% from 2003, and it increased to 12.3% during 2005 and 9.8% during 2006.

In June 2005, the Argentine government completed a restructuring of the federal government's public debt, which had been in default since December 2001. Argentina reduced the outstanding principal amount of its public debt from US\$191.3 billion to US\$126.6 billion and negotiated lower interest rates and extended payment terms. Approximately US\$19.5 billion of defaulted bonds held by creditors who did not participate in the exchange offer remain outstanding.

Over the past four years, the Argentine economy has recovered significantly from the crisis, and the business environment has largely stabilized. IRSA believes that the current recovery has led to significant improvements and sets the stage for growth opportunities. Nevertheless, we cannot assure you that the favorable economic conditions that Argentina has experienced in recent years will continue. See **Risk Factors** **Risks Related to Argentina**.

Economic Recovery and Improvements in IRSA's Business Segments

Shopping centers

The profitability of IRSA's shopping center business is highly sensitive to consumer spending, overall GDP growth in Argentina and availability of financing. The contraction in consumer spending and the greater reliance on informal and low quality products that characterized the Argentine economy during the crisis has been significantly lessened along with an increase in GDP growth. This economic reactivation has significantly increased the revenues of Alto Palermo, IRSA's subsidiary engaged in shopping center ownership and operation. During the fiscal years ended June 30, 2005, 2006 and 2007, IRSA's shopping center revenues were Ps.165.5 million, Ps.215.0 million and Ps.270.3 million respectively.

Credit card operations

Tarshop S.A. is a subsidiary of Alto Palermo through which IRSA has rolled out a credit card business. Economic reactivation and the consequent increase in consumer spending have been fueling the growth in this business as in the case of the shopping center segment. Conceived originally as a marketing tool intended to stimulate sales at IRSA's shopping centers, Tarshop's

Table of Contents

credit card business has extended beyond IRSA's shopping centers, becoming one of the fastest growing credit card businesses in the consumer credit industry in Argentina. As of June 30, 2007, Tarshop had 712,000 outstanding credit card accounts with more than Ps.700 million in outstanding loans most of which had been securitized as of such date. During the fiscal years ended June 30, 2005, 2006 and 2007, the revenues of IRSA's credit card operations were Ps.64.6 million, Ps.123.0 million and Ps.213.0 million, respectively.

Development and sale of properties

Demand for new residential units is influenced by a number of factors, including employment rates, short-term and long-term interest rates, availability of government-sponsored and private mortgage financing programs and products, consumer confidence, governmental policies, demographic factors and, to a lesser extent, changes in property taxes, energy costs and federal income tax rates. In addition, the feasibility of developing and marketing new residential units depends on a number of factors such as the inventory of existing units, zoning restrictions, government policies, cost and availability of land, construction and sales costs and the availability of financing on reasonable terms, among other factors. At the time of the crisis, residential sales came to a virtual standstill and real estate prices fell sharply. During the last four years, the market has begun to recover, making gradual progress. This continuing market stabilization accounts for much of the revenue increase in IRSA's development and sale of properties segment. During the fiscal years ended June 30, 2005, 2006 and 2007, IRSA's development and sale of properties segment had revenues of Ps.32.3 million, Ps.104.0 million and Ps.75.8 million, respectively.

Offices and other non-shopping center rental properties

The profitability of offices and other non-shopping center rental properties segment is similarly affected by the macroeconomic factors described above. Favorable market conditions and the incidence of bankruptcy are also closely related to levels of vacancy and to the price at which IRSA can lease its premises which in turn adversely affect IRSA's revenues in this segment. During the 2001 Argentine economic crisis and its aftermath, few development projects were built in Argentina. However, demand for office space and rental properties has increased substantially during the last four years, significantly raising prices. During the fiscal years ended June 30, 2005, 2006 and 2007, IRSA's offices and other non-shopping center rental properties segment had revenues of Ps.19.4 million, Ps.30.6 million and Ps.55.7 million, respectively.

Hotel operations

The revenues from IRSA's hotel business are also highly sensitive to market conditions. For example, the devaluation of the Peso following the repeal of the Convertibility Law made Argentina a less expensive, and therefore a more attractive, tourist destination, significantly increasing the influx of foreign tourists. The appreciation of foreign currency also rendered domestic travel destinations more appealing to the Argentines, many of whom replaced foreign travel with local travel. During fiscal years ended June 30, 2005, 2006 and 2007, IRSA's Hotel operations segment had revenues of Ps.87.1 million, Ps.103.8 million and Ps.122.7 million, respectively.

Factors Affecting Comparability of Results of Operations

Described below are certain considerations that will facilitate an understanding of IRSA's overall operating results. These factors are based upon the information which is currently available to IRSA and do not represent all of the factors that are relevant to an understanding of IRSA's current and future results of operations.

Table of Contents

Recent gains on equity investees

IRSA currently owns 11.8% of Banco Hipotecario, Argentina's leading mortgage lender in terms of mortgage loans granted and provider of mortgage-related insurance and mortgage loan services. Banco Hipotecario consummated a restructuring of its financial indebtedness in 2004 and since that time has recorded improving results of operations. For fiscal years ended June 30, 2006 and 2007, IRSA's investment in Banco Hipotecario generated a gain of Ps.47.0 million and Ps.41.4 million respectively. The gains IRSA recorded in its 2006 and 2007 fiscal years represented 48.7% and 38.6%, respectively, of its consolidated net income for such years. We cannot give you any assurance that IRSA's investment in Banco Hipotecario will continue to generate similar gains, if any, in the future.

Variability of results due to substantial property acquisitions and dispositions

The development and sale of large residential and other properties does not yield a stable, recurring stream of revenue. On the contrary, large acquisitions and sales significantly affect revenues for a reporting period, making it difficult to compare IRSA's year-to-year results. For example, the Ps.31.0 million sale to a third party of 10% of the plot known as Santa María de Plata and the Ps.26.2 million sale of plot Z of Dique III have significantly impacted IRSA's results for its 2007 fiscal year. IRSA's historical revenues have varied from period to period depending upon the timing of sales of properties, and IRSA's future period-on-period results of operations are likely to continue to vary, perhaps significantly, as a result of periodic acquisitions and dispositions of properties.

Critical Accounting Policies and Estimates

In connection with the preparation of the IRSA's consolidated financial statements included in this annual report, IRSA has relied on variables and assumptions derived from historical experience and various other factors that IRSA deemed reasonable and relevant. Although IRSA reviews these estimates and assumptions in the ordinary course of business, the portrayal of its financial condition and results of operation often requires IRSA's management to make judgments regarding the effects of matters that are inherently uncertain on the carrying value of its assets and liabilities. Actual results may differ from those estimated under different variables, assumptions or conditions. In order to provide an understanding about how IRSA's management forms its judgments about future events, including the variables and assumptions underlying the estimates, and the sensitivity of those judgments to different variables and conditions, we have included comments related to each critical accounting policy described as follows:

revenue recognition;

purchase accounting of real estate assets;

useful lives of real estate assets;

provision for allowances and contingencies;

impairment of long-lived assets;

debt restructuring;

deferred income tax; and

Table of Contents

minimum presumed income tax.

Revenue recognition

IRSA primarily derives its revenues from domestic office space and shopping center leases and services operations, from the development and sale of properties, from credit card operations and from hotel operations.

Accounting for real estate barter transactions. During the years ended June 30, 2007, 2006 and 2005 IRSA entered into certain non-monetary transactions with third parties pursuant to which IRSA sold plots of land in the ordinary course of business in exchange for cash and/or other real estate properties. Under Argentine GAAP, these transactions were recorded based on the fair value of the assets involved and, as a result, a gain or loss was recognized at the time of the exchange. IRSA believes that this accounting policy is a critical accounting policy because the impact of accounting for real estate barter transactions under this method could have a material effect on IRSA's consolidated balance sheet as well as on its results of operations.

Recognition of inventories at net realizable value. Inventories, on which IRSA received payments in advance that establishes the sales price and the terms and conditions of the contract assuring the closing of the transaction and the realization of the gain, are valued at net realizable value. At June 30, 2007, payments for Ps.20.7 million were valued according to these criteria, which was principally applied to the following developments: Dock III Plot X for Ps.18.4 million and San Martín de Tours for Ps.1.5 million. IRSA believes that the accounting policy related to recognition of inventories at net realizable value is a critical accounting policy because the impact of accounting under this method could have a material effect on IRSA's consolidated balance sheet as well as on its results of operations. The performance of a sensitivity analysis, which reduced the market value of the properties by 5%, would have resulted in a smaller Gain from recognition of inventories at net realizable value by Ps.2.3 million for IRSA's fiscal year ended June 30, 2007.

Leases and services from shopping center operations. IRSA accounts for its leases with tenants as operating leases. IRSA generally charges tenants a rent which consists of the higher of (i) a monthly base rent (the Base Rent) and (ii) a specified percentage of the tenant's monthly gross retail sales (the Percentage Rent) (which generally ranges between 4% and 8% of tenant's gross sales). Furthermore, pursuant to the rent escalation clause in most leases, the tenant's Base Rent generally increases between 4% and 7% each year during the term of the lease. Certain of IRSA's lease agreements contain provisions which provide for rents based on a percentage of sales or based on a percentage of sales volume above a specified threshold. IRSA determines the compliance with specific targets and calculate the additional rent on a monthly basis as provided for in the contracts. Thus, IRSA does not recognize contingent rents until the required thresholds are exceeded.

IRSA's lease agreements vary from 36 to 120 months. Law No. 24,808 provides that tenants may rescind commercial lease agreements after the initial six months, upon not less than 60 days' written notice, subject to penalties of one and a half months rent if the tenant rescinds during the first year of its lease, and one month of rent if the tenant rescinds after the first year of its lease.

IRSA also charges its tenants a monthly administration fee, prorated among the tenants according to their leases, which varies from shopping center to shopping center, relating to the administration and maintenance of the common area and the administration of contributions made by tenants to finance promotional efforts for the overall shopping centers operations. IRSA recognizes administration fees monthly when earned. In addition to rent, IRSA generally charges

Table of Contents

tenants admission rights. Admission rights are non-refundable admission fees that tenants may be required to pay upon entering into a lease or upon lease renewal. An admission right is normally paid in one lump sum or in a small number of monthly installments. IRSA recognizes admission rights using the straight-line method over the life of the respective lease agreements. Furthermore, the lease agreements generally provide for the reimbursement of real estate taxes, insurance, advertising and certain common area maintenance costs. These additional rents and tenant reimbursements are accounted for on the accrual basis.

IRSA also derives revenues for parking lot fees charged to visitors. IRSA recognizes parking revenues as services are performed.

Leases and services from office and other buildings. IRSA accounts for its leases with tenants as operating leases. IRSA charges tenants a base rent on a monthly basis. IRSA recognizes rental income on a straight-line basis over the term of the leases.

Development and sale of properties. IRSA records revenue from the sale of properties when all of the following criteria are met: (a) the sale has been consummated (a sale is not considered consummated until (i) the parties are bound by the terms of a contract, (ii) all consideration has been exchanged, (iii) any permanent financing for which the seller is responsible has been arranged and (iv) all conditions precedent to the closing have been performed); (b) IRSA determines that the buyer's initial and continuing investments are adequate to demonstrate a commitment to pay for the property (the adequacy of a buyer's initial investment is measured by (i) its composition and (ii) its size compared with the sales value of the property); (c) IRSA's receivables are not subject to future subordination (IRSA's receivables will not be placed in or occupy a lower rank, class or position with respect to other obligations of the buyer); and (d) IRSA has transferred to the buyer the risk and rewards of ownership and does not have a continuing involvement in the property.

IRSA generally enters into purchase and sale agreements with purchasers of units in its residential development properties prior to the commencement of construction. Pursuant to this practice, IRSA initiates its marketing and sales efforts on the basis of already-commissioned architectural designs and model units. As a general rule, purchasers pay a booking charge for the units and subsequently enter into fixed price purchase and sale agreements. The balance of the purchase price is due upon delivery of the constructed and completed unit.

Construction of such residential development properties is done pursuant to turn-key contracts with major Argentine and South American construction companies that provide for construction to be completed within a prescribed period and budget, subject to customary exceptions.

IRSA uses the percentage-of-completion method of accounting with respect to sales of development properties under construction effected under fixed-priced contracts. Under this method, revenue is recognized based on the ratio of costs incurred to total estimated costs applied to the total contract price. IRSA does not commence revenue and cost recognition until such time as the decision to proceed with the project is made and construction activities have begun.

The percentage-of-completion method of accounting requires management to prepare budgeted costs (i.e., the estimated costs of completion) in connection with sales of properties and/or units. All changes to estimated costs of completion are incorporated into revised estimates during the contract period.

Table of Contents

Under this method of accounting, revenues for work completed may be recognized in the statement of income prior to the period in which actual cash proceeds from the sale are received. In this situation, a deferred asset is recorded. Alternatively, and as is more common for IRSA, where property and/or unit purchasers pay IRSA an advance down-payment and monthly cash installments prior to the commencement of construction, a liability is recorded. This is recorded as a customer advance in the financial statements.

Credit card operations

IRSA derives revenues from credit card transactions which primarily are comprised of (i) merchant discount fees which are recognized when transactional information is received and processed by the Company; (ii) data processing services which consist of processing and printing cardholders account statements, and which are recognized as services are provided; and (iii) life and disability insurance charges to cardholders which are recognized on an accrual basis.

Hotel operations

IRSA recognizes revenues from occupation of rooms, catering, and restaurant facilities as earned on the close of each business day.

Purchase accounting of real estate assets

IRSA allocates the purchase price to assets acquired and liabilities assumed on a gross basis based on their fair values at the date of acquisition pursuant to the provisions of Technical Resolution No. 18 Specific Considerations for the Preparation of Financial Statements (RT No. 18). In estimating the fair value of the tangible and intangible assets and liabilities acquired, IRSA considers information obtained about each property as a result of IRSA's due diligence, marketing and leasing activities. It applies various valuation methods, such as estimated cash flow projections utilizing appropriate discount and capitalization rates, estimates of replacement costs net of depreciation, and available market information. Depending upon the size of the acquisition, IRSA may engage an outside appraiser to perform a valuation of the tangible and intangible assets acquired. IRSA is required to make subjective estimates in connection with these valuations and allocations.

When the sum of the individual fair values of the identifiable tangible and intangible assets exceeds the purchase price paid, negative goodwill exists. Under Argentine GAAP, when negative goodwill exists after an acquiring entity initially assigns values to all assets acquired and liabilities assumed, RT No. 18 states that the entity must first reassess whether all acquired assets and assumed liabilities have been identified and properly valued. If an amount of negative goodwill still results after this reassessment, intangible assets acquired (including above and below market leases, in-place leases and tenant relationships, as applicable), are subject to reduction. If after all of these intangible assets are reduced to zero and an amount of negative goodwill still remains, the remaining unallocated negative goodwill is amortized under the straight-line method over the weighted average useful life of the main tangible assets acquired.

Useful lives of real estate assets

IRSA is required to make subjective assessments as to the useful lives of its properties for purposes of determining the amount of depreciation to reflect on an annual basis with respect to those properties. These assessments have a direct impact on IRSA's net income. If IRSA would

Table of Contents

lengthen or shorten the expected useful life of a particular asset, it would be depreciated over more or less years and result in less or more depreciation expense and higher or lower net income.

Provisions for allowances and contingencies

IRSA provides for losses relating to mortgage, lease and other accounts receivable. The allowance for losses is recognized when, based on current information and events, it is probable that IRSA will be unable to collect all amounts due according to the terms of its agreements. Allowances are determined on a case-by-case basis, where applicable, by considering the present value of expected future cash flow or the fair market value of collateral if the loan is securitized. Determinations that an allowance should be recognized are dependent on information available at the time of the determination. As a result, future adjustments to the allowance may be necessary if future economic conditions differ substantially from the assumptions used at the time of the determination. IRSA has considered all events and/or transactions subject to reasonable and standard estimation procedures. The consolidated financial statements reflect these considerations.

IRSA has certain contingent liabilities with respect to existing or potential claims, lawsuits and other proceedings, including those involving labor and other matters. IRSA accrues liabilities when it is probable that future costs will be incurred and such costs can be reasonably estimated. Such accruals are based on developments to date, IRSA's estimate of the outcomes of these matters and IRSA's lawyers' experience in contesting, litigating and settling other matters. As the scope of the liabilities becomes better defined, there may be changes in the estimates of future costs, which could have a material effect on IRSA's future results of operations and financial condition or liquidity.

Impairment of long-lived assets

IRSA periodically evaluates the carrying value of its long-lived assets for impairment. IRSA considers the carrying value of a long-lived asset to be impaired when the expected cash flows, undiscounted and without interest, from such asset is separately identifiable and less than its carrying value. IRSA determines the fair market value of a long-lived asset primarily using independent appraisals and utilizing anticipated cash flows discounted at a rate commensurate with the risk involved. The reposition value is mainly determined using independent appraisals or projections of future cash flows. In that event, a loss would be recognized based on the amount by which the carrying value exceeds the fair market value of the long-lived asset. Impairments are allocated to the results of the period.

Under Argentine GAAP a previously recognized impairment loss is reversed when there is a subsequent change in estimates used to compute the fair market value of the asset. In that event, the new carrying value of the asset is the lower of its fair market value or the net carrying value the asset would have had if no impairment had been recognized. Both the impairment charge and the impairment reversal are recognized in earnings. U.S. GAAP prohibits the reversal of a previously recognized impairment charge.

IRSA believes that the accounting estimate related to asset impairment is a critical accounting estimate because:

it is highly susceptible to change from period to period because it requires company management and/or independent appraisers to make assumptions such as, future sales and cost of sale, future vacancy rates and future prices, which requires significant adjustments because actual prices and vacancy rates have fluctuated in the past and are expected to continue to do so; and

Table of Contents

the impact that recognizing an impairment would have on assets reported on IRSA's balance sheet as well as on the results of IRSA's operations could be material. Independent appraisals about future sales prices and future vacancy rates require significant judgment because actual sales prices and vacancy rates have fluctuated in the past and are expected to continue to do so.

As of June 30, 2002, IRSA had reviewed its assets in all segments for impairments due to the continued deterioration of the Argentine economy. As a result, as of June 30, 2002, IRSA had recognized an impairment of Ps.140.6 million. During fiscal years 2003 and 2005, IRSA also recognized impairment losses totaling Ps.14.0 million and Ps.0.2 million, respectively. As a result of increases in the fair market values of the assets for which IRSA had recognized impairment losses, IRSA partially reversed those impairment losses, recognizing gains of Ps.25.4 million, Ps.63.0 million, Ps.28.2 million, Ps.12.6 million and Ps.2.6 million, for the years ended June 30, 2003, 2004, 2005, 2006 and 2007 respectively. Assets related to our business segments represented approximately 98.5% of IRSA's total long-lived assets as of June 30, 2007.

The fair market value of IRSA's office and rental properties was determined following the rent value method, taking into consideration each property's future cash flow, its comparability with other properties in the market and its historic vacancy rates. The price per square meter of IRSA's properties varies according to the category and type of building, and to each property's idiosyncratic traits. Vacancy rates are the lowest in history with rates below 2%. Moreover, IRSA currently believes that a significant amount of new office space, comparable to its existing buildings, is not likely to become available in the City of Buenos Aires during IRSA's next two or three fiscal years. IRSA applied an assumed 5% vacancy rate in preparing its cash flow analyses. For buildings IRSA considers to be Class A (those having the best location and condition) the average price per square meter used was between Ps.68 and Ps.74 per square meter per month, while for buildings IRSA considers to be Class A/B (having very good location and/or condition) the average price was between Ps.37 and Ps.49 per square meter per month, and for buildings IRSA considers Class B/C (those having good location and/or condition) it was Ps.31 per square meter per month. The performance of a sensitivity analysis, which would have reduced the fair market value of these properties by 5%, would have resulted in a smaller reversal of impairment losses of Ps.0.4 million, as of June 30, 2007.

With respect to IRSA's Hotel Operations segment, the discounted cash flows methodology was applied by taking the forecasts of each hotel in a 10-year flow and discounting such estimated amounts at rates according to risk, location and other relevant factors. The cash flows to be discounted considered revenues per room, per guest, per additional charge as well as the fixed and variable expenditures related to the transaction. Rate increases and occupancy variations were estimated based on the information supplied by each hotel's management and comparing them to industry-specific data in the local market. IRSA believes that tourism activities and related industries in Argentina have grown in the range of 13% to 18% over the last 12 months, well above worldwide figures, according to inbound traveling and spending statistics provided by the National Tourism Agency.

Shopping centers were valued according to the rent value method. IRSA calculated discount rates considering each property's location, its comparability with other properties in the market, its historic rental income, vacancy rates and cash flow. The average discount rates IRSA

Table of Contents

used ranged between 10.0% and 10.4%, and the average price per leasable square meter was Ps.7,043 and the average vacancy rate was calculated taking into consideration the real vacancy.

IRSA used the open market method for determining the fair market value of its land reserves and inventories. IRSA estimated the value of each site by taking into consideration the value of the property according to its surface area and location, as well as the availability of inventory. The performance of a sensitivity analysis, which would have reduced the fair market value of these properties by 5% would have resulted in increased recognition of impairment losses as of June 30, 2007, of Ps.0.7 million.

Debt restructuring

Extension of the maturity date of Alto Palermo's Convertible Notes. On August 20, 2002, Alto Palermo issued an aggregate amount of US\$50.0 million of unsecured convertible notes in exchange for cash and the settlement of certain liabilities. These convertible notes accrue interest at a fixed annual interest rate of 10% (payable semiannually), are convertible at any time at the option of the holder into common shares (at a conversion ratio of US\$0.3240 per share) and originally matured on July 19, 2006. On May 2, 2006, Alto Palermo's noteholders resolved to extend the maturity date of these convertible notes through July 19, 2014, the remaining terms and conditions remained unchanged.

Under Argentine GAAP, an exchange or modification of debt instruments is deemed to result in a substantially different debt instrument if the present value of the cash flows under the terms of the new debt instrument is at least 10% different from the present value of the remaining cash flows under the terms of the original instrument. The new debt instrument should be initially recorded at fair value, and that amount should be used to determine the extinguishment gain or loss to be recognized.

Fair value should be determined by the present value of the future cash flows to be paid under the terms of the new debt instrument discounted at a rate commensurate with the risks of the debt instrument and time value of money. If it is determined that the original and new debt instrument are not substantially different, then a new effective interest rate is to be determined based on the carrying amount of the original debt instrument and the revised cash flows.

IRSA believes that the accounting policy related to the extension of Alto Palermo's convertible notes' maturity date is a critical accounting policy because it required IRSA's management to make an estimate of the present value of the future cash flows, using an estimated discount rate which is highly susceptible to changes from period to period. The impact on the fair market value of IRSA's debt instruments could be material. Based on the analysis performed, IRSA concluded that the instruments were not substantially different and accordingly the old instrument was not extinguished.

Deferred income tax

IRSA recognizes income tax using the liability method. Accordingly, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recorded or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in

Table of Contents

the period that includes the enactment date. Technical Resolution No. 17 requires companies to record a valuation allowance for that component of net deferred tax assets which is not recoverable.

IRSA believes that the accounting estimate related to deferred income tax is a critical accounting estimate because:

it is highly susceptible to change from period to period because it requires company management to make assumptions, such as future revenues and expenses, exchange rates and inflation among others; and

the impact that calculating income tax using this method would have on assets or liabilities reported on IRSA's consolidated balance sheet as well as on the income tax result reported in IRSA's consolidated statement of income could be material.

Minimum presumed income tax

IRSA calculates the minimum presumed income tax provision by applying the current 1% rate on computable assets at the end of the year. This tax complements the income tax. IRSA's tax obligation each year will coincide with the highest amount due under either of these two taxes. However, if the minimum presumed income tax provision exceeds income tax in a given year, the amount in excess of income tax can be offset against income tax arising in any of the following ten years.

