SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended July 31, 2010

or

TRANSITION REPORT PURSUANT TO SECTION 13 or 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number: 000-30877

Marvell Technology Group Ltd.

(Exact name of registrant as specified in its charter)

Edgar Filing: MARVELL TECHNOLOGY GROUP LTD - Form 10-Q

Bermuda **77-0481679**
(State or other jurisdiction of **(I.R.S. Employer**
incorporation or organization) **Identification No.)**
Canon s Court, 22 Victoria Street, Hamilton HM 12, Bermuda

(441) 296-6395

(Address, including Zip Code, of principal executive offices and
registrant s telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company
Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of common shares of the registrant outstanding as of August 20, 2010 was 650.6 million shares.

MARVELL TECHNOLOGY GROUP LTD.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 1. The Company and Basis of Presentation

The Company

Marvell Technology Group Ltd., a Bermuda company (the Company), is a leading global semiconductor provider of high-performance application-specific standard products. The Company's core strength of expertise is the development of complex system-on-a-chip devices leveraging its extensive technology portfolio of intellectual property in the areas of analog, mixed-signal, digital signal processing and embedded ARM-based microprocessor integrated circuits. The Company's broad product portfolio includes devices for data storage, enterprise-class Ethernet data switching, Ethernet physical-layer transceiver handheld cellular, Ethernet-based wireless networking, personal area networking, Ethernet-based PC connectivity, control plane communications, powerline communications, video-image processing and power management solutions.

Basis of presentation

The Company's fiscal year is the 52- or 53-week period ending on the Saturday closest to January 31. In a 52-week year, each fiscal quarter consists of 13 weeks. The additional week in a 53-week year is added to the fourth quarter, making such quarter consist of 14 weeks. Fiscal 2011 and fiscal 2010 are comprised of 52-week periods.

The unaudited interim condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and notes required by GAAP for annual financial statements. In the opinion of management, all adjustments consisting of normal and recurring entries considered necessary for a fair statement of the results for the interim periods have been included in the Company's financial position as of July 31, 2010, the results of its operations for the three and six months ended July 31, 2010 and August 1, 2009, and its cash flows for the six months ended July 31, 2010 and August 1, 2009. The January 30, 2010 condensed consolidated balance sheet data was derived from audited consolidated financial statements included in the Company's Annual Report on Form 10-K for the year ended January 30, 2010 but does not include all disclosures required for annual periods. Certain reclassifications have been made to conform to the current period's presentation.

These condensed consolidated financial statements and related notes are unaudited and should be read in conjunction with the Company's audited financial statements and related notes for the year ended January 30, 2010 included in the Company's Annual Report on Form 10-K for the year ended January 30, 2010 as filed on March 31, 2010 with the Securities and Exchange Commission. The results of operations for the three and six months ended July 31, 2010 are not necessarily indicative of the results that may be expected for any other interim period or for the full fiscal year.

Use of estimates

The preparation of consolidated financial statements in conformity with GAAP in the United States requires management to make estimates, judgments and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, the Company evaluates its estimates, including those related to performance-based compensation, uncollectible receivables, inventory excess and obsolescence, investment fair values, goodwill and other intangible assets, income taxes, revenue recognition and contingencies. In addition, the Company uses assumptions when employing the Black-Scholes option valuation model to calculate the fair value of stock-based awards granted. Actual results could differ from these estimates, and such differences could affect the results of operations reported in future periods.

Principles of consolidation

The unaudited condensed consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All intercompany accounts and transactions have been eliminated. The functional currency of the Company and its subsidiaries is the United States dollar.

Table of Contents**MARVELL TECHNOLOGY GROUP LTD.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 2. Recent Accounting Pronouncements and Accounting Changes**

In September 2009, the FASB issued new accounting guidance related to the revenue recognition of multiple element arrangements. The new guidance states that if vendor specific objective evidence or third party evidence for deliverables in an arrangement cannot be determined, companies will be required to develop an estimate of the selling price to separate deliverables and allocate arrangement consideration using the relative selling price method. The accounting guidance was adopted during the three months ended May 1, 2010, however, as the Company does not generally enter into multiple element arrangements, its adoption did not impact the Company's financial position or results of operations.

In December 2009, the Financial Accounting Standard Board (the FASB) issued revised guidance that amends the consolidation rules related to variable interest entities by replacing the previous quantitative-based analysis with a framework that is based more on qualitative judgments. The determination of whether a company is required to consolidate an entity is based on, among other things, an entity's purpose and design, a company's ability to direct the activities of the entity that most significantly impact the entity's economic performance and an a company's obligation to absorb losses or a right to receive benefits that could potentially be significant to the variable interest entity. This guidance requires ongoing reassessments of whether an enterprise is the primary beneficiary of the variable interest entity. This guidance became effective during the three months ended May 1, 2010 and its adoption did not have a material impact on the Company's financial position or results of operations.

In January 2010, the FASB issued guidance that expands the interim and annual disclosure requirements of fair value measurements, including the information about movement of assets between Level 1 and 2 of the three-tier fair value hierarchy established under its fair value measurement guidance. This guidance also requires separate disclosure for purchases, sales, issuances and settlements in the reconciliation for fair value measurements using significant unobservable inputs using Level 3 methodologies. Except for the detailed disclosure in the Level 3 reconciliation, which is effective for the fiscal years beginning after December 15, 2010, all the other disclosures under this guidance became effective during the three months ended May 1, 2010. The adoption of this guidance did not have a material impact on the Company's financial position or results of operations.

Note 3. Investments

The following tables summarize the Company's investments (in thousands):

		As of July 31, 2010		
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Short-term investments:				
Available-for-sale:				
Corporate debt securities	\$ 536,980	\$ 2,512	\$ (251)	\$ 539,241
U.S. government and agencies	509,876	691	(9)	510,558
Total short-term investments	\$ 1,046,856	\$ 3,203	\$ (260)	\$ 1,049,799
Long-term investments:				
Available-for-sale:				
Auction rate securities	\$ 36,450	\$	\$ (2,266)	\$ 34,184
Total long-term investments	\$ 36,450	\$	\$ (2,266)	\$ 34,184
Total investments	\$ 1,083,306	\$ 3,203	\$ (2,526)	\$ 1,083,983

Table of Contents**MARVELL TECHNOLOGY GROUP LTD.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

	Amortized Cost	As of January 30, 2010		Estimated Fair Value
		Gross Unrealized Gains	Gross Unrealized Loss	
Short-term investments:				
Available-for-sale:				
Corporate debt securities	\$ 227,610	\$ 934	\$ (75)	\$ 228,469
U.S. government and agencies	457,592	258	(30)	457,820
Trading securities:				
Auction rate security and settlement option	5,000			5,000
Total short-term investments	\$ 690,202	\$ 1,192	\$ (105)	\$ 691,289
Long-term investments:				
Available-for-sale:				
Auction rate securities	\$ 36,600	\$	\$ (2,319)	\$ 34,281
Total long-term investments	\$ 36,600	\$	\$ (2,319)	\$ 34,281
Total investments	\$ 726,802	\$ 1,192	\$ (2,424)	\$ 725,570

As of July 31, 2010, the Company's investment portfolio included \$36.5 million in par value of auction rate securities. Beginning in February 2008, liquidity issues in the global credit markets resulted in a failure of auction rate securities, as the amount of securities submitted for sale in those auctions exceeded the amount of bids. To estimate the fair value of the auction rate securities since that time, the Company used a discounted cash flow model based on estimated timing and amount of future interest and principal payments, credit quality of the underlying securities and illiquidity considerations, the collateralization of underlying security investments, the credit worthiness of the issuer of the securities, the probability of full repayment and other considerations. As of July 31, 2010, the fair value of auction rate securities was \$2.3 million less than par value and was recorded in long-term investments. During the three months ended July 31, 2010, the Company sold one \$5 million auction rate security.

Based on the Company's assessment of its cash flow projections, a balance of approximately \$2.4 billion in cash, cash equivalents and short-term investments other than auction rate securities and the fact that the Company continues to generate positive cash flow on a quarterly basis, the Company does not anticipate having to sell these securities below par value in order to operate its business. The Company does not have the intent to sell these auction rate securities until recovery and it is more likely than not that it will not be required to sell the auction rate securities prior to recovery. Thus, the Company considers the impairment to be temporary and recorded the unrealized loss to accumulated other comprehensive income (loss), a component of shareholders' equity.

The contractual maturities of available-for-sale and trading debt securities excluding cash and cash equivalents at July 31, 2010, and January 30, 2010 are presented in the following table (in thousands):

	July 31, 2010		January 30, 2010	
	Amortized Cost	Estimated Fair Value	Amortized Cost	Estimated Fair Value
Due in one year or less	\$ 489,515	\$ 489,933	\$ 357,179	\$ 357,348
Due between one and five years	557,341	559,866	333,023	333,941
Due in over five years	36,450	34,184	36,600	34,281

Table of Contents**MARVELL TECHNOLOGY GROUP LTD.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****Net income (loss) per share***

The Company reports both basic net income (loss) per share, which is based upon the weighted average number of common shares outstanding and diluted net income (loss) per share, which is based on the weighted average number of common shares outstanding and dilutive potential common shares. The computations of basic and diluted net income (loss) per share are presented in the following table (in thousands, except per share amounts):

	Three Months Ended		Six Months Ended	
	July 31, 2010	August 1, 2009	July 31, 2010	August 1, 2009
Numerator:				
Net income (loss)	\$ 219,777	\$ 58,493	\$ 425,544	\$ (52,964)
Denominator:				
Weighted average common shares outstanding	648,028	620,881	644,477	619,779
Effect of dilutive securities:				
Common share options and other	27,192	27,229	32,162	
Weighted average shares diluted	675,220	648,110	676,639	619,779
Net income (loss) per share:				
Basic	\$ 0.34	\$ 0.09	\$ 0.66	\$ (0.09)
Diluted	\$ 0.33	\$ 0.09	\$ 0.63	\$ (0.09)

Options to purchase 12.7 million weighted-average shares at a weighted average exercise price of \$21.15 have been excluded from the computation of diluted net income per share for the three months ended July 31, 2010 because including them would have been anti-dilutive. Options to purchase 27.1 million weighted-average shares at a weighted average exercise price of \$17.08 have been excluded from the computation of diluted net income per share for the three months ended August 1, 2009 because including them would have been anti-dilutive.

Options to purchase 10.1 million weighted-average shares at a weighted average exercise price of \$22.03 have been excluded from the computation of diluted net income per share for the six months ended July 31, 2010 because including them would have been anti-dilutive. The effects of common share options, restricted stock units and other securities totaling 22.1 million shares were excluded from diluted net loss per share for the six months ended August 1, 2009 as the impact is anti-dilutive in net loss periods.

Comprehensive income (loss)

Table of Contents**MARVELL TECHNOLOGY GROUP LTD.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 5. Derivative Financial Instruments**

The Company manages some of its foreign currency exchange rate risk through the purchase of foreign currency exchange contracts that hedge against the short-term impact of currency fluctuations. The Company's policy is to enter into foreign currency forward contracts with maturities generally less than 12 months that mitigate the impact of rate fluctuations on certain local currency denominated operating expenses. All derivatives are recorded at fair value in either prepaids and other current assets or accrued liabilities. The Company reports cash flows from derivative instruments in cash flows from operating activities. The Company uses quoted prices to value its derivative instruments.

The notional amounts of outstanding hedge contracts were as follows (in thousands):

	July 31, 2010		January 30, 2010	
	Buy Contracts	Sell Contracts	Buy Contracts	Sell Contracts
Israeli shekel	\$ 43,155	\$	\$ 29,512	\$ (1,163)

Cash Flow Hedges. The Company designates and documents its foreign currency forward exchange contracts as cash flow hedges for certain operating expenses denominated in Israeli shekels. The Company evaluates and calculates the effectiveness of each hedge at least quarterly. The effective change is recorded in accumulated other comprehensive income (OCI) and is subsequently reclassified to operating expense when the hedged expense is recognized. Ineffectiveness is recorded in interest and other income, net.

Other Foreign Currency Forward Contracts. The Company enters into foreign currency forward exchange contracts to hedge certain payments denominated in Israeli shekels that it does not designate as hedges for accounting purposes. The maturities of these contracts are generally less than 12 months. Gains or losses arising from the remeasurement of these contracts to fair value each period are recorded in interest and other income, net.

The fair value and balance sheet classification of foreign exchange contract derivatives are as follows (in thousands):

	July 31, 2010	January 30, 2010
Prepaids and other current assets:		
Derivative assets designated as hedging instruments:		
Cash flow hedges	\$	\$ 836
Other forward contracts		(6)
Total derivative assets	\$	\$ 830
Accrued liabilities:		
Derivative assets designated as hedging instruments:		
Cash flow hedges	\$ 88	\$
Total derivative liabilities	\$ 88	\$

The following tables summarize the pre-tax effect of foreign exchange contract derivatives by cash flow hedges.

Cash Flow Hedges (in thousands):

Edgar Filing: MARVELL TECHNOLOGY GROUP LTD - Form 10-Q

	Three Months Ended		Six Months Ended	
	July 31, 2010	August 1, 2009	July 31, 2010	August 1, 2009
Accumulated OCI, beginning of period	\$ 540	\$ (1,076)	\$ 341	\$
Gains (losses) recorded in OCI (effective portion)	(267)	3,656	(17)	2,580
Losses reclassified from OCI to operating expense (effective portion)	(423)	(790)	(474)	(790)
Accumulated OCI, end of period	\$ (150)	\$ 1,790	\$ (150)	\$ 1,790

The Company anticipates reclassifying the accumulated loss recorded as of July 31, 2010 from accumulated other comprehensive income to operating expense within 12 months.

Table of Contents**MARVELL TECHNOLOGY GROUP LTD.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 6. Fair Value Measurements**

Fair value is an exit price representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or a liability. As a basis for considering such assumptions, the guidance establishes a three-tier value hierarchy, which prioritizes the inputs used in the valuation methodologies in measuring fair value:

Level 1 - Observable inputs that reflect quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 - Include other inputs that are directly or indirectly observable in the marketplace.

Level 3 - Unobservable inputs that are supported by little or no market activity.

The fair value hierarchy also requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

The Company measures its cash equivalents and marketable securities at fair value. The Company's cash equivalents and marketable securities are primarily classified within Level 1 and Level 2 with the exception of its investments in auction rate securities, which are classified within Level 3. The Company's investments in auction rate securities are classified within Level 3 because there are no active markets for the auction rate securities and therefore the Company is unable to obtain independent valuations from market sources. Therefore, the auction rate securities were valued using a discounted cash flow model. The total amount of assets measured using Level 3 valuation methodologies represented 0.6% of total assets as of July 31, 2010. Cash equivalents and marketable securities are valued primarily using quoted market prices utilizing market observable inputs. The Company's investments in corporate debt securities are classified within Level 2 as the market inputs to value these instruments consist of market yields, reported trades and broker/dealer quotes. In addition, foreign currency contracts are classified within Level 2 as the valuation inputs are based on quoted prices and market observable data of similar instruments.

The tables below set forth, by level, the Company's financial assets that were accounted for at fair value as of July 31, 2010 and January 30, 2010. The tables do not include assets and liabilities that are measured at historical cost or any basis other than fair value (in thousands):

	Level 1	Level 2	Level 3	Portion of Carrying Value Measured at Fair Value at July 31, 2010

* Upon completion of the project, the related in-process research and development (IPR&D) assets will be amortized over its estimated useful life. If any of the projects are abandoned, the Company will be required to impair the related IPR&D asset.

Based on the identified intangible assets recorded at July 31, 2010, the future amortization expense of identified intangibles excluding IPR&D for the next five fiscal years is as follows (in thousands):

Fiscal year	Amount
Reminder of fiscal 2011	\$ 35,416
2012	44,099
2013	37,365
2014	23,592
2015	1,731
Thereafter	977
	\$ 143,180

During the three months ended July 31, 2010, the Company purchased the assets of a company engaged in the development of powerline communication for home networking and broadband over powerline applications. Under the purchase method of accounting, the total purchase price was allocated to tangible and intangible assets based on their fair values as of the date of the completion of the purchase. The purchase price was not significant.

Table of Contents**MARVELL TECHNOLOGY GROUP LTD.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 8. Restructuring**

During the three months ended July 31, 2010, as a result of the anticipated sale of one of its facilities, the Company classified the carrying value of the building as held for sale within prepaids and other current assets. This resulted in a charge of \$1.1 million to write-down the carrying value to fair value in research and development. In addition, the Company continued to make payments and incur on-going operating expenses from its reserved facilities. During the six months ended July 31, 2010, the Company subleased one its reserved facilities and recorded an adjustment to the restructuring liabilities.

