**Notes to the Condensed Consolidated Financial Statements**

**(Unaudited)**

**(1) Organization and Basis of Presentation**

ResMed Inc. (referred to herein as we, us, our or the Company) is a Delaware corporation formed in March 1994 holding company for the ResMed Group. Through our subsidiaries, we design, manufacture and market equipment for the diagnosis and treatment of sleep-disordered breathing and other respiratory disorders, including obstructive sleep apnea. Our manufacturing operations are located in Australia, Singapore, France and the United States. Major distribution and sales sites are located in the United States, Germany, France, the United Kingdom, Switzerland, Australia, Norway and Sweden.

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X of the U.S. Securities and Exchange Commission (SEC). Accordingly, they do not include all of the information and footnotes required by U.S. generally accepted accounting principles (U.S. GAAP) for complete financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. Operating results for the three months ended September 30, 2010 are not necessarily indicative of the results that may be expected for the year ending June 30, 2011.

The condensed consolidated financial statements for the three months ended September 30, 2010 and 2009 are unaudited and should be read in conjunction with the consolidated financial statements and notes thereto included in our Form 10-K for the year ended June 30, 2010.

**(2) Summary of Significant Accounting Policies**

**(a) Basis of Consolidation**

The unaudited condensed consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. All significant intercompany transactions and balances have been eliminated in consolidation.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management estimates and assumptions that affect amounts reported in the financial statements and accompanying notes. Actual results could differ from management's estimates.

(b) Revenue Recognition

Revenue on product sales is generally recorded upon shipment, at which time title and risk of loss transfers to the customer. Revenue on product sales which require customer acceptance is not recorded until acceptance is received. Royalty revenue from license agreements is recorded when earned. Service revenue received in advance from service contracts is initially deferred and recognized ratably over the life of the service contract. Revenue received in advance from rental unit contracts is initially deferred and recognized ratably over the life of the rental contract. Freight charges billed to customers are included in revenue. All freight related expenses are charged to cost of sales. Taxes assessed by government authorities that

are imposed on and concurrent with revenue-producing transactions, such as sales and value added taxes, are excluded from the revenue.

We do not recognize revenues to the extent that we offer a right of return or other recourse with respect to the sale of our products, other than returns for product defects or other warranty claims, nor do we recognize revenues if we offer variable sale prices for subsequent events or activities. However, as part of our sales processes we may provide upfront discounts for large orders, one-time special pricing to support new product introductions, sales rebates for centralized purchasing entities or price-breaks for regular order volumes. The costs of all such programs are recorded as an adjustment to revenue. Our products are predominantly therapy-based equipment and require no installation. As such, we have no significant installation obligations.

(c) Cash and Cash Equivalents

Cash equivalents include certificates of deposit and other highly liquid investments and are stated at cost, which approximates market. Investments with original maturities of 90 days or less are considered to be cash equivalents for purposes of the condensed consolidated statements of cash flows.

(d) Allowance for Doubtful Accounts

We maintain an allowance for doubtful accounts for estimated losses resulting from the inability of our customers to make required payments, which results in bad debt expense. We determine the adequacy of this allowance by regular evaluation of individual customer receivables, considering a customer's financial condition, credit history and current economic conditions.

(e) Inventories

Inventories are stated at the lower of cost, determined principally by the first-in, first-out method, or net realizable value. Finished goods and work-in-process inventories include material, labor and manufacturing overhead costs. We review and provide for any product obsolescence in our manufacturing and distribution operations with assessments of individual products and components (based on estimated future usage and sales) being performed throughout the year.

(f) Property, Plant and Equipment

Property, plant and equipment, including rental equipment are recorded at cost. Depreciation expense is computed using the straight-line method over the estimated useful lives of the assets, generally two to ten years except for buildings, which are depreciated over an estimated useful life of 40 years. Straight-line and accelerated methods of depreciation are used for tax purposes. Maintenance and repairs are charged to expense as incurred.

We capitalize interest in connection with the construction of facilities. Actual construction costs incurred relating to facilities under active development qualify for interest capitalization. Interest capitalization ceases when the construction of a facility is complete and available for use. During the three months ended September 30, 2010 and 2009, we did not capitalize interest relating to such construction costs.

(g) Research and Development

All research and development costs are expensed in the period incurred.

(h) Intangible Assets

The registration costs for new patents are capitalized and amortized over the estimated useful life of the patent, generally five years. In the event of a patent being superseded, the unamortized costs are written off immediately.

Other intangible assets are amortized on a straight-line basis over their estimated useful lives, which range from three to nine years. We evaluate the recoverability of intangible assets periodically and take into account events or circumstances that warrant revised estimates of useful lives or that indicate that impairment exists. All of our intangible assets are subject to amortization. No impairment of intangible assets has been identified during any of the periods presented.

## (i) Goodwill

We conducted our annual review for goodwill impairment during the final quarter of fiscal 2010. The results of the review during the final quarter of fiscal 2010 indicated that goodwill was not impaired. In conducting our review of goodwill impairment we identified reporting units, being components of our operating segment of each of the entities acquired and giving rise to the goodwill. The fair value for each reporting unit was determined based on discounted cash flows and involved a two-step process as follows:

- Step 1 - Compare the fair value for each reporting unit to its carrying value, including goodwill. For each reporting unit where the carrying value, including goodwill, exceeds the reporting unit's fair value, move on to step 2. If a reporting unit's fair value exceeds the carrying value, no further work is performed and no impairment charge is necessary.
- Step 2 - Allocate the fair value of the reporting unit to its identifiable tangible and non-goodwill intangible assets and liabilities. This will derive an implied fair value for the goodwill. Then, compare the implied fair value of the reporting unit's goodwill with the carrying amount of the reporting unit's goodwill. If the carrying amount of the reporting unit's goodwill is greater than the implied fair value of its goodwill, an impairment loss must be recognized for the excess.

## (j) Foreign Currency

The consolidated financial statements of our non-U.S. subsidiaries, whose functional currencies are other than U.S. dollars, are translated into U.S. dollars for financial reporting purposes. Assets and liabilities of non-U.S. subsidiaries whose functional currencies are other than U.S. dollars are translated at period-end exchange rates, and revenue and expense transactions are translated at average exchange rates for the period. Cumulative translation adjustments are recognized as part of comprehensive income, as described in Note 4, and are included in accumulated other comprehensive income in the condensed consolidated balance sheet until such time as the subsidiary is sold or substantially or completely liquidated. Gains and losses on transactions denominated in other than the functional currency of the entity are reflected in the condensed consolidated financial statements.

## (k) Earnings Per Share

All share and per share information has been adjusted to reflect the two-for-one stock split effected in the form of a 100% stock dividend that was declared on August 5, 2010 and distributed on August 30, 2010.

Basic earnings per share is computed by dividing the net income available to common stockholders by the weighted average number of shares of common stock outstanding. For purposes of calculating diluted earnings per share, the denominator includes both the weighted average number of shares of common stock outstanding and the number of dilutive common stock equivalents such as stock options and restricted stock units.

The weighted average shares used to calculate basic earnings per share were 151,474,000 and 150,788,000 for the three months ended September 30, 2010 and 2009, respectively. The difference between basic earnings per share and diluted earnings per share is attributable to the impact of outstanding stock options during the periods presented. Stock options had the effect of increasing the number of shares used in the calculation (by application of the treasury stock method) by 5,278,000 and 2,736,000 for the three months ended September 30, 2010 and 2009, respectively.

Stock options of 182,459 and 8,754,000 for the three months ended September 30, 2010 and 2009, respectively, were not included in the computation of diluted earnings per share as the effect of exercising these options would have been anti-dilutive.

Basic and diluted earnings per share for the three months ended September 30, 2010 and 2009 are calculated as follows (in thousands except per share data):

	Three Months Ended

(l) Financial Instruments

The carrying value of financial instruments, such as cash and cash equivalents, accounts receivable and accounts payable, approximate their fair value because of their short-term nature. The carrying value of long-term debt approximates the fair value as the principal amounts outstanding are subject to variable interest rates that are based on market rates which are regularly reset. Foreign currency option contracts are marked to market and therefore reflect their fair value. We do not hold or issue financial instruments for trading purposes. The fair value of financial instruments is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

(m) Foreign Exchange Risk Management

We enter into various types of foreign exchange contracts in managing our foreign exchange risk, including derivative financial instruments encompassing forward exchange contracts and foreign currency options.

