FORM 10-K

(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2014

OR

TRANSITION REPORT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the transition period from _____ to _____

Commission file number 1-4987

SL INDUSTRIES, INC.

(Exact name of registrant as specified in its charter)

Delaware
(State of other jurisdiction of
incorporation or organization)

21-0682685
(I.R.S. Employer
Identification No.)

520 Fellowship Road, Suite A114, Mt. Laurel, NJ
(Address of principal executive offices)

08054
(Zip Code)

Registrant's telephone number, including area code: 856-727-1500

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class
Common Stock, \$.20 par value

Name of Each Exchange on Which Registered
NYSE MKT

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. YES NO

Edgar Filing: SL INDUSTRIES INC - Form 10-K

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. YES NO

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). YES NO

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). YES NO

As of the last business day of the Registrant's most recently completed second fiscal quarter, the aggregate market value of the voting and non-voting stock held by non-affiliates of the Registrant was \$64,099,000 based on the closing price of the Registrant's common stock on the NYSE MKT on that date. Shares of the Registrant's common stock beneficially owned by each executive officer and director of the Registrant and by each person known by the Registrant to beneficially own 10% or more of its outstanding common stock have been excluded, in that such persons may be deemed to be affiliates. This determination of affiliate status is not necessarily a conclusive determination for other purposes.

The number of shares of common stock outstanding as of February 27, 2015 was 4,086,000.

DOCUMENTS INCORPORATED BY REFERENCE

Certain information required by Part III of this report (Items 10, 11, 12, 13 and 14) is incorporated by reference from the Company's proxy statement to be filed pursuant to Regulation 14A with respect to the registrant's 2014 annual meeting of stockholders.

PART I

ITEM 1. BUSINESS

(a) General Development Of Business

SL Industries, Inc., through its subsidiaries, designs, manufactures and markets power electronics, motion control, power protection, and power quality electromagnetic equipment that are used in a variety of medical, commercial and military aerospace, computer, datacom, industrial, and telecom applications. Its products are generally incorporated into larger systems to improve operating performance, safety, reliability and efficiency. The Company's products are largely sold to Original Equipment Manufacturers (OEMs) and, to a lesser extent, to commercial distributors. The Company was incorporated as G-L Electronics Company in the state of New Jersey on March 29, 1956. The Company's name was changed to G-L Industries, Inc. in November 1963; SGL Industries, Inc. in November 1970; and then to the present name of SL Industries, Inc. in September 1984. Unless the context requires otherwise, the terms the Company, SL Industries, we, us and our mean SL Industries, Inc., a Delaware corporation, and its consolidated subsidiaries after Reincorporation (defined and described below) and SL Industries, Inc., a New Jersey corporation prior to Reincorporation. In the context of describing the Reincorporation, SL-NJ means SL Industries, Inc., a New Jersey corporation, and SL-DE means SL Industries, Inc., a Delaware corporation and wholly owned subsidiary of SL-NJ.

On May 9, 2013, the Company's shareholders voted to approve a proposal to change the state of incorporation of SL Industries from the State of New Jersey to the State of Delaware by merging SL-NJ with and into SL-DE (the Reincorporation). On June 20, 2013 (the Effective Date), the Reincorporation was effected by merging SL-NJ with and into SL-DE pursuant to an Agreement and Plan of Merger, dated June 3, 2013, between SL-NJ and SL-DE. SL-DE survived the merger and SL-NJ ceased to exist. The principal reason for the Reincorporation was to give the Company a greater measure of flexibility and simplicity in corporate governance and provide greater clarity and predictability with respect to the Company's corporate legal affairs. The Reincorporation did not result in any change in the name, business, management, fiscal year, accounting, location of the principal executive officers, assets or liabilities or net worth (other than the costs of reincorporation which were immaterial) of the Company.

On November 17, 2014, SL Delaware Holdings, Inc. (SL Delaware Holdings), a wholly-owned subsidiary of the Company, entered into a definitive Stock Purchase Agreement (the Purchase Agreement) with Hubbell Power Systems, Inc. (Hubbell), a subsidiary of Hubbell Incorporated, pursuant to which SL Delaware Holdings sold all of the issued and outstanding capital stock of RFL Electronics Inc. (RFL) to Hubbell for aggregate cash consideration of \$20,000,000, subject to a post-closing working capital adjustment which amounted to \$299,000 and was received in February 2015. A portion of the cash consideration (\$2,000,000, subject to adjustment after nine months), is being held in escrow to secure the indemnification obligations of SL Delaware Holdings. As a result, the Company recognized a pre-tax gain of \$6,650,000 (\$4,322,000 net of tax).

Table of Contents

(b) Financial Information About Segments

Financial information about the Company's business segments is incorporated herein by reference to Note 23 in the Notes to Consolidated Financial Statements included in Part IV of this Annual Report on Form 10-K.

(c) Narrative Description Of Business

Segments

The Company currently operates under three business segments: SL Power Electronics Corp. (SLPE), the High Power Group, and SL Montevideo Technology, Inc. (SL-MTI). TEAL Electronics Corp. (TEAL) and MTE Corporation (MTE) are combined into one business segment, which is reported as the High Power Group. The Company aggregates operating business subsidiaries into a single segment for financial reporting purposes if aggregation is consistent with the objectives of ASC 280 Segment Reporting.

SLPE SL Power Electronics Corp. designs, manufactures and markets high-reliability power conversion products in internal and external footprints. The Company's power supplies provide a reliable and safe power source for the customer's specific equipment needs. SLPE, which sells products under three brand names (SL Power Electronics, Condor and Ault), is a major supplier to the OEMs of medical, industrial/instrumentation, LED, and information technology equipment. For the years ended December 31, 2014, December 31, 2013 and December 31, 2012, net sales of SLPE, as a percentage of consolidated net sales from continuing operations, were 36%, 42% and 44%, respectively.

HIGH POWER GROUP The High Power Group sells products under two brand names: TEAL and MTE. TEAL designs and manufactures power quality products that include noise suppression isolation transformers, power conditioned distribution systems, voltage regulators, and high level integrated cabinets with preinstalled prewired power quality and distribution components. TEAL primarily sells to OEMs of medical imaging, medical treatment, military aerospace, semiconductor, solar, and advanced simulation systems. MTE designs and manufactures power quality solutions used to protect electrical equipment, bring harmonics into compliance, and improve the efficiency of variable speed motor drive systems. MTE's standard product lines include: harmonic filters, three-phase AC reactors, DC link chokes, and motor protection filters. TEAL and MTE also design and build customer specific and custom products for special applications. These products are typically used in industrial plants, renewable energy facilities, and commercial buildings. For the years ended December 31, 2014, December 31, 2013 and December 31, 2012, net sales of the High Power Group, as a percentage of consolidated net sales from continuing operations, were 42%, 37% and 36%, respectively.

SL-MTI SL-MTI designs and manufactures high power density precision motors that are used in numerous mission critical applications, including military and commercial aerospace, oil and gas, medical, and industrial products. For the years ended December 31, 2014, December 31, 2013 and December 31, 2012, net sales of SL-MTI, as a percentage of consolidated net sales from continuing operations, were 22%, 21% and 20%, respectively.

Table of Contents

Discontinued Operations

RFL RFL designs and manufactures communication and power protection products/systems that are used to protect electric utility transmission lines and apparatus by isolating faulty transmission lines from a transmission grid. On November 17, 2014, SL Delaware Holdings, a wholly-owned subsidiary of the Company, sold all of the issued and outstanding capital stock of RFL. As a result, the results of operations and cash flows of RFL are reported as discontinued operations for all periods presented.

SURFTECH SL Surface Technologies, Inc. (SurfTech) produced industrial coatings and platings for equipment in the corrugated paper and telecommunications industries. On November 24, 2003, the Company sold substantially all of the assets of SurfTech. As a result, SurfTech is reported as a discontinued operation for all periods presented. A significant portion of the Company's environmental costs, which have been incurred and are expected to be incurred, are related to the former SurfTech operations.

Raw Materials

Raw material components are supplied by various domestic and international vendors. In general, availability of materials is not a problem for the Company; however, at times the Company has had to locate alternate suppliers for certain key components. Raw materials are purchased directly from the manufacturer whenever possible to avoid distributor mark-ups. Average lead times generally run from immediate availability to 22 weeks. Lead times can be substantially higher for strategic components subject to industry shortages. In most cases, viable multiple sources are maintained for flexibility and competitive leverage.

Copper is used primarily by the High Power Group in its transformers, filters and reactors. In an attempt to limit the volatility of copper costs, the High Power Group entered into forward purchase agreements during 2014 in the aggregate amount of approximately \$2,600,000. As of December 31, 2014, forward purchase agreements in the aggregate amount of approximately \$914,000 were entered into for 2015. As of December 31, 2014, no copper purchase commitments were greater than nine months.

Patents, Trademarks, Licenses, Franchises And Concessions

The Company has proprietary information that it has developed and uses in its business. This proprietary information is protected by contractual agreements as well as through patents and patents pending, to the extent appropriate. The patents are protected by federal law. To protect its proprietary information, the Company also enters into non-disclosure agreements with its employees, vendors and customers. Where appropriate, the Company will take and has taken all steps necessary to defend its intellectual property.

Seasonality

Generally, seasonality is not a significant factor in any of the Company's segments.

Significant Customers

The Company has no customer that accounts for 10% or more of its consolidated net sales from continuing operations. SLPE, the High Power Group, and SL-MTI each have certain major customers, the loss of any of which could have a material adverse effect on such segment.

Table of Contents

Backlog

At February 27, 2015, March 2, 2014, and March 1, 2013, backlog was \$78,358,000, \$68,951,000, and \$62,747,000, respectively. The backlog at February 27, 2015 increased by \$9,407,000, or 14%, compared to March 2, 2014. SL-MTI and SLPE recorded increases in backlog while the High Power Group was relatively flat.

Competitive Conditions

The Company's businesses are in active competition with domestic and foreign companies with national and international name recognition that offer similar products or services and with companies producing alternative products appropriate for the same uses. Each of the Company's businesses seeks to gain an advantage from its competition by concentrating on differentiating or customizing products based on customer needs. The Company's businesses also seek a competitive advantage based on quality, service, innovation, delivery and price.

Environmental

The Company (together with the industries in which it operates or has operated) is subject to the environmental laws and regulations of the United States, People's Republic of China (China), Republic of Mexico (Mexico) and United Kingdom concerning emissions to the air, discharges to surface and subsurface waters and generation, handling, storage, transportation, treatment and disposal of waste materials. The Company and the subject industries are also subject to other federal, state and local environmental laws and regulations, including those that require the Company to remediate or mitigate the effects of the disposal or release of certain chemical substances at various sites, mostly at sites where the Company has ceased operations. It is impossible to predict precisely what effect these laws and regulations will have on the Company in the future.

It is the Company's policy to comply with all environmental, health and safety regulations, as well as industry standards for maintenance. The Company's domestic and international competitors are subject to the same environmental, health and safety laws and regulations, and the Company believes in each of its markets that the subject compliance issues and potential related expenditures of its operating subsidiaries are comparable to those faced by its major competitors.

Loss contingencies include potential obligations to investigate and eliminate or mitigate the effects on the environment of the disposal or release of certain chemical substances at various sites, such as Superfund sites and other facilities, whether or not they are currently in operation. The Company is currently participating in environmental assessments and cleanups at a number of sites and in the future may be involved in additional environmental assessments and cleanups. Based upon investigations completed to date by the Company and its independent engineering-consulting firms, management has provided an estimated accrual for all known costs believed to be probable and costs that can be reasonably estimated in the amount of \$16,859,000, of which \$7,384,000 is included as other long-term liabilities, with the remainder recorded as other short-term accrued liabilities, as of December 31, 2014. However, it is the nature of environmental contingencies that other circumstances might arise, the costs of which are indeterminable at this time due to such factors as changing government regulations and stricter standards, the unknown magnitude of cleanup costs, and the unknown timing and extent of the remedial actions that may be required. These other circumstances could result in additional expenses or judgments, or offsets thereto. The adverse resolution of any one or more of these other circumstances could have a material adverse effect on the business, operating results, financial condition or cash flows of the Company. The Company's environmental costs primarily relate to discontinued operations and such costs have been recorded in discontinued operations, net of tax.

Table of Contents

There are three sites on which the Company may incur material environmental costs in the future as a result of past activities of its former subsidiary, SurfTech. There are two Company owned sites related to its former subsidiary, SurfTech. These sites are located in Pennsauken, New Jersey (the Pennsauken Site) and in Camden, New Jersey (the Camden Site). There is also a third site, which is not owned by the Company, referred to as the Puchack Well Field Site. The Puchack Well Field Site and the Pennsauken Site are part of the Puchack Well Field Superfund Site. The Company's environmental contingencies with respect to the Pennsauken Site are fully discussed in Item 3. Legal Proceedings included in Part I of this Annual Report on Form 10-K.

With respect to the Camden Site, the Company has reported soil contamination and a groundwater contamination plume emanating from the site. The New Jersey Department of Environmental Protection (NJDEP) approved, and the Company implemented in 2010, an interim remedial action pilot study to inject neutralizing chemicals into the unsaturated soil. Based on an assessment of post-injection data, our consultants believe the pilot study can be implemented as a full scale soil remedy to treat unsaturated contaminated soil. A Remedial Action Workplan (RAWP) for soils is being developed. The RAWP will select the injection remedy as the site wide remedy for unsaturated soils, along with demolition and proper disposal of the former concrete building slab and targeted excavation and disposal of impacted soil immediately underlying the slab. Additionally, the RAWP will address a small area of impacted soil off the property. The RAWP for soils is expected to be submitted to the NJDEP in the first quarter of 2015, by the Licensed Site Remediation Professional (LSRP) for the site. The RAWP for treatment of unsaturated soils is scheduled to be implemented in the third quarter of 2015. The Company's environmental consultants also implemented an interim remedial action pilot study to treat on-site contaminated groundwater, which consisted of injecting food-grade product, into the groundwater at the down gradient property boundary, to create a bio-barrier. Post-injection groundwater monitoring to assess the bio-barrier's effectiveness was completed. Consistent decreases in target contaminants concentrations in groundwater were observed. In December 2014, a report was submitted to the NJDEP stating sufficient information was obtained from the pilot study to complete the full scale groundwater remedy design. A Remedial Action Report/Remedial Action Workplan for full scale implementation will be provided to the NJDEP in 2015.

As previously reported, the Company is currently participating in environmental assessments and cleanups at a number of sites. One of these sites is a commercial facility, located in Wayne, New Jersey. Contaminated soil and groundwater has undergone remediation with NJDEP and LSRP oversight, but contaminants of concern (COCs) in groundwater and surface water, which extend off-site, still remain above applicable NJDEP remediation standards. A soil remedial action plan has been developed to remove the new soil source contamination that continues to impact groundwater. Our LSRP completed a supplemental groundwater remedial action, pursuant to a RAWP filed with, and permit approved by, the NJDEP. The remedial action consisted of additional in-situ injections of food grade product into on-site groundwater and post-performance groundwater monitoring. The in-situ injections are completed, and remedial action performance monitoring for groundwater is scheduled to occur through 2015. Enhancements to the existing vapor intrusion system were completed in the fourth quarter 2014. The Company's consultants have developed cost estimates for supplemental remedial injections, soil excavation and additional tests and remedial activities. Costs related to this site are recorded as part of discontinued operations, net of tax. The Remedial Investigation deadline for this site has been extended to May 7, 2016.

Table of Contents

The Company's sale of RFL triggered certain requirements of the Industrial Site Recovery Act or (ISRA), which applies to New Jersey statutorily defined transactions involving industrial establishments. Under the stock purchase agreement pursuant to which RFL was sold (the RFL-SPA), the Company agreed to undertake, or cause to undertake, all actions necessary to comply with ISRA arising from the RFL-SPA. The Company hired an LSRP to complete a Preliminary Assessment. Based on the Preliminary Assessment, the LSRP recommended the completion of a site investigation (the Site Investigation) for certain areas of concern. The LSRP completed most of the Site Investigation in January 2015, and the remainder of the investigation is scheduled to be completed by April 2015. A Preliminary Assessment Report and Site Investigation Report are scheduled to be filed with the NJDEP by no later than November 17, 2015. The Company may then be obligated to perform additional investigation or remediation, depending on the outcome of the Site Investigation.

The Company has reported soil and groundwater contamination at the facility of SL-MTI located on its property in Montevideo, Minnesota. An analysis of the contamination has been completed and a remediation plan has been implemented at the site pursuant to the remedial action plan approved by the Minnesota Pollution Control Agency (MPCA). A soil vapor extraction system has been operating at the site since October 2008. In 2013 the regulatory and screening levels for soil vapor and groundwater were lowered for some of the contaminants at the site. In response to this regulatory change, SL-MTI's consultants are conducting additional testing to delineate site impacts and update the site conceptual model. A work plan was submitted to MPCA and approved on September 22, 2014. Pending the results of work performed during 2015, additional investigations or remedial actions may be required in the future. Costs related to this site are recorded as a component of continuing operations.

