NOTE CONCERNING FORWARD-LOOKING STATEMENTS

Information contained herein contains forward-looking statements. You should not place undue reliance on those statements because they are subject to numerous uncertainties and factors relating to our operations and business environment, all of which are difficult to predict and many of which are beyond our control. Forward-looking statements include information concerning our possible or assumed future results of operations, including descriptions of our business strategy. These statements often include words such as may, will, should, believe, expect, anticipate, intend, plan, estimate or similar expressions. These statements are based on assumptions that we have made in light of our experience in the industry as well as our perceptions of historical trends, current conditions, expected future developments and other factors we believe are appropriate under the circumstances. Although we believe that these forward-looking statements are based on reasonable assumptions, you should be aware that many factors could affect our actual financial results or results of operations and could cause actual results to differ materially from those in the forward-looking statements. These factors include, but are not limited to:

increases in the unemployment rate, cyclicity or downturns in the United States or worldwide economy or the industries we serve, labor shortages, or job shortages;

competition from existing and future competitors;

failure to maintain and develop our reputation and brand recognition;

failure to increase or maintain the number of customers who purchase recruitment packages;

failure to attract qualified professionals or grow the number of qualified professionals who use our websites;

capacity constraints, systems failures or breaches of network security;

compliance with laws and regulations concerning collection, storage and use of professionals' personal information;

changes in the recruiting and career services business and technologies, and the development of new products and services;

our substantial indebtedness;

inability to borrow funds under our credit facility or refinance our debt;

periods of operating and net losses and history of bankruptcy;

covenants in our Amended and Restated Credit Facility;

inability to successfully identify or integrate future acquisitions;

Edgar Filing: DICE HOLDINGS, INC. - Form 10-K

strain on our resources due to future growth;

misappropriation or misuse of our intellectual property, claims against us for intellectual property infringement or the failure to enforce our ownership or use of intellectual property;

control by our principal stockholders;

compliance with certain corporate governance requirements and costs incurred in connection with being a public company;

compliance with the continued listing standards of the New York Stock Exchange (the NYSE);

failure to establish and maintain internal controls over financial reporting;

loss of key executives and technical personnel;

U.S. and foreign government regulation of the Internet and taxation;

changes in foreign currency exchange rates;

our foreign operations;

inability to expand into international markets; and

write-offs of goodwill.

Table of Contents

PART I.

**Item 1. Business
Overview**

We are a leading provider of specialized career websites for select professional communities. We target employment categories in which there is a long-term scarcity of highly skilled, highly qualified professionals relative to market demand. Our career websites serve as online marketplaces where employers and recruiters find and recruit prospective employees, and where professionals find relevant job opportunities and information to further their careers. Each of our career websites offers job postings, content, career development and recruiting services tailored to the specific needs of the professional community that it serves. Our largest websites by revenue are Dice.com, the leading career website in the United States for technology and engineering professionals, and eFinancialCareers.com, the leading global career website for financial services professionals.

The Dice.com service has operated for 18 years, while eFinancialCareers.com, which we acquired in October 2006, has been in operation for eight years. Through this strategic acquisition, we have been able to extend our operations into financial services and expand our presence internationally into Europe and Asia, and broaden our expertise in content and community features. eFinancialCareers.com operates local websites in 18 markets and five languages for financial services professionals primarily in the United Kingdom, Continental Europe, North America, Middle East, Southeast Asia and Australia.

We believe that as recruiting activities continue to migrate online and the global workforce becomes increasingly specialized, both professionals and employers are demanding access to industry and occupation-specific online recruiting services and career content. Professionals use our base level services at no cost to manage their careers by posting their resumes and searching our large collections of job postings. Employers, recruiters and staffing firms pay us to post jobs and to access our databases of resumes of highly experienced and qualified professionals. The majority of our revenues are derived from customers who purchase our recruitment packages, which are available through monthly or longer-term contractual arrangements and allow customers to both post jobs and search our databases of resumes.

We believe that our long operating history has enabled us to build brand recognition and a critical mass of both customers and professionals, which has given us a distinct competitive advantage in our employment categories. As the breadth and number of job postings and skilled professionals using our websites has grown, the increase of each has fostered the growth of the other, further enhancing the value and scale of our marketplaces.

We operate the following websites, each of which focuses on different career sectors or geographic regions:

Dice.com, the leading recruiting and career development website for technology and engineering professionals in the United States. During January 2009, Dice.com had approximately 2.3 million unique visitors and experienced an increase of nearly 16% since January 2008. As of January 31, 2009, there were approximately 57,000 job postings.

eFinancialCareers.com, the leading global recruiting and career development network of websites for financial services professionals, is headquartered in the United Kingdom and serves the financial services industry in various markets around the world. During January 2009, eFinancialCareers.com had approximately 1.7 million unique visitors worldwide, including visitors who came to more than one site in the network during the month, a decline of approximately 17% since January 2008. As of January 31, 2009, there were approximately 6,600 job postings.

ClearanceJobs.com is the leading recruiting and career development website for professionals with active U.S. government security clearances. During January 2009, ClearanceJobs.com had approximately 270,000 unique visitors, an increase of approximately 44% since January 2008, and as of January 31, 2009 had approximately 5,000 job postings.

Table of Contents

JobsintheMoney.com is a recruiting and career development website for accounting and finance professionals in the United States. During January 2009, JobsintheMoney.com had approximately 175,000 unique visitors, a decrease of approximately 13% since December 2007. As of January 31, 2009 there were approximately 1,300 job postings.

We also operate Targeted Job Fairs, a leading producer and host of career fairs and open houses focused primarily on technology and security-cleared candidates in the United States. In 2008, Targeted Job Fairs produced more than 100 career fairs, at which it hosted a wide range of locally and nationally recognized companies and recruiters, offering them the opportunity to screen and hire highly qualified candidates face-to-face. A typical job fair during 2008 hosted between 12 and 17 companies and between 325 and 375 professionals. In addition, Targeted Job Fairs coordinates private career fairs for individual companies desiring exclusive access to top quality candidates.

We have experienced significant revenue growth since 2004. We generated revenues from continuing operations of \$155.0 million in 2008, up from \$32.2 million in 2004, representing a CAGR of 48%, and we grew our operating income and cash flow from operations from \$3.6 million and \$14.0 million to \$34.9 million and \$54.2 million, representing a CAGR of 76% and 40%, respectively, over the same period. In the second half of 2008, the economies contracted, as measured by gross domestic product, in our primary geographic markets, the United States and the United Kingdom, causing recruitment activity to decline and unemployment to increase. Due to the shortage of available job openings, we have experienced a decrease in the number of job postings on our websites, which in turn negatively impacts our revenues and income. During the fourth quarter of 2008, we experienced a decline in total revenues of 10% as compared to the fourth quarter of 2007. The decline in revenues is a result of reduced recruitment activity which impacted customer usage of our primary services. We saw a decline in the number of customers served at Dice.com from approximately 8,800 customers to approximately 7,600 customers during the fourth quarter of 2008. If the slowdown in recruitment activity continues, as it is currently projected to, our future financial results will be negatively impacted.

Our Company

Through our predecessors, we have been in the technology recruiting and career development business for 18 years. In 1999, the Dice.com service was acquired by Earthweb Inc., an Internet technology content provider, which at the time of the acquisition was a publicly held company with its common stock traded on the NASDAQ National Market. During 2000, Earthweb Inc. (which subsequently changed its name to Dice Inc. (Dice Inc.) made a strategic decision to focus on technology recruiting and career development and exited the technology content-based business.

From its inception through 2003, Dice Inc. sustained net operating losses and negative cash flows and during that period was primarily dependent upon its ability to raise debt and equity financing through public or private offerings in order to fund its operations. In addition, beginning in 2001, Dice Inc. s liquidity issues worsened as a result of a decline in the demand for its products and services stemming from the downturn in the general labor market and more specifically in the technology labor market and due to the significant amount of indebtedness Dice Inc. had incurred. As a result, in 2002 Dice Inc. began pursuing discussions with the largest holder of its then outstanding debt securities regarding a pre-packaged Chapter 11 plan of reorganization under the United States Bankruptcy Code.

On February 14, 2003, Dice Inc. filed a voluntary petition under Chapter 11 of the United States Bankruptcy Code with respect to its pre-packaged plan of reorganization. The Joint Plan of Reorganization was confirmed by the Bankruptcy Court on June 24, 2003, and became effective on June 30, 2003. In accordance with the Joint Plan of Reorganization, Dice Inc. s pre-bankruptcy debt securities were eliminated in exchange for 95% of the common stock of the reorganized Dice Inc., with the remaining 5% of this common stock issued to the 130 largest holders of Dice Inc. s pre-bankruptcy capital stock. The Dice Inc. stockholders who were not among the 130 largest holders received a pro rata allocation of \$50,000. Under the Joint Plan of Reorganization all of

Table of Contents

Dice Inc.'s pre-bankruptcy capital stock, options and debt securities were cancelled upon its emergence from bankruptcy and Dice Inc. emerged from bankruptcy as a privately-held company.

In September 2004, Dice Inc. acquired substantially all of the assets of ClearanceJobs.com, the leading recruiting and career development website for professionals with active U.S. government security clearances, and in January 2005, acquired substantially all of the assets of Targeted Job Fairs, a leading producer and host of career fairs and open houses for technology, engineering and security-cleared candidates.

Dice Holdings, Inc. (the Company or DHI) was incorporated on June 28, 2005 by investment funds organized by General Atlantic, LLC (the General Atlantic Stockholders) and Quadrangle Group LLC (the Quadrangle Stockholders). On August 31, 2005, Dice Holdings, Inc. purchased all of the outstanding common stock of Dice Inc. from its stockholders (the 2005 Acquisition), and Dice Inc. became its wholly-owned subsidiary. DHI is a holding company and its assets consist substantially of the capital stock of its three subsidiaries, Dice Inc., eFinancialGroup and JobsintheMoney.

On October 31, 2006, DHI acquired all of the outstanding capital stock of eFinancialGroup (the eFinancialGroup Acquisition). eFinancialGroup operated the career websites eFinancialCareers.com, which targets financial services professionals and employers worldwide, and JobsintheMoney.com, which targets the financial and accounting job market in the United States, and a financial publishing business, eFinancialNews. As consideration for the acquisition, Dice Holdings, Inc. paid the stockholders of eFinancialGroup £56.5 million (or approximately \$106.3 million at the exchange rate in effect on October 31, 2006) in cash and issued 3,628,992 shares of its Series A convertible preferred stock valued at \$25.2 million. Immediately after the acquisition, Dice Holdings, Inc. sold eFinancialNews back to certain of eFinancialGroup's former stockholders for approximately \$41.6 million in cash. Operating results of eFinancialGroup and JobsintheMoney occurring subsequent to the eFinancialGroup Acquisition are included in the consolidated operating results of Dice Holdings, Inc. Total consideration for eFinancialGroup, excluding eFinancialNews, was \$89.9 million (which amount includes the value of 3,628,992 shares of the Series A convertible preferred stock of Dice Holdings, Inc. issued as partial consideration for the eFinancialGroup Acquisition).

On July 23, 2007, we completed our initial public offering (the IPO). We sold 6,700,000 shares of our common stock and selling stockholders sold an additional 10,000,000 shares of common stock at an initial public offering price of \$13.00. The selling stockholders granted the underwriters a 30 day option to purchase up to an additional 2,505,000 shares of the Company's common stock at the initial public offering price. On August 16, 2007, the underwriters exercised the option to acquire 292,000 of those shares. Our common stock is traded on the NYSE under the symbol DHX.

On January 28, 2008, we sold our equity stake in CyberMediaDice Careers Limited (CMD), a joint venture between Dice India Holdings, Inc. (Dice India) and CyberMedia, which was the largest targeted vertical career website for technology professionals in India. Accordingly, CMD is classified as discontinued operations for all periods presented.

Our Industry

We operate in the online employment advertising segment of the broader market for staffing and employment services. The worldwide market for staffing and employment advertising is large and shifting online at a rapid pace.

We believe that the overall demand for employment advertising and recruiting and career development products and services has significant long-term growth potential. Over the next decade, the aging labor force of the United States is expected to lead to a labor supply-demand imbalance as baby-boomers retire. We believe that international economies show similar trends, with an aging labor force in Europe and shortages of skilled professionals to meet the demand of developing economies in Asia.

Table of Contents

We also believe that certain industries that employ highly skilled and highly paid professionals will experience particularly strong demand for effective recruiting solutions due to the scarcity of such professionals. According to the U.S. Bureau of Labor Statistics, for instance, two of the top five and five of the 25 fastest-growing occupations in the United States during the period from 2006 to 2016 are expected to be in technology fields. In addition, the current labor market for computer-related occupations is significantly tighter than the overall employment market in the U.S.

We believe that the market for employment advertising is shifting online due to:

Expansion in the size of the Internet population and increased broadband access. The Internet population continues to grow and, according to IDC, the number of global Internet users is projected to grow from 968 million in 2005 to over 1.7 billion in 2010. Gartner projects that broadband penetration will increase from 35% of U.S. households in 2005 to 58% in 2010. This trend is bringing online large groups of professional workers from diverse industry segments and enabling employers to target them through online classified advertisements.

Shift in media consumption and spending from offline to online media. Increased penetration of broadband Internet connections is fueling not only the growth in the number of Internet users but also the amount of time consumers are spending online (on an absolute basis and relative to using other media). In 2005, Forrester Research, US, or Forrester, found that consumers spent 34% of their media consumption hours online. While U.S. online advertising budgets are large and growing, online marketing spend represents only a small fraction of total advertising spending. According to Forrester, online advertising budgets were estimated to be approximately \$14.7 billion in 2005, which was just 6% of total U.S. advertising expenditures. We believe that over time, advertisers will follow consumer behavior and invest a growing share of their marketing budgets in online advertising. Forrester projected that U.S. online advertising would reach \$26.0 billion in 2010, representing a CAGR of approximately 12% from 2005.

Online job boards offer inherent benefits compared to offline methods. The Internet has revolutionized the hiring process for professionals as well as for recruiters and employers. Professionals experience multiple benefits from performing searches online. They are able to search for open positions that fit their qualifications and career objectives and immediately upload their resumes to apply for open positions. Prior to online offerings, recruiters and employers had a limited and relatively inflexible set of options to find employees, including newspaper classifieds and other print advertisements, traditional career fairs, on campus recruiting, internal referral programs and recruiting firms. With online solutions, recruiters and employers are able to immediately upload and update a list of open positions and can provide detailed job descriptions, along with links to relevant information for potential candidates. They can also efficiently search through online databases of resumes for candidates that fit their hiring needs.

Relative cost advantages of online versus print employment advertising. Recruiters and employers using online recruiting methods can realize substantially lower cost per hire and overall sourcing costs in comparison to traditional print classified advertisements. Not only is the typical price to post a job listing lower online than in print for a comparable period of time, but we also believe that online advertising is more effective and contributes to a higher return on investment for our customers because online job postings are generally more accessible to a wider audience given the limitless geographic boundaries and 24/7 access the Internet affords. Moreover, online job postings can more easily be filtered for relevancy than print listings, allowing customers access to a more targeted audience. Further, searchable database access allows customers access to a broad and unique talent pool, immediately and cost effectively, connecting employers with highly qualified professionals.

While generalist job boards have improved the recruiting process compared to traditional offline alternatives, specialized career websites offer job postings, content and services tailored to the specific needs of the communities they serve. Generalist sites often do not provide as simple and rapid an ability to match specific

Table of Contents

skills and requirements between candidates and available positions. Specialist career websites, however, not only can provide an experience relevant to candidates' specific needs, but also can remain relevant for professionals who are not currently seeking a job, but who nonetheless wish to remain apprised of market trends. We believe this leads to a better recruitment experience for both customers and professionals.

Our Value Proposition

We have become a leading provider of specialized career websites for select professional communities by providing unique benefits to professionals and our customers. Our specialized career websites provide professionals with quick and easy access to job postings that are relevant and meet their industry-specific criteria, and provide our customers with pools of hard-to-find, highly qualified professional talent. By providing deep databases of professionals to our customers and a large number of employment opportunities for professionals, we encourage the use of our websites and continue to attract customers to our services. We believe these factors have helped us to achieve a critical mass of both customers and professionals, contributing to the attractiveness and efficiency of our online marketplaces.

Benefits to Professionals

Access to a large number of relevant job postings. Our career websites provide a large number of job postings for technology and engineering, accounting and finance, financial services and U.S. government security-clearance positions. For example, as of January 31, 2009, Dice.com had 57,000 individual job postings for technology and engineering professionals, which we believe to be the largest concentration in the United States in these verticals, and eFinancialCareers had 6,600 job postings for financial services professionals. In addition, the specialized focus of our career websites benefits professionals by helping to ensure that the job opportunities posted by our customers are relevant and attractive to them.

Compelling user experience. We have designed each of our career websites with the specific needs of our target audiences of professionals in mind. Each of our specialized career websites permits professionals to search for jobs based on location and other specific variables, such as type of employment and skill set. We also offer tools such as our search agents, which provide for powerful, detailed searches of job opportunities that match desired criteria, the results of which are delivered by email. We believe this makes it easy for professionals to quickly find job opportunities that match their qualifications and expectations. Additionally, we tailor the look and feel and content of each of our websites to its intended target audience of professionals, which makes the experience more useful and relevant in their day-to-day work lives. We believe that our customized search engines and audience-tailored websites are efficient and relevant, easy to use and valuable to our users, helping us build a loyal and engaged audience.

Targeted career development services and tools. We provide professionals with targeted career development services and tools including content, decision support tools and relevant industry news. For example, Dice.com and ClearanceJobs.com provide professionals with market and salary information and local market trends. eFinancialCareers.com provides industry-specialized online career content, as well as print and online career guides targeted to college and graduate students. We believe our career development services and tools benefit the professionals who use our career websites by providing them with relevant information to manage and enhance their careers, and also increase the engagement of professionals with our sites.

Benefits to our Customers

Unique pools of qualified professionals. We seek to improve the efficiency of the recruiting process for our customers by providing quick and easy access to large and up-to-date pools of highly qualified and hard-to-reach professionals. The professionals who post their resumes on Dice.com are highly educated, with approximately 73% having a bachelor's degree or higher, as of January 2009. Our online surveys indicate that 78% of professionals who use Dice.com have more than five years of experience, more than half have greater than 10

Table of Contents

years of experience, and the majority are currently employed. We believe the high number of employed, or passive, job seekers that use our websites makes our online career websites more attractive to our customers because actively employed professionals often make for more attractive candidates. Moreover, because the communities of professionals who visit our websites are highly skilled and specialized within specific industries, we believe our customers reach a more targeted and qualified pool of candidates than through generalist sites. Additionally, the size and geographic scope of the eFinancialCareers network, which operates career websites in 18 markets around the world, provides customers with access to highly targeted financial services professionals around the world.

Efficient and targeted candidate searches. Our career websites are easy to use and our search engines are designed so that our customers can search our resume databases quickly to find professionals who meet specified criteria. We believe that this approach results in a faster and more efficient search for candidates, helps our customers improve the efficiency of their recruiting efforts and increases customer preference for our recruiting solutions relative to those of our competitors.

High-quality customer support. We are able to differentiate ourselves from our competitors by providing extensive ongoing support to our customers. Our customer support representatives focus on building customer loyalty, customer training, proactive follow-up support, reactive troubleshooting, maintenance and expansion of customer relationships and compliance. We personalize our customer support efforts by providing our customers with representatives that are knowledgeable about the professional communities we serve and the skill sets of professionals in those communities. For example, we help our customers draft job postings and build specific candidate searches, improving the relevancy of job postings for professionals, and helping our customers find and attract qualified candidates.

Our Strategy

Our goal is to be the leading global network of specialized career websites for select professional communities. Our primary objective is to maximize the long-term potential of our career websites. Due to the current economic contraction, we have adjusted spending and investment and may make additional adjustments if the downturn continues or worsens. We continue to pursue our goals, albeit with lower investment currently, by pursuing the following strategies:

Continue to grow the size, quality and uniqueness of our professional communities. Continuing to grow the size, quality and uniqueness of our professional communities is a key success factor in maximizing the long-term potential of our career websites. By continually delivering a growing and fresh audience of qualified professionals to our customers, we will be able to satisfy and retain our existing customers as well as to meet the expectations and needs of new customers. We intend to achieve this objective by increasing loyalty and usage among professionals who currently use the site and by reaching new users through targeted marketing and online advertising campaigns.

Continue to execute on customer acquisition. Our ability to achieve our long-term growth objective depends, in part, on our ability to expand our customer base and deepen the relationships we have with our existing customers. Our customer acquisition efforts are focused primarily on direct marketing combined with a targeted sales approach. We believe there are significant opportunities to sell our services to companies with whom we do not currently have a relationship and to expand the level of services we sell to our existing customers.

Further build brand awareness. Brand recognition is a key differentiating factor among providers of traditional and online recruiting and career services. We believe that during the 18 years we have operated Dice.com and the eight years that eFinancialCareers has been in operation, we have fostered brands that are closely associated with ease of use and high quality sector-specific career and recruiting services within their professional communities. We will continue to invest in increasing brand awareness through targeted marketing and advertising campaigns in order to attract new customers and professionals.

Table of Contents

Enhance content and community features across our websites. We believe that both active and passive job seekers find value in the free information and services we provide, and we intend to enhance, expand and develop additional content and community features across our websites. For example, Dice.com launched a discussion board where technology professionals come together to discuss career advice and network with each other and eFinancialCareers has invested in producing significant online and offline content tailored to each of its websites and audiences. In addition, by powering the job boards of an estimated additional 75 websites in the financial services sector, including well-known, worldwide financial publications, eFinancialCareers is able to position its job postings next to high quality, third party content. We believe enhancing our community features will increase the level of engagement we have with our audience and our audience has with each other.

Further expand our services globally. We believe there are significant long-term global growth opportunities for the online recruitment and employment advertising industry. As in the United States, there is increasing demand for specialized online recruiting in both emerging and established economies worldwide. Consistent with this belief, in October 2006 we completed the eFinancialGroup Acquisition, and, as a result, we now have a strong presence in the United Kingdom, as well as a presence in important financial services centers around the world. We believe the expertise and reach of Dice and eFinancialCareers together will provide a strong position to expand our business and brands into new markets. We will also continue to evaluate and selectively pursue other growth opportunities that will allow us to further expand our business outside of the United States.

Selectively expand into new verticals. We believe other professional communities have characteristics that would support specialized career websites. We will consider entering into new verticals that meet specific criteria, primarily focusing on hard-to-find, highly skilled and highly paid professionals. We believe we can leverage our experience serving unique vertical or industry markets as we pursue opportunities in other vertical industries. For example, we have been able to increase ClearanceJobs.com's revenues more than ten-fold since we acquired it in 2004, which demonstrates our ability to successfully leverage our experience in serving high growth communities as we expand into new verticals.

Products and Services

We provide leading recruiting and career development websites for direct employers, recruiters, staffing companies and technology and engineering, financial services, capital market and corporate finance, and security-cleared professionals. We provide our customers with access to unique pools of experienced and highly qualified professionals, and professionals seeking jobs and career information with access to collections of full-time, part-time and contract positions. Both customers and professionals provide content for our career websites by posting descriptions of available jobs and resumes. Our search technology and specialized focus enable us to provide professionals with the ability to perform highly targeted job searches based on specific criteria, including locations, types of employment, skills and keywords. Our vertical focus allows users to find the information they are looking for faster and easier than general job boards. Our career websites also offer career resources, such as specialized content and industry news.

We offer our recruiting and career development services and tools through the following four websites, each of which focuses on different career sectors:

Dice.com is the leading career site for technology and engineering professionals and the companies that seek to employ them. The job postings available in the Dice.com database, from both technology and non-technology companies across many industries, include a wide variety of technology positions for software engineers, systems administrators, database specialists and project managers, and a variety of other technology and engineering professionals.

Customers have access to specific tools and resources that Dice.com provides to help recruiters and human resources managers improve the effectiveness of their recruitment processes. Through our resume database

Table of Contents

offerings, Dice.com provides customers with the ability to conduct powerful, detailed searches of candidate resumes that match desired criteria, the results of which are delivered by email to our customers. Dice.com also provides professionals with job search tools, resume posting and career-related content. In January 2009, Dice.com had approximately 2.3 million unique visitors and ended the month with over 420,000 searchable resumes less than one year old.