The purpose of our foreign currency hedging activities is to protect us from adverse exchange rate fluctuations with respect to net cash movements resulting from the sales of products to foreign customers and our Australian manufacturing activities. We enter into foreign currency hedging contracts to hedge anticipated sales and manufacturing costs, principally denominated in Australian dollars, Euros and British Pounds Sterling. The terms of such foreign currency hedging contracts generally do not exceed three years.

Our foreign currency derivatives portfolio represents a cash flow hedge program against the net cash flow of our international manufacturing operations. We have determined our hedge program to be a non-effective hedge as defined under Statement of Financial Accounting Standards No. 133, *Accounting for Derivative Instruments and Hedging Activities*. The foreign currency derivatives portfolio is recorded in the condensed consolidated balance sheets at fair value and included in other assets.

All movements in the fair value of the foreign currency derivatives are recorded within other income, net in our condensed consolidated statements of income.

(2) Summary of Significant Accounting Policies, Continued

(n) Income Taxes

We account for income taxes in accordance with the Financial Accounting Standards Board's (FASB) authoritative guidance for accounting for income taxes, which requires deferred tax assets and liabilities to be recognized using enacted tax rates for the effect of temporary differences between the financial statement and tax bases of recorded assets and liabilities. The guidance also requires that deferred tax assets be reduced by a valuation allowance if it is more likely than not that a portion of the deferred tax asset will not be realized. Valuation allowances are established, when necessary, to reduce deferred tax assets to the amount expected to be realized. We have determined that our future taxable income will be sufficient to recover our deferred tax assets, reported net of any valuation allowance. If in the future we determine that a change has occurred which will not allow this recovery, we will revise any valuation allowance against our deferred tax assets. This will result in a charge against our income tax provision.

The calculation of our effective tax rate is dependent upon the geographic composition of our worldwide earnings, tax regulations governing each region and the availability of tax credits. In addition, the calculation of our tax liabilities involves uncertainties in the application of complex tax laws and regulations. We recognize these uncertainties in accordance with the relevant accounting guidance. The final payment of the amounts regarding these uncertainties may ultimately prove to be less than or greater than our estimate. If this occurs there will be either a benefit or a charge to our income tax provision.

(o) Warranty

Estimated future warranty costs related to certain products are charged to operations in the period in which the related revenue is recognized. The liability for warranty costs is included in accrued expenses in our condensed consolidated balance sheets.

Changes in the liability for product warranty for the three months ended September 30, 2010 are as follows (in thousands):

Item 1

**RESMED INC. AND SUBSIDIARIES****Notes to the Condensed Consolidated Financial Statements****(Unaudited)****(2) Summary of Significant Accounting Policies, Continued****(p) Impairment of Long-Lived Assets**

We periodically evaluate the carrying value of long-lived assets to be held and used, including certain identifiable intangible assets, when events and circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount which the carrying amount of the assets exceeds the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying amount or fair value less cost to sell.

During the three months ended September 30, 2010, and 2009, we recognized an impairment charge of \$2.3 million and nil, respectively, relating to impaired long-lived assets.

**(q) Cost-Method Investments**

The aggregate carrying amount of our cost-method investments at September 30, 2010 and June 30, 2010, was \$3.0 million and \$1.7 million, respectively. We review the carrying value of these investments at each balance sheet date. We have determined that the carrying value of our cost method investments do not exceed their estimated fair values.

**(r) Stock-Based Employee Compensation**

We have granted stock options and restricted stock units to personnel, including officers and directors, under the ResMed Inc. 2009 Incentive Award Plan (the 2009 Plan ), the 2006 Incentive Award Plan, as amended (the 2006 Plan ) and the Amended and Restated ResMed Inc. 2006 Incentive Award Plan (the 2006 Amended Plan ). These options and restricted stock units have expiration dates of seven years from the date of grant and vest over one or four years. We granted the options with the exercise price equal to the market value as determined at the date of grant. We have also offered to our personnel, including officers, the right to purchase shares of our common stock at a discount under the ResMed Inc. 2009 Employee Stock Purchase Plan (the ESPP ).

We measure the compensation expense of all stock-based awards at fair value on the date of grant and recognize the compensation expense over the service period for awards expected to vest. The fair value of stock options is

determined using the Black-Scholes valuation model. Such value is recognized as expense over the service period, using the straight-line method for stock-based awards. The fair value of restricted stock units is equal to the market value as determined at the date of grant.

(2) Summary of Significant Accounting Policies, Continued

(r) Stock-Based Employee Compensation, Continued

The fair value of stock options granted under our stock option plans and purchase rights granted under the ESPP is estimated on the date of the grant using the Black-Scholes valuation model, assuming no dividends and the following assumptions:

	Three months ended	
	September 30,	
	2010	2009
<b>Stock options:</b>		
Weighted average grant date fair value	\$9.29	\$6.95
Weighted average risk-free interest rate	1.8%	2.2%
Expected option life in years	5.0	4.0
Expected volatility	32%	40%
<b>ESPP purchase rights:</b>		
Weighted average risk-free interest rate	0.3%	0.3%
Expected option life in years	6 months	6 months
Expected volatility	29%	55%

Expected volatilities are based on a combination of historical volatilities of our stock and the implied volatilities from traded options of our stock corresponding to the expected term of the options. We use a combination of the historic and implied volatilities as we believe the addition of the implied volatility is more representative of our future stock price trends. While there is a tradable market of options on our common stock, less emphasis is placed on the implied volatility of these options due to the relative low volumes of these traded options and the difference in the terms compared to our employee options. The expected life represents the weighted average period of time that options granted are expected to be outstanding giving consideration to vesting schedules and our historical exercise patterns. The risk-free rate is based on the U.S. Treasury yield curve in effect at the time of grant for periods corresponding with the expected life of the option.

## (s) Reclassifications

An amount of \$26.1 million relating to prepaid taxes on intercompany profit in inventories was reclassified within the condensed consolidated balance sheet at June 30, 2010, from deferred income taxes to prepaid expenses and other current assets. There was no impact on working capital, total current assets or total assets, as a result of this reclassification.

Foreign currency translation adjustments	18,744
Balance at September 30, 2010	\$ 222,327

On August 19, 2010 we acquired certain business assets of our headgear supplier for a total purchase price of \$21.7 million. This acquisition will allow us to improve our current supply capabilities, reduce our cost base and enhance our ability to develop headgear technology. The acquisition has been accounted for as a business combination using purchase accounting and is included in our consolidated financial statements from August 19, 2010. The acquisition is not considered a material business combination and we have not incurred any material acquisition related costs. We expect to complete our purchase price allocation during the quarter ending December 31, 2010 although we do not believe that the appraisals will materially modify the preliminary purchase price allocation.

**Revolving Facility**

On February 27, 2009, ResMed Inc., and our wholly-owned subsidiaries, ResMed Corp., ResMed EAP Holdings Inc. and ResMed Motor Technologies Inc., entered into a Third Amendment to the March 1, 2006 Second Amended and Restated Revolving Loan Agreement with Union Bank of California, N.A. (the Loan Agreement).

The Loan Agreement was modified in order that the revolving commitment remains at \$65 million otherwise it would have been reduced to \$55 million as of March 1, 2009. The entire outstanding principal amount must be repaid in full before March 1, 2011. The outstanding principal amount due under the revolving facility will bear interest at a rate equal to LIBOR plus 0.75% to 1.00% (depending on the applicable leverage ratio). At September 30, 2010, there was \$64.1 million outstanding under this revolving facility.

The obligations of ResMed Corp., ResMed Motor Technologies Inc. and ResMed EAP Holdings Inc. under the Loan Agreement are secured by substantially all of the personal property of each of ResMed Corp., ResMed Motor Technologies Inc. and ResMed EAP Holdings Inc., and are guaranteed by ResMed Inc. under an Amended and Restated Continuing Guaranty and Pledge Agreement, which guaranty is secured by a pledge of the equity interests in ResMed Corp., ResMed Motor Technologies Inc. and ResMed EAP Holdings Inc. held by ResMed Inc. The Loan Agreement also contains customary covenants, including certain financial covenants and an obligation that ResMed Inc. maintain certain financial ratios, including a maximum ratio of total debt to EBITDA (as defined in the Loan Agreement), a fixed charge coverage ratio, a minimum tangible net worth, and a minimum ResMed Corp., ResMed Motor Technologies Inc. and ResMed EAP Holdings Inc. EBITDA.

