Semi-Annual Report

This report provides management's discussion of fund performance for AllianceBernstein National Municipal Income Fund (the "Fund") for the semi-annual reporting period ended April 30, 2008. The Fund is a closed-end fund that trades under the New York Stock Exchange symbol

AFB. Effective May 18, 2007, Alliance National Municipal Income Fund changed its name to AllianceBernstein National Municipal Income Fund. The Board of Directors approved the name change at the recommendation of AllianceBernstein L.P., the Fund's investment adviser, to brand the Fund with the same AllianceBernstein name used for other funds in the AllianceBernstein family of funds. As of the close of business on May 18, 2007, the Fund acquired all of the net assets and assumed the liabilities of ACM Municipal Securities Income Fund, pursuant to a plan of reorganization approved by the shareholders of ACM Municipal Securities Income Fund.

Investment Objective and Policies

This closed-end fund seeks to provide high current income exempt from regular federal income tax by investing substantially all of its net assets in municipal securities that pay interest that is exempt from federal income tax. The Fund will normally invest at least 80% of its net assets in municipal securities paying interest that is exempt from regular federal income tax. The Fund also normally will invest at least 75% of its assets in investment-grade municipal securities or unrated municipal securities considered to be

of comparable quality. The Fund may invest up to 25% of its net assets in municipal bonds rated below investment-grade and unrated municipal bonds considered to be of comparable quality as determined by the Fund's investment adviser. The Fund intends to invest primarily in municipal securities that pay interest that is not subject to the federal Alternative Minimum Tax ("AMT"), but may invest without limit in municipal securities paying interest that is subject to the federal AMT. For more information regarding the Fund's risks, please see "A Word About Risk" on page 4 and "Note H Risks Involved in Investing in the Fund" of the Notes to Financial Statements on page 34.

Investment Results

The table on page 5 provides performance data for the Fund and its benchmark, the Lehman Brothers (LB) Municipal Index, for the six- and 12-month periods ended April 30, 2008.

The Fund underperformed its benchmark during both the six- and 12-month periods ended April 30, 2008. The Fund's relative underperformance during the six-month period under review was due to security selection in the insured, hospital, special tax and housing sectors. The maturities of the Fund's holdings relative to the benchmark's benefited performance. The Fund's leveraged structure increased income. However, it generally detracted from the Fund's total return as it also served to increase exposure to long-term bonds and long-term bond prices declined due to the rise in long-term interest rates.

Market Review and Investment Strategy

A significant sign of stress in the municipal market was how inexpensive tax-exempt bonds were relative to taxable bonds on April 30, 2008. This was especially true in relation to Treasuries, but municipals were also attractive relative to other types of taxable bonds such as high-grade corporate bonds. On an after-tax basis, municipal bonds provided an extra 1.05% in yield over U.S. Treasuries for clients subject to the top federal income tax rate. This spread declined from its peak a month earlier, but remains significantly above its historical average. The Fund's Municipal Bond Investment Team (the Team) believed this was primarily due to market dislocations, which included: the downgrading of bond insurers, problems in auction rate securities (not enough interested bidders willing to purchase these long-term securities), troubles with variable rate demand notes (long-term bonds whose interest rates change with money market interest rates and are payable on demand) and issues with margin calls (investors being called on to cover their purchase of securities with borrowed funds) on leveraged municipal portfolios. Investors appear to have recognized that solving some of these factors could substantially increase the supply of traditional fixed-coupon municipal bonds available for sale. The Team observed a reduction in investor demand and a consequent reduction in the price of municipals.

The increase in credit spreads over the six- and 12-month periods ended

April 30, 2008, is consistent with investors' heightened sense of risk aversion, and has been compounded by the downgrades of bond insurers. The percentage of municipal bonds issued with bond insurance declined from 50% of total new issuance over the last few years to only 25% in the first quarter of 2008, thereby creating a larger supply of lower-rated bonds. There may be opportunities to add income to the Fund, but the Team is also seeking to identify bonds which may be stable during this difficult economic period.

The Fund may purchase municipal securities that are insured under policies issued by certain insurance companies. Insured municipal securities typically receive a higher credit rating which means that the issuer of the securities pays a lower interest rate. In purchasing such insured securities, the Team gives consideration to both the insurer and to the credit quality of the underlying issuer. The insurance reduces the credit risk for a particular municipal security by supplementing the creditworthiness of the underlying bond and provides additional security for payment of the principal and interest of a municipal security. Certain of the insurance companies that provide insurance for municipal securities provide insurance for other types of securities, including some involving subprime mortgages. The value of subprime mortgage securities has declined recently and some may default, increasing a bond insurer's risk of having to make payments to holders of subprime mortgage securities. Because of this risk, the ratings

of some insurance companies have been, or may be, downgraded and it is possible that an insurance company may become insolvent. If an insurance company's rating is downgraded or the company becomes insolvent, the prices of municipal securities insured by the insurance company may decline. As of April 30, 2008, the Fund held 57% of total investments in insured bonds (of this amount 15% represents the Fund's holding in pre-refunded bonds).

The Team believes that downgrades in insurance company ratings or insurance company insolvencies present limited risk to the Fund. The Fund is well diversified by bond insurer, minimizing the exposure to any single insurer. In addition, the generally investment grade underlying credit quality of the insured municipal securities reduces the risk of a significant reduction in the value of the insured municipal security.

Since February 2008, auctions of the Fund's Auction Preferred Shares (the Preferred Shares) have had fewer buyers than sellers and, as a result, the auctions have failed. The failed auctions did not lower the credit quality of the Preferred Shares, but rather

meant that a holder was unable to sell the Preferred Shares, so that there was a loss of liquidity for the holders of the Preferred Shares. When the auctions fail, the Preferred Shares continue to pay interest on a formula based-maximum rate based on AA-commercial paper and short-term municipal bond rates. This interest rate has been and remains generally economical versus the earnings of the Fund's investments. However, to the extent that the cost of this leverage increases in the future and earnings from the Fund's investments do not increase, the Fund's net investment returns may be reduced. The Fund is exploring other liquidity and leverage options and has recently (subsequent to this reporting period) redeemed a portion of its Preferred Shares using tender option bonds as substitute leverage. (See Note L to the Financial Statements.) The Fund is not required to redeem any Preferred Shares and expects to continue to rely on the Preferred Shares for a portion of its leverage exposure.

