SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2012

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from to

Commission File Number: 001-35375

Zynga Inc.

(Exact name of registrant as specified in its charter)

Edgar Filing: ZYNGA INC - Form 10-Q

Delaware
(State of Incorporation)

42-1733483
(IRS Employer Identification No.)

699 Eighth Street

San Francisco, CA
(Address of Principal Executive Offices)

94103
(Zip Code)

(855) 449-9642

(Telephone No.)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Exchange Act Rule 12b-2). Yes No

As of October 15, 2012, there were 583,862,093 shares of the Registrant's Class A common stock outstanding, 179,596,824 shares of the Registrant's Class B common stock outstanding and 20,517,472 shares of the Registrant's Class C common stock outstanding.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains forward-looking statements. In some cases you can identify these statements by forward-looking words such as believe, may, will, estimate, continue, anticipate, intend, could, would, project, plan, expect, or similar expressions, or the negative or plural of these words or expressions. These forward-looking statements include, but are not limited to, statements concerning the following:

our future relationship with Facebook, changes in the Facebook platform or changes in our agreements with Facebook;

our cost reduction plans and reduction in force and estimated savings and charges;

our ability to rationalize our product pipeline, reduce marketing and technology expenditures and consolidate certain facilities;

our share repurchase program;

our evaluation of new business opportunities, including our expansion into real money gaming;

user traffic to the Zynga platform and publishing games from third-party developers on the Zynga platform;

continued growth in demand for virtual goods and in the social games industry;

building and sustaining our franchise games;

the ability of our games to generate revenue and bookings for a significant period of time after launch and the timing for market acceptance of new games;

capital expenditures and investment in our network infrastructure, including data centers;

our use of working capital in general;

retaining and adding players and increasing the monetization of our player base;

maintaining a technology infrastructure that can efficiently and reliably handle increased player usage, fast load times and the deployment of new features and products;

attracting and retaining qualified employees and key personnel;

Edgar Filing: ZYNGA INC - Form 10-Q

maintaining, protecting and enhancing our intellectual property;

protecting our players' information and adequately addressing privacy concerns; and

successfully acquiring and integrating companies and assets.

These forward-looking statements are subject to a number of risks, uncertainties and assumptions, including those described in Part II, Item 1A, Risk Factors of this Quarterly Report on Form 10-Q. Moreover, we operate in a very competitive and rapidly changing environment and industry. We are also highly reliant on Facebook and the Facebook platform for a substantial amount of our revenue. The Facebook platform and our agreements with Facebook are subject to change. New risks emerge from time to time. It is not possible for our management to predict all of the risks related to our business and operations, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements we may make. In light of these risks, uncertainties and assumptions, the forward-looking events and circumstances discussed in this Quarterly Report on Form 10-Q may not occur and actual results could differ materially and adversely from those anticipated or implied in the forward-looking statements.

You should not rely upon forward-looking statements as predictions of future events. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee that the future results, levels of activity, performance or events and circumstances reflected in the forward-looking statements will be achieved or occur. We undertake no obligation to update any forward-looking statements for any reason to conform these statements to actual results or to changes in our expectations.

Zynga Inc.

Notes to Consolidated Financial Statements

(Unaudited)

1. Overview and Summary of Significant Accounting Policies

Organization and Description of Business

Zynga Inc. (Zynga, we or the Company) develops, markets and operates online social games as live services played over the Internet and on social networking sites and mobile platforms. We generate revenue through the in-game sale of virtual goods and through advertising. Our operations are headquartered in San Francisco, California, and we have several operating locations in the U.S. as well as various international office locations in Canada, Asia and Europe.

We were originally organized in April 2007 as a California limited liability company under the name Presidio Media LLC, converted to a Delaware corporation in October 2007 and changed our name to Zynga Inc. in November 2010. We completed our initial public offering in December 2011 and our Class A common stock is listed on the NASDAQ Global Select Market under the symbol ZNGA.

Basis of Presentation and Consolidation

The accompanying consolidated financial statements are presented in accordance with United States generally accepted accounting principles (U.S. GAAP). The consolidated financial statements include the operations of us and our wholly-owned subsidiaries. All significant intercompany balances and transactions have been eliminated in the consolidation.

Accounting Policy Updates

The accompanying interim consolidated financial statements and these related notes should be read in conjunction with the consolidated financial statements and related notes included in our Annual Report on Form 10-K for the year ended December 31, 2011 (the Annual Report).

In the second quarter of 2012, we established a policy for accounting for derivative financial instruments used to manage interest rate risk. We account for these instruments in accordance with Accounting Standards Codification (ASC) 815, *Derivatives and Hedging*, which requires that every derivative instrument be recorded on the balance sheet as either an asset or liability measured at its fair value as of the reporting date. ASC 815 also requires that changes in our derivatives fair values be recognized in earnings, unless specific hedge accounting and contemporaneous documentation criteria are met, in which case, the change in fair value related to the effective portion of the hedge may be recognized as a component of accumulated other comprehensive income. Any ineffective or excluded portion of a designated cash flow hedge is recognized in earnings. There have been no other significant changes to our accounting policies that were disclosed in our Annual Report that impact our consolidated financial statements and related notes.

Unaudited Interim Financial Information

The accompanying interim consolidated balance sheet as of September 30, 2012, the interim consolidated statements of operations for the three and nine months ended September 30, 2012 and 2011, the interim consolidated statements of comprehensive income (loss) for the three and nine months ended September 30, 2012 and 2011, the interim consolidated statements of cash flows for the nine months ended September 30, 2012 and 2011 and the related footnote disclosures are unaudited. These unaudited interim financial statements have been prepared in accordance with U.S. GAAP. In management s opinion, the unaudited interim financial statements have been prepared on the same basis as the audited financial statements and include all adjustments of a normal recurring nature necessary for the fair presentation of the Company s statement of financial position and operating results for the periods presented. The results for the three and nine months ended September 30, 2012 are not necessarily indicative of the results expected for the full fiscal year or any future period.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts in the consolidated financial statements and notes thereto. Significant estimates and assumptions reflected in the financial statements include, but are not limited to, the estimated lives of virtual goods that we use for revenue recognition, the chargeback reserve for our

Edgar Filing: ZYNGA INC - Form 10-Q

third-party payment processors, the allowance for doubtful accounts, useful lives of property and equipment and intangible assets, accrued liabilities, income taxes, accounting for business combinations, stock-based expense and evaluation of goodwill, intangible assets, and long-lived assets for impairment. Actual results could differ materially from those estimates.

Table of Contents**2. Marketable Securities**

The following tables summarize our amortized cost, gross unrealized gains and losses and fair value of our available-for-sale investments in marketable securities (in thousands):

	September 30, 2012 (unaudited)			
	Amortized Cost	Gross	Gross	Aggregate Fair Value
		Unrealized Gains	Unrealized Losses	
U.S. government and government agency debt securities	\$ 549,211	\$ 285	\$ (6)	\$ 549,490
Corporate debt securities	702,164	835	(221)	702,778
Municipal securities	1,685			1,685
Total	\$ 1,253,060	\$ 1,120	\$ (227)	\$ 1,253,953

	December 31, 2011			
	Amortized Cost	Gross	Gross	Aggregate Fair Value
		Unrealized Gains	Unrealized Losses	
U.S. government and government agency debt securities	\$ 267,635	\$ 53	\$ (53)	\$ 267,635
Corporate debt securities	67,657	35	(64)	67,628
Total	\$ 335,292	\$ 88	\$ (117)	\$ 335,263

The estimated fair value of available-for-sale marketable securities, classified by their contractual maturities was as follows (in thousands):

	September 30, 2012 (unaudited)
Due within one year	\$ 928,684
After one year through three years	325,269
Total	\$ 1,253,953

Changes in market interest rates and bond yields cause certain of our investments to fall below their cost basis, resulting in unrealized losses on marketable securities. As of September 30, 2012, we had unrealized losses of \$0.2 million related to marketable securities that had a fair value of \$353.1 million. As of December 31, 2011, we had unrealized losses of \$0.1 million related to marketable securities that had a fair value of \$111.1 million. None of these securities were in a continuous unrealized loss position for more than 12 months.

As of September 30, 2012 and December 31, 2011, we did not consider any of our marketable securities to be other-than-temporarily impaired. When evaluating our investments for other-than-temporary impairment, we review factors such as the length of time and extent to which fair value has been below its cost basis, the financial condition of the issuer, our ability and intent to hold the security and whether it is more likely than not that we will be required to sell the investment before recovery of its cost basis.

3. Fair Value Measurements

Our financial instruments consist of cash equivalents, short-term and long-term marketable securities, accounts receivable, long-term debt and an interest rate swap. Accounts receivable, net, are stated at their carrying value, which approximates fair value due to the short time to expected receipt of cash.

Table of Contents

Cash equivalents and short-term and long-term marketable securities, consisting of money market funds, U.S. government and government agency debt securities, municipal securities and corporate debt securities, are carried at fair value, which is defined as an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between knowledgeable and willing market participants. The carrying value of long-term debt approximates fair value, which is primarily based on valuation models, using the net present value of cash flows over the term using estimated market rates for similar instruments and remaining terms (Level 3). These valuation techniques involve some level of management estimation and judgment, the degree of which is dependent on price transparency for the instruments or market and the instruments' complexity.

Interest rate swaps are estimated using expected future cash flows related to our interest rate swap agreement, appropriately discounted considering the uncertainties associated with the obligation, and as calculated in accordance with the terms of the loan agreement and interest rate swap agreement. We determine the fair value of our interest rate swap by comparing the future discounted cash flows of the swap agreement based on its stated rate to the future discounted cash flows based on current market interest rates.

Intangible assets that have been impaired are classified as Level 3 due to unobservable inputs that are factored into our income-based valuation analysis. The primary input in determining fair value of intangible assets was the estimated undiscounted future cash flows associated with those assets.

Fair value is a market-based measurement that should be determined based on assumptions that knowledgeable and willing market participants would use in pricing an asset or liability. We use a three-tier value hierarchy, which prioritizes the inputs used in measuring fair value as follows:

Level 1 Observable inputs that reflect quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 Includes inputs, other than Level 1 inputs, that are directly or indirectly observable in the marketplace.

Level 3 Unobservable inputs that are supported by little or no market activity.

The composition of our financial instruments and our impaired intangible assets among the three Levels of the fair value hierarchy are as follows (in thousands):

	Level 1	September 30, 2012 (unaudited)		Total
		Level 2	Level 3	
Assets:				
Money market funds	\$ 239,533	\$	\$	\$ 239,533
U.S. government and government agency debt securities		549,491		549,491
Corporate debt securities (1)		734,580		734,580
Municipal securities (1)		2,235		2,235
OMGPOP intangible assets			5,300	5,300
Total	\$ 239,533	\$ 1,286,306	\$ 5,300	\$ 1,531,139
Liabilities:				
Long-term debt	\$	\$	\$ 100,000	\$ 100,000
Interest rate swap		2,781		2,781
Total	\$	\$ 2,781	\$ 100,000	\$ 102,781

(1) Includes amounts classified as cash and cash equivalents.

Acquisition of Corporate Headquarters Building

On April 2, 2012, we purchased our corporate headquarters building located in San Francisco, California from 650 Townsend Associates, LLC to support the overall growth of our business. Pursuant to the agreement, we also acquired existing third-party leases and other intangible property and terminated our existing office leases with the seller. In accordance with ASC 805, *Business Combinations*, we accounted for the building purchase as a business combination. The purchase consideration for the corporate headquarters building was as follows (in thousands, unaudited):

Cash	\$ 233,700
Gain on termination of below-market lease	41,058
Total purchase consideration	\$ 274,758

The gain on the termination of the below-market lease represents the difference between the contractual minimum rental payments owed under our previously-existing leases and the market rates of those same leases. The following table summarizes the fair values of net tangible and intangible assets acquired (in thousands, unaudited):

Building	\$ 182,774
Land	89,000
Acquired lease intangibles	2,984
Total	\$ 274,758

In addition to the gain recognized on the termination of the below-market lease, we recognized a gain of \$25.1 million from the write-off of deferred rent liability and we recognized a loss of \$46.2 million resulting from the write-off of leasehold improvements, as any value ascribed to these leasehold improvements were reflected in the fair value of the net tangible and intangible assets acquired. These amounts have been included in other income (expense), net in our consolidated statements of operations.

Edgar Filing: ZYNGA INC - Form 10-Q

We have included the rental income from third party leases with other tenants in the building, and the proportionate share of building expenses for those leases, in other income (expense), net, in our consolidated results of operations from the date of acquisition. These amounts were not material for the periods presented. The useful life for the building is expected to be 39 years and is being amortized on a straight-line basis.

5. Acquisitions

Acquisition of OMGPOP. On March 21, 2012, we acquired 100% of the outstanding stock of OMGPOP, Inc., a provider of social games for mobile phones, tablets, PCs and social network sites, for purchase consideration of approximately \$183.1 million in cash. We acquired OMGPOP to expand our social games offerings, particularly on mobile platforms. Goodwill from the acquisition

Table of Contents

represents the excess of the purchase price over the fair value of the net tangible and intangible assets acquired and is not deductible for tax purposes. Goodwill recorded in connection with this acquisition is primarily attributable to the assembled workforce of the acquired business and expected synergies at the time of the acquisition.

Other Acquisitions. During the nine months ended September 30, 2012, we acquired 4 companies in addition to OMGPOP for an aggregate purchase price of \$24.1 million, all of which was paid in cash.

The following table summarizes the purchase date fair value of net tangible and intangible assets acquired for all business acquisitions for the nine months ended September 30, 2012 (in thousands, unaudited):

	OMGPOP ₁	Other	Total
Developed technology	\$ 83,590	\$ 14,379	\$ 97,969
Branding intangible assets	33,530		33,530
Deferred tax liabilities	(42,871)	(3,905)	(46,776)
Net tangible assets acquired (liabilities assumed)	5,055	400	5,455
Goodwill	103,782	13,214	116,996
Total	\$ 183,086	\$ 24,088	\$ 207,174

(1) Includes the impact of adjustments to goodwill resulting from changes in net assets (liabilities) acquired and other adjustments, pursuant to our business combinations policy.

Prior to the impairment of the developed technology and branding intangible assets acquired in the OMGPOP acquisition, the useful lives for the developed technology and branding intangible assets were three years and seven years, respectively. Subsequent to the impairment, the remaining useful lives of both the developed technology and branding intangible assets are two years. These assets were, and continue to be, amortized on a straight-line basis. For all acquisitions completed during the nine months ended September 30, 2012, the weighted-average useful life of all identified acquired intangible assets is 2.4 years. Developed technologies associated with acquisitions are being amortized over periods ranging from one to three years.

6. Goodwill and Other Intangible Assets

Changes in the carrying value of goodwill from December 31, 2011 to September 30, 2012 are as follows (in thousands, unaudited):

Goodwill	December 31, 2011	\$ 91,765
Additions		117,541
Foreign currency translation adjustments		339
Goodwill adjustments		136
Goodwill	September 30, 2012	\$ 209,781

Amortization expense of acquisition-related intangible assets for the three months ended September 30, 2012 and 2011 was \$13.5 million and \$6.9 million, respectively. Amortization expense of acquisition-related intangible assets for the nine months ended September 30, 2012 and 2011 was \$35.0 million and \$19.1 million, respectively. As of September 30, 2012, future amortization expense related to the intangible assets is expected to be recognized as shown below (in thousands, unaudited):

Year ending December 31:	
2012	\$ 5,614

Edgar Filing: ZYNGA INC - Form 10-Q

2013	12,230
2014	7,311
2015	3,295
2016 and thereafter	167
Total	\$ 28,617

Table of Contents

In the third quarter of 2012, we made the decision to discontinue development of certain games associated with technology and other intangible assets previously acquired from OMGPOP. Our updated financial forecast as of September 30, 2012 indicated a reduction of undiscounted cash flows expected to be generated from these intangible assets, and we therefore performed an impairment analysis. We determined the estimated fair value of these assets to be \$95.5 million lower than their carrying value as of September 30, 2012. Accordingly, we recorded this amount as an impairment charge in our consolidated statements of operations.

7. Income Taxes

The benefit from income taxes was \$43.0 million and \$36.4 million in the three and nine months ended September 30, 2012, respectively. The income tax expense for the three and nine months ended September 30, 2012 was impacted by acquisitions, the OMGPOP impairment charge, the costs of implementing our international structure, and the valuation allowance offsetting a portion of our net deferred tax assets.