In the third amendment, the Loan Agreement was also amended to modify certain financial covenants. The minimum fixed charge coverage ratio was revised to exclude capital expenditures related to construction of our new headquarters building. The requirement that ResMed Corp. and ResMed Motor Technologies Inc. maintain minimum earnings before interest, taxes, depreciation and amortization, or EBITDA, was increased to \$15 million. Finally, the requirement that we meet certain minimum liquidity levels was eliminated.

The entire principal amount of the revolving facility and any accrued but unpaid interest may be declared immediately due and payable in the event of the occurrence of an event of default as defined in the Loan Agreement. Events of default include, among other items, failure to make payments when due, the occurrence of a material default in the

performance of any covenants in the Loan Agreement or related amendments or a 35% or more change in control of ResMed Inc., ResMed Corp., ResMed Motor Technologies Inc. or ResMed EAP Holdings Inc. At September 30, 2010, we were in compliance with our debt covenants.

**Syndicated Facility**

On June 8, 2006, our wholly owned Australian subsidiary, ResMed Limited, entered into a Syndicated Facility Agreement with HSBC Bank Australia Limited as original financier, facility agent and security trustee, that provides for a loan in tranches (the Syndicated Facility Agreement).

Tranche A is a Euro ( EUR ) 50 million five-year term loan facility that refinanced all amounts outstanding under a previous facility. Tranche A bears interest at a rate equal to LIBOR for deposits denominated in EUR plus a margin of 0.80% or 0.90%, depending on the ratio of the total debt to EBITDA of ResMed Inc. and its subsidiaries (the ResMed Group) for the most recently completed fiscal year for the applicable interest period. The total outstanding principal amount of Tranche A must be repaid in full on June 8, 2011. At September 30, 2010, the Tranche A facility loan had an amount outstanding of EUR 15 million, equivalent to approximately U.S. dollars ( USD ) 20.4 million.

Tranche B is a USD 15 million term loan facility that may only be used for the purpose of financing capital expenditures and other asset acquisitions by the ResMed Group. Tranche B bears interest at a rate equal to LIBOR for deposits denominated in EUR, Australian dollars, USD or British Pounds Sterling plus a margin of 0.80% or 0.90%, depending on the ratio of the total debt to EBITDA of the ResMed Group for the most recently completed fiscal year for the applicable interest period. The entire principal amount must be repaid in full on June 8, 2011. At September 30, 2010, there was USD 9.0 million outstanding under the Tranche B loan facility.

Tranche C was a USD 60 million term loan facility that could only be used for the purpose of the payment by ResMed Limited of a dividend to ResMed Holdings Limited, which would ultimately be paid to ResMed Inc. Tranche C bore interest at a rate equal to LIBOR for deposits denominated in EUR, Australian dollars or USD plus a margin of 0.70% or 0.80%, depending on the ratio of the total debt to EBITDA of the ResMed Group for the most recently completed fiscal year for the applicable interest period. The entire outstanding principal amount was repaid in full during the year ended June 30, 2009. At September 30, 2010, the Tranche C loan facility was no longer available.

Simultaneous with the Syndicated Facility Agreement, ResMed Limited entered into a working capital agreement with HSBC Bank Australia Limited for revolving, letter of credit and overdraft facilities up to a total commitment of 6.5 million Australian dollars, and ResMed (UK) Limited entered into a working capital agreement with HSBC Bank plc for a revolving cash advance facility for a total commitment of up to 3 million British Pounds Sterling. At

September 30, 2010, there were no amounts outstanding under either of these facilities.

On September 30, 2008, our wholly-owned Australian subsidiary, ResMed Limited, agreed to amend and restate the Syndicated Facility Agreement entered into on June 8, 2006. The amended and restated agreement ( First Amended and Restated Syndicated Facility Agreement ) with the Hong Kong and Shanghai Banking Corporation, Sydney Branch as financier and HSBC Bank Australia Limited as facility agent and security trustee, provided for an additional Tranche D term loan facility in the amount of USD 50 million.

On September 30, 2009, ResMed Limited, agreed to amend and restate for a second time the Syndicated Facility Agreement. The second amended and restated agreement ( Second Amended and Restated Syndicated Facility Agreement ) provides for the extension of our Tranche D term loan facility in the amount of USD 50 million for an additional 12 month period and to increase the interest rate applicable to the Tranche D portion of the loan facility. The financier continues to have the right to assign part or all of its rights and/or obligations under the Second Amended and Restated Syndicated Facility Agreement to other financial institutions. The extended Tranche D loan facility bears interest at a rate equal to LIBOR for deposits denominated in USD, plus a margin of 2.25% or 2.50%, depending on the ratio of the total debt to EBITDA of the ResMed Group for the most recently completed fiscal year for the applicable interest period. The entire principal amount of the additional loan facility has been repaid by September 30, 2010. At September 30, 2010, there was \$Nil outstanding under the Tranche D loan facility.

The Syndicated Facility Agreement is secured by a pledge of one hundred percent of the shares of ResMed Inc.'s subsidiary, ResMed Paris SAS (formerly Saime SAS), pursuant to a pledge agreement. The Syndicated Facility Agreement also contains customary covenants, including certain financial covenants and an obligation that ResMed Limited maintains certain financial ratios, including a minimum debt service cover ratio, a maximum ratio of total debt to EBITDA and a minimum tangible net worth. The entire principal amount of the loan and any accrued, but unpaid, interest may be declared immediately due and payable in the event of the occurrence of an event of default as defined in the Syndicated Facility Agreement. Events of default include, among other items, failure to make payments when due, breaches of representations, warranties or covenants, the occurrence of certain insolvency events, the occurrence of an event or change which could have a material adverse effect on ResMed Limited and its subsidiaries, and if ResMed Inc. ceases to control ResMed Limited, ResMed Corp., ResMed SAS, ResMed GmbH & Co. KG, ResMed (UK) Limited, Take Air Medical Handels-GmbH or ResMed Paris SAS.

The obligations of ResMed Limited under the loan facility are subject to two guarantee and indemnity agreements, one on behalf of ResMed Inc. and its U.S. subsidiary, ResMed Corp., and another on behalf of ResMed's international subsidiaries, ResMed SAS (other than Tranche C), ResMed GmbH & Co. KG, ResMed (UK) Limited and Take Air Medical Handels-GmbH. We are in compliance with our debt covenants as of September 30, 2010.

**Prepayment Facility**

## Edgar Filing: RESMED INC - Form 10-Q

**Common Stock.** On May 27, 2009, our Board of Directors approved a new share repurchase program, authorizing us to acquire up to an aggregate of 10.0 million shares of ResMed Inc. common stock. The program allows us to repurchase shares of our common stock from time to time for cash in the open market, or in negotiated or block transactions, as market and business conditions warrant. This program canceled and replaced our previous share repurchase program previously authorized on June 6, 2002 for 8.0 million shares and pursuant to which we had repurchased 6,622,907 shares. The new program authorizes us to purchase in addition to the shares we repurchased under our previous program. There is no expiration date for this program. All share repurchases after May 29, 2009 have been executed in accordance with this program. In conjunction with the stock split declared on August 5, 2010, the Board approved a doubling of the remaining number of shares, as at the date of stock split that could be purchased under the above program, from 7.2 million shares to 14.3 million shares. Accordingly, the effective total number of shares that can be purchased under the May 27, 2009 program is 17.2 million shares.

During the three months ended September 30, 2010, we repurchased 0.3 million shares at a cost of \$17.9 million. At September 30, 2010, we have repurchased a total of 9.6 million shares at a cost of \$362.4 million, of which 6.6 million shares were repurchased pursuant to the repurchase program approved on June 6, 2002 and 3.0 million were repurchased pursuant to the new repurchase program approved on May 27, 2009. Shares that are repurchased are classified as treasury stock pending future use and reduce the number of shares outstanding used in calculating earnings per share. At September 30, 2010, there is a remaining 14.2 million shares that can be repurchased under the approved share repurchase program.

**Stock Split.** On August 5, 2010, our Board of Directors declared a two-for-one split of our common stock to be payable in the form of a 100% stock dividend. On August 30, 2010, shareholders received one additional share of common stock for every share held on August 17, 2010. All share and per share information has been adjusted to reflect the stock split.