During the three months ended August 1, 2009, the Company continued to implement certain cost reduction measures that included reductions in workforce in all functions of the organization worldwide. As a result, a restructuring charge of \$5.0 million consisting of \$1.1 million of severance and related employee benefits to the terminated employees, \$1.5 million for equipment and other related charges and \$2.4 million for additional facilities impairment charges. During the six months ended August 1, 2009, a restructuring charge of \$13.3 million consisting of \$8.5 million of severance and related employee benefits to the terminated employees, \$2.4 million for equipment and other related charges and \$2.4 million for additional facilities impairment charges.

The following table sets forth an analysis of the components of the restructuring charges and the payments made (in thousands):

	Three Months Ended		Six Months Ended	
	July 31, 2010	August 1, 2009	July 31, 2010	August 1, 2009
Restructuring liabilities, beginning of period	\$ 4,964	\$ 7,367	\$ 5,397	\$ 7,685
Equipment and other related charges	520	1,516	888	2,432

MARVELL TECHNOLOGY GROUP LTD.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 9. Commitments and Contingencies

Purchase commitments

Under the Company's manufacturing relationships with its foundry partners, cancellation of all outstanding purchase orders are allowed but require repayment of all expenses incurred through the date of cancellation. As of July 31, 2010, these foundries had incurred \$407.3 million of manufacturing expenses on the Company's outstanding purchase orders.

Intellectual property indemnification

The Company has agreed to indemnify certain customers for claims made against the Company's products, where such claims allege infringement of third party intellectual property rights, including, but not limited to, patents, registered trademarks, and/or copyrights. Under the aforementioned indemnification clauses, the Company may be obligated to defend the customer and pay for the damages awarded against the customer under an infringement claim as well as the customer's attorneys' fees and costs. The Company's indemnification obligations generally do not expire after termination or expiration of the agreement containing the indemnification obligation. In certain cases, there are limits on and exceptions to the Company's potential liability for indemnification. Although historically the Company has not made significant payments under these indemnification obligations, the Company cannot estimate the amount of potential future payments, if any, that it might be required to make as a result of these agreements. The maximum potential amount of any future payments that the Company could be required to make under these indemnification obligations could be significant.

Contingencies

IPO Securities Litigation. In 2001, two putative class action lawsuits were filed in the United States District Court for the Southern District of New York concerning certain alleged underwriting practices related to the Company's initial public offering (the "IPO") on June 29, 2000. The actions were consolidated and a consolidated complaint was filed, naming as defendants certain investment banks that participated in the IPO, the Company, and two of its officers, one of whom is also a director. Plaintiffs claim that defendants violated certain provisions of the Securities Act of 1933, as amended, and the Securities Exchange Act of 1934, as amended (the "Exchange Act"), by allegedly failing to disclose that the underwriters received excessive and undisclosed commissions and entered into unlawful tie-in agreements with certain of their clients. The consolidated complaint seeks unspecified damages, interest and fees. In addition, this case has been coordinated with hundreds of other lawsuits filed by plaintiffs against underwriters and issuers for approximately 300 other IPOs. Defendants in the coordinated proceedings moved to dismiss the actions. In February 2003, the trial court granted the motions in part and denied them in part, allowing certain claims to proceed.

The parties have reached a global settlement of the coordinated litigation. Under the settlement, the insurers will pay the full amount of settlement share allocated to the Company, and the Company will bear no financial liability. The Company, as well as the officer and director defendants who were previously dismissed from the action pursuant to tolling agreements, will receive complete dismissals from the case. On October 5, 2009, the Court issued an order of final approval of the settlement. Certain objectors have filed appeals. If for any reason the settlement does not become effective, the Company believes it has meritorious defenses to the claims against it and intends to defend the action vigorously.

Section 16(b) Litigation. On October 9, 2007, a purported shareholder of the Company filed a complaint for violation of Section 16(b) of the Exchange Act, which prohibits short swing trading, against the Company's IPO underwriters. The complaint *Vanessa Simmonds v. The Goldman Sachs Group, et al.*, Case No. C07-1632 filed in District Court for the Western District of Washington, seeks the recovery of short swing profits. The Company is named as a nominal defendant. No recovery is sought from the Company. Numerous similar suits were filed by the same plaintiff against other underwriters relating to other issuers. The underwriter defendants and some of the issuer defendants (excluding the Company) filed a motion to dismiss, and on March 12, 2009, the district court ordered dismissal of all claims against the moving issuer defendants without prejudice. The court also ordered dismissal of all claims against the underwriter defendants with prejudice. On April 10, 2009, the plaintiffs filed their notice of appeal to those dismissal orders. In accordance with the briefing schedule set by the Ninth Circuit Court of Appeals on August 18, 2009, plaintiff filed her opening brief on August 26, 2009. On October 2, 2009, the underwriter defendants/appellees/cross-appellants filed their answering brief, and the moving issuers/appellees filed their principal brief as well. Plaintiff/appellant/cross-appellee filed her response and reply briefs on November 2, 2009. The underwriter

Edgar Filing: MARVELL TECHNOLOGY GROUP LTD - Form 10-Q

defendants/appellees/cross-appellants filed their reply brief on November 17, 2009. Pursuant to an order entered by the Ninth Circuit on August 26, 2010, oral argument in this matter has been scheduled for October 5, 2010. No discovery has taken place.

Jasmine Networks Litigation. On September 12, 2001, Jasmine Networks, Inc. (Jasmine) filed a lawsuit in the Santa Clara County Superior Court alleging claims against the Company and three of its officers for allegedly improperly obtaining and using information and technologies during the course of the negotiations with its personnel regarding the potential acquisition of certain Jasmine assets by the Company. The lawsuit claims that the Company s officers used such information and technologies after the Company signed a nondisclosure agreement with Jasmine. The Company believes the claims asserted against its officers and the Company are without merit and the Company intends to defend all claims vigorously.

Table of Contents**MARVELL TECHNOLOGY GROUP LTD.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

On June 21, 2005, the Company filed a cross complaint in the above disclosed action in the Santa Clara County Superior Court asserting claims against Jasmine and unnamed Jasmine officers and employees. The cross complaint was later amended to name two individual officers of Jasmine and a second amended cross complaint was filed in May 2007 adding additional causes of action for declaratory relief against Jasmine. The second amended cross complaint alleges that Jasmine and its personnel engaged in fraud in connection with their effort to sell the Company technology that Jasmine and its personnel wrongfully obtained from a third party in violation of such third party's rights, and that such technology does not constitute trade secrets or property of Jasmine. The cross complaint seeks a declaratory judgment that the Company's technology does not incorporate any of Jasmine's alleged technology. The cross complaint seeks further a declaratory judgment that Jasmine and its personnel misappropriated certain aspects of Jasmine's allegedly proprietary technology. The Company defeated Jasmine's demurrer to certain of the causes of action in the cross complaint and Jasmine filed its answer. The Company thereafter filed its motion for summary adjudication on its fifth and sixth causes of action for declaratory relief seeking, among other things, a determination that Jasmine held no proprietary interest in the JSLIP algorithm, which was one of the core technologies Jasmine asserts was misappropriated by the Company. The motion was denied on November 14, 2007. However, in its opposition, Jasmine admitted that JSLIP had been taken from the work of a third party and is embodied in patents held by the University of California and Cisco Systems. These admissions are significant with respect to both Jasmine's assertion of trade secret rights and any damages claimed by Jasmine.

In addition, on December 28, 2001 and January 7, 2002, the trial court issued a preliminary injunction precluding Jasmine from using, disclosing or disseminating the contents of a privileged communication between certain officers of the Company and its counsel. The order granting injunctive relief was reversed by the California Court of Appeal, but review was granted by the California Supreme Court on a grant and hold basis pending the Court's decision on a case involving closely related issues, *Rico v. Mitsubishi Motors Corp.* (2004) 116 Cal.App.4th 51. The effect of the California Supreme Court's grant of review was to depublish the Court of Appeal's decision. On December 13, 2007, the California Supreme Court ruled in the *Rico v. Mitsubishi* case in a manner consistent with the position asserted by the Company that attorney work product and attorney-client privileges are not waived by inadvertent disclosure of a privileged communication, and that any party receiving such information (i) is required to notify opposing counsel immediately; and (ii) may not read such document more closely than is necessary to determine it is privileged. *Rico v. Mitsubishi Motors Corp.* (2007) 42 Cal.4th 807. Following its decision in *Rico v. Mitsubishi*, on April 23, 2008, the California Supreme Court issued an order dismissing the Company's petition for review. As a result the decision of the Court of Appeal, which remains unpublished, became final.

The case then proceeded in the trial court. On January 13, 2009, the Court granted a motion disqualifying the Company's counsel and the Company engaged new counsel. The trial date was continued from March 2, 2009 to May 4, 2009. The claims against the three Company officers were dropped. The parties engaged in extensive discovery. Motions for summary judgment and/or summary adjudication filed by the parties were heard on February 3, 2009 and were all denied except for Jasmine's motions directed to the Company's declaratory judgment claims, which were granted. On June 3, 2009, the Court granted the Company's motion to dismiss Jasmine's Second Amended Complaint in its entirety with prejudice, for lack of standing. On December 29, 2009, the Court of Appeal, Sixth Appellate District reversed that dismissal with directions to proceed in the trial court. On February 10, 2010, the California Supreme Court declined to review that decision. In April 2010, the trial court set a new trial date for September 20, 2010.

CSIRO Litigation. Australia's Commonwealth Scientific and Industrial Research Organisation (CSIRO) has been and continues to be involved in several patent litigations in the Eastern District of Texas, in which it has accused a number of wireless LAN system manufacturers, including some of the Company's customers, of infringing CSIRO's patent, U.S. Patent No. 5,487,069 (the '069 Patent'). CSIRO's claims of infringement relate to wireless standards known as IEEE 802.11a, 802.11g and 802.11n. As a result of CSIRO's claims for patent infringement, a number of the Company's customers have sought, or may in the future seek, indemnification from the Company. In response to these demands for indemnification, the Company has acknowledged certain of the demands and incurred costs in response to them.

On May 4, 2007, Marvell Semiconductor, Inc., (MSI), Marvell Asia Pte., Ltd. (MAPL), and Marvell International Ltd. (MIL) (collectively, the Company's Subsidiaries) filed an action in the United States District Court for the Eastern District of Texas (the Marvell CSIRO Litigation) seeking a declaratory judgment against CSIRO that the '069 Patent is invalid and unenforceable and that the Company's Subsidiaries and the Company's customers do not infringe the '069 Patent. The complaint also seeks damages and a license that also covers the Company's customers on reasonable and non-discriminatory terms in the event the Company's 802.11a/g/n wireless LAN products are found to infringe and the '069 Patent is found to be valid and enforceable.

Edgar Filing: MARVELL TECHNOLOGY GROUP LTD - Form 10-Q

On December 5, 2007, CSIRO filed its answer to the complaint filed by the Company's Subsidiaries, as well as counterclaims for willful and deliberate infringement of the '069 Patent. CSIRO's counterclaims included a claim for monetary damages, including treble damages based on its allegation of willful and deliberate infringement, attorneys' fees and injunctive relief. On April 10, 2008, the Company's Subsidiaries filed a First Amended Complaint and First Amended Reply to CSIRO's Answer and Counterclaims. On April 23, 2008, CSIRO filed its Answer and Counterclaims to the First Amended Complaint. On May 12, 2008, the Company's Subsidiaries filed a Reply and Affirmative Defenses to CSIRO's amended counterclaims.

Table of Contents**MARVELL TECHNOLOGY GROUP LTD.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The trial for the Marvell CSIRO Litigation was scheduled to commence on May 10, 2010. The pretrial conference was held on April 22, 2010. On April 27, 2010, the Court issued a supplemental claim construction ruling. On April 30, 2010, the parties reached a tentative settlement which has been accounted for in the results for the three months ended May 1, 2010. The final dismissal was entered by the court on August 26, 2010.

Wi-LAN Litigation. On October 31, 2007, Wi-LAN, Inc. (Wi-LAN) sued two groups of system and chip manufacturers in the United States District Court for the Eastern District of Texas, in both cases naming MSI as a defendant and alleging patent infringement. The complaints seek unspecified damages and an injunction. In the first case, Wi-LAN alleges that defendants infringe U.S. Patent Nos. 5,282,222 and RE 37,802 (the 222 and 802 patents) that allegedly relate to the 802.11 wireless standards. In the second case, Wi-LAN alleges that defendants infringe the same 222 and 802 patents, and in addition Wi-LAN alleges that some of the defendants in the second case infringe a third patent that allegedly relates to Asymmetric Digital Subscriber Line (ADSL) technology. In the second case, MSI is not accused of infringing the ADSL patent.

On September 10, 2008, the Court granted the defendant's motion to consolidate both actions but denied as premature having the defendant suppliers' case proceed first. On February 3, 2009, the Court granted Wi-LAN's motion to add an additional patent, U.S. Patent No. 6,549,759 (the 759 Patent). The claim construction hearing for the 222 and 802 patents was held on March 11, 2010, and a ruling was issued on May 11, 2010. The claim construction hearing for the 759 patent is scheduled for September 1, 2010. The trial for all three patents is presently scheduled for January 4, 2011.

On June 4, 2010, Wi-LAN filed another patent litigation against MSI and other system and chip manufacturers in the United States District Court for the Eastern District of Texas. Wi-LAN alleges that defendants infringe the 759 patent and U.S. Patent No. 5,515,369 (the 369 patent) that allegedly relate to the Bluetooth standards. MSI filed its answer and counterclaims on August 6, 2010.

MSI believes it does not infringe any valid and enforceable claims of the asserted Wi-LAN patents and will vigorously defend itself in these matters.

Carnegie Mellon Litigation. On March 6, 2009, Carnegie Mellon University (CMU) filed a complaint in the United States District Court for the Western District of Pennsylvania naming MSI and the Company as defendants and alleging patent infringement. CMU has asserted two patents (U.S. Patent Nos. 6,201,839 and 6,438,180) purportedly relating to read-channel integrated circuit devices and the hard disk drive products incorporating such devices. The complaint seeks unspecified damages and an injunction. On June 1, 2009, MSI and the Company filed their answers and MSI filed counterclaims to the complaint seeking declaratory judgments of non-infringement and invalidity as to both of the asserted patents. The claim construction hearing was held on April 12 and 13, 2010. On April 29, 2010, MSI and the Company filed their amended answers and counterclaims. The Court has not yet scheduled a trial date. MSI and the Company believe that they do not infringe any valid and enforceable claims of the asserted CMU patents and intend to contest this action vigorously.

PACid Patent Litigation. On March 30, 2009, The PACid Group, LLC filed a complaint in the United States District Court for the Eastern District of Texas, case no. 6:09-cv-00143 LED, which named MSI, Marvell Technology, Inc. (MTI), Marvell Semiconductor, Ltd. (MSL), the Company and 15 other companies as defendants. The complaint alleged infringement of two patents purportedly relating to encryption: U.S. Patent Nos. 5,963,646 and 6,049,612. The complaint seeks unspecified damages and an injunction. On May 22, 2009, MSI filed its answer and counterclaims to the complaint. On June 1, 2009, MTI, MSL and the Company were dismissed without prejudice. The claim construction hearing was held on March 25, 2010, and a ruling was issued on July 15, 2010. Trial is presently scheduled for February 14, 2011. MSI believes that it does not infringe any valid and enforceable claims of the asserted PACid patents and intends to contest this action vigorously.

Xpoint Patent Litigation. On August 21, 2009, Xpoint Technologies, Inc. filed a complaint in the United States District of Delaware, which names the Company, MSI and thirty-six other companies as defendants. The complaint alleged infringement of U.S. Patent No. 5,913,028 which purportedly relates to data traffic delivery. The complaint seeks unspecified damages and an injunction. On September 18, 2009 an amended complaint was filed. On October 28, 2009, the Company was dismissed from the lawsuit, although MSI remains a defendant. MSI filed its answers and counterclaims on December 18, 2009. The Court has scheduled a claim construction hearing for January 13, 2012, and trial for May 7, 2012. MSI intends to contest this action vigorously. Because this action is in the early stages, the Company is unable to predict the outcome of this litigation at this time.

Edgar Filing: MARVELL TECHNOLOGY GROUP LTD - Form 10-Q

Intravisual Patent Litigation. On March 15, 2010, Intravisual, Inc. filed a Complaint in the United States District Court in the Eastern District of Texas. The Complaint names MSI and eight other Defendants, and alleges infringement of United States Patent No. 6,614,845 (the 845 patent). The 845 patent is purportedly directed to a method and apparatus for differential macroblock encoding in video coders and decoders. The Complaint seeks unspecified damages and a permanent injunction. MSI filed its answer and counterclaims on May 10, 2010. On June 1, 2010, Intravisual filed an Amended Complaint in the case, naming several additional defendants including the Company. On June 18, 2010, MSI filed its answer to the amended complaint. At this time, the Court has not set a schedule for the case. MSI intends to vigorously defend this action. Because this action is in the very early stages, the Company is unable to predict the outcome of this litigation at this time.