For the foreseeable future, we expect that our effective tax rate will be impacted by additional tax expense associated with the implementation of our international tax structure and the deductibility of stock-based expense. As the implementation of our international tax structure is completed, we anticipate that our effective tax rate will be lower than the U.S. statutory rate.

8. Long-term Debt and Derivative Financial Instruments

On June 29, 2012, we entered into an agreement for a term loan of \$100 million due June 30, 2017, at a variable interest rate equal to the bank's prime rate, or at our election, the three or six month LIBOR plus a 0.75 percent credit spread. Effective July 3, 2012, we made a permanent election to use the three month LIBOR plus 0.75 percent credit spread. Interest payments are made quarterly and the three month LIBOR will reset once per quarter. The amounts borrowed are collateralized by our corporate headquarters building. The loan will be used for general corporate purposes and we may prepay the term loan in full or in part at any time.

Concurrent with the execution of the loan agreement, to eliminate variability in interest payments, we entered into an interest rate swap agreement, such that the interest rate is fixed at two percent. The critical terms of the interest rate swap agreement and the \$100 million term loan match, including the notional and principal amounts, payment dates, interest rate reset dates, maturity dates and underlying benchmark interest rates. Accordingly, we have designated the interest rate swap as a qualifying hedging instrument and accounted for it as a cash flow hedge in accordance with ASC 815, *Derivatives and Hedging*. If the hedged transactions become probable of not occurring, the corresponding amounts in accumulated other comprehensive income would be reclassified to other income (expense), net in our consolidated statements of operations.

The fair value of the interest rate swap was \$2.8 million as of September 30, 2012 and was recorded in the consolidated balance sheets in other current and non-current liabilities. We initially record the gain or loss on the effective portion of the hedge as a component of accumulated other comprehensive income (loss) and subsequently reclassify it to interest expense in other income (expense), net when the hedged transaction occurs. If the hedged transactions were to become probable of not occurring, the corresponding amounts in accumulated other comprehensive income would be reclassified to other income (expense), net. As of September 30, 2012, we expect to reclassify approximately \$0.9 million net from accumulated other comprehensive income (loss) into other income (expense), net in the next 12 months, along with the earnings impact of the related forecasted hedged transactions. The combined impact of the variable interest payments and the interest rate swap is expected to result in \$500 thousand of interest expense per quarter, or a two percent effective interest rate, over the life of the debt. We do not use the interest rate swap agreement for trading purposes and our interest rate swap agreement does not require us to post collateral.

9. Other Current Liabilities

Other current liabilities consist of the following (in thousands):

	September 30, 2012 (unaudited)	December 31, 2011
Customer deposits	\$ 30,557	\$ 50,140
Accrued escrow for acquisitions	32,487	7,242
Other	83,082	109,889
Total other current liabilities	\$ 146,126	\$ 167,271

Table of Contents

Customer deposits represent amounts received for unredeemed game cards as well as advanced payments from various customers. Accrued escrow from acquisitions mainly relates to amounts held in escrow under the terms of certain of our acquisition agreements. Other liabilities include various expenses that we accrue for transaction taxes, compensation liabilities and accrued accounts payable.

Table of Contents**10. Stockholders Equity**

We recorded stock-based expense related to grants of employee and consultant stock options, warrants, restricted stock and restricted stock units (ZSUs) in our consolidated statements of operations as follows (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
	(unaudited)		(unaudited)	
Cost of revenue	\$ 1,080	\$ 515	\$ 11,098	\$ 1,602
Research and development	41,853	16,752	185,245	40,693
Sales and marketing	(3,977)	2,330	21,156	10,101
General and administrative	(1,139)	3,027	49,625	17,845
Total stock-based expense	\$ 37,817	\$ 22,624	\$ 267,124	\$ 70,241

Negative amounts reflect the reversal of stock-based expense previously recognized for ZSUs under the accelerated-attribution method that were unvested at the time of employee termination.

The following table shows stock option activity for the nine months ended September 30, 2012 (in thousands, except weighted-average exercise price and remaining contractual term):

Stock Options	Weighted-Average Exercise Price	Outstanding Options		Weighted-Average Contractual Term (in years)
		Aggregate Intrinsic Value of Stock Options Outstanding (unaudited)	Aggregate Intrinsic Value of Stock Options Outstanding (unaudited)	
Balance as of December 31, 2011	102,314	\$ 0.69	\$ 892,135	7.04
Granted	29,401	2.80		
Forfeited and cancelled	(5,774)	0.98		
Exercised	(32,836)	0.36		
Balance as of September 30, 2012	93,105	\$ 1.46	\$ 128,446	8.17

The following table shows a summary of ZSU activity for the nine months ended September 30, 2012 (in thousands, except weighted-average fair value and remaining term):

Shares	Weighted-Average Grant Date Fair Value	Outstanding ZSUs		Weighted-Average Remaining Term (in years)
		Aggregate Intrinsic Value of Unvested ZSUs (unaudited)	Aggregate Intrinsic Value of Unvested ZSUs (unaudited)	
Unvested as of December 31, 2011	79,818	\$ 11.24	\$ 751,090	2.15
Granted	25,363	9.26		
Vested	(23,130)	11.48		
Forfeited and cancelled	(16,269)	12.07		
Unvested as of September 30, 2012	65,782	\$ 10.19	\$ 186,493	2.64

Table of Contents

11. Net Income (Loss) Per Share of Common Stock

We compute net income (loss) per share of common stock using the two-class method required for participating securities. Prior to the date of the initial public offering, we considered all series of our convertible preferred stock to be participating securities due to their non-cumulative dividend rights. Additionally, we consider shares issued upon the early exercise of options subject to repurchase and unvested restricted shares to be participating securities, because holders of such shares have non-forfeitable dividend rights in the event we declare a dividend for common shares. In accordance with the two-class method, net income allocated to these participating securities, which include participation rights in undistributed net income, is subtracted from net income (loss) to determine total net income (loss) to be allocated to common stockholders.

Basic net income (loss) per share is computed by dividing net income (loss) attributable to common stockholders by the weighted-average number of common shares outstanding during the period. In computing diluted net income (loss) attributable to common stockholders, net income (loss) is re-allocated to reflect the potential impact of dilutive securities, including stock options, warrants, unvested restricted stock and unvested ZSUs. Diluted net income (loss) per share is computed by dividing net income (loss) attributable to common stockholders by the weighted-average number of common shares outstanding, including potential dilutive securities. For periods in which we have generated a net loss or there is no income attributable to common stockholders, we do not include stock options, warrants and unvested ZSUs in our calculation of diluted net income (loss) per share, as the impact of these awards is anti-dilutive.

Table of Contents

The following table sets forth the computation of basic and diluted net income (loss) per share of common stock (in thousands, except per share data):

	Three Months Ended September 30,					
	Class A	Class B	Class C (unaudited)	Class A	Class B	Class C
BASIC:						
Net income (loss)	\$ (35,781)	\$ (15,511)	\$ (1,433)	\$	\$ 11,592	\$ 948

Total	168,850	96,692	180,559	100,162

12. Commitments and Contingencies**Lease Commitments**

We have entered into operating leases for facilities, including data center space. As of September 30, 2012, future minimum lease payments related to these leases are as follows (in thousands, unaudited):

Year ending December 31:	
2012	\$ 8,479
2013	33,484
2014	33,260
2015	30,482
2016 and thereafter	86,070
	\$ 191,775

Legal Matters

On July 30, 2012, a purported securities class action captioned *DeStefano v. Zynga Inc. et al.*, Case No. 3:12-cv-04007-JSW, was filed in the United States District Court for the Northern District of California against the Company, and certain of our current and former directors, officers, and executives. Additional purported securities class actions containing similar allegations have since been filed in the Northern District. On September 26, 2012, the court consolidated various of the class actions as *In re Zynga Inc. Securities Litigation*, Lead Case No. 12-cv-04007-JSW. In addition, a securities class action captioned *Reyes v. Zynga Inc., et al.* was filed on August 1, 2012 in San Francisco County Superior Court, and removed to the Northern District on September 28, 2012. The various class action complaints allege that the defendants violated the federal securities laws by issuing false or misleading statements regarding the Company's business and financial projections. The various plaintiffs seek to represent a class of persons who purchased or otherwise acquired the Company's securities between December 16, 2011 and July 25, 2012. The complaints assert claims for unspecified damages, and an award of costs and expenses to the putative class, including attorneys' fees. The Company believes it has meritorious defenses and will vigorously defend these actions.

Since August 3, 2012, eight stockholder derivative lawsuits have been filed in State or Federal courts in California and Delaware purportedly on behalf of the Company against certain current and former directors and executive officers of the Company. The derivative plaintiffs allege that the defendants breached their fiduciary duties and violated California Corporations Code section 25402 in connection with our initial public offering in December 2011, secondary offering in April 2012, and allegedly false or misleading statements regarding the Company's business and financial projections. Beginning on August 3, 2012, three of the actions were filed in San Francisco County Superior Court. On October 2, 2012, the court consolidated those three actions as *In re Zynga Shareholder Derivative Litigation*, Lead Case CGC-12-522934. Beginning on August 16, 2012, four stockholder derivative actions were filed in the United States District Court for the Northern District of California and one derivative action was filed in the United States District Court for the District of Delaware. The derivative actions include claims for, among other things, unspecified damages in favor of the Company, certain corporate actions to purportedly improve the Company's corporate governance, and an award of costs and expenses to the derivative plaintiffs, including attorneys' fees. We believe that the plaintiffs in the

derivative actions lack standing to pursue litigation on behalf of Zynga.

Table of Contents

The actions described above have only recently been filed and there has been no discovery or other proceedings. Accordingly, we are not in a position to assess whether any loss or adverse effect on our financial condition is probable or remote or to estimate the range of potential loss, if any.

We are also party to various legal proceedings and claims which arise in the ordinary course of business. In addition, we may receive notification alleging infringement of patent or other intellectual property rights. Adverse results in any such litigation, legal proceedings or claims may include awards of substantial monetary damages, costly royalty or licensing agreements, or orders preventing us from offering certain games, features, or services, and may also result in changes in our business practices, which could result in additional costs or a loss of revenue for us and could otherwise harm our business. Although the results of such litigation cannot be predicted with certainty, we believe that the amount or range of reasonably possible losses related to such pending or threatened litigation will not have a material adverse effect on our business, operating results, cash flows, or financial condition should such litigation be resolved unfavorably. We recognize legal expenses as incurred.

13. Geographical Information

14. Subsequent Events**Share Repurchase Program**

In October 2012, our Board of Directors authorized a share repurchase program of up to \$200 million of our outstanding Class A common stock that remains effective until October 31, 2014.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion of our financial condition and results of operations in conjunction with the consolidated financial statements and the related notes included elsewhere in this Quarterly Report on Form 10-Q. The following discussion contains forward-looking statements that reflect our plans, estimates and beliefs. Our actual results could differ materially from those discussed in the forward-looking statements and you are cautioned not to place undue reliance on forward-looking statements. Factors that could cause or contribute to these differences include those discussed below and elsewhere in this Quarterly Report on Form 10-Q, particularly in Special Note Regarding Forward-Looking Statements and Risk Factors. The forward-looking statements included in this Quarterly Report are made only as of the date hereof.

Overview

We are the world's leading online social game developer with approximately 311 million average MAUs. We have launched some of the most successful social games in the industry in each of the last three years. Our games are accessible on Facebook and other social networks, mobile platforms and the Zynga platform. Our games are generally available for free, and we generate revenue through the in-game sale of virtual goods, mobile game download fees and advertising.

We are a pioneer and innovator of social games and a leader in making play a core activity on the Internet. Our objective is to become the worldwide leader in play by connecting the world through games.

Consistent with our free-to-play business model, compared to all players who play our games in any period, only a small portion of our players are payers. Because the opportunity for social interactions increases as the number of players increases, we believe that maintaining and growing our overall number of players, including the number of players who may not purchase virtual goods, is important to the success of our business. As a result, we believe that the number of players who choose to purchase virtual goods will continue to constitute a small portion of our overall players as our business grows.

How We Generate Revenue

We operate our games as live services that allow players to play for free. We generate revenue primarily from the in-game sale of virtual goods and advertising. Revenue growth will depend largely on our ability to attract and retain players and more effectively monetize our player base through the sale of virtual goods and advertising. We intend to do this through the launch of new games, enhancements to current games and expansion into new markets and distribution platforms.

Online Game. We provide our players with the opportunity to purchase virtual goods that enhance their game-playing experience. We believe players choose to pay for virtual goods for the same reasons they are willing to pay for other forms of entertainment. They enjoy the additional playing time or added convenience, the ability to personalize their own game boards, the satisfaction of leveling up and the opportunity for sharing creative expressions. We believe players are more likely to purchase virtual goods when they are connected to and playing with their friends, whether those friends play for free or also purchase virtual goods. Players may also elect to pay a one-time download fee to obtain an ad-free mobile game.

Facebook is currently the primary distribution, marketing, promotion and payment platform for our games. We generate a significant portion of our revenue and players through the Facebook platform and expect to continue to do so for the foreseeable future. For example, for the three months ended September 30, 2012 and 2011, we estimate that 80% and 94% of our quarterly bookings, respectively, was generated through the Facebook platform. For the three months ended September 30, 2012 and 2011, we estimate that 84% and 93% of our quarterly revenue, respectively, were generated through the Facebook platform. We have had to estimate this information because certain payment methods used do not allow us to determine the platform used.

We are subject to Facebook's standard terms and conditions for application developers, which govern the promotion, distribution and operation of games and other applications on the Facebook platform. We have entered into an addendum to these terms and conditions pursuant to which we have agreed to use Facebook Credits, Facebook's proprietary payment method, as the primary means of payment within our games played through Facebook and the Zynga platform. This addendum expires in May 2015.

We began migrating to Facebook Credits in July 2010, and in April 2011, we completed this migration. Under the addendum, Facebook remits to us an amount equal to 70% of the face value of Facebook Credits purchased by our players for use in our games. We recognize revenue net of amounts retained by Facebook. Prior to this addendum, we used third-party payment processors and paid these processors service fees ranging from 2% to 10% of the purchase price of our virtual goods which were recorded in cost of revenue. Players can purchase Facebook Credits from

Facebook directly through our games or through game cards purchased from retailers and distributors.

Table of Contents

In June 2012, Facebook announced its plans to discontinue the use of Facebook Credits and instead support pricing in local currencies. We expect our games to transition away from Facebook Credits and to adopt Facebook's local currency-based payments model in the near future.

On platforms other than Facebook, players purchase our virtual goods through various widely accepted payment methods offered in the games, including credit cards, PayPal, Apple iTunes accounts and direct wires. Players can purchase game cards from retailers and distributors that can be redeemed on these platforms.

Advertising. Advertising revenue primarily includes branded virtual goods and sponsorships, engagement ads and offers, mobile ads, display ads and licensing. We generally report our advertising revenue net of amounts due to advertising agencies and brokers.

Key Metrics

We regularly review a number of metrics, including the following key financial and operating metrics, to evaluate our business, measure our performance, identify trends in our business, prepare financial projections and make strategic decisions.

Key Financial Metrics

Bookings. Bookings is a non-GAAP financial measure that is equal to revenue recognized during the period plus the change in deferred revenue during the period. We record the sale of virtual goods as deferred revenue and then recognize that revenue over the estimated average life of the purchased virtual goods or as the virtual goods are consumed. Advertising sales which consist of certain branded virtual goods and sponsorships is also deferred and recognized over the estimated average life of the branded virtual good, similar to online game revenue. Bookings, as opposed to revenue, is the fundamental top-line metric we use to manage our business, as we believe it is a better indicator of the sales activity in a given period. Over the long term, the factors impacting our bookings and revenue are the same. However, in the short term, there are factors that may cause revenue to exceed or be less than bookings in any period.

We use bookings to evaluate the results of our operations, generate future operating plans and assess the performance of our company. While we believe that this non-GAAP financial measure is useful in evaluating our business, this information should be considered as supplemental in nature and is not meant as a substitute for revenue recognized in accordance with U.S. GAAP. In addition, other companies, including companies in our industry, may calculate bookings differently or not at all, which reduces its usefulness as a comparative measure.