**Preferred Stock.** In April 1997, the Board of Directors authorized 2,000,000 shares of \$0.01 par value preferred stock. No such shares were issued or outstanding at September 30, 2010.

**Stock Options and Restricted Stock Units ( RSU ).** We have granted stock options and restricted stock units to personnel, including officers and directors, in accordance with the 2006 Plan, the 2006 Amended Plan and the 2009 Plan, which was approved at the annual meeting of the stockholders of ResMed Inc. on November 18, 2009. These options and restricted stock units have expiration dates of seven years from the date of grant and vest over one or four

years. We have granted the options with an exercise price equal to the market value as determined at the date of grant.

## (9) Stockholders' Equity, Continued

The maximum number of shares of our common stock authorized for issuance under the 2009 Plan is 22,921,650. The number of securities remaining available for future issuance under the 2009 Plan at September 30, 2010 is 7,032,162. The number of shares of our common stock available for issuance under the 2009 Plan will be reduced by (i) two (2.0) shares, a decrease from two and four tenths (2.4) shares, for each one share of common stock delivered in settlement of any full-value award, which is any award other than a stock option, stock appreciation right or other award for which the holder pays the intrinsic value and (ii) one share for each share of common stock delivered in settlement of all other awards. The maximum number of shares, which may be subject to awards granted under the 2009 Plan to any individual during any calendar year, may not exceed 3,000,000 shares of our common stock (except in a participant's initial year of hiring up to 4,500,000 shares of our common stock may be granted).

At September 30, 2010, there was \$49.3 million in unrecognized compensation costs related to unvested stock-based compensation arrangements. This is expected to be recognized over a weighted average period of 2.6 years. The aggregate intrinsic value of the stock-based compensation arrangements outstanding and exercisable at September 30, 2010, was \$266.1 million and \$129.3 million, respectively. The aggregate intrinsic value of the options exercised during the three months ended September 30, 2010 was \$11.6 million.

**Employee Stock Purchase Plan (the ESPP).** The ESPP was approved at the annual meeting of the stockholders of ResMed Inc. on November 18, 2009, as an amendment to the previously approved employee stock purchase plan. Under the ESPP, participants are offered the right to purchase shares of our common stock at a discount during successive offering periods. Each offering period under the ESPP will be for a period of time determined by the Board of Directors' Compensation Committee of no less than 3 months and no more than 27 months. The purchase price for our common stock under the ESPP will be the lower of 85% of the fair market value of our common stock on the date of grant or 85% of the fair market value of our common stock on the date of purchase. An individual participant cannot subscribe for more than \$25,000 in common stock during any calendar year. As part of the approval of the ESPP at the annual meeting of the stockholders of ResMed Inc. on November 18, 2009, the number of shares of our common stock available for grant under the ESPP increased by 600,000, from 500,000 to 1,100,000. In conjunction with the stock split, the Board approved a doubling of the number of shares remaining available for future issuance under the ESPP, as at the date of stock split, from 540,000 to 1,080,000. At September 30, 2010, the number of shares remaining available for future issuance under the ESPP is 1,080,000.

During the three months ended September 30, 2010, we recognized \$0.6 million, of stock-based compensation expense associated with the ESPP.

## (10) Fair Value Measurements

In determining the fair value measurements of our financial assets and liabilities, we consider the principal and most advantageous market in which we transact and consider assumptions that market participants would use when pricing the financial asset or liability. We maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

The hierarchies of inputs are as follows:

Level 1: Input prices quoted in an active market for identical financial assets or liabilities;

Level 2: Inputs other than prices quoted in Level 1, such as prices quoted for similar financial assets and liabilities in active markets, prices for identical assets and liabilities in markets that are not active or other inputs that are observable or can be corroborated by observable market data; and

Level 3: Input prices quoted that are significant to the fair value of the financial assets or liabilities which are not observable nor supported by an active market.

## (10) Fair Value Measurements, Continued

The following table summarizes our financial assets and liabilities, as at September 30, 2010, using the valuation input hierarchy (in thousands):

	Level 1	Level 2	Level 3	Total
Cash and cash equivalents	\$540,004	\$0	\$0	\$540,004
Cost-method investments	0	0	2,955	2,955
Foreign currency options	0	16,335	0	16,335
	\$540,004	\$16,335	\$2,955	\$559,294

We determine the fair value of our financial assets as follows:

**Cash and cash equivalents** The valuation used for our cash and other money market funds are derived from quoted market prices due to their short term nature and there is an active market for these financial instruments.

**Cost-method investments** These investments include our holdings in privately held service companies and research companies that are not exchange traded and therefore not supported with observable market prices. However, these investments are valued by reference to their net asset values which can be market supported and observable inputs including future cash flows.

**Foreign currency options** These financial instruments are valued using third party valuation models based on market observable inputs, including interest rate curves, on market spot currency prices, volatilities and credit risk.

The following table shows a reconciliation of the changes in the three months ended September 30, 2010 for fair value measurements using significant unobservable inputs (thousands):

**(11) Legal Actions and Contingencies**

In the normal course of business, we are subject to routine litigation incidental to our business. While the results of this litigation cannot be predicted with certainty, we believe that their final outcome will not have a material adverse effect on our consolidated financial statements taken as a whole.

During September and October 2004, we began receiving tax assessment notices for the audit of one of our German subsidiaries by the German tax authorities for the years 1996 through 1998. Certain aspects of these assessment notices are being contested and appealed to the German tax authority office. As the outcome of the appeal cannot be predicted with certainty, any tax issues resolved in a manner not consistent with our expectations may require us to adjust our provision for income tax in the period of resolution.

In February 2007, the University of Sydney commenced legal action in the Federal Court of Australia against us, claiming breach of a license agreement and infringement of certain intellectual property. The claim has been amended to include an allegation of breach of confidentiality. The university is seeking various types of relief, including an injunction against manufacturing, supplying, offering for sale, selling or exporting certain mask devices, payment of license fees, damages or an account of profits, interest, costs and declaration of a constructive trust over and assignment of certain intellectual property. In October 2007, we filed a defense denying the university's claim, as well as a cross-claim against the university seeking an order for rectification of the contract and alleging the university violated the Australian Trade Practices Act. The matter is ongoing. We do not expect the outcome of this matter to have a material adverse effect on our consolidated financial statements.

In January 2010, Vaughn Medical Equipment Repair Service, L.L.C., filed a complaint in the U.S. District court in Louisiana, asserting claims against us and other defendants, for anti-competitive conduct, conspiracy, defamation and tortious interference. On September 1, 2010, the Court granted our motion to dismiss the case which Vaughn Medical has appealed. We do not expect the outcome of this matter to have a material adverse effect on our consolidated financial statements.

**(12) Derivative Instruments and Hedging Activities**

We transact business in various foreign currencies, including a number of major European currencies as well as the Australian dollar. We have significant foreign currency exposure through both our Australian manufacturing activities and international sales operations. We have established a foreign currency hedging program using purchased currency

options and forward contracts to hedge foreign-currency-denominated financial assets, liabilities and manufacturing expenditures. The terms of such foreign currency hedging contracts generally do not exceed three years. The goal of this hedging program is to economically manage the financial impact of foreign currency exposures denominated in Euros, Australian dollars and British Pounds. Under this program, increases or decreases in our foreign-currency-denominated financial assets, liabilities, and firm commitments are partially offset by gains and losses on the hedging instruments.

We have determined our hedge program to be a non-effective hedge. All movements in the fair value of the foreign currency instruments are recorded within other income, net in our condensed consolidated statements of income. We do not enter into financial instruments for trading or speculative purposes.

**RESMED INC. AND SUBSIDIARIES****Notes to the Condensed Consolidated Financial Statements****(Unaudited)****(12) Derivative Instruments and Hedging Activities, Continued**

We held foreign currency instruments with notional amounts totaling \$193.8 million and \$211.5 million at September 30, 2010 and June 30, 2010, respectively, to hedge foreign currency fluctuations. These contracts mature at various dates prior to June 30, 2013.