Customers can purchase recruitment packages, classified postings or advertisements. Approximately 89% of Dice.com revenue is derived from recruitment packages. Recruitment packages offer our customers the ability to access the candidate resume database and post jobs in job slots. Job slots allow our customers to rotate an unlimited number of jobs through the same slots during the contract period. Our base monthly recruitment package gives our customers a single license to search our candidate resume database and post positions in up to five job slots. Customers are incented to purchase our recruitment packages on an annual basis. Our classified postings allow our customers to post a single job for a period of 30 days. General website advertising does not generate a significant portion of our revenue, but may be purchased separately or as part of a recruitment package.

eFinancialCareers.com is the leading global recruiting and career development network of websites for financial services professionals, including investment banking, asset management, insurance, retail banking, hedge funds and senior corporate finance professionals. eFinancialCareers was launched in the United Kingdom in 2000, and now operates career websites in 18 markets in five languages primarily in Continental Europe, North America, the Persian Gulf States, Southeast Asia and Australia using the eFinancialCareers name. eFinancialCareers has expanded its career site network through distribution agreements by which it powers the job boards of an additional 75 websites in the finance sector, including well-known worldwide capital markets publications and organizations, such as Thomson Reuters (U.K.), Institutional Investor (U.S.), L'Expansion (France), Milano Finanza (Italy), Boersen Zeitung (Germany), Finance Asia (Southeast Asia) and Financial Standard (Australia). As a result, eFinancialCareers is able to greatly enhance the reach and visibility of its job postings and has attracted an audience of cross-border customers and professionals willing to seek jobs in markets other than their own. eFinancialCareers does not generate revenues from its distribution agreements.

eFinancialCareers customers post jobs targeting specific sectors within the financial services industry, and can also search the resume database of highly qualified and specialized professionals in this sector. In addition to allowing professionals to post resumes and apply for listed positions, eFinancialCareers also provides professionals with career enhancement tools and resources, such as employer profiles, newsletters, and industry surveys. eFinancialCareers also provides both professionals and graduating students with professional education and training materials.

ClearanceJobs.com is the leading secure job board dedicated to matching technology candidates with active or current U.S. government security clearances to the best hiring companies searching for security-cleared employees. ClearanceJobs.com provides professionals with many of the career development tools, such as resume writing tips and salary surveys, also offered on Dice.com. We believe ClearanceJobs.com has the largest and fastest-growing database of active security-cleared candidates available online, with approximately 110,000 resumes as of December 31, 2008. The majority of candidates with resumes in our database have high-level security clearances.

JobsintheMoney.com is a targeted career site for accounting and finance professionals in the United States. JobsintheMoney.com offers professionals and its customers many of the same tools offered on our other websites. JobsintheMoney.com has partnerships with many of the leading industry websites used by accounting and finance professionals, including BusinessFinanceMag.com and AuditNet.org.

We also operate Targeted Job Fairs, a leading producer and host of career fairs and open houses focused primarily on technology and security-cleared candidates in the United States. In 2008, Targeted Job Fairs produced more than 100 career fairs, at which it hosted a wide range of locally and nationally recognized

Table of Contents

companies and recruiters, offering them the opportunity to screen and hire highly qualified candidates face-to-face. A typical job fair during 2008 hosted between 12 and 17 companies and between 325 and 375 professionals. In addition, Targeted Job Fairs coordinates private career fairs for individual companies desiring exclusive access to top quality candidates.

Marketing and Sales

Success in the highly competitive online recruiting business requires the creation of a marketplace attractive to both customers and professionals. We focus our long-term marketing efforts on growing the number of professionals who visit our websites, which we believe increases the attractiveness of our websites to our customers. We primarily use targeted marketing, rather than broad-based advertising, to increase our brand awareness among professionals, new applicable audiences and improve site performance including new resumes posted and applications to job postings. For instance, in the case of Dice.com, we have advertising campaigns on technology-focused websites, such as Tech Crunch, Technorati and Ars Technica, and on search engines. We also market our websites to professionals through the use of newsletters and industry pieces, such as The Dice Advisor and The ClearanceJobs Report, and through the use of products, such as daily Job Alert emails. Our job seeker marketing programs have helped us produce strong results in traffic and user activity.

Our customer marketing efforts are directed at targeted customer acquisition and have been effective in producing new customers. We also employ marketing efforts directed at retaining our existing customers. eFinancialCareers has built its brand awareness through strategic relationships, but without significant spending on marketing and advertising. During 2008, we increased our direct marketing spend to approximately 19% of revenues for eFinancialCareers in order to increase its brand awareness. In addition to our sales efforts described below, our customer marketing efforts are conducted through direct mail and email campaigns, marketing and trade shows. For instance, we send over 1.6 million emails and 250,000 pieces of direct mail to our existing and potential customers on a monthly basis. We also reach our customers through the use of direct marketing educational campaigns, which keep them aware of recruiting developments and practices.

Our sales efforts focus on further penetrating the market for recruiting and career development services. Our field sales group targets Fortune 1000 companies, large staffing and recruiting firms and other large and mid-size businesses. Our in-house sales organization focuses on generating new business from recruiters and small and mid-size companies, renewing customer contracts and increasing the service levels that customers purchase, as well as servicing the needs of our largest clients. As of December 31, 2008, our sales organization employed 79 sales personnel in the United States and 25 in the rest of the world.

Customer Support

We believe we have differentiated ourselves from our competitors by providing extensive ongoing support to our customers. Our customers are assigned a customer support representative, who is the first point of contact after a sale is made. Our customer support efforts focus on training our customers on our products and services, because we believe customers will have a more compelling user experience if they are more familiar with our products and services. Our customer support representatives also assist customers, upon request, by building candidate searches and writing and editing customers' job postings. Additionally, our customer support efforts focus on ensuring that the professionals who use our websites have positive experiences. For instance, our customer support department constantly reviews our websites for false or inaccurate job postings and performs other similar compliance functions. We believe customers view our customer support functions as a strong, attractive attribute of our websites.

Customers

We currently serve a diversified customer base consisting of approximately 10,000 customers. No customer for our career website services accounted for more than 1% of our revenues in 2008. Our customers include

Table of Contents

small, mid-sized and large direct employers and staffing companies, recruiting agencies and consulting firms. As of December 31, 2008, significant customers of Dice.com and ClearanceJobs.com included Accenture, Adecco, IBM, Lockheed Martin, Manpower, Raytheon and Robert Half, and significant customers of eFinancialCareers included Bloomberg, Credit Suisse, Genworth Financial, JP Morgan, SThree, Société Générale and Thomson Reuters.

Technology

We use a variety of technologies to support our websites. Each system is designed so that it can be scaled by adding additional hardware and network capacity. We host our applications whenever possible on clustered, high availability hardware. All applications and data connections are monitored 24/7 for performance, responsiveness and stability.

Our primary operations facility is located within our Urbandale, Iowa office facilities in a limited access, temperature-controlled data center with emergency power generation capability. We maintain a backup system for website operations at our co-location center. We replicate website data at various times throughout the day to the co-location facility. Additionally, we have business resumption hardware and software in place at the co-location facility to ensure a smooth transition for the business in case of loss of our Urbandale operations center, and offsite data storage capabilities. We have robust firewalls and switchgear to provide network security, and have used substantial expert assistance in their configuration and testing.

Competition

The market for recruiting services and employment advertising is highly competitive with multiple online and offline competitors. With the evolution of the online recruiting model, there has been an increasing need to provide ease of use and relevance to professionals, as well as an efficient and cost-effective recruitment method for direct employers, recruiters and staffing companies. Additionally, the further development of the Internet has made it easier for new competitors to emerge with minimal barriers to entry. Our ability to maintain our existing customer base and generate new customers depends to a significant degree on the quality of our candidate base, the quality of our services, our pricing and value-added products and services and our reputation among our customers and potential customers. Our competitors include:

generalist job boards, some of which have substantially greater resources and brand recognition than we do, such as CareerBuilder (owned by Gannett, Tribune, McClatchy and Microsoft), Monster.com, and Yahoo! Hotjobs.com, and which, unlike specialized job boards, permit customers to enter into a single contract to find professionals across multiple occupational categories and attempt to fill all their hiring needs through a single website;

newspaper and magazine publishers, national and regional advertising agencies, executive search firms and search and selection firms that carry classified advertising, many of whom have developed, begun developing or acquired new media capabilities such as recruitment websites, or have recently partnered with generalist job boards;

specialized job boards focused specifically on the industries we service, such as FT.com, ComputerJobs.com and CareerBank.com; and

new and emerging competitors, such as aggregators of classified advertising, including SimplyHired, Indeed and Google; Craigslist; and professional networking sites, such as LinkedIn.

Intellectual Property

We seek to protect our intellectual property through a combination of service marks, trademarks, copyrights and other methods of restricting disclosure of our proprietary or confidential information. We have no patents or patent applications pending for our current services and we do not anticipate that patents will become a

Table of Contents

significant part of our intellectual property in the foreseeable future. We generally enter into confidentiality agreements with our employees, consultants, vendors and customers. We also seek to control access to and distribution of our technology, documentation and other proprietary information.

We generally pursue the registration of the material service marks we own in the United States and internationally, as applicable. We own a number of registered, applied for and/or unregistered trademarks and service marks that we use in connection with our businesses. We have registered the DICE trademark in the United States, Canada and the European community and the JOBSINTHEMONEY and CLEARANCEJOBS.COM trademarks in the United States. We have registered the EFINANCIALCAREERS mark on the Supplemental Register in the United States and have applied for registration of the mark in other jurisdictions. Registrations for trademarks may be maintained indefinitely, as long as the trademark owner continues to use and police the trademarks and timely renews registrations with the applicable governmental office. Although we generally pursue the registration of our material service marks and other material intellectual property we own, where applicable, we have trademarks and/or service marks that have not been registered in the United States and/or other jurisdictions. We have not registered the copyrights in the content of our websites, and do not intend to register such copyrights.

The steps we have taken to protect our copyrights, trademarks, service marks and other intellectual property may not be adequate, and third parties could infringe, misappropriate or misuse our intellectual property. If this were to occur, it could harm our reputation and affect our competitive position. See Item 1A. Risk Factors Misappropriation or misuse of our intellectual property could harm our reputation, affect our competitive position and cost us money.

Regulation and Legislation

User Privacy

We collect, store and use a variety of information about both professionals and customers on our website properties. Within the websites, the information that is collected, stored and used has been provided by the professionals or customers with the intent of making it publicly available. We do not store credit card numbers on our websites, and we do not ask professionals or customers to supply social security numbers. Our business data is separated from website operations by a variety of security layers including network segmentation, access controls, and physical separation.

We post our privacy policies on our websites so that our users can access and understand the terms and conditions applicable to the collection, storage and use of information collected from users. Our privacy policies also disclose the types of information we gather, how we use it and how a user can correct or change their information. Our privacy policies also explain the circumstances under which we share this information and with whom. Professionals who register for our websites have the option of indicating specific areas of interest in which they are willing to receive offers via email or postal mail. These offers contain content created either by us or our third-party partners.

To protect confidential information and to comply with our obligations to our users, we impose constraints on our customers to whom we provide user data, which are consistent with our commitments to our users. Additionally, when we provide lists to third parties, including to our advertiser customers, it is under contractual terms that are consistent with our obligations to our users and with applicable laws and regulations.

U.S. and Foreign Government Regulation

Congress has passed legislation that regulates certain aspects of the Internet, including content, copyright infringement, user privacy, advertising and promotional activities, taxation, access charges, liability for third-party activities and jurisdiction. In addition, federal, state, local and foreign governmental organizations have enacted and also are considering, and may consider in the future, other legislative and regulatory proposals that

Table of Contents

would regulate the Internet. Areas of potential regulation include, but are not limited to, libel, electronic contracting, pricing, quality of products and services and intellectual property ownership.

As of January 1, 2004, the Controlling the Assault of Non-Solicited Pornography and Marketing Act of 2003, or the CAN-SPAM Act, became effective. The CAN-SPAM Act regulates commercial emails and provides a right on the part of the recipient to request the sender to stop sending messages, and establishes penalties for the sending of email messages that are intended to deceive the recipient as to source or content. Under the CAN-SPAM Act, senders of commercial emails (and other persons who initiate those emails) are required to make sure that those emails do not contain false or misleading transmission information. Commercial emails are required to include a valid return email address and other subject heading information so that the sender and the Internet location from which the message has been sent are accurately identified. Recipients must be furnished with an electronic method of informing the sender of the recipient's decision not to receive further commercial emails. In addition, the email must include a postal address of the sender and notice that the email is an advertisement. The CAN-SPAM Act may apply to the marketing materials and newsletters that we distribute to our audience. At this time, we are applying the CAN-SPAM Act to our email communications, and believe that our email practices comply with the requirements of the CAN-SPAM Act.

The European Union also has enacted several directives relating to the Internet and various EU member states have implemented them with national legislation. In order to safeguard against the spread of certain illegal and socially harmful materials on the Internet, the European Commission has drafted the Action Plan on Promoting the Safe Use of the Internet. Other European Commission directives and national laws of several foreign governments address the regulation of privacy, e-commerce, security, commercial piracy, consumer protection and taxation of transactions completed over the Internet.

Employees

As of December 31, 2008, we had 283 employees. Our employees are not represented by any union and are not the subject of a collective bargaining agreement. We believe that we have a good relationship with our employees.

Operating Segments

We organize our businesses into the following operating segments, so defined due to similarities in the economic and geographical characteristics, and financial performance of the underlying brands.

DCS Online

eFinancialCareers

Other

The following table summarizes our operating revenues for our products and services, which are described in each of the subsequent operating segment discussions:

	Year ended December 31,					
	2008	2007		2006		
	(in thousands, except percentages)					
<i>Revenues:</i>						
DCS Online	\$ 107,329	69%	\$ 102,215	72%	\$ 77,285	93%
eFinancialCareers	37,202	24%	29,658	21%	2,924	3%
Other	10,478	7%	10,477	7%	3,191	4%
Total revenues from continuing operations	\$ 155,009	100%	\$ 142,350	100%	\$ 83,400	100%

Table of Contents

Our DCS Online reporting segment is comprised of the Dice and ClearanceJobs career websites. Revenues are derived mostly from sales of recruitment packages to recruiters and employers, which are a combination of job posting slots and access to a searchable database of candidates. Revenues are also generated from the sale of classified job postings to recruiters and employers, along with website advertising.

Our eFinancialCareers reporting segment represents international operations, and is headquartered in the United Kingdom. Revenues are derived from the sale of job postings, access to a searchable database of candidates, classified job postings, and website advertising, although not usually as a package.

Our Other reporting segment is comprised of eFinancialCareers North American operations, Targeted Job Fairs, and JobsintheMoney. Revenues are derived from sales of recruitment packages to recruiters and employers, which is a combination of job posting slots and access to a searchable database of candidates. Revenues are also generated from the sale of classified job postings to recruiters and employers, along with website advertising and job fair revenue.

Refer to the notes to our consolidated financial statements for a measure of profit and assets by segment.

Item 1A. Risk Factors

We may be adversely affected by cyclicalities or an extended downturn in the United States or worldwide economy, or in or related to the industries we serve.

Our revenues are generated primarily from servicing customers seeking to hire qualified professionals in the technology and finance sectors. Demand for these professionals, and professionals in the other vertical industries we serve, tends to be tied to economic cycles. Increases in the unemployment rate, specifically in the technology, finance and other vertical industries we serve, cyclicalities or an extended downturn in the economy could cause our revenues to decline. For example, during the recession in 2001, employers reduced or postponed their recruiting efforts, including their recruitment of professionals in certain of the vertical industries we serve, such as technology. The 2001 economic recession, coupled with the substantial indebtedness incurred by our predecessor, Dice Inc., resulted in Dice Inc. filing for Chapter 11 protection in 2003. As of December 2008, the seasonally unadjusted U.S. unemployment rate was 3.4% for computer related occupations, 5.6% in the finance sector and 7.2% overall, seasonally adjusted. The increase in unemployment and decrease in recruitment activity experienced during 2008 resulted in decreased demand for our services. During the fourth quarter of 2008 we experienced a 10% decline in revenues compared to the fourth quarter of 2007. As the current economic recession continues, our ability to generate revenue is adversely affected.

In addition, the general level of economic activity in the regions and industries in which we operate significantly affects demand for our services. When economic activity slows, many companies hire fewer employees. Therefore, our operating results, business and financial condition could be significantly harmed by an extended economic downturn or future downturns, especially in regions or industries where our operations are heavily concentrated. Further, we may face increased pricing pressures during such periods. Additionally, the labor market and certain of the industries we serve have historically experienced short term cyclicalities. It is difficult to estimate the total number of passive or active job seekers or available job openings in the United States or abroad during any given period. If there is a labor shortage, qualified professionals may be less likely to seek our services, which could cause our customers to look elsewhere for attractive employees. Such labor shortages would require us to intensify our marketing efforts towards professionals so that professionals who post their resumes on our websites remain relevant to our customers, which would increase our expenses. Alternatively, if there is a shortage of available job openings, the number of job postings on our websites could decrease, causing our revenues to decline. Any economic downturn or recession in the United States or abroad for an extended period of time could have a material adverse effect on our business, financial condition, results of operations and liquidity.

Table of Contents

We operate in a highly competitive developing market and we may be unable to compete successfully against existing and future competitors.

The market for career services is highly competitive and barriers to entry in the market are relatively low. For example, there are tens of thousands of job boards currently operating on the Internet, and new competitors may emerge. We do not own any patented technology that would preclude or inhibit competitors from entering the recruiting and career development services market. We compete with other companies that direct all or portions of their websites toward certain segments or sub segments of the industries we serve. We compete with generalist job boards, some of which have substantially greater resources and brand recognition than we do, such as CareerBuilder (owned by Microsoft, Gannett, Tribune and McClatchy), Monster.com, and Yahoo! HotJobs.com, which, unlike specialist job boards, permit customers to enter into a single contract to find professionals across multiple occupational categories and attempt to fill all their hiring needs through a single website, as well as job boards focused specifically on the industries we service, such as ComputerJobs.com, and CareerBank.com. We also compete with newspaper and magazine publishers, national and regional advertising agencies, executive search firms and search and selection firms that carry classified advertising, many of whom have developed, begun developing or acquired new media capabilities such as recruitment websites, or have recently partnered with generalist job boards. In addition, we face competition from new and emerging competitors, such as aggregators of classified advertising, including SimplyHired, Indeed and Google; Craigslist; and professional networking sites, such as LinkedIn. Many of our customers also seek to hire candidates directly. Existing or future competitors may develop or offer services that are comparable or superior to ours at a lower price, which could cause our customers to stop using our services or put pressure on us to decrease our prices. If our current or potential customers, or the qualified professionals who use our websites, choose to use these websites rather than ours, demand for our services could decline and our revenues could be reduced. Additionally, job postings and resume posting in the career services industry are not marketed exclusively through any single channel, and accordingly, our competition could aggregate a set of postings similar to ours. Our inability to compete successfully against present or future competitors could materially adversely affect our business, results of operations, financial condition and liquidity.

If we fail to maintain and develop our reputation and brand recognition our business could be adversely affected.

We believe that establishing and maintaining the identity of our brands, such as Dice and eFinancialCareers, is critical in attracting and maintaining the number of professionals and customers using our services, and that the importance of brand recognition will increase due to the growing number of Internet services similar to ours. Promotion and enhancement of our brands will depend largely on our success in continuing to provide high quality recruiting and career development services. If users do not perceive our existing career and recruiting services to be of high quality, or if we introduce new services or enter into new business ventures that are not favorably received by users, the uniqueness of our brands could be diminished and accordingly the attractiveness of our websites to professionals and customers could be reduced. We may also find it necessary to increase substantially our financial commitment to creating and maintaining a distinct brand loyalty among users. If we cannot provide high quality career services, fail to protect, promote and maintain our brands or incur excessive expenses in an attempt to improve our career services or promote or maintain our brands, our business, results of operations, financial condition and liquidity could be materially adversely affected.

Our business is largely based on customers who purchase monthly or annual recruitment packages. Any failure to increase or maintain the number of customers who purchase recruitment packages could adversely impact our revenues.

Our customers typically include recruiters, staffing firms, consulting firms and direct hiring companies. Customers can choose to purchase recruitment packages, classified postings or advertisements. Most of our revenues are generated by the fees we earn from our customers who purchase monthly or long-term recruitment packages. Our growth depends on our ability to retain our existing monthly and annual recruitment package customers and to increase the number of customers who purchase recruitment packages. Any of our customers may decide not to continue to use our services in favor of alternate services or because of budgetary constraints

Table of Contents

or other reasons. We cannot assure you that we will be successful in continuing to attract new customers or retaining existing customers or that our future sales efforts in general will be effective. If our existing customers choose not to use our services, decrease their use of our services, or change from being recruitment package customers to purchasing individual classified postings, our services, job postings and resumes posted on our websites could be reduced, search activity on our websites could decline, the usefulness of our services to customers could be diminished, and we could experience declining revenues and/or incur significant expenses.

If we fail to attract qualified professionals to our websites or grow the number of qualified professionals who use our websites, our revenues could decline.

The value of our websites to our customers is dependent on our ability to continuously attract professionals with the experience, education and skill set our customers seek. For example, the professionals who post their resumes on Dice.com are highly educated, with, as of January 2009, approximately 73% having a bachelor's degree or higher. Our online surveys indicate that 78% of professionals who use Dice.com have more than five years of experience, greater than half have more than 10 years of experience and most are currently employed. To grow our businesses, we must continue to convince qualified professionals that our services will assist them in finding employment, so that customers will choose to use our services to find employees. We do not know the extent to which we have penetrated the market of qualified professionals in the industries we serve or the extent to which we will be able to grow the number of qualified professionals who use our websites. If we are unable to increase the number of professionals using our websites, or if the professionals who use our websites are viewed as unattractive by our customers, our customers could seek to list jobs and search for candidates elsewhere, which could cause our revenues to decline.

Capacity constraints, systems failures or breaches of our network security could materially and adversely affect our business.

We derive almost all of our revenues from the purchase of recruitment products and services and employment advertising offered on our websites. As a result, our operations depend on our ability to maintain and protect our computer systems, most of which are located in redundant and independent systems in Urbandale, Iowa. Any system failure, including network, software or hardware failure that causes interruption or an increase in response time of our services, could substantially decrease usage of our services and could reduce the attractiveness of our services to both our customers and professionals. An increase in the volume of queries conducted through our services could strain the capacity of the software or hardware we employ. This could lead to slower response times or system failures and prevent users from accessing our websites for extended periods of time, thereby decreasing usage and attractiveness of our services. Our operations are dependent in part on our ability to protect our operating systems against:

physical damage from acts of God;

terrorist attacks or other acts of war;

power loss;

telecommunications failures;

physical and electronic break-ins;

hacker attacks;

computer viruses or worms; and

similar events.

Edgar Filing: DICE HOLDINGS, INC. - Form 10-K

Although we maintain insurance against fires, floods and general business interruptions, the amount of coverage may not be adequate in any particular case. Furthermore, the occurrence of any of these events could result in interruptions, delays or cessations in service to users of our services, which could materially impair or

Table of Contents

prohibit our ability to provide our services and significantly impact our business.