The following table presents a reconciliation of revenue to bookings for each of the periods presented (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
Reconciliation of Revenue to Bookings:				
Revenue	\$ 316,637	\$ 306,829	\$ 970,102	\$ 828,863
Change in deferred revenue	(61,031)	(19,168)	(83,744)	20,139
Bookings	\$ 255,606	\$ 287,661	\$ 886,358	\$ 849,002

In July 2010, we began migrating to Facebook Credits as the primary payment method for our games played through Facebook, and in April 2011, we completed this migration. Facebook remits to us an amount equal to 70% of the face value of Facebook Credits purchased by our players for use in our games. We record bookings and recognize revenue net of the amounts retained by Facebook. Prior to adoption of Facebook Credits, we recorded a majority of our online game revenue at the gross price charged to the customer.

Adjusted EBITDA. Adjusted EBITDA is a non-GAAP financial measure that we calculate as net income (loss), adjusted for (provision for) / benefit from income taxes; other income (expense), net; interest income; gain (loss) from legal settlements; depreciation and amortization; stock-based expense, impairment of intangible assets and change in deferred revenue. We believe that adjusted EBITDA provides useful information to investors and others in understanding and evaluating our operating results in the same manner as our management and board of directors.

We have included adjusted EBITDA in this Quarterly Report on Form 10-Q because it is a key measure we use to evaluate our financial and operating performance, generate future operating plans and make strategic decisions for the allocation of capital. Accordingly, we believe that

Edgar Filing: ZYNGA INC - Form 10-Q

adjusted EBITDA provides useful information to investors and others in understanding and evaluating our operating results in the same manner as our management and board of directors. While we believe that this non-GAAP financial measure is useful in evaluating our business, this information should be considered as supplemental in nature and is not meant as a substitute for the related financial information prepared in accordance with U.S. GAAP.

Table of Contents

The following table presents a reconciliation of net income (loss) to adjusted EBITDA for each of the periods indicated (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
Reconciliation of Net Income (Loss) to Adjusted EBITDA:				
Net income (loss)	\$ (52,725)	\$ 12,540	\$ (160,887)	\$ 30,689
(Provision for) benefit from income taxes	(43,035)	19,723	(36,417)	51,206
Other income (expense), net	350	(263)	(19,758)	273
Interest income	(1,144)	(262)	(3,519)	(1,223)
Legal settlements	985		1,874	
Depreciation and amortization	39,444	22,936	108,049	64,148
Impairment of intangible assets	95,493		95,493	
Stock-based expense	37,817	22,624	267,124	70,241
Change in deferred revenue	(61,031)	(19,168)	(83,744)	20,139
Adjusted EBITDA	\$ 16,154	\$ 58,130	\$ 168,215	\$ 235,473

Limitations of Bookings and Adjusted EBITDA

Some limitations of bookings and adjusted EBITDA are:

adjusted EBITDA does not include the impact of stock-based expense;

bookings and adjusted EBITDA do not reflect that we defer and recognize online game revenue and revenue from certain advertising transactions over the estimated average life of virtual goods or as virtual goods are consumed;

adjusted EBITDA does not reflect income tax expense;

adjusted EBITDA does not include other income and expense (net), which includes foreign exchange gains and losses, interest income, and the net gain on termination of lease and purchase of our corporate headquarters building;

adjusted EBITDA excludes depreciation and amortization and although these are non-cash charges, the assets being depreciated and amortized may have to be replaced in the future;

adjusted EBITDA does not include the impairment of intangible assets previously acquired in connection with the company's purchase of OMGPOP;

adjusted EBITDA does not include gains and losses associated with legal settlements; and

other companies, including companies in our industry, may calculate bookings and adjusted EBITDA differently or not at all, which reduces their usefulness as a comparative measure.

Edgar Filing: ZYNGA INC - Form 10-Q

Because of these limitations, you should consider bookings and adjusted EBITDA along with other financial performance measures, including revenue, net income (loss) and our other financial results presented in accordance with U.S. GAAP.

Key Operating Metrics

We manage our business by tracking several operating metrics: DAUs, which measure daily active users of our games, MAUs, which measure monthly active users of our games, MUUs, which measure monthly unique users of our games, MUPs, which measure monthly unique payers in our games, and ABPU, which measures our average daily bookings per average DAU, each of which is recorded by our internal analytics systems.

DAUs. We define DAUs as the number of individuals who played one of our games during a particular day. Under this metric, an individual who plays two different games on the same day is counted as two DAUs. Similarly, an individual who plays the same game on two different platforms (e.g. web and mobile) or on two different social networks on the same day would be counted as two DAUs. Average DAUs for a particular period is the average of the DAUs for each day during that period. We use DAUs as a measure of audience engagement.

Table of Contents

MAUs. We define MAUs as the number of individuals who played a particular game in the 30-day period ending with the measurement date. Under this metric, an individual who plays two different games in the same 30-day period is counted as two MAUs. Similarly, an individual who plays the same game on two different platforms (e.g., web and mobile) or on two different social networks in a 30-day period would be counted as two MAUs. Average MAUs for a particular period is the average of the MAUs at each month-end during that period. We use MAUs as a measure of total game audience size.

MUUs. We define MUUs as the number of unique individuals who played any of our games on a particular platform in the 30-day period ending with the measurement date. An individual who plays more than one of our games in a given 30-day period would be counted as a single MUU. However, because we cannot always distinguish unique individuals playing across multiple platforms, an individual who plays any of our games on two different platforms (e.g., web and mobile) in a given 30-day period may be counted as two MUUs in the event that we do not have data that allows us to de-duplicate the player. Because many of our players play more than one game in a given 30-day period, MUUs are always lower than MAUs in any given time period. Average MUUs for a particular period is the average of the MUUs at each month-end during that period. We use MUUs as a measure of total audience reach across our network of games.

MUPs. We define MUPs as the number of unique players who made a payment at least once during the applicable month through a payment method for which we can quantify the number of unique payers, including payers from certain of our mobile games. MUPs does not include payers who use certain payment methods for which we cannot quantify the number of unique payers. If a player made a payment in our games on two separate platforms (e.g, Facebook and Google+) in a period, the player would be counted as two unique payers in that period. MUPs are presented as an average of the three months in the applicable quarter.

ABPU. We define ABPU as (i) our total bookings in a given period, divided by (ii) the number of days in that period, divided by, (iii) the average DAUs during the period. We believe that ABPU provides useful information to investors and others in understanding and evaluating our results in the same manner as our management and board of directors. We use ABPU as a measure of overall monetization across all of our players through the sale of virtual goods and advertising.

Our business model for social games is designed so that, as there are more players that play our games, social interactions increase and the more valuable the games and our business become. All engaged players of our games help drive our bookings and, consequently, both online game revenue and advertising revenue. Virtual goods are purchased by players who are socializing with, competing against or collaborating with other players, most of whom do not buy virtual goods. Accordingly, we primarily focus on bookings, DAUs, MAUs, MUUs, MUPs and ABPU, which together we believe best reflect the economic value of all of our players.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
	(users and payers in millions)		(users and payers in millions)	
Average DAUs	60	54	66	58
Average MAUs	311	227	303	230
Average MUUs	177	152	184	150
Average MUPs	2.9	2.6	3.5	NA
ABPU	\$ 0.047	\$ 0.058	\$ 0.049	\$ 0.053

NA means data is not available.

Table of Contents

The increase in DAUs, MAUs and MUUs for the three and nine months ended September 30, 2012 as compared to the same periods of the prior year was the result of mobile player growth offset by declines in web players. DAUs and MUUs decreased in the three months ended September 30, 2012 as compared to the prior quarter primarily due to declines in *Draw Something*.

Other Metrics

Although our management primarily focuses on the operating metrics above, we also monitor periodic trends in our paying players of our games. The table below shows average monthly unique payer bookings, average MUPs and unique payer bookings per unique payer for the last five quarters. These metrics are not available for the first and second quarters of 2011 due to mobile payer data not becoming available until the third quarter of 2011:

	For the Three Months Ended:				
	Sep 30, 2012	June 30, 2012	Mar 31, 2012	Dec 31, 2011	Sep 30, 2011
Average monthly unique payer bookings (in thousands) (1)	\$ 71,760	\$ 86,282	\$ 96,277	\$ 90,839	\$ 86,543
Average MUPs (in millions)	2.9	4.1	3.5	2.9	2.6
Monthly unique payer bookings per MUP (2)	\$ 25	\$ 21	\$ 28	\$ 31	\$ 33

- (1) Average monthly unique payer bookings represent the monthly average amount of bookings for the applicable quarter that we received through payment methods for which we can quantify the number of unique payers and excludes bookings generated from certain mobile payers in the first quarter of 2012 due to our acquisition of OMGPOP late in that quarter, as well as bookings from certain payment methods for which we cannot quantify the number of unique payers. Also excluded are bookings from advertising.
- (2) Monthly unique payer bookings per MUP is calculated by dividing average monthly unique payer bookings by average MUPs. Average monthly unique payer bookings decreased in each of the last two quarters, which was consistent with the decrease in total reported bookings during these periods. Monthly unique payer bookings per MUP decreased from \$27 in the first quarter of 2012 to \$21 in the second quarter of 2012, due to an increase in MUPs in our mobile games, which generally monetizes at a lower rate than our web games. Monthly unique payer bookings per MUP increased to \$24 in the third quarter of 2012, due to fewer mobile MUPs. In the initial launch period of mobile games, such as the second quarter of 2012 that included the first full quarter of new payers from *Draw Something*, we have seen increased MUPs due to one-time paid download fees that tend to decline in subsequent periods after which in-game spending comprises a greater percentage of mobile bookings. Although we monitor our unique payer metrics, we focus on monetization, including through in-game advertising, of all of our players and not just our payers. Accordingly, we strive to enhance content and our players' game experience to increase our bookings and ABPU, which is a measure of overall monetization across all of our players through the sale of virtual goods and advertising.

Future growth in audience and engagement will depend on our ability to retain current players, attract new players, launch new games and expand into new markets and distribution platforms, and the success of the Zynga platform. Our operating metrics may not correlate directly to quarterly bookings or revenue trends in the short term.

Recent Developments

Game Launches. We launched three games during the third quarter of 2012, including two titles on web-based platforms, *ChefVille* and *FarmVille 2*, and one title on mobile platforms, *Gems with Friends*.

Third Quarter Operating Results. Our operating results for the third quarter of 2012 declined as compared to the second quarter of 2012. Total bookings decreased by 15% and adjusted EBITDA decreased by 75% compared to the second quarter of 2012. Third quarter results primarily reflect weakness of certain games in our web invest and express category and include an impairment charge of \$95.5 million (excluding any income tax impact) related to the intangible assets previously acquired in connection with our purchase of OMGPOP. We expect a sequential decline in reported bookings and adjusted EBITDA from the third quarter of 2012 to the fourth quarter of 2012.

Cost Reduction Plan. We have implemented cost reduction initiatives to better align our operating expenses with our revenue, including a reduction in force of approximately 150 employees, or approximately 5% of our current workforce, and also steps to rationalize our product pipeline, reduce marketing expenses and consolidate certain facilities, and we plan to continue to manage costs to better and more efficiently manage our business.

Factors Affecting Our Performance

Edgar Filing: ZYNGA INC - Form 10-Q

Changes in Facebook or other platforms. Facebook is the primary distribution, marketing, promotion and payment platform for our social games. We generate substantially all of our bookings, revenue and players through the Facebook platform and expect to continue to do so for the foreseeable future. Except as to terms that have otherwise been negotiated between the parties, Facebook and other platforms have the discretion to change their platforms, terms of service and other policies with respect to us or other developers, and those changes may be unfavorable to us. For the three months ended September 30, 2012 and 2011, we estimate that 80% and 94% of our quarterly bookings, respectively, was generated through the Facebook platform. For the three months ended September 30, 2012 and 2011, we estimate that 84% and 93% of our quarterly revenue, respectively, was generated through the Facebook platform. We have had to estimate this information because certain payment methods used do not allow us to determine the platform used.

Table of Contents

Launch of new games and release of enhancements. Our bookings and revenue results have been driven by the launch of new games and the release of fresh content and new features in existing games. Although the amount of revenue and bookings we generate from a new game or an enhancement to an existing game can vary significantly, we expect our revenue and bookings to be correlated to the success and timely launch of our new games and our success in releasing engaging content and features.

Game monetization. We generate most of our bookings and revenue from the sale of virtual goods in our games. The degree to which our players choose to pay for virtual goods in our games is driven by our ability to create content and virtual goods that enhance the game-play experience. Our bookings, revenue and overall financial performance are affected by the number of players and the effectiveness of our monetization of players through the sale of virtual goods and advertising. For example ABPU decreased from \$0.053 in the first nine months of 2011 to \$0.049 in the first nine months of 2012, which was partially due to a shift in our user base to mobile games including *Draw Something*, a mobile game that increased our overall player base, but did not monetize as high as some of our core web games. In addition, mobile and international players have historically monetized at a lower level than U.S. players on average. The percentage of paying mobile and international players may increase or decrease based on a number of factors, including growth in mobile games as a percentage of total game audience and our overall international players, localization of content and the availability of payment options.

Investment in game development. In order to develop new games and enhance the content and features in our existing games, we must invest in a significant amount of engineering and creative resources. These expenditures generally occur months in advance of the launch of a new game or the release of new content, and the resulting revenue may not equal or exceed our development costs.

Player acquisition costs. We utilize advertising and other forms of player acquisition and retention to grow and retain our player audience. These expenditures generally relate to the promotion of new game launches and ongoing performance-based programs to drive new player acquisition and lapsed player reactivation. Over time, these acquisition and retention-related programs may become either less effective or more costly, negatively impacting our operating results.

New market development. We are investing in new distribution channels such as the Zynga platform and mobile and other platforms, including other social networks and in international markets to expand our reach and grow our business. For example, we have continued to hire additional employees and acquire companies with experience developing mobile applications. We have also invested resources in integrating and operating some of our games on additional platforms, including Google+, mixi and Tencent. As we expand into new markets and distribution channels, we expect to incur headcount, marketing and other operating costs in advance of the associated bookings and revenue. Our financial performance will be impacted by our investment in these initiatives and their success.

Stock-based expense. Prior to our initial public offering, we granted ZSUs to our employees that generally vested upon the satisfaction of both a service-period condition of up to four years and a liquidity event condition, the latter of which was satisfied upon our initial public offering. Because the liquidity event condition was not met until our initial public offering, prior to the fourth quarter of 2011, we had not recorded any expense related to our ZSUs. In the three and nine months ended September 30, 2012, we recognized \$23.8 million and \$196.5 million, respectively, of stock-based expense related to ZSUs. In the third quarter of 2012, we granted 29.4 million stock options to our employees pursuant to our equity incentive plan.

Hiring and retaining key personnel. Our ability to compete and grow depends in large part on the efforts and talents of our employees. During the third quarter of 2012, we experienced a higher amount of employee attrition. Retaining key employees is critical to our ability to grow our business and execute on our business strategy.

Table of Contents**Results of Operations**

The following table sets forth our results of operations for the periods presented as a percentage of revenue for those periods:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2012	2011	2012	2011
Consolidated Statements of Operations Data:

Revenue

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2012	2011	% Change	2012	2011	% Change
	(in thousands)			(in thousands)		
Revenue by type:						
Online game	\$ 285,587	\$ 287,866	(1%)	\$ 869,915	\$ 781,738	11%
Advertising	31,050	18,963	64%	100,187	47,125	113%
Total revenue	\$ 316,637	\$ 306,829	3%	\$ 970,102	\$ 828,863	17%

Three Months Ended September 30, 2012 Compared to Three Months Ended September 30, 2011

Total revenue increased \$9.8 million in the third quarter of 2012, as compared to the same period of the prior year. Bookings decreased by \$32.1 million in the third quarter of 2012, as compared to the same period of the prior year. ABPU decreased from \$0.058 to \$0.047 in the third quarter of 2012, as compared to the same period of the prior year, while average DAUs increased from 54 million in the third quarter of 2011 to 60 million in the third quarter of 2012.