IRSA has recognized the minimum presumed income tax provision paid in previous years as a credit as IRSA estimates that it will offset future years' income tax.

IRSA believes that the accounting policy relating to the minimum presumed income tax provision is a critical accounting policy because it requires management to make estimates and assumptions with respect to IRSA's future results that are highly susceptible to change from period to period, and as such the impact on IRSA's financial position and results of operations could be material.

Principal differences between Argentine GAAP and U.S. GAAP

The principal differences, other than inflation accounting, between Argentine GAAP and U.S. GAAP are related to the following:

the impact of certain U.S. GAAP adjustments on equity investees;

the accounting for marketable securities;

the application of different useful lives for depreciation purposes;

the deferral of certain preoperating and organization expenses under Argentine GAAP which are expensed as incurred under U.S. GAAP;

the accounting for a mortgage payable with no stated interest;

Table of Contents

the accounting for securitization programs;

the application of certain U.S. GAAP adjustments to the estimation of the fair value of net assets acquired;

the present-value accounting;

the restoration of previously recognized impairment losses accounting;

the accounting for convertible notes;

the accounting for troubled debt restructuring;

the accounting for real estate barter transactions;

the accounting for the appraisal revaluation of fixed assets;

the revenue recognition of deferred brokerage commissions over the term of the respective leases;

the escalation rental revenue under straight-line method over the term of the leases;

the amortization of fees related to the Senior Notes;

the accounting for software obtained for internal use;

the accounting for increasing rate debt;

the accounting for certain inventories to which we have received advance payments that fix sales price and the contractual terms assure the closing of the sale and the realization of the gain;

the differences between the price-level restated amounts of assets and liabilities and their historical basis, that under Argentine GAAP, are treated as permanent differences in accounting for deferred income tax calculation purposes while under U.S. GAAP are treated as temporary differences;

the effect of the reversal of gain from recognition of financial receivables at net realizable value.

the effect of the reversal of capitalized exchange differences.

Table of Contents

the effects on deferred income tax of the foregoing taxes of the above-mentioned reconciling items, as appropriate;

the effect on minority interest of the above-mentioned reconciling items, as appropriate;

the cumulative effect of initial application of SAB 108; and

the deferral of certain revenues from life and disability insurance and origination fees.

In addition, certain other disclosures required under U.S. GAAP have been included in the U.S. GAAP reconciliation. See note 17 to IRSA's audited consolidated financial statements included elsewhere in this annual report.

Net income under Argentine GAAP for the years ended June 30, 2005, 2006 and 2007 was approximately Ps.103.2 million, Ps.96.6 million and Ps.107.1 million, respectively, compared to approximately Ps.129.4 million, Ps.89.9 million and Ps.103.2 million, respectively, under U.S. GAAP. Shareholders' equity under Argentine GAAP as of June 30, 2006 and 2007, was Ps.1,485.8 million and Ps.1,646.7 million, respectively, compared to Ps.1,158.4 million and Ps.1,358.7 million, respectively, under U.S. GAAP.

Business Segment Reporting

IRSA has determined that its reportable segments are those based on IRSA's method of internal reporting. Accordingly, IRSA has six reportable segments. These segments are shopping centers, credit card operations, development and sale of properties, offices and other non-shopping center rental properties, hotel operations and financial operations and others.

A general description of each segment follows:

Shopping centers. This segment includes the operating results of IRSA's shopping centers principally consisting of lease and service revenues from tenants.

Credit card operations. IRSA operates a credit card consumer finance business through Alto Palermo's majority-owned subsidiary Tarshop. IRSA's Credit card operations consist primarily of lending and servicing activities relating to the credit card products IRSA offers to consumers at shopping centers, supermarkets and street stores. IRSA finances a substantial majority of IRSA's credit card activities through securitization of the receivables underlying the accounts IRSA originates. IRSA's revenues from credit card transactions are derived from interest income generated by financing and lending activities, merchants' fees, insurance charges for life and disability insurance and fees for data processing which consist of processing and printing cardholder's account statement.

Development and sale of properties. This segment includes the operating results of IRSA's construction and/or sale of residential buildings business.

Offices and other non-shopping center rental properties. This segment includes the operating results from IRSA's lease and service revenues for office space and other non-retail building properties.

Hotel operations. This segment includes the operating results of IRSA's hotels principally comprised of room, catering and restaurant revenues.

Table of Contents

Financial operations and others. This segment primarily includes revenues and associated costs generated from the sale of equity securities, other securities-related transactions and other non-core activities.

IRSA measures its reportable segments based on net income. Inter-segment transactions, if any, are accounted for at current market prices. IRSA evaluates performance and allocates its resources to each segment based on net income. IRSA does not depend on any one customer for the majority of its business.

Allocation of expenses and other gains to business segments

Allocation of selling expenses to business segments

Selling expenses directly attributable to the shopping centers, credit card operations and hotel operations segments are directly allocated to these segments. These expenses are incurred individually by these segments. All other selling expenses are allocated appropriately among the remaining segments based on the specific segment which incurred the expenses.

Allocation of administrative expenses to business segments

Administrative expenses directly attributable to the shopping centers, credit card operations and hotel operations segments are directly allocated to these segments. These expenses are incurred individually by these segments. All other administrative expenses are prorated among the Development and sale of properties segment and the offices and other non-shopping center rental properties segments based on the percentage of the operating assets and revenues generated by each segment. Accordingly, 53.1% and 46.9% of administrative expenses (excluding expenses directly attributable to the shopping centers, credit card operations and hotel operations segments) are allocated to the development and sale of properties segment and the offices and other non-shopping center rental properties segments, respectively.

Allocation of results from retained interest in securitized receivables to business segments

Alto Palermo's profits from its interest in Tarjeta Shopping are allocated to IRSA's credit card operations segment.

Allocation of results from operations and holdings of real estate assets, net

These results are allocated to the segment that generates them, which are shopping centers, development and sales of properties, offices and other non-shopping center rental properties and hotel operations.

Allocation of the amortization of goodwill

Includes, principally, the amortization of goodwill generated from (i) the acquisition of Alto Palermo, (ii) the acquisition of Alto Palermo's subsidiaries, (iii) the purchase of Alto Palermo's Convertible Notes and (iv) the acquisition of 33% interest in Palermo Invest. The amortization is allocated to the segment that generates the corresponding goodwill.

Table of Contents

Allocation of financial results to business segments

Financial results, net

Includes interest income, interest on discounting of assets and liabilities, gain on financial operations, financial expenses, exchange gain (loss) and other financial results allocated to each segment, as described below.

Gain (loss) on financial operations

The Shopping centers, Credit card operations and Hotel operations segments each manage their financial operations individually. The results generated on such operations are directly allocated to these segments. The remaining financial gains or losses are shown in the Financial operations and others segment since they are not specifically generated by any other separate segment.

Interest income, interest on discounting of assets and liabilities and financial expenses

Only the results generated by Alto Palermo, Tarjeta Shopping and IRSA's hotels are recorded in the Shopping centers, Credit card operations and Hotel operations segments, respectively. The remaining results are prorated among Development and sale of properties, Offices and other non-shopping center rental properties, Shopping centers, Credit card operations, Hotel operations and Financial operations and others in proportion to the corresponding assets to each segment.

Exchange gain (loss) and other financial results

In the case of Shopping centers, Credit card operations and Hotel operations, exchange gains (losses) and other financial results are attributed to the segments giving rise to them. The remaining items are recorded in Financial Operations and Others as they are not directly related to any segment.

Allocation of (Loss) gain on equity investees

(Loss) gain on equity investees is allocated to the corresponding segments. (Loss) gain on equity investees carrying out activities not falling under any of IRSA's segments of activity are recorded under Financial operations and Others.

Allocation of other expenses, net

The Shopping centers, Credit card operations and Hotel operations segments each manage their expenses individually. The results generated by such operations are directly allocated to these segments. The remaining expenses are shown in the Financial operations and others segment since they are not specifically generated by any other separate segment.

Allocation of minority interest

Minority interests are allocated among IRSA's respective segments that generate them.

Table of Contents*Allocation of income tax and minimum presumed income tax*

The corresponding income tax is allocated to the segment that generates it and minimum presumed income tax is prorated among the Development and sale of properties, the Offices and other non-shopping center rental properties and the Financial Operations and Others segments.

The following tables show certain operating data by business activity:

As of and for year ended June 30, 2007	Development and sale of properties	Offices and other non-shopping center rental properties (a)	Shopping centers	Hotel operations	Credit card operations	Financial operations and others	Total
			(in thousands Ps.)

IRSA's Results of Operations for the Fiscal Years ended June 30, 2007 and 2006

Revenues

Revenues increased 27.9% from Ps.577.7 million in fiscal year 2006 to Ps.738.8 million in fiscal year 2007, primarily due to increases in the revenues of each of IRSA's credit card operations, shopping centers, offices and other non-shopping center rental properties and hotel operations segments, partially offset by a decrease in the revenues of IRSA's development and sale of properties segment.

Table of Contents

Shopping Centers

Revenues from IRSA's shopping centers segment increased 25.7% from Ps.215.0 million in fiscal year 2006 to Ps.270.3 million in fiscal year 2007. This increase was principally due to a Ps.55.3 million increase in revenues from rentals and admission rights as a consequence of: (i) an 18.0% increase in the average rental price per square meter and (ii) a 24.3% increase in the total sales of IRSA's lessees, from Ps.2,273.3 million during fiscal year 2006 to Ps.2,825.8 million during fiscal year 2007, resulting in a Ps.552.5 million increase in revenues from variable rental payments. The average occupancy rate of IRSA's shopping centers decreased from 99.1% in fiscal year 2006 to 97.0% in fiscal year 2007.

Credit Card Operations

Revenues from IRSA's Credit Card segment increased 73.2% from Ps.123.0 million in fiscal year 2006 to Ps.213.0 million in fiscal year 2007. This increase was caused by a number of factors, including:

favorable macroeconomic conditions in fiscal year 2007, which showed a general increase in consumption;

an increase of 201,114 in the number of newly issued credit cards;

the opening of four new branches;

an increase of 90.5% in sales made with IRSA's shopping card and an increase of 49% in the number of stores accepting IRSA's card; and

an increase of income from financial operations and others.

Revenues from IRSA's Financial Operations and Others segment remained stable with respect to fiscal year 2006. Revenues included in this segment represents fees for services unrelated to IRSA's Others segments.

Development and Sale of Properties

Revenues from IRSA's development and sale of properties segment decreased 27.1% from Ps.104.0 million in fiscal year 2006 to Ps.75.8 million in fiscal year 2007. This business segment generally does not show consistently recurring revenues due to the nature of IRSA's business. As a result, period-on-period comparisons may vary significantly depending on the projects that IRSA is developing and their degree of completion. The decrease of the revenues of this segment in fiscal year 2006 was principally due to the absence in fiscal year 2007 of Ps.104.0 million of revenues which were recognized during fiscal year 2006 principally arising from the following operations:

Ps.41.8 million from the sale of parcel Y, Dock III;

Ps.23.0 million from the sale by IRSA's subsidiary Alto Palermo of a parcel of land near its Paseo Alcorta shopping center;

Table of Contents

Ps.22.8 million from the sale of block 36 of the parcel called Terrenos de Caballito; and

Ps.10.0 million from the sale of Edificios Cruceros units.

The absence in fiscal year 2007 of the Ps.104.0 million of revenues mentioned above was partially offset by the following revenues recognized during fiscal year 2007:

Ps.31.0 million from the sale to third parties of 10% of IRSA's Santa María del Plata land reserve;

Ps.26.2 million from the sale of plot Z, Dock III;

Ps.8.6 million from the sale of units in San Martín de Tours; and

Ps.8.4 million from the sale of Edificios Cruceros units.

Offices and Other Non-Shopping Center Rental Properties

Revenues from IRSA's Offices and Other Non-Shopping Center Rental Properties increased 82.2% from Ps.30.6 million in fiscal year 2006 to Ps.55.7 million in fiscal year 2007. This increase was primarily due to a Ps.25.5 million increase in the revenues from office rentals, from Ps.27.4 million in fiscal year 2006 to Ps.52.9 million in fiscal year 2007. This increase in revenues from office rentals was due to:

an increase, from 94.0% in fiscal year 2006 to 99.1% in fiscal year 2007, in IRSA's average occupancy rates in offices for lease due to IRSA's inclusion in fiscal year 2007 of Dock del Plata and Bouchard 551 and Reconquista 823 (which were 100.0% occupied);

a 93.3% increase in annual rentals from offices for lease arising principally from (i) price increases in the following buildings which increased IRSA's total leasable area of Class A buildings by 53% from 78.115 to 119.360 square meters: Intercontinental Plaza resulting in higher rents of Ps.5.5 million, Bouchard 710 resulting in higher rents of Ps.3.1 million, Maipú 1300 resulting in higher rents of Ps.2.5 million and Libertador 498 resulting in higher rents of Ps.2.4 million (ii) the acquisition of two new premium buildings: Bouchard 551 (acquired in March 2007) which generated rental revenues in fiscal year 2007 of Ps.3.9 million and Dock del Plata (acquired in November 2006) which generated rental revenues in fiscal year 2007 of Ps.3.1 million; and

The occupancy rate of the offices and other non-shopping center rental properties segment increased from 96.9% in fiscal year 2006 to 97.4% during fiscal year 2007.

Hotel Operations

Revenues from IRSA's hotel operations increased 18.2% from Ps.103.8 million in fiscal year 2006 to Ps.122.7 million in fiscal year 2007, principally due a 23.7% increase in the average price per room in IRSA's hotels, from Ps.379.0 in fiscal year 2006 to Ps.469.0 in fiscal year 2007. In fiscal year 2007, revenues from the Hotel Llao Llao increased Ps.8.9 million, revenues from the Hotel Intercontinental increased Ps.6.0 million and revenues from the Hotel Sheraton Libertador increased Ps.4.0 million, in each case compared to fiscal year 2006. These improvements in fiscal year 2007 were partially offset by a decrease in average occupancy rates from 78.7% in fiscal year 2006 to 74.0% during fiscal year 2007.

Table of Contents

Costs

IRSA's costs increased 27.8% from Ps.243.8 million in fiscal year 2006 to Ps.311.6 million in fiscal year 2007 as a result of an increase in costs of each of IRSA's business segments during fiscal year 2007 other than Financial Operations and Others. IRSA's total costs as a percentage of IRSA's revenues remained flat at 42.2% for each of fiscal year 2006 and 2007.

Credit Card Operations

Cost of the Credit card operations segment increased 73.6%, from Ps.43.9 million during fiscal year ended June 30, 2006 to Ps.76.3 million during fiscal year ended June 30, 2007. This increase, which reflected the expansion of IRSA's credit card operations in fiscal year 2007, was primarily due to:

a Ps.11.0 million increase in the cost of salaries and social security charges;

a Ps.9.8 million increase in expenses for interest and commissions;

a Ps.5.7 million increase in charges for taxes, rates, contributions and services; and

a Ps.2.8 million increase in fees and services payable to third parties.

The cost of Credit card operations as percentage of revenues from such segment remained flat at 35.8% in each of fiscal years 2006 and 2007.

Financial Operations and Others

The cost of the Financial Operations and Others segment decreased Ps.0.6 million, from Ps.1.4 million in fiscal year 2006 to Ps.0.8 million in fiscal year 2007. Costs included in this line represent expenses unrelated to IRSA's other segments.

Shopping Centers

Costs of the Shopping Centers segment increased 17.7%, from Ps.77.4 million in fiscal year 2006 to Ps.91.1 million in fiscal year 2007. This increase was primarily due to:

a Ps.6.6 million increase in costs related to renovation of shopping center common areas;

a Ps.4.7 million increase in depreciation and amortization charges due to the depreciation of fixed assets; and

a Ps.2.3 million increase in costs for unrecovered expenses.

The cost of the Shopping Centers segment as percentage of the revenues from such segment decreased from 36.0% in fiscal year 2006 to 33.7% during fiscal year 2007.

Table of Contents

Development and Sale of Properties

Costs related to Development and Sale of Properties increased 6.7%, from Ps.54.2 million in fiscal year 2006 to Ps.57.8 million in fiscal year 2007. This business segment generally does not show consistently recurring costs due to the nature of IRSA's business. As a result, period-on-period comparisons may vary significantly depending on the projects that IRSA is developing and their degree of completion. The increase in costs of this segment was principally due to the following costs incurred in fiscal year 2007:

Ps.26.2 million related to the sale of plot Z of Dock III;

Ps.12.9 million related to the sale of 10% of the Santa María del Plata land reserve;

Ps.8.2 million related to the sale of San Martín de Tours units; and

Ps.3.2 million related to the sale of Edificio Cruceros units.

The foregoing cost increases in fiscal year 2007 were partially offset by the non-recurrence in fiscal year 2007 of the following costs which were incurred in fiscal year 2006:

Ps.18.4 million in costs related to the sale of Alcorta Plaza (through Alto Palermo);

Ps.11.3 million of costs related to the sale of block 36 of the plot called Terrenos de Caballito ;

Ps.9.7 million of costs related to the sale of plot Y, Dock III; and

Ps.8.8 million of costs related to the sale of Edificios Cruceros units.

Costs included in this segment as percentage of revenues from such segment increased from 52.1% in fiscal year 2006 to 76.3% in fiscal year 2007.

Offices and Other Non-Shopping Center Rental Properties

Costs of the Offices and Other Non-Shopping Center Rental Properties segment increased 85.5%, from Ps.9.0 million in fiscal year 2006 to Ps.16.7 million in fiscal year 2007. The principal cost component in this office segment is the depreciation of buildings rented, and the increase in fiscal year 2007 was principally due to (i) Ps.3.1 million higher depreciation in fiscal year 2007 as a result of the addition of two new rental properties, Dock del Plata and Bouchard 551 and (ii) Ps.5.9 million higher depreciation as a result of a change in the determination of remaining useful life of IRSA's rental buildings, which decreased from an average of 496 months in fiscal year 2006 to an average of 253 months in fiscal year 2007.

Hotel Operations

Costs of Hotel Operations increased 19.0%, from Ps.58.0 million in fiscal year 2006 to Ps.69.0 million in fiscal year 2007 principally due to increases in depreciation of assets, fees for commissions and services, food and beverages and salaries and social security charges in each case related to increasing revenues from such segment. Costs of Hotel Llao Llao increased Ps.6.0

Table of Contents

million, those of Hotel Intercontinental increased Ps.2.6 million and those of Hotel Sheraton Libertador increased Ps.2.4 million. Costs of hotel operations as percentage of revenues of such segment increased from 55.9% in fiscal year 2006 to 56.2% in fiscal year 2007.

Gross profit

As a result of the above, gross profit increased 27.9% from Ps.333.8 million in fiscal year 2006 to Ps.427.1 million in fiscal year 2007. IRSA's gross margin, calculated as IRSA's gross profit divided by IRSA's revenues, remained at 57.8% in fiscal years 2006 and 2007 primarily as a result of improvements in the gross margin of IRSA's Shopping Centers and Financial Operations and Others segments, partially offset by a decrease in the gross margin of IRSA's Development and Sale of Properties, Offices and Other Non-Shopping Center Rental Properties, Hotel Operations and Credit card operations segments.

Gain from recognition of inventories at net realizable value

This line reflects the valuation at net realization value of inventories in respect of which IRSA received prepayments of rentals pursuant to contractual terms which establish the consummation of the sales and the resulting profits. This business segment generally does not show consistently recurring gains, and as a result, period-on-period comparisons may vary significantly depending on the projects that IRSA is developing and their degree of completion. During fiscal year 2007, IRSA recognized Ps.20.7 million gain which was principally applied to the following developments:

Dock III - Plot X in an amount equal to Ps.18.4 million; and

San Martín de Tours in an amount equal to Ps.1.5 million.

During fiscal year 2006, IRSA recognized a gain of Ps.9.1 million primarily in respect of: Edificios Cruceros in an amount equal to Ps.4.6 million, Torres Rosario in an amount equal to Ps.3.5 million, Dock III - Plot Z in an amount equal to Ps.1.6 million and San Martín de Tours in an amount equal to Ps.(0.6) million.

Selling expenses

Selling expenses increased 89.2% from Ps.60.1 million in fiscal year 2006 to Ps.113.7 million in fiscal year 2007 principally due to an increase in the selling expenses of the Credit card operations and Shopping Centers segments of Ps.31.1 million and Ps.6.6 million, respectively. Selling expenses as a percentage of revenues increased from 10.4% in fiscal year 2006 to 15.4% in fiscal year 2007.

Shopping Centers

Selling expenses for the Shopping Centers segment increased 42.3%, from Ps.15.7 million in fiscal year 2006 to Ps.22.3 million in fiscal year 2007 due to: (i) a Ps.2.0 million increase in the costs of salaries and social security charges; (ii) a Ps.1.4 million increase in the charge for turnover tax; and (iii) a Ps.1.2 million increase in the charge for bad debts. Selling expenses related to Shopping Centers as a percentage of revenues from such segment increased from 7.3% in fiscal year 2006 to 8.3% in fiscal year 2007.

Table of Contents

Credit Card Operations

Selling expenses for the Credit Card Operations segment increased 100.5%, from Ps.30.9 million in the fiscal year ended June 30, 2006 to Ps.62.0 million in the fiscal year ended June 30, 2007 principally due to:

a Ps.11.7 million increase in advertising expenses;

a Ps.11.8 million increase in the charge for bad debts; and

a Ps.5.8 million increase in the charge for turnover tax.

Selling expenses of Credit Card Operations as a percentage of the revenues from such segment increased from 25.1% in the fiscal year 2006 to 29.1% in fiscal year 2007.

Development and Sale of Properties

Selling expenses for this segment consist of commissions and expenses derived from sales, stamp tax and on gross sales (gross revenues). Selling expenses for Development and Sale of Properties increased Ps.11.0 million in fiscal year 2007 principally due to a higher turnover tax charge during such fiscal year as a result of IRSA's sale of Solares de Santa María.

Offices and Other Non-Shopping Center Rental Properties

Selling expenses for the Offices and Other Non-Shopping Center Rental Properties segment increased Ps.3.4 million, from Ps.1.0 million in fiscal year 2006 to Ps.4.4 million in fiscal year 2007 due to a Ps.1.9 million higher charge for bad debtors by IRSA's subsidiary Inversora Bolívar, and higher charges for turnover tax and real estate commissions.

Hotel Operations

Selling expenses for the Hotel segment increased 13.9% from Ps.10.7 million in fiscal year 2006 to Ps.12.2 million in fiscal year 2007 principally due to increases in turnover tax, salaries and social security charges and commissions for tourism agencies, in each case reflecting an increase in the revenues of the segment in line with higher activity.

Administrative expenses

Administrative expenses increased 46.0% from Ps.96.9 million in fiscal year 2006 to Ps.141.4 million in fiscal year 2007 primarily due to an increase in administrative expenses in the Credit card operations segment and, to a lesser extent, increases in each of the remaining segments. Principal components of administrative expenses are salaries and social security charges, directors' fees, fees and remunerations for services and depreciation of fixed assets. Administrative expenses as a percentage of revenues increased from 16.8% in fiscal year 2006 to 19.1% in fiscal year 2007.

Shopping Centers

Administrative expenses of the Shopping Centers segment increased 26.6%, from Ps.25.8 million in fiscal year 2006 to Ps.32.7 million in fiscal year 2007 principally due to (i) a Ps.3.7 million increase in expenses for fees and third parties' services; (ii) a Ps.2.0 million increase in the charge for directors' fees and (iii) a Ps.1.3 million increase in expenses for taxes, rates and

Table of Contents

contributions mostly due to the tax on bank debits and credits. Administrative expenses of the Shopping Centers segment as a percentage of the revenues from such segment remained essentially flat, increasing from 12.0% in fiscal year 2006 to 12.1% in fiscal year 2007.