Table of Contents**MARVELL TECHNOLOGY GROUP LTD.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

USEI Litigation. On October 9, 2009, U.S. Ethernet Innovations, LLC (USEI) filed a complaint in the Eastern District of Texas, in which USEI has accused a number of system manufacturers, including the Company's customers, of patent infringement (the USEI litigation). Specifically, USEI has asserted that these customers infringe U.S. Patent Nos. 5,307,459, 5,434,872, 5,732,094, and 5,299,313 (collectively, the USEI patents in suit), which purportedly relate to Ethernet technologies. The complaint seeks unspecified damages and an injunction.

On May 4, 2010, MSI filed a motion to intervene in the USEI litigation, which was granted on May 19, 2010. On July 13, 2010, the Court issued an order granting the Defendants' motion to transfer the action to the Northern District of California. MSI believes that it does not infringe any valid and enforceable claim of the USEI patents in suit, and intends to litigate this action vigorously.

Lake Cherokee Patent Litigation. On June 30, 2010, Lake Cherokee Hard Drive Technologies, L.L.C. filed a Complaint in the United States District Court in the Eastern District of Texas. The Complaint names MSI and seven other Defendants, and alleges infringement of United States Patent Nos. 5,844,738 and 5,978,162 (collectively, the Lake Cherokee patents in suit). The Lake Cherokee patents in suit are purportedly relating to read-channel integrated circuit devices and the hard disk drive products incorporating such devices. The Complaint seeks unspecified damages and a permanent injunction. MSI intends to vigorously defend this action. Because this action is in the early stages, the Company is unable to predict the outcome of this litigation at this time.

General. The Company is also party to other legal proceedings and claims arising in the normal course of business. The legal proceedings and claims described above could result in substantial costs and could divert the attention and resources of the Company's management. Although the legal responsibility and financial impact with respect to these proceedings and claims cannot currently be ascertained, an unfavorable outcome in such actions could have a material adverse effect on the Company's cash flows. Litigation is subject to inherent uncertainties and unfavorable rulings could occur. An unfavorable ruling in litigation could require the Company to pay damages or one-time license fees or royalty payments, which could adversely impact gross margins in future periods, or could prevent the Company from manufacturing or selling some of its products or limit or restrict the type of work that employees involved in such litigation may perform for the Company. There can be no assurance that these matters will be resolved in a manner that is not adverse to the Company's business, financial condition, results of operations or cash flows.

Indemnities, Commitments and Guarantees

During its normal course of business, the Company has made certain indemnities, commitments and guarantees under which it may be required to make payments in relation to certain transactions. These indemnities include intellectual property indemnities to the Company's customers in connection with the sales of its products, indemnities for liabilities associated with the infringement of other parties' technology based upon the Company's products, indemnities to various lessors in connection with facility leases for certain claims arising from such facility or lease, and indemnities to directors and officers of the Company to the maximum extent permitted under the laws of Bermuda. In addition, the Company has contractual commitments to various customers, which could require the Company to incur costs to repair an epidemic defect with respect to its products outside of the normal warranty period if such defect were to occur. The duration of these indemnities, commitments and guarantees varies, and in certain cases, is indefinite. The majority of these indemnities, commitments and guarantees do not provide for any limitation of the maximum potential future payments that the Company could be obligated to make. The Company has not recorded any liability for these indemnities, commitments and guarantees in the accompanying unaudited condensed consolidated balance sheets. The Company does, however, accrue for losses for any known contingent liability, including those that may arise from indemnification provisions, when future payment is probable.

Note 10. Stock-Based Compensation

The following table presents details of stock-based compensation expenses by functional line item (in thousands):

	Three Months Ended		Six Months Ended	
	July 31, 2010	August 1, 2009	July 31, 2010	August 1, 2009
Cost of goods sold	\$ 1,692	\$ 1,810	\$ 3,928	\$ 5,926

Edgar Filing: MARVELL TECHNOLOGY GROUP LTD - Form 10-Q

Research and development	22,089	22,193	40,940	43,930
Selling and marketing	2,397	3,659	5,570	7,370
General and administrative	4,511	2,353	7,147	4,437
	\$ 30,689	\$ 30,015	\$ 57,585	\$ 61,663

Stock-based compensation of \$1.0 million and \$1.6 million was capitalized in inventory as of July 31, 2010 and January 30, 2010, respectively.

Table of Contents**MARVELL TECHNOLOGY GROUP LTD.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following weighted average assumptions were used for each respective period to calculate the fair value of each option award on the date of grant using the Black-Scholes option pricing model:

	Stock Option Plans		ESPP	
	Three Months Ended		Three Months Ended	
	July 31, 2010	August 1, 2009	July 31, 2010	August 1, 2009
Estimated fair value	\$ 8.75	\$ 5.69	\$ 5.14	\$ 4.14
Volatility	53%	53%	53%	51%
Expected term (in years)	4.7	4.6	0.5	1.3
Risk-free interest rate	2.5%	1.9%	0.2%	0.7%

Estimated fair value	\$ 9.45	\$ 5.13	\$ 5.14	\$ 4.14
Volatility	53%	52%	53%	51%
Expected term (in years)	4.7	4.6	0.5	1.3
Risk-free interest rate	2.3%	1.8%	0.2%	0.7%
Dividend yield				

Note 11. Shareholders Equity**Stock plans**

In April 1995, the Company adopted the 1995 Stock Option Plan (the "Option Plan"). The Option Plan, as amended to date, had 383.4 million common shares reserved for issuance thereunder as of July 31, 2010. Options granted under the Option Plan generally have a term of ten years and generally must be issued at prices not less than 100% and 85% for incentive and nonqualified stock options, respectively, of the fair market value of the stock on the date of grant. Incentive stock options granted to shareholders who own greater than 10% of the outstanding stock are for periods not to exceed five years and must be issued at prices not less than 110% of the fair market value of the stock on the date of grant. The options generally vest 20% one year after the vesting commencement date, and the remaining shares vest one-sixtieth per month over the remaining 48 months. Options granted under the Option Plan subsequent to March 1, 2000 may only be exercised upon or after vesting. At the Annual Meeting of Shareholders held in July 2010, the shareholders approved an amendment to the Option Plan that (i) allows the Company to grant awards other than stock options and stock appreciation rights intended to qualify as performance-based compensation within the meaning of the Internal Revenue Code of 1986, as amended, pursuant to an appendix to the Option Plan; and (ii) amends the Option Plan to reduce the maximum number of shares automatically added to the Option Plan each fiscal year by 50% (the "reduced evergreen"). Under the reduced evergreen provision, on the first day of each fiscal year starting January 31, 2011 and continuing until the earlier of January 31, 2013 or the termination of the Option Plan, the share reserve of the Option Plan automatically increases by the lesser of: (a) 20,000,000 shares, (b) 2.5% of outstanding shares on such date, or (c) a lesser amount determined by the Board.

In October 2007, the Company adopted the 2007 Directors' Stock Incentive Plan (the "2007 Directors' Plan"). The 2007 Directors' Plan had 750,000 common shares reserved for issuance thereunder as of July 31, 2010. Under the 2007 Directors' Plan, an outside director is granted an option to purchase 50,000 common shares upon appointment to the Company's Board of Directors. These options vest one-third on the one year anniversary of the date of grant and one-third of the shares on each anniversary thereafter. An outside director who has served on the Company's Board of Directors for the prior six months is also granted an option to purchase 12,000 common shares on the date of each annual meeting of the Company's shareholders. These options vest 100% on the earlier of the date of the next annual general meeting of shareholders or the one year anniversary of the date of grant.

Table of Contents**MARVELL TECHNOLOGY GROUP LTD.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Under the Option Plan and the 2007 Directors' Plan, the Company may also grant restricted stock awards, which may be subject to vesting, and stock unit awards, which are denominated in shares of stock, but may be settled in cash or tradable shares of the Company's common shares upon vesting, as determined by the Company at the time of grant.

Employee stock purchase plan

In June 2000, the Company adopted the 2000 Employee Stock Purchase Plan (the "Purchase Plan"), and on October 22, 2009, the Purchase Plan was amended and restated (the "Restated Purchase Plan"). The Restated Purchase Plan had 28.6 million common shares reserved for issuance thereunder as of July 31, 2010. The Restated Purchase Plan provides that beginning each calendar year, there will be added the lesser of an additional (A) 8,000,000 common shares, or (B) 1.5% of the outstanding shares of capital stock on such date, or (C) an amount determined by the Board.

Pursuant to the terms of the Restated Purchase Plan, the "look-back" period for the stock purchase price was changed from 24 months to six months. This change was effective for new participants who enroll in the Restated Purchase Plan in December 2009 and is applicable for each successive offering period thereafter. Offering and purchase periods will continue to begin on December 8 and June 8 of each year. New participants will be granted the right to purchase common shares at a price per share that is 85% of the lesser of the fair market value of the Company's common shares at the beginning or the end of each six-month period. The existing two-year offering periods will be phased out and any currently enrolled participant in a current 24-month offering period will continue in the current offering period until the earlier of the end of the offering period or in the event the current offering period is reset. A reset occurs if the fair market value of Marvell common shares on any purchase date is less than it was on the first day of the offering period. Participants were granted the right to purchase common shares at a price per share that is 85% of the lesser of the fair market value of the shares at (i) the participant's entry date into the two-year offering period or (ii) the end of each six-month purchase period within the offering period.

Participants who will enroll under the Restated Purchase Plan will no longer be subject to a share limitation on the number of shares that may be purchased in the event that the market price of Company's common shares decreases by more than 25% from one purchase date to the next. Participants may purchase no more than 7,500 shares per six-month offering period. Participants purchase stock using payroll deductions, which may not exceed 15% of their total cash compensation.

For the three and six months ended July 31, 2010, the Company recognized \$3.3 million and \$8.1 million stock-based compensation expense related to the activity under the Restated Purchase Plan. The Company issued 5,425,037 shares under the Restated Purchase Plan in the three and six months ended July 31, 2010. As of July 31, 2010, there was \$3.5 million of unrecognized compensation cost related to the Restated Purchase Plan.

Activity under the Company's stock option plans for the six months ended July 31, 2010 is summarized below (in thousands, except per share amounts):

	Options Outstanding	Weighted Average Exercise Price
Balance at January 30, 2010	70,966	\$ 11.28
Granted	1,886	\$ 20.41
Canceled/Forfeited/Expired	(1,846)	\$ 20.09
Exercised or issued	(6,345)	\$ 8.73
Balance at July 31, 2010	64,661	\$ 11.55
Vested or expected to vest at July 31, 2010	62,714	\$ 11.55

Edgar Filing: MARVELL TECHNOLOGY GROUP LTD - Form 10-Q

Exercisable at July 31, 2010	43,127	\$	11.47
------------------------------	--------	----	-------

Included in the preceding table are options for 918,000 common shares granted to certain officers at exercise prices ranging between \$6.84 and \$17.66 that will become exercisable only upon the achievement of specified annual earnings per share targets or achievement of certain operating performance criteria through fiscal 2014.

The aggregate intrinsic value and weighted average remaining contractual term of options vested and expected to vest at July 31, 2010 was \$294.8 million and 5.27 years, respectively. The aggregate intrinsic value and weighted average remaining contractual term of options exercisable at July 31, 2010 was \$212.8 million and 4.0 years, respectively. The aggregate intrinsic value is calculated based on the Company's closing stock price for all in-the-money options as of July 30, 2010.

Table of Contents**MARVELL TECHNOLOGY GROUP LTD.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Included in the table below is activity related to restricted stock units (in thousands, except per share amounts):

	Restricted Stock Outstanding	Weighted Average Grant Date Fair Value
Balance at January 30, 2010	2,746	\$ 8.99
Granted	4,261	\$ 21.07
Vested	(471)	\$ 12.99
Canceled/Forfeited	(163)	\$ 11.69
Balance at July 31, 2010	6,373	\$ 16.72

Included in the preceding table are 557,000 restricted stock units granted to certain officers that will become exercisable only upon the achievement of certain revenue growth and/or operating performance criteria through fiscal 2012. The aggregate intrinsic value and weighted average remaining contractual term of restricted stock units vested and expected to vest as of July 31, 2010 was \$83.8 million and 1.5 years, respectively.

The Company's current practice is to issue new shares to satisfy share option exercises. As of July 31, 2010, compensation costs related to unvested share-based awards not yet recognized amounted to \$208.2 million. The unamortized compensation expense for stock options and restricted stock units will be amortized over a weighted-average period of 2.1 years and 2.6 years, respectively. The expense is recognized on a straight-line basis, except for performance-based awards which are amortized on an accelerated basis.

The total tax benefit attributable to options exercised for the six months ended July 31, 2010 was \$229,000 as reported on the unaudited condensed consolidated statements of cash flows in financing activities. Such excess tax benefits represent the reduction in income taxes otherwise payable during the period, attributable to the actual gross tax benefits in excess of the expected tax benefits for options exercised in current and prior periods.

Note 12. Income Taxes

For the three months ended July 31, 2010 and August 1, 2009, the Company's effective tax rate was an income tax provision of 1.1% and 13.8%, respectively. For the six months ended July 31, 2010 and August 1, 2009, the Company's effective tax rate was an income tax provision of 0.3% and 27.3%, respectively. The income tax provision for these periods was affected by non-tax-deductible expenses such as stock-based compensation expense, amortization of acquired intangibles and accrual of unrecognized tax benefits, and interest and penalties associated with unrecognized tax positions. For the three months and six ended July 31, 2010, the provision was impacted by a reduction of unrecognized tax benefits of approximately \$2.3 million and \$8.8 million, respectively, due to the expiration of the statute of limitation in multiple jurisdictions.

The Company's total unrecognized tax benefits as of July 31, 2010 and January 30, 2010 were \$100.7 million and \$103.3 million, respectively. The Company's liability for potential interest and penalties as of July 31, 2010 and January 30, 2010 was \$31.2 million and \$29.9 million, respectively. If recognized, all of the liabilities recorded to date, except the portion attributable to the foreign exchange gains and losses, will impact the effective tax rate. During the next 12 months, the Company believes that the expiration of applicable statutes of limitations could potentially reduce its unrecognized tax benefit by up to \$12.2 million. However, this amount could change because the Company may have negotiations with various tax authorities throughout the year. At this time, the Company is unable to make an estimate of the amount of payments in individual years beyond 12 months due to uncertainties in the timing of tax audit outcomes.

The Company conducts business globally and as a result, is subject to examination by tax authorities throughout the world, including such major jurisdictions as China, Israel, Japan, Singapore, Switzerland and the United States. The Company is subject to non-U.S. and U.S. income tax examinations for years beginning with fiscal year 2002 and fiscal year 2007, respectively.

Note 13. Related Party Transactions

In August, 2005, through its subsidiaries MSI and MIL, the Company entered into a License and Manufacturing Services Agreement with C2 Microsystems, Inc. (C2Micro License Agreement). The C2Micro License Agreement has substantially similar terms as other license and manufacturing services agreements of the Company with other third parties for similar technology. The Company recognized no revenue under the C2Micro License Agreement during the three and six months ended July 31, 2010 and August 1, 2009. Dr. Sehat Sutardja, the Company's President and Chief Executive Officer, and Weili Dai, the Vice President of Sales for Communications and Consumer Business of MSI and

Table of Contents**MARVELL TECHNOLOGY GROUP LTD.****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Vice President and General Manager of Communications and Computing Business Unit of MSI, through their ownership and control of Estopia LLC, are indirect shareholders of C2 Microsystems. Dr. Sehat Sutardja and Weili Dai are husband and wife. Kuo Wei (Herbert) Chang, a member of the Company's Board of Directors, is also an indirect shareholder of C2 Microsystems as a partner of entities who have invested in C2 Microsystems. Dr. Pantas Sutardja, the Company's Vice President, Chief Technology Officer and Chief Research and Development Officer, is also a shareholder of C2 Microsystems.