Online game revenue decreased \$2.3 million in the third quarter of 2012, as compared to the same period of the prior year. This decrease is partially attributable to online game revenue from *FrontierVille*, *FarmVille* and *Mafia Wars* decreasing by \$36.9 million, \$22.3 million, and \$22.1 million, respectively. The decrease in online game revenue from *FrontierVille* was partially due to a change in the estimated average life of durable virtual goods in the third quarter of 2011, which resulted in a \$17.9 million increase in revenue in the third quarter of 2011. The decreases in online game revenue from *FarmVille* and *Mafia Wars* as well as the remaining decrease in *FrontierVille* were due to an overall

Edgar Filing: ZYNGA INC - Form 10-Q

decline in bookings in these games. The decreases in online game revenue were partially offset by increases in online revenue of \$26.3 million, \$24.5 million, and \$14.4 million from *CastleVille*, *Zynga Poker* and *Bubble Safari*, respectively. The increase in revenue from *Zynga Poker* was primarily due to higher mobile bookings. The increase in online game revenue from *Bubble Safari* and *CastleVille* was the result of the launch of these games in May 2012 and November 2011, respectively. All other games accounted for the remaining offsetting increase in online game revenue of \$16.1 million for the third quarter of 2012.

International revenue as a percentage of total revenue accounted for 44% and 36% in the third quarter of 2012 and 2011, respectively.

In the three months ended September 30, 2012, *Zynga Poker*, *FarmVille* and *CityVille* were our top revenue-generating games and comprised 21%, 20%, and 12%, respectively, of our online game revenue for the period. In the three months ended September 30, 2011, *FarmVille*, *FrontierVille*, *CityVille*, *Zynga Poker*, and *Mafia Wars* were our top revenue-generating games and comprised 28%, 20%, 13%, 13% and 11%, respectively, of online game revenue for the period. No other game generated more than 10% of online game revenue during either of these periods.

Table of Contents

Consumable virtual goods accounted for 32% and 25% of online game revenue in the third quarter of 2012 and 2011, respectively. Durable virtual goods accounted for 68% and 75% of online game revenue in the third quarter of 2012 and 2011, respectively. The estimated weighted-average life of durable virtual goods was 12 months for the third quarter of 2012 compared to 14 months for the third quarter of 2011.

Advertising revenue increased \$12.1 million from the three months ended September 30, 2011 to the three months ended September 30, 2012, due to a \$13.6 million increase in in-game display ads and a \$1.0 million increase in in-game sponsorship revenue, partially offset by a decrease of \$2.6 million in in-game offers, engagement ads and other advertising revenue.

Nine Months Ended September 30, 2012 Compared to Nine Months Ended September 30, 2011

Total revenue increased \$141.2 million in the nine months ended September 30, 2012, as compared to the same period of the prior year, as a result of growth in both online game and advertising revenue. Bookings increased by \$37.4 million in the nine months ended September 30, 2012 as compared to the same period of the prior year. ABPU decreased from \$0.053 for the nine months ended September 30, 2011 to \$0.049 million for the nine months ended September 30, 2012. DAUs increased from 58 million for the nine months ended September 30, 2011 to 66 million for the nine months ended September 30, 2012.

Online game revenue increased \$88.2 million in the nine months ended September 30, 2012 as compared to the same period of the prior year. This increase is primarily attributable to increases in revenue from *CastleVille*, *Zynga Poker*, *CityVille*, *Hidden Chronicles* and *FarmVille* in the amount of \$68.0 million, \$41.2 million, \$35.1 million, \$19.7 million, and \$13.0 million of the increase respectively. The increases in online game revenue from *CastleVille*, *CityVille*, and *Hidden Chronicles* were the result of these games' more recent launch dates which were in November 2011, December 2010, and February 2012, respectively. The increase in *FarmVille* was the result of higher bookings from new content releases throughout 2011 and 2012. The increase in online game revenue from *Zynga Poker* was mainly due to bookings growth on mobile platforms. The growth in online game revenue was partially offset by decreases in online game revenue of \$74.4 million and \$56.7 million from *Mafia Wars* and *FrontierVille*, respectively. The decrease in *Mafia Wars* online game revenue was due to a decrease in bookings. The decrease in online game revenue from *FrontierVille* was primarily due to changes in our estimated average life of durable virtual goods in the first nine months of 2011, resulting in a \$30.7 million increase to revenue in the nine months ended September 30, 2011. All other games accounted for the remaining net increase of \$42.3 million.

International revenue as a percentage of total revenue accounted for 41% and 35% in the nine months ended September 30, 2012 and 2011, respectively.

In the nine months ended September 30, 2012, *FarmVille*, *Zynga Poker*, and *CityVille*, were our top revenue-generating games and comprised 26%, 18%, and 14%, respectively, of our online game revenue for the period. In the nine months ended September 30, 2011, *FarmVille*, *FrontierVille*, *Zynga Poker*, *Mafia Wars*, and *CityVille* were our top revenue-generating games and comprised 27%, 16%, 15%, 14%, and 11%, respectively, of online game revenue for the period. No other game generated more than 10% of online game revenue during either of these nine month periods.

Consumable virtual goods accounted for 30% of online game revenue in the nine months ended September 30, 2012 and 2011. Durable virtual goods accounted for 70% of online game revenue in the nine months ended September 30, 2012 and 2011. The estimated weighted-average life of durable virtual goods was 13 months in the nine months ended September 30, 2012, compared to 15 months for the nine months ended September 30, 2011. In addition, changes in our estimated average life of durable virtual goods during the nine months ended September 30, 2012 for various games resulted in an increase in revenue of \$22.0 million in that period, which is the result of adjusting the remaining recognition period of deferred revenue generated in prior periods at the time of a change in estimate. For the same period in the prior year, changes in our estimated average life of durable virtual goods resulted in an increase in revenue of \$48.5 million.

Advertising revenue increased \$53.1 million from the nine months ended September 30, 2011 to the nine months ended September 30, 2012, due to a \$48.2 million increase in in-game display ads, a \$7.6 million increase in licensing revenue, and a \$8.4 million increase in in-game sponsorship revenue, offset by a decrease of \$11.2 million in in-game offers, engagement ads and other advertising revenue.

Table of Contents**Cost of revenue**

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2012	2011	% Change	2012	2011	% Change
	(in thousands)			(in thousands)		
Cost of revenue	\$ 90,150	\$ 80,170	12%	\$ 275,113	\$ 225,908	22%

Three Months Ended September 30, 2012 Compared to Three Months Ended September 30, 2011

Cost of revenue increased \$10.0 million in the third quarter of 2012 as compared to the same period of the prior year. The increase was primarily attributable to an increase of \$11.6 million in depreciation and amortization expense related to new property and equipment acquired to support our network infrastructure and acquired intangibles, an increase of \$5.8 million in third-party payment processing fees and an increase of \$3.1 million in sales tax expense. These increases in costs of revenue were partially offset by a decrease of \$10.0 million in hosting costs in the third quarter of 2012 as compared to the same period of the prior year.

Nine Months Ended September 30, 2012 Compared to Nine Months Ended September 30, 2011

Cost of revenue increased \$49.2 million in the nine months ended September 30, 2012 as compared to the same period of the prior year. The increase was primarily attributable to an increase of \$29.4 million in depreciation and amortization expense related to property and equipment acquired to support our network infrastructure and acquired intangibles, an increase of \$21.6 million in third-party payment processing fees, an increase of \$9.5 million in stock-based expense mainly due to expense recognized for ZSUs, as prior to our December 2011 initial public offering, the criteria for recognition of these expenses had not been met, and an increase of \$7.3 million in consulting costs primarily related to third-party customer support required. These increases in costs of revenue were partially offset by a decrease of \$17.0 million in maintenance and hosting costs in the nine months ended September 30, 2012 as compared to the same period of the prior year.

Research and development

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2012	2011	% Change	2012	2011	% Change
	(in thousands)			(in thousands)		
Research and development	\$ 155,609	\$ 114,809	36%	\$ 513,801	\$ 282,316	82%

Three Months Ended September 30, 2012 Compared to Three Months Ended September 30, 2011

Research and development expenses increased \$40.8 million in the third quarter of 2012 as compared to the same period of the prior year. The increase was primarily attributable to a \$25.1 million increase in stock-based expenses, mainly due to the expense recognized for ZSUs, and an increase of \$13.9 million in headcount-related expenses, in each case as compared to the same period of the prior year.

Nine Months Ended September 30, 2012 Compared to Nine Months Ended September 30, 2011

Research and development expenses increased \$231.5 million in the nine months ended September 30, 2012 as compared to the same period of the prior year. The increase was primarily attributable to a \$144.5 million increase in stock-based expenses, mainly due to the expense recognized for ZSUs, an increase of \$66.3 million in headcount-related expenses, an increase of \$11.0 million in facilities and other overhead support costs and an increase of \$8.2 million in consulting costs, in each case as compared to the same period of the prior year.

Table of Contents**Sales and marketing**

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2012	2011	% Change	2012	2011	% Change

Sales and marketing	\$ 36,586	\$ 43,717	(16%)	\$ 149,478	\$ 121,971	23%
----------------------------	-----------	-----------	-------	------------	------------	-----

Three Months Ended September 30, 2012 Compared to Three Months Ended September 30, 2011

Sales and marketing expenses decreased \$7.1 million in the third quarter of 2012 as compared to the same period of the prior year. The decrease was primarily attributable to a \$6.3 million decrease in stock-based expenses and \$1.9 decrease in player acquisition costs, which were partially offset by a \$1.2 million increase in amortization expense from acquired intangibles, in each case as compared to the same period of the prior year.

Nine Months Ended September 30, 2012 Compared to Nine Months Ended September 30, 2011

Sales and marketing expenses increased \$27.5 million in the nine months ended September 30, 2012 as compared to the same period of the prior year. The increase was primarily attributable to \$11.1 million increase in stock-based expense, mainly due to the expense recognized for ZSUs, a \$9.3 million increase in player acquisition costs, an increase in headcount-related expenses of \$4.1 million, and a \$2.4 million increase in amortization from acquired intangibles, each case as compared to the same period of the prior year.

General and administrative

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2012	2011	% Change	2012	2011	% Change

General and administrative	\$ 35,353	\$ 36,395	(3%)	\$ 156,798	\$ 117,723	33%
-----------------------------------	-----------	-----------	------	------------	------------	-----

Three Months Ended September 30, 2012 Compared to Three Months Ended September 30, 2011

General and administrative expenses decreased \$1.0 million in the third quarter of 2012 as compared to the same period of the prior year. The decrease was primarily attributable to a decrease of \$4.2 million in stock-based expense as well as a \$2.0 million decrease in allocated facilities and other overhead support costs. These decreases in general and administrative expenses were partially offset by a \$3.9 million increase in depreciation and amortization expense and a \$1.9 million increase in legal fees.

Nine Months Ended September 30, 2012 Compared to Nine Months Ended September 30, 2011

General and administrative expenses increased \$39.1 million in the nine months ended September 30, 2012 as compared to the same period of the prior year. The increase was primarily attributable to an increase of \$31.8 million in stock-based expense, including the expense recognized for ZSUs. The increase in general and administrative expenses was also due in part to an \$11.9 million increase in depreciation and amortization, and a \$6.3 million increase in consulting expense, which was offset by a decrease of \$11.6 million in allocated facilities and other overhead costs.

Other income (expense), net

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2012	2011	% Change	2012	2011	% Change

Other income (expense), net	\$ (350)	\$ 263	N/M	\$ 19,758	\$ (273)	N/M
------------------------------------	----------	--------	-----	-----------	----------	-----

Table of Contents*Three Months Ended September 30, 2012 Compared to Three Months Ended September 30, 2011*

Other income (expense), net decreased \$0.6 million in the third quarter of 2012 as compared to the same period of the prior year. The decrease was primarily attributable to interest and currency rate fluctuations.

Nine Months Ended September 30, 2012 Compared to Nine Months Ended September 30, 2011

Other income (expense), net increased \$20.0 million in the nine months ended September 30, 2012 as compared to the same period of the prior year. The increase was primarily attributable to the \$19.8 million net gain recognized on the termination of lease and purchase of building, net.

Provision for income taxes

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2012	2011	% Change	2012	2011	% Change
	(in thousands)			(in thousands)		
Provision for income taxes	\$ 43,035	\$ (19,723)	(318%)	\$ 36,417	\$ (51,206)	(171%)

Three Months Ended September 30, 2012 Compared to Three Months Ended September 30, 2011

The provision for income taxes decreased by \$62.8 million in the third quarter of 2012 as compared to the same period of the prior year. This decrease was attributable in part to a decrease in pre-tax income of \$128.0 million in the third quarter of 2012, as well as acquisitions, the tax impact of the OMGPOP impairment charge recorded in the quarter, the costs of implementing our international structure and current year valuation allowance offsetting a portion of our net deferred tax assets.

Nine Months Ended September 30, 2012 Compared to Nine Months Ended September 30, 2011

The provision for income taxes decreased by \$87.6 million in the nine months ended September 30, 2012 as compared to the same period of the prior year. This decrease was attributable in part to a decrease in pre-tax income of \$279.2 million in the nine months ended September 30, 2012, as well as acquisitions, the OMGPOP impairment charge recorded in the quarter, the costs of implementing our international structure, and current year valuation allowance offsetting a portion of our net deferred tax assets.

For the foreseeable future, our effective tax rate will be impacted by additional tax expense associated with the implementation of our international tax structure, and the deductibility of stock-based expense. As the implementation of our international tax structure is completed, we anticipate that our effective tax rate will be lower than the U.S. statutory rate.

Liquidity and Capital Resources

	Nine Months Ended September 30,	
	2012	2011
	(in thousands)	
Consolidated Statements of Cash Flows Data:		
Acquisition of property and equipment	\$ (325,504)	\$ (187,736)
Depreciation and amortization	108,049	64,148
Cash flows provided by operating activities	\$ 175,988	\$ 225,213
Cash flows used in investing activities	(1,462,241)	(10,579)
Cash flows provided by financing activities	98,170	201,731

As of September 30, 2012, we had cash, cash equivalents and marketable securities of approximately \$1.6 billion, which consisted of cash, money market funds, U.S. government and government agency debt securities, corporate debt securities and municipal securities. For the full year ended December 31, 2012, we expect to make capital expenditures of up to \$345 million, which includes the purchase and build out of our corporate headquarters as well as investments in network infrastructure to support our expected growth. We believe that our existing cash, cash equivalents and marketable securities, together with cash generated from operations, will be sufficient to fund our operations and capital expenditures for at least the next 12 months.

Table of Contents***Operating Activities***

Operating activities provided \$176.0 million of cash during the nine months ended September 30, 2012, as our net loss of \$160.9 million in the nine months ended September 30, 2011 is adjusted to exclude non-cash items. Significant non-cash items included stock-based expense of \$267.1 million, depreciation and amortization of \$108.0 million and impairment of intangible assets of \$95.5 million. Stock-based expense was composed primarily of employee ZSU and stock option expense and increased by \$196.9 million in the nine months ended September 30, 2012 as compared to the same period of the prior year due to expense incurred related to ZSUs. We did not incur ZSU-related expenses during the nine months ended September 30, 2011 because a liquidity event-based vesting criteria was not satisfied until our initial public offering in December 2011. Depreciation and amortization increased as compared to the nine months ended September 30, 2011 as a result of our continued investment in property and equipment, including the purchase of our corporate headquarters building, and business acquisitions. Changes in our operating assets and liabilities used \$67.4 million of cash in the nine months ended September 30, 2012, primarily due to decreases in deferred revenue and other liabilities. Changes in operating assets and liabilities provided \$57.3 million of cash during the nine months ended September 30, 2011, primarily due to increases in other liabilities, deferred revenue and accounts payable offset by a decrease in income tax receivable.

Investing Activities

Investing activities resulted in a cash outflow of \$1.5 billion during the nine months ended September 30, 2012. The primary uses of cash associated with investing activities were \$1.5 billion for the purchase of marketable securities, as we continued to invest the proceeds received from our initial public offering; \$233.7 million for the purchase of our corporate headquarters building; and \$205.5 million net of cash acquired, for business acquisitions. Excluding the purchase of our corporate headquarters building, capital expenditures were \$91.8 million for the nine months ended September 30, 2012, which mainly related to the continued investment in our data centers and other hardware and software to support our growth. These uses of cash were partially offset by the sale and maturity of \$591.8 million of marketable securities.

Financing Activities

For the nine months ended September 30, 2012, our primary financing activity was \$99.8 million in proceeds from a term loan, net of issuance costs, entered into on June 29, 2012. We also had cash out flows for tax payments made in connection with the vesting of stock awards and cash received from the exercise of employee stock options. In the nine months ended September 30, 2011, we issued 34.9 million shares of Series C preferred stock for net proceeds of \$485.3 million. In addition, we repurchased 27.5 million shares of our outstanding capital stock for a total purchase price of \$283.8 million during the nine months ended September 30, 2011.

