Table of Contents**SBA COMMUNICATIONS CORPORATION AND SUBSIDIARIES****CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)****1. BASIS OF PRESENTATION**

The accompanying consolidated financial statements should be read in conjunction with the Annual Report on Form 10-K for the fiscal year ended December 31, 2012 for SBA Communications Corporation and its subsidiaries (the Company). These financial statements have been prepared in accordance with the instructions to Form 10-Q and Article 10 of Regulation S-X and, therefore, omit or condense certain footnotes and other information normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States. In the opinion of the Company's management, all adjustments (consisting of normal recurring accruals) considered necessary for fair financial statement presentation have been made. The results of operations for an interim period may not give an indication of the results for the year. Certain reclassifications have been made to prior year amounts or balances to conform to the presentation adopted in the current year.

The preparation of financial statements requires management to make estimates and assumptions that affect the amounts reported in consolidated financial statements and accompanying notes. While the Company believes that such estimates are reasonable when considered in conjunction with the consolidated financial statements and accompanying notes, the actual amount of such estimates, when known, will vary from these estimates.

2. FAIR VALUE MEASUREMENTS

Items Measured at Fair Value on a Recurring Basis The Company's earnouts related to acquisitions are measured at fair value on a recurring basis using Level 3 inputs. The Company determines the fair value of acquisition-related contingent consideration, and any subsequent changes in fair value, using a discounted probability-weighted approach using Level 3 inputs. The fair value of the earnouts is reviewed quarterly and is based on the payments the Company expects to make based on historical internal observations related to the anticipated performance of the underlying assets. The Company's estimate of the fair value of its obligation if the performance targets contained in various acquisition agreements were met was \$26.0 million and \$9.8 million as of September 30, 2013 and December 31, 2012, respectively, which the Company recorded in accrued expenses on its Consolidated Balance Sheets. The maximum potential obligation related to the performance targets was \$39.4 million as of September 30, 2013.

Items Measured at Fair Value on a Nonrecurring Basis The Company's long-lived assets, intangibles, and asset retirement obligations are measured at fair value on a nonrecurring basis using Level 3 inputs. Level 3 valuations rely on unobservable inputs for the asset or liability, and include situations where there is little, if any, market activity for the asset or liability. The Company considers many factors and makes certain assumptions when making this assessment, including but not limited to: general market and economic conditions, historical operating results, geographic location, lease-up potential and expected timing of lease-up. The fair value of the long-lived assets, intangibles, and asset retirement obligations is calculated using a discounted cash flow model. During the three and nine months ended September 30, 2013, the Company recognized an impairment charge of \$6.2 million and \$16.4 million, respectively, including the write off of the carrying value of decommissioned towers and other third party decommission costs, related to its long-lived assets and intangibles resulting from the Company's analysis that the future cash flows from certain tower sites would not recover the carrying value of the investment in those tower sites. During the three and nine months ended September 30, 2012, the Company recognized an impairment charge of \$1.6 million and \$2.6 million, respectively. Impairment charges for all periods presented and the related impaired assets

relate to the Company's site leasing operating segment.

Fair Value of Financial Instruments The carrying values of cash and cash equivalents, accounts receivable, restricted cash, accounts payable, and short-term investments approximate their related estimated fair values due to the short maturity of those instruments. Short-term investments consisted of \$4.7 million and \$5.3 million in certificate of deposits, as of September 30, 2013 and December 31, 2012, respectively. The Company's estimate of the fair value of its held-to-maturity investments in treasury and corporate bonds, including current portion, are based

Table of Contents**SBA COMMUNICATIONS CORPORATION AND SUBSIDIARIES****CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)**

primarily upon Level 1 reported market values. As of September 30, 2013, the carrying value and fair value of the held-to-maturity investments, including current portion, were \$1.1 million and \$1.3 million, respectively. As of December 31, 2012, the carrying value and fair value of the held-to-maturity investments, including current portion, was \$1.3 million and \$1.5 million, respectively.

The Company determines fair value of its debt instruments utilizing various Level 2 sources including quoted prices and indicative quotes (non-binding quotes) from brokers that require judgment to interpret market information including implied credit spreads for similar borrowings on recent trades or bid/ask prices. The fair value of the Revolving Credit Facility is considered to be equal to the carrying value because the interest payments are based on Eurodollar rates that reset every month. The Company does not believe its credit risk has changed materially from the date the applicable Eurodollar Rate plus 187.5 basis points was set for the Revolving Credit Facility. The following table reflects fair values, principal balances, and carrying values of the Company's debt instruments (see Note 9).

Pursuant to the terms of the Tower Securities (see Note 9), the Company is required to establish a securitization escrow account, held by the indenture trustee, into which all rents and other sums due on the towers that secure the Tower Securities are directly deposited by the lessees. These restricted cash amounts are used to fund reserve accounts for the payment of (1) debt service costs, (2) ground rents, real estate and personal property taxes, and insurance premiums related to tower sites, (3) trustee and servicing expenses, (4) management fees, and (5) to reserve a portion of advance rents received from tenants. The restricted cash in the controlled deposit account in excess of required reserve balances is subsequently released to the Borrowers (as defined in the Annual Report on Form 10-K) monthly, provided that the Borrowers are in compliance with their debt service coverage ratio and that no event of default has occurred. All monies held by the indenture trustee are classified as restricted cash on the Company's Consolidated Balance Sheets.

Payment and performance bonds relate primarily to collateral requirements for tower construction currently in process by the Company. Cash is pledged as collateral related to surety bonds issued for the benefit of the Company or its affiliates in the ordinary course of business and primarily related to the Company's tower removal obligations. As of September 30, 2013, the Company had \$39.2 million in surety, payment and performance bonds for which it was required to post \$7.8 million in collateral. As of December 31, 2012, the Company had \$35.1 million in surety, payment and performance bonds for which it was required to post \$10.5 million in collateral. The Company periodically evaluates the collateral posted for its bonds to ensure that it meets the minimum requirements. The Company also pledged \$2.3 million as collateral related to its workers' compensation policy as of September 30, 2013 and December 31, 2012.