Additionally, overall Internet usage could decline if any well publicized compromise of security occurs or if there is a perceived lack of security of information, including credit card numbers and other personal information. Hacking involves efforts to gain unauthorized access to information or systems or to cause intentional malfunctions or loss or corruption of data, software, hardware or other computer equipment and online job boards, in particular, have been targeted by hackers who seek to gain unauthorized access to job seeker and customer data for purposes of implementing phishing or other schemes. Despite our implementation of firewalls, switchgear and other network security measures, our websites, servers, databases and other systems may be vulnerable to computer hackers, physical or electronic break-ins, sabotage, computer viruses, worms and similar disruptions from unauthorized tampering with our computer systems. Our systems, like the systems of many other career websites, have been targeted in the past in cyber attacks and hacks and may continue to be subject to such attacks. We will continue to enhance and review our computer systems to try to prevent unauthorized and unlawful intrusions, but in the future it is possible that we may not be able to successfully prevent all intrusions and such intrusions could result in our network security or computer systems being compromised and possibly result in the misappropriation or corruption of proprietary or personal information or cause disruptions in our services. We might be required to expend significant capital and resources to protect against, or alleviate, problems caused by such intrusions. We may also not have a timely remedy against a hacker who is able to penetrate our network security. Our networks could also be affected by computer viruses or other similar disruptive problems and we could inadvertently transmit viruses across our networks to our users or other third parties. Any of these occurrences could harm our business or give rise to a cause of action against us. Our general business interruption insurance policies have limitations with respect to covering interruptions caused by computer viruses or hackers. We have not added specific insurance coverage to protect against these risks. Our activities and the activities of third party contractors involve the storage, use and transmission of proprietary and personal information, including personal information collected from professionals who use our websites. Accordingly, security breaches could expose us to a risk of loss or litigation and possibly liabilities. We cannot assure you that contractual provisions attempting to limit our liability in these areas will be successful or enforceable, or that other parties will accept such contractual provisions as part of our agreements. Any security breaches or our inability to provide users with continuous access to our networks could materially impact our ability to provide our services as well as materially impact the confidence of our customers in our services, either of which could have a material adverse effect on our business.

We may be liable with respect to the collection, storage and use of the personal information of our professionals and our current practices may not be in compliance with proposed new laws and regulations.

Our business depends on our ability to collect, store, use and disclose personal data from the professionals who use our websites. Our policies concerning the collection, use and disclosure of personally identifiable information are described on our websites. In recent years, class action lawsuits have been filed and the Federal Trade Commission and state agencies have commenced investigations with respect to the collection, use and sale by various Internet companies of users' personal information. While we believe we are in compliance with current law, we cannot ensure that we will not be subject to lawsuits or investigations for violations of law. Moreover, our current practices regarding the collection, storage and use of user information may not be in compliance with currently pending legislative and regulatory proposals by the United States federal government and various state and foreign governments intended to limit the collection and use of user information. While we have implemented and intend to implement additional programs designed to enhance the protection of the privacy of our users, these programs may not conform to all or any of these laws or regulations and we may consequently incur civil or criminal liability for failing to conform. As a result, we may be forced to change our current practices relating to the collection, storage and use of user information. Our failure to comply with laws and regulations could also lead to adverse publicity and a loss of consumer confidence if it were known that we did not take adequate measures to assure the confidentiality of the personally identifiable information that our users had given to us. This could result in a loss of customers and revenue and materially impact the success of our business. Concern among prospective customers and professionals regarding our use of personal information collected on our websites, such as credit card numbers, email addresses, phone numbers and other personal information, could keep prospective customers from using our career services websites. Internet-wide incidents

Table of Contents

or incidents with respect to our websites, including misappropriation of our users' personal information, penetration of our network security, or changes in industry standards, regulations or laws could deter people from using the Internet or our websites to conduct transactions that involve confidential information, which could have a material adverse impact on our business. Additionally, the European Union (EU) has adopted a directive, and most of the EU states have adopted laws, that impose restrictions on the collection, use and disclosure of personal data concerning EU residents, and on any transfer of such data outside of the EU. In response to the directive and these laws, which prohibit the transfer of data to countries that are not deemed to have laws that adequately protect data subjects' privacy rights, other countries have adopted or are considering adopting laws and regulations regarding the collection, use and disclosure of personal data that meet the EU's standard for adequacy. Directives and privacy acts of these other countries may have an adverse effect on our ability to collect, use, disclose and transfer personal data from users in the applicable countries and consequently may have an adverse effect on our business.

We must adapt our business model to keep pace with rapid changes in the recruiting and career services business, including rapidly changing technologies and the development of new products and services.

Providing recruiting and career development services on the Internet is a relatively new and rapidly evolving business, and we will not be successful if our business model does not keep pace with new trends and developments. The adoption of recruiting and job seeking, particularly among those who have historically relied on traditional recruiting methods, requires acceptance of a new way of conducting business, exchanging information and applying for jobs. The number of customers and professionals utilizing our services has increased over at least the past three years. However, online recruiting may not continue to gain market acceptance at its current rate. If we are unable to adapt our business model to keep pace with changes in the recruiting business, or if we are unable to convince those who use traditional recruiting methods to use our online recruiting services, our business, results of operations, financial condition and liquidity could be materially adversely affected. Our success is also dependent on our ability to adapt to rapidly changing technology and to develop new products and services. Accordingly, to maintain our competitive position and our revenue base, we must continually modernize and improve the features, reliability and functionality of our service offerings and related products in response to our competitors. Future technological advances in the career services industry may result in the availability of new recruiting and career development offerings or increase in the efficiency of our existing offerings. Many of our competitors have longer operating histories, larger client bases, longer relationships with clients, greater brand or name recognition, or significantly greater financial, technical, marketing and public relations resources than we do. As a result, they may be in a position to respond more quickly to new or emerging technologies and changes in customer requirements, and to develop and promote their products and services more effectively than we can. We may not be able to adapt to such technological changes or offer new products on a timely basis or establish or maintain competitive positions. If we are unable to develop and introduce new products and services, or enhancements to existing products and services, in a timely and successful manner, our business, results of operations, financial condition and liquidity could be materially and adversely affected.

We have a substantial amount of indebtedness which could affect our financial condition, and, given the current environment, we may not be able to borrow funds under our revolving credit facility or refinance our indebtedness.

As of December 31, 2008, we had \$81.5 million of outstanding indebtedness under our Amended and Restated Credit Facility and we had the ability to borrow an additional \$72.3 million. Following the payment of \$10.3 million in January 2009 and an additional \$10.0 million in early February 2009, we had \$61.2 million of outstanding indebtedness under our Amended and Restated Credit Facility. If we cannot generate sufficient cash flow from operations to service our debt, we may need to further refinance our debt, dispose of assets or issue equity to obtain necessary funds. We do not know whether we will be able to do any of this on a timely basis or on terms satisfactory to us or at all.

The commitments under the revolving credit facility portion of our Amended and Restated Credit Facility have been syndicated to a number of financial institutions. Given the uncertainty of the credit markets, it is possible that one or more of the lenders will refuse or be unable to satisfy their commitment to lend to us should

Table of Contents

we need to borrow funds under the revolving credit facility. If borrowings are unavailable to us and we cannot generate sufficient revenues to fund our operations, our business will be adversely affected. In addition, the inability to borrow could hinder growth if we need funds to complete an acquisition.

Our substantial amount of indebtedness could limit our ability to:

obtain necessary additional financing for working capital, capital expenditures or other purposes in the future;

plan for, or react to, changes in our business and the industries in which we operate;

make future acquisitions or pursue other business opportunities; and

react in an extended economic downturn.

The terms of our Amended and Restated Credit Facility may restrict our current and future operations, which would adversely affect our ability to respond to changes in our business and to manage our operations.

Our Amended and Restated Credit Facility contains, and any future indebtedness of ours would likely contain, a number of restrictive covenants that impose significant operating and financial restrictions on us, including restrictions on our ability to, among other things:

incur additional debt;

pay dividends and make other restricted payments;

create liens;

make investments and acquisitions;

engage in sales of assets and subsidiary stock;

enter into sale-leaseback transactions;

enter into transactions with affiliates;

transfer all or substantially all of our assets or enter into merger or consolidation transactions;

hedge currency and interest rate risk; and

make capital expenditures.

Our Amended and Restated Credit Facility also requires us to maintain certain financial ratios. A failure by us to comply with the covenants or financial ratios contained in our Amended and Restated Credit Facility could result in an event of default under the facility which could adversely affect our ability to respond to changes in our business and manage our operations. In the event of any default under our Amended and Restated Credit Facility, the lenders under our Amended and Restated Credit Facility will not be required to lend any additional amounts to us. Our lenders also could elect to declare all amounts outstanding to be due and payable and require us to apply all of our available cash to repay these amounts. If the indebtedness under our Amended and Restated Credit Facility were to be accelerated, there can be no assurance that our assets would be sufficient to repay this indebtedness in full.

Our history of operations includes periods of operating and net losses, and we may incur operating and net losses in the future. Our significant net losses in periods prior to 2003 and the significant amount of indebtedness incurred by our predecessor led us to declare bankruptcy in early 2003.

We experienced operating and net losses from continuing operations of approximately \$307,000 and \$1.4 million, respectively, in the four month period ending December 31, 2005, due primarily to the negative impact of the deferred revenue adjustment we made at the time of the 2005 Acquisition and the increased amortization expense and interest expense incurred as a result of the 2005 Acquisition. Additionally, on a pro forma basis, we

Table of Contents

experienced a net loss from continuing operations of \$3.6 million for the year ended December 31, 2006. If we continue to suffer operating and net losses the trading price of our common stock may decline significantly. In addition, we had net losses from continuing operations of \$16.4 million in 2002, primarily as a result of a decline in demand for the products and services Dice Inc. offered stemming from the severe and extended downturn in the general labor market and more specifically the technology labor market that began in 2001, and also due to the significant amount of indebtedness Dice Inc.'s predecessor had incurred. As a result on February 14, 2003, Dice Inc. filed a voluntary petition for bankruptcy under Chapter 11 of the United States Bankruptcy Code (the Joint Plan of Reorganization). The Joint Plan of Reorganization was confirmed by the Bankruptcy Court on June 24, 2003, and became effective as of the close of business on June 30, 2003, at which point Dice Inc. emerged from bankruptcy. Although we have managed to achieve an increase in revenues since Dice Inc. emerged from bankruptcy, we have also increased our operating expenses significantly, expanded our net sales and marketing operations, made significant acquisitions and have continued to develop and extend our online career services with the expectation that our revenues will grow in the future. We may not generate sufficient revenues to pay for all of these operating or other expenses, which could have a material adverse effect on our business, results of operations and financial condition.

If we are not able to successfully identify or integrate future acquisitions, including fully integrating the operations of eFinancialGroup, our management's attention could be diverted, and our efforts to integrate future acquisitions could consume significant resources.

An important component of our strategy is to expand the geographic markets and the vertical sectors we serve and diversify the products and services we offer through the acquisition of other complementary businesses and technologies (for example the October 2006 eFinancialGroup Acquisition). Our further growth may depend in part on our ability to identify additional suitable acquisition candidates and acquire them on terms that are beneficial to us. We may not be able to identify suitable acquisition candidates or acquire them on favorable terms or at all. In addition, the anticipated results or operational benefits of any businesses we acquire may not be realized and we may not be successful in integrating other acquired business into our operations. Failure to manage and successfully integrate acquired businesses could harm our business. Even if we are successful in making an acquisition, we may encounter numerous risks, including the following:

expenses, delays and difficulties in integrating the operations, technologies and products of acquired companies;

potential disruption of our ongoing operations;

diversion of management's attention from normal daily operations of the business;

inability to maintain key business relationships and the reputations of acquired businesses;

entry into markets in which we have limited or no prior experience and in which our competitors have stronger market positions;
dependence on unfamiliar employees, affiliates and partners;

the amortization of the acquired company's intangible assets;

insufficient revenues to offset increased expenses associated with the acquisition;

inability to maintain our internal standards, controls, procedures and policies;

reduction or replacement of the sales of existing services by sales of products and services from acquired business lines;

potential loss of key employees of the acquired companies;

difficulties integrating the personnel and cultures of the acquired companies into our operations; and

responsibility for the potential liabilities of the acquired businesses.

If any of these risks materialize, they could have a material adverse effect on our business, results of operations, financial condition and liquidity.

Table of Contents

In addition, any acquisition of other businesses or technologies may require us to seek debt or equity financing. Such financing might not be available to us on acceptable terms, if at all. The global financial markets have recently experienced declining equity valuations and disruptions in the credit markets due to liquidity imbalances and repricing of risk, which may impact our ability to obtain additional financing on reasonable terms, if at all.

Our potential future growth may strain our resources.

As our operations have expanded, we have experienced a rapid growth in our headcount. We grew from 128 employees at December 31, 2004 to 283 employees at December 31, 2008. Our rapid growth has demanded and will continue to demand substantial resources and attention from our management, including improving our operational and financial systems and expanding, training, retaining and managing our employee base. If we do not effectively manage our growth and expand, train, retain and manage our employee base, our customer service and responsiveness could suffer and our costs could increase, which could harm our brand, increase our expenses and reduce our profitability.

Misappropriation or misuse of our intellectual property could harm our reputation, affect our competitive position and cost us money.

Our success and ability to compete are dependent in part on the strength of our intellectual property rights, the content included on our websites, the goodwill associated with our trademarks, trade names and service marks and on our ability to use U.S. and foreign laws to protect them. Our intellectual property includes, among other things, the content included on our websites, our logos, brands, domain names, the technology that we use to deliver our products and services, the various databases of information that we maintain and make available and the appearance of our websites. We claim common law protection on certain names and marks that we have used in connection with our business activities and the content included on our websites. We also own a number of registered or applied for trademarks and service marks that we use in connection with our business, including DICE, CLEARANCEJOBS.COM, JOBSINTHEMONEY and EFINANCIALCAREERS. Although we generally pursue the registration of material service marks and other material intellectual property we own, where applicable, we have copyrights, trademarks and/or service marks that have not been registered in the United States and/or other jurisdictions. We generally enter into confidentiality agreements with our employees, consultants, vendors and customers to protect our intellectual property rights. We also seek to control access to and distribution of our technology, documentation and other proprietary information as well as proprietary information licensed from third parties. Policing our intellectual property rights worldwide is a difficult task, and we may not be able to identify infringing users. The steps we have taken to protect our proprietary rights may not be adequate, and third parties could infringe, misappropriate or misuse our intellectual property rights. If this were to occur, it could harm our reputation and affect our competitive position. It could also require us to spend significant time and money in litigation. We have licensed in the past (on a royalty free basis), and expect to license in the future, various elements of our distinctive trademarks, service marks, trade dress, content and similar proprietary rights to third parties. We enter into strategic marketing arrangements with certain third party web site operators pursuant to which we license our trademarks, service marks and content to such third parties in order to promote our brands and services and to generate leads to our websites. While we attempt to ensure that the quality of our brands is maintained by these licensees, we cannot assure you that third party licensees of our proprietary rights will always take actions to protect the value of our intellectual property and reputation, which could adversely affect our business and reputation.

We could be subject to infringement claims that may result in costly litigation, the payment of damages or the need to revise the way we conduct business.

We cannot be certain that our technology, offerings, services or content do not or will not infringe upon the intellectual property rights of third parties and from time to time we receive notices alleging potential infringement. In seeking to protect our marks, copyrights, domain names and other intellectual property rights, or in defending ourselves against claims of infringement that may or may not be without merit, we could face costly litigation and the diversion of our management's attention and resources. Claims against us could result in the

Table of Contents

need to develop alternative trademarks, content, technology or other intellectual property or to enter into costly royalty or licensing agreements, which could have a material adverse effect on our business, results of operations, financial condition and liquidity. If we were found to have infringed on a third party's intellectual property rights, among other things, the value of our brands and our business reputation could be impaired, and our business could suffer.

If we are unable to enforce or defend our ownership or use of intellectual property, our business, competitive position and operating results could be harmed.

The success of our business depends in large part on our intellectual property rights, including existing and future trademarks and copyrights, which are and will continue to be valuable and important assets of our business. Our business could be harmed if we are not able to protect the content of our databases and our other intellectual property. We have taken measures to protect our intellectual property, such as requiring our employees and consultants with access to our proprietary information to execute confidentiality agreements. In the future, we may sue competitors or other parties who we believe to be infringing our intellectual property. We may in the future also find it necessary to assert claims regarding our intellectual property. These measures may not be sufficient or effective to protect our intellectual property. We also rely on laws, including those regarding copyrights and trademarks to protect our intellectual property rights. Current laws, or the enforceability of such laws, specifically in foreign jurisdictions, may not adequately protect our intellectual property or our databases and the data contained in them. In addition, legal standards relating to the validity, enforceability and scope of protection of intellectual property rights in Internet related businesses are uncertain and evolving, and we cannot assure you of the future viability or value of any of our proprietary rights. Others may develop technologies similar or superior to our technology. A significant impairment of our intellectual property rights could require us to develop alternative intellectual property, incur licensing or other expenses or limit our product and service offerings.

We are controlled by two groups of principal stockholders whose interest in our business may be different than yours.

Together, the General Atlantic Stockholders and the Quadrangle Stockholders beneficially own approximately 73% of our outstanding common stock as of January 30, 2009. Accordingly, together the General Atlantic Stockholders and the Quadrangle Stockholders (collectively the Principal Stockholders) can exercise significant influence over our business policies and affairs, including the composition of our board of directors, and over any action requiring the approval of our stockholders, including the adoption of amendments to our certificate of incorporation and the approval of mergers or sales of substantially all of our assets. The concentration of ownership of the General Atlantic Stockholders and the Quadrangle Stockholders may also delay, defer or even prevent an acquisition by a third party or other change of control of our company and may make some transactions more difficult or impossible without the support of the General Atlantic Stockholders and the Quadrangle Stockholders, even if such events are in the best interests of minority stockholders. In addition, in connection with our IPO, we entered into the Institutional and Management Shareholders Agreement, or the Institutional Shareholder Agreement, with the Principal Stockholders and certain of our officers and employees, which we refer to as the Management Stockholders. In accordance with the Institutional Shareholder Agreement, each of the Principal Stockholders has the right to designate up to (1) three members of our board of directors if such Principal Stockholder owns 17.5% or more of our common stock, (2) two members of our board of directors if it owns less than 17.5% but at least 10% of our common stock, and (3) one member of our board of directors if it owns less than 10% but at least 5% of our common stock. If a Principal Stockholder owns less than 5% of our common stock, it will no longer be entitled to designate members of our board of directors. Each Principal Stockholder has agreed to vote its shares in favor of the directors designated by the other Principal Stockholder in accordance with the terms of the agreement. Each Principal Stockholder will also have the right to designate one member of our Compensation Committee and one member of our Nominating and Corporate Governance Committee if such Principal Stockholder owns at least 5% of our common stock. Our Institutional Shareholder Agreement and our amended and restated certificate of incorporation provides that the doctrine of corporate opportunity will not apply against our Principal Stockholders in a manner that would

Table of Contents

prohibit them from investing in competing businesses or doing business with our clients and customers. To the extent they invest in such other businesses, they may have differing interests than our other stockholders.

We are exempt from certain corporate governance requirements since we are a controlled company within the meaning of the NYSE rules and, as a result, our stockholders will not have the protections afforded by these corporate governance requirements.

Together, the General Atlantic Stockholders and the Quadrangle Stockholders control more than 50% of the voting power of our common stock. As a result, we are considered a controlled company for the purposes of the NYSE listing requirements and therefore we are permitted to opt out of the NYSE listing requirements that would otherwise require our board of directors to have a majority of independent directors and our Compensation and Nominating and Corporate Governance Committees to be comprised entirely of independent directors. For instance, our Chief Executive Officer is a member of our Nominating and Corporate Governance Committee. Additionally, the Institutional Shareholder Agreement requires us to take advantage of the controlled company exemption to the extent it remains available. Accordingly, our stockholders do not have the same protection afforded to stockholders of companies that are subject to all of the NYSE governance requirements and the ability of our independent directors to influence our business policies and affairs may be reduced.

We have incurred and will continue to incur increased costs as a result of being a public company.

As a public company, we have incurred and will continue to incur significant levels of legal, accounting and other expenses. The Sarbanes Oxley Act of 2002 (Sarbanes Oxley) and related rules of the Securities and Exchange Commission, the Commission, and the NYSE regulate corporate governance practices of public companies and impose significant requirements relating to disclosure controls and procedures and internal control over financial reporting. Compliance with these public company requirements has increased our costs, required additional resources and made some activities more time consuming. We are required to expend considerable time and resources complying with public company regulations.

If we do not meet the continued listing requirements of the NYSE our common stock may be delisted.

Our common stock is listed on the NYSE. The NYSE requires us to continue to meet certain listing standards, including standards related to the trading price of our common stock (e.g., maintaining an average share price of at least \$1.00), as well as our global market capitalization (e.g., maintaining an average global market capitalization of at least \$75 million). As of February 5, 2009, the closing price of our common stock on the NYSE was \$2.95 and our market capitalization was approximately \$183.5 million. While we are currently in compliance with the NYSE continued listing requirements, we cannot assure you that we will remain in compliance in light of the current economic crisis which has been driving down the price of stocks. If we do not meet the NYSE s continued listing standards, we will be notified by the NYSE and we will be required to take corrective action to meet the continued listing standards; otherwise our common stock will be delisted from the NYSE. A delisting of our common stock on the NYSE would reduce the liquidity and market price of our common stock and the number of investors willing to hold or acquire our common stock, which could negatively impact our ability to access the public capital markets. A delisting would also reduce the value of our equity compensation plans, which could negatively impact our ability to retain key employees.

Failure to establish and maintain effective internal control over financial reporting could have a material adverse effect on our business, operating results and stock price.

Maintaining effective internal control over financial reporting is necessary for us to produce reliable financial reports and is important in helping to prevent financial fraud. If we are unable to maintain adequate internal controls, our business and operating results could be harmed. We are required to satisfy the requirements of Section 404 of Sarbanes Oxley and the related rules of the Commission, which require, among other things, our management to assess annually the effectiveness of our internal control over financial reporting and our independent registered public accounting firm to issue a report on that assessment. We may be unable to remedy before the requisite deadline for those reports. Any failure to remediate deficiencies noted by our independent

Table of Contents

registered public accounting firm or to implement required new or improved controls or difficulties encountered in their implementation could cause us to fail to meet our reporting obligations or result in material misstatements in our financial statements. If our management or our independent registered public accounting firm were to conclude in their reports that our internal control over financial reporting was not effective, investors could lose confidence in our reported financial information, and the trading price of our stock could drop significantly.

We are dependent on the continued service of key executives and technical personnel whose expertise would be difficult to replace and, if we fail to retain key executives and personnel, there could be a material adverse effect on our business.

Our performance is substantially dependent on the performance of senior management and key technical personnel. We have employment agreements, which include non-compete provisions, with all members of senior management and certain key technical personnel. However, we cannot assure you that any of these senior managers or others will remain with us or that they will not compete with us in the event they cease to be employees, which could have a material adverse effect on our business, results of operations, financial condition and liquidity. In addition, we have not purchased key person life insurance on any members of our senior management. Our future success also depends upon our continuing ability to identify, attract, hire and retain highly qualified personnel, including skilled technical, management, product and technology, and sales and marketing personnel, all of whom are in high demand and are often subject to competing offers. There has in the past been, and there may in the future be, a shortage of qualified personnel in the career services market. We also compete for qualified personnel with other companies. A loss of a substantial number of qualified employees, or an inability to attract, retain and motivate additional highly skilled employees required for expansion of our business, could have a material adverse effect on our business.

Our business is subject to U.S. and foreign government regulation of the Internet and taxation, which may have a material adverse effect on our business.

Congress and various state and local governments, as well as the European Union, have passed legislation that regulates various aspects of the Internet, including content, copyright infringement, user privacy, taxation, access charges, liability for third-party activities and jurisdiction. In addition, federal, state, local and foreign governmental organizations are also considering legislative and regulatory proposals that would regulate the Internet. Areas of potential regulation include libel, pricing, quality of products and services and intellectual property ownership. A number of proposals have been made at the state and local level that would impose taxes on the sale of goods and services through the Internet. Such proposals, if adopted, could substantially impair the growth of commerce over the Internet and could adversely affect our business, future results of operations, financial condition and liquidity. A law imposing a three-year moratorium on new taxes on Internet based transactions was enacted by Congress in October 1998. The moratorium was extended by Congress three different times with the expiration now being in 2014. This moratorium relates to new taxes on Internet access fees and state taxes on commerce that discriminate against out-of-state websites. Sales or use taxes imposed upon the sale of products or services over the Internet are not affected by this moratorium. We may be subject to restrictions on our ability to communicate with our customers through email and phone calls. Several jurisdictions have proposed or adopted privacy related laws that restrict or prohibit unsolicited email or spam. These laws may impose significant monetary penalties for violations. For example, the CAN-SPAM Act of 2003, or CAN-SPAM, imposes complex and often burdensome requirements in connection with sending commercial email. Key provisions of CAN-SPAM have yet to be interpreted by the courts. Depending on how it is interpreted, CAN-SPAM may impose burdens on our email marketing practices or services we offer or may offer. Although CAN-SPAM is thought to have preempted state laws governing unsolicited email, the effectiveness of that preemption is likely to be tested in court challenges. If any of those challenges are successful, our business may be subject to state laws and regulations that may further restrict our email marketing practices and the services we may offer. The scope of those regulations is unpredictable. Because a number of these laws are relatively new and still in the process of being implemented, we do not know how courts will interpret these laws. Therefore, we are uncertain as to how new laws or the application of existing laws will

Table of Contents

affect our business. Increased regulation of the Internet may therefore reduce the use of the Internet, which could decrease demand for our services, increase our cost of doing business or otherwise have a material adverse effect on our business, results of operations, financial condition and liquidity.