In January 2007, the Company, through MIL, entered into a Library/IP/Software Evaluation License Agreement (the Evaluation License Agreement) with VeriSilicon Holdings Co., Ltd. (VeriSilicon). The Evaluation License Agreement has no consideration. The Company incurred \$48 and \$2,000 of royalty expense from VeriSilicon under a core license agreement assumed from its acquisition of the semiconductor business of UTStarcom, Inc. during the three months ended July 31, 2010 and August 1, 2009, respectively. The Company incurred \$48 and \$6,000 of royalty expense under the same license agreement during the six months ended July 31, 2010 and August 1, 2009, respectively. This core license agreement had been assumed by VeriSilicon after its acquisition of certain assets from LSI Corporation. In March 2009, the Company entered into an addendum to this core license agreement with VeriSilicon. The Company recorded a license fee of \$500,000 and maintenance fees of \$80,000. In June 2009, the Company entered into a second addendum to this technology license agreement with VeriSilicon for VeriSilicon to perform services for a fee of \$40,000. In December 2009, the Company entered into a third addendum to this technology agreement with VeriSilicon to license additional technology for a license fee of \$275,000 with an annual support fee of \$47,500. In March 2010, the Company entered into a fourth addendum to this technology agreement with VeriSilicon to license additional technology for a license fee of \$2.5 million with an annual support fee of \$120,000. \$1.5 million of license fee and \$200,000 of support fee were paid to VeriSilicon during the three and six months ended July 31, 2010, respectively. \$500,000 of license fee and \$80,000 of support fee were paid during the three and six months ended August 1, 2009, respectively. Weili Dai's brother (and Dr. Sehat Sutardja's brother-in-law) is the Chairman, President and Chief Executive Officer of VeriSilicon. Ms. Dai is also a shareholder of VeriSilicon.

In August 2008, the Company entered into a Technology License Agreement with Vivante. This Technology License Agreement, as amended, also had substantially similar terms as the Company would expect to obtain for license agreements with other third parties for similar technology. The Company recorded \$2.0 million for the license fee and \$200,000 of maintenance during the year ended January 31, 2009 in connection with this Technology License Agreement. In January 2009, the Company entered into an agreement with Vivante to disclose certain cell libraries to Vivante at no additional cost. In April 2009, the Company entered into an amendment to the Technology License Agreement with Vivante. The Company recorded \$1.0 million for the license fee and \$70,000 of maintenance during the three months ended May 2, 2009 in connection with the amendment to the Technology License Agreement. In June 2009, the Company entered into the second amendment to the Technology License Agreement with Vivante. The Company recorded \$500,000 for the license fee and \$50,000 of maintenance during the three months ended August 1, 2009. In December 2009, the Company entered into an Amended and Restated Technology License Agreement (the Restated Technology Agreement) with Vivante to license additional technology and to modify certain terms associated with the previously licensed technology. The total amount of the license fee was \$12.0 million (paid over three years) and ten percent for maintenance fees (paid over three years). During the three and six months ended July 31, 2010, the Company paid Vivante \$0.9 million and \$2.6 million of license fees and \$0 and \$350,000 for maintenance, respectively. \$1.5 million of license fees and \$120,000 of maintenance fees were paid to Vivante during the six months ended August 1, 2009. The Company incurred \$177,000 and \$0 of royalty expense from Vivante under its agreements with Vivante during the three months ended July 31, 2010 and August 1, 2009, respectively. The Company incurred \$184,000 and \$0 of royalty expense from Vivante under its agreements with Vivante during the six months ended July 31, 2010 and August 1, 2009, respectively. Dr. Sehat Sutardja and Weili Dai, through their ownership and control of Estopia LLC, are indirect shareholders of Vivante. In addition, Dr. Sehat Sutardja is also a direct shareholder and Chairman of the board of directors of Vivante. Weili Dai's brother (and Dr. Sehat Sutardja's brother-in-law) is the Chief Executive Officer of Vivante. Kuo Wei (Herbert) Chang, a member of the Company's Board of Directors, is also an indirect shareholder of Vivante as a partner of entities who have invested in Vivante.

Note 14. Subsequent Event

On August 19, 2010, the Company announced that its Board of Directors approved a \$500 million share repurchase program. The repurchase program does not have a scheduled expiration date.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This Quarterly Report on Form 10-Q contains forward-looking statements that involve risks and uncertainties. These statements include, without limitation, statements regarding our expectations, beliefs, intentions or strategies regarding the future. These statements involve known and unknown risks, uncertainties and other factors, which may cause our actual results to differ materially from those implied by the forward-looking statements. Words such as anticipates, expects, intends, plans, believes, seeks, estimates, can, and similar expressions identify such forward-looking statements. These are statements that relate to future periods and include statements relating to our anticipation that the rate of new orders and shipments will vary significantly from quarter to quarter; our expectations regarding industry trends; our expectations regarding our inventory levels; our expectations regarding competition; our expectations relating to the protection of our intellectual property; our expectations regarding the amount of customer concentration in the future; our expectations regarding the amount of our future sales in Asia; our plans and expectations regarding our auction rate securities; our expectations regarding acquisitions, investments, strategic alliances and joint ventures; our expectations regarding net revenue, cash flows and expense for the third quarter ending October 30, 2010 compared with the second quarter ended July 31, 2010; our expectations regarding the impact of legal proceedings and claims; our expectations regarding the adequacy of our capital resources, capital expenditures, investment requirements and commitments to meet our capital needs for the next 12 months; our ability to attract and retain highly skilled personnel; our expectations regarding the growth in business and operations; our plan regarding forward exchange contracts and the effect of foreign exchange rates; the effect of recent accounting pronouncements and changes in taxation rules; our expectation regarding the effectiveness of our hedges of foreign currency exposures; our expectations that quarterly operating results will fluctuate from quarter to quarter; our expectations regarding the current economic environment; our expectations regarding arrangements with suppliers; our expectations regarding our ability to develop and introduce new products and achieve market acceptance of our products; our expectations regarding pricing; our expectations regarding demand for our products; our expectations regarding the implementation and improvement of operational and financial systems, as well as the implementation of additional procedures and other internal management systems; our expectations regarding gross margin and the events that may cause gross margin to fluctuate; our expectations to transition our semiconductor products to increasingly smaller line width geometries; our expectations regarding the portion of our operations and sales outside of the United States; our expectations regarding the adequacy of our internal control over financial reporting; our expectations regarding future impairment review of our goodwill and intangible assets; and the anticipated features and benefits of our technology solutions. These forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those indicated in the forward-looking statements. Factors that could cause actual results to differ materially from those predicted, include but are not limited to, the impact of the worldwide financial crisis; the impact of international conflict and continued economic volatility in either domestic or foreign markets; our dependence upon the hard disk drive and mobile and wireless industry which is highly cyclical; our ability to scale our operations in response to changes in demand for existing or new products and services; our maintenance of an effective system of internal controls; our dependence on a small number of customers; our ability and our customers' ability to develop new and enhanced products; our success in integrating businesses we acquire and the impact such acquisitions may have on our operating results; our ability to estimate customer demand and future sales accurately; the success of our strategic relationships; our reliance on independent foundries and subcontractors for the manufacture, assembly and testing of our products; our ability to manage future growth; the development and evolution of markets for our integrated circuits; our ability to protect our intellectual property; the impact of any change in our application of the United States federal income tax laws and the loss of any beneficial tax treatment that we currently enjoy; the impact of changes in international financial and regulatory conditions; our ability to compete in the mobile and wireless communications markets; the impact of lengthy and expensive product sales cycles; and the outcome of pending or future litigation and legal proceedings. Additional factors which could cause actual results to differ materially include those set forth in the following discussion, as well as the risks discussed in Part II, Item 1A, Risk Factors, and other sections of this Quarterly Report on Form 10-Q. These forward-looking statements speak only as of the date hereof. Unless required by law, we undertake no obligation to update any forward-looking statements.

Overview

We are a leading global semiconductor provider of high-performance application-specific standard products. Our core strength of expertise is the development of complex system-on-a-chip devices leveraging our extensive technology portfolio of intellectual property in the areas of analog, mixed-signal, digital signal processing and embedded ARM-based microprocessor integrated circuits. Our broad product portfolio includes devices for data storage, enterprise-class Ethernet data switching, Ethernet physical-layer transceiver (PHY), handheld cellular, Ethernet-based wireless networking, personal area networking, Ethernet-based PC connectivity, control plane communications, powerline communications, video-image processing and power management solutions. Our products serve diverse applications used in carrier, metropolitan, enterprise and PC-client data communications and storage systems. Additionally, we serve the consumer electronics market for the convergence of voice, video and data applications. We are a fabless integrated circuit company, which means that we rely on independent, third party contractors to perform manufacturing, assembly and test functions. This approach allows us to focus on designing, developing and marketing our products and significantly reduces the amount of capital we need to invest in manufacturing products.

Our sales have historically been made on the basis of purchase orders rather than long-term agreements. In addition, the sales cycle for our products is long, which may cause us to experience a delay between the time we incur expenses and the time revenue is generated from these expenditures. We anticipate that the rate of new orders may vary significantly from quarter to quarter. Consequently, if anticipated sales and shipments in any quarter do not occur when expected, expenses and inventory levels could be disproportionately high, and our operating results

for that quarter and future quarters may be adversely affected.

Table of Contents

The second quarter of fiscal 2011 was challenging due to lower demand for PCs, which in turn led to excess inventory build-up in the supply chain for hard disk drives. Despite these challenges, during our fiscal second quarter, we generated revenues of \$896.5 million, a 5% sequential increase, and a 40% increase over the same period a year ago. We delivered diluted earnings per share of \$0.33, and generated \$319 million in cash from operations. We believe these results demonstrate the robustness of our business model, and our ability to sustain revenue growth and excellent profitability in spite of challenges experienced in one of the three end markets we serve. We saw better than expected results in the mobile and wireless end markets, which increased significantly compared to the first six months of fiscal 2010. Our combined revenue from the mobile and wireless end market now represents nearly one-third of our total revenue.

Our fiscal year is the 52- or 53-week period ending on the Saturday closest to January 31. In a 52-week year, each fiscal quarter consists of 13 weeks. The additional week in a 53-week year is added to the fourth quarter, making such quarter consist of 14 weeks. Fiscal 2011 and fiscal 2010 are comprised of 52-week periods. In this Quarterly Report on Form 10-Q, we refer to the fiscal year ended January 31, 2009 as fiscal 2009, the fiscal year ended January 30, 2010 as fiscal 2010, and the fiscal year ending January 29, 2011 as fiscal 2011.

Critical Accounting Policies and Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States (GAAP) requires management to make estimates, judgments and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosure of contingent assets and liabilities. Actual results could differ from these estimates, and such differences could affect the results of operations reported in future periods. For a description of our critical accounting policies and estimates, please refer to the Critical Accounting Policies and Estimates section of our Management's Discussion and Analysis of Financial Condition and Results of Operations contained in our Annual Report on Form 10-K for the year ended January 30, 2010. As noted in Note 2: Recent Accounting Pronouncements and Accounting Changes in Part 1, Item 1 of this Form 10-Q, we adopted new accounting guidance related to the revenue recognition of multiple element arrangements. However, the adoption did not impact our financial condition or results of operations, therefore, there have been no material changes in any of our critical accounting policies during fiscal 2011.

Results of Operations

The following table sets forth information derived from our unaudited condensed consolidated statements of operations expressed as a percentage of net revenue:

	Three Months Ended		Six Months Ended	
	July 31, 2010	August 1, 2009	July 31, 2010	August 1, 2009
Net revenue	100.0%	100.0%	100.0%	100.0%
Operating costs and expenses:				
Cost of goods sold	40.9	45.0	40.6	47.0
Research and development	25.5	30.7	25.5	34.6
Selling and marketing	4.1	5.1	4.3	5.7
General and administrative	2.8	4.6	2.8	11.4
Amortization of acquired intangible assets	2.4	4.1	2.4	4.9
Total operating costs and expenses	75.7	89.5	75.6	103.6
Operating income (loss)	24.3	10.5	24.4	(3.6)
Interest and other income, net	0.5	0.3	0.0	0.1
Interest expense	(0.0)	(0.2)	(0.0)	(0.1)
Income (loss) before income taxes	24.8	10.6	24.4	(3.6)
Provision for income taxes	0.3	1.5	0.1	1.0
Net income (loss)	24.5%	9.1%	24.3%	(4.6)%

Table of Contents*Three and Six Months Ended July 31, 2010 and August 1, 2009**Net Revenue*

	Three Months Ended			Six Months Ended		
	July 31, 2010	August 1, 2009	% Change	July 31, 2010	August 1, 2009	% Change
(in thousands, except percentage)						
Net revenue	\$ 896,474	\$ 640,620	39.9%	\$ 1,752,053	\$ 1,162,054	50.8%

The increase in net revenue for the three and six months ended July 31, 2010 compared to the three and six months ended August 1, 2009 reflected the improvement in overall economic conditions as well as the ramp of new products, new programs, and in certain cases, new customers. Our storage revenue grew 4.7% and 28.3% in the three and six months ended July 31, 2010, respectively, compared to the three and six months ended August 1, 2009. Between the second quarter of fiscal 2010 and the first quarter of fiscal 2011, storage revenue increased each quarter as demand returned and the supply chain replenished inventories following the global economic crisis. However, storage revenue declined significantly in the three months ended July 31, 2010 compared to the prior quarter due to lower demand for PCs, which in turn led to excess inventory build-up in the supply chain for hard disk drives and resulted in lower demand for our products. Therefore, revenue for the three months ended July 31, 2010 as compared to the same quarter in the prior year showed only a slight improvement in storage revenue due to the recent decline in this market.

We experienced significant growth within our mobile and wireless revenue as demand for our application and communication processors increased, helping the mobile and wireless revenue to grow over 140% and 120% in the three and six months ended July 31, 2010, respectively, compared to the three and six months ended August 1, 2009. Our networking revenue represented approximately 21% of our total revenue and grew by over 35% and 40% in the three and six months ended July 31, 2010, respectively, compared to the three and six months ended August 1, 2009 as sales of our enterprise switching and PHY products continued to ramp offset slightly by declines in Ethernet controllers. We expect growth in mobile and wireless revenue as several of our new products continue to ramp, while storage and networking revenue are expected to be relatively flat. Overall, we currently expect that revenue for the three months ending October 30, 2010 will increase moderately from the level of revenue for the three months ended July 31, 2010.

Historically, a relatively small number of customers have accounted for a significant portion of our revenue. No distributors accounted for more than 10% of our net revenue for the three months ended July 31, 2010 and August 1, 2009.

The following table sets forth revenue to end customers comprising 10% or more of our net revenue for the periods indicated:

Customer	Three Months Ended		Six Months Ended	
	July 31, 2010	August 1, 2009	July 31, 2010	August 1, 2009
A	19%	23%	23%	24%
B	14%	*	12%	*
C	*	18%	10%	15%
D	*	10%	*	11%

* Less than 10% of net revenue

Because we sell our products to many OEM manufacturers who have manufacturing operations located in Asia, a significant percentage of our sales are made to customers located outside of the United States. Sales to customers located in Asia represented 82% and 93% of our net revenue for the three months ended July 31, 2010 and August 1, 2009, respectively, and represented 84% and 91% of our net revenue for the six months ended July 31, 2010 and August 1, 2009, respectively. We expect that a significant portion of our revenue will continue to be represented by sales to our customers in Asia.

Cost of Goods Sold

Edgar Filing: MARVELL TECHNOLOGY GROUP LTD - Form 10-Q

	Three Months Ended			Six Months Ended		
	July 31, 2010	August 1, 2009	% Change	July 31, 2010	August 1, 2009	% Change
	(in thousands, except percentage)					
Cost of goods sold	\$ 366,682	\$ 288,059	27.3%	\$ 710,667	\$ 545,689	30.2%
% of net revenue	40.9%	45.0%		40.6%	47.0%	

The decrease in cost of goods sold as a percentage of revenue for the three and six months ended July 31, 2010 compared to the three and six months ended August 1, 2009 was primarily driven by the higher revenue levels, as well as improved cost structure of our newer products as we have continued to benefit from cost reduction efforts with our key manufacturing partners, continued focus on efficiency and yield improvements, and lower inventory write-offs. Our cost of goods sold as a percentage of revenue may fluctuate in future periods due to, among other things, changes in the mix of products sold, the timing of production ramps of new products, increased pricing pressures from our customers and competitors, particularly in the consumer product markets that we are targeting, charges for obsolete or potentially excess inventory, changes in the costs charged by our foundry, assembly and test subcontractors, the introduction of new products with lower margins and product warranty costs. We currently expect cost of goods sold as a percentage of revenue to be approximately flat for the three months ending October 30, 2010.