The fair value and effect of derivative instruments on our condensed consolidated financial statements were as follows:

Derivatives Not Designated as Hedging Instruments	Asset Derivatives	September 30, 2010	Location of gain	Gain recognized in Income on Derivative
	Balance Sheet Location	Fair Value	recognized in Income on Derivative	Three Months Ended September 30, 2010
Foreign Exchange Contracts	Other Assets	\$16,335	Other Income	\$7,831

We are exposed to credit-related losses in the event of non-performance by counter parties to financial instruments. The credit exposure of foreign currency derivatives at September 30, 2010 and June 30, 2010 was \$16.3 million and \$10.8 million, respectively, which represents the positive fair value of our foreign currency derivatives. These values are included in the current and non-current balances of other assets on the condensed consolidated balance sheets. We minimize counterparty credit risk by entering into derivative transactions with major financial institutions and, as such, we do not expect material losses as a result of default by our counterparties.

**(13) Subsequent Events**

We have evaluated any events or transactions occurring after September 30, 2010 and noted that there have been no such events or transactions which would impact our consolidated financial statements for the three months ended September 30, 2010.

Special Note Regarding Forward-Looking Statements**

This report contains or may contain certain forward-looking statements and information that are based on the beliefs of our management as well as estimates and assumptions made by, and information currently available to, our management. All statements other than statements regarding historical facts are forward-looking statements. The words believe, expect, anticipate, will continue, will, estimate, plan, future and other similar expressions in this report are forward-looking statements of such expressions, generally identify forward-looking statements, including, in particular, statements regarding the development and approval of new products and product applications, market expansion, pending litigation and the development of new markets for our products, such as cardiovascular and stroke markets. These forward-looking statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. You are cautioned not to place undue reliance on these forward-looking statements. Such forward-looking statements reflect the views of our management at the time such statements are made and are subject to a number of risks, uncertainties, estimates and assumptions, including, without limitation, and in addition to those identified in the text surrounding such statements, those identified in our Annual Report on Form 10-K for the fiscal year ended June 30, 2010 and elsewhere in this report.

In addition, important factors to consider in evaluating such forward-looking statements include changes or developments in healthcare reform, social, economic, market, legal or regulatory circumstances, changes in our business or growth strategy or an inability to execute our strategy due to changes in our industry or the economy generally, the emergence of new or growing competitors, the actions or omissions of third parties, including suppliers, customers, competitors and governmental authorities and various other factors. Should any one or more of these risks or uncertainties materialize, or underlying estimates or assumptions prove incorrect, actual results may vary significantly from those expressed in such forward-looking statements, and there can be no assurance that the forward-looking statements contained in this report will in fact occur.

Before deciding to purchase, hold or sell our common stock, you should carefully consider the risks described in our annual report on Form 10-K, in addition to the other cautionary statements and risks described elsewhere in this report and in our other filings with the SEC, including our subsequent reports on Forms 10-Q and 8-K. These risks and uncertainties are not the only ones we face. Additional risks and uncertainties not presently known to us or that we currently deem immaterial may also affect our business. If any of these known or unknown risks or uncertainties actually occurs with material adverse effects on us, our business, financial condition and results of operations could be seriously harmed. In that event, the market price for our common stock will likely decline and you may lose all or part of your investment.

**RESMED INC. AND SUBSIDIARIES****Management's Discussion and Analysis of Financial Condition and Results of Operations****Overview**

The following is an overview of our results of operations for the three months ended September 30, 2010. Management's discussion and analysis ( MD&A ) of financial condition and results of operations is intended to help the reader understand the results of operations and financial condition of ResMed Inc. MD&A is provided as a supplement to, and should be read in conjunction with selected financial data and condensed consolidated financial statements and notes, included herein.

We are a leading developer, manufacturer and distributor of medical equipment for treating, diagnosing, and managing sleep-disordered breathing ( SDB ) and other respiratory disorders. During the three months ended September 30, 2010, we continued our efforts to build awareness of the consequences of untreated SDB, and to grow our business in this market. In our efforts, we have attempted to raise awareness through market and clinical initiatives highlighting the relationship between sleep-disordered breathing/obstructive sleep apnea and co-morbidities, such as cardiac disease, diabetes, hypertension and obesity, as well as the dangers of sleep apnea in regard to occupational health and safety, especially in the transportation industry.

We are committed to ongoing investment in research and development and product enhancements. During the three months ended September 30, 2010, we invested \$19.7 million, on research and development activities. Since the development of Continuous Positive Airway Pressure ( CPAP ), we have developed a number of innovative products for SDB and other respiratory disorders including airflow generators, diagnostic products, mask systems, headgear and other accessories. Our new product release schedule remains active across both our mask and flow generator categories. We have recently introduced the S9 AutoSet and Elite products, the ApneaLink Plus, our type 3 device for home sleep testing, the Swift FX mask and the Mirage SoftGel mask. We are taking steps to increase awareness of the health dangers of sleep-disordered breathing by sponsoring educational programs targeted at the primary care physician community. We believe these efforts should further increase awareness of both doctors and patients about the relationship between sleep-disordered breathing, obstructive sleep apnea and co-morbidities such as cardiac disease, diabetes, hypertension and obesity. We believe these efforts should also support our efforts to inform the community of the dangers of sleep apnea in occupational health and safety, especially in the transport industry.

During the three months ended September 30, 2010, our net revenue increased by 14% when compared to the three months ended September 30, 2009. Gross margin was 61.7% for the three months ended September 30, 2010 compared to 60.8% for the three months ended September 30, 2009. Diluted earnings per share for the three months ended September 30, 2010 increased to \$0.36 per share, up from \$0.27 per share in the three months ended September 30, 2009.

At September 30, 2010, our cash and cash equivalents totaled \$540.0 million, our total assets were \$1.8 billion and our stockholders' equity was \$1.5 billion.

PART I - FINANCIAL INFORMATION

Item 2

**RESMED INC. AND SUBSIDIARIES****Management's Discussion and Analysis of Financial Condition and Results of Operations****Net Revenue**

Net revenue increased for the three months ended September 30, 2010 to \$282.0 million compared to \$247.0 million for the three months ended September 30, 2009, an increase of \$35.0 million or 14%. The increase in net revenue is primarily attributable to an increase in unit sales of our flow generators, masks and accessories. Movements in international currencies against the U.S. dollar negatively impacted revenues by approximately \$7.7 million during the three months ended September 30, 2010. Excluding the impact of unfavorable foreign currency movements, net revenue for the three months ended September 30, 2010 increased by 17% compared to the three months ended September 30, 2009.

Net revenue in North and Latin America increased for the three months ended September 30, 2010 to \$155.6 million from \$134.7 million for the three months ended September 30, 2009, an increase of 16%. We believe this growth has been generated by increased public and physician awareness of sleep-disordered breathing and growth generated from our recent product releases including the S9 flow generator and the Swift FX and Mirage SoftGel masks. Net international revenue, which includes all markets outside North and Latin America, for the three months ended September 30, 2010, increased to \$126.4 million from \$112.3 million for the three months ended September 30, 2009, an increase of 13%. Movements in international currencies against the U.S. dollar negatively impacted international revenues by approximately \$7.7 million during the three months ended September 30, 2010. Excluding the impact of movements in international currencies, international sales grew by 19% compared to the three months ended September 30, 2009. We believe this international sales growth predominantly reflects growth in the overall sleep-disordered breathing market and growth generated from our recent product releases, including the S9 flow generator and the Swift FX and Mirage SoftGel masks.

Net revenue from the sales of flow generators, including humidifiers, for the three months ended September 30, 2010 totaled \$161.8 million, an increase of 15% compared to the three months ended September 30, 2009 of \$140.6 million, including increases of 14% in North and Latin America and 16% internationally. Net revenue from the sales of masks and other accessories for the three months ended September 30, 2010 totaled \$120.2 million, an increase of 13% compared to the three months ended September 30, 2009 of \$106.4 million, including increases of 17% in North and Latin America and 6% internationally. Excluding the impact of unfavorable currency movements, international revenue increased by 22% and 13% for flow generators and masks and other accessories, respectively, for the three months ended September 30, 2010 compared to the three months ended September 30, 2009. We believe these increases primarily reflect growth in the overall sleep-disordered breathing market and contributions from new products.

The following table summarizes the percentage movements in our net revenue for the three months ended

Edgar Filing: RESMED INC - Form 10-Q

September 30, 2010 compared to the three months ended September 30, 2009:

	North and Latin America	International	Total	International (Constant Currency) *	Total (Constant Currency)
Flow generators	14%	16%	15%	22%	19%
Masks and other accessories	17%	6%	13%	13%	15%
Total	16%	13%	14%	19%	17%

\* Constant currency numbers exclude the impact of movements in international currencies.