For additional information about the Preferred Shares, please visit the AllianceBernstein website at www.alliancebernstein.com.

HISTORICAL PERFORMANCE

An Important Note About the Value of Historical Performance

The performance on the following page represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance information shown. All fees and expenses related to the operation of the Fund have been deducted. Performance assumes reinvestment of distributions and does not account for taxes.

AllianceBernstein National Municipal Income Fund Shareholder Information

The Fund's NYSE trading symbol is AFB. Weekly comparative net asset value (NAV) and market price information about the Fund is published each Monday in *The Wall Street Journal*, each Sunday in *The New York Times* and each Saturday in *Barron's* and other newspapers in a table called "Closed-End Bond Funds." For additional shareholder information regarding this Fund, please see page 48.

Benchmark Disclosure

The unmanaged Lehman Brothers (LB) Municipal Index does not reflect fees and expenses associated with the active management of a fund portfolio.

The Index is a total return performance benchmark for the long-term, investment grade, tax-exempt bond market. An investor cannot invest directly in an index, and its results are not indicative of the performance for any specific investment, including the Fund.

A Word About Risk

Among the risks of investing in the Fund are changes in the general level of interest rates or changes in bond credit quality ratings. Changes in interest rates have a greater effect on bonds with longer maturities than on those with shorter maturities. Please note, as interest rates rise, existing bond prices fall and can cause the value of your investment in the Fund to decline. While the Fund invests principally in bonds and other fixed-income securities, in order to achieve its investment objectives, the Fund may at times use certain types of investment derivatives, such as options, futures, forwards and swaps. These instruments involve risks different from, and in certain cases, greater than, the risks presented by more traditional investments. At the discretion of the Fund's Adviser, the Fund may invest up to 25% of its net assets in municipal bonds that are rated below investment grade (i.e., "junk bonds"). These securities involve greater volatility and risk than higher-quality fixed-income securities.

Leverage Risks The Fund uses financial leverage for investment purposes, which involves leverage risk. The Fund's outstanding Auction Rate Preferred Stock results in leverage. The Fund may also use other types of financial leverage, including tender option bonds ("TOBs"), either in combination with, or in lieu of, the Auction Preferred Stock. The Fund utilizes leverage to seek to enhance the yield and net asset value attributable to its Common Stock. These objectives may not be achieved in all interest rate environments. Leverage creates certain risks for holders of Common Stock, including the likelihood of greater volatility of the net asset value and market price of the Common Stock. If income from the securities purchased from the funds made available by leverage is not sufficient to cover the cost of leverage, the Fund's return will be less than if leverage had not been used. As a result, the amounts available for distribution to Common Stockholders as dividends and other distributions will be reduced. During periods of rising short-term interest rates, the interest paid on the Auction Rate Preferred Stock or the floaters issued in connection with the Fund's TOB transactions would increase. In addition, the interest paid on inverse floaters held by the Fund, whether issued in connection with the Fund's TOB transactions or purchased in a secondary market transaction, would decrease. Under such circumstances, the Fund's income and distributions to Common Stockholders may decline, which would adversely affect the Fund's yield and possibly the market value of its shares.

(a) Position, or a portion thereof, has been segregated to collateralize when issued and/or delayed delivery securities.

Edgar Filing: ALLIANCEBERNSTEIN NATIONAL MUNICIPAL INCOME FUND - Form N-CSRS

(b) Position, or a portion thereof, has been segregated to collateralize interest rate swaps.

(c) When-Issued and/or delayed delivery security.

(d) Variable rate coupon, rate shown as of April 30, 2008.

24 ALLIANCEBERNSTEIN NATIONAL MUNICIPAL INCOME FUND

Portfolio of Investments

(e) Indicates a security that has a zero coupon that remains in effect until a predetermined date at which time the stated coupon rate becomes effective until final maturity.

(f) Variable Rate Demand Notes (VRDN) are instruments whose interest rates change on a specific date (such as coupon date or interest payment date) or whose interest rates vary with changes in a designated base rate (such as the prime interest rate). This instrument is payable on demand and is secured by letters of credit or other credit support agreements from major banks.

(g) Portfolio percentages are calculated based on net assets applicable to common shareholders.

* Variable interest rate based on the Securities Industry & Financial Markets Association, formerly the Bond Market Association (BMA).

An auction rate security whose interest rate resets at each auction date. Auctions are typically held every week or month. The rate shown is as of April 30, 2008 and the aggregate market value of this security amounted to \$600,000 or .08% of total investments.

As of April 30, 2008, the Portfolio held 57% of total investments in insured bonds (of this amount 15% represents the Portfolio's holding in pre-refunded bonds).

NOTES TO FINANCIAL STATEMENTS

April 30, 2008 (unaudited)

NOTE A

Significant Accounting Policies

AllianceBernstein National Municipal Income Fund, Inc. (the Fund) was incorporated in the State of Maryland on November 9, 2001 and is registered under the Investment Company Act of 1940 as a diversified, closed-end management investment company. The financial statements have been prepared in conformity with U.S. generally accepted accounting principles which requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements and amounts of income and expenses during the reporting period. Actual results could differ from those estimates. The following is a summary of significant accounting policies followed by the Fund.

1. Security Valuation

Portfolio securities are valued at their current market value determined on the basis of market quotations or, if market quotations are not readily available or are deemed unreliable, at fair value as determined in accordance with procedures established by and under the general supervision of the Fund's Board of Directors.