Credit Card Operations

Administrative expenses of the Credit card operations segment increased 75.0%, from Ps.25.9 million in fiscal year 2006 to Ps.45.4 million in fiscal year 2007. This increase was primarily due to:

a Ps.11.4 million increase in expenses for salaries, compensation, social security charges and personnel;

a Ps.2.4 million increase in expenses for rentals, taxes, rates and contributions; and

a Ps.3.0 million increase in expenses for fees and third parties services.

Administrative expenses of Credit card operations as a percentage of revenues from such segment increased from 21.1% in fiscal year ended 2006 to 21.3% during fiscal year 2007 as a result of a higher proportional average of these expenses in respect of the revenues increase of this segment.

Development and Sale of Properties

Administrative expenses of the Development and Sale of Properties segment increased 53.2%, from Ps.12.8 million in fiscal year 2006 to Ps.19.6 million in fiscal year 2007 due to: (i) a Ps.4.5 million increase for salaries, bonds and social security charges and directors' fees and (ii) a Ps.2.1 million increase in bank expenses. Administrative expenses of Development and Sale of Properties as a percentage of revenues from this segment increased from 12.3% in fiscal year 2006 to 25.9% in fiscal year 2007.

Offices and Other Non-Shopping Center Rental Properties

Administrative expenses of the Offices and Other Non-Shopping Center Rental Properties segment increased 48.7% from Ps.11.3 million in fiscal year 2006 to Ps.16.8 million in fiscal year 2007. The increase is principally due to an increase of Ps.4.0 million in salaries, bonds and social security charges and fees to directors and to a Ps.1.8 million increase in bank expenses. Administrative expenses of Offices and Other Non-Shopping Center Rental Properties as a percentage of revenues from such segment decreased from 37.0% in fiscal year 2006 to 30.2% in fiscal year 2007.

Hotel Operations

Administrative expenses of the Hotel segment increased 28.1% from Ps.21.0 million in fiscal year 2006 to Ps.26.9 million in fiscal year 2007, principally due to: (i) a Ps.1.7 million increase in administrative expenses of Hotel Intercontinental mostly due to an increase in salaries and social security charges, commissions and depreciation of fixed assets, (ii) a Ps.1.4 million increase in administrative expenses of Hotel Sheraton Libertador principally due to an increase in fees for services and in salaries and social security charges and (iii) a Ps.2.8 million increase in administrative expenses of Hotel Llao Llao principally due to increases in salaries and social security charges, fees for services due to higher sales and taxes, rates and contributions. Administrative expenses of Hotel Operations as a percentage of revenues from such segment increased from 20.2% in fiscal year 2006 to 21.9% in fiscal year 2007.

Table of Contents***Net income from retained interest in securitized receivables (Tarjeta Shopping)***

This gain reflects the result generated by Alto Palermo's participation in the Tarjeta Shopping credit card trusts. This gain increased 24.0%, from Ps.2.6 million in fiscal year 2006 to Ps.3.3 million in fiscal year 2007, primarily due to the creation in fiscal year 2007 of new credit card trusts in connection with new securitizations in such year.

Results from the operations and holdings of real estate assets, net

This line reflects the impairment losses and gains associated with the reversal of previously recognized impairment charges. Results from the operation and holding of real estate assets decreased 79.6%, from a gain of Ps.12.6 million in fiscal year 2006 to a gain of Ps.2.6 million in fiscal year 2007, principally recorded in Neuquén Project for Ps.2.2 million, Suipacha 652 for Ps.0.9 million, Avenida de Mayo 589 for Ps.0.7 million and Torres de Abasto for Ps.0.1 million, partially offset by a loss of Ps.1.5 million corresponding to Torres Rosario. During fiscal year 2006 the gain of Ps.12.6 million had been attributable to Caballito for Ps.6.5 million, Alto Rosario for Ps.3.5 million, Espacio Aereo Coto for Ps.1.4 million, Torre Constitución for Ps.0.7 million and Reconquista 823 for Ps.0.6 million.

Operating income

Operating income decreased 1.3% million from Ps.201.2 million in fiscal year 2006 to Ps.198.5 million in fiscal year 2007 mainly due to a decrease in the operating income of the Development and Sale of Properties segment that was partially offset by increases in operating income of each of IRSA's other segments. IRSA's operating margin, calculated as IRSA's operating income divided by IRSA's revenues, decreased from 34.8% for fiscal year 2006 to 26.9% for fiscal year 2007 primarily as a result of decreases in the operating margins of IRSA's Development and Sale of Properties, Offices and other non-Shopping Center Rental Properties, Shopping Centers, and Credit Card segments, partially offset by an increase in the operating margin of IRSA's Financial Operations and Others segment.

Shopping Centers

Operating income of Shopping Centers increased 18.2%, from Ps.105.6 million in fiscal year 2006 to Ps.124.8 million in fiscal year 2007 mostly due to a 25.7% increase in the revenues from this segment that was partially offset by increases of 17.7% in costs, 42.3% in selling expenses and 26.6% in administrative expenses. The operating income of this segment as a percentage of revenues from such segment decreased from 49.1% during fiscal year 2006 to 46.2% during fiscal year 2007 primarily as a result of a decrease during fiscal year 2007 in the gain generated by the reversal of previously recognized impairment charges which was only Ps.0.7 million in fiscal year 2007 compared to Ps.9.5 million in fiscal year 2006.

Credit Card Operations

Operating income of the Credit Card segment increased 31.4%, from Ps.24.8 million in fiscal year 2006 to Ps.32.6 million in fiscal year 2007 primarily due to a 73.2% increase in revenues from this segment that were partially offset by increases of 73.6% in costs, 100.5% in selling

Table of Contents

expenses and 75.0% in administrative expenses. The operating income of this segment as a percentage of the revenues from such segment decreased from 20.2% during fiscal year 2006 to 15.3% during fiscal year 2007 primarily as a result of the increase in selling expenses of almost 101% while the revenues from this segment increased 73.2%. IRSA's selling expenses in this segment increased at a greater rate than IRSA's revenues from this segment as a result of a Ps.11.9 million increase in the charge for bad debts.

Development and Sale of Properties

Operating income from the Development and Sale of Properties segment decreased 86.0% from Ps.44.3 million in fiscal year 2006 to Ps.6.2 million in fiscal year 2007 primarily due to a decrease in the revenues from this segment and increases in selling and administrative expenses, partially offset by higher gain from recognition of inventories at their net realizable value during fiscal year 2007. The operating income of this segment as a percentage of the revenues from such segment decreased from 42.6% during fiscal year 2006 to 8.2% during fiscal year 2007.

Offices and Other Non-Shopping Center Rental Properties

Operating income from the Offices and Other Non-Shopping Center Rental Properties segment increased 65.5%, from Ps.11.9 million in fiscal year 2006 to Ps.19.6 million in fiscal year 2007 primarily due to an 82.2% increase in the revenues from this segment. The operating income of this segment as a percentage of the revenues from such segment decreased from 38.8% during fiscal year 2006 to 35.2% during the fiscal year 2007 primarily as a result of the effect during fiscal year 2007 of the adjustment in the remaining useful life of IRSA's rental buildings which generated a loss of Ps.5.9 million reflected in the cost of this segment. Without considering this effect IRSA's operating income as a percentage of IRSA's revenues would have been 45.8% instead of 35.2%.

Hotel Operations

Operating income of Hotel Operations increased from Ps.14.6 million in fiscal year 2006 to Ps.14.7 million in fiscal year 2007 mostly due to an increase in revenues from this segment that was partially offset by increases in costs and expenses. The operating income of this segment as a percentage of the revenues from such segment decreased from 14.0% during fiscal year 2006 to 11.9% during fiscal year 2007, primarily as a Ps.2.4 million increase in depreciation due to a change in the determination of the remaining useful life of IRSA's three hotels, which decreased from an average of 408 months in fiscal year 2006 to an average of 207 months in fiscal year 2007.

Financial Operations and Others

Operating income of the Financial Operations and other operations segment increased Ps.0.5 million from Ps.0.1 million in fiscal year 2006 to Ps.0.6 million in fiscal year 2007. Operating revenues of this segment as a percentage of the revenues from such segment increased from 4.0% in fiscal year 2006 to 43.1% in fiscal year 2007 primarily as a result of a 40.9% decrease in the costs of this segment.

Amortization of goodwill

The amortization of the goodwill includes: (i) amortization of the goodwill of the following subsidiaries of Alto Palermo: Shopping Alto Palermo S.A., FIBESA, Tarshop, ERSAs and Empalme and (ii) of IRSA's own negative goodwill generated by IRSA's purchase of Alto Palermo and Palermo Invest S.A. shares. Amortization of goodwill increased (Ps.0.4 million), from a charge of Ps.1.1 million in fiscal year 2006 to a charge of Ps.1.5 million in fiscal year 2007.

Table of Contents

Financial results, net

Financial results, net increased Ps.45.0 million, from a net loss of Ps.40.9 million in fiscal year 2006 to a net gain of Ps.4.1 million in fiscal year 2007. The principal causes for this variation were:

the increase of Ps.40.4 million in results of financial operations mainly due to an increase of Ps.46.9 million in the fair market value of IRSA's investment in the mutual investment fund, Dolphin Fund Plc.;

a Ps.12.1 million positive exchange difference compared to fiscal year 2006 due to a lower depreciation during fiscal year 2007 of the Argentine peso versus the US dollar; and

Ps.9.9 million due to higher interest income in fiscal year 2007 of which Ps.7.6 million resulted from financial investments. These improvements were partially offset by a Ps.16.5 million increase in financial expenses in fiscal year 2007, principally due to higher interest expense resulting from the issuance of bonds by IRSA and Alto Palermo during fiscal year 2007.

Gain on equity investees

Gain from related companies decreased 3.9% from a gain of Ps.41.7 million in fiscal year 2006 to a gain of Ps.40.0 million in fiscal year 2007. This decrease principally resulted from a Ps.5.7 million decrease in the gain of Banco Hipotecario, from Ps.47.0 million in fiscal year 2006 to Ps.41.4 million in fiscal year 2007. This decrease was partially offset by the absence in fiscal year 2007 of the Ps.4.0 million loss incurred in fiscal year 2006 from IRSA's investment in Abril S.A.

Other income and expenses, net

Other income and expenses, net, decreased 22.8%, from a net expense of Ps.18.3 million in fiscal year 2006 to a net expense of Ps.14.1 million in fiscal year 2007 principally due to: (i) a Ps.7.5 million decrease in the allowance for uncollectible loans and (ii) a Ps.3.1 million increase for the recovery of allowances, which were partially offset in fiscal year 2007 by: (i) a Ps.4.5 million increase in charges for donations and (ii) a Ps.2.7 million increase in contingencies for lawsuits.

Income before taxes and minority interest

As a result of the above mentioned issue, income before taxes and minority interest increased 24.4% passing for an income of Ps.182.6 million in fiscal year 2006 to an income of Ps.227.1 million in fiscal year 2007.

Income tax and minimum presumed income tax

Income tax and minimum presumed income tax increased 48.9%, from Ps.58.8 million in fiscal year 2006 to Ps.87.5 million in fiscal year 2007. IRSA applied the deferred tax method to calculate IRSA's income tax for the two fiscal years, recognizing the temporary differences in the accounting and in tax assets and liabilities. IRSA's effective tax rate in the fiscal year 2007 was 38.5% compared to 32.2% in fiscal year 2006.

Table of Contents

The Ps.28.7 million variation was principally caused by the net impact of:

Ps.23.6 million increase in the expense for income tax for IRSA's company, from Ps.4.0 million during fiscal year 2006 to Ps.27.6 million during fiscal year 2007 due to the charge during fiscal year 2007 for Ps.11.6 million of deferred tax mostly caused by the sale of Santa María del Plata;

a Ps.12.9 million allowance for income tax in fiscal year 2007 mostly caused by the sale of shares in Banco Hipotecario and ownership units in Dolphin Fund Plc.;

a of Ps.7.8 million increase in the expense for income tax of Alto Palermo, from Ps.48.5 million in fiscal year 2006 to Ps.56.3 million in fiscal year 2007; and

a Ps.0.5 million increase in the expense for income tax of Nuevas Fronteras S.A.

Minority interest

The negative result caused by third parties' participation in subsidiaries increased 19.3% from a charge of Ps.27.2 million in fiscal year 2006 to a charge of Ps.32.4 million in fiscal year 2007 as a consequence of an increase in the income accounts of related companies in which IRSA has a minority interest (principally in the Shopping Centers and Credit card operations segments).

Net income

Due to the above-mentioned issues, net income increased 10.9% from Ps.96.6 million in fiscal year 2006 to Ps.107.1 million in fiscal year 2007.

IRSA's Results of Operations for the Fiscal Years ended June 30, 2006 and 2005.

Revenues

IRSA's revenues increased 56.2% from Ps.369.9 million for IRSA's 2005 fiscal year to Ps.577.7 million for its 2006 fiscal year, primarily as a result of increases in revenues in IRSA's Shopping Center and Development and Sale of Properties segments.

Credit Card Operations

Revenues from credit card operations increased 90.5% from Ps.64.6 million in fiscal year 2005 to Ps.123.0 million in fiscal year 2006, reflecting improved macroeconomic conditions and a related increase in the level of private consumption which enabled IRSA to open new branches, increase the number of credit cards issued and expand the number of shops that accept IRSA's credit cards.

Shopping Centers

Revenues from IRSA's Shopping Center segment increased 29.9% from Ps.165.5 million for its 2005 fiscal year to Ps.215.0 million for its 2006 fiscal year. The increase is attributed principally to an increase of Ps.48.1 million in revenues from leases and admission rights of IRSA's Shopping Centers, as a consequence of the 33.9% increase in sales by its tenants from Ps.1,698.1

Table of Contents

million for its 2005 fiscal year to Ps.2,273.3 million for its 2006 fiscal year. The average occupancy rate in IRSA's shopping centers was 99.1% for its 2006 fiscal year similar to 99% in its 2005 fiscal year.

Development and Sale of Properties

Revenues from IRSA's Development and Sale of Properties segment increased 221.8% from Ps.32.3 million for its 2005 fiscal year to Ps.104.0 million for its 2006 fiscal year. The increase in revenues from this segment was attributable principally to: (i) Ps.23.0 million of revenues from Alto Palermo's sale of Alcorta Plaza, a plot of land by Paseo Alcorta shopping center; (ii) Ps.22.7 million of revenues from the sale of block 36 of the plot named Terrenos de Caballito in IRSA's 2006 fiscal year; (iii) Ps.41.8 million of revenues from the sale of plot Y of Dock III during IRSA's 2006 fiscal year; and (iv) Ps.10.0 million of revenues from IRSA's sale of units of Edificios Cruceros in its 2006 fiscal year, partially offset by the absence in its 2006 fiscal year of Ps.23.6 million of revenues from the sale of a plot of Dock III and Ps.3.5 million of revenues from the sale of Madero 1020, both of which IRSA sold during its 2005 fiscal year.

Offices and Other Non-Shopping Center Rental Properties

Revenues from IRSA's Offices and Other Non-Shopping Center Rental Properties segment increased 57.3%, from Ps.19.4 million for its 2005 fiscal year to Ps.30.6 million for its 2006 fiscal year.

This increase was mainly due to: (i) a 52.1% increase in revenues from office rents, from Ps.18.0 million in IRSA's 2005 fiscal year, to Ps.27.4 million for its 2006 fiscal year. This increase in revenues is attributed to a 3.0% increase in average occupancy rates in IRSA's 2006 fiscal year and a 41.5% increase in average monthly rates of the majority of the buildings, principally due to the increase in accumulated annual rents in Bouchard 710 for Ps.5.4 million, Libertador 498 for 0.8 million, Maipú 1300 for Ps.0.7 million, Laminar Plaza for Ps.0.7 million, Suipacha 652 for Ps.0.4 million and Edificios Costeros Dock IV for Ps.0.5 million; and (ii) a 135.8% increase in revenues of other properties from Ps.0.9 million in IRSA's 2005 fiscal year to Ps.2.1 million for its 2006 fiscal year, mainly due to Santa María del Plata for an amount of Ps.1.2 million. The rate of occupancy in this segment increased 3.2% from 94.0% in June 2005 to 97.0% in June 2006.

Hotel Operations

Revenues from IRSA's hotel operations increased 19.1% from Ps.87.1 million for its 2005 fiscal year to Ps.103.8 million for its 2006 fiscal year, mainly due to an 18.2% increase in average price per room of IRSA's hotels from Ps.320 in 2005 to Ps.379.0 in 2006. On the other hand, IRSA's average occupancy rates remained stable at 78.7% during its fiscal year 2006 compared to 75.4% in its 2005 fiscal year. Revenues from Hotel Intercontinental increased by Ps.6.1 million, revenues from the Hotel Llao Llao increased by Ps.5.8 million and revenues from Hotel Sheraton Libertador increased by Ps.4.7 million.

Financial Operations and Others

Revenues from IRSA's Financial Operations and Others segment increased 50.4% from Ps.0.9 million for its 2005 fiscal year, to Ps.1.4 million for its 2006 fiscal year. Revenues included in this segment represent fees for services with no specific allocation to any of the previous segments.

Table of Contents***Costs***

IRSA's costs increased 45.1% from Ps.168.1 million for its 2005 fiscal year to Ps.243.8 million for its 2006 fiscal year, reflecting an increase in costs in each of IRSA's business segments during its 2006 fiscal year. Total costs as a percentage of revenues decreased from 45.4% for IRSA's 2005 fiscal year to 42.2% for its 2006 fiscal year.

Credit Card Operations

The cost of sales relating to Credit Card operations rose 90.2% from Ps.23.1 million for IRSA's 2005 fiscal year to Ps.43.9 million for its 2006 fiscal year, mainly due to (i) a cost increase of Ps.6.2 million in salaries and social security charges and Ps.3.0 million in taxes, dues and contributions, Ps.1.3 million of electricity and telephone expenses mainly as a result of the expansion of IRSA's operations, (ii) a higher charge in commissions and interest by a margin of Ps.5.6 million and (iii) an increase in fees and services of Ps.2.3 million mainly due to the new issues under the securitization program.

Shopping Centers

Costs related to Shopping Centers increased 10.9% from Ps.69.8 million for IRSA's 2005 fiscal year to Ps.77.4 million for its 2006 fiscal year. This increase was primarily due to an increase in depreciation and amortization expenses of Ps.4.5 million and an increase in the charges of unrecoverable expenses of Ps.2.6 million.

Development and Sale of Properties

Costs related to Development and Sale of Properties increased 209.0%, from Ps.17.5 million for IRSA's 2005 fiscal year to Ps.54.2 million for its 2006 fiscal year. The increase in costs from this segment is mainly due to the following occurring: (i) Ps.18.4 million in costs related to the sale of Alcorta Plaza (through Alto Palermo); (ii) Ps.11.3 million in costs related to the sale of block 36 of the plot named Terrenos de Caballito ; (iii) Ps.9.7 million in costs related to the sale of plot Y of Dock III; (iv) of Ps.8.8 million in costs related to the sale of units of Edificios Cruceros, (v) a decrease due to the sale of a plot of Dock III during IRSA's 2005 fiscal year for Ps.23.6 million and (vi) a decrease of Ps.3.5 million in connection with the sale of Madero 1020 during the previous fiscal year. Costs relating to Development and Sale of Properties as a percentage of revenues from this segment decreased from 54.3% for IRSA's 2005 fiscal year to 52.1% for its 2006 fiscal year.

Offices and Other Non-Shopping Center Rental Properties

Costs of Offices and Other Non-Shopping Center Rental Properties increased by 16.0% from Ps.7.7 million for IRSA's 2005 fiscal year to Ps.9.0 million for its 2006 fiscal year, mainly due to the amortization in IRSA's 2006 fiscal year of Bouchard 710 which IRSA acquired in June 2005. The main component of cost for offices is the depreciation of leased properties.

Hotel Operations

Costs from hotel operations increased 18.5% from Ps.48.9 million for IRSA's 2005 fiscal year to Ps.58.0 million for its 2006 fiscal year, primarily due to revenue increases. Higher costs for Hotel Operations are primarily due to an increase in the depreciation of the assets, salaries and social security contributions. Costs from Llao Llao Hotel increased Ps.5.3 million, costs from Hotel Intercontinental increased Ps.2.3 million and costs from Hotel Sheraton Libertador increased Ps.1.8 million. Costs from hotel operations as a percentage of revenues from this segment decreased from 56.2% in IRSA's 2005 fiscal year to 55.9% in its 2006 fiscal year.

Table of Contents

Financial Operations and Others

Costs from the Financial Operations and Others segment increased by Ps.0.4 million from Ps.1.0 million for IRSA's 2005 fiscal year to Ps.1.4 million for its 2006 fiscal year. Costs included in this line represent expenses incurred for the rendering of services that generate revenues.

Gross profit

As a result of the foregoing, the gross profit increased by 65.4%, from Ps.201.8 million during the fiscal year ended June 30, 2005 to Ps.333.8 million during the fiscal year ended June 30, 2006.

Gain from recognition of inventories at net realizable value

This line is generated as a result of valuing at the net realizable value those inventories for which IRSA has received purchase price or lease advances that fix prices, and the contract terms and conditions of the transactions that IRSA signed state the consummation of the sale and the gain. Ps.9.1 million were valued according to this criteria, which was principally applied to the following developments: Cruceros for Ps.4.6 million, Torres Rosario, for Ps.3.5 million, and Dock III Plot Z, for Ps.1.6 million and San Martín de Tours for Ps.0.6 million in losses.

Selling expenses

Selling expenses increased 63.2% from Ps.36.8 million for IRSA's 2005 fiscal year to Ps.60.1 million for its 2006 fiscal year primarily due to an increase in selling expenses in IRSA's Credit Card, Shopping Center and Hotel segments. Selling expenses as a percentage of revenues increased from 10.0% for IRSA's 2005 fiscal year to 10.4% for its 2006 fiscal year.

Credit Card Operations

Selling expenses of the Credit Card segment increased 129.0%, from Ps.13.5 million for IRSA's 2005 fiscal year to Ps.30.9 million for its 2006 fiscal year, mainly due to an increase of Ps.6.7 million in advertising expenses, a higher charge of Ps.3.8 million in gross sales taxes as a result of IRSA's higher revenues, and an increase in the charge for bad debts of Ps.6.2 million in line with the growth of IRSA's credit portfolio.

Shopping Centers

Selling expenses relating to Shopping Centers increased 47.3% from Ps.10.7 million for IRSA's 2005 fiscal year to Ps.15.7 million for its 2006 fiscal year. The increase was mainly due to an increase of Ps.2.0 million in the charge for gross sales taxes in line with IRSA's higher revenues, an increase of Ps.1.1 million in the charge for provision of bad debts and an increase of Ps.0.5 million in the charge of advertising.

Development and Sale of Properties

Selling expenses from Development and Sale of Properties decreased 8.4% from Ps.2.0 million for IRSA's 2005 fiscal year to Ps.1.8 million for its 2006 fiscal year. Selling expenses for Development and Sale of Properties are mainly commissions and expenses from sales, sealing and gross sales tax.

Table of Contents

Offices and Other Non-Shopping Center Rental Properties

Selling expenses relating to Offices and Other Non-Shopping Center Rental Properties increased 10.6% from Ps.0.9 million for IRSA's 2005 fiscal year to Ps.1.0 million for its 2006 fiscal year.

Hotel Operations

Selling expenses relating to IRSA's Hotel Operations increased 9.2% from Ps.9.8 million for its 2005 fiscal year to Ps.10.7 million for its 2006 fiscal year, mainly due to an increase in the gross sales tax, salaries and social security charges and the tourism agencies commissions due to an increase in revenues in the segment in line with higher levels of activity.

Administrative expenses

Administrative expenses increased 37.1%, from Ps.70.7 million for IRSA's 2005 fiscal year to Ps.96.9 million for its 2006 fiscal year, due to an increase in administrative expenses for IRSA's Shopping Center segment and, to a lesser extent, each of IRSA's other business segments. The main components of administrative expenses are salaries and social security charges, Directors' fees, fees and compensation for services, and depreciation and amortization.