Employees

As of December 31, 2014, the Company had approximately 1,400 employees. Of these employees, 177, or approximately 13%, were subject to collective bargaining agreements in Mexico.

Foreign Operations

In addition to manufacturing operations in California, Minnesota, and Wisconsin, the Company manufactures substantial quantities of products in premises leased in Mexicali, Mexico, Matamoros, Mexico, Tecate, Mexico, and Xianghe, China. SLPE manufactures most of its products in Mexico and China. TEAL, which is part of the High Power Group, has transferred the majority of its manufacturing to a wholly-owned subsidiary located in Mexico. SL-MTI manufactures a significant portion of its products in Mexico. These external and foreign sources of supply present risks of interruption for reasons beyond the Company's control, including political or economic instability and other uncertainties.

Generally, the Company's sales are priced and invoiced in U.S. dollars (USD) and its costs and expenses are priced in U.S. dollars, Mexican pesos (MXN) and Chinese yuan (CNH). The Mexican subsidiaries of SLPE, the High Power Group and SL-MTI maintain their books and records in Mexican pesos. SLPE's subsidiaries in China maintain their books and records in Chinese yuan; however, most of their sales are invoiced in U.S. dollars. Business operations conducted in Mexico or China incur their respective labor costs and supply expenses in Mexican pesos and Chinese yuan, as the case may be.

Table of Contents

The competitiveness of the Company's products relative to locally produced products may be affected by the performance of the U.S. dollar compared with that of its foreign customers' and competitors' currencies. Foreign net sales comprised 30%, 22% and 20% of net sales from continuing operations for fiscal 2014, 2013 and 2012, respectively. Additionally, the Company is exposed to foreign currency exchange rate fluctuations, which may result from fluctuations in the value of the Mexican peso and Chinese yuan versus the U.S. dollar.

Since 2012, the Company has entered into a series of foreign currency forward contracts to hedge its exposure to foreign exchange rate movements in its forecasted expenses in China and Mexico. The foreign currency forwards are not speculative and are being used to manage the Company's exposure to foreign exchange rate movements. Foreign currency forward agreements involve fixing the USD-MXN and USD-CNH exchange rates for delivery of a specified amount of foreign currency on a specified date. The Company has elected not to apply hedge accounting to these derivatives and they are marked to market through earnings. Therefore, gains and losses resulting from changes in the fair value of these contracts are recognized at the end of each reporting period directly in earnings in other gain, net on the Consolidated Statements of Income.

For additional information related to financial information about foreign operations, see Notes 17 and 23 in the Notes to Consolidated Financial Statements included in Part IV of this Annual Report on Form 10-K.

Additional Information

Additional information regarding the development of the Company's businesses during 2014 and 2013 is contained in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations included in Part II and Notes 1 and 4 of the Notes to the Consolidated Financial Statements included in Part IV of this Annual Report on Form 10-K.

The Company's Current Reports on Form 8-K, Quarterly Reports on Form 10-Q and Annual Reports on Form 10-K are electronically filed with or furnished to Securities and Exchange Commission (the "SEC"), and all such reports and amendments to such reports filed have been and will be made available, free of charge, through the Company's website (<http://www.slindustries.com>) as soon as reasonably practicable after such filing. Such reports will remain available on the Company's website for at least 12 months. The contents of the Company's website are not incorporated by reference into this Annual Report on Form 10-K.

ITEM 1A. RISK FACTORS

Not applicable.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

Table of Contents**ITEM 2. PROPERTIES**

Set forth below are the properties where the Company conducted business as of December 31, 2014.

Location	General Character	Approx. Square Footage	Owned or Leased And	Expiration Date
Ventura, CA	Administration, design and sales of power supply products (SLPE)	31,200	Leased	1/13/2016
Canton, MA	Design of power supply products (SLPE)	2,560	Leased	8/31/2016
Mexicali, Mexico	Manufacture and distribution of power supply products (SLPE)	82,400	Leased	12/15/2020

Montevideo, MN	Administration, design, sales and manufacture of precision motors and motion control systems (SL-MTI)	30,000	Owned	
Matamoros, Mexico	Manufacture of precision motors (SL-MTI)	30,000	Leased	12/31/2015
Eden Prairie, MN	Administration and design of precision motors and motion control systems (SL-MTI)	3,700	Leased	3/31/2018
Pennsauken, NJ	Land (Unallocated Corporate Assets) ⁽¹⁾	6,000	Owned	
Mt. Laurel, NJ	Corporate office (Unallocated Corporate Assets)	4,200	Leased	11/30/2015

⁽¹⁾ Formerly a document warehouse, which was demolished during December 2013. The property was originally used for industrial surface finishing operations.

The Company believes that most of its manufacturing facilities are adequate for current production requirements. The Company believes that its remaining facilities are sufficient for current operations, maintained in good operating condition and adequately insured. Of the owned properties, none are subject to a major encumbrance material to the operations of the Company.

Table of Contents

ITEM 3. LEGAL PROCEEDINGS

Environmental Matters

The Company has been and is the subject of administrative actions that arise from its ownership of SL Surface Technologies, Inc. (SurfTech), a wholly-owned subsidiary, the assets of which were sold in November 2003. SurfTech formerly operated chrome-plating facilities in Pennsauken Township, New Jersey (the Pennsauken Site) and Camden, New Jersey (the Camden Site).

In 2006 the United States Environmental Protection Agency (the EPA) named the Company as a potential responsible party (a PRP) in connection with the remediation of the Puchack Well Field, which has been designated as a Superfund Site. The EPA is remediating the Puchack Well Field Superfund Site in two separate operable units. The first operable unit (OU-1) consists of an area of chromium groundwater contamination in three aquifers that exceeds the selected cleanup standard. The second operable unit (OU-2) pertains to sites that are allegedly the sources of contamination for the first operable unit.

The Company has reached an agreement with both the United States Department of Justice (DOJ) and EPA effective April 30, 2013 related to its liability for both OU-1 and OU-2 pursuant to the terms of a Consent Decree which governs the agreement. Specifically, the Company has agreed to perform the remediation for OU-2 and pay a fixed sum for the EPA s past cost for OU-2 and a portion of the EPA s past cost for OU-1. The payments are to be made in five equal payments of \$2,141,000, for a total \$10,705,000, plus interest. The Company has also agreed to pay the EPA s costs for oversight of the OU-2 remediation. The United States District Court judge signed the Consent Decree effective April 30, 2013, thereby triggering the Company s obligation under the Consent Decree. On May 10, 2013, the Company made the first payment related to its obligation under the Consent Decree in the amount of \$2,185,000, which included interest. On May 20, 2014, the Company made the second payment related to its obligation under the Consent Decree in the amount of \$2,211,000, which included interest. The next three payments will be made on the anniversary of the prior year s payment plus ten days in the same amount of \$2,141,000, plus interest. In 2013, the Company had obtained financial assurances for the OU-2 remediation and the fixed payments as required by the terms of the Consent Decree. The financial assurance is reduced annually as the fixed payments are made. Also, the financial instruments did not affect the Company s availability under its Credit facility (see Note 12 in the Notes to the Consolidated Financial Statements included in Part IV of this Annual Report on Form 10-K).

The Company has completed the final stages of the design phase of the remediation activities for OU-2. The 100% Remediation Design (the Final Design) was finalized in November 2014. The Final Design, was approved by the EPA in January 2015. The Final Design essentially sets the scope of work for the Company s remediation responsibility related to OU-2 under the terms of the Consent Decree. The Company s consultants performed a significant amount of work during 2014, which included demolition of the Company s former facility and a building on an adjacent property, shoring, equipment mobilization and set in-place the main components of the on-site soil processing batch plant. The Company s consultants have been providing the EPA with progress reports during the year, prior to submission of the Final Design. The Company expects to incur significant remediation costs in 2015, which have been accrued.

Table of Contents*Other*

On March 10, 2015, Compass Directional Guidance, Inc. (Compass) filed a complaint (the Complaint) against SL-MTI in the District Court in Harris County, Texas. The Complaint seeks damages in excess of \$18 million arising from the SL-MTI s sale of certain brushless motors to Compass. Compass asserts that SL-MTI breached express and implied warranties, violated the Texas Deceptive Trade Practices Act, and negligently misrepresented the quality, specification and uses of its motors to Compass. SL-MTI intends to vigorously defend the claims asserted in the Complaint which it believes are limited by the contractual terms between the parties as well as the applicable statute of limitations, and are substantially without merit. The Company has notified its insurance carriers regarding this claim.

In the ordinary course of its business the Company is and may be subject to other loss contingencies pursuant to foreign and domestic federal, state and local governmental laws and regulations and may be party to certain legal actions, frequently involving complaints by terminated employees and disputes with customers, suppliers and others. In the opinion of management, any such other loss contingencies are not expected to have a material adverse effect on the financial condition or results of operations of the Company.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II**ITEM 5. MARKET FOR REGISTRANT S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

The Company s common stock is currently listed on the NYSE MKT under the ticker symbol SLI . The following table sets forth the high and low closing sales price per share of the Company s common stock for the periods indicated:

	Year Ended December 31, 2014		Year Ended December 31, 2013	
	HIGH	LOW	HIGH	LOW
Stock Prices				
1st Quarter	\$ 27.99	\$ 24.01	\$ 19.65	\$ 16.60
2nd Quarter	\$ 32.05	\$ 24.84	\$ 26.04	\$ 18.35
3rd Quarter	\$ 49.59	\$ 29.86	\$ 31.00	\$ 22.14
4th Quarter	\$ 50.15	\$ 35.74	\$ 30.50	\$ 24.58

Holders of Record

As of February 27, 2015, there were approximately 473 holders of record of the Company s common stock.

Dividends

The Company has not paid a cash dividend on its common stock since 2012. The declaration and payment of dividends in the future, if any, and their amounts, will be determined by the Board of Directors in light of conditions

then existing, including the Company's earnings, financial condition and business requirements (including working capital needs), and other factors. On August 9, 2012, the Company entered into the 2012 Credit Facility with PNC Bank to replace its 2008 Credit Facility. The 2012 Credit Facility imposes restrictions on our ability to pay dividends, and thus the Company's ability to pay dividends on our common stock will depend upon, among other things, the Company's level of indebtedness at the time of the proposed dividend and whether the Company is in default under any of our debt obligations. The Company's ability to pay dividends will also depend on the requirements of any future financing agreements to which we may be a party.

Table of Contents**Issuer Purchases of Equity Securities**

On November 16, 2010, the Board of Directors authorized a plan that allows for the repurchase up to an aggregate of 470,000 shares of the Company's outstanding common stock (the 2010 Repurchase Plan). Any repurchases pursuant to the 2010 Repurchase Plan would be made in the open market or in negotiated transactions. During 2014, the Company purchased approximately 4,000 shares of Company stock at an average price of \$24.68 a share under the 2010 Repurchase Plan.

On December 24, 2014, the Board of Directors authorized a plan that allows for the repurchase up to an aggregate of 420,000 shares of the Company's outstanding common stock (the 2014 Repurchase Plan). The 2014 Repurchase Plan supersedes the 2010 Repurchase Plan. Any repurchases pursuant to the 2014 Repurchase Plan would be made in the open market or in negotiated transactions. No purchases were made under the 2014 Repurchase Plan during 2014. As of December 31, 2014, 420,000 shares remained available for purchase under the 2014 Repurchase Plan. Currently, the 2014 Repurchase Plan has no expiration date.

The following table presents information related to the repurchase of common stock that the Company made during the twelve months ended December 31, 2014:

Period	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid per Share	Total Number of Shares of Publicly Announced Plans or Programs Purchased as Part of	Maximum Number of Shares That May Yet Be Purchased under Publicly Announced Plans or Programs
February 2014	2,000	24.52	2,000	241,000
March 2014				241,000
April 2014	2,000	24.80	2,000	239,000
May 2014				239,000
June 2014				239,000
July 2014				239,000
August 2014				239,000
September 2014				239,000
October 2014				239,000
November 2014				239,000
December 2014				420,000 ⁽²⁾
Total	4,000	\$ 24.68	4,000	420,000

- (1) The number of shares purchased pursuant to the 2010 Repurchase Plan.
- (2) The number of shares available for purchase pursuant to the 2014 Repurchase Plan.

Table of Contents**Equity Compensation Plan Information**

Information relating to securities authorized for issuance under equity compensation plans as of December 31, 2014, is as follows:

	Number of securities to be issued upon exercise of outstanding options, warranty and rights (a)	Weighted-average exercise price of outstanding options, warranty and rights (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding shares reflected in column (a) (c)
Equity compensation plans approved by security holders	228,000 ⁽¹⁾	\$ 19.71 ⁽²⁾	116,000 ⁽³⁾
Equity compensation plans not approved by security holders	none		
Total	228,000	\$ 19.71	116,000

⁽¹⁾ This amount includes the following:

184,000 shares issuable upon the exercise of outstanding stock options under the 2008 Incentive Stock Plan (the 2008 Plan) with a weighted-average price of \$19.71.

6,000 restricted stock units (RSUs) earned under the Company s 2012 Long-term Incentive Plan (the 2012 LTIP) pursuant to the 2008 Plan.

18,000 RSUs issuable under the Company s 2013 Long-term Incentive Plan (the 2013 LTIP) pursuant to the 2008 Plan. Assumes that outstanding performance-based RSUs will vest at target.

20,000 RSUs issuable under the Company s 2014 Long-term Incentive Plan (the 2014 LTIP) pursuant to the 2008 Plan. Assumes that outstanding performance-based RSUs will vest at target.

- (2) The 2014 LTIP, 2013 LTIP, and 2012 LTIP RSUs have been excluded from the computation of the weighted-average exercise price since these awards have no exercise price.
- (3) This amount represents the number of shares available for issuance pursuant to stock options and awards that could be granted in the future under the Company's active shareholder approved stock plan, the 2008 Plan. The 2008 Plan allows for the issuance of up to 500,000 shares.

Table of Contents**ITEM 6. SELECTED FINANCIAL DATA**

Selected consolidated financial data with respect to the years ended December 31, 2014, 2013, 2012, 2011, and 2010, are presented below.

	Years Ended December 31,				
	2014	2013	2012	2011	2010
	(amounts in thousands except per share data)				
Net sales ⁽¹⁾	\$ 204,417	\$ 184,658	\$ 179,375	\$ 189,506	\$ 167,370
Income from continuing operations ⁽¹⁾⁽²⁾	\$ 14,180	\$ 7,478	\$ 7,539	\$ 10,792	\$ 7,859
Income (loss) from discontinued operations ⁽¹⁾⁽³⁾	\$ 4,715	\$ 762	\$ 238	\$ (2,594)	\$ (5,303)
Net income ⁽¹⁾⁽⁴⁾	\$ 18,895	\$ 8,240	\$ 7,777	\$ 8,198	\$ 2,556
Diluted net income per common share ⁽¹⁾	\$ 4.51	\$ 1.97	\$ 1.80	\$ 1.79	\$ 0.44
Shares used in computing diluted net income per common shares ⁽¹⁾⁽⁵⁾	4,187	4,184	4,330	4,573	5,811
Year-end financial position

- (1) On November 17, 2014, SL Delaware Holdings, a wholly-owned subsidiary of the Company, entered into the Purchase Agreement with Hubbell pursuant to which SL Delaware Holdings sold all of the issued and outstanding capital stock of RFL to Hubbell for aggregate cash consideration of \$20,000,000, subject to a post-closing working capital adjustment which amounted to \$299,000 and was received in February 2015. The Company concluded that the accounting requirements for reporting the results of operations of the divested business as discontinued operations were met at November 17, 2014. As a result, the results of operations for the periods presented have been recast to reflect the formerly owned RFL businesses as discontinued operations.
- (2) Fiscal 2013 includes a \$5,055,000 (\$3,172,000 net of tax) goodwill impairment related to the TEAL reporting unit, which is part of the High Power Group segment.
- (3) Discontinued operations include the results of operations of the Company's RFL business and environmental remediation activities associated with the Company's five environmental sites. Prior to fiscal 2012, discontinued operations for the periods indicated largely relate to expenses for environmental remediation activities, legal expenses, and potential settlement costs associated with SurfTech, which were partially offset by the results of operations of the Company's RFL business.
- (4) During the fourth quarter of 2011, the Company recorded a \$5,151,000, net of tax, charge related to estimated environmental remediation liabilities associated with the Pennsauken Site, which was partially offset by a \$787,000 favorable settlement with a foreign tax authority during the second quarter of 2011. Fiscal 2010 includes a provision for environmental remediation of \$5,132,000, net of tax, related to the Pennsauken Site and \$784,000, net of tax, related to the Camden Site.

(5) Fiscal 2014 and 2013 represents the effect of the purchase of Company stock pursuant to the Company's 2010 Repurchase Plan. During 2014 and 2014, the Company purchased approximately 4,000 shares and 87,000 shares of its common stock in connection with the 2010 Repurchase Plan.