During the third quarter of 2013, the Company acquired 279 completed towers and related assets and liabilities and the rights to manage 4 additional communication sites. These acquisitions were not significant to the Company and, accordingly, pro forma financial information has not been presented.

The following table summarizes the Company's cash acquisition capital expenditures:

Earnouts		708	1,311	5,751
Total acquisition capital expenditures	\$ 91,646	\$ 31,598	\$ 348,365	\$ 982,989

Total acquisition capital expenditures for the nine months ended September 30, 2013, included \$175.9 million related to an acquisition in Brazil which closed in the fourth quarter of 2012.

The Company recorded these amounts in prepaid rent on its Consolidated Balance Sheet.

The estimates of the fair value of the assets acquired and liabilities assumed at the date of an acquisition are subject to adjustment during the measurement period (up to one year from the particular acquisition date). The primary areas of the preliminary purchase price allocations that are not yet finalized relate to the fair value of certain tangible and intangible assets acquired and liabilities assumed, including contingent consideration and any related tax impact. The fair values of these net assets acquired are based on management's estimates and assumptions, as well as other information compiled by management, including valuations that utilize customary valuation procedures and techniques. During the measurement period, the Company will adjust assets and/or liabilities if new information is obtained about facts and circumstances that existed as of the acquisition date that, if known, would have resulted in a revised estimated value of those assets and/or liabilities as of that date. The effect of material measurement period adjustments to the estimated fair values is reflected as if the adjustments had been completed on the acquisition date. The impact of all changes that do not qualify as measurement period adjustments are included in current period earnings. If the actual results differ from the estimates and judgments used in these fair values, the amounts recorded in the consolidated financial statements could be subject to a possible impairment of the intangible assets, or require

acceleration of the amortization expense of intangible assets in subsequent periods.

During the second quarter of 2013, the Company identified a purchase price allocation adjustment related to an acquisition that occurred in the fourth quarter of the prior year, and accordingly, has recorded an adjustment to reclassify \$54.1 million from Property and Equipment to Intangible Assets. The effect of this entry was not material to the Company's Statement of Operations and Consolidated Balance Sheet for the periods presented, and as such, has only been reflected in the Consolidated Statement of Operations and Consolidated Balance Sheet as of and for the nine months ended September 30, 2013.

Revolving Credit Facility under the Senior Credit Agreement

The Revolving Credit Facility is governed by the Senior Credit Agreement. As of September 30, 2013, the Revolving Credit Facility consists of a revolving loan under which up to \$770.0 million aggregate principal amount may be borrowed, repaid and redrawn, subject to compliance with specific financial ratios and the satisfaction of other customary conditions to borrowing. Amounts borrowed under the Revolving Credit Facility accrue interest at the Eurodollar Rate plus a margin that ranges from 187.5 basis points to 237.5 basis points or at a Base Rate plus a margin that ranges from 87.5 basis points to 137.5 basis points, in each case based on the ratio of Consolidated Total Debt to Annualized Borrower EBITDA, calculated in accordance with the Senior Credit Agreement. If not earlier terminated by SBA Senior Finance II, the Revolving Credit Facility will terminate on, and SBA Senior Finance II will repay all amounts outstanding on or before, May 9, 2017. The proceeds available under the Revolving Credit Facility may be used for general corporate purposes. A per annum commitment fee of 0.375% to 0.5% of the unused commitments under the Revolving Credit Facility is charged based on the ratio of Consolidated Total Debt to Annualized Borrower EBITDA (calculated in accordance with the Senior Credit Agreement). SBA Senior Finance II may, from time to time, borrow from and repay the Revolving Credit Facility. Consequently, the amount outstanding under the Revolving Credit Facility at the end of a period may not be reflective of the total amounts outstanding during such period.

On August 27, 2013, SBA Senior Finance II entered into a Sixth Amendment to the Senior Credit Agreement with the lenders parties thereto and the Administrative Agent. The Sixth Amendment

amended the Senior Credit Agreement to, among other things, (i) increase the existing Consolidated Total Debt to Annualized Borrower EBITDA ratio maintenance covenant from 6.0x to 6.5x and (ii) proportionately adjust various leverage-based covenants, including mandatory repayments and restrictions on acquired indebtedness, general disposition of assets, restricted payments, and general investments.

In addition, the Sixth Amendment modified the incremental capacity of the Revolving Credit Facility and Term Loan Facility from a fixed cap to an incurrence-based availability test which permits SBA Senior Finance II to request that one or more lenders provide (i) additional commitments under the Revolving Credit Facility and (ii) additional term loans, in each case without requesting the consent of the other lenders provided that after giving effect to the proposed increase in Revolving Credit Facility commitments or incremental term loans the ratio of Consolidated Total Debt to Annualized Borrower EBITDA would not exceed 6.5x. In addition, the amendment modified the percentage of allowable annualized borrower EBITDA for foreign subsidiaries from 10.0% to 35.0%.

As of September 30, 2013, there was no amount outstanding under the Revolving Credit Facility and the availability under the Revolving Credit Facility was \$770.0 million, subject to compliance with specified financial ratios and satisfaction of other customary conditions to borrowing.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

We are a leading independent owner and operator of wireless communications towers. Our principal operations are in the United States and its territories. In addition, we own and operate towers in Canada, Central America, and South America. Our primary business line is our site leasing business, which contributed approximately 95.9% of our total segment operating profit for the year-to-date period ended September 30, 2013. In our site leasing business, we lease antenna space to wireless service providers on towers and other structures that we own, manage, or lease from others. The towers that we own have been constructed by us at the request of a wireless service provider, constructed based on our own initiative or acquired. As of September 30, 2013, we owned 17,889 tower sites, the majority of which have been built by us or built by other tower owners or operators who, like us, have built such towers to lease space to multiple wireless service providers. We also managed or leased approximately 4,800 communications sites, approximately 500 of which were revenue producing as of September 30, 2013. Our other business line is our site development business, through which we assist wireless service providers in developing and maintaining their own wireless service networks.

