Table of Contents**GLOSSARY OF TERMS AND ABBREVIATIONS**

The following terms, abbreviations and acronyms are used to identify frequently used terms in this report:

TERM	DEFINITION
ACNielsen	ACNielsen Corporation a former affiliate of Old D&B
Analytics	Moody's Analytics a reportable segment of MCO formed in January 2008 which includes the non-rating commercial activities of MCO
AOCI	Accumulated other comprehensive income (loss); a separate component of shareholders' equity (deficit)
ASC	The FASB Accounting Standards Codification; the sole source of authoritative GAAP as of July 1, 2009 except for rules and interpretive releases of the SEC, which are also sources of authoritative GAAP for SEC registrants
ASU	The FASB Accounting Standards Updates to the ASC. It also provides background information for accounting guidance and the bases for conclusions on the changes in the ASC. ASUs are not considered authoritative until codified into the ASC
B&H	Barrie & Hibbert Limited, an acquisition completed in December 2011; part of the MA segment, a leading provider of risk management modeling tools for insurance companies worldwide
Basel II	Capital adequacy framework published in June 2004 by the Basel Committee on Banking Supervision
Board	The board of directors of the Company
Bps	Basis points
Canary Wharf Lease	Operating lease agreement entered into on February 6, 2008 for office space in London, England, occupied by the Company in the second half of 2009
CFG	Corporate finance group; an LOB of MIS
CMBS	Commercial mortgage-backed securities; part of CREF
Cognizant	Cognizant Corporation a former affiliate of Old D&B, which comprised the IMS Health and NMR businesses
Commission	European Commission
Common Stock	The Company's common stock
Company	Moody's Corporation and its subsidiaries; MCO; Moody's
Copal	Copal Partners; an acquisition completed in November 2011; part of the MA segment; leading provider of outsourced research and analytical services to institutional investors.
Corporate Family Ratings	Rating opinion of a corporate family's ability to honor all of its financial obligations which is assigned to the corporate family as if it had a single class of debt and a single consolidated legal entity structure. This rating is often issued in connection with ratings of leveraged finance transactions
COSO	Committee of Sponsoring Organizations of the Treadway Commission
Council	Council of European Finance Ministers
CP	Commercial paper
CP Notes	Unsecured CP notes
CP Program	The Company's CP program entered into on October 3, 2007
CRAs	Credit rating agencies
CREF	Commercial real estate finance which includes REITs, commercial real estate collateralized debt obligations and CMBS; part of SFG
CSI	CSI Global Education, Inc., an acquisition completed in November 2010; part of the MA segment; a provider of financial learning, credentials, and certification in Canada
D&B Business	Old D&B's Dun & Bradstreet operating company

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

DBPPs

Defined benefit pension plans

DCF

Discounted cash flow; a fair value calculation methodology whereby future projected cash flows are discounted back to their present value using a discount rate

MOODY S 2011 10-K

Table of Contents

TERM	DEFINITION
Debt/EBITDA	Ratio of Total Debt to EBITDA
Directors' Plan	The 1998 Moody's Corporation Non-Employee Directors' Stock Incentive Plan
Distribution Date	September 30, 2000; the date which Old D&B separated into two publicly traded companies - Moody's Corporation and New D&B
ECAIs	External Credit Assessment Institutions
ECB	European Central Bank
EMEA	Represents countries within Europe, the Middle East and Africa
EPS	Earnings per share
ESPP	The 1999 Moody's Corporation Employee Stock Purchase Plan
ETR	Effective tax rate
EU	European Union
EUR	Euros
Excess Tax Benefit	The difference between the tax benefit realized at exercise of an option or delivery of a restricted share and the tax benefit recorded at the time that the option or restricted share is expensed under GAAP
Exchange Act	The Securities Exchange Act of 1934, as amended
FASB	Financial Accounting Standards Board
FIG	Financial institutions group; an LOB of MIS
Fitch	Fitch Ratings, a part of the Fitch Group
Financial Reform Act	Dodd-Frank Wall Street Reform and Consumer Protection Act
FX	Foreign exchange
GAAP	U.S. Generally Accepted Accounting Principles
GBP	British pounds
G-8	The finance ministers and central bank governors of the group of eight countries consisting of Canada, France, Germany, Italy, Japan, Russia, U.S. and U.K.
G-20	The G-20 is an informal forum that promotes open and constructive discussion between industrial and emerging-market countries on key issues related to global economic stability. By contributing to the strengthening of the international financial architecture and providing opportunities for dialogue on national policies, international co-operation, and international financial institutions, the G-20 helps to support growth and development across the globe. The G-20 is comprised of: Argentina, Australia, Brazil, Canada, China, France, Germany, India, Indonesia, Italy, Japan, Mexico, Russia, Saudi Arabia, South Africa, South Korea, Turkey, U.K., U.S. and the EU, which is represented by the rotating Council presidency and the ECB
IMS Health	A spin-off of Cognizant, which provides services to the pharmaceutical and healthcare industries
Indenture	Indenture and supplemental indenture dated August 19, 2010, relating to the 2010 Senior Notes
Indicative Ratings	These are ratings which are provided as of a point in time, and not published or monitored. They are primarily provided to potential or current issuers to indicate what a rating may be based on business fundamentals and financial conditions as well as based on proposed financings
Intellectual Property	The Company's intellectual property, including but not limited to proprietary information, trademarks, research, software tools and applications, models and methodologies, databases, domain names, and other proprietary materials
IOSCO	International Organization of Securities Commissions
IOSCO Code	Code of Conduct Fundamentals for CRAs issued by IOSCO
IRS	Internal Revenue Service
Korea	Republic of South Korea
LIBOR	London Interbank Offered Rate

TERM	DEFINITION
LOB	Line of Business
MA	Moody's Analytics – a reportable segment of MCO formed in January 2008 which includes the non-rating commercial activities of MCO
Make Whole Amount	The prepayment penalty relating to the Series 2005-1 Notes and Series 2007-1 Notes; a premium based on the excess, if any, of the discounted value of the remaining scheduled payments over the prepaid principal
MCO	Moody's Corporation and its subsidiaries; the Company; Moody's
MD&A	Management's Discussion and Analysis of Financial Condition and Results of Operations
MIS	Moody's Investors Service – a reportable segment of MCO
MIS Code	Moody's Investors Service Code of Professional Conduct
Moody's	Moody's Corporation and its subsidiaries; MCO; the Company
Net Income	Earnings attributable to Moody's Corporation, which excludes the portion of net income from consolidated entities attributable to non-controlling shareholders
New D&B	The New D&B Corporation – which comprises the D&B business after September 30, 2000
NM	Not-meaningful percentage change (over 400%)
NMR	Nielsen Media Research, Inc.; a spin-off of Cognizant; a leading source of television audience measurement services
NRSRO	Nationally Recognized Statistical Rating Organization
Old D&B	The former Dun and Bradstreet Company which distributed New D&B shares on September 30, 2000, and was renamed Moody's Corporation
Post-Retirement Plans	Moody's funded and unfunded U.S. pension plans, the U.S. post-retirement healthcare plans and the U.S. post-retirement life insurance plans
PPIF	Public, project and infrastructure finance; an LOB of MIS
Profit Participation Plan	Defined contribution profit participation plan that covers substantially all U.S. employees of the Company
PPP	Profit Participation Plan
RD&A	Research, Data and Analytics; an LOB within MA that distributes investor-oriented research and data, including in-depth research on major debt issuers, industry studies, commentary on topical credit events, economic research and analytical tools such as quantitative risk scores
Redeemable Noncontrolling Interest	Represents minority shareholders' interest in entities which are controlled but not wholly-owned by Moody's and for which Moody's obligation to redeem the minority shareholders' interest is in the control of the minority shareholders
Reform Act	Credit Rating Agency Reform Act of 2006
REITs	Real estate investment trusts
Reorganization	The Company's business reorganization announced in August 2007 which resulted in two new reportable segments (MIS and MA) beginning in January 2008
RMBS	Residential mortgage-backed securities; part of SFG
RMS	The Risk Management Software LOB within MA which provides both economic and regulatory capital risk management software and implementation services
S&P	Standard & Poor's Ratings Services, a division of The McGraw-Hill Companies, Inc.
SEC	Securities and Exchange Commission
Series 2005-1 Notes	Principal amount of \$300 million, 4.98% senior unsecured notes due in September 2015 pursuant to the 2005 Agreement
SFG	Structured finance group; an LOB of MIS
SG&A	Selling, general and administrative expenses
Stock Plans	The Old D&B's 1998 Key Employees' Stock Incentive Plan and the Restated 2001 Moody's Corporation Key Employees' Stock Incentive Plan

Table of Contents

TERM	DEFINITION
T&E	Travel and entertainment expenses
TPE	Third party evidence, as defined in the ASC, used to determine selling price based on a vendor's or any competitor's largely interchangeable products or services in standalone sales transactions to similarly situated customers
Total Debt	Current and long-term portion of debt as reflected on the consolidated balance sheets, excluding current accounts payable and accrued liabilities incurred in the ordinary course of business
U.S.	United States
USD	U.S. dollar
UTBs	Unrecognized tax benefits
UTPs	Uncertain tax positions
VSOE	Vendor specific objective evidence; evidence, as defined in the ASC, of selling price limited to either of the following: the price charged for a deliverable when it is sold separately, or for a deliverable not yet being sold separately, the price established by management having the relevant authority
WACC	Weighted average cost of capital
1998 Plan	Old D&B's 1998 Key Employees' Stock Incentive Plan
2000 Distribution	The distribution by Old D&B to its shareholders of all of the outstanding shares of New D&B common stock on September 30, 2000
2000 Distribution Agreement	Agreement governing certain ongoing relationships between the Company and New D&B after the 2000 Distribution including the sharing of any liabilities for the payment of taxes, penalties and interest resulting from unfavorable IRS determinations on certain tax matters and certain other potential tax liabilities
2001 Plan	The Amended and Restated 2001 Moody's Corporation Key Employees' Stock Incentive Plan
2005 Agreement	Note purchase agreement dated September 30, 2005 relating to the Series 2005-1 Notes
2007 Agreement	Note purchase agreement dated September 7, 2007 relating to the Series 2007-1 Notes
2007 Facility	Revolving credit facility of \$1 billion entered into on September 28, 2007, expiring in 2012
2007 Restructuring Plan	The Company's 2007 restructuring plan approved December 31, 2007
2008 Term Loan	Five-year \$150.0 million senior unsecured term loan entered into by the Company on May 7, 2008
2009 Restructuring Plan	The Company's 2009 restructuring plan approved March 27, 2009
2010 Senior Notes	Principal amount of \$500.0 million, 5.50% senior unsecured notes due in September 2010 pursuant to the Indenture
7WTC	The Company's corporate headquarters located at 7 World Trade Center
7WTC Lease	Operating lease agreement entered into on October 20, 2006

Table of Contents**PART I****ITEM 1. BUSINESS
BACKGROUND**

As used in this report, except where the context indicates otherwise, the terms "Moody's" or the "Company" refer to Moody's Corporation, a Delaware corporation, and its subsidiaries. The Company's executive offices are located at 7 World Trade Center at 250 Greenwich Street, New York, NY 10007 and its telephone number is (212) 553-0300. Prior to September 30, 2000, the Company operated as part of The Dun & Bradstreet Corporation.

THE COMPANY

Moody's is a provider of (i) credit ratings, (ii) credit and economic related research, data and analytical tools, (iii) risk management software, (iv) quantitative credit risk measures, credit portfolio management solutions, training and financial credentialing and certification services and (v) outsourced research and analytical services to institutional customers. Moody's reports in two reportable segments: MIS and MA. The MIS segment consists of all credit rating activity. All of Moody's other non-rating commercial activities are included within the MA segment. Financial information and operating results of these segments, including revenue, expenses, operating income and total assets, are included in Part II, Item 8. Financial Statements of this annual report, and are herein incorporated by reference.

MIS, the credit rating agency, publishes credit ratings on a wide range of debt obligations and the entities that issue such obligations in markets worldwide, including various corporate and governmental obligations, structured finance securities and commercial paper programs. Revenue is derived from the originators and issuers of such transactions who use MIS ratings to support the distribution of their debt issues to investors. MIS provides ratings in more than 110 countries. Ratings are disseminated via press releases to the public through a variety of print and electronic media, including the Internet and real-time information systems widely used by securities traders and investors. As of December 31, 2011, MIS had ratings relationships with approximately 11,000 corporate issuers and approximately 22,000 public finance issuers. Additionally, the Company has rated and currently monitors ratings on approximately 94,000 structured finance obligations (representing approximately 14,000 transactions). The aforementioned amounts relating to the number of issuers and transactions represent issuers or transactions that had an active rating at any point during the year ended December 31, 2011.

The MA segment develops a wide range of products and services that support the risk management activities of institutional participants in global financial markets. Within its Research, Data and Analytics business, MA distributes investor-oriented research and data developed by MIS as part of its ratings process, including in-depth research on major debt issuers, industry studies, commentary on topical credit related events and also provides economic research and credit data and analytical tools such as quantitative credit risk scores. Within its Risk Management Software business, MA provides both economic and regulatory capital risk management software and implementation services. Within its Professional Services business it provides quantitative credit risk measures, credit portfolio management solutions, training, financial credentialing and certification services as well as outsourced research and analytical services to institutional investors. MA customers represent more than 4,600 institutions worldwide operating in approximately 115 countries. During 2011 Moody's research web site was accessed by over 226,000 individuals including 28,000 client users.

The Company operated as part of "Old D&B" until September 30, 2000, when Old D&B separated into two publicly traded companies "Moody's Corporation" and "New D&B". At that time, Old D&B distributed to its shareholders shares of New D&B stock. New D&B comprised the business of Old D&B's Dun & Bradstreet operating company. The remaining business of Old D&B consisted solely of the business of providing ratings and related research and credit risk management services and was renamed Moody's Corporation. For purposes of governing certain ongoing relationships between the Company and New D&B after the 2000 Distribution and to provide for an orderly transition, the Company and New D&B entered into various agreements including a distribution agreement, tax allocation agreement and employee benefits agreement.

Table of Contents

PROSPECTS FOR GROWTH

Over recent decades, global fixed-income markets grew significantly in terms of the amount and the types of securities or other obligations outstanding. Beginning in mid-2007, there was a severe market disruption and a global decline in issuance activity for some significant asset classes. Despite the market disruption, Moody's believes that the overall long-term outlook remains favorable for continued global growth of fixed-income markets including the market for related financial information such as credit opinions, data, analytics and related services. Moody's growth is influenced by a number of trends that impact financial information markets including:

Health of the world's major economies;

Debt capital markets activity; and

Business investment spending.

Throughout 2011 there were continued signs of gradual improvement in the health of the U.S. economy while the global economy continued to experience more volatility with European sovereign debt and related banking sector concerns offset by strong economic growth in emerging markets. Continued improvement of the U.S. economy and housing sector as well as a potential resolution to the European sovereign debt crisis should influence the Company's growth over the near term. Furthermore, Moody's is well positioned to benefit from a long-term recovery in global credit market activity and a more informed use of credit ratings, research and related analytical products in an environment of renewed attention to risk analysis and risk management. Moody's expects that these developments will support continued long-term demand for high-quality, independent credit opinions, research, data and risk management tools and services. An expectation of recovery-driven growth in capital market activity, supported by initiatives to increase market share, leverage pricing opportunities, capture disintermediation activity in developed and developing markets and develop additional data, research and rating products, represent key growth drivers for Moody's.

Growth in global fixed income markets in a given year is dependent on many macroeconomic and capital market factors including interest rates, business investment spending, corporate refunding needs, merger and acquisition activity and consumer borrowing and securitization. Rating fees paid by debt issuers account for most of the revenue of MIS. Therefore, a substantial portion of MIS's revenue is dependent upon the dollar-equivalent volume and number of ratable debt securities issued in the global capital markets. MIS's results can be affected by factors such as the performance and the prospects for growth of the major world economies, the fiscal and monetary policies pursued by their governments and the decisions of issuers to request MIS ratings to aid investors in their investment decision process. However, annual fee arrangements with frequent debt issuers, annual debt monitoring fees and annual fees from commercial paper and medium-term note programs, bank and insurance company financial strength ratings, mutual fund ratings, and other areas partially mitigate MIS's dependence on the volume or number of new debt securities issued in the global capital markets. Furthermore, the strong growth trend seen in the issuance of structured finance securities from the mid-1990's reversed dramatically in 2008 due to market turmoil, with continued declines seen in 2009 and 2010. The market disruptions that escalated in 2008 are expected to continue in the immediate term, however Moody's has seen some revenue stabilization from this market in 2011. Despite significant declines from peak market levels, Moody's believes that structured finance securities will continue to play a role in global credit markets and will provide opportunities for longer term revenue growth. Moody's will continue to monitor this market and adapt to meet the changing needs of its participants.

Longer term growth in global fixed-income markets is also attributable to a number of forces and trends such as advances in information technology and disintermediation of financial systems. The pace of change in technology and communication over the past two decades makes information about investment alternatives widely available throughout the world and facilitates issuers' ability to place securities outside their national markets and investors' capacity to obtain information about securities issued outside their national markets. Technology also allows issuers and investors the ability to more readily obtain information about new financing techniques and new types of securities that they may wish to purchase or sell, which in the absence of the appropriate technology may not be easily obtainable. This availability of information promotes the ongoing integration and expansion of financial markets worldwide giving issuers and investors access to a wider range of developed capital markets and a number of new capital markets. As technology provides for wider access to worldwide markets, it also results in a greater need for credible, globally comparable opinions about credit risk, data, analytics and related services. Additionally, information technology also provides opportunities to further build a global platform to support Moody's continued expansion in developing markets.

An ongoing trend in the world's capital markets is the disintermediation of financial systems. Issuers increasingly raise capital in the global public capital markets, in addition to, or in substitution for, traditional financial intermediaries. Moreover, financial intermediaries have sold assets in the global public capital markets, in addition to, or instead of, retaining those assets. Recent credit market disruptions which began in

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

mid-2007 initially slowed the trend of disintermediation globally, but Moody's believes that debt capital markets offer advantages in capacity and efficiency compared to the traditional banking systems. In fact, disintermediation has accelerated in some markets over the past year as deleveraging by banks has encouraged corporations and other entities to seek alternative funding in bond

Table of Contents

markets, while in key emerging markets strong economic growth is outpacing banking system capacity. Thus, disintermediation is expected to accelerate in the longer-term, with Moody's continuing to target investment and resources to growing international markets where disintermediation and bond issuance should remain more robust.

In response to the 2008-2009 credit crisis, and to address new regulation and ongoing volatility in the capital markets, financial institutions are investing in people, processes and systems to enhance risk management and compliance functions. Regulations such as the Dodd-Frank Wall Street Reform and Consumer Protection Act, Basel II, Basel III, Solvency II and others may stimulate demand for Moody's Analytics products. Financial institutions are also investing in advanced qualitative and quantitative tools and services to support their management of complex balance sheets and diverse portfolios. Moody's Analytics offers a suite of risk management products and services to address these needs, including but not limited to risk management software, economic analysis, training and professional services.

Legislative bodies and regulators in the U.S., Europe and selective other jurisdictions continue to conduct regulatory reviews of CRAs, which may result in, for example, an increased number of competitors, changes to the business model or restrictions on certain business activities of MIS, or increased costs of doing business for MIS. Therefore, in order to broaden the potential for expansion of non-ratings services, Moody's reorganized in January 2008 into two distinct businesses: MIS, consisting solely of the ratings business, and MA. MA conducts all non-ratings activities including the sale of credit research produced by MIS and the production and sale of other economic and credit-related products and services. The reorganization broadens the opportunities for expansion by MA into activities which may have otherwise been restricted for MIS, due to the potential for conflicts of interest with the ratings business. At present, Moody's is unable to assess the nature and effect that any regulatory changes may have on future growth opportunities.

Moody's operations are subject to various risks, as more fully described in Part I, Item 1A Risk Factors, inherent in conducting business internationally. Such risks include currency fluctuations and possible nationalization, expropriation, exchange and price controls, changes in the availability of data from public sector sources, limits on providing information across borders and other restrictive governmental actions. Management believes that the risks of nationalization or expropriation are reduced because the Company's basic service is the creation and dissemination of information, rather than the production of products that require manufacturing facilities or the use of natural resources. However, the formation of, for example, a new government-sponsored regional or global rating agency would pose a risk to MIS's growth prospects. Management believes that this risk, compared to other regulatory changes under consideration for the credit rating industry, is relatively low because of the likelihood that substantial investments over a sustained period would be required, with uncertainty about the likelihood of financial success for the entity.

COMPETITION

The MIS business competes with other CRAs and with investment banks and brokerage firms that offer credit opinions and research. Many users of MIS's ratings also have in-house credit research capabilities. MIS's largest competitor in the global credit rating business is Standard & Poor's Ratings Services, a division of The McGraw-Hill Companies, Inc. There are some rating markets, based on industry, geography and/or instrument type, in which Moody's has made investments and obtained market positions superior to S&P Ratings Services, while in other markets, the reverse is true.

In addition to S&P Ratings Services, MIS's competitors include Fitch Ratings, Dominion Bond Rating Service Ltd., A.M. Best Company Inc., Japan Credit Rating Agency Ltd., Kroll Bond Rating Agency Inc., Morningstar Inc. and Egan-Jones Ratings Company. In Europe, examples of competitors include Euler Hermes Rating, Feri EuroRating, Creditreform Rating, PSR Rating, ICAP Group and Companhia Portuguesa de Rating. There are additional competitors in other regions and countries, for example, in China where Moody's operates through a joint venture. These competitors include China Lianhe Credit Rating Co Ltd., Shanghai Brilliance Credit Rating & Investors Service Co Ltd., Dagong Global Credit Rating Co Ltd. and Pengyuan Credit Rating Co Ltd.

MA competes broadly in the financial information industry against diversified competitors such as Thomson Reuters Markets Division, Bloomberg, S&P Capital IQ/S&P Indices, Fitch Solutions, Dun & Bradstreet, IBM, Wolters Kluwer, Sungard, SAS, Fiserv, MSCI and Markit Group among others. MA's main competitors within RD&A include S&P Capital IQ/S&P Indices, CreditSights, Thomson-Reuters, Intex, IHS Global Insight, BlackRock Solutions, FactSet and other smaller boutique providers of fixed income analytics, valuations, economic data and research. In RMS, MA faces competition from both large software providers such as IBM Algorithmics, SunGard, SAS, Oracle, Mysis, Oliver Wyman, Verisk and other various smaller vendors and in-house solutions. Within professional services, MA competes with Omega Performance, DC Gardner, and a host of financial training and education boutiques, and with Evalueserve, AMBA, CRISIL Global Research & Analytics, and other providers of outsourced research and consulting services.

Table of Contents

MOODY S STRATEGY

Moody s corporate strategy is to be the world s most respected authority serving credit sensitive markets. The key aspects to implement this strategy are to:

Defend and enhance the core business

Invest in growth

Moody s will invest to defend and enhance the core businesses in an attempt to position the Company to fully capture market opportunities resulting from global debt capital market expansion and increased business investment spending. Moody s will also make strategic investments to achieve scale in attractive financial information markets, move into attractive adjacencies where the Company can leverage its core competencies and expand our footprint in high growth emerging markets.

To broaden the Company s potential, Moody s reorganized in 2008, creating the MA business focused on all non-ratings activities. This adds considerable value in three ways. First, MA adds a significant base of recurring revenue to offset potential volatility in ratings issuance volumes impacting MIS. Second, MA provides a foothold in emerging markets, selling products and services, such as training, consulting and bank system implementation, before these debt capital markets are fully mature. Finally, MA provides holistic financial risk management credit solutions sought by the Company s customers.

Moody s invests in a portfolio of initiatives to implement our strategy through organic development and targeted acquisitions. Example initiatives include:

Risk management software and services

Expansion in emerging markets

New products and services such as CreditView and RiskCalc China

The 2011 acquisitions of Barrie & Hibbert and majority stake in the companies of Copal Partners advanced Moody s strategy. B&H is a leading provider of risk management modeling tools for insurance companies worldwide. Copal is among the world s leading providers of outsourced research and analytical services to institutional customers. Both companies will help the Company pursue its objective to be the world s foremost authority and services provider in credit risk-sensitive markets.

REGULATION

MIS and many of the securities that it rates are subject to extensive regulation in both the U.S. and in other countries (including by state and local authorities). Thus, existing and proposed laws and regulations can impact the Company s operations and the markets for securities that it rates. Additional laws and regulations have been adopted but not yet implemented or have been proposed or are being considered. Each of the existing, adopted, proposed and potential laws and regulations can increase the costs and legal risk associated with the issuance of credit ratings and may negatively impact Moody s operations or profitability, the Company s ability to compete, or result in changes in the demand for credit ratings, in the manner in which ratings are utilized and in the manner in which Moody s operates.

In the U.S., MIS has been designated as an NRSRO by the SEC since 1975 and, pursuant to the substantive regulatory authority granted to the SEC under the Credit Rating Agency Reform Act of 2006, has been registered as an NRSRO since September 2007. The Reform Act provided the SEC with authority to oversee NRSROs, while prohibiting the SEC from regulating the substance of credit ratings or the procedures and methodologies by which any NRSRO determines credit ratings. Pursuant to the Reform Act, the SEC has adopted regulations applicable to rating agencies which register as NRSROs, addressing among other things:

the NRSRO application and registration process;

recordkeeping, financial reporting, prevention of misuse of material non-public information, conflicts of interest, and prohibited acts and practices;

additional requirements for managing conflicts of interest, enhancing record keeping requirements, and improving transparency of ratings performance and methodologies;

additional disclosure requirements applicable to rating histories; and

a prohibition on rating structured finance products unless the issuer makes the same information accessible to all NRSROs that it provides to any NRSRO that it hires to rate the product.

Table of Contents

Provisions of the Financial Reform Act, which was enacted in 2010, seek, among other things, to enhance transparency and accountability in the credit rating agency industry, and to reduce the regulatory reliance on credit ratings. The majority of the provisions of Subtitle C of Title IX of the Financial Reform Act seek to regulate the activities of those CRAs that are registered under the SEC's regulatory framework for NRSROs, and thus apply to MIS.

Among other provisions applicable to NRSROs, the Financial Reform Act:

rescinded Rule 436(g) under the Securities Act of 1933 (the Securities Act), which provided NRSROs with an exemption from expert liability under the Securities Act when ratings information was included in a registration statement relating to a securities offering.

created new pleading standards that may affect NRSROs' liability in cases brought against them;

heightened compliance standards, including by adoption of enhanced corporate governance and conflicts of interest policies and procedures, implementation of professional standards for credit analysts and providing for periodic compliance examinations;

increased public disclosures by NRSROs, including disclosure of the ratings process and methodology, factors relied upon in formulating ratings, results of third-party due diligence and accuracy of prior ratings;

deleted or replaced references to credit ratings in certain federal laws and mandated that federal agencies delete or replace references to credit ratings in their regulations; and

mandated that the SEC study the feasibility of establishing a system in which a utility or a self-regulatory organization assigns NRSROs to determine the credit ratings of structured finance products to address so-called rating-shopping by issuers and underwriters of structured financial products.

The SEC and other federal regulators are in the process of implementing provisions of the Financial Reform Act applicable to NRSROs and rating agencies. Events surrounding the implementation have included:

In September 2011, an SEC rule went into effect requiring NRSROs to disclose information about the representations and warranties of the structured finance securities they rate;

In July 2011, the SEC adopted a rule that removed references to credit ratings in certain rules and forms applicable to issuers; and

Financial institution regulators closed the comment period on proposed alternatives to credit ratings that could be incorporated into banking regulations.

The SEC also has adopted or proposed a number of regulations affecting securities that are rated by MIS and that otherwise affect the market for ratings, including proposals to require disclosure about credit ratings in certain registered securities offerings, and rules affecting disclosures and the operation of the structured finance products.

Internationally, several regulatory developments have occurred:

EU In 2009, the European Parliament passed a new regulation (EU Regulation) that establishes an oversight regime for the CRA industry in the European Union. The framework for the EU Regulation requires the registration, formal regulation and periodic inspection of CRAs operating in

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

the EU. The EU Regulation also sets out specific requirements for the use of ratings that are produced outside of the EU and are used for regulatory purposes in the EU. Among these is a requirement for the relevant competent authority in the EU and the competent authority of the non-EU jurisdiction where that rating has been produced to enter into a cooperation agreement containing provisions related to the exchange of information and the coordination of supervisory activities. The EU Regulation became fully effective in September 2010. MIS applied for registration in August 2010 and was granted registration in October 2011. In addition, the European Securities and Market Authority (ESMA) was established in January 2011 and has had direct supervisory responsibility for registered CRA industry in the EU since July 2011.

The regulatory framework of the CRA industry continues to be discussed in the European Union.

In November 2011, the European Commission issued proposed amendments to its existing regulations. If enacted as proposed, the revised regulations, among other things, would:

impose various additional procedural requirements with respect to ratings of sovereign issuers;

require member states to adopt laws imposing liability on credit rating agencies for an intentional or grossly negligent failure to abide by the applicable regulations;

potentially impose a greater burden of proof on credit rating agencies accused of failing to abide by applicable regulations;

Table of Contents

impose mandatory rotation requirements on the rating agencies hired by issuers of securities, thereby limiting the number of years a credit rating agency can issue ratings for securities of a particular issuer;

enhance ESMA's role in reviewing rating methodologies; and

impose additional procedural and substantive requirements on the pricing of services.

The next stages of the legislative process include deliberation and potential amendments by both the European Parliament and the Council of European Finance Ministers. The Parliament, Council and Commission must all confer and agree on a final text. The Company expects this process may take from four to eight months, during which time Moody's will continue to consult with relevant authorities and market participants as to the impact of the specific proposals on the financial markets, issuers and investors.

The G-8 and the G-20 have over the past several years:

Committed to implement oversight of the CRAs, consistent with the strengthened International Organization of Securities Commissions Code of Conduct, described below, and agreed that, in the medium term, countries should implement a registration system for CRAs;

Agreed to extend regulatory oversight to and require registration of CRAs in order to ensure that they adhere to the international code of good practice; and

Expressed the view that the development of good practices for due diligence by asset managers investing in structured finance products will result in reduced reliance on credit ratings.

IOSCO has published a Code of Conduct Fundamentals for Credit Rating Agencies. In 2009, IOSCO published its second review of the CRAs implementation of the IOSCO Code. The report noted that seven out of the 21 CRAs reviewed had implemented the IOSCO Code in their own codes of conduct. In particular, MIS was found to have substantially implemented the 2008 revisions to the IOSCO Code. In addition, IOSCO announced in 2009 the establishment of a new standing committee that will address global issues regarding the CRA industry.

MIS has revised its Code of Professional Conduct (fashioned on the IOSCO Code) on several occasions to reflect the changes made to the IOSCO Code and the broader changes in the regulatory environment for CRAs. Beginning in 2006, MIS has annually published a report that describes its implementation of its Code. The MIS Code and implementation reports can be found on the Company's website.

The Basel Committee In 2004, the Basel Committee on Banking Supervision published a bank capital adequacy framework, called Basel II, to replace its initial 1988 framework. Under Basel II, ratings assigned by recognized CRAs or ECAIs, can be used by banks in determining credit risk weights for many of their institutional credit exposures. Recognized ECAIs could be subject to a broader range of oversight. MIS has been recognized as an ECAI in many jurisdictions. As a result of the recent developments in the financial markets, the banking authorities of the Basel Committee have been reconsidering the overall framework. Work on the new framework, Basel III, is now complete. It is to be implemented in stages, beginning in 2010 and concluding in 2018. Basel III continues to use credit ratings as a tool in bank supervision, however the form and extent of this use is currently under debate by global prudential regulators.

Other legislation and regulation relating to credit rating and research services is being considered by local, national and multinational bodies and this type of activity is likely to continue in the future. In addition, in certain countries, governments may provide financial or other support to locally-based rating agencies. For example, governments may from time to time establish official rating agencies or credit ratings criteria or procedures for evaluating local issuers. If enacted, any such legislation and regulation could change the competitive landscape in which MIS operates. The legal status of rating agencies has been addressed by courts in various decisions and is likely to be considered and addressed in legal proceedings from time to time in the future. Management of MIS cannot predict whether these or any other proposals will be enacted, the outcome of any pending or possible future legal proceedings, or regulatory or legislative actions, or the ultimate impact of any such matters on the competitive position, financial position or results of operations of Moody's.

INTELLECTUAL PROPERTY

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

Moody's and its affiliates own and control a variety of intellectual property, including but not limited to proprietary information, trademarks, research, software tools and applications, models and methodologies, databases, domain names, and other proprietary materials that, in the aggregate, are of material importance to Moody's business. Management of Moody's believes that each of the trademarks and related corporate names, marks and logos containing the term "Moody's" are of material importance to the Company.

The Company, primarily through MA, licenses certain of its databases, software applications, credit risk models, training courses in credit risk and capital markets, research and other publications and services that contain Intellectual Property to its customers. These licenses are provided pursuant to standard fee-bearing agreements containing customary restrictions and intellectual property protections.

Table of Contents

In addition, Moody's licenses certain technology and other intellectual property rights owned and controlled by others. Specifically, Moody's licenses financial information (such as market and index data, financial statement data, third party research, default data, and security identifiers) as well as software development tools and libraries. The Company obtains such technology and intellectual property rights from generally available commercial sources. Most of such technology and intellectual property is available from a variety of sources. Although certain financial information (particularly security identifiers and certain pricing or index data) is available only from a limited number of sources, Moody's does not believe it is dependent on any one data source for a material aspect of its business.

The Company considers its Intellectual Property to be proprietary, and Moody's relies on a combination of copyright, trademark, trade secret, patent, non-disclosure and other contractual safeguards for protection. Moody's also pursues instances of third-party infringement of its Intellectual Property in order to protect the Company's rights. The Company owns a single, non-material patent. None of the Intellectual Property is subject to a specific expiration date, except to the extent that the copyright in items that the Company authors (such as credit reports, research, and other written opinions) expires pursuant to relevant law, currently 95 years from first publication in the US; and the single patent that Moody's owns expires in 2028.

The names of Moody's products and services referred to herein are trademarks, service marks or registered trademarks or service marks owned by or licensed to Moody's or one or more of its subsidiaries.

EMPLOYEES

As of December 31, 2011 the number of full-time equivalent employees of Moody's was approximately 6,100.

AVAILABLE INFORMATION

Moody's investor relations Internet website is <http://ir.moody's.com/>. Under the "SEC Filings" tab at this website, the Company makes available free of charge its annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports as soon as reasonably practicable after they are filed with, or furnished to, the SEC.

The SEC maintains an internet site that contains annual, quarterly and current reports, proxy and other information statements that the Company files electronically with the SEC. The SEC's internet site is <http://www.sec.gov/>.

EXECUTIVE OFFICERS OF THE REGISTRANT

NAME, AGE AND POSITION

BIOGRAPHICAL DATA

Mark E. Almeida, 52 *President Moody's Analytics* Mr. Almeida has served as President of Moody's Analytics since January 2008. Prior to this position, Mr. Almeida was Senior Vice President of Moody's Corporation from August 2007 to January 2008, Senior Managing Director of the Investor Services Group (ISG) at Moody's Investors Service, Inc. from December 2004 to January 2008 and was Group Managing Director of ISG from June 2000 to December 2004. Mr. Almeida joined Moody's Investors Service, Inc. in April 1988 and has held a variety of positions with the company in both the U.S. and overseas.

Richard Cantor, 54 *Chief Risk Officer*

Mr. Cantor has served as Chief Risk Officer of Moody's Corporation since December 2008 and as Chief Credit Officer of Moody's Investors Service, Inc. since November 2008. From July 2008 to November 2008, Mr. Cantor served as Acting Chief Credit Officer. Prior thereto, Mr. Cantor was Managing Director of Moody's Credit Policy Research Group from June 2001 to July 2008, after serving as Senior Vice President in the Financial Guarantors Rating Group. Mr. Cantor joined Moody's in 1997 from the Federal Reserve Bank of New York, where he served as Assistant Vice President in the Research Group and was Staff Director at the Discount Window. Prior to the Federal Reserve, Mr. Cantor taught Economics at UCLA and Ohio State and has taught on an adjunct basis at the business schools of Columbia University

Table of Contents**Robert Fauber, 41**

*Senior Vice President Corporate
Development*

Mr. Fauber has served as Senior Vice President Corporate Development of Moody's Corporation since April 2009 and as Vice President-Corporate Development since he joined Moody's in September 2005 to April 2009. Prior to joining Moody's, Mr. Fauber served in several roles at Citigroup from 1999 to 2005, including most recently, Director of Planning and Business Development for Citigroup's Alternative Investments division. Prior to that, Mr. Fauber worked as a Director in Corporate Strategy & Business Development for Citigroup and a Vice President and Associate in the Financial Sponsor and Telecom investment banking groups at the firm's Salomon Smith Barney subsidiary. From 1992-1996, Mr. Fauber worked at NationsBank (now Bank of America), working in the middle market commercial banking group and also ran the firm's Global Finance college recruiting program in 1997.

John J. Goggins, 51

*Executive Vice President and General
Counsel*

Mr. Goggins has served as the Company's Executive Vice President and General Counsel since April 2011 and the Company's Senior Vice President and General Counsel from October 2000 until April 2011. Mr. Goggins joined Moody's Investors Service, Inc. in February 1999 as Vice President and Associate General Counsel. Prior thereto, he served as counsel at Dow Jones & Company from 1995 to 1999, where he was responsible for securities, acquisitions and general corporate matters. Prior to Dow Jones, he was an associate at Cadwalader, Wickersham & Taft from 1985 to 1995, where he specialized in mergers and acquisitions.

Linda S. Huber, 53

*Executive Vice President and Chief
Financial Officer*

Ms. Huber has served as the Company's Executive Vice President and Chief Financial Officer since May 2005. Prior thereto, she served as Executive Vice President and Chief Financial Officer at U.S. Trust Company, a subsidiary of Charles Schwab & Company, Inc., from 2003 to 2005. Prior to U.S. Trust, she was Managing Director at Freeman & Co. from 1998 through 2002. She served PepsiCo as Vice President of Corporate Strategy and Development from 1997 until 1998 and as Vice President and Assistant Treasurer from 1994 until 1997. She served as Vice President in the Energy Investment Banking Group at Bankers Trust Company from 1991 until 1994 and as an Associate in the Energy Group at First Boston Corporation from 1986 through 1990. She also held the rank of Captain in the U.S. Army where she served from 1980 to 1984.

Michel Madelain, 56

*President and Chief Operating Officer
Moody's Investors Service*

Mr. Madelain has served as President of Moody's Investors Service Inc. since November 2010 and as Chief Operating Officer since May 2008. Prior to this, Mr. Madelain served as Executive Vice President, Fundamental Ratings from September 2007 to May 2008, with responsibility for all Global Fundamental Ratings, including Corporate Finance, Financial Institutions, Public Finance and Infrastructure Finance. He managed the Financial Institutions group from March 2007 until September 2007. Mr. Madelain served as Group Managing Director, EMEA Corporate Ratings from November 2000 to March 2007 and prior thereto held several Managing Director positions in the U.S. and U.K. Fundamental Rating Groups. Prior to joining Moody's in 1994, Mr. Madelain served as a Partner of Ernst & Young, Auditing Practice. Mr. Madelain is qualified as a Chartered Accountant in France.

Joseph (Jay) McCabe, 61

*Senior Vice President Corporate
Controller*

Mr. McCabe has served as the Company's Senior Vice President Corporate Controller since December 2005. Mr. McCabe joined Moody's in July 2004 as Vice President and Corporate Controller. Before joining the Company, he served as Vice President Corporate Controller at PPL Corporation, an energy and utility holding company, from 1994 to 2003. Prior to PPL Corporation, he served Deloitte & Touche as Partner from 1984 to 1993 and as a member of the firm's audit practice from 1973 to 1984.

Table of Contents**Raymond W. McDaniel, Jr., 54***Chairman and Chief Executive Officer*

Raymond W. McDaniel, Jr., has served as the Chairman and Chief Executive Officer of the Company since April 2005 and serves on the MIS and International Business Development Committees of the Board of Directors. Mr. McDaniel served as the Company's President from October 2004 until April 2005 and the Company's Chief Operating Officer from January 2004 until April 2005. He has served as Chairman and Chief Executive Officer of Moody's Investors Service, Inc., a subsidiary of the Company, since October 2007 and held the additional title of President from November 2001 to August 2007 and December 2008 to November 2010. Mr. McDaniel served as the Company's Executive Vice President from April 2003 to January 2004, and as Senior Vice President, Global Ratings and Research from November 2000 until April 2003. He served as Senior Managing Director, Global Ratings and Research, of Moody's Investors Service from November 2000 until November 2001 and as Managing Director, International from 1996 to November 2000. Mr. McDaniel currently is a Director of John Wiley & Sons, Inc.

