Item 5.02 Departure of Directors or Certain Officers; Election of Directors; Appointment of Certain Officers; Compensatory Arrangements of Certain Officers

(e)
 On August 5, 2008, the Human Resources and Compensation Committee (the Committee) of Cardinal Health, Inc. (the Company) Board of Directors approved the following payouts of fiscal 2008 annual incentive compensation under the Cardinal Health, Inc. Amended and Restated Management Incentive Plan, as amended (the MIP), to named executives:

Name	Fiscal 2008 Annual Incentive Compensation
R. Kerry Clark <i>Chairman and Chief Executive Officer</i>	\$ 691,804
Jeffrey W. Henderson <i>Chief Financial Officer</i>	\$ 208,689
Robert D. Walter <i>Former Executive Director and Former Executive Chairman of the Board</i>	\$ 416,883
David L. Schlotterbeck <i>Vice Chairman of Cardinal Health and Chief Executive Officer, Clinical and Medical Products</i>	\$ 556,127

In August 2007, the Committee established performance goals under the MIP for fiscal 2008 based upon the achievement of a specified level of growth in net operating profit after tax (NOPAT) and return on tangible capital (ROTC). A named executive could receive a cash award of 0-200% of the executive's annual incentive target, with a threshold cash award level of 60% if a minimum level of both NOPAT and ROTC was obtained. The Committee established a schedule of potential cash award percentages based upon achievement of varying NOPAT and ROTC levels. For performance below the 60% threshold, any awards were at the discretion of the Committee.

For fiscal 2008, the Company did not achieve the minimum performance goals with respect to either NOPAT or ROTC, but satisfied the overall company performance criterion of a specified level of return on equity. The Committee exercised discretion to determine the amount of each named executive's annual incentive compensation based on a consideration of the overall consolidated performance of the Company and, as applicable, the performance of the businesses with which the executive was most closely associated.