Table of Contents*Research and Development*

	Three Months Ended			Six Months Ended		
	July 31, 2010	August 1, 2009	% Change	July 31, 2010	August 1, 2009	% Change
	(in thousands, except percentage)					
Research and development	\$ 228,211	\$ 196,190	16.3%	\$ 447,322	\$ 402,279	11.2%
% of net revenue	25.5%	30.7%		25.5%	34.6%	

The increase in research and development expense for the three months ended July 31, 2010 compared to the three months ended August 1, 2009 of \$32.0 million was primarily due to increases in salary and related costs of \$22.8 million. The increase in salary and related costs was due to increases in headcount to support the growth of our business, and higher expenses for the incentive compensation program due to higher revenue and operating profit compared to the prior year. In addition, wafer, test and other preproduction engineering materials increased \$7.6 million due to increased activity to bring new products to market, along with a reduction of \$3.0 million in research and development funding from customers for development work. Partially offsetting the increases was a decrease in restructuring costs of \$2.2 million due primarily to facilities related costs recorded in the three months ended August 1, 2009 as we adjusted our real estate needs in response to the global economic downturn.

The increase in research and development expense for the six months ended July 31, 2010 compared to the six months ended August 1, 2009 of \$45.0 million was primarily due to increases in salary and related costs of \$42.1 million. The increase in salary and related costs was due to increases in headcount to support the growth of our business, as well as higher expenses for the incentive compensation program due to higher revenue and operating profit compared to the prior year. Wafer, test and other preproduction engineering materials increased \$17.0 million due to increased activity to bring new products to market. Partially offsetting the increases was a decrease in restructuring costs of \$7.9 million due primarily to severance and facilities related costs in the six months ended August 1, 2009.

We currently expect research and development expense during the third quarter ending October 30, 2010 will increase slightly from the level of expense reported during the second quarter ended July 31, 2010 primarily due to new hires, including those associated with an acquisition that occurred in the second quarter of fiscal 2011.

Selling and Marketing

	Three Months Ended			Six Months Ended		
	July 31, 2010	August 1, 2009	% Change	July 31, 2010	August 1, 2009	% Change
	(in thousands, except percentage)					
Selling and marketing	\$ 36,863	\$ 32,908	12.0%	\$ 75,286	\$ 66,818	12.7%
% of net revenue	4.1%	5.1%		4.3%	5.7%	

The increase in selling and marketing expense for the three months ended July 31, 2010 compared to the three months ended August 1, 2009 of \$4.0 million was primarily due to an increase of \$3.0 million as a result of higher trade show and public relation expenses as we increased our presence in these areas. In addition, salaries and wages increased \$1.6 million due to higher benefit and incentive compensation costs. Partially offsetting the increases was a decrease in stock-based compensation costs of \$1.3 million during the three months ended July 31, 2010.

The increase in selling and marketing expense for the six months ended July 31, 2010 compared to the six months ended August 1, 2009 of \$8.5 million was primarily due to an increase of \$7.3 million in trade show and public relation expenses as we increased our presence in these areas. In addition, salaries and wages increased \$1.5 million due to higher salary and benefit related costs. Sales representative commissions increased \$1.3 million due to the increase in revenue. Partially offsetting the increases was a decrease in stock-based compensation costs \$1.8 million.

We currently expect that selling and marketing expense during the third quarter ending October 30, 2010 will increase moderately from the level of expense reported during the second quarter ended July 31, 2010 as a result of increased tradeshow and advertising costs along with some headcount growth.

Table of Contents*General and Administrative*

	Three Months Ended			Six Months Ended		
	July 31, 2010	August 1, 2009	% Change	July 31, 2010	August 1, 2009	% Change
	(in thousands, except percentage)					
General and administrative	\$ 25,440	\$ 29,468	(13.7)%	\$ 48,548	\$ 132,196	(63.3)%
% of net revenue	2.8%	4.6%		2.8%	11.4%	

The decrease in general and administrative expense for the three months ended July 31, 2010 compared to the three months ended August 1, 2009 of \$4.0 million was primarily due to a decrease in legal fees of \$10.4 million primarily due to the timing of trial activity and lower activity as a result of the settlement of various litigation matters. Partially offsetting the decreases was an increase in salaries and wages of \$2.3 million due to higher incentive compensation costs and an increase in stock-based compensation of \$2.2 million due to the impact of executive performance grants.

The decrease in general and administrative expense for the six months ended July 31, 2010 compared to the six months ended August 1, 2009 of \$83.6 million was primarily due to a \$72.0 million settlement recorded in the six months ended August 1, 2009 in connection with the settlement of the class action securities litigation related to our historical stock option granting practices. In addition, legal fees decreased by \$20.3 million primarily due to the timing of trial activity and lower activity as a result of the settlement of various litigation matters. Partially offsetting the decreases was an increase in salaries and wages of \$4.4 million due to higher incentive compensation costs. Finally, stock-based compensation increased \$2.7 million due to the impact of executive performance grants.

We currently expect that general and administrative expense during the third quarter ending October 30, 2010 will increase moderately from the level of expense reported during the second quarter ended July 31, 2010 primarily as a result of increased legal activity.

Amortization of Acquired Intangible Assets

	Three Months Ended			Six Months Ended		
	July 31, 2010	August 1, 2009	% Change	July 31, 2010	August 1, 2009	% Change
	(in thousands, except percentage)					
Amortization of acquired intangible assets	\$ 21,214	\$ 26,446	(19.8)%	\$ 43,763	\$ 56,802	(23.0)%
% of net revenue	2.4%	4.1%		2.4%	4.9%	

The decrease in amortization of acquired intangible assets for the three and six months ended July 31, 2010 compared to the three and six months ended August 1, 2009 was due to intangible assets from certain acquisitions becoming fully amortized and the effects of the write-off of certain purchased intangibles during the fourth quarter ended January 30, 2010.

Interest and Other Income, Net

	Three Months Ended			Six Months Ended		
	July 31, 2010	August 1, 2009	% Change	July 31, 2010	August 1, 2009	% Change
	(in thousands, except percentage)					
Interest and other income, net	\$ 4,253	\$ 1,793	137.2%	\$ 552	\$ 1,721	(67.9)%
% of net revenue	0.5%	0.3%		0.0%	0.1%	

The increase in income for the three months ended July 31, 2010 compared to the three months ended August 1, 2009 was primarily due to favorable foreign currency impacts on our tax liabilities as a result of the strengthening of the U.S. dollar. In addition, interest income increased due to higher average cash and cash equivalents and short-term investment balances. The decrease in income for the six months ended July 31, 2010 compared to the six months ended August 1, 2009 was primarily due to less favorable foreign currency impacts on our tax contingency reserves as a result of the weakening of the U.S. dollar in the six months ended July 31, 2010 and a gain on a severance fund in a foreign jurisdiction recorded in the six months ended August 1, 2009. Partially offsetting the decreases was an increase in interest income in the six months ended July 31, 2010 due to higher average cash and cash equivalents and short-term investment balances.

Table of Contents*Interest Expense*

	Three Months Ended			Six Months Ended		
	July 31, 2010	August 1, 2009	% Change	July 31, 2010	August 1, 2009	% Change
	(in thousands, except percentage)					
Interest expense	\$ 41	\$ 1,514	(97.3)%	\$ 92	\$ 1,602	(94.3)%
% of net revenue	0.0%	0.2%		0.0%	0.1%	

The decrease in interest expense for the three and six months ended July 31, 2010 compared to the three and six months ended August 1, 2009 was due to the repayment of capital lease obligations.

Provision for Income Taxes

	Three Months Ended			Six Months Ended		
	July 31, 2010	August 1, 2009	% Change	July 31, 2010	August 1, 2009	% Change
	(in thousands, except percentage)					
Provision for income taxes	\$ 2,499	\$ 9,335	(73.2)%	\$ 1,383	\$ 11,353	(87.8)%
% of net revenue	0.3%	1.5%		0.1%	1.0%	

For the three and six months ended July 31, 2010, the provision for income taxes was impacted by a reduction of unrecognized tax benefits of approximately \$2.3 million and \$8.8 million, respectively, due to the expiration of the statute of limitation in multiple jurisdictions. In addition to the quarterly income tax provision, the effective tax rate for the three and six months ended August 1, 2009, was impacted by the exclusion of a jurisdiction with a pretax loss for which no benefit would be recognized and such loss was excluded from the calculation of the provision for income taxes. For the three and six months ended August 1, 2009, the provision for income taxes was also increased by the revaluation of a deferred tax asset arising out of a non U.S. corporate tax rate change effective in the quarter.

Liquidity and Capital Resources

Our principal source of liquidity as of July 31, 2010 consisted of approximately \$2.4 billion of cash and cash equivalents and short-term investments as well as cash from operations. We believe that our existing cash, cash equivalents and marketable securities, together with cash generated from operations and from exercise of employee stock options, will be sufficient to cover our working capital needs, capital expenditures, investment requirements and commitments for at least the next 12 months.

Net Cash Provided by Operating Activities

Net cash provided by operating activities was \$574.8 million for the six months ended July 31, 2010. The cash inflows from operations in the six months ended July 31, 2010 were primarily due to \$575.0 million of net income adjusted for non-cash items.

Increases in working capital during the six months ended July 31, 2010 included an increase in accounts payable of \$98.8 million. The increase in accounts payable was due to a combination of increased inventory receipts at the end of the period in anticipation of growth in our mobile and wireless end markets, and the ramp of new WiFi customers, where we are selling more of a system solution. Because of the business model to service these customers, where we limit our inventory risk during the significant ramp of new products, the payables tend to be higher. Deferred income increased by \$26.6 million due primarily to increases in deferrals related to our module business and our distributors increasing inventory levels in anticipation of increased sales to their end customers. Significant working capital changes offsetting positive cash flows for the six months ended July 31, 2010 included an increase in accounts receivable of \$134.0 million due to higher levels of revenue and seasonal patterns.

Net cash provided by operating activities of \$326.9 million for the six months ended August 1, 2009 was the result of \$171.6 million in net non-cash operating expenses, \$208.2 million net cash provided by changes in working capital items partially offset by a net loss of \$53.0 million. Improvements in working capital included a decrease in inventories of \$100.6 million primarily due to our efforts to control our inventory levels and an increase of \$133.8 million in accounts payable due to efforts to extend payment periods to vendors. In addition, accrued liabilities and other increased \$69.1 million primarily due to a legal settlement in connection with the class action securities litigation.

Edgar Filing: MARVELL TECHNOLOGY GROUP LTD - Form 10-Q

Significant working capital changes offsetting positive cash flows for the six months ended August 1, 2009 related to an increase in accounts receivable of \$106.4 million due to the higher levels of revenue and seasonal patterns.

Table of Contents

Net Cash Used in Investing Activities

Net cash used in investing activities was \$429.9 million for the six months ended July 31, 2010 compared to \$19.7 million for the six months ended August 1, 2009. The net cash used in investing activities in the six months ended July 31, 2010 was primarily due to net purchases of short-term investments of \$363.1 million. In addition, we purchased \$39.3 million of property and equipment mainly to support additional capacity, \$20.7 million for an acquisition and purchased technology licenses of \$6.8 million. The net cash used for the six months ended August 1, 2009 was due to purchases of property and equipment of \$7.2 million along with purchases of technology licenses of \$12.6 million.

Net Cash Provided by Financing Activities

Net cash provided by financing activities was \$79.8 million for the six months ended July 31, 2010 compared to net cash provided by financing activities of \$20.2 million for the six months ended August 1, 2009. For the six months ended July 31, 2010, net cash provided by financing activities was attributable to proceeds from the issuance of common shares under our stock option plan of \$80.5 million, which was partially offset by payments on capital leases of \$1.0 million. For the six months ended August 1, 2009, net cash provided by financing activities was attributable to proceeds from the issuance of common shares under our stock option plans partially offset by principal payments on capital leases.

Prospective capital needs

We believe that our existing cash, cash equivalents and marketable securities, together with cash generated from operations and from exercise of employee stock options, will be sufficient to cover our working capital needs, capital expenditures, investment requirements and commitments for at least the next 12 months. Our capital requirements will depend on many factors, including our rate of sales growth, market acceptance of our products, costs of securing access to adequate manufacturing capacity, the timing and extent of research and development projects, costs of making improvements to facilities and increases in operating expenses, which are all subject to uncertainty.

Off-Balance Sheet Arrangements

As of July 31, 2010, we did not have any material off-balance-sheet arrangements, as defined in Item 303(a)(4)(ii) of SEC Regulation S-K.

Recent Accounting Pronouncements and Accounting Changes

See Note 2: Recent Accounting Pronouncements and Accounting Changes in Part 1, Item 1 of this Form 10-Q.

Related Party Transactions

See Note 13: Related Party Transactions in Part 1, Item 1 of this Form 10-Q.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Interest Rate Risk. Our interest rate risk relates primarily to our fixed income short-term investment portfolio as we do not have any outstanding debt as of July 31, 2010. We maintain an investment policy that requires minimum short-term and long-term credit ratings, diversification of credit risk and limits the long-term interest rate risk by requiring maturities of less than five years. We invest our excess cash primarily in highly liquid debt instruments of the U.S. government and its agencies, time deposits, money market mutual funds, and corporate debt securities. These investments are generally classified as available-for-sale and, consequently, are recorded on our balance sheets at fair market value with their related unrealized gain or loss reflected as a component of accumulated other comprehensive income in shareholders' equity. Investments in both fixed rate and floating rate interest earning securities carry a degree of interest rate risk. Fixed rate securities may have their fair market value adversely impacted due to a rise in interest rates, while floating rate securities may produce less income than predicted if interest rates fall.

To provide an assessment of the interest rate risk associated with our investment portfolio, we performed a sensitivity analysis to determine the impact that an adverse change in interest rates would have on the value of the investment portfolio. Based on investment positions as of July 31, 2010, a hypothetical 100 basis point increase in interest rates across all maturities would result in a \$10.6 million incremental decline in the fair market value of the portfolio. Due to our positive cash flow from operations, the relatively short-term nature of our investment portfolio and our ability to hold investments to maturity, such change in fair market value would likely not result in any cash flow impact.

Edgar Filing: MARVELL TECHNOLOGY GROUP LTD - Form 10-Q

As of July 31, 2010, our investment portfolio included \$36.5 million in par value of auction rate securities. Beginning in February 2008, liquidity issues in the global credit markets resulted in a failure of auction rate securities, as the amount of securities submitted for sale in those auctions exceeded the amount of bids. To estimate the fair value of the auction rate securities since that time, we have used a discounted cash flow model based on estimated timing and amount of future interest and principal payments, credit quality of the underlying securities and liquidity considerations, the collateralization of underlying security investments, the credit worthiness of the issuer of the securities, the probability of full repayment and other considerations. As of July 31, 2010, the fair value of auction rate securities was \$2.3 million less than par value and recorded in long-term investments. During the three months ended July 31, 2010, we sold one \$5 million auction rate security.

Table of Contents

Based on our assessment of our cash flow projections, a balance of approximately \$2.4 billion in cash, cash equivalents and short-term investments other than auction rate securities and the fact that we continue to generate positive cash flow on a quarterly basis, we do not anticipate having to sell these securities below par value in order to operate our business. We do not have the intent to sell these auction rate securities until recovery and it is more likely than not that we will not be required to sell the auction rate securities prior to recovery. Thus we consider the impairment to be temporary and recorded the unrealized loss to accumulated other comprehensive loss, a component of shareholders' equity.

Investment Risk. We invest in equity instruments of privately held companies for strategic purposes. These investments, which totaled \$8.1 million at July 31, 2010, are included in other non-current assets in the accompanying balance sheets and are accounted for under the cost method because our ownership is less than 20% and we do not have the ability to exercise significant influence over the operations of these companies. We monitor these investments for impairment and make appropriate reductions in carrying value when an impairment is deemed to be other-than-temporary.

Foreign Currency Exchange Risk. Substantially all of our sales and the majority of our expenses are denominated in U.S. dollars. Since we operate in many countries, we pay certain payroll and other operating expenses in local currencies and these expenses may be higher or lower in U.S. dollar terms. Furthermore, our operation in Israel represents a large portion of our total foreign currency exposure. We may also hold certain assets and liabilities, including potential tax liabilities in local currency on our balance sheet. These tax liabilities would be settled in local currency, therefore foreign exchange gains and losses from remeasuring the tax liabilities are recorded to other income and expense. The related effects of foreign exchange fluctuations on local currency expenses are recorded to operating expenses. Significant fluctuations in exchange rates in countries where we incur expenses or record assets or liabilities in local currency could affect our business and operating results in the future. There is also a risk that our customers may be negatively impacted in their ability to purchase our products priced in U.S. dollars when there has been significant volatility in foreign currency exchange rates.