Lisa S. Westlake, 50*Senior Vice President and Chief Human Resource Officer*

Ms. Westlake has served as the Company's Senior Vice President and Chief Human Resources Officer since November 2008. Prior to this position, Ms. Westlake served as Vice President Investor Relations from December 2006 to December 2008 and Managing Director Finance from September 2004 to December 2006. Prior to joining the Company, Ms. Westlake was a senior consultant with the Schiff Consulting Group from 2003 to 2004. From 1996 to 2003 Ms. Westlake worked at American Express Company where she held several different positions such as Vice President and Chief Financial Officer for the OPEN Small Business Network, Vice President and Chief Financial Officer for Establishment Services and Vice President and Chief Financial Officer for Relationship Services. From 1989 to 1995 Ms. Westlake held a range of financial management positions at Dun & Bradstreet Corporation and its subsidiary at the time, IMS International. From 1984 to 1987 Ms. Westlake served at Lehman Brothers in both the investment banking and municipal trading areas.

ITEM 1A. RISK FACTORS

The following risk factors and other information included in this annual report on Form 10-K should be carefully considered. The risks and uncertainties described below are not the only ones the Company faces. Additional risks and uncertainties not presently known to the Company or that the Company's management currently deems minor or insignificant also may impair its business operations. If any of the following risks occur, Moody's business, financial condition, operating results and cash flows could be materially adversely affected.

Laws and Regulations Affecting the Credit Rating Industry are Rapidly Evolving and May Negatively Impact the Nature and Economics of the Company's Business

Credit rating agencies are regulated in both the U.S. (by federal, state and local authorities) and in other countries. Over the past few years, many jurisdictions have adopted or proposed new laws and regulations that impact the operation of credit rating agencies and the markets for securities that are rated. Additional laws and regulations have been proposed or are being considered, and further legislation or regulation may be proposed or implemented in the future. Some of the more prominent developments are discussed below or under the section entitled "Regulation" in Part I, Item 1 of this Form 10-K. These laws and regulations are intended to cause, or may result in, increased competition in the credit rating business. In addition, these laws or regulations may cause or result in (i) alternatives to credit ratings, (ii) regulations or restrictions on how information is used in the development or maintenance of credit ratings, (iii) increased regulatory oversight of the credit markets and credit rating agency operation, (iv) limits on the number of years that a credit rating agency can rate securities of a particular issuer, or (v) changes in the pricing of credit ratings. All of these items could result in an increase in costs that Moody's may not be able to pass through to customers and a decrease in the demand for or changes in the use of credit ratings.

New pleading and liability standards that have been adopted in the U.S. and proposed elsewhere may subject credit rating agencies to a greater number of legal proceedings claiming liability for losses suffered by investors on rated securities, may place greater burdens on credit rating agencies to defend themselves, could result in such legal proceedings continuing for a greater period of time before being resolved, and could result in increased uncertainty over and exposure to liability of credit rating agencies. As new laws and regulations applicable to credit ratings and rating agencies rapidly evolve, the costs of compliance are expected to increase, and Moody's may not be able to pass on these costs through the pricing of its services. In addition, there may be greater uncertainty over the scope, interpretation and administration of new laws and regulations, which may increase compliance costs and increase the possibility of fines, penalties or other sanctions (including restrictions on activities) being imposed.

Table of Contents

Given the comparatively recent adoption and the number of additional reforms that have been or are proposed to be adopted, including those under the legislative and regulatory initiatives discussed below, Moody's is unable to accurately assess the future impact of any regulatory changes that may result or the impact on Moody's competitive position, current practices or business prospects. Although these recent and pending legislative and regulatory initiatives apply to rating agencies and credit markets generally, they may affect Moody's in a disproportionate manner. Responding to these developments will increase Moody's fixed and variable costs of operations, perhaps to a degree that is significantly greater than Moody's currently expects, and may materially reduce MIS revenue. Moody's may not be able to pass through or otherwise recoup or offset such costs or lost revenue. These developments may alter MIS's communications with issuers as part of the rating assignment process, alter the manner in which MIS's ratings are developed, assigned and communicated, and decrease demand or affect the manner in which MIS or its customers or users of credit ratings operate, and alter the economics of the credit ratings business, including by restricting or mandating the business models under which a rating agency is permitted to operate. Moody's stock price may also be affected by speculation regarding legislative and regulatory initiatives and their potential impact on Moody's business and by increased uncertainty over potential liability and adverse legal or judicial determinations. Each of these developments increase the costs and legal risk associated with the issuance of credit ratings and may negatively impact Moody's operations or profitability, the Company's ability to compete, or result in changes in the demand for credit ratings, in the manner in which ratings are utilized and in the manner in which Moody's operates in ways that cannot presently be predicted.

In the U.S., MIS is designated as an NRSRO pursuant to SEC regulations adopted under the Reform Act. One of the central tenets of the Reform Act was to encourage competition among rating agencies. The Reform Act established standards for the SEC to have direct jurisdiction over credit rating agencies that seek NRSRO status and to inspect their operations.

In the U.S., one of the tenets of the Financial Reform Act enacted in 2011 is that credit rating agencies play an important role in the financial market and should be subject to enhanced oversight standards that could result in enhanced liability. The Financial Reform Act amends a number of laws and regulations, requires the SEC to adopt a number of rules affecting rating agencies and the use of credit ratings, especially in structured finance markets, and authorizes a number of studies relating to the operations and legal standards applicable to CRAs. Provisions of the Financial Reform Act and other rules that have recently been or may be adopted by the SEC in furtherance of the Financial Reform Act that pose risks to the Company's business include, among others:

heightened compliance standards;

increased disclosure obligations;

provisions seeking to diminish regulatory and investor reliance on credit ratings, including the elimination of SEC rules that include eligibility standards based on credit ratings;

rules potentially mandating disclosure of sensitive issuer information provided to CRAs for the purpose of developing a rating;

a mandate that the SEC study the feasibility of establishing a system in which a utility or a self-regulatory organization assigns NRSROs to determine the credit ratings of structured finance products to address so-called "rating-shopping" by issuers and underwriters of structured financial products; and

changes to the pleading standards and, by repealing Rule 436(g) under the Securities Act, the liability standards under the federal securities laws if a CRA consents to have a rating included in a registration statement or prospectus.

The Financial Reform Act's rescission of Rule 436(g) under the Securities Act, which was an exemption from expert liability under the Securities Act for ratings information included in registration statements, could impact Moody's in a number of ways. SEC rules relating to offerings of asset-backed securities that are registered with the SEC require certain disclosures regarding credit ratings if, as is common in the market for such securities, the issuance or sale of any class of such asset-backed securities is conditioned on the assignment of a rating by one or more rating agencies. As a result of the repeal of Rule 436(g) under the Securities Act and accordingly the imposition of a heightened liability standard that would result from such disclosures, MIS and other credit rating agencies have declined to consent to issuers of such securities

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

making such disclosures regarding their ratings. The staff of the SEC has informally advised issuers of asset-backed securities that, pending further review of rulemaking required under the Financial Reform Act, the SEC staff will not recommend enforcement action if an issuer omits the ratings disclosure required by SEC rules for registered offerings of asset-backed securities. If the SEC staff position were reversed or if SEC rules otherwise were adopted or applied in a manner that resulted in rating agencies being subject to heightened standards of liability in such offerings, it could adversely impact the volume of securities sold in such offerings, demand for MIS's ratings, the pricing structure for ratings issued by MIS and/or Moody's exposure to liability and could have other effects that Moody's is not able to predict, any of which could have a material adverse effect on the Company's business.

In addition, in October 2009, the SEC proposed a rule providing that, if credit ratings are used in connection with an offering of any other type of security that is registered under the Securities Act (which as proposed would include use of a credit rating for certain

Table of Contents

unregistered securities offerings that are subsequently subject to a registered exchange offer), the ratings must be included in the registration statement. If adopted, this proposal, coupled with the Financial Reform Act's rescission of Rule 436(g), would mean that common practices used in the U.S. to market and sell securities in such offerings would have to be altered unless MIS or other credit rating agencies consented to subject themselves to expert liability provisions of the Securities Act with respect to their credit ratings. Adoption of this or a similar rule could impact the volume of securities sold in such offerings, demand for MIS's ratings, the pricing structure for ratings issued by MIS and/or Moody's exposure to liability and could have other effects that Moody's is not able to predict, any of which could have a material adverse effect on the Company's business.

Both the G-8 and the G-20 have sought to analyze and arrive at a consistent approach for addressing various areas of the financial market and have made a variety of recommendations as to regulation of rating agencies and the markets for ratings. Specifically, the G-20 has agreed to require the registration of rating agencies in their home jurisdiction. As a result of the internationally coordinated approach, countries other than the U.S. (which as noted above had already adopted a registration regime for NRSROs) have begun the process of implementing registration regimes for the oversight of CRAs. In particular, the EU adopted a new regulatory framework for rating agencies operating in the EU. The regulation seeks to introduce a common EU regulatory approach to the oversight of CRAs. Its primary objective is to enhance the integrity, transparency, responsibility, governance and reliability of credit rating activities, by establishing conditions for the issuance of credit ratings and rules on the organization and conduct of credit rating agencies, including restrictions on certain activities that are deemed to create a conflict of interest and special requirements for the rating of structured finance instruments. The regulation became fully effective on September 6, 2010. MIS applied for registration in August 2010 and was granted registration in October 2011.

In addition, the European Securities and Market Authority became fully operational in July 2011 and now has direct supervisory authority for CRAs in the EU.

The European Commission published a consultation paper on CRAs at the end of 2010 which covered the following topics:

the potential for increasing the liability or changing the basis of liability of CRAs for their ratings;

the issuer-pay CRA business model;

amending existing regulations to reduce reliance on ratings by governments and regulated industries;

proposed changes to the business model associated with the rating of sovereigns; and

increasing competition among CRAs.

The EU Parliament also published its own report discussing a number of these issues.

In furtherance of the foregoing, the European Commission issued proposed amendments to the existing regulations. If enacted as proposed, the revised regulations, among other things, would:

impose various additional procedural requirements with respect to ratings of sovereign issuers;

require EU member states to adopt laws imposing liability on credit rating agencies for an intentional or grossly negligent failure to abide by the applicable regulations;

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

potentially impose a greater burden of proof on credit rating agencies accused of failing to abide by applicable regulations;

impose rotation requirements on issuers of securities, thereby limiting the number of years a credit rating agency can issue ratings for securities of a particular issuer;

enhance ESMA's role in reviewing rating methodologies; and

impose additional procedural and substantive requirements on the pricing of services.

The foregoing initiatives, if implemented and depending on their terms, could have a significant negative effect on Moody's operations or profitability, ability to compete or the markets for its products and services, including in ways that Moody's presently is unable to predict. In particular, exposure to increased liability under future EU regulation may further increase costs and legal risks associated with the issuance of credit ratings and materially and adversely affect Moody's results of operations. Moody's also believes that the Commission's proposed rotation requirements, if enacted, would lead to a potentially significant decrease in revenue by restricting MIS from continuing to rate issuers that currently pay for ratings and in particular frequent issuers. Compliance with the amended regulations may also increase costs of operations.

In addition to the foregoing, in the wake of the credit crisis, legislative and regulatory bodies in both the US and in other countries have adopted or are studying or pursuing new laws and regulations addressing CRAs and the use of credit ratings, particularly in the area of structured finance securities, and the role of CRAs leading up to the credit crisis.

Table of Contents

Moody's believes that there is still the potential for additional rulemaking that can significantly impact Moody's business. It is likely that other jurisdictions will adopt additional laws or regulations affecting Moody's operations or the markets for its products and services. This could include adopting regulations that affect the need for debt securities to be rated, establish criteria for credit ratings or authorize only certain entities to provide credit ratings. However, Moody's cannot predict the extent of the regulations that may be implemented, or the effect that they may have on Moody's operations or the potential for increased exposure to liability.

Exposure to Litigation Related to Moody's Rating Opinions

Moody's has received subpoenas and inquiries from states attorneys general and governmental authorities as part of ongoing investigations following the credit crisis, and is responding to those inquiries. In addition, Moody's faces a greater amount of litigation than has historically been the case from parties claiming damages relating to ratings actions, as well as other related business practices. Due to the difficult economic times and turbulent markets over the last several years, the market value of credit-dependent instruments has declined and defaults have increased, significantly increasing the number of legal proceedings, including investigations, Moody's is currently facing. These proceedings impose additional expenses on the Company, which may increase over time as these matters progress procedurally, require the attention of senior management to an extent that may significantly reduce their ability to devote time addressing other business issues, and, given the number of these proceedings and significant amount of damages that may be sought, present a greater risk that Moody's may be subject to fines, penalties or damages if Moody's is deemed to have violated any laws or regulations. In jurisdictions outside the U.S., these types of proceedings may increase or become more costly because foreign jurisdictions may not have legal protections or liability standards comparable to those that currently exist in the U.S. (such as protections for the expression of credit opinions as provided by the First Amendment), may adopt legislation potentially imposing liability under specified circumstances and loosening pleading requirements and may pose a greater risk of criminal rather than civil penalties. These risks often are and may continue to be difficult to assess or quantify. Moody's may not have adequate insurance or reserves to cover these risks, and their existence and magnitude often remains unknown for substantial periods of time. Furthermore, to the extent that Moody's is unable to achieve dismissals from the various litigation at an early stage and matters proceed to trial, the aggregate legal defense costs to be incurred by Moody's could increase substantially, regardless of the ultimate outcome.

In addition, as discussed above, the Financial Reform Act revised pleading and liability standards and other provisions potentially subjecting CRAs to increased liability under securities law claims. The Financial Reform Act and regulations that will be adopted as a result of it may result in a material increase in the number of legal proceedings, especially as related to future ratings, and, together with judicial decisions under the Financial Reform Act and under pre-existing legal standards, may increase the potential legal exposure of CRAs. Changes in liability standards, as well as pleading standards, applicable in markets outside the U.S., such as those recently proposed by the European Commission, also could create a greater potential for liability from operating in such markets. The Company believes that adoption of these provisions could negatively impact credit markets, including causing CRAs to cease to issue ratings on certain securities or issuers, increasing the cost of ratings, delaying issuances of ratings and restricting the public availability of ratings, which changes could materially negatively impact the Company's business and prospects. It is possible that implementing changes to the Company's operations to address the changed pleading and liability standards may result in lower revenues and/or increased expenses that the Company may not be able to recoup or offset, which could be material, and the Company may not be successful in avoiding or mitigating the impact of the heightened or changed pleading and liability standards.

Changes in the Volume of Debt Securities Issued in Domestic and/or Global Capital Markets and Changes in Interest Rates and Other Volatility in the Financial Markets

Approximately 58% of MIS's revenue for 2011 was transaction-based, compared to 57% of MIS's revenue in 2010 and 50% of MIS's revenue in 2009. Revenue from rating transactions is dependent on the number and dollar volume of debt securities issued in the capital markets. Accordingly, any conditions that either reduce investor demand for debt securities or reduce issuers' willingness or ability to issue such securities could reduce the number and dollar-equivalent volume of debt issuances for which MIS provides ratings services and thereby have an adverse effect on the fees derived from the issuance of ratings.

A significant disruption in world financial markets, particularly in the credit markets, began in mid-2007, when many credit markets experienced a severe lack of liquidity. This disruption continues to adversely affect our business as the markets struggle to recover. Credit market disruptions, including those resulting from the sovereign debt crisis in Europe, together with the persistent economic slowdown have negatively impacted the volume of debt securities issued in global capital markets and the demand for credit ratings. Future debt issuances could be negatively affected by a sharp increase in long-term interest rates or factors which cause instability or volatility in the global capital markets, such as the recent credit market disruptions resulting from the sovereign debt crises in certain European countries. New debt issuances in the structured finance market are likely to continue to be significantly below peak levels reached in the middle of the past decade. Consequently, the Company has experienced a reduction in the overall demand for rating newly issued debt securities. Changes in the markets for such securities and in the role and regulation of rating agencies may materially adversely affect the Company even if the volume of securities issuances in all sectors recovers to or exceeds those experienced prior to 2007.

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

The timing, nature, extent and sustainability of any recovery in the credit and other financial markets remains uncertain, and there can be no assurance that overall market conditions will improve in the future, or that Moody's financial results will not continue to be

Table of Contents

adversely affected. A sustained period of market decline or weakness, especially if it relates to credit sensitive securities, for which there was historically a high level of demand for ratings, could have a material adverse effect on Moody's business and financial results. Initiatives that the Company has undertaken to reduce costs may not be sufficient and further cost reductions may be difficult or impossible to obtain in the near term, due in part to rent, technology, compliance and other fixed costs associated with some of the Company's operations as well as the need to monitor outstanding ratings. Further, the cost-reduction initiatives undertaken to date could result in strains in the Company's operations if the credit markets and demand for ratings in all sectors return to levels that prevailed prior to mid-2007 or otherwise unexpectedly increase. Other factors that could further reduce investor demand for debt securities or reduce issuers' willingness or ability to issue such securities include increases in interest rates or credit spreads, continued volatility in financial markets or the interest rate environment, significant regulatory, political or economic events, the use of alternative sources of credit including financial institutions and government sources, defaults of significant issuers and other unfavorable market and economic conditions.

Furthermore, issuers of debt securities may elect to issue securities without ratings or securities which are rated or evaluated by non-traditional parties such as financial advisors, rather than traditional credit rating agencies, such as MIS. Changing regulatory considerations and other market developments could negatively affect the demand for credit ratings even if debt security issuances and activities increase. As such, no assurance can be given as to the amount of revenues that may be derived therefrom.

Legal, Economic and Regulatory Risks of Operating in Foreign Jurisdictions

Moody's maintains offices outside the U.S. and derives a significant portion of its revenue from sources outside the U.S. In addition to the regulatory risks discussed above, operations in different countries expose Moody's to a number of legal, economic and regulatory risks such as restrictions on the ability to convert local currency into U.S. dollars and currency fluctuations; the costs of repatriating cash held by entities outside the U.S., U.S. laws affecting overseas operations including domestic and foreign export and import restrictions, tariffs and other trade barriers; different legal or civil liability standards, political and economic instability; the possibility of nationalization, expropriation, price controls and other restrictive governmental actions; longer payment cycles and possible problems in collecting receivables; and potentially adverse tax consequences.

As Moody's derives a significant portion of its revenue from sources outside the U.S., Moody's business also is subject to changes in the economic condition of the various economies outside the U.S. in which it operates. For example, economic developments in the European zone, which is presently experiencing a degree of economic uncertainty, or in Southeast Asia could affect the number of securities offerings undertaken within the particular area, which, in turn, could affect Moody's business.

In its non-U.S. operations, Moody's is subject to regulations applicable under the Office of Foreign Asset Control, the Foreign Corrupt Practices Act (the FCPA) and other anti-corruption laws that generally prohibit U.S. companies and their intermediaries from offering, promising, authorizing or making improper payments to foreign government officials (which may include companies affiliated with foreign governments) for the purpose of obtaining or retaining business. Other countries in which Moody's operates, such as the United Kingdom, have also enacted similar laws. Violations of the FCPA, the U.K. Bribery Act and other anti-corruption laws may result in severe criminal and civil sanctions as well as other penalties and the SEC and U.S. Department of Justice and their counterparts outside the U.S. have increased their enforcement activities with respect to the FCPA and similar laws, increasing the likelihood that a company will face costly investigations or penalties for actual or alleged violations of these laws. Internal controls, policies and procedures and employee training and compliance programs that the Company has implemented to deter prohibited practices may not be effective in prohibiting its employees, contractors or agents from violating or circumventing its policies and the law. If Moody's employees or agents fail to comply with applicable laws or Company policies governing its international operations, the Company may face investigations, prosecutions and other legal proceedings and actions which could result in damage to our reputation as well as civil penalties, administrative remedies and criminal sanctions. Any determination that the Company has violated the FCPA or other similar laws could have a material adverse effect on Moody's financial condition. Compliance with international and U.S. laws and regulations that apply to the Company's international operations increases the cost of doing business in foreign jurisdictions.

In addition to competition from other rating agencies that operate in a number of international jurisdictions and specialized companies that provide ratings for particular types of financial products or issuers (such as A.M. Best Company, Inc., with respect to the insurance industry), in many foreign countries MIS competes with rating agencies that may have a stronger local presence and greater familiarity or a longer operating history in those markets. These local providers or comparable competitors that may emerge in the future may receive support from local governments or other institutions that MIS does not receive, putting MIS at a competitive disadvantage.

Increased Pricing Pressure from Competitors and/or Customers

In the credit rating, research and credit risk management markets, competition for customers and market share has spurred more aggressive tactics by some competitors in areas such as pricing and service, as well as increased competition from non-NRSROs that evaluate debt risk for issuers or investors. At the same time, bankruptcies and consolidation of customers, particularly those involved in structured finance products,

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

and other factors affecting demand may enhance the market power of customers. While Moody's seeks to compete primarily on the basis of the quality of its products and service, if its pricing and services are not sufficiently competitive with

Table of Contents

its current and future competitors, Moody's may lose market share. In addition, one of the central goals of the Reform Act was to encourage competition among rating agencies. The formation of additional NRSROs may increase pricing, as well as other competitive pressures.

Exposure to Reputational and Credibility Concerns

Moody's reputation is one of the key bases on which the Company competes. To the extent that the rating agency business as a whole or Moody's, relative to its competitors, has suffered a loss in credibility in the course of the credit crisis, or, in the future, suffers a loss in credibility, Moody's business could be adversely affected. Factors that may have already affected credibility and could potentially continue to have an impact in this regard include the appearance of a conflict of interest, the performance of securities relative to the rating assigned to such securities, the timing and nature of changes in ratings, adverse publicity as to the ratings process and its implementation with respect to one or more securities, a major compliance failure, publicity associated with ongoing litigation and new laws and regulations and increased criticism by users of ratings, regulators and legislative bodies. These concerns may be disclosed or highlighted in the course of various investigations or lawsuits that have been or may be instituted, through legislative or regulatory hearings or special studies that are mandated by legislation, or through journalists or others attempting to chronicle or report on the recent credit crisis. Operational errors, whether by Moody's or a Moody's competitor, could harm the reputation of the credit rating industry and adversely affect Moody's business.

Introduction of Competing Products or Technologies by Other Companies

The markets for credit ratings, research and credit risk management services are highly competitive. The ability to provide innovative products and technologies that anticipate customers' changing requirements and to utilize emerging technological trends is a key factor in maintaining market share. Competitors may develop quantitative methodologies or related services for assessing credit risk that customers and market participants may deem preferable, more cost-effective or more valuable than the credit risk assessment methods currently employed by Moody's, or may price or market their products in manners that differ from those utilized by Moody's. Customers or others may develop alternative, proprietary systems for assessing credit risk. Such developments could affect demand for Moody's products and its growth prospects. In addition, Moody's growth prospects also could be adversely affected by limitations of its information technologies that fail to provide adequate capacity and capabilities to meet increased demands of producing quality ratings and research products at levels achieved by competitors.

Significant Amount of Intangible Assets

Moody's has a significant amount of intangible assets on its balance sheet consisting of \$642.9 million of goodwill and \$253.6 million of amortizable intangible assets. Approximately 99% of these intangibles reside in the MA business and are allocated to the five reporting units within MA: RD&A; RMS; Training, CSI, and Copal. Failure to achieve business objectives and financial projections in one or all of these reporting units could result in an asset impairment charge which would reduce net income in the period the impairment is recorded. Impairment of goodwill or intangibles would result in a non-cash charge to operating expenses. An impairment would be recorded if the fair value of a reporting unit or asset group which holds goodwill or any intangible assets is less than the carrying amount of its net assets. A significant factor in the determination of the fair value of a reporting unit or asset group is its projected cash flows. Future cash flows of MA are dependent on a variety of factors such as, but not limited to, general economic growth, capital market activity, product innovation, pricing, market share and competition. Changes in these factors or in the conduct of Moody's operations in response to such factors could lead to reduced cash flows resulting in an asset impairment charge.

Possible Loss of Key Employees and Related Compensation Cost Pressures

Moody's success depends in part upon recruiting, retaining and motivating highly skilled, experienced financial analysts and other professionals. Competition for qualified staff in the financial services industry is intense, and Moody's ability to attract staff could be impaired if it is unable to offer competitive compensation and other incentives or if the regulatory environment mandates restrictions on or disclosures about individual employees that would not be necessary in competing analytical industries. Investment banks, investors and competitors may seek to attract analyst talent by providing more favorable working conditions or offering higher compensation than Moody's. Moody's also may not be able to identify and hire employees in some markets outside the U.S. with the required experience or skills to perform sophisticated credit analysis.

The Trading Price of Moody's Stock Could be Affected by Third Party Actions

Ownership of Moody's stock is highly concentrated with a majority of shares held by a few institutional stockholders. Due to this concentrated stockholder base, the trading price of Moody's stock could be affected considerably by actions of significant stockholders to increase or decrease their positions in Moody's stock.

Table of Contents

Moody's Operations and Infrastructure may Malfunction or Fail

Moody's ability to conduct business may be adversely impacted by a disruption in the infrastructure that supports its businesses and the communities in which Moody's is located, including having its headquarters in New York City and offices in major cities worldwide. This may include a disruption involving electrical, communications or other services used by the Company or third parties with or through whom Moody's conducts business, whether due to human error, natural disasters, power loss, telecommunication failures, break-ins, sabotage, computer viruses, intentional acts of vandalism, acts of terrorism or war or otherwise. Moody's efforts to secure and plan for potential disruptions of major operating systems may not be successful. The Company, in a number of instances, relies on third party providers to provide essential services. While the Company believes that such third parties are reliable, the Company, obviously, has less control over the performance of such providers. The Company also does not have fully redundant systems for most of its smaller office locations and low-risk systems, and its disaster recovery plan does not include restoration of non-essential services. If a disruption occurs in one of Moody's locations or systems and its personnel in those locations or those who rely on such systems are unable to utilize other systems or communicate with or travel to other locations, their ability to service and interact with Moody's clients and customers may suffer. The Company's operations also rely on the secure processing, storage and transmission of confidential and other information in its computer systems and networks. The business relies upon and processes a great deal of data through its systems, the security and quality of which must be maintained in order for the business units to perform. Protective measures that Moody's takes may be circumvented or may not be sufficient to guard its computer systems, software and networks from unauthorized access, computer viruses or other malicious events that could have a security impact. If one or more of such events occur, this could jeopardize Moody's or its clients' or counterparties' confidential and other information processed and stored in, and transmitted through, its computer systems and networks, or otherwise cause interruptions or malfunctions in the Company's, its clients', its counterparties' or third parties' operations. Moody's may be required to expend significant additional resources to modify its protective measures or to investigate and remediate vulnerabilities or other exposures, and the Company may be subject to litigation and financial losses that are either not insured against or not fully covered through any insurance maintained by Moody's.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Moody's corporate headquarters is located at 7 World Trade Center at 250 Greenwich Street, New York, New York 10007, with approximately 668,513 square feet of leased space. As of December 31, 2011, Moody's operations were conducted from 18 U.S. offices and 58 non-U.S. office locations, all of which are leased. These properties are geographically distributed to meet operating and sales requirements worldwide. These properties are generally considered to be both suitable and adequate to meet current operating requirements.

ITEM 3. LEGAL PROCEEDINGS

From time to time, Moody's is involved in legal and tax proceedings, governmental investigations, claims and litigation that are incidental to the Company's business, including claims based on ratings assigned by MIS. Moody's is also subject to ongoing tax audits in the normal course of business. Management periodically assesses the Company's liabilities and contingencies in connection with these matters based upon the latest information available. Moody's discloses material pending legal proceedings pursuant to SEC rules and other pending matters as it may determine to be appropriate.

Following the events in the U.S. subprime residential mortgage sector and the credit markets more broadly over the last several years, MIS and other credit rating agencies are the subject of intense scrutiny, increased regulation, ongoing investigation, and civil litigation. Legislative, regulatory and enforcement entities around the world are considering additional legislation, regulation and enforcement actions, including with respect to MIS's compliance with newly imposed regulatory standards. Moody's has received subpoenas and inquiries from states attorneys general and other governmental authorities and is responding to such investigations and inquiries.

In addition, the Company is facing litigation from market participants relating to the performance of MIS rated securities. Although Moody's in the normal course experiences such litigation, the volume and cost of defending such litigation has significantly increased following the events in the U.S. subprime residential mortgage sector and the credit markets more broadly over the last several years.

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

On June 27, 2008, the Brockton Contributory Retirement System, a purported shareholder of the Company's securities, filed a purported shareholder derivative complaint on behalf of the Company against its directors and certain senior officers, and the Company as nominal defendant, in the Supreme Court of the State of New York, County of New York. The plaintiff asserts various causes of action relating to the named defendants' oversight of MIS's ratings of RMBS and constant-proportion debt obligations, and their participation

Table of Contents

in the alleged public dissemination of false and misleading information about MIS's ratings practices and/or a failure to implement internal procedures and controls to prevent the alleged wrongdoing. The plaintiff seeks compensatory damages, restitution, disgorgement of profits and other equitable relief. On July 2, 2008, Thomas R. Flynn, a purported shareholder of the Company's securities, filed a similar purported shareholder derivative complaint on behalf of the Company against its directors and certain senior officers, and the Company as nominal defendant, in the Supreme Court of the State of New York, County of New York, asserting similar claims and seeking the same relief. The cases have been consolidated and plaintiffs filed an amended consolidated complaint in November 2008. The Company removed the consolidated action to the United States District Court for the Southern District of New York in December 2008. In January 2009, the plaintiffs moved to remand the case to the Supreme Court of the State of New York, which the Company opposed. On February 23, 2010, the court issued an opinion remanding the case to the Supreme Court of New York. On October 30, 2008, the Louisiana Municipal Police Employees Retirement System, a purported shareholder of the Company's securities, also filed a shareholder derivative complaint on behalf of the Company against its directors and certain officers, and the Company as a nominal defendant, in the U.S. District Court for the Southern District of New York. This complaint also asserts various causes of action relating to the Company's ratings of RMBS, CDO and constant-proportion debt obligations, and named defendants' participation in the alleged public dissemination of false and misleading information about MIS's ratings practices and/or a failure to implement internal procedures and controls to prevent the alleged wrongdoing. On December 9, 2008, Rena Nadoff, a purported shareholder of the Company, filed a shareholder derivative complaint on behalf of the Company against its directors and its CEO, and the Company as a nominal defendant, in the Supreme Court of the State of New York. The complaint asserts a claim for breach of fiduciary duty in connection with alleged overrating of asset-backed securities and underrating of municipal securities. On October 20, 2009, the Company moved to dismiss or stay the action in favor of related federal litigation. On January 26, 2010, the court entered a stipulation and order, submitted jointly by the parties, staying the Nadoff litigation pending coordination and prosecution of similar claims in the above and below described federal derivative actions. On July 6, 2009, W. A. Sokolowski, a purported shareholder of the Company, filed a purported shareholder derivative complaint on behalf of the Company against its directors and current and former officers, and the Company as a nominal defendant, in the United States District Court for the Southern District of New York. The complaint asserts claims relating to alleged mismanagement of the Company's processes for rating structured finance transactions, alleged insider trading and causing the Company to buy back its own stock at artificially inflated prices.

Two purported class action complaints have been filed by purported purchasers of the Company's securities against the Company and certain of its senior officers, asserting claims under the federal securities laws. The first was filed by Raphael Nach in the U.S. District Court for the Northern District of Illinois on July 19, 2007. The second was filed by Teamsters Local 282 Pension Trust Fund in the U.S. District Court for the Southern District of New York on September 26, 2007. Both actions have been consolidated into a single proceeding entitled *In re Moody's Corporation Securities Litigation* in the U.S. District Court for the Southern District of New York. On June 27, 2008, a consolidated amended complaint was filed, purportedly on behalf of all purchasers of the Company's securities during the period February 3, 2006 through October 24, 2007. Plaintiffs allege that the defendants issued false and/or misleading statements concerning the Company's business conduct, business prospects, business conditions and financial results relating primarily to MIS's ratings of structured finance products including RMBS, CDO and constant-proportion debt obligations. The plaintiffs seek an unspecified amount of compensatory damages and their reasonable costs and expenses incurred in connection with the case. The Company moved for dismissal of the consolidated amended complaint in September 2008. On February 23, 2009, the court issued an opinion dismissing certain claims and sustaining others. On January 22, 2010, plaintiffs moved to certify a class of individuals who purchased Moody's Corporation common stock between February 3, 2006 and October 24, 2007, which the Company opposed. On March 31, 2011, the court issued an opinion denying plaintiffs' motion to certify the proposed class. On April 14, 2011, plaintiffs filed a petition in the United States Court of Appeals for the Second Circuit seeking discretionary permission to appeal the decision. The Company filed its response to the petition on April 25, 2011. On July 20, 2011, the Second Circuit issued an order denying plaintiffs' petition for leave to appeal.

For claims, litigation and proceedings not related to income taxes, where it is both probable that a liability is expected to be incurred and the amount of loss can be reasonably estimated, the Company records liabilities in the consolidated financial statements and periodically adjusts these as appropriate. In other instances, because of uncertainties related to the probable outcome and/or the amount or range of loss, management does not record a liability but discloses the contingency if significant. As additional information becomes available, the Company adjusts its assessments and estimates of such matters accordingly. In view of the inherent difficulty of predicting the outcome of litigation, regulatory, enforcement and similar matters and contingencies, particularly where the claimants seek large or indeterminate damages or where the parties assert novel legal theories or the matters involve a large number of parties, the Company cannot predict what the eventual outcome of the pending matters will be or the timing of any resolution of such matters. The Company also cannot predict the impact (if any) that any such matters may have on how its business is conducted, on its competitive position or on its financial position, results of operations or cash flows. As the process to resolve the pending matters referred to above progresses, management will continue to review the latest information available and assess its ability to predict the outcome of such matters and the effects, if any, on its operations and financial condition. However, in light of the inherent uncertainties involved in these matters, the large or indeterminate damages sought in some of them and the novel theories of law asserted, an estimate of the

Table of Contents

range of possible losses cannot be made at this time. For income tax matters, the Company employs the prescribed methodology of Topic 740 of the ASC which requires a company to first determine whether it is more-likely-than-not (defined as a likelihood of more than fifty percent) that a tax position will be sustained based on its technical merits as of the reporting date, assuming that taxing authorities will examine the position and have full knowledge of all relevant information. A tax position that meets this more-likely-than-not threshold is then measured and recognized at the largest amount of benefit that is greater than fifty percent likely to be realized upon effective settlement with a taxing authority.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

Table of ContentsPART II

ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED SHAREHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Information in response to this Item is set forth under the captions below.

MOODY'S PURCHASES OF EQUITY SECURITIES

For the Three Months Ended December 31, 2011

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Approximate Dollar Value of Shares That May yet be Purchased Under the Program (2)
October 1 - 31	1,642	\$		\$ 873.8 million
November 1 - 30		\$		\$ 873.8 million
December 1 - 31	9	\$		\$ 873.8 million
Total	1,651	\$		

(1) Includes the surrender to the Company of 1,642 shares of common stock in October and 9 shares of common stock in December to satisfy tax withholding obligations in connection with the vesting of restricted stock issued to employees.

(2) As of the last day of each of the months. On July 30, 2007 the Company's Board authorized a \$2.0 billion share repurchase program which the Company began utilizing in January 2008 upon completion of the June 2006 authorization. There is no established expiration date for the remaining authorization. During the fourth quarter of 2011, Moody's issued 0.4 million shares under employee stock-based compensation plans.

Table of Contents**COMMON STOCK INFORMATION AND DIVIDENDS**

The Company's common stock trades on the New York Stock Exchange under the symbol MCO. The table below indicates the high and low sales price of the Company's common stock and the dividends declared and paid for the periods shown. The number of registered shareholders of record at January 31, 2012 was 3,039. A substantially greater number of the Company's common stock is held by beneficial holders whose shares are held of record by banks, brokers and other financial institutions.

	Price Per Share		Dividends Per Share	
	High	Low	Declared	Paid
2011:				
First quarter	\$ 34.74	\$ 26.49	\$	\$ 0.115
Second quarter	41.93	34.26	0.14	0.14
Third quarter	40.28	26.79	0.14	0.14
Fourth quarter	37.15	28.29	0.30	0.14
Year ended December 31, 2011			\$ 0.58	\$ 0.535
2010:				
First quarter	\$ 31.04	\$ 26.12	\$	\$ 0.105
Second quarter	30.31	18.50	0.105	0.105
Third quarter	26.13	19.46	0.105	0.105
Fourth quarter	28.93	24.82	0.22	0.105
Year Ended December 31, 2010			\$ 0.43	\$ 0.42

During 2009, the Company paid a quarterly dividend of \$0.10 per share of Moody's common stock in each of the quarters, resulting in dividends paid per share during the year ended December 31, 2009 of \$0.40.

On December 13, 2011, the Board of the Company approved the declaration of a quarterly dividend of \$0.16 per share of Moody's common stock, payable on March 10, 2012 to shareholders of record at the close of business on February 20, 2012. The continued payment of dividends at the rate noted above, or at all, is subject to the discretion of the Board.

EQUITY COMPENSATION PLAN INFORMATION

The table below sets forth, as of December 31, 2011, certain information regarding the Company's equity compensation plans.

Plan Category	Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights (a)	Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights ⁽²⁾ (b)	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (excluding Securities Reflected in Column (a)) (c)
Equity compensation plans approved by security holders	21,616,127 ⁽¹⁾	\$ 39.60	13,790,885 ⁽³⁾
Equity compensation plans not approved by security holders		\$	
Total	21,616,127	\$ 39.60	13,790,885

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

- (1) Includes 16,863,860 options and unvested restricted shares outstanding under the Company's 2001 Key Employees' Stock Incentive Plan, 3,241,536 options and unvested restricted shares outstanding under the Company's 1998 Key Employees' Stock Incentive Plan, and 53,489 options and unvested restricted shares outstanding under the 1998 Non-Employee Directors' Stock Incentive Plan. This number also includes a maximum of 1,457,242 performance shares outstanding under the Company's 2001 Key Employees' Stock Incentive Plan, which is the maximum number of shares issuable pursuant to performance share awards assuming the maximum payout at 200% of the target award.
- (2) Does not reflect unvested restricted shares or performance share awards included in column (a) because these awards have no exercise price.

Table of Contents

- (3) Includes 10,509,412 shares available for issuance as options, shares of restricted stock, performance shares or other stock-based awards under the 2001 Stock Incentive Plan and 126,678 shares available for issuance as options, shares of restricted stock or performance shares under the 1998 Directors Plan, and 3,154,795 shares available for issuance under the Company's Employee Stock Purchase Plan. No new grants may be made under the 1998 Stock Incentive Plan, which expired by its terms in June 2008.

PERFORMANCE GRAPH

The following graph compares the total cumulative shareholder return of the Company to the performance of Standard & Poor's 500 Stock Composite Index and the Russell 3000 Financial Services Index. Both of the aforementioned indexes are easily accessible to the Company's shareholders in newspapers, the internet and other readily available sources for purposes of the following graph.

The comparison assumes that \$100.00 was invested in the Company's common stock and in each of the foregoing indices on December 31, 2006. The comparison also assumes the reinvestment of dividends, if any. The total return for the Company's common stock was (48%) during the performance period as compared with a total return during the same period of (50%) for the Russell 3000 Financial Services Index and (1%) for the S&P 500 Composite Index.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This discussion and analysis of financial condition and results of operations should be read in conjunction with the Moody's Corporation consolidated financial statements and notes thereto included elsewhere in this annual report on Form 10-K.

This MD&A contains Forward-Looking Statements. See **Forward-Looking Statements** commencing on page 59 and Item 1A. **Risk Factors** commencing on page 16 for a discussion of uncertainties, risks and other factors associated with these statements.

THE COMPANY

Moody's is a provider of (i) credit ratings, (ii) credit and economic related research, data and analytical tools, (iii) risk management software, (iv) quantitative credit risk measures, credit portfolio management solutions, training and financial credentialing and certification services and (v) outsourced research and analytical services to institutional customers. Moody's operates in two reportable segments: MIS and MA.

MIS, the credit rating agency, publishes credit ratings on a wide range of debt obligations and the entities that issue such obligations in markets worldwide. Revenue is derived from the originators and issuers of such transactions who use MIS ratings in the distribution of their debt issues to investors.

The MA segment, which includes all of the Company's non-rating commercial activities, develops a wide range of products and services that support the risk management activities of institutional participants in global financial markets. Within its RD&A business, MA distributes investor-oriented research and data developed by MIS as part of its ratings process, including in-depth research on major debt issuers, industry studies and commentary on topical credit related events. The RD&A business also produces and provides economic research and credit data and analytical tools such as quantitative credit risk scores. Within its RMS business, MA provides both economic and regulatory capital risk management software solutions. Within its professional services business it provides quantitative credit risk measures, credit portfolio management solutions, training, financial credentialing and certification services as well as outsourced research and analytical services to institutional investors.

Moody's purchased CSI and Copal in November 2010 and 2011, respectively, which are currently separate reporting units within MA and for which revenues are reported within the professional services LOB. Moody's purchased B&H in December 2011, which is currently part of the RMS reporting unit and LOB within MA.