Site Leasing Services

Our primary focus is the leasing of antenna space on our multi-tenant towers to a variety of wireless service providers under long-term lease contracts in the United States, Canada, Central America, and South America. Site leasing revenues are received primarily from wireless service provider tenants, including AT&T, Sprint, Verizon, T-Mobile, Digicel, Claro, and Telefonica. Wireless service providers enter into different tenant leases with us, each of which relates to the lease or use of space at an individual tower site. In the United States and Canada our tenant leases are generally for an initial term of five to ten years with five 5-year renewal periods at the option of the tenant. These tenant leases typically contain specific rent escalators, which average 3-4% per year, including the renewal option periods. Tenant leases in our Central and South America markets typically have an initial term of 10 years with 5-year renewal periods. In Central America, we have similar rent escalators to that of leases in the United States and Canada while our leases in South America typically escalate in accordance with a standard cost of living index.

Cost of site leasing revenue primarily consists of:

Rental payments on ground and other underlying property leases;

Straight-line rent adjustment for the difference between rental payments made and the expense recorded as if the payments had been made evenly throughout the minimum lease term (which typically include renewal terms) of the underlying property leases;

Property taxes;

Site maintenance and monitoring costs (exclusive of employee related costs);

Utilities;

Property insurance; and

Deferred lease origination cost amortization.

Ground leases are generally for an initial term of five years or more with multiple renewal terms of five year periods at our option and provide for rent escalators which typically average 2-3% annually. Of the 17,889 tower sites we owned as of September 30, 2013, approximately 71% were located on parcels of land that we own, land subject to

Table of Contents

perpetual easements, or parcels of land in which we have a leasehold interest that extends beyond 20 years. For any given tower, costs are relatively fixed over a monthly or an annual time period. As such, operating costs for owned towers do not generally increase as a result of adding additional customers to the tower. The amount of direct costs associated with operating a tower varies from site to site depending on the taxing jurisdiction and the height and age of the tower. The ongoing maintenance requirements are typically minimal and include replacing lighting systems, painting a tower or upgrading or repairing an access road or fencing.

As indicated in the table below, our site leasing business generates approximately 95.9% of our total segment operating profit. For information regarding our operating segments, please see Note 14 of our Condensed Notes to Consolidated Financial Statements included in this quarterly report.

- ⁽¹⁾ Site leasing segment operating profit and total segment operating profit are non-GAAP financial measures. We reconcile these measures and other Regulation G disclosures in this quarterly report in the section entitled Non-GAAP Financial Measures.

We believe that over the long-term, site leasing revenues will continue to grow as wireless service providers lease additional antenna space on our towers due to increasing minutes of network use and data transfer, network expansion and network coverage requirements. We believe our site leasing business is characterized by stable and long-term recurring revenues, predictable operating costs and minimal non-discretionary capital expenditures. Due to the relatively young age and mix of our tower portfolio, we expect future expenditures required to maintain these towers to be minimal. Consequently, we expect to grow our cash flows by (1) adding tenants to our towers at minimal incremental costs by using existing tower capacity or requiring wireless service providers to bear all or a portion of the cost of tower modifications and (2) executing monetary amendments as wireless service providers upgrade their equipment. Furthermore, because our towers are strategically positioned and our customers typically do not relocate,

we have historically experienced low tenant lease terminations as a percentage of revenue.

Site Development Services

Our site development business, which we conduct in the United States only, is complementary to our site leasing business and provides us the ability to keep in close contact with the wireless service providers who generate substantially all of our site leasing revenue and to capture ancillary revenues that are generated by our site leasing activities, such as antenna and equipment installation at our tower locations. Site development services revenues are

Table of Contents

earned primarily from providing a full range of end to end services to wireless service providers or companies providing development or project management services to wireless service providers. Our services include: (1) network pre-design; (2) site audits; (3) identification of potential locations for towers and antennas; (4) support in buying or leasing of the location; (5) assistance in obtaining zoning approvals and permits; (6) tower and related site construction; (7) antenna installation; and (8) radio equipment installation, commissioning, and maintenance.

For information regarding our operating segments, see Note 14 of our Condensed Notes to Consolidated Financial Statements included in this quarterly report.

International Operations

As of September 30, 2013, we had operations in Canada, Costa Rica, El Salvador, Guatemala, Nicaragua, Panama, and Brazil. Our operations in these countries are solely in the site leasing business, and we expect to expand operations through new builds and acquisitions. Tenant leases in the Canadian market typically have similar terms and conditions as those in the United States, with an initial term of five years, and specific rent escalators. Tenant leases in Central America and Brazil typically have a ten year initial term. Tenant leases in Central America typically have similar renewal terms and rent escalators as those in the United States and Canada while those in Brazil are based on a standard cost of living index.

In our Central American markets, significantly all of our revenue, expenses, and capital expenditures arising from our new build activities are denominated in U.S. dollars. Specifically, most of our ground leases, tenant leases, and tower related expenses are due and paid in U.S. dollars. In our Central American markets, our local currency obligations are principally limited to (1) permitting and other local fees, (2) utilities, and (3) taxes. In our Canadian and Brazilian operations, significantly all of our revenue, expenses and capital expenditures, including tenant leases, ground leases and other tower-related expenses, are denominated in local currency.

CRITICAL ACCOUNTING POLICIES

We have identified the policies and significant estimation processes listed in the Annual Report on Form 10-K as critical to our business operations and the understanding of our results of operations. The listing is not intended to be a comprehensive list. In many cases, the accounting treatment of a particular transaction is specifically dictated by accounting principles generally accepted in the United States, with no need for management's judgment in their application. In other cases, management is required to exercise judgment in the application of accounting principles with respect to particular transactions. The impact and any associated risks related to these policies on our business operations is discussed throughout Management's Discussion and Analysis of Financial Condition and Results of Operations where such policies affect reported and expected financial results. For a detailed discussion on the application of these and other accounting policies, see Note 2 of our Consolidated Financial Statements contained in our Annual Report on Form 10-K for the year ended December 31, 2012. Our preparation of our financial statements requires us to make estimates and assumptions that affect the reported amount of assets and liabilities, disclosure of contingent assets and liabilities at the date of our financial statements, and the reported amounts of revenue and expenses during the reporting periods. Management bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. There can be no assurance that actual results will not differ from those estimates and such differences could be significant.