In general, the market value of securities which are readily available and deemed reliable are determined as follows. Securities listed on a national securities exchange (other than securities listed on the NASDAQ Stock Market, Inc. (NASDAQ)) or on a foreign securities exchange are valued at the last sale price at the close of the exchange or foreign securities exchange. If there has been no sale on such day, the securities are valued at the mean of the closing bid and asked prices on such day. Securities listed on more than one exchange are valued by reference to the principal exchange on which the securities are traded; securities listed only on NASDAQ are valued in accordance with the NASDAQ Official Closing Price; listed put or call options are valued at the last sale price. If there has been no sale on that day, such securities will be valued at the closing bid prices on that day; open futures contracts and options thereon are valued using the closing settlement price or, in the absence of such a price, the most recent quoted bid price. If there are no quotations available for the day of valuation, the last available closing settlement price is used; securities traded in the over-the-counter market, (OTC) are valued at the mean of the current bid and asked prices as reported by the National Quotation Bureau or other comparable sources; U.S. government securities and other debt instruments having 60 days or less remaining until maturity are valued at amortized cost if their original maturity was 60 days or less; or by amortizing their fair value as of the 61st day prior to maturity if their original term to maturity exceeded 60 days; fixed-income securities, including mortgage backed and asset backed securities, may be valued on the basis of prices provided by a pricing service or at a price obtained from one or more of the major broker/dealers. In cases where broker/dealer quotes are obtained, AllianceBernstein L.P. (the Adviser) may

establish procedures whereby changes in market yields or spreads are used to adjust, on a daily basis, a recently obtained quoted price on a security; and OTC and other derivatives are valued on the basis of a quoted bid price or spread from a major broker/dealer in such security.

Securities for which market quotations are not readily available (including restricted securities) or are deemed unreliable are valued at fair value. Factors considered in making this determination may include, but are not limited to, information obtained by contacting the issuer, analysts, analysis of the issuer's financial statements or other available documents. In addition, the Fund may use fair value pricing for securities primarily traded in non-U.S. markets because most foreign markets close well before the Fund values its securities at 4:00 p.m., Eastern Time. The earlier close of these foreign markets gives rise to the possibility that significant events, including broad market moves, may have occurred in the interim and may materially affect the value of those securities.

2. Taxes

It is the Fund's policy to meet the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its investment company taxable income and net realized gains, if any, to shareholders. Therefore, no provisions for federal income or excise taxes are required.

3. Investment Income and Investment Transactions

Interest income is accrued daily. Investment transactions are accounted for on the date the securities are purchased or sold. Investment gains or losses are determined on the identified cost basis. The Fund amortizes premiums and accretes original issue discounts and market discounts as adjustments to interest income.

4. Dividends and Distributions

Dividends and distributions to shareholders, if any, are recorded on the ex-dividend date. Income dividends and capital gains distributions are determined in accordance with federal tax regulations and may differ from those determined in accordance with U.S. generally accepted accounting principles. To the extent these differences are permanent, such amounts are reclassified within the capital accounts based on their federal tax basis treatment; temporary differences do not require such reclassification.

NOTE B

Advisory, Administrative Fees and Other Transactions With Affiliates

Under the terms of an investment advisory agreement, prior to February 12, 2007, the Fund paid the Adviser an advisory fee at an annual rate of .65 of 1% of the Fund's average daily net assets applicable to common and preferred shareholders. As of February 12, 2007, the Fund pays the Adviser an advisory fee at an annual rate of .55% of the Fund's average daily net assets applicable to common and preferred stockholders. Such fee is accrued daily and paid monthly.

The Adviser has voluntarily agreed to waive a portion of its fees or reimburse the Fund for expenses in the amount of .25% of the Fund's average daily net assets applicable to common and preferred shareholders for the first 5 full years of the Fund's operations, .20% for the period January 28, 2007 until February 12, 2007, .10% for year 6 (such waiver commencing February 12 of year 6) and .05% for year 7. For the six months ended April 30, 2008, which is year 7 of operations, the amount of such fees waived was \$261,053. The Fund commenced operations on January 28, 2002.

Under the terms of the Shareholder Inquiry Agency Agreement with AllianceBernstein Investor Services, Inc. (ABIS), a wholly-owned subsidiary of the Adviser, the Fund reimburses ABIS for costs relating to servicing phone inquiries on behalf of the Fund. During the six months ended April 30, 2008, there was no reimbursement paid to ABIS.

NOTE C

Investment Transactions

Purchases and sales of investment securities (excluding short-term investments) for the six months ended April 30, 2008 were as follows:

	Purchases	Sales
Investment securities (excluding U.S. government securities)	\$ 77,483,216	\$ 62,833,272
U.S. government securities	0	0

The cost of investments for federal income tax purposes was substantially the same as the cost for financial reporting purposes. Accordingly, gross unrealized appreciation and unrealized depreciation (excluding swap transactions) are as follows:

Gross unrealized appreciation	\$ 19,154,632
Gross unrealized depreciation	(10,721,121)
Net unrealized appreciation	\$ 8,433,511

1. Swap Agreements

The Fund may enter into swaps to hedge its exposure to interest rates and credit risk or for investment purposes. A swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset. The payment flows are usually netted against each other, with the difference being paid by one party to the other.

Risks may arise as a result of the failure of the counterparty to the swap contract to comply with the terms of the swap contract. The loss incurred by the failure of a counterparty is generally limited to the net interim payment to be received by the Fund, and/or the termination value at the end of the contract. Therefore,

the Fund considers the creditworthiness of each counterparty to a swap contract in evaluating potential credit risk. Additionally, risks may arise from unanticipated movements in interest rates or in the value of the underlying securities.

As of November 1, 2003, the Fund has adopted the method of accounting for interim payments on swap contracts in accordance with Financial Accounting Standards Board Statement No. 133. The Fund accrues for the interim payments on swap contracts on a daily basis, with the net amount recorded within unrealized appreciation/depreciation of swap contracts on the statement of assets and liabilities. Once the interim payments are settled in cash, the net amount is recorded as realized gain/loss on swaps, in addition to realized gain/loss recorded upon termination of swap contracts on the statement of operations. Prior to November 1, 2003, these interim payments were reflected within interest income/expense in the statement of operations. Fluctuations in the value of swap contracts are recorded as a component of net change in unrealized appreciation/depreciation of investments.