PART I - FINANCIAL INFORMATION

Item 2

**RESMED INC. AND SUBSIDIARIES**

**Management's Discussion and Analysis of Financial Condition and Results of Operations**

**Gross Profit**

Gross profit increased for the three months ended September 30, 2010 to \$174.0 million from \$150.2 million for the three months ended September 30, 2009, an increase of \$23.8 million or 16%. Gross profit as a percentage of net revenue for the three months ended September 30, 2010 increased to 61.7% from 60.8% for the three months ended September 30, 2009.

The increase in gross margins for the three months ended September 30, 2010 is primarily due to new product introductions, cost savings attributable to manufacturing and supply chain initiatives and product mix, partly offset by the appreciation of the Australian dollar against the U.S. dollar as the majority of our manufacturing labor and overhead is denominated in Australian dollars.

**Selling, General and Administrative Expenses**

Selling, general and administrative expenses increased for the three months ended September 30, 2010 to \$84.8 million from \$76.8 million for the three months ended September 30, 2009, an increase of \$8.0 million or 10%. Selling, general and administrative expenses, as a percentage of net revenue, were 30.1% for the three months ended September 30, 2010 compared to 31.1% for the three months ended September 30, 2009.

The increase in selling, general and administrative expenses was primarily due to an increase in the number of sales and administrative personnel to support our growth, stock-based compensation costs and other expenses related to the increase in our sales. As a percentage of net revenue, we expect our future selling, general and administrative expense to be between 30% and 31%.

**Research and Development Expenses**

Research and development expenses increased for the three months ended September 30, 2010 to \$19.7 million from \$17.9 million for the three months ended September 30, 2009, an increase of \$1.8 million or 10%. Research and development expenses, as a percentage of net revenue, were 7.0% for the three months ended September 30, 2010, compared to 7.3% for the three months ended September 30, 2009.

The increase in research and development expenses was primarily due to an increase in charges for consulting fees and an increase in clinical trials. The increase in research and development expenses was also due to the net appreciation of the Australian dollar against the U.S. dollar, which increased our expenses by approximately \$0.8 million for the three months ended September 30, 2010, as reported in U.S. dollars. As a percentage of net revenue,

we expect our future research and development expense to continue to be between 7% and 8%.

Item 2

**RESMED INC. AND SUBSIDIARIES****Management's Discussion and Analysis of Financial Condition and Results of Operations****Amortization of Acquired Intangible Assets**

Amortization of acquired intangible assets for the three months ended September 30, 2010 totaled \$2.0 million, respectively, as compared to \$1.8 million for the three months ended September 30, 2009, respectively. The increase in amortization expense is attributable to recent acquisitions.

**Donations to Foundation**

For the three months ended September 30, 2010, we donated a total of \$1.0 million, to the ResMed Foundation (the Foundation). The Foundation was established primarily to promote research into the deleterious medical consequences of untreated sleep-disordered breathing and to increase public and physician awareness of the importance of sleep and respiratory health throughout the world. For the three months ended September 30, 2009, we donated a total of \$1.0 million, to the ResMed Foundation.

**Other Income, Net**

Other income, net for the three months ended September 30, 2010 was \$10.2 million, compared to \$5.2 million for the three months ended September 30, 2009. The increase in other income, net, was predominately due to gains on foreign currency and hedging transactions and an increase in interest income, net, during the three months ended September 30, 2010.

**Income Taxes**

Our effective income tax rate of approximately 25.9% for the three months ended September 30, 2010 was lower than our effective income tax rate of approximately 27.3% for the three months ended September 30, 2009. The lower tax rate was primarily due to a change in the geographic mix of taxable income.

We continue to benefit from the Australian and Singapore corporate tax rates and certain Australian research and development tax benefits because we generate the majority of our taxable income in Australia.

**Net Income**

As a result of the factors above, our net income for the three months ended September 30, 2010 was \$56.7 million or \$0.36 per diluted share compared to net income of \$42.1 million or \$0.27 per diluted share for the three months ended September 30, 2009, an increase of 35% and 33%, respectively, over the three months ended September 30, 2009.

**RESMED INC. AND SUBSIDIARIES****Management's Discussion and Analysis of Financial Condition and Results of Operations****Liquidity and Capital Resources**

As of September 30, 2010 and June 30, 2010, we had cash and cash equivalents of \$540.0 million and \$488.8 million, respectively. Working capital was \$782.2 million and \$672.7 million at September 30, 2010 and June 30, 2010, respectively.

Inventories at September 30, 2010 were \$214.2 million, an increase of \$39.1 million or 22% over the September 30, 2009 balance of \$175.1 million. The percentage increase in inventories mainly reflects an increase in materials for new products and the impact of movements in foreign currency exchange rates, particularly the appreciation of the Australian dollar relative to the U.S. dollar.

Accounts receivable at September 30, 2010 were \$225.8 million, an increase of \$17.0 million or 8% over the September 30, 2009 accounts receivable balance of \$208.8 million. Accounts receivable days outstanding of 70 days at September 30, 2010 decreased by 7 days compared to the 77 days at September 30, 2009. Our allowance for doubtful accounts as a percentage of total accounts receivable at September 30, 2010 and June 30, 2010 was 3.5% and 3.3%, respectively. To date we have not experienced any significant adverse decline in the credit quality of our customers and it remains broadly consistent with our past experience.

At September 30, 2010, no capital lease obligations exist. Details of contractual obligations at September 30, 2010 are as follows:

In \$000 s	Total	Payments Due by Period

Item 2

**RESMED INC. AND SUBSIDIARIES****Management's Discussion and Analysis of Financial Condition and Results of Operations****Liquidity and Capital Resources, Continued****Revolving Facility**

On February 27, 2009, ResMed Inc., and our wholly-owned subsidiaries, ResMed Corp., ResMed EAP Holdings Inc. and ResMed Motor Technologies Inc., entered into a Third Amendment to the March 1, 2006 Second Amended and Restated Revolving Loan Agreement with Union Bank of California, N.A.

The Loan Agreement was modified in order that the revolving commitment remains at \$65 million, otherwise, it would have been reduced to \$55 million as of March 1, 2009. The Loan Agreement was also amended to modify certain financial covenants. The minimum fixed charge coverage ratio was revised to exclude capital expenditures related to construction of our new headquarters building. The requirement that ResMed Corp. and ResMed Motor Technologies Inc. maintain minimum earnings before interest, taxes, depreciation and amortization, or EBITDA, was increased to \$15 million. Finally, the requirement that we meet certain minimum liquidity levels was eliminated.

The entire outstanding principal amount must be repaid in full before March 1, 2011. The outstanding principal amount due under the revolving facility will bear interest at a rate equal to LIBOR plus 0.75% to 1.00% (depending on the applicable leverage ratio). At September 30, 2010, there was \$64.1 million outstanding under this revolving facility.

**Syndicated Facility**

On June 8, 2006, our wholly owned Australian subsidiary, ResMed Limited, entered into a Syndicated Facility Agreement with HSBC Bank Australia Limited as original financier, facility agent and security trustee, that provides for a loan in tranches (the Syndicated Facility Agreement).

Tranche A is a Euro ( EUR ) 50 million five-year term loan facility that refinanced all amounts outstanding under a previous facility. Tranche A bears interest at a rate equal to LIBOR for deposits denominated in EUR plus a margin of 0.80% or 0.90%, depending on the ratio of the total debt to EBITDA of ResMed Inc. and its subsidiaries (the ResMed Group ) for the most recently completed fiscal year for the applicable interest period. The entire outstanding principal amount must be repaid in full on June 8, 2011. At September 30, 2010, the Tranche A facility loan had an amount outstanding of EUR 15 million, equivalent to approximately U.S. dollars ( USD ) 20.4 million

Tranche B is a USD 15 million term loan facility that may only be used for the purpose of financing capital expenditures and other asset acquisitions by the ResMed Group. Tranche B bears interest at a rate equal to LIBOR for deposits denominated in EUR, Australian dollars, USD or British Pounds Sterling plus a margin of 0.80% or 0.90%, depending on the ratio of the total debt to EBITDA of the ResMed Group for the most recently completed fiscal year for the applicable interest period. The entire principal amount must be repaid in full on June 8, 2011. At September 30, 2010 there was USD 9.0 million outstanding under the Tranche B loan facility.