Credit Card Operations

Administrative expenses from the Credit Card segment increased 74.7%, from Ps.14.8 million in IRSA's 2005 fiscal year to Ps.25.9 million in its 2006 fiscal year, basically due to a Ps.5.9 million increase in salaries, bonuses and social security charges, Ps.2.4 million increase in fees and compensations for services, Ps.1.3 million increase in taxes and rent, and of Ps.1.6 million in insurance, amortization and others due to an expansion and increase of IRSA's operations.

Shopping Centers

Administrative expenses of IRSA's Shopping Centers increased 56.1%, from Ps.16.5 million for its 2005 fiscal year to Ps.25.8 million for its 2006 fiscal year primarily as a result of an increase in directors' fees of Ps.3.4 million, an increase in the fees and services of third parties of Ps.3.2 million, an increase in salaries, bonuses and social security charges of Ps.1.9 million, and an increase in taxes, rates and assessments of Ps.0.6 million, mainly due to the financial transactions tax.

Development and Sale of Properties

Administrative expenses of Development and Sale of Properties increased 27.1%, from Ps.10.1 million for IRSA's 2005 fiscal year to Ps.12.8 million for its 2006 fiscal year, primarily due to (i) increases in expenses related to the design and implementation of IRSA's new system; (ii) an increase of Ps.0.8 million in salaries and social security charges, and (iii) an increase in directors' fees of Ps.0.3 million. Administrative expenses for Development and Sale of Properties as a percentage of revenues from this segment decreased from 31.2% for IRSA's 2005 fiscal year to 12.3% for its 2006 fiscal year.

Table of Contents*Offices and Other Non-Shopping Center Rental Properties*

Administrative expenses of Offices and Other increased 15.8%, from Ps.9.8 million for IRSA's 2005 fiscal year to Ps.11.3 million for its 2006 fiscal year. The increase is mainly due to an increase of Ps.0.7 million in salaries and social security charges and a Ps.0.3 million increase in directors' fees.

Hotel Operations

Administrative expenses of IRSA's Hotel Operations increased 8.0%, from Ps.19.4 million for its 2005 fiscal year to Ps.21.0 million for its 2006 fiscal year, primarily due to (i) a Ps.1.0 million increase from Hotel Intercontinental mainly due to an increase of Ps.0.7 million of fees and services to third parties, of Ps.0.1 million of salaries and social security charges and Ps.0.1 million of depreciations; (ii) an increase of Ps.1.0 million in Hotel Sheraton Libertador mainly due to an increase of Ps.0.5 million in fees and compensation for services and of Ps.0.4 million in salaries and social security charges; and due to (iii) a decrease of Ps.0.4 million in Hotel Llao Llao mainly due to a decrease of Ps.1.5 million related to lawsuits and to an increase of Ps.0.4 million in salaries and social security charges, an increase of Ps.0.3 million in taxes, duties and contributions, an increase of Ps.0.2 million in fees and compensation for services and an increase of Ps.0.1 million in depreciation and amortization. Administrative expenses of Hotel Operations as a percentage of revenues from hotel operations decreased from 22.3% for IRSA's 2005 fiscal year to 20.2% for its 2006 fiscal year.

Net income from retained interest in securitized receivables

This gain results from the interest held by Alto Palermo in the Tarjeta Shopping Credit Card Trusts. The results of these credit card trusts increased 520.6% from Ps.0.4 million for IRSA's 2005 fiscal year to Ps.2.6 million for its 2006 fiscal year as a result of the expansion of IRSA's credit card business segment through Tarshop, Alto Palermo's subsidiary.

Gain from operations and holdings of real estate assets, net

The results from operations and holdings of real estate assets, net, decreased 54.8%, from a gain of Ps.27.9 million for IRSA's 2005 fiscal year to a gain of Ps.12.6 million for its 2006 fiscal year. The decrease in income from the previous year is due to a lower amount of recovery on the allowance for impairment of long lived assets.

Operating income

IRSA's operating income increased 43.7% from Ps.140.0 million for its 2005 fiscal year to Ps.201.2 million for its 2006 fiscal year primarily as a result of increases in IRSA's Shopping centers, Developments and sale of properties, Credit card operations and Hotel Operations segments, partially offset by a small decrease in IRSA's Offices and Other Non-Shopping Center Rental Properties segment. Operating income as a percentage of revenues increased from 37.8% from IRSA's 2005 fiscal year to 34.8% for its 2006 fiscal year.

Shopping Centers

Operating income from Shopping Centers increased 29.3% from Ps.81.6 million for IRSA's 2005 fiscal year to Ps.105.6 million for its 2006 fiscal year primarily due to a 29.9% increase in revenues, accompanied by an increase of 10.9% in costs and an increase of 56.1% and 47.3% in selling and administrative expenses for this segment, respectively.

Table of Contents*Credit Cards Operations*

Operating income from the Credit Card segment increased 83.3%, from Ps.13.5 million in fiscal year 2005 to Ps.24.8 million in fiscal year 2006. Operating income from the Credit Card segment as a percentage of revenue from this segment decreased from 21.0% from fiscal year 2005 to 20.2% in fiscal year 2006.

Development and Sale of Properties

Operating income from Development and Sales of properties increased 115.3%, from Ps.20.6 million for IRSA's 2005 fiscal year to Ps.44.3 million for its 2006 fiscal year. Operating income from the Development and Sale of Properties segment as a percentage of revenues from this segment decreased from 63.7% for IRSA's 2005 fiscal year to 42.6% for its 2006 fiscal year primarily as a result of an increase of 209.0% in costs which was accompanied by an increase of 221.8% in revenues for this segment.

Offices and Other Non-Shopping Center Rental Properties

Operating income from Offices and Other Non-Shopping Center Rental Properties decreased 10.3% from Ps.13.2 million for IRSA's 2005 fiscal year to Ps.11.9 million for its 2006 fiscal year. Operating income from Offices and Other Non-Shopping Center Rental Properties as a percentage of revenues from this segment decreased from 68.0% for IRSA's 2005 fiscal year to 38.8% in its 2006 fiscal year primarily as a result of an increase of 57.3% in revenues accompanied with an increase of 16.0% in costs from this segment.

Hotel Operations

Operating income from Hotel Operations increased 31.5% from Ps.11.1 million for IRSA's 2005 fiscal year to Ps.14.6 million for its 2006 fiscal year. Operating income from Hotel Operations as a percentage of revenues from this segment increased from 12.7% for fiscal year 2005 to 14.0% in fiscal year 2006 primarily as a result of a 18.5% increase in costs compared to a 19.1% increase in revenues.

Financial Operations and Others

Operating income from Financial Operations and Others segment increased 243.6% from a loss of Ps.0.04 million for IRSA's 2005 fiscal year to a gain of Ps.0.1 million for its 2006 fiscal year. Operating income from Financial Operations and Other as a percentage of revenues from this segment increased from a loss of 4.1% for IRSA's 2005 fiscal year to a gain of 4.0% for its 2006 fiscal year. This is mainly attributable to an increase of 50.4% in revenues accompanied with an increase of 38.7% in costs from this segment.

Amortization of goodwill

Amortization of goodwill mainly includes: (i) the amortization of goodwill during this fiscal year, for the goodwill from the following subsidiaries of Alto Palermo: Shopping Alto Palermo S.A., Fibesa S.A., Tarshop S.A. and Emprendimiento Recoleta S.A., with no significant variation and (ii) the depreciation, during this year, of IRSA's own negative goodwill due to the purchase of Alto Palermo stock. Amortization of goodwill decreased 35.1% from a loss of Ps.1.7 million for fiscal year 2005 to a loss of Ps.1.1 million for fiscal year 2006, as a result of the incorporation of new negative goodwill as described in point (ii) above.

Table of Contents***Financial results, net***

Financial results, net showed a variation of 245.4%, from a loss of Ps.11.8 million for IRSA's 2005 fiscal year to a loss of Ps.40.9 million for its 2006 fiscal year. The main reasons for this variation were: (i) a Ps.21.7 million increase in IRSA's loss attributable to variation in exchange rates, owing to the depreciation of the Peso to the U.S. dollar from Ps.2.887 in its 2005 fiscal year to Ps.3.086 in its 2006 fiscal year; (ii) the non-recurrence of Ps.2.2 million of discounts obtained in 2006 due to the cancellation with discount of financial loans owed by Mendoza Plaza Shopping S.A.; (iii) a loss with respect to the previous fiscal year of Ps.2.6 million of financial results mainly due to interest and other expenses in connection with the loan of Hoteles Argentinos S.A. and financial expenses from Alto Palermo, and (iv) the decrease of Ps.10.6 million in income from financial operations, due to Dolphin Fund PLC decrease in profits by Ps.16.3 million and NCH Development Partner Fund increase in profits by Ps.4.6 million and the gains from the interest rate swap agreement entered into with Deutsche Bank AG for Ps.1.2 million, and (v) the increase of Ps.7.4 million on interest gain as a result of the refinancing of the Hoteles Argentinos loan.

Gain on equity investees

IRSA's gain on equity investments decreased 38.0% from a gain of Ps.67.2 million for its 2005 fiscal year to a gain of Ps.41.7 million for its 2006 fiscal year. This lower gain is mainly due to: (i) a lower gain by Banco Hipotecario of Ps.8.2 million from Ps.55.2 million to Ps.47.0 million as a result of a lower gain from Banco Hipotecario's investment in Sovereign Bonds (BODEN), (ii) a gain of Ps.12.2 million corresponding to the Hotel segment, and (iii) the negative impact of the dilution of IRSA's interest in Alto Palermo amounting to Ps.0.9 million.

Other expenses, net

Other expenses, net increased 29.6% from net expenses of Ps.14.1 million for IRSA's 2005 fiscal year to net expenses of Ps.18.3 million for its 2006 fiscal year, primarily due to the effect of (i) an increase of Ps.7.5 million in the allowance for doubtful accounts; (ii) an increase of Ps.1.9 million from non recoverable value added tax, (iii) a gain of Ps.2.4 million due to the accelerated accrual of unrealized revenues, (iv) a decrease of Ps.1.3 million in donation charges and (v) a lower charge of Ps.1.1 million for minimum presumed income tax.

Income before taxes and minority interest

As a result of the foregoing, income before taxes and minority interest increased 1.6%, from a gain of Ps.179.6 million for IRSA's 2005 fiscal year, to a gain of Ps.182.6 million for its 2006 fiscal year.

Minority interest

Minority interest increased 17.4% from a loss of Ps.23.2 million for IRSA's 2005 fiscal year to a loss of Ps.27.2 million for its 2006 fiscal year, mainly as a result of an increase in net income from the Shopping Centers segment that generated an increase in the results of minority interest.

Table of Contents

Income tax and minimum presumed income tax

Income tax and minimum presumed income tax expense increased 10.5%, from Ps.53.2 million for IRSA's 2005 fiscal year, to Ps.58.8 million for its 2006 fiscal year. The deferred tax allocation method was used to calculate the income tax corresponding to the two fiscal years, thus recognizing the temporary differences in the accounting and tax assets and liabilities. The variation of Ps.5.6 million was mainly due to the net impact of:

a Ps.14.8 million increase in Alto Palermo's income tax expense, from Ps.33.6 million for IRSA's 2005 fiscal year to Ps.48.5 million for its 2006 fiscal year, due to an increase in taxable income resulting from IRSA's 57.0% increase in revenues during fiscal year 2006;

increased income tax expense of Nuevas Fronteras S.A., Baldovinos S.A., Inversora Bolívar S.A. and Llao Llao Resorts S.A. which during IRSA's 2006 fiscal year were Ps.1.9 million, Ps.1.0 million, Ps.2.7 million and Ps.0.5 million higher, respectively, than during its 2005 fiscal year;

a Ps.1.1 million decrease in IRSA's income tax expense; and

the variation in income tax expense for Buenos Aires Trade & Finance Center S.A. which changed from a Ps.12.6 million expense for IRSA's 2005 fiscal year to a Ps.0.2 million expense for its 2006 fiscal year, as a result of the swap agreement entered into in connection with plot 1.c) of Dock III and the purchase agreement entered into in connection with plot 1.d) of Dock III. IRSA's effective tax rate increased to 32.2% in fiscal year 2006 from 29.6% in fiscal year 2005.

Net income

As a result of the foregoing, net income decreased 6.5% from a gain of Ps.103.2 million for IRSA's 2005 fiscal year to a gain of Ps.96.6 million for its 2006 fiscal year.

Liquidity and Capital Resources

Liquidity

IRSA's principal sources of liquidity have historically been:

cash generated by operations;

cash from borrowings and financings arrangements; and

cash proceeds from the sale of real estate.

IRSA's principal cash requirements or uses (other than in connection with IRSA's operating activities) have historically been:

capital expenditures for property, plant and equipment;

Table of Contents

interest payments and repayments of short-term and long-term debt;

payments of dividends; and

acquisitions or purchases of real estate.

IRSA's liquidity and capital resources include IRSA's cash and cash equivalents, proceeds from bank borrowings and long-term debt, capital financing and sales of real estate investments.

As of June 30, 2007, IRSA had a working capital of Ps.523.7 million. At the same date, IRSA had cash and cash equivalents totaling Ps.708.5 million, an increase of 332.2% from the Ps.163.9 million of cash and cash equivalents held as of June 30, 2006.

As of June 30, 2006, IRSA had a working capital of Ps.62.6 million. At the same date, IRSA had cash and cash equivalents totaling Ps.163.9 million, an increase of 15.0% from the Ps.142.6 million of cash and cash equivalents held as of June 30, 2005.

As of June 30, 2005, IRSA had a working capital of Ps.78.8 million. At the same date, IRSA had cash and cash equivalents totaling Ps.142.6 million, an increase of 16.0% from Ps.122.9 million of cash and cash equivalents held as of June 30, 2004.

Cash Flow Information

Operating Activities

2007 Fiscal Year. IRSA's operating activities resulted in net cash inflows of Ps.163.1 million for fiscal year 2007 primarily as a result of operating gains of Ps.276.0 million, an increase in trade accounts payable of Ps.65.1 million, a decrease in inventories of Ps.29.0 million, and an increase in accrued interest of Ps.21.5 million partially offset by an increase in mortgages and leases receivables of Ps.79.7 million, and increase in Other receivables and prepaid expenses of Ps.79.6 million, an increase in non-current investments of Ps.35.6 million and an increase in current investments of Ps.29.8 million.

2006 Fiscal Year. IRSA's operating activities resulted in net cash inflows of Ps.194.7 million for fiscal year 2006 primarily as a result of operating gains of Ps.218.5 million, an increase in trade accounts payable of Ps.56.0 million, a decrease in inventories of Ps.25.1 million, an increase in accrued interest of Ps.14.0 million and a decrease in current investments of Ps.10.3 million partially offset by an increase in mortgages and leases receivables of Ps.80.3 million, a decrease in customer advances, salaries and social security payable and taxes payable of Ps.28.4 million and an increase in non-current investments of Ps.26.4 million.

2005 Fiscal Year. IRSA's operating activities resulted in net cash inflows of Ps.93.5 million for fiscal years 2005. The operating cash inflows for fiscal year 2005 primarily resulted from operating gains of Ps.127.2 million, an increase in customer advances, salaries and social security payable and taxes payable of Ps.12.0 million and an increase in trade accounts payable of Ps.21.0 million partially offset by an increase in mortgages and leases receivables for Ps.49.2 million and a decrease in other liabilities of Ps.17.7 million.

Investment Activities

2007 Fiscal Year. IRSA's investing activities resulted in net cash outflows of Ps.510.8 million for fiscal year 2007, primarily as a result of investments in fixed assets of Ps.410.1 million

Table of Contents

due to (i) the acquisition of Bouchard 551 for Ps.243.2 million, (ii) Ps.96.4 million thorough Alto Palermo primarily for improvements made in shopping centers (iii) improvements in the Hotel Operations segment for Ps.57.1 million, principally in Liao Liao for Ps.49.4 million, and as a result of a decrease in minority interest of Ps.40.4 million principally due to the increase in IRSA's ownership in Palermo Invest and in Alto Palermo for Ps.27.5 million and Ps.7.2 million, respectively.

On December 12, 2006 IRSA purchased from different holders 34,710 shares of Canteras Natal Crespo for a total amount of Ps.1.8 million. After this transaction, IRSA's interest on Canteras (jointly with its partner ECIPSA) increased up to 98.45%.

2006 Fiscal Year. IRSA's investing activities resulted in net cash outflows of Ps.136.6 million for fiscal year 2006, primarily as a result of investments in fixed assets of Ps.54.1 million due to (i) improvements made in shopping centers amounting to Ps.33.6 million and (ii) improvements in the Hotel Operations segment for Ps.20.1 million. IRSA also invested Ps.62.1 million in undeveloped parcels of land primarily through IRSA's subsidiary Alto Palermo. IRSA also made investments of Ps.4.3 million to increase IRSA's ownership interest in Alto Palermo, and Ps.4.2 million in the acquisition of 43.2% of Canteras Natal Crespo S.A. Additionally, IRSA posted a guaranty deposit for Ps.8.6 million at Deutsche Bank guaranteeing IRSA's obligations to Argentimo S.A. relating to an agreement entered into between Alto Palermo, Argentimo S.A. and Constructora San José Argentina S.A. for the acquisition of land for the development of a shopping center and a dwelling and/or office building.

2005 Fiscal Year. IRSA's investing activities resulted in net cash outflows of Ps.126.7 million for fiscal year 2005, primarily as a result of investments in fixed assets of Ps.79.3 million, due to (i) the development of Alto Rosario Shopping and improvements made in other shopping centers totaling Ps.50.9 million, and (ii) partial payment for the acquisition of Bouchard 710 for Ps.20.4 million. IRSA also invested Ps.35.0 million in the acquisition of an additional ownership interest of 49.9% in Mendoza Plaza Shopping and IRSA also made a payment of US\$4 million (Ps.11.7 million) in connection with a contract entered into with Credit Suisse in June 2005, pursuant to which, subject to the satisfaction of certain conditions, IRSA expects to take out a loan for US\$10.0 million, establishing a mortgage on an office building in the City of Buenos Aires.

Financing Activities

2007 Fiscal Year. IRSA's financing activities resulted in net cash inflows of Ps.892.2 million. IRSA's net cash provided by financing activities for fiscal year 2007 was primarily related to (i) the proceeds from short-term and long-term debt for Ps.1,199.7 million, primarily due to the issuance of IRSA's notes and Alto Palermo notes (ii) IRSA's issuance of common shares as a result of the exercise of warrants for Ps.26.0 million, partially offset by (i) the payment of short-term and long-term debt for Ps.292.2 million, (ii) the payment of dividends to minority shareholders for Ps.23.2 million and (iii) a the partial repayment of Ps.18.0 million of a mortgage payable.

2006 Fiscal Year. IRSA's financing activities resulted in net cash outflows of Ps.36.8 million. IRSA's net cash spent on financing activities for fiscal year 2006 was primarily related to the payment of short-term and long-term debt for Ps.82.5 million, the payment of dividends by IRSA's subsidiaries to minority shareholders totaling Ps.12.7 million, the repayment of debt owed to minority shareholders for Ps.5.2 million and a partial repayment of Ps.25.6 million of a mortgage payable, partially offset by IRSA's issuance of common shares as a result of the exercise of warrants for Ps.43.6 million and proceeds from issuance of short-term and long-term debt totaling Ps.45.1 million.

Table of Contents

2005 Fiscal Year. IRSA's financing activities resulted in net cash inflows of Ps.52.9 million. IRSA's net cash provided by financing activities for fiscal year 2005 relates to IRSA's issuance of common shares as a result of the exercise of warrants for Ps.105.7 million, proceeds from issuance of short-term and long-term debt totaling Ps.117.2 million and proceeds from the settlement of a swap agreement for Ps.15.8 million, partially offset by the payment of short-term and long-term debt for Ps.167.3 million, the payment of dividends by IRSA's subsidiaries to minority shareholders totaling Ps.10.3 million, and the payment of Ps.5.8 million to Credit Suisse, establishing a guarantee for the debt of IRSA's subsidiary Hoteles Argentinos.

Indebtedness

The following table sets forth the scheduled maturities of IRSA's outstanding debt as of June 30, 2007:

	Currency	Less than 1 year ⁽¹⁾	From 1 to 2 years (in millions of pesos) ⁽³⁾	From 2 to 3 years	From 3 to 4 years	More than 4 years	Total ⁽²⁾ %	Average annual interest rate %

(3) Exchange rate as of June 30, 2007: US\$1.00 = Ps.3.093.

(4) Includes issuance expenses (under Argentine GAAP expenses incurred in connection with the issuance of debt are classified as short-term or long-term debts, as appropriate).

(5) Repaid on October 29, 2007. See Recent Developments.
Hoteles Argentinos secured loan

Edgar Filing: CRESUD INC - Form 20-F

On March 23, 2005, Credit Suisse First Boston International acquired the US\$11.1 million indebtedness incurred by Hoteles Argentinos which had been in default since January 2002. On April 21, 2006, Hoteles Argentinos reduced the outstanding principal amount to US\$6.0 million with a prepayment, and the unpaid balance was restructured to mature in March 2010 with scheduled amortization payments as described below:

Table of Contents

Date	Amount due (US\$ thousands)
March 15, 2008	213
September 15, 2008	225
March 15, 2009	239
September 15, 2009	253
March 15, 2010	5,070

Interest accrues on the unpaid principal of this loan at six-month LIBOR plus 7.0%.

In addition, IRSA entered into a credit default swap agreement with Credit Suisse International which, among other stipulations, secures payment of Hoteles Argentinos' indebtedness and provides that, in the event of default, IRSA will be required to acquire the loan. Simultaneously with the amendment of Hoteles Argentinos' loan agreement, IRSA amended the credit default swap with Credit Suisse International. Thus, IRSA would only assume 80.0% of Hoteles Argentinos' indebtedness in the event of default. The remaining 20.0% was assumed by Starwood Hotels and Resorts Worldwide Inc. (Starwood), an indirect minority shareholder in Hoteles Argentinos, which has also been instrumented through a credit default swap. To secure performance of IRSA's obligations under the agreement with Credit Suisse International, IRSA made an escrow deposit of US\$1.2 million.

The loan agreement of Hoteles Argentinos provides that it may not declare or pay any dividends or make any distribution on IRSA's capital stock, or purchase, redeem, retire, defease or otherwise acquire any of IRSA's shares, or make any distribution of assets, capital stock, warrants, rights, options, obligations or securities to IRSA's shareholders, except in an amount not to exceed the lesser of (x) Hoteles Argentinos' excess cash flow for the preceding year, or (y) IRSA's consolidated retained earnings and consolidated profits earned; and then only if, after giving pro forma effect to such action, no default or event of default would occur as a consequence thereof.

Alto Palermo 10% convertible notes due 2014

On August 20, 2002 Alto Palermo issued US\$50.0 million unsecured convertible notes in exchange for cash and the liquidation of determined liabilities owed to IRSA's shareholders. These convertible notes mature on July 19, 2014, in accordance with the extension of the initially scheduled maturity date approved at a meeting of holders of such convertible notes on May 2, 2006. Such securities accrue interest payable biannually at a fixed annual rate of 10% and are convertible at any time at the option of the holder into common shares, face value of Ps.0.10 per share. The conversion rate per US dollar is the lesser of (i) 30.8642 and (ii) the result obtained by dividing the rate of exchange effective on the date of conversion by the face value of the common shares of Alto Palermo. As of June 30, 2007, as a result of conversions previously made, the outstanding principal amount of Alto Palermo's convertible notes was US\$47.2 million. In the event all the bondholders exercise their conversion rights, Alto Palermo's common shares would increase from 782.0 million shares (having a face value of Ps. 78.2 million) to 223.5 million shares (having a face value of Ps.223.9 million). As of June 30, 2007, IRSA held US\$31.7 million of Alto Palermo's convertible notes.