2. Financial Futures Contracts

The Fund may buy or sell financial futures contracts for the purpose of hedging its portfolio against adverse effects of anticipated movements in the market. The Fund bears the market risk that arises from changes in the value of these financial instruments and the imperfect correlation between movements in the price of the futures contracts and movements in the price of the securities hedged or used for cover.

At the time the Fund enters into a futures contract, the Fund deposits and maintains as collateral an initial margin with the broker, as required by the exchange on which the transaction is effected. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in the value of the contract. Such receipts or payments are known as variation margin and are recorded by the Fund as unrealized gains or losses. Risks may arise from the potential inability of a counterparty to meet the terms of the contract. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the time it was closed.

NOTE D

Common Stock

There are 28,656,080 shares of common stock outstanding at April 30, 2008. During the six months ended April 30, 2008, the Fund issued 0 shares in connection with the Fund's dividend reinvestment plan. During the year ended October 31, 2007, the Fund issued 8,737 shares in connection with the Fund's dividend reinvestment plan.

NOTE E

Preferred Stock

The Fund has authorized, issued and outstanding 11,400 shares of Auction Preferred Stock (the Preferred Shares), consisting of 3,150 shares each of Series M, Series W and Series TH, and also 1,950 shares of Series T. The Preferred Shares have a liquidation value of \$25,000 per share plus accumulated, unpaid dividends. The dividend rate on the Preferred Shares may change generally every 7 days as set by the auction agent for Series M, T, W and TH. Due to the recent failed auctions, the dividend rate is the maximum rate set by the terms of the Preferred Shares, which is based on AA commercial paper rates and short-term municipal bond rates. The dividend rate on the Series M is 3.59% effective through May 5, 2008. The dividend rate on the Series T is 3.78% effective through May 6, 2008. The dividend rate on the Series W is 3.82% effective through May 7, 2008. The dividend rate on the Series TH is 3.59% effective through May 1, 2008.

At certain times, the Preferred Shares are redeemable by the Fund, in whole or in part, at \$25,000 per share plus accumulated, unpaid dividends.

Although the Fund will not ordinarily redeem the Preferred Shares, it may be required to redeem shares if, for example, the Fund does not meet an asset coverage ratio required by law or to correct a failure to meet a rating agency guideline in a timely manner. The Fund voluntarily may redeem the Preferred Shares in certain circumstances. (See Note L for information regarding recent and future partial redemptions of Preferred Shares.)

The Preferred Shareholders, voting as a separate class, have the right to elect at least two Directors at all times and to elect a majority of the Directors in the event two years' dividends on the Preferred Shares are unpaid. In each case, the remaining Directors will be elected by the Common Shareholders and Preferred Shareholders voting together as a single class. The Preferred Shareholders will vote as a separate class on certain other matters as required under the Fund's Charter, the Investment Company Act of 1940 and Maryland law.

NOTE F

Acquisition of ACM Municipal Securities Income Fund by AllianceBernstein National Municipal Income Fund (the Fund)

On May 18, 2007, the Alliance National Municipal Fund (the Fund) acquired all of the net assets of the ACM Municipal Securities Income Fund, pursuant to a plan of reorganization approved by the shareholders of ACM Municipal Securities Income Fund. On May 18, 2007, the acquisition was accomplished by a tax-free exchange of 8,132,542 common shares and 3,600 shares of Auction Preferred stock of the Fund for 11,145,261 common shares and 3,600 shares of Auction Preferred stock of ACM Municipal Income Securities Fund. The aggregate net assets applicable to common shareholders of the Fund and ACM Municipal Income Fund immediately before the acquisition were \$313,569,265.

and \$124,260,444 (including \$6,907,265 of net unrealized appreciation of investments). Immediately after the acquisition, the combined net assets applicable to common and preferred shareholders of the Fund amounted to \$722,829,709.

NOTE G

Distributions to Common Shareholders

The tax character of distributions to be paid for the year ending October 31, 2008 will be determined at the end of the current fiscal year. The tax character of distributions paid during the fiscal years ended October 31, 2007 and October 31, 2006 were as follows:

	2007	2006
Distributions paid from:		
Ordinary income	\$ 653,378	\$ 33,460
Tax-exempt income	18,281,658	20,374,316
Total distributions paid	\$ 18,935,036	\$ 20,407,776

As of October 31, 2007, the components of accumulated earnings/(deficit) on a tax basis were as follows:

Accumulated capital and other losses	\$ (7,551,220) ^(a)
Unrealized appreciation/(depreciation)	23,668,727 ^(b)
Total accumulated earnings/(deficit)	\$ 16,117,507^(c)

^(a) On October 31, 2007, the Fund had a net capital loss carryforward of \$7,551,220 (of which approximately \$7,060,361 was attributable to the merger with ACM Municipal Securities Income Fund) of which \$1,971,343 expires in the year 2010, \$5,569,671 expires in the year 2011, and \$10,206 expires in the year 2012. To the extent future capital gains are offset by capital loss carryforwards, such gains will not be distributed. The Fund utilized \$1,148,060 of capital loss carryforward for the fiscal year ended October 31, 2007. The Fund had \$9,772,815 of capital loss carryforwards expire in the fiscal year. As a result of the merger with ACM Municipal Securities Income Fund, various limitations regarding the utilization of capital loss carryforwards were applied, based on certain provisions in the Internal Revenue Code.

^(b) The differences between book-basis and tax-basis unrealized appreciation/(depreciation) are attributed primarily to the difference between the book and tax treatment of swap income and to wash sales.

^(c) The difference between book-basis and tax-basis components accumulated earnings/(deficit) is attributable primarily to dividends payable.