CRITICAL ACCOUNTING ESTIMATES

Moody's discussion and analysis of its financial condition and results of operations are based on the Company's consolidated financial statements, which have been prepared in accordance with GAAP. The preparation of these financial statements requires Moody's to make estimates and judgments that affect reported amounts of assets and liabilities and related disclosures of contingent assets and liabilities at the dates of the financial statements and revenue and expenses during the reporting periods. These estimates are based on historical experience and on other assumptions that are believed to be reasonable under the circumstances. On an ongoing basis, Moody's evaluates its estimates, including those related to revenue recognition, accounts receivable allowances, contingencies, goodwill and intangible assets, restructuring liabilities, pension and other post-retirement benefits, UTBs and stock-based compensation. Actual results may differ from these estimates under different assumptions or conditions. The following accounting estimates are considered critical because they are particularly dependent on management's judgment about matters that are uncertain at the time the accounting estimates are made and changes to those estimates could have a material impact on the Company's consolidated results of operations or financial condition.

Revenue Recognition

Revenue is recognized when persuasive evidence of an arrangement exists, delivery has occurred or the services have been provided and accepted by the customer when applicable, fees are determinable and the collection of resulting receivables is considered probable.

In October 2009, the FASB issued ASU No. 2009-13, **Multiple-Deliverable Revenue Arrangements** (ASU 2009-13). The standard changes the requirements for establishing separate units of accounting in a multiple element arrangement and requires the allocation of arrangement consideration based on the relative selling price of each deliverable. The Company has adopted ASU 2009-13 on a prospective basis for applicable transactions originating or materially modified on or after January 1, 2010. If applied in the same manner to the year ended December 31, 2009, ASU 2009-13 would not have had a material impact on net revenue reported for both its MIS and MA segments in terms of the timing and pattern of revenue recognition. The adoption of ASU 2009-13 did not have a significant effect on the Company's net revenue in the period of adoption and is also not expected to have a significant effect on the

Table of Contents

Company's net revenue in periods after the initial adoption when applied to multiple element arrangements based on the currently anticipated business volume and pricing.

For 2010 and future periods, pursuant to the guidance of ASU 2009-13, when a sales arrangement contains multiple deliverables, the Company allocates revenue to each deliverable based on its relative selling price which is determined based on its vendor specific objective evidence if available, third party evidence if VSOE is not available, or estimated selling price if neither VSOE nor TPE is available.

The Company's products and services will generally continue to qualify as separate units of accounting under ASU 2009-13. The Company evaluates each deliverable in an arrangement to determine whether it represents a separate unit of accounting. A deliverable constitutes a separate unit of accounting when it has stand-alone value to the customers and if the arrangement includes a customer refund or return right relative to the delivered item, the delivery and performance of the undelivered item is considered probable and substantially in the Company's control. In instances where the aforementioned criteria are not met, the deliverable is combined with the undelivered items and revenue recognition is determined as one single unit.

The Company determines whether its selling price in a multi-element transaction meets the VSOE criteria by using the price charged for a deliverable when sold separately. In instances where the Company is not able to establish VSOE for all deliverables in a multiple element arrangement, which may be due to the Company infrequently selling each element separately, not selling products within a reasonably narrow price range, or only having a limited sales history, the Company attempts to establish TPE for deliverables. The Company determines whether TPE exists by evaluating largely similar and interchangeable competitor products or services in standalone sales to similarly situated customers. However, due to the difficulty in obtaining third party pricing, possible differences in the Company's market strategy from that of its peers and the potential that products and services offered by the Company may contain a significant level of differentiation and/or customization such that the comparable pricing of products with similar functionality cannot be obtained, the Company generally is unable to reliably determine TPE. Based on the selling price hierarchy established by ASU 2009-13, when the Company is unable to establish selling price using VSOE or TPE, the Company will establish an ESP. ESP is the price at which the Company would transact a sale if the product or service were sold on a stand-alone basis. The Company establishes its best estimate of ESP considering internal factors relevant to its pricing practices such as costs and margin objectives, standalone sales prices of similar products, percentage of the fee charged for a primary product or service relative to a related product or service, and customer segment and geography. Additional consideration is also given to market conditions such as competitor pricing strategies and market trend. The Company reviews its determination of VSOE, TPE and ESP on an annual basis or more frequently as needed.

In the MIS segment, revenue attributed to initial ratings of issued securities is recognized when the rating is issued. Revenue attributed to monitoring of issuers or issued securities is recognized ratably over the period in which the monitoring is performed, generally one year. In the case of commercial mortgage-backed securities, derivatives, international residential mortgage-backed and asset-backed securities, issuers can elect to pay the monitoring fees upfront. These fees are deferred and recognized over the future monitoring periods based on the expected lives of the rated securities, which ranged from two to 51 years at December 31, 2011. At December 31, 2011, 2010 and 2009, deferred revenue related to these securities was approximately \$79 million, \$76 million and \$78 million, respectively.

Multiple element revenue arrangements in the MIS segment are generally comprised of an initial rating and the related monitoring service. Beginning January 1, 2010, in instances where monitoring fees are not charged for the first year monitoring effort, fees are allocated to the initial rating and monitoring services based on the relative selling price of each service to the total arrangement fees. The Company generally uses ESP in determining the selling price for its initial ratings as the Company rarely sells initial ratings separately without providing related monitoring services and thus is unable to establish VSOE or TPE for initial ratings. Prior to January 1, 2010 and pursuant to the previous accounting standards, for these types of arrangements the initial rating fee was first allocated to the monitoring service determined based on the estimated fair market value of monitoring services, with the residual amount allocated to the initial rating. Under ASU 2009-13 this practice can no longer be used for non-software deliverables.

MIS estimates revenue for ratings of commercial paper for which, in addition to a fixed annual monitoring fee, issuers are billed quarterly based on amounts outstanding. Revenue is accrued each quarter based on estimated amounts outstanding and is billed when actual data is available. The estimate is determined based on the issuers' most recent reported quarterly data. At December 31, 2011, 2010 and 2009, accounts receivable included approximately \$24 million, \$25 million and \$27 million, respectively, related to accrued commercial paper revenue. Historically, MIS has not had material differences between the estimated revenue and the actual billings. Furthermore, for certain annual monitoring services, fees are not invoiced until the end of the annual monitoring period and revenue is accrued ratably over the monitoring period.

In the MA segment, products and services offered by the Company include software licenses and related maintenance, subscriptions, and professional services. Revenue from subscription based products, such as research and data subscriptions and certain software-based credit risk management subscription products, is recognized ratably over the related subscription period, which is principally one year. Revenue from sale of perpetual licenses of credit processing software is generally recognized at the time the product master or

Table of Contents

first copy is delivered or transferred to and accepted by the customer. Software maintenance revenue is recognized ratably over the annual maintenance period. Revenue from services rendered within the professional services line of business is generally recognized as the services are performed. If uncertainty exists regarding customer acceptance of the product or service, revenue is not recognized until acceptance occurs. A large portion of annual research and data subscriptions and annual software maintenance are invoiced in the months of November, December and January.

Products and services offered within the MA segment are sold either stand-alone or together in various combinations. In instances where a multiple element arrangement includes software and non-software deliverables, revenue is allocated to the non-software deliverables and to the software deliverables, as a group, using the relative selling prices of each of the deliverables in the arrangement based on the aforementioned selling price hierarchy. Revenue is recognized for each element based upon the conditions for revenue recognition noted above.

If the arrangement contains more than one software deliverable, the arrangement consideration allocated to the software deliverables as a group is allocated to each software deliverable using VSOE. In the instances where the Company is not able to determine VSOE for all of the deliverables of an arrangement, the Company allocates the revenue to the undelivered elements equal to its VSOE and the residual revenue to the delivered elements. If the Company is unable to determine VSOE for an undelivered element, the Company defers all revenue allocated to the software deliverables until the Company has delivered all of the elements or when VSOE has been determined for the undelivered elements.

Prior to January 1, 2010 and pursuant to the previous accounting standards, the Company allocated revenue in a multiple element arrangement to each deliverable based on its relative fair value, or for software elements, based on VSOE. If the fair value was not available for an undelivered element, the revenue for the entire arrangement was deferred.

Accounts Receivable Allowance

Moody's records an allowance for estimated future adjustments to customer billings as a reduction of revenue, based on historical experience and current conditions. Such amounts are reflected as additions to the accounts receivable allowance. Additionally, estimates of uncollectible accounts are recorded as bad debt expense and are reflected as additions to the accounts receivable allowance. Billing adjustments and uncollectible account write-offs are charged against the allowance. Moody's evaluates its accounts receivable allowance by reviewing and assessing historical collection and adjustment experience and the current aging status of customer accounts. Moody's also considers the economic environment of the customers, both from an industry and geographic perspective, in evaluating the need for allowances. Based on its analysis, Moody's adjusts its allowance as considered appropriate in the circumstances. This process involves a high degree of judgment and estimation and could involve significant dollar amounts. Accordingly, Moody's results of operations can be affected by adjustments to the allowance. Management believes that the allowance for uncollectible accounts receivable is adequate to cover anticipated adjustments and write-offs under current conditions. However, significant changes in any of the above factors, or actual write-offs or adjustments that differ from the estimated amounts could impact the Company's consolidated results of operations.

Contingencies

Accounting for contingencies, including those matters described in the Contingencies section of this MD&A, commencing on page 57 is highly subjective and requires the use of judgments and estimates in assessing their magnitude and likely outcome. In many cases, the outcomes of such matters will be determined by third parties, including governmental or judicial bodies. The provisions made in the consolidated financial statements, as well as the related disclosures, represent management's best estimates of the then current status of such matters and their potential outcome based on a review of the facts and in consultation with outside legal counsel where deemed appropriate. The Company would record a material loss contingency in its financial statements if the loss is both probable of occurring and the loss can be reasonably estimated. The Company regularly reviews contingencies and as new information becomes available may, in the future, adjust its associated liabilities.

Goodwill and Other Acquired Intangible Assets

Moody's evaluates its goodwill for impairment at the reporting unit level, defined as an operating segment or one level below an operating segment, annually as of November 30 or more frequently if impairment indicators arise in accordance with ASC Topic 350. These impairment indicators could include significant events or circumstances that would reduce the fair value of a reporting unit below its carrying value. These events or circumstances could include a significant change in the business climate, legal factors, operating performance indicators, competition or sale or disposition of a significant portion of a reporting unit.

At November 30, 2011, the Company had six primary reporting units: one in MIS that encompasses all of Moody's ratings operations and five reporting units within MA: RD&A, RMS, training, CSI and Copal. The RD&A reporting unit encompasses the distribution of investor-oriented research and data developed by MIS as part of its ratings process, in-depth research on major debt issuers, industry studies, economic research

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

and commentary on topical events and credit analytic tools. The RMS reporting unit consists of credit risk management and compliance software that is sold on a license or subscription basis as well as related advisory services for

Table of Contents

implementation and maintenance. The training reporting unit consists of the portion of the MA business that offers both credit training as well as other professional development training. In November 2010, the Company acquired CSI, which was analyzed separately as its own reporting unit for the annual goodwill impairment assessment as of November 30, 2011 as the entity has not yet been integrated with one of the aforementioned MA reporting units. In the fourth quarter of 2011, the Company acquired Copal which is deemed to be separate reporting unit at December 31, 2011. Additionally, in December 2011, the Company acquired B&H which is part of the RMS reporting unit.

In 2011, the FASB issued an ASU which permits an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount before proceeding with a quantitative assessment. The Company has adopted the provisions of this ASU and accordingly, the Company evaluates the recoverability of goodwill using a three-step impairment test approach at the reporting unit level. In the first step, the Company assesses various qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit may be less than its carrying amount. If a determination is made that, based on the qualitative factors, an impairment does not exist, the Company is not required to perform further testing. If the aforementioned qualitative assessment results in the Company concluding that it is more likely than not that the fair value of a reporting unit may be less than its carrying amount, the fair value of the reporting unit is compared to its carrying value including goodwill. If the fair value of the reporting unit exceeds the carrying value of the net assets assigned to that unit, goodwill is not impaired and the Company is not required to perform further testing. If the fair value of the reporting unit is less than the carrying value, the Company must perform a third step of the impairment test to determine the implied fair value of the reporting unit's goodwill. The implied fair value of the goodwill is determined based on the difference between the fair value of the reporting unit and the net fair value of the identifiable assets and liabilities of the reporting unit. If the implied fair value of the goodwill is less than the carrying value, the difference is recognized as an impairment charge. For the reporting units where the Company is consistently able to conclude on impairment using only a qualitative approach, the Company's accounting policy is to perform the second step of the aforementioned goodwill impairment assessment at least once every three years.

Determining the fair value of a reporting unit or an indefinite-lived acquired intangible asset involves the use of significant estimates and assumptions. These estimates and assumptions include revenue growth rates and operating margins used to calculate projected future cash flows, risk-adjusted discount rates, future economic and market conditions, and appropriate market comparables. The Company bases its fair value estimates on assumptions believed to be reasonable. However, as these estimates and assumptions are unpredictable and inherently uncertain, actual future results may differ from these estimates. In addition, the Company also makes certain judgments and assumptions in allocating shared assets and liabilities to determine the carrying values for each of its reporting units.

Goodwill is assigned to a reporting unit at the date when an acquisition is integrated into one of the established reporting units, and is based on which reporting unit is expected to benefit from the synergies of the acquisition. Other assets and liabilities, including applicable corporate assets, are allocated to the extent they are related to the operation of respective reporting units.

The Company performed a qualitative analysis as of November 30, 2011 on all reporting units excluding Copal, which was acquired in the fourth quarter of 2011 and as such, its purchase price represents the fair value of the net assets acquired. The qualitative assessment considered the impact of various macroeconomic conditions as well as factors specific to the reporting unit that could impact future cash flows. The most significant estimates in these qualitative assessments are projected results for each reporting unit and the WACC.

Based upon the aforementioned qualitative assessment, the Company determined that for all of its reporting units excluding its training reporting unit, it was not more likely than not that the fair value of a reporting unit was less than its carrying amount. In addition to analyzing macroeconomic factors that could potentially impact the cash flows of the reporting units, the Company analyzed the growth rates and the WACC for each reporting unit, noting that changes in the assumptions from those used as of November 30, 2010 would be favorable to the reporting unit's valuation. Accordingly, no quantitative test was performed on these reporting units. For the training reporting unit, the Company's projected cash flows for this reporting unit were slightly lower than projected in 2010 primarily due to macroeconomic uncertainties in the U.S. and EMEA. As a result, for the training reporting unit, the Company proceeded to step two of the impairment test more fully described above. Based on the result of this test, the Company does not believe that the goodwill relating to its training reporting unit is at risk of impairment as the fair value for the reporting unit is substantially in excess of its carrying value.

Table of Contents

The following table identifies the amount of goodwill allocated to each reporting unit as of December 31, 2011 as well as the amount by which the net assets of each reporting unit would exceed the fair value under Step 2 of the goodwill impairment test as prescribed in ASC Topic 350, assuming hypothetical reductions in their fair values as of November 30, 2010 for all reporting units excluding the training reporting unit. For these reporting units, the Company has deemed their fair values at November 30, 2010 to approximate their fair values at November 30, 2011 based on the qualitative assessment described above. The sensitivity analysis for the training reporting unit is shown as of November 30, 2011:

	Goodwill	Sensitivity Analysis			
		Deficit Caused by a Hypothetical Reduction to Fair Value			
		10%	20%	30%	40%
MIS	\$ 13.9	\$	\$	\$	\$
RD&A	157.9				
RMS	209.6				
Training	17.7			(0.5)	(3.5)
CSI	104.7	*	*	*	*
Copal	139.1	*	*	*	*
Totals	\$ 642.9	\$	\$	\$ (0.5)	\$ (3.5)

*Copal was excluded from the sensitivity analysis in the table above as well as the sensitivity analyses on the WACC and future cash flow assumptions discussed below as it was acquired in the fourth quarter of 2011. Accordingly, the carrying value of the net assets acquired approximates their fair value at November 30, 2011. Additionally, CSI is excluded from the aforementioned analyses as this acquisition occurred subsequent to the date of the last quantitative goodwill test. For this reporting unit, the Company utilized a qualitative assessment to determine the likelihood of its goodwill being impaired in 2011 and as discussed above, there was no indication of potential impairment based on the assessment. B&H was acquired subsequent to the annual assessment of potential impairment to goodwill which is performed as of November 30. Accordingly, B&H is also excluded from this sensitivity analysis.

The following is a discussion regarding the Company's methodology for determining the fair value of its reporting units at November 30, 2010 (excluding the training reporting unit for which a quantitative test was performed as of November 30, 2011), which was the last date that the Company performed a quantitative test to assess the potential impairment of goodwill. Assumptions for deriving the fair value of the training reporting unit have been updated as of November 30, 2011. This discussion excludes B&H, Copal and CSI which have not yet been subject to a full quantitative impairment analysis as of December 31, 2011 due to the timing of the acquisitions of these entities:

The fair value of each reporting unit was estimated using a discounted cash flow methodology. The results of the DCF were evaluated against comparable public company and precedent transaction multiples in order to assess the reasonableness of the DCF fair values. The DCF analysis requires significant judgments regarding the derivation of fair value, including estimation of future operating results and cash flows of each reporting unit, which is based on internal budgets and strategic plans, expected long-term growth rates, terminal values, weighted average cost of capital and the effects of external factors and market conditions. Changes in these estimates and assumptions could materially affect the determination of the fair value and goodwill impairment for each reporting unit which could result in an impairment charge to reduce the carrying value of goodwill, which could be material to the Company's financial position and results of operations. Moody's allocates newly acquired goodwill to reporting units based on the reporting unit expected to benefit from the acquisition. The Company evaluates its reporting units on an annual basis, or more frequently if there are changes in the reporting structure of the Company due to acquisitions or realignments.

The following discusses the key assumptions utilized in the discounted cash flow valuation methodology which requires significant management judgment:

WACC The WACC is the rate to discount each reporting unit's estimated future cash flows. The WACC is calculated based on the proportionate weighting of the cost of debt and equity. The cost of equity is based on a risk-free interest rate, an equity risk factor which is derived from public companies similar to the reporting unit and which captures the perceived risks and uncertainties associated with the reporting unit's cash flows. The cost of debt component is calculated as the weighted average cost associated with all of the Company's outstanding borrowings as of the date of the impairment test and was immaterial to the computation of the WACC. The cost of debt and equity is weighted based on the debt to market capitalization ratio of publicly traded companies with similarities to the reporting unit being tested. The WACC for all reporting units ranged from 9% to 12% in the last quantitative assessment performed. Differences in the WACC used between reporting units is due primarily to distinct risks and uncertainties regarding the cash flows of the different reporting units. A sensitivity analysis of the WACC was performed on all reporting units. An increase in the WACC of one percentage point for each of the

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

reporting units would not have resulted in the carrying value of the reporting unit exceeding its respective estimated fair value under step one of the goodwill impairment test as prescribed in ASC Topic 350.

Table of Contents

Future cash flow assumptions The projections for future cash flows utilized in the models are derived from historical experience and assumptions regarding future growth and profitability of each reporting unit. These projections are consistent with the Company's operating and strategic plan. Cash flows for each of the next five years subsequent to the date of the last quantitative assessment were estimated based on annual revenue growth rates ranging from 4% to 19%. The growth rates assumed a gradual increase in revenue from financial service customers based on a continued improvement in the global economy and capital markets which began in the second half of 2009. Beyond five years a terminal value was determined using a perpetuity growth rate based on inflation and real GDP growth rates. A sensitivity analysis of the growth rates was performed on all reporting units. A decrease in the growth rates used in the discounted cash flow calculation of 10% for each of the reporting units would not have resulted in the carrying value of the reporting unit exceeding its respective estimated fair value under step one of the goodwill impairment test as prescribed in ASC Topic 350.

Amortizable intangible assets are reviewed for recoverability whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. There were no such events or changes during 2011 that would indicate that the carrying amount of amortizable intangible assets in any of the Company's reporting units may not be recoverable. This determination was made based on improving market conditions and an assessment of projected cash flows for all reporting units. Additionally, there were no events or circumstances during 2011 that would indicate the need for an adjustment of the remaining useful lives of the Company's amortizable intangible assets.

Pension and Other Post-Retirement Benefits

The expenses, assets and liabilities that Moody's reports for its Post-Retirement Plans are dependent on many assumptions concerning the outcome of future events and circumstances. These assumptions include the following:

future compensation increases, based on the Company's long-term actual experience and future outlook

long-term return on pension plan assets, based on historical portfolio results and the expected future average annual return for each major asset class within the plan's portfolio (which is principally comprised of equity and fixed-income investments)

future healthcare cost trends, based on historical market data, near-term outlooks and assessments of likely long-term trends

discount rates, based on current yields on high-grade corporate long-term bonds

The discount rates selected to measure the present value of the Company's benefit obligation for its Post-Retirement Plans as of December 31, 2011 were derived using a cash flow matching method whereby the Company compares each plan's projected payment obligations by year with the corresponding yield on the Citibank pension discount curve. The cash flows by plan are then discounted back to present value to determine the discount rate applicable to each plan.

Moody's major assumptions vary by plan and assumptions used are set forth in Note 12 to the consolidated financial statements. In determining these assumptions, the Company consults with outside actuaries and other advisors as deemed appropriate. While the Company believes that the assumptions used in its calculations are reasonable, differences in actual experience or changes in assumptions could have a significant effect on the expenses, assets and liabilities related to the Company's Post-Retirement Plans.

When actual plan experience differs from the assumptions used, actuarial gains or losses arise. Excluding differences between the expected long-term rate of return assumption and actual experience on plan assets, the Company amortizes, as a component of annual pension expense, total outstanding gains or losses over the estimated average future working lifetime of active plan participants to the extent that the gain/loss exceeds 10% of the greater of the beginning-of-year projected benefit obligation or the market-related value of plan assets. For Moody's Post-Retirement Plans, the total losses as of December 31, 2011 that have not been recognized in annual expense are \$119.7 million, and Moody's expects to recognize net periodic benefit expense of \$9.4 million in 2012 related to the amortization of actuarial losses.

For Moody's funded U.S. pension plan, the differences between the expected long-term rate of return assumption and actual experience could also affect the net periodic pension expense. As permitted under ASC Topic 715, the Company spreads the impact of asset experience over a five-year period for purposes of calculating the market-related value of assets that is used in determining the expected return on assets component of annual expense and in calculating the total unrecognized gain or loss subject to amortization. As of December 31, 2011, the Company has an unrecognized asset loss of \$13.6 million, of which \$9.3 million will be recognized in the market-related value of assets that is

used to calculate the expected return on assets component of 2012 expense.

Table of Contents

The table below shows the estimated effect that a one percentage-point decrease in each of these assumptions will have on Moody's 2012 operating income. These effects have been calculated using the Company's current projections of 2012 expenses, assets and liabilities related to Moody's Post-Retirement Plans, which could change as updated data becomes available.

	Assumption Used for 2012	Estimated Impact on 2012 Operating Income (Decrease)/Increase
Weighted Average Discount Rates*	4.25% / 4.05%	\$ (8.5)
Weighted Average Assumed Compensation Growth Rate	4.00%	\$ 2.1
Assumed Long-Term Rate of Return on Pension Assets	7.85%	\$ (1.6)

* Weighted average discount rates of 4.25% and 4.05% for pension plans and other post-retirement plans, respectively.

A one percentage-point increase in assumed healthcare cost trend rates will not affect 2012 projected expenses. Based on current projections, the Company estimates that expenses related to Post-Retirement Plans will be \$30.1 million in 2012 compared with \$24.1 million in 2011, excluding the effect of pension settlement charges. The expected expense increase in 2012 reflects the effects of higher benefit obligations primarily due to lower discount rate assumptions and higher amortization of actuarial losses.

Stock-Based Compensation

The Company records compensation expense for all share-based payment award transactions granted to employees based on the fair value of the equity instrument at the time of grant. This includes shares issued under employee stock purchase plans, stock options, restricted stock and stock appreciation rights. The fair value of each option award is estimated on the date of grant using the Black-Scholes option pricing model that uses assumptions and estimates that the Company believes are reasonable. Some of the assumptions and estimates, such as share price volatility and expected option holding period, are based in part on Moody's experience during the period since becoming a public company. The use of different assumptions and estimates in the Black-Scholes option pricing model could produce materially different estimated fair values for option awards and related expense.

An increase in the following assumptions would have had the following estimated effect on operating income in 2011 (dollars in millions):

	Assumption Used for 2007-2011 grants	Increase in Assumption	Estimated impact on Operating Income in 2011 Increase/(Decrease)
Average Expected Dividend Yield	0.4% - 2.1%	0.1%	\$ 0.2
Average Expected Share Price Volatility	23% - 48.7%	5%	\$ (2.1)
Expected Option Holding Period	5.5 - 7.6 years	1.0 year	\$ (1.4)

Income Taxes

The Company is subject to income taxes in the U.S. and various foreign jurisdictions. The Company's tax assets and liabilities are affected by the amounts charged for service provided and expenses incurred as well as other tax matters such as intercompany transactions. The Company accounts for income taxes under the asset and liability method in accordance with ASC Topic 740. Therefore, income tax expense is based on reported income before income taxes, and deferred income taxes reflect the effect of temporary differences between the amounts of assets and liabilities that are recognized for financial reporting purposes and the amounts that are recognized for income tax purposes.

Moody's is subject to tax audits in various jurisdictions which involve Legacy Tax and other tax matters. The Company regularly assesses the likely outcomes of such audits in order to determine the appropriateness of liabilities for UTPs. The Company classifies interest related to income taxes as a component of interest expense in the Company's consolidated financial statements and associated penalties, if any, as part of other non-operating expenses.

For UTP's, ASC Topic 740 requires a company to first determine whether it is more-likely-than-not (defined as a likelihood of more than fifty percent) that a tax position will be sustained based on its technical merits as of the reporting date, assuming that taxing authorities will examine

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

the position and have full knowledge of all relevant information. A tax position that meets this more-likely-than-not threshold is then measured and recognized at the largest amount of benefit that is greater than fifty percent likely to be realized upon effective settlement with a taxing authority. As the determination of liabilities related to UTPs and associated interest and penalties requires significant estimates to be made by the Company, there can be no assurance that the Company will accurately predict the outcomes of these audits, and thus the eventual outcomes could have a material impact on the Company's operating results or financial condition.

For certain of its foreign subsidiaries, the Company has deemed a portion of the undistributed earnings relating to these subsidiaries to be indefinitely reinvested within its foreign operations. Accordingly, the Company has not provided deferred income taxes on these

Table of Contents

indefinitely reinvested earnings. A future distribution or change in assertion regarding reinvestment by the foreign subsidiaries relating to these earnings could result in additional tax liability for the Company. It is not practicable to determine the amount of the potential additional tax liability due to complexities in the tax laws and in the hypothetical calculations that would have to be made.

Other Estimates

In addition, there are other accounting estimates within Moody's consolidated financial statements, including recoverability of deferred tax assets, anticipated dividend distributions from non-U.S. subsidiaries and valuation of investments in affiliates. Management believes the current assumptions and other considerations used to estimate amounts reflected in Moody's consolidated financial statements are appropriate. However, if actual experience differs from the assumptions and other considerations used in estimating amounts reflected in Moody's consolidated financial statements, the resulting changes could have a material adverse effect on Moody's consolidated results of operations or financial condition.

See Note 2 to the consolidated financial statements for further information on significant accounting policies that impact Moody's.

OPERATING SEGMENTS

Moody's operates in two reportable segments: MIS and MA.

The MIS segment consists of four lines of business—corporate finance, structured finance, financial institutions and public, project and infrastructure finance—that generate revenue principally from fees for the assignment and ongoing monitoring of credit ratings on debt obligations and the entities that issue such obligations in markets worldwide.

The MA segment, which includes all of the Company's non-rating commercial activities, develops a wide range of products and services that support the risk management activities of institutional participants in global financial markets. The MA segment consists of three lines of business—RD&A, Risk Management Software and Professional Services.

In the fourth quarter of 2011, subsidiaries of the Company acquired Copal and B&H. Copal is an outsourced research and consulting business. B&H is a provider of insurance risk management tools. Additionally, in November 2010, a subsidiary of the Company acquired CSI, which is Canada's leading provider of financial learning, credentials and certification. B&H is part of the MA segment and its revenue is included in the RMS LOB and Copal's and CSI's revenue is included in the professional services LOB within MA.

The following is a discussion of the results of operations of these segments, including the intersegment royalty revenue for MIS and expense charged to MA for the rights to use and distribute content, data and products developed by MIS. The discussion also includes intersegment license fees charged to MIS from MA for the use of certain MA products and services in MIS's ratings process. Overhead charges and corporate expenses which exclusively benefit one segment are fully charged to that segment. Additionally, overhead costs and corporate expenses of the Company which benefit both segments are generally allocated to each segment based on a revenue-split methodology. Overhead expenses include costs such as rent and occupancy, information technology and support staff such as finance, human resource and information technology. Beginning on January 1, 2011, the Company refined its methodology for allocating the aforementioned overhead and corporate costs to its segments to better align these costs based on each segment's usage of the overhead services. The refined methodology is reflected in the segment results for the year ended December 31, 2011 and accordingly, the segment results for the same period in 2010 and 2009 have been reclassified to conform to the new presentation.

Certain prior year amounts have been reclassified to conform to the current presentation.

RESULTS OF OPERATIONS

Year Ended December 31, 2011 compared with Year Ended December 31, 2010

Executive Summary

Moody's revenue for the year ended December 31, 2011 totaled \$2,280.7 million, an increase of \$248.7 million compared to the same period in 2010. Excluding the favorable impact from changes in FX translation rates, revenue in the year ended December 31, 2011 increased approximately \$221 million compared to 2010. Total expenses were \$1,392.3 million, an increase of \$133.1 million compared to 2010 of which approximately \$25 million was due to unfavorable changes in FX translation rates. Operating income of \$888.4 million in the year ended December 31, 2011 increased \$115.6 million compared to the same period in the prior year. Diluted EPS of \$2.49 for the year ended

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

December 31, 2011, which included a \$0.03 benefit related to favorable resolutions of Legacy Tax Matters as well as other tax benefits totaling \$0.09, increased \$0.34 over the prior year period, which included a \$0.15 tax benefit on foreign earnings that are indefinitely reinvested, foreign tax credits and lower state taxes. Excluding the \$0.03 favorable impact relating to the resolution of Legacy Tax Matters in 2011, diluted EPS of \$2.46 increased \$0.33, or 15%, from \$2.13 in 2010, which excludes a prior year favorable impact of \$0.02 related to the resolution of a Legacy Tax Matter.

Operating income	\$ 888.4	\$ 772.8	15%
Interest (expense) income, net	\$ (62.1)	\$ (52.5)	(18%)
Other non-operating (expense) income, net	\$ 13.5	\$ (5.9)	329%
Net income attributable to Moody's	\$ 571.4	\$ 507.8	13%
Diluted EPS	\$ 2.49	\$ 2.15	16%

The table below shows Moody's global staffing by geographic area:

	December 31,		% Change
	2011	2010	
United States	2,465	2,333	6%
International	3,661	2,128	72%
Total *	6,126	4,461	37%

* Total as of December 31, 2011 includes approximately 1,300 staff from fourth quarter 2011 MA acquisitions, of which a significant portion are based in low cost jurisdictions

Global revenue of \$2,280.7 million in the year ended December 31, 2011 increased \$248.7 million compared to the same period in 2010 reflecting strong growth in both segments. The increase in ratings revenue compared to the year ended December 31, 2010 reflects growth across all ratings LOBs, most notably from within CFG and SFG. The growth in MA revenue reflects higher revenue across all LOBs, most notably in professional services which includes revenue from CSI and Copal which were acquired in the fourth quarter of 2010 and 2011, respectively. Transaction revenue accounted for 46% of global MCO revenue in the year ended December 31, 2011, compared to 44% in the same period of the prior year.

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

U.S. revenue of \$1,177.0 million increased \$87.5 million over 2010, primarily reflecting growth in CFG largely due to changes in the mix of fee type, new fee initiatives and certain pricing increases. The growth over the prior year also reflects strong rated issuance volumes in the first half of 2011 for investment-grade corporate debt. Further contributing to the growth in U.S. ratings revenue over the prior year were higher rated issuance volumes in CREF within SFG. The aforementioned growth in ratings revenue was partially offset by declines in U.S. public and project finance rated issuance. Additionally, the increase over the year ended December 31, 2010 reflects positive results in all LOBs within MA.

Non-U.S. revenue increased \$161.2 million over 2010, reflecting growth in all LOBs within both segments. The most notable growth in non-U.S. ratings revenue resulted from higher rated issuance volumes in the EMEA and Asia regions for most asset classes within SFG as

Table of Contents

well as higher investment-grade and speculative-grade issuance in the EMEA region in the first half of 2011. Additionally, the growth over 2010 reflects higher infrastructure finance and banking-related issuance in the EMEA and Asia regions. Furthermore, there was strong growth in indicative ratings across all regions. The increase in non-U.S. MA revenue reflects growth across all LOBs, most notably in professional services, where over 90% of the growth for this LOB is attributed to the acquisitions of CSI and Copal in the fourth quarter of 2010 and 2011, respectively. Changes in FX translation rates had an approximate \$28 million favorable impact on non-U.S. revenue for the year ended December 31, 2011.

Operating expenses were \$683.5 million in the year ended December 31, 2011, an increase of \$78.7 million from the same period in 2010 and reflected both higher compensation and non-compensation costs. Compensation costs increased approximately \$44 million from the prior year reflecting higher salaries and related employee benefits which has resulted from increases in headcount in both the MIS and MA segments coupled with annual merit increases. Non-compensation costs have increased approximately \$34 million over the same period in 2010 reflecting higher costs resulting from the Company's ongoing investments in technology infrastructure as well as higher travel-related and other variable costs which are correlated with improved overall business conditions in both segments. Also, the increase is due to unfavorable changes in FX translation rates compared to the prior year. Additionally, the increase in both compensation and non-compensation costs compared to the prior year reflects costs from CSI which was acquired in the fourth quarter of 2010 as well as costs related to Copal and B&H which were acquired in the fourth quarter of 2011.

SG&A expenses of \$629.6 million in the year ended December 31, 2011 increased \$41.6 million from the same period in 2010. Compensation costs increased approximately \$41 million primarily due to higher salaries and related employee benefits which reflects annual merit increases and headcount growth in support areas such as compliance and IT. Non-compensation expenses were flat compared to the prior year reflecting the offsetting effects of higher professional service costs relating to ongoing investments in technology infrastructure and fees relating to fourth quarter 2011 acquisitions in the MA segment being offset by lower legal and litigation-related costs.

Depreciation and amortization of \$79.2 million in the year ended December 31, 2011 increased \$12.9 million from the same period in 2010 and reflected higher amortization for software developed or obtained for internal use coupled with higher amortization related to intangible assets acquired as part of the fourth quarter 2010 and 2011 MA acquisitions.

Operating income of \$888.4 million increased \$115.6 million from the same period in 2010, reflecting the 12% increase in revenue exceeding the 11% increase in operating expenses. Changes in FX translation rates had an approximate \$4 million favorable impact on operating income in the year ended December 31, 2011.

Interest (expense) income, net for the year ended December 31, 2011 was (\$62.1) million, a \$9.6 million increase in expense compared to the same period in 2010. This increase is primarily due to higher expense on borrowings reflecting a full-year of interest on the \$500 million 2010 Senior Notes issued in August 2010 partially offset by lower interest expense on the \$300 million Series 2005-1 Notes resulting from benefits on interest rate swaps entered into in the fourth quarter of 2010 to convert the fixed rate of interest on the notes to a floating LIBOR-based rate. This increase in interest expense on borrowings was partially offset by a reversal of interest on UTPs of approximately \$3 million related to the favorable resolution of a state tax matter. Additionally, there were benefits of \$3.7 million and \$2.5 million, in the year ended December 31, 2011 and 2010, respectively, related to the favorable resolution of Legacy Tax Matters. The benefit in 2011 consists of a \$2.8 million reversal of interest expense related to a matter for which the statute of limitations had lapsed coupled with \$0.9 million in interest income received for the settlement of a matter for a tax year that preceded the 2000 Distribution. The benefit in 2010 reflects interest income received for the favorable settlement of Legacy Tax Matters.

Other non-operating (expense) income, net of \$13.5 million in the year ended December 31, 2011 increased \$19.4 million compared to the same period in 2010. The increase in income reflects a \$6.4 million reversal of reserves in the first half of 2011 for the lapse of a statute of limitations relating to a Legacy Tax Matter. Additionally, there were FX gains of approximately \$3 million in the year ended December 31, 2011 compared to FX losses of approximately \$5 million in the prior year period. The gains in 2011 primarily reflect transaction gains on the euro and British pound in the first half of 2011. The losses in the prior year period primarily reflected the weakening of the euro to the British pound over the course of 2010.

Moody's ETR was 31.2% in the year ended December 31, 2011, up from 28.1% in 2010. The increase was primarily due to tax benefits in 2010 relating to utilization of foreign tax credits, lower state taxes and the indefinite reinvestment of certain foreign earnings, which were only partially offset by beneficial UTB adjustments relating to a foreign tax ruling and the settlement of state tax audits in 2011.

Net Income for the year ended December 31, 2011 was \$571.4 million, or \$2.49 per diluted share and increased \$63.6 million, or \$0.34 per diluted share, compared to the same period in 2010. The increase in EPS over the prior year reflects higher Net Income coupled with fewer diluted shares outstanding compared to 2010. Excluding net benefits from the favorable resolution of Legacy Tax Matters in both periods as well as minor restructuring-related adjustments in 2010, Net Income increased \$61.1 million, or 12%, to \$564.4 million, resulting in a \$0.33, or 15%,

increase in diluted EPS compared to the prior year.

Table of Contents**Segment Results****Moody's Investors Service**

The table below provides a summary of revenue and operating results, followed by further insight and commentary:

	Year Ended December 31,		% Change Favorable (Unfavorable)
	2011	2010	
Revenue:			
Corporate finance (CFG)	\$ 652.1	\$ 563.9	16%
Structured finance (SFG)	344.6	290.8	19%
Financial institutions (FIG)	294.9	278.7	6%
Public, project and infrastructure finance (PIPF)	277.3	271.6	2%
Total external revenue	1,568.9	1,405.0	12%
Intersegment royalty	65.8	61.3	7%
Total MIS Revenue	1,634.7	1,466.3	11%
Expenses:			
Operating and SG&A (including intersegment expenses)	831.0	781.5	(6%)
Restructuring		0.1	100%
Depreciation and amortization	41.0	35.0	(17%)
Total	872.0	816.6	(7%)
Operating income	\$ 762.7	\$ 649.7	17%

The following is a discussion of external MIS revenue and operating expenses:

Global MIS revenue of \$1,568.9 million for the year ended December 31, 2011 increased \$163.9 million compared to 2010, reflecting growth across all ratings LOBs. The principal driver of the MIS revenue growth reflected changes in the mix of fee type, new fee initiatives and certain pricing increases, primarily in the U.S. The growth also reflected higher rated issuance for investment-grade corporate debt and bank loans, most notably in the first half of 2011, resulting from the low interest rate environment throughout 2011. These increases were partially offset by significant declines in speculative-grade corporate debt issuance in the second half of 2011 which reflected a considerable widening of high-yield credit spreads relating to uncertainties in the U.S. and EMEA capital markets. Additionally, there was growth across most asset classes within SFG compared to challenging conditions in the securitization markets in the prior year as well as stronger banking and insurance-related issuance within FIG and infrastructure finance revenue within PPIF in the first half of the year. Transaction revenue for MIS in the year ended December 31, 2011 was 58% of total revenue compared to 57% in 2010, with the increase primarily reflecting the aforementioned growth in rated issuance in the CFG and SFG LOBs.

In the U.S., revenue was \$879.1 million in the year ended December 31, 2011 and increased \$63.7 million, or 8%, compared to the same period in 2010. The increase reflects the aforementioned changes in the mix of fee type, new fee initiatives and certain pricing increases as well as strong rated issuance volumes for investment-grade corporate debt and bank loans in the first half of 2011. Additionally, there were higher rated issuance volumes in the CREF asset class within SFG compared to the same period in 2010. These increases were partially offset by declines in rated issuance volumes for high-yield corporate debt in the second half of 2011 coupled with declines in rated issuance for U.S. public finance in 2011.

Non-U.S. revenue was \$689.8 million in the year ended December 31, 2011 and increased \$100.2 million, or 17%, compared to the same period in the prior year. The increase reflects higher rated issuance volumes in the EMEA region across most asset classes within SFG as well as higher infrastructure finance revenue across all regions. Additionally, the increase reflects good growth in revenue from rating high-yield and investment-grade corporate debt as well as higher banking and insurance-related rated issuance in the EMEA region. Changes in FX translation rates had an approximate \$28 million favorable impact on non-U.S. MIS revenue in the year ended December 31, 2011.