Credit Facility

In July 2011, we executed a revolving credit agreement with certain lenders to borrow up to \$1.0 billion in revolving loans. The interest rate for the credit facility is determined based on a formula using certain market rates. As of September 30, 2012, we had not drawn down any amounts on the credit facility.

Off-Balance Sheet Arrangements

We did not have any off-balance sheet arrangement in the third quarter of 2012 or in any prior periods.

Table of Contents**Lease Obligations**

We have entered into operating leases for facilities, including data center space. As of September 30, 2012, future minimum lease payments related to these leases are as follows (in thousands, unaudited):

Year ending December 31:	
2012	\$ 8,479
2013	33,484
2014	33,260
2015	30,482
2016 and thereafter	86,070
	\$ 191,775

We do not have any material capital lease obligations, and all of our property, equipment and software has been purchased with cash.

Critical Accounting Policies and Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts in our consolidated financial statements and related notes. Our significant accounting policies are described in Note 1 to our consolidated financial statements included in our previously-filed Annual Report. We have identified below our critical accounting policies and estimates that we believe require the greatest amount of judgment. These estimates and judgments have a significant impact on our consolidated financial statements. Actual results could differ materially from those estimates. The accounting policies that reflect our more significant estimates and judgments and that we believe are the most critical to fully understand and evaluate our reported financial results include the following:

Revenue recognition

Income taxes

Business combinations

Stock-based expense

Goodwill and indefinite-lived intangible assets (please see further details below)

Impairment of long-lived assets (please see further details below)

Please refer to Management's Discussion and Analysis of Financial Condition and Results of Operations contained in Part II, Item 7 of our Annual Report on Form 10-K for our fiscal year ended December 31, 2011 for a more complete discussion of our critical accounting policies and estimates. In addition, we made the following updates to our critical accounting policies.

Goodwill and Indefinite-Lived Intangible Assets

Goodwill and indefinite-lived intangible assets are carried at cost and are evaluated annually for impairment, or more frequently if circumstances exist that indicate that impairment may exist. Goodwill is assessed for impairment annually or when events or changes in circumstances indicate that the fair value has been reduced below carrying value. When conducting our annual goodwill impairment assessment, we initially perform a qualitative evaluation of whether it is more likely than not that goodwill is impaired in order to determine the need to perform the two-step impairment test. If we determine by a qualitative evaluation that it is more likely than not that goodwill is impaired, we conduct a quantitative assessment of impairment which requires us to estimate future cash flows. Recoverability of indefinite-lived intangible assets is measured by comparison of the carrying amount of the asset to its fair value. If the asset is considered to be impaired, the amount of any impairment is measured as the difference between the carrying value and the fair value of the impaired asset.

Impairment of Long-Lived Assets

Long-lived assets, including other intangible assets (excluding indefinite-lived intangible assets), are reviewed for impairment whenever events or changes in circumstances indicate an asset's carrying value may not be recoverable. If such circumstances are present, we assess the recoverability of the long-lived assets by comparing the carrying value to the undiscounted future cash flows associated with the related assets. If the future net undiscounted cash flows are less than the carrying value of the assets, the assets are considered impaired and an expense, equal to the amount required to reduce the carrying value of the assets to the estimated fair value, is recorded in the consolidated statements of operations. Significant judgment is required to estimate the amount and timing of future cash flows and the relative risk of achieving those cash flows.

Assumptions and estimates about future values and remaining useful lives are complex and often subjective. They can be affected by a variety of factors, including external factors such as industry and economic trends, and internal factors such as changes in our business strategy and our internal forecasts. For example, if our future operating results do not meet current forecasts or if we experience a continued decline in our market capitalization, we may be required to record future impairment charges for goodwill and/or acquired intangible assets. Impairment charges could materially decrease our future net income and result in lower asset values on our balance sheet.

Table of Contents

Recent Accounting Pronouncements

For information with respect to recent accounting pronouncements and the impact of these pronouncements on our consolidated financial statements, see Note 1 Overview and Summary of Significant Accounting Policies in the notes to the consolidated financial statements included elsewhere in this Quarterly Report on Form 10-Q.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

During the nine months ended September 30, 2012, there were no significant changes to our quantitative and qualitative disclosures about market risk. Please refer to Part II, Item 7A. Quantitative and Qualitative Disclosure About Market Risk included in our Annual Report on Form 10-K for our fiscal year ended December 31, 2011 for a more complete discussion on the market risks we encounter.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our chief executive officer and chief financial officer, evaluated the effectiveness of our disclosure controls and procedures as of the end of the period covered by this Quarterly Report. The term disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission (the SEC) rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Based on the evaluation of our disclosure controls and procedures as of September 30, 2012, our chief executive officer and chief financial officer concluded that, as of such date, our disclosure controls and procedures were effective at the reasonable assurance level.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting identified in management's evaluation pursuant to Rules 13a-15(d) or 15d-15(d) of the Exchange Act during the quarter ended September 30, 2012 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Limitations on Effectiveness of Controls and Procedures

In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures must reflect the fact that there are resource constraints and that management is required to apply judgment in evaluating the benefits of possible controls and procedures relative to their costs.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

For a description of our material legal proceedings, see the section titled Legal Matters included in Note 12 Commitments and Contingencies in the notes to the consolidated financial statements included elsewhere in this Quarterly Report on Form 10-Q which is incorporated by reference herein.

ITEM 1A. RISK FACTORS

We have identified the following risks and uncertainties that may have a material adverse effect on our business, financial condition or results of operations. The risks described below are not the only ones we face. Additional risks not presently known to us or that we currently believe are not material may also significantly impair our business operations. Our business could be harmed by any of these risks. The trading price of our common stock could decline due to any of these risks, and you may lose all or part of your investment. In assessing these risks, you should also refer to the other information contained in this Quarterly Report on Form 10-Q, including our condensed consolidated financial statements and

related notes.

Table of Contents

We have marked with an asterisk () those risks described below that reflect substantive changes from, or additions to, the risks described in our Annual Report on Form 10-K for the year ended December 31, 2011.*

Risks Related to Our Business and Industry

If we are unable to maintain a good relationship with Facebook, our business will suffer.*

Facebook is currently the primary distribution, marketing, promotion and payment platform for our games. We generate a significant majority of our revenue and players through the Facebook platform and expect to continue to do so for the foreseeable future. Any deterioration in our relationship with Facebook would harm our business and adversely affect our operating results and the value of our Class A common stock.

We are subject to Facebook's standard terms and conditions for application developers, which govern the promotion, distribution and operation of games and other applications on the Facebook platform, and which are subject to change by Facebook from time to time. We have entered into an addendum to these terms and conditions pursuant to which we have agreed to use Facebook Credits, Facebook's proprietary payment method, as the primary means of payment within our games played through Facebook. This addendum expires in May 2015. In June 2012, Facebook announced its plans to discontinue the use of Facebook Credits and instead support pricing in local currencies. We expect to transition away from Facebook Credits and to adopt Facebook's local currency-based payments model in the near future, but we cannot assure you that these changes will not have a negative impact on our operating results in the future.

Our business may be harmed if:

Facebook discontinues or limits access to its platform by us;

Facebook terminates or does not renew or replace our addendum or seeks to terminate our contractual relationship altogether;

Facebook modifies its terms of service or other policies, including fees charged to, or other restrictions on, us, other application developers, or Facebook changes how the personal information of its users is made available to application developers on the Facebook platform or shared by users;

Facebook establishes more favorable relationships with one or more of our competitors; or

Facebook develops its own competitive offerings.

In addition, we have benefited from Facebook's strong brand recognition and large user base. If Facebook loses its market position or otherwise falls out of favor with Internet users, we would need to identify alternative channels for marketing, promoting and distributing our games, which would consume substantial resources and may not be effective. As noted above, Facebook has broad discretion to change its terms of service and other policies with respect to us and other developers, and those changes may be unfavorable to us. For example, Facebook's policy requiring that applications on Facebook accept only its virtual currency, Facebook Credits, as payment from users, which was adopted in 2010 and we completed in April 2011, provided Facebook with a greater share of payments made by our players than it did when other payment options were allowed. Facebook recently announced its plans to discontinue use of Facebook Credits. Facebook may also change its fee structure, add fees associated with access to and use of the Facebook platform, change how the personal information of its users is made available to application developers on the Facebook platform or restrict how Facebook users can share information with friends on their platform. Beginning in early 2010, Facebook changed its policies for application developers regarding use of its communication channels. These changes limited the level of communication among users about applications on the Facebook platform. As a result, the number of our players on Facebook declined. Our current agreement with Facebook allows our users to use Zynga-branded game cards for the redemption of Facebook Credits and allows us to continue to distribute our game cards for a limited time. We are working with Facebook to transition retailers from our gift card program to Facebook's gift cards. We expect this transition to occur over time and to be completed in the near future. Our future bookings and revenue may be negatively impacted during this transition period and upon the expiration of our game card program. Any such changes in the future could significantly alter how players experience our games or interact within our games, which may harm our business.

Edgar Filing: ZYNGA INC - Form 10-Q

We operate in a new and rapidly changing industry, which makes it difficult to evaluate our business and prospects.

The social game industry, through which we derive substantially all of our revenue, is a new and rapidly evolving industry. The growth of the social game industry and the level of demand and market acceptance of our games are subject to a high degree of uncertainty. Our future operating results will depend on numerous factors affecting the social game industry, many of which are beyond our control, including:

continued worldwide growth in the adoption and use of Facebook and other social networks;

changes in consumer demographics and public tastes and preferences;

the availability and popularity of other forms of entertainment;

Table of Contents

the worldwide growth of personal computer, broadband Internet and mobile device users, and the rate of any such growth; and

general economic conditions, particularly economic conditions adversely affecting discretionary consumer spending.

Our ability to plan for game development, distribution and promotional activities will be significantly affected by our ability to anticipate and adapt to relatively rapid changes in the tastes and preferences of our current and potential players. New and different types of entertainment may increase in popularity at the expense of social games. A decline in the popularity of social games in general, or our games in particular would harm our business and prospects.

We have a new business model and a short operating history, which makes it difficult to evaluate our prospects and future financial results and may increase the risk that we will not be successful.

We began operations in April 2007, and we have a short operating history and a new business model, which makes it difficult to effectively assess our future prospects. Our business model is based on offering games that are free to play. To date, only a small portion of our players pay for virtual goods.

We rely on a small portion of our total players for nearly all of our revenue.*

Compared to all players who play our games in any period, only a small portion are paying players. During the three months ended September 30, 2012, we had approximately 2.9 million MUPs (excluding payers who use certain payment methods for which unique payer data is not available), which represents approximately two percent of our players. We lose players in the ordinary course of business. In order to sustain our revenue levels, we must attract, retain and increase the number of players or more effectively monetize our players. To retain players, we must devote significant resources so that the games they play retain their interest and attract them to our other games. If we fail to grow or sustain the number of our players, or if the rates at which we attract and retain players declines or if the average amount our players pay declines, our business may not grow and our financial results will suffer.

Our growth prospects may suffer if the Zynga platform is unsuccessful.*

We launched the Zynga platform in March 2012. Our ability to increase our player base and revenue will depend, in part, on the successful operation of the Zynga platform. If the Zynga platform fails to engage players, interest third-party game developers or attract advertisers, we may fail to generate sufficient revenue, operating margin or other value to justify our investment in the development and operation of the Zynga platform. We have very limited experience launching third-party developed games on the Zynga platform, and supporting games developed by third parties. We may also encounter technical and operational challenges operating a platform. In addition, although the Zynga platform is integrated with Facebook and uses Facebook Credits as the only payment method for purchasing virtual goods, our launch and promotion of the Zynga platform could harm our relationship with Facebook. Moreover, in the event that the Zynga platform ceases to be integrated with Facebook, then the standard Facebook policies that are applicable to third party games outside the Facebook platform will apply to the Zynga platform. These policies include Facebook's recently announced policy that, effective on December 15, 2012, web games outside the Facebook platform will be limited in the Facebook information they may access and are prohibited from using the same application ID as web games on Facebook. If we are not successful with the overall monetization of the Zynga platform, we may not be able to maintain or grow our revenue as anticipated and our financial results could be adversely affected.

We expect our bookings and revenue growth rate to decline over time and anticipate operating margins may decline in the future.*

From 2010 to 2011, our revenue grew from \$597.5 million to \$1.14 billion, which represents an annual growth rate of approximately 91%. We expect the growth rate in bookings and revenue will decline over time. Although we have begun to implement targeted cost reduction initiatives to better align our operating expenses with our revenue and we plan to continue to manage costs better and manage our business more efficiently, we believe our operating margin will experience downward pressure as a result of increasing competition and the need for increased operating expenditures for many aspects of our business. Further, we believe that the increased stock-based expense associated with vested ZSUs, which we had not recognized prior to our initial public offering, will also exert downward pressure on our operating margin. We expect to continue to expend substantial financial and other resources on game development, international expansion and our network infrastructure. Our operating costs might also increase if we do not effectively manage costs. In addition, weak economic conditions or other factors could cause our business to contract, requiring us to implement additional cost cutting measures.

Table of Contents

A small number of games have generated a majority of our revenue, and we must continue to launch and enhance games that attract and retain a significant number of players in order to grow our revenue and sustain our competitive position.

Historically we have depended on a small number of games for a majority of our revenue and we expect that this dependency will continue for the foreseeable future. Our growth depends on our ability to consistently launch new games that achieve significant popularity. Each of our games requires significant engineering, marketing and other resources to develop, launch and sustain via regular upgrades and expansions, and such costs have increased on average. Our ability to successfully launch, sustain and expand games and attract and retain players largely will depend on our ability to:

anticipate and effectively respond to changing game player interests and preferences;

anticipate or respond to changes in the competitive landscape;

attract, retain and motivate talented game designers, product managers and engineers;

develop, sustain and expand games that are fun, interesting and compelling to play;

effectively market new games and enhancements to our existing players and new players;

minimize launch delays and cost overruns on new games and game expansions;

minimize downtime and other technical difficulties; and

acquire high quality assets, personnel and companies.

It is difficult to consistently anticipate player demand on a large scale, particularly as we develop games in new genres or new markets, including international markets and mobile platforms. If we do not successfully launch games that attract and retain a significant number of players and extend the life of our existing games, our market share, reputation and financial results will be harmed.

If our top games do not maintain their popularity, our results of operations could be harmed.

In addition to creating new games that are attractive to a significant number of players, we must extend the life of our existing games, in particular our most successful games. For a game to remain popular, we must constantly enhance, expand or upgrade the game with new features that players find attractive. Such constant enhancement requires the investment of significant resources, particularly with older games and such costs have increased on average. We may not be able to successfully enhance, expand or upgrade our current games. Any reduction in the number of players of our most popular games, any decrease in the popularity of our games or social games in general, any breach of game-related security or prolonged server interruption, any loss of rights to any intellectual property underlying such games, or any other adverse developments relating to our most popular games, could harm our results of operations.

Our growth prospects will suffer if we are unable to continue to develop successful games for mobile platforms or successfully monetize mobile games we develop or acquire.*

Developing games for mobile platforms is an important component of our strategy. We have devoted and we expect to continue to devote substantial resources to the development of our mobile games, and we cannot guarantee that we will continue to develop games that appeal to players or advertisers. In addition, we may encounter difficulty in integrating features on games developed for mobile platforms that a sufficient number of players will pay for or otherwise sufficiently monetize mobile games. Generally, our mobile games monetize at a lower rate than our

Edgar Filing: ZYNGA INC - Form 10-Q

web-based games and we may not be successful in our efforts to increase our monetization from mobile games. If we are unable to implement successful monetization strategies for our mobile games, our ability to grow revenue and our financial performance will be negatively affected.

Our ability to successfully develop games for mobile platforms will depend on our ability to:

anticipate and effectively respond to the growing number of players switching from web-based to mobile games, the changing mobile landscape and the interests of players on mobile platforms;

attract, retain and motivate talented game designers, product managers and engineers who have experience developing games for mobile platforms;

expand on our current mobile games;

effectively market new mobile games to our existing web-based players and players of our current mobile games;

minimize launch delays and cost overruns on the development of new games;

develop games that provide for a compelling and optimal user experience through existing and developing third party technologies, including third party software and middleware utilized by our players; and

acquire and successfully integrate high quality mobile game assets, personnel or companies.