NOTE H

Risks Involved in Investing in the Fund

Interest Rate Risk and Credit Risk Interest rate risk is the risk that changes in interest rates will affect the value of the Fund's investments in fixed-income debt securities such as bonds or notes. Increases in interest rates may cause the value of the Fund's investments to decline. Credit risk is the risk that the issuer or guarantor of a debt security, or the counterparty to a derivative contract, will be unable or unwilling to make timely principal and/or interest payments, or to

otherwise honor its obligations. The degree of risk for a particular security may be reflected in its credit risk rating. Credit risk is greater for medium quality and lower-rated securities. Lower-rated debt securities and similar unrated securities (commonly known as junk bonds) have speculative elements or are predominantly speculative risks.

The Fund may purchase municipal securities that are insured under policies issued by certain insurance companies. Insured municipal securities typically receive a higher credit rating which means that the issuer of the securities pays a lower interest rate. In purchasing such insured securities, the Adviser gives consideration to both the insurer and the credit quality of the underlying issuer. The insurance reduces the credit risk for a particular municipal security by supplementing the creditworthiness of the underlying bond and provides additional security for payment of the principal and interest of a municipal security. Certain of the insurance companies that provide insurance for municipal securities provide insurance for other types of securities, including some involving subprime mortgages. The value of subprime mortgage securities has declined recently and some may default increasing a bond insurer's risk of having to make payments to holders of subprime mortgage securities. Because of this risk, the ratings of some insurance companies have been, or may be, downgraded and it is possible that an insurance company may become insolvent. If an insurance company's rating is downgraded or the company becomes insolvent, the prices of municipal securities insured by the insurance company may decline.

The Adviser believes that downgrades in insurance company ratings or insurance company insolvencies present limited risk to the Fund. The Fund is well diversified by bond insurer, minimizing the exposure to any single insurer. In addition, the generally investment grade underlying credit quality of the insured municipal securities reduces the risk of a significant reduction in the value of the insured municipal security.

Financing and Related Transactions; Leverage and Other Risks The Fund uses financial leverage for investment purposes, which involves leverage risk. The Fund's outstanding Auction Rate Preferred Stock results in leverage. The Fund may also use other types of financial leverage, including tender option bond transactions, either in combination with, or in lieu of, the Auction Preferred Stock. In a tender option bond transaction, the Fund may sell a highly rated fixed-rate municipal security to a broker, which, in turn, deposits the bond into a special purpose vehicle (typically, a trust) usually sponsored by the broker. The Fund receives cash and a residual interest security (sometimes referred to as an inverse floater) issued by the trust in return. The trust simultaneously issues securities, which pay an interest rate that is reset each week based on an index of high-grade short-term seven-day demand notes. These securities, sometimes referred to as floaters, are bought by third parties, including tax-exempt money market funds, and can be tendered by these holders to a liquidity pro-

vider at par, unless certain events occur. The Fund continues to earn all the interest from the transferred bond less the amount of interest paid on the floaters and the expenses of the trust, which include payments to the trustee and the liquidity provider and organizational costs. The Fund also uses the cash received from the transaction for investment purposes or to retire other forms of leverage. Under certain circumstances, the trust may be terminated and collapsed, either by the Fund or upon the occurrence of certain events, such as a downgrade in the credit quality of the underlying bond, or in the event holders of the floaters tender their securities to the liquidity provider. See Note K to the Financial Statements Floating Rate Notes Issued in Connection with Securities Held for more information about tender option bond transactions.

The Fund utilizes leverage to seek to enhance the yield and net asset value attributable to its Common Stock. These objectives may not be achieved in all interest rate environments. Leverage creates certain risks for holders of Common Stock, including the likelihood of greater volatility of the net asset value and market price of the Common Stock. If income from the securities purchased from the funds made available by leverage is not sufficient to cover the cost of leverage, the Fund's return will be less than if leverage had not been used. As a result, the amounts available for distribution to Common Stockholders as dividends and other distributions will be reduced. During periods of rising short-term interest rates, the interest paid on the Preferred Shares or floaters in tender option bond transactions would increase, which may adversely affect the Fund's income and distribution to Common Stockholders. A decline in distributions would adversely affect the Fund's yield and possibly the market value of its shares. If rising short-term rates coincide with a period of rising long-term rates, the value of the long-term municipal bonds purchased with the proceeds of leverage would decline, adversely affecting the net asset value attributable to the Fund's common stock and possibly the market value of the shares.

The Fund may also purchase inverse floaters from a tender option bond trust in a secondary market transaction without first owning the underlying bond. The income received from an inverse floater varies inversely with the short-term interest rate paid on the floaters issued by the trust. The prices of inverse floaters are subject to greater volatility than the prices of fixed-income securities that are not inverse floaters. Investments in inverse floaters may amplify the risks of leverage. If short-term interest rates rise, the interest payable on the floaters would increase and income from the inverse floaters decrease, resulting in decreased amounts of income available for distribution to Common Stockholders.

Indemnification Risk In the ordinary course of business, the Fund enters into contracts that contain a variety of indemnifications. The Fund's maximum exposure under these arrangements is unknown. However, the Fund has not had prior claims or losses pursuant to these indemnification provisions and expects the risk of loss thereunder to be remote.

NOTE I

Legal Proceedings

As has been previously reported, the staff of the U.S. Securities and Exchange Commission (SEC) and the Office of the New York Attorney General (NYAG) have been investigating practices in the mutual fund industry identified as market timing and late trading of mutual fund shares. Certain other regulatory authorities have also been conducting investigations into these practices within the industry and have requested that the Adviser provide information to them. The Adviser has been cooperating and will continue to cooperate with all of these authorities. The shares of the Fund are not redeemable by the Fund, but are traded on an exchange at prices established by the market. Accordingly, the Fund and its shareholders are not subject to the market timing and late trading practices that are the subject of the investigations mentioned above or the lawsuits described below.

Numerous lawsuits have been filed against the Adviser and certain other defendants in which plaintiffs make claims purportedly based on or related to the same practices that are the subject of the SEC and NYAG investigations referred to above. Some of these lawsuits name the Fund as a party. The lawsuits are now pending in the United States District Court for the District of Maryland pursuant to a ruling by the Judicial Panel on Multidistrict Litigation transferring and centralizing all of the mutual funds involving market and late trading in the District of Maryland.