We face risks relating to our foreign operations.

As a result of the eFinancialGroup Acquisition, we operate in 18 markets around the world. For the year ended December 31, 2008, approximately 24% of our total revenues were generated outside of the United States. Such amounts are collected in local currency. As a result of operating outside the United States, we are at risk for exchange rate fluctuations between such local currencies and the United States dollar, which could affect our results of operations. To date, we have not engaged in exchange rate hedging activities and our Amended and Restated Credit Facility contains a restrictive covenant which limits our ability to hedge currency risk. Even were we to implement hedging strategies to mitigate this risk, these strategies might not eliminate our exposure to foreign exchange rate fluctuations and would involve costs and risks of their own, such as ongoing management time and expertise, external costs to implement the strategies and potential accounting implications. We are also subject to taxation in foreign jurisdictions. In addition, transactions between our foreign subsidiaries and us may be subject to United States and foreign withholding taxes. Applicable tax rates in foreign jurisdictions differ from those of the United States, and change periodically. The extent, if any, to which we will receive credit in the United States for taxes we pay in foreign jurisdictions will depend upon the application of limitations set forth in the U.S. Internal Revenue Code of 1986, as amended, or the Code, as well as the provisions of any tax treaties that may exist between the United States and such foreign jurisdictions. Our current or future international operations might not succeed for a number of reasons including:

difficulties in staffing and managing foreign operations;

competition from local recruiting services or employment advertising agencies;

operational issues such as longer customer payment cycles and greater difficulties in collecting accounts receivable;

language and cultural differences;

taxation issues;

foreign exchange controls that might prevent us from repatriating income earned in countries outside the United States;

multiple and conflicting laws and regulations, including complications due to unexpected changes in these laws and regulations;

the burdens of complying with a wide variety of foreign laws and regulations;

difficulties in enforcing intellectual property rights in countries other than the United States; and

general political and economic trends.

Our future growth depends on our ability to expand operations in international markets. We may have limited experience or we may need to rely on business partners in these markets, and our future growth will be materially adversely affected if we are unsuccessful in our international expansion efforts.

Edgar Filing: DICE HOLDINGS, INC. - Form 10-K

We operate local websites in numerous markets around the world. Our future growth will depend significantly on our ability to expand our brands and product offerings in additional international markets. As we expand into new international markets, we will have only limited experience in marketing and operating our products and services in such markets. In other instances, we may have to rely on the efforts and abilities of foreign business partners in such markets. Certain international markets may be slower than domestic markets in adopting the online career and commerce medium and, as a result, our operations in international markets may not develop at a rate that supports our level of investment.

Table of Contents

A write-off of all or a part of our goodwill would hurt our operating results and reduce our net worth.

We have significant intangible assets related to goodwill, which represents the excess of the total purchase price of our acquisitions over the estimated fair value of the net assets acquired. As of December 31, 2008, we had \$137 million of goodwill on our balance sheet, which represented approximately 49% of our total assets. We are not permitted to amortize goodwill under U.S. accounting standards and instead are required to review goodwill at least annually for impairment. During 2008, goodwill of \$7.2 million related to eFinancialCareers U.S. operations was written off. In the event impairment is identified again in the future, a charge to earnings would be recorded. Although it does not affect our cash flow, a write-off in future periods of all or a part of our goodwill would hurt our operating results and net worth. See Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies Goodwill.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

We do not own any properties. Our corporate headquarters are located at 3 Park Avenue, New York, New York. We currently lease approximately 5,000 square feet at our corporate headquarters, under a sublease expiring in September 2009. We lease approximately 39,000 square feet of office space in two facilities in Urbandale, Iowa under two separate lease arrangements. We lease approximately 10,000 square feet of space to house our eFinancialCareers operation in London, England. We also have small sales offices in Cincinnati, Ohio; Singapore; and Sydney, Australia.

We believe that our facilities are generally adequate for current and anticipated future use, although we may from time to time lease additional facilities as operations require.

Item 3. Legal Proceedings

From time to time we may be involved in disputes or litigation relating to claims arising out of our operations. We are currently not a party to any material legal proceedings.

Item 4. Submission of Matters to a Vote of Security Holders

None.

Table of Contents**PART II.****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities**
Market Information

Our common stock is listed on the NYSE and commenced trading on July 18, 2007 under the ticker symbol "DHX". We have not listed our stock on any other markets or exchanges. Prior to July 18, 2007, there was no public market for our common stock. The high and low quarterly closing sales prices for the common stock for 2008 and 2007 were as follows:

	2008				2007	
	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Third Quarter	Fourth Quarter
Low	\$ 5.97	\$ 6.29	\$ 5.96	\$ 2.62	\$ 7.81	\$ 7.95
High	\$ 9.37	\$ 9.04	\$ 9.24	\$ 6.68	\$ 13.90	\$ 13.09

 Holders

As of January 30, 2009, there were 55 stockholders of record of our common stock and the last reported sale price of our stock as reported by the NYSE was \$2.86. A significant number of the outstanding shares of common stock which are beneficially owned by individuals and entities are registered in the name of Cede & Co. Cede & Co. is a nominee of The Depository Trust Company, a securities depository for banks and brokerage firms.

Dividend Policy

While we did declare and pay dividends prior to our IPO, we have not declared or paid any cash dividends on our stock as a public company. We currently anticipate that all future earnings will be retained by the Company to support our long-term growth strategy. Accordingly, we do not anticipate paying periodic cash dividends on our stock for the foreseeable future.

Furthermore, we are restricted by our Amended and Restated Credit Agreement from paying cash dividends.

The payment of any future dividends will be at the discretion of our Board of Directors and will depend upon, among other things, future earnings, operations, capital requirements, our general financial condition, contractual restrictions and general business conditions.

Repurchases of Equity Securities

We did not repurchase any equity securities during the fourth quarter of the fiscal year covered by this Annual Report on Form 10-K.

Use of Proceeds

We completed an IPO of our common stock under a Registration Statement on Form S-1, as amended (File No. 333-141876), which became effective on July 17, 2007. The aggregate offering price of the common stock sold by us resulted in net proceeds of approximately \$81.0 million to us. We have used those proceeds to repay outstanding indebtedness under our Amended and Restated Credit Facility.

Table of Contents**Securities Authorized for Issuance under Equity Compensation Plans**

The following table sets forth information required by this item as of December 31, 2008 regarding compensation plans under which the Company's equity securities are authorized for issuance:

	(a)	(b)	(c)
	Number of Securities to be Issued upon Exercise of Outstanding Options	Weighted-Average Exercise Price of Outstanding Options (\$)	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column (a))
Plan Category			
Equity compensation plans approved by security holders	9,653,074	\$ 2.77	2,059,424
Equity compensation plans not approved by security holders	n/a	n/a	n/a
Total	9,653,074	\$ 2.77	2,059,424

Table of Contents

Performance Graph

The following graph shows the total shareholder return of an investment of \$100 in cash on July 18, 2007 (the date on which our common stock was first traded on the NYSE) through December 31, 2008 (the last trading day of our common stock on the NYSE in 2008) for (i) our common stock, (ii) the Russell 2000 and (iii) the Dow Jones Internet Composite Index, at the closing price on July 17, 2007. All values assume reinvestment of the full amount of all dividends, if any.

Comparative Returns

The returns shown on the graph do not necessarily predict future performance.

Table of Contents**Item 6. Selected Financial Data**

The information set forth below should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations and our consolidated financial statements and related notes included elsewhere in this annual report.

The following consolidated statements of operations data for the years ended December 31, 2008, 2007 and 2006 and the consolidated balance sheet data as of December 31, 2008 and 2007 have been derived from the audited consolidated financial statements and related notes of Dice Holdings, Inc. (Successor), which are included elsewhere in this Annual Report. The consolidated statements of operations data for the four months ended December 31, 2005 and the consolidated balance sheet data as of December 31, 2005 have been derived from the audited consolidated financial statements and related notes of Dice Holdings, Inc. (Successor), which are not included in this Annual Report. The consolidated statements of operations data for the year ended December 31, 2004, and the eight months ended August 31, 2005, and the consolidated balance sheet data as of August 31, 2005 and December 31, 2004 have been derived from the audited consolidated financial statements and related notes of Dice Inc. (Predecessor), that do not appear in this Annual Report.

- (1) Reflects the acquisition of ClearanceJobs in September 2004.
- (2) Reflects the acquisition of Targeted Job Fairs in January 2005.
- (3) Reflects the eFinancialGroup Acquisition on October 31, 2006.
- (4) Basic and diluted net income (loss) per share is computed by dividing the net income (loss) applicable to common stockholders by the weighted-average number of shares outstanding for the period. The impact of preferred stock outstanding and common stock options outstanding at December 31, 2007 and 2006, were anti-dilutive and therefore were excluded from the calculation of diluted earnings per share for those periods.
- (5) Deferred revenue is a key metric of our business as it indicates a level of sales already made that will be recognized as revenue in the future. Deferred revenue reflects our increased ability to sign customers to long-term contracts. We recorded deferred revenue of \$16.1 million on our consolidated balance sheet, as of August 31, 2005, prior to purchase accounting adjustments related to the 2005 Acquisition. As required by generally accepted accounting principles in the United States, or U.S. GAAP, in determining the fair value of the liabilities assumed under purchase accounting, the acquired deferred revenue is to be recorded at fair value to the extent it represents an assumed legal obligation. We estimated our obligation related to deferred revenue as a result of the 2005 Acquisition using the cost build-up approach which determines fair value by estimating the costs related to fulfilling the obligation plus a normal profit margin. The estimated costs to fulfill our deferred revenue obligation in connection with the 2005 Acquisition were based on our expected future costs to fulfill our obligation to our customers. As a result, we recorded an adjustment to reduce the carrying value of deferred revenue by \$6.0 million, to \$10.1 million. The reduction negatively impacted revenues by \$3.6 million and \$2.1 million for the periods ended December 31, 2005 and 2006, respectively. Similarly, we recorded deferred revenue for eFinancialGroup at the date of the acquisition of \$3.6 million, prior to purchase accounting adjustments. We estimated our obligation related to deferred revenue based on future costs to fulfill our obligation to our customers. As a result, we recorded an adjustment to reduce the carrying value of deferred revenue for eFinancialGroup by \$2.4 million, to \$1.2 million. The reduction negatively impacted revenues by \$1.5 million and \$918,000 during the year ended December 31, 2007 and 2006, respectively.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with our condensed consolidated financial statements and the related notes included elsewhere in this report. See also Note Concerning Forward-Looking Statement.

Information contained herein contains forward-looking statements. You should not place undue reliance on those statements because they are subject to numerous uncertainties and factors relating to our operations and business environment, all of which are difficult to predict and many of which are beyond our control. Forward-looking statements include information concerning our possible or assumed future results of operations, including descriptions of our business strategy. These statements often include words such as may, will, should, believe, expect, anticipate, intend, plan, estimate or similar expressions. These statements are based on assumptions that we have made in light of our experience in the industry as well as our perceptions of historical trends, current conditions, expected future developments and other factors we believe are appropriate under the circumstances. Although we believe that these forward-looking statements are based on reasonable assumptions, you should be aware that many factors could affect our actual financial results or results of operations and could cause actual results to differ materially from those in the forward-looking statements. These factors include, but are not limited to, competition from existing and future competitors, failure to maintain and develop our reputation and brand recognition, failure to increase or maintain the number of customers who purchase recruitment packages, cyclicalities or downturns in the economy or industries we serve, and the failure to attract qualified professionals or grow the number of qualified professionals who use our websites. These factors and others are discussed in this Annual Report on Form 10-K under the headings Risk Factors, Forward-Looking Statements and Management's Discussion and Analysis of Financial Condition and Results of Operations and our quarterly reports on Form 10-Q all of which are available on the Investor Relations page of our website at www.diceholdingsinc.com.

You should keep in mind that any forward-looking statement made by us herein, or elsewhere, speaks only as of the date on which we make it. New risks and uncertainties come up from time to time, and it is impossible for us to predict these events or how they may affect us. We have no obligation to update any forward-looking statements after the date hereof, except as required by federal securities laws.

Overview

We are a leading provider of specialized career websites for select professional communities. We target employment categories in which there is a long-term scarcity of highly skilled, highly qualified professionals relative to market demand. Our career websites serve as online marketplaces where employers and recruiters find and recruit prospective employees, and where professionals find relevant job opportunities and information to further their careers. Each of our career websites offers job postings, content, career development and recruiting services tailored to the specific needs of the professional community that it serves. Our largest websites by revenue are Dice.com, the leading career website in the United States for technology professionals, and eFinancialCareers.com, the leading global career website for financial services professionals.

Our Company

Through our predecessors, we have been in the technology recruiting and career development business for 18 years. In 1999, the Dice.com service was acquired by Earthweb Inc., an Internet technology content provider, which at the time of the acquisition was a publicly held company with its common stock traded on the NASDAQ National Market. During 2000, Earthweb Inc. (which subsequently changed its name to Dice Inc.) made a strategic decision to focus on technology recruiting and career development and exited the technology content-based business.

From its inception through 2003, Dice Inc. sustained net operating losses and negative cash flows and during that period was primarily dependent upon its ability to raise debt and equity financing through public or

Table of Contents

private offerings in order to fund its operations. In addition, beginning in 2001, Dice Inc.'s liquidity issues worsened as a result of a decline in the demand for its products and services stemming from the downturn in the general labor market and more specifically in the technology labor market and due to the significant amount of indebtedness Dice Inc. had incurred. As a result, in 2002 Dice Inc. began pursuing discussions with the largest holder of its then outstanding debt securities regarding a pre-packaged Chapter 11 plan of reorganization under the United States Bankruptcy Code.

On February 14, 2003, Dice Inc. filed a voluntary petition under Chapter 11 of the United States Bankruptcy Code with respect to its pre-packaged plan of reorganization. The Joint Plan of Reorganization was confirmed by the Bankruptcy Court on June 24, 2003, and became effective on June 30, 2003. In accordance with the Joint Plan of Reorganization, Dice Inc.'s pre-bankruptcy debt securities were eliminated in exchange for 95% of the common stock of the reorganized Dice Inc., with the remaining 5% of this common stock issued to the 130 largest holders of Dice Inc.'s pre-bankruptcy capital stock. The Dice Inc. stockholders who were not among the 130 largest holders received a pro rata allocation of \$50,000. Under the Joint Plan of Reorganization all of Dice Inc.'s pre-bankruptcy capital stock, options and debt securities were cancelled upon its emergence from bankruptcy and Dice Inc. emerged from bankruptcy as a privately-held company.

In September 2004, Dice Inc. acquired substantially all of the assets of ClearanceJobs.com, the leading recruiting and career development website for professionals with active U.S. Government security clearances, and in January 2005, acquired substantially all of the assets of Targeted Job Fairs, a leading producer and host of career fairs and open houses focused primarily on technology and security-cleared candidates in the United States.

Dice Holdings, Inc. was incorporated on June 28, 2005 by investment funds organized by the General Atlantic Stockholders and the Quadrangle Stockholders. On August 31, 2005, Dice Holdings, Inc. purchased all of the outstanding common stock of Dice Inc. from its stockholders, and Dice Inc. became its wholly-owned subsidiary. Dice Holdings, Inc. is a holding company and its assets consist substantially of the capital stock of its three operating subsidiaries, Dice Inc., eFinancialGroup Limited and JobsintheMoney.com, Inc.

On October 31, 2006, Dice Holdings, Inc. acquired all of the outstanding capital stock of eFinancialGroup. eFinancialGroup operated the career websites eFinancialCareers.com, which targets financial services professionals and employers worldwide, and JobsintheMoney.com, which targets the finance and accounting job market in the United States, and a financial publishing business, eFinancialNews. As consideration for the acquisition, Dice Holdings, Inc. paid the stockholders of eFinancialGroup £56.5 million (or approximately \$106.3 million at the exchange rate in effect on October 31, 2006) in cash and issued 3,628,992 shares of its Series A convertible preferred stock valued at \$25.2 million. Immediately after the acquisition, Dice Holdings, Inc. sold eFinancialNews back to certain of eFinancialGroup's former stockholders for approximately \$41.6 million in cash. Operating results of eFinancialGroup and JobsintheMoney occurring subsequent to the eFinancialGroup Acquisition are included in the consolidated operating results of Dice Holdings, Inc. Total consideration for eFinancialGroup, excluding eFinancialNews, was \$89.9 million (which amount includes the value of 3,628,992 shares of the Series A convertible preferred stock of Dice Holdings, Inc. issued as partial consideration for the eFinancialGroup Acquisition).

We have provided certification test preparation and assessment products for technology professionals through our subsidiary, MeasureUp. In February 2007, we decided to abandon the MeasureUp business after assessing the long-term economic viability of MeasureUp in light of its projected operating losses and the lack of an operational or strategic fit with our core business, and after unsuccessfully attempting to sell the business. We ceased all significant business activities of MeasureUp on March 30, 2007. Our historical financial statements present MeasureUp as a discontinued operation. Revenue for MeasureUp for the years ended December 31, 2007 and 2006 totaled \$835,000 and \$3.5 million, respectively.

CyberMediaDice Careers Limited was a joint venture between Dice India and CyberMedia (India) Limited (CyberMedia), and the largest targeted vertical career website for technology professionals in India. During the

Table of Contents

fourth quarter 2007, we decided to exit the joint venture. We completed the sale on January 28, 2008, following the completion of all legal documents and conditions of the sale. Our historical financial statements present CMD as a discontinued operation. Revenue for Dice India for the years ended December 31, 2008, 2007, and 2006 were \$37,000, \$501,000, and \$260,000, respectively. Dice India experienced operating losses of \$92,000, \$1.3 million, and \$1.3 million, respectively over the same periods.

We have identified two reportable segments under Statement of Financial Accounting Standards, or SFAS, No. 131, *Disclosures about Segments of an Enterprise and Related Information*, based on our operating structure. Our reportable segments include DCS Online (which includes Dice.com and ClearanceJobs.com) and eFinancialCareers' international business. Targeted Job Fairs, JobsintheMoney.com, and eFinancialCareers' North American operations do not meet certain quantitative thresholds, and therefore are reported in the aggregate in the Other segment.

Our Revenues and Expenses

We derive the majority of our revenues from customers who pay fees, either annually, quarterly or monthly, to post jobs on our websites and to access our searchable databases of resumes. Our fees vary by customer based on the number of individual users of our databases of resumes, the number and type of job postings purchased and the terms of the package purchased. In the United States, we sell recruitment packages that include both access to our databases of resumes and job posting capabilities. Internationally, our job postings and access to our resume databases are often sold separately and not as a single package. We believe the key metrics that are material to an analysis of our U.S. businesses are our total number of recruitment package customers and the revenue, on average, that these customers generate. Similar metrics are important to our international businesses. At December 31, 2008, Dice.com had approximately 7,600 total recruitment package customers and our other websites collectively served approximately 2,300 customers, including some customers who are also customers of Dice.com, as of the same date. Our revenues from continuing operations have grown significantly from \$32.2 million in 2004 to \$155.0 million in 2008; a greater than 48% CAGR.

The key factors influencing our revenue growth over this period are:

increased adoption of our services by direct employers, staffing companies and recruiting firms that seek to recruit, place, or hire professionals in the communities we serve, which contributed to an increase in revenues of approximately \$78 million; and

the eFinancialGroup Acquisition, which contributed to an increase in revenues of \$44.4 million.

Our ability to continue to grow our revenues will largely depend on our ability to grow our customer bases in the markets in which we operate by acquiring new recruitment package customers while retaining a high proportion of the customers we currently serve, and to expand the breadth of services our customers purchase from us. We continue to make investments in our business and infrastructure to help us achieve our long-term growth objectives.

Our revenues are generated primarily from servicing customers seeking to hire qualified professionals in the technology and finance sectors. Accordingly, significant increases or decreases in the unemployment rate, labor shortages or a decrease in available jobs, specifically in the technology, finance and other vertical industries we serve, can have a material affect on our revenues and results of operations. The recent significant increase in the unemployment rate and shortage of available jobs has caused a decrease in the number of job posting openings on our websites, which in turn negatively impacts our revenues and income. During the fourth quarter of 2008, total revenues declined 10% as compared to the fourth quarter of 2007. The decline in revenues is a result of reduced recruitment activity which impacted customer usage of our primary services. We saw a decline in the number of customers served at Dice.com from approximately 8,800 customers to approximately 7,600 customers during the fourth quarter of 2008. If the slowdown in recruitment activity continues, as projected, our future revenues and results of operations will be negatively impacted.

Table of Contents

Alternatively, a decrease in the unemployment rate or a labor shortage generally means that employers (including our customers) are seeking to hire more individuals, which would generally lead to more job postings and have a positive impact on our revenues and results of operations.

Other material factors that may affect our results of operations include our ability to attract qualified professionals to our websites and our ability to attract customers with relevant job opportunities. The more qualified professionals that use our websites, the more attractive our websites become to employers, which in turn makes them more likely to become our customers, resulting in positive impacts on our results of operations. If we are unable to continue to attract qualified professionals to our websites, our customers may no longer find our services attractive, which could have a negative impact on our results of operations. Additionally, in order to attract qualified professionals to our websites we need to ensure that our websites remain relevant.

The largest components of our expenses are personnel costs and marketing and sales expenditures. Personnel costs consist of salaries, benefits, and incentive compensation for our employees, including commissions for salespeople. Personnel costs are categorized in our statements of operations based on each employee's principal function. Marketing and sales expenditures primarily consist of online advertising and direct mailing programs.

Critical Accounting Policies

This discussion of our financial condition and results of operations is based upon our consolidated financial statements, which have been prepared in accordance with U.S. GAAP. The preparation of these financial statements requires us to make estimates, judgments and assumptions that affect the reported amount of assets, liabilities, revenues and expenses and related disclosure of contingent assets and liabilities. On an ongoing basis, we evaluate our estimates, including those related to revenue, goodwill and intangible assets, stock-based compensation and income taxes. We based our estimates of the carrying value of certain assets and liabilities on historical experience and on various other assumptions that we believe are reasonable. In many cases, we could reasonably have used different accounting policies and estimates. In some cases, changes in the accounting estimates are reasonably likely to occur from period to period. Our actual results may differ from these estimates under different assumptions or conditions. We believe the following critical accounting policies affect our more significant judgments used in the preparation of our consolidated financial statements.

Revenue Recognition

We recognize revenues, under the provisions of the Securities and Exchange Commission's Staff Accounting Bulletin, or SAB, No. 104, *Revenue Recognition*, when persuasive evidence of an agreement exists, delivery has occurred, the sales price is fixed or determinable and collectibility is reasonably assured. Payments received in advance of services being rendered are recorded as deferred revenue and recognized generally on a straight-line basis over the service period. We generate a majority of our revenue from the sale of recruitment packages.

Recruitment package revenues are derived from the sale to recruiters and employers of a combination of job postings and access to a searchable database of candidates on Dice.com, Clearancejobs.com, efinancialcareers.com, and Jobsinthemoney.com. Certain of our arrangements include multiple deliverables, which consist of access to job postings and access to a searchable database of resumes. In the absence of higher-level specific authoritative guidance, we determine the units of accounting for multiple element arrangements in accordance with Emerging Issues Task Force (EITF) Issue No. 00-21, *Revenue Arrangements with Multiple Deliverables*. Specifically, we consider a delivered item as a separate unit of accounting if it has value to the customer on a standalone basis, if there is objective and reliable evidence of the fair value of the undelivered elements, and, if the arrangement includes a general right of return relative to the delivered element, delivery or performance of the undelivered element is considered probable and is substantially within our control. Services to customers buying a package of available job postings and access to the database are delivered over the same

Table of Contents

period and revenue is recognized ratably over the length of the underlying contract, typically from one to twelve months. Revenue from the sale of classified job postings is recognized ratably over the length of the contract or the period of actual usage, if shorter.