These and other uncertainties make it difficult to know whether we will succeed in continuing to develop successful mobile games. If we do not succeed in doing so, our growth prospects will suffer.

Table of Contents

Any failure or significant interruption in our network could impact our operations and harm our business.

Our technology infrastructure is critical to the performance of our games and to player satisfaction. Our games run on a complex distributed system, or what is commonly known as cloud computing. We own, operate and maintain the primary elements of this system, but some elements of this system are operated by third parties that we do not control and which would require significant time to replace. We have experienced, and may in the future experience, website disruptions, outages and other performance problems due to a variety of factors, including infrastructure changes, human or software errors and capacity constraints. For example, the operation of *CityVille*, was interrupted for several hours in April 2012 due to a network outage. If a particular game is unavailable when players attempt to access it or navigation through a game is slower than they expect, players may stop playing the game and may be less likely to return to the game as often, if at all. A failure or significant interruption in our game service would harm our reputation and operations. We expect to continue to make significant investments to our technology infrastructure to maintain and improve all aspects of player experience and game performance. To the extent that our disaster recovery systems are not adequate, or we do not effectively address capacity constraints, upgrade our systems as needed and continually develop our technology and network architecture to accommodate increasing traffic, our business and operating results may suffer. We do not maintain insurance policies covering losses relating to our systems and we do not have business interruption insurance.

Security breaches, computer viruses and computer hacking attacks could harm our business, reputation, brand and results of operations.*

Security breaches, computer malware and computer hacking attacks have become more prevalent in our industry, have occurred on our systems in the past and may occur on our systems in the future. Any security breach caused by hacking, which involves efforts to gain unauthorized access to information or systems, or to cause intentional malfunctions or loss or corruption of data, software, hardware or other computer equipment, and the inadvertent transmission of computer viruses could harm our business, financial condition and operating results. We have experienced and will continue to experience hacking attacks. Because of our prominence in the social game industry, we believe we are a particularly attractive target for hackers.

In addition, our games involve the storage and transmission of players' personal information in our facilities and on our equipment, networks and corporate systems. Security breaches could expose us to litigation, remediation costs, increased costs for security measures, loss of revenue, damage to our reputation, and potential liability. Our player data and corporate systems and security measures may be breached due to the actions of outside parties, employee error, malfeasance, a combination of these, or otherwise, and, as a result, an unauthorized party may obtain access to our data or our players' data. Additionally, outside parties may attempt to fraudulently induce employees or players to disclose sensitive information in order to gain access to our players' data. We must continuously examine and modify our security controls and business policies to adapt to the adoption of new devices and technologies enabling players to share data and communicate in new ways, and the increasing focus by our players and regulators on controlling and protecting user data.

Because the techniques used to obtain unauthorized access, disable or degrade service, or sabotage systems change frequently or may be designed to remain dormant until a predetermined event and often are not recognized until launched against a target, we may be unable to anticipate these techniques or implement adequate preventative measures. Though it is difficult to determine what harm may directly result from any specific interruption or breach, any failure to maintain performance, reliability, security and availability of our network infrastructure to the satisfaction of our players may harm our reputation and our ability to retain existing players and attract new players.

If an actual or perceived breach of our security occurs, the market perception of the effectiveness of our security measures could be harmed, we could lose players, and we could suffer financial exposure due to such events or in connection with remediation efforts, investigation costs, changed security, and system protection measures.

If we fail to effectively manage our growth, our business and operating results could be harmed.*

We have experienced rapid growth in our headcount and operations over the last couple of years, which has placed and will continue to place significant demands on our management and our operational, financial and technological infrastructure. As of September 30, 2012, approximately 34% of our employees had been with us for less than one year and approximately 73% for less than two years. We are in the process of implementing certain cost reduction initiatives to better align our operating expenses with our revenue, including reducing our headcount, rationalizing our product pipeline, reducing marketing and technology expenditures and consolidating certain facilities, and we plan to continue to manage costs to better and more efficiently manage our business. However, we must continue to expend significant resources to identify, hire, integrate, develop, motivate and retain a large number of qualified employees. Our cost reduction initiatives could negatively impact our ability to hire and retain key employees. If we fail to effectively manage our hiring needs, successfully integrate our new hires and retain key employees, our ability to continue launching new games and enhance existing games could suffer.

Edgar Filing: ZYNGA INC - Form 10-Q

To effectively manage the growth of our business and operations, we will need to continue spending significant resources to improve our technology infrastructure, our operational, financial and management controls, and our reporting systems and procedures by, among other things:

monitoring and updating our technology infrastructure to maintain high performance and minimize down time;

Table of Contents

enhancing information and communication systems to ensure that our employees and offices around the world are well-coordinated and can effectively communicate with each other;

enhancing our internal controls to ensure timely and accurate reporting of all of our operations; and

appropriately documenting our information technology systems and our business processes.

These enhancements and improvements will require significant capital expenditures and allocation of valuable management and employee resources. If we fail to implement these enhancements and improvements effectively, our ability to manage our expected growth and comply with the rules and regulations that are applicable to public reporting companies will be impaired. In addition, we cannot be sure that the cost reduction initiatives will be as successful in reducing our overall expenses as expected or that additional costs will not offset any such reductions. If our operating costs are higher than we expect or if we do not maintain adequate control of our costs and expenses, our operating results will suffer.

Our core values of focusing on our players first and acting for the long term may conflict with the short-term interests of our business.

One of our core values is to focus on surprising and delighting our players, which we believe is essential to our success and serves the best, long-term interests of Zynga and our stakeholders. Therefore, we have made in the past and we may make in the future, significant investments or changes in strategy that we think will benefit our players, even if our decision negatively impacts our operating results in the short term. For example, in late 2009 and in 2010 we reduced in-game advertising offers in order to improve player experience. This decrease in in-game offers led to a reduction of advertising revenue in 2010 as compared to 2009. Our decisions may not result in the long-term benefits that we expect, in which case the success of our games, business and operating results could be harmed.

If we lose the services of our founder and Chief Executive Officer or certain other members of our senior management team, we may not be able to execute our business strategy.*

Our success depends in a large part upon the continued service of our senior management team. In particular, our founder and Chief Executive Officer, Mark Pincus, is critical to our vision, strategic direction, culture, products and technology. We do not maintain key-man insurance for Mr. Pincus or any other member of our senior management team. The loss of our founder and Chief Executive Officer or certain other members of senior management could harm our business.

If we are unable to attract and retain highly qualified employees, we may not be able to grow effectively.*

Our ability to compete and grow depends in large part on the efforts and talents of our employees. Such employees, particularly game designers, product managers, engineers and executives are in high demand, and we devote significant resources to identifying, recruiting, hiring, training, successfully integrating and retaining these employees. We have historically hired a number of key personnel through acquisitions, and as competition with other game companies for attractive target companies with a skilled employee base increases, we may incur significant expenses in continuing this practice. The loss of talented employees or the inability to hire skilled employees as replacements could result in significant disruptions to our business, and the integration of replacement personnel could be time-consuming and expensive and cause additional disruptions to our business. If we do not succeed in recruiting, retaining, and motivating our key employees to achieve a high level of success or if we do not attract new key personnel, we may be unable to grow our business or execute our business strategy and as a result, our revenue and profitability may decline. We believe that two critical components of our success and our ability to retain our best people are our culture and our competitive compensation practices. As we continue to develop the infrastructure of a public company, we may find it difficult to maintain our entrepreneurial, execution-focused culture. In addition, some of our employees may have been motivated to work for us by an expectation that our Class A common stock would be trading at a higher value and may be less motivated by the equity compensation they receive as a result. Competitors may leverage any resulting disappointment as a tool to recruit talented employees. Despite this, many of our employees may still be able to receive significant proceeds from sales of our equity in the public markets, which may reduce their motivation to continue to work for us. In addition, there may also be disparities of wealth between those of our employees whom we hired prior to our initial public offering in December 2011 and those who joined us after we became a public company, which may harm our culture and relations among employees. We have recently experienced attrition at higher levels than we have in the past, in part as a result of our transition to a public company. In addition, we have recently begun implementing certain cost reduction initiatives to better align our operating expenses with our revenue, including reducing our headcount, and these cost reduction initiatives could negatively impact our ability to hire and retain key employees.

*An increasing number of individuals are utilizing devices other than personal computers to access the Internet, and versions of our games developed for these devices might not gain widespread adoption, or may not function as intended.**

The number of individuals who access the Internet through devices other than a personal computer, such as smartphones, tablets, televisions and set-top box devices, has increased dramatically, and we believe this trend is likely to continue. The generally lower processing speed, power, functionality and memory associated with these devices make playing our games through such devices

Table of Contents

more difficult; and the versions of our games developed for these devices may not be compelling to players. In addition, each device manufacturer or platform provider may establish unique or restrictive terms and conditions for developers on such devices or platforms, and our games may not work well or be viewable on these devices as a result. To expand our business, we will need to support a number of alternative devices and technologies. Once developed, we may choose to port or convert a game into separate versions for alternative devices with different technological requirements. As new devices and new mobile platforms or updates to platforms are continually being released, we may encounter problems in developing versions of our games for use on these alternative devices and we may need to devote significant resources to the creation, support, and maintenance of such devices and platforms. If we are unable to successfully expand the platforms and devices on which our games are available, or if the versions of our games that we create for alternative platforms and devices are not compelling to our players, our business will suffer.

Expansion into international markets is important for our growth, and as we expand internationally, we will face additional business, political, regulatory, operational, financial and economic risks, any of which could increase our costs and hinder such growth.

Continuing to expand our business to attract players in countries other than the United States is a critical element of our business strategy. An important part of targeting international markets is developing offerings that are localized and customized for the players in those markets. We have a limited operating history as a company outside of the United States. We expect to continue to devote significant resources to international expansion through acquisitions, the establishment of additional offices and development studios, and increasing our foreign language offerings. Our ability to expand our business and to attract talented employees and players in an increasing number of international markets will require considerable management attention and resources and is subject to the particular challenges of supporting a rapidly growing business in an environment of multiple languages, cultures, customs, legal systems, alternative dispute systems, regulatory systems and commercial infrastructures. We have experienced difficulties in the past and have not been successful in all the countries we have entered. Expanding our international focus may subject us to risks that we have not faced before or increase risks that we currently face, including risks associated with:

recruiting and retaining talented and capable management and employees in foreign countries;

challenges caused by distance, language and cultural differences;

developing and customizing games and other offerings that appeal to the tastes and preferences of players in international markets;

competition from local game makers with significant market share in those markets and with a better understanding of player preferences;

protecting and enforcing our intellectual property rights;

negotiating agreements with local distribution platforms that are sufficiently economically beneficial to us and protective of our rights;

the inability to extend proprietary rights in our brand, content or technology into new jurisdictions;

implementing alternative payment methods for virtual goods in a manner that complies with local laws and practices and protects us from fraud;

compliance with applicable foreign laws and regulations, including privacy laws and laws relating to content;

Edgar Filing: ZYNGA INC - Form 10-Q

compliance with anti-bribery laws including without limitation, compliance with the Foreign Corrupt Practices Act;

credit risk and higher levels of payment fraud;

currency exchange rate fluctuations;

protectionist laws and business practices that favor local businesses in some countries;

foreign tax consequences;

foreign exchange controls or U.S. tax restrictions that might restrict or prevent us from repatriating income earned in countries outside the United States;

political, economic and social instability;

higher costs associated with doing business internationally;

export or import regulations; and

trade and tariff restrictions.

Entering new international markets will be expensive, our ability to successfully gain market acceptance in any particular market is uncertain, and the distraction of our senior management team could harm our business.

Table of Contents

Competition within the broader entertainment industry is intense and our existing and potential players may be attracted to competing forms of entertainment such as offline and traditional online games, television, movies and sports, as well as other entertainment options on the Internet.*

Our players face a vast array of entertainment choices. Other forms of entertainment, such as offline, traditional online, personal computer and console games, television, movies, sports, real money gaming and the Internet, are much larger and more well-established markets and may be perceived by our players to offer greater variety, affordability, interactivity and enjoyment. These other forms of entertainment compete for the discretionary time and income of our players. If we are unable to sustain sufficient interest in our games in comparison to other forms of entertainment, including new forms of entertainment, our business model may no longer be viable.

There are low barriers to entry in the social game industry, and competition is intense.*

The social game industry is highly competitive, with low barriers to entry, and we expect more companies to enter the sector and a wider range of social games to be introduced. Our competitors that develop social games for social networks vary in size and include publicly-traded companies such as Electronic Arts Inc., DeNA Co. Ltd. and The Walt Disney Company and privately-held companies such as Crowdstar, Inc., Vostu, King.com and wooga GmbH. In addition, online game developers and distributors who are primarily focused on specific international markets, such as Tencent Holdings Limited in Asia, and high-profile companies with significant online presences that to date have not developed social games, such as Facebook, Google Inc. and Microsoft Corporation, may decide to develop social games. Some of these current and potential competitors have significant resources for developing or acquiring additional games, may be able to incorporate their own strong brands and assets into their games, have a more diversified set of revenue sources than we do and may be less severely affected by changes in consumer preferences, regulations or other developments that may impact the online social game industry. In addition, we have limited experience in developing games for mobile and other platforms and our ability to succeed on those platforms is uncertain. As we continue to devote significant resources to developing games for those platforms, we will face significant competition from established companies, including Electronic Arts Inc., GREE International, Inc., DeNA Co. Ltd., Gameloft SA, Glu Mobile Inc., Disney and Rovio Mobile Ltd. We expect new mobile-game competitors to enter the market and existing competitors to allocate more resources to develop and market competing games and applications.

The value of our virtual goods is highly dependent on how we manage the economies in our games. If we fail to manage our game economies properly, our business may suffer.

Paying players purchase virtual goods in our games because of the perceived value of these goods which is dependent on the relative ease of securing an equivalent good via non-paid means within the game. The perceived value of these virtual goods can be impacted by an increase in the availability of free or discounted Facebook Credits or by various actions that we take in the games including offering discounts for virtual goods, giving away virtual goods in promotions or providing easier non-paid means to secure these goods. If we fail to manage our virtual economies properly, players may be less likely to purchase virtual goods and our business may suffer.

Some of our players may make sales and/or purchases of virtual goods used in our games through unauthorized third-party websites, which may impede our revenue growth.

Some of our players may make sales and/or purchases of our virtual goods, such as *Zynga Poker* virtual poker chips, through unauthorized third-party sellers in exchange for real currency. These unauthorized transactions are usually arranged on third-party websites. We do not generate any revenue from these transactions. Accordingly, these unauthorized purchases and sales from third-party sellers could impede our revenue and profit growth by, among other things:

decreasing revenue from authorized transactions;

creating downward pressure on the prices we charge players for our virtual currency and virtual goods;

causing us to lose revenue from paying players who stop playing a particular game;

Edgar Filing: ZYNGA INC - Form 10-Q

increasing costs we incur to develop technological measures to curtail unauthorized transactions;

generating legal claims relating to the diminution of value of our virtual goods; and

increasing customer support costs to respond to dissatisfied players.

To discourage unauthorized purchases and sales of our virtual goods, we have stated in our terms of service that the buying or selling of virtual currency and virtual goods from unauthorized third-party sellers may result in bans from our games and/or legal

Table of Contents

action. We have banned players as a result of such activities. We have also developed technological measures to help detect unauthorized transactions. If we decide to implement further restrictions on players' ability to transfer virtual goods, we may lose players, which could harm our financial condition and results of operations.

The proliferation of cheating programs and scam offers that seek to exploit our games and players affects the game-playing experience and may lead players to stop playing our games.

Unrelated third parties have developed, and may continue to develop, cheating programs that enable players to exploit our games, play them in an automated way or obtain unfair advantages over other players who do play fairly. These programs harm the experience of players who play fairly and may disrupt the virtual economy of our games. In addition, unrelated third parties attempt to scam our players with fake offers for virtual goods. We devote significant resources to discover and disable these programs and activities, and if we are unable to do so quickly our operations may be disrupted, our reputation damaged and players may stop playing our games. This may lead to lost revenue from paying players, increased cost of developing technological measures to combat these programs and activities, legal claims relating to the diminution in value of our virtual currency and goods, and increased customer service costs needed to respond to dissatisfied players.