Table of Contents**KEY PERFORMANCE INDICATORS****Non-GAAP Financial Measures**

This report contains certain non-GAAP measures, including Segment operating profit and Adjusted EBITDA information. We have provided below a description and reconciliation of such non-GAAP measures to their most directly comparable GAAP measures, and an explanation as to why management utilizes these measures.

Segment Operating Profit:

We believe that Segment operating profit is an indicator of the operating performance of our site leasing and site development segments and is used to provide management with the ability to monitor the operating results and margin of each segment, while excluding the impact of depreciation, accretion and amortization, which is largely fixed and non-cash in nature. Segment operating profit is not intended to be an alternative measure of revenue or segment gross profit as determined in accordance with GAAP.

Segment operating profit	\$ 9,358	\$ 4,716	\$ 4,642	\$ 25,194	\$ 11,617	\$ 13,577

Site leasing segment operating profit increased \$57.2 million for the three months ended September 30, 2013, as compared to the same period in the prior year, primarily due to additional profit generated by (1) 4,532 towers acquired and 418 towers built since July 1, 2012 which include towers acquired in the fourth quarter of 2012 related to TowerCo and Vivo, (2) organic site leasing growth from new leases, (3) contractual rent escalators, and (4) lease

amendments with current tenants which increased the related rent as a result of additional equipment added to our towers.

Site leasing segment operating profit increased \$178.0 million for the nine months ended September 30, 2013, as compared to the same period in the prior year, primarily due to additional profit generated by (1) 6,991 towers acquired and 571 towers built since January 1, 2012 which include towers acquired in the Mobilitie, TowerCo, and Vivo acquisitions, (2) organic site leasing growth from new leases, (3) contractual rent escalators, and (4) lease amendments with current tenants which increased the related rent as a result of additional equipment added to our towers.

Table of Contents

The increase in site development segment operating profit of \$4.6 and \$13.6 million for the three and nine months ended September 30, 2013, respectively, is primarily due to the higher volume of work performed compared to the prior year associated with the deployment of next generation networks by wireless carriers, in particular, the Sprint Network Vision initiative.

Adjusted EBITDA:

We define Adjusted EBITDA as net income (loss) excluding the impact of net interest expenses, provision for taxes, depreciation, accretion, and amortization, asset impairment and decommission costs, non-cash compensation, net loss from extinguishment of debt, other income and expenses, acquisition related expenses, non-cash straight-line leasing revenue, and non-cash straight-line ground lease expense.

We believe that Adjusted EBITDA is an indicator of the financial performance of our core businesses. Adjusted EBITDA is a component of the calculation that has been used by our lenders to determine compliance with certain covenants under our Senior Credit Agreement, 8.25% Notes, 5.625% Notes, and 5.75% Notes. Adjusted EBITDA is not intended to be an alternative measure of operating income or gross profit margin as determined in accordance with GAAP.

The reconciliation of Adjusted EBITDA is as follows:

Adjusted EBITDA increased \$57.1 million and \$176.9 million for the three and nine months ended September 30, 2013, respectively compared to the same period in the prior year, primarily due to increased segment operating profit from our site leasing and site development segments partially offset by an increase in selling, general and administrative costs.

Revenues:

Site leasing revenues increased \$78.7 million for the three months ended September 30, 2013, as compared to the same period in the prior year, due largely to (i) revenues from 4,532 towers acquired and 418 towers built since July 1, 2012 which include the towers acquired in the fourth quarter of 2012 related to TowerCo and Vivo, and (ii) organic site leasing growth from new leases, contractual rent escalators and lease amendments which increased the related rent as a result of additional equipment added to our towers.

Site development revenues increased \$14.8 million for the three months ended September 30, 2013, as compared to the same period in the prior year, as a result of a higher volume of work performed during the quarter as compared to the same period last year associated with the deployment of next generation networks by wireless carriers, in particular, Sprint's Network Vision initiative.

Table of Contents

Operating Expenses:

Site leasing cost of revenues increased \$21.4 million for the three months ended September 30, 2013, as compared to the same period in the prior year, largely as a result of the growth in the number of tower sites owned by us, primarily driven from the TowerCo and Vivo towers acquired during the fourth quarter of 2012, partially offset by the positive impact of our ground lease purchase program.

Site development cost of revenues increased \$10.2 million for the three months ended September 30, 2013, as compared to the same period in the prior year, as a result of a higher volume of work associated with the deployment of next generation networks by wireless carriers.

Selling, general, and administrative expenses increased \$4.3 million for the three months ended September 30, 2013, as compared to the same period in the prior year, primarily as a result of an increase in personnel, salaries, benefits, non-cash compensation, and other expenses due in large part to our continued portfolio expansion.

Asset impairment and decommission costs increased \$4.6 million for the three months ended September 30, 2013, as compared to the same period in the prior year, primarily as a result of the write-off of assets and related costs associated with the decommissioning of 50 towers during the three months ended September 30, 2013.

Acquisition related expenses decreased \$2.1 million for the three months ended September 30, 2013, as compared to the same period in the prior year, primarily as a result of a decrease in acquisition activity as compared to the three months ended September 30, 2012.

Depreciation, accretion, and amortization expense increased \$32.3 million for the three months ended September 30, 2013, as compared to the same period in the prior year, due to an increase in the number of tower sites built and acquired by us, primarily driven by the TowerCo and Vivo towers acquired during the fourth quarter of 2012.

Operating Income:

Operating income increased \$22.8 million for the three months ended September 30, 2013 from the three months ended September 30, 2012, primarily due to higher segment operating profit in both the site leasing and site development segments and a reduction in acquisition related expenses partially offset by increases in asset impairment and decommission costs, depreciation, accretion, and amortization expense, and selling, general, and administrative expenses.