Deferred revenue is a key metric of our business as it indicates a level of sales already made that will be recognized as revenue in the future. Deferred revenue reflects the impact of our ability to sign customers to long-term contracts. We recorded deferred revenue of \$16.1 million on our consolidated balance sheet, as of August 31, 2005, prior to purchase accounting adjustments related to the 2005 Acquisition. As required by U.S. GAAP, in determining the fair value of the liabilities assumed under purchase accounting, the acquired deferred revenue is to be recorded at fair value to the extent it represents an assumed legal obligation. We estimated our obligation related to deferred revenue as a result of the 2005 Acquisition using the cost build-up approach which determines fair value by estimating the costs related to fulfilling the obligation plus a normal profit margin. The estimated costs to fulfill our deferred revenue obligation in connection with the 2005 Acquisition were based on our expected future costs to fulfill our obligation to our customers. As a result, we recorded an adjustment to reduce the carrying value of deferred revenue by \$6.0 million, to \$10.1 million. The reduction negatively impacted revenues \$2.1 million for the period ended December 31, 2006. Similarly, we recorded deferred revenue for eFinancialGroup at the date of the acquisition of \$3.6 million, prior to purchase accounting adjustments. We estimated our obligation related to deferred revenue based on future costs to fulfill our obligation to our customers. As a result, we recorded an adjustment to reduce the carrying value of deferred revenue for eFinancialGroup by \$2.4 million, to \$1.2 million. The reduction negatively impacted revenues by \$1.5 million and \$918,000 during the years ended December 31, 2007 and 2006, respectively.

Fair Value of Acquired Businesses

We completed the acquisition of Dice Inc. in 2005 and eFinancialGroup in 2006. Statement of Financial Accounting Standards No. 141, *Business Combinations* (SFAS No. 141) requires acquired businesses to be recorded at fair value by the acquiring entity. SFAS No. 141 also requires that intangible assets that meet the legal or separable criterion be separately recognized on the financial statements at their fair value, and provides guidance on the types of intangible assets subject to recognition. A significant component of the value of these acquired businesses has been allocated to intangible assets.

The significant assets acquired and liabilities assumed from our acquisitions consist of intangible assets, goodwill and deferred revenue. Fair values of the technology and trademarks were determined using a profit allocation methodology which estimates the value of the trademark and brand name by capitalizing the profits saved because the company owns the asset. Fair values of the customer lists were estimated using the discounted cash flow method based on projections of the amounts and timing of future revenues and cash flows, discount rates and other assumptions as deemed appropriate. Fair values of the candidate database were determined based on the estimated cost to acquire a seeker applied to the number of active seekers as of the acquisition date. The acquired deferred revenue is recorded at fair value as it represents an assumed legal obligation. We estimated our obligation related to deferred revenue using the cost build-up approach which determines fair value by estimating the costs related to fulfilling the obligation plus a reasonable profit margin. The estimated costs to fulfill our deferred revenue obligation were based on our expected future costs to fulfill our obligation to our customers. Goodwill is the amount of purchase price paid for an acquisition that exceeds the estimated fair value of the net identified tangible and intangible assets acquired.

The remaining useful life of the technology was determined through review of the technology roadmaps, the pattern of projected economic benefit of each existing technology asset, and the time period over which the majority of the undiscounted cash flows are projected to be achieved. The remaining useful life of the trademarks and brand names was determined based on the estimated time period over which each asset is projected to be used, the pattern of projected economic benefit, and the time period over which the majority of the undiscounted cash flows are projected to be achieved. The remaining useful life of the customer list was determined based on the projected customer attrition rates, the pattern of projected economic benefit of each list and the time period over which the majority of the undiscounted cash flows are projected to be achieved.

Table of Contents

Determining the fair value for these specifically identified intangible assets involves significant professional judgment, estimates and projections related to the valuation to be applied to intangible assets such as customer lists, technology and trade names. The subjective nature of management's assumptions increases the risk associated with estimates surrounding the projected performance of the acquired entity. Additionally, as we amortize the finite-lived intangible assets over time, the purchase accounting allocation directly impacts the amortization expense we record on our financial statements.

Goodwill

As a result of our various acquisitions, we have recorded goodwill. We record goodwill when the purchase price paid for an acquisition exceeds the estimated fair value of the net identified tangible and intangible assets acquired.

We determine whether the carrying value of recorded goodwill is impaired on an annual basis or more frequently if indicators of potential impairment exist. The first step of the impairment review process compares the fair value of the reporting unit in which the goodwill resides to the carrying value of that reporting unit. The second step measures the amount of impairment loss, if any, by comparing the implied fair value of the reporting unit goodwill with its carrying amount. Our annual impairment test for the goodwill from the 2005 Acquisition is performed as of August 31 by comparing the goodwill recorded from the 2005 Acquisition to the fair value of the DCS Online and Targeted Job Fairs reporting units. The annual impairment test was performed as of August 31, 2008 resulting in no impairment. The goodwill at the other reporting units, eFinancialCareers' international business and eFinancialCareers' U.S. business, was the result of the eFinancialGroup Acquisition which occurred in October 2006. The annual test of impairment of goodwill from the eFinancialGroup Acquisition is performed as of October 31 by comparing the goodwill recorded from the eFinancialGroup Acquisition to the fair value of the eFinancialCareers' international and eFinancialCareers' U.S. reporting units.

The determination of whether or not goodwill has become impaired involves a significant level of judgment in the assumptions underlying the approach used to determine the value of our reporting units. Fair values are determined either by using a discounted cash flow methodology or by using a combination of a discounted cash flow methodology and a market comparable method. The discounted cash flow methodology is based on projections of the amounts and timing of future revenues and cash flows, assumed discount rates and other assumptions as deemed appropriate. We consider factors such as historical performance, anticipated market conditions, operating expense trends and capital expenditure requirements. Additionally, the discounted cash flows analysis takes into consideration cash expenditures for product development, other technological updates and advancements to our websites and investments to improve our candidate databases. The market comparable method indicates the fair value of a business by comparing it to publicly traded companies in similar lines of business or to comparable transactions or assets. Considerations for factors such as size, growth, profitability, risk and return on investment are analyzed and compared to the comparable businesses and adjustments are made. A market value of invested capital of the publicly traded companies is calculated and then applied to the entity's operating results to arrive at an estimate of value. Changes in our strategy and/or market conditions could significantly impact these judgments and require adjustments to recorded amounts of goodwill.

During the fourth quarter of 2008, we determined the goodwill at eFinancialCareers' U.S. reporting unit was impaired. The fair value of this reporting unit was determined by a discounted cash flow methodology. Cash flow projections for this reporting unit decreased significantly during the fourth quarter of 2008 due to the decline in recruitment activity in financial services. A non-cash charge of \$7.2 million was recorded during the year ended December 31, 2008 for the impairment of goodwill at eFinancialCareers' U.S. reporting unit. The charge is reflected as impairment of goodwill and intangible assets on the Consolidated Statements of Operations.

Indefinite-Lived Acquired Intangible Assets

The indefinite-lived acquired intangible assets include the Dice trademarks and brand name. The Dice.com trademark, trade name and domain name is one of the most recognized names of online job boards. Since Dice's

Table of Contents

inception in 1991, the brand has been recognized as a leader in recruiting and career development services for technology and engineering professionals. Currently, the brand is synonymous with the most specialized online marketplace for industry-specific talent. The brand has a significant online and offline presence in online recruiting and career development services. Considering the recognition and the awareness of the Dice brand in the talent acquisition and staffing services market, Dice's long operating history and the intended use of the Dice brand, the remaining useful life of the Dice.com trademark, trade name and domain name was determined to be indefinite.

We determine whether the carrying value of recorded indefinite-lived acquired intangible assets is impaired on an annual basis or more frequently if indicators of potential impairment exist. The impairment review process compares the fair value of the indefinite-lived acquired intangible assets to its carrying value. If the carrying value exceeds the fair value, an impairment loss is recorded. The impairment test is performed annually as of August 31. No impairment was indicated during 2008.

The determination of whether or not indefinite-lived acquired intangible assets have become impaired involves a significant level of judgment in the assumptions underlying the approach used to determine the value of the indefinite-lived acquired intangible assets. Fair values are determined using a profit allocation methodology which estimates the value of the trademark and brand name by capitalizing the profits saved because the company owns the asset. We consider factors such as historical performance, anticipated market conditions, operating expense trends and capital expenditure requirements. Changes in our strategy and/or market conditions could significantly impact these judgments and require adjustments to recorded amounts of intangible assets.

Income Taxes

We utilize the liability method of accounting for income taxes as set forth in Financial Accounting Standards Board (the FASB) SFAS No. 109, *Accounting for Income Taxes*. Under this method, deferred income taxes are recognized for differences between the financial statement and tax bases of assets and liabilities at enacted statutory tax rates in effect for the years in which the differences are expected to reverse. The effect on deferred taxes of a change in tax rates is recognized in income in the period that includes the enactment date. In addition, valuation allowances are established when necessary to reduce deferred tax assets to the amounts expected to be realized. We have concluded that based on expected future results and the future reversals of existing taxable temporary differences, it is more likely than not that the deferred tax assets will be used in the future, net of valuation allowances.

As of December 31, 2007 we had net operating loss carry forwards for federal income tax purposes of approximately \$31.8 million, substantially all of which will be used in our tax filings for the year ended December 31, 2008.

Stock and Stock-Based Compensation

We have granted stock options to certain of our employees and directors under our 2005 Omnibus Stock Plan and our 2007 Equity Award Plan. We adopted SFAS No. 123 (Revised 2004), *Share-Based Payment*, or SFAS 123(R), upon inception of Dice Holdings, Inc. Prior to September 1, 2005, we accounted for our stock-based awards using the intrinsic value method prescribed in Accounting Principles Board, or APB, Opinion No. 25 and related interpretations. Under the intrinsic value method, compensation expense was measured on the date of the grant as the difference between the deemed fair value of our common stock and the exercise or purchase price multiplied by the number of stock options or restricted stock awards granted. Compensation expense was recorded for stock options awarded to employees in return for employee service. The expense was measured at the fair value of the award on the date of grant and recognized as compensation expense on a straight-line basis over the employee service period, which is the vesting period. The fair value of options granted was estimated on the grant date using Black-Scholes option-pricing model. The use of an option

Table of Contents

valuation model includes highly subjective assumptions based on long-term predictions, including the expected stock price volatility and average life of each grant.

The fair value of options granted during the years ended December 31, 2008, 2007 and 2006, was estimated on the grant date using Black-Scholes option-pricing model with the weighted average assumptions in the table below. Because our stock was not publicly traded during all of the periods during which options were granted, the average historical volatility rate for a similar entity was used. The expected life of the options granted was derived from historical exercise behavior. The risk-free rate for periods within the expected life of the option is based on the U.S. Treasury yield curve in effect at the time of grant.

	Periods Ended December 31,		
	2008	2007	2006
The weighted average fair value of options granted	\$ 2.06	\$ 1.41	\$ 1.52
Dividend yield	0.00%	0.00%	0.00%
Weighted average risk free interest rate	2.14%	4.62%	4.64%
Weighted average expected volatility	47.78%	35.54%	36.84%
Expected life (in years)	4	4	4

Valuation of Capital Stock*Significant Factors, Assumptions, and Methodologies Used in Determining the Fair Value of our Capital Stock.*

Subsequent to our IPO, the fair value of our common stock on the date options were granted was determined based on the closing price of our stock on the grant date or based on the average of the high and low price for the day prior to the grant date, depending on which plan the options were issued under. Prior to our IPO, members of our management possessing the requisite valuation experience estimated the fair value of our capital stock. We did not obtain contemporaneous valuations prepared by an unrelated valuation specialist at the time of each stock option issuance because we believed our management possessed the requisite valuation expertise to prepare a reasonable estimate of the fair value of the interests at the time of each issuance since inception. When determining the fair value of our common stock, we follow the guidance prescribed by the American Institute of Certified Public Accountants in its practice aid, Valuation of Privately-Held-Company Equity Securities Issued as Compensation, (the Practice Aid).

According to paragraph 11 of the Practice Aid, quoted market prices in active markets are the best evidence of fair value of a security and should be used as the basis for the measurement of fair value, if available. Since quoted market prices for our securities were not available prior to our July 2007 public offering, the estimate of fair value was based on the best information available at the time of the valuation, including prices for similar securities and the results of using other valuation techniques. Privately held enterprises or shareholders sometimes engage in arm's-length cash transactions with unrelated parties for the issuance or sale of their equity securities, and the cash exchanged in such a transaction is, under certain conditions, an observable price that serves the same purpose as a quoted market price. Those conditions are (a) the equity securities in the transaction are the same securities as those with which the fair value determination is being made, and (b) the transaction is a current transaction between willing parties. To the extent that arm's-length cash transactions had occurred, we utilized those transactions to determine the fair value of our common stock. When arm's-length transactions as described above were not available, then we utilized other valuation techniques based on the guideline company's method and discounted cash flows analysis. The methodologies and assumptions were applied consistently over the various grant dates prior to our July 2007 public offering, at a time when the determination of the fair value of our common stock required us to make judgments that were complex and inherently subjective.

The derived fair value of our common stock underlying the options was determined based on an internal valuation prepared by management with the appropriate level of competency, contemporaneously with the issuance of the options. We used generally accepted valuation methodologies, including the guideline company

Table of Contents

method, a variation of the market approach based on comparable company multiples. The guideline public company method incorporates certain assumptions including the market performance of comparable listed companies as well as the financial results and growth trends of the group, to derive the total equity value of the group. The comparable companies were comprised of a combination of companies in the online recruitment and workforce management businesses, the technology focused advertising businesses and subscription-based, vertically focused online businesses. We believe using companies in these lines of businesses provides a reasonable basis for estimating the fair value of our common stock because they are most comparable to our operations. We believe that using the guideline company method provides the nearest relative value that can be found in the market and is therefore the best indicator of the value of our company.

Additionally, a discounted cash flow method was prepared as corroborating evidence. The discounted cash flow method is a method within the income approach whereby the present value of future expected net cash flows is calculated using a discount rate to validate the valuation that resulted from the guideline companies method.

Options granted at the time of a confirming transaction had a strike price determined as if the value of common stock equaled the value of the Series A convertible preferred stock less certain discounts related to leverage and dilution.

The following table details the values determined for each option grant in 2006 and for the period in 2007 prior to our stock becoming publicly traded. At such dates our stock and our company were valued as follows (dollars in millions except per share amounts):

Option Grants	Net Debt(3)	Discount for Lack of Marketability	Dice Equity Value on a Minority Non-Marketable Basis	Exercise Price per Share	Number of Options Granted
May 2, 2006	\$ 35.0	40%	\$ 190.0(1)	\$ 3.52	137,839
November 1, 2006	\$ 89.7	(2)	\$ 367.9(2)	\$ 5.97	1,011,895
December 5, 2006	\$ 85.0	(2)	\$ 367.9(2)	\$ 5.97	135,534
January 31, 2007	\$ 83.1	40%	\$ 392.0(1)	\$ 6.55	18,440
January 31, 2007	\$ 83.1	40%	\$ 392.0(1)	\$ 8.27(4)	628,804
March 27, 2007	\$ 187.5	10%	\$ 413.0(1)	\$ 6.89	192,698
May 9, 2007	\$ 183.7	10%	\$ 436.0(1)	\$ 7.11	117,094

- (1) The fair value was determined based on a contemporaneous internal valuation prepared by management with the appropriate levels of competency.
- (2) The fair value was determined based on a third party transaction involving our preferred stock issued in connection with the eFinancialGroup Acquisition. The equity value of \$6.94 per share determined in the eFinancialGroup Acquisition was further reduced by the incurrence of indebtedness and the dilutive effect of previously issued stock options. Our Board of Directors determined that the strike price for options issued at the time of the eFinancialGroup Acquisition should be at the value of the preferred shares less certain reductions related to leverage and dilution.
- (3) Net debt consists of debt less cash held by us.
- (4) These options were granted at an exercise price above fair value of the common stock.

The valuations were impacted by a \$0.19 reduction in the strike price of options outstanding on October 20, 2006 in connection with a dividend paid to holders of our preferred stock, the eFinancialGroup Acquisition on October 31, 2006, and a \$1.78 reduction in the strike price of unvested options outstanding on March 23, 2007 in connection with a dividend paid to holders of our preferred and common stock.

Table of Contents

A discount of 40% for lack of marketability was applied to the valuation of our stock for the May 2, 2006 and January 31, 2007 option grants. The size of the discount was based on a quantitative and qualitative assessment of the facts and circumstances at the time of the grants. The value of the company to which the discount was applied was established using market multiples of a group of our large, publicly traded peers. The impact of being privately held was not included when developing the market multiples. The qualitative factors we examined when estimating the discount that would be demanded by a hypothetical investor included (i) general private company discounts, (ii) the impact of the greater risk and uncertainty inherent in our relatively small size and (iii) the difference in value between the outstanding preferred stock and the common stock to be issued upon exercise of the stock options. Consistent with the Practice Aid, the higher the perceived risk of the enterprise, or the higher the volatility of the price or value of its equity securities, the higher the discount would tend to be. Estimating the volatility of the share price of a privately held company is complex because there is no readily available market for the shares. We estimated the volatility of our stock based on available information on volatility of stocks of publicly traded companies in the industry. The volatility of the market indices for technology companies is approximately 40% more volatile than the broad market. Additionally, the volatility of the comparable companies utilized for the valuation of our stock was approximately three times more volatile than the broad market and two times more volatile than the market indices for technology companies. The quantitative factors we examined when estimating the discount that would be demanded by a hypothetical investor included (i) the time we believed it would take for us to issue stock in a public offering, (ii) the volatility of our stock and (iii) the risk of completing an IPO. The aggregate discount we selected is well within the range of discounts observed in published studies and research which have indicated as much as a 50-60% discount is appropriate for restricted stock. We considered the risk factors identified in the studies and compared them to our risk factors and determined the use of a 40% discount to be appropriate based on the evidence available.

In February 2007, we interviewed a group of investment banking firms to help assess our alternatives in regard to potentially issuing stock in an IPO. Prior to the commencement of this process, we believed that we did not have sufficient business scale to be a public company. In addition, during this period we believed that we required more time to focus on integrating the eFinancialCareers business into our existing business. The process that began in February also focused on an evaluation of the most opportune timing for a potential IPO given the eFinancialCareers integration effort.

As a result of the commencement of this process, beginning with the March 27, 2007 grant, a total discount of 10% was applied. The discount was reduced from 40% used on January 31, 2007 due to the increasing likelihood of an IPO. Reducing the discount from 40% to 20% for the January 31, 2007 stock option grant would have resulted in additional stock compensation expense of approximately \$260,000 on an annual basis over a four year period beginning January 31, 2008. The impact of this change would be insignificant to our results of operations when compared to 2007 revenues of \$83.4 million, 2006 Adjusted EBITDA of \$36.0 million, and 2006 income from continuing operations of \$7.7 million. Additionally, there would be no impact on our debt covenants for any additional stock compensation expense.

In our calculation using the guideline company method, we used multiples of revenue, net income and EBITDA of comparable companies. As a private company, we believed it was appropriate to weight these three multiples in determining our stock price because we deemed all three measures to be appropriate for measurement. The multiples of revenue, net income and EBITDA used at each of the stock option grant dates during 2007 and 2008 were as follows:

	May 2, 2006		January 31, 2007		March 27, 2007		May 9, 2007	
	Multiple	Weight	Multiple	Weight	Multiple	Weight	Multiple	Weight
Revenue	2.6	50%	3.6	50%	3.5	50%	3.1	50%
Net income	36	20%	37	20%	35	20%	27	20%
EBITDA	15.1	30%	24.4	30%	17.0	30%	12.1	30%

We used the best information available to corroborate our determination of our stock price, including events affecting the fair value of our common stock during the year, such as the implementation of our business

Table of Contents

strategy, including the achievement of significant qualitative and quantitative milestones relating to, among others, recruitment package customer growth, revenue growth, employee growth and the execution of strategic transactions. The multiples were applied to 2006 estimated results for the May 2, 2006 grant, to 2007 estimated results for the January 31, 2007 and March 27, 2007 grants and to 2008 estimated results for the May 9, 2007 grant.

In anticipation of our IPO, we considered whether the estimates of the fair value of the common stock used in the accounting for share-based compensation for stock options granted during 2006 was reasonable based on conducting a retrospective analysis. We considered the valuation methodologies that investment banking firms discussed with us in preparation for this offering in the context of the guidance provided in the Practice Aid. We further considered the likelihood of proceeding with this offering and the changes in the business and capital structure during the course of 2006 and during the period thereafter leading up to the filing of a registration statement with the SEC. Based on such considerations, we determined that the contemporaneous valuation estimates completed by management at the time of each equity offering accurately reflected the fair value of our common stock at each grant date.

We expected there to be a difference between the estimated fair value of our common stock used to account for stock options issued during and subsequent to the year ended December 31, 2006 and the price of our common stock sold in our IPO at \$13.00 per share of our common stock. We believe this increase was primarily attributable to items such as our significant revenue and net income growth, our acquisition of eFinancialCareers and JobsintheMoney, our increase in recruitment package customers, the abandonment of MeasureUp, and decreases in our marketability discount.

Recent Developments

Impairment of Goodwill

During the fourth quarter of 2008, we determined that the goodwill at eFinancialCareers U.S. reporting unit was impaired. The fair value of this reporting unit was determined by a discounted cash flow methodology. Cash flow projections for this reporting unit decreased significantly during the fourth quarter of 2008 due to the decline in recruitment activity in financial services. A non-cash charge of \$7.2 million was recorded during the year ended December 31, 2008 for the impairment of goodwill at eFinancialCareers U.S. reporting unit. The charge is reflected as Impairment of goodwill and intangible assets on the Consolidated Statements of Operations.

Long-term Debt

In addition to making our quarterly amortization payment on the term loan in 2009, we prepaid \$10.0 million in mid-January 2009 and an additional \$10.0 million in early February 2009. All payments were on the term loan portion of our Amended and Restated Credit Facility. As of February 9, 2009, we had \$61.2 million outstanding under the term loan. The \$72.3 million available under the revolving credit facility remains undrawn.

Income Taxes

During the fourth quarter of 2008, the Company made cash tax payment of \$3.4 million, primarily related to its non-U.S. tax filings. The company expects to be a full cash taxpayer in both the U.S. and non-U.S. for its 2009 tax filings.

CyberMedia Dice

On January 28, 2008, we sold our equity stake in the CyberMedia Dice joint venture to an affiliate of CyberMedia. CyberMedia Dice results were previously reported in the other segment. Pursuant to FASB Statement No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, the results from operations,

Table of Contents

assets and liabilities from the joint venture have been classified as held for sale, and classified as discontinued operations for all periods presented herein.

Cyclicality

The labor market and certain of the industries that we serve have historically experienced short-term cyclicality. However, we believe that the economic and strategic value provided by online career websites has led to overall growth in the use of these services during the most recent labor market cycle, and has somewhat lessened the impact of cyclicality on our businesses as compared to traditional offline competitors.

The significant increase in the unemployment rate and shortage of available jobs has caused a decrease in the number of job postings on our websites, which in turn negatively impacts our revenues and income. During the fourth quarter of 2008, revenues decreased 10% as compared to the fourth quarter of 2007. The decline in revenues is a result of reduced recruitment activity which impacted customer usage of our primary services. We saw a decline in the number of customers served at Dice.com from approximately 8,800 customers to approximately 7,600 customers during the fourth quarter of 2008. If the slowdown in recruitment activity continues, projected, our future revenues and results of operations will be negatively impacted.