IRSA 8% convertible notes due 2007

On November 21, 2002, IRSA issued US\$100.0 million of convertible notes due November 2007. The convertible notes accrue interest at 8% per annum, payable on a semi-annual basis. The conversion price is US\$0.545 per common share, which means that each US\$1.00 principal amount

Table of Contents

of such convertible note may be exchanged for 1.8347 common shares. Additionally, each convertible note contains a warrant attached that grants its holder an option to acquire 1.8347 shares at a price of US\$0.6541 each.

From the date of issuance through June 30, 2007, the holders of IRSA's convertible notes exercised their conversion rights for a total of 81.1 million units with a face value of US\$1.0 each, issuing 148.8 million common shares with a face value of Ps.1.0 each. In addition, from the date of issuance through June 30, 2007, warrants issued by us were exercised for a total amount of US\$56.8 million, and 104.2 million shares were issued in exchange. IRSA received funds aggregating US\$68.1 million.

As of June 30, 2007, the outstanding amount of IRSA's convertible notes and warrants was US\$18.9 million and 43.2 million, respectively, and the amount IRSA's outstanding shares was 464,969,456. After this date, 18.85 million convertible notes were converted and 43.12 million of warrants were exercised. As a result of the expiration of the conversion of convertible notes and exercises of warrants, IRSA's outstanding capital stock increased from 464,969,156 at June 30, 2007 to 578,676,460 as of the date of this annual report.

Alto Palermo series I and series II notes

On May 11, 2007, Alto Palermo issued two new series of notes in an aggregate principal amount of US\$170 million. Series I consists of US\$120 million of notes due on May 11, 2017, which accrue interest at a fixed rate of 7.875% payable semi-annually on May 11 and November 11 of each year, commencing on November 11, 2007. The Series I notes mature in a single installment on May 11, 2017.

Series II consists of Ps.154 million (equivalent to US\$50 million) of notes which mature in seven, equal and consecutive semi-annual installments commencing on June 11, 2009, and which accrue interest at 11% per annum, payable on June 11 and December 11 of each year commencing on December 11, 2007.

IRSA 8.5% notes due 2017

On February 2, 2007, IRSA issued its 2017 fixed rate notes for a total amount of US\$150.0 million, which accrue interest at an annual interest rate of 8.5% payable semi-annually and which mature in a single installment on February 2, 2017.

This bond also contains a covenant limiting IRSA's ability to pay dividends which may not exceed the sum of:

50% of its cumulative consolidated net income; or

75% of its cumulative consolidated net income if its consolidated interest coverage ratio for its most recent four consecutive fiscal quarters is at least 3.0 to 1; or

100% of cumulative consolidated net income if its consolidated interest coverage ratio for its most recent four consecutive fiscal quarters is at least 4.0 to 1; or

100% of the aggregate net cash proceeds (with certain exceptions) and the fair market value of property other than cash received by IRSA or by its restricted subsidiaries from (a) any contribution to IRSA's equity capital or to the capital stock of its

restricted subsidiaries or issuance and sale of IRSA's qualified capital stock or the qualified capital stock of its restricted subsidiaries subsequent to the issue of IRSA's notes due 2017, or (b) issuance and sale subsequent to the issuance of IRSA's notes due 2017 of IRSA's indebtedness or of the indebtedness of its restricted subsidiaries that has been converted into or exchanged for its qualified capital stock.

Capital Expenditures

2007 Fiscal Year. During the fiscal year ended June 30, 2007, IRSA had capital expenditures of Ps.419.4 million. IRSA made investments in fixed assets of Ps.410.1 million primarily in the acquisition of Bouchard 551 for Ps.243.2 million, Ps.96.4 million through Alto Palermo primarily for the improvement of Shopping Centers and Ps.57.1 million in the Hotel Segment, primarily in Llao Llao for Ps.49.4 million. IRSA also invested Ps.9.3 million in undeveloped plots of land.

2006 Fiscal Year. During the fiscal year ended June 30, 2006, IRSA had capital expenditures of Ps.116.2 million. IRSA made investments in fixed assets of Ps.54.1 million primarily in shopping centers totaling Ps.33.6 million and in Hotel segment of Ps.20.1 million.

2005 Fiscal Year. During the fiscal year ended June 30, 2005, IRSA had capital expenditures of Ps.80.0 million. IRSA made investments in fixed assets of Ps.79.3 million, primarily in shopping centers totaling Ps.50.9 million and in the acquisition of Bouchard 710 for Ps.20.4 million. IRSA also invested Ps.0.7 million in undeveloped plots of land.

C. RESEARCH AND DEVELOPMENTS, PATENTS AND LICENSES

Investments in technology amounted to Ps. 11.6 million, Ps. 22.9 million and Ps. 11.2 million for the fiscal years 2007, 2006 and 2005 respectively. Total technology investments aimed at increasing the productivity of purchased land amounted to Ps. 116.2 million from fiscal year 1995.

The objectives within this area are reached through the implementation of national and international technological development projects focusing mainly on:

Quality and productivity improvement.

Table of Contents

Increase in land appreciation value through the development of marginal areas.

Increase in the quality of food in order to achieve global food safety standards. We aim to implement and perform according to official and private quality protocols that allow us to comply with the requirements of our present and future clients. Regarding official regulations, in 2003 we implemented the Servicio Nacional de Sanidad y Calidad Agroalimentaria law on animal identification for livestock in six farms. Simultaneously, in 2004 we implemented EurepGap Protocols with the objective of complying with European Union food safety standards and as a mean for continuous improvement of the internal management and system production of our farms. Our challenge is to achieve global quality standards.

We do not have any patents or licenses that are material for conducting our business.

D. TREND INFORMATION**Trend Information**

Our future operating results may be affected by variations in some factors, such as adverse changes in the price of commodities or the yield of crops. Accordingly, historical tendencies may not be representative of our future results. Our past results must not be considered indicative of our future performance. To mitigate certain risks associated with changes in weather and prices, we seek to apply hedging mechanisms through futures and option agreements in the grain market and to diversify our geographic areas of production.

Production and sales

At present we are engaged in various operations and activities including crops, cattle breeding and fattening, milk production and certain forestry activities. We complement our operations with the purchase and sale of land to benefit from the real estate valuation.

We conduct our business on owned and leased land. As of June 30, 2007, together with our subsidiaries, we owned 17 farms. Approximately 28,272 hectares of our own land are applied to, and suitable for, crop production, whereas approximately 84,889 hectares are more suitable for the cattle beef business and 2,609 hectares are applied to milk production.

The remaining 483,677 hectares are basically land reserves. During fiscal year 2007, we leased 40 farms for agricultural and cattle-beef production, which together spanned a total surface of 54,515 hectares, including double crop.

The following chart shows for the periods indicated below, the amount of land allocated to each productive activity (including the total amount of own and leased farms):

	Use of land				
	Fiscal Year ended June				
	2003 ^{(1) (6)}	2004 ^{(1) (7)}	2005 ^{(1) (8)}	2006 ^{(1) (9)}	2007 ^{(1) (9) (10) (11)}
	<i>(in hectares)</i>				
Crops ⁽²⁾	27,255	27,358	40,722	41,283	53,579
Cattle ⁽³⁾	135,798	125,669	126,879	129,946	114,097

Land Reserves ⁽⁴⁾	272,318	266,916	263,177	418,477	483,677
Lease of own land to third parties		13,996	9,978	14,229	13,771
Total ⁽⁵⁾	436,348	434,940	442,532	605,633	667,733

(1) Includes 35.723% of approximately 8,299 hectares owned by Agro Uranga S.A.

Table of Contents

- (2) Includes wheat, corn, sunflower, soybean, sorghum and others.
- (3) Breeding and Fattening.
- (4) We used part of our land reserves to produce charcoal, posts and fence rods .
- (5) As of June 30, 2003, 14,578 hectares of land were leased for agriculture production. As of June 30, 2004, the surface area allocated to agricultural production in the farms leased was 9,766 hectares. During fiscal year 2005, 16,299 hectares were leased for agricultural production. As of June 30, 2006, 17,004 hectares were leased for agricultural production and 32,647 hectares were leased for cattle breeding. As of June 30, 2007, 25,307 hectares were leased for agricultural production and 29,208 hectares were leased for cattle breeding.
- (6) Includes 618 hectares of Los Maizales farm and 706 hectares of El Silencio / San Luis farm.
- (7) Includes 8,360 hectares of El Tigre farm purchased on April 30, 2003 and does not include 6,478 hectares of El 41-42 farm whose title deeds were signed on November 26, 2003.
- (8) Includes 977 hectares of San Enrique farm and 30,350 hectares of El Ñacurutu farm sold during fiscal year 2005.
- (9) Includes 6,022 hectares of San Pedro farm acquired on September 1, 2005 and approximately 162,000 hectares through our 99.99% ownership interest in Agropecuaria Cervera S.A. which owns, among other assets and rights, the concession of the start-up of production for a comprehensive development project. It does not include 5,727 hectares of El Gualicho farm sold on July 25, 2005.
- (10) Includes 90,000 hectares corresponding to the 8 de Julio farm, allocated to land reserve. Does not include 20,833 hectares of the Tapenagá farm. Neither does it include 14,516 hectares at the Los Pozos farm, 50 hectares at Establecimiento El Recreo, as they were sold in the course of fiscal 2007.

- (11) Includes 24% out of 170 hectares owned by Cactus Argentina S.A.

Crop production volumes increased 64.2%, from 106,867 tons in fiscal year 2006 to 175,455 tons in fiscal year 2007 (the corn and soy production increased 155.8% and 43.2%, respectively and the wheat and sunflower production decreased 23.6% and 6.9% respectively). The production increase resulted, among other matters, from an increase of 29.7% of the surface in production. The total surface produced increased from 37,022 hectares in fiscal year 2006 to 49,244 hectares in fiscal year 2007. The privately owned surface for production increased from 20,018 hectares in year 2006 to 22,712 hectares in fiscal year 2007 whereas the leased surface produced increased from 17,004 hectares in year 2006 to 25,307 hectares in year 2007. The surface produced in concession was 1,225 hectares.

Crops sales decreased 13.4%, from Ps. 61.7 million in fiscal year 2006 to Ps. 53.4 million in fiscal year 2007. The decrease of 24.0% in the sales volume of 164,104 tons to 124,652 tons was compensated by a higher average unit price of 14.0% in fiscal year 2007 in comparison with fiscal year 2006. The average price per ton sold was Ps. 428 in fiscal year 2007 and Ps. 376 in fiscal year 2006. Although the production volume of grain was higher in the current year, the lower sales volume was for a lower number of stocks at the beginning of 61,745 tons in the current year in respect of the previous.

The cost of sales of the crops decreased 5.4%, from Ps. 53.3 million in year 2006 to Ps. 50.4 million in year 2007. Such decrease is mainly due to a lower volume of grain sales compensated by a higher level of average prices of commodities in the current year. The average cost per ton sold was Ps. 405 in year 2007 and Ps. 325 in year 2006. The cost of production of the crops increased 46.6%, from Ps. 35.8 million in fiscal year 2006 to Ps. 52.4 million in fiscal year 2007. The cost increase was mainly due to a higher volume of grains production of 64.2% as a consequence of higher grain surface produced of 29.7% in the current fiscal year in respect of the previous.

Edgar Filing: CRESUD INC - Form 20-F

Beef cattle sales decreased 5.2%, from Ps. 33.7 million in fiscal year 2006 to Ps. 32.0 million in year 2007. The 9.7% decrease in the sales volume was compensated by an average increase of 5.0% in the price per tone sold. Sales volume decreased from 14,762 tons to 13,332 tons

Table of Contents

whereas sales price increased from Ps. 2.28 per kilogram in fiscal year 2006 to Ps. 2.40 per kilogram in fiscal year 2007. The decrease in the sales volume was mainly due to a lower number of finished cattle in the feedlot, from 21,400 in fiscal year 2006 to 11,900 in fiscal year 2007. The average cattle stock increased from 91,500 heads in fiscal year 2006 to 97,111 in fiscal year 2007. The number of hectares dedicated to cattle production increased from 100,724 hectares in fiscal year 2006 to 114,056 hectares in fiscal year 2007. This increase was mainly due to a higher number of hectares leased and to the conversion of hectares of land reserve into cattle in the Los Pozos farm during the current fiscal year, negatively compensated by the retirement of cattle hectares due to the sale of the Tapenagá farm.

Beef cattle cost of sales decreased 8.2%, from Ps. 33.0 million in year 2006 to Ps. 30.3 million in year 2007. Such decrease is mainly due to lower volume of beef cattle sales of 9.7% in respect of the previous year due to a lower number of finished cattle in the feedlot.

Milk sales increased 23.3%, from Ps. 7.9 million in fiscal year 2006 to Ps. 9.7 million in fiscal year 2007, mainly due to the increase of 14.2% in production volume and the increase of 7.9% in the milk price, from Ps. 541 in fiscal year 2006 to Ps. 584 in year 2007 per thousand liter of milk. Production volumes increased 14.2%, from 14.6 million liters in fiscal year 2006 to 16.7 million liters in fiscal year 2007. This increase was mainly due to the higher production volume of the milk in line with higher number of milking cows, and improvement in the efficiency level of daily production of milk per cow in the current fiscal year respect the previous year. We have started production in the new milking facility of La Juanita farm, Province of Buenos Aires, which increased its capacity to 1,800 cows per day. The higher production volume was accompanied by an increase in the price level of milk of 7.9% en the current fiscal year in respect of the previous.

Milk cost of increased 23.3%, from Ps. 7.9 million in year 2006 to Ps. 9.7 million in year 2007. Such increase is mainly due to higher volume of milk sales in the current year. Milk cost of production increased 45.0%, from Ps. 5.8 million in fiscal year 2006 to Ps. 8.5 million in fiscal year 2007. Such increase mainly relates to higher level of milk production in the current fiscal year, together with the impact of higher feeding costs as a consequence of the increase in corn prices and other raw materials of the milk segment. Milk cost of production per thousand liters increased from Ps. 401 in fiscal year 2006 to Ps. 509 in fiscal year 2007.

Product Prospects

The sources of the following information are the Secretaría de Agricultura, Pesca y Alimentación de la República Argentina, the United States Department of Agriculture (USDA), the Instituto Interamericano de Cooperación para la Agricultura, Márgenes Agropecuarios, Food and Agriculture Organization of the United Nations and our information.

Wheat

USDA projections for the 2007/2008 campaign at global level estimate a production of approximately 612 million tons of wheat, 3% higher than the previous campaign. In the Northern Hemisphere, where many crops have reached a well-developed stage, a wheat production increase is forecast especially in North America and Europe.

As regards Argentina, USDA projects a 14 million-ton production for the 2007/2008, 8% lower than the prior-year campaign. It is estimated that the sowed area will decrease by 3% due to the significant number of hectares that will be assigned to sunflower and soybean. A decrease in exports of about 14% is also expected.

Table of Contents

Corn

Globally, USDA calculates a 777.1 million tons of corn and final stocks of 108.4 million, vis-à-vis 701 and 100.9 million, respectively, in the previous cycle. These figures show the impact of ethanol that takes up most of the production surplus. Given the demand of soybean and corn, in the fodder as well as in the power markets, and considering the current corn scarcity, it seem inevitable that in 2007/2008 the world area earmarked for corn will increase to the detriment of soybean.

The ongoing high corn prices would encourage farmers in Argentina and Brazil to increase the corn-sowed area to the detriment of the soybean area. For Argentina, USDA estimates that production would reach approximately 24 million tons, 7% higher than the previous campaign.

Soybean

In the case of soybean, for the 2007/2008 campaign, USDA projects a world production of 222.1 million tons, 14 million less than the previous year. This decrease is due to the USA decision to allot more land to corn to the detriment of the soybean sowed area by 15% in respect of the last campaign, estimating a 71 million-ton production. With world consumption growing from 9 million tons to 234.2 million tons, there would be a 12 million deficit, bringing world stock to 52 million tons.

On the other hand, USDA projects an increase in soybean sowing in South America where the soybean area is expected to increase by 1.4 million hectares in Brazil and 900,000 hectares in Argentina. Argentine production is estimated at approximately 47 million tons, slightly lower than the previous year.

Sunflower

Globally, sunflower production for the 2007/2008 campaign is projected at approximately 31 million tons compared to 32 million tons in the previous year. This decrease is due to a smaller sunflower sowing area in the main producing countries in the Northern Hemisphere. Sunflower production in the European Union is projected at 5.8 million tons vis-à-vis 6.2 million tons in the previous campaign.

International prices of vegetable oils, specially palm, rapeseed and soybean oils, are currently strong due to biofuel demand, a situation that affects sunflower oil prices. In Argentina, the interest for sunflower increased and it was reflected by a larger sowed areas based on high seed and oil prices, which are expected to increase during the 2007/08 campaign vis-à-vis the previous cycle.

Beef Cattle

World beef prices have remained generally stable since late 2006. World beef exportable supplies continue to be limited due to the slow recovery of beef exports from North America to the main Asian markets, due to the discovery of bovine spongiform encephalopathy (BSE) cases.

In many developing countries, consumers are diversifying traditional eating habits, leaving aside basic cereals and adopting more westernized foods such as beef. Although we believe that world beef production is likely to increase in 2007, export taxes, restrictions on beef exports and other government policies currently being enforced in Argentina to restrain increases in beef prices in the Argentine market are likely to result in a decrease in beef production for 2007.

Table of Contents*Milk*

In recent months, prices of many dairy products in the international market have reached high levels, essentially due to the fact that world milk production has not kept pace with increasing demand. We believe milk production in Argentina is likely to grow in 2007. Investments made in the milk producing sector, in spite of export taxes, are enabling Argentina to focus on global export markets, especially in the powdered milk and cheese sectors. However, growth may be adversely affected by high prices in cereal crops, fodder cereals that reduce available pastures and adversely affect the profitability of dairy products.

E. OFF-BALANCE SHEET ARRANGEMENT

At June 30, 2007, we did not have any off-balance sheet transactions, arrangements or obligations with unconsolidated entities or others that are reasonably likely to have a material effect on our financial condition, results of operations or liquidity.

F. TABULAR DISCLOSURE OF CONTRACTUAL OBLIGATIONS

The following table shows our contractual obligations as of June 30, 2007:

Detail	Payments due by period (In million of Pesos) (5)			
	Total	Less than 1 year	1-3 year	More than 3-5 year 5 years
Short-term debt				
Convertible notes accrued interest	0.89	0.89		
Convertible notes(2)	8.7	8.7		
Charitable donations(1)	1.8	1.8		
Non-guaranteed loans(3)	114.0	114.0		
Secured farm purchase obligations	4.48	4.48		
Unsecured farm purchase obligations	3.71	3.71		
Management fee payable(1)	2.8	2.8		
Long-term debt				
Guaranteed loan contract(4)	24.7		24.7	
Total	161.08	136.38	24.7	

(1) Obligations do not accrue interest.

(2) Accrued interest at a fixed rate of 8% per annum.

(3) Accrues interest at a fixed rate of 8.17% for checking account overdrafts and fixed notes ranging from 5.6% to 6.05% for export financings.

(4) Accrues interest at a variable rate equal to Libor + 3.75% per annum.

(5) Includes accrued interest, as of June 30, 2007.

G. SAFE HARBOR

See the discussion at the beginning of this Item 5 and Forward Looking Statements in the introduction of this annual report, for forward-looking statement safe harbor provisions.

Table of Contents**Item 6. Directors, Senior Management and employees****A. DIRECTORS AND SENIOR MANAGEMENT****Board of Directors**

We are managed by a board of directors, which consists of nine directors and five alternate directors. Each director and alternate director is elected by our shareholders at an annual ordinary meeting of shareholders for a three-year term, provided, however, that only one third of the board of directors is elected each year. The directors and alternate directors may be re-elected to serve on the board any number of times. There are no arrangements or understandings pursuant to which any director or person from senior managements is selected.

Our current board of directors was elected at shareholders meetings held on November 29, 2005, October 31, 2006 and October 10, 2007 for terms expiring in the years 2008, 2009 and as the case may be. Our current directors are as follows:

Directors(1)	Date of Birth	Position in Cresud	Term Expires(2)	Date of Current Appointment	Current Position Held Since
Eduardo S. Elsztain	01/26/1960	Chairman	06/30/08	11/29/05	1994
Saúl Zang	12/30/1945	First vice-chairman	06/30/08	11/29/05	1994
Alejandro G. Elsztain	03/31/1966	Second vice- chairman and CEO	06/30/10	10/10/07	1994
Clarisa D. Lifsic	07/28/1962	Director	06/30/10	10/10/07	1994
Gabriel A.G. Reznik	11/18/1958	Director	06/30/09	10/31/06	2003
Jorge Oscar Fernández	01/08/1939	Director	06/30/09	10/31/06	2003
Fernando A. Elsztain	01/04/1961	Director	06/30/10	10/10/07	2004
David A. Perednik	11/15/1957	Director and chief administrative officer	06/30/10	10/10/07	2004
Pedro Damaso Labaqui Palacio	02/22/1943	Director	06/30/09	10/31/06	2006
Salvador D. Bergel	04/17/1932	Alternate director	06/30/08	11/29/05	1996
Juan C. Quintana Terán	06/11/1937	Alternate director	06/30/08	11/29/05	1994
Gastón A. Lernoud	06/04/1968	Alternate director	06/30/08	11/29/05	1999
Enrique Antonini	03/16/1950	Alternate director	06/30/10	10/10/07	2007
Eduardo Kalpakian	03/03/1964	Alternate director	06/30/10	10/10/07	2007

(1) The business address of our management is Cresud S.A.C.I.F.I. y A., Moreno 877, 23rd Floor, (C1091AAQ) Buenos Aires, Argentina.

(2) Term expires at the annual ordinary shareholders meeting.

Enrique Antonini, Eduardo Kalpakian, Gabriel A. G. Reznik, Jorge Oscar Fernández y Pedro Damaso Labaqui Palacio qualify as independent, in accordance with *Comisión Nacional de Valores* Resolution N° 400/2002.

The following is a brief biographical description of each member of our board of directors:

Eduardo S. Elsztain. Mr. Elsztain studied Economic Sciences at University of Buenos Aires (*Universidad de Buenos Aires*). He has been engaged in the real estate business for more than twenty years. He is the chairman of the board of directors of IRSA, Alto Palermo, Shopping Alto Palermo S.A., Consultores Asset Management and BACS Banco de Crédito & Securitización

Table of Contents

among other companies. He is also vice-chairman of Banco Hipotecario, E-Commerce Latina S.A. and BrasilAgro among other companies. He is Fernando A. Elsztain's cousin and Alejandro G. Elsztain's brother.

Saúl Zang. Mr. Zang obtained a law degree from University of Buenos Aires (*Universidad de Buenos Aires*). He is a member of the International Bar Association (Asociación Internacional de Abogados) and the Interamerican Federation of Lawyers (Federación Interamericana de Abogados). He is a founding member of the law firm Zang, Bergel & Viñes. He is also first vice-chairman of the board of directors of IRSA and Shopping Alto Palermo S.A., and vice-chairman of Alto Palermo, Puerto Retiro and Fibesa; and director of Banco Hipotecario, Nuevas Fronteras S.A., Tarshop and Palermo Invest S.A.

Alejandro G. Elsztain. Mr. Elsztain obtained a degree in agricultural engineering from University of Buenos Aires (*Universidad de Buenos Aires*). He is chairman of Inversiones Ganaderas S.A. and Cactus Argentina. He is also second vice-chairman of IRSA and executive vice-chairman of Alto Palermo and Shopping Alto Palermo S.A. He is a member of the board of directors of Futuros y Opciones S.A. Mr. Alejandro G. Elsztain is the brother of our chairman, Eduardo S. Elsztain, and cousin of Fernando A. Elsztain.

Clarisa D. Lifsic. Mrs. Lifsic obtained a degree in Economic Sciences from University of Buenos Aires (*Universidad de Buenos Aires*) and she holds a Masters Degree in Sciences with management expertise from Massachusetts Institute of Technology. She has also held offices in research and financial analysis areas in the private sector since 1987. She currently is the chairman of the board of directors of Banco Hipotecario.