We engage in hedging transactions to help mitigate some of the volatility to forecasted cash flows due to changes in foreign exchange rates, and in particular hedge a portion of the forecasted Israel Shekel expenses. We will enter into short-term forward exchange contracts, typically less than 12 months in duration, to hedge exposures for expenses and purchases denominated in foreign currencies when the currency exposure is significant and there is a high certainty of the underlying cash flow. We do not enter into derivative financial instruments for trading or speculative purposes. We may choose not to hedge certain foreign exchange exposures due to immateriality, offsetting exposures, prohibitive economic cost of hedging a particular currency, and limited availability of appropriate hedging instruments. To the extent our foreign currency hedges are effective, the results of the hedge activities offset the underlying expense within the operating expense. De-designated hedges or hedges deemed ineffective are recorded in other income and expense. We do not hedge our tax liabilities denominated in local currency on our balance sheet as the timing of these tax liabilities becoming cash flows is not deemed to be certain.

To provide an assessment of the foreign currency exchange risk associated with our foreign currency exposures within operating expense, we performed a sensitivity analysis to determine the impact that an adverse change in exchange rates would have on our financial statements. If the U.S. dollar weakened by 10%, our operating expense could increase by 2.4%. We expect our hedges of foreign currency exposures to be highly effective and offset a significant portion of the short-term impact of changes in exchange rates.

Item 4. Controls and Procedures

Management's Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended (the Exchange Act)). Disclosure controls and procedures are designed to ensure that information required to be disclosed is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC and that such information is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of July 31, 2010, our disclosure controls and procedures were effective.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting during the three months ended July 31, 2010 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Limitation on Effectiveness of Controls

It should be noted that any system of controls, however well designed and operated, can provide only reasonable, and not absolute, assurance that the objectives of the system are met. The design of any control system is based, in part, upon the benefits of the control system relative to its costs. Control systems can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. In addition, over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies and procedures may deteriorate. In addition, the design of any control system is based in part upon certain assumptions about the likelihood of future events.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The information set forth under Note 9 Commitments and Contingencies of our notes to unaudited condensed consolidated financial statements, included in Part I, Item 1, is incorporated herein by reference. For additional discussion of certain risks associated with legal proceedings, see Part II, Item 1A, Risk Factors, immediately below.

Item 1A. Risk Factors

Before deciding to purchase, hold or sell our common shares, you should carefully consider the risks described below in addition to the other cautionary statements and risks described elsewhere and the other information contained in this Quarterly Report on Form 10-Q and in our other filings with the SEC, including our Annual Report on Form 10-K for the year ended January 30, 2010 and subsequent reports on Forms 10-Q and 8-K. Many of these risks and uncertainties are beyond our control, including business cycles and seasonal trends of the computing, semiconductor and related industries.

Our financial condition and results of operations may vary from quarter to quarter, which may cause the price of our common shares to decline.

Our quarterly results of operations have fluctuated in the past and could do so in the future. Because our results of operations are difficult to predict, you should not rely on quarterly comparisons of our results of operations as an indication of our future performance.

Fluctuations in our results of operations may be due to a number of factors, including, but not limited to, those listed below and those identified throughout this Risk Factors section:

Edgar Filing: MARVELL TECHNOLOGY GROUP LTD - Form 10-Q

general economic and political conditions and specific conditions in the markets we address, including the continuing volatility in the technology sector and semiconductor industry, and current general economic volatility;

our dependence on a few customers for a significant portion of our revenue;

Table of Contents

cancellations, rescheduling or deferrals of significant customer orders or shipments;

our ability to scale our operations in response to changes in demand for our existing products or demand for new products requested by our customers;

gain or loss of a key customer or design win;

our ability to develop and introduce new and enhanced products in a timely and effective manner;

our ability to maintain a competitive cost structure for our manufacturing and assembly and test processes;

failure to qualify our products or our suppliers' manufacturing lines;

our ability to exercise stringent quality control measures to obtain high yields;

our ability to successfully transition to smaller geometry process technologies or achieve higher levels of design integration;

effective and timely update of equipment and facilities as required for leading edge production capabilities;

our ability to attract and retain highly skilled managerial, engineering, sales and marketing personnel;

our ability to anticipate and adapt to changes in technology and evolving industry standards and our customers' changing demands;

failure to protect our intellectual property; and

any current and future litigation that could result in substantial costs and a diversion of management's attention and resources that are needed to successfully maintain and grow our business.

Due to fluctuations in our quarterly results of operations and other factors, the price at which our common shares will trade is likely to continue to be highly volatile. The closing sale price of our common shares on the Nasdaq Global Select Market for the period of January 1, 2009 to July 31, 2010 ranged from a low of \$5.80 to a high of \$22.58. In future periods, if our revenues or operating results are below our estimates or the estimates or expectations of public market analysts and investors, our stock price could decline. On average, technology companies have been subject to a greater number of securities class action claims than companies in many other industries as a result of stock price volatility. If our stock price is volatile, we may become involved in this type of litigation. Any litigation could result in substantial costs and a diversion of management's attention and resources that are needed to successfully maintain and grow our business.

Our business, financial condition and results of operations may be adversely impacted by global economic conditions, which may cause a decline in the market price of our common shares.

We operate in the semiconductor industry, which is cyclical and subject to rapid change and evolving industry standards. From time to time, this industry has experienced significant demand downturns. These downturns are characterized by decreases in product demand, excess customer inventories and sometimes accelerated erosion of prices. These factors could cause substantial fluctuations in our net revenue, gross margin, cash

Edgar Filing: MARVELL TECHNOLOGY GROUP LTD - Form 10-Q

flows and results of operations. In addition, during these downturns some competitors may become more aggressive in their pricing practices, which would adversely impact our gross margin. Any downturns in the current environment may be severe and prolonged, and any failure of the markets in which we operate to fully recover from downturns could seriously impact our revenue and harm our business, financial condition and results of operations. The semiconductor industry is also subject to periodic increases in demand and supply constraints, which may affect our ability to ship products. Accordingly, our results of operations may vary significantly as a result of the general conditions in the semiconductor industry, which could cause fluctuations in our stock price.

The global credit and financial markets continue to experience extreme volatility and disruptions, including severely diminished liquidity and credit availability, increased concerns about inflation and deflation, decreased consumer confidence, lower economic growth, volatile energy costs, increased unemployment rates, and uncertainty about economic stability. We cannot predict the timing, strength or duration of any economic slowdown or subsequent global economic recovery in the hard disk drive or in the semiconductor industry. If the economy or markets in which we operate deteriorate from current levels, our business, financial condition and results of operations will likely be materially and adversely affected. Additionally, the combination of our lengthy sales cycle coupled with challenging macroeconomic conditions could adversely impact our results of operations.

Table of Contents

A large portion of our business is dependent on the hard disk drive industry, which is highly cyclical, experiences rapid technological change, and is facing increased competition from alternative technologies.

The hard disk drive industry is intensely competitive, and the technology changes rapidly. As a result, this industry has historically been cyclical, with periods of increased demand and rapid growth followed by periods of oversupply and subsequent contraction. These cycles may affect us because some of our customers are participants in this industry.

Hard disk drive manufacturers tend to order more components than they may need during growth periods, and sharply reduce orders for components during periods of contraction. In addition, advances in existing technologies and the introduction of new technologies may result in lower demand for disk drive storage devices, thereby reducing demand for our products. Rapid technological changes in the hard disk drive industry often result in significant and rapid shifts in market share among the industry's participants. If the hard disk drive manufacturers using our products do not retain or increase their market share, our sales may decrease.

Future changes in the nature of information storage products may reduce demand for traditional hard disk drives. For instance, products using alternative technologies, such as semiconductor memory, optical storage, solid-state flash drives and other storage technologies could become a significant source of competition to manufacturers of hard disk drives. Flash memory has typically been more costly than disk drive technologies. However, flash memory manufacturers have been reducing the prices for their products, which could enable them to compete more effectively with very small form factor hard disk drive products. Demand for hard disk drives could be reduced if alternative storage technologies such as flash memory can meet customers' cost and capacity requirements.

We operate in the intensely competitive mobile and wireless communications markets, and our failure to compete effectively would harm our results of operations.

The semiconductor industry and specifically the mobile and wireless communications markets are extremely competitive, and we expect competition to intensify as current competitors expand their product offerings and new competitors enter the market. We currently compete with a number of large domestic and international companies in the business of designing integrated circuits and related applications, some of which have greater financial, technical and management resources than us. We expect competition to continue to increase as industry standards continue to evolve and become better known, and others realize the market potential of wired and wireless products and services.

As the markets we compete in continue to increase, our revenues and gross margins may be harmed. For example, competitors with greater financial resources may be able to offer lower prices than us, or they may offer additional products, services or other incentives that we may not be able to match. In addition, many of our competitors operate and maintain their own fabrication facilities and have longer operating histories, greater name recognition, larger customer bases, and greater sales, marketing and distribution resources than we do. Furthermore, our current and potential competitors in the mobile and wireless markets have established or may establish financial and strategic relationships among themselves or with existing or potential customers or other third parties to increase the ability of their products to address the needs of customers. Accordingly, new competitors or alliances among these competitors may acquire significant market share, which would harm our business. We cannot assure you that we will be able to continue to compete successfully against existing or new competitors, which would harm our results of operations.

Our sales are concentrated in a few customers, and if we lose or experience a significant reduction in sales to any of these key customers, our revenues may decrease substantially.

We receive a significant amount of our revenues from a limited number of customers. For the six months ended July 31, 2010, three customers accounted for a total of approximately 45% of our net revenue. Sales to our largest customers have fluctuated significantly from period to period primarily due to the timing and number of design wins with each customer, as well as the continued diversification of our customer base as we expand into new markets, and will likely continue to fluctuate dramatically in the future. The loss of any of our large customers or a significant reduction in sales we make to them would likely harm our financial condition and results of operations. Our operating results in the foreseeable future will continue to depend on sales to a relatively small number of customers, as well as the ability of these customers to sell products that incorporate our products. In the future, these customers may decide not to purchase our products at all, purchase fewer products than they did in the past, or alter their purchasing patterns in some other way, particularly because:

substantially all of our sales are made on a purchase order basis, which permits our customers to cancel, change or delay product purchase commitments with little or no notice to us and without penalty;

our customers may develop their own solutions;

our customers may purchase integrated circuits from our competitors; or

our customers may discontinue sales or lose market share in the markets for which they purchase our products.

Table of Contents

If we are unable to develop and introduce new and enhanced products that achieve market acceptance in a timely and cost-effective manner, our results of operations and competitive position will be harmed.

Our future success will depend on our ability, in a timely and cost-effective manner, to develop and introduce new products and enhancements to our existing products. We must also achieve market acceptance for these products and enhancements. If we do not successfully develop and achieve market acceptance for new and enhanced products, our ability to maintain or increase revenues will suffer. The development of our products is highly complex. We occasionally have experienced delays in completing the development and introduction of new products and product enhancements, and we could experience delays in the future. Even if new and enhanced products are introduced to the market, we may not be able to achieve market acceptance of them in a timely manner.

In addition, our longstanding relationships with some of our larger customers may also deter other potential customers who compete with these customers from buying our products. To attract new customers or retain existing customers, we may offer certain customers favorable prices on our products. If these prices are lower than the prices paid by our existing customers, we would have to offer the same lower prices to certain of our customers who have contractual most favored nation pricing arrangements. In that event, our average selling prices and gross margins would decline.

We rely on independent foundries and subcontractors for the manufacture, assembly and testing of our integrated circuit products, and the failure of any of these third party vendors to deliver products or otherwise perform as requested could damage our relationships with our customers, decrease our sales and limit our growth.

We do not have our own manufacturing or assembly facilities and have very limited in-house testing facilities, therefore, we rely on third party vendors to manufacture, assemble and test the products we design. We currently rely on several third party foundries to produce our integrated circuit products. We also currently rely on several third party assembly and test subcontractors to assemble, package and test our products. This exposes us to a variety of risks, including the following:

Regional Concentration:

Substantially all of our products are manufactured by third party foundries located in Taiwan. Currently our alternative manufacturing sources are located in China and Singapore. In addition, substantially all of our assembly and testing facilities are located in Singapore, Taiwan, Malaysia and the Philippines. Because of the geographic concentration of these third party foundries, as well as our assembly and test subcontractors, we are exposed to the risk that their operations may be disrupted by regional disasters. For example, the risk of an earthquake in Taiwan and elsewhere in the Pacific Rim region is significant due to the proximity of major earthquake fault lines to the facilities of our foundries and assembly and test subcontractors. Taiwan has experienced significant earthquakes in the past, including, for example, in March 2010, and may be subject to additional earthquakes that could disrupt manufacturing operations. In addition, the resurgence of severe acute respiratory syndrome, the outbreak of avian flu and any similar future outbreaks in Asia, where these foundries are located, could affect the production capabilities of our manufacturers by resulting in quarantines or closures. In the event of such a quarantine or closure, if we were unable to quickly identify alternate manufacturing facilities, our revenues, cost of goods sold and results of operations would be negatively impacted. If these vendors do not provide us with high-quality products and services in a timely manner, or if one or more of these vendors terminates its relationship with us, we may be unable to obtain satisfactory replacements to fulfill customer orders on a timely basis, our relationships with our customers could suffer, our sales could decrease and harm our business, financial condition or results of operations.

No Guarantee of Capacity or Supply:

The ability of each foundry to provide us with semiconductor devices is limited by its available capacity and existing obligations. In addition, when demand is strong, availability of foundry capacity may be constrained, and with limited exceptions, our vendors are not obligated to perform services or supply products to us for any specific period, in any specific quantities, or at any specific price, except as may be provided in a particular purchase order. For example, as a consequence of the economic downturn, during the last several months of fiscal 2010 and continuing into fiscal 2011, we experienced some supply shortages due to the difficulties encountered by the foundries in rapidly increasing their production capacities from low utilization levels to the high utilization levels required due to a rapid increase in demand. Although we have entered into contractual commitments to supply specified levels of products to some of our customers, we may not have sufficient levels of production capacity with all of our foundries, despite signing an agreement with a foundry to reserve and secure foundry fabrication capacity for a fixed number of wafers. Despite this agreement, foundry capacity may not be available when we need it or at reasonable prices. We place our orders on the basis of our customers' purchase orders or our forecast of customer demand, and the foundries can allocate capacity to the production of other companies' products and reduce deliveries to us on short notice. It is possible that foundry customers that are larger and better financed than we are or that have long-term agreements with our main foundries, may induce our foundries to reallocate capacity to those customers. This reallocation could impair our ability to secure the supply of components that we need.

Table of Contents

Although we use several independent foundries to manufacture our semiconductor products, most of our components are not manufactured at more than one foundry at any given time, and our products typically are designed to be manufactured in a specific process at only one of these foundries. Accordingly, if one of our foundries is unable to provide us with components as needed, it may be difficult for us to transition the manufacture of our products to other foundries, and we could experience significant delays in securing sufficient supplies of those components. This could result in a material decline in revenues, net income and cash flow.

In order to secure sufficient foundry capacity when demand is high and mitigate the risks described in the foregoing paragraph, we may enter into various arrangements with suppliers that could be costly and harm our results of operations, such as non-refundable deposits with or loans to foundries in exchange for capacity commitments, and contracts that commit us to purchase specified quantities of integrated circuits over extended periods. We may not be able to make any such arrangement in a timely fashion or at all, and any arrangements may be costly, reduce our financial flexibility, and not be on terms favorable to us. Moreover, if we are able to secure foundry capacity, we may be obligated to use all of that capacity or incur penalties. These penalties may be expensive and could harm our financial results.

Uncertain Yields and Quality:

The fabrication of integrated circuits is a complex and technically demanding process. Our foundries have from time to time experienced manufacturing defects and reduced manufacturing yields. Changes in manufacturing processes or the inadvertent use of defective or contaminated materials by our foundries could result in lower than anticipated manufacturing yields or unacceptable performance. Many of these problems are difficult to detect at an early stage of the manufacturing process and may be time consuming and expensive to correct. Poor yields from our foundries, or defects, integration issues or other performance problems in our products could cause us significant customer relations and business reputation problems, harm our financial results and result in financial or other damages to our customers. Our customers could also seek damages from us for their losses. A product liability claim brought against us, even if unsuccessful, would likely be time consuming and costly to defend. In addition, defects in our existing or new products could result in significant warranty, support and repair costs, and divert the attention of our engineering personnel from our product development efforts.

To the extent that we rely on outside suppliers to manufacture or assemble and test our products, we may have a reduced ability to control directly product delivery schedules and quality assurance. This lack of control may result in product shortages or quality assurance problems that could delay shipments of products or increase manufacturing, assembly, testing or other costs.

If we fail to appropriately scale our operations in response to changes in demand for our existing products or to the demand for new products requested by our customers, our business and profitability could be materially and adversely affected.