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

Global CFG revenue of \$652.1 million in the year ended December 31, 2011 increased \$88.2 million from the same period in 2010. The principal driver of the revenue growth reflected changes in the mix of fee type, new fee initiatives and certain pricing increases, primarily in the U.S. The increase over the prior year also includes strong growth in rated issuance volumes in the first half of the year for investment-grade corporate bonds and bank loans reflecting issuers taking advantage of the overall low interest rate environment to refinance existing borrowings. These increases were partially offset by declines in rated issuance volumes in the second half of 2011

Table of Contents

resulting from higher credit spreads on speculative-grade corporate debt which reflected uncertainties in the EU sovereign debt markets coupled with concerns over the potential weakening of macroeconomic conditions in the U.S. Additionally, the growth over the prior year period reflects higher surveillance revenue. Transaction revenue represented 71% of total CFG revenue in the year ended December 31, 2011 compared to 73% in the prior year period. In the U.S., revenue in 2011 was \$422.3 million, or \$52.8 million higher than the same period in 2010. The increase primarily reflected the aforementioned changes in the mix of fee type, new fee initiatives and certain pricing increases coupled with growth in rated issuance for investment-grade corporate debt throughout 2011 as well as bank loans in the first half of 2011. These increases in rated issuance volumes reflect the overall current low interest rate environment which has resulted in issuers opportunistically refinancing debt ahead of scheduled maturities. Also, the growth in investment-grade corporate debt reflects an increase in issuance to fund merger and acquisition-related activity. These increases were partially offset by declines in rated issuance volumes for high-yield corporate debt in the second half of 2011 due to significantly higher credit spreads on these securities reflecting macroeconomic uncertainty in the U.S. and EMEA. Internationally, revenue of \$229.8 million in 2011 increased \$35.4 million compared to the same period in 2010. This increase was driven by rated issuance growth in high-yield corporate debt and bank loans in the first half of 2011 before sovereign debt uncertainties in the EMEA region, which were exacerbated in the second half of 2011, resulted in a pull-back of both investment-grade and high-yield issuance. The growth in non-U.S. revenue over the prior year period also reflected an increase in Indicative Ratings assigned. Favorable changes in FX translation rates had an approximate \$9 million impact on international CFG revenue in 2011.

Global SFG revenue of \$344.6 million in 2011 increased \$53.8 million compared to the same period in 2010, primarily reflecting growth in most asset classes internationally coupled with strong growth in rated CMBS issuance volumes in the U.S. The aforementioned growth resulted in transaction revenue increasing to 52% of total SFG revenue in 2011 compared to 43% in the prior year period. In the U.S., revenue of \$161.6 million increased \$18.7 million compared to 2010, reflecting good growth in CMBS rated issuance volumes due to the current favorable credit market environment and narrow credit spreads for this asset class for most of 2011. Non-U.S. revenue in the year ended December 31, 2011 of \$183.0 million increased \$35.1 million compared to the same period in the prior year, primarily reflecting growth across most asset classes within the EMEA region, most notably in the ABS, RMBS and covered bonds sectors compared to a challenging prior year period in the non-U.S. securitization markets. The increases in ABS and RMBS also reflected issuers requesting a second rating for these securities in the first quarter of 2011, which was a new requirement by the ECB for existing asset-backed securities that could be used as collateral in Eurosystem credit operations. Favorable changes in FX translation rates had an approximate \$10 million impact on international SFG revenue in 2011.

Global FIG revenue of \$294.9 million in 2011 increased \$16.2 million compared to the same period in 2010 with the increase almost entirely reflecting the favorable impact of the aforementioned changes in the mix of fee type, new fee initiatives and pricing increases, primarily in the U.S. Additionally, higher rated issuance volumes in the first half of 2011 were mostly offset by volume declines in the second half of 2011 which resulted from uncertainties in the European sovereign debt markets. Transaction revenue was 34% of total FIG revenue in 2011, compared to 37% in 2010. In the U.S., revenue of \$118.7 million for the year ended December 31, 2011 increased \$4.3 million compared to the prior year. Outside the U.S., revenue in 2011 was \$176.2 million, or \$11.9 million higher than in the prior year, and was primarily due to growth in banking and insurance revenue in the EMEA and Asia regions. Favorable changes in FX translation rates had an approximate \$6 million impact on international FIG revenue in the year ended December 31, 2011.

Global PPIF revenue was \$277.3 million in 2011, an increase of \$5.7 million compared to the same period in 2010. The principal driver of the increase reflected changes in the mix of fee type, new fee initiatives and certain pricing increases, primarily in the U.S. This increase was partially offset by declines in U.S. public and project finance issuance. Revenue generated from new transactions was 58% of total PPIF revenue in 2011, compared to 59% in the prior year period. In the U.S., revenue for the year ended December 31, 2011 of \$176.5 million decreased \$12.1 million compared to the prior year primarily due to declines in public and project finance rated issuance partially offset by the aforementioned changes in the mix of fee type, new fee initiatives and pricing changes. These declines in rated issuance volumes reflected decreases in state and local government spending and the expiration of the Build America Bond Program in the fourth quarter of 2010, which was implemented in the U.S. as part of the American Recovery and Reinvestment Act of 2009. Outside the U.S., PPIF revenue increased 21% compared to 2010 due to growth in infrastructure finance revenue across all non-U.S. regions. Favorable changes in FX translation rates had an approximate \$4 million impact on international PPIF revenue in 2011.

Operating and SG&A expenses in 2011 increased \$49.5 million compared to the same period in 2010 reflecting higher compensation costs of approximately \$41 million coupled with higher non-compensation expenses of approximately \$7 million. The increase in compensation costs reflects higher salaries and related employee benefits resulting from annual merit increases, modest headcount growth in the ratings LOBs as well as in support areas such as IT for which the costs are allocated to each segment based on a revenue-split methodology. The increase in non-compensation expenses reflects: (i) higher costs related to the Company's continued investment in IT infrastructure, (ii) higher rent and occupancy costs relating to various real estate relocation and expansion projects and (iii) higher variable costs such as T&E to support business growth. These increases were partially offset by lower legal and litigation-related costs as well as lower bad debt expense compared to the prior year.

Table of Contents

Operating income in 2011 of \$762.7 million, which includes intersegment royalty revenue and intersegment license expense, increased \$113.0 million from the same period in 2010 and reflects the 11% increase in total MIS revenue outpacing the 7% increase in total operating expenses.

Moody's Analytics

The table below provides a summary of revenue and operating results, followed by further insight and commentary:

	Year Ended December 31,		% Change Favorable (Unfavorable)
	2011	2010	
Revenue:			
Research, data and analytics (RD&A)	\$ 451.3	\$ 425.0	6%
Risk management software (RMS)	183.4	173.2	6%
Professional services	77.1	28.8	168%
Total external revenue	711.8	627.0	14%
Intersegment license fees	10.6	9.3	14%
Total MA Revenue	722.4	636.3	14%
Expenses:			
Operating and SG&A (including intersegment expenses)	558.5	481.9	(16%)
Depreciation and amortization	38.2	31.3	(22%)
Total	596.7	513.2	(16%)
Operating income	\$ 125.7	\$ 123.1	2%

The following is a discussion of external MA revenue and operating expenses:

Global MA revenue increased \$84.8 million compared to the year ended December 31, 2010, with 72% of the growth generated internationally, and reflected revenue from CSI which was acquired in the fourth quarter of 2010 as well as revenue from Copal and B&H which were acquired in the fourth quarter of 2011. Recurring revenue comprised 80% of total MA revenue in 2011 compared to 85% in the same period of the prior year.

In the U.S., revenue of \$297.9 million in the year ended December 31, 2011 increased \$23.8 million, primarily reflecting growth in RD&A and RMS. International revenue of \$413.9 million for the year ended December 31, 2011 was \$61.0 million higher than the same period in 2010. The increase reflected growth across all LOBs, most notably in professional services which includes revenue from the CSI and Copal acquisitions which were completed in the fourth quarter of 2010 and 2011, respectively.

Global RD&A revenue, which comprised over 63% of MA revenue in both of the years ended December 31, 2011 and 2010, increased \$26.3 million over the prior year reflecting greater demand for products that support analysis for investment and commercial credit applications. Global RMS revenue in 2011 increased \$10.2 million over the same period in 2010, due to the final delivery and client acceptance of software licenses and implementations. Revenue from the professional services LOB increased \$48.3 million compared to the same period in 2010, with approximately 91% of the growth reflecting the acquisitions of CSI and Copal in the fourth quarter of 2010 and 2011, respectively, coupled with growth in the base business. Revenue in the RMS and professional services LOBs are subject to quarterly volatility resulting from the variable nature of project timing and the concentration of revenue in a relatively small number of engagements.

Operating and SG&A expenses in 2011, which include the intersegment royalty for the right to use and distribute content, data and products developed by MIS, increased \$76.6 million compared to the same period in 2010 reflecting both higher compensation and non-compensation costs of approximately \$44 million and \$28 million, respectively. The increase in compensation costs reflects higher salaries and related employee benefits resulting from annual merit increases coupled with a full year of compensation costs relating to the acquisition of CSI in the fourth quarter of 2010 as well as increased headcount to support business growth. Additionally, the increase in compensation costs reflects higher incentive compensation primarily due to the aforementioned growth in headcount. The increase in non-compensation costs reflects a full-year of expenses related to CSI which was acquired in the fourth quarter of 2010, approximately \$8 million in costs directly related to the

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

fourth quarter 2011 acquisitions of Copal and B&H as well as higher variable costs, such as T&E, that are correlated with business growth.

MOODY S 2011 10-K

41

Table of Contents

Depreciation and amortization of \$38.2 million in the year ended December 31, 2011 increased \$6.9 million from the same period in 2010 and reflected higher amortization related to intangible assets acquired as part of the acquisitions of CSI in the fourth quarter of 2010 as well as Copal and B&H in the fourth quarter of 2011.

Operating income of \$125.7 million in 2011, which includes intersegment license fee revenue and intersegment royalty expense, increased \$2.6 million compared to the same period in 2010, reflecting the \$86.1 million increase in total MA revenue exceeding the \$83.5 million increase in total expenses.

Year Ended December 31, 2010 compared with Year Ended December 31, 2009**Executive Summary**

Moody's revenue for the year ended December 31, 2010 totaled \$2,032.0 million, an increase of \$234.8 million compared to the same period in 2009. Total expenses were \$1,259.2 million, an increase of \$149.5 million compared to 2009. Operating income of \$772.8 million in 2010 increased \$85.3 million compared to the same period in the prior year. Excluding the restructuring charge in 2009 and minor restructuring-related adjustments in both years, operating income increased \$67.9 million from \$705.0 million in the prior year period. Diluted EPS of \$2.15 for the year ended December 31, 2010 increased \$0.46, or 27% over the prior year period and included a benefit of \$0.02 associated with the resolution of a Legacy Tax Matter as well as other tax benefits of \$0.15 in 2010 relating to foreign earnings that are indefinitely reinvested, foreign tax credits and lower state taxes. Excluding the aforementioned Legacy Tax Matter in 2010, diluted EPS of \$2.13 increased \$0.43, or 25%, from \$1.70 in 2009, which excludes a prior year favorable impact of \$0.04 related to the resolution of a Legacy Tax Matter and an unfavorable \$0.05 impact for restructuring.

Table of Contents

Global revenue of \$2,032.0 million in 2010 increased \$234.8 million compared to the same period in 2009, reflecting good growth in both ratings and MA revenue. The growth in ratings revenue is primarily due to strong issuance activity in 2010 within the corporate finance, financial institution and public finance debt markets. The growth in MA is due to higher revenue across all LOBs. Transaction revenue accounted for 44% of global MCO revenue in 2010 compared to 37% in the same period of the prior year.

U.S. revenue increased \$168.7 million over 2009 reflecting growth in all ratings LOBs, most notably in rated issuance volumes for bank loans and speculative-grade corporate bonds. There was also good growth over the prior year in U.S. public finance and CREF rated issuance. Additionally, there was growth in all LOBs within the MA segment, most notably in RMS.

International revenue increased \$66.1 million compared to the same period in 2009 primarily reflecting growth in CFG revenue, particularly in speculative-grade ratings in EMEA, coupled with higher banking related revenue across all regions. Additionally, the growth reflects higher revenue across all MA LOBs, primarily from within the Asia and the Americas regions. These increases were partially offset by declines in most asset classes within SFG as well as declines in investment-grade rated issuance within the EMEA region.

Operating expenses were \$604.8 million in 2010, an increase of \$72.4 million from the same period in 2009 and were primarily due to both higher compensation and non-compensation costs. Compensation costs increased approximately \$63 million reflecting approximately \$30 million higher incentive compensation primarily resulting from greater achievement against targeted results compared to achievement against targeted results in the prior year period, a \$7 million global profit sharing contribution due to the Company's growth in diluted EPS over 2009 and approximately \$29 million higher salaries and related employee benefits primarily due to annual merit increases coupled with higher headcount in both operating segments to support business growth. Non-compensation costs increased approximately \$9 million reflecting higher professional service costs for ongoing investments in technology infrastructure as well as higher travel-related costs which reflects improving business conditions compared to 2009.

SG&A expenses of \$588.0 million in 2010 increased \$92.3 million from the same period in 2009. Non-compensation expenses increased approximately \$47 million over the prior year primarily reflecting higher professional service costs relating to ongoing investments in technology infrastructure as well as higher legal and litigation-related costs related to ongoing matters. Compensation costs increased approximately \$45 million primarily due to higher salaries and related employee benefits which reflects annual merit increases and headcount growth in sales personnel within MA as well as in support areas such as compliance and IT. Additionally there was approximately \$10 million higher incentive compensation costs compared to 2009 which primarily reflects greater achievement against targeted results compared to the achievement of targeted results in the prior year period. Furthermore, there was an approximate \$6 million profit sharing contribution in 2010 due to the Company's year-over-year growth in diluted EPS.

Restructuring expense in 2009 reflects severance costs associated with the 2009 Restructuring Plan approved on March 27, 2009 and adjustments to the previous estimates for both the 2007 and 2009 Restructuring Plans.

Operating income of \$772.8 million was up \$85.3 million from the same period in 2009, reflecting the 13% increase in revenue being partially offset by the \$149.5 million increase in expenses. Excluding the restructuring charge in 2009 and minor restructuring-related adjustments in both periods, operating income increased \$67.9 million over 2009.

Interest (expense) income, net for the year ended December 31, 2010 was \$(52.5) million, a \$19.1 million increase in expense compared to the same period in 2009. The increase relates primarily to an interest expense reduction of approximately \$12 million in the first quarter of 2009 for UTBs and other tax-related liabilities that did not recur in 2010. Also, there was an approximate \$7 million increase in interest expense on borrowings which primarily reflects interest on the 2010 Senior Notes issued in the third quarter of 2010. Additionally, there was interest income related to the favorable settlement of Legacy Tax Matters of \$2.5 million and \$6.5 million in 2010 and 2009, respectively.

Other non-operating (expense) income, net of \$(5.9) million in 2010 decreased \$2.0 million compared to the prior year. This decrease primarily reflects FX losses of approximately \$(5) million in 2010 compared to losses of approximately \$(10) million in 2009. The FX losses in both periods primarily reflect the weakening of the euro to the British pound over both of the twelve month periods ended December 31, 2010 and 2009.

Moody's ETR was 28.1% for the year ended December 31, 2010, down from 37.0% in 2009 and was primarily due to increased taxable income internationally; indefinite reinvestment of certain foreign earnings; utilization of foreign tax credits; lower state taxes; and a resolution of a non-U.S. tax audit resulting in a reduction of UTBs. Additionally, the 2009 ETR reflects a non-taxable \$12 million interest expense reduction related to UTBs and other tax-related liabilities. The 2010 and 2009 tax expense included benefits of \$2.1 million and \$1.7 million, respectively, relating to the favorable resolution of Legacy Tax Matters (see Contingencies Legacy Tax Matters below for further information). Excluding the Legacy Tax Matters in both years, the ETR in 2010 of 28.5% decreased 910 Bps from 2009.

Table of Contents

Net Income for the year ended December 31, 2010 was \$507.8 million, or \$2.15 per diluted share, and increased \$105.8 million, or \$0.46 per diluted share, compared to the prior year. Included in the 2010 Net Income were tax benefits of approximately \$36 million, or \$0.15 per diluted share, relating to the indefinite reinvestment of certain foreign earnings, utilization of foreign tax credits and lower state taxes. Excluding benefits for favorable resolutions of Legacy Tax Matters in both 2010 and 2009, as well as the restructuring charge in 2009 and related adjustments in both years, Net Income increased \$98.6 million, or 24%, to \$503.3 million, resulting in a \$0.43, or 25%, increase in diluted EPS compared to the prior year.

Segment Results**Moody's Investors Service**

The table below provides a summary of revenue and operating results, followed by further insight and commentary:

	Year Ended December 31,		% Change Favorable (Unfavorable)
	2010	2009	
Revenue:			
Corporate finance (CFG)	\$ 563.9	\$ 408.2	38%
Structured finance (SFG)	290.8	304.9	(5%)
Financial institutions (FIG)	278.7	258.5	8%
Public, project and infrastructure finance (PPIF)	271.6	246.1	10%
Total external revenue	1,405.0	1,217.7	15%
Intersegment royalty	61.3	60.0	2%
Total MIS Revenue	1,466.3	1,277.7	15%
Expenses:			
Operating and SG&A (including intersegment expenses)	781.5	674.7	(16%)
Restructuring	0.1	8.7	99%
Depreciation and amortization	35.0	31.3	(12%)
Total	816.6	714.7	(14%)
Operating income	\$ 649.7	\$ 563.0	15%

The following is a discussion of external MIS revenue as well as operating expenses:

Global MIS revenue of \$1,405.0 million for the year ended December 31, 2010 increased \$187.3 million compared to the same period in 2009. The increase reflects strong growth in rated issuance volumes for high-yield corporate debt and bank loans within CFG as well as good growth from public finance and banking related issuance within PPIF and FIG, respectively. These increases were partially offset by declines in derivatives and investment-grade corporate debt rated issuance volumes within SFG and CFG, respectively. Transaction revenue for MIS in 2010 was 57% of total revenue compared to 50% in 2009, with the increase primarily reflecting the aforementioned strong rated issuance in the high-yield corporate debt and bank loan sectors within CFG.

In the U.S., revenue was \$815.4 million in 2010, an increase of \$152.3 million, or 23%, compared to the same period in 2009. The increase relates primarily to strong rated issuance volumes in bank loans and high-yield corporate debt within CFG, higher rated issuance in the CREF sector within SFG and good growth in PPIF. These increases were partially offset by declines in derivatives and consumer asset-backed securities rated issuance within SFG.

Non-U.S. revenue was \$589.6 million in 2010, an increase of \$35.0 million, or 6%, over the prior year. The increase reflects growth in banking related revenue across all non-U.S. regions as well as higher speculative-grade corporate debt issuance in the EMEA region. Additionally, there was higher revenue in 2010 for Indicative Ratings and Corporate Family Ratings in the EMEA region. These increases were partially offset by declines within the EMEA region in most asset classes within SFG coupled with lower rated issuance volumes for investment-grade corporate

debt.

Global CFG revenue of \$563.9 million in 2010 increased \$155.7 million from the prior year primarily due to higher rated issuance volumes in the high-yield corporate debt and bank loan sectors, coupled with an increase in Indicative Ratings and Corporate Family Ratings. The aforementioned growth was partially offset by declines in rated issuance for investment-grade corporate debt which reflects a strong prior year comparative period where many companies were refinancing their debt ahead of expected maturities.

Table of Contents

Transaction revenue represented 73% of total CFG revenue in 2010, compared to 64% in the prior year. In the U.S., revenue in 2010 was \$369.5 million, or 47% higher than the same period in 2009. This increase is primarily due to higher bank loan issuance reflecting the narrowing of credit spreads and the low interest rate environment in 2010 which has resulted in a high volume of refinancing activity coupled with increased issuance related to leveraged buy-out activity. Additionally, there was higher speculative-grade corporate debt issuance reflecting increased investor appetite for high-yield instruments as stability has gradually returned to the corporate credit markets. Internationally, revenue of \$194.4 million in 2010 increased 24% compared to the same period in 2009, driven primarily by growth in rated issuance volumes for speculative-grade corporate debt across all regions which reflects the aforementioned increased investor confidence in the high-yield markets coupled with higher revenue from Indicative Ratings and Corporate Family Ratings in the EMEA region. These increases were partially offset by declines in investment-grade rated issuance in EMEA reflecting a strong comparative prior year period where many companies were refinancing their debt ahead of expected maturities.

Global SFG revenue of \$290.8 million in 2010 decreased \$14.1 million compared to the same period in 2009 reflecting lower revenue in the derivatives and consumer asset-backed securities asset classes partially offset by increased rated issuance activity in U.S. CREF. Transaction revenue represented 43% of total SFG revenue in 2010 compared to 41% in the prior year period. In the U.S., revenue of \$142.9 million in 2010 increased \$0.8 million compared to the prior year reflecting growth in both commercial mortgage-backed securities and real estate investment trusts rated issuance resulting from the low interest rate environment and narrowing credit spreads in these sectors. The aforementioned growth was almost completely offset by continued declines in the derivatives sector as well as declines in consumer asset-backed securities issuance reflecting continued lack of investor demand as well as regulatory uncertainties pertaining to these asset classes. Non-U.S. revenue of \$147.9 million in 2010 decreased \$14.9 million compared to the prior year, reflecting declines in most asset classes within the EMEA region as uncertainties surrounding the EU sovereign debt markets at various times throughout 2010 has reduced investor demand for structured products.

Global FIG revenue of \$278.7 million in 2010 increased \$20.2 million from the prior year, primarily reflecting higher banking related revenue. Transaction revenue increased to 37% of global FIG revenue, up from 31% in the prior year period. In the U.S., revenue of \$114.4 million in 2010 increased \$7.1 million compared to the prior year. The growth over the prior year was driven by higher insurance related rated issuance which reflected insurers taking advantage of the low interest rate environment in 2010 to refinance debt ahead of expected maturities as well as issuance to fund acquisition activity. Outside the U.S., revenue in 2010 was \$164.3 million, or 9% higher than in the prior year, and was primarily due to growth in banking revenue across all non-U.S. regions, most notably in the Asia and Americas regions, compared to a challenging prior year period.

Global PPIF revenue was \$271.6 million in 2010, an increase of \$25.5 million compared to the same period in 2009, primarily reflecting increases in public and project finance revenue. Revenue generated from new transactions was 59% of total PPIF revenue in 2010, unchanged from the prior year period. In the U.S., revenue for the year ended December 31, 2010 of \$188.6 million increased 16% over the prior year primarily due to growth in public finance revenue which reflects modest price increases compared to the prior year coupled with issuance relating to the Build America Bond Program which was implemented in the U.S. as part of the American Recovery and Reinvestment Act of 2009. Additionally, there was higher project and infrastructure finance revenue as issuers took advantage of the low interest rate environment and the Build America Bond Program to fund capital expenditure needs. Outside the U.S., PPIF revenue decreased 1% compared to prior year reflecting declines in infrastructure and project finance revenue within the EMEA region due to uncertainties in the EU debt markets at various times during 2010 coupled with a strong comparative prior year period. These decreases were offset by higher project finance rated issuance in the Asia and Americas regions.

Operating and SG&A expenses in 2010 increased \$106.8 million compared to the prior year and reflected increases in compensation and non-compensation expenses of approximately \$63 million and \$45 million, respectively. The increase in compensation expenses relates to higher salaries reflecting annual merit increases, modest headcount growth within the ratings LOBs as well as support areas such as compliance and IT for which the costs are allocated to each segment based on a revenue-split methodology. Additionally, there was higher incentive compensation due to greater achievement against targeted results in 2010 compared to the achievement against targeted results in the prior year. Furthermore, there was a profit sharing contribution in 2010 reflecting the Company's diluted EPS growth over 2009. The increase in non-compensation expenses primarily reflects higher legal and litigation-related costs relating to ongoing matters and higher IT consulting costs relating to investments in technology infrastructure.

The restructuring charge of \$8.7 million in the prior year period reflects costs associated with the 2009 Restructuring Plan approved in the first quarter of 2009 as well as minor adjustments made to both the 2009 and 2007 restructuring plans.

Operating income in 2010 of \$649.7 million, which includes the intersegment royalty revenue, increased \$86.7 million from the prior year and reflects the 15% increase in total MIS revenue exceeding the 14% increase in operating expenses. Excluding the restructuring-related amounts in both periods, operating income in 2010 was \$649.8 million, an increase of \$78.1 million from the same period in 2009.

Table of Contents**Moody's Analytics**

The table below provides a summary of revenue and operating results, followed by further insight and commentary:

	Year Ended December 31,		% Change Favorable (Unfavorable)
	2010	2009	
Revenue:			
Research, data and analytics (RD&A)	\$ 425.0	\$ 413.6	3%
Risk management software (RMS)	173.2	145.1	19%
Professional services	28.8	20.8	38%
Total external revenue	627.0	579.5	8%
Intersegment license fees	9.3	10.6	(12%)
Total	636.3	590.1	8%
Expenses:			
Operating and SG&A (including intersegment expenses)	481.9	424.0	(14%)
Restructuring		8.8	100%
Depreciation and amortization	31.3	32.8	(5%)
Total	513.2	465.6	(10%)
Operating income	\$ 123.1	\$ 124.5	(1%)

Global MA revenue in 2010 increased \$47.5 million over the prior year primarily reflecting growth in all three LOBs. Recurring revenue, which includes subscriptions and software maintenance fees, comprised 85% of MA revenue in 2010, down from 89% in the same period of 2009.

Revenue in the U.S. increased \$16.4 million, or 6%, over the prior year and reflected growth across all LOBs, most notably in RMS. International revenue, which represented 56% of total MA revenue in both 2010 and 2009, increased 10% over the prior year reflecting growth in all LOBs.

Global RD&A revenue, which comprised over 67% of total MA revenue in both 2010 and 2009, increased \$11.4 million, or 3%, over the prior year. The increase reflects greater demand for products that support analysis for investment and commercial credit applications and also the gradual stabilization among capital markets customers as disruption from the global financial crisis recedes. Global RMS revenue in 2010 increased \$28.1 million over the prior year primarily due to the final delivery and client acceptance of software licenses and implementations, primarily from within the U.S and Asia regions. Revenue from professional services increased \$8.0 million compared to 2009, with approximately 40% of the growth related to the acquisition of CSI in the fourth quarter of 2010. Revenue in the RMS and professional services LOBs are subject to quarterly volatility resulting from the variable nature of project timing and the concentration of revenue in a relatively small number of engagements.

Operating and SG&A expenses in 2010, which include the intersegment royalty for the right to use and distribute content, data and products developed by MIS, increased \$57.9 million compared to 2009 reflecting both higher compensation and non-compensation costs of approximately \$45 million and \$12 million, respectively. The increase in compensation costs is primarily due to higher incentive compensation reflecting greater achievement against targeted results in 2010 compared to achievement against targeted results in the prior year coupled with a profit sharing contribution in 2010 reflecting the Company's diluted EPS growth over 2009. Additionally, there were higher salaries reflecting annual merit increases and headcount increases to support business growth coupled with an increase in commission expense compared to the prior year reflecting higher MA sales. The increase in non-compensation costs reflects higher legal and litigation-related costs relating to ongoing matters that Moody's Corporation is exposed to, which are allocated to MA as part of the allocation of overhead and corporate expenses which is based on a revenue-split methodology. Additionally, the increase in non-compensation expenses reflects higher travel and entertainment costs due to improving business conditions over the prior year.

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

The restructuring charge of \$8.8 million in the prior year period reflects severance costs associated with the 2009 Restructuring Plan approved in the first quarter of 2009, which includes costs related to the divestiture of non-strategic assets and contract termination costs for office closures as well as minor adjustments made to original estimates for the 2007 Restructuring Plan.

Table of Contents

Operating income of \$123.1 million in 2010, which includes the intersegment royalty expense, decreased \$1.4 million compared to the prior year, reflecting the \$47.6 million increase in total expenses exceeding the \$46.2 million increase in revenue. Excluding the 2009 restructuring charge and minor restructuring-related adjustments for both restructuring plans in 2009, operating income decreased \$10.2 million from the same period in 2009.

Non-GAAP Financial Measures:

In addition to its reported results, Moody's has included in this MD&A certain adjusted results that the SEC defines as non-GAAP financial measures. Management believes that such non-GAAP financial measures, when read in conjunction with the Company's reported results, can provide useful supplemental information for investors analyzing period to period comparisons of the Company's performance. These non-GAAP financial measures relate to expenses and adjustments made to both the Company's 2007 and 2009 Restructuring Plans and Legacy Tax Matters, further described in Note 11 and Note 18, respectively, to the Company's consolidated financial statements. The table below shows Moody's consolidated results for each of the years ended December 31, 2011, 2010 and 2009, adjusted to exclude the impact of the aforementioned items:

Year Ended December 31,

Amounts in millions, except per share

amounts	2011			2010			Non-GAAP Financial Measures
	As Reported	Legacy Tax (a)	Non-GAAP Financial Measures	As Reported	Restructuring (b)	Legacy Tax (a)

(b) To exclude amounts related to the 2009 restructuring charge as well as minor adjustments related to both the 2009 and 2007 restructuring charges. Additionally, includes the tax impacts of the aforementioned adjustments.

Table of Contents**MARKET RISK***Foreign exchange risk:*

Moody's maintains a presence in 27 countries outside the U.S. In 2011, approximately 47% and 51% of the Company's revenue and expenses, respectively, were in currencies other than the U.S. dollar, principally in the GBP and the euro. As such, the Company is exposed to market risk from changes in FX rates. As of December 31, 2011, approximately 55% of Moody's assets were located outside the United States making the Company susceptible to fluctuations in FX rates. The effects of translating assets and liabilities of non-U.S. operations with non-U.S. functional currencies to the U.S. dollar are charged or credited to the cumulative translation adjustment account in the consolidated statements of shareholders' equity (deficit).

The effects of revaluing assets and liabilities that are denominated in currencies other than an entity's functional currency are charged to other non-operating income (expense), net in the Company's consolidated statements of operations. Accordingly, the Company enters into foreign exchange forwards to mitigate the change in fair value on certain assets and liabilities denominated in currencies other than an entity's functional currency. If all foreign currencies in the Company's foreign exchange forward portfolio were to devalue 10% compared to the U.S. dollar, there would be an approximate \$3 million unfavorable impact to the fair value of the forward contracts. This unfavorable change in fair value of the foreign exchange forward contracts would be offset by favorable FX revaluation gains in future earnings on underlying assets and liabilities denominated in currencies other than an entity's functional currency. Additional information on the Company's forward contracts can be found in Note 5 to the consolidated financial statements located in Item 8 of this Form 10K.

Credit and Interest rate risk:

The Company's interest rate risk management objective is to reduce the funding cost and volatility to the Company and to alter the interest rate exposure to the desired risk profile. Moody's uses interest rate swaps as deemed necessary to assist in accomplishing this objective.

The Company is exposed to interest rate risk as it relates to its floating rate \$150 million 2008 Term Loan entered into on May 7, 2008. The Company entered into interest rate swaps with a total notional amount of \$150 million to protect against fluctuations in the LIBOR-based variable interest rate. These swaps are adjusted to fair market value based on prevailing interest rates at the end of each reporting period and fluctuations related to unrealized gains and losses are recorded into AOCI, while net interest payments are recorded in interest expense (income), net in the consolidated statements of operations. A hypothetical change of 100bps in the LIBOR-based swap rate would result in an approximate \$1 million change to the fair value of these interest rate swaps which would be recognized in the statement of operations over the swaps remaining contractual term. Additional information on this interest rate swap is disclosed in Note 5 to the consolidated financial statements located in Item 8 of this Form 10K.

Additionally, the Company is exposed to interest rate risk on its various outstanding fixed rate debt for which the fair value of the outstanding fixed rate debt fluctuates based on changes in interest rates. The Company entered into interest rate swaps with a total notional amount of \$300 million in the fourth quarter of 2010 to convert the fixed rate of interest on its \$300 million Series 2005-1 Notes to a floating interest rate based on the 3-month LIBOR. These swaps are adjusted to fair market value based on prevailing interest rates at the end of each reporting period and fluctuations are recorded as a reduction or addition to the carrying value of the Series 2005-1 Notes, while net interest payments are recorded as interest expense/income in the Company's consolidated statements of operations. A hypothetical change of 100bps in the LIBOR-based swap rate would result in an approximate \$12 million change to the fair value of these interest rate swaps. Additional information on this interest rate swap is disclosed in Note 5 to the consolidated financial statements located in Item 8 of this Form 10K.

Moody's aggregate cash and cash equivalents of \$760.0 million at December 31, 2011 consisted of approximately \$550 million located outside the U.S. Moody's cash equivalents consist of investments in high-quality investment-grade securities within and outside the U.S. with maturities of three months or less when purchased. The Company manages its credit risk exposure by allocating its cash equivalents among various money market mutual funds and issuers of high-grade commercial paper and by limiting the amount it can invest with any single issuer. Short-term investments primarily consist of certificates of deposit and high quality investment-grade corporate bonds in Korea.

Table of Contents**LIQUIDITY AND CAPITAL RESOURCES*****Cash Flow***

The Company is currently financing its operations, capital expenditures and share repurchases through cash flow from operations.

The following is a summary of the changes in the Company's cash flows followed by a brief discussion of these changes:

	Year Ended December 31,		\$ Change Favorable (unfavorable)	Year Ended December 31,		\$ Change Favorable (unfavorable)
	2011	2010		2010	2009	
Net cash provided by operating activities	\$ 803.3	\$ 653.3	\$ 150.0	\$ 653.3	\$ 643.8	\$ 9.5
Net cash used in investing activities	\$ (267.6)	\$ (228.8)	\$ (38.8)	\$ (228.8)	\$ (93.8)	\$ (135.0)
Net cash used in financing activities	\$ (417.7)	\$ (241.3)	\$ (176.4)	\$ (241.3)	\$ (348.8)	\$ 107.5

Net cash provided by operating activities**Year ended December 31, 2011 compared to the year ended December 31, 2010:**

The \$150.0 million increase in net cash flows provided by operating activities resulted from an increase in net income of \$64.6 million, which was further impacted by the following changes in assets and liabilities:

An approximate \$118 million increase in cash flows reflecting lower prepaid tax balances in 2011 resulting from both a refund received from the Internal Revenue Service in 2011 for tax overpayments made in 2010 as well as the application of a portion of the aforementioned overpayments to 2011 quarterly estimated tax payments;

A \$71.5 million increase in cash flow due to higher cash collections in the twelve months ended December 31, 2011 compared to the same period in 2010 reflecting the collection of fees billed in the fourth quarter of 2010 and the first half of 2011 when there was strong growth in rated issuance volumes within CFG, particularly in high-yield corporate debt and bank loans. A decline in rated issuance volumes in the second half of 2011 resulted in steeper declines in accounts receivable balances in 2011 compared to 2010. Approximately 25% and 21% of the Company's accounts receivable balance at December 31, 2011 and 2010, respectively, represent unbilled receivables which primarily reflect certain annual fees in MIS which are invoiced in arrears;

An approximate \$65 million decrease in cash flows reflecting higher incentive compensation payments made in 2011 compared to the prior year. The higher payouts in 2011 reflect greater achievement against targeted results in 2010 as compared to achievement against targets in 2009. Additionally, the decrease reflects a profit sharing contribution paid to eligible employees of the Company in 2011 which was based on the Company's diluted EPS growth from 2009 to 2010. There was no such contribution made in 2010;

A decrease in cash flow of approximately \$26 million relating to contributions and payments made by the Company to its funded and unfunded U.S. DBPPs and its U.S. other post-retirement plans in 2011;

The remaining decrease in cash flows of approximately \$13 million is due to changes in various other assets and liabilities.

Year ended December 31, 2010 compared to the year ended December 31, 2009:

The \$9.5 million increase in net cash flows provided by operating activities resulted from an increase in net income of \$106.3 million, which was partially offset by the following:

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

A \$27.1 million reduction in cash flow related to a non-cash benefit from deferred income taxes primarily related to basis differences on non-U.S. earnings that are permanently reinvested as well as accruals for legal and litigation-related costs;

A \$39.5 million reduction in cash flow due to changes in year-to-date accounts receivable balances from December 31, 2008 to December 31, 2009 compared to the same periods in 2010. The higher accounts receivable balances in 2010 reflect stronger fundamental ratings issuance in the fourth quarter of 2010 as compared to the same period in 2009 as well as timing of billings for certain software maintenance fees within the MA segment;

An approximate \$108 million reduction in cash flows reflecting higher prepaid tax balances in 2010, which are included in other current assets, resulting from higher than anticipated estimated tax payments in excess of required amounts;

A \$51.8 million increase in cash flows from UTBs primarily related to a \$51 million payment in 2009 for the settlement of a tax audit for the 2001-2007 tax years;

Table of Contents

An approximate \$29 million increase in cash flows reflecting higher incentive compensation accruals as compared to the prior year, which are included in accounts payable and accrued liabilities. This increase reflects greater achievement against targeted results in 2010 compared to achievement against targeted results in the prior year and an accrual for a profit sharing contribution based on the Company's diluted EPS growth over 2009.

Net cash used in investing activities

Year ended December 31, 2011 compared to the year ended December 31, 2010:

Net cash used in investing activities in 2011 increased \$38.8 million compared to the prior year period with the 2011 cash outflow primarily reflecting payments made, net of cash acquired, for Copal and B&H. The 2010 amount primarily reflects payments made, net of cash acquired, for the acquisition of CSI in the fourth quarter of 2010. The \$11.3 million reduction in capital expenditures compared to 2010 primarily reflects a decrease in costs relating to the build-out of the Canary Wharf leased facility in London, England in the current year as the project is now complete.

Year ended December 31, 2010 compared to the year ended December 31, 2009:

Net cash used in investing activities in 2010 increased \$135.0 million compared to the prior year period and reflected payments made, net of cash acquired, for the acquisition of CSI in the fourth quarter of 2010 of \$148.6 million. The \$11.7 million reduction in capital expenditures compared to 2009 reflects less costs relating to the build-out the Canary Wharf leased facility in London, England in the current year as the project nears completion partially offset by higher cash outlays relating to the Company's continued investment in IT infrastructure.

Net cash used in financing activities

Year ended December 31, 2011 compared to the year ended December 31, 2010:

The \$176.4 million increase in cash used in financing activities was primarily attributed to:

A \$110.2 million increase in treasury shares repurchased compared to 2010;

Higher dividends paid of \$22.4 million due to an increase in the March 2011 payout reflecting an increase in the Company's quarterly dividend from 10.5 cents to 11.5 cents per share of Moody's common stock as well as an increase from 11.5 cents per share to 14 cents per share for the June, September and December 2011 payout;

Proceeds received in August 2010 of \$496.9 million relating to the issuance of the 2010 Senior Notes;
Partially offset by:

A \$443.6 million decrease in net repayments on short-term borrowings under the Company's CP program. The Company had paid all outstanding CP Notes during 2010 and has no borrowings outstanding under the CP program or the revolving credit facility as of December 31, 2011.

Year ended December 31, 2010 compared to the year ended December 31, 2009:

The \$107.5 million decrease in cash used in financing activities was primarily attributed to:

Proceeds received of \$496.9 million relating to the issuance of the 2010 Senior Notes in August 2010;
Partially offset by:

A \$223.6 million increase in treasury shares repurchased. There were no share repurchases in 2009 as the Company instead utilized its operating cash flow to repay outstanding borrowings;

A \$169.6 million increase in net repayments in short-term borrowings under the Company's CP program and revolving credit facility.

Cash held in non-U.S. jurisdictions

The Company's aggregate cash and cash equivalents of \$760.0 million at December 31, 2011 consisted of approximately \$550 million located outside of the U.S. The cash held in the Company's non-U.S. operations contains approximately \$438 million in entities whose undistributed earnings are indefinitely reinvested in the Company's foreign operations. Accordingly, the Company has not provided deferred income taxes on these indefinitely reinvested earnings. A future distribution or change in assertion regarding reinvestment by the foreign subsidiaries relating to these earnings could result in additional tax liability to the Company. It is not practicable to determine the amount of the potential additional tax liability due to complexities in the tax laws and in the hypothetical calculations that would have to be made. The Company manages both its U.S. and international cash flow to maintain sufficient liquidity in all regions to effectively meet its operating needs.

Table of Contents***Future Cash Requirements***

The Company believes that it has the financial resources needed to meet its cash requirements and expects to have positive operating cash flow for the next twelve months. Cash requirements for periods beyond the next twelve months will depend, among other things, on the Company's profitability and its ability to manage working capital requirements. The Company may also borrow from various sources.

The Company remains committed to using its strong cash flow to create value for shareholders by investing in growing areas of the business, reinvesting in ratings quality initiatives, making selective acquisitions in related businesses, repurchasing stock and paying a dividend, all in the manner consistent with maintaining sufficient liquidity. In December of 2011, the Board of Directors of the Company declared a quarterly dividend of \$0.16 per share of Moody's common stock, payable on March 10, 2012 to shareholders of a record at the close of business on February 20, 2012. The continued payment of dividends at this rate, or at all, is subject to the discretion of the Board. Additionally, the Company expects to continue share repurchases in 2012 subject to available cash flow, market conditions and other capital allocation decisions. The Company repurchased \$333.8 million of shares in the year ended December 31, 2011. As of December 31, 2011, Moody's had \$0.9 billion of share repurchase authority remaining under its current program, which does not have an established expiration.