Results of Operations

Our historical financial information discussed in this Annual Report on Form 10-K has been derived from the Company's financial statements and accounting records for the years ended December 31, 2008, 2007 and 2006. Consolidated operating results as a percent of revenue follows:

	For the year ended December 31,		
	2008	2007	2006
Revenues	100.0%	100.0%	100.0%
Operating expenses:			
Cost of revenues	6.4%	6.1%	5.5%
Product development	2.9%	2.9%	2.8%
Sales and marketing	36.8%	37.5%	40.1%
General and administrative	13.7%	13.5%	12.3%
Depreciation	2.4%	2.1%	2.0%
Amortization of intangible assets	10.7%	13.4%	15.7%
Impairment of goodwill and intangible assets	4.7%	2.0%	0.0%
Total operating expenses	77.5%	77.5%	78.5%
Operating income	22.5%	22.5%	21.5%
Interest expense	(6.2%)	(9.2%)	(5.7%)
Interest income	1.1%	0.7%	0.3%
Other expense	(1.7%)	0.0%	0.0%
Income from continuing operations before income taxes	15.7%	14.0%	16.0%
Income tax expense	6.2%	4.7%	6.1%
Income from continuing operations	9.6%	9.3%	9.9%
Income (loss) from discontinued operations, net of tax	0.3%	1.6%	(1.8%)
Net income	9.9%	10.9%	8.1%

Table of Contents**Comparison of Years Ended December 31, 2008 and 2007***Revenues*

	Year ended December 31,			Percent Change
	2008	2007	Increase	
	(in thousands, except percentages)			
DCS Online	\$ 107,329	\$ 102,215	\$ 5,114	5.0%
eFinancialCareers	37,202	29,658	7,544	25.4%
Other	10,478	10,477	1	0.0%
Total revenues	\$ 155,009	\$ 142,350	\$ 12,659	8.9%

Our revenues were \$155.0 million for the year ended December 31, 2008 compared to \$142.4 million for the same period in 2007, an increase of \$12.7 million, or 8.9%.

We experienced growth in the DCS Online segment of \$5.1 million, or 5.0%, as a result of a \$10.1 million increase in revenues from existing customers, offset by a decline in revenues generated from new customers of \$4.3 million and job postings purchased directly through our websites of \$0.6 million. Our recruitment package customers decreased from approximately 8,700 at December 31, 2007 to approximately 7,600 at December 31, 2008, nearly all of which occurred during the fourth quarter of 2008, reflecting a decrease in demand due to the economic contraction in the United States. Average revenue per recruitment package customer remained flat from the year ended December 31, 2007 to the year ended December 31, 2008.

The eFinancialCareers segment demonstrated significant revenue growth of \$7.5 million, or 25.4%, mainly driven by investments in key European and Asian markets driving an increase the number of customers who use our sites, combined with increased production from a growing sales force and strong performance from markets in which we have recently entered, offset by a \$2.9 million unfavorable effect of currency translation from pound sterling to U.S. dollars. We experienced strong revenue gains in our top European markets, with the United Kingdom, our most mature market, generating 4.4% growth, Continental Europe and the Middle East markets growing revenues at 65.0%, and Southeast Asia, our newest market, growing 97.7% year-over-year.

Cost of Revenues

	Year ended December 31,			Percent Change
	2008	2007	Increase	
	(in thousands, except percentages)			
Cost of revenues	\$ 9,862	\$ 8,647	\$ 1,215	14.1%
Percentage of revenues	6.4%	6.1%		

Our cost of revenues for the year ended December 31, 2008 were \$9.9 million compared to \$8.6 million for the same period in 2007, an increase of \$1.2 million, or 14.1%. The increase in cost of revenues was driven by our DCS Online segment, which was \$1.3 million higher than 2007, primarily due to an increase in software costs needed to maintain our websites. Additionally, there was an increase in costs as a result of increasing the number of network operations personnel we employ, which was needed in order to support an increase in user activity and compliance activity. Cost of revenues for the eFinancialCareers segment decreased \$136,000, due mostly to a favorable effect from currency translation from pound sterling to U.S. dollar.

Table of Contents*Product Development Expenses*

	Year ended December 31,			Percent Change
	2008	2007	Increase	
	(in thousands, except percentages)			
Product Development	\$ 4,425	\$ 4,188	\$ 237	5.7%
Percentage of revenues	2.9%	2.9%		

Product development expenses for the year ended December 31, 2008 were \$4.4 million compared to \$4.2 million for the same period in 2007, an increase of \$237,000 or 5.7%. The increase was driven mostly by the eFinancialCareers segment, which increased \$261,000, or 25.9% from 2007 to 2008, relating to an increase in consulting fees and salaries and benefit costs for the product development team in the United Kingdom who support eFinancialCareers websites serving Europe, the Middle East, Asia Pacific and North America.

Sales and Marketing Expenses

	Year ended December 31,			Percent Change
	2008	2007	Increase	
	(in thousands, except percentages)			
Sales and Marketing	\$ 57,019	\$ 53,427	\$ 3,592	6.7%
Percentage of revenues	36.8%	37.5%		

Sales and marketing expenses for the year ended December 31, 2008 were \$57.0 million compared to \$53.4 million for the same period in 2007, an increase of \$3.6 million, or 6.7%.

Advertising costs for the DCS Online segment were \$21.3 million for the year ended December 31, 2008 compared to \$20.1 million for the same period in 2007, an increase of \$589,000, or 3.0%. The increase was primarily due to an increase in our online advertising spending, including our new brand awareness initiatives, direct mail and email campaigns and radio advertising campaigns we conducted during the year ended December 31, 2008, offset by managed reductions in job seeker marketing. As revenues have grown, we have increased our advertising spending.

In the case of Dice.com, approximately 75% of our advertising and marketing spending has been focused on increasing the number of professionals who visit Dice.com and their levels of activity on the website. We have increased the amount we spend on online media, particularly paid search programs, in order to drive more traffic to the website and we continue to spend on technology-focused websites. Additionally, we invested in more brand awareness and radio advertising campaigns during the year ended December 31, 2008. We have also increased our visibility at job seeker events in targeted markets and the amount of spending on maintaining the loyalty of existing professionals who already use the website. We have increased the amount we spend to reach employers and recruiters who pay to use our website services. A majority of the spending increase is in direct mail and email campaigns focused on communicating the value proposition of our services to current and potential customers.

The salaries, commissions, and benefits component of sales and marketing expense for the U.S. businesses was \$14.3 million for the year ended December 31, 2008, which was consistent with the costs during the same period in 2007.

For the eFinancialCareers segment, we increased overall marketing expense by \$2.1 million to \$6.9 million for the year ended December 31, 2008 from \$4.8 million for the year ended December 31, 2007. The increase was to elevate eFinancialCareers exposure in the less penetrated markets of Continental Europe, Asia, and the Middle East, and to support traffic growth across all markets. Sales costs for eFinancialCareers outside of North America increased \$261,000 primarily due to increased commissions driven by higher sales during the year ended December 31, 2008 as compared to the same period in 2007.

Table of Contents*General and Administrative Expenses*

	Year ended December 31,			Percent Change
	2008	2007	Increase	
	(in thousands, except percentages)			
General and administrative	\$ 21,277	\$ 19,194	\$ 2,083	10.9%
Percentage of revenues	13.7%	13.5%		

General and administrative expenses for the year ended December 31, 2008 were \$21.3 million compared to \$19.2 million for the same period in 2007, an increase of \$2.1 million, or 10.9%.

Our U.S. businesses incurred an increase in general and administrative expenses of \$2.2 million in the year ended December 31, 2008 as compared to the same period in the prior year. Of this increase, stock-based compensation expenses were \$1.5 million due to the additional expense for options and restricted stock issued after December 31, 2006 and the reduction in the strike price of stock options in March 2007. Additionally, we incurred an increase in professional fees and additional other costs of being a public company of approximately \$900,000. Increased costs of being a public company include insurance, audit fees, and investor relations and internal audit personnel.

General and administrative expense for eFinancialCareers decreased \$155,000 in the year ended December 31, 2008, as compared to the same period in 2007. The decrease was primarily from favorable foreign exchange rates, offset by higher rent expense due to moving to new office space in mid-2007 and an increase in the provision for doubtful accounts, which is consistent with eFinancialCareers' revenue growth.

Depreciation

	Year ended December 31,			Percent Change
	2008	2007	Increase	
	(in thousands, except percentages)			
Depreciation	\$ 3,689	\$ 2,971	\$ 718	24.2%
Percentage of revenues	2.4%	2.1%		

Depreciation expense for the year period ended December 31, 2008 was \$3.7 million compared to \$3.0 million for the same period in 2007, an increase of \$718,000, or 24.2%. The increase was due to a greater depreciable fixed asset balance during the year ended December 31, 2008 compared to the same period in 2007 as a result of continued upgrades to our business systems and facilities.

Amortization of Intangible Assets

	Year ended December 31,			Percent Change
	2008	2007	Decrease	
	(in thousands, except percentages)			
Amortization	\$ 16,641	\$ 19,051	\$ (2,410)	-12.7%
Percentage of revenues	10.7%	13.4%		

Amortization expense for the year period ended December 31, 2008 was \$16.6 million compared to \$19.1 million for the same period in 2007, a decrease of \$2.4 million, or 12.7%. Amortization expense in the year ended December 31, 2008 decreased due to certain intangible assets from the eFinancialCareers Acquisition becoming fully amortized in the last half of 2007 and due to the \$2.9 million write-off of intangible assets of JobsintheMoney.com in the fourth quarter of 2007.

Table of Contents*Impairment of Intangible Assets*

	Year ended December 31,			Percent Change
	2008	2007	Increase	
	(in thousands, except percentages)			
Impairment of goodwill and intangible assets	\$ 7,213	\$ 2,879	\$ 4,334	150.5%
Percentage of revenues	4.7%	2.0%		

During fourth quarter 2008 and as a result of our annual impairment test, we determined a reduction in the carrying value of our eFinancialCareers U.S. reporting unit was warranted, based on a combination of factors, including the current and anticipated environment for financial services recruitment activity and the subsequent impact on future cash flows. As a result, a non-cash charge of \$7.2 million, roughly half of the carrying value of the eFinancialCareers U.S. reporting unit, was recorded for the impairment of goodwill.

In September 2007, we launched a redesigned JobsintheMoney website with an expectation that, together with an increased investment in marketing, overall performance for employers, recruiters, and finance and accounting professionals would improve. While the functionality of the website improved, there was no measurable improvement in financial performance. During the fourth quarter of 2007, management and the Board of Directors reassessed the strategic plan of JobsintheMoney. As a result of these strategic changes, management performed an impairment test and the carrying value of the intangible assets for JobsintheMoney, acquired as part of the eFinancialCareers October 31, 2006 acquisition, was reduced to zero, from \$2.9 million.

Operating Income

Operating income for the year ended December 31, 2008 was \$34.9 million compared to \$32.0 million for the same period in 2007, an increase of \$2.9 million, or 9.0%. The increase is primarily the result of the increase in revenues from both the DCS Online and eFinancialCareers segments, lower amortization costs and the favorable effect on expenses of currency translation from pound sterling to U.S. dollars, offset by an unfavorable effect on revenue from currency translation and increases in operating costs.

Interest Expense

	Year ended December 31,			Percent Change
	2008	2007	Decrease	
	(in thousands, except percentages)			
Interest expense	\$ 9,552	\$ 13,104	\$ (3,552)	-27.1%
Percentage of revenues	6.2%	9.2%		

Interest expense for the year ended December 31, 2008 was \$9.6 million compared to \$13.1 million for the same period in 2007, a decrease of \$3.6 million, or 27.1%. The decrease in interest expense was due to a larger amount of borrowings outstanding in the year ended December 31, 2007, on average, as compared to the same period in 2008. We made borrowings under our Amended and Restated Credit Facility in March 2007, which were used to pay a dividend in March 2007 and to refinance the indebtedness outstanding under our prior credit facility. Also, the interest rates on our debt during the year ended December 2008 were lower than rates during the same period of 2007, primarily due to the decline in LIBOR rates between these periods. A portion of the March 2007 borrowings were repaid with proceeds from our IPO in July 2007. Furthermore, in addition to making our amortization and excess cash flow payments during 2008, \$21.4 million of borrowings on the term loan facility were paid in September 2008 and \$18.8 million of borrowing were paid in October 2008.

Interest Income

Interest income for the year ended December 31, 2008 was \$1.6 million compared to \$1.0 million for the same period in 2007, an increase of \$600,000. The increase in interest income was due to larger cash and

Table of Contents

marketable securities balances in the year ended December 31, 2008, on average, as compared to the same period in 2007. The increased cash balance was due to cash generated from operations and cash from our IPO.

Other Expense

Other expense for the year ended December 31, 2008 totaled \$2.6 million, from changes in the fair value of our interest rate swap agreements. In December 2007, the Company entered into an interest rate swap agreement which fixed the interest rate on \$60.0 million of LIBOR-based debt at 7.39% for the two-year period from January 2, 2008 to January 2, 2010. In February 2008, the Company entered into an interest rate swap agreement which fixed the interest rate on \$20.0 million of LIBOR-based debt at 6.37% for the three-year period from February 11, 2008 to February 11, 2011. The fair value of the swap agreements are reflected as an Interest rate hedge liability on the Consolidated Balance Sheets. During the first quarter of 2008, the Company elected hedge accounting under Statement of Financial Accounting Standards No. 133 (SFAS 133), *Accounting for Derivates, as amended*. Subsequent to that election, the interest rate swap agreements became ineffective primarily due to the 3% minimum LIBOR rate in the Amended and Restate Credit Facility as the swap agreements do not contain a rate floor. As the swaps are ineffective and we do not expect them to be effective in the future, the Company discontinued applying hedge accounting under SFAS 133 during the fourth quarter of 2008.

Income Taxes

	Year ended December 31, 2008 2007 (in thousands, except percentages)	
Income from continuing operations before income taxes and minority interest	\$ 24,410	\$ 19,936
Income tax expense	9,573	6,692
Effective tax rate	39.2%	33.6%

The effective income tax rate for the year ended December 31, 2008 was 39.2% compared to 33.6% for the same period in 2007. The increase in the current period rate was impacted by a fourth quarter 2008 goodwill impairment charge of \$7.2 that has no tax benefit as well as a \$1.6 million tax benefit related to a \$4.6 million payment made to the holders of vested stock options in lieu of dividends in the prior period. This increase in the current period rate was partially offset by a \$1.3 million tax benefit recognized in the second quarter of 2008 related to our determination that our foreign earnings will be indefinitely invested as well as the favorable impact of a decrease in non-U.S. statutory rates and changes related to state tax legislation compared to the prior period. We expect our quarterly effective tax rate to approximate 35% in future periods.

As of December 31, 2008 and 2007, we had net operating loss carry forwards for U.S. income tax purposes of approximately \$0.3 million and \$31.8 million, respectively. The remaining 2008 amount of \$0.3 is related to state income tax filings for which a \$0.2 valuation allowance has been established.

Table of Contents

A reconciliation of the federal statutory tax rate to the effective tax rate on continuing operations applicable to income before income tax expense follows:

	Year Ended December 31,	
	2008	2007
Federal statutory rate	35.0%	35.0%
Tax effect of permanent items	1.0%	0.5%
State taxes, net of federal effect	0.8%	2.0%
Payment in lieu of dividends on vested options		(8.1%)
Impairment charge with no tax benefit	10.3%	
Foreign earnings indefinitely reinvested	(5.5%)	
Difference between foreign and U.S. rates	(4.2%)	2.0%
Other	1.8%	2.2%
Effective tax rate	39.2%	33.6%

Discontinued Operations

Discontinued operations represent the operations Dice India, our interest in a joint venture with CyberMedia. We sold our interest in the CyberMedia Dice joint venture in January 2008. Accordingly, the results of operations from these segments are reflected as discontinued operations for all periods presented. Income from discontinued operations, net of tax, for the year ended December 31, 2008 was \$519,000.

Comparison of Years Ended December 31, 2007 and 2006*Revenues*

	Year ended December 31,			Percent
	2007	2006	Increase	Change
	(in thousands, except percentages)			
DCS Online	\$ 102,215	\$ 77,285	\$ 24,930	32%
eFinancialCareers	29,658	2,924	26,734	914%
Other	10,477	3,191	7,286	228%
Total revenues	\$ 142,350	\$ 83,400	\$ 58,950	71%

Our revenues were \$142.4 million for the year ended December 31, 2007 compared to \$83.4 million for the same period in 2006, an increase of \$59.0 million, or 71%. This increase can be attributed to a combination of the eFinancialGroup Acquisition and organic growth. The increase in revenues resulting from the eFinancialGroup Acquisition was \$33.1 million, of which \$26.7 million relates to the international business and \$6.4 million relates to the U.S. businesses. Additionally, we experienced organic growth in the DCS Online segment of \$24.9 million, or 32%, as a result of successful marketing efforts leading to new customers, as well as an increase in revenues from existing customers both in the number of job postings and individual users of our databases and an increase in the price of our products. Our recruitment package customers increased from approximately 7,600 at December 31, 2006 to approximately 8,700 at December 31, 2007. Average revenue per recruitment package customer increased by approximately 4.8% from the year ended December 31, 2006 to the year ended December 31, 2007.

Table of Contents*Cost of Revenues*

	Year ended December 31,			Percent Change
	2007	2006	Increase	
	(in thousands, except percentages)			
Cost of revenues	\$ 8,647	\$ 4,628	\$ 4,019	87%
Percentage of revenues	6.1%	5.5%		

Our cost of revenues for the year ended December 31, 2007 were \$8.6 million compared to \$4.6 million for the same period in 2006, an increase of \$4.0 million, or 87%. The increase was primarily due to the inclusion of the results of operations of eFinancialGroup in 2007, which led to an increase of \$2.5 million. An increase in cost of revenues was experienced at DCS Online of \$1.0 million, due to an increase in salaries and benefits as a result of an increase in the number of network operations and customer support personnel we employed, which was needed in order to support an increase in the number of job postings and user activity. Additionally, cost of revenues at Targeted Job Fairs increased \$421,000 due to an increase in the number and type of career fairs conducted.

Product Development Expenses

	Year ended December 31,			Percent Change
	2007	2006	Increase	
	(in thousands, except percentages)			
Product Development	\$ 4,188	\$ 2,359	\$ 1,829	78%
Percentage of revenues	2.9%	2.8%		

Product development expenses for the year ended December 31, 2007 were \$4.2 million compared to \$2.4 million for the same period of 2006, an increase of \$1.8 million, or 78%. The inclusion of the results of operations of eFinancialGroup in 2007 led to \$1.0 million of this increase. The remainder of the increase related primarily to enhancements to the Dice.com website that were not able to be capitalized.

Sales and Marketing Expenses

	Year ended December 31,			Percent Change
	2007	2006	Increase	
	(in thousands, except percentages)			
Sales and Marketing	\$ 53,427	\$ 33,456	\$ 19,971	60%
Percentage of revenues	37.5%	40.1%		

Sales and marketing expenses for the year ended December 31, 2007 were \$53.4 million compared to \$33.5 million for the same period in 2006, an increase of approximately \$20.0 million, or 60%. The inclusion of the results of operations of eFinancialGroup in 2007 led to \$12.1 million of this increase. The remainder of the increase was primarily due to an increase in advertising and sales expenses for the DCS Online operating segment.

Advertising costs for the DCS Online segment were \$20.1 million for the year ended December 31, 2007 compared to \$15.9 million for the same period in 2006, an increase of approximately \$4.2 million, or 26%. This increase was primarily due to an increase in our online advertising spending and the number of email and direct mail campaigns conducted during the year ended December 31, 2007. As our revenues have grown, we have increased our advertising spending.

In the case of Dice.com, a significant portion of our advertising and marketing spending is focused on increasing the number of professionals who visit Dice.com and the levels of activity on the website. We have

Table of Contents

significantly increased the amount we spend on online media, including banner advertisements and paid search programs in order to drive more traffic to the website. Much of this advertising spending is on technology-focused websites and search engines.

We have significantly increased the amount we spend to reach employers and recruiters who pay to use the website services. A majority of the spending increase is in direct mail and email campaigns focused on communicating the value proposition of our services to current and potential customers. This marketing effort has helped result in an increase in net recruitment package customers during the year ended December 31, 2007 of approximately 1,100 from approximately 7,600 at December 31, 2006.

The salaries, commissions, and benefits component of sales and marketing expense for the Company amounted to \$14.1 million for the year ended December 31, 2007 compared to \$11.5 million for the same period in 2006, an increase of approximately \$2.7 million, or 24%. This increase was primarily due to an increased number of sales personnel and increased sales by those personnel resulting in higher incentive compensation. The DCS Online sales force headcount increased from 67 at December 31, 2006 to 78 at December 31, 2007.

General and Administrative Expenses

	Year ended December 31,		Increase	Percent Change
	2007	2006		
	(in thousands, except percentages)			
General and administrative	\$ 19,194	\$ 10,263	\$ 8,930	87%
Percentage of revenues	13.5%	12.3%		

General and administrative expenses for the year ended December 31, 2007 were \$19.2 million compared to \$10.3 million for the same period in 2006, an increase of \$8.9 million, or 87%. The inclusion of the results of operations of eFinancialGroup in 2007 led to \$4.3 million of this increase. An increase in stock-based compensation of \$2.6 million was experienced due to the additional expense for options issued in late 2006 and early 2007 and due to the reduction in the strike price of the options in March 2007. Additionally, Dice Holdings, Inc. experienced an increase in professional fees of \$740,000 and additional other costs of being a public company of approximately \$530,000.

Depreciation

	Year ended December 31,		Increase	Percent Change
	2007	2006		
	(in thousands, except percentages)			
Depreciation	\$ 2,971	\$ 1,699	\$ 1,272	75%
Percentage of revenues	2.1%	2.0%		

Depreciation expense for the year period ended December 31, 2007 was \$3.0 million compared to \$1.7 million for the same period in 2006, an increase of \$1.3 million, or 75%. The inclusion of the results of operations of eFinancialGroup in 2007 led to \$377,000 of this increase. The remainder of the increase was due to a greater depreciable fixed asset balance during the year ended December 31, 2007 compared to the same period in 2006 as a result of continued upgrades to our business systems and facilities.

Amortization of Intangible Assets

	Year ended December 31,		Increase	Percent Change
	2007	2006		
	(in thousands, except percentages)			
Amortization	\$ 19,051	\$ 13,092	\$ 5,959	46%
Percentage of revenues	13.4%	15.7%		

Table of Contents

Amortization expense for the year period ended December 31, 2007 was \$19.1 million compared to \$13.1 million for the same period in 2006, an increase of \$6.0 million, or 46%. Amortization expense in the year ended December 31, 2006 consists of amortization of finite-lived acquired intangible assets acquired as part of the 2005 Acquisition, and two months of amortization for finite-lived assets acquired as part of the eFinancialGroup Acquisition. Amortization expense in the year ended December 31, 2007 consists of a full year of amortization of finite-lived intangible assets acquired as part of both the 2005 Acquisition and the eFinancialGroup Acquisition.

Impairment of Intangible Assets

In September 2007, we launched a redesigned JobsintheMoney website with an expectation that, together with an increased investment in marketing, overall performance for employers, recruiters, and finance and accounting professionals would improve. While the functionality of the website improved, there was no measurable improvement in financial performance. During the fourth quarter of 2007, management and the Board of Directors reassessed the strategic plan of JobsintheMoney. As a result of these strategic changes, management performed an impairment test and the carrying value of the intangible assets for JobsintheMoney, acquired as part of the eFinancialCareers October 31, 2006 acquisition, was reduced to zero, from \$2.9 million.

Operating Income

Operating income for the year ended December 31, 2007 was \$32.0 million compared to \$17.9 million for the same period in 2006, an increase of \$14.1 million, or 79%. The increase is primarily the result of the increase in DCS Online revenues due to increase in recruitment package customers and revenue per recruitment package customer, partially offset by increases in operating costs. The inclusion of the results of operations of eFinancialGroup for the year ended December 31, 2007 contributed operating income of \$722,000.