Fiscal 2012 represents the effect of the Company's Dutch Auction tender offer that expired on June 27, 2012 (the 2012 Tender Offer) and the purchase of Company stock pursuant to the Company's 2010 Repurchase Plan. The Company purchased and retired approximately 307,000 shares of its common stock in connection with the 2012 Tender Offer, and purchased approximately 140,000 shares in connection with the 2010 Repurchase Plan.

Fiscal 2011 represents the full year effect of the Company's tender offer that expired on October 13, 2010 (the 2010 Tender Offer) and the purchase of Company stock held by the Company's defined contribution plan during the fourth quarter of 2010. During 2010, the Company purchased and retired approximately 1,335,000 shares of its common stock in connection with the 2010 Tender Offer, and purchased approximately 252,000 shares of its common stock held by its defined contribution plan.

(6) Excludes capital expenditures of the formerly owned RFL business.

(7) Excludes amortization of deferred financing costs. Also excludes depreciation and amortization of the formerly owned RFL business.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following section highlights significant factors impacting the consolidated operations and financial condition of the Company and its subsidiaries. The following discussion should be read in conjunction with Item 6. Selected Financial Data, Item 8. Financial Statements and Supplementary Data, and the Consolidated Financial Statements included in Part IV of this Annual Report on Form 10-K.

Forward-Looking Statements

In addition to other information in this Annual Report on Form 10-K, this Management's Discussion and Analysis of Financial Condition and Results of Operations contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements are based on current expectations and the current economic environment. These statements are not guarantees of future performance. They involve a number of risks and uncertainties that are difficult to predict, including, but not limited to, the Company's ability to implement its business plan, retain key management, anticipate industry and competitive conditions, realize operating efficiencies, secure necessary capital facilities and obtain favorable determinations in various legal and regulatory matters. Actual results could differ materially from those expressed or implied in the forward-looking statements. Some important assumptions and other critical factors that could cause actual results to differ materially from those in the forward-looking statements are specified in the Company's filings with the SEC, including the Company's Quarterly Reports on Form 10-Q and Current Reports on Form 8-K.

Overview

SL Industries, Inc., through its subsidiaries, designs, manufactures and markets power electronics, motion control, power protection, and power quality electromagnetic equipment that is used in a variety of medical, commercial and military aerospace, computer, datacom, industrial, and telecom applications. Its products are generally incorporated into larger systems to improve operating performance, safety, reliability and efficiency. The Company's products are largely sold to OEMs and, to a lesser extent, to commercial distributors. The Company is comprised of three domestic business segments, all of which have significant manufacturing operations in Mexico. SLPE has manufacturing, engineering and sales capability in China. Most of the Company's sales are made to customers who are based in the United States. The Company places an emphasis on highly engineered, well-built, high quality, dependable products and is dedicated to continued product enhancement and innovation.

The Company's business strategy has been to enhance the growth and profitability of each of its businesses through the penetration of attractive new market niches, further improvement of operations through the implementation of lean manufacturing principles, expansion of lean principles into the transactional side of the business, and expansion of global capabilities. The Company intends to focus on improving efficiencies that better leverage the Company's resources. Lean initiatives, both on the factory floor and throughout the organization, are ongoing. The Company expects to pursue its goals during the next twelve months principally through organic growth. The Company also continues to pursue strategic alternatives to maximize shareholder value. Some of these alternatives have included, and could continue to include, selective acquisitions, divestitures and the sale of certain assets. The Company has provided, and may from time to time in the future provide, information to interested parties.

Table of Contents

In the sections that follow, statements with respect to 2014 or fiscal 2014 refer to the twelve month period ending December 31, 2014. Statements with respect to 2013 or fiscal 2013 refer to the twelve month period ending December 31, 2013.

Significant Transactions and Financial Trends

On November 17, 2014, SL Delaware Holdings, a wholly-owned subsidiary of the Company, entered into the Purchase Agreement with Hubbell pursuant to which SL Delaware Holdings sold all of the issued and outstanding capital stock of RFL to Hubbell for aggregate cash consideration of \$20,000,000, subject to a post-closing working capital adjustment which amounted to \$299,000 and was received in February 2015. A portion of the cash consideration (\$2,000,000, subject to adjustment after nine months), is being held in escrow to secure the indemnification obligations of SL Delaware Holdings. As a result, the Company recognized a pre-tax gain of \$6,650,000 (\$4,322,000 net of tax).

On July 25, 2014, the Company acquired certain assets and assumed certain liabilities of Dynetic Systems, Inc. (Dynetic), pursuant to an Asset Purchase Agreement for an initial purchase price of \$4,000,000 less a working capital adjustment of \$27,000 (the Dynetic Acquisition). The Asset Purchase Agreement also includes a possible earn-out, initially estimated at \$310,000, which is comprised of annual payments based on sales of Dynetic products and sales to Dynetic customers over the period immediately following the date of the Dynetic Acquisition through December 31, 2017. Dynetic designed, developed and manufactured precision quality, instrument grade motion control products, and provided custom motor and motion control solutions to the aerospace, defense, medical, commercial and industrial markets. In connection with the Dynetic Acquisition, SL Montevideo Technology, Inc. (SL-MTI) recorded \$266,000 of non-cash inventory step-up amortization due to purchase accounting and direct acquisition costs of approximately \$146,000 during 2014. The non-cash inventory step-up amortization was recorded within cost of products sold and direct acquisition costs were recorded within selling, general and administrative expenses in the Consolidated Statements of Income. SLMTI DS LLC (SLMTI DS), a new formed subsidiary of SL-MTI, holds the assets acquired in the Dynetic Acquisition.

During 2013, the Company reached an agreement with both the United States Department of Justice (DOJ) and EPA related to its liability for both OU-1 and OU-2 pursuant to the terms of a Consent Decree which governs the agreement. On May 20, 2014, the Company made the second payment related to its obligation under the Consent Decree in the amount of \$2,211,000, which included interest. The next three payments will be made on the anniversary of the prior year s payment plus ten days in the same amount of \$2,141,000, plus interest (see Note 16 for additional information).

During 2013, the Company purchased publicly traded equity securities which were classified as available-for-sale securities. During 2014, the Company sold all of its available-for-sale securities for total proceeds of \$4,054,000. The gross realized gains on these sales totaled \$1,691,000 (\$1,063,000 net of tax), for the year ended December 31, 2014 (see Note 10 for additional information).

Table of Contents

Business Trends

Demand for the Company's products and services increased during 2014 compared to 2013. During 2014, net sales increased by \$19,759,000, or 11%, while income from operations increased by \$9,327,000, or 91%. The largest increases in net sales during the year occurred at the High Power Group and SL-MTI. Excluding a \$5,055,000 non-cash goodwill impairment charge recognized in 2013 by TEAL, which is part of the High Power Group, income from operations increased by \$4,272,000, or 28%, during 2014. The largest increase in income from operations occurred at the High Power Group.

During 2014, bookings increased by \$18,498,000, or 10%, compared to 2013. All operating segments experienced increases in bookings in 2014 with the most significant increases occurring at SL-MTI and the High Power Group. Backlog at December 31, 2014, was \$72,292,000, compared to \$65,641,000 at December 31, 2013, for an increase of \$6,651,000, or 10%. The most significant increase occurred at SL-MTI, which was partially offset by a large decrease at the High Power Group.

The Company's management is taking numerous actions to improve sales through the deployment of growth tools aimed at identifying attractive market segments and penetrating those markets through aggressive new product introduction. The Company is also identifying and penetrating selected geographic opportunities. The Company is continuing to emphasize lean initiatives at all of its facilities in manufacturing as well as in finance and administration.

While these items are important in understanding and evaluating financial results and trends, other transactions or events, which are disclosed in this Management's Discussion and Analysis, may have a material impact on continuing operations. A complete understanding of these transactions is necessary in order to estimate the likelihood that these trends will continue.

Critical Accounting Policies

The Company's consolidated financial statements have been prepared in accordance with Generally Accepted Accounting Principles in the United States (GAAP). GAAP requires management to make estimates and assumptions that affect the amounts of reported and contingent assets and liabilities at the date of the consolidated financial statements and the amounts of reported net sales and expenses during the reporting period.

The SEC has issued disclosure guidance for critical accounting policies. The SEC defines critical accounting policies as those that are most important to the portrayal of the Company's financial condition and results, and that require application of management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain and may change in subsequent periods.

The Company's significant accounting policies are described in Note 1 in the Notes to Consolidated Financial Statements included in Part IV of this Annual Report on Form 10-K. Not all of these significant accounting policies require management to make difficult, subjective or complex judgments or estimates. However, the following policies are deemed to be critical within the SEC definition. The Company's senior management has reviewed these critical accounting policies and estimates and the related Management's Discussion and Analysis of Financial Condition and Results of Operations with the Audit Committee of the Board of Directors.

Table of Contents

Revenue Recognition

Revenue is recognized when persuasive evidence of an arrangement exists, delivery has occurred or services have been rendered, the purchase price is fixed or determinable and collectability is reasonably assured. Revenue is recorded in accordance with Staff Accounting Bulletin (SAB) No. 104. The major portion of the Company's revenue is derived from equipment sales. The Company recognizes equipment revenue upon shipment or delivery, depending upon the terms of the order, and transfer of title. Generally, the revenue recognition criteria are met at the time the product is shipped. The Company does not currently have any multiple-element arrangements.

Provisions are established for product warranties, principally based on historical experience. At times the Company establishes reserves for specific warranty issues known by management. Customer service and installation revenue is recognized when completed.

SLPE has two sales programs with distributors, pursuant to which credits are issued to distributors: (1) a re-stocking program and (2) a competitive discount program. The distributor re-stocking program allows distributors to rotate up to a pre-determined percentage of their purchases over the previous six month period. SLPE provides for this allowance as a decrease to revenue based upon the amount of sales to each distributor and other historical factors. The competitive discount program allows a distributor to sell a product out of its inventory at a negotiated price in order to meet certain competitive situations. SLPE records this discount as a reduction to revenue based on the distributor's eligible inventory. The eligible distributor inventory is reviewed at least quarterly. No cash is paid under either distributor program. These programs affected consolidated gross revenue for 2014, 2013 and 2012 by approximately 0.3%, 0.5% and 0.7%, respectively.

Certain judgments affect the application of the Company's revenue policy, as mentioned above. Revenue recognition is significant because net revenue is a key component of results of operations. In addition, revenue recognition determines the timing of certain expenses, such as commissions, royalties and certain incentive programs. Revenue results are difficult to predict. Any shortfall in revenue or delay in recognizing revenue could cause operating results to vary significantly from year to year and quarter to quarter.

Allowance For Doubtful Accounts

The Company's estimate for the allowance for doubtful accounts related to trade receivables is based on two methods. The amounts calculated from each of these methods are combined to determine the total amount reserved. First, the Company evaluates specific accounts where it has information that the customer may have an inability to meet its financial obligations (e.g., bankruptcy or insolvency). In these cases, the Company uses its judgment, based on the best available facts and circumstances, and records a specific reserve for that customer against amounts due to reduce the receivable to the amount that is expected to be collected. These specific reserves are reevaluated and adjusted as additional information is received that impacts the amount reserved. Second, a general reserve is established for all customers based on several factors, including historical write-offs as a percentage of sales. If circumstances change (e.g., higher than expected defaults or an unexpected material adverse change in a major customer's ability to meet its financial obligation), the Company's estimates of the recoverability of amounts due could be reduced by a material amount. Receivables are charged off against the reserve when they are deemed uncollectible. The Company's allowance for doubtful accounts represented 0.8% and 1.9% of gross trade receivables at December 31, 2014 and December 31, 2013, respectively.

Table of Contents

Inventories

The Company values inventory at the lower of cost or market, and continually reviews the book value of discontinued product lines to determine if these items are properly valued. The Company identifies these items and assesses the ability to dispose of them at a price greater than cost. If it is determined that cost is less than market value, then cost is used for inventory valuation. If market value is less than cost, then related inventory is adjusted to market value.

If a write down to the current market value is necessary, the market value cannot be greater than the net realizable value, which is defined as selling price less costs to complete and dispose, and cannot be lower than the net realizable value less a normal profit margin. The Company also continually evaluates the composition of its inventory and identifies obsolete, slow-moving and excess inventories. Inventory items identified as obsolete, slow-moving or excess are evaluated to determine if reserves are required. If the Company were not able to achieve its expectations of the net realizable value of the inventory at current market value, it would have to adjust its reserves accordingly. The Company attempts to accurately estimate future product demand to properly adjust inventory levels. However, significant unanticipated changes in demand could have a significant impact on the value of inventory and of operating results.

Investments

The Company determines the appropriate classification of its investments in equity securities at the time of purchase and reevaluates such determinations at each balance sheet date. Marketable securities that are bought and held principally for the purpose of selling them in the near term are classified as trading securities and are reported at fair value, with unrealized gains and losses recognized in earnings. Marketable equity securities not classified as trading are classified as available for sale, and are carried at fair market value, with the unrealized gains and losses, net of tax, included in the determination of comprehensive income and reported in shareholders' equity. The fair value of all securities held by the Company is determined by quoted market prices.

Derivative Instruments and Hedging Activities

FASB ASC 815, Derivatives and Hedging (ASC 815), provides the disclosure requirements for derivatives and hedging activities with the intent to provide users of financial statements with an enhanced understanding of: (a) how and why an entity uses derivative instruments, (b) how the entity accounts for derivative instruments and related hedged items, and (c) how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. Further, qualitative disclosures are required that explain the Company's objectives and strategies for using derivatives, as well as quantitative disclosures about the fair value of and gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative instruments.

The Company is exposed to certain risks arising from both its business operations and economic conditions. The Company principally manages its exposures to a wide variety of business and operational risks through management of its core business activities. Certain of the Company's foreign operations expose the Company to fluctuations of foreign interest rates and exchange rates. These fluctuations may impact the value of the Company's revenues, expenses, cash receipts and payments in terms of the Company's functional currency. The Company enters into derivative financial instruments to protect the value or fix the amount of certain cash flows in terms of the functional currency of the business unit with that exposure.

Table of Contents

As required by ASC 815, the Company records all derivatives on the balance sheet at fair value. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative, whether the Company has elected to designate a derivative in a hedging relationship and apply hedge accounting and whether the hedging relationship has satisfied the criteria necessary to apply hedge accounting. The Company enters into derivative contracts that are intended to economically hedge certain of its risk, even though hedge accounting does not apply or the Company elects not to apply hedge accounting. Currently, the Company does not apply hedge accounting to any of its foreign currency derivatives.

Accounting For Income Taxes

Significant management judgment is required in determining the provision for income taxes, deferred tax assets and liabilities and any valuation allowance recorded against deferred tax assets. Net deferred tax assets as of December 31, 2014 and December 31, 2013 were \$11,601,000 and \$13,043,000, respectively, net of valuation allowances of \$1,720,000 for 2014 and \$2,003,000 for 2013. The 2014 and 2013 valuation allowances were primarily related to discontinued operations. The carrying value of the Company's net deferred tax assets assumes that the Company will be able to generate sufficient future taxable income in certain tax jurisdictions. Valuation allowances are attributable to uncertainties related to the Company's ability to utilize certain deferred tax assets prior to expiration. These deferred tax assets primarily consist of the state tax expense on certain expenses and loss carryforwards. The valuation allowance is based on estimates of taxable income, expenses and credits by the jurisdictions in which the Company operates and the period over which deferred tax assets will be recoverable. In the event that actual results differ from these estimates or these estimates are adjusted in future periods, the Company may need to establish an additional valuation allowance that could materially impact its consolidated financial position and results of operations. Each quarter, management evaluates the ability to realize the deferred tax assets and assesses the need for additional valuation allowances.

The Company applies the provisions of ASC 740-10-55 to all tax positions for which the statute of limitations remain open. The amount of unrecognized tax benefits as of December 31, 2014 was \$865,000, excluding interest and penalties. This amount represents unrecognized tax benefits, which, if ultimately recognized, will reduce the Company's effective tax rate. As of December 31, 2014 and December 31, 2013, the Company reported accrued interest and penalties related to unrecognized tax benefits of \$81,000 and \$100,000, respectively. For additional disclosures related to accounting for income taxes, see Note 11 in the Notes to the Consolidated Financial Statements included in Part IV of this Annual Report on Form 10-K.

Legal Contingencies

The Company is currently involved in certain legal proceedings. As discussed in Note 16 in the Notes to the Consolidated Financial Statements included in Part IV to this Annual Report on Form 10-K, the Company has accrued an estimate of the probable costs for the resolution of these claims. This estimate has been developed based on the current stage of negotiations and data from the Company's environmental engineering consultants and legal counsel. Management does not believe these proceedings will have a further material adverse effect on the Company's consolidated financial position, except as discussed in Note 16. As with litigation, generally the outcome is inherently uncertain. It is possible, however, that future results of operations for any particular quarterly or annual period could be materially affected by changes in these assumptions, or the effectiveness of these strategies, related to these proceedings.