Other Income (Expense):

Interest expense increased \$12.4 million due to the higher weighted average principal amount of cash-interest bearing debt outstanding for the three months ended September 30, 2013 compared to the three months ended September 30, 2012, primarily resulting from the issuance of the 2012-2 Term Loan, 2012-1 Tower Securities, 2013 Tower Securities, 5.75% Notes, and 5.625% Notes. These increases were partially offset by the maturity of the 1.875% Notes, full repayment of the Mobilite Bridge Loan and the 8.0% Senior Notes, as well as, partial prepayments on the 2011 Term Loan, and 2012-2 Term Loan.

Other income increased \$33.9 million primarily due to a \$27.3 million gain on the sale of a bankruptcy claim in the third quarter of 2013 and a \$6.9 million unrealized gain on a foreign currency swap contract in the third quarter of 2013.

Table of Contents

Non-cash interest expense decreased \$8.2 million for the three months ended September 30, 2013, compared to the same period in the prior year. This decrease primarily reflects the full repayment of the 1.875% Notes.

Loss from Extinguishment of Debt

Loss from extinguishment of debt decreased \$22.6 million for the three months ended September 30, 2013, compared to the same period in the prior year primarily due to the premium paid on the full redemption of the 8.0% Senior Notes during the third quarter of 2012 and the write off of the related debt discount and deferred financing fees.

Net Income (Loss)

Net loss decreased \$74.0 million for the three months ended September 30, 2013 compared to the same period in the prior year, primarily due to an increase in other income, an increase in our site leasing and site development segments operating profit, net as well as decreases in acquisition related expenses, loss from extinguishment of debt, and non-cash interest expense as compared to the same period in the prior year. These items were partially offset by increases in selling, general, and administrative expenses, asset impairment and decommission costs, depreciation, amortization, and accretion, and interest expense.

Revenues:

Site leasing revenues increased \$255.2 million for the nine months ended September 30, 2013, as compared to the same period in the prior year, due largely to (i) revenues from 6,991 towers acquired and 571 towers built since January 1, 2012 which includes the Mobilitie towers acquired in the second quarter of 2012, the TowerCo towers acquired in the fourth quarter of 2012, and the Vivo towers acquired in Brazil during the fourth quarter of 2012 and (ii) organic site leasing growth from new leases, contractual rent escalators and lease amendments which increased the related rent to reflect additional equipment added to our towers.

Site development revenues increased \$54.1 million for the nine months ended September 30, 2013, as compared to the same period in the prior year, as a result of a higher volume of work performed during the period as compared to the same period last year associated with the deployment of next generation networks by wireless carriers, in particular, Sprint's Network Vision initiative.

Table of Contents

Operating Expenses:

Site leasing cost of revenues increased \$77.1 million for the nine months ended September 30, 2013, as compared to the same period in the prior year, primarily as a result of the growth in the number of tower sites owned by us, including the Mobilitie, TowerCo, and Vivo towers acquired during 2012, partially offset by the positive impact of our ground lease purchase program.

Site development cost of revenues increased \$40.5 million for the nine months ended September 30, 2013, as compared to the same period in the prior year, as a result of a higher volume of work associated with the deployment of next generation networks by wireless carriers.

Selling, general, and administrative expenses increased \$11.2 million for the nine months ended September 30, 2013, as compared to the same period in the prior year, primarily as a result of an increase in personnel, salaries, benefits, non-cash compensation, and other expenses due in large part to our continued portfolio expansion.

Asset impairment and decommission costs increased \$13.9 million for the nine months ended September 30, 2013, as compared to the same period in the prior year, primarily as a result of the write-off of assets and related costs associated with the decommissioning of 181 towers during the nine months ended September 30, 2013.

Acquisition related expenses decreased \$10.5 million for the nine months ended September 30, 2013, as compared to the same period in the prior year, primarily as a result of a decrease in acquisition activity compared to 2012 when we acquired Mobilitie.

Depreciation, accretion, and amortization expense increased \$122.9 million for the nine months ended September 30, 2013, as compared to the same period in the prior year, due to an increase in the number of tower sites built and acquired by us, including the Mobilitie, TowerCo, and Vivo towers acquired during 2012.

Operating Income:

Operating income increased \$54.1 million for the nine months ended September 30, 2013 from the nine months ended September 30, 2012, primarily due to higher segment operating profit in both the site leasing and site development segments as well as a reduction in acquisition related expenses partially offset by increases in asset impairment and decommission costs, depreciation, accretion, and amortization expense, and selling, general, and administrative expenses.

Other Income (Expense):

Interest expense increased \$48.8 million due to the higher weighted average principal amount of cash-interest bearing debt outstanding for the three months ended September 30, 2013 compared to the nine months ended September 30, 2012, primarily resulting from the issuance of the 2012-1 and 2012-2 Term Loans, 2012-1 Tower Securities, 2013 Tower Securities, 5.75% Notes, and 5.625% Notes. These increases were partially offset by the maturity of the 1.875% Notes, the full repayment of the Mobilitie Bridge Loan and the 8.0% Senior Notes, as well as partial prepayments of the 2011 Term Loan, 2012-2 Term Loan, and 8.25% Senior Notes.

Other income increased \$29.6 million primarily due to a \$27.3 million gain on the sale of a bankruptcy claim against Lehman Brothers in the third quarter of 2013 and a \$6.9 million unrealized gain on a foreign currency swap contract in the third quarter of 2013, partially offset by a \$4.6 million gain on partial settlement of a bankruptcy claim received during the nine months ended September 30, 2012.

Table of Contents

Non-cash interest expense decreased \$13.1 million from the nine months ended September 30, 2013, compared to the same period in the prior year. This decrease primarily reflects the full repayment of the 1.875% Notes.

Amortization of deferred financing fees increased \$2.2 million for the nine months ended September 30, 2013 compared to the same period in the prior year, primarily resulting from the issuance of the 2012-1 Term Loan, 2012-2 Term Loan, 2012-1 Tower Securities, 2013 Tower Securities, 5.75% Notes, and 5.625% Notes. These increases were offset by the full redemption of the 8.0% Notes, the partial redemption of the 8.25% Notes, and the settlement of the 1.875% Notes.