Interest Expense

Interest expense for the year ended December 31, 2007 was \$13.1 million compared to \$4.8 million for the same period in 2006, an increase of \$8.3 million. The increase in interest expense was due to a larger amount of borrowings outstanding in the year ended December 31, 2007, on average, as compared to the same period in 2006 due to borrowings made in October 2006 to finance the eFinancialGroup Acquisition and borrowings under our Amended and Restated Credit Facility in March 2007 used to pay the March 2007 dividend and to refinance the indebtedness outstanding under our prior credit facility. The borrowings were reduced during the year, including \$51.0 million from proceeds of the IPO in July 2007. See Liquidity and Capital Resources and Amended and Restated Credit Facility.

Income Taxes

	Year ended December 31,	
	2007	2006
	(in thousands, except	
	percentages)	
Income from continuing operations before income taxes and minority interest	\$ 19,936	\$ 13,349
Income tax expense	6,692	5,110
Effective tax rate	33.6%	38.3%

Table of Contents

Income tax expense for the year ended December 31, 2007 was \$6.7 million compared to \$5.1 million for the same period in 2006. As of December 31, 2007 and December 31, 2006, we had net operating loss carry forwards for federal income tax purposes of approximately \$31.8 million and \$49.6 million, respectively. The carry forwards will begin to expire in 2011 if not used. We expect that all carry forwards will be utilized. A reconciliation of the federal statutory tax rate to the effective tax rate on continuing operations applicable to income before income tax expense follows:

	Year Ended December 31,	
	2007	2006
Federal statutory rate	35.0%	35.0%
Tax effect of permanent items	0.5%	
State taxes, net of federal effect	2.0%	4.0%
Payment in lieu of dividends on vested options	(8.1%)	
Difference between foreign and U.S. rates	2.0%	(0.7%)
Other	2.2%	
Effective tax rate	33.6%	38.3%

During the year ended December 31, 2007, the permanent item impacting the effective tax rate is payments to the holders of vested stock options in lieu of dividends of \$4.6 million.

Discontinued Operations

Discontinued operations represent the operations of MeasureUp, our subsidiary that provided certification test preparation and assessment products for technology professionals, and our interest in CyberMedia Dice, representing Dice India Holdings' 51% interest in the joint venture with CyberMedia. All significant business activities of MeasureUp ceased on March 30, 2007, while CyberMedia Dice was classified as held for sale as of December 31, 2007, pursuant to a signed agreement to sell Dice India Holdings' interest to an affiliate of CyberMedia. Accordingly, the results of operations from these segments are reflected as discontinued operations for all periods presented. Income from discontinued operations, net of tax, for the year ended December 31, 2007 was \$2.3 million compared to a loss from discontinued operations, net of tax, of \$1.5 million for the same period in 2006.

Liquidity and Capital Resources

We have summarized our cash flows for the years ended December 31, 2008, 2007 and 2006 (in thousands).

	Year Ended December 31,		
	2008	2007	2006
Cash provided by operating activities	\$ 54,176	\$ 55,653	\$ 40,852
Cash used for investing activities	(10,341)	(2,760)	(66,547)
Cash provided by (used for) financing activities	(43,196)	(1,167)	27,964

We have financed our operations primarily through cash provided by operating activities, our IPO, and the use of our Amended and Restated Credit Facility. At December 31, 2008, we had cash, cash equivalents and marketable securities of \$61.6 million compared to \$57.7 million at December 31, 2007. Marketable securities are comprised of highly liquid debt instruments of the U.S. government and government agencies and corporate debt securities.

Our principal sources of liquidity are cash, cash equivalents and marketable securities, as well as the cash flow that we generate from our operations. In addition, at December 31, 2008, we had \$72.3 million in borrowing capacity under our Amended and Restated Credit Facility. We believe that our existing cash, cash equivalents,

Table of Contents

marketable securities, cash generated from operations and available borrowings under our Amended and Restated Credit Facility will be sufficient to satisfy our currently anticipated cash requirements through at least the next 12 months and the foreseeable future thereafter. However, given the uncertainty of the credit markets, it is possible that one or more lenders under the revolving portion of the credit facility may refuse or be unable to satisfy their commitment to lend to us or we may need to refinance our debt and be unable to do so. In addition, our liquidity could be negatively affected by a further decrease in demand for our products and services. We may also make acquisitions and may need to raise additional capital through future debt financings or equity offerings to the extent necessary to fund such acquisitions, which we may not be able to do on a timely basis or on terms satisfactory to us or at all.

Comparison of Years Ended December 31, 2008 and 2007

Operating Activities

Net cash provided by operating activities primarily consists of net income adjusted for certain non-cash items, including depreciation, amortization, changes in deferred tax assets and liabilities, share based compensation, impairment of goodwill and intangible assets, and loss on interest rate hedges, and for the effect of changes in working capital. Net cash provided by operating activities was \$54.2 million and \$55.7 million for the years ended December 31, 2008 and 2007, respectively. The cash provided by operating activities during these periods was consistent primarily due to net income being consistent between the periods, while non-cash items increased by \$11.5 million and the changes in working capital decreased by \$11.5 million. The working capital changes were primarily due to the reduction in cash generated from changes in accounts receivable and deferred revenue, both due to the reduction in billings in the fourth quarter of 2008, as compared to the fourth quarter of 2007.

Investing Activities

Cash used for investing activities during the years ended December 31, 2008 and 2007 was \$10.3 million and \$2.8 million respectively. Cash used for investing in the year ended December 31, 2008 was primarily attributable to purchases of marketable securities, partially offset by sales of marketable securities, and due to capital expenditures of \$4.0 million. Capital expenditures are generally comprised of computer hardware, software, and website development costs. Cash used for investing activities during the year ended December 31, 2007 was attributed to capital expenditures.

Financing Activities

Cash used for financing activities during the year ended December 31, 2008 was \$43.2 million resulting primarily from payments on Amended and Restated Credit Facility. Cash used for financing activities during the year ended December 31, 2007 of \$1.2 million was from dividends paid and cash payments in lieu of dividends totaling \$112.5 million, payments under our credit facilities of \$77.6 million, payments for financing costs of \$2.4 million, and payments of costs related to our IPO of \$2.9 million, offset by proceeds from our Amended and Restated Credit Facility of \$113.0 million and proceeds from our IPO of \$81.0 million.

Comparison of Years Ended December 31, 2007 and 2006

Operating Activities

Net cash provided by operating activities primarily consists of net income adjusted for certain non-cash items, including depreciation, amortization, changes in deferred tax assets and liabilities, share based compensation, and for the effect of changes in working capital. Net cash provided by operating activities was \$55.7 million and \$40.9 million for the years ended December 31, 2007 and 2006, respectively. The increase in cash provided by operating activities during these periods was primarily due to higher revenue in part due to the eFinancialGroup Acquisition and increased net income. The increase in net income is primarily related to higher

Table of Contents

revenue due to an increase in the number of customers and an increase in the price charged for recruitment packages and job postings.

Investing Activities

Cash used for investing activities during the years ended December 31, 2007 and 2006 of \$2.8 million and \$66.5 million, respectively. Cash used for investing in the year ended December 31, 2007 was primarily attributable to capital expenditures. Capital expenditures are generally comprised of computer hardware, software, and website development costs. Cash used for investing activities during the year ended December 31, 2006 was attributed to the eFinancialGroup Acquisition (\$63.2 million) and capital expenditures.

Financing Activities

Cash used for financing activities during the year ended December 31, 2007 was \$1.2 million resulting from proceeds from our Amended and Restated Credit Facility of \$113.0 million and proceeds from our IPO of \$81.0 million offset by dividends paid and cash payments in lieu of dividends totaling \$112.5 million, payments under our credit facilities of \$77.6 million, payments for financing costs of \$2.4 million, and payments of costs related to our IPO of \$2.9 million. Cash provided by financing activities during the year ended December 31, 2006 of \$28.0 million related to \$77.0 million of proceeds from our credit facility used in the eFinancialGroup Acquisition offset by \$37.0 million in payments under those same credit facilities and dividends paid of \$11.2 million.

Financings and Capital Requirements

In connection with the 2005 Acquisition, we issued 51,539,800 shares of Series A convertible preferred stock and 92,200 shares of common stock for consideration of \$111.8 million and borrowed \$60.0 million under our prior credit facility. In October 2006, a dividend of \$11.2 million was paid to holders of our Series A convertible preferred stock, which was financed by borrowings under the prior revolving credit facility. In October 2006, in connection with the eFinancialGroup Acquisition, we issued 3,628,992 shares of our Series A convertible preferred stock valued at \$25.2 million and borrowed \$67.0 million under our prior credit facility. In March 2007, we borrowed \$113.0 million to pay dividends to our stockholders and make payments to holders of vested options.

On July 23, 2007, we completed our IPO. We sold 6,700,000 shares of our common stock and selling stockholders sold an additional 10,000,000 shares of common stock at a price of \$13.00 less underwriting discounts. The selling stockholders granted the underwriters a 30-day option to purchase up to an additional 2,505,000 shares of the Company's common stock at a price of \$13.00, less underwriting commissions. On August 16, 2007, the underwriters exercised the option to acquire 292,000 of those shares. The proceeds, net of underwriting commissions received by us, were \$81.0 million. We did not receive any proceeds from the sale of shares by the selling stockholders. We used the proceeds from the offering to repay outstanding indebtedness under the Amended and Restated Credit Facility.

We anticipate capital expenditures in 2009 to be approximately \$2 to \$3 million.

Amended and Restated Credit Facility

On March 21, 2007, we entered into our Amended and Restated Credit Facility which provides for a revolving facility of \$75.0 million and a term loan facility of \$125.0 million, both of which mature on March 21, 2012. Quarterly payments of \$250,000 on the term loan facility began in third quarter 2007. We may prepay our revolving facility or the term loan facility at any time without penalty. Payments of principal on the term loan facility result in permanent reductions to that facility.

Table of Contents

Immediately prior to entering into the Amended and Restated Credit Facility, we had \$81.0 million outstanding under our prior facility. On March 21, 2007, we borrowed an additional \$113.0 million under the Amended and Restated Credit Facility, resulting in total borrowings of \$194.0 million. Borrowings under our Amended and Restated Credit Facility bear interest, at our option, at a LIBOR rate plus 3.25% or a reference rate plus 1.75%. We used a portion of the net proceeds received from our IPO on July 23, 2007 to repay \$51.0 million of the outstanding indebtedness under the Amended and Restated Credit Facility. During 2008, we repaid \$42.9 million of the term loan. Borrowings at December 31, 2008 included \$81.5 million under our term loan facility.

In addition to making our quarterly amortization payment on the term loan, we prepaid \$10.0 million in mid-January 2009 and an additional \$10.0 million in early February 2009. These payments were all on the term loan facility and resulted in outstanding borrowings at February 9, 2009 of \$61.2 million. Additionally, the \$72.3 million available under the revolving credit facility remains undrawn.

In December 2007, the Company entered into an interest rate swap agreement which fixed the interest rate on \$60.0 million of LIBOR-based debt at 7.39% for the two-year period from January 2, 2008 to January 2, 2010. In February 2008, the Company entered into an interest rate swap agreement which fixed the interest rate on \$20.0 million of LIBOR-based debt at 6.37% for the three-year period from February 11, 2008 to February 11, 2011.

Our existing and future domestic subsidiaries unconditionally guarantee our borrowings under the Amended and Restated Credit Facility. The obligations under the Amended and Restated Credit Facility and the guarantees are secured by substantially all of the individual assets of each of the borrowers and guarantors. Our Amended and Restated Credit Facility also contains certain financial covenants and requirements, including a Senior Leverage Ratio, Fixed Charge Coverage Ratio, and Minimum Adjusted EBITDA covenant and an Excess Cash Flow payment requirement. The Company was in compliance with all such covenants and requirements as of December 31, 2008. Refer to Note 8 in the Notes to the Consolidated Financial Statements included in Item 8 of this Form 10-K.

Commitments and Contingencies

The following table presents certain minimum payments due under contractual obligations with minimum firm commitments as of December 31, 2008:

	Total	2009	Payments by period		Thereafter
			2010-2011	2012-2013	
			(in thousands)		
Term loan facility	\$ 81,500	\$ 1,000	\$ 2,000	\$ 78,500	\$
Operating lease obligations	2,782	1,012	1,546	224	
Total contractual obligations	\$ 84,282	\$ 2,012	\$ 3,546	\$ 78,724	\$

We make commitments to purchase advertising from online vendors which we pay for on a monthly basis. We have no long-term obligations to purchase a fixed or minimum amount with these vendors.

Our principal commitments consist of obligations under operating leases for office space and equipment and long-term debt. As of December 31, 2008, we had \$81.5 million outstanding under our Amended and Restated Credit Facility. Interest payments are due monthly on a portion of the facility and at varying, specified periods (to a maximum of three months) for the remaining portion. In addition to making our quarterly amortization payment on the term loan, we prepaid \$10.0 million in mid-January 2009 and an additional \$10.0 million in early February 2009. These payments were all on the term loan facility and resulted in outstanding borrowings at February 9, 2009 of \$61.2 million. See Note 8 Indebtedness in our consolidated financial statements for additional information related to our revolving facility.

Table of Contents

Future interest payments on our term loan and revolving facilities are variable due to our interest rate being based on LIBOR or a reference rate. As discussed above, outstanding borrowings at February 9, 2009 were \$61.2 million. We also have two interest rate swap agreements which fixed the interest rate on \$60.0 million of LIBOR-based debt at 7.39% until January 2, 2010 and \$20.0 million of LIBOR-based debt at 6.37% until February 11, 2011. Assuming a rate of 6.25% on our debt and payments on the swap agreements, interest payments in 2009, 2010-2011, 2012-2013, are expected to be \$6.9 million, \$9.0 million, and \$940,000, respectively and none thereafter.

As of December 31, 2008, we have recorded approximately \$5.3 million of unrecognized tax benefits as liabilities in accordance with FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes - an interpretation of FASB Statement No. 109* (FIN 48), and we are uncertain as to if or when such amounts may be settled. Related to the unrecognized tax benefits considered permanent differences, we have also recorded a liability for potential penalties and interest. Included in the balance of unrecognized tax benefits at December 31, 2008, are \$1.6 million of tax benefits that, if recognized, would affect the effective tax rate. Also included in the balance of unrecognized tax benefits at December 31, 2008, are \$3.7 million of tax benefits that, if recognized, would result in a decrease to goodwill recorded in purchase business combinations.

Recent Accounting Pronouncements

For a discussion of new accounting pronouncements affecting the Company, refer to Note 2 of Notes to Consolidated Financial Statements included in Item 8 of this Form 10-K.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

We have exposure to financial market risks, including changes in interest rates, foreign currency exchange rates and other relevant market prices.

Foreign Exchange Risk

As a result of the eFinancialGroup Acquisition on October 31, 2006, we conduct business in an additional 18 markets around the world, with the majority of our foreign operations conducted in the United Kingdom. For the years ended December 31, 2008 and 2007, approximately 24% and 21% of our revenues, respectively, were earned outside the U.S. and collected in local currency. We are subject to risk for exchange rate fluctuations between such local currencies and the pound sterling and the subsequent translation of the pound sterling to U.S dollars. We currently do not hedge currency risk as our Amended and Restated Credit Facility places limitations on our ability to hedge currency risk.

The financial statements of our non-U.S. subsidiaries are translated into U.S. dollars using current exchange rates, with gains or losses included in the cumulative translation adjustment account, which is a component of stockholders' equity. As of December 31, 2008 our translation adjustment, net of tax decreased stockholders' equity by \$15.6 million. As of December 31, 2007 our translation adjustment, net of tax increased stockholders' equity by \$3.1 million. The change from 2007 to 2008 is primarily attributable to the strengthening of the U.S. dollar against the pound sterling.

Interest Rate Risk

We have interest rate risk primarily related to borrowings under our Amended and Restated Credit Facility and related to our interest rate swap agreements. Borrowings under our Amended and Restated Credit Facility bear interest, at our option, at either a LIBOR rate plus 3.25% or a reference rate plus 1.75%. As of December 31, 2008, we had outstanding borrowings of \$81.5 million under our Amended and Restated Credit Facility. During January 2009, we paid \$10.3 million of borrowings (includes our quarterly amortization payment on the term loan) and in February 2009 we paid an additional \$10.0 million, resulting in outstanding borrowings at February 9, 2009 of \$61.2 million. If interest rates increased by 1.0%, interest expense in 2009 on our current

Table of Contents

borrowings and swap arrangements would decrease by approximately \$810,000. The decrease in interest expense is the result of the interest rate swaps becoming more effective as rates rise and due to current LIBOR rates being more than 1.0% below the floor that we pay on our LIBOR based borrowings.

In December 2007, we entered into an interest rate swap agreement which fixed the interest rate on \$60.0 million of LIBOR-based debt at 7.39% for the two-year period from January 2, 2008 to January 2, 2010. In February 2008, we entered into an interest rate swap agreement which fixed the interest rate on \$20.0 million of LIBOR-based debt at 6.37% for the three-year period from February 11, 2008 to February 11, 2011. During 2008, the interest rate swaps became ineffective primarily due to the 3% minimum LIBOR rate in the Amended and Restated Credit Facility as the swaps do not contain a rate floor.

We also have interest rate risk related to our portfolio of marketable securities and money market accounts. Our marketable securities and money market accounts will produce less income than expected if market interest rates fall.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of

Dice Holdings, Inc.

Des Moines, Iowa

We have audited the accompanying consolidated balance sheets of Dice Holdings, Inc. and subsidiaries (the Company) as of December 31, 2008 and 2007, and the related consolidated statements of operations, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2008. Our audits also included the financial statement schedules listed in the Index at Item 15. These financial statements and financial statement schedules are the responsibility of the Company's management. Our responsibility is to express an opinion on the financial statements and financial statement schedules based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Dice Holdings, Inc. and subsidiaries as of December 31, 2008 and 2007, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2008, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such financial statement schedules, when considered in relation to the basic consolidated financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2008, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 18, 2009 expressed an unqualified opinion on the Company's internal control over financial reporting.

DICE HOLDINGS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. ORGANIZATION AND PRINCIPAL ACTIVITIES

Dice Holdings, Inc. (DHI or the Company), a Delaware corporation, was incorporated on June 28, 2005 to acquire the stock of Dice Inc. (Dice) and its subsidiaries, Dice Career Solutions, Inc. (DCSI), MUP, Inc. (MeasureUp), EW Knowledge Products, Inc. (EWKP) and Dice India Holdings, Inc. (Dice India) (the Dice Inc. Acquisition). On October 31, 2006, the Company acquired eFinancialGroup Limited (eFG) including its two subsidiaries, eFinancialCareers Limited (eFC) and JobsintheMoney.com, Inc (JitM) (the eFinancialGroup Acquisition). See Note 4.

The Company provides online recruiting and career development services. DHI provides services to hire, train and retain technology, engineering, finance, accounting, financial services and security-cleared professionals through its principal operating subsidiaries. DCSI operates career management services for technology, engineering and security-cleared professionals. DHI, through its subsidiaries eFC and JitM, operates career management services for finance, accounting and financial services professionals. See Note 4.

2. SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation The consolidated financial statements include the accounts of DHI and its majority owned subsidiaries, Dice, DCSI, MeasureUp, EWKP, and its variable interest entity, Dice India, and, for the period subsequent to October 31, 2006, eFG, eFC, and JitM. All intercompany balances and transactions have been eliminated in consolidation.

Revenue Recognition The Company recognizes revenue when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable and collectibility is reasonably assured. Revenue is recognized net of customer discounts ratably over the service period. Payments received in advance of services being rendered are recorded as deferred revenue and recognized on a straight-line basis over the service period. The Company generates revenue from the following sources:

Recruitment packages. Recruitment package revenues are derived from the sale to recruiters and employers a combination of job postings and access to a searchable database of candidates on the Dice.com, Clearancejobs.com, efinancialcareers.com, and Jobsinthemoney.com websites. Certain of the Company's arrangements include multiple deliverables, which consist of access to job postings and access to a searchable database of candidates. In the absence of higher-level specific authoritative guidance, the Company determines the units of accounting for multiple element arrangements in accordance with Emerging Issues Task Force (EITF) Issue No. 00-21, *Revenue Arrangements with Multiple Deliverables*. Specifically, the Company will consider a delivered item as a separate unit of accounting if it has value to the customer on a standalone basis, if there is objective and reliable evidence of the fair value of the undelivered elements, and, if the arrangement includes a general right of return relative to the delivered element, delivery or performance of the undelivered element is considered probable and is substantially within the Company's control. Services to customers buying a package of available job postings and access to the database are delivered over the same period and revenue is recognized ratably over the length of the underlying contract, typically from one to twelve months. Revenue from the sale of classified job postings is recognized ratably over the length of the contract or the period of actual usage, if shorter.

Job fair booth rentals. Job fair revenues are derived from renting booth space to recruiters and employers. Revenue from these sales is recognized when the job fair is held. Certain customers purchase access to resumes obtained at these career fairs, which revenue is recognized on a per event basis over the period of the contract.

Advertising revenue. Advertising revenue is recognized over the period in which the advertisements are displayed on the websites or at the time an e-mail is sent to registered members.

Table of Contents**DICE HOLDINGS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

Concentration of Credit Risk Substantially all of the Company's cash, cash equivalents and marketable securities have been invested in a diversified portfolio of high quality money market instruments, debt instruments of U.S. government agencies and corporate debt securities with readily determinable quoted market values. The money market instruments comprise short-term bank deposits and money market funds invested in U.S. treasury securities, U.S. government agency securities, European government securities and United Kingdom government securities. The Company believes it is not exposed to any significant credit risk.

The Company performs ongoing credit evaluations of its customers' financial condition and generally does not require collateral on accounts receivable. No single customer represents 10% or more of revenues for the years ended December 31, 2008, 2007 and 2006.

Allowance for Doubtful Accounts The Company maintains allowances for doubtful accounts for estimated losses resulting from the inability of its customers to make required payments. If the financial condition of Dice's customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required.

Statements of Cash Flows All bank deposits and money market accounts are considered cash and cash equivalents.

The supplemental disclosures to the accompanying consolidated statements of cash flows are as follows (in thousands):

	For the year ended December 31,		
	2008	2007	2006
Supplemental cash flow information:			
Interest paid	\$ 8,026	\$ 12,846	\$ 3,809
Taxes paid	6,553	320	816
Non-cash investing and financing activities:			
Issuance of preferred stock to acquire eFinancialGroup Limited	\$		\$ 25,174
Capital expenditures on fixed assets included in accounts payable and accrued expenses	57	59	323
Costs for IPO included in accounts payable and accrued expenses		358	

Marketable Securities The Company's marketable securities are generally comprised of U.S. government and agency securities and corporate debt securities with readily determinable quoted market values. Marketable securities are classified and accounted for as available-for-sale and are reported at fair market value with the resulting net unrealized gains or losses reported as a separate component of stockholders' equity. If management determines that an unrealized loss is other-than-temporary, such loss will be charged to the statement of operations. There were no other-than-temporary charges during 2008, 2007 or 2006.

Fixed Assets Depreciation of equipment, furniture and fixtures, computer software and capitalized website development costs are provided under the straight-line method over estimated useful lives ranging from two to five years. Amortization of leasehold improvements is provided over the shorter of the term of the related lease or the estimated useful life of the improvement. The cost of additions and betterments is capitalized, and repairs and maintenance costs are charged to operations in the periods incurred.

Capitalized Software Costs Capitalized software costs consist of costs to purchase and develop software for internal use. The Company capitalizes certain incurred software development costs in accordance with the AICPA issued Statement of Position No. 98-1, *Accounting for the Cost of Computer Software Developed or*

Table of Contents

DICE HOLDINGS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Obtained for Internal Use (SOP 98-1). Costs incurred during the application-development stage for software bought and further customized by outside vendors for the Company's use and software developed by a vendor for the Company's proprietary use have been capitalized.

Website Development Costs The Company capitalizes certain costs incurred in designing, developing, testing and implementing enhancements to its websites. These costs are amortized over the enhancement's estimated useful life, which approximates two years. Costs related to the planning and post implementation phases of website development efforts are expensed as incurred.