Table of Contents**Goodwill**

The Company has allocated its adjusted goodwill balance to its reporting units. The Company tests goodwill for impairment annually at fiscal year-end and in interim periods if certain events occur indicating that the carrying value of goodwill may be impaired, such as a significant adverse change in business climate, an adverse action or assessment by a regulator or the decision to sell a business, that would make it more likely than not that an impairment may have occurred. The goodwill impairment test is a two-step process. The first step of the impairment analysis compares the fair value to the net book value. In determining fair value, the accounting guidance allows for the use of several valuation methodologies, although it indicates that quoted market prices are the best evidence of fair value. The Company uses a combination of expected present values of future cash flows and comparative market multiples. It has also performed a review of market capitalization with estimated control premiums at December 31, 2014. If the fair value of a reporting unit is less than its net book value, the Company would perform a second step in its analysis, which compares the implied fair value of goodwill to its carrying amount. If the carrying amount of goodwill exceeds its implied fair value, the Company recognizes an impairment loss equal to that excess amount. Application of the goodwill impairment test requires judgment, including the identification of reporting units, assigning assets and liabilities to reporting units, assigning goodwill to reporting units and determining the fair value of each reporting unit. Significant judgments required to estimate the fair value of reporting units include estimating future cash flows, determining appropriate discount and growth rates, operating margins and working capital requirements, selecting comparable companies within each reporting unit and market and determining control premiums. Changes in these estimates and assumptions could materially affect the determination of fair value for each reporting unit.

The assumptions about future cash flows and growth rates are based on the budget and long-term business plans of each reporting unit. Such assumptions take into account numerous factors including but not limited to historical experience, anticipated economic conditions, new product introductions, product cost and cost structure of each reporting unit. The growth rates assumptions were generally consistent with those utilized in prior year forecasted periods, except in certain circumstances where operational strategies support otherwise.

For 2014, there were three reporting units identified for impairment testing. Those units were SLPE, MTE and SL-MTI. For 2013 and 2012, there were four reporting units identified for impairment testing. Those units were SLPE, TEAL, MTE and RFL. There were no impairment charges related to goodwill recorded during 2014 and 2012. Based upon the assumptions described above, the Company's 2013 annual impairment test resulted in our assessment that the carrying value of the TEAL reporting unit exceeded its fair value. As a result of the annual impairment test, a \$5,055,000 non-cash goodwill impairment charge was assessed and recorded in goodwill impairment expense on the Consolidated Statements of Income in the fourth quarter of 2013 in the Company's High Power Group segment. The goodwill impairment was primarily due to a decline in medical imaging equipment market sales during the year coupled with the cancellation of a large solar contract during the fourth quarter of 2013. This resulted in the TEAL reporting unit having lower sales and cash flows for the year than previously projected and lower forecasts of future sales and cash flows for the reporting unit.

Table of Contents

As of December 31, 2014, the total fair values for each of the remaining reporting units in all of the Company's segments exceeded their total carrying values by 168% or greater. Although our analysis regarding the fair values of the goodwill and indefinite lived intangible assets indicates that they exceed their respective carrying values, materially different assumptions regarding the future performance of the Company's businesses or significant declines in the Company's stock price could result in additional goodwill impairment losses.

The Company has performed sensitivity analysis to illustrate the impact of changes in assumptions underlying the first step of the impairment test for all reporting units that have goodwill. Based upon the Company's annual assessment:

a one percentage point decrease in the perpetual growth rate would reduce the indicated fair value of each reporting unit by a range of approximately 2% to 3% and would not result in an impairment of any reporting unit;

a three percentage point decrease in the operating margin (operating income before tax) would reduce the indicated fair value of each reporting unit by a range of approximately 8% to 16% and would not result in an impairment of any reporting unit; or

a one percentage point increase in the discount rate would reduce the indicated fair value of each reporting unit by a range of approximately 4% to 5% and would not result in an impairment of any reporting unit.

Goodwill totaled \$13,072,000 and \$17,666,000 as of December 31, 2014 and December 31, 2013 (representing 10% and 16% of total assets), respectively.

Impairment Of Long-Lived And Intangible Assets

The Company's long-lived and intangible assets primarily consist of fixed assets, goodwill and other intangible assets. The Company periodically reviews the carrying value of its long-lived assets held and used, other than goodwill and intangible assets with indefinite lives, and assets to be disposed of whenever events or circumstances indicate that the carrying amount of an asset may not be recoverable. The Company assesses the recoverability of the asset by estimated cash flows and at times by independent appraisals. It compares estimated cash flows expected to be generated from the related assets, or the appraised value of the asset, to the carrying amounts to determine whether impairment has occurred. If the estimate of cash flows expected to be generated changes in the future, the Company may be required to record impairment charges that were not previously recorded for these assets. If the carrying value of a long-lived asset is considered impaired, an impairment charge is recorded for the amount by which the carrying value of the long-lived asset exceeds its fair value. Asset impairment evaluations are by nature highly subjective. There were no impairment charges related to long-lived and intangible assets recorded during 2014, 2013 and 2012.

Table of Contents

Environmental Expenditures

Expenditures that relate to current operations are charged to expense or capitalized, as appropriate. Expenditures that relate to an existing condition caused by formerly owned operations are expensed and recorded as part of discontinued operations, net of tax. Expenditures include costs of remediation, consulting, legal fees to defend against claims for environmental liability and certain costs to assist the Company with compliance matters and administrative tasks. Liabilities are recorded when remedial efforts are probable and the costs can be reasonably estimated. The liability for remediation expenditures includes, as appropriate, elements of costs such as site investigations, consultants' fees, feasibility studies, outside contractor expenses and monitoring expenses. Estimates are not discounted and they are not reduced by potential claims for recovery from insurance carriers. The Company does not currently have any outstanding claims against insurance carriers related to remediation expenditures. The liability is periodically reviewed and adjusted to reflect current remediation progress, prospective estimates of required activity and other relevant factors, including changes in technology or regulations. For additional information related to environmental matters, see Note 16 of the Notes to the Consolidated Financial Statements.

The above listing is not intended to be a comprehensive list of all of the Company's accounting policies. In many cases, the accounting treatment of a particular transaction is specifically dictated by GAAP with no need for management's judgment in its application. There are also areas in which management's judgment in selecting any available alternatives would not produce a materially different result. For a discussion of accounting policies and other disclosures required by GAAP, see the Company's audited Consolidated Financial Statements and Notes thereto included in Part IV of this Annual Report on Form 10-K.

Table of Contents**Liquidity And Capital Resources**

	December 31, 2014	December 31, 2013	\$ Variance	% Variance
	(in thousands)			
Cash and cash equivalents	\$ 31,950	\$ 7,163	\$ 24,787	346%
Bank debt	\$	\$ 1,000	\$ (1,000)	(100%)
Capital leases	\$	\$ 235	\$ (235)	(100%)
Working capital	\$ 56,120	\$ 37,051	\$ 19,069	51%
Shareholders' equity	\$ 77,321	\$ 59,175	\$ 18,146	31%

The Company's liquidity needs have related to, and are expected to continue to relate to, capital investments, product development costs, acquisitions, working capital requirements, and certain environmental and legal remediation costs. The Company has met its liquidity needs primarily through cash generated from operations and, to a lesser extent, through bank borrowings. The Company believes that cash provided by operating activities from continuing operations and funding available under the 2012 Credit Facility will be adequate to service debt and meet working capital needs, capital investment, and product development requirements for the next twelve months.

At December 31, 2014, the Company reported \$31,950,000 of cash and cash equivalents, compared to \$7,163,000 of cash and cash equivalents as of December 31, 2013. Cash and cash equivalents increased in 2014 primarily due to \$17,207,000 of net cash provided by continuing operations and \$7,628,000 of net cash provided by discontinued operations. Net cash provided by continuing operations consisted of \$19,849,000 of net cash provided by operating activities, which was partially offset by \$1,491,000 of net cash used in investing activities and \$1,151,000 of net cash used in financing activities. Net cash provided by discontinued operations consisted of \$17,783,000 of net cash provided by investing activities, which was partially offset by \$9,920,000 of net cash used in operating activities and \$235,000 of net cash used in financing activities.

During 2014, net cash provided by operating activities from continuing operations was \$19,849,000 as compared to net cash provided by operating activities from continuing operations of \$13,658,000 during 2013. The primary sources of cash from operating activities during 2014 were income from continuing operations of \$14,180,000, an increase in accrued income taxes of \$4,152,000, an increase in accounts payable of \$2,130,000, a decrease in deferred income tax assets of \$1,615,000, and an increase in other accrued liabilities of \$1,321,000. In addition, depreciation and amortization expense of \$2,220,000 was added to income from continuing operations. The increase in accrued income taxes was primarily due to the timing of tax payments related to the gain from the sale of the company's RFL subsidiary during the fourth quarter of 2014. All of the Company's operating segments recorded increases in accounts payable during 2014, which was primarily the result of increased purchases during the fourth quarter of 2014 to meet customer demand. The decrease in deferred income tax assets was primarily due to environmental payments in 2014 for environmental claims, remediation, and other services which were accrued for in prior years. The increase in other accrued liabilities was primarily due to the reclassification of the fair value of the foreign currency forward contracts from other current assets in 2013 to other current liabilities in 2014 due to an unrealized loss which was recognized during 2014. The sources of cash from operating activities were partially offset by an increase in accounts receivable of \$5,129,000, a gain from the sale of common stock classified as available-for-sale securities of \$1,691,000, and a gain from the sale of property, plant and equipment of \$1,127,000. All of the Company's operating segments recorded increases in accounts receivable, which was primarily the result of increased sales during the fourth quarter of 2014 as compared to 2013. The gain from the sale of property, plant and equipment was primarily due to the sale of the Company's former manufacturing facility located in Xianghe, China. The Company relocated to a new manufacturing facility in Xianghe, China during the fourth quarter of 2014.

Table of Contents

During 2013, net cash provided by operating activities from continuing operations was \$13,658,000. The primary sources of cash from operating activities during 2013 were income from continuing operations of \$7,478,000 and an increase in other accrued liabilities of \$3,368,000. In addition, a non-cash goodwill impairment expense of \$5,055,000 related to the Company's TEAL reporting unit, which is part of the High Power Group segment, and depreciation and amortization expense of \$2,010,000 were added to income from continuing operations. The increase in other accrued liabilities was primarily due to an increase in accrued bonus and other compensation costs as the result of the Company's improved financial performance during 2013 as compared to 2012. The sources of cash from operating activities were partially offset by a decrease in accounts payable of \$1,860,000, an increase in other assets of \$1,729,000, and an increase in accounts receivable of \$1,028,000. The largest decrease in accounts payable occurred at SLPE, which was partially offset by a large increase at MTE, which is part of the High Power Group. The decrease at SLPE was due to less inventory purchases during the fourth quarter of 2013 as compared to the fourth quarter of 2012 primarily due to lean initiatives to reduce inventory levels. The increase at MTE was due to an increase in inventory purchases during the fourth quarter of 2013 in order to fulfill a large customer order which was delivered during the beginning of 2014. The increase in other assets was primarily due to the increase in fair value of certain publicly traded equity securities which the Company has classified as available-for-sale securities coupled with an increase in prepaid taxes at SLPE. The largest increase in accounts receivable occurred at SL-MTI, which was partially offset by a large decrease at SLPE. The increase at SL-MTI was primarily due to an increase in sales during the fourth quarter of 2013 as compared to 2012. The increase at SL-MTI was also due to decreased collections in December 2013 as compared to December 2012. The decrease in accounts receivable at SLPE was primarily related to a large VAT receivable in 2012 with no comparable receivable in 2013.

During 2014, net cash used in operating activities from discontinued operations was \$9,920,000 as compared to \$3,959,000 during 2013. The primary uses of cash from operating activities from discontinued operations during 2014 were an after-tax gain of \$4,322,000 from the sale of the company's RFL subsidiary (proceeds of \$18,000,000 are recorded as part of investing activities), and \$5,902,000 of environmental payments. The primary uses of cash from operating activities from discontinued operations during 2013 were \$4,333,000 of environmental payments.

On November 17, 2014, SL Delaware Holdings, a wholly-owned subsidiary of the Company, sold all of the issued and outstanding capital stock of RFL to Hubbell for aggregate cash consideration of \$20,000,000, subject to a post-closing working capital adjustment which amounted to \$299,000 and was received in February 2015. A portion of the cash consideration (\$2,000,000, subject to adjustment after nine months), is being held in escrow to secure the indemnification obligations of SL Delaware Holdings. As a result, the Company recognized a pre-tax gain of \$6,650,000 (\$4,322,000 net of tax).

Table of Contents

During the second quarter of 2013, the Company reached an agreement with both the DOJ and EPA related to its liability for both OU-1 and OU-2 pursuant to the terms of a Consent Decree which governs the agreement. During 2014 and 2013, the Company paid \$2,211,000 and \$2,185,000, which included interest, related to its obligation under the Consent Decree. The remaining environmental payments in 2014 and 2013 were related to environmental remediation costs, consulting fees, and legal expenses associated with the past operations of the Company's five environmental sites.

During 2014, net cash used in investing activities from continuing operations was \$1,491,000 as compared to net cash used in investing activities from continuing operations of \$5,116,000 during 2013. Net cash used in investing activities from continuing operations during 2014 was primarily related to the acquisition of certain assets of Dynetic of \$3,973,000 and purchases of property, plant and equipment of \$2,850,000, which were partially offset by the proceeds from the sale of common stock classified as available-for-sale securities of \$4,054,000 and proceeds from the sale of property, plant and equipment of \$1,657,000. Purchases of property, plant and equipment were primarily used to upgrade production capabilities and technology, and for leasehold improvements related to the relocation to a new manufacturing facility in Xianghe, China. Proceeds from the sale of property, plant and equipment was primarily related to the sale of Company's Xianghe, China manufacturing facility previously mentioned. During 2013, net cash used in investing activities from continuing operations was primarily for the purchases of property, plant and equipment of \$2,434,000 and the purchases of common stock classified as available-for-sale securities of \$2,362,000. Purchases of property, plant and equipment were primarily used to upgrade production capabilities and technology, and to acquire new production equipment in Mexico.

On July 25, 2014, the Company entered into an Asset Purchase Agreement pursuant to which it purchased certain assets and assumed certain liabilities of Dynetic, for an initial purchase price of \$4,000,000 less a working capital adjustment of \$27,000. The Asset Purchase Agreement also includes a possible earn-out, currently estimated at \$288,000, which is comprised of annual payments based on sales of Dynetic products and sales to Dynetic customers over the period immediately following the date of the Dynetic Acquisition through December 31, 2017. The Dynetic Acquisition was paid for in cash.

During 2014, net cash provided by investing activities from discontinued operations was \$17,783,000 as compared to net cash used in investing activities from discontinued operations of \$416,000 during 2013. Net cash provided by investing activities from discontinued operations during 2014 was primarily related to the \$18,000,000 of cash proceeds received from the sale of the company's RFL subsidiary, which was partially offset by purchases of property, plant and equipment of \$217,000 by RFL prior to the divestiture. Net cash used in investing activities from discontinued operations during 2013 was related to RFL's purchases of property, plant and equipment of \$316,000 and other assets of \$100,000.

During 2014, net cash used in financing activities from continuing operations was \$1,151,000 as compared to net cash used in financing activities from continuing operations of \$246,000 during 2013. Net cash used in financing activities from continuing operations during 2014 was primarily related to \$1,000,000 of payments made under the 2012 Credit Facility and \$106,000 of payments made for the purchase of Company stock pursuant to the Company's 2010 Repurchase Plan (described in Part II, Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities). Cash used in financing activities from continuing operations during 2013 was primarily related to the purchase of Company stock pursuant to the Company's 2010 Repurchase Plan in the amount of \$2,079,000, which was partially offset by \$1,000,000 of net borrowings under the 2012 Credit Facility and \$743,000 of proceeds from the stock option exercises.

Table of Contents

On August 9, 2012, the Company entered into a Credit Agreement with PNC Bank, National Association, as administrative agent and lender (PNC Bank), and the lenders from time to time party thereto, as amended (the 2012 Credit Facility), to replace its 2008 Credit Facility. The 2012 Credit Facility provides for borrowings up to \$40,000,000 and under certain conditions maximum borrowings up to \$70,000,000. The 2012 Credit Facility included a \$5,000,000 sublimit for letters of credit (subsequently amended on March 11, 2013, as described below) and provides for a separate \$10,700,000 letter of credit which expires one year from the date of closing, with annual extensions. The 2012 Credit Facility expires on August 9, 2016.

Borrowings under the 2012 Credit Facility bear interest, at the Company's option, at the London interbank offering rate (LIBOR) plus a margin rate ranging from 1.25% to 2.0%, or the higher of a Base Rate plus a margin rate ranging from 0.25% to 1.0%. The Base Rate is equal to the highest of (i) the Federal Funds Open Rate plus 0.5% and (ii) the Prime Rate and (iii) the Daily Libor Rate plus 1%. The margin rates are based on certain leverage ratios, as defined. The Company is subject to compliance with certain financial covenants set forth in the 2012 Credit Facility, including, but not limited to, indebtedness to EBITDA, as defined, minimum levels of fixed charges and limitations on capital expenditures, as defined. Availability under the 2012 Credit Facility is based upon the Company's trailing twelve month EBITDA, as defined.