The Adviser believes that these matters are not likely to have a material adverse effect on the Fund or the Adviser's ability to perform advisory services relating to the Fund.

NOTE J

Recent Accounting Pronouncements

On July 13, 2006, the Financial Accounting Standards Board (FASB) released FASB Interpretation No. 48 Accounting for Uncertainty in Income Taxes (FIN 48). FIN 48 provides guidance for how uncertain tax positions should be recognized, measured, presented and disclosed in the financial statements. FIN 48 requires the evaluation of tax positions taken or expected to be taken in the course of preparing a fund's tax returns to determine whether the tax positions are more-likely-than-not of being sustained by the applicable tax authority. Tax positions not deemed to meet the more-likely-than-not threshold would be recorded in the current period. Adoption of FIN 48 is required for fiscal years beginning after December 15, 2006 and is to be applied to all open tax years as of the effective date. On April 30, 2008, the Fund implemented FIN 48 which supplements FASB 109, Accounting for Income Taxes . Management has analyzed the Fund's tax positions taken on federal income tax returns for all open tax years (tax years ended October 31, 2004-2006) for purposes of implementing FIN 48, and has concluded that no provision for income tax is required in the Fund's financial statements.

On September 20, 2006, the FASB released Statement of Financial Accounting Standards No. 157 Fair Value Measurements (FAS 157). FAS 157 establishes an authoritative definition of fair value, sets out a framework for measuring fair value, and requires additional disclosures about fair-value measurements. The application of FAS 157 is required for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. At this time, management is evaluating the implications of FAS 157 and believes the adoption of FAS 157 will have no material impact on its financial statements.

On March 19, 2008, the FASB released Statement of Financial Accounting Standards No. 161, Disclosures about Derivative Instruments and Hedging Activities (FAS 161). FAS 161 requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of and gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. The application of FAS 161 is required for fiscal years beginning after November 15, 2008 and interim periods within those fiscal years. At this time, management is evaluating the implications of FAS 161 and believes the adoption of FAS 161 will have no material impact on its financial statements.

NOTE K

Floating Rate Notes Issued in Connection with Securities Held

The Fund may engage in tender option bond transactions in which the Fund may sell a fixed rate bond to a broker for cash. The broker deposits the fixed rate bond into a Special Purpose Vehicle (the SPV , which is generally organized as a trust), organized by the broker. The Fund buys a residual interest in the assets and cash flows of the SPV, often referred to as an inverse floating rate obligation (Inverse Floater). The SPV also issues floating rate notes (Floating Rate Notes) which are sold to third parties. The Floating Rate Notes pay interest at rates that generally reset weekly and their holders have the option to tender their notes to a liquidity provider for redemption at par. The Inverse Floater held by the Fund gives the Fund the right (1) to cause the holders of the Floating Rate Notes to tender their notes at par, and (2) to have the trustee transfer the Fixed Rate Bond held by the SPV to the Fund, thereby collapsing the SPV. The SPV may also be collapsed in certain other circumstances. Pursuant to Financial Accounting Standards Board (FASB) Statement No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities (FAS 140), the Fund accounts for the transaction described above as a secured borrowing by including the Fixed Rate Bond in its Portfolio of Investments and the Floating Rate Notes as a liability under the caption Payable for floating rate notes issued in its Statement of Assets and Liabilities. Interest expense related to the Fund's liability with respect to Floating Rate Notes is recorded as incurred. The interest expense is also included in the Fund's expense ratio. The Fund did not hold Floating Rate Notes for the six months ended April 30, 2008.

The Fund may also purchase Inverse Floaters in the secondary market without first owning the underlying bond. Such an Inverse Floater is included in the Fund's Portfolio of Investments but is not required to be treated as a secured borrowing and reflected in the Fund's Financial Statements as a secured borrowing.

Management believes that the Fund's tender option bond transactions are not borrowings by the Fund because the secured borrowings deemed to have occurred for accounting purposes pursuant to FAS 140 are distinct from a legal borrowing of the Fund. Inverse Floaters held by the Fund are securities exempt from registration under Rule 144A of the Securities Act of 1933.

NOTE L

Subsequent Events

The Fund has redeemed \$39,600,000 or 13.9% of its outstanding Auction Preferred Shares (the Preferred Shares) at a redemption price of \$25,000 per share, plus accumulated but unpaid dividends. The partial redemption of the Preferred Shares was made on a pro rata basis. The Fund financed the partial redemption and replaced the Preferred Shares with tender option bonds. The Fund believes that the use of tender option bonds as alternative financing may reduce its costs of leverage.

The Fund redeemed its Preferred Shares on the following redemption dates:

Series M	June 13, 2008
Series T	June 9, 2008
Series W	June 10, 2008
Series TH	June 11, 2008

On June 17, 2008 the Fund announced that it intends to make additional partial redemptions of approximately \$3,175,000 or 1.3% of its outstanding Preferred Shares under the same terms as described above. The Fund will redeem these Preferred Shares on the following redemption dates:

Series M	July 11, 2008
Series T	July 7, 2008
Series W	July 8, 2008
Series TH	July 9, 2008

The Fund is not required to redeem any of its Preferred Shares and expects to continue to rely on the Preferred Shares for a portion of its leverage exposure. The Fund may also pursue other liquidity solutions for the Preferred Shares.

See footnote summary on page 41.

(a) As of November 1, 2003, the Fund has adopted the method of accounting for interim payments on swap contracts in accordance with Financial Accounting Standards Board Statement No. 133. These interim payments are reflected within net realized and unrealized gain (loss) on swap contracts, however, prior to November 1, 2003, these interim payments were reflected within interest income/expense on the statement of operations. For the year ended October 31, 2004, the effect of this change to the net investment income and the net realized and unrealized gain (loss) on investment transactions was less than \$0.01 per share and the ratio of net investment income to average net assets was .00%.