Gabriel A. G. Reznik. Mr. Reznik obtained a degree in Civil Engineering from University of Buenos Aires (*Universidad de Buenos Aires*). He worked for IRSA since 1992 until May 2005 at which time he resigned. He formerly worked for an independent construction company in Argentina. He is an alternate director of Puerto Retiro S.A., Tarshop S.A. and Fibesa, as well as member of the board of Banco Hipotecario, among others.

Jorge Oscar Fernández. Mr. Fernández obtained a degree in Economic Sciences from University of Buenos Aires (*Universidad de Buenos Aires*). He has performed professional activities at several banks, financial corporations, brokerage and insurance firms and other companies related to financial services. He is also involved in many industrial, commercial and professional institutions and associations.

Fernando A. Elsztain. Mr. Elsztain studied architecture at University of Buenos Aires (*Universidad de Buenos Aires*). He has been engaged in the real estate business as a consultant and as managing officer of a real estate company. He is chairman of the board of directors of Llao Llao Resorts S.A., Palermo Invest S.A. and Nuevas Fronteras S.A. He is also a director of IRSA, Alto Palermo, Shopping Alto Palermo, Hoteles Argentinos and Tarshop and alternate director of Banco Hipotecario and Puerto Retiro. He is the cousin of our director chief executive officer Alejandro Elsztain and of our chairman Eduardo S. Elsztain.

Pedro Damaso Labaqui Palacio. Mr. Labaqui obtained a law degree from University of Buenos Aires (*Universidad de Buenos Aires*). He is also director of Bapro Medios de Pago S.A., Permanent Syndic of Bayfe S.A. Fondos Comunes de Inversión, Member of the Supervisory Committee of the J. Minetti S.A., alternate Director of J. Minetti S.A., alternate Member of the Supervisory Committee of J. Minetti S.A.; and Director of REM Sociedad de Bolsa S.A.

Table of Contents

David A. Perednik. Mr. Perednik obtained a degree in accounting from University of Buenos Aires (*Universidad de Buenos Aires*). He has worked for several companies such as Marifran Internacional S.A., a subsidiary of Louis Dreyfus Amateurs where he worked as Financial Manager from 1986 to 1997. He also worked as a Senior Consultant in the administration and systems department of Deloitte & Touche from 1983 to 1986. He is also chief administrative officer of IRSA and Alto Palermo.

Salvador D. Bergel. Mr. Bergel obtained a law degree and a PhD from Litoral University (*Universidad Nacional del Litoral*). He is a founding partner of Zang, Bergel & Viñes and a consultant at Repsol YPF S.A. He is also an alternate director of Alto Palermo.

Juan C. Quintana Terán. Mr. Quintana Terán obtained a law degree from University of Buenos Aires (*Universidad de Buenos Aires*). He is also a consultant at Zang, Bergel & Viñes law firm. He has been chairman and Judge of the National Commercial Court of Appeals of the City of Buenos Aires (Cámara Nacional de Apelaciones en lo Comercial). He is an alternate director of Alto Palermo.

Gastón Armando Lernoud. Mr. Lernoud obtained a law degree from El Salvador University (*Universidad de El Salvador*) in 1992. He obtained a Masters degree in Corporate Law in 1996 from Palermo University (*Universidad de Palermo*). He was a senior associated member of Zang, Bergel & Viñes law firm until June 2002, when he joined Cresud's lawyers.

Enrique Antonini. Mr. Antonini holds a degree in law from the University of Buenos Aires. He is currently a member of the board of directors of Banco Mariva S.A. (since 1992), Mariva Bursátil S.A. (since 1997). He has also served as a director of Inversiones y Representaciones S.A. from 1993 to 2002. He is a member of the Banking Lawyers Committee and the International Bar Association.

Eduardo Kalpakian. Mr. Kalpakian holds a degree in business from the University of Belgrano. He has also an MBA from the CEMA University of Argentina. He has been a director for 25 years of Kalpakian Hnos. S.A.C.I., a leading carpet manufacturer and flooring distributor in Argentina, as a director and is currently is vice chairman of the board and CEO. He is also vice chairman of the board of La Dormida S.A.A.C.E.I.

Employment contracts with our directors

We do not have written contracts with our directors. However, Mr. Eduardo Elsztain, Saúl Zang, Alejandro Elsztain, Fernando Elsztain, Clarisa Lifsic and David Perednik are employed by us under the Labor Contract Law No. 20.744. This law governs certain conditions of the labor relationship, including remuneration, protection of wages, hours of work, holidays, paid leave, maternity protection, minimum age requirements, protection of young workers and suspension and termination of the contract.

Management

Our board of directors appoints and removes the senior management. Senior management performs its duties in accordance with the instructions of our board of directors. There are no arrangements by which a person is selected as a member of our senior management.

Table of Contents

The following table shows information about our current senior management designated by the board of directors meeting:

Name	Date of Birth	Position	Current Position Held Since
Eduardo S. Elsztain	01/26/1960	Chairman of the board of directors	1994
Alejandro G. Elsztain	03/31/1966	Chief executive officer	1994
Gabriel Blasi	11/22/1960	Chief financial officer	2004
Alejandro Bartolomé	12/09/1954	Chief production officer	1996
David A. Perednik	11/15/1957	Chief administrative officer	1997
José Luis Rinaldini	08/14/1963	Chief subsidiaries supervisor	1995
Alejandro Casaretto	10/15/1952	Chief real estate officer	2000
Carlos Blousson	09/21/1963	Chief sales officer	2000

The following is a biographical description of each of our senior managers who are not directors:

Gabriel Blasi. Mr. Blasi obtained a business administration degree and carried out post graduate studies in Finance at CEMA University (*Universidad del CEMA, Centro de Estudios Macroeconómicos Argentinos*) and at Austral University (*IAE, Universidad Austral*). He formerly worked as a senior securities trader at Citibank. He also performed several management positions related to investment banking and capital markets at Banco Río (BSCH) and was a financial director of Carrefour Group and Goyaique SACIFIA (Grupo Perez Companc). Currently, he also serves as chief financial director of IRSA and Alto Palermo.

Alejandro Bartolomé. Mr. Bartolomé obtained a degree in agriculture from University of Buenos Aires (*Universidad de Buenos Aires*) and a Master's degree in Animal Production from University of Reading (England). He was treasurer of CREA Monte Buey Inrville and coordinator of the Dairy Group Santa Emilia from 1993 until 1996. He also worked as a farm manager and was associated to a farm management company called Administración Abelenda, Magrane, Anchorena.

José Luis Rinaldini. Mr. Rinaldini obtained a degree in agriculture from University of Buenos Aires (*Universidad de Buenos Aires*). He has worked for Inversiones Ganaderas S.A. and for an agriculture and forestry company in the production and marketing areas.

Alejandro Casaretto. Mr. Casaretto obtained a degree in agriculture from University of Buenos Aires (*Universidad de Buenos Aires*). He has been working as our Technical Manager, a farm manager and has been a technical coordinator since 1975.

Carlos Blousson. Mr. Blousson obtained a degree in agriculture from University of Buenos Aires (*Universidad de Buenos Aires*). He has been working as our Sales Officer since 1996. Prior to joining Cresud, he worked as a futures and options operator at Vanexva Bursátil Sociedad de Bolsa-. Previously, he worked as a farm manager and a technical advisor at Leucon S.A.

Supervisory Committee

Our Supervisory Committee is responsible for reviewing and supervising our administration and affairs, and verifying compliance with the bylaws and the decisions adopted at shareholders' meetings. The members of the Supervisory Committee are appointed at the annual general ordinary shareholders' meeting for a term of one year. The Supervisory Committee is composed of three members and three alternate members.

Table of Contents

The following table shows information about the members of our Supervisory Committee, who were elected in the annual general ordinary shareholders meeting which was held on October 10, 2007:

Member	Date of Birth	Position
	(m/d/y)	
José Daniel Abelovich	07/20/1956	Member
Marcelo Héctor Fuxman	11/30/1955	Member
Roberto Murmis	04/07/1959	Member
Alicia Rigueira	12/02/1951	Alternate member
Sergio Kolaczyk	11/28/1964	Alternate member
Silvia Cecilia de Feo	10/07/1958	Alternate member

All members of the supervisory committee qualify as independent, in accordance with *Comisión Nacional de Valores* Resolution N° 400/2002.

Set forth below is a brief biographical description of each member of our Supervisory Committee:

José D. Abelovich. Mr. Abelovich obtained a degree in accounting from the University of Buenos Aires (*Universidad de Buenos Aires*). He is a founding member and partner of Abelovich, Polano & Asociados/SC International, a public accounting firm in Argentina. Formerly, he had been a manager of Harteneck, López y Cía/Coopers & Lybrand and has served as a senior advisor in Argentina for the United Nations and the World Bank. He is a member of the Supervisory Committees of Alto Palermo, Shopping Alto Palermo, Hoteles Argentinos, Inversora Bolívar and IRSA.

Marcelo H. Fuxman. Mr. Fuxman obtained a degree in accounting from the University of Buenos Aires (*Universidad de Buenos Aires*). He is a partner of Abelovich, Polano and Associates/SC International, a public accounting firm in Argentina. He is also a member of the Supervisory Committee of Alto Palermo, Shopping Alto Palermo, Inversora Bolívar and IRSA.

Roberto Murmis. Mr. Murmis holds a degree in accounting from the University of Buenos Aires (*Universidad de Buenos Aires*). Mr. Murmis is a partner at Abelovich, Polano & Asociados / SC International. Mr. Murmis worked as an advisor to the Secretaría de Ingresos Públicos. Furthermore, he is a member of the Supervisory Committee of Shopping Alto Palermo, Futuros y Opciones S.A., Llao Llao Resorts S.A. and IRSA.

Alicia Graciela Rigueira. Mrs. Rigueira holds a degree in accounting from the Universidad de Buenos Aires. Since 1998 she has been a manager at Estudio Abelovich, Polano & Asociados, affiliated with SC International. From 1974 to 1998, Mrs. Rigueira performed several functions in Harteneck, Lopez y Cia affiliated with Coopers & Lybrand. Mrs. Rigueira lectured at the Facultad de Ciencias Económicas de la Universidad de Lomas de Zamora.

Sergio Leonardo Kolaczyk. Mr. Kolaczyk obtained a degree in accounting from the University of Buenos Aires (*Universidad de Buenos Aires*). He is a professional of Abelovich, Polano & Asociados, a member firm of SC International. He is also an alternate member of the Supervisory Committee of Alto Palermo and IRSA.

Table of Contents

Silvia De Feo. Mrs. De Feo obtained a degree in accounting from the University of Belgrano (*Universidad de Belgrano*). She is a manager at Abelovich, Polano & Asociados/ SC International, an accounting firm in Argentina and former manager at Harteneck, Lopez & Cía./Coopers & Lybrand. She is also a member of the Supervisory Committees of Shopping Alto Palermo, Inversora Bolivar, Baldovinos S.A. and IRSA.

KEY EMPLOYEES

There are no key employees.

B. COMPENSATION

Compensation of directors

Under Argentine law, if the compensation of the members of the board of directors is not established in the by-laws of the company, it should be determined by the shareholders' meeting. The maximum amount of total compensation to the members of the board of directors, including compensation for technical or administrative permanent activities, cannot exceed 25% of the earnings of the company. That amount should be limited to 5% when there is no distribution of dividends to shareholders, and will be increased proportionally to the distribution. When one or more directors perform special commissions or technical or administrative activities, and there are no earnings to distribute, or they are reduced, the shareholders' meeting may approve compensation in excess of the above-mentioned limits.

The compensation of our directors for each fiscal year is determined pursuant to Argentine law, and taking into consideration whether the directors performed technical or administrative activities and our fiscal year's results. Once the amount is determined, they are considered at the shareholders' meeting.

At our shareholders meeting held on October 10, 2007 the shareholders approved an aggregate remuneration of Ps.2.2 million for all of our directors for the fiscal year ended June 30, 2007.

Compensation of Supervisory Committee

The shareholders meeting held on October 10, 2007, further approved by majority vote to pay aggregate remuneration of Ps.30,000 to our Supervisory Committee.

Compensation of Senior Management

Our senior management is paid a fixed amount established by taking into consideration their background, capacity and experience and an annual bonus which varies according to their individual performance and our results.

The total and aggregate compensation of our senior management for the fiscal year ended June 30, 2007 was Ps.2.1 million.

Table of Contents

As of June 30, 2007, we had set aside an aggregate amount of Ps.202,218 to provide pension, retirement or similar benefits for our directors and members of our administrative, supervisory and audit committees.

Compensation plan for executive management

During fiscal year 2007, we developed a special compensation plan for our key managers (the Plan) by means of contributions to be made by the employees and us.

Such Plan is directed to key managers and aims to retain them by increasing their total compensation package. It is granted to those who have met certain conditions. Participation and contributions under the Plan are voluntary. Once the invitation to participate has been accepted by the employee (the Participant), he/she is required to make two kinds of contributions: monthly contributions (salary based) and extraordinary contribution (annual bonus based). The suggested contribution to be made by Participants is: up to 2.5% of their monthly salary and up to 15.0% of their annual bonus.

Our contribution will be 200% of the employees' monthly contributions and 300% of the extraordinary employees' contributions.

The funds as a result of the Participants' contributions are transferred to a special independent vehicle created in Argentina as a Investment Fund approved by the *Comisión Nacional de Valores*. Such funds (including the rents derived thereof) are freely redeemable upon request of the Participants.

Contributions made by us under the Plan are transferred to another separate and independent vehicle (e.g., a trust fund).

Participants or their assignees, as the case may be, will have access to 100% of the benefits of the Plan (that is, our contributions made on the Participants' behalf to the specially created vehicle) under the following circumstances:

ordinary retirement in accordance with applicable labor regulations;

total or permanent incapacity or disability; and

death.

In case of resignation or termination without good cause, the manager may redeem the amounts contributed by us only if he or she has participated in the Plan for at least 5 years.

As of June 30, 2007, our contributions amounted to Ps.0.14 million.

C. BOARD PRACTICES

Benefits upon Termination of Employment

There are no contracts providing for benefits to directors upon termination of employment.

Table of Contents**Audit Committee**

In accordance with the Regime of Transparency in Public Offerings provided by Decree No. 677/01, the regulations of the *Comisión Nacional de Valores* and Resolutions No. 400 and 402 of the *Comisión Nacional de Valores*, our board of directors established an audit committee which would focus on assisting the board in exercising its duty of care, compliance with disclosure requirements, the enforcement of accounting policies, management of our business risks, the management of our internal control systems, ethical conduct of our businesses, monitoring the sufficiency of our financial statements, our compliance with the laws, independence and capacity of independent auditors and performance of our internal audit duties both by our company and our external auditors.

On December 13, 2006, our board of directors appointed Jorge Oscar Fernández, Pedro Damaso Labaqui Palacio, and Gabriel Adolfo Reznik, all of them independent members, as members of the audit committee. The board of directors named Jorge Oscar Fernández as the financial expert in accordance with the relevant SEC rules. We have a fully independent audit committee as per the standard provided in Rule 10(A)-3(b)(1).

Remuneration Committee

There is no remuneration committee.

D. EMPLOYEES

As of June 30, 2007, we had 363 employees, including the employees of Cresud, Inversiones Ganaderas S.A., Agropecuaria Cervera S.A. and Futuros y Opciones.Com, but not those of Agro-Uranga S.A. Approximately 61% are under collective labor agreements. We believe we have good relations with the union and our employees. We have never experienced a work stoppage. The following table shows our employees for the fiscal year ended June 30, 2007, 2006 and 2005.

Province	At June 30, 2007		At June 30, 2006		At June 30, 2005

- (1) Includes (i) 101,963,754 shares beneficially owned by Inversiones Financieras del Sur S.A., for which Mr. Eduardo S. Elsztain may be deemed beneficial owner by virtue of his voting power to control Inversiones Financieras del Sur S.A., (ii) 59,948 common shares beneficially owned by Dolphin Fund Plc., whose investment manager is a company beneficially owned by Eduardo Elsztain and (iii) 50,000 common shares owned directly by Eduardo S. Elsztain.

Table of Contents**Item 7. Major shareholders and related party transactions****A. MAJOR SHAREHOLDERS****Information about Major Shareholders****Share Ownership**

The following table sets forth information regarding ownership of our capital stock by each person known to us to own beneficially at least 5% of our common shares, Argentine pension funds and all our directors and officers as a group.

Shareholder	Share Ownership as of November 30, 2007	
	Number of Shares	Percentage ⁽⁶⁾
IFISA ⁽¹⁾	102,013,754	31.8%
D.E. Shaw Oculus Portfolios, L.L.C. ⁽²⁾	18,382,780	5.7%
Fidelity Management & Research Co. ⁽³⁾	18,469,000	5.8%
Directors and officers ⁽⁴⁾	103,000	0.03%
Argentine pension funds in the aggregate ⁽⁵⁾	8,752,090	3.5%
Total	149,420,624	46.58%

- (1) Mr. Eduardo S. Elsztain is the president of (i) IFIS Limited (IFIS), a company incorporated under the laws of Bermuda and registered in Argentina under article 123 of the Argentine Corporations Law No. 19,550, located at Wessex House, 45 Reid Street, Hamilton HM12, Bermuda, and (ii) IFISA, a company incorporated under the laws of Uruguay and registered in Argentina under article 123 of the Argentine Corporations Law No. 19,550, located at Zabala 1422, Montevideo, Uruguay, which is 100% owned by IFIS. Mr. Elsztain, by virtue of his position and voting power in IFIS, is the beneficial owner of 43.5% of IFIS capital stock. Although Mr. Elsztain does not own the majority of IFIS capital stock, he exercises effective control over this company, which, in turn, controls IFISA. As a result, Mr. Elsztain may be deemed beneficial owner of 32.4% of our total shares, by virtue of his voting power to control IFISA. Includes 50,000 common shares directly owned by Eduardo.
- (2) According to a Schedule 13G filed with the SEC on October 15, 2007.
- (3) According to the 13G filed with the SEC on February 14, 2007.
- (4) Does not include Mr. Eduardo Elsztain.
- (5) Based on estimates from the Superintendency of AFJP (*Administradora de Fondos de Jubilaciones y Pensiones*). None of the pension funds individually own more than 3.5% of our common shares. The highest percentage owners of the shares are *Met* with approximately 0.8%, *Consolidar* with approximately 0.6%, *Orígenes* with approximately 0.5% and *Nación* with approximately 0.5%.
- (6) As of October 31, 2007 our outstanding shares were 314,387,478. The term for the exercise of our outstanding warrants and the conversion of our outstanding convertible notes issued on November 21, 2002 expired on November 14, 2007. Throughout the conversion and exercise periods, holders of our warrants and convertible notes exercised an aggregate of 49,867,018 warrants and converted an aggregate of 49,910,874 convertible notes, respectively, increasing our capital stock to 320,774,772 issued and outstanding shares. As of the date of this annual report, there are no outstanding warrants or convertible notes to acquire our shares. As of June 30, 2004, 2005, 2006 and 2007, IFISA owned 27.5%, 20.2%, 16.0% and 32.8%, respectively, of our total shares. The increase in the ownership from 2006 to 2007 was due to the conversion of Cresud's convertible notes and Warrants that IFISA owned. IFISA has the same voting rights as our other shareholders.

Table of Contents**Change in Capital Stock Ownership**

	As of November 30, 2007 %	As of June 30, 2007 %	As of June 30, 2006 %	As of June 30, 2005 %	As of June 30, 2004 %
Eduardo S. Elsztain (1)	31.8%	32.8%	21.2%	17.3%	28.9%
Pension Funds in the aggregate	3.5%	3.7%	4.9%	7.1%	7.9%
Directors and senior managers in the aggregate	31.9%	32.9%	21.3%	17.5%	31.3%

(1) The number of shares beneficially owned by Mr. Eduardo S. Elsztain is 102,013,754. On October 15, 2002, we initiated a preemptive rights offering to subscribe for 50,000,000 units consisting of US\$50.0 million of 8% Convertible Notes due 2007 and non-detachable warrants to purchase additional shares of our common stock. The Convertible Notes were converted at the holder's option into shares of our common stock until maturity on November 14, 2007, at the initial conversion price of US\$0.5078 per common share. Each warrant was exercisable on or after conversion of the convertible note to which it is attached at the same conversion price plus a 20% premium (US\$0.6093). As a result of the conversion of convertible notes and of the exercise of warrants, the debt related to the convertible notes has been totally cancelled and the Company's capital stock has been fixed in the amount of Ps.320,774,772, representing 320,774,772 common shares face value Ps.1 and with a right to 320,774,772 votes.

As of November 30, 2007, our directors and senior managers controlled, directly or indirectly, approximately 31.9% of our common shares. As a result, these shareholders have, and will continue to have, significant influence on the election of our directors and the outcome of any action requiring shareholder approval.

Difference in Voting Rights

Our major shareholders do not have different voting rights.

B. RELATED PARTY TRANSACTIONS**Headquarters**

From December 2001 to December 2003 we subleased our headquarters from Alto Palermo. We paid a monthly rent of Ps.2,541.

This subleased agreement was cancelled on February, 2004 and a new lease agreement was signed among us, Alto Palermo, IRSA and Isaac Elsztain e Hijos S.C.A. We have leased our executive offices located in Bolívar 108, City of Buenos Aires pursuant to this agreement since March 2004. This lease has a term of 120 months and rent of Ps.8,490 payable monthly. We, Alto Palermo and IRSA each pay one-third of such rent in an amount of Ps.2,830 each.

In December 2003, we moved our headquarters to the 23rd floor of the Intercontinental Plaza tower, located at Moreno 877, in the City of Buenos Aires. We lease our headquarters and five parking lot spaces from Inversora Bolívar, a subsidiary of IRSA, pursuant to a lease agreement with an initial term of 60 months and an extension option for 36 additional months. We pay monthly rent of US\$2,979.

Table of Contents

Eduardo S. Elsztain, our chairman is also the chairman of the board of directors of Alto Palermo. Saúl Zang, our first vice-president is also director of Inversora Bolívar and Alejandro Gustavo Elsztain, our second vice-chairman is the vice chairman of Inversora Bolívar. In addition, Fernando Adrián Elsztain who is the chairman of Inversora Bolívar is also our director.

Lease Agreement

We lease a farm located in the Province of Córdoba, from Isaac Elsztain e Hijos S.C.A., pursuant to a lease agreement executed in July, 2005. This lease agreement has a term of three years and an option to extend the lease for three additional years. The leased farm has an extension of 15,069 hectares.

The rent was agreed to be paid in the following conditions: (i) for the first year the equivalent in Pesos of 7 Kg. of beef per hectare; (ii) for the second year up to the conclusion of this agreement (a) the equivalent in Pesos of 10 Kg. of beef per hectare if the total amount of cattle is less than 3,000; or (b) the equivalent in Pesos of 15 kg. of beef per hectare if the total amount of cattle exceeds 3,000. The beef price will be set, taking into account the price per kilo of beef quoted on *La Nación* newspaper, the previous Saturday of the payment date.

Due to the crisis in the cattle sector during the last year, in February 26, 2007, we signed an addendum to the lease agreement, decreasing the rent in a 50% for the next six months with an extension option for six additional months. During fiscal 2007, we pay a rent of Ps.0.2 million.

Fernando Adrián Elsztain, our director is also president of Isaac Elsztain e Hijos S.C.A. In addition, Alejandro G. Elsztain who is alternate director of Isaac Elsztain e Hijos S.C.A. is also our second vice-chairman and CEO.

Consulting Agreement

Pursuant to the terms of the Consulting Agreement with Consultores Asset Management effective as of November 7, 1994, Consultores Asset Management provides us advisory services on matters related to capital investments in all aspects of the agriculture business. One of our shareholders and the Chairman of our board of directors is the owner of 85% of the capital stock of Consultores Asset Management and our First Vice Chairman of the board of directors holds the remaining 15% of its capital stock.