The Company's obligations under the 2012 Credit Facility are secured by the grant of security interests in substantially all of its assets.

On March 11, 2013, the Company entered into a First Amendment (the First Amendment) to the 2012 Credit Facility. The First Amendment, among other things, (a) amends the Letter of Credit (LC) sublimit amount to the lesser of (i) an amount equal to \$5,000,000 plus the aggregate amount of Designated Usage LC issued and outstanding under the Designated Usage LC sublimit or (ii) \$25,000,000 and (b) allows the Company to enter into foreign currency exchange services with Loan Parties on an unsecured basis and that such obligations shall not exceed at any time an aggregate amount equal to \$3,500,000.

On May 28, 2013, a letter of credit in the amount of \$8,564,000 was issued in favor of the EPA to provide financial assurance related to the Company's environmental payments in accordance with the terms of the Consent Decree reached with the DOJ and EPA related to its liability under the terms of the Consent Decree. The letter of credit requires an annual commitment fee of 0.125% and standby commission of 1%, and does not reduce amounts available under the 2012 Credit Facility.

On May 20, 2014, the Company made the second payment related to its obligation under the Consent Decree in the amount of \$2,141,000, excluding interest. As of December 31, 2014, the total liability under the letter of credit equaled \$6,423,000. The letter of credit expires on May 28, 2015, and is renewed annually.

Table of Contents

On June 20, 2013, the Company entered into a Second Amendment and Joinder to Credit Agreement and to Security Agreement (the "Second Amendment"), which amends the 2012 Credit Facility in order to reflect the Reincorporation of the Company. The Second Amendment, among other things, joins the Company as a "Borrower" under the Credit Agreement and a "Debtor" under the Security Agreement entered into by SL-NJ in connection with the 2012 Credit Facility.

On September 15, 2014, the Company entered into a Third Amendment and Joinder to Credit Agreement and to Security Agreement (the "Third Amendment") that amended the terms of the 2012 Credit Facility. The Third Amendment, among other things, joined SLMTI DS as a borrower and debtor under the 2012 Credit Facility following consummation of the Dynetic Acquisition, and increases the permitted amount of foreign currency exchange services to the borrowers and guarantors under the 2012 Credit Facility, which are to be provided on an unsecured basis, to a notional contract amount of such obligations not to exceed at any time an aggregate amount equal to \$15,500,000. Also, the Third Amendment allows the Company, in certain circumstances, to make investments not to exceed \$1,000,000 at any one time during the term of the 2012 Credit Facility.

As of December 31, 2014, the Company had no outstanding debt. As of December 31, 2013, the Company's total debt equaled \$1,235,000, which was comprised of \$1,000,000 under the 2012 Credit Facility and \$235,000 related to capital leases. At December 31, 2014 and December 31, 2013, the Company had total availability under the 2012 Credit Facility of \$39,527,000 and \$38,526,000, respectively. The Company's percentage of total debt to total shareholders' equity was 2.1% as of December 31, 2013. The Company's current ratio was 2.27 to 1 at December 31, 2014 and 2.10 to 1 at December 31, 2013.

Capital expenditures from continuing operations were \$2,850,000 in 2014, which represented an increase of \$416,000 from the capital expenditure levels of 2013. The Company anticipates spending approximately \$3,800,000 on property, plant and equipment, used primarily to upgrade production capabilities and upgrade technology during 2015. The 2015 capital additions are expected to be funded primarily through cash from operating activities.

With the exception of the segment reported as "Unallocated Corporate Expenses" (which consists primarily of corporate office expenses, financing activities, certain treasury, risk management, legal, litigation, public reporting costs, certain strategic costs, legacy costs and costs not specifically allocated to the reportable business segments), all of the Company's operating segments recorded income from operations during 2014 and 2013.

Table of Contents**Contractual Obligations**

The following is a summary of the Company's contractual obligations at December 31, 2014 for the periods indicated:

	Less Than 1 Year	1 to 3 Years	3 to 5 Years	After 5 Years	Total
	(in thousands)				
Operating leases	\$ 1,831	\$ 2,464	\$ 840	\$ 428	\$ 5,563
Payments to EPA ⁽¹⁾	2,193	4,334			6,527
Letters of credit ⁽²⁾	473				473
	\$ 4,497	\$ 6,798	\$ 840	\$ 428	\$ 12,563

- (1) On May 28, 2013 a letter of credit was issued in favor of the EPA to provide financial assurance related to the Company's environmental payments in accordance with the terms of the Consent Decree reached with the DOJ and EPA related to its liability for both OU-1 and OU-2. In accordance with the Consent Decree, the Company has agreed to pay a fixed sum for the EPA's past cost for OU-2 and a portion of the EPA's past cost for OU-1. The payments are to be made in five equal payments of \$2,141,000, for a total \$10,705,000, plus interest. On May 10, 2013, the Company made the first payment related to its obligation under the Consent Decree in the amount of \$2,185,000, which included interest. On May 20, 2014, the Company made the second payment related to its obligation under the Consent Decree in the amount of \$2,211,000, which included interest. The next three payments will be made on the anniversary of the prior year's payment plus ten days in the same amount of \$2,141,000, plus interest (See Note 16 - Commitments and Contingencies for the terms and conditions of the Consent Decree).
- (2) As of December 31, 2014, the Company was contingently liable for an outstanding letter of credit issued for casualty insurance requirements. The letter of credit has a maximum maturity of twelve months from the date of issuance.

The table above excludes the Company's gross liability for uncertain tax positions of \$946,000, including accrued interest and penalties, which totaled \$81,000 as of December 31, 2014, since the Company cannot predict with reasonable reliability the timing or certainty of cash settlements to the respective taxing authorities.

Off-Balance Sheet Arrangements

It is not the Company's usual business practice to enter into off-balance sheet arrangements such as guarantees on loans and financial commitments, indemnification arrangements and retained interests in assets transferred to an unconsolidated entity for securitization purposes. Consequently, the Company has no off-balance sheet arrangements which have, or are reasonably likely to have, a material current or future effect on its financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources, except for operating lease commitments and letters of credit disclosed in the table above and inventory purchase commitments.

In an attempt to limit the volatility of copper costs, the Company has in the past, and may in the future, enter into purchase agreements for copper. As of December 31, 2014, inventory purchase commitments for copper totaled \$914,000. As of December 31, 2014, no purchase commitments for copper were greater than nine months.

Table of Contents**Restructuring Costs**

Restructuring activity for the period ended December 31, 2014 was as follows:

	Accrual at Beginning of the Year	Charged to Earnings	Cash Payments (in thousands)	Accrual at December 31, 2014
2014 Plan				
Severance and other employee-related charges	\$	\$ 463	\$ 463	\$

No restructuring activity was recognized during the period ended December 31, 2013.

2014 Restructuring Plan

During the first quarter of 2014, the Company announced to its employees a restructuring plan (2014 Plan) to align its costs with current and projected sales activity. The costs reductions were primarily production, engineering, selling and administration employees at TEAL, which is part of the High Power Group. As of December 31, 2014, there was a consolidated charge to earnings of \$463,000, which was composed of severance and other employee related charges. The total number of employees affected by the restructuring plan was 11, all of which had been terminated during the first quarter of 2014.

2012 Restructuring Plan

During the third quarter of 2012, the Company announced to its employees a restructuring plan (2012 Plan) to align its costs with current and projected sales activity. The costs reductions were primarily direct labor employees and engineering, selling and administration employees at SLPE and TEAL, which is part of the High Power Group. During the year ended December 31, 2012, there was a consolidated charge to earnings of \$790,000, which was comprised of a \$732,000 charge at SLPE and a \$58,000 charge at TEAL. The charges are composed of severance and other employee related charges. The total number of employees affected by the restructuring plan was 55, all of which had been terminated as of December 31, 2012.

N/M Not material.

⁽¹⁾ Fiscal 2013 includes a \$5,055,000 goodwill impairment charge related to the TEAL reporting unit. During 2014, consolidated net sales increased by \$19,759,000 or 11%, compared to net sales during 2013. When compared to 2013, net sales of SLPE decreased by \$3,584,000, or 5%; net sales of the High Power Group increased by \$16,580,000, or 24%; and net sales of SL-MTI increased by \$6,763,000, or 18%. During 2014, SL-MTI benefited from \$1,861,000 of sales related to the Dynetic Acquisition, which was completed on July 25, 2014.

In 2014, the Company's income from operations increased by \$9,327,000, or 91%, when compared to 2013. Income from operations was 10% of net sales in 2014 compared to 6% in 2013. All of the Company's operating entities recorded income from operations in 2014 and 2013. Unallocated Corporate Expenses increased by \$1,269,000, or 22%, in 2014 compared to 2013. In addition, income from operations for SL-MTI was negatively impacted by \$598,000 primarily due to the recognition of a non-cash inventory purchase accounting adjustment, acquisition costs, and integration costs that were recognized during 2014 associated with the Dynetic Acquisition. During 2013, the Company's income from operations was negatively impacted by a \$5,055,000 non-cash goodwill impairment charge related to the Company's TEAL reporting unit, which is part of the High Power Group segment.

Table of Contents

Income from continuing operations in 2014 was \$14,180,000 or \$3.39 per diluted share, compared to income from continuing operations in 2013 of \$7,478,000, or \$1.79 per diluted share. Income from continuing operations was approximately 7% of net sales in 2014, compared to income from continuing operations of 4% of net sales in 2013. During 2013, a \$5,055,000 (\$3,172,000, net of tax) non-cash goodwill impairment charge had a negative impact of approximately \$0.76 per diluted share.

The Company's effective tax rate increased from 25% in 2013 to 33% in 2014. The increase in the effective tax rate was primarily due to federal research and development credits recorded in 2013 that were not available in 2014. In 2013, income from continuing operations benefited from research and development tax credits by approximately \$1,051,000, or \$0.25 per diluted share.

The Company's business segments and the components of operating expenses are discussed in the following sections.

SLPE

SLPE recorded net sales of \$74,593,000 or 36% of consolidated net sales in 2014, compared to \$78,177,000, or 42% of consolidated net sales in 2013. The decrease in net sales at SLPE was primarily due to a decrease in sales in the industrial and medical product lines, which were partially offset by an increase in sales in the data communications product line primarily due to an increase in sales to a large domestic distributor. The decrease in the industrial product line was primarily due to a decrease in sales to several large international customers and a decrease in domestic distributor sales. The decrease in the medical product line was primarily due to a weakening of the domestic medical market, which resulted in a decline in domestic distributor sales. The decrease in sales in the medical product line was also due to the Company's current year strategy to exit certain low margin business. The decreases in the medical market were partially offset by an increase in sales to the Asian medical market. Domestic sales decreased by 11% while international sales increased by 12% during 2014. Returns and distributor credits, which represented approximately 1% of SLPE gross sales in 2014 and 2013, also negatively affected net sales.

SLPE reported income from operations of \$7,217,000 in 2014, compared to \$6,558,000 in 2013. Income from operations increased in 2014 primarily due to a 2% decrease in cost of products sold as a percentage of net sales, and a 2% decrease in operating costs, which were partially offset by a 5% decrease in sales. Operating costs decreased during 2014 primarily due to a decrease in selling, general and administrative expenses of \$462,000, or 4%, which was partially offset by an increase in engineering and product development costs of \$253,000, or 6%.

High Power Group

The High Power Group reported net sales of \$85,332,000, or 42% of consolidated net sales in 2014, compared to \$68,752,000, or 37% of consolidated net sales in 2013. The increase in net sales during 2014 was due to an increase in net sales at MTE of \$9,038,000, or 24%, and an increase at TEAL of \$7,542,000, or 24%.

Table of Contents

MTE recognized record sales during 2014. MTE's sales increase during 2014 was primarily attributable to an increase in new product sales for harmonic filters and motor protection filters. In particular, MTE recognized a large order during 2014 for new product harmonic filter sales from a new customer in the electronic equipment industry. The increase in sales was partially offset by a decrease in domestic harmonic filter sales to a large customer in the oil and gas industry. Domestic sales increased by 18% and international sales increased by 48%.

TEAL also recognized record sales during 2014. TEAL recorded an increase in net sales in all product lines during 2014 except in the solar market. TEAL recognized the largest increase in sales in the medical imaging equipment market primarily due to an increase in new product sales to a large international customer, which was partially offset by decreased sales in the solar market primarily due to a decrease in sales to a large domestic customer. Domestic sales decreased by 15% while international sales increased by 227% during 2014.

The High Power Group reported income from operations of \$12,175,000 in 2014, compared to \$2,206,000 in 2013. The increase in income from operations during 2014 was due to an increase at TEAL of \$6,155,000 and an increase at MTE of \$3,814,000. Income from operations increased in 2014 primarily due to a 24% increase in sales, a 1% decrease in cost of products sold as a percentage of net sales, and a 23% decrease in operating costs. Operating costs decreased by \$4,325,000 during 2014 primarily due to a non-cash goodwill impairment charge of \$5,055,000 recorded at TEAL during 2013. Operating costs also decreased due to a decrease in engineering and product development costs of \$721,000, or 18%, which was offset by an increase in selling, general and administrative expenses of \$913,000, or 10%, and \$463,000 of restructuring charges incurred during 2014 at TEAL.

SL-MTI

SL-MTI recorded net sales of \$44,492,000, or 22% of consolidated net sales in 2014, compared to \$37,729,000, or 21% of consolidated net sales in 2013. SL-MTI recorded \$1,861,000 of sales related to the Dynetic Acquisition during 2014. As a result, comparable sales, net of the acquisition, increased by \$4,902,000, or 13%, during 2014 as compared to 2013. Excluding the Dynetic Acquisition, SL-MTI experienced an increase in net sales in all product lines during 2014. The largest increases in net sales, excluding the Dynetic Acquisition, were in the commercial aerospace and medical industries. The increase in the commercial aerospace industry was primarily due to increased component parts sales related to Airbus and Boeing 787 programs. The increase in the medical industry was primarily due to an increase in sales to a large international customer located in the United Kingdom. Excluding the Dynetic Acquisition, domestic sales increased by 8% and international sales increased by 55% during 2014.

SL-MTI reported income from operations of \$7,170,000 in 2014, compared to \$7,202,000 in 2013. Income from operations was negatively impacted by \$598,000 due to the Dynetic Acquisition, which recognized additional expenses during 2014 as previously mentioned. Excluding the Dynetic Acquisition, income from operations increased by \$566,000 in 2014 primarily due to a 13% increase in net sales, which was partially offset by a 2% increase in cost of products sold as a percentage of net sales and an increase in operating costs of \$469,000, or 7% during 2014. Operating costs increased during 2014 primarily due to an increase in selling, general and administrative expenses of \$214,000, or 6%, and an increase in engineering and product development costs of \$169,000, or 6%.

Table of Contents**Cost of Products Sold**

Cost of products sold was approximately 68% of net sales in 2014 and 2013. Cost of products sold as a percentage of net sales was flat while net sales increased 11% during 2014.

During 2014, SLPE and the High Power Group each recorded an improvement in cost of products sold as a percentage of net sales, while SL-MTI recorded an increase in cost of products sold as a percentage of net sales. SLPE's cost of products sold as a percentage of net sales improved by approximately 2% during 2014 primarily due to an improved product mix and current year strategy to exit certain low margin business, which was partially offset by an increase in the inventory reserve. The decrease in SLPE's cost of products sold as a percentage of net sales was also due to \$568,000 of additional costs incurred in 2013 due to a work stoppage in China during March 2013. Cost of products sold as a percentage of net sales at the High Power Group improved by approximately 1% during 2014 due to a decrease of 3% at MTE, which was partially offset by an increase of 2% at TEAL. The decrease in cost of products sold as a percentage of net sales at MTE was primarily due to increased sales volumes, which improved overhead absorption, an improved product mix, and a shift in manufacturing costs to a lower cost region. The increase in cost of products sold as a percentage of net sales at TEAL was primarily due to an unfavorable product mix during 2014, which was partially offset by increased sales volumes. SL-MTI recorded a 3% increase in its cost of products sold as a percentage of net sales during 2014. Excluding the Dynetic Acquisition, SL-MTI recorded a 2% increase in cost of products sold as a percentage of net sales primarily due to an unfavorable sales mix, which was partially offset by an increase in sales volumes, which improved overhead absorption. All operating entities are at various stages of emphasizing lean initiatives throughout the factory floor to reduce costs of products sold.

Engineering and Product Development Expenses

Engineering and product development expenses were approximately 5% of net sales in 2014, compared to 6% in 2013. Engineering and product development expenses decreased by \$299,000, or 3% during 2014 due to a decrease of \$721,000 at the High Power Group, which was partially offset by an increase of \$253,000 at SLPE and an increase of \$169,000 at SL-MTI. The decrease in engineering and product development costs at the High Power Group was primarily due to a decrease at TEAL. The decrease at TEAL was due to decreased consulting fees for new product development and decreased employee compensation costs due to a reduction in staffing levels associated with the implementation of a current year restructuring plan. The decrease at TEAL was partially offset by an increase at MTE due to the addition of engineering staff which increased employee salary and other compensation costs, and an increase in new product development costs. The increase in engineering and product development costs at SLPE was primarily due to an increase in consulting fees and other compensation costs. The increase in engineering and product development costs at SL-MTI was primarily due to an increase in prototype expenses during 2014.