Loss from Extinguishment of Debt

Loss from extinguishment of debt decreased \$44.0 million for the nine months ended September 30, 2013, compared to the same period in the prior year primarily due to the premium paid on the 8.0% and 8.25% Senior Notes during the second and third quarters of 2012 and the write off of the related debt discount and deferred financing fees as compared to the write off of debt discounts and deferred financing fees associated with the partial repayment of the 2011 and 2012-2 Term Loans.

Net Loss

Net loss decreased \$92.1 million for the nine months ended September 30, 2013 compared to the same period in the prior year, primarily due to an increase in other income, an increase in our site leasing and site development segments operating profit, net as well as decreases in acquisition related expenses, loss from extinguishment of debt, and non-cash interest expense as compared to the same period in the prior year. These items were partially offset by increases in selling, general, and administrative expenses, asset impairment and decommission costs, depreciation, amortization, and accretion, and interest expense.

Table of Contents**LIQUIDITY AND CAPITAL RESOURCES**

SBA Communications Corporation is a holding company with no business operations of its own. SBA Communications' only significant asset is the outstanding capital stock of SBA Telecommunications, LLC (formerly known as SBA Telecommunications, Inc.) (Telecommunications), which is also a holding company that owns equity interests in entities that directly or indirectly own all of our domestic and international towers and assets. We conduct all of our business operations through Telecommunications' subsidiaries. Accordingly, our only source of cash to pay our obligations, other than financings, is distributions with respect to our ownership interest in our subsidiaries from the net earnings and cash flow generated by these subsidiaries.

We believe that our principal use of liquidity will be to fund tower portfolio growth and, secondarily, to fund our stock repurchase program. In the future, we may repurchase, for cash or equity, our outstanding indebtedness in privately-negotiated or open market transactions in order to optimize our liquidity and leverage and take advantage of market opportunities. If we undertake debt repurchases or exchanges, these actions could materially impact the amount and composition of indebtedness outstanding or dilute our existing shareholders.

We fund our growth, including our tower portfolio growth, through cash flows from operations, long-term indebtedness and equity issuances. We have issued secured and unsecured debt instruments at various levels of our organizational structure to minimize our financing costs while maximizing our operational flexibility.

A summary of our cash flows is as follows:

Operating Activities

Cash provided by operating activities was \$343.0 million for the nine months ended September 30, 2013 as compared to \$237.5 million for the nine months ended September 30, 2012. This increase was primarily due to an increase in segment operating profit from the site leasing and site development operating segments partially offset by increased selling, general, and administrative expenses, as well as, increased cash interest payments relating to the higher average amount of cash-interest bearing debt outstanding for the nine months ended September 30, 2013 compared to

the nine months ended September 30, 2012.

(2) Excludes \$7.6 and \$4.7 million spent to extend ground lease terms for the nine months ended September 30, 2013 and 2012.

Subsequent to September 30, 2013, we acquired 10 towers and related assets and liabilities for an aggregate consideration of \$11.6 million in cash.

During the remainder of 2013, we expect to incur non-discretionary cash capital expenditures associated with tower maintenance and general corporate expenditures of \$3.8 million to \$4.8 million and discretionary cash capital expenditures, based on current obligations, of \$423.0 million to \$443.0 million primarily associated with new tower construction, additional tower acquisitions, tower augmentations, and ground lease purchases. We expect to fund these additional cash capital expenditures from cash on hand, cash flow from operations, and borrowings under the Revolving Credit Facility. The exact amount of our future cash capital expenditures will depend on a number of factors including amounts necessary to support our tower portfolio, our new tower build and tower acquisition programs, and our ground lease purchase program.

We have on file with the Commission a shelf registration statement on Form S-4 registering shares of Class A common stock that we may issue in connection with the acquisition of wireless communication towers or antenna sites and related assets or companies who own wireless communication towers, antenna sites, or related assets. During the three months ended September 30, 2013, we did not issue any shares of Class A common stock under this registration statement. As of September 30, 2013, we had approximately 1.7 million shares of Class A common stock remaining under this shelf registration statement.

On February 27, 2012, we filed with the Commission an automatic shelf registration statement for well-known seasoned issuers on Form S-3ASR. This registration statement enables us to issue shares of our Class A common stock, preferred stock, or debt securities either separately or represented by warrants, or depositary shares as well as units that include any of these securities. Under the rules governing automatic shelf registration statements, we will file a prospectus supplement and advise the Commission of the amount and type of securities each time we issue securities under this registration statement. Debt Instruments and Debt Service Requirements

Revolving Credit Facility under the Senior Credit Agreement

The Revolving Credit Facility is governed by the Senior Credit Agreement. As of September 30, 2013, the Revolving Credit Facility consists of a revolving loan under which up to \$770.0 million aggregate principal amount may be borrowed, repaid and redrawn, subject to compliance with specific financial ratios and the satisfaction of other customary conditions to borrowing. Amounts borrowed under the Revolving Credit Facility accrue interest at the Eurodollar Rate plus a margin that ranges from 187.5 basis points to 237.5 basis points or at a Base Rate plus a margin

that ranges from 87.5 basis points to 137.5 basis points, in each case based on the ratio of Consolidated Total

Table of Contents

Debt to Annualized Borrower EBITDA, calculated in accordance with the Senior Credit Agreement. If not earlier terminated by SBA Senior Finance II, the Revolving Credit Facility will terminate on, and SBA Senior Finance II will repay all amounts outstanding on or before, May 9, 2017. The proceeds available under the Revolving Credit Facility may be used for general corporate purposes. A per annum commitment fee of 0.375% to 0.5% of the unused commitments under the Revolving Credit Facility is charged based on the ratio of Consolidated Total Debt to Annualized Borrower EBITDA (calculated in accordance with the Senior Credit Agreement). SBA Senior Finance II may, from time to time, borrow from and repay the Revolving Credit Facility. Consequently, the amount outstanding under the Revolving Credit Facility at the end of a period may not be reflective of the total amounts outstanding during such period.