Our quarterly operating results are volatile and difficult to predict, and our stock price may decline if we fail to meet the expectations of securities analysts or investors.*

Our bookings, revenue, traffic and operating results could vary significantly from quarter-to-quarter and year-to-year and may fail to match our past performance or the expectations of securities analysts or investors because of a variety of factors, some of which are outside of our control. Any of these events could cause the market price of our Class A common stock to fluctuate. Factors that may contribute to the variability of our operating results include the risk factors listed in these Risk Factors and the factors discussed in the section titled Management's Discussion and Analysis of Financial Condition and Results of Operations Factors Affecting Our Performance.

In particular, we recognize revenue from the sale of our virtual goods in accordance with U.S. GAAP, which is complex and based on our assumptions and historical data with respect to the sale and use of various types of virtual goods. In the event that such assumptions are revised based on new data or there are changes in the historical mix of virtual goods sold due to new game introductions, reduced virtual good sales in existing games or other factors or there are changes in our estimates of average playing periods, the amount of revenue that we recognize in any particular period may fluctuate significantly. For further information regarding our revenue recognition policy, see the section titled

Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies Revenue Recognition of our Annual Report on Form 10-K for the year ended December 31, 2011.

Given our short operating history and the rapidly evolving social game industry, our historical operating results may not be useful in predicting our future operating results. In addition, metrics we have developed or those available from third parties regarding our industry and the performance of our games, including DAUs, MAUs, MUUs, MUPs and ABPU may not be indicative of our financial performance.

We may be required to record impairment charges related to our goodwill, intangible assets or other long-lived assets if our market capitalization declines below our net asset value or if our financial performance and/or condition deteriorates.*

As of September 30, 2012, we had \$737.4 million of goodwill, intangible assets and other long-lived assets. If our market capitalization declines below our net asset value or if our financial performance and/or condition deteriorates, we may have to impair our goodwill, intangible assets or other long-lived assets, which could adversely impact our results of operations and financial position.

Failure to protect or enforce our intellectual property rights or the costs involved in such enforcement could harm our business and operating results.

We regard the protection of our trade secrets, copyrights, trademarks, trade dress, domain names and other product rights as critical to our success. We strive to protect our intellectual property rights by relying on federal, state and common law rights, as well as contractual restrictions. We enter into confidentiality and invention assignment agreements with our employees and contractors and confidentiality agreements with parties with whom we conduct business in order to limit access to, and disclosure and use of, our proprietary information. However, these contractual arrangements and the other steps we have taken to protect our intellectual property may not prevent the misappropriation of our proprietary information or deter independent development of similar technologies by others.

We pursue the registration of our domain names, copyrights, trademarks, and service marks in the United States and in certain locations outside the United States. We are seeking to protect our trademarks, copyrights, patents and domain names in an increasing number of jurisdictions, a process that is expensive and time-consuming and may not be successful or which we may not pursue in every location. We may,

Edgar Filing: ZYNGA INC - Form 10-Q

over time, increase our investment in protecting our innovations through increased patent filings that are expensive and time-consuming and may not result in issued patents that can be effectively enforced. The Leahy-Smith America Invents Act (the Leahy-Smith Act) was adopted in September 2011. The Leahy-Smith Act includes a number of significant changes to United States patent law, including provisions that affect the way patent applications will be prosecuted and may also affect patent litigation. The United States Patent and Trademark Office is currently developing regulations and procedures to govern administration of the Leahy-Smith Act, and many of the substantive changes to patent law associated with the Leahy-Smith Act will not become effective until up to 18 months after its enactment. Accordingly, it is not clear what, if any, impact the Leahy-Smith Act will have on the operation of our business. However, the Leahy-Smith Act and its implementation could increase the uncertainties and costs surrounding the prosecution of our patent applications and the enforcement or defense of our issued patents, all of which could harm our business.

Table of Contents

Litigation may be necessary to enforce our intellectual property rights, protect our trade secrets or determine the validity and scope of proprietary rights claimed by others. Any litigation of this nature, regardless of outcome or merit, could result in substantial costs, adverse publicity or diversion of management and technical resources, any of which could adversely affect our business and operating results. If we fail to maintain, protect and enhance our intellectual property rights, our business and operating results may be harmed.

We are, and may in the future be, subject to intellectual property disputes, which are costly to defend and could require us to pay significant damages and could limit our ability to use certain technologies in the future.

From time to time, we have faced, and we expect to face in the future, allegations that we have infringed the trademarks, copyrights, patents and other intellectual property rights of third parties, including from our competitors, non-practicing entities and former employers of our personnel. Patent and other intellectual property litigation may be protracted and expensive, and the results are difficult to predict. As the result of any court judgment or settlement we may be obligated to cancel the launch of a new game, stop offering a game or certain features of a game, pay royalties or significant settlement costs, purchase licenses or modify our games and features while we develop substitutes.

In addition, we use open source software in our games and expect to continue to use open source software in the future. From time to time, we may face claims from companies that incorporate open source software into their products, claiming ownership of, or demanding release of, the source code, the open source software and/or derivative works that were developed using such software, or otherwise seeking to enforce the terms of the applicable open source license. These claims could also result in litigation, require us to purchase a costly license or require us to devote additional research and development resources to change our games, any of which would have a negative effect on our business and operating results.

Although we do not believe that the final outcome of intellectual property litigation and claims that we currently face will have a material adverse effect on our business, our expectations may not prove to be correct. Even if these matters do not result in litigation or are resolved in our favor or without significant cash settlements, these matters, and the time and resources necessary to litigate or resolve them, could harm our business, operating results, financial condition, reputation or the market price of our Class A common stock.

We are involved in legal proceedings that may result in adverse outcomes.*

We may be involved in claims, suits, government investigations, and proceedings arising from the ordinary course of our business, including actions with respect to intellectual property claims, privacy, data protection or law enforcement matters, tax matters, labor and employment claims, commercial claims, as well as stockholder derivative actions, purported class action lawsuits, and other matters. Such claims, suits, government investigations, and proceedings are inherently uncertain and their results cannot be predicted with certainty. Regardless of the outcome, such legal proceedings can have an adverse impact on us because of legal costs, diversion of management and other personnel, and other factors. In addition, it is possible that a resolution of one or more such proceedings could result in liability, penalties, or sanctions, as well as judgments, consent decrees, or orders preventing us from offering certain features, functionalities, products, or services, or requiring a change in our business practices, products or technologies, which could in the future materially and adversely affect our business, operating results, and financial condition. See the section titled "Legal Matters" included in Note 12 "Commitments and Contingencies" in the notes to the consolidated financial statements included elsewhere in this Quarterly Report.

Programming errors or flaws in our games could harm our reputation or decrease market acceptance of our games, which would harm our operating results.

Our games may contain errors, bugs, flaws or corrupted data, and these defects may only become apparent after their launch, particularly as we launch new games and rapidly release new features to existing games under tight time constraints. We believe that if our players have a negative experience with our games, they may be less inclined to continue or resume playing our games or recommend our games to other potential players. Undetected programming errors, game defects and data corruption can disrupt our operations, adversely affect the game experience of our players by allowing players to gain unfair advantage, harm our reputation, cause our players to stop playing our games, divert our resources and delay market acceptance of our games, any of which could result in legal liability to us or harm our operating results.

Evolving regulations, industry standards and practices by platform providers concerning data privacy could prevent us from providing our current games to our players, or require us to modify our games, thereby harming our business.*

The regulatory framework for privacy issues worldwide is currently in flux and is likely to remain so for the foreseeable future. Practices regarding the collection, use, storage, transmission and security of personal information by companies operating over the Internet and mobile platforms are under increased public scrutiny, and civil claims alleging liability for the breach of data privacy have been asserted against us. The U.S. government, including the Federal Trade Commission, the Department of Commerce and the U.S. Congress are continuing to review the

Edgar Filing: ZYNGA INC - Form 10-Q

need for greater regulation for the collection of information concerning consumer behavior on the Internet, including regulation aimed at restricting certain targeted advertising practices. In addition, the European Union has proposed reforms to its existing data protection legal framework, which may result in a greater compliance burden for companies with users in Europe. Various government and consumer agencies have also called for new regulation and changes in industry practices.

Table of Contents

We began operations in 2007 and have grown rapidly. While our administrative systems have developed rapidly, during our earlier history our practices relating to intellectual property, data privacy and security, and legal compliance may not have been as robust as they are now, and there may be unasserted claims arising from this period that we are not able to anticipate. In addition, our business, including our ability to operate and expand internationally, could be adversely affected if laws or regulations are adopted, interpreted, or implemented in a manner that is inconsistent with our current business practices and that require changes to these practices, the design of our website, games, features or our privacy policy. In particular, the success of our business has been, and we expect will continue to be, driven by our ability to responsibly use the data that our players share with us. Therefore, our business could be harmed by any significant change to applicable laws, regulations or industry practices or the requirements of platform providers regarding the use or disclosure of data our players choose to share with us, or regarding the manner in which the express or implied consent of consumers for such use and disclosure is obtained. Such changes may require us to modify our game features and advertising practices, possibly in a material manner, and may limit our ability to use the data that our players share with us.

We process, store and use personal information and other data, which subjects us to governmental regulation and other legal obligations related to privacy, and our actual or perceived failure to comply with such obligations could harm our business.

We receive, store and process personal information and other player data, and we enable our players to share their personal information with each other and with third parties, including on the Internet and mobile platforms. There are numerous federal, state and local laws around the world regarding privacy and the storing, sharing, use, processing, disclosure and protection of personal information and other player data on the Internet and mobile platforms, the scope of which are changing, subject to differing interpretations, and may be inconsistent between countries or conflict with other rules. We generally comply with industry standards and are subject to the terms of our own privacy policies and privacy-related obligations to third parties (including voluntary third-party certification bodies such as TRUSTe). We strive to comply with all applicable laws, policies, legal obligations and certain industry codes of conduct relating to privacy and data protection, to the extent reasonably attainable. However, it is possible that these obligations may be interpreted and applied in a manner that is inconsistent from one jurisdiction to another and may conflict with other rules or our practices. Any failure or perceived failure by us to comply with our privacy policies, our privacy-related obligations to players or other third parties, or our privacy-related legal obligations, or any compromise of security that results in the unauthorized release or transfer of personally identifiable information or other player data, may result in governmental enforcement actions, litigation or public statements against us by consumer advocacy groups or others and could cause our players to lose trust in us, which could have an adverse effect on our business. Additionally, if third parties we work with, such as players, vendors or developers, violate applicable laws or our policies, such violations may also put our players' information at risk and could in turn have an adverse effect on our business.

In the area of information security and data protection, many states have passed laws requiring notification to players when there is a security breach for personal data, such as the 2002 amendment to California's Information Practices Act, or requiring the adoption of minimum information security standards that are often vaguely defined and difficult to practically implement. The costs of compliance with these laws may increase in the future as a result of changes in interpretation. Furthermore, any failure on our part to comply with these laws may subject us to significant liabilities.

Our business is subject to a variety of other U.S. and foreign laws, many of which are unsettled and still developing and which could subject us to claims or otherwise harm our business.*

We are subject to a variety of laws in the United States and abroad, including laws regarding consumer protection, intellectual property, export and national security, that are continuously evolving and developing. The scope and interpretation of the laws that are or may be applicable to us are often uncertain and may be conflicting, particularly laws outside the United States. For example, laws relating to the liability of providers of online services for activities of their users and other third parties are currently being tested by a number of claims, including actions based on invasion of privacy and other torts, unfair competition, copyright and trademark infringement, and other theories based on the nature and content of the materials searched, the ads posted or the content provided by users. It is also likely that as our business grows and evolves and our games are played in a greater number of countries, we will become subject to laws and regulations in additional jurisdictions. We are potentially subject to a number of foreign and domestic laws and regulations that affect the offering of certain types of content, such as that which depicts violence, many of which are ambiguous, still evolving and could be interpreted in ways that could harm our business or expose us to liability. In addition, certain of our games, including *Zynga Poker*, may become subject to gambling-related rules and regulations and expose us to civil and criminal penalties if we do not comply. It is difficult to predict how existing laws will be applied to our business and the new laws to which we may become subject.

If we are not able to comply with these laws or regulations or if we become liable under these laws or regulations, we could be directly harmed, and we may be forced to implement new measures to reduce our exposure to this liability. This may require us to expend substantial resources or to modify our games, which would harm our business, financial condition and results of operations. In addition, the increased attention focused upon liability issues as a result of lawsuits and legislative proposals could harm our reputation or otherwise impact the growth of our business. Any costs incurred as a result of this potential liability could harm our business and operating results.

Table of Contents

It is possible that a number of laws and regulations may be adopted or construed to apply to us in the United States and elsewhere that could restrict the online and mobile industries, including player privacy, advertising, taxation, content suitability, copyright, distribution and antitrust. Furthermore, the growth and development of electronic commerce and virtual goods may prompt calls for more stringent consumer protection laws that may impose additional burdens on companies such as ours conducting business through the Internet and mobile devices. We anticipate that scrutiny and regulation of our industry will increase and we will be required to devote legal and other resources to addressing such regulation. For example, existing laws or new laws regarding the regulation of currency and banking institutions may be interpreted to cover virtual currency or goods. If that were to occur we may be required to seek licenses, authorizations or approvals from relevant regulators, the granting of which may be dependent on us meeting certain capital and other requirements and we may be subject to additional regulation and oversight, all of which could significantly increase our operating costs. Changes in current laws or regulations or the imposition of new laws and regulations in the United States or elsewhere regarding these activities may lessen the growth of social game services and impair our business.

Companies and governmental agencies may restrict access to Facebook, our website or the Internet generally, which could lead to the loss or slower growth of our player base.

Our players need to access the Internet and in particular Facebook and our website to play our games. Companies and governmental agencies could block access to Facebook, our website or the Internet generally for a number of reasons such as security or confidentiality concerns or regulatory reasons, or they may adopt policies that prohibit employees from accessing Facebook, our website or other social platforms. For example, the government of the People's Republic of China has blocked access to Facebook in China. If companies or governmental entities block or limit access to Facebook or our website or otherwise adopt policies restricting players from playing our games our business could be negatively impacted and could lead to the loss or slower growth of our player base.

Our business will suffer if we are unable to successfully integrate acquired companies into our business or otherwise manage the growth associated with multiple acquisitions.*

We have acquired businesses, personnel and technologies in the past and we intend to continue to evaluate and pursue acquisitions and strategic investments that are complementary to our existing business and expand our employee base and the breadth of our offerings. Our ability to grow through future acquisitions will depend on the availability of suitable acquisition and investment candidates at an acceptable cost, our ability to compete effectively to attract these candidates and the availability of financing to complete larger acquisitions. Additional challenges and risks include:

significant competition from other game companies as the social game industry consolidates;

the need to integrate the operations, systems, technologies, products and personnel of each acquired company, the inefficiencies and lack of control that may result if such integration is delayed or not implemented, and unforeseen difficulties and expenditures that may arise in connection with integration;

diversion of our management's attention away from our business and any difficulties encountered in the integration process;

declining employee morale and retention issues resulting from changes in, or acceleration of, compensation, or changes in management, reporting relationships, or future prospects;

the need to implement controls, procedures and policies appropriate for a larger public company at companies that prior to acquisition had lacked such controls, procedures and policies;

risks associated with our expansion into new international markets and doing business internationally, including those described under the risk factor caption "Expansion into international markets is important for our growth, and as we expand internationally, we will face additional business, political, regulatory, operational, financial and economic risks, any of which could increase our costs and hinder such growth" elsewhere in this Quarterly Report on Form 10-Q;

in the case of foreign acquisitions, the need to integrate operations across different cultures and languages and to address the particular economic, currency, political and regulatory risks associated with specific countries;

in some cases, the need to transition operations and players onto our existing or new platforms and the potential loss of, or harm to, our relationships with employees, players and other suppliers as a result of integration of new businesses; and

liability for activities of the acquired company before the acquisition, including intellectual property and other litigation claims or disputes, information security vulnerabilities, violations of laws, rules and regulations, commercial disputes, tax liabilities and other known and unknown liabilities.