To achieve our business objectives, it may be necessary from time to time for us to expand or contract our operations. In the future, we may not be able to scale our workforce and operations in a sufficiently timely manner to respond effectively to changes in demand for our existing products or to the demand for new products requested by our customers. In that event, we may be unable to meet competitive challenges or exploit potential market opportunities, and our current or future business could be materially and adversely affected. Conversely, if we expand our operations and workforce too rapidly in anticipation of increased demand for our products, and such demand does not materialize at the pace at which we expected, the rate of increase in our costs and operating expenses may exceed the rate of increase in our revenue, which would adversely affect our results of operations. In addition, if such demand does not materialize at the pace which we expect, we may be required to scale down our business through expense and headcount reductions as well as facility consolidations or closures that could result in restructuring charges that would materially and adversely affect our results of operations. For example, in order to reduce expenses in the challenging economic environment that began during the second half of fiscal 2009, in late fiscal 2009 and early in fiscal 2010, we implemented certain cost reduction measures to reduce operating expenses. Because many of our expenses are fixed in the short-term or are incurred in advance of anticipated sales, we may not be able to decrease our expenses in a timely manner to offset any decrease in customer demand. If customer demand does not increase as anticipated, our profitability could be adversely affected due to our higher expense levels.

Our past growth has placed, and any future long-term growth is expected to continue to place, a significant strain on our management personnel, systems and resources. To implement our current business and product plans, we will need to continue to expand, train, manage and motivate our workforce. All of these endeavors will require substantial management effort. Although we have implemented an enterprise resource planning system to help us improve our planning and management processes, we anticipate that we will also need to continue to implement and improve a variety of new and upgraded operational and financial systems, as well as additional procedures and other internal management systems. These systems can be time consuming and expensive to implement, increase management responsibilities and divert management attention. If we are unable to effectively manage our expanding operations, we may be unable to scale our business quickly enough to meet competitive challenges or exploit potential market opportunities, or conversely, we may scale our business too quickly and the rate of increase in our costs and expenses may exceed the rate of increase in our revenue, either of which would materially and adversely affect our results of operations.

Table of Contents

We are subject to order and shipment uncertainties, and if we are unable to accurately predict customer demand, we may hold excess or obsolete inventory, which would reduce our gross margin, or, conversely, we may have insufficient inventory, which would result in lost revenue opportunities and potentially in loss of market share and damaged customer relationships.

We typically sell products pursuant to purchase orders rather than long-term purchase commitments. Customers can generally cancel or defer purchase orders on short notice without incurring a significant penalty. In the recent past, some of our customers have developed excess inventories of their own products and have, as a consequence, deferred purchases of our products. We cannot accurately predict what or how many products our customers will need in the future. Anticipating demand is difficult because our customers face unpredictable demand for their own products and are increasingly focused more on cash preservation and tighter inventory management. In addition, as an increasing number of our chips are being incorporated into consumer products, we anticipate greater fluctuations in demand for our products, which makes it more difficult to forecast customer demand.

We place orders with our suppliers based on forecasts of customer demand and, in some instances, may establish buffer inventories to accommodate anticipated demand. Our forecasts are based on multiple assumptions, each of which may introduce error into our estimates. For example, our ability to accurately forecast customer demand may be impaired by the delays inherent in our lengthy sales cycle. The sales cycle for many of our products is long and requires us to invest significant resources with each potential customer without any assurance of sales to that customer. Our sales cycle typically begins with an extended evaluation and test period, also known as qualification, during which our products undergo rigorous reliability testing by our customers. Qualification is typically followed by an extended development period by our customers and an additional three to nine month period before a customer commences volume production of equipment incorporating our products. This lengthy sales cycle creates the risk that our customers will decide to cancel or change product plans for products incorporating our integrated circuits prior to completion, which makes it even more difficult to forecast customer demand.

If we overestimate customer demand, we may allocate resources to manufacturing products that we may not be able to sell when we expect to, if at all. As a result, we would hold excess or obsolete inventory, which would reduce our gross margin and adversely affect our financial results. Conversely, if we underestimate customer demand or if insufficient manufacturing capacity is available, we would miss revenue opportunities and potentially lose market share and damage our customer relationships. In addition, any future significant cancellations or deferrals of product orders or the return of previously sold products could materially and adversely affect our profit margins, increase product obsolescence and restrict our ability to fund our operations.

We must keep pace with rapid technological change and evolving industry standards in the semiconductor industry to remain competitive.

Our future success will depend on our ability to anticipate and adapt to changes in technology and evolving industry standards. We sell products in markets that are characterized by rapid technological change, evolving industry standards, frequent new product introductions, short product life cycles and increasing demand for higher levels of integration and smaller process geometries. Our past sales and profitability have resulted, to a large extent, from our ability to anticipate changes in technology and industry standards and to develop and introduce new and enhanced products incorporating the new standards and technologies. Our ability to adapt to these changes and to anticipate future standards, and the rate of adoption and acceptance of those standards, will be a significant factor in maintaining or improving our competitive position and prospects for growth. If new industry standards emerge which we do not properly anticipate, our products or our customers' products could become unmarketable or obsolete, and we could lose market share. We may also have to incur substantial unanticipated costs to comply with these new standards. In addition, our target markets continue to undergo rapid growth and consolidation. A significant slowdown in any of these markets could materially and adversely affect our business, financial condition and results of operations. Our success will also depend on the ability of our customers to develop new products and enhance existing products for the markets they serve and to introduce and promote those products successfully.

The average selling prices of products in our markets have historically decreased rapidly and will likely do so in the future, which could harm our revenues and gross margin.

The products we develop and sell are primarily used for high volume applications. As a result, the prices of those products have historically decreased rapidly. We may not be able to maintain or improve the gross margins and our gross profits and financial results will suffer if we are unable to offset any reductions in our average selling prices by increasing our efficiency through reducing our costs or developing new or enhanced products on a timely basis with higher selling prices or gross margin.

Additionally, because we do not operate our own manufacturing, assembly or testing facilities, we may not be able to reduce our costs as rapidly as companies that operate their own facilities, and our costs may even increase, which could also reduce our gross margin. In the past, we have reduced the average selling prices of our products in anticipation of future competitive pricing pressures, new product introductions by us or our competitors and other factors. We expect that we will have to do so again in the future.

We may experience difficulties in transitioning to smaller geometry process technologies or in achieving higher levels of design integration, which may result in reduced manufacturing yields, delays in product deliveries and increased expenses.

In order to remain competitive, we expect to continue to transition our semiconductor products to increasingly smaller line width geometries. This transition requires us to modify the manufacturing processes for our products and to redesign some products. We periodically evaluate the benefits, on a product-by-product basis, of migrating to smaller geometry process technologies to reduce our costs. In the past, we

Table of Contents

have experienced some difficulties in shifting to smaller geometry process technologies or new manufacturing processes, which resulted in reduced manufacturing yields, delays in product deliveries and increased expenses. We may face similar difficulties, delays and expenses as we continue to transition our products to smaller geometry processes. We are dependent on our relationships with our foundry subcontractors to transition to smaller geometry processes successfully. We cannot assure you that the foundries that we use will be able to effectively manage the transition or that we will be able to maintain our existing foundry relationships or develop new ones. If we or any of our foundry subcontractors experience significant delays in this transition or fail to efficiently implement this transition, we could experience reduced manufacturing yields, delays in product deliveries and increased expenses, all of which could harm our relationships with our customers and our results of operations. As smaller geometry processes become more prevalent, we expect to continue to integrate greater levels of functionality, as well as customer and third party intellectual property, into our products, however, we may not be able to achieve higher levels of design integration or deliver new integrated products on a timely basis, if at all. Moreover, even if we are able to achieve higher levels of design integration, such integration may have a short-term adverse impact on our results of operations, as we may reduce our revenue by integrating the functionality of multiple chips into a single chip.

As a result of our global operations, we face foreign business, political, economic and exchange rate risks, which may harm our results of operations, because a majority of our products and our customers' products are manufactured and sold outside of the United States.

A substantial portion of our business is conducted outside of the United States and, as a result, we are subject to foreign business, political and economic risks. All of our products are manufactured outside of the United States. Our current qualified integrated circuit foundries are located in the same region within Taiwan, and our primary assembly and test subcontractors are located in the Pacific Rim region. In addition, many of our customers are located outside of the United States, primarily in Asia, which further exposes us to foreign risks. Sales to customers located in Asia represented approximately 84% of our net revenue for the six months ended July 31, 2010, 89% of our net revenue in fiscal 2010, 86% of our net revenue in fiscal 2009 and 84% of our net revenue in fiscal 2008.

As of July 31, 2010, we have substantial operations outside of the U.S., including approximately 20% and 14% of our workforce in Israel and China, respectively. These operations are directly influenced by the political and economic conditions, as well as possible military hostilities that could affect our operations in Israel. We anticipate that our manufacturing, assembly, testing and sales outside of the United States will continue to account for a substantial portion of our operations and revenue in future periods. Accordingly, we are subject to risks associated with international operations, including:

political, social and economic instability, including wars, terrorism, other hostilities and political unrest, boycotts, curtailment of trade and other business restrictions;

compliance with domestic and foreign export and import regulations, and difficulties in obtaining and complying with domestic and foreign export, import and other governmental approvals, permits and licenses;

compliance with foreign laws, and laws and practices that favor local companies;

difficulties in staffing and managing foreign operations;

trade restrictions or higher tariffs;

transportation delays;

difficulties of managing distributors, especially because we expect to continue to increase our sales through international distributors;

Edgar Filing: MARVELL TECHNOLOGY GROUP LTD - Form 10-Q

less effective protection of intellectual property than is afforded to us in the United States or other developed countries; and

inadequate local infrastructure.

Moreover, the international nature of our business subjects us to risk associated with the fluctuation of the U.S. dollar versus foreign currencies. Decreases in the value of the U.S. dollar versus currencies in jurisdictions where we have large fixed costs or our third party manufacturers have significant cost will increase the cost of such operations, which could harm our results of operations. For example, we have large fixed costs in Israel, which will become greater if the U.S. dollar declines in value versus the Israeli Shekel. On the other hand, substantially all of our sales have been denominated in U.S. dollars.

Table of Contents

We rely on third party distributors and manufacturers representatives and the failure of these distributors and manufacturers representatives to perform as expected could reduce our future sales.

From time to time, we enter into relationships with distributors and manufacturers representatives to sell our products, and we are unable to predict the extent to which these partners will be successful in marketing and selling our products. Moreover, many of our distributors and manufacturers representatives also market and sell competing products, and may terminate their relationships with us at any time. Our future performance will also depend, in part, on our ability to attract additional distributors or manufacturers representatives that will be able to market and support our products effectively, especially in markets in which we have not previously distributed our products. If we cannot retain or attract quality distributors or manufacturers representatives, our sales and results of operations will be harmed.

We have made and may continue to make acquisitions and investments, which could divert management's attention, cause ownership dilution to our shareholders, be difficult to integrate and adversely affect our results of operations and share price.

We expect to continue to make acquisitions of, and investments in, businesses that offer complementary products and technologies, augment our market segment coverage, or enhance our technological capabilities. We may also enter into strategic alliances or joint ventures to achieve these goals. We cannot assure you that we will be able to identify suitable acquisition, investment, alliance or joint venture opportunities in the future, or that we will be able to consummate any such transactions or relationships on terms and conditions acceptable to us, or that such transactions or relationships will be successful.

Integrating newly acquired businesses or technologies typically entails many risks that could put a strain on our resources, could be costly and time consuming, and might not be successful. In addition, any acquisitions could materially harm our results of operations or liquidity as a result of either the issuance of dilutive equity securities, new debt or contingent liabilities, or payment of cash. Moreover, such acquisitions could divert our management's attention from other business concerns and also result in customer dissatisfaction. In addition, we might lose key employees of the newly acquired organizations during the acquisition process. The acquisition of another company or its products and technologies may also require us to enter into a geographic or business market in which we have little or no prior experience.

We are exposed to potential impairment charges on certain assets.

We have approximately \$2.0 billion of goodwill and \$152.9 million of intangible assets on our balance sheet as of July 31, 2010. Under GAAP, we are required to review our intangible assets for impairment whenever events or changes in circumstances indicate that the carrying value of these assets may not be recoverable. We perform an assessment of goodwill at the beginning of our fiscal fourth quarter and we also assess the impairment of goodwill on an interim basis whenever events or changes in circumstances indicate that the carrying value of such assets may not be recoverable. If the businesses acquired fail to meet our expectations set out at the time of the acquisition or if our market capitalization adjusted for control premiums and other factors declines to below our carrying value, we could incur significant goodwill or intangible impairment charges, which could negatively impact our financial results. For example, as a result of our analysis related to acquired intangible assets, we recorded an impairment charge of \$15.6 million in the fourth quarter ended January 31, 2009. In addition, from time to time, we have made investments in other private companies. If the companies that we invest in are unable to execute their plans and succeed in their respective markets, we may not benefit from such investments, and we could potentially lose the amounts we invest. We evaluate our investment portfolio on a regular basis to determine if impairments have occurred. Impairment charges could have a material impact on our results of operations in any period.

We have had material weaknesses in internal control over financial reporting in prior fiscal years. Although we believe we have taken the necessary actions to strengthen the weaknesses in our control structure, we cannot assure you that additional material weaknesses will not be identified in the future. If our internal control over financial reporting or disclosure controls and procedures are not effective, there may be errors in our financial statements that could require a restatement or our filings may not be filed on a timely basis and investors may lose confidence in our reported financial information, which could lead to a decline in our stock price.

We believe that effective internal controls are necessary for us to provide reliable financial reports and effectively prevent fraud. Any inability to provide reliable financial reports or prevent fraud could harm our business. The Sarbanes-Oxley Act of 2002 requires management and our auditors to evaluate and assess the effectiveness of our internal control over financial reporting, as of the end of each year, and to include a management report assessing the effectiveness of our internal control over financial reporting in each Annual Report on Form 10-K.

Our management, including our Chief Executive Officer and Chief Financial Officer, does not expect that our internal control over financial reporting will prevent all error and all fraud. These inherent limitations include the realities that judgments in decision making can be faulty, breakdowns can occur because of simple errors or mistake and errors discovered by personnel within control systems may not be properly disclosed and addressed. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by

Edgar Filing: MARVELL TECHNOLOGY GROUP LTD - Form 10-Q

management override of the controls. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. In addition, we are consistently evaluating the design and operating effectiveness of our internal controls, a process which sometimes leads to modifications in such controls. These modifications could affect the overall effectiveness or evaluation of the control system in the future by us or our independent registered public accounting firm. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and we

Table of Contents

cannot assure you that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Changes in financial accounting standards or practices or existing taxation rules or practices may adversely affect our financial results.

Changes in financial accounting standards or practices or changes in existing taxation rules or practices may have a significant effect on our reported results. New accounting pronouncements and taxation rules and varying interpretations of accounting pronouncements and taxation practice have occurred and may occur in the future. For example, the U.S. Congress is considering legislation affecting the taxation of foreign corporations and such legislation if enacted might adversely affect our future tax liabilities and have a material impact on our results of operations. Changes to existing rules or the questioning of current practices by regulators may adversely affect our reported financial results or the way we conduct our business.

Tax benefits that we receive may be terminated or reduced in the future, which would increase our costs.

Over the course of the past several years, we have entered into agreements with the local governments in certain foreign jurisdictions where we have significant operations to provide us with favorable tax rates in those jurisdictions if certain criteria are met.

We obtained from the Minister of Finance of Bermuda under the Exempt Undertakings Tax Protection Act 1966, as amended, an undertaking that, in the event that Bermuda enacts legislation imposing tax computed on income and capital gains, those taxes should not apply to us until March 28, 2016.

The Economic Development Board of Singapore (the EDB) granted Pioneer Status to our wholly-owned subsidiary in Singapore in July 1999. This tax exemption was to expire after ten years, but the EDB in June 2006 agreed to extend the term to 15 years. As a result, we anticipate that a significant portion of the income we earn in Singapore during this period will be exempt from the Singapore income tax. We are required to meet several requirements as to investment, headcount and activities in Singapore to retain this status. Due to the economic downturn in fiscal 2010, we came to an agreement to amend the Pioneer conditions for future years and preserve the 15 year tax exemption status.

Under the Israeli law of approved or benefited enterprise, two branches of Marvell Israel (MISL), the GTL division and the cellular division (formerly Marvell DSPC), are entitled to a beneficial tax program that includes reduced tax rates and exemption of certain income. The first program was approved for MISL in 1995 and the most recent was elected in 2009. Marvell DSPC has five approved programs with the first approved in 1990 and the most recent elected in 2010. The benefit period is generally ten to 15 years and begins in the first year in which our Israeli branches earn taxable income from the approved or benefited enterprises, provided the maximum period has not elapsed. Income from the approved or benefited enterprises is subject to reduced tax rates ranging between 0% and 10% or tax exemptions for fiscal years 2008 through 2020.