On August 27, 2013, SBA Senior Finance II entered into a Sixth Amendment, to the Senior Credit Agreement with the lenders parties thereto and the Administrative Agent. The Sixth Amendment amended the Senior Credit Agreement to, among other things, (i) increase the existing Consolidated Total Debt to Annualized Borrower EBITDA ratio maintenance covenant from 6.0x to 6.5x and (ii) proportionately adjust various leverage-based covenants, including mandatory repayments and restrictions on acquired indebtedness, general disposition of assets, restricted payments, and general investments.

In addition, the Sixth Amendment modified the incremental capacity of the Revolving Credit Facility and Term Loan Facility from a fixed cap to an incurrence-based availability test which permits SBA Senior Finance II to request that one or more lenders provide (i) additional commitments under the Revolving Credit Facility and (ii) additional term loans, in each case without requesting the consent of the other lenders provided that after giving effect to the proposed increase in Revolving Credit Facility commitments or incremental term loans the ratio of Consolidated Total Debt to Annualized Borrower EBITDA would not exceed 6.5x. In addition, the amendment modified the percentage of allowable annualized borrower EBITDA for foreign subsidiaries from 10.0% to 35.0%.

As of September 30, 2013, there was no amount outstanding under the Revolving Credit Facility and the availability under the Revolving Credit Facility was \$770.0 million, subject to compliance with specified financial ratios and satisfaction of other customary conditions to borrowing.

The 4.0% Notes are convertible, at the holder's option, into shares of our Class A common stock, at an initial conversion rate of 32.9164 shares of our Class A common stock per \$1,000 principal amount of 4.0% Notes (subject to certain customary adjustments), which is equivalent to an initial conversion price of approximately \$30.38 per share or a 22.5% conversion premium based on the last reported sale price of \$24.80 per share of our Class A common stock on the Nasdaq Global Select Market on April 20, 2009, the purchase agreement date.

Concurrently with the pricing of the 4.0% Notes, we entered into convertible note hedge and warrant transactions with affiliates of certain of the initial purchasers of the convertible notes. The initial strike price of the convertible note hedge transactions relating to the 4.0% Notes is \$30.38 per share of our Class A common stock (the same as the initial conversion price of the 4.0% Notes) and the upper strike price of the warrant transactions is \$44.64 per share.

We are amortizing the debt discount on the 4.0% Notes utilizing the effective interest method over the life of the 4.0% Notes which increases the effective interest rate of the 4.0% Notes from its coupon rate of 4.0% to 12.9%. As of September 30, 2013 and December 31, 2012, the carrying amount of the equity component related to the 4.0% Notes was \$169.0 million.

Table of Contents

The 4.0 % Notes are reflected in long-term debt in our Consolidated Balance Sheets at their carrying value. The following table summarizes the balances for the 4.0% Notes:

	As of September 30, 2013	As of December 31, 2012
	(in thousands)	
Principal balance	\$ 499,947	\$ 499,987
Debt discount	(41,412)	(69,236)
Carrying value	\$ 458,535	\$ 430,751

The 4.0% Notes are convertible only under the following circumstances:

during any calendar quarter, if the last reported sale price of our Class A common stock for at least 20 trading days in the 30 consecutive trading day period ending on the last trading day of the preceding calendar quarter is more than 130% of the applicable conversion price per share of Class A common stock on the last day of such preceding calendar quarter,

during the five business day period after any ten consecutive trading day period in which the trading price per \$1,000 principal amount of the 4.0% Notes for each day in the measurement period was less than 95% of the product of the last reported sale price of Class A common stock and the applicable conversion rate,

if specified distributions to holders of Class A common stock are made or specified corporate transactions occur, and

at any time on or after July 22, 2014.

Upon conversion, we have the right to settle our conversion obligation in cash, shares of Class A common stock or a combination of cash and shares of our Class A common stock. From time to time, upon notice to the holders of the 4.0% Notes, we may change our election regarding the form of consideration that we will use to settle our conversion obligation; provided, however, that we are not permitted to change our settlement election after July 21, 2014 for the 4.0% Notes. At the time of the issuance of the 4.0% Notes, we elected to settle our conversion obligations in stock. As of September 30, 2013, we have not changed our election.

During the three and nine months ended September 30, 2013, the 4.0% Notes were convertible based on the fact that our Class A common stock closing price per share exceeded \$39.49 for at least 20 trading days during the 30 consecutive trading day period during the last month of the prior quarter. As a result of conversions exercised by holders pursuant to the terms of the indenture, during the nine months ended September 30, 2013, we converted \$40,000 in principal amount of 4.0% Notes and settled our conversion obligation through the issuance of 1,307 shares of our Class A common stock. In connection with these conversions, the related convertible note hedges and a portion of the common stock warrants were settled. As a result, we received a net 593 shares of our Class A common stock. In

addition, we have received conversion notices totaling \$3,000 in principal amount of the 4.0% Notes during the third quarter of 2013, which will settle during the fourth quarter of 2013 in shares of our Class A common stock and cash for fractional shares.

Our current primary market risk exposure is interest rate risk relating to (1) our ability to meet financial covenants and (2) the impact of interest rate movements on our 2011 Term Loan, 2012-1 Term Loan, 2012-2 Term Loan, and any borrowings that we may incur under our Revolving Credit Facility, which are at floating rates. We manage the interest rate risk on our outstanding debt through our large percentage of fixed rate debt. While we cannot predict our ability to refinance existing debt or the impact interest rate movements will have on our existing debt, we continue to evaluate our financial position on an ongoing basis. In addition, in connection with our convertible notes, we are subject to market risk associated with the market price of our common stock.