Table of Contents

The benefits of an acquisition or investment may also take considerable time to develop, and we cannot be certain that any particular acquisition or investment will produce the intended benefits, which could adversely affect our business and operating results. Acquisitions could result in potential dilutive issuances of equity securities, use of significant cash balances or incurrence of debt (and increased interest expense), contingent liabilities or amortization expenses related to intangible assets or write-offs of goodwill and/or intangible assets, which could adversely affect our results of operations and dilute the economic and voting rights of our stockholders. For example, in the third quarter of 2012, we made the decision to discontinue the development of certain games associated with technology and other intangible assets previously acquired from OMGPOP and we recorded an asset impairment charge of \$95.5 million. See Note 6 *Goodwill and Other Intangible Assets* in the notes to the consolidated financial statements included elsewhere in this Quarterly Report for more information.

Failure in pursuing or executing new business initiatives could have a material adverse impact on our business and future growth.*

Our growth strategy includes evaluating, considering and effectively executing new business initiatives, which can be difficult. Management may not properly ascertain or assess the risks of new initiatives, and subsequent events may alter the risks that were evaluated at the time we decided to execute any new initiative. Entering into any new initiatives can also divert our management's attention from other business issues and opportunities. Failure to effectively identify, pursue and execute new business initiatives, including real money gambling as discussed below, may adversely affect our reputation, business, financial condition and results of operations. We believe real money gambling could have risks that are different than those associated with other new initiatives. In particular, real money gambling is subject to stringent, complicated and rapidly changing licensing and regulatory requirements, both federally and in each state, as well as internationally. Regulatory and legislative developments may prevent or significantly limit our ability to enter into or succeed in real money gambling, even if we pursue it. Becoming familiar with and complying with these requirements will increase our costs and subject our business to greater scrutiny by regulators in many different jurisdictions. If our brand becomes associated with real money gambling we may lose current players, advertisers or partners or have difficulty attracting new players, advertisers or partners, which could adversely impact our business.

We have begun efforts to expand our business to include real money gambling and in October 2012, we entered into a partnership agreement with bwin.party digital entertainment plc, a leading international real money gambling operator, to develop, test and operate certain real money online poker and casino games in the United Kingdom. This is our first experience with real money gambling and we cannot assure you that these preliminary efforts will be successful or result in the development or timely launch of real money gambling products, if at all, or ultimately produce any revenue. In addition, even if we ultimately do launch real money gambling products, if we or our partners fail to comply with regulatory requirements, or if players are less satisfied than expected with the games provided, we may not benefit from this line of business, we may lose players and we may curtail our efforts to enter the real money gambling market.

Fluctuations in foreign currency exchange rates will affect our financial results, which we report in U.S. dollars.

As we continue to expand our international operations, we become more exposed to the effects of fluctuations in currency exchange rates. We incur expenses for employee compensation and other operating expenses at our non-U.S. locations in the local currency, and an increasing percentage of our international revenue is from players who pay us in currencies other than the U.S. dollar. Fluctuations in the exchange rates between the U.S. dollar and those other currencies could result in the dollar equivalent of such expenses being higher and/or the dollar equivalent of such foreign-denominated revenue being lower than would be the case if exchange rates were stable. This could have a negative impact on our reported operating results.

The enactment of legislation implementing changes in the U.S. taxation of international business activities or the adoption of other tax reform policies could materially impact our financial position and results of operations.

The current administration has made public statements indicating that it has made international tax reform a priority, and key members of the U.S. Congress have conducted hearings and proposed new legislation. Recent changes to U.S. tax laws, including limitations on the ability of taxpayers to claim and utilize foreign tax credits and the deferral of certain tax deductions until earnings outside of the United States are repatriated to the United States, as well as changes to U.S. tax laws that may be enacted in the future, could impact the tax treatment of our foreign earnings. Due to the large and expanding scale of our international business activities, any changes in the U.S. taxation of such activities may increase our worldwide effective tax rate and harm our financial position and results of operations.

A change in the application of the tax laws of various jurisdictions could result in an increase to our worldwide effective tax rate and a change in how we operate our business.

Our corporate structure and intercompany arrangements, including the manner in which we develop and use our intellectual property and the transfer pricing of our intercompany transactions, are intended to provide us worldwide tax efficiencies. The application of the tax laws of various jurisdictions, including the United States, to our international business activities is subject to interpretation and depends on our ability to

Edgar Filing: ZYNGA INC - Form 10-Q

operate our business in a manner consistent with our corporate structure and intercompany arrangements. The taxing authorities of the jurisdictions in which we operate may challenge our methodologies for valuing developed technology or intercompany arrangements, including our transfer pricing, or determine that the manner in which we operate our business is not consistent with the manner in which we report our income to the jurisdictions, which could increase our worldwide effective tax rate and harm our financial position and results of operations.

Table of Contents

Our facilities are located near known earthquake fault zones, and the occurrence of an earthquake or other natural disaster could cause damage to our facilities and equipment, which could require us to curtail or cease operations.

Our principal offices and network operations centers are located in the San Francisco Bay Area, an area known for earthquakes, and are thus vulnerable to damage. We are also vulnerable to damage from other types of disasters, including power loss, fire, explosions, floods, communications failures, terrorist attacks and similar events. If any disaster were to occur, our ability to operate our business at our facilities could be impaired.

We may require additional capital to meet our financial obligations and support business growth, and this capital might not be available on acceptable terms or at all.

We intend to continue to make significant investments to support our business growth and may require additional funds to respond to business challenges, including the need to develop new games and features or enhance our existing games, improve our operating infrastructure or acquire complementary businesses, personnel and technologies. Accordingly, we may need to engage in equity or debt financings to secure additional funds. If we raise additional funds through future issuances of equity or convertible debt securities, our existing stockholders could suffer significant dilution, and any new equity securities we issue could have rights, preferences and privileges superior to those of holders of our Class A common stock. Any debt financing that we secure in the future could involve restrictive covenants relating to our capital raising activities and other financial and operational matters, which may make it more difficult for us to obtain additional capital and to pursue business opportunities, including potential acquisitions. We may not be able to obtain additional financing on terms favorable to us, if at all. If we are unable to obtain adequate financing or financing on terms satisfactory to us when we require it, our ability to continue to support our business growth and to respond to business challenges could be significantly impaired, and our business may be harmed.

Risks Related to Our Class A Common Stock

The three class structure of our common stock has the effect of concentrating voting control with those stockholders who held our stock prior to our initial public offering, including our founder and Chief Executive Officer and our other executive officers, employees and directors and their affiliates; this limits our other stockholders' ability to influence corporate matters.*

Our Class C common stock has 70 votes per share, our Class B common stock has seven votes per share and our Class A common stock has one vote per share. Mark Pincus, our Chief Executive Officer, beneficially owned approximately 58% of the total voting power of our outstanding capital stock as of September 30, 2012. As a result, Mark Pincus has significant influence over the management and affairs of the company and control over matters requiring stockholder approval, including the election of directors and significant corporate transactions, such as a merger or other sale of our company or our assets. Mr. Pincus may hold this voting power for the foreseeable future, subject to additional issuances of stock by the company or sales or exercises by Mr. Pincus. This concentrated voting control limits the ability of our other stockholders to influence corporate matters and could adversely affect the market price of our Class A common stock.

Future transfers or sales by holders of Class B common stock or Class C common stock will result in those shares converting to Class A common stock, which will have the effect, over time, of increasing the relative voting power of those stockholders who retain their existing shares of Class B or Class C common stock. In addition, as shares of Class B common stock are transferred or sold and converted to Class A common stock, the sole holder of Class C common stock, Mark Pincus, will have greater relative voting control to the extent he retains his existing shares of Class C common stock, and as a result he could in the future control a majority of our total voting power. Mark Pincus is entitled to vote his shares in his own interests and may do so.

Certain provisions in our charter documents and under Delaware law could limit attempts by our stockholders to replace or remove our board of directors or current management and limit the market price of our Class A common stock.

Provisions in our certificate of incorporation and bylaws may have the effect of delaying or preventing changes in our board of directors or management. Our certificate of incorporation and bylaws include provisions that:

establish an advance notice procedure for stockholder proposals to be brought before an annual meeting, including proposed nominations of persons for election to our board of directors;

prohibit cumulative voting in the election of directors; and

reflect three classes of common stock, as discussed above.

These provisions may frustrate or prevent any attempts by our stockholders to replace or remove our current management by making it more difficult for stockholders to replace members of our board of directors, which is responsible for appointing the members of our management. In addition, because we are incorporated in Delaware, we are governed by the provisions of Section 203 of the Delaware General Corporation Law, which generally prohibits a Delaware corporation from engaging in any of a broad range of business combinations with any interested stockholder for a period of three years following the date on which the stockholder became an interested stockholder.

Our share price has been and will likely continue to be volatile.*

The trading price of our Class A common stock has been, and is likely to continue to be, highly volatile and could be subject to wide fluctuations in response to various factors, some of which are beyond our control. Since shares of our Class A common stock

Table of Contents

were sold in our initial public offering in December 2011 at a price of \$10.00 per share, through October 15, 2012, our stock price has ranged from \$2.21 to \$15.91. In addition to the factors discussed in these Risk Factors and elsewhere in this Quarterly Report on Form 10-Q, factors that may cause volatility in our share price include:

changes in projected operational and financial results;

issuance of new or updated research or reports by securities analysts;

market rumors or press reports;

announcements related to our stock repurchase program;

the use by investors or analysts of third-party data regarding our business that may not reflect our actual performance;

fluctuations in the valuation of companies perceived by investors to be comparable to us;

the activities, public announcements and financial performance of our commercial partners, such as Facebook;

fluctuations in the trading volume of our shares, or the size of our public float relative to the total number of shares of our Class A, Class B and Class C common stock that are issued and outstanding;

share price and volume fluctuations attributable to inconsistent trading volume levels of our shares; and

general economic and market conditions.

Furthermore, the stock markets have experienced extreme price and volume fluctuations that have affected and continue to affect the market prices of equity securities of many companies. These fluctuations often have been unrelated or disproportionate to the operating performance of those companies. These broad market and industry fluctuations, as well as general economic, political and market conditions such as recessions, interest rate changes or international currency fluctuations, may negatively impact the market price of our Class A common stock. In the past, companies that have experienced volatility in the market price of their stock have been subject to securities class action litigation. We may be the target of this type of litigation in the future. Securities litigation against us could result in substantial costs and divert our management's attention from other business concerns, which could harm our business.

In addition, in October 2012, we announced that our Board of Directors authorized us to repurchase up to \$200 million of our Class A common stock. The timing and amount of any share repurchases will be determined based on market conditions, share price and other factors. The program does not require us to repurchase any specific number of shares of our Class A common stock, and may be modified, suspended or terminated at any time without notice. The share repurchase program will be funded from existing cash on hand. Repurchases of our Class A common stock in the open market could result in increased volatility in our stock price.

Our Class A common stock price may be volatile due to third-party data regarding our games.

Third parties, such as AppData, publish daily data about us and other social game companies with respect to DAUs and MAUs and other information concerning social game usage, in particular on Facebook. These metrics can be volatile, particularly for specific games, and in many

cases do not accurately reflect the actual levels of usage of our games across all platforms and may not correlate to our bookings or revenue from the sale of virtual goods. There is a possibility that third parties could change their methodologies for calculating these metrics in the future. To the extent that securities analysts or investors base their views of our business or prospects on such third-party data, the price of our Class A common stock may be volatile and may not reflect the performance of our business.

If securities or industry analysts do not publish research about our business, or publish negative reports about our business, our share price and trading volume could decline.

The trading market for our Class A common stock, to some extent, depends on the research and reports that securities or industry analysts publish about our business. We do not have any control over these analysts. If one or more of the analysts who cover us downgrade our shares or lower their opinion of our shares, our share price would likely decline. If one or more of these analysts cease coverage of our company or fail to regularly publish reports on us, we could lose visibility in the financial markets, which could cause our share price or trading volume to decline.

Future sales or potential sales of our Class A common stock in the public market could cause our share price to decline.*

If the existing holders of our Class B common stock particularly our directors and officers, sell a large number of shares, they could adversely affect the market price for our Class A common stock. Sales of substantial amounts of our Class A common stock in the public market, or the perception that these sales could occur, could cause the market price of our Class A common stock to decline.

Table of Contents

If we are unable to implement and maintain effective internal control over financial reporting in the future, the accuracy and timeliness of our financial reporting may be adversely affected.

If we are unable to maintain adequate internal controls for financial reporting in the future, or if our auditors are unable to express an opinion as to the effectiveness of our internal controls as required pursuant to the Sarbanes-Oxley Act, investor confidence in the accuracy of our financial reports may be impacted or the market price of our Class A common stock could be negatively impacted.

The requirements of being a public company may strain our resources, divert management's attention and affect our ability to attract and retain qualified board members.

We are subject to the reporting requirements of the Securities Exchange Act of 1934, as amended, or the Exchange Act, the Sarbanes-Oxley Act, the Dodd-Frank Act, the listing requirements of the NASDAQ Global Select Market and other applicable securities rules and regulations. Compliance with these rules and regulations has increased and will continue to increase our legal and financial compliance costs, make some activities more difficult, time-consuming or costly and increase demand on our systems and resources. The Exchange Act requires, among other things, that we file annual, quarterly and current reports with respect to our business and operating results.

As a result of disclosure of information in this Quarterly Report on Form 10-Q and in our other public filings with the SEC as required of a public company, our business and financial condition have become more visible, which we believe may result in threatened or actual litigation, including by competitors and other third parties. If such claims are successful, our business and operating results could be harmed, and even if the claims do not result in litigation or are resolved in our favor, these claims, and the time and resources necessary to resolve them, could divert the resources of our management and harm our business and operating results.

We do not intend to pay dividends for the foreseeable future.

We have never declared or paid any cash dividends on our common stock and do not intend to pay any cash dividends in the foreseeable future. Any determination to pay dividends in the future will be at the discretion of our board of directors. Accordingly, investors must rely on sales of their Class A common stock after price appreciation, which may never occur, as the only way to realize any future gains on their investments.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Unregistered Sales of Equity Securities

In September 2012, we issued approximately 3.2 million shares of our Class A Common Stock to the two stockholders of A Bit Lucky, Inc., in exchange for all of the outstanding capital stock of A Bit Lucky, in connection with the acquisition of A Bit Lucky pursuant to the Agreement and Plan of Merger and Reorganization, dated as of September 17, 2012. This issuance was deemed to be exempt from the registration requirement of the Securities Act of 1933, as amended (the Securities Act), pursuant to Section 4(2) under the Securities Act as a transaction by an issuer not involving any public offering. The recipients of the unregistered securities were provided access to all material information, requested, and all information necessary to verify such information and were afforded access to our management in connection with the purchases. The recipients of the unregistered securities acquired such securities for investment and not with a view toward distribution, acknowledging such intent to us. All certificates or agreements representing such securities that were issued contained restrictive legends, prohibiting further transfer of the certificates or agreements representing such securities, without such securities either being first registered or otherwise exempt from registration in any further resale or disposition.

Use of Proceeds

On December 15, 2011, our registration statement on Form S-1 (File No. 333-175298) was declared effective for our initial public offering pursuant to which we sold 100,000,000 shares of Class A common stock at a public offering price of \$10.00 per share for an aggregate offering price of \$1.0 billion. Morgan Stanley & Co. LLC and Goldman, Sachs & Co. acted as joint book running managers and representatives of the underwriters for the offering, BofA Merrill Lynch, Barclays Capital Inc. and J.P. Morgan Securities LLC acted as additional joint book running managers, and Allen & Company LLC acted as senior co-manager for the offering.

As a result of our initial public offering, we received net proceeds of \$961.4 million, after deducting underwriting discounts and commissions and other offering expenses. None of the expenses associated with the initial public offering were paid to directors, officers or persons owning ten percent or more of our common stock or to their associates, or to our affiliates.

Table of Contents

We intend to use the net proceeds to us from the initial public offering for general corporate purposes, including working capital, game development, marketing activities and capital expenditures. In addition, we may use a portion of the proceeds from the initial public offering for acquisitions of or investments in complementary businesses, technologies or other assets. As of September 30, 2012, the net offering proceeds have been invested in money market funds, debt instruments of the U.S. government and its agencies and high credit quality corporate issuers. There has been no material change in the planned use of proceeds from our initial public offering as described in our final prospectus filed with the SEC pursuant to Rule 424(b) on December 16, 2011.

Issuer Purchases of Equity Securities

None.

ITEM 6. EXHIBITS

The exhibits listed in the Exhibit Index (following the signature pages of this Quarterly Report) are filed with, or incorporated by reference in, this Quarterly Report.