Tranche C was a USD 60 million term loan facility that could only be used for the purpose of the payment by ResMed Limited of a dividend to ResMed Holdings Limited, which would ultimately be paid to ResMed Inc. Tranche C bore interest at a rate equal to LIBOR for deposits denominated in EUR, Australian dollars or USD plus a margin of 0.70% or 0.80%, depending on the ratio of the total debt to EBITDA of the ResMed Group for the most recently completed fiscal year for the applicable interest period. The entire outstanding principal amount was repaid in full during the year ended June 30, 2009. At September 30, 2010, the Tranche C loan facility was no longer available.

**RESMED INC. AND SUBSIDIARIES****Management's Discussion and Analysis of Financial Condition and Results of Operations****Liquidity and Capital Resources, Continued**

Simultaneous with the Syndicated Facility Agreement, ResMed Limited entered into a working capital agreement with HSBC Bank Australia Limited for revolving, letter of credit and overdraft facilities up to a total commitment of 6.5 million Australian dollars, and ResMed (UK) Limited entered into a working capital agreement with HSBC Bank plc for a revolving cash advance facility for a total commitment of up to 3 million British Pounds Sterling. At September 30, 2010, there were no amounts outstanding under either of these facilities.

On September 30, 2008, our wholly-owned Australian subsidiary, ResMed Limited, agreed to amend and restate the Syndicated Facility Agreement entered into on June 8, 2006. The amended and restated agreement ( First Amended and Restated Syndicated Facility Agreement ) with the Hong Kong and Shanghai Banking Corporation, Sydney Branch as financier and HSBC Bank Australia Limited as facility agent and security trustee, provided for an additional Tranche D term loan facility in the amount of USD 50 million.

On September 30, 2009, ResMed Limited, agreed to amend and restate for a second time the Syndicated Facility Agreement. The second amended and restated agreement ( Second Amended and Restated Syndicated Facility Agreement ) provides for the extension of our Tranche D term loan facility in the amount of USD 50 million for an additional 12 month period and to increase the interest rate applicable to the Tranche D portion of the loan facility. The financier continues to have the right to assign part or all of its rights and/or obligations under the Second Amended and Restated Syndicated Facility Agreement to other financial institutions. The extended Tranche D loan facility bears interest at a rate equal to LIBOR for deposits denominated in USD, plus a margin of 2.25% or 2.50%, depending on the ratio of the total debt to EBITDA of the ResMed Group for the most recently completed fiscal year for the applicable interest period. The entire principal amount of the additional loan facility has been repaid by September 30, 2010. At September 30, 2010 there was \$Nil outstanding under the Tranche D loan facility.

The Syndicated Facility Agreement is secured by a pledge of one hundred percent of the shares of ResMed Inc.'s subsidiary, Saime SAS, pursuant to a pledge agreement. The Syndicated Facility Agreement also contains customary covenants, including certain financial covenants and an obligation that ResMed Limited maintains certain financial ratios, including a minimum debt service cover ratio, a maximum ratio of total debt to EBITDA and a minimum tangible net worth. The entire principal amount of the loan and any accrued, but unpaid, interest may be declared immediately due and payable in the event of the occurrence of an event of default as defined in the Syndicated Facility Agreement. Events of default include, among other items, failure to make payments when due, breaches of representations, warranties or covenants, the occurrence of certain insolvency events, the occurrence of an event or change which could have a material adverse effect on ResMed Limited and its subsidiaries, and if ResMed Inc. ceases

to control ResMed Limited, ResMed Corp., ResMed SAS, ResMed GmbH & Co. KG, ResMed (UK) Limited, Take Air Medical Handels-GmbH or ResMed Paris SAS (formerly Saime SAS).

**RESMED INC. AND SUBSIDIARIES****Management's Discussion and Analysis of Financial Condition and Results of Operations****Liquidity and Capital Resources, Continued**

The obligations of ResMed Limited under the loan facility are subject to two guarantee and indemnity agreements, one on behalf of ResMed Inc. and its U.S. subsidiary, ResMed Corp., and another on behalf of ResMed's international subsidiaries, ResMed SAS (other than Tranche C), ResMed GmbH & Co. KG, ResMed (UK) Limited and Take Air Medical Handels-GmbH. We are in compliance with our debt covenants.

**Prepayment Facility**

During the quarter ended September 30, 2009, ResMed EPN Limited, our wholly owned UK subsidiary, obtained access to a Prepayment Facility with HSBC Invoice Finance (UK) Limited that provides for a cash advance facility up to a total commitment of 5 million British Pounds Sterling. These advances are limited to 75% of secured outstanding sales invoices. At September 30, 2010, there were no amounts outstanding under this facility.

We expect to satisfy all of our short-term liquidity requirements through a combination of cash on hand and cash generated from operations.

**Common stock**

On May 27, 2009, our Board of Directors approved a new share repurchase program, authorizing us to acquire up to an aggregate of 10.0 million shares of ResMed Inc. common stock. During the three months ended September 30, 2010, we repurchased 0.3 million shares, at a cost of \$17.9 million. In conjunction with the stock split declared on August 5, 2010, the Board approved a doubling of the remaining number of shares, as at the date of stock split that could be purchased under the above program, from 7.2 million shares to 14.3 million shares. Accordingly, the effective total number of shares that can be purchased under the May 27, 2009 program is 17.2 million shares. At September 30, 2010, we have repurchased a total of which 9.6 million shares at a cost of \$362.4 million, and of which 6.6 million shares were repurchased pursuant to the repurchase program approved on June 6, 2002 and 3.0 million shares were repurchased pursuant to the new repurchase program approved on May 27, 2009. Shares that are repurchased are classified as treasury stock pending future use and reduce the number of shares outstanding used in calculating earnings per share. At September 30, 2010, 14.2 million additional shares can be repurchased under the share repurchase program approved May 27, 2009.

**Stock Split**

On August 5, 2010, our Board of Directors declared a two-for-one split of our common stock to be payable in the form of a 100% stock dividend. Shareholders received one additional share of common stock for every share held on August 17, 2010. All share and per share information has been adjusted to reflect the two-for-one stock split effected in the form of a 100% stock dividend that was declared on August 5, 2010 and distributed on August 30, 2010.

**Management's Discussion and Analysis of Financial Condition and Results of Operations**

**Critical Accounting Principles and Estimates**

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires us to make estimates and judgments that affect our reported amounts of assets and liabilities, revenues and expenses and related disclosures of contingent assets and liabilities. On an ongoing basis we evaluate our estimates, including those related to allowance for doubtful accounts, inventory reserves, warranty obligations, goodwill, potentially impaired assets, intangible assets, income taxes and contingencies.

We state these accounting policies in the notes to the financial statements and at relevant sections in this discussion and analysis. The estimates are based on the information that is currently available to us and on various other assumptions that we believe to be reasonable under the circumstances. Actual results could vary from those estimates under different assumptions or conditions.

We believe that the following critical accounting policies affect the more significant judgments and estimates used in the preparation of our financial statements:

(1) Allowance for Doubtful Accounts. We maintain an allowance for doubtful accounts for estimated losses resulting from the inability of our customers to make required payments, which results in bad debt expense. We determine the adequacy of this allowance by regular evaluation of individual customer receivables, considering a customer's financial condition, credit history and current economic conditions. If the financial condition of our customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required.

(2) Inventory Valuation. Inventories are stated at lower of cost or market and are determined by the first-in, first-out method. We review the components of inventory on a regular basis for excess, obsolete and impaired inventory based on estimated future usage and sales. The likelihood of any material inventory write-downs is dependent on changes in competitive conditions, new product introductions by us or our competitors, or rapid changes in customer demand.

(3) Valuation of Deferred Income Taxes. Valuation allowances are established, when necessary, to reduce deferred tax assets to the amount expected to be realized. The likelihood of a material change in our expected realization of these assets is dependent on future taxable income, the intrinsic value of stock options, our ability to deduct tax loss carry forwards against future taxable income, the effectiveness of our tax planning strategies among the various tax jurisdictions that we operate in, and any significant changes in the tax treatment received on our business combinations.