(b) Based on average shares outstanding.

(c) Net of fees waived by the Adviser.

(d) Total investment return is calculated assuming a purchase of common stock on the opening of the first day and a sale on the closing of the last day of the period reported. Dividends and distributions, if any, are assumed for purposes of this calculation, to be reinvested at prices obtained under the Fund's dividend reinvestment plan. Generally, total investment return based on net asset value will be higher than total investment return based on market value in periods where there is an increase in the discount or a decrease in the premium of the market value to net asset value from the beginning to the end of such periods. Conversely, total investment return based on net asset value will be lower than total investment return based on market value in periods where there is a decrease in the discount or an increase in the premium of the market value to the net asset value from the beginning to the end of the period. Total investment return calculated for a period of less than one year is not annualized.

(e) These expense and net investment income ratios do not reflect the effect of dividend payments to preferred shareholders.

(f) Annualized.

(g) The ratio includes expenses attributable to costs of proxy solicitation.

Davidson III and Terrance T. Hults.

Notice is hereby given in accordance with Section 23(c) of the Investment Company Act of 1940 that the Fund may purchase at market prices from time-to-time shares of its Common Stock in the open market.

This report, including the financial statements therein, is transmitted to the shareholders of AllianceBernstein National Municipal Income Fund for their information. This is not a prospectus, circular or representation intended for use in the purchase of shares of the Fund or any securities mentioned in the report.

Annual Certifications As required, on April 28, 2008, the Fund submitted to the New York Stock Exchange (NYSE) the annual certification of the Fund's Chief Executive Officer certifying that he is not aware of any violation of the NYSE's Corporate Governance listing standards.

The Fund also has included the certifications of the Fund's Chief Executive Officer and Chief Financial Officer required by Section 302 of the Sarbanes-Oxley Act of 2002 as exhibits to the Fund's Form N-CSR filed with the Securities and Exchange Commission for the period.

ALLIANCEBERNSTEIN NATIONAL MUNICIPAL INCOME FUND 43

Board of Directors

Information Regarding the Review and Approval of the Fund's Advisory Agreement

The disinterested directors (the "directors") of AllianceBernstein National Municipal Income Fund, Inc. (the "Fund") approved the continuance of the Fund's Advisory Agreement with the Adviser at a meeting held on October 30-November 1, 2007.

Prior to approval of the continuance of the Advisory Agreement, the directors had requested from the Adviser, and received and evaluated, extensive materials. They reviewed the proposed continuance of the Advisory Agreement with the Adviser and with experienced counsel who are independent of the Adviser who advised on the relevant legal standards. The directors also discussed the proposed continuance in private sessions with counsel and the Fund's Senior Officer (who is also the Fund's Independent Compliance Officer).

The directors considered their knowledge of the nature and quality of the services provided by the Adviser to the Fund gained from their experience as directors or trustees of most of the registered investment companies advised by the Adviser, their overall confidence in the Adviser's integrity and competence they have gained from that experience, the Adviser's initiative in identifying and raising potential issues with the directors and its responsiveness, frankness and attention to concerns raised by the directors in the past, including the Adviser's willingness to consider and implement organizational and operational changes designed to improve investment results and the services provided to the AllianceBernstein Funds. The directors noted that they have four regular meetings each year, at each of which they receive presentations from the Adviser on the investment results of the Fund and review extensive materials and information presented by the Adviser.

The directors also considered all other factors they believed relevant, including the specific matters discussed below. In their deliberations, the directors did not identify any particular information that was all-important or controlling, and different directors may have attributed different weights to the various factors. The directors determined that the selection of the Adviser to manage the Fund and the overall arrangements between the Fund and the Adviser, as provided in the Advisory Agreement, including the advisory fee, were fair and reasonable in light of the services performed, expenses incurred and such other matters as the directors considered relevant in the exercise of their business judgment. The material factors and conclusions that formed the basis for the directors' determinations included the following:

Nature, Extent and Quality of Services Provided

The directors considered the scope and quality of services provided by the Adviser under the Advisory Agreement, including the quality of the investment research capabilities of the Adviser and the other resources it has dedicated to performing services for the Fund. They also noted the professional experience

and qualifications of the Fund's portfolio management team and other senior personnel of the Adviser. The directors also considered that the Advisory Agreement provides that the Fund will reimburse the Adviser for the cost to it of providing certain clerical, accounting, administrative and other services provided at the Fund's request by employees of the Adviser or its affiliates. Requests for these reimbursements are approved by the directors on a quarterly basis and (to the extent requested and paid) result in a higher rate of total compensation from the Fund to the Adviser than the fee rate stated in the Fund's Advisory Agreement. The directors noted that the Adviser had not requested such reimbursements from the Fund. The quality of administrative and other services, including the Adviser's role in coordinating the activities of the Fund's other service providers, also were considered. The directors concluded that, overall, they were satisfied with the nature, extent and quality of services provided to the Fund under the Advisory Agreement.

Costs of Services Provided and Profitability

The directors reviewed a schedule of the revenues, expenses and related notes indicating the profitability of the Fund to the Adviser for calendar years 2005 and 2006 that had been prepared with an updated expense allocation methodology arrived at in consultation with an independent consultant retained by the Fund's Senior Officer. The directors reviewed the assumptions and methods of allocation used by the Adviser in preparing fund-specific profitability data and noted that there are a number of potentially acceptable allocation methodologies for information of this type. The directors noted that the profitability information reflected all revenues and expenses of the Adviser's relationship with the Fund, including those relating to its subsidiary which provides shareholder services to the Fund. The directors recognized that it is difficult to make comparisons of profitability from fund advisory contracts because comparative information is not generally publicly available and is affected by numerous factors. The directors focused on the profitability of the Adviser's relationship with the Fund before taxes. The directors concluded that they were satisfied that the Adviser's level of profitability from its relationship with the Fund was not unreasonable.