Pursuant to the terms of the Consulting Agreement, Consultores Asset Management provides us with the following services:

advises with respect to the investment of our capital in all aspects of agricultural operations, including, among others, sales, marketing, distribution, financing, investments, technology and business proposals;

acts on our behalf in such transactions, negotiating the prices, conditions, and other terms of each operation; and

gives advice regarding securities investments with respect to such operations.

Table of Contents

The Consulting Agreement expressly provides that Consultores Asset Management may not advise us with respect to transactions that are entirely related to real estate.

Under the Consulting Agreement, we pay Consultores Asset Management for its services, an annual fee equal to 10% of our annual after-tax net income. We also reimburse Consultores Asset Management the administrative expenses incurred by it in performing its duties under the Consulting Agreement and: (i) remuneration to the directors and certifying accountants; (ii) remuneration of legal consultants; (iii) remuneration of auditors; (iv) representation costs; and (v) all other costs incurred by it in performing its services.

Fees totaled Ps.5.5 million, Ps.3.8 million and Ps.8.5 million for the years ended June 30, 2007, 2006 and 2005, respectively.

The Consulting Agreement is subject to termination by either party upon not less than 60 days prior written notice. If we terminate the Consulting Agreement without cause, we will be liable to Consultores Asset Management S.A for twice the average of the amounts of the management fee paid to Consultores Asset Management for the two fiscal years prior to such termination.

Donations to Fundación IRSA

From time to time, we donate money to Fundación IRSA, a charitable, not-for-profit organization, whose director is Eduardo S. Elsztain, our largest beneficial owner and our Chairman of the board of directors. Mr. Elsztain's wife serves as the President of Fundación IRSA.

During fiscal year ended June 30, 2007, we made no donations to Fundación IRSA; however, during the years ended June 30, 2006 and 2005, our donations amounted to Ps.1.6 million and Ps.1.2 million, respectively. In addition, as of June 30, 2007, we had recognized a liability for our unconditional promise to make a cash donation of Ps.1.8 million to Fundación IRSA and had accounted for such liability within trade accounts payable.

Agreement for Shared Corporate Services with IRSA and Alto Palermo

In order to reduce administrative expenses and to achieve a more efficient allocation of corporate resources, we entered into an Exchange of Operating Services Agreement with IRSA and Alto Palermo, on June 30, 2004. This agreement has a term of two years, which may be renewed for an equal term unless any of the parties decides to terminate it. Pursuant to this agreement tasks are performed by one or more of the companies for the benefit of one or more of other companies in exchange for a fee to be paid primarily through the provision of services in other areas. Through this agreement, each company continues to maintain its strategic and commercial independence while increasing operating efficiency. This agreement will not affect the independence of each company's record and accounting systems or adversely affect internal control systems or external audit tasks. Each company will continue to maintain separate assets and liabilities.

Alejandro Gustavo Elsztain is the General Coordinator of the program and the program is operated and implemented by Gabriel Adolfo Gregorio Reznik for us, Cedric Bridger for IRSA and Abraham Perelman for Alto Palermo, all of whom are directors and members of the Supervisory Committees of their respective companies. The main duties for implementation of the project are (a) monitoring the project's implementation in accordance with the agreement; (b) reviewing the billing report on a monthly basis to analyze and check it against the provisions of the agreement, and, in the event of discrepancies or deviations, preparing a report to submit for the consideration of the General Coordinator, and by each company's boards of directors and (c) assessing, on a permanent basis the results derived from the project's implementation and proposing to the General

Table of Contents

Coordinator changes in the event of a conflict with the agreement or, if appropriate, the possibility of establishing cost or benefit allocation mechanisms or criteria more consistent with the goals of the agreement.

The areas originally involved were Human Resources, Finance, Institutional Relations, Administration, Systems, Insurance, Purchasing, Messenger Services, Contracts, Operations and Directors Assistants, among others. This program was implemented to reduce operating costs by optimizing the individual administrative efficiencies of each company.

Currently, the program includes Internal Audit and the other Shared Corporate Services, while the sharing of Directors Assistants has been dropped.

In the future and in order to continue our policy of achieving a more efficient allocation of corporate resources, we may extend the areas in which we share corporate services with IRSA and Alto Palermo. Our chairman is also chairman of IRSA and Alto Palermo and our vice-chairman is also vice-chairman of IRSA and Alto Palermo. We believe that the terms and conditions of these transactions are consistent in all material respects with those prevailing in the market at the relevant time for agreements between unaffiliated parties.

Legal Services

During the years ended June 30, 2005, 2006 and 2007, the law firm Zang, Bergel & Viñes provided us with legal services amounting Ps.0.3 million, Ps.0.6 million and Ps.0.2 million, respectively. Our first vice-chairman Saúl Zang and our director Salvador D. Bergel are partners of such law firm.

Subscription of our Convertible Notes by Inversiones Financieras del Sur S.A.

On October 15, 2002, we initiated a preemptive rights offering to subscribe for 50,000,000 units consisting of US\$50.0 million of 8% convertible notes due 2007 (convertible notes) and non-detachable warrants to purchase shares of our common shares.

Inversiones Financieras del Sur S.A., an Uruguayan holding company, for which Mr. Eduardo S. Elsztain may be deemed beneficial owner by virtue of his voting power to control that company, has subscribed US\$22.6 million of our convertible notes.

During 2006 and 2007, Inversiones Financieras del Sur S.A. converted all of its convertible notes and exercised all of its warrants. As a result IFISA owned, as of November 30, 2007, 31.8% of our common shares.

Acquisition of IRSA Units

Eduardo S. Elsztain and Saúl Zang are, Chairman and Vice Chairman of our board of directors, respectively and are also shareholders of our company. Mr. Elsztain and Mr. Zang are also Chairman and Vice-Chairman of the Board of Directors of IRSA, respectively and are also shareholders of IRSA.

During November and December 2002, we purchased 49.7 million convertible notes issued by IRSA and during July and November 2003, we purchased an additional 0.25 million convertible notes. The notes mature in 2007 and accrue interest semi-annually at 8% interest rate.

Table of Contents

IRSA's convertible notes which were offered on October 15, 2002 for 100 million units consisting of US\$100.0 million of 8% convertible notes due 2007- are convertible at any time, at the option of the holder, into a fixed number of common shares. Once converted, the holder has the right to acquire an additional equal number of shares at the exercise price of the warrant.

In May 2004 we decided to exercise our option to convert 5.0 million aggregate principal amount of IRSA's convertible notes as part of our long term strategy, in order to revert the reduction of our ownership percentage, which was diluted by the conversion of notes and the exercise of warrants by third parties. As a result of this conversion, we have received 9.2 million of IRSA common shares.

In July 2004, we converted 0.35 million of convertible notes issued by IRSA for US\$0.5 million.

On September 30, 2004, we exercised 5.0 million of its IRSA Warrants for 9.2 ordinary shares at a total cost of US\$6.0 million.

In February 2006, we converted 5.0 million of convertible notes issued by IRSA for 9.2 million ordinary shares.

In April 2006, we converted 16.0 million of convertible notes issued by IRSA for 29.3 million ordinary shares.

In September 25, 2007, we converted US\$12 million IRSA convertible notes for 22.0 million ordinary shares of IRSA. After this conversion, we no longer own any IRSA convertible notes.

As of September 30, 2007, we owned 31.9% of IRSA's common shares.

Additionally, on October 25, 2007, we exercised all our outstanding warrants (12.5 million) to acquire 22.9 million common shares for a total cost of US\$15.0 million. The term for the exercise of IRSA's outstanding warrants and the conversion of IRSA's outstanding convertible notes issued on November 21, 2002 expired on November 14, 2007. Throughout the conversion and exercise periods, holders of IRSA's warrants and convertible notes exercised an aggregate of 99,896,806 warrants and converted an aggregate of 99,942,343 convertible notes, respectively, increasing IRSA's capital stock to 578,676,460 issued and outstanding shares. As of the date of this Form 20-F, there are no outstanding warrants or convertible notes to acquire IRSA's shares. After this exercise of warrants and conversion of convertible notes, we have no outstanding warrants or convertible notes of IRSA. As a result of the exercise of these warrants, our investment in IRSA increased from 25.0% as of June 30, 2007 to 34.4% of IRSA's shares as of November 16, 2007.

Purchase of Cresud Shares and Notes by IFISA

Cresud convertible notes

During the fiscal year ended on June 30, 2007, IFISA converted 15.0 million convertible notes and subsequently exercised the 15.0 Cresud warrants. Both transactions resulted in the issue of 58.9 million Cresud common shares.

During the fiscal year ended on June 30, 2006, IFISA converted 5.5 million Cresud convertible notes resulting in the issue of 10.8 million Cresud common shares and 5.5 million

Table of Contents

warrants. During the same period IFISA purchased 0.5 million Cresud warrants and subsequently exercised 6.0 million warrants resulting in the issue of 11.9 million Cresud common shares.

On December 22, 2005 the Board of Directors of IFISA approved the distribution of dividends in kind of 3.5 million convertible notes of Cresud, as provided by the applicable law and its memorandum of incorporation. These assets were available for distribution during January 2006.

Cresud Shares

During the fiscal year ended on June 30, 2007, 58.9 million Cresud common shares were issued as a result of the conversion of 15.0 million Cresud convertible notes and the exercise of the 15.0 million Cresud warrants.

During the same period IFISA bought the net of 4.3 million of Cresud common shares.

During the fiscal year ended on June 30, 2006, 22.7 million Cresud common shares were issued as a result of the conversion of 5.5 million Cresud convertible notes and from the exercise of 6.0 million warrants, of which a net of 4.6 million Cresud common shares were sold.

On October 18, 2005 Refco filed for Chapter 11 bankruptcy protection and announced a deal to sell its brokerage business to private investors. At the same time, IFISA acknowledged that Refco had disputed the ownership of IFISA's account assets.

On August 10, 2005, IFISA entered into an equity financing with Refco, for which 0.86 million Cresud ADRs and 2.5 million IRSA Convertible Bonds were placed as collateral.

On July 17, 2006, IFISA asserted the Proof of Claim against Refco for a total amount of US\$10.8 million.

On October 10, 2006, Marc S. Kirschner, the chapter 11 Trustee of Refco (the Trustee), announced his decision to liquidate substantially all of the Refco securities portfolio, by soliciting bids from multiple independent/dealers and by other means consistent with good market practice. The Trustee was also allowed to solicit additional bids from former Refco customers for particular securities, provided however, that neither the Trustee nor Refco shall have any obligation to contact former Refco customers, including IFISA when selling the above mentioned securities.

IFISA expressed its willingness to acquire the securities that were formerly in its account at Refco in a timely manner. Nevertheless, IFISA's offer to purchase Cresud ADRs from the Trustee, which included 860,000 Cresud ADRs was rejected.

As of November 30, 2007, IFISA owned 102.0 million shares of Cresud, representing 31.8% of the total outstanding Cresud shares.

Purchase of Cresud Convertible Notes by Directors and Shareholders

As of June 30, 2007 and 2006, certain directors and shareholders were also holders of convertible notes, totaling US\$0.04 million and US\$14,992,438 which US\$14,984,838 corresponds to IFISA and US\$7,600 to Clarisa Lifsic.

Table of Contents

Cresud s Intercompany Loans

As of June 30, 2007, we, as lender, had a line of credit with our wholly-owned subsidiary Agropecuaria Cervera S.A., as borrower, for up to Ps.20.0 million, with an annual interest rate of Baibor plus 100 basis points, which is scheduled to mature on January 2, 2008. The line of credit was granted for working capital purposes in the ordinary course of business. As of June 30, 2007, the outstanding amount was Ps.13.7 million.

IRSA s Intercompany Loans

As of September 30, 2007, IRSA, as lender, had two loan agreements with Llao Llao Resort S.A. (50% owned by IRSA), as borrower: (i) a loan agreement for Ps.20.6 million, with an annual interest rate of 12%, which is scheduled to mature on December 19, 2007; (ii) a loan agreement for up to US\$. 4.0 million, with an annual interest rate of 7%, which is scheduled to mature on October14, 2010. Both loan agreements were granted for working capital purposes in the ordinary course of business. As of September 30, 2007, the outstanding amounts were Ps.20.6 million and US\$ 1.3 million, respectively.

As such date, IRSA, as borrower, also had a line of credit with Ritelco (100% owned by IRSA), as lender, for up to US\$. 5.0 million, with an interest rate of Libor, which is scheduled to mature on November 28, 2008. The line of credit was granted for working capital purposes in the ordinary course of business. As of September 30, 2007, the outstanding amount was US\$4.5 million.

C. INTERESTS OF EXPERTS AND COUNSEL

This section is not applicable.

Item 8. Financial information

A. CONSOLIDATED STATEMENTS AND OTHER FINANCIAL INFORMATION

See Item 18 for our Consolidated Financial Statements.

Legal or arbitration proceedings

We are not engaged in any material litigation or arbitration and no material litigation or claim is known to us to be pending or threatened against us, other than those described below.

Inversiones Ganaderas

Exagrind S.A. has filed a lawsuit against our subsidiary Inversiones Ganaderas S.A. (IGSA) to recover damages and losses produced by a fire in Estancia San Rafael which is close to Tali Sumaj, Province of Catamarca. The fire took place on September 6, 2000. The estimated amount of the legal action is Ps.2.9 million at the date the claim was filed.

IGSA argued that Exagrind s claim was incorrectly processed and requested that the first instance judge order a new notice of processed, which request was granted by the judge. Exagrind

Table of Contents

successfully appealed such decision. IGSA filed subsequent appeals requesting to be given the remainder of the legal term to answer the lawsuit, since at the time of Exagrind's appeal the legal term, had not yet expired, Such appeals were rejected by both first and second instance courts, ending with an appeal to the High Court of the Province of Catamarca. To date, a decision from the appellate court is still pending.

Additionally, in March 2007, under the request of Exagrind S.A., the court in charge of the case ordered a general inhibition of IGSA's assets. In June 2007, that measure was revoked and replaced by an attachment on the real estate.

Exportaciones Agroindustriales Argentinas

On January 11, 2007 our affiliate Cactus and us (solely nominee Argentine legal purposes) acquired 100% of the capital stock of Exportaciones Agroindustriales Argentinas S.A. (EAASA). On September 13, 2007, EAASA received an information request from the Central Bank relating to its obligation to repatriate foreign currency proceeds for an aggregate amount of US\$0.9 million from certain exports of agricultural products prior to our acquisition. Information requests often are a first step by the Central Bank in its initiation of administrative proceedings relating to possible breaches of foreign exchange regulations.

On October 8, 2007, EAASA requested an extension of the time to answer the Central Bank's information request in order to analyze the relevant accounts and operations. The Central Bank granted EAASA an extension of 30 business days from October 30, 2007 to answer the information request. Breach of exporters' obligations to repatriate export proceeds is subject to fines of up to ten times the amount involved and other penalties imposed pursuant to Argentine Criminal laws. We cannot assure you that the Central Bank will not initiate an administrative proceeding against EAASA, and that as a result of any such proceeding Central Bank will not impose fines and penalties that adversely affect the financial condition and results of operations of EAASA.

Agropecuaria Cervera S.A.

On September 17, 2007, certain individuals filed an action to enforce constitutional rights known as *amparo* against the Ministry of Production and Employment of the Province of Salta and Agropecuaria Cervera S.A. before the Second Chamber of the Indictment Court (*Cámara de Acusación Sala II*) of the Province of Salta. The plaintiffs seek an exceptional remedy to protect their constitutional rights, in the form of a declaration that Resolution No. 403 enacted by the Ministry is null and void. Resolution No. 403, dated September 23, 2004, authorized Agropecuaria Cervera to convert certain forested plots of land into non-forest land for agricultural purposes. The plaintiffs argued that such Resolution was enacted through an irregular administrative proceeding and is therefore unconstitutional.

On November 15, 2007, Agropecuaria Cervera S.A., as co-defendant, filed a response to the complaint, arguing against the remedy sought, primarily on the grounds that the plaintiffs failed to fulfill the procedural and legal prerequisites to filing the action. Agropecuaria Cervera S.A. further argued that the summary proceeding, as an exceptional remedy, is only available to protect individuals' constitutional rights or to prevent an imminent threat to such rights and does not apply in this case, since Resolution No. 403 was enacted three years prior. As of the date of this Form 20-F, the Court's decision is still pending.

Table of Contents
IRSA's and Alto Palermo's legal or arbitration proceedings

Set forth below is a description of certain material legal proceedings to which IRSA is a party. IRSA is not engaged in any other material litigation or arbitration and no other material litigation or claim is known to IRSA to be pending or threatened against it or its subsidiaries. Nevertheless, IRSA may be involved in other litigation from time to time in the ordinary course of business.

Puerto Retiro

On November 18, 1997, in connection with IRSA's acquisition of its subsidiary Inversora Bolívar S.A. (Inversora Bolívar), IRSA indirectly acquired 35.2% of the capital stock of Puerto Retiro. Inversora Bolívar had purchased such shares of Puerto Retiro from Redona Investments Ltd. N.V. in 1996. In 1999, IRSA, through Inversora Bolívar, increased its interest in Puerto Retiro to 50.0% of its capital stock. On April 18, 2000, Puerto Retiro received notice of a complaint filed by the Argentine Government, through the Ministry of Defense, seeking to extend the bankruptcy of Inversora Dársena Norte S.A. (Indarsa). Upon filing of the complaint, the bankruptcy court issued an order restraining the ability of Puerto Retiro to dispose of, in any manner, the real property it had purchased in 1993 from Tandanor S.A. (Tandanor). Puerto Retiro appealed the restraining order which was confirmed by the Court on December 14, 2000.

In 1991, Indarsa had purchased 90% of Tandanor, a former government-owned company, which owned a piece of land near Puerto Madero of approximately 8 hectares, divided into two parcels: Planta 1 and 2. After the purchase of Tandanor by Indarsa, in June 1993, Tandanor sold Planta 1 to Puerto Retiro, for a sum of US\$18 million pursuant to a valuation performed by J.L. Ramos, a well-known real estate brokerage firm in Argentina. Indarsa failed to pay to the Argentine government the price for its purchase of the stock of Tandanor, and as a result the Ministry of Defense requested the bankruptcy of Indarsa. Since the only asset of Indarsa was its holding in Tandanor, the Argentine government is seeking to extend Indarsa's bankruptcy to other companies or individuals which, according to its view, acted as a single economic group. In particular, the Argentine government has requested the extension of Indarsa's bankruptcy to Puerto Retiro which acquired Planta 1 from Tandanor.

The deadline for producing evidence in relation to these legal proceedings has expired. The parties have submitted their closing arguments and are awaiting a final judgment. However, the judge has delayed his decision until a final judgment in the criminal proceedings against the former Defense Minister and former directors of Indarsa has been delivered. We cannot give you any assurance that IRSA will prevail in this proceeding, and if the plaintiff's claim is upheld by the courts, all of the assets of Puerto Retiro would likely be used to pay Indarsa's debts and IRSA's investment in Puerto Retiro, valued at Ps.54.9 million as of June 30, 2007, would be lost. As of June 30, 2007, IRSA had not established any reserve in respect of this contingency.

Llao Llao Holding

Llao Llao Holding S.A. purchased Hotel Llao Llao in November, 1997, from the Argentine National Parks Administration. Llao Llao Holding S.A., the predecessor of Llao Llao Resorts S.A., was sued in 1997 by the National Parks Administration to collect the unpaid balance of the purchase price in Argentine sovereign debt securities amounting to US\$2.9 million. The trial court ruled in favor of the plaintiff. The ruling was appealed, and the court of appeals confirmed the judgment ordering the payment of US\$2.9 million in Argentine sovereign debt securities available at the date of the ruling, plus compensatory and punitive interest and attorneys' fees. On March 2, 2004, Llao

Table of Contents

Llao Resorts S.A. deposited a payment of Ps.7.2 million with Banco de la Ciudad de Buenos Aires in favor of the National Parks Administration and deposited Argentine sovereign debt securities class FRB FRB L+13/16 2005 having a total principal amount of US\$4.1 million. The aggregate amount deposited on that date was Ps.9.2 million.

On June 30, 2004, the plaintiff filed a brief rejecting Llao Llao Holding Resorts payment on the grounds that it was a partial payment and requesting the court to determine the term for the deposit of funds amounting to final payment of the total debt. The trial court pesified the outstanding amount of plaintiff s ruling against Llao Llao Resorts S.A., as well as the unpaid fee of the plaintiff s attorneys. The plaintiff appealed this decision. The court of appeals ruled in favor of the plaintiff maintaining the unpaid amounts were payable in U.S. dollars. Llao Llao Resorts S.A. filed an appeal, which was rejected. Llao Llao Resorts S.A. subsequently filed an additional appeal in response to the refusal to allow the appeal and this action is still pending.

The plaintiff filed a petition requesting that the above mentioned deposit amount be transferred to a savings account. Llao Llao Holding S.A. did not oppose this petition maintaining that its obligations would be cancelled upon such payment. Notwithstanding the appeal the complaint filed by Llao Llao Resorts S.A., the plaintiff has continued the procedure for the collection of the outstanding amount.

As of September 30, 2007, Llao Llao Resorts S.A. had established a reserve in the amount of Ps.4.78 million which it determined by calculating the difference between the amount claimed for compensatory and punitive interest (US\$3.8 million) and the amount Llao Llao Resorts S.A. has deposited in favor of the National Parks Administration (Ps.7.2 million). In addition, as of such date Llao Llao Resorts S.A. had established an additional reserve of Ps.1.12 million to cover its possible liability for the fees of the plaintiff s attorneys.

Neuquén Project

On July 6, 1999, Alto Palermo acquired 94.6% ownership of Shopping Neuquén S.A. (Shopping Neuquén) for Ps.4.2 million. Shopping Neuquén s sole asset is a parcel of land of approximately 50,000 square meters in which Alto Palermo seek to develop a shopping center. Alto Palermo paid Ps.0.9 million on September 1, 1999, and the remaining Ps.3.3 million were originally scheduled to be paid on the earlier to occur of July 5, 2001, and the completion of the construction of the shopping center. On August 15, 2003, the former holders of 85.8% of Shopping Neuquén filed a complaint against Alto Palermo seeking recovery of the unpaid balance of the purchase price, plus interest and legal costs. In September 2003, Alto Palermo answered the complaint and raised several defenses including, plaintiffs non-compliance with her duties under the contract and the pesification of the purchase price balance pursuant to emergency legislation adopted in 2002. Alto Palermo also filed a counterclaim alleging there should be a readjustment of the terms of the contract which became excessively burdensome given the 2001 economic, social and political crisis. In November 2003, the plaintiffs replied to Alto Palermo s counterclaim alleging that the payment under the purchase agreement was overdue before the economic and social crisis emerged and thus its contract readjustment claim was inadmissible. On February 2, 2007, Alto Palermo reached an agreement with Shopping Neuquén S.A. former shareholders, in which both parties decided to accept the judge s ruling. On that date, and pursuant to the aforementioned agreement, Alto Palermo paid the amount of US\$3.45 million to the former shareholders of Shopping Neuquén S.A., not having the latter anything else to claim to Alto Palermo.

Table of Contents

Legal issues with the City Hall of Neuquén

In June 2001, Shopping Neuquén requested that the City Hall of Neuquén allow it to transfer certain parcels of land to third parties so that each participant in the commercial development to be constructed would be able to build on its own land. The City Hall Executive Branch previously rejected this request under Decree No. 1437/2002 which also established the expiration of the rights arising from Ordinance 5178, including the loss of any improvement and expenses incurred. As a result, Shopping Neuquén had no right to claim indemnity charges and annulled its buy-sell land contracts.