During fiscal 2007, our Switzerland subsidiary received a ten-year Federal and Cantonal tax holiday on revenues from research and design and wafer supply trading activities that will expire in 2017. If certain requirements are not met in the initial five-year period, our incentive exemption would be reduced by 50% on the next five-year period of the tax holiday, which would adversely affect our financial results.

If any of our tax arrangements in these foreign jurisdictions were terminated, our financial results could be harmed.

We may be unable to protect our intellectual property, which would negatively affect our ability to compete.

We believe one of our key competitive advantages results from our collection of proprietary technologies that we have developed since our inception. If we fail to protect these intellectual property rights, competitors could sell products based on technology that we have developed that could harm our competitive position and decrease our revenues. We believe that the protection of our intellectual property rights is and will continue to be important to the success of our business. We rely on a combination of patent, copyright, trademark and trade secret laws, as well as nondisclosure agreements and other methods, to protect our proprietary technologies. We also enter into confidentiality or license agreements with our employees, consultants and business partners, and control access to and distribution of our documentation and other proprietary information. We have been issued several U.S. and foreign patents and have a number of pending U.S. and foreign patent applications. However, a patent may not be issued as a result of any applications or, if issued, claims allowed may not be sufficiently broad to protect our technology. In addition, it is possible that existing or future patents may be challenged, invalidated or circumvented. Despite our efforts, unauthorized parties may attempt to copy or otherwise obtain and use our products or proprietary technology. Monitoring unauthorized use of our technology is difficult, and the steps that we have taken may not prevent unauthorized use of our technology, particularly in foreign countries where the laws may not protect our proprietary rights as fully as in the United States. If our patents do not adequately protect our technology, our competitors

may be able to offer products similar to ours, which would adversely impact our business.

Table of Contents

Certain of our software (as well as that of our customers) may be derived from so-called open source software that is generally made available to the public by its authors and/or other third parties. Such open source software is often made available under licenses, such as the GNU General Public License which impose certain obligations on us in the event we were to distribute derivative works of the open source software. These obligations may require us to make source code for the derivative works available to the public, and/or license such derivative works under a particular type of license, rather than the forms of license customarily used to protect our intellectual property. In addition, there is little or no legal precedent for interpreting the terms of certain of these open source licenses, including the determination of which works are subject to the terms of such licenses. While we believe we have complied with our obligations under the various applicable licenses for open source software, in the event that the copyright holder of any open source software were to successfully establish in court that we had not complied with the terms of a license for a particular work, we could be required to release the source code of that work to the public and/or stop distribution of that work.

We may become involved with costly and lengthy litigation involving our patents and other intellectual property, which could subject us to liability, require us to indemnify our customers, require us to obtain or renew licenses, stop selling our products or force us to redesign our products.

Litigation involving patents and other intellectual property is widespread in the high-technology industry and is particularly prevalent in the semiconductor industry, where a number of companies and other entities aggressively bring numerous infringement claims to assert their patent portfolios. From time to time our subsidiaries and customers receive, and may continue to receive in the future, notices that allege claims of infringement, misappropriation or misuse of the intellectual property rights of third parties. For example, in recent years, multiple claims have been made against our subsidiaries and our customers related to standards-based technologies such as wireless LAN. In addition, we have had certain patent licenses with third parties that have not been renewed, and if we cannot successfully renew these licenses, our subsidiaries and customers could face claims of infringement. These claims could result in litigation and/or claims for indemnification, which, in turn, could subject us to significant liability for damages, attorneys fees and costs. Any potential intellectual property litigation also could force us to do one or more of the following:

stop selling, offering for sale, making, having made or exporting products or using technology that contains the allegedly infringing intellectual property;

limit or restrict the type of work that employees involved in such litigation may perform for us;

pay substantial damages and/or license fees and/or royalties to the party claiming infringement that could adversely impact our liquidity or operating results;

attempt to obtain or renew licenses to the relevant intellectual property, which licenses may not be available on reasonable terms or at all; and

attempt to redesign those products that contain the allegedly infringing intellectual property.

In addition, many of our contracts with our customers require us to indemnify our customers' products against claims alleging infringement of the proprietary rights of other parties. From time to time, we have agreed to indemnify select customers for claims made against our products, where such claims allege infringement of third party intellectual property rights, including, but not limited to, patents, registered trademarks and/or copyrights.

We have been named as a party to several lawsuits and we may be named in additional litigation in the future, all of which could result in an unfavorable outcome and have a material adverse effect on our business, financial condition, results of operations, cash flows, and the trading price for our securities.

We have been named as a party to several lawsuits and we may be named in additional litigation in the future. Please refer to Note 9 Commitments and Contingencies (Contingencies) of our Notes to our unaudited condensed consolidated financial statements set forth in Part I, Item 1 for a more detailed description of a number of the litigation matters we are currently engaged in. Under certain circumstances, we have contractual and other legal obligations to indemnify and to incur legal expenses on behalf of current and former directors and officers for these

Edgar Filing: MARVELL TECHNOLOGY GROUP LTD - Form 10-Q

lawsuits. In addition, due to the high volatility of our stock price, we may be vulnerable to securities class action litigation. The ultimate outcome of these actions could have a material adverse effect on our business and the trading price for our securities. Litigation may be time-consuming, expensive, and disruptive to normal business operations, and the outcome of litigation is difficult to predict. The defense of these lawsuits may result in significant expenditures and the continued diversion of our management's time and attention from the operation of our business, which could impede our business. In the event we were to receive an unfavorable outcome in any lawsuit, our business, financial condition, results of operations, cash flows and the trading price of our securities may be materially and adversely affected.

Table of Contents

As a result of the settlement with the SEC, we cannot invoke the safe harbor for the forward-looking statements provision of the Private Securities Litigation Reform Act of 1995 for three years following the entry of judgment.

On May 8, 2008, we announced that we had reached an agreement with the SEC that concluded the SEC's formal investigation of us with respect to our historic stock option granting practices. As a result of our SEC settlement, we have forfeited for three years following the entry of judgment, or June 20, 2011, the ability to invoke the safe harbor for the forward-looking statements provision of the Private Securities Litigation Reform Act of 1995. This safe harbor provided us enhanced protection from liability related to forward-looking statements if the forward-looking statements were either accompanied by meaningful cautionary statements or were made without actual knowledge that they were false or misleading. Without the statutory safe harbor, it may be more difficult for us to defend against any claims based on forward-looking statements.

We depend on key personnel to manage our business, and if we are unable to retain our current personnel and hire additional personnel, our ability to develop and successfully market our products could be harmed.

We believe our future success will depend in large part upon our ability to attract and retain highly skilled managerial, engineering, sales and marketing personnel. The loss of key employees or the inability to attract qualified personnel, including engineers, sales and marketing personnel could delay the development and introduction of and harm our ability to sell our products. We typically do not enter into employment agreements with any of our key technical personnel, and their knowledge of our business and industry would be extremely difficult to replace.

The competition for qualified technical personnel with significant experience in the design, development, manufacturing, marketing and sales of integrated circuits is intense. It is important that we are able to identify, hire and retain engineers who are familiar with the intricacies of the design and manufacture of products based on analog technology. Our key technical personnel represent a significant asset and serve as the source of our technological and product innovations. We may not be successful in attracting and retaining sufficient numbers of technical personnel to develop new products or enhance existing products in a timely manner.

Two of our officers and directors own a large percentage of our voting stock, and, together with another employee who is also a significant shareholder, are related by blood or marriage. These factors may allow the officers and directors as a group or the three related employees to influence the election of directors and the approval or disapproval of significant corporate actions.

Dr. Sehat Sutardja, our President and Chief Executive Officer, and Weili Dai, who serves as the Vice President of Sales for Communications and Consumer Business of MSI and Vice President and General Manager of Communications and Computing Business Unit of MSI, are husband and wife, and Dr. Sehat Sutardja and Dr. Pantas Sutardja, our Vice President, Chief Technology Officer and Chief Research and Development Officer, are brothers. Together, these three individuals held approximately 16% of our outstanding common shares as of July 31, 2010. As a result, if these individuals act together, they may influence the election of our directors and the approval or disapproval of any significant corporate actions that require shareholder approval. This influence over our affairs might be adverse to the interests of other shareholders. For instance, the voting power of these individuals could have the effect of delaying or preventing an acquisition of us on terms that other shareholders may desire. Furthermore, we have a classified board, which could further delay or prevent an acquisition, under certain circumstances.

Under Bermuda law, all of our officers, in exercising their powers and discharging their duties, must act honestly and in good faith with a view to our best interests and exercise the care, diligence and skill that a reasonably prudent person would exercise in comparable circumstances. Majority shareholders do not owe fiduciary duties to minority shareholders. As a result, the minority shareholders will not have a direct claim against the majority shareholders in the event the majority shareholders take actions that damage the interests of minority shareholders. Class actions and derivative actions are generally not available to shareholders under the laws of Bermuda, except that Bermuda courts would be expected to follow English case law precedent, which would permit a shareholder to bring an action in our name if the directors or officers are alleged to be acting beyond our corporate power, committing illegal acts or violating our Memorandum of Association or Second Amended and Restated Bye-Laws. Furthermore, consideration would be given by a Bermuda court to acts that are alleged to constitute a fraud against the minority shareholders or, for instance, where an act requiring the approval of a greater percentage of the company's shareholders than those who actually approved it.

The Companies Act 1981 of Bermuda, as amended, provides that when one or more shareholders believes the affairs of a company are being conducted in a manner which is prejudicial to the interest of some of the shareholders, a Bermuda court, upon petition, may make such order as it sees fit, including an order regulating the conduct of the company's affairs in the future or ordering the purchase of the shares of any shareholders by other shareholders or by the company, and in the case of a purchase of the shares by the company, for the reduction accordingly of the company's capital or otherwise.

Table of Contents

If the recent weakness in credit market conditions continues or increases, it could have a material adverse impact on our investment portfolio.

U.S. sub-prime mortgage defaults have had a significant impact across various sectors of the financial markets, causing global credit and liquidity issues. The short-term funding markets experienced credit issues beginning in the second half of calendar 2007 leading to liquidity disruption in the auction rate securities market and certain asset-backed commercial paper. We hold auction rate securities in our portfolio, and if the global credit market continues to deteriorate, our investment portfolio may be impacted and we could determine that some of our investments are impaired. This could materially adversely impact our results of operations and financial condition. For additional details on our auction rate securities, please see Part I, Item 3, Quantitative and Qualitative Disclosures About Market Risk.

In addition, to support our international operations, a portion of our cash and investment portfolio is held offshore. While these amounts are primarily invested in U.S. dollars, a portion is held in foreign currencies, and all offshore balances are exposed to local political, banking, currency control and other risks. Certain of these amounts may also be subject to tax and other restrictions on their transfer to the U.S. or other countries. While we believe our cash and investments are secure, there is risk that some of our balances in international locations will not be adequately secured if the current credit crisis continues.

We rely upon certain critical information systems for the operation of our business, and the failure of any critical information system, may result in serious harm to our business.

We maintain and rely upon certain critical information systems for the effective operation of our business. These information systems include telecommunications, the Internet, our corporate intranet, various computer hardware and software applications, network communications and e-mail. These information systems are subject to attacks, failures and access denials from a number of potential sources including viruses, destructive or inadequate code, power failures, and physical damage to computers, communication lines and networking equipment. To the extent that these information systems are under our control, we have implemented security procedures, such as virus protection software and emergency recovery processes, to address the outlined risks. While we believe that our information systems are appropriately controlled and that we have processes in place to adequately manage these risks, security procedures for information systems cannot be guaranteed to be failsafe and our inability to use or access these information systems at critical points in time could unfavorably impact the timely and efficient operation of our business.

We are subject to the risks of owning real property.

Our U.S. headquarters located in Santa Clara, California, and our buildings in Singapore, Penang, Malaysia, Etoy, Switzerland and Shanghai, China subject us to the risks of owning real property, which include:

the possibility of environmental contamination and the costs associated with fixing any environmental problems;

adverse changes in the value of these properties, due to interest rate changes, changes in the neighborhood in which the property is located, or other factors;

the possible need for structural improvements in order to comply with zoning, seismic and other legal or regulatory requirements;

the potential disruption of our business and operations arising from or connected with a relocation due to moving to or renovating the facility;

increased cash commitments for improvements to the buildings or the property or both;

increased operating expenses for the buildings or the property or both;

possible disputes with tenants or other third parties related to the buildings or the property or both; and

the risk of financial loss in excess of amounts covered by insurance, or uninsured risks, such as the loss caused by damage to the buildings as a result of earthquakes, floods and or other natural disasters.

As we carry only limited insurance coverage, any incurred liability resulting from uncovered claims could adversely affect our financial condition and results of operations.

Our insurance policies may not be adequate to fully offset losses from covered incidents, and we do not have coverage for certain losses. We believe our existing insurance coverage is consistent with common practice and economic and availability considerations. However, if our insurance coverage is inadequate to protect us against unforeseen catastrophic losses, any uncovered losses could adversely affect our financial condition and results of operations.

Table of Contents

We are incorporated in Bermuda, and, as a result, it may not be possible for our shareholders to enforce civil liability provisions of the securities laws of the United States. In addition, our Bye-laws contain a waiver of claims or rights of action by our shareholders against our officers and directors, which will severely limit our shareholders' right to assert a claim against our officers and directors under Bermuda law.

We are organized under the laws of Bermuda. As a result, it may not be possible for our shareholders to effect service of process within the United States upon us, or to enforce against us in United States courts judgments based on the civil liability provisions of the securities laws of the United States. There is significant doubt as to whether the courts of Bermuda would recognize or enforce judgments of United States courts obtained against us or our directors or officers based on the civil liability provisions of the securities laws of the United States or any state or hear actions brought in Bermuda against us or those persons based on those laws. The United States and Bermuda do not currently have a treaty providing for the reciprocal recognition and enforcement of judgments in civil and commercial matters. Therefore, a final judgment for the payment of money rendered by any federal or state court in the United States based on civil liability, whether or not based solely on United States federal or state securities laws, would not be automatically enforceable in Bermuda.

Our Bye-laws contain a broad waiver by our shareholders of any claim or right of action, both individually and on our behalf, against any of our officers and directors. The waiver applies to any action taken by an officer or director, or the failure of an officer or director to take any action, in the performance of his or her duties with or for us, other than with respect to any matter involving any fraud or dishonesty on the part of the officer or director. This waiver will limit the rights of our shareholders to assert claims against our officers and directors unless the act complained of involves actual fraud or dishonesty. Thus, so long as acts of business judgment do not involve actual fraud or dishonesty, they will not be subject to shareholder claims under Bermuda law. For example, shareholders will not have claims against officers and directors for a breach of trust, unless the breach rises to the level of actual fraud or dishonesty.

Our Bye-laws contain provisions that could delay or prevent a change in corporate control, even if the change in corporate control would benefit our shareholders.

Our Bye-laws contain change in corporate control provisions, which include:

authorizing the issuance of preferred stock without shareholder approval; and

providing for a classified board of directors with staggered; and

requiring a vote of two-thirds of the outstanding shares to approve any change of corporate control in the event the action is not approved by at least 66 2/3 % of the directors holding office at the date of the Board meeting to approve the action.

These change in corporate control provisions could make it more difficult for a third party to acquire us, even if doing so would be a benefit to our shareholders. However, beginning in calendar year 2011 our classified board of directors will be phased out and by calendar year 2013 all director will be up for election annually.

Item 6. Exhibits

- # Management contracts or compensation plans or arrangements in which directors or executive officers are eligible to participate.
- * In accordance with Item 601(b)(32)(ii) of Regulation S-K and SEC Release No. 33-8238 and 34-47986, Final Rule: Management's Reports on Internal Control Over Financial Reporting and Certification of Disclosure in Exchange Act Periodic Reports, the certifications furnished in Exhibits 32.1 and 32.2 hereto are deemed to accompany this Form 10-Q and will not be deemed filed for purposes of Section 18 of the Exchange Act. Such certifications will not be deemed to be incorporated by reference into any filings under the Securities Act of 1933, as amended, or the Exchange Act, except to the extent that the registrant specifically incorporates it by reference.
- ** Pursuant to applicable securities laws and regulations, we are deemed to have complied with the reporting obligation relating to the submission of interactive data files in such exhibits and are not subject to liability under any anti-fraud provisions of the federal securities laws as long as we have made a good faith attempt to comply with the submission requirements and promptly amend the interactive data files after becoming aware that the interactive data files fail to comply with the submission requirements. Users of this data are advised that, pursuant to Rule 406T, these interactive data files are deemed not filed and otherwise are not subject to liability.