In January 2012, the Company paid approximately \$89 million to New York State for tax assessments, including interest, related to the completion of audits for the years 2004-2010. The Company had accrued for this liability as of December 31, 2011 and thus the payment is not expected to have a material impact to the provision for income taxes or Net Income in 2012. The Company anticipates making additional payments totaling \$30 to \$40 million in 2012 relating to the potential settlement of various tax audits.

As part of the Copal acquisition in November 2011, Moody's and the non-controlling shareholders entered into a put/call arrangement whereby the noncontrolling shareholders have the option to sell the portion of Copal that Moody's does not currently own and Moody's has the option to purchase this portion from the noncontrolling shareholders. The exercise price of this option was valued at \$68 million at the time of acquisition and will fluctuate based on the financial results of Copal subject to a floor exercise price of approximately \$46 million. There is no limit as to the amount of the strike price on the put/call option. It is estimated that the exercise of the put/call arrangement will take place in the next three to six years based on a Monte Carlo simulation. This put/call arrangement expires on the sixth anniversary date of the acquisition.

At December 31, 2011, Moody's had \$1.2 billion of outstanding debt, which is further described in the *Indebtedness* section of this MD&A below, with \$1.0 billion of additional capacity available. Principal payments on the 2008 Term Loan commenced in September 2010 and will continue through its maturity in accordance with the schedule of payments outlined in the *Indebtedness* section of this MD&A below.

On February 6, 2008, the Company entered into a 17.5 year operating lease agreement to occupy six floors of an office tower located in the Canary Wharf district of London, England. The total base rent of the Canary Wharf Lease over its 17.5-year term is approximately 134 million GBP, and the Company began making base rent payments in 2011. In addition to the base rent payments the Company will be obligated to pay certain customary amounts for its share of operating expenses and tax obligations. The total remaining lease payments as of December 31, 2011 are approximately 130 million GBP, of which approximately 7 million GBP will be paid in the next twelve months.

On October 20, 2006, the Company entered into an operating lease agreement with 7 World Trade Center, LLC for 589,945 square-feet of an office building located at 7WTC at 250 Greenwich Street, New York, New York, which is serving as Moody's headquarters. The 7WTC Lease has an initial term of 21 years with a total of 20 years of renewal options. The total base rent of 7WTC Lease over its initial 21-year term is approximately \$536 million including rent credits from the World Trade Center Rent Reduction Program promulgated by the Empire State Development Corporation. On March 28, 2007, the 7WTC lease agreement was amended for the Company to lease an additional 78,568 square-feet at 7WTC. The additional base rent is approximately \$106 million over a 20-year term. The total remaining lease payments as of December 31, 2011, including the aforementioned rent credits, are approximately \$536 million, of which approximately \$29 million will be paid during the next twelve months.

During the year ended December 31, 2012, the Company anticipates making contributions of \$17.5 million to its funded pension plan and anticipates making payments of \$3.0 million to its unfunded U.S. pension plans and \$0.8 million to its other U.S. post-retirement plans.

Table of Contents**INDEBTEDNESS**

The following table summarizes total indebtedness:

	December 31,	
	2011	2010
2007 Facility	\$	\$
Commercial paper		
Notes payable:		
Series 2005-1 Notes due 2015, including fair value of interest rate swap of \$11.5 million at 2011 and \$(3.7) million at 2010	311.5	296.3
Series 2007-1 Notes due in 2017	300.0	300.0
2010 Senior Notes, due 2020, net of unamortized discount of \$2.7 million and \$3.0 million in 2011 and 2010, respectively	497.3	497.0
2008 Term Loan, various payments through 2013	135.0	146.3
Total debt	1,243.8	1,239.6
Current portion	(71.3)	(11.3)
Total long-term debt	\$ 1,172.5	\$ 1,228.3

2007 Facility

On September 28, 2007, the Company entered into a \$1.0 billion five-year senior, unsecured revolving credit facility, expiring in September 2012. The 2007 Facility will serve, in part, to support the Company's CP Program described below. Interest on borrowings is payable at rates that are based on LIBOR plus a premium that can range from 16.0 to 40.0 basis points of the outstanding borrowing amount depending on the Debt/EBITDA ratio. The Company also pays quarterly facility fees, regardless of borrowing activity under the 2007 Facility. The quarterly fees for the 2007 Facility can range from 4.0 to 10.0 basis points per annum of the facility amount, depending on the Company's Debt/EBITDA ratio. The Company also pays a utilization fee of 5.0 basis points on borrowings outstanding when the aggregate amount outstanding exceeds 50% of the total facility. The 2007 Facility contains certain covenants that, among other things, restrict the ability of the Company and certain of its subsidiaries, without the approval of the lenders, to engage in mergers, consolidations, asset sales, transactions with affiliates and sale-leaseback transactions or to incur liens, as defined in the related agreement. The 2007 Facility also contains financial covenants that, among other things, require the Company to maintain a Debt/EBITDA ratio of not more than 4.0 to 1.0 at the end of any fiscal quarter.

Commercial Paper

On October 3, 2007, the Company entered into a private placement commercial paper program under which the Company may issue CP notes up to a maximum amount of \$1.0 billion. Amounts available under the CP Program may be re-borrowed. The CP Program is supported by the Company's 2007 Facility. The maturities of the CP Notes will vary, but may not exceed 397 days from the date of issue. The CP Notes are sold at a discount from par or, alternatively, sold at par and bear interest at rates that will vary based upon market conditions at the time of issuance. The rates of interest will depend on whether the CP Notes will be a fixed or floating rate. The interest on a floating rate may be based on the following: (a) certificate of deposit rate; (b) commercial paper rate; (c) the federal funds rate; (d) the LIBOR; (e) prime rate; (f) Treasury rate; or (g) such other base rate as may be specified in a supplement to the private placement agreement. The CP Program contains certain events of default including, among other things: non-payment of principal, interest or fees; entrance into any form of moratorium; and bankruptcy and insolvency events, subject in certain instances to cure periods.

Notes Payable

On November 4, 2011, in connection with the acquisition of Copal, a subsidiary of the Company issued a \$14.2 million non-interest bearing note to the sellers which represented a portion of the consideration transferred to acquire the Copal entities. If a seller subsequently transfers to the Company all of its shares, the Company must repay the seller its proportion of the principal on the later of (i) the fourth anniversary date of the note or (ii) within a time frame set forth in the acquisition agreement relating to the resolution of certain income tax uncertainties pertaining to the transaction. Otherwise, the Company must repay any amount outstanding on the earlier of (i) two business days subsequent to the exercise of the put/call option to acquire the remaining shares of Copal or (ii) the tenth anniversary date of the issuance of the note. The Company has the right to offset payment of the note against certain indemnification assets associated with UTPs related to the acquisition, which are more fully

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

discussed in Note 7. Accordingly, the Company has offset the liability for this note against the indemnification asset, thus no balance for this note is carried on the Company's consolidated balance sheet at December 31, 2011. In the event that the Company would not be required to settle amounts related

Table of Contents

to the UTPs, the Company would be required to pay the sellers the principal in accordance with the note agreement. The Company may prepay the note in accordance with certain terms set forth in the acquisition agreement.

On August 19, 2010, the Company issued \$500 million aggregate principal amount of senior unsecured notes in a public offering. The 2010 Senior Notes bear interest at a fixed rate of 5.50% and mature on September 1, 2020. Interest on the 2010 Senior Notes will be due semi-annually on September 1 and March 1 of each year, commencing March 1, 2011. The Company may prepay the 2010 Senior Notes, in whole or in part, at any time at a price equal to 100% of the principal amount being prepaid, plus accrued and unpaid interest and a Make-Whole Amount. Additionally, at the option of the holders of the notes, the Company may be required to purchase all or a portion of the notes upon occurrence of a Change of Control Triggering Event, as defined in the Indenture, at a price equal to 101% of the principal amount thereof, plus accrued and unpaid interest to the date of purchase. The Indenture contains covenants that limit the ability of the Company and certain of its subsidiaries to, among other things, incur or create liens and enter into sale and leaseback transactions. In addition, the Indenture contains a covenant that limits the ability of the Company to consolidate or merge with another entity or to sell all or substantially all of its assets to another entity. The Indenture contains customary default provisions. In addition, an event of default will occur if the Company or certain of its subsidiaries fail to pay the principal of any indebtedness (as defined in the Indenture) when due at maturity in an aggregate amount of \$50 million or more, or a default occurs that results in the acceleration of the maturity of the Company's or certain of its subsidiaries' indebtedness in an aggregate amount of \$50 million or more. Upon the occurrence and during the continuation of an event of default under the Indenture, the notes may become immediately due and payable either automatically or by the vote of the holders of more than 25% of the aggregate principal amount of all of the notes then outstanding.

On September 7, 2007, the Company issued and sold through a private placement transaction, \$300.0 million aggregate principal amount of its 6.06% Series 2007-1 Senior Unsecured Notes due 2017 pursuant to the 2007 Agreement. The Series 2007-1 Notes have a ten-year term and bear interest at an annual rate of 6.06%, payable semi-annually on March 7 and September 7. Under the terms of the 2007 Agreement, the Company may, from time to time within five years, in its sole discretion, issue additional series of senior notes in an aggregate principal amount of up to \$500.0 million pursuant to one or more supplements to the 2007 Agreement. The Company may prepay the Series 2007-1 Notes, in whole or in part, at any time at a price equal to 100% of the principal amount being prepaid, plus accrued and unpaid interest and a Make Whole Amount. The 2007 Agreement contains covenants that limit the ability of the Company, and certain of its subsidiaries to, among other things: enter into transactions with affiliates, dispose of assets, incur or create liens, enter into any sale-leaseback transactions, or merge with any other corporation or convey, transfer or lease substantially all of its assets. The Company must also not permit its Debt/EBITDA ratio to exceed 4.0 to 1.0 at the end of any fiscal quarter.

On September 30, 2005, the Company issued and sold through a private placement transaction, \$300.0 million aggregate principal amount of its Series 2005-1 Senior Unsecured Notes due 2015 pursuant to the 2005 Agreement. The Series 2005-1 Notes have a ten-year term and bear interest at an annual rate of 4.98%, payable semi-annually on March 30 and September 30. Proceeds from the sale of the Series 2005-1 Notes were used to refinance \$300.0 million aggregate principal amount of the Company's outstanding 7.61% senior notes which matured on September 30, 2005. In the event that Moody's pays all, or part, of the Series 2005-1 Notes in advance of their maturity, such prepayment will be subject to a Make Whole Amount. The Series 2005-1 Notes are subject to certain covenants that, among other things, restrict the ability of the Company and certain of its subsidiaries, without the approval of the lenders, to engage in mergers, consolidations, asset sales, transactions with affiliates and sale-leaseback transactions or to incur liens, as defined in the related agreements.

2008 Term Loan

On May 7, 2008, Moody's entered into a five-year, \$150.0 million senior unsecured term loan with several lenders. Proceeds from the loan were used to pay off a portion of the CP outstanding. Interest on borrowings under the 2008 Term Loan is payable quarterly at rates that are based on LIBOR plus a margin that can range from 125 basis points to 175 basis points depending on the Company's Debt/EBITDA ratio. The outstanding borrowings shall amortize in accordance with the schedule of payments set forth in the 2008 Term Loan outlined in the table below.

The 2008 Term Loan contains restrictive covenants that, among other things, restrict the ability of the Company to engage or to permit its subsidiaries to engage in mergers, consolidations, asset sales, transactions with affiliates and sale-leaseback transactions or to incur, or permit its subsidiaries to incur, liens, in each case, subject to certain exceptions and limitations. The 2008 Term Loan also limits the amount of debt that subsidiaries of the Company may incur. In addition, the 2008 Term Loan contains a financial covenant that requires the Company to maintain a Debt/EBITDA ratio of not more than 4.0 to 1.0 at the end of any fiscal quarter.

Table of Contents

The principal payments due on the Company's long-term borrowings for each of the next five years are presented in the table below:

Year Ending December 31,	2008 Term Loan	Series 2005-1 Notes	Total
2012	\$ 71.3	\$	\$ 71.3
2013	63.7		63.7
2014			
2015		300.0	300.0
2016			
Total	\$ 135.0	\$ 300.0	\$ 435.0

In the fourth quarter of 2010, the Company entered into interest rate swaps with a total notional amount of \$300 million which will convert the fixed rate of interest on the Series 2005-1 Notes to a floating LIBOR-based interest rate. Also, on May 7, 2008, the Company entered into interest rate swaps with a total notional amount of \$150 million to protect against fluctuations in the LIBOR-based variable interest rate on the 2008 Term Loan. Both of these interest rate swaps are more fully discussed in Note 5 above.

INTEREST EXPENSE, NET

The following table summarizes the components of interest as presented in the consolidated statements of operations:

	Year Ended December 31,		
	2011	2010	2009
Income	\$ 5.3	\$ 3.1	\$ 2.5
Expense on borrowings	(65.5)	(52.2)	(45.5)
UTBs and other tax related interest	(8.7)	(7.7)	1.6
Legacy Tax (a)	3.7	2.5	6.5
Interest capitalized	3.1	1.8	1.5
Total	\$ (62.1)	\$ (52.5)	\$ (33.4)
Interest paid	\$ 67.2	\$ 44.0	\$ 46.1

(a) Represents a reduction of accrued interest related to the favorable resolution of Legacy Tax Matters, further discussed in Note 18 to the consolidated financial statements.

Net interest expense of \$33.4 million in 2009 reflects a reduction of approximately \$12 million related to tax and tax-related liabilities.

At December 31, 2011, the Company was in compliance with all covenants contained within all of the debt agreements. In addition to the covenants described above, the 2007 Facility, the 2005 Agreement, the 2007 Agreement, the 2010 Senior Notes and the 2008 Term Loan contain cross default provisions whereby default under one of the aforementioned debt instruments could in turn permit lenders under other debt instruments to declare borrowings outstanding under those instruments to be immediately due and payable.

The Company's long-term debt, including the current portion, is recorded at cost except for the Series 2005-1 Notes which are carried at cost adjusted for the fair value of an interest rate swap used to hedge the fair value of the note. The fair value and carrying value of the Company's long-term debt as of December 31, 2011 and 2010 is as follows:

December 31, 2011

December 31, 2010

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
Series 2005-1 Notes*	\$ 311.5	\$ 316.5	\$ 296.3	\$ 310.6
Series 2007-1 Notes	300.0	332.7	300.0	321.3
2010 Senior Notes	497.3	525.6	497.0	492.1
2008 Term Loan	135.0	135.0	146.3	146.3
Total	\$ 1,243.8	\$ 1,309.8	\$ 1,239.6	\$ 1,270.3

* The carrying amount includes an \$11.5 million and (\$3.7) million fair value adjustment on an interest rate hedge at December 31, 2011 and 2010, respectively.

Table of Contents

The fair value of the Company's 2010 Senior Notes is based on quoted market prices. The fair value of the remaining long-term debt, which is not publicly traded, is estimated using discounted cash flows based on prevailing interest rates available to the Company for borrowings with similar maturities.

Management may consider pursuing additional long-term financing when it is appropriate in light of cash requirements for operations, share repurchases and other strategic opportunities which would result in higher financing costs.

Off-Balance Sheet Arrangements

At December 31, 2011, Moody's did not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as special purpose or variable interest entities where Moody's is the primary beneficiary, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. As such, Moody's is not exposed to any financing, liquidity, market or credit risk that could arise if it had engaged in such relationships.

Contractual Obligations

The following table presents payments due under the Company's contractual obligations as of December 31, 2011:

(in millions)	Total	Payments Due by Period			
		Less Than 1 Year	1-3 Years	3-5 Years	Over 5 Years
Indebtedness ⁽¹⁾	\$ 1,638.5	\$ 132.3	\$ 176.3	\$ 401.6	\$ 928.3
Operating lease obligations	851.7	73.6	134.1	106.2	537.8
Purchase obligations	124.3	54.0	69.8	0.5	
Contingent consideration related to acquisitions ⁽²⁾	2.5			2.5	
Pension obligations ⁽³⁾	106.1	21.3	9.8	11.4	63.6
Payment of UTPs ⁽⁴⁾	119.9	119.9			
Total⁽⁵⁾	\$ 2,843.0	\$ 401.1	\$ 390.0	\$ 522.2	\$ 1,529.7

- (1) Reflects principal payments, related interest and applicable fees due on the 2008 Term Loan, the Series 2005-1 Notes, the Series 2007-1 Notes, the 2010 Senior Notes, borrowings under the CP Program and the 2007 Facility, as described in Note 15 to the consolidated financial statements
- (2) Reflects a \$2.5 million contingent cash payment related to the November 18, 2010 acquisition of CSI Global Education, Inc. The cash payment is dependent upon the achievement of a certain contractual milestone by January 2016
- (3) Reflects projected benefit payments for the next ten years relating to the Company's U.S. unfunded Post-Retirement Benefit Plans described in Note 12 to the condensed consolidated financial statements
- (4) Reflects the projected settlement of UTPs in various tax jurisdictions
- (5) The table above does not include the Company's net long-term tax liabilities of \$138.2 million relating to UTP and Legacy Tax Matters, since the expected cash outflow of such amounts by period cannot be reasonably estimated. The table above does not include the following relating to the acquisition of Copal; (i) the \$14.2 million note payable as described in Note 15 to the consolidated financial statements, (ii) the \$6.8 million contingent consideration obligation and the (iii) the \$60.5 million Redeemable Noncontrolling Interest, as the expected cash outflow of such amounts by period cannot be reasonably estimated.

2012 OUTLOOK

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

Moody's outlook for 2012 is based on assumptions about many macroeconomic and capital market factors, including interest rates, corporate profitability and business investment spending, merger and acquisition activity, and consumer borrowing and securitization. There is an important degree of uncertainty surrounding these assumptions and, if actual conditions differ from these assumptions, Moody's results for the year may differ materially from the current outlook. The Company's guidance assumes foreign currency translation at end-of-quarter exchange rates.

For Moody's overall, the Company expects full-year 2012 revenue to grow in the high-single to low-double-digit percent range. Full-year 2012 expenses are also projected to increase in the high-single to low-double-digit percent range. Full-year 2012 operating margin is projected to be approximately 39 percent. The effective tax rate is expected to be approximately 33 percent. The Company expects diluted earnings per share for full-year 2012 in the range of \$2.62 to \$2.72.

For the global MIS business, revenue for full-year 2012 is expected to increase in the mid-single-digit percent range. Within the U.S., MIS revenue is expected to increase in the low-double-digit percent range, while non-U.S. revenue is expected to be about flat. Corporate finance revenue is forecasted to grow in the high-single-digit percent range. Revenue from each of structured finance and financial institutions is projected to be flat to slightly down, while public, project and infrastructure finance revenue is expected to increase in the low-teens percent range.

For MA, full-year 2012 revenue is expected to increase in the high-teens percent range both in the U.S. and outside the U.S. Revenue growth is projected in the mid-single-digit percent range for research, data and analytics and in the low 20's percent range for risk

Table of Contents

management software, reflecting growth in the core business as well as the December 2011 acquisition of Barrie & Hibbert. Professional services revenue is projected to grow by approximately 70%, inclusive of revenue from the late 2011 acquisition of a majority stake in Copal Partners and continued growth in the Company's legacy businesses.

RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS*Adopted:*

In January 2010, the FASB issued ASU No. 2010-06, *Improving Disclosures about Fair Value Measurements*. The standard requires disclosure regarding transfers in and out of Level 1 and Level 2 classifications within the fair value hierarchy as well as requiring further detail of activity within the Level 3 category of the fair value hierarchy. The standard also requires disclosures regarding the fair value for each class of assets and liabilities, which is a subset of assets or liabilities within a line item in a company's balance sheet. Additionally, the standard requires further disclosures surrounding inputs and valuation techniques used in fair value measurements. The disclosures and clarifications of existing disclosures set forth in this ASU are effective for interim and annual reporting periods beginning after December 15, 2009, except for the additional disclosures regarding Level 3 fair value measurements, for which the effective date is for fiscal years and interim periods within those years beginning after December 15, 2010. The Company has fully adopted all provisions of this ASU as of January 1, 2011 and the implementation did not have a material impact on the Company's consolidated financial statements.

In December 2010, the FASB issued ASU No. 2010-29, *Disclosure of Supplementary Pro Forma Information for Business Combinations*. The objective of this ASU is to address diversity in practice regarding proforma disclosures for revenue and earnings of the acquired entity. The amendments in this ASU specify that if a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination(s) that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. The amendments in this ASU also expand the supplemental pro forma disclosures under ASC Topic 805 to include a description of the nature and amount of material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. The amendments in this ASU are effective for fiscal years beginning on or after December 15, 2010. The Company will conform to the disclosure requirements set forth in this ASU for any future business combinations for which the impact to the consolidated statement of operations would be material.

In September 2011, the FASB issued ASU No. 2011-08, *Intangibles—Goodwill and Other (Topic 350)*. The objective of this ASU is to simplify how entities test goodwill for impairment. This ASU permits an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test described in Topic 350 of the ASC. The more-likely-than-not threshold is defined as having a likelihood of more than 50 percent. Prior to the issuance of this ASU, an entity was required to test goodwill for impairment, on at least an annual basis, by comparing the fair value of a reporting unit with its carrying amount, including goodwill (step one). If the fair value of a reporting unit was less than its carrying amount, then the second step of the test would be performed to measure the amount of the impairment loss, if any. Under the amendments in this ASU, an entity is not required to calculate the fair value of a reporting unit unless the entity determines that it is more likely than not that its fair value is less than its carrying amount. The amendments in this ASU are effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011 with early adoption permitted. The Company adopted this ASU in the fourth quarter of 2011 and applied its provisions in assessing the potential goodwill impairment which is performed at least annually as of November 30.

Not yet adopted:

In May 2011, the FASB issued ASU No. 2011-04, *Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*. The objective of this ASU is to achieve common fair value measurement and disclosure requirements in U.S. GAAP and IFRS. The amendments in this ASU change the wording used to describe current requirements in U.S. GAAP for measuring fair value and for financial statement disclosure about fair value measurements. Some of the amendments in the ASU clarify the FASB's intent or change a particular principle or requirement pertaining to the application of existing fair value measurement requirements or for disclosing information about fair value measurements. The amendments in this ASU are required to be applied prospectively and are effective for fiscal years beginning after December 15, 2011. Early adoption is not permitted. The Company is currently evaluating the potential impact, if any, of the implementation of this ASU on its consolidated financial statements.

In June 2011, the FASB issued ASU No. 2011-05, *Presentation of Comprehensive Income*. Under the amendments in this ASU, an entity has two options for presenting its total comprehensive income: to show its components along with the components of net income in a single continuous statement, or in two separate but consecutive statements. The amendments in this ASU are required to be applied retrospectively and are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011, with early adoption permitted. In December 2011, the FASB issued ASU No. 2011-12, *Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of*

Items Out of Accumulated Other Comprehensive Income , which indefinitely defers the

Table of Contents

requirement in ASU No. 2011-05 to present on the face of the financial statements reclassification adjustments for items that are reclassified from OCI to net income in the statement(s) where the components of net income and the components of OCI are presented. All other provisions of this ASU, which are to be applied retrospectively, are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. The Company intends to adopt all provisions that were not deferred beginning with its Form 10Q for the three months ended March 31, 2012. The adoption of this ASU will not have any impact on the Company's consolidated financial statements other than revising the presentation of the components of comprehensive income.

CONTINGENCIES

From time to time, Moody's is involved in legal and tax proceedings, governmental investigations, claims and litigation that are incidental to the Company's business, including claims based on ratings assigned by MIS. Moody's is also subject to ongoing tax audits in the normal course of business. Management periodically assesses the Company's liabilities and contingencies in connection with these matters based upon the latest information available. Moody's discloses material pending legal proceedings pursuant to SEC rules and other pending matters as it may determine to be appropriate.

Following the events in the U.S. subprime residential mortgage sector and the credit markets more broadly over the last several years, MIS and other credit rating agencies are the subject of intense scrutiny, increased regulation, ongoing investigation, and civil litigation. Legislative, regulatory and enforcement entities around the world are considering additional legislation, regulation and enforcement actions, including with respect to MIS's compliance with newly imposed regulatory standards. Moody's has received subpoenas and inquiries from states attorneys general and other governmental authorities and is responding to such investigations and inquiries.

In addition, the Company is facing litigation from market participants relating to the performance of MIS rated securities. Although Moody's in the normal course experiences such litigation, the volume and cost of defending such litigation has significantly increased following the events in the U.S. subprime residential mortgage sector and the credit markets more broadly over the last several years.

On June 27, 2008, the Brockton Contributory Retirement System, a purported shareholder of the Company's securities, filed a purported shareholder derivative complaint on behalf of the Company against its directors and certain senior officers, and the Company as nominal defendant, in the Supreme Court of the State of New York, County of New York. The plaintiff asserts various causes of action relating to the named defendants' oversight of MIS's ratings of RMBS and constant-proportion debt obligations, and their participation in the alleged public dissemination of false and misleading information about MIS's ratings practices and/or a failure to implement internal procedures and controls to prevent the alleged wrongdoing. The plaintiff seeks compensatory damages, restitution, disgorgement of profits and other equitable relief. On July 2, 2008, Thomas R. Flynn, a purported shareholder of the Company's securities, filed a similar purported shareholder derivative complaint on behalf of the Company against its directors and certain senior officers, and the Company as nominal defendant, in the Supreme Court of the State of New York, County of New York, asserting similar claims and seeking the same relief. The cases have been consolidated and plaintiffs filed an amended consolidated complaint in November 2008. The Company removed the consolidated action to the United States District Court for the Southern District of New York in December 2008. In January 2009, the plaintiffs moved to remand the case to the Supreme Court of the State of New York, which the Company opposed. On February 23, 2010, the court issued an opinion remanding the case to the Supreme Court of New York. On October 30, 2008, the Louisiana Municipal Police Employees Retirement System, a purported shareholder of the Company's securities, also filed a shareholder derivative complaint on behalf of the Company against its directors and certain officers, and the Company as a nominal defendant, in the U.S. District Court for the Southern District of New York. This complaint also asserts various causes of action relating to the Company's ratings of RMBS, CDO and constant-proportion debt obligations, and named defendants' participation in the alleged public dissemination of false and misleading information about MIS's ratings practices and/or a failure to implement internal procedures and controls to prevent the alleged wrongdoing. On December 9, 2008, Rena Nadoff, a purported shareholder of the Company, filed a shareholder derivative complaint on behalf of the Company against its directors and its CEO, and the Company as a nominal defendant, in the Supreme Court of the State of New York. The complaint asserts a claim for breach of fiduciary duty in connection with alleged overrating of asset-backed securities and underrating of municipal securities. On October 20, 2009, the Company moved to dismiss or stay the action in favor of related federal litigation. On January 26, 2010, the court entered a stipulation and order, submitted jointly by the parties, staying the Nadoff litigation pending coordination and prosecution of similar claims in the above and below described federal derivative actions. On July 6, 2009, W. A. Sokolowski, a purported shareholder of the Company, filed a purported shareholder derivative complaint on behalf of the Company against its directors and current and former officers, and the Company as a nominal defendant, in the United States District Court for the Southern District of New York. The complaint asserts claims relating to alleged mismanagement of the Company's processes for rating structured finance transactions, alleged insider trading and causing the Company to buy back its own stock at artificially inflated prices.

Two purported class action complaints have been filed by purported purchasers of the Company's securities against the Company and certain of its senior officers, asserting claims under the federal securities laws. The first was filed by Raphael Nach in the U.S. District Court for the Northern District of Illinois on July 19, 2007. The second was filed by Teamsters Local 282 Pension Trust Fund in the U.S.

Table of Contents

District Court for the Southern District of New York on September 26, 2007. Both actions have been consolidated into a single proceeding entitled *In re Moody's Corporation Securities Litigation* in the U.S. District Court for the Southern District of New York. On June 27, 2008, a consolidated amended complaint was filed, purportedly on behalf of all purchasers of the Company's securities during the period February 3, 2006 through October 24, 2007. Plaintiffs allege that the defendants issued false and/or misleading statements concerning the Company's business conduct, business prospects, business conditions and financial results relating primarily to Moody's ratings of structured finance products including RMBS, CDO and constant-proportion debt obligations. The plaintiffs seek an unspecified amount of compensatory damages and their reasonable costs and expenses incurred in connection with the case. The Company moved for dismissal of the consolidated amended complaint in September 2008. On February 23, 2009, the court issued an opinion dismissing certain claims and sustaining others. On January 22, 2010, plaintiffs moved to certify a class of individuals who purchased Moody's Corporation common stock between February 3, 2006 and October 24, 2007, which the Company opposed. On March 31, 2011, the court issued an opinion denying plaintiffs' motion to certify the proposed class. On April 14, 2011, plaintiffs filed a petition in the United States Court of Appeals for the Second Circuit seeking discretionary permission to appeal the decision. The Company filed its response to the petition on April 25, 2011. On July 20, 2011, the Second Circuit issued an order denying plaintiffs' petition for leave to appeal.

For claims, litigation and proceedings not related to income taxes, where it is both probable that a liability is expected to be incurred and the amount of loss can be reasonably estimated, the Company records liabilities in the consolidated financial statements and periodically adjusts these as appropriate. In other instances, because of uncertainties related to the probable outcome and/or the amount or range of loss, management does not record a liability but discloses the contingency if significant. As additional information becomes available, the Company adjusts its assessments and estimates of such matters accordingly. In view of the inherent difficulty of predicting the outcome of litigation, regulatory, enforcement and similar matters and contingencies, particularly where the claimants seek large or indeterminate damages or where the parties assert novel legal theories or the matters involve a large number of parties, the Company cannot predict what the eventual outcome of the pending matters will be or the timing of any resolution of such matters. The Company also cannot predict the impact (if any) that any such matters may have on how its business is conducted, on its competitive position or on its financial position, results of operations or cash flows. As the process to resolve the pending matters referred to above progresses, management will continue to review the latest information available and assess its ability to predict the outcome of such matters and the effects, if any, on its operations and financial condition. However, in light of the inherent uncertainties involved in these matters, the large or indeterminate damages sought in some of them and the novel theories of law asserted, an estimate of the range of possible losses cannot be made at this time. For income tax matters, the Company employs the prescribed methodology of Topic 740 of the ASC which requires a company to first determine whether it is more-likely-than-not (defined as a likelihood of more than fifty percent) that a tax position will be sustained based on its technical merits as of the reporting date, assuming that taxing authorities will examine the position and have full knowledge of all relevant information. A tax position that meets this more-likely-than-not threshold is then measured and recognized at the largest amount of benefit that is greater than fifty percent likely to be realized upon effective settlement with a taxing authority.

Legacy Tax Matters

Moody's continues to have exposure to potential liabilities arising from Legacy Tax Matters. As of December 31, 2011, Moody's has recorded liabilities for Legacy Tax Matters totaling \$54.6 million. This includes liabilities and accrued interest due to New D&B arising from the 2000 Distribution Agreement. It is possible that the ultimate liability for Legacy Tax Matters could be greater than the liabilities recorded by the Company, which could result in additional charges that may be material to Moody's future reported results, financial position and cash flows.

The following summary of the relationships among Moody's, New D&B and their predecessor entities is important in understanding the Company's exposure to the Legacy Tax Matters.

In November 1996, The Dun & Bradstreet Corporation separated into three separate public companies: The Dun & Bradstreet Corporation, ACNielsen Corporation and Cognizant Corporation. In June 1998, The Dun & Bradstreet Corporation separated into two separate public companies: Old D&B and R.H. Donnelley Corporation. During 1998, Cognizant separated into two separate public companies: IMS Health Incorporated and Nielsen Media Research, Inc. In September 2000, Old D&B separated into two separate public companies: New D&B and Moody's.

Old D&B and its predecessors entered into global tax planning initiatives in the normal course of business. These initiatives are subject to normal review by tax authorities. Old D&B and its predecessors also entered into a series of agreements covering the sharing of any liabilities for payment of taxes, penalties and interest resulting from unfavorable IRS determinations on certain tax matters, and certain other potential tax liabilities, all as described in such agreements. Further, in connection with the 2000 Distribution and pursuant to the terms of the 2000 Distribution Agreement, New D&B and Moody's have agreed on the financial responsibility for any potential liabilities related to these Legacy Tax Matters.

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

At the time of the 2000 Distribution, New D&B paid Moody's \$55.0 million for 50% of certain anticipated future tax benefits through 2012. In the event that these tax benefits are not claimed or otherwise not realized by New D&B, or there is an IRS audit of New D&B

Table of Contents

impacting these tax benefits, Moody's would be required to repay to New D&B an amount equal to the discounted value of its share of the related future tax benefits as well as its share of any tax liability incurred by New D&B. In June 2011, the statute of limitations for New D&B relating to the 2004 tax year expired. As a result, in the second quarter of 2011, Moody's recorded a reduction of accrued interest expense of \$2.8 million (\$1.7 million, net of tax) and an increase in other non-operating income of \$6.4 million, relating to amounts due to New D&B. As of December 31, 2011, Moody's liability with respect to this matter totaled \$52.6 million.

Additionally, in April 2011, Moody's received a refund of \$0.9 million (\$0.6 million, net of tax) for interest assessed related to pre-spinoff tax years. Coupled with the \$6.4 million noted above (and related interest of \$1.7 million), net legacy tax benefits were \$8.7 million in the year ended December 31, 2011 of which \$7 million was deemed to be unusual in nature.

In 2005, settlement agreements were executed with the IRS with respect to certain Legacy Tax Matters related to the years 1989-1990 and 1993-1996. With respect to these settlements, Moody's and New D&B believed that IMS Health and NMR did not pay their full share of the liability to the IRS under the terms of the applicable separation agreements between the parties. Moody's and New D&B subsequently paid these amounts to the IRS and commenced arbitration proceedings against IMS Health and NMR to resolve this dispute. Pursuant to these arbitration proceedings, the Company received \$10.8 million (\$6.5 million as a reduction of interest expense and \$4.3 million as a reduction of tax expense) in 2009. The aforementioned settlement payment resulted in net income benefits of \$8.2 million in 2009. The Company continues to carry a \$2 million liability for this matter.

In 2006, New D&B and Moody's each deposited \$39.8 million with the IRS in order to stop the accrual of statutory interest on potential tax deficiencies with respect to the 1997 through 2002 tax years. In 2007, New D&B and Moody's requested a return of that deposit. The IRS applied a portion of the deposit in satisfaction of an assessed deficiency and returned the balance to the Company. Moody's subsequently pursued a refund for a portion of the outstanding amount. In May 2010, the IRS refunded \$5.2 million to the Company for the 1997 tax year, which included interest of approximately \$2.5 million resulting in an after-tax benefit of \$4.6 million.

Forward-Looking Statements

Certain statements contained in this annual report on Form 10-K are forward-looking statements and are based on future expectations, plans and prospects for the Company's business and operations that involve a number of risks and uncertainties. Such statements involve estimates, projections, goals, forecasts, assumptions and uncertainties that could cause actual results or outcomes to differ materially from those contemplated, expressed, projected, anticipated or implied in the forward-looking statements. Those statements appear at various places throughout this annual report on Form 10-K, including in the sections entitled 2012 Outlook and Contingencies under Item 7. MD&A, commencing on page 29 of this annual report on Form 10-K, under Legal Proceedings in Part I, Item 3, of this Form 10-K, and elsewhere in the context of statements containing the words believe, expect, anticipate, intend, plan, will, predict, potential, continue, strategy, forecast, project, estimate, should, could, may and similar expressions or words and variations thereof relating to the Company's views on events, trends and contingencies. Stockholders and investors are cautioned not to place undue reliance on these forward-looking statements. The forward-looking statements and other information are made as of the date of this annual report on Form 10-K, and the Company undertakes no obligation (nor does it intend) to publicly supplement, update or revise such statements on a going-forward basis, whether as a result of subsequent developments, changed expectations or otherwise. In connection with the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, the Company is identifying examples of factors, risks and uncertainties that could cause actual results to differ, perhaps materially, from those indicated by these forward-looking statements.

Those factors, risks and uncertainties include, but are not limited to, the current world-wide credit market disruptions and economic slowdown, which is affecting and could continue to affect the volume of debt and other securities issued in domestic and/or global capital markets; other matters that could affect the volume of debt and other securities issued in domestic and/or global capital markets, including credit quality concerns, changes in interest rates and other volatility in the financial markets; the uncertain effectiveness and possible collateral consequences of U.S. and foreign government initiatives to respond to the economic slowdown; concerns in the marketplace affecting our credibility or otherwise affecting market perceptions of the integrity or utility of independent agency ratings; the introduction of competing products or technologies by other companies; pricing pressure from competitors and/or customers; the impact of regulation as an NRSRO, the potential for new U.S., state and local legislation and regulations, including provisions in the recently enacted Financial Reform Act and anticipated regulations resulting from that law; the potential for increased competition and regulation in the EU and other foreign jurisdictions; exposure to litigation related to our rating opinions, as well as any other litigation to which the Company may be subject from time to time; provisions in the Financial Reform Act legislation, and potential EU regulations, modifying the pleading and liability standards applicable to credit rating agencies in a manner adverse to rating agencies; the possible loss of key employees; failures or malfunctions of our operations and infrastructure; the outcome of any review by controlling tax authorities of the Company's global tax planning initiatives; the outcome of those Legacy Tax Matters and legal contingencies that relate to the Company, its predecessors and their affiliated companies for which Moody's has assumed portions of the financial responsibility; the ability of the Company to successfully integrate acquired businesses; currency and foreign exchange volatility; and a decline in the demand for credit risk management tools by financial institutions. These factors, risks and uncertainties

as well as other

risks and uncertainties that could cause Moody's actual results to differ materially from those contemplated, expressed, projected, anticipated or implied in the forward-looking statements are described in greater detail under "Risk Factors" in Part I, Item 1A of this annual report on Form 10-K, and in other filings made by the Company from time to time with the SEC or in materials incorporated herein or therein. Stockholders and investors are cautioned that the occurrence of any of these factors, risks and uncertainties may cause the Company's actual results to differ materially from those contemplated, expressed, projected, anticipated or implied in the forward-looking statements, which could have a material and adverse effect on the Company's business, results of operations and financial condition. New factors may emerge from time to time, and it is not possible for the Company to predict new factors, nor can the Company assess the potential effect of any new factors on it.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Information in response to this Item is set forth under the caption "Market Risk" in Part II, Item 7 on page 48 of this annual report on Form 10-K.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management of Moody's Corporation is responsible for establishing and maintaining adequate internal control over financial reporting and for the assessment of the effectiveness of internal control over financial reporting. As defined by the SEC in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, internal control over financial reporting is a process designed by, or under the supervision of, the Company's principal executive and principal financial officers, or persons performing similar functions, and effected by the Company's Board, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Moody's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of Moody's management and directors; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management of the Company has undertaken an assessment of the design and operational effectiveness of the Company's internal control over financial reporting as of December 31, 2011 based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. The COSO framework is based upon five integrated components of control: risk assessment, control activities, control environment, information and communications and ongoing monitoring.

Based on the assessment performed, management has concluded that Moody's maintained effective internal control over financial reporting as of December 31, 2011.

The effectiveness of our internal control over financial reporting as of December 31, 2011 has been audited by KPMG LLP, an independent registered public accounting firm, as stated in their report which appears herein.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Moody's Corporation:

We have audited the accompanying consolidated balance sheets of Moody's Corporation (the Company) as of December 31, 2011 and 2010 and the related consolidated statements of operations, cash flows and shareholders' deficit, for each of the years in the three-year period ended December 31, 2011. We also have audited Moody's Corporation's internal control over financial reporting as of December 31, 2011, based on the criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Moody's Corporation's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on these consolidated financial statements and an opinion on the Company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the consolidated financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Moody's Corporation as of December 31, 2011 and 2010, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2011, in conformity with U.S. generally accepted accounting principles. Also in our opinion, Moody's Corporation maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

MOODY'S CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(TABULAR DOLLAR AND SHARE AMOUNTS IN MILLIONS, EXCEPT PER SHARE DATA)

NOTE 1 DESCRIPTION OF BUSINESS AND BASIS OF PRESENTATION

Moody's is a provider of (i) credit ratings, (ii) credit and economic related research, data and analytical tools, (iii) risk management software, (iv) quantitative credit risk measures, credit portfolio management solutions, training and financial credentialing and certification services and (v) outsourced research and analytical services to institutional customers. Moody's operates in two reportable segments: MIS and MA.

MIS, the credit rating agency, publishes credit ratings on a wide range of debt obligations and the entities that issue such obligations in markets worldwide. Revenue is derived from the originators and issuers of such transactions who use MIS ratings in the distribution of their debt issues to investors.

The MA segment, which includes all of the Company's non-rating commercial activities, develops a wide range of products and services that support the risk management activities of institutional participants in global financial markets. Within its RD&A business, MA distributes investor-oriented research and data developed by MIS as part of its ratings process, including in-depth research on major debt issuers, industry studies and commentary on topical credit related events. The RD&A business also produces and provides economic research and credit data and analytical tools such as quantitative credit risk scores. Within its RMS business, MA provides both economic and regulatory capital risk management software solutions. Within its professional services business it provides quantitative credit risk measures, credit portfolio management solutions, training, financial credentialing and certification services as well as outsourced research and analytical services to institutional investors.