(4) Valuation of Goodwill, Intangible and Other Long-Lived Assets. We use assumptions in establishing the carrying value, fair value and estimated lives of our long-lived assets and goodwill. The criteria used for these evaluations include management's estimate of an asset's continuing ability to generate positive income from operations and positive cash flow in future periods compared to the carrying value of the asset, as well as the strategic significance of any identifiable intangible asset in our business objectives. If assets are considered to be impaired, the impairment recognized is the amount by which the carrying value of the assets exceeds the fair value of the assets. Useful lives and related amortization or depreciation expense are based on our estimate of the period that the assets will generate revenues or otherwise be used by us. Factors that would influence the likelihood of a material change in our reported results include significant changes in the asset's ability to generate positive cash flow, loss of legal ownership or title to the asset, a significant decline in the economic and competitive environment on which the asset depends, significant changes in our strategic business objectives, utilization of the asset, and a significant change in the economic and/or political conditions in certain countries.

(5) Provision for Warranty. We provide for the estimated cost of product warranties at the time the related revenue is recognized. The amount of this provision is determined by using a financial model, which takes into consideration actual, historical expenses and potential risks associated with our different products. This financial model is then used to calculate the future probable expenses related to warranty and the required level of the warranty provision. Although we engage in product improvement programs and processes, our warranty obligation is affected by product failure rates and costs incurred to correct those product failures. Should actual product failure rates or estimated costs to repair those product failures differ from our estimates, revisions to our estimated warranty provision would be required.

(6) Revenue Recognition. Revenue on product sales is recorded at the time of shipment, at which time title and risk of loss transfers to the customer. Revenue on product sales, which require customer acceptance, is not recorded until acceptance is received. Royalty revenue from license agreements is recorded when earned. Service revenue received in advance from service contracts is initially deferred and recognized ratably over the life of the service contract. Revenue received in advance from rental unit contracts is initially deferred and recognized ratably over the life of the rental contract. Revenue from sale of marketing and distribution rights is initially deferred and recognized ratably as revenue over the life of the contract. Freight charges billed to customers are included in revenue. All freight-related expenses are charged to cost of sales. We do not recognize revenues to the extent that we offer a right of return or other recourse with respect to the sale of our products, other than returns for product defects or other warranty claims, nor do we recognize revenues if we offer variable sale prices for subsequent events or activities. As part of our sales

processes we may provide upfront discounts for large orders, one-time special pricing to support new product introductions, sales rebates for centralized purchasing entities or price-breaks for regular order volumes. The costs of all such programs are recorded as an adjustment to revenue. Our products are predominantly therapy-based equipment and require no installation. As such, we have no significant installation obligations.

(7) **Stock-Based Compensation.** We measure the compensation of all stock-based awards at fair value on date of grant. Such value is recognized as compensation expense over the service period, net of estimated forfeitures. We estimate the fair value of employee stock options using a Black-Scholes valuation model. The fair value of an award is affected by our stock price on the date of grant as well as other assumptions including the estimated volatility of our stock price over the term of the awards and the estimated period of time that we expect employees to hold their stock options. The risk-free interest rate assumption we use is based upon U.S. Treasury yield curve appropriate for the expected life of the awards. Expected volatilities are based on a combination of historical volatilities of our stock and the implied volatilities from traded options of our stock corresponding to the expected term of the options. We use a combination of the historic and implied volatilities as we believe the addition of the implied volatility is more representative of our future stock price trends. In order to determine the estimated period of time that we expect employees to hold their stock options, we have used historical rates by employee groups. The estimation of stock awards, including options and restricted stock units, that will ultimately vest requires judgment, and to the extent actual results differ from our estimates, such amounts will be recorded as a cumulative adjustment in the period estimates are revised. The aforementioned inputs entered into the option valuation model we use to fair value our stock awards are subjective estimates and changes to these estimates will cause the fair value of our stock awards and related stock-based compensation expense we record to vary.

(8) **Income Tax.** We assess our income tax positions and record tax benefits for all years subject to examination based upon management's evaluation of the facts, circumstances, and information available at the reporting date. For those tax positions where it is more likely than not that a tax benefit will be sustained, we have recorded the largest amount of tax benefit with a greater than 50 percent likelihood of being realized upon ultimate settlement with a taxing authority that has full knowledge of all relevant information. For those income tax positions where it is not more likely than not that a tax benefit will be sustained, no tax benefit has been recognized in the financial statements.

**Off-Balance Sheet Arrangements**

As of September 30, 2010, we are not involved in any off-balance sheet arrangements, as defined in Item 303(a)(4)(ii) of Regulation S-K promulgated by the SEC.

Foreign Currency Market Risk**

Our reporting currency is the U.S. dollar, although the financial statements of our non-U.S. subsidiaries are maintained in their respective local currencies. We transact business in various foreign currencies, including a number of major European currencies as well as the Australian dollar. We have significant foreign currency exposure through both our Australian manufacturing activities and international sales operations. We have established a foreign currency hedging program using purchased currency options and forward contracts to hedge foreign-currency-denominated financial assets, liabilities and manufacturing expenditures. The goal of this hedging program is to economically manage the financial impact of foreign currency exposures denominated in Euros and Australian dollars. Under this program, increases or decreases in our foreign-currency-denominated financial assets, liabilities, and firm commitments are partially offset by gains and losses on the hedging instruments. We do not enter into financial instruments for trading or speculative purposes.

The table below provides information in U.S. dollar equivalents on our significant foreign-currency-denominated financial assets and liabilities at September 30, 2010 (in thousands):

The table below provides information about our foreign currency derivative financial instruments and presents the information in U.S. dollar equivalents. The table summarizes information on instruments and transactions that are sensitive to foreign currency exchange rates, including foreign currency hedges held at September 30, 2010. The table presents the notional amounts and weighted average exchange rates by contractual maturity dates for our foreign currency derivative financial instruments. **Interest Rate Risk**

We are exposed to risk associated with changes in interest rates affecting the return on our cash and cash equivalents, investment securities and debt. At September 30, 2010, we maintained cash and cash equivalents of \$540.0 million containing financial instruments that have original maturities of less than 90 days. These financial instruments are principally comprised of bank term deposits and at call accounts and are invested at both short term fixed interest rates and variable interest rates. At September 30, 2010, we had total long-term debt, including the current portion of those obligations, of \$93.8 million. All of this debt is subject to variable interest rates. A hypothetical 10% change in interest rates during the three months ended September 30, 2010, would not have had a material impact on pretax income. We have no interest rate hedging agreements.

**Item 4. Controls and Procedures**

We maintain disclosure controls and procedures that are designed to provide reasonable assurance that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and in reaching a reasonable level of assurance management necessarily was required to apply its judgment in evaluating the cost benefit relationship of possible controls and procedures.

As required by Rule 13a-15(b) of the Exchange Act, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this report. Based on the foregoing, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level as of September 30, 2010.

There has been no change in our internal controls over financial reporting during our most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

The information required by this Item is incorporated herein by reference to Note 11, Legal Actions and Contingencies, to the unaudited condensed consolidated financial statements under Part I, Item 1 of this report.

**Item 1A Risk Factors**

The discussion of our business and operations should be read together with the risk factors contained in our Annual Report on Form 10-K for the fiscal year ended June 30, 2010, which was filed with the SEC and describes the various risks and uncertainties to which we are or may become subject. At September 30, 2010, there have been no material changes to the risk factors set forth in our Annual Report on Form 10-K for the year ended June 30, 2010.

**Item 2 Unregistered Sales of Equity Securities and Use of Proceeds**

Purchases of equity securities. The following table summarizes purchases by us of our common stock during the three months ended September 30, 2010:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs <sup>(1)</sup>	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs <sup>(1),(2)</sup>

Total	347,395	\$ 51.45	9,569,163	14,210,388

<sup>(1)</sup> On May 27, 2009, the Board of Directors authorized us to repurchase up to 10.0 million shares of our outstanding common stock. There is no expiration date for this program. In conjunction with the stock split declared on August 5, 2010, the Board approved a doubling of the remaining number of shares, as at the date of stock split that could be purchased under the above program, from 7.2 million shares to 14.3 million shares. Accordingly, the effective total number of shares that can be purchased under the May 27, 2009 program is 17.2 million shares. For the three months ended September 30, 2010 and 2009, we repurchased 347,395 and 788,800 shares at a cost of \$17.9 million and \$35.7 million, respectively. Since the inception of the share buyback program, we have repurchased 6,622,907 shares before May 27,