Selling, General and Administrative Expenses

Selling, general and administrative expenses were approximately 16% of net sales in 2014 and 2013. During 2014, selling, general and administrative expenses increased by \$2,751,000, or 9%, while sales increased by 11%.

Table of Contents

During 2014, SL-MTI and the High Power Group each recorded an increase in selling, general and administrative expenses, while SLPE recorded a decrease in selling, general and administrative expenses. Selling, general and administrative expenses at SL-MTI increased by \$1,026,000 primarily due to \$812,000 of costs related to the Dynetics. The remainder of the increase at SL-MTI was primarily due to an increase in environmental remediation costs and increased salaries due to higher staffing levels. The High Power Group recorded an increase in selling, general and administrative expenses of \$913,000 primarily due to an increase at MTE. The increase at MTE was primarily due to increased salaries due to higher staffing levels and increased commissions and other compensation costs on higher sales volumes. Selling, general and administrative expenses at TEAL were relatively flat during 2014. Selling, general and administrative expenses at SLPE decreased by \$462,000 in 2014 primarily due to a decrease in employee compensation costs. The decrease at SLPE was also due to \$107,000 of additional costs incurred in 2013 due to a work stoppage in China during March 2013. Unallocated Corporate Expenses increased by \$1,269,000 primarily due to increased non-cash stock compensation costs and certain strategic costs that were not allocated to the operating entities. The increase was also due to the Delaware state franchise tax incurred in 2014 resulting from the Company's reincorporation in Delaware in June 2013.

Depreciation and Amortization Expenses

Depreciation and amortization expenses in 2014 were \$2,220,000, an increase of \$210,000, or 10%, compared to depreciation and amortization expenses in 2013. Depreciation and amortization expenses were approximately 1% of net sales in 2014 and 2013.

Restructuring Costs

Restructuring costs were \$463,000 in 2014 and consisted of severance costs and other employee related charges. During the first quarter of 2014, the Company announced to its employees a restructuring plan to align its costs with current and projected sales activity. The costs reductions were primarily production, engineering, selling and administration employees at TEAL, which is part of the High Power Group. No restructuring costs were incurred during 2013.

Goodwill Impairment

Goodwill impairment expense in 2013 was \$5,055,000, or 2.7% of net sales, without a comparable charge in 2014. The 2013 expense is detailed in the Goodwill section of Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations and in Note 9 Goodwill and Intangibles in the Notes to the Consolidated Financial Statements included in Part IV of this Annual Report on Form 10-K.

Amortization of Deferred Financing Costs

In connection with entering into the 2012 Credit Facility and related amendments, the Company incurred deferred financing costs which are amortized over the term of the 2012 Credit Facility. During 2014 and 2013, the amortization of deferred financing costs equaled \$94,000 and \$83,000, respectively.

Interest Income and Interest Expense

In 2014, interest income was \$13,000 compared to \$12,000 in 2013. Interest expense in 2014 was \$27,000 compared to \$61,000 in 2013. The Company had no outstanding balance as of December 31, 2014, and an outstanding balance of \$1,000,000 as of December 31, 2013 under the 2012 Credit Facility.

Table of Contents

Other Gain (Loss), net

Other gain (loss), net in 2014 was a net gain of \$1,769,000 compared to net loss of \$78,000 in 2013. Other gain (loss), net in 2014 included a \$1,691,000 gain recognized from the sale of available-for-sale securities, a \$892,000 gain on the sale of the Company's former manufacturing facility located in Xianghe, China, and \$11,000 of dividend income received from investments in available-for-sale securities, which were partially offset by a \$825,000 unrealized loss on foreign currency forward contracts. Other gain (loss), net in 2013 included a \$90,000 unrealized loss on foreign currency forward contracts, which was partially offset by \$12,000 of dividend income received from investments in available-for-sale securities.

During 2013 and 2014, the Company entered into a series of foreign currency forward contracts to hedge its exposure to foreign exchange rate movements in its forecasted expenses in China and Mexico. The loss recognized in 2014 and 2013 represents the change in fair value of foreign currency forward contracts that are marked to market at year end.

Taxes (Continuing Operations)

The effective tax rate from continuing operations during 2014 was approximately 33% as compared to 25% during 2013. The increase in the effective tax rate was primarily due to the amount of federal research and development tax credits available in 2014 as compared to 2013 as well as a change in estimate related to the federal and state research and development tax credits which was recognized during the third quarter 2014. In 2013, the Company recorded a research and development tax benefit of \$1,051,000, of which \$431,000 was related to the retroactive reinstatement of the federal research and development tax credits from the enactment of the American Tax Relief Act of 2012.

Discontinued Operations

During 2014, the Company recorded income from discontinued operations, net of tax, of \$4,715,000 compared to income from discontinued operations of \$762,000, net of tax, in 2013. Income from discontinued operations during 2014 relates to a pre-tax gain of \$6,650,000 (\$4,322,000 net of tax) from the sale of RFL on November 17, 2014 (see Note 4 Discontinued Operations for further information). Income from the discontinued operations also relates to the net earnings of RFL prior to the divestiture. These gains and earnings associated with RFL were partially offset by environmental remediation costs, consulting fees, and legal expenses associated with the past operations of the Company's five environmental sites (see Note 16 Commitments and Contingencies for further information concerning the environmental sites).

Income from discontinued operations during 2013 relates to the net earnings of the Company's RFL business, which is classified as discontinued operations. The earnings associated with RFL were partially offset by environmental remediation costs, consulting fees, and legal expenses associated with the past operations of the Company's five environmental sites.

Net Income

Net income was \$18,895,000, or \$4.51 per diluted share, for 2014 compared to \$8,240,000, or \$1.97 per diluted share, for 2013. The weighted average number of shares used in the diluted earnings per share computation was 4,187,000 and 4,184,000 for 2014 and 2013, respectively.

Table of Contents**Year Ended December 31, 2013 Compared With Year Ended December 31, 2012**

	2013	Net Sales		
		Years Ended December 31,		% Variance
		2012	\$ Variance	
		(in thousands)		
SLPE	\$ 78,177	\$ 77,869	\$ 308	N/M

N/M Not material.

⁽¹⁾ Fiscal 2013 includes a \$5,055,000 goodwill impairment charge related to the TEAL reporting unit. During 2013, consolidated net sales increased by \$5,283,000, or 3%, compared to net sales during 2012. When compared to 2012, net sales at SLPE increased by \$308,000, or less than 1%; net sales of the High Power Group increased by \$3,469,000, or 5%; and net sales at SL-MTI increased by \$1,506,000, or 4%.

In 2013, the Company's income from operations was \$10,235,000 compared to \$10,138,000 in 2012, representing an increase of \$97,000, or 1%. Income from operations was approximately 6% of net sales in 2013 and 2012. During 2013, the Company's income from operations was negatively impacted by a \$5,055,000 non-cash goodwill impairment charge related to the Company's TEAL reporting unit, which is part of the High Power Group segment. Without this charge, income from operations would have increased by \$5,152,000, or 51%. During 2012, the Company's income from operations was negatively impacted by \$790,000 of restructuring costs. All of the Company's operating segments recorded income from operations in 2013 and 2012.

Income from continuing operations in 2013 was \$7,478,000, or \$1.79 per diluted share, compared to income from continuing operations in 2012 of \$7,539,000, or \$1.74 per diluted share. Income from continuing operations was

approximately 4% of net sales in 2013 and 2012. During 2013, a \$5,055,000 (\$3,172,000, net of tax) non-cash goodwill impairment charge had a negative impact of approximately \$0.76 per diluted share. During 2012, restructuring costs of \$790,000 (\$589,000, net of tax) had a negative impact of approximately \$0.14 per diluted share. In 2013 and 2012, income from continuing operations benefited from research and development tax credits by approximately \$1,051,000 and \$512,000, or \$0.25 and \$0.12 per diluted share, respectively.

The Company's business segments and the components of operating expenses are discussed in the following sections.

Table of Contents**SLPE**

SLPE recorded net sales of \$78,177,000 or 42% of consolidated net sales in 2013, compared to \$77,869,000, or 44% of consolidated net sales in 2012. At SLPE, net sales of the industrial product line increased by \$1,284,000 or 11%, and sales of other products increased by \$361,000, or 15%, which was partially offset by a decrease in sales of the data communications product line of \$816,000, or 7%, and a decrease in sales of the medical equipment product line of \$520,000, or 1%. The increase in sales in the industrial product line was primarily due to increased sales volumes to a large international customer. The decrease in sales of the data communications line was primarily due to no sales in 2013 to a former large domestic customer, coupled with a general decline in domestic distributor and customer sales during 2013. The decrease in sales of the medical equipment product line was primarily due to decreased sales to a large domestic distributor. The decrease in medical equipment sales was partially offset by increased sales to several large domestic and international customers. Returns and distributor credits also negatively affected net sales, which represented approximately 1% and 2% of gross sales in 2013 and 2012, respectively. Domestic sales decreased by 5% and international sales increased by 18% during 2013.

SLPE reported income from operations of \$6,558,000 in 2013, compared to income from operations of \$2,487,000 in 2012. Income from operations increased in 2013 primarily due to an improvement in cost of products sold as a percentage of net sales and a decrease in operating expenses. Cost of products sold improved by approximately 3% as a percentage of net sales during 2013. Operating costs decreased by approximately \$1,692,000, or 9%, during 2013 primarily due to a decrease in selling, general and administrative expenses of \$727,000, a decrease in depreciation and amortization expense of \$183,000, and a decrease in engineering and product development costs of \$50,000. Also, on a comparative basis, operating costs decreased due to \$732,000 of restructuring charges which were incurred in 2012 while no restructuring charges were incurred in 2013.

Included in cost of products sold and operating costs during 2013 are \$675,000 (\$568,000 recorded in cost of products sold and \$107,000 recorded in selling, general and administrative expenses) of incremental costs related to a work stoppage in China. Also, SLPE incurred \$844,000 in legal and accounting fees related to the FCPA investigation in China in 2012 that were not repeated in 2013.

High Power Group

The High Power Group reported net sales of \$68,752,000 or 37% of consolidated net sales in 2013, compared to \$65,283,000, or 36% of consolidated net sales in 2012. The increase in net sales during 2013 was due to an increase in sales at MTE of \$5,013,000, or 15%, which was offset by a decrease in sales at TEAL of \$1,544,000, or 5%.

MTE's sales increase during 2013 was primarily attributable to an increase in filter sales to the oil industry and the introduction of new matrix filter products. MTE's sales increase was also due to an increase in reactor sales to the industrial automation market. Domestic sales increased by 23% while international sales decreased by 7%. The increase in domestic sales was primarily due to a general increase in demand as a result of the introduction of new filter products, increased filter sales to a large customer in the oil industry, and increased reactor sales to a large industrial automation OEM. The decrease in international sales was primarily due to decreased sales to a large customer and a large distributor in the oil industry located in South America.

Table of Contents

TEAL's sales decrease was primarily attributable to a decrease in sales to the medical imaging equipment market of \$2,990,000, or 12%, which was partially offset by an increase in sales to the semi-conductor market of \$1,227,000, or 74%, an increase in sales to the military and aerospace markets of \$191,000, or 7%, and an increase in sales to customers in the solar market of \$91,000, or 3%. The decrease in sales to the medical imaging equipment market was primarily due to a general decline in demand in this market. The increase in the semi-conductor market was primarily driven by sales of new products to two large international customers. Sales to military and aerospace customers increased during 2013 primarily due to an increased focus on the military and aerospace business, which was evident by an increase in sales volumes to two large domestic customers. Sales to customers in the solar market increased due to a new large domestic customer in 2013, which was partially offset by sales to a large domestic customer in 2012. Domestic sales decreased by 11%, and international sales increased by 52% during 2013.

The High Power Group reported income from operations of \$2,206,000 in 2013, which represented a decrease of 68% from 2012. The decrease in income from operations during 2013 was due to a decrease of \$6,581,000 at TEAL, which was partially offset by an increase at MTE of \$1,965,000. The decrease in the High Power Group's income from operations was due to an increase in operating costs, which was partially offset by an increase in sales of 5%. Cost of products sold as a percentage of net sales was relatively flat during 2013. Operating costs increased by \$5,613,000, or 43%, during 2013 primarily due to a non-cash goodwill impairment charge of \$5,055,000 recorded at TEAL. Without this charge, operating costs increased by \$558,000, or 4%. This increase in operating expenses was due to an increase in engineering and product development costs of \$585,000 and an increase in selling, general and administrative expenses of \$196,000. The increase in operating expenses was partially offset by a decrease in depreciation and amortization expenses of \$165,000 and \$58,000 of restructuring charges incurred during 2012 at TEAL.

SL-MTI

SL-MTI recorded net sales of \$37,729,000 or 21% of consolidated net sales in 2013, compared to \$36,223,000, or 20% of consolidated net sales in 2012. Sales of industrial products increased by \$1,863,000, or 81%, and sales to customers in the medical industry increased by \$239,000, or 24%, which were partially offset by a decrease in sales to the defense industry of \$619,000, or 3%. Sales to customers in the commercial aerospace industry were relatively flat during 2013. Domestic sales increased by 6% while international sales decreased by 8% during 2013. The increase in domestic sales was primarily due to increased downhole exploration sales in the oil and gas market and increased sales volumes to a large customer in the industrial market. The increase in domestic sales was partially offset by a decrease in sales volumes to two large military customers. The decrease in international sales was primarily related to decreased military sales to a large customer located in Australia.

SL-MTI reported income from operations of \$7,202,000 in 2013, which represented an increase of 14% from 2012. The increase was primarily due to a 4% increase in sales and a 3% improvement in cost of products sold as a percentage of net sales, which were partially offset by an 11% increase in operating costs. Operating costs increased by \$630,000 due to an increase of \$788,000 in engineering and product development costs and an increase of \$63,000 in depreciation and amortization expenses, which were partially offset by a decrease in selling, general and administrative expenses of \$221,000. SL-MTI recorded \$434,000 of direct costs related to the Astromec acquisition during 2012.

Table of Contents**Cost of Products Sold**

Cost of products sold was approximately 68% and 70% of net sales in 2013 and 2012, respectively. Cost of products sold as a percentage of net sales decreased 2% while net sales increased by 3% during 2013.

SLPE and SL-MTI each recorded an improvement in cost of products sold as a percentage of net sales, while the cost of products sold as a percentage of net sales at the High Power Group was relatively flat during 2013. SLPE's cost of products sold as a percentage of net sales decreased by approximately 3% during 2013 primarily due to a favorable sales mix, a favorable product mix partially due to the introduction of new products into the market, a decrease in labor costs associated with the implementation of a prior year restructuring plan, and a decrease in inventory reserve charges incurred during 2013 compared to 2012. SLPE's cost of products sold as a percentage of net sales also decreased due to the recording of additional social taxes in China in 2012, while the recording of additional social taxes were not required in 2013. The decrease in SLPE's cost of products sold as a percentage of net sales was partially offset by \$568,000 of additional costs incurred due to a work stoppage in China during March 2013. Cost of products sold as a percentage of net sales at the High Power Group was relatively flat during 2013 due to a 2% decrease at MTE, which was offset by a 4% increase at TEAL. The decrease in cost of products sold as a percentage of net sales at MTE was primarily due to improved product mix and a decrease in commodity costs, primarily for copper and steel. The decrease at MTE was also due to a shift in labor to Mexico and increased sales levels, which improved overhead absorption. The increase in cost of products sold as a percentage of net sales at TEAL was primarily due to an unfavorable sales mix and higher labor costs due to additional support needed for new product programs. The increase in cost of products sold as a percentage of net sales at TEAL was partially offset by lower commodity costs, primarily for copper and steel. During 2013, SL-MTI recorded a 3% decrease in its cost of products sold as a percentage of net sales primarily due to a more favorable sales mix, lower commodity costs, and improved lean initiatives implemented at its manufacturing facilities in Matamoros, Mexico and Montevideo, Minnesota. The decrease at SL-MTI was also due to increased costs incurred during 2012 due to the Astromec integration, which was completed during that year. All operating entities are at various stages of emphasizing lean initiatives throughout the factory floor to reduce costs of products sold.

Engineering and Product Development Expenses

Engineering and product development expenses were approximately 6% of net sales in 2013 and 2012, respectively. Engineering and product development expenses increased by \$1,322,000, or 13%, during 2013 primarily due to an increase of \$788,000 at SL-MTI, and an increase of \$584,000 at the High Power Group, which were partially offset by a decrease of \$50,000 at SLPE. The increase in engineering and product development costs at SL-MTI was primarily due to a decrease in customer funding received for prototype projects during 2013. The increase in engineering and product development costs at the High Power Group was due to increases at MTE and TEAL. The increase at MTE was primarily due to an increase in engineering staff and an increase in new product development costs. The increase in engineering and product development costs at TEAL was due to increased new product development costs, which was partially offset by a decrease in consulting fees. The decrease in engineering and product development costs at SLPE was primarily due to a decrease in consulting fees and product development costs, which were partially offset by an increase in compensation costs as a result of an increase in engineering staff during 2013.