The Company operated as part of Old D&B until September 30, 2000, when Old D&B separated into two publicly traded companies - Moody's Corporation and New D&B. At that time, Old D&B distributed to its shareholders shares of New D&B stock. New D&B comprised the business of Old D&B's Dun & Bradstreet operating company. The remaining business of Old D&B consisted solely of the business of providing ratings and related research and credit risk management services and was renamed Moody's Corporation. For purposes of governing certain ongoing relationships between the Company and New D&B after the 2000 Distribution and to provide for an orderly transition, the Company and New D&B entered into various agreements including a distribution agreement, tax allocation agreement and employee benefits agreement.

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Consolidation

The consolidated financial statements include those of Moody's Corporation and its majority- and wholly-owned subsidiaries. The effects of all intercompany transactions have been eliminated. Investments in companies for which the Company has significant influence over operating and financial policies but not a controlling interest are accounted for on an equity basis.

The Company applies the guidelines set forth in Topic 810 of the ASC in assessing its interests in variable interest entities to decide whether to consolidate that entity. The Company has reviewed the potential variable interest entities and determined that there are no consolidation requirements under Topic 810 of the ASC.

Cash and Cash Equivalents

Cash equivalents principally consist of investments in money market mutual funds and high-grade commercial paper with maturities of three months or less when purchased.

Property and Equipment

Property and equipment are stated at cost and are depreciated using the straight-line method over their estimated useful lives. Expenditures for maintenance and repairs that do not extend the economic useful life of the related assets are charged to expense as incurred.

Research and Development Costs

All research and development costs are expensed as incurred. These costs primarily reflect the development of credit processing software and quantitative credit risk assessment products sold by the MA segment. These costs also reflect expenses for new quantitative research and business ideas that potentially warrant near-term investment within MIS or MA which could potentially result in commercial opportunities for the Company.

Table of Contents

Research and development costs were \$29.8 million, \$20.3 million, and \$14.3 million for the years ended December 31, 2011, 2010 and 2009, respectively, and are included in operating expenses within the Company's consolidated statements of operations. These costs generally consist of professional services provided by third parties and compensation costs of employees.

Costs for internally developed computer software that will be sold, leased or otherwise marketed are capitalized when technological feasibility has been established. These costs primarily relate to the development or enhancement of credit processing software and quantitative credit risk assessment products sold by the MA segment, to be licensed to customers and generally consist of professional services provided by third parties and compensation costs of employees that develop the software. Judgment is required in determining when technological feasibility of a product is established and the Company believes that technological feasibility for its software products is reached after all high-risk development issues have been resolved through coding and testing. Generally, this occurs shortly before the products are released to customers. Accordingly, costs for internally developed computer software that will be sold, leased or otherwise marketed that were eligible for capitalization under Topic 985 of the ASC as well as the related amortization expense related to such costs were immaterial for the years ended December 31, 2011, 2010 and 2009.

Computer Software Developed or Obtained for Internal Use

The Company capitalizes costs related to software developed or obtained for internal use. These assets, included in property and equipment in the consolidated balance sheets, relate to the Company's accounting, product delivery and other systems. Such costs generally consist of direct costs of third-party license fees, professional services provided by third parties and employee compensation, in each case incurred either during the application development stage or in connection with upgrades and enhancements that increase functionality. Such costs are depreciated over their estimated useful lives on a straight-line basis. Costs incurred during the preliminary project stage of development as well as maintenance costs are expensed as incurred.

Long-Lived Assets, Including Goodwill and Other Acquired Intangible Assets

Moody's evaluates its goodwill for impairment at the reporting unit level, defined as an operating segment or one level below an operating segment, annually as of November 30 or more frequently if impairment indicators arise in accordance with ASC Topic 350. These impairment indicators could include significant events or circumstances that would reduce the fair value of a reporting unit below its carrying value. These events or circumstances could include a significant change in the business climate, legal factors, operating performance indicators, competition or sale or disposition of a significant portion of a reporting unit.

At November 30, 2011, the Company had six primary reporting units: one in MIS that encompasses all of Moody's ratings operations and five reporting units within MA: RD&A, RMS, training, CSI and Copal. The RD&A reporting unit encompasses the distribution of investor-oriented research and data developed by MIS as part of its ratings process, in-depth research on major debt issuers, industry studies, economic research and commentary on topical events and credit analytic tools. The RMS reporting unit consists of credit risk management and compliance software that is sold on a license or subscription basis as well as related advisory services for implementation and maintenance. The training reporting unit consists of the portion of the MA business that offers both credit training as well as other professional development training. In November 2010, the Company acquired CSI, which was assessed separately as its own reporting unit for the annual goodwill impairment assessment as of November 30, 2011 as the entity has not yet been integrated with one of the aforementioned MA reporting units. In the fourth quarter of 2011, the Company acquired Copal and B&H, for which Copal is deemed to be a separate reporting unit and B&H is part of the RMS reporting unit at December 31, 2011.

In 2011, the FASB issued an ASU which permits an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount before proceeding with a quantitative assessment. The Company has adopted the provisions of this ASU and accordingly, the Company evaluates the recoverability of goodwill using a three-step impairment test approach at the reporting unit level. In the first step, the Company assesses various qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit may be less than its carrying amount. If a determination is made that, based on the qualitative factors, an impairment does not exist, the Company is not required to perform further testing. If the aforementioned qualitative assessment results in the Company concluding that it is more likely than not that the fair value of a reporting unit may be less than its carrying amount, the fair value of the reporting unit is compared to its carrying value including goodwill. If the fair value of the reporting unit exceeds the carrying value of the net assets assigned to that unit, goodwill is not impaired and the Company is not required to perform further testing. If the fair value of the reporting unit is less than the carrying value, the Company must perform a third step of the impairment test to determine the implied fair value of the reporting unit's goodwill. The implied fair value of the goodwill is determined based on the difference between the fair value of the reporting unit and the net fair value of the identifiable assets and liabilities of the reporting unit. If the implied fair value of the goodwill is less than the carrying value, the difference is recognized as an impairment charge. For the reporting units where the Company is consistently able to conclude on impairment using only a qualitative approach, the Company's accounting policy is to perform the second step of the aforementioned goodwill impairment assessment at least once every three years.

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

Determining the fair value of a reporting unit or an indefinite-lived acquired intangible asset involves the use of significant estimates and assumptions. These estimates and assumptions include revenue growth rates and operating margins used to calculate projected

Table of Contents

future cash flows, risk-adjusted discount rates, future economic and market conditions, and appropriate market comparables. The Company bases its fair value estimates on assumptions believed to be reasonable. However, as these estimates and assumptions are unpredictable and inherently uncertain, actual future results may differ from these estimates. In addition, the Company also makes certain judgments and assumptions in allocating shared assets and liabilities to determine the carrying values for each of its reporting units.

Goodwill is assigned to a reporting unit at the date when an acquisition is integrated into one of the established reporting units, and is based on which reporting unit is expected to benefit from the synergies of the acquisition. Other assets and liabilities, including applicable corporate assets, are allocated to the extent they are related to the operation of respective reporting units.

Rent Expense

The Company records rent expense on a straight-line basis over the life of the lease. In cases where there is a free rent period or future fixed rent escalations the Company will record a deferred rent liability. Additionally, the receipt of any lease incentives will be recorded as a deferred rent liability which will be amortized over the lease term as a reduction of rent expense.

Stock-Based Compensation

The Company records compensation expense for all share-based payment award transactions granted to employees based on the fair value of the equity instrument at the time of grant. This includes shares issued under employee stock purchase plans, stock options, restricted stock and stock appreciation rights. The Company has also established a pool of additional paid-in capital related to the tax effects of employee share-based compensation (APIC Pool), which is available to absorb any recognized tax deficiencies.

Derivative Instruments and Hedging Activities

Based on the Company's risk management policy, from time to time the Company may use derivative financial instruments to reduce exposure to changes in foreign exchange rates and interest rates. The Company does not enter into derivative financial instruments for speculative purposes. All derivative financial instruments are recorded on the balance sheet at their respective fair values. The changes in the value of derivatives that qualify as fair value hedges are recorded currently into earnings. Changes in the derivative's fair value that qualify as cash flow hedges are recorded as other comprehensive income or loss, to the extent the hedge is effective, and such amounts are reclassified to earnings in the same period or periods during which the hedged transaction affects income.

Revenue Recognition

Revenue is recognized when persuasive evidence of an arrangement exists, delivery has occurred or the services have been provided and accepted by the customer when applicable, fees are determinable and the collection of resulting receivables is considered probable.

In October 2009, the FASB issued ASU No. 2009-13, Multiple-Deliverable Revenue Arrangements (ASU 2009-13). The standard changes the requirements for establishing separate units of accounting in a multiple element arrangement and requires the allocation of arrangement consideration based on the relative selling price of each deliverable. The Company adopted ASU 2009-13 on a prospective basis for applicable transactions originating or materially modified on or after January 1, 2010. If applied in the same manner to the year ended December 31, 2009, ASU 2009-13 would not have had a material impact on net revenue reported for both its MIS and MA segments in terms of the timing and pattern of revenue recognition. The adoption of ASU 2009-13 did not have a significant effect on the Company's net revenue in the period of adoption and is also not expected to have a significant effect on the Company's net revenue in periods after the initial adoption when applied to multiple element arrangements based on the currently anticipated business volume and pricing.

For 2010 and future periods, pursuant to the guidance of ASU 2009-13, when a sales arrangement contains multiple deliverables, the Company allocates revenue to each deliverable based on its relative selling price which is determined based on its vendor specific objective evidence (VSOE) if available, third party evidence (TPE) if VSOE is not available, or estimated selling price (ESP) if neither VSOE nor TPE is available.

The Company's products and services will generally continue to qualify as separate units of accounting under ASU 2009-13. The Company evaluates each deliverable in an arrangement to determine whether it represents a separate unit of accounting. A deliverable constitutes a separate unit of accounting when it has stand-alone value to the customers and if the arrangement includes a customer refund or return right relative to the delivered item, the delivery and performance of the undelivered item is considered probable and substantially in the Company's control. In instances where the aforementioned criteria are not met, the deliverable is combined with the undelivered items and revenue recognition is determined as one single unit.

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

The Company determines whether its selling price in a multi-element transaction meets the VSOE criteria by using the price charged for a deliverable when sold separately. In instances where the Company is not able to establish VSOE for all deliverables in a multiple element arrangement, which may be due to the Company infrequently selling each element separately, not selling products within a reasonably narrow price range, or only having a limited sales history, the Company attempts to establish TPE for deliverables. The Company determines whether TPE exists by evaluating largely similar and interchangeable competitor products or services in standalone sales to similarly situated customers. However, due to the difficulty in obtaining third party pricing, possible differences -in its

Table of Contents

market strategy from that of its peers and the potential that products and services offered by the Company may contain a significant level of differentiation and/or customization such that the comparable pricing of products with similar functionality cannot be obtained, the Company generally is unable to reliably determine TPE. Based on the selling price hierarchy established by ASU 2009-13, when the Company is unable to establish selling price using VSOE or TPE, the Company will establish an ESP. ESP is the price at which the Company would transact a sale if the product or service were sold on a stand-alone basis. The Company establishes its best estimate of ESP considering internal factors relevant to its pricing practices such as costs and margin objectives, standalone sales prices of similar products, percentage of the fee charged for a primary product or service relative to a related product or service, and customer segment and geography. Additional consideration is also given to market conditions such as competitor pricing strategies and market trend. The Company reviews its determination of VSOE, TPE and ESP on an annual basis or more frequently as needed.

In the MIS segment, revenue attributed to initial ratings of issued securities is recognized when the rating is issued. Revenue attributed to monitoring of issuers or issued securities is recognized ratably over the period in which the monitoring is performed, generally one year. In the case of commercial mortgage-backed securities, derivatives, international residential mortgage-backed and asset-backed securities, issuers can elect to pay the monitoring fees upfront. These fees are deferred and recognized over the future monitoring periods based on the expected lives of the rated securities, which ranged from two to 51 years at December 31, 2011. At December 31, 2011, 2010 and 2009, deferred revenue related to these securities was approximately \$79 million, \$76 million, and \$78 million.

Multiple element revenue arrangements in the MIS segment are generally comprised of an initial rating and the related monitoring service. Beginning January 1, 2010, in instances where monitoring fees are not charged for the first year monitoring effort, fees are allocated to the initial rating and monitoring services based on the relative selling price of each service to the total arrangement fees. The Company generally uses ESP in determining the selling price for its initial ratings as the Company rarely sells initial ratings separately without providing related monitoring services and thus is unable to establish VSOE or TPE for initial ratings. Prior to January 1, 2010 and pursuant to the previous accounting standards, for these types of arrangements the initial rating fee was first allocated to the monitoring service determined based on the estimated fair market value of monitoring services, with the residual amount allocated to the initial rating. Under ASU 2009-13 this practice can no longer be used for non-software deliverables upon the adoption of ASU 2009-13.

MIS estimates revenue for ratings of commercial paper for which, in addition to a fixed annual monitoring fee, issuers are billed quarterly based on amounts outstanding. Revenue is accrued each quarter based on estimated amounts outstanding and is billed when actual data is available. The estimate is determined based on the issuers' most recent reported quarterly data. At December 31, 2011, 2010 and 2009, accounts receivable included approximately \$24 million, \$25 million, and \$27 million, respectively, related to accrued commercial paper revenue. Historically, MIS has not had material differences between the estimated revenue and the actual billings. Furthermore, for certain annual monitoring services, fees are not invoiced until the end of the annual monitoring period and revenue is accrued ratably over the monitoring period.

In the MA segment, products and services offered by the Company include software licenses and related maintenance, subscriptions, and professional services. Revenue from subscription based products, such as research and data subscriptions and certain software-based credit risk management subscription products, is recognized ratably over the related subscription period, which is principally one year. Revenue from sale of perpetual licenses of credit processing software is generally recognized at the time the product master or first copy is delivered or transferred to and accepted by the customer. Software maintenance revenue is recognized ratably over the annual maintenance period. Revenue from services rendered within the professional services line of business is generally recognized as the services are performed. If uncertainty exists regarding customer acceptance of the product or service, revenue is not recognized until acceptance occurs. A large portion of annual research and data subscriptions and annual software maintenance are invoiced in the months of November, December and January.

Products and services offered within the MA segment are sold either stand-alone or together in various combinations. In instances where a multiple element arrangement includes software and non-software deliverables, revenue is allocated to the non-software deliverables and to the software deliverables, as a group, using the relative selling prices of each of the deliverables in the arrangement based on the aforementioned selling price hierarchy. Revenue is recognized for each element based upon the conditions for revenue recognition noted above.

If the arrangement contains more than one software deliverable, the arrangement consideration allocated to the software deliverables as a group is allocated to each software deliverable using VSOE. In the instances where the Company is not able to determine VSOE for all of the deliverables of an arrangement, the Company allocates the revenue to the undelivered elements equal to its VSOE and the residual revenue to the delivered elements. If the Company is unable to determine VSOE for an undelivered element, the Company defers all revenue allocated to the software deliverables until the Company has delivered all of the elements or when VSOE has been determined for the undelivered elements.

Prior to January 1, 2010 and pursuant to the previous accounting standards, the Company allocated revenue in a multiple element arrangement to each deliverable based on its relative fair value, or for software elements, based on VSOE. If the fair value was not available for an undelivered element, the revenue for the entire arrangement was deferred.

Table of Contents

Accounts Receivable Allowances

Moody's records an allowance for estimated future adjustments to customer billings as a reduction of revenue, based on historical experience and current conditions. Such amounts are reflected as additions to the accounts receivable allowance. Additionally, estimates of uncollectible accounts are recorded as bad debt expense and are reflected as additions to the accounts receivable allowance. Billing adjustments and uncollectible account write-offs are recorded against the allowance. Moody's evaluates its accounts receivable allowance by reviewing and assessing historical collection and adjustment experience and the current status of customer accounts. Moody's also considers the economic environment of the customers, both from an industry and geographic perspective, in evaluating the need for allowances. Based on its analysis, Moody's adjusts its allowance as considered appropriate in the circumstances.

Operating Expenses

Operating expenses are charged to income as incurred. These expenses include costs associated with the development and production of the Company's products and services and their delivery to customers. These expenses principally include employee compensation and benefits and travel costs that are incurred in connection with these activities.

Restructuring

The Company's restructuring accounting follows the provisions of: Topic 712 of the ASC for severance relating to employee terminations, Topic 715 of the ASC for pension settlements and curtailments, and Topic 420 of the ASC for contract termination costs and other exit activities.

Selling, General and Administrative Expenses

SG&A expenses are charged to income as incurred. These expenses include such items as compensation and benefits for corporate officers and staff and compensation and other expenses related to sales of products. They also include items such as office rent, business insurance, professional fees and gains and losses from sales and disposals of assets.

Redeemable noncontrolling interest

The Company records its redeemable noncontrolling interest at fair value on the date of the related business combination transaction. The redeemable noncontrolling interest represents noncontrolling shareholders' interest in entities which are controlled but not wholly-owned by Moody's and for which Moody's obligation to redeem the minority shareholders' interest is in the control of the minority shareholders. Subsequent to the initial measurement, the redeemable noncontrolling interest is recorded at the greater of its redemption value or its carrying value at the end of each reporting period. At December 31, 2011, the carrying value of the redeemable noncontrolling interest exceeded its redemption value. Accordingly, the redeemable noncontrolling interest is recorded at its carrying value. If the redeemable noncontrolling interest is carried at its redemption value, the difference between the redemption value and the carrying value would be adjusted through capital surplus at the end of each reporting period. The Company also performs a quarterly assessment to determine if the aforementioned redemption value exceeds the fair value of the redeemable noncontrolling interest. If the redemption value of the redeemable noncontrolling interest were to exceed its fair value, the excess would reduce the net income attributable to Moody's shareholders.

Foreign Currency Translation

For all operations outside the U.S. where the Company has designated the local currency as the functional currency, assets and liabilities are translated into U.S. dollars using end of year exchange rates, and revenue and expenses are translated using average exchange rates for the year. For these foreign operations, currency translation adjustments are accumulated in a separate component of shareholders' equity.

Comprehensive Income

Comprehensive income represents the change in net assets of a business enterprise during a period due to transactions and other events and circumstances from non-owner sources including foreign currency translation impacts, net actuarial losses and net prior service costs related to pension and other post-retirement plans and derivative instruments. Accumulated other comprehensive (loss) income is primarily comprised of:

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

(in millions)	December 31,	
	2011	2010
Currency translation adjustments, net of tax	\$(23.3)	\$ 23.6
Net actuarial losses and net prior service costs related to Post-Retirement Plans, net of tax	(81.2)	(51.4)
Realized and unrealized losses on cash flow hedges, net of tax	(3.0)	(5.6)
Total accumulated other comprehensive loss	\$(107.5)	(33.4)

Table of Contents

Income Taxes

The Company accounts for income taxes under the asset and liability method in accordance with Topic 740 of the ASC. Therefore, income tax expense is based on reported income before income taxes, and deferred income taxes reflect the effect of temporary differences between the amounts of assets and liabilities that are recognized for financial reporting purposes and the amounts that are recognized for income tax purposes.

The Company classifies interest related to unrecognized tax benefits in interest expense in its consolidated statements of operations. Penalties are recognized in other non-operating expenses. For UTPs, the Company first determines whether it is more-likely-than-not (defined as a likelihood of more than fifty percent) that a tax position will be sustained based on its technical merits as of the reporting date, assuming that taxing authorities will examine the position and have full knowledge of all relevant information. A tax position that meets this more-likely-than-not threshold is then measured and recognized at the largest amount of benefit that is greater than fifty percent likely to be realized upon effective settlement with a taxing authority.

For certain of its non-U.S. subsidiaries, the Company has deemed its undistributed earnings relating to these subsidiaries to be indefinitely reinvested within its foreign operations. Accordingly, the Company has not provided deferred income taxes on these indefinitely reinvested earnings. It is not practicable to determine the amount of deferred taxes that might be required to be provided if such earnings were distributed in the future due to complexities in the tax laws and in the hypothetical calculations that would have to be made.

Fair Value of Financial Instruments

The Company's financial instruments include cash, cash equivalents, trade receivables and payables, all of which are short-term in nature and, accordingly, approximate fair value. Additionally, the Company invests in short-term investments that are carried at cost, which approximates fair value due to their short-term maturities. Also, the Company uses derivative instruments, as further described in Note 5, to manage certain financial exposures that occur in the normal course of business. These derivative instruments are carried at fair value on the Company's consolidated balance sheets. The Company also is subject to contingent consideration obligations related to certain of its acquisitions as more fully discussed in Note 7. These obligations are carried at their estimated fair value within the Company's consolidated balance sheets.

Fair value is defined by the ASC as the price that would be received from selling an asset or paid to transfer a liability (i.e., an exit price) in an orderly transaction between market participants at the measurement date. The determination of this fair value is based on the principal or most advantageous market in which the Company could commence transactions and considers assumptions that market participants would use when pricing the asset or liability, such as inherent risk, transfer restrictions and risk of nonperformance. Also, determination of fair value assumes that market participants will consider the highest and best use of the asset.

The ASC establishes a fair value hierarchy whereby the inputs contained in valuation techniques used to measure fair value are categorized into three broad levels as follows:

Level 1: quoted market prices in active markets that the reporting entity has the ability to access at the date of the fair value measurement;

Level 2: inputs other than quoted market prices described in Level 1 that are observable for the asset or liability, either directly or indirectly, such as quoted prices in active markets for similar assets or liabilities, quoted prices for identical or similar assets or liabilities in markets that are not active or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities;

Level 3: unobservable inputs that are supported by little or no market activity and that are significant to the fair value measurement of the assets or liabilities.

Concentration of Credit Risk

Financial instruments that potentially subject the Company to concentration of credit risk principally consist of cash and cash equivalents, short-term investments, trade receivables and derivatives.

Cash equivalents consist of investments in high quality investment-grade securities within and outside the U.S. The Company manages its credit risk exposure by allocating its cash equivalents among various money market mutual funds and issuers of high- grade commercial paper. Short-term investments primarily consist of certificates of deposit and high-grade corporate bonds in Korea as of December 31, 2011 and 2010. The Company manages its credit risk exposure on cash equivalents and short-term investments by limiting the amount it can invest with any

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

single issuer. No customer accounted for 10% or more of accounts receivable at December 31, 2011 or 2010.

Earnings per Share of Common Stock

Basic shares outstanding are calculated based on the weighted average number of shares of common stock outstanding during the reporting period. Diluted shares outstanding are calculated giving effect to all potentially dilutive common shares, assuming that such shares were outstanding during the reporting period.

Table of Contents**Pension and Other Post-Retirement Benefits**

Moody's maintains various noncontributory DBPPs as well as other contributory and noncontributory retirement and post-retirement plans. The expense and assets/liabilities that the Company reports for its pension and other post-retirement benefits are dependent on many assumptions concerning the outcome of future events and circumstances. These assumptions represent the Company's best estimates and may vary by plan. The differences between the assumptions for the expected long-term rate of return on plan assets and actual experience is spread over a five-year period to the market related value of plan assets which is used in determining the expected return on assets component of annual pension expense. All other actuarial gains and losses are generally deferred and amortized over the estimated average future working life of active plan participants.

The Company recognizes as an asset or liability in its statement of financial position the funded status of its defined benefit post-retirement plans, measured on a plan-by-plan basis. Changes in the funded status are recorded as part of other comprehensive income during the period the changes occur.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates. Estimates are used for, but not limited to, revenue recognition, accounts receivable allowances, income taxes, contingencies, valuation of long-lived and intangible assets, goodwill, pension and other post-retirement benefits, stock-based compensation, and depreciation and amortization rates for property and equipment and computer software.

The financial market volatility and poor economic conditions beginning in the third quarter of 2007 and continuing into 2011, both in the U.S. and in many other countries where the Company operates, have impacted and will continue to impact Moody's business. If such conditions were to recur they could have a material impact to the Company's significant accounting estimates discussed above, in particular those around accounts receivable allowances, valuations of investments in affiliates, goodwill and other acquired intangible assets, and pension and other post-retirement benefits.

Recently Issued Accounting Pronouncements***Adopted:***

In January 2010, the FASB issued ASU No. 2010-06, *Improving Disclosures about Fair Value Measurements*. The standard requires disclosure regarding transfers in and out of Level 1 and Level 2 classifications within the fair value hierarchy as well as requiring further detail of activity within the Level 3 category of the fair value hierarchy. The standard also requires disclosures regarding the fair value for each class of assets and liabilities, which is a subset of assets or liabilities within a line item in a company's balance sheet. Additionally, the standard requires further disclosures surrounding inputs and valuation techniques used in fair value measurements. The disclosures and clarifications of existing disclosures set forth in this ASU are effective for interim and annual reporting periods beginning after December 15, 2009, except for the additional disclosures regarding Level 3 fair value measurements, for which the effective date is for fiscal years and interim periods within those years beginning after December 15, 2010. The Company has fully adopted all provisions of this ASU as of January 1, 2011 and the implementation did not have a material impact on the Company's consolidated financial statements.

In December 2010, the FASB issued ASU No. 2010-29, *Disclosure of Supplementary Pro Forma Information for Business Combinations*. The objective of this ASU is to address diversity in practice regarding proforma disclosures for revenue and earnings of the acquired entity. The amendments in this ASU specify that if a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination(s) that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. The amendments in this ASU also expand the supplemental pro forma disclosures under ASC Topic 805 to include a description of the nature and amount of material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. The amendments in this ASU are effective for fiscal years beginning on or after December 15, 2010. The Company will conform to the disclosure requirements set forth in this ASU for any future business combinations for which the impact to the consolidated statement of operations would be material.

In September 2011, the FASB issued ASU No. 2011-08, *Intangibles—Goodwill and Other (Topic 350)*. The objective of this ASU is to simplify how entities test goodwill for impairment. This ASU permits an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

two-step goodwill impairment test described in Topic 350 of the ASC. The more-likely-than-not threshold is defined as having a likelihood of more than 50 percent. Prior to the issuance of this ASU, an entity was required to test goodwill for impairment, on at least an annual basis, by comparing the fair value of a reporting unit with its carrying amount, including goodwill (step one). If the fair value of a reporting unit was less than its carrying amount, then the second step of the test would be performed to measure the amount of the impairment loss, if any. Under the amendments in this ASU, an entity is not required to calculate the fair

Table of Contents

value of a reporting unit unless the entity determines that it is more likely than not that its fair value is less than its carrying amount. The amendments in this ASU are effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011 with early adoption permitted. The Company adopted this ASU in the fourth quarter of 2011 and applied its provisions in assessing the potential goodwill impairment which is performed at least annually as of November 30.

Not yet adopted:

In May 2011, the FASB issued ASU No. 2011-04, *Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*. The objective of this ASU is to achieve common fair value measurement and disclosure requirements in U.S. GAAP and IFRS. The amendments in this ASU change the wording used to describe current requirements in U.S. GAAP for measuring fair value and for financial statement disclosure about fair value measurements. Some of the amendments in the ASU clarify the FASB's intent or change a particular principle or requirement pertaining to the application of existing fair value measurement requirements or for disclosing information about fair value measurements. The amendments in this ASU are required to be applied prospectively and are effective for fiscal years beginning after December 15, 2011. Early adoption is not permitted. The Company is currently evaluating the potential impact, if any, of the implementation of this ASU on its consolidated financial statements.

In June 2011, the FASB issued ASU No. 2011-05, *Presentation of Comprehensive Income*. Under the amendments in this ASU, an entity has two options for presenting its total comprehensive income: to show its components along with the components of net income in a single continuous statement, or in two separate but consecutive statements. The amendments in this ASU are required to be applied retrospectively and are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011, with early adoption permitted. In December 2011, the FASB issued ASU No. 2011-12, *Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income*, which indefinitely defers the requirement in ASU No. 2011-05 to present on the face of the financial statements reclassification adjustments for items that are reclassified from OCI to net income in the statement(s) where the components of net income and the components of OCI are presented. All other provisions of this ASU, which are to be applied retrospectively, are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. The Company intends to adopt all provisions that were not deferred beginning with its Form 10Q for the three months ended March 31, 2012. The adoption of this ASU will not have any impact on the Company's consolidated financial statements other than revising the presentation of the components of comprehensive income.

NOTE 3 RECONCILIATION OF WEIGHTED AVERAGE SHARES OUTSTANDING

Below is a reconciliation of basic to diluted shares outstanding:

	Year Ended December 31,		
	2011	2010	2009
Basic	226.3	235.0	236.1
Dilutive effect of shares issuable under stock-based compensation plans	3.1	1.6	1.7
Diluted	229.4	236.6	237.8
Antidilutive options to purchase common shares and restricted stock excluded from the table above	10.6	15.5	15.6

The calculation of diluted EPS requires certain assumptions regarding the use of both cash proceeds and assumed proceeds that would be received upon the exercise of stock options and vesting of restricted stock outstanding as of December 31, 2011, 2010 and 2009. These assumed proceeds include Excess Tax Benefits and any unrecognized compensation on the awards.

NOTE 4 SHORT-TERM INVESTMENTS

Short-term investments are securities with maturities greater than 90 days at the time of purchase that are available for use in the Company's operations in the next twelve months. The short-term investments, primarily consisting of certificates of deposit, are classified as held-to-maturity and therefore are carried at cost. The remaining contractual maturities of the short-term investments were one to seven months

and one to six months as of December 31, 2011 and 2010, respectively. Interest and dividends are recorded into income when earned.

NOTE 5 DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

The Company is exposed to global market risks, including risks from changes in FX rates and changes in interest rates. Accordingly, the Company uses derivatives in certain instances to manage the aforementioned financial exposures that occur in the normal course of business. The Company does not hold or issue derivatives for speculative purposes.

Table of Contents**Interest Rate Swaps**

In the fourth quarter of 2010, the Company entered into interest rate swaps with a total notional amount of \$300 million to convert the fixed interest rate on the Series 2005-1 Notes to a floating interest rate based on the 3-month LIBOR. The purpose of this hedge was to mitigate the risk associated with changes in the fair value of the Series 2005-1 Notes, thus the Company has designated these swaps as fair value hedges. The fair value of the swaps is reported in other assets at December 31, 2011 and in other liabilities at December 31, 2010 in the Company's consolidated balance sheets with a corresponding adjustment to the carrying value of the Series 2005-1 Notes. The changes in the fair value of the hedges and the underlying hedged item generally offset and the net cash settlements on the swaps are recorded each period within interest expense, net in the Company's consolidated statement of operations. The net interest income recognized in interest income (expense), net within the Company's consolidated statement of operations on these swaps was \$4.1 million in 2011 and was immaterial in 2010.

In May 2008, the Company entered into interest rate swaps with a total notional amount of \$150 million to protect against fluctuations in the LIBOR-based variable interest rate on the 2008 Term Loan. These interest rate swaps are designated as cash flow hedges. Accordingly, changes in the fair value of these swaps are recorded to other comprehensive income or loss, to the extent that the hedge is effective, and such amounts are reclassified to earnings in the same period during which the hedged transaction affects income. The fair value of the swaps is reported in other liabilities in the Company's consolidated balance sheets at December 31, 2011 and 2010.

Foreign Exchange Forwards and Options

The Company engaged in hedging activities to protect against FX risks from forecasted billings and related revenue denominated in the euro and the GBP. FX options and forward exchange contracts were utilized to hedge exposures related to changes in FX rates. As of December 31, 2010, these FX options and forward exchange contracts have matured and as of December 31, 2011 all realized gains and losses have been reclassified from AOCI into earnings. These FX options and forward exchange contracts were designated as cash flow hedges.

The Company also enters into foreign exchange forwards to mitigate the change in fair value on certain assets and liabilities denominated in currencies other than the entity's functional currency. These forward contracts are not designated as hedging instruments under the applicable sections of Topic 815 of the ASC. Accordingly, changes in the fair value of these contracts are recognized immediately in other non-operating income (expense), net in the Company's consolidated statements of operations along with the FX gain or loss recognized on the assets and liabilities denominated in a currency other than the entity's functional currency. These contracts have expiration dates at various times through March 2012.

The following table summarizes the notional amounts of the Company's outstanding foreign exchange forwards:

	December 31, 2011	December 31, 2010
Notional amount of Currency Pair:		
Contracts to purchase USD with euros	\$ 27.5	\$ 11.7
Contracts to sell USD for euros	\$ 47.7	\$ 55.5
Contracts to purchase USD with GBP	\$ 2.4	\$
Contracts to sell USD for GBP	\$ 17.6	\$ 20.7
Contracts to purchase USD with other foreign currencies	\$ 3.2	\$ 5.4
Contracts to sell USD for other foreign currencies	\$ 7.6	\$ 19.5
Contracts to purchase euros with other foreign currencies	13.6	10.5
Contracts to purchase euros with GBP	1.6	
Contracts to sell euros for GBP	7.2	14.0

The net gains (losses) on these instruments recognized in other non-operating income (expense), net in the Company's consolidated statements of operations for the years ended December 31, 2011, 2010 and 2009 were (\$1.4) million, (\$2.2) million and \$3.0 million, respectively.

Table of Contents

The table below shows the classification between assets and liabilities on the Company's consolidated balance sheets of the fair value of derivative instruments:

	Fair Value of Derivative Instruments			
	Asset		Liability	
	December 31, 2011	December 31, 2010	December 31, 2011	December 31, 2010
Derivatives designated as accounting hedges:				
Interest rate swaps	\$ 11.5	\$	\$ 4.5	\$ 12.2
Derivatives not designated as accounting hedges:				
FX forwards on certain assets and liabilities	1.1	2.0	2.3	0.7
Total	\$ 12.6	\$ 2.0	\$ 6.8	\$ 12.9

The fair value for the interest rate swaps is included in other assets and other liabilities in the consolidated balance sheets at December 31, 2011 and in other liabilities at December 31, 2010. The fair value of the FX forwards is included in other current assets and account payable and accrued liabilities as of December 31, 2011 and December 31, 2010, respectively. Refer to Note 9 for further information on the fair value of derivatives.

The following table provides information on gains (losses) on the company's cash flow hedges:

Derivatives in Cash Flow Hedging Relationships	Amount of Gain/(Loss) Recognized in AOCI on Derivative (Effective Portion)		Location of Gain/(Loss) Reclassified from AOCI into Income (Effective Portion)	Amount of Gain/(Loss) Reclassified from AOCI into Income (Effective Portion)		Location of Gain/(Loss) Recognized in Income on Derivative (Ineffective Portion and Amount Excluded from Effectiveness Testing)	Amount of Gain/(Loss) Recognized in Income on Derivative (Ineffective Portion and Amount Excluded from Effectiveness Testing)	
	Year Ended December 31, 2011	Year Ended December 31, 2010		Year Ended December 31, 2011	Year Ended December 31, 2010		Year Ended December 31, 2011	Year Ended December 31, 2010
FX options	\$ (0.6)	\$ (3.1)	Revenue	\$ (0.2)	\$ (1.0)	Revenue	\$	\$
Interest rate swaps	(0.6)	(3.1)	Interest expense	(3.0)	(2.8)	N/A		
Total	\$ (0.6)	\$ (3.1)		\$ (3.2)	\$ (3.8)		\$	\$

All gains and losses on derivatives designated as cash flow hedges for accounting purposes are initially recognized through AOCI. Realized gains and losses reported in AOCI are reclassified into earnings (into revenue for the FX options and into interest expense, net for the interest rate swaps) as the underlying transaction is recognized.

The cumulative amount of unrecognized hedge losses recorded in AOCI is as follows:

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

	Unrecognized Losses, net of tax	
	December 31, 2011	December 31, 2010
FX options	\$	\$ (0.2)
Interest rate swaps	(3.0)	(5.4)
Total	\$ (3.0)	\$ (5.6)

Table of Contents**NOTE 6 PROPERTY AND EQUIPMENT, NET**

Property and equipment, net consisted of:

	December 31,	
	2011	2010
Office and computer equipment (3 – 20 year estimated useful life)	\$ 106.8	\$ 92.2
Office furniture and fixtures (5 – 10 year estimated useful life)	40.6	40.2
Internal-use computer software (3 – 5 year estimated useful life)	241.8	199.1
Leasehold improvements (3 – 17 year estimated useful life)	195.8	188.6
Total property and equipment, at cost	585.0	520.1
Less: accumulated depreciation and amortization	(258.2)	(200.8)
Total property and equipment, net	\$ 326.8	\$ 319.3

Depreciation and amortization expense related to the above assets was \$58.7 million, \$49.9 million, and \$47.7 million for the years ended December 31, 2011, 2010 and 2009, respectively.

NOTE 7 ACQUISITIONS

All of the acquisitions described below were accounted for using the purchase method of accounting whereby the purchase price is allocated first to the net assets of the acquired entity based on the fair value of its net assets. Any excess of the purchase price over the fair value of the net assets acquired is recorded to goodwill. These acquisitions are discussed below in more detail.

Barrie & Hibbert Limited

On December 16, 2011, a subsidiary of the Company acquired Barrie & Hibbert Limited, a provider of risk management modeling tools for insurance companies worldwide. B&H operates within the RMS LOB of MA, broadening MA's suite of software solutions for the insurance and pension sectors.

The aggregate purchase price was \$79.5 million in cash payments to the sellers and was funded with cash on hand.

Shown below is the purchase price allocation, which summarizes the fair values of the assets acquired, and liabilities assumed, at the date of acquisition:

Current assets	\$ 15.2
Property and equipment, net	0.7
Intangible assets:	
Trade name (5 year weighted average life)	\$ 1.9
Client relationships (18 year weighted average life)	10.4
Software (7 year weighted average life)	16.8
Other intangibles (2 year weighted average life)	0.1
Total intangible assets (11 year weighted average life)	29.2
Goodwill	52.5
Liabilities assumed	(18.1)
Net assets acquired	\$ 79.5

Current assets include acquired cash of approximately \$10 million. The acquired goodwill, which has been assigned to the MA segment, will not be amortized and will not be deductible for tax. B&H operates within the RMS reporting unit and goodwill associated with the acquisition was

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

part of the RMS reporting unit within the MA segment as of the acquisition date.

The Company incurred approximately \$1 million of costs directly related to the acquisition of B&H during the year ended December 31, 2011. These costs, which primarily consisted of consulting and legal fees, are recorded within selling, general and administrative expenses in the Company's consolidated statements of operations.

The amount of revenue and expenses included in the Company's consolidated statement of operations for B&H from the acquisition date through December 31, 2011 was not material. The near term impact to operations and cash flow from this acquisition is not

Table of Contents

expected to be material to the Company's consolidated financial statements. Due to the close proximity of this acquisition to December 31, 2011, the Company is still in the process of evaluating the fair values of the assets and liabilities acquired relating to B&H.

Copal Partners

On November 4, 2011, subsidiaries of the Company acquired a 67% interest in Copal Partners Limited and a 100% interest in two related entities that were wholly-owned by Copal Partners Limited (together herein referred to as Copal). These acquisitions resulted in the Company obtaining an approximate 75% economic ownership interest in the Copal group of companies. Copal is a provider of outsourced research and consulting services to the financial services industry. Copal will operate within the professional services LOB of MA and will complement the research, data, software and education services offered by MA. The table below details the total consideration transferred to the sellers of Copal:

Cash paid	\$ 125.0
Put/call option for non-controlling interest	61.2
Contingent consideration liability assumed	6.8
Total fair value of consideration transferred	 \$ 193.0

In conjunction with the purchase, the Company and the non-controlling shareholders entered into a put/call option agreement whereby the Company has the option to purchase from the non-controlling shareholders and the non-controlling shareholders have the option to sell to the Company the remaining 33% ownership interest of Copal Partners Limited at a later date based on a strike price to be calculated on pre-determined formulas using a combination of revenue and EBITDA multiples when exercised. The derivation of the estimated put/call option strike price on the date of acquisition utilized a Monte Carlo simulation model. This model contemplated multiple scenarios which simulated certain of Copal's revenue, EBITDA margins and equity values to estimate the present value of the expected strike price of the option. There is no limit as to the amount of the strike price on the put/call option. It is estimated that the exercise of the put/call arrangement will take place in the next three to six years based on a Monte Carlo simulation. This put/call arrangement expires on the sixth anniversary date of the acquisition.

Additionally, as part of the consideration transferred, the Company issued a note payable of \$14.2 million to the sellers which is more fully discussed in Note 15 to these consolidated financial statements. The Company has a right to reduce the amount payable under this note with payments that it may be required to make relating to certain UTPs associated with the acquisition, which is more fully discussed below. Accordingly, this note payable is not carried on the consolidated balance sheet as of December 31, 2011 in accordance with certain indemnification arrangements relating to these UTPs which are more fully discussed below.

Also, the purchase agreement contains several different provisions for contingent cash payments to the sellers valued at \$6.8 million at the acquisition date. A portion of the contingent cash payments are based on revenue and EBITDA growth for certain of the acquired Copal entities. This growth is calculated by comparing revenue and EBITDA in the year immediately prior to the exercise of the aforementioned put/call option to revenue and EBITDA in the year ended December 31, 2011. There are no limitations set forth in the acquisition agreement relating to the amount payable under this contingent payment arrangement and payments under the arrangement, if any, would be made upon the exercise of the put/call option. Other contingent cash payments are based on the achievement of revenue targets for 2012 and 2013, with certain limits on the amount of revenue that can be applied to the derivation of the contingent payment. Each of these contingent payments has a maximum payout of \$2.5 million. The Company has recorded the fair value of these arrangements within other liabilities in its consolidated balance sheet. Further information on the inputs and methodologies utilized to derive the fair value of these contingent consideration liabilities are discussed in Note 9.