Goodwill Goodwill is recorded when the purchase price paid for an acquisition exceeds the estimated fair value of the net identified tangible and intangible assets acquired. The Company performs an annual test in the third quarter of each year for the goodwill from the Dice Inc. Acquisition, and during the fourth quarter of each year for the goodwill from the eFinancialCareers Acquisition, or more frequently if indicators of potential impairment exist, to determine if the carrying value of the recorded goodwill is impaired. The impairment review process compares the fair value of the reporting unit in which goodwill resides to its carrying value. Fair value is determined either using a discounted cash flow methodology under the income approach or a combination of the income and market approaches, depending on the reporting unit being valued. The determination of whether or not goodwill has become impaired involves a significant level of judgment in the assumptions underlying the approach used to determine the value of the Company's reporting units. Changes in the Company's strategy and/or market conditions could significantly impact these judgments and require adjustments to recorded amounts of goodwill.

A non-cash charge of \$7.2 million was recorded during the year ended December 31, 2008 for the impairment of goodwill at eFinancialCareers U.S. reporting unit. The fair value of this reporting unit was determined by a discounted cash flow methodology. Cash flow projections for this reporting unit decreased significantly during the fourth quarter of 2008 due to the decline in recruitment activity in financial services. The loss is recorded as Impairment of goodwill and intangible assets on the Consolidated Statements of Operations.

Indefinite-Lived Acquired Intangible Assets The indefinite-lived acquired intangible assets include the Dice trademarks and brand name. The Company performs an annual test in the third quarter of each year for the infinite-lived acquired intangible asset from the Dice Inc. Acquisition, or more frequently if indicators of potential impairment exist, to determine if the carrying value of the recorded indefinite-lived acquired intangible assets are impaired. The impairment review process compares the fair value of the indefinite-lived acquired intangible assets to their carrying value. Fair value is determined using the profit allocation method. The determination of whether or not indefinite-lived acquired intangible asset have become impaired involves a significant level of judgment in the assumptions underlying the approach used to determine the value of the indefinite-lived acquired intangible assets. Changes in the Company's strategy and/or market conditions could significantly impact these judgments and require adjustments to recorded amounts of indefinite-lived intangible assets.

Foreign Currency Translation For the Company's foreign operations whose functional currency is not the U.S. dollar, the assets and liabilities are translated into U.S. dollars at current exchange rates. Resulting translation adjustments are reflected as other comprehensive income (loss) in stockholders' equity. Revenue and expenses are translated at average exchange rates for the period. Transaction gains and losses that arise from exchange rate fluctuations on transactions denominated in a currency other than the functional currency are included in the results of operations as incurred.

Advertising Costs The Company expenses advertising costs as they are incurred. Advertising expense for the years ended December 31, 2008, 2007 and 2006 was \$33.2 million, \$31.4 million, \$19.0 million, respectively.

Table of Contents

DICE HOLDINGS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Income Taxes The Company recognizes deferred taxes by the asset and liability method. Under this method, deferred income taxes are recognized for differences between the financial statement and tax bases of assets and liabilities at enacted statutory tax rates in effect for the years in which the differences are expected to reverse. The effect on deferred taxes of a change in tax rates is recognized in income in the period that includes the enactment date. In addition, valuation allowances are established when necessary to reduce deferred tax assets to the amounts expected to be realized. The primary sources of temporary differences are stock based compensation, amortization of intangible assets, net operating loss carry forwards and deferred revenue.

Stock-Based Compensation The Company has two plans to grant stock options to certain employees and directors of the Company and its subsidiaries. See Note 12.

Fair Value of Financial Instruments The carrying amounts reported in the consolidated balance sheet for cash and cash equivalents, accounts receivable, and accounts payable and accrued expenses approximate their fair values. The estimated fair value of long-term debt, as of December 31, 2008 and 2007 was approximately \$64 million and \$119 million, respectively, based on an estimate of current rates for debt of the same remaining maturities.

Risks and Uncertainties DHI has a limited operating history and its prospects are subject to the risks, expenses and uncertainties frequently encountered by companies in the new and rapidly evolving markets for internet products and services. These risks include the failure to develop and extend the Company's online service brands, the rejection of the Company's services by consumers, vendors and/or advertisers, the inability of the Company to maintain and increase the levels of traffic on its online services, as well as other risks and uncertainties. In the event that the Company does not successfully execute its business plan, certain assets may not be recoverable.

Use of Estimates The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities as of the date of the financial statements, and reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. DHI's significant estimates include the useful lives and valuation of fixed assets and intangible assets; the income tax valuation allowance; fair value of the common and preferred stock of the Company; the assumptions used to value the stock options of the Company; and the valuation of assets acquired and liabilities assumed from acquisitions.

Reclassification A reclassification on the Consolidated Statements of Cash Flows was made to combine the cash flows from discontinued operations with cash flows from continuing operations as allowed by FASB Statement No. 95, *Statement of Cash Flows*.

Net Income (Loss) per Common and Common Equivalent Share The Company follows FASB Statement No. 128, Earnings Per Share, and EITF Issue No. 03-6, *Participating Securities and the Two-Class Method under FASB Statement 128*, (EITF 03-6). EITF 03-6 established standards regarding the computation of earnings per share (EPS) by companies that have issued securities other than common stock that contractually entitle the holder to participate in dividends and earnings of the company. EITF 03-6 requires earnings available to common shareholders for the period, after deduction of convertible preferred stock dividends, to be allocated between the common and convertible preferred shareholders based on their respective rights to receive dividends. Basic EPS is then calculated by dividing income allocable to common shareholders (including the reduction for any undeclared, preferred stock dividends assuming current income for the period had been distributed) by the weighted average number of shares outstanding. EITF 03-6 does not require the presentation of basic and diluted EPS for securities other than common stock; therefore, the EPS amounts only pertain to the Company's common

Table of Contents**DICE HOLDINGS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

stock. The Company calculates diluted EPS under the if-converted method unless the conversion of the convertible preferred stock is anti-dilutive to basic EPS. To the extent convertible preferred stock is anti-dilutive, the Company calculates diluted EPS under the two class method to include the effect of potential common shares. See Note 16.

New Accounting Pronouncements In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures for each major asset and liability category measured at fair value on either a recurring or nonrecurring basis. As a basis for considering assumptions, SFAS 157 establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value as follows:

Level 1 Quoted prices for identical instruments in active markets.

Level 2 Quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active and model-derived valuations, in which all significant inputs are observable in active markets

Level 3 Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

SFAS 157 does not impose fair value measurements on items not already accounted for at fair value; rather it applies, with certain exceptions, to other accounting pronouncements that either require or permit fair value measurements. SFAS 157 is effective for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. FASB Staff Position 157-2: *Effective Date of FASB Statement No. 157* (FSP 157-2) delayed the implementation of SFAS 157 for certain non-financial assets and liabilities. The Company partially adopted SFAS 157 in the first quarter of 2008. The adoption did not have an impact on the Company's consolidated financial statements. The Company did not adopt SFAS 157 as it relates to goodwill and other intangible assets due to the delay allowed by FSP 157-2. Money market funds are included in Cash and cash equivalents on the Consolidated Balance Sheets. The money market funds and marketable securities are valued using quoted prices in the market. The interest rate hedge liabilities are valued using observable inputs from a third party provider. The assets and liabilities measured at fair value on a recurring basis are as follows as of December 31, 2008 (in thousands):

	Fair Value Measurements Using			Total as of December 31, 2008
	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
Money market funds	\$ 33,957	\$	\$	\$ 33,957
Marketable securities	6,496			6,496
Interest rate hedge liability		2,568		2,568

In February 2007, the FASB issued Statement of Financial Accounting Standards No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (SFAS 159). SFAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value and establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. Unrealized gains and losses on items for which the fair value option has been elected are reported in earnings at each subsequent reporting date. SFAS 159 was effective for fiscal years beginning after December 15, 2007. The Company adopted SFAS 159 in the first quarter of 2008 choosing not to elect the fair value measurement option for any of its assets and liabilities, therefore resulting in

Table of Contents**DICE HOLDINGS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

no changes to its consolidated financial statements. The Company will continue to evaluate items on a case-by-case basis for consideration of the fair value option.

In December 2007, the FASB issued Statement of Financial Accounting Standards No. 141R, *Business Combinations* and Statement No. 160, *Noncontrolling Interests in Consolidated Financial Statements - an amendment of ARB No. 51*. These statements change the accounting for business combinations and noncontrolling interests (minority interests in current U.S. GAAP) including requiring more assets acquired and liabilities assumed to be measured at fair value, requiring liabilities related to contingent consideration to be remeasured at fair value in each subsequent reporting period, requiring the acquirer in preacquisition periods to expense all acquisition-related costs and requiring noncontrolling interests in subsidiaries initially to be measured at fair value and classified as a separate component of equity. Both statements are to be applied prospectively and were adopted by the Company on January 1, 2009. The standards have no impact to the Company's financial statements in 2008.

3. DISCONTINUED OPERATIONS

MeasureUp The Company provided certification test preparation and assessment products for technology professionals through its subsidiary, MUP, Inc. (formerly known as MeasureUp, Inc.) (MeasureUp). In February 2007, the Company decided to abandon the MeasureUp business after assessing the long-term economic viability of MeasureUp in light of its projected operating losses, the lack of an operational or strategic fit with the Company's core business, and after unsuccessfully attempting to sell the business. All significant business activities of MeasureUp were ceased on March 30, 2007. Accordingly, the Company reflects the related assets, liabilities, and results of operations from this segment as discontinued operations for all periods presented. Expenses that are not directly identified to MeasureUp or are considered corporate overhead have not been allocated to this segment in arriving at results from discontinued operations.

Summary results of operations for the former MeasureUp operating segment prior to ceasing operations were as follows (in thousands):

	For the year ended December 31,	
	2007	2006
Revenues	\$ 835	\$ 3,476
Operating expenses:		
Cost of revenues	173	521
Product development	600	1,282
Sales and marketing	288	929
General and administrative	332	513
Depreciation	16	83
Amortization		570
Impairment of intangible assets		1,040
Other expense (income)	(331)	
Total operating expenses	1,078	4,938
Operating loss	(243)	(1,462)
Income tax benefit	3,997	541
Income (loss) from discontinued operations	\$ 3,754	\$ (921)

Table of Contents**DICE HOLDINGS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

There were no assets or liabilities associated with MeasureUp as of December 31, 2008 or 2007. The income tax benefit in 2007 is the result of abandoning the operations of MeasureUp. Intangible assets related to MeasureUp were written off in 2006. There was no goodwill associated with MeasureUp.

Dice India Dice India entered into a joint venture agreement with CyberMedia (India) Limited (CyberMedia) in 2004 to form CyberMedia Dice (CMD), an online technology-focused career website for the posting of technology-related jobs based in India. Dice India, a wholly owned subsidiary of Dice Holdings, Inc., owned a majority of CMD. During the fourth quarter of 2007, Dice India decided to exit the joint venture, after assessing the long-term economic viability of the business in light of its operating losses. The Company sold its interest in the joint venture to an affiliate of CyberMedia in January 2008. Accordingly, the Company has reflected the related assets, liabilities, and results of operations from this segment as discontinued operations for all periods presented. Expenses that are not directly identified to Dice India or are considered corporate overhead have not been allocated to this segment in arriving at results from discontinued operations. Summary results of operations for Dice India were as follows (in thousands):

	For the year ended December 31,		
	2008	2007	2006
Revenues	\$ 37	\$ 501	\$ 260
Operating expenses:			
Cost of revenues	14	254	196
Sales and marketing	40	1,132	1,044
General and administrative	75	354	195
Depreciation		102	130
Total operating expenses	129	1,842	1,565
Operating loss	(92)	(1,341)	(1,305)
Gain on sale of joint venture	611		
Income tax benefit (expense)		(16)	469
Minority interest income (loss)		(134)	296
Income (loss) from discontinued operations	\$ 519	\$ (1,491)	\$ (540)

The assets and liabilities of Dice India were as follows as of December 31, 2007 (in thousands):

Cash	\$ 5
Prepaid and other current assets	190
Current assets of discontinued operations	\$ 195
Fixed assets, net	\$ 135
Non-current assets of discontinued operations	\$ 135
Accounts payable and accrued expenses	\$ 1,288
Deferred revenue	95
Other liabilities	21

Current liabilities of discontinued operations	\$ 1,404
--	----------

4. ACQUISITION OF eFINANCIALGROUP LIMITED

On October 31, 2006, DHI acquired all of the outstanding shares of eFG which operates career management services for finance, accounting and capital markets and financial services professionals. At the time of the

Table of Contents**DICE HOLDINGS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

acquisition, eFG was comprised of (1) eFinancialCareers Limited, a global financial markets career website for capital markets and financial services professionals, (2) JobsintheMoney.com, a career website for accounting and finance professionals in the United States, and (3) eFinancialNews Limited (eFN), which publishes financial news periodicals.

DHI acquired all of the outstanding stock of eFG in exchange for a total of \$106.3 million in cash and 3,628,992 shares of convertible preferred stock of DHI valued at \$25.2 million, net of cash acquired of \$3.9 million. Each shareholder of eFG was given the option to receive cash, convertible preferred stock of DHI or a combination of both. The value of the preferred stock was based on the amount of cash that each eFG shareholder was entitled to receive in lieu of convertible preferred stock of DHI. Immediately after the acquisition of eFG, eFN was sold to a company controlled by a group of former eFG shareholders for total consideration of \$41.6 million, resulting in a net purchase price for the remaining eFG business, which was comprised of eFC and JitM, of \$89.9 million in cash and convertible preferred stock. The cash portion of the acquisition, including transaction costs, was financed by borrowings of \$67.0 million, plus cash on hand.

The Company incurred a total of \$3.2 million of direct costs associated with the transaction. Of that amount, \$0.9 million was capitalized as debt issuance costs. The remaining \$2.3 million was included as consideration paid in the allocation of the purchase price.

Factors that contributed to a purchase price resulting in goodwill for the purchase of eFG s assets included relationships with job seekers and customers, historical cash flow, executive experience (not tied to non-competition agreements) and the value of the workforce in place. The amortization of goodwill is not deductible for tax purposes.

The purchase price allocation is complete. Adjustments to goodwill during the year ended December 31, 2007 were related to income taxes. The purchase price allocation of eFG based upon management s estimates at the date of acquisition, in millions of dollars, is as follows:

Assets:	
Cash and cash equivalents	\$ 3.9
Accounts receivable	4.8
Prepaid and other current assets	0.2
Fixed assets	0.3
Acquired intangible assets	27.1
Goodwill	70.9
Other assets	41.6
Assets acquired	\$ 148.8
Liabilities:	
Accounts payable and accrued expenses	\$ 5.0
Deferred income taxes	8.8
Deferred revenue	1.2
Liabilities assumed	\$ 15.0

Table of Contents**DICE HOLDINGS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

The acquired intangible assets consist of the following, in millions of dollars:

Technology	\$ 2.7
Trademarks and brand names	7.2
Customer lists	12.1
Order backlog	1.4
Candidate database	3.5
Leasehold interests	0.2
Acquired intangible assets	\$ 27.1

The portion of the purchase price allocated to eFN is included above in Other assets. The \$41.6 million was received by DHI immediately subsequent to the closing of the sale of eFN on October 31, 2006.

The following pro forma condensed consolidated results of operations for the year ended December 31, 2006 assume that the acquisition of eFG was completed as of January 1, 2006 (in millions except per share amounts):

Revenues	\$ 101.7
Net loss	\$ (0.2)
Loss per share	\$ (123.43)

The pro forma financial information represents the historical operating results of the combined company with adjustments for purchase accounting and is not necessarily indicative of the results of operations that would have been achieved if the acquisition had taken place at the beginning of the periods presented. The pro forma adjustments included adjustments for interest on borrowings and amortization of acquired intangible assets and deferred financing costs as well as the related income tax impacts of such adjustments.

5. MARKETABLE SECURITIES

DHI's marketable securities are stated at fair value. The following tables summarize the Company's marketable securities as of December 31, 2008 and 2007 (in thousands):

	Maturity	As of December 31, 2008		Estimated Fair Value
		Gross Amortized Cost	Gross Unrealized Gain	
U.S. Government and agencies	Within one year	\$ 5,028	\$ 18	\$ 5,046
U.S. Government and agencies	1 to 5 years	1,404	36	1,440
Corporate debt securities	1 to 5 years	11		11
Total		\$ 6,443	\$ 54	\$ 6,497

Edgar Filing: DICE HOLDINGS, INC. - Form 10-K

		As of December 31, 2007		
	Maturity	Gross Amortized Cost	Gross Unrealized Gain	Estimated Fair Value
U.S. Government and agencies	Within one year	\$ 149	\$ 1	\$ 150

Table of Contents**DICE HOLDINGS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****6. FIXED ASSETS, NET**

Fixed assets, net consist of the following as of December 31, 2008 and 2007 (in thousands):

	2008	2007
Computer equipment and software	\$ 10,066	\$ 7,435
Furniture and fixtures	603	467
Leasehold improvements	1,560	1,627
Capitalized website development costs	1,966	1,096
	14,195	10,625
Less: Accumulated depreciation and amortization	(8,257)	(4,857)
Fixed assets, net	\$ 5,938	\$ 5,768

7. ACQUIRED INTANGIBLE ASSETS, NET

In September 2007, the Company launched a redesigned JobsintheMoney website with an expectation that, together with an increased investment in marketing, overall performance for employers, recruiters, and finance and accounting professionals would improve. While the functionality of the website improved, there was no measurable improvement in financial performance. Therefore, the carrying value of the intangible assets for JobsintheMoney, acquired as part of the eFinancialGroup Acquisition, was reduced to zero from \$2.9 million during 2007.

Below is a summary of the major acquired intangible assets and the weighted average amortization period for the acquired identifiable intangible assets (in thousands):

	As of December 31, 2008				Weighted Average Amortization Period
	Cost	Accumulated Amortization	Foreign Currency Translation Adjustment	Acquired Intangible Assets, Net	
Technology	\$ 12,420	\$ (10,168)	\$ (126)	\$ 2,126	3.75 years
Trademarks and brand names Dice	39,000			39,000	Indefinite
Trademarks and brand names Other	6,400	(3,086)	(644)	2,670	5 years
Customer lists	36,361	(23,035)	(953)	12,373	4.5 years
Candidate database	17,440	(14,427)	(63)	2,950	3.75 years
Acquired intangible assets, net	\$ 111,621	\$ (50,716)	\$ (1,786)	\$ 59,119	

	As of December 31, 2007				Weighted Average Amortization Period
	Cost	Accumulated Amortization	Foreign Currency Translation Adjustment	Impairment	

Edgar Filing: DICE HOLDINGS, INC. - Form 10-K

Technology	\$ 12,700	\$ (6,926)	\$ 149	\$ (280)	\$ 5,643	3.75 years
Trademarks and brand names Dice	39,000				39,000	Indefinite
Trademarks and brand names Other	7,600	(1,888)	292	(1,200)	4,804	5 years
Customer lists	36,700	(15,222)	529	(339)	21,668	4.5 years
Order backlog	2,000	(2,037)	37			
Candidate database	18,500	(10,050)	67	(1,060)	7,457	3.75 years
Leasehold interests	154	(162)	8			
Acquired intangible assets, net	\$ 116,654	\$ (36,285)	\$ 1,082	\$ (2,879)	\$ 78,572	

Table of Contents**DICE HOLDINGS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

Based on the carrying value of the acquired finite-lived intangible assets recorded as of December 31, 2008, and assuming no subsequent impairment of the underlying assets, the estimated future amortization expense is as follows (in thousands):

2009	\$ 13,304
2010	6,078
2011	737

Indefinite Life on Trade Name

The Dice.com Trade Name / Trademark / Domain Name is one of the most recognized names of online job boards. Since Dice's inception in 1991, the brand has been recognized as a leader in recruiting and career development services for technology and engineering professionals. Currently, the brand is synonymous with the most specialized online marketplace for technology industry-specific talent. The brand has significant online and offline presence in online recruiting and career development services. Considering the recognition of the brand, its long history, awareness in the talent acquisition and staffing services market, and the intended use, the remaining useful life of the Dice.com Trade Name / Trademark / Domain Name was determined to be indefinite.

8. INDEBTEDNESS

On March 21, 2007, the Company entered into an Amended and Restated Financing Agreement (the Amended and Restated Credit Facility), resulting in total borrowings of \$194.0 million. The Amended and Restated Credit Facility provides for a revolving credit facility of \$75.0 million and a term loan facility of \$125.0 million, and matures on March 21, 2012. Borrowings under the facility bear interest, at the Company's option, at the LIBOR Rate plus 3.25% or Reference Rate plus 1.75%. The Company began making mandatory quarterly payments on the term loan facility of \$250,000 in September 2007. Payments of principal on the term loan facility result in permanent reductions to that facility.

Immediately prior to entering into the amended agreement, the Company had \$81.0 million outstanding under the then existing facility. On March 21, 2007, the Company borrowed an additional \$113.0 million under the amended agreement. The Company used a portion of the net proceeds that it received from its initial public offering on July 23, 2007 to repay \$51.0 million of the outstanding indebtedness under the Amended and Restated Credit Facility. Total payments of \$42.9 million were made on the Term Loan during 2008. In addition to making the quarterly amortization payment on the term loan in January 2009, the Company prepaid \$10.0 million in mid-January 2009 and an additional \$10.0 million in early February 2009. All payments were made on the Term Loan and resulted in outstanding borrowings of \$61.2 million as of February 9, 2009. The \$72.3 million available under the revolving credit facility remains undrawn.

The Company's existing and future domestic subsidiaries unconditionally guarantee borrowings under the Amended and Restated Credit Facility. The obligations under the Amended and Restated Credit Facility and the guarantees are secured by substantially all of the personal assets of each of the borrowers and guarantors.

The Amended and Restated Credit Facility also contains certain financial covenants, including the following:

Senior Leverage Ratio, which requires the ratio of senior debt to adjusted EBITDA for the most recently completed 12 months to exceed certain thresholds. The senior leverage ratio is tested on a quarterly basis. As of December 31, 2008, the senior leverage ratio was required to be no greater than 3.50:1.00.

Table of Contents**DICE HOLDINGS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

Fixed Charge Coverage Ratio, which requires the ratio of (i) adjusted EBITDA for the most recently completed 12 months less income tax expense and capital expenditures to (ii) the sum of scheduled debt repayments and net interest expense to be in excess of certain thresholds. The fixed charge coverage ratio is tested on a quarterly basis. As of December 31, 2008 the fixed charge coverage ratio was required to be in excess of 1.50:1.00.

Minimum Adjusted EBITDA, requires adjusted EBITDA for the most recently completed 12 months to exceed certain thresholds if the senior leverage ratio is greater than or equal to 3.0:1.0. Minimum Adjusted EBITDA is tested on a quarterly basis. As of December 31, 2008, minimum adjusted EBITDA would have been required to be \$50.0 million if our senior leverage ratio had been equal to or greater than 3.0:1.0.

The Company is also subject to a cap on annual capital expenditures and is limited in the ability to make certain acquisitions, to hedge currency and interest rate risks, to repurchase its stock, and to pay dividends. As of December 31, 2008, the Company was in compliance with all of the financial and other covenants under our Amended and Restated Credit Facility.

The terms of the Amended and Restated Financing Agreement require the annual prepayment of a portion of the debt based on an annual determination of excess cash flow, as defined under the agreement, and on the leverage ratio at the end of each calendar year. The prepayment is applied 75% to the Revolving Loan Facility and 25% to the Term Loan Facility. The excess cash flow reflects Adjusted EBITDA, reduced for certain items, including cash interest payments, the quarterly mandatory payments and loan servicing fees. For the period ended December 31, 2007, an excess cash flow payment of \$2.1 million was paid during 2008. Due to voluntary payments made on the debt during 2008, the Company will not be required to make an excess cash flow payment on the Term Loan Facility during 2009.

The amounts borrowed and terms of the financing agreement as of December 31, 2008 and 2007 are as follows (dollars in thousands):

	December 31, 2008	December 31, 2007
Maximum Available Under Revolving Credit Facility	\$ 72,250	\$ 75,000
Maximum Available Under Term Loan Facility	\$ 81,500	\$ 124,400
Amounts Borrowed:		
LIBOR Rate Loans	\$ 81,200	\$ 108,400
Reference Rate Loans	300	16,000
 Total Borrowed	 \$ 81,500	 \$ 124,400
Interest Rates:		
LIBOR Option:		
Interest Margin	3.25