Table of Contents

Selling, General and Administrative Expenses

Selling, general and administrative expenses were approximately 16% of net sales for 2013 and 17% of net sales for 2012. During 2013, selling, general and administrative expenses decreased by \$484,000, or 2%, while sales increased by 3%.

Selling, general and administrative expenses at SLPE decreased by \$727,000 in 2013 primarily due to costs incurred for consulting and legal fees in 2012 in connection with the China Investigation, which were partially offset by \$107,000 of additional costs incurred due to a work stoppage in China during March 2013. Selling, general and administrative expenses at SL-MTI decreased by \$221,000 primarily due to direct acquisition costs incurred in 2012 related to the Astromec acquisition, which were partially offset by increased consulting fees and an increase of approximately \$100,000 related to an environmental accrual due to a regulatory change. The High Power Group recorded an increase in selling, general and administrative expenses of \$196,000 primarily due to a \$448,000 increase at MTE, which was partially offset by a \$252,000 decrease at TEAL. The increase at MTE was due to an increase in salaries as the result of an increase in staffing in 2013, and increased other employee compensation costs related to commissions on higher sales volumes. The increase was partially offset by the absence of litigation costs at MTE, which were incurred in 2012. The decrease in selling, general and administrative expenses at TEAL was due to a decrease in compensation costs. Unallocated Corporate Expenses increased by \$268,000, or 5%, primarily due to the cost of the Delaware state franchise tax, expenses related to executive recruiting, and a management service fee (see Note 25 Related Party Transactions in the Notes to the Consolidated Financial Statements included in Part IV of this Annual Report on Form 10-K for details on the management service fee). The increase was partially offset by a decrease in stock compensation expense.

Depreciation and Amortization Expenses

Depreciation and amortization expenses in 2013 were \$2,010,000, a decrease of \$286,000, or 12%, compared to depreciation and amortization expenses in 2012. Depreciation and amortization expenses were approximately 1% of net sales in 2013 and 2012.

Restructuring Costs

Restructuring costs were \$790,000 in 2012 and consisted of severance costs and other employee related charges. During 2012, the Company announced to its employees a restructuring plan to align its costs with current and projected sales activity. The costs reductions were primarily direct labor employees and engineering, selling and administration employees at SLPE and TEAL, which is part of the High Power Group. No restructuring costs were incurred during 2013.

Goodwill Impairment

Goodwill impairment expense in 2013 was \$5,055,000, or 3% of net sales, without a comparable charge in 2012. The 2013 expense is detailed in the Goodwill section of Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations and in Note 9 Goodwill and Intangibles in the Notes to the Consolidated Financial Statements included in Part IV of this Annual Report on Form 10-K.

Table of Contents

Amortization of Deferred Financing Costs

In connection with entering into the 2012 Credit Facility and related amendments, the Company incurred deferred financing costs which are amortized over the term of the 2012 Credit Facility. Costs related to the 2008 Credit Facility and related waivers and amendments, which expired on August 9, 2012, were amortized over the term of the 2008 Credit Facility. During 2013 and 2012, the amortization of deferred financing costs equaled \$83,000 and \$138,000, respectively.

Interest Income and Interest Expense

In 2013, interest income was \$12,000 compared to \$5,000 in 2012. Interest expense in 2013 was \$61,000 compared to \$23,000 in 2012. The increase in interest expense in 2013 was primarily due to increased borrowings under the 2012 Credit Facility during 2013 compared to borrowings under the 2012 Credit Facility and 2008 Credit Facility during 2012. The Company had an outstanding balance of \$1,000,000 as of December 31, 2013, under the 2012 Credit Facility. The Company had no outstanding balance as of December 31, 2012, under the 2012 Credit Facility.

Other gain, net

Other gain, net in 2013 was a net loss of \$78,000 compared to a net gain of \$243,000 in 2012. Other gain, net in 2013 includes a \$90,000 loss on foreign currency forward contracts, which was partially offset by \$12,000 of dividend income received from investments in available-for-sale securities. Other gain, net in 2012 includes a \$243,000 gain on foreign currency forward contracts.

During 2012 and 2013, the Company entered into a series of foreign currency forward contracts to hedge its exposure to foreign exchange rate movements in its forecasted expenses in China and Mexico. The loss recognized in 2013 and the gain recognized in 2012 represents the change in fair value of foreign currency forward contracts that are marked to market at year end.

Taxes (Continuing Operations)

The effective tax rate was approximately 25% in 2013 compared to 26% in 2012, respectively. During 2013, the effective tax rate was positively impacted by the recording of a research and development tax benefit of \$1,051,000, of which \$431,000 was related to the retroactive reinstatement of the federal research and development tax credits from the enactment of the American Tax Relief Act of 2012. These credits were not available to the Company in 2012.

Discontinued Operations

Income from discontinued operations was \$762,000, net of tax, in 2013 as compared to \$238,000, net of tax, in 2012. Income from discontinued operations during 2013 and 2012 relates to the net earnings of the Company's RFL business, which is classified as discontinued operations (see Note 4 Discontinued Operations for further information). The earnings associated with RFL during 2013 and 2012 were partially offset by environmental remediation costs, consulting fees, and legal expenses associated with the past operations of the Company's five environmental sites (see Note 16 Commitments and Contingencies for further information concerning the environmental sites).

Net Income

Edgar Filing: SL INDUSTRIES INC - Form 10-K

Net income was \$8,240,000, or \$1.97 per diluted share, for 2013 compared to \$7,777,000, or \$1.80 per diluted share, for 2012. The weighted-average number of shares used in the diluted earnings per share computation was 4,184,000 and 4,330,000 for 2013 and 2012, respectively.

Not applicable.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Consolidated Financial Statements and supplementary data, together with the report of Grant Thornton LLP, independent registered public accounting firm, are included in Part IV of this Annual Report on Form 10-K.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation Of Disclosure Controls And Procedures

The Company, under the supervision and with the participation of its management, including the Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures, as such term is defined in Rules 13a-15e and 15d-15e promulgated under the Securities Exchange Act of 1934, as amended, (the Exchange Act). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by this Annual Report on Form 10-K. Such controls and procedures are designed to ensure that all material information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is accumulated and communicated as appropriate to allow timely decisions regarding required disclosure and that all such information is recorded, processed, summarized and reported as specified in the rules and forms of the SEC.

Management's Annual Report on Internal Control over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act). The Company's internal control over financial reporting is designed to provide reasonable assurance to the Company's management and Board of Directors regarding the reliability of financial reporting and the preparation and fair presentation of published financial statements for external purposes in accordance with GAAP.

Table of Contents

The Company's internal control over financial reporting includes those policies and procedures that:

pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the Company's transactions and dispositions of the Company's assets;

provide reasonable assurance that the Company's transactions are recorded as necessary to permit preparation of the Company's financial statements in accordance with GAAP, and that the Company's receipts and expenditures are being made only in accordance with authorizations of the Company's management and the Company's directors; and

provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on its financial statements.

Because of its inherent limitations, internal control over financial reporting cannot prevent or detect every potential misstatement. Therefore, even those systems determined to be effective can provide only reasonable assurances with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may decline.

The Company's management conducted an evaluation of the effectiveness of the Company's internal control over financial reporting, based on the framework and criteria established in Internal Control - Integrated Framework (1992), issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO 1992 Framework). On May 14, 2013, COSO issued an updated version of its Internal Control - Integrated Framework (COSO 2013 Framework). Both frameworks provide principles-based guidance for designing and implementing effective internal controls. As of December 31, 2014, the Company continues to utilize the COSO 1992 Framework. The Company has started the process to implement the COSO 2013 Framework and plans to complete implementation of the COSO 2013 Framework in 2015. Based on this evaluation under the COSO 1992 Framework, the Company's management assessed the effectiveness of the Company's internal control over financial reporting for the year ended December 31, 2014 and concluded that such internal control over financial reporting was effective.

This annual report does not include an attestation report of the Company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's auditors pursuant to rules of the Securities and Exchange Commission that permit the Company to provide only management's report in this annual report.

Changes in Internal Control over Financial Reporting

During the fiscal quarter ended December 31, 2014, there were no changes in the Company's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, such internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Apart from certain information concerning the Company's executive officers, which is set forth in Part I of this Annual Report on Form 10-K, and the Code of Ethics, as set forth below, the information required under this Item is incorporated herein by reference to the applicable information in the Proxy Statement for the Company's 2015 Annual Meeting of Shareholders.

Code of Ethics

The Company has adopted a Code of Conduct and Ethics (the Code of Ethics) that applies to all of its directors, officers and employees. The Code of Ethics is reasonably designed to deter wrongdoing and to promote (i) honest and ethical conduct, including the ethical handling of actual or apparent conflicts of interest between personal and professional relationships, (ii) full, fair, accurate, timely and understandable disclosure in reports and documents filed with, or submitted to, the SEC and in other public communications made by the Company, (iii) compliance with applicable governmental laws, rules and regulations, (iv) the prompt internal reporting of violations of the Code of Ethics to appropriate persons identified in the Code of Ethics, and (v) accountability for adherence to the Code of Ethics. The Code of Ethics is available on the Investor Relations section of the Company's website (www.slindustries.com) under the tab Corporate Governance. The Code of Ethics may also be requested in print, without charge, by writing to: Louis J. Belardi, Secretary, SL Industries, Inc., 520 Fellowship Road, Suite A-114, Mount Laurel, New Jersey 08054. Amendments to the Code of Ethics and any grant of a waiver from a provision of the Code of Ethics requiring disclosure under applicable SEC rules will be disclosed on the Investor Relations section of the Company's website (www.slindustries.com) under the tab Corporate Governance.

ITEM 11. EXECUTIVE COMPENSATION

The information required under this Item is incorporated herein by reference to the applicable information in the Proxy Statement for the Company's 2015 Annual Meeting of Shareholders.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Except for the Equity Compensation Plan Information set forth below, the information required under this Item is incorporated herein by reference to the applicable information in the Proxy Statement for the Company's 2015 Annual Meeting of Shareholders.

Table of Contents

Equity Compensation Plan Information

The Equity Compensation Plan Information included in Part II, Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities, is incorporated by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS AND DIRECTOR INDEPENDENCE

The information required under this Item is incorporated herein by reference to the applicable information in the Proxy Statement for the Company's 2015 Annual Meeting of Shareholders.

Table of Contents**EXHIBIT INDEX**

The exhibit number, description and sequential page number in the original copy of this document where exhibits can be found as follows:

Exhibit #	Description
2.1	Securities Purchase Agreement by and among SL Industries, Inc., SL Industries Vertrieb GmbH, and DCX-Chol Holding GmbH, DCX-Chol Enterprises, Inc. and Chol Enterprises, Inc. dated as of January 3, 2003. Incorporated by reference to Exhibit 2.1 to the Company's report on Form 8-K filed with the Securities and Exchange Commission on January 17, 2003.
2.2	Agreement and Plan of Merger, dated December 16, 2005, by and among SL Industries, Inc., Lakers Acquisition Corp. and Ault Incorporated. Incorporated by reference to Exhibit 2.1 to the Company's report on Form 8-K filed with the Securities and Exchange Commission on December 16, 2005.
2.3	Stock Purchase Agreement, dated October 31, 2006 by and among SL Industries, Inc., Norbert D. Miller, Revocable Living Trust of Fred A. Lewis and Margaret Lange-Lewis U/A dated January 28, 1993, as Amended and Restated as of October 31, 2001 and the Einhorn Family Foundation. Incorporated by reference to Exhibit 10.1 to the Company's report on Form 8-K/A filed with the Securities and Exchange Commission on December 21, 2006.
2.4	Agreement and Plan of Merger, dated June 3, 2013, by and between SL Industries, Inc., a New Jersey corporation, and SL Industries, Inc., a Delaware corporation. Incorporated by reference to Exhibit 2.1 to the Company's Current Report on Form 8-K filed on June 20, 2013.
2.5	Stock Purchase Agreement, dated as of November 17, 2014, by and among SL Delaware Holdings, Inc., SL Industries, Inc., and Hubbell Power Systems. Incorporated by reference to Exhibit 2.1 to the Company's Current Report on Form 8-K filed on November 21, 2014.
3.1	Amended and Restated Certificate of Incorporation of SL Industries, Inc., a Delaware corporation. Incorporated by reference to Exhibit 3.1 to the Company's Current Report on Form 8-K filed on June 20, 2013.
3.2	By-Laws of SL Industries, Inc., a Delaware corporation. Incorporated by reference to Exhibit 3.2 to the Company's Current Report on Form 8-K filed on June 20, 2013.
4.1	Form of Common Stock Certificate Incorporation of SL Industries, Inc., a Delaware corporation. Incorporated by reference to Exhibit 4.1 to the Company's Current Report on Form 8-K filed on June 20, 2013.
10.1+	Supplemental Compensation Agreement for the Benefit of Byrne Litschgi. Incorporated by reference to Exhibit 10.1 to the Company's report on Form 8-K dated November 9, 1990.
10.2+	1991 Long Term Incentive Plan of SL Industries, Inc., as amended, is incorporated by reference to Appendix to the Company's Proxy Statement for its 1995 Annual Meeting held November 17, 1995, previously filed with the Securities and Exchange Commission.

Table of Contents

- 10.3 Amended And Restated Revolving Credit Agreement dated as of October 23, 2008, among Bank of America, N.A., as Agent, various financial institutions party hereto from time to time, as Lenders, SL Industries, Inc., as the parent borrower and, SL Delaware, Inc., SL Delaware Holdings, Inc., MTE Corporation, RFL Electronics Inc., SL Montevideo Technology, Inc., Cedar Corporation, TEAL Electronics Corporation, MEX Holdings LLC, SL Power Electronics Corporation, SLGC Holdings, Inc., SLW Holdings, Inc., SL Auburn, Inc., and SL Surface Technologies, Inc. as subsidiary borrowers. Incorporated by reference to Exhibit 10.1 to the Company's report on Form 10-Q for the fiscal quarter ended September 30, 2008.
- 10.4 First Amendment and Waiver Under Credit Agreement dated as of October 23, 2008, among Bank of America, N.A., as Agent, various financial institutions party hereto from time to time, as Lenders, SL Industries, Inc., as the parent borrower and, SL Delaware, Inc., SL Delaware Holdings, Inc., MTE Corporation, RFL Electronics Inc., SL Montevideo Technology, Inc., Cedar Corporation, TEAL Electronics Corporation, MEX Holdings LLC, SL Power Electronics Corporation, SLGC Holdings, Inc., SLS Holdings, Inc., SL Auburn, Inc., and SL Surface Technologies, Inc. as subsidiary borrowers. Incorporated by reference to Exhibit 10.1 to the Company's report on Form 10-Q for the fiscal quarter ended June 30, 2009.
- 10.5+ Employment Agreement, dated June 29, 2010, between the SL Industries, Inc. and William Fejes, Jr. Incorporated by reference to Exhibit 10.1 to the Company's report on Form 10-Q for the fiscal quarter ended June 30, 2010.
- 10.6+ Stock Option Agreement, dated June 29, 2010, between the SL Industries, Inc. and William Fejes, Jr. Incorporated by reference to Exhibit 10.2 to the Company's report on Form 10-Q for the fiscal quarter ended June 30, 2010.
- 10.7+ Separation Agreement and Mutual Release of a former officer, dated as of October 20, 2010. Incorporated by reference to Exhibit 10.1 to the Company's report on Form 10-Q for the fiscal quarter ended September 30, 2010.
- 10.8+ Separation Agreement and Mutual Release of a former officer, dated as of October 14, 2010. Incorporated by reference to Exhibit 10.2 to the Company's report on Form 10-Q for the fiscal quarter ended September 30, 2010.
- 10.9+ Change of Control Agreement, dated August 31, 2010, between the SL Industries, Inc. and Louis J. Belardi. Incorporated by reference to Exhibit 10.3 to the Company's report on Form 10-Q for the fiscal quarter ended September 30, 2010.
- 10.10+ Stock Option Agreement, dated September 2, 2010, between the SL Industries, Inc. and Louis J. Belardi. Incorporated by reference to Exhibit 10.4 to the Company's report on Form 10-Q for the fiscal quarter ended September 30, 2010.

Table of Contents

- 10.11 Second Amendment to Credit Agreement with Bank of America, N.A., dated November 19, 2010, as administrative agent and lender, and a syndicate of other lenders party thereto, further amending that certain Amended and Restated Revolving Credit Agreement entered into as of October 23, 2008 among the Company, subsidiaries of the Company party thereto, Bank of America, N.A., as administrative agent and lender, and a syndicate of other lenders party thereto. Incorporated by reference to Exhibit 10.17 to the Company's report on Form 10-K for the fiscal year ended December 31, 2010.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders

SL Industries, Inc.