The Company incurred approximately \$7 million of costs directly related to the acquisition of Copal during the year ended December 31, 2011. These costs which primarily consisted of consulting and legal fees, are recorded within selling, general and administrative expenses in the Company's consolidated statements of operations.

Table of Contents

Shown below is the purchase price allocation, which summarizes the fair values of the assets acquired, and liabilities assumed, at the date of acquisition:

Current assets		\$ 15.5
Property and equipment, net		0.5
Intangible assets:		
Trade name (15 year weighted average life)	\$ 8.6	
Client relationships (16 year weighted average life)	66.2	
Other (2 year weighted average life)	4.4	
Total intangible assets (15 year weighted average life)		79.2
Goodwill		143.4
Indemnification asset		12.0
Other assets		6.6
Liabilities assumed		(64.2)
Net assets acquired		\$ 193.0

Current assets include acquired cash of approximately \$7 million. The acquired goodwill, which has been assigned to the MA segment, will not be amortized and will not be deductible for tax.

In connection with the acquisition, the Company assumed liabilities relating to UTPs, which are included in the liabilities assumed in the table above and for which the sellers have contractually indemnified the Company against any potential payments. Under the terms of the acquisition agreement, a portion of the purchase price was remitted to an escrow agent for certain uncertainties associated with the transaction. Additionally, the Company is contractually indemnified for payments in excess of the amount paid into escrow via a reduction to the amount payable under the aforementioned note payable issued to the sellers and the amount payable under the put/call option to acquire the remaining 33% interest in the Copal entity not wholly-owned. Accordingly, the Company carries an indemnification asset on its consolidated balance sheet at December 31, 2011 for which a portion has been offset by the note payable and the put/call arrangement in the amount of \$14.2 million and \$6.8 million, respectively.

As of December 31, 2011, Copal operates as its own reporting unit. Accordingly, goodwill associated with the acquisition is part of the Copal reporting unit within the MA segment. Copal will remain a separate reporting unit until MA management completes its assessment on how to integrate the entity into the MA operating segment.

The amount of revenue and expenses for Copal from the acquisition date through December 31, 2011 was not material. The near term impact to operations and cash flow from this acquisition is not expected to be material to the Company's consolidated financial statements. Due to the close proximity of this acquisition to December 31, 2011, the Company is still in the process of evaluating the fair values of the assets and liabilities acquired relating to Copal.

KIS Pricing, Inc.

On May 6, 2011, a subsidiary of the Company acquired a 16% additional direct equity investment in KIS Pricing from a shareholder with a non-controlling interest in the entity. The additional interest adds to the Company's existing indirect ownership of KIS Pricing through its controlling equity stake in Korea Investors Service (KIS). The aggregate purchase price was not material and the near term impact to operations and cash flow is not expected to be material. KIS Pricing is part of the MA segment.

CSI Global Education, Inc.

On November 18, 2010, a subsidiary of the Company acquired CSI Global Education, Inc., Canada's leading provider of financial learning, credentials, and certification. CSI operates within MA, strengthening the Company's capabilities for delivering credit and other financial training programs to financial institutions worldwide and bolsters Moody's efforts to serve as an essential resource to financial market participants.

The aggregate purchase price was \$151.4 million in net cash payments to the sellers. There is a 2.5 million Canadian dollar contingent cash payment which is dependent upon the achievement of a certain contractual milestone by January 2016. The Company has recognized the fair value of the contingent payment of \$2.0 million as a long-term liability at the acquisition date using a discounted cash flow methodology which

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

assumes that the entire 2.5 million Canadian dollar payment will be made by January 2016. That measure is based on significant inputs that are not observable in the market, which ASC 820 refers to as Level 3 inputs. Subsequent fair value changes, which will be measured quarterly, up to the ultimate amount paid, will be recognized in earnings. The purchase price was funded with cash on hand.

Table of Contents

Shown below is the purchase price allocation, which summarizes the fair values of the assets acquired, and liabilities assumed, at the date of acquisition:

Current assets		\$ 5.1
Property and equipment, net		0.8
Intangible assets:		
Trade name (30 year weighted average life)	\$ 9.0	
Client relationships (21 year weighted average life)	63.1	
Trade secret (13 year weighted average life)	5.8	
Total intangible assets (21 year weighted average life)		77.9
Goodwill		104.6
Liabilities assumed		(37.0)
Net assets acquired		\$ 151.4

Current assets include acquired cash of approximately \$2.8 million. The acquired goodwill, which has been assigned to the MA segment, will not be amortized and will not be deductible for tax. As of December 31, 2011, CSI operates as its own reporting unit and thus goodwill associated with the acquisition of CSI is all part of the CSI reporting unit within the MA segment. CSI will remain a separate reporting unit until MA management completes its evaluation as to how the acquired entity will be integrated into the MA segment.

The near term impact to operations and cash flow from this acquisition was not material to the Company's consolidated financial statements.

For all acquisitions completed during the year ended December 31, 2011, the Company has not presented proforma combined results for these acquisitions because the impact on the previously reported statements of operations would not have been material.

NOTE 8 GOODWILL AND OTHER ACQUIRED INTANGIBLE ASSETS

The following table summarizes the activity in goodwill:

	Year Ended December 31,					
	2011			2010		
	MIS	MA	Consolidated	MIS	MA	Consolidated
Beginning balance	\$ 11.4	\$ 454.1	\$ 465.5	\$ 11.1	\$ 338.1	\$ 349.2
Additions/adjustments		198.5	198.5		104.6	104.6
Foreign currency translation adjustments	(0.4)	(20.7)	(21.1)	0.3	11.4	11.7
Ending balance	\$ 11.0	\$ 631.9	\$ 642.9	\$ 11.4	\$ 454.1	\$ 465.5

The additions/adjustments for the MA segment in the table above relate to the acquisitions of CSI in 2010 and Copal and B&H in 2011 as further described in Note 7 above.

Table of Contents

Acquired intangible assets consisted of:

	December 31,	
	2011	2010
Customer relationships	\$ 217.9	\$ 145.1
Accumulated amortization	(58.6)	(49.2)
Net customer relationships	159.3	95.9
Trade secrets	31.3	31.4
Accumulated amortization	(13.4)	(10.9)
Net trade secrets	17.9	20.5
Software	70.9	54.8
Accumulated amortization	(25.1)	(20.3)
Net software	45.8	34.5
Trade names	28.1	17.9
Accumulated amortization	(9.0)	(8.3)
Net trade names	19.1	9.6
Other	24.6	19.6
Accumulated amortization	(13.1)	(11.3)
Net other	11.5	8.3
Total	\$ 253.6	\$ 168.8

The amounts as of December 31, 2011 in the table above include intangible assets acquired in the 2011 purchases of Copal and B&H, and the amounts as of December 31, 2010 include intangible assets acquired in the 2010 purchase of CSI, as more fully discussed in Note 7 above. Other intangible assets primarily consist of databases and covenants not to compete. Amortization expense relating to intangible assets is as follows:

	Year Ended December 31,		
	2011	2010	2009
Amortization Expense	\$ 20.5	\$ 16.4	\$ 16.4

Estimated future annual amortization expense for intangible assets subject to amortization is as follows:

Year Ended December 31,	
2012	\$ 28.0
2013	27.2
2014	22.1
2015	20.7
2016	19.5
Thereafter	136.1

Intangible assets are reviewed for recoverability whenever circumstances indicate that the carrying amount may not be recoverable. If the estimated undiscounted future cash flows are lower than the carrying amount of the related asset, a loss is recognized for the difference between the carrying amount and the estimated fair value of the asset. Goodwill is analyzed for impairment annually or more frequently if circumstances

indicate the assets may be impaired.

For the years ended December 31, 2011, 2010 and 2009 there were no impairments to goodwill or to intangible assets except for an immaterial \$0.2 million impairment of intangible assets in 2009 which was included in the restructuring charge as further discussed in Note 11 below. The Company measured the amount of the impairment loss by comparing the carrying amount of the related assets to their fair value. The fair value was determined by utilizing the expected present value technique which uses multiple cash flow scenarios that reflect the range of possible outcomes and a risk-free rate.

Table of Contents**NOTE 9 FAIR VALUE**

The table below presents information about items, which are carried at fair value on a recurring basis at December 31, 2011 and 2010:

Description	Fair Value Measurement as of December 31, 2011			
	Balance	Level 1	Level 2	Level 3
Assets:				
Derivatives (a)	\$ 12.6	\$	\$ 12.6	\$
Total	\$ 12.6	\$	\$ 12.6	\$
Liabilities:				
Derivatives (a)	\$ 6.8	\$	\$ 6.8	\$
Contingent consideration arising from acquisitions	9.1			9.1
Total	\$ 15.9	\$	\$ 6.8	\$ 9.1

Description	Fair Value Measurement as of December 31, 2010			
	Balance	Level 1	Level 2	Level 3
Assets:				
Derivatives (a)	\$ 2.0	\$	\$ 2.0	\$
Total	\$ 2.0	\$	\$ 2.0	\$
Liabilities:				
Derivatives (a)	12.9		12.9	
Contingent consideration arising from acquisitions (b)	2.1			2.1
Total	\$ 15.0	\$	\$ 12.9	\$ 2.1

(a) Represents interest rate swaps and FX forwards as more fully described in Note 5 to the financial statements

(b) Represents contingent consideration liabilities pursuant to the agreements for certain MA acquisitions which are more fully discussed in Note 7 to the consolidated financial statements

The following table summarizes the changes in the fair value of the Company's Level 3 liabilities:

	Contingent Consideration Year Ended December 31,	
	2011	2010
Balance as of January 1	\$ 2.1	\$
Issuances	7.4	2.0
Settlements	(0.3)	
Total losses (realized and unrealized):		
Included in earnings	0.3	
Foreign currency translation adjustments	(0.4)	0.1
Balance as of December 31	\$ 9.1	\$ 2.1

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

The losses included in earnings in the table above are recorded within SG&A expenses in the Company's consolidated statement of operations. During the year ended December 31, 2011, there were gains of \$0.3 million relating to contingent consideration obligations that were settled during the year. The remaining losses of \$0.6 million relate to contingent consideration obligations outstanding at December 31, 2011.

The following are descriptions of the methodologies utilized by the Company to estimate the fair value of its derivative contracts and contingent consideration obligations:

Derivatives:

In determining the fair value of the derivative contracts in the table above, the Company utilizes industry standard valuation models when active market quotes are not available. Where applicable, these models project future cash flows and discount the future

Table of Contents

amounts to a present value using spot rates, forward points, currency volatilities, interest rates as well as the risk of non-performance of the Company and the counterparties with whom it has derivative contracts. The Company has established strict counterparty credit guidelines and only enters into transactions with financial institutions that adhere to these guidelines. Accordingly, the risk of counterparty default is deemed to be minimal.

Contingent consideration:

At December 31, 2011, the Company has contingent consideration obligations related to the acquisitions of CSI and Copal which are based on certain financial and non-financial metrics set forth in the acquisition agreements. These obligations are measured using Level 3 inputs as defined in the ASC. The Company has recorded the obligations for these contingent consideration arrangements on the date of each respective acquisition based on management's best estimates of the achievement of the metrics.

The contingent consideration obligation for CSI is based on the achievement of a certain contractual milestone by January 2016. The Company utilizes a discounted cash flow methodology to value this obligation. The future expected cash flow for this obligation is discounted using an interest rate available to borrowers with similar credit risk profiles to that of the Company. The most significant estimate involved in the measurement of this obligation is the probability that the milestone will be reached by January 2016. At December 31, 2011, the Company expects that this milestone will be reached by the aforementioned date.

There are several contingent consideration obligations relating to the acquisition of Copal which are more fully discussed in Note 7. The Company utilizes discounted cash flow methodologies to value these obligations. The expected future cash flows for these obligations are discounted using a risk-free interest rate plus a credit spread based on the option adjusted spread of the Company's publicly traded debt as of the valuation date. The most significant estimate involved in the measurement of these obligations is the projected future results of the applicable Copal entities. Also, for the portion of the obligations which are dependent upon the exercise of the call/put option, the Company has utilized a Monte Carlo simulation model to estimate when the option will be exercised, thus triggering the payment of contingent consideration.

Table of Contents**NOTE 10 OTHER BALANCE SHEET INFORMATION**

The following tables contain additional detail related to certain balance sheet captions:

	December 31,	
	2011	2010
<i>Other current assets:</i>		
Prepaid taxes	\$ 27.6	\$ 82.3
Prepaid expenses	44.6	39.8

Other	44.1	38.1
Total other liabilities	\$ 404.8	\$ 362.3

Table of Contents**REDEEMABLE NONCONTROLLING INTEREST:**

The following table shows changes in the redeemable noncontrolling interest related to the acquisition of Copal for the year ended December 31, 2011:

(in millions)	Redeemable Noncontrolling Interest
Balance January 1, 2011	\$ 68.0
Fair value at date of acquisition	68.0
Reduction due to right of offset for UTPs *	(6.8)
Net earnings	1.0
Distributions	(1.7)
Translation adjustment	(1.7)
Balance December 31, 2011	\$ 60.5

* Relates to right of offset pursuant to the Copal acquisition agreement whereby the amount due to the sellers under the put/call arrangement is reduced by the amount of UTPs that the Company may be required to pay. See Note 7 for further detail on this arrangement.

NOTE 11 RESTRUCTURING

On March 27, 2009 the Company approved the 2009 Restructuring Plan to reduce costs in response to a strategic review of its business in certain jurisdictions and weak global economic and market conditions. The 2009 Restructuring Plan consisted of headcount reductions of approximately 150 positions representing approximately 4% of the Company's workforce at December 31, 2008 as well as contract termination costs and the divestiture of non-strategic assets. The Company's plan included closing offices in South Bend, Indiana; Jakarta, Indonesia and Taipei, Taiwan. There was \$0.2 million in accelerated amortization for intangible assets recognized in the first quarter of 2009 relating to the closure of the Jakarta, Indonesia office. The cumulative amount of expense incurred from inception through December 31, 2011 for the 2009 Restructuring Plan was \$14.7 million. The 2009 Restructuring Plan was substantially complete at September 30, 2009.

On December 31, 2007, the Company approved the 2007 Restructuring Plan that reduced global headcount by approximately 275 positions, or approximately 7.5% of the workforce at December 31, 2007, in response to the Company's reorganization announced in August 2007 and a decline in the then current and anticipated issuance of rated debt securities in some market sectors. Included in the 2007 Restructuring Plan was a reduction of staff as a result of: (i) consolidation of certain corporate staff functions, (ii) the integration of businesses comprising MA and (iii) an anticipated decline in new securities issuance in some market sectors. The 2007 Restructuring Plan also called for the termination of technology contracts as well as the outsourcing of certain technology functions. The cumulative amount of expense incurred from inception through December 31, 2011 for the 2007 Restructuring Plan was \$50.4 million. The 2007 Restructuring Plan was substantially complete as of December 31, 2008.

Total expenses included in the accompanying consolidated statements of operations are as follows:

	Year Ended December 31,		
	2011	2010	2009
2007 Restructuring Plan	\$	\$ 1.0	\$ 1.9
2009 Restructuring Plan		(0.9)	15.6
Total	\$	\$ 0.1	\$ 17.5

The expense in 2010 and 2009 related to the 2007 Restructuring Plan and the expense in 2010 related to the 2009 Restructuring Plan primarily reflects adjustments to previous estimates.

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

As of December 31, 2011 and 2010, the remaining liabilities related to both the 2007 Restructuring Plan and the 2009 Restructuring Plan were immaterial.

Table of Contents**NOTE 12 PENSION AND OTHER POST-RETIREMENT BENEFITS****U.S. Plans**

Moody's maintains funded and unfunded noncontributory Defined Benefit Pension Plans. The U.S. plans provide defined benefits using a cash balance formula based on years of service and career average salary or final average pay for selected executives. The Company also provides certain healthcare and life insurance benefits for retired U.S. employees. These post-retirement healthcare plans are contributory with participants' contributions adjusted annually; the life insurance plans are noncontributory. Moody's funded and unfunded U.S. pension plans, the U.S. post-retirement healthcare plans and the U.S. post-retirement life insurance plans are collectively referred to herein as the Post-Retirement Plans. Effective at the Distribution Date, Moody's assumed responsibility for the pension and other post-retirement benefits relating to its active employees. New D&B has assumed responsibility for the Company's retirees and vested terminated employees as of the Distribution Date.

Through 2007, substantially all U.S. employees were eligible to participate in the Company's DBPPs. Effective January 1, 2008, the Company no longer offers DBPPs to employees hired or rehired on or after January 1, 2008 and new hires instead will receive a retirement contribution in similar benefit value under the Company's Profit Participation Plan. Current participants of the Company's DBPPs continue to accrue benefits based on existing plan benefit formulas.

Following is a summary of changes in benefit obligations and fair value of plan assets for the Post-Retirement Plans for the years ended December 31:

	Pension Plans		Other Post-Retirement Plans	
	2011	2010	2011	2010
Change in Benefit Obligation:				
Benefit obligation, beginning of the period	\$ (242.5)	\$ (213.0)	\$ (15.6)	\$ (13.1)
Service cost	(15.1)	(13.5)	(1.1)	(0.9)
Interest cost	(13.1)	(12.0)	(0.8)	(0.8)
Plan participants' contributions			(0.2)	(0.2)
Benefits paid	13.6	10.5	0.8	0.7
Actuarial gain (loss)	(4.9)	7.4	(0.9)	(0.4)
Assumption changes	(36.8)	(21.9)	(2.4)	(0.9)
Benefit obligation, end of the period	(298.8)	(242.5)	(20.2)	(15.6)
Change in Plan Assets:				
Fair value of plan assets, beginning of the period	120.4	108.2		
Actual return on plan assets	0.8	13.9		
Benefits paid	(13.6)	(10.5)	(0.8)	(0.7)
Employer contributions	25.4	8.8	0.6	0.5
Plan participants' contributions			0.2	0.2
Fair value of plan assets, end of period	133.0	120.4		
Funded status of the plans	(165.8)	(122.1)	(20.2)	(15.6)
Amounts Recorded on the Consolidated Balance Sheets:				
Pension and post-retirement benefits liability-current	(3.0)	(8.9)	(0.8)	(0.6)
Pension and post-retirement benefits liability-non current	(162.8)	(113.2)	(19.4)	(15.0)
Net amount recognized	\$ (165.8)	\$ (122.1)	\$ (20.2)	\$ (15.6)
Accumulated benefit obligation, end of the period	\$ (256.1)	\$ (214.6)

Table of Contents

The following table summarizes the pre-tax net actuarial losses and prior service cost recognized in AOCI for the Company's Post-Retirement Plans as of December 31:

	Pension Plans		Other Post-Retirement Plans	
	2011	2010	2011	2010
Net actuarial (losses)	\$ (127.1)	\$ (80.9)	\$ (6.1)	\$ (3.1)
Net prior service costs	(4.7)	(5.3)		
Total recognized in AOCI- pretax	\$ (131.8)	\$ (86.2)	\$ (6.1)	\$ (3.1)

The following table summarizes the estimated pre-tax net actuarial losses and prior service cost for the Company's Post-Retirement Plans that will be amortized from AOCI and recognized as components of net periodic expense during the next fiscal year:

	Pension Plans		Other Post-Retirement Plans	
	2011	2010	2011	2010
Net actuarial losses	\$ 8.9		\$ 0.5	
Net prior service costs		0.7		
Total to be recognized as components of net periodic expense	\$ 9.6		\$ 0.5	

Net periodic benefit expenses recognized for the Post-Retirement Plans for years ended December 31:

	2011	Pension Plans		Other Post-Retirement Plans		
		2010	2009	2011	2010	2009
Components of net periodic expense						
Service cost	\$ 15.1	\$ 13.5	\$ 12.1	\$ 1.1	\$ 0.9	\$ 0.8
Interest cost	13.1	12.0	9.9	0.8	0.8	0.7
Expected return on plan assets	(11.9)	(10.5)	(10.0)			
Amortization of net actuarial loss from earlier periods	5.0	2.8	0.6	0.3	0.1	
Amortization of net prior service costs from earlier periods	0.6	0.7	0.4			
Settlement charges	1.6	1.3				
Net periodic expense	\$ 23.5	\$ 19.8	\$ 13.0	\$ 2.2	\$ 1.8	\$ 1.5

The following table summarizes the pre-tax amounts recorded in OCI related to the Company's Post-Retirement Plans for the years ended December 31:

	Pension Plans		Other Post-Retirement Plans	
	2011	2010	2011	2010
Amortization of net actuarial losses	\$ 5.0	\$ 2.8	\$ 0.3	\$ 0.1
Amortization of prior service costs	0.6	0.7		
Accelerated recognition of actuarial loss due to settlement	1.6	1.3		
Net actuarial (loss) arising during the period	(52.8)	(11.2)	(3.3)	(1.2)
Total recognized in Other Comprehensive Income pre-tax	\$ (45.6)	\$ (6.4)	\$ (3.0)	\$ (1.1)

Table of Contents**ADDITIONAL INFORMATION:****Assumptions Post-Retirement Plans**

Weighted-average assumptions used to determine benefit obligations at December 31:

	Pension Plans		Other Post-Retirement Plans	
	2011	2010	2011	2010
Discount rate	4.25%	5.39%	4.05%	5.15%
Rate of compensation increase	4.00%	4.00%		

Weighted-average assumptions used to determine net periodic benefit expense for years ended December 31:

	Pension Plans			Other Post-Retirement Plans		
	2011	2010	2009	2011	2010	2009
Discount rate	5.39%	5.95%	6.00%	5.15%	5.75%	6.25%
Expected return on plan assets	8.35%	8.35%	8.35%			
Rate of compensation increase	4.00%	4.00%	4.00%			

For 2011, the Company continued to use an expected rate of return on assets of 8.35% for Moody's funded pension plan. The expected rate of return on plan assets represents the Company's best estimate of the long-term return on plan assets and is determined by using a building block approach, which generally weighs the underlying long-term expected rate of return for each major asset class based on their respective allocation target within the plan portfolio. As the assumption reflects a long-term time horizon, the plan performance in any one particular year does not, by itself, significantly influence the Company's evaluation. For 2012, the expected rate of return used in calculating the net periodic benefit costs is 7.85%, which reflects the Company's most recent view of long-term capital market outlook and is commensurate with the returns expected to be generated by the plan assets under Company's current investment strategy, net of expenses.

Assumed Healthcare Cost Trend Rates at December 31:

	2011		2010		2009	
	Pre-age 65	Post-age 65	Pre-age 65	Post-age 65	Pre-age 65	Post-age 65
Healthcare cost trend rate assumed						
for the following year	7.4%	8.4%	7.9%	8.9%	8.4%	9.4%
Ultimate rate to which the cost trend rate is assumed to decline (ultimate trend rate)	5.0%		5.0%		5.0%	
Year that the rate reaches the ultimate trend rate	2020		2020		2020	

The assumed health cost trend rate reflects different expectations for the medical and prescribed medication components of health care costs for pre and post-65 retirees. As the Company subsidies for retiree healthcare coverage are capped at the 2005 level, for the majority of the post-retirement health plan participants, retiree contributions are assumed to increase at the same rate as the healthcare cost trend rates. As such, a one percentage-point increase or decrease in assumed healthcare cost trend rates would not have affected total service and interest cost and would have a minimal impact on the post-retirement benefit obligation.

In March 2010, the Patient Protection and Affordable Care Act (the Act) and the related reconciliation measure, which modifies certain provisions of the Act, were signed into law. The Act repeals the current rule permitting deduction of the portion of the drug coverage expense that is offset by the Medicare Part D subsidy. The provision of the Act is effective for taxable years beginning after December 31, 2010 and the reconciliation measure delays the aforementioned repeal of the drug coverage expense reduction by two years to December 31, 2012. The

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

Company has accounted for the enactment of the two laws in the first quarter of 2010, for which the impact to the Company's income tax expense and net income was immaterial. Other key provisions of the Act, such as coverage mandates, early retiree reinsurance program, and excise tax are also considered and their impacts on the benefit plan obligation of the Company's Other Post-Retirement Plans are deemed immaterial.

Plan Assets

Moody's investment objective for the assets in the funded pension plan is to earn total returns that will minimize future contribution requirements over the long-term within a prudent level of risk. The Company works with its independent investment consultants to

Table of Contents

determine asset allocation targets for its pension plan investment portfolio based on its assessment of business and financial conditions, demographic and actuarial data, funding characteristics, and related risk factors. Other relevant factors, including historical and forward looking views of inflation and capital market returns, are also considered. Risk management practices include monitoring of the plan, diversification across asset classes and investment styles, and periodic rebalancing toward asset allocation targets. The Company's monitoring of the plan includes ongoing reviews of investment performance, annual liability measurements, periodic asset/liability studies, and investment portfolio reviews.

Prior to 2009, the Company's target asset allocation was approximately 70% in diversified U.S. and non-U.S. equity securities, 20% in long-duration investment grade government and corporate bonds, and 10% in private real estate funds. In 2009, the Company revised its target asset allocation to approximately 60% (range of 50% to 70%) in equity securities, 30% (range of 25% to 35%) in fixed income securities and 10% (range of 7% to 13%) in other investments based on the Company's pension asset-liability study conducted. The revised asset allocation policy is expected to earn a return comparable to the Company's prior allocation target over the long-term and the Company has rebalanced its pension plan assets in 2010 to comply with the revised policy.

In accordance with the revised asset allocation policy, the funded plan will use a combination of active and passive investment strategies and different investment styles for its investment portfolios within each asset class. The plan's equity investments are diversified across U.S. and non-U.S. stocks of small, medium and large capitalization. The plan's fixed income investments are diversified principally across U.S. and non-U.S. government and corporate bonds which are expected to help reduce plan exposure to interest rate variation and to better align assets with obligations. Approximately 3% of total plan assets may be invested in funds which invest in debts rated below investment grade and 3% may be invested in emerging market debt. The plan's other investments are made through private real estate and convertible securities funds and these investments are expected to provide additional diversification benefits and absolute return enhancement to the plan assets. The Company does not use derivatives to leverage the portfolio. The overall allocation is expected to help protect the plan's funded status while generating sufficiently stable returns over the long-term.

The fair value of the Company's pension plan assets by asset category at December 31, 2011, determined based on the hierarchy of fair value measurements as defined in Footnote 2, and at December 31, 2010 are as follows:

Asset Category	Fair Value Measurement as of December 31, 2011				% of total assets
	Balance	Level 1	Level 2	Level 3	
Cash and cash equivalents	\$ 0.2	\$	\$ 0.2	\$	0%
Emerging markets equity fund	7.7	\$ 7.7	\$		6%
Common/collective trust funds equity securities					
U.S. large-cap	26.4		26.4		20%
U.S. small and mid-cap	9.3		9.3		7%
International	30.4		30.4		23%
Total equity investments	73.8	7.7	66.1		56%
Common/collective trust funds fixed income securities

U.S. Treasury Inflation-Protected Securities (TIPs)	7.6		7.6		6%
Emerging markets bonds	4.5		4.5		3%
High yield bonds	3.6		3.6		3%
Total fixed-income investments	44.5		44.5		33%
Common/collective trust funds convertible securities	4.8		4.8		4%
Private real estate fund	9.7			9.7	7%
Total other investment	14.5		4.8	9.7	11%
Total Assets	\$ 133.0	\$ 7.7	\$ 115.6	\$ 9.7	100%

Table of Contents

Asset Category	Fair Value Measurement as of December 31, 2010				% of total assets
	Balance	Level 1	Level 2	Level 3	
Emerging markets equity fund	\$ 10.3	\$ 10.3	\$	\$	9%
Common/collective trust funds equity securities					
U.S. large-cap	26.0		26.0		21%
U.S. small and mid-cap	9.6		9.6		8%
International	32.1		32.1		27%
Total equity investments	78.0	10.3	67.7		65%
Common/collective trust funds-fixed income securities					
Long-term investment grade government/corporate bonds	18.8		18.8		15%
U.S. Treasury Inflation-Protected Securities (TIPs)	5.4		5.4		4%
Emerging markets bonds	3.2		3.2		3%
High yield bonds	3.3		3.3		3%
Total fixed-income investments	30.7		30.7		25%
Common/collective trust funds convertible securities					
Private real estate fund	8.3			8.3	7%
Total other investment	11.7		3.4	8.3	10%
Total Assets	\$ 120.4	\$ 10.3	\$ 101.8	\$ 8.3	100%

Cash and cash equivalent is primarily comprised of investment in money market mutual funds. In determining fair value, Level 1 investments are valued based on quoted market prices in active markets. Investments in common/collective trust funds are valued using the net asset value (NAV) per unit in each fund. The NAV is based on the value of the underlying investments owned by each trust, minus its liabilities, and then divided by the number of shares outstanding. Common/collective trust funds are categorized in Level 2 to the extent that they are readily redeemable at their NAV or else they are categorized in Level 3 of the fair value hierarchy. The Company's investment in a private real estate fund is valued using the NAV per unit of funds that are invested in real property, and the real property is valued using independent market appraisals. Since appraisals involve utilization of significant unobservable inputs and the private real estate fund is not readily redeemable for cash, the Company's investment in the private real estate fund is categorized in Level 3.

The table below is a summary of changes in the fair value of the Plan's Level 3 assets:

Real estate investment fund:	
Balance as of December 31, 2010	\$ 8.3
Return on plan assets related to assets held as of December 31, 2011	1.0
Return on plan assets related to assets sold during the period	
Purchases (sales), net	0.4
Balance as of December 31, 2011	\$ 9.7

Except for the Company's U.S. funded pension plan, all of Moody's Post-Retirement Plans are unfunded and therefore have no plan assets.

Cash Flows

The Company contributed \$13.6 million to its funded pension plan during the year ended December 31, 2011 and made no contributions in 2010. The Company made payments of \$11.8 million and \$8.8 related to its U.S. unfunded pension plan obligations during the years ended December 31, 2011 and 2010, respectively and included in these amounts were lump sum settlement payments of \$6.9 million and \$7.0 million for 2011 and 2010, respectively. The Company made payments of \$0.6 million and \$0.5 million to its other U.S. post-retirement plans during the years ended December 31, 2011 and 2010, respectively. The Company presently anticipates making contributions of \$17.5 million to its funded pension plan and anticipates making payments of \$3.0 million to its unfunded U.S. pension plans and \$0.8 million to its other U.S.

post-retirement plans during the year ended December 31, 2012.

Table of Contents**Estimated Future Benefits Payable**

Estimated future benefits payments for the Post-Retirement Plans are as follows at ended December 31, 2011:

Year Ending December 31,	Pension Plan	Other Post-Retirement Plans *
2012	\$ 7.0	\$ 0.8
2013	8.0	0.9
2014	8.8	1.0
2015	9.9	1.2
2016	11.3	1.3
2017 - 2021	\$ 106.4	\$ 8.2

* The estimated future benefits payable for the Post-Retirement Plans are reflected net of the expected Medicare Part D subsidy for which the subsidy is insignificant on an annual basis for all the years presented.

Defined Contribution Plans

Moody's has a Profit Participation Plan covering substantially all U.S. employees. The Profit Participation Plan provides for an employee salary deferral and the Company matches employee contributions with cash contributions equal to 50% of employee contribution up to a maximum of 3% of the employee's pay. Moody's also makes additional contributions to the Profit Participation Plan based on year-to-year growth in the Company's EPS. Effective January 1, 2008, all new hires are automatically enrolled in the Profit Participation Plan when they meet eligibility requirements unless they decline participation. As the Company's U.S. DBPPs are closed to new entrants effective January 1, 2008, all eligible new hires will instead receive a retirement contribution into the Profit Participation Plan in value similar to the pension benefits. Additionally, effective January 1, 2008, the Company implemented a deferred compensation plan in the U.S., which is unfunded and provides for employee deferral of compensation and Company matching contributions related to compensation in excess of the IRS limitations on benefits and contributions under qualified retirement plans. Total expenses associated with U.S. defined contribution plans were \$14.9 million, \$19.4 million and \$9.1 million in 2011, 2010, and 2009, respectively.

Effective January 1, 2008, Moody's has designated the Moody's Stock Fund, an investment option under the Profit Participation Plan, as an Employee Stock Ownership Plan and, as a result, participants in the Moody's Stock Fund may receive dividends in cash or may reinvest such dividends into the Moody's Stock Fund. Moody's paid approximately \$0.3 million in dividends in each of the years ended December 31, 2011 and 2010 for the Company's common shares held by the Moody's Stock Fund. The Company records the dividends as a reduction of retained earnings in the Consolidated Statements of Shareholders' Equity (Deficit). The Moody's Stock Fund held approximately 610,000 and 645,000 shares of Moody's common stock at December 31, 2011 and 2010, respectively.

International Plans

Certain of the Company's international operations provide pension benefits to their employees. For defined contribution plans, company contributions are primarily determined as a percentage of employees' eligible compensation. Moody's also makes contributions to non-U.S. employees under a profit sharing plan which is based on year-to-year growth in the Company's diluted EPS. Expenses related to these defined contribution plans for the years ended December 31, 2011, 2010 and 2009 were \$16.3 million, \$11.8 million and \$5.7 million, respectively.

For defined benefit plans, the Company maintains various unfunded DBPPs and post-retirement health benefit plan for certain of its non-U.S. subsidiaries located in Germany, France and Canada. These unfunded DBPPs are generally based on each eligible employee's years of credited service and on compensation levels as specified in the plans. The DBPP in Germany was closed to new entrants in 2002. Total defined benefit pension liabilities recorded related to non-U.S. pension plans was \$5.3 million, \$4.6 million and \$3.6 million based on a weighted average discount rate of 4.79%, 5.28%, and 5.56% at December 31, 2011, 2010 and 2009, respectively. The pension liabilities recorded as of December 31, 2011 represent the unfunded status of these pension plans and were recognized in the statement of financial position as non-current liabilities. Total pension expense recorded for the years ended December 31, 2011, 2010 and 2009 was approximately \$0.6 million, \$0.5 million and \$0.4 million, respectively. These amounts are not included in the tables above. As of December 31, 2011, the Company has included in AOCI net actuarial gains of \$0.8 million (\$0.6 million net of tax) related to non-U.S. pension plans that have yet to be recognized as a reduction to net periodic pension expense and the Company expects its 2012 amortization of the net actuarial gains to be immaterial. The Company's non-U.S. other post-retirement benefit obligation is not material as of December 31, 2011.

Table of Contents**NOTE 13 STOCK-BASED COMPENSATION PLANS**

Presented below is a summary of the stock compensation cost and associated tax benefit in the accompanying Consolidated Statements of Operations:

	Year Ended December 31,		
	2011	2010	2009
Stock compensation cost	\$ 56.7	\$ 56.6	\$ 57.4
Tax benefit	\$ 18.1	\$ 23.9	\$ 20.9

The fair value of each employee stock option award is estimated on the date of grant using the Black-Scholes option-pricing model that uses the assumptions noted below. The expected dividend yield is derived from the annual dividend rate on the date of grant. The expected stock volatility is based on an assessment of historical weekly stock prices of the Company as well as implied volatility from Moody's traded options. The risk-free interest rate is based on U.S. government zero coupon bonds with maturities similar to the expected holding period. The expected holding period was determined by examining historical and projected post-vesting exercise behavior activity.

The following weighted average assumptions were used for options granted:

	Year Ended December 31,		
	2011	2010	2009
Expected dividend yield	1.53%	1.58%	1.59%
Expected stock volatility	41%	44%	38%
Risk-free interest rate	3.33%	2.73%	2.63%
Expected holding period	7.6 yrs	5.9 yrs	5.8 yrs
Grant date fair value	\$ 12.49	\$ 10.38	\$ 8.52

Under the 1998 Plan, 33.0 million shares of the Company's common stock have been reserved for issuance. The 2001 Plan, which is shareholder approved, permits the granting of up to 35.6 million shares, of which not more than 15.0 million shares are available for grants of awards other than stock options. The 2001 Plan was amended and approved at the annual shareholders meeting on April 20, 2010, increasing the number of shares reserved for issuance by 7.0 million which are included in the aforementioned amounts. The Stock Plans provide that options are exercisable not later than ten years from the grant date. The vesting period for awards under the Stock Plans is generally determined by the Board at the date of the grant and has been four years except for employees who are at or near retirement eligibility, as defined, for which vesting is between one and four years. Additionally, the vesting period is three years for certain performance-based restricted stock that contain a condition whereby the number of shares that ultimately vest are based on the achievement of certain non-market based performance metrics of the Company. Options may not be granted at less than the fair market value of the Company's common stock at the date of grant. The Stock Plans also provide for the granting of restricted stock.

The Company maintains the Directors' Plan for its Board, which permits the granting of awards in the form of non-qualified stock options, restricted stock or performance shares. The Directors' Plan provides that options are exercisable not later than ten years from the grant date. The vesting period is determined by the Board at the date of the grant and is generally one year for options and between one and three years for restricted stock. Under the Directors' Plan, 0.8 million shares of common stock were reserved for issuance. Any director of the Company who is not an employee of the Company or any of its subsidiaries as of the date that an award is granted is eligible to participate in the Directors' Plan.

Table of Contents

A summary of option activity as of December 31, 2011 and changes during the year then ended is presented below:

Options	Shares	Weighted Average Exercise Price Per Share	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding, December 31, 2010	19.3	\$ 38.11		
Granted	0.6	30.59		
Exercised	(2.2)	23.21		
Forfeited	(0.1)	28.49		
Expired	(0.2)	50.34		
Outstanding, December 31, 2011	17.4	\$ 39.60	4.7 yrs	\$ 64.6
Vested and expected to vest, December 31, 2011	17.0	\$ 39.86	4.6 yrs	\$ 62.3
Exercisable, December 31, 2011	13.4	\$ 42.94	3.8 yrs	\$ 41.0

The aggregate intrinsic value in the table above represents the total pre-tax intrinsic value (the difference between Moody's closing stock price on the last trading day of the year ended December 31, 2011 and the exercise prices, multiplied by the number of in-the-money options) that would have been received by the option holders had all option holders exercised their options as of December 31, 2011. This amount varies based on the fair value of Moody's stock. As of December 31, 2011 there was \$19.6 million of total unrecognized compensation expense related to options. The expense is expected to be recognized over a weighted average period of 1.4 years.

The following table summarizes information relating to stock option exercises:

	Year Ended December 31,		
	2011	2010	2009
Proceeds from stock option exercises	\$ 50.3	\$ 36.4	\$ 18.0
Aggregate intrinsic value	\$ 25.3	\$ 19.7	\$ 13.8
Tax benefit realized upon exercise	\$ 9.6	\$ 7.8	\$ 5.4

A summary of the status of the Company's nonvested restricted stock as of December 31, 2011 and changes during the year then ended is presented below:

Nonvested Restricted Stock	Shares	Weighted Average Grant Date Fair Value Per Share
Balance, December 31, 2010	2.0	\$ 33.10
Granted	1.5	30.52
Vested	(0.6)	38.42
Forfeited	(0.1)	29.89
Balance, December 31, 2011	2.8	\$ 30.65

As of December 31, 2011, there was \$43.3 million of total unrecognized compensation expense related to nonvested restricted stock. The expense is expected to be recognized over a weighted average period of 1.7 years.

The following table summarizes information relating to the vesting of restricted stock awards:

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

	Year Ended December 31,		
	2011	2010	2009
Fair value of vested shares	\$ 18.9	\$ 12.4	\$ 8.0
Tax benefit realized upon vesting	\$ 6.9	\$ 4.7	\$ 2.9

Table of Contents

A summary of the status of the Company's performance-based restricted stock as of December 31, 2011 and changes during the year then ended is presented below:

Performance based restricted stock	Shares	Weighted Average Grant Date Fair Value Per Share
Balance, December 31, 2010	0.4	\$ 25.33
Granted	0.4	28.76
Adjustment to shares expected to vest*	0.2	26.63
Balance, December 31, 2011	1.0	\$ 26.92

* The adjustment reflects additional shares expected to vest based on the Company's projected achievement of certain non-market based performance metrics as of December 31, 2011.

As of December 31, 2011, there was \$13.0 million of total unrecognized compensation expense related to this plan. The expense is expected to be recognized over a weighted average period of 0.9 years.

The Company has a policy of issuing treasury stock to satisfy shares issued under stock-based compensation plans.

In addition, the Company also sponsors the ESPP. Under the ESPP, 6.0 million shares of common stock were reserved for issuance. The ESPP allows eligible employees to purchase common stock of the Company on a monthly basis at a discount to the average of the high and the low trading prices on the New York Stock Exchange on the last trading day of each month. This discount was 5% in 2011, 2010 and 2009 resulting in the ESPP qualifying for non-compensatory status under Topic 718 of the ASC. Accordingly, no compensation expense was recognized for the ESPP in 2011, 2010, and 2009. The employee purchases are funded through after-tax payroll deductions, which plan participants can elect from one percent to ten percent of compensation, subject to the annual federal limit.