These statements concern expectations, beliefs, projections, plans and strategies, anticipated events or trends and similar expressions concerning matters that are not historical facts. Specifically, this quarterly report contains forward-looking statements regarding:

our expectations on the future growth and financial health of the wireless industry and the industry participants, and the drivers of such growth;

our beliefs regarding our ability to capture and capitalize on industry growth and the impact of such growth on our financial and operational results;

our expectations regarding the opportunities in the international wireless markets in which we currently operate or have targeted for growth, our beliefs regarding how we can capitalize on such opportunities, and our intent to continue expanding internationally through new builds and acquisitions;

our belief that over the long-term, site leasing revenues will continue to grow as wireless service providers lease additional antenna space on our towers due to increasing minutes of network use and data transfer, network expansion and network coverage requirements;

our belief that our site leasing business is characterized by stable and long-term recurring revenues, predictable operating costs and minimal non-discretionary capital expenditures;

our expectation that, due to the relatively young age and mix of our tower portfolio, future expenditures required to maintain these towers will be minimal;

our expectation that we will grow our cash flows by adding tenants to our towers at minimal incremental costs and executing monetary amendments;

our intent to grow our tower portfolio, domestically and internationally;

our expectation that we will continue our ground lease purchase program and the estimates of the impact of such program on our financial results;

our expectation that we will continue to incur losses;

our expectations regarding our future cash capital expenditures, both discretionary and non-discretionary, including expenditures required to maintain, improve and modify our towers, ground lease purchases and general corporate expenditures, and the source of funds for these expenditures;

our intended use of our liquidity;

our expectations regarding our annual debt service in 2013 and thereafter, and our belief that our cash on hand, cash flows from operations for the next twelve months and availability under our Revolving Credit Facility will be sufficient to service our outstanding debt during the next twelve months;

our belief regarding our credit risk; and

our estimates regarding certain accounting and tax matters.

These forward-looking statements reflect our current views about future events and are subject to risks, uncertainties and assumptions. We wish to caution readers that certain important factors may have affected and could in the future affect our actual results and could cause actual results to differ significantly from those expressed in any forward-looking statement. The most important factors that could prevent us from achieving our goals, and cause the assumptions underlying forward-looking statements and the actual results to differ materially from those expressed in or implied by those forward-looking statements include, but are not limited to, the following:

the impact of continued consolidation among wireless service providers on our leasing revenue;

Table of Contents

our ability to continue to comply with covenants and the terms of our credit instruments and our ability to obtain additional financing to fund our capital expenditures;

our ability to successfully manage the risks associated with international operations, including risks relating to political or economic conditions, tax laws, currency restrictions, legal or judicial systems, and land ownership;

our ability to successfully manage the risks associated with our acquisition initiatives, including our ability to effectively integrate acquired towers into our business and to achieve the financial results projected in our valuation models for the acquired towers;

developments in the wireless communications industry in general, and for wireless communications infrastructure providers in particular, that may slow growth or affect the willingness or ability of the wireless service providers to expend capital to fund network expansion or enhancements;

our ability to secure as many site leasing tenants as anticipated, recognize our expected economies of scale with respect to new tenants on our towers, and retain current leases on towers;

our ability to secure and deliver anticipated services business at contemplated margins;

our ability to build new towers, including our ability to identify and acquire land that would be attractive for our clients and to successfully and timely address zoning, permitting, weather, availability of labor and supplies and other issues that arise in connection with the building of new towers;

competition for the acquisition of towers and other factors that may adversely affect our ability to purchase towers that meet our investment criteria and are available at prices which we believe will be accretive to our shareholders and allow us to maintain our long-term target leverage ratios;

our ability to protect our rights to the land under our towers, and our ability to acquire land underneath our towers on terms that are accretive;

our ability to sufficiently increase our revenues and maintain expenses and cash capital expenditures at appropriate levels to permit us to meet our anticipated uses of liquidity for operations, debt service and estimated portfolio growth;

our ability to successfully estimate the impact of regulatory and litigation matters;

our ability to successfully estimate the impact of certain accounting and tax matters, including the effect on our company of adopting certain accounting pronouncements and the availability of sufficient net operating losses to offset future taxable income;

natural disasters and other unforeseen damage for which our insurance may not provide adequate coverage;

a decrease in demand for our communications sites; and

the introduction of new technologies or changes in a tenant's business model that may make our tower leasing business less desirable to potential tenants.

PART II OTHER INFORMATION**ITEM 5. OTHER INFORMATION****Sixth Amendment to the Amended and Restated Credit Agreement**

On August 27, 2013, SBA Senior Finance II LLC (SBA Senior Finance II), a wholly-owned subsidiary of SBA Communications Corporation, entered into the Sixth Amendment (the Sixth Amendment), among SBA Senior Finance II, SBA Senior Finance LLC, the lender parties thereto and Toronto Dominion (Texas) LLC, as administrative agent (the Administrative Agent), to the Amended and Restated Credit Agreement, dated as of June 30, 2011, among SBA Senior Finance II, as borrower, the lenders parties thereto, and the Administrative Agent (as amended, supplemented or modified from time to time, the Senior Credit Agreement). The Sixth Amendment amended the Senior Credit Agreement to, among other things, (i) increase the existing Consolidated Total Debt to Annualized Borrower EBITDA ratio maintenance covenant from 6.0x to 6.5x and (ii) proportionately adjust various leverage-based covenants, including mandatory repayments, and restrictions on acquired indebtedness, general disposition of assets, restricted payments, and general investments.

In addition, the Sixth Amendment modified the incremental capacity of the Revolving Credit Facility and Term Loan Facility from a fixed cap to an incurrence-based availability test which permits SBA Senior Finance II to request that one or more lenders provide (i) additional commitments under the Revolving Credit Facility and (ii) additional term loans, in each case without requesting the consent of the other lenders provided that after giving effect to the proposed increase in Revolving Credit Facility commitments or incremental term loans the ratio of Consolidated Total Debt to Annualized Borrower EBITDA would not exceed 6.5x. SBA Senior Finance II's ability to request such increases in the Revolving Credit Facility or additional term loans is subject to its compliance with the conditions set forth in the Senior Credit Agreement including, with respect to any additional term loan, compliance, on a pro forma basis, with the financial covenants and ratios set forth therein. Upon SBA Senior Finance II's request, each lender may decide, in its sole discretion, whether to provide additional commitments under the Revolving Credit Facility or whether to provide SBA Senior Finance II with additional term loans and, if so, upon what terms. Furthermore, the amendment modified the percentage of allowable annualized borrower EBITDA for foreign subsidiaries from 10.0% to 35.0%.