Fall-Out Benefits

The directors considered the benefits to the Adviser and its affiliates from their relationships with the Fund other than the fees and expense reimbursements payable under the Advisory Agreement, including but not limited to benefits relating to shareholder servicing fees paid by the Fund to a wholly owned subsidiary of the Adviser. The directors recognized that the Adviser's profitability would be somewhat lower without these benefits. The directors noted that since the Fund does not engage in brokerage transactions, the Adviser does not receive soft dollar benefits in respect of portfolio transactions of the Fund. The directors understood that the Adviser also might derive reputational and other benefits from its association with the Fund.

Investment Results

In addition to the information reviewed by the directors in connection with the meeting, the directors receive detailed performance information for the Fund at each regular Board meeting during the year. At the meeting, the directors reviewed information prepared by Lipper showing the performance of the Fund as compared to a group of funds selected by Lipper (the Performance Group), and information prepared by the Adviser showing the Fund's performance as compared to the Lehman Brothers Municipal Bond Index (the Index), in each case for periods ended July 31, 2007 over the 1-, 3- and 5-year periods and (in the case of the Index) the since inception period (January 2002 inception). The directors noted that the Fund was in the 3rd quintile of the Performance Group in the 1- and 3-year periods and 1st quintile of the Performance Group in the 5-year period, and that the Fund outperformed the Index in all periods reviewed. The directors also noted that the Fund utilizes leverage whereas the Index is not leveraged. Based on their review, the directors concluded that the Fund's relative performance over time had been satisfactory.

Advisory Fees and Other Expenses

The directors considered the latest fiscal year actual advisory fee rate paid by the Fund to the Adviser and information prepared by Lipper concerning fee rates paid by other funds in the same Lipper category as the Fund. The directors also took into account their general knowledge of advisory fees paid by open-end and closed-end funds that invest in fixed-income municipal securities. The directors recognized that it is difficult to make comparisons of advisory fees because there are variations in the services that are included in the fees paid by other funds.

The directors noted that the Adviser advises several open-end funds that invest in municipal securities similar to those the Fund invests in at fee rates that are lower than the fee rate charged to the Fund, and that such rates reflect fee reductions agreed to by the Adviser in connection with the settlement of the market timing matter with the New York Attorney General in December 2003.

The Adviser informed the directors that there are no institutional products managed by it that have a substantially similar investment style as the Fund. The directors reviewed information in the Adviser's Form ADV and noted that the Adviser charges institutional clients lower fees for advising comparably sized institutional accounts using strategies that differ from those of the Fund but which involved investments in securities of the same type that the Fund invests in (i.e., fixed income municipal). The Adviser reviewed with the directors the significantly greater scope of the services it provides the Fund relative to institutional clients. In light of this information, the directors did not place significant weight on these fee comparisons.

The directors also considered the total expense ratio of the Fund in comparison to the fees and expenses of funds within two comparison groups created by Lipper: an Expense Group and an Expense Universe. Lipper described an

Expense Group as a representative sample of funds comparable to the Fund and an Expense Universe as a broader group, consisting of all funds in the Fund's investment classification/objective. The expense ratio of the Fund was based on the Fund's latest fiscal year expense ratio and reflected fee waivers and/or expense reimbursements as contemplated in the prospectus for the Fund's initial public offering. The directors recognized that the expense ratio information for the Fund potentially reflected on the Adviser's provision of services, as the Adviser is responsible for coordinating services provided to the Fund by others. The directors noted that it was likely that the expense ratios of some funds in the Fund's Lipper category were lowered by waivers or reimbursements by those funds' investment advisers, which in some cases were voluntary and perhaps temporary.

The information reviewed by the directors showed that the Fund's latest fiscal year actual advisory fee rate of 64.8 basis points was lower than the Expense Group and Expense Universe medians. The directors noted that Lipper calculates the fee rate based on the Fund's net assets attributable to common stockholders, whereas the Fund's Advisory Agreement provides that fees are computed based on average daily net assets (i.e., including assets supported by the Fund's preferred stock). The directors also noted that the Fund's fee rate reflects a fee waiver arrangement that provides for the waiver amount to be gradually reduced over four years commencing after the fifth full year of operations of the Fund, and that the Fund commenced operations in January 2002. The directors noted that the Adviser, in response to a request from the directors, had agreed in November 2006 to a reduction to the Fund's contractual advisory fee rate from .65% to .55%, such that when the waivers have been fully phased out the fee rate payable by the Fund will be 10 basis points less than it otherwise would have been. Finally, the directors noted that the Fund's total expense ratio was lower than the Expense Group and Expense Universe medians. The directors concluded that the Fund's expense ratio was satisfactory.

Economies of Scale

The directors considered that the Fund is a closed-end fund and that it was not expected to have meaningful asset growth as a result. In such circumstances, the directors did not view the potential for realization of economies of scale as the Fund's assets grow to be a material factor in their deliberations. The directors noted that if the Fund's net assets were to increase materially as a result of, *e.g.*, an acquisition or rights offering, they would review whether potential economies of scale would be realized by the Adviser. In this regard, the directors took account of the fact that the Fund's net assets had increased by the acquisition of a smaller fund, ACM Municipal Income Fund, Inc., effective May 18, 2007 and that the Fund's acquisition was one of the reasons the directors had requested the reduction in the Fund's contractual fee rate discussed above.

SUMMARY OF GENERAL INFORMATION

Shareholder Information

Daily market prices for the Fund's shares are published in the New York Stock Exchange Composite Transaction section of *The Wall Street Journal* under the abbreviation Alliance NA. The Fund's NYSE trading symbol is AFB. Weekly comparative net asset value (NAV) and market price information about the Fund is published each Monday in *The Wall Street Journal*, each Sunday in *The New York Times* and each Saturday in *Barron's* and other newspapers in a table called Closed-End Bond Funds.

Dividend Reinvestment Plan

A Dividend Reinvestment Plan provides automatic reinvestment of dividends and capital gains in additional Fund shares.

For questions concerning shareholder account information, or if you would like a brochure describing the Dividend Reinvestment Plan, please call Computershare Trust Company at (800) 219-4218.