NOTE 14 INCOME TAXES

Components of the Company's provision for income taxes are as follows:

	Year Ended December 31,		
	2011	2010	2009
Current:			
Federal	\$ 133.6	\$ 106.6	\$ 99.2
State and Local	28.1	22.1	53.3
Non-U.S.	89.8	82.9	70.1
Total current	251.5	211.6	222.6
Deferred:			
Federal	9.3	(14.7)	22.8
State and Local	7.0	10.6	(9.3)
Non-U.S.	(6.0)	(6.5)	3.0
Total deferred	10.3	(10.6)	16.5
Total provision for income taxes	\$ 261.8	\$ 201.0	\$ 239.1

Table of Contents

A reconciliation of the U.S. federal statutory tax rate to the Company's effective tax rate on income before provision for income taxes is as follows:

	Year Ended December 31,		
	2011	2010	2009
U.S. statutory tax rate	35.0%	35.0%	35.0%
State and local taxes, net of federal tax benefit	2.7	2.9	4.4
Benefit of foreign operations	(6.3)	(9.7)	(2.4)
Legacy tax items	(0.2)	(0.4)	(0.3)
Other		0.3	0.3
Effective tax rate	31.2%	28.1%	37.0%
Income tax paid	\$ 191.4	\$ 247.9	\$ 192.2

The source of income before provision for income taxes is as follows:

	Year Ended December 31,		
	2011	2010	2009
United States	\$ 469.1	\$ 390.6	\$ 386.9
International	370.7	323.8	259.3
Income before provision for income taxes	\$ 839.8	\$ 714.4	\$ 646.2

Table of Contents

The components of deferred tax assets and liabilities are as follows:

	December 31,	
	2011	2010
Deferred tax assets:		
Current:

Foreign earnings to be repatriated	(2.6)	(1.2)
Amortization of intangible assets and capitalized software	(135.7)	(108.2)
Self-insured related income	(26.8)	(27.1)
Other liabilities	(2.4)	(1.5)
Total non-current	(193.1)	(154.4)
Total deferred tax liabilities	(193.1)	(154.6)
Net deferred tax asset	192.8	208.8
Valuation allowance	(13.9)	(12.8)
Total net deferred tax assets	\$ 178.9	\$ 196.0

(1) Amounts are primarily set to expire beginning in 2015, if unused.

Table of Contents

Prepaid taxes of \$27.6 million and \$82.3 million for December 31, 2011 and 2010, respectively are included in other current assets in the consolidated balance sheets. As of December 31, 2011, the Company had approximately \$956.1 million of undistributed earnings of foreign subsidiaries that it intends to indefinitely reinvest in foreign operations. The Company has not provided deferred income taxes on these indefinitely reinvested earnings. It is not practicable to determine the amount of deferred taxes that might be required to be provided if such earnings were distributed in the future, due to complexities in the tax laws and in the hypothetical calculations that would have to be made.

The Company had valuation allowances of \$13.9 million and \$12.8 million at December 31, 2011 and 2010, respectively, related to foreign net operating losses for which realization is uncertain. The change in the valuation allowances for 2011 and 2010 results primarily from the increase in valuation allowances in certain jurisdictions based on the Company's evaluation of the expected realization of these future benefits.

As of December 31, 2011 the Company had \$205.4 million of UTPs of which \$131.1 million represents the amount that, if recognized, would impact the effective tax rate in future periods.

A reconciliation of the beginning and ending amount of UTPs is as follows:

	2011	2010	2009
Balance as of January 1	\$ 180.8	\$ 164.2	\$ 185.1
Additions for tax positions related to the current year	48.9	31.1	31.1
Additions for tax positions of prior years	15.3	16.2	52.5
Reductions for tax positions of prior years	(27.3)	(9.9)	(47.0)
Settlements with taxing authorities	(2.1)		(50.7)
Lapse of statute of limitations	(10.2)	(20.8)	(6.8)
Balance as of December 31	\$ 205.4	\$ 180.8	\$ 164.2

The Company classifies interest related to UTPs in interest expense in its consolidated statements of operations. Penalties, if incurred, would be recognized in other non-operating expenses. During 2011, the Company accrued net interest of \$7 million related to UTPs. As of December 31, 2011 and 2010, the amount of accrued interest recorded in the Company's consolidated balance sheets related to UTPs was \$41.5 million and \$33.7 million, respectively.

Moody's Corporation and subsidiaries are subject to U.S. federal income tax as well as income tax in various state, local and foreign jurisdictions. The Company's U.S. federal income tax returns for the years 2008 and 2009 are under examination and its 2010 return remains open to examination. New York City income tax returns for the years 2008 through 2010 are currently under examination. In January 2012, the examination of the Company's New York State income tax returns for the years 2004 through 2010 was completed and resulted in a payment of approximately \$89 million, including interest. This payment is not expected to have a material impact on the provision for income taxes or net income in 2012. Tax filings in the U.K. remain open to examination for tax years 2007 through 2010.

For current ongoing audits related to open tax years the Company estimates that it is reasonably possible that the balance of UTPs could decrease in the next twelve months as a result of the effective settlement of these audits. The Company believes that the effective settlement of tax audits in the next twelve months will result in a decrease in UTPs of \$100 million to \$120 million, including decreases associated with the above mentioned \$89 million payment.

Table of Contents**NOTE 15 INDEBTEDNESS**

The following table summarizes total indebtedness:

	December 31,	
	2011	2010
2007 Facility	\$	\$
Commercial paper		
Notes payable:		
Series 2005-1 Notes due 2015, including fair value of interest rate swap of \$11.5 million at 2011 and \$(3.7) million at 2010	311.5	296.3
Series 2007-1 Notes due in 2017	300.0	300.0
2010 Senior Notes, due 2020, net of unamortized discount of \$2.7 million and \$3.0 million in 2011 and 2010, respectively	497.3	497.0
2008 Term Loan, various payments through 2013	135.0	146.3
Total debt	1,243.8	1,239.6
Current portion	(71.3)	(11.3)
Total long-term debt	\$ 1,172.5	\$ 1,228.3

2007 Facility

On September 28, 2007, the Company entered into a \$1.0 billion five-year senior, unsecured revolving credit facility, expiring in September 2012. The 2007 Facility will serve, in part, to support the Company's CP Program described below. Interest on borrowings is payable at rates that are based on LIBOR plus a premium that can range from 16.0 to 40.0 basis points of the outstanding borrowing amount depending on the Debt/EBITDA ratio. The Company also pays quarterly facility fees, regardless of borrowing activity under the 2007 Facility. The quarterly fees for the 2007 Facility can range from 4.0 to 10.0 basis points per annum of the facility amount, depending on the Company's Debt/EBITDA ratio. The Company also pays a utilization fee of 5.0 basis points on borrowings outstanding when the aggregate amount outstanding exceeds 50% of the total facility. The 2007 Facility contains certain covenants that, among other things, restrict the ability of the Company and certain of its subsidiaries, without the approval of the lenders, to engage in mergers, consolidations, asset sales, transactions with affiliates and sale-leaseback transactions or to incur liens, as defined in the related agreement. The 2007 Facility also contains financial covenants that, among other things, require the Company to maintain a Debt/EBITDA ratio of not more than 4.0 to 1.0 at the end of any fiscal quarter.

Commercial Paper

On October 3, 2007, the Company entered into a private placement commercial paper program under which the Company may issue CP notes up to a maximum amount of \$1.0 billion. Amounts available under the CP Program may be re-borrowed. The CP Program is supported by the Company's 2007 Facility. The maturities of the CP Notes will vary, but may not exceed 397 days from the date of issue. The CP Notes are sold at a discount from par or, alternatively, sold at par and bear interest at rates that will vary based upon market conditions at the time of issuance. The rates of interest will depend on whether the CP Notes will be a fixed or floating rate. The interest on a floating rate may be based on the following: (a) certificate of deposit rate; (b) commercial paper rate; (c) the federal funds rate; (d) the LIBOR; (e) prime rate; (f) Treasury rate; or (g) such other base rate as may be specified in a supplement to the private placement agreement. The CP Program contains certain events of default including, among other things: non-payment of principal, interest or fees; entrance into any form of moratorium; and bankruptcy and insolvency events, subject in certain instances to cure periods.

Notes Payable

On November 4, 2011, in connection with the acquisition of Copal, a subsidiary of the Company issued a \$14.2 million non-interest bearing note to the sellers which represented a portion of the consideration transferred to acquire the Copal entities. If a seller subsequently transfers to the Company all of its shares, the Company must repay the seller its proportion of the principal on the later of (i) the fourth anniversary date of the note or (ii) within a time frame set forth in the acquisition agreement relating to the resolution of certain income tax uncertainties pertaining to the transaction. Otherwise, the Company must repay any amount outstanding on the earlier of (i) two business days subsequent to the exercise of the put/call option to acquire the remaining shares of Copal or (ii) the tenth anniversary date of the issuance of the note. The Company has the right to offset payment of the note against certain indemnification assets associated with UTPs related to the acquisition, which are more fully discussed in Note 7. Accordingly, the Company has offset the liability for this note against the indemnification asset, thus no balance for this

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

note is carried on the Company's consolidated balance sheet at December 31, 2011. In the event that the Company would not be required to settle amounts related to the UTPs, the Company would be required to pay the sellers the principal in accordance with the note agreement. The Company may prepay the note in accordance with certain terms set forth in the acquisition agreement.

Table of Contents

On August 19, 2010, the Company issued \$500 million aggregate principal amount of senior unsecured notes in a public offering. The 2010 Senior Notes bear interest at a fixed rate of 5.50% and mature on September 1, 2020. Interest on the 2010 Senior Notes will be due semi-annually on September 1 and March 1 of each year, commencing March 1, 2011. The Company may prepay the 2010 Senior Notes, in whole or in part, at any time at a price equal to 100% of the principal amount being prepaid, plus accrued and unpaid interest and a Make-Whole Amount. Additionally, at the option of the holders of the notes, the Company may be required to purchase all or a portion of the notes upon occurrence of a Change of Control Triggering Event, as defined in the Indenture, at a price equal to 101% of the principal amount thereof, plus accrued and unpaid interest to the date of purchase. The Indenture contains covenants that limit the ability of the Company and certain of its subsidiaries to, among other things, incur or create liens and enter into sale and leaseback transactions. In addition, the Indenture contains a covenant that limits the ability of the Company to consolidate or merge with another entity or to sell all or substantially all of its assets to another entity. The Indenture contains customary default provisions. In addition, an event of default will occur if the Company or certain of its subsidiaries fail to pay the principal of any indebtedness (as defined in the Indenture) when due at maturity in an aggregate amount of \$50 million or more, or a default occurs that results in the acceleration of the maturity of the Company's or certain of its subsidiaries' indebtedness in an aggregate amount of \$50 million or more. Upon the occurrence and during the continuation of an event of default under the Indenture, the notes may become immediately due and payable either automatically or by the vote of the holders of more than 25% of the aggregate principal amount of all of the notes then outstanding.

On September 7, 2007, the Company issued and sold through a private placement transaction, \$300.0 million aggregate principal amount of its 6.06% Series 2007-1 Senior Unsecured Notes due 2017 pursuant to the 2007 Agreement. The Series 2007-1 Notes have a ten-year term and bear interest at an annual rate of 6.06%, payable semi-annually on March 7 and September 7. Under the terms of the 2007 Agreement, the Company may, from time to time within five years, in its sole discretion, issue additional series of senior notes in an aggregate principal amount of up to \$500.0 million pursuant to one or more supplements to the 2007 Agreement. The Company may prepay the Series 2007-1 Notes, in whole or in part, at any time at a price equal to 100% of the principal amount being prepaid, plus accrued and unpaid interest and a Make Whole Amount. The 2007 Agreement contains covenants that limit the ability of the Company, and certain of its subsidiaries to, among other things: enter into transactions with affiliates, dispose of assets, incur or create liens, enter into any sale-leaseback transactions, or merge with any other corporation or convey, transfer or lease substantially all of its assets. The Company must also not permit its Debt/EBITDA ratio to exceed 4.0 to 1.0 at the end of any fiscal quarter.

On September 30, 2005, the Company issued and sold through a private placement transaction, \$300.0 million aggregate principal amount of its Series 2005-1 Senior Unsecured Notes due 2015 pursuant to the 2005 Agreement. The Series 2005-1 Notes have a ten-year term and bear interest at an annual rate of 4.98%, payable semi-annually on March 30 and September 30. Proceeds from the sale of the Series 2005-1 Notes were used to refinance \$300.0 million aggregate principal amount of the Company's outstanding 7.61% senior notes which matured on September 30, 2005. In the event that Moody's pays all, or part, of the Series 2005-1 Notes in advance of their maturity, such prepayment will be subject to a Make Whole Amount. The Series 2005-1 Notes are subject to certain covenants that, among other things, restrict the ability of the Company and certain of its subsidiaries, without the approval of the lenders, to engage in mergers, consolidations, asset sales, transactions with affiliates and sale-leaseback transactions or to incur liens, as defined in the related agreements.

2008 Term Loan

On May 7, 2008, Moody's entered into a five-year, \$150.0 million senior unsecured term loan with several lenders. Proceeds from the loan were used to pay off a portion of the CP outstanding. Interest on borrowings under the 2008 Term Loan is payable quarterly at rates that are based on LIBOR plus a margin that can range from 125 basis points to 175 basis points depending on the Company's Debt/EBITDA ratio. The outstanding borrowings shall amortize in accordance with the schedule of payments set forth in the 2008 Term Loan outlined in the table below.

The 2008 Term Loan contains restrictive covenants that, among other things, restrict the ability of the Company to engage or to permit its subsidiaries to engage in mergers, consolidations, asset sales, transactions with affiliates and sale-leaseback transactions or to incur, or permit its subsidiaries to incur, liens, in each case, subject to certain exceptions and limitations. The 2008 Term Loan also limits the amount of debt that subsidiaries of the Company may incur. In addition, the 2008 Term Loan contains a financial covenant that requires the Company to maintain a Debt/EBITDA ratio of not more than 4.0 to 1.0 at the end of any fiscal quarter.

Table of Contents

The principal payments due on the Company's long-term borrowings for each of the next five years are presented in the table below:

	2008 Term Loan	Series 2005-1 Notes	Total
Year Ending December 31,			
2012	\$ 71.3	\$	\$ 71.3
2013	63.7		63.7
2014			
2015		300.0	300.0
2016			
Total	\$ 135.0	\$ 300.0	\$ 435.0

In the fourth quarter of 2010, the Company entered into interest rate swaps with a total notional amount of \$300 million which will convert the fixed rate of interest on the Series 2005-1 Notes to a floating LIBOR-based interest rate. Also, on May 7, 2008, the Company entered into interest rate swaps with a total notional amount of \$150 million to protect against fluctuations in the LIBOR-based variable interest rate on the 2008 Term Loan. Both of these interest rate swaps are more fully discussed in Note 5 above.

INTEREST EXPENSE, NET

The following table summarizes the components of interest as presented in the consolidated statements of operations:

	Year Ended December 31,		
	2011	2010	2009
Income	\$ 5.3	\$ 3.1	\$ 2.5
Expense on borrowings	(65.5)	(52.2)	(45.5)
UTBs and other tax related interest	(8.7)	(7.7)	1.6
Legacy Tax ^(a)	3.7	2.5	6.5
Interest capitalized	3.1	1.8	1.5
Total	\$ (62.1)	\$ (52.5)	\$ (33.4)
Interest paid	\$ 67.2	\$ 44.0	\$ 46.1

(a) Represents a reduction of accrued interest related to the favorable resolution of Legacy Tax Matters, further discussed in Note 18 to the consolidated financial statements.

Net interest expense of \$33.4 million in 2009 reflects a reduction of approximately \$12 million related to tax and tax-related liabilities.

At December 31, 2011, the Company was in compliance with all covenants contained within all of the debt agreements. In addition to the covenants described above, the 2007 Facility, the 2005 Agreement, the 2007 Agreement, the 2010 Senior Notes and the 2008 Term Loan contain cross default provisions whereby default under one of the aforementioned debt instruments could in turn permit lenders under other debt instruments to declare borrowings outstanding under those instruments to be immediately due and payable.

The Company's long-term debt, including the current portion, is recorded at cost except for the Series 2005-1 Notes which are carried at cost adjusted for the fair value of an interest rate swap used to hedge the fair value of the note. The fair value and carrying value of the Company's long-term debt as of December 31, 2011 and 2010 is as follows:

December 31, 2011

December 31, 2010

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
Series 2005-1 Notes*	\$ 311.5	\$ 316.5	\$ 296.3	\$ 310.6
Series 2007-1 Notes	300.0	332.7	300.0	321.3
2010 Senior Notes	497.3	525.6	497.0	492.1
2008 Term Loan	135.0	135.0	146.3	146.3
Total	\$ 1,243.8	\$ 1,309.8	\$ 1,239.6	\$ 1,270.3

* The carrying amount includes an \$11.5 million and (\$3.7) million fair value adjustment on an interest rate hedge at December 31, 2011 and 2010, respectively.

Table of Contents

The fair value of the Company's 2010 Senior Notes is based on quoted market prices. The fair value of the remaining long-term debt, which is not publicly traded, is estimated using discounted cash flows based on prevailing interest rates available to the Company for borrowings with similar maturities.

NOTE 16 CAPITAL STOCK**Authorized Capital Stock**

The total number of shares of all classes of stock that the Company has authority to issue under its Restated Certificate of Incorporation is 1.02 billion shares with a par value of \$0.01, of which 1.0 billion are shares of common stock, 10.0 million are shares of preferred stock and 10.0 million are shares of series common stock. The preferred stock and series common stock can be issued with varying terms, as determined by the Board.

Share Repurchase Program

The Company implemented a systematic share repurchase program in the third quarter of 2005 through an SEC Rule 10b5-1 program. Moody's may also purchase opportunistically when conditions warrant. On July 30, 2007, the Board of the Company authorized a \$2.0 billion share repurchase program, which the Company began utilizing in January 2008. There is no established expiration date for the remaining authorization. The Company's intent is to return capital to shareholders in a way that serves their long-term interests. As a result, Moody's share repurchase activity will continue to vary from quarter to quarter.

During 2011, Moody's repurchased 11.0 million shares of its common stock under the aforementioned July 30, 2007 authorization, and issued 2.9 million shares under employee stock-based compensation plans.

Dividends

During the years ended December 31, 2011, 2010 and 2009, the Company paid dividends of:

	Dividends Paid Per Share		
	Year ended December 31,		
	2011	2010	2009
First quarter	\$ 0.115	\$ 0.105	\$ 0.10
Second quarter	0.14	0.105	0.10
Third quarter	0.14	0.105	0.10
Fourth quarter	0.14	0.105	0.10
Year ended December 31,	\$ 0.535	\$ 0.42	\$ 0.40

On December 13, 2011, the Board of the Company approved the declaration of a quarterly dividend of \$0.16 per share of Moody's common stock, payable on March 10, 2012 to shareholders of record at the close of business on February 20, 2012. The continued payment of dividends at the rate noted above, or at all, is subject to the discretion of the Board.

NOTE 17 LEASE COMMITMENTS

Moody's operates its business from various leased facilities, which are under operating leases that expire over the next 16 years. Moody's also leases certain computer and other equipment under operating leases that expire over the next five years. Rent expense, including lease incentives, is amortized on a straight-line basis over the related lease term. Rent expense under operating leases for the years ended December 31, 2011, 2010 and 2009 was \$73.1 million, \$70.9 million and \$74.3 million, respectively. The amount of deferred rent that is included in other liabilities in the consolidated balance sheets is \$110.5 million and \$103.1 million at December 31, 2011 and 2010, respectively.

Edgar Filing: MOODYS CORP /DE/ - Form 10-K

The approximate minimum rent for operating leases that have remaining or original non-cancelable lease terms in excess of one year at December 31, 2011 is as follows:

Year Ending December 31,	Operating Leases
2012	\$ 73.0
2013	70.6
2014	62.8
2015	55.1
2016	51.0
Thereafter	537.6
Total minimum lease payments	\$ 850.1

Table of Contents

On October 20, 2006, the Company entered into a 21-year operating lease agreement to occupy 15 floors of an office building at 7WTC which includes a total of 20 years of renewal options. On March 28, 2007 the 7WTC lease agreement was amended for the Company to lease an additional two floors for a term of 20 years. The total base rent for the entire lease term, including rent credits, for the 7WTC lease is approximately \$642 million. As of December 31, 2011, the company has a remaining obligation of \$536.2 million.

On February 6, 2008, the Company entered into a 17.5 year operating lease agreement to occupy six floors of an office tower located in the Canary Wharf district of London, England. The total base rent of the Canary Wharf Lease over its 17.5-year term is approximately 134 million GBP, and the Company began making base rent payments in 2011. As of December 31, 2011, the company has a remaining obligation of \$201.4 million. In addition to the base rent payments the Company is obligated to pay certain customary amounts for its share of operating expenses and tax obligation.

NOTE 18 CONTINGENCIES

From time to time, Moody's is involved in legal and tax proceedings, governmental investigations, claims and litigation that are incidental to the Company's business, including claims based on ratings assigned by MIS. Moody's is also subject to ongoing tax audits in the normal course of business. Management periodically assesses the Company's liabilities and contingencies in connection with these matters based upon the latest information available. Moody's discloses material pending legal proceedings pursuant to SEC rules and other pending matters as it may determine to be appropriate.

Following the events in the U.S. subprime residential mortgage sector and the credit markets more broadly over the last several years, MIS and other credit rating agencies are the subject of intense scrutiny, increased regulation, ongoing investigation, and civil litigation. Legislative, regulatory and enforcement entities around the world are considering additional legislation, regulation and enforcement actions, including with respect to MIS's compliance with newly imposed regulatory standards. Moody's has received subpoenas and inquiries from states attorneys general and other governmental authorities and is responding to such investigations and inquiries.

In addition, the Company is facing litigation from market participants relating to the performance of MIS rated securities. Although Moody's in the normal course experiences such litigation, the volume and cost of defending such litigation has significantly increased following the events in the U.S. subprime residential mortgage sector and the credit markets more broadly over the last several years.

On June 27, 2008, the Brockton Contributory Retirement System, a purported shareholder of the Company's securities, filed a purported shareholder derivative complaint on behalf of the Company against its directors and certain senior officers, and the Company as nominal defendant, in the Supreme Court of the State of New York, County of New York. The plaintiff asserts various causes of action relating to the named defendants' oversight of MIS's ratings of RMBS and constant-proportion debt obligations, and their participation in the alleged public dissemination of false and misleading information about MIS's ratings practices and/or a failure to implement internal procedures and controls to prevent the alleged wrongdoing. The plaintiff seeks compensatory damages, restitution, disgorgement of profits and other equitable relief. On July 2, 2008, Thomas R. Flynn, a purported shareholder of the Company's securities, filed a similar purported shareholder derivative complaint on behalf of the Company against its directors and certain senior officers, and the Company as nominal defendant, in the Supreme Court of the State of New York, County of New York, asserting similar claims and seeking the same relief. The cases have been consolidated and plaintiffs filed an amended consolidated complaint in November 2008. The Company removed the consolidated action to the United States District Court for the Southern District of New York in December 2008. In January 2009, the plaintiffs moved to remand the case to the Supreme Court of the State of New York, which the Company opposed. On February 23, 2010, the court issued an opinion remanding the case to the Supreme Court of New York. On October 30, 2008, the Louisiana Municipal Police Employees Retirement System, a purported shareholder of the Company's securities, also filed a shareholder derivative complaint on behalf of the Company against its directors and certain officers, and the Company as a nominal defendant, in the U.S. District Court for the Southern District of New York. This complaint also asserts various causes of action relating to the Company's ratings of RMBS, CDO and constant-proportion debt obligations, and named defendants' participation in the alleged public dissemination of false and misleading information about MIS's ratings practices and/or a failure to implement internal procedures and controls to prevent the alleged wrongdoing. On December 9, 2008, Rena Nadoff, a purported shareholder of the Company, filed a shareholder derivative complaint on behalf of the Company against its directors and its CEO, and the Company as a nominal defendant, in the Supreme Court of the State of New York. The complaint asserts a claim for breach of fiduciary duty in connection with alleged overrating of asset-backed securities and underrating of municipal securities. On October 20, 2009, the Company moved to dismiss or stay the action in favor of related federal litigation. On January 26, 2010, the court entered a stipulation and order, submitted jointly by the parties, staying the Nadoff litigation pending coordination and prosecution of similar claims in the above and below described federal derivative actions. On July 6, 2009, W. A. Sokolowski, a purported shareholder of the Company, filed a purported shareholder derivative complaint on behalf of the Company against its directors and current and former officers, and the Company as a nominal defendant, in the United States District Court for the Southern District of New York. The complaint asserts claims relating to alleged mismanagement of the Company's processes for rating structured finance transactions, alleged insider trading and causing the Company to buy back its own stock at artificially inflated prices.

Table of Contents

Two purported class action complaints have been filed by purported purchasers of the Company's securities against the Company and certain of its senior officers, asserting claims under the federal securities laws. The first was filed by Raphael Nach in the U.S. District Court for the Northern District of Illinois on July 19, 2007. The second was filed by Teamsters Local 282 Pension Trust Fund in the U.S. District Court for the Southern District of New York on September 26, 2007. Both actions have been consolidated into a single proceeding entitled *In re Moody's Corporation Securities Litigation* in the U.S. District Court for the Southern District of New York. On June 27, 2008, a consolidated amended complaint was filed, purportedly on behalf of all purchasers of the Company's securities during the period February 3, 2006 through October 24, 2007. Plaintiffs allege that the defendants issued false and/or misleading statements concerning the Company's business conduct, business prospects, business conditions and financial results relating primarily to MIS's ratings of structured finance products including RMBS, CDO and constant-proportion debt obligations. The plaintiffs seek an unspecified amount of compensatory damages and their reasonable costs and expenses incurred in connection with the case. The Company moved for dismissal of the consolidated amended complaint in September 2008. On February 23, 2009, the court issued an opinion dismissing certain claims and sustaining others. On January 22, 2010, plaintiffs moved to certify a class of individuals who purchased Moody's Corporation common stock between February 3, 2006 and October 24, 2007, which the Company opposed. On March 31, 2011, the court issued an opinion denying plaintiffs' motion to certify the proposed class. On April 14, 2011, plaintiffs filed a petition in the United States Court of Appeals for the Second Circuit seeking discretionary permission to appeal the decision. The Company filed its response to the petition on April 25, 2011. On July 20, 2011, the Second Circuit issued an order denying plaintiffs' petition for leave to appeal.

For claims, litigation and proceedings not related to income taxes, where it is both probable that a liability is expected to be incurred and the amount of loss can be reasonably estimated, the Company records liabilities in the consolidated financial statements and periodically adjusts these as appropriate. In other instances, because of uncertainties related to the probable outcome and/or the amount or range of loss, management does not record a liability but discloses the contingency if significant. As additional information becomes available, the Company adjusts its assessments and estimates of such matters accordingly. In view of the inherent difficulty of predicting the outcome of litigation, regulatory, enforcement and similar matters and contingencies, particularly where the claimants seek large or indeterminate damages or where the parties assert novel legal theories or the matters involve a large number of parties, the Company cannot predict what the eventual outcome of the pending matters will be or the timing of any resolution of such matters. The Company also cannot predict the impact (if any) that any such matters may have on how its business is conducted, on its competitive position or on its financial position, results of operations or cash flows. As the process to resolve the pending matters referred to above progresses, management will continue to review the latest information available and assess its ability to predict the outcome of such matters and the effects, if any, on its operations and financial condition. However, in light of the inherent uncertainties involved in these matters, the large or indeterminate damages sought in some of them and the novel theories of law asserted, an estimate of the range of possible losses cannot be made at this time. For income tax matters, the Company employs the prescribed methodology of Topic 740 of the ASC which requires a company to first determine whether it is more-likely-than-not (defined as a likelihood of more than fifty percent) that a tax position will be sustained based on its technical merits as of the reporting date, assuming that taxing authorities will examine the position and have full knowledge of all relevant information. A tax position that meets this more-likely-than-not threshold is then measured and recognized at the largest amount of benefit that is greater than fifty percent likely to be realized upon effective settlement with a taxing authority.

Legacy Tax Matters

Moody's continues to have exposure to potential liabilities arising from Legacy Tax Matters. As of December 31, 2011, Moody's has recorded liabilities for Legacy Tax Matters totaling \$54.6 million. This includes liabilities and accrued interest due to New D&B arising from the 2000 Distribution Agreement. It is possible that the ultimate liability for Legacy Tax Matters could be greater than the liabilities recorded by the Company, which could result in additional charges that may be material to Moody's future reported results, financial position and cash flows.

The following summary of the relationships among Moody's, New D&B and their predecessor entities is important in understanding the Company's exposure to the Legacy Tax Matters.

In November 1996, The Dun & Bradstreet Corporation separated into three separate public companies: The Dun & Bradstreet Corporation, ACNielsen Corporation and Cognizant Corporation. In June 1998, The Dun & Bradstreet Corporation separated into two separate public companies: Old D&B and R.H. Donnelley Corporation. During 1998, Cognizant separated into two separate public companies: IMS Health Incorporated and Nielsen Media Research, Inc. In September 2000, Old D&B separated into two separate public companies: New D&B and Moody's.

Old D&B and its predecessors entered into global tax planning initiatives in the normal course of business. These initiatives are subject to normal review by tax authorities. Old D&B and its predecessors also entered into a series of agreements covering the sharing of any liabilities for payment of taxes, penalties and interest resulting from unfavorable IRS determinations on certain tax matters, and certain

Table of Contents

other potential tax liabilities, all as described in such agreements. Further, in connection with the 2000 Distribution and pursuant to the terms of the 2000 Distribution Agreement, New D&B and Moody's have agreed on the financial responsibility for any potential liabilities related to these Legacy Tax Matters.

At the time of the 2000 Distribution, New D&B paid Moody's \$55.0 million for 50% of certain anticipated future tax benefits through 2012. In the event that these tax benefits are not claimed or otherwise not realized by New D&B, or there is an IRS audit of New D&B impacting these tax benefits, Moody's would be required to repay to New D&B an amount equal to the discounted value of its share of the related future tax benefits as well as its share of any tax liability incurred by New D&B. In June 2011, the statute of limitations for New D&B relating to the 2004 tax year expired. As a result, in the second quarter of 2011, Moody's recorded a reduction of accrued interest expense of \$2.8 million (\$1.7 million, net of tax) and an increase in other non-operating income of \$6.4 million, relating to amounts due to New D&B. As of December 31, 2011, Moody's liability with respect to this matter totaled \$52.6 million.

Additionally, in April 2011, Moody's received a refund of \$0.9 million (\$0.6 million, net of tax) for interest assessed related to pre-spinoff tax years. Coupled with the \$6.4 million noted above (and related interest of \$1.7 million), net legacy tax benefits were \$8.7 million in the year ended December 31, 2011 of which \$7 million was deemed to be unusual in nature.

In 2005, settlement agreements were executed with the IRS with respect to certain Legacy Tax Matters related to the years 1989-1990 and 1993-1996. With respect to these settlements, Moody's and New D&B believed that IMS Health and NMR did not pay their full share of the liability to the IRS under the terms of the applicable separation agreements between the parties. Moody's and New D&B subsequently paid these amounts to the IRS and commenced arbitration proceedings against IMS Health and NMR to resolve this dispute. Pursuant to these arbitration proceedings, the Company received \$10.8 million (\$6.5 million as a reduction of interest expense and \$4.3 million as a reduction of tax expense) in 2009. The aforementioned settlement payment resulted in net income benefits of \$8.2 million in 2009. The Company continues to carry a \$2 million liability for this matter.

In 2006, New D&B and Moody's each deposited \$39.8 million with the IRS in order to stop the accrual of statutory interest on potential tax deficiencies with respect to the 1997 through 2002 tax years. In 2007, New D&B and Moody's requested a return of that deposit. The IRS applied a portion of the deposit in satisfaction of an assessed deficiency and returned the balance to the Company. Moody's subsequently pursued a refund for a portion of the outstanding amount. In May 2010, the IRS refunded \$5.2 million to the Company for the 1997 tax year, which included interest of approximately \$2.5 million resulting in an after-tax benefit of \$4.6 million.

NOTE 19 SEGMENT INFORMATION

The Company operates in two reportable segments: MIS and MA. The rating agency is reported in the MIS segment and all of Moody's other non-rating commercial activities are reported in the MA segment.

Revenue for MIS and expenses for MA include an intersegment royalty charged to MA for the rights to use and distribute content, data and products developed by MIS. Also, revenue for MA and expenses for MIS include an intersegment license fee charged to MIS from MA for certain MA products and services utilized in MIS's ratings process. Additionally, overhead costs and corporate expenses of the Company which exclusively benefit only one segment, are fully charged to that segment. Overhead costs and corporate expenses of the Company which benefit both segments are allocated to each segment based on a revenue-split methodology. Overhead expenses include costs such as rent and occupancy, information technology and support staff such as finance, human resource and information technology. Beginning on January 1, 2011, the Company refined its methodology for allocating the aforementioned overhead and corporate costs to its segments to better align the costs allocated based on each segment's usage of the overhead services. The refined methodology is reflected in the segment results for the year ended December 31, 2011 and accordingly, the segment results for the year ended December 31, 2010 and 2009 have been reclassified to conform to the new presentation. Eliminations in the table below represent intersegment royalty/license revenue/expense.

Table of Contents**FINANCIAL INFORMATION BY SEGMENT:**

	Year Ended December 31,							
	2011				2010			
	MIS	MA	Eliminations	Consolidated	MIS	MA	Eliminations	Consolidated
Revenue	\$ 1,634.7	\$ 722.4	\$ (76.4)	\$ 2,280.7	\$ 1,466.3	\$ 636.3	\$ (70.6)	\$ 2,032.0
Expenses:								
Operating, SG&A	831.0	558.5	(76.4)	1,313.1	781.5	481.9	(70.6)	1,192.8

Total Assets	\$ 725.9	\$ 1,289.7	\$ 860.5	\$ 2,876.1	\$ 639.0	\$ 910.0	\$ 991.3	\$ 2,540.3

(a) Represents common assets that are shared between each segment or utilized by the corporate entity. Such assets primarily include cash and cash equivalents, short-term investments, unallocated property and equipment and deferred tax assets.

NOTE 20 VALUATION AND QUALIFYING ACCOUNTS

Accounts receivable allowances primarily represent adjustments to customer billings that are estimated when the related revenue is recognized and also represents an estimate for uncollectible accounts. The valuation allowance on deferred tax assets relates to foreign net operating losses for which realization is uncertain. Below is a summary of activity for both allowances:

Year Ended December 31,	Balance at Beginning of the Year	Additions	Write-offs and Adjustments	Balance at End of the Year
2011				
Accounts receivable allowance	\$ (33.0)	\$ (40.6)	\$ 45.6	\$ (28.0)

Table of Contents**NOTE 21 OTHER NON-OPERATING INCOME (EXPENSE), NET**

The following table summarizes the components of other non-operating income (expense) as presented in the consolidated statements of operations:

	Year Ended December 31,		
	2011	2010	2009
FX gain/(loss)	\$ 2.6	\$ (5.1)	\$ (9.5)
Legacy Tax (see Note 18)	6.4		
Joint venture income	6.8	2.8	6.1
Other	(2.3)	(3.6)	(4.5)
Total	\$ 13.5	\$ (5.9)	\$ (7.9)

NOTE 22 RELATED PARTY TRANSACTIONS

Moody's Corporation made grants of \$5 million to The Moody's Foundation during the year ended December 31, 2011. Grants of \$4.4 million were made during the year ended December 31, 2010 and no grants were made during the year ended December 31, 2009. The Foundation carries out philanthropic activities primarily in the areas of education and health and human services. Certain members of Moody's senior management are on the Board of the Foundation.

NOTE 23 QUARTERLY FINANCIAL DATA (UNAUDITED)

(amounts in millions, except EPS)	Three Months Ended			
	March 31	June 30	September 30	December 31
2011				
Revenue	\$ 577.1	\$ 605.2	\$ 531.3	\$ 567.1
Operating Income	\$ 250.1	\$ 270.1	\$ 196.1	\$ 172.1
Net income attributable to Moody's	\$ 155.5	\$ 189.0	\$ 130.7	\$ 96.2
EPS:				
Basic	\$ 0.68	\$ 0.83	\$ 0.58	\$ 0.43
Diluted	\$ 0.67	\$ 0.82	\$ 0.57	\$ 0.43
2010				
Revenue	\$ 476.6	\$ 477.8	\$ 513.3	\$ 564.3
Operating income	\$ 196.8	\$ 190.5	\$ 188.9	\$ 196.6
Net income attributable to Moody's	\$ 113.4	\$ 121.0	\$ 136.0	\$ 137.4
EPS:				
Basic	\$ 0.48	\$ 0.51	\$ 0.58	\$ 0.59
Diluted	\$ 0.47	\$ 0.51	\$ 0.58	\$ 0.58

Basic and diluted EPS are computed for each of the periods presented. The number of weighted average shares outstanding changes as common shares are issued pursuant to employee stock plans and for other purposes or as shares are repurchased. Therefore, the sum of basic and diluted EPS for each of the four quarters may not equal the full year basic and diluted EPS.

The quarterly financial data includes a \$7.0 and \$4.6 million benefit to net income related to the resolution of Legacy Tax Matters for the three months ended June 30, 2011 and 2010, respectively. Also, there was a tax benefit of approximately \$14 million during the three months ended June 30, 2011 resulting from a foreign tax ruling and a tax benefit of approximately \$7 million in the three months ended September 30, 2011 resulting from the settlement of state tax audits. Additionally, there was a tax benefit of \$17.6 million during the three months ended September 30, 2010 resulting from the indefinite reinvestment of certain foreign earnings and a tax benefit of \$18.4 million in the three months ended December 31, 2010 resulting from the utilization of foreign tax credits and lower state taxes.

NOTE 24 SUBSEQUENT EVENT

In January 2012, the examination of the Company's New York State income tax returns for the years 2004 through 2010 was completed and resulted in a payment of approximately \$89 million, including interest. The Company had accrued for this liability as of December 31, 2011 and thus the payment is not expected to have a material impact to the provision for income taxes or Net Income in 2012.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE
Not applicable

ITEM 9A. CONTROLS AND PROCEDURES
Evaluation of Disclosure Controls and Procedures

The Company carried out an evaluation, as required by Rule 13a-15(b) under the Exchange Act, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures, as defined in Rule 13a-15(e) of the Exchange Act, as of the end of the period covered by this report (the Evaluation Date). Based on such evaluation, such officers have concluded that, as of the Evaluation Date, the Company's disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the times periods specified in the communication to the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes In Internal Control Over Financial Reporting

Information in response to this Item is set forth under the caption Management's Report on Internal Control Over Financial Reporting, in Part II, Item 8 of this annual report on Form 10-K.

In addition, the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, has determined that there were no changes in the Company's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, these internal controls over financial reporting during the period covered by this report.

ITEM 9B. OTHER INFORMATION
Not applicable.

Table of Contents

PART III

Except for the information relating to the executive officers of the Company set forth in Part I of this annual report on Form 10-K, the information called for by Items 10-13 is contained in the Company's definitive proxy statement for use in connection with its annual meeting of stockholders scheduled to be held on April 16, 2012, and is incorporated herein by reference.

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

ITEM 11. EXECUTIVE COMPENSATION

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

The Audit Committee has established a policy setting forth the requirements for the pre-approval of audit and permissible non-audit services to be provided by the Company's independent registered public accounting firm. Under the policy, the Audit Committee pre-approves the annual audit engagement terms and fees, as well as any other audit services and specified categories of non-audit services, subject to certain pre-approved fee levels. In addition, pursuant to the policy, the Audit Committee has authorized its chair to pre-approve other audit and permissible non-audit services up to \$50,000 per engagement and a maximum of \$250,000 per year. The policy requires that the Audit Committee chair report any pre-approval decisions to the full Audit Committee at its next scheduled meeting. For the year ended December 31, 2011, the Audit Committee approved all of the services provided by the Company's independent registered public accounting firm, which are described below.

Audit Fees

The aggregate fees for professional services rendered for (i) the integrated audit of the Company's annual financial statements for the years ended December 31, 2011 and 2010, (ii) the review of the financial statements included in the Company's Reports on Forms 10-Q and 8-K, and (iii) statutory audits of non-U.S. subsidiaries, were approximately \$2.3 and \$2.0 million in 2011 and 2010, respectively. These fees included amounts accrued but not billed of \$1.3 million in each 2011 and 2010.

Audit-Related Fees

The aggregate fees billed for audit-related services rendered to the Company were approximately \$0.1 million in both of the years ended December 31, 2011 and 2010. Such services included employee benefit plan audits.

Tax Fees

The aggregate fees billed for professional services rendered for tax services rendered by the auditors for the years ended December 31, 2011 and 2010 were \$0 and \$0, respectively.

All Other Fees

The aggregate fees billed for all other services rendered to the Company by KPMG LLP for the year ended December 31, 2011 and 2010 were \$0 and \$0, respectively.