Shopping Neuquén submitted a written appeal to this decision on January 21, 2003. It also sought permission to submit a revised schedule of time terms, taking account of the current situation and including reasonable short and medium term projections. The City Hall Executive Branch rejected this request in Decree 585/2003. Consequently, on June 25, 2003, Shopping Neuquén filed an Administrative Procedural Action with the High Court of Neuquén requesting, among other things, the annulment of Decrees 1,437/2002 and 585/2003 issued by the City Hall Executive Branch. On December 21, 2004, the High Court of Neuquén communicated its decision that the administrative procedural action that Shopping Neuquén had filed against the City Hall of Neuquén had expired. Shopping Neuquén filed an extraordinary appeal for the case to be sent to the Argentine Supreme Court, which is yet to be decided.

On December 13, 2006, Shopping Neuquén signed an agreement with both the City Hall and the Province of Neuquén stipulating a new timetable for construction of the commercial and housing enterprises (the Agreement). Also, Shopping Neuquén was permitted to transfer certain parcels to third parties so that each participant in the commercial development to be constructed would be able to build on its own land, with the exception of the land in which the shopping center will be constructed. The Legislative Council of the City Hall of Neuquén duly ratified the Agreement. The City Hall Executive Branch promulgated the ordinance issued on February 12, 2007.

The Agreement also provides that Shopping Neuquén will submit, within 120 days after the Agreement is signed, a new urban project draft with an adjustment of the environmental impact survey, together with a map of the property subdivision, which the City Hall of Neuquén will approve or disapprove within 30 days after its presentation. If the project is approved, Shopping Neuquén will submit the final maps of the works to the City Hall within 150 days of this decision and construction must commence within a maximum period of 90 days thereafter. The first stage of construction (including minimum construction of 21,000 square meters of the shopping center and 10,000 square meters of the hypermarket) is expected to be completed within a maximum period of 22 months. The Agreement is conditional upon the City Hall declaring the feasibility of the draft project submitted, and upon the terms and conditions of this decision being accepted by Shopping Neuquén S.A. The City Hall of Neuquén reserves its right to rescind the Agreement and file the legal actions it deems pertinent if its conditions are contravened.

On March 28, 2007, Shopping Neuquén submitted the new project draft and revised environmental impact survey to the City Hall of Neuquén. On May 10, 2007, the City Hall of Neuquén, requested certain explanations and made recommendations for IRSA's consideration before issuing an opinion on the feasibility of the draft project. On July 17, 2007, Shopping Neuquén answered the City Hall's requests and on September 11, 2007, the City Hall approved the feasibility of the project.

Table of Contents

Other Litigation

As of July 5, 2006, the AFIP filed a preliminary injunction with the Federal Court for Administrative Proceedings for an aggregate amount of Ps.3,689,485.5, plus an added amount, provisionally estimated, of Ps.900,000 for legal fees and interest. The main dispute is about the capital gains tax due for admission rights. In the first instance, AFIP pleaded for a general restraining order. On November 29, 2006, the Federal Court issued an order substituting such restraining order for an attachment on the parcel of land located in Caballito neighborhood, City of Buenos Aires, where Alto Palermo is planning to develop a shopping center.

After IRSA's acquisition of Bouchard 557, IRSA requested that the Argentine Antitrust Authority indicate whether it was necessary to notify it of such acquisition. The Antitrust Authority advised IRSA that it was in fact required to so notify it, and IRSA challenged such opinion in the courts. The court (*Cámara Nacional de Casación Penal*) confirmed the opinion of the Antitrust Authority. IRSA subsequently appealed such confirmation and this appeal is still pending.

Dividends and dividend policy

Pursuant to Argentine law, the distribution and payment of dividends to shareholders is valid only if they result from realized and net earnings of the company pursuant to annual financial statements approved by the shareholders. The approval, amount and payment of dividends are subject to the approval by our shareholders at our annual ordinary shareholders meeting. The approval of dividends requires the affirmative vote of a majority of the shares entitled to vote at the meeting.

In accordance with Argentine law and our by-laws, net and realized profits for each fiscal year are allocated as follows:

5% of such net profits is allocated to our legal reserve, until such reserve amounts to 20% of our capital stock;

a certain amount determined at a shareholders' meeting is allocated to compensation of our directors and the members of our Supervisory Committee; and

additional amounts are allocated for the payment of dividends or to optional reserve funds, or to establish reserves or for whatever other purpose our shareholders determine.

On May 2, 2006, we entered into a US\$8 million loan agreement with Credit Suisse which imposes restrictions on our ability to pay dividends. Under this loan agreement, which matures on November 2, 2008, we are not permitted to make dividends or other restricted payments (including purchases or redemptions of our capital stock), in cash, obligations or other property, in an aggregate amount exceeding US\$5 million in any calendar year.

The following table sets forth the dividend payout ratio and the amount of dividends paid on each fully paid common share for the mentioned years. Amounts in Pesos are presented in historical, non-inflation adjusted Pesos as of the respective payment dates. See Exchange Rates .

Table of Contents

Year	Total Dividend (in millions of Pesos)	Dividend per Common Share(1) (Pesos)
1996		
1997		
1998	3.8	0.099
1999	11.0	0.092
2000	1.3	0.011
2001	8.0	0.030
2002		
2003	1.5	0.012
2004	3.0	0.020
2005	10.0	0.059
2006	5.5	0.024
2007	8.3	0.026

(1) Corresponds to per share payments. To calculate the dividends paid per ADS, the payment per share should be multiplied by ten. Amounts in Pesos are presented in historical Pesos as of the respective payment date. See *Exchange Rates*.

Future dividends with respect to our common shares, if any, will depend on, among other things, our results of operations, cash requirements, financial condition, contractual restrictions, business opportunities, provisions of applicable law and other factors that our shareholders at a general shareholders meeting may deem relevant. As a result, we cannot give you any assurance that we will pay any dividends at any time in the future.

B. SIGNIFICANT CHANGES

Exercise of our warrants and conversion of our convertible notes. The term for the exercise of our outstanding warrants and the conversion of our outstanding convertible notes issued on November 21, 2002 expired on November 14, 2007. Throughout the conversion and exercise periods, holders of our warrants and convertible notes exercised an aggregate of 49,867,018 warrants and converted an aggregate of 49,910,874 convertible notes, respectively, increasing our capital stock to 320,774,772 issued and outstanding shares. As of the date of this annual report, there are no outstanding warrants or convertible notes to acquire our shares.

Cactus. The Cactus farm is a 170-hectare farm owned by our affiliate Cactus in Villa Mercedes, Province of San Luis. Cactus is a joint venture between us, Cactus Feeders Inc., one of the largest feed lot companies in the United States, and Tyson Foods, a leading beef and poultry meat processing company. The feed lot began to operate in September 1999. On October 12, 2007, the administrative authority of Villa Mercedes, Province of San Luis, where the feed lot is located, ordered the partial closure of Cactus due to the emission of odors related to the number of animals accommodated. In addition, it ordered Cactus to file a Mitigation Plan in connection with the emission of the said odors. On December 5, 2007, the aforementioned administrative authority discharged the closure, authorizing the accommodation of up to 18,000 heads of cattle.

Partial sale of Los Pozos farm. On October 22, 2007 we signed a deed for the transfer of 4,974 hectares of our Los Pozos farm, in the Province of Salta. The aggregate sale price was US\$1.1 million, of which we collected US\$0.34 on August 22, 2007 and US\$0.68 on October 25, 2007. The balance of US\$0.10 million plus accrued interest at a variable rate of LIBOR plus 600 basis points, is payable on August 21, 2008. We acquired Los Pozos farm at a purchase price of approximately US\$9.75 per hectare and was sold at approximately US\$225 per hectare, resulting in a gain of approximately US\$1.0 million.

Table of Contents

Capital increase. On our shareholders meeting held on October 10, 2007, our shareholders approved a capital increase by a nominal amount of up to Ps.180,000,000, through the issuance of up to 180,000,000 of new common shares, par value Ps.1.00. On September 12, 2007, we filed a Registration Statement with the SEC and on October 7, 2007, we filed an amendment to such Registration Statement. As of the date of this Form 20-F, the final terms of this rights offering are pending of approval and we cannot give any assurance in relation to the proposed timing of the offering about the issue date of the new common shares.

Minimum Environmental Budgets for the Protection of Native Forests Law. On December 19, 2007, was enacted Law No. 26,331, known as the Forests Law, which sets forth the minimum budgets for environmental protection, restoration, conservation and, use and sustainable management of native forests. The Forests Law prevents the owners of lands, including native forests from deforesting or converting forested areas to non-forest lands for other commercial uses without a prior permit from each local government, which requires the preparation and evaluation of an environmental impact report. The Forests Law establishes that each jurisdiction shall set forth its territorial planning within one year and that no deforestations shall be permitted prior to this.

In addition, the Forests Law also sets forth a national policy for the rational and sustainable use of native forests, which aims to guarantee the preferential use of native forests by aboriginal and farming communities that reside nearby. In this case, the relevant provincial authority shall not grant permits without the formal written consent by such communities and which is to be declared at a public hearing.

Purchase of additional hectares of La Adela . On December 17, 2007, we signed a purchase agreement to acquire the remaining undivided 25% of the 72 hectare of La Adela farm, which amounts to 18 hectares. The transaction was agreed at a price of US\$0.14 million, which was paid upon the execution of the agreement.

Agreement with Cyrela Brazil Realty. On August 14, 2007, IRSA signed an agreement with Cyrela Brazil Realty S.A. Empreendimentos e Participações (Cyrela) pursuant to which IRSA and Cyrela propose to develop residential projects in Argentina targeted to diverse market segments. IRSA and Cyrela formed a new company, Cyrsa S.A., to carry out the proposed development projects, and have each agreed to make an initial investment of US\$30 million in such company. Cyrela is a public company in Brazil and is one of the largest developers of residential real estate in the cities of Sao Paulo and Rio de Janeiro. We and IRSA have a long-standing commercial relationship with Cyrela as reflected by IRSA s substantial investment in Brazil Realty S.A. from 1994 to 2002 and our recent investment in BrasilAgro, a company focused on agricultural opportunities in Brazil that was founded by, among others, us and another company owned by Mr. Elie Horn, Cyrela s controlling shareholder and current chief executive officer.

Cyrsa is currently developing a parcel of land in Vicente Lopez, province of Buenos Aires.

Acquisition of BankBoston Tower. On August 27, 2007, IRSA signed a deed that entitles it to an undivided 50% ownership interest in an office building known as the BankBoston Tower located at 265 Carlos Maria Della Paolera in the City of Buenos Aires. This modern property was designed by the recognized Architect Cesar Pelli and has a gross leasable area of 31,670 square meters. The transaction was consummated for an aggregate purchase price of US\$108 million (including taxes), of which IRSA paid US\$54 million.

Table of Contents

Neuquén Project. On September 20, 2007 the Municipality of Neuquén declared the urban project and environmental impact study are feasible. Shopping Neuquén S.A. has 150 days to submit the work plans from the date of the declaration. See IRSA's Business Development and Sale of Properties Land Reserves in Other Provinces.

Patio Olmos Building. On September 25, 2007 IRSA signed the transfer deed to purchase the real estate in which the Patio Olmos commercial center is currently operating from the Government of the Province of Córdoba. IRSA also signed the transfer deed to purchase the related concession contract relating to the use of the property. The balance of Ps. 22.7 million for the property and the concession was also paid on this date.

Torres Rosario, City of Rosario. IRSA owns a plot of land spanning a surface of approximately 50,000 square meters in the City of Rosario in the same place where IRSA's local Shopping Center, Alto Rosario, is located.

On October 11, 2007, IRSA entered into a barter agreement with Condominios del Alto S.A. whereby Condominios del Alto S.A. proposed to acquire plot G, located in the City of Rosario, Province of Santa Fe, Argentina, which belongs to IRSA, for the construction at its own expense and under its own responsibility of a housing building. As consideration for the barter over the plot, Condominios de Alto S.A. agreed to deliver: (i) fifteen housing units, with a total constructed surface of 1,504.45 square meters, which will represent upon completion in aggregate 14.85% of the area of housing units to build in plot G (ii) fifteen garages, which will represent upon completion in aggregate 15% of the area of garage own units to be build in the same building.

As additional consideration for IRSA, Condominios del Alto S.A. will pay IRSA US\$15,300 and guarantee its obligations: (i) Condominios del Alto S.A. granted a first degree mortgage in favor of IRSA on plot G in the amount of US\$1,100,000; (ii) established a security insurance of which IRSA will be assigner of the insured amount of US\$1,600,000, and (iii) the shareholders of Condominios del Alto S.A. are the guarantors of the obligations of the latter up to the amount of US\$800,000.

Finally, IRSA granted Condominios del Alto S.A. an option to enter into a barter agreement on plot 2h, close to the transferred plot G.

National Congress enacted the Law No. 26,313. Recently enacted Law No. 26,313, established mandatory restructuring of certain mortgage loans granted by the former Banco Hipotecario Nacional prior to April 1, 1991. Neither the Ministry of Economy nor the Central Bank have issued corresponding regulations explaining the application of the law as yet. Banco Hipotecario's management interpretation is that this law only applies to non-performing mortgage loans granted before April 1, 1991, which are restructured convertibility period. However, it is possible that the regulations will provide for the restructuring of all mortgage loans granted prior to April 1, 1991, including performing loans.

Incorporation of Financel. On September 25, 2007, IRSA formed a new company, Financel Communications S.A. (Financel), with its partner Prisma Investments S.A. with ownership of 80% and 20%, respectively. Financel's purpose is to create innovative solutions for collections and payments in Argentina through the use of mobile telephony. Financel, together with CTI Móvil and Tarshop, have set-up Compra Móvil, the first shopping system for mobile telephones in Argentina which we believe will allow CTI customers to expand their options in an easy and secure way, for payments of consumer purchasers, through the use of their mobile telephones.

Table of Contents

Exercise of IRSA's Warrants and Conversion of Convertible Notes. On September 30, 2007, we exercised 20.5 million of our warrants to acquire an additional 37.6 million common shares of IRSA for a total cost of US\$24.6 million. Additionally, on October 25, 2007, we exercised 12.5 million of our warrants to acquire an additional 22.9 million common shares for a total cost of US\$ 15.0 million. On September 25, 2007, we converted US\$ 12.0 million of IRSA's convertible notes into 22.0 million common shares of IRSA. After this exercise of warrants and conversion of convertible notes, we have no outstanding warrants or convertible notes of IRSA. The term for the exercise of IRSA's outstanding warrants and the conversion of IRSA's outstanding convertible notes issued on November 21, 2002 expired on November 14, 2007. Throughout the conversion and exercise periods, holders of IRSA's warrants and convertible notes exercised an aggregate of 99,896,806 warrants and converted an aggregate of 99,942,343 convertible notes, respectively, increasing our capital stock to 578,676,460 issued and outstanding shares. As of the date of this annual report, there are no outstanding warrants or convertible notes to acquire IRSA's shares. As a result of these exercises and conversions, our investment in IRSA's common shares increased from 25% on June 30, 2007 to 34.4% on November 16, 2007.

Prepayment of IRSA's Outstanding Indebtedness. On October 21, 2007 IRSA notified the holders of its secured floating rate notes due November 2009 and the lenders under its US\$51 million syndicated bank loan agreement of its intention to redeem such notes and repay such loans in full, together with interest accrued to the redemption and repayment date, as applicable. On October 29, 2007 IRSA prepaid US\$ 24.3 million of principal and US\$0.35 million of accrued interest under the notes, and US\$14.95 million of principal and US\$0.21 million of accrued interest under the loans.

IRSA's Capital Increase. At IRSA's shareholders' meeting held on October 10, 2007, IRSA's shareholders approved a capital increase by a nominal amount of up to Ps.280,000,000, through the issuance of up to 280,000,000 of new common shares, par value Ps.1.00. On September 25, 2007, IRSA filed a Registration Statement with the SEC. As of the date of this Form 20-F, the final terms of this rights offering are pending and IRSA cannot give any assurance in relation to the proposed timing of the offering about the issue date of the new common shares.

Torres Renoir, Dock III. On September 7, 2004, IRSA entered into a barter and option agreement with DYPSA under which IRSA (i) exchanged an undeveloped parcel of land which forms part of IRSA's property, Dock III (identified as plot 1c) for the future delivery of residential units, parking lots and storage spaces representing an aggregate of 28.5% of the housing area of a 37-storey building to be constructed by DYPSA on plot 1c within 36 months or less and (ii) granted an option to DYPSA to acquire an undeveloped plot of land of Dique III (identified as plot 1e) of its property within 548 days or less from the date of signing the deed of conveyance for plot 1c and subject to the completion of certain work-in-progress in the 37-storey building. As a result, IRSA signed the deed of conveyance of plot 1c at a price of US\$8.0 million and the option for plot 1e at US\$10.8 million in November 2004. As guarantee for the first transaction, DYPSA set up a first degree mortgage on plot 1c in IRSA's favor for the total value of the property. In May 2006, DYPSA exercised the option to acquire plot 1e and both parties increased their valuation of the barter agreement to US\$ 13.5 million. As consideration for plot 1e, DYPSA would deliver housing units, individual storage spaces and parking lots representing an aggregate 31.5% of the housing area of a 40-storey building to be constructed by DYPSA on plot 1e within 36 months or less. As guarantee for this transaction, DYPSA set up a first degree mortgage on

Table of Contents

plot 1e in IRSA's favor for the original value of the respective transaction. On November 2, 2007, IRSA and the developer decided to replace the barter agreement for plot 1e for a payment of US\$18.2 million, US\$4.6 million of which were paid on that date and the balance of which will be paid to IRSA over the next six months. The income resulting from this transaction amounts to approximately US\$4.7 million.

Solares de Santa María, City of Buenos Aires (ex Santa María del Plata).

Background

In 1997, IRSA acquired the property which the National Executive Branch declared would be used as the athletic residences for the Olympic Games if Buenos Aires was selected to host the Olympic Games (former Boca Juniors Football Club sports town), currently owned by IRSA's subsidiary Solares de Santa María S.A. Since purchasing the property, IRSA has sought approval for a mixed use development project (hereinafter the Project) to be built in the lot, including filing the dossier and meeting all the requirements set forth in the Rule passed by the Legislative Branch of the City of Buenos Aires in 1992 (Ordinance 45,665/92). This rule passed by the City Council of the City of Buenos Aires provides general urban standards in relation to the development of a lot and requires that the site design be submitted to the approval of the Urban Planning Council (Consejo de Planificación Urbana - COPUA) (Executive Branch).

The Project met the requirements under the Rule and was recently approved under Decree 1584/2007, issued by the Executive Branch of the Government of the City of Buenos Aires. Under the Planning Code 50% of the Lot shall be donated for public use and convenience, (357,975m²) inside which a common, nautical and recreation areas, roads, pedestrian lanes and so forth will be found.

Evolution of Approval Instances

Since commencing the Project, IRSA has made various changes and filed an application for final approval, in response to changes in the building regulations and the interpretation of other legal requirements by the various authorities in office since commencing the Project. IRSA has been dealing with a different of authorities and regulatory bodies in order to obtain the final authorization of the Project. For example:

In 2000, IRSA filed a Master Plan for Santa María del Plata site, which was assessed by COPUA and submitted to the Town Treasurer's Office, who takes part in the process to grant final approve of the Project.

In 2002, by Decree 405/02, the government issued a notice of public hearing to be held in June 2002, which was carried out with presence of several professional and private entities and assessed by all Competent Agencies.

Table of Contents

In June 2003, IRSA prepared an environmental impact statement in accordance with Resolution 1004- SSEPyDU-03.

On August 12, 2003, IRSA filed a plan to amend the Project in response to the recommendations made by the public hearing.

In December 2005, the Hydraulic General Bureau gave its consent to the project.

In July 2006, COPUA made some recommendations in relation to the project.

On December 13, 2006, IRSA filed an amendment to the Project to adjust it to the recommendations made by COPUA, that included the following:

1. The project met the Guidelines of the Environmental Urban Plan
2. The project was comprised within the proposals for the strategic development of the City's Southern Area.
3. A perimetrical pedestrian lane was designed along the entire site on the *Río de la Plata* bank.
4. Maximum integration with the city was planned, continuing with the surrounding urban landscape, designing a shore park on *Río de la Plata* bank and providing vehicle access to the avenues surrounding the site.
5. Donation of 50% of the Lot to the GCBA was proposed for Public Use and Convenience, which is the maximum amount set forth in the Planning Code.
6. The specific ruling within the scope of Ordinance N° 45,665/92, Law 23,738/89 and Decree 5783/92 was proposed.

On March 29, 2007, COPUAM, an advisory body of government composed of advisors from the legislative and executive branches) released the 145-COPUAM-07 REPORT, in which it states that it has no objections in relation to the Project and requested the General Treasury issue a decision concerning the ruling scope proposed.

In May 2007, the Traffic Undersecretary took part at the request of the General Treasury, requesting a new traffic study for the area.

In July and November 2007, the General Treasury carried out a comprehensive studies of the urban proposal and bill of Decree submitted for consideration, stating that there is no legal challenge the Bill of Decree .

Prior to its enactment, the Decree was reviewed and approved by the Minister of Planning and Public Works, the Traffic and Transport Undersecretary, the Treasury Department and the General Technical Administrative and Legal Bureau of the Ministry of Planning and Public Works.

Edgar Filing: CRESUD INC - Form 20-F

Having complied with all legal and technical requirements during the last 11 years since dossier was prepared and during 15 years, from the date when the general ruling on the site was passed by the Town Council, the Chief of Government of the City passed Decree No 1584/07 on November 9, 2007, which provides with the required approval for the Project.

On December 1, 2007, Decree No 1584 was published in the Official Gazette No. 2815, fulfilling all legal rules in force.

Next steps

Notwithstanding the issuance of Decree No. 1584/07, other matters concerning operation and implementation of the Project, under the different sectors of urban agencies of the City of Buenos Aires, are still pending.

Table of Contents

IRSA has also learned that the Decree has been judicially challenged on formal and procedural aspects. At the time of this report, IRSA has not been duly notified about any decision issued by the authorities concerning said objections.

In that sense, and if appropriate, IRSA will eventually evaluate what measures to take in order to protect the acquired rights.

Item 9. The offer and the listing

A. INFORMATION ON THE LISTING OF OUR STOCK

The following summary provides information concerning our share capital and briefly describes all material provisions of our by-laws and the Argentine Corporation Law 19,550.

Stock Exchanges in which our securities are listed

Our common shares are listed on the Buenos Aires Stock Exchange under the trading symbol CRES and NASDAQ under the trading symbol CRESY. As of September 30, 2007 our authorized capital stock consists of 313,396,410 common shares, Ps.1.00 par value per share.

As of November 16, 2007, our outstanding capital stock consisted of 320,774,772 common shares. As of that date (1) we had no other shares of any class or series issued and outstanding and (2) there are no outstanding warrants or convertible notes to acquire our shares. Our common shares have one vote per share. All outstanding shares of the common shares are validly issued, fully paid and non assessable. As of September 30, 2007, there were approximately 1,157 holders of all of our common shares.

The term for the exercise of our outstanding warrants and the conversion of our outstanding convertible notes issued on November 21, 2002 expired on November 14, 2007. Throughout the conversion and exercise periods, holders of our warrants and convertible notes exercised an aggregate of 49,867,018 warrants and converted an aggregate of 49,910,874 convertible notes, respectively, increasing our capital stock to 320,774,772 issued and outstanding shares. As of the date of this Form 20-F, there are no outstanding warrants or convertible notes to acquire our shares.

Price history of our stock on the Buenos Aires Stock Exchange and NASDAQ

Our common shares are traded in Argentina on the Buenos Aires Stock Exchange, under the trading symbol CRES. Since March 1997, our ADSs, each presenting 10 common shares, have been listed on the NASDAQ under the trading symbol CRESY. The Bank of New York is the depository with respect to the ADSs.

The table below shows the high and low daily closing prices of our common shares in Pesos and the quarterly trading volume of our common shares on the Buenos Aires Stock Exchange for the first quarter of 2002 through December 2007. The table also shows the high and low daily closing prices of our ADSs in U.S. dollars and the quarterly trading volume of our ADSs on the NASDAQ for the first quarter of 2002 through December 2007. Each ADS represents ten common shares