We have audited the accompanying consolidated balance sheets of SL Industries, Inc. (a Delaware corporation) and subsidiaries (the Company) as of December 31, 2014 and 2013, and the related consolidated statements of income and comprehensive income, changes in shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2014. Our audits of the basic consolidated financial statements included the financial statement schedule listed in the index appearing under Schedule II, Valuation and Qualifying Accounts. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Company's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of SL Industries, Inc. and subsidiaries as of December 31, 2014 and 2013, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2014 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

See accompanying notes to consolidated financial statements.

Table of Contents**Notes To Consolidated Financial Statements****Note 1. Summary Of Significant Accounting Policies**

Background: SL Industries, Inc. (the Company), through its subsidiaries, designs, manufactures and markets power electronics, motion control, power protection, and power quality electromagnetic equipment that is used in a variety of medical, commercial and military aerospace, computer, datacom, industrial, and telecom applications. Its products are generally incorporated into larger systems to improve operating performance, safety, reliability and efficiency. The Company's products are largely sold to Original Equipment Manufacturers (OEMs) and, to a lesser extent, to commercial distributors. The Company's customer base is primarily located in the United States. The Company's operating subsidiaries are described and defined in Note 23. The Company's discontinued operations are described and defined in Note 4.

Unless the context requires otherwise, the terms the Company, SL Industries, we, us and our mean SL Industries, a Delaware corporation, and its consolidated subsidiaries after Reincorporation (defined and described below) and SL Industries, Inc., a New Jersey corporation prior to Reincorporation. In the context of describing the Reincorporation, SL-NJ means SL Industries, Inc., a New Jersey corporation, and SL-DE means SL Industries, Inc., a Delaware corporation and wholly owned subsidiary of SL-NJ.

On May 9, 2013, the Company's shareholders voted to approve a proposal to change the state of incorporation of SL Industries from the State of New Jersey to the State of Delaware by merging SL-NJ with and into SL-DE (the Reincorporation). On June 20, 2013 (the Effective Date), the Reincorporation was effected by merging SL-NJ with and into SL-DE pursuant to an Agreement and Plan of Merger, dated June 3, 2013, between SL-NJ and SL-DE. SL-DE survived the merger and SL-NJ ceased to exist. The principal reason for the Reincorporation was to give the Company a greater measure of flexibility and simplicity in corporate governance and provide greater clarity and predictability with respect to the Company's corporate legal affairs. The Reincorporation did not result in any change in the name, business, management, fiscal year, accounting, location of the principal executive officers, assets or liabilities or net worth (other than the costs of reincorporation which were immaterial) of the Company.

On November 17, 2014, SL Delaware Holdings, Inc. (SL Delaware Holdings), a wholly-owned subsidiary of the Company, entered into a definitive Stock Purchase Agreement (the Purchase Agreement) with Hubbell Power Systems, Inc. (Hubbell), a subsidiary of Hubbell Incorporated, pursuant to which SL Delaware Holdings sold all of the issued and outstanding capital stock of RFL Electronics Inc. (RFL). The Company concluded that the accounting requirements for reporting the results of operations and cash flows of the divested business as discontinued operations were met at November 17, 2014. As a result, the accompanying consolidated statements of income for 2013 and 2012, the consolidated statements of cash flows for 2013 and 2012, and the amounts in these notes to the consolidated financial statements related to 2013 and 2012 have been recast to reflect the presentation of the results of operations and cash flows of the formerly owned RFL businesses as discontinued operations. Refer to Note 4, Discontinued Operations, for additional information regarding this transaction.

Basis Of Consolidation: The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All material intercompany accounts and transactions have been eliminated in consolidation.

Table of Contents

Use Of Estimates: The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The most significant areas that require the use of management estimates relate to product warranty costs, accrued liabilities related to litigation, allowance for doubtful accounts, allowance for inventory obsolescence and environmental costs, the valuation of acquisitions and long-lived assets, and income taxes, including estimates for certain tax liabilities and the determination of recoverability of certain of the deferred tax assets.

Cash Equivalents: The Company considers all highly liquid debt instruments with an original maturity date of three months or less and investments in money market accounts to be cash equivalents. At December 31, 2014 and December 31, 2013, cash and cash equivalents held in the United States are held principally at one financial institution.

Accounts Receivable: The Company's accounts receivable primarily consist of trade receivables and are reported net of allowances for doubtful accounts of approximately \$281,000 and \$581,000 as of December 31, 2014 and December 31, 2013, respectively. The Company's estimate for the allowance for doubtful accounts related to trade receivables is based on two methods. The amounts calculated from each of these methods are combined to determine the total amount reserved. First, the Company evaluates specific accounts where it has information that the customer may have an inability to meet its financial obligations (e.g., bankruptcy or insolvency). In these cases, the Company uses its judgment, based on the best available facts and circumstances, and records a specific reserve for that customer against amounts due to reduce the receivable to the amount that is expected to be collected. These specific reserves are reevaluated and adjusted as additional information is received that impacts the amount reserved. Second, a general reserve is established for all customers based on several factors, including historical write-offs as a percentage of sales. If circumstances change (e.g., higher than expected defaults or an unexpected material adverse change in a major customer's ability to meet its financial obligation), the Company's estimates of the recoverability of amounts due could be reduced by a material amount. Receivables are charged off against the reserve when they are deemed uncollectible.

Inventories: Inventories are valued at the lower of cost or market. Cost is primarily determined using the first-in, first-out (FIFO) method. Cost for certain inventories is determined using the last-in, first-out (LIFO) method. The Company's carrying cost of inventory is valued at the lower of cost or market as the Company continually reviews the book value of discontinued product lines to determine if these items are properly valued. The Company identifies these items and assesses the ability to dispose of them at a price greater than cost. If it is determined that cost is less than market value, then cost is used for inventory valuation. If market value is less than cost, then related inventory is adjusted to market value. If a write down to the current market value is necessary, the market value cannot be greater than the net realizable value, which is defined as selling price less costs to complete and dispose, and cannot be lower than the net realizable value less a normal profit margin. The Company also continually evaluates the composition of its inventory and identifies obsolete, slow-moving, and excess inventories. Inventory items identified as obsolete, slow-moving, or excess are evaluated to determine if reserves are required. If the Company were not able to achieve its expectations of the net realizable value of the inventory at current market value, it would have to adjust its reserves accordingly. The Company attempts to accurately estimate future product demand to properly adjust inventory levels. However, significant unanticipated changes in demand could have a significant impact on the value of inventory and of operating results.

Table of Contents

Investments: The Company determines the appropriate classification of its investments in equity securities at the time of purchase and reevaluates such determinations at each balance sheet date. Marketable securities that are bought and held principally for the purpose of selling them in the near term are classified as trading securities and are reported at fair value, with unrealized gains and losses recognized in earnings. Marketable equity securities not classified as trading are classified as available for sale, and are carried at fair market value, with the unrealized gains and losses, net of tax, included in the determination of comprehensive income and reported in shareholders' equity. The fair value of all securities held by the Company is determined by quoted market prices.

Property, Plant And Equipment: Property, plant and equipment are carried at cost and include expenditures for new facilities and major renewals and betterments. Maintenance, repairs and minor renewals are charged to expense as incurred. When assets are sold or otherwise disposed of, any gain or loss is recognized currently. Depreciation is provided primarily using the straight-line method over the estimated useful lives of the assets, which range from 25 to 40 years for buildings, 3 to 15 years for equipment and other property, and the lesser of the lease term or life of the asset for leasehold improvements. Assets subject to capital leases are depreciated over the lesser of the estimated useful life of the asset or length of the contract.

Goodwill And Other Intangibles: The Company follows Accounting Standards Codification (ASC) 350 Intangibles Goodwill and Other, which requires that goodwill and other indefinite-lived intangible assets will no longer be amortized to earnings, but instead be subject to periodic testing for impairment. Intangible assets determined to have definitive lives will continue to be amortized over their estimated useful lives.

The Company's impairment testing is undertaken annually, or more frequently upon the occurrence of some indication that an impairment may take place. The Company conducted its annual impairment test as of December 31, 2014.

A two-step process is utilized to determine if goodwill has been impaired. In the first step, the fair value of each reporting unit is compared to the net asset value recorded for such unit. If the fair value exceeds the net asset value, the goodwill of the reporting unit is not adjusted. However, if the recorded net asset value exceeds the fair value, the Company would perform a second step to measure the amount of impairment loss, if any. In the second step, the implied fair value of the reporting unit's goodwill is compared with the goodwill recorded for such unit. If the recorded amount of goodwill exceeds the implied fair value, an impairment loss is recognized in the amount of the excess. The nonrecurring fair value measurement of goodwill is developed using significant unobservable inputs (Level 3) (see Note 18 for additional information).

Long-Lived Assets: The Company evaluates the recoverability of its long-lived assets in accordance with ASC 360 Property, Plant, and Equipment. The Company reviews long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of long-lived assets are measured by a comparison of the carrying amount of an asset to future cash flows expected to be generated by the asset, undiscounted and without interest or independent appraisals. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the asset exceeds the fair value of the assets.

Table of Contents

Revenue Recognition: Revenue is recognized when persuasive evidence of an arrangement exists, delivery has occurred or services have been rendered, the purchase price is fixed or determinable and collectability is reasonably assured. The major portion of the Company's revenue is derived from equipment sales. The Company recognizes equipment revenue upon shipment or delivery, depending upon the terms of the order, and transfer of title. Generally, the revenue recognition criteria are met at the time the product is shipped. Provisions are made at the time the related revenue is recognized for product returns, product warranties, rebates, certain re-stocking programs with distributors and other sales incentives offered by the Company to its customers. Freight revenues billed to customers are included in net sales and expenses for shipping products are included in cost of sales.

Environmental Expenditures: Environmental expenditures that relate to current operations are charged to expense or capitalized, as appropriate. Expenditures that relate to an existing condition caused by formerly owned operations are expensed and recorded as part of discontinued operations, net of tax. Expenditures include costs of remediation and legal fees to defend against claims for environmental liability. Liabilities are recorded when remedial efforts are probable and the costs can be reasonably estimated. The liability for remediation expenditures includes, as appropriate, elements of costs such as site investigations, consultants' fees, feasibility studies, outside contractor expenses and monitoring expenses. Estimates are not discounted and they are not reduced by potential claims for recovery from insurance carriers. The liability is periodically reviewed and adjusted to reflect current remediation progress, prospective estimates of required activity and other relevant factors, including changes in technology or regulations.

Deferred Financing Costs: Costs incurred in securing long-term debt are deferred and amortized on a straight-line basis over the term of the related debt. In the case of loan modifications, the Company follows the guidance provided by ASC 470-50 Debt Modification and Extinguishments. The net unamortized deferred financing costs at December 31, 2014 and December 31, 2013 were \$177,000 and \$227,000, respectively. The financing cost amortization expense was \$94,000, \$83,000, and \$138,000, for 2014, 2013, and 2012, respectively.

Product Warranty Costs: The Company offers various warranties on its products. These warranties vary in length depending on the product. The Company provides for its estimated future warranty obligations in the period in which the related sale is recognized primarily based on historical experience. For 2014, 2013 and 2012, product warranty costs from continuing operations were \$818,000, \$757,000 and \$524,000, respectively.

Advertising Costs: Advertising costs are expensed as incurred. For 2014, 2013 and 2012, advertising costs from continuing operations were \$349,000, \$258,000 and \$271,000, respectively.

Research And Development Costs: Research and development costs are expensed as incurred. For 2014, 2013 and 2012, research and development costs from continuing operations were \$4,054,000, \$4,215,000 and \$2,992,000, respectively.

Table of Contents

Other Gain (Loss), net: Other gain (loss), net in 2014 was a net gain of \$1,769,000 compared to net loss of \$78,000 in 2013 and a net gain of \$243,000 in 2012. Other gain (loss), net in 2014 included a \$1,691,000 gain recognized from the sale of available-for-sale securities, a \$892,000 gain on the sale of the Company's former manufacturing facility located in Xianghe, China, and \$11,000 of dividend income received from investments in available-for-sale securities, which were partially offset by a \$825,000 unrealized loss on foreign currency forward contracts. Other gain (loss), net in 2013 included a \$90,000 unrealized loss on foreign currency forward contracts, which was partially offset by \$12,000 of dividend income received from investments in available-for-sale securities. Other gain (loss), net in 2012 included a \$243,000 unrealized gain on foreign currency forward contracts.

Since 2012, the Company has entered into a series of foreign currency forward contracts to hedge its exposure to foreign exchange rate movements in its forecasted expenses in China and Mexico. The loss recognized in 2014 and 2013 and the gain recognized in 2012 represents the change in fair value of foreign currency forward contracts that are marked to market (see Note 19 for additional information).

Income Taxes: The Company accounts for income taxes under the asset and liability method, which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements. Under this method, deferred tax assets and liabilities are determined based upon the differences between the financial statement carrying amounts and the tax basis of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse. The Company establishes valuation allowances if the Company believes that it is more likely than not that some of the deferred tax assets will not be realized. The Company does not recognize a tax benefit unless it is more likely than not that the benefit will be sustained on audit by the taxing authority based on the merits of the associated tax position. If the recognition threshold is met, the Company recognizes a tax benefit measured at the largest amount of the tax benefit that, based on the Company's judgment, is greater than fifty percent likely to be realized. The Company records interest and penalties related to unrecognized tax benefits as income tax expense.

Foreign Currency Conversion: Assets and liabilities of foreign operations are translated from local currency to U.S. dollars at the exchange rates in effect at the end of the fiscal period. Gains and losses from the translation of foreign operations are included in accumulated other comprehensive gain (loss) on the Company's Consolidated Balance Sheets. Revenue and expenses are translated at the year-to-date average rate of exchange. Transaction gains and losses arising from currency exchange rate fluctuations on transactions denominated in a currency other than the local currency are included in the Company's Consolidated Statements of Income.

Derivative Instruments And Hedging Activities: FASB ASC 815, *Derivatives and Hedging* (ASC 815), provides the disclosure requirements for derivatives and hedging activities with the intent to provide users of financial statements with an enhanced understanding of: (a) how and why an entity uses derivative instruments, (b) how the entity accounts for derivative instruments and related hedged items, and (c) how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. Further, qualitative disclosures are required that explain the Company's objectives and strategies for using derivatives, as well as quantitative disclosures about the fair value of and gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative instruments.

Table of Contents

The Company is exposed to certain risks arising from both its business operations and economic conditions. The Company principally manages its exposures to a wide variety of business and operational risks through management of its core business activities. Certain of the Company's foreign operations expose the Company to fluctuations of foreign interest rates and exchange rates. These fluctuations may impact the value of the Company's revenues, expenses, cash receipts and payments in terms of the Company's functional currency. The Company enters into derivative financial instruments to protect the value or fix the amount of certain cash flows in terms of the functional currency of the business unit with that exposure.

As required by ASC 815, the Company records all derivatives on the balance sheet at fair value. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative, whether the Company has elected to designate a derivative in a hedging relationship and apply hedge accounting and whether the hedging relationship has satisfied the criteria necessary to apply hedge accounting. The Company enters into derivative contracts that are intended to economically hedge certain of its risk, even though hedge accounting does not apply or the Company elects not to apply hedge accounting. Currently, the Company does not apply hedge accounting to any of its foreign currency derivatives.

Note 2. Income Per Share

The Company has presented net income per common share pursuant to ASC 260 Earnings Per Share. Basic net income per common share is computed by dividing reported net income available to common shareholders by the weighted-average number of shares outstanding for the period.

Diluted net income per common share is computed by dividing reported net income available to common shareholders by the weighted-average shares outstanding for the period, adjusted for the dilutive effect of common stock equivalents, which consist of stock options, using the treasury stock method.

There were no anti-dilutive options for the years ended December 31, 2014 and December 31, 2013. For the year ended December 31, 2012, 6,000 stock options were excluded from the dilutive computation as the assumed shares repurchased under the treasury method would have been anti-dilutive.

Table of Contents

The table below sets forth the computation of basic and diluted net income per share:

	December 31, 2014	December 31, 2013	December 31, 2012
	(in thousands, except per share amounts)		
Net income available to common shareholders:			
Basic net income available to common shareholders from continuing operations	\$ 14,180	\$ 7,478	\$ 7,539
Basic net income available to common shareholders from discontinued operations	\$ 4,715	\$ 762	\$ 238
Diluted net income available to common shareholders from continuing operations	\$ 14,180	\$ 7,478	\$ 7,539
Diluted net income available to common shareholders from discontinued operations	\$ 4,715	\$ 762	\$ 238
Shares:			
Basic weighted average number of common shares outstanding	4,139	4,138	4,313
Common shares assumed upon exercise of stock options	48	46	17
Diluted weighted average number of common shares outstanding	4,187	4,184	4,330
Basic net income per common share:			
Income from continuing operations	\$ 3.43	\$ 1.81	\$ 1.74
Income from discontinued operations (net of tax)	1.14	0.18	0.06
Net income	\$ 4.57	\$ 1.99	\$ 1.80
Diluted net income per common share:			
Income from continuing operations	\$ 3.39	\$ 1.79	\$ 1.74
Income from discontinued operations (net of tax)	1.12	0.18	0.06
Net income	\$ 4.51	\$ 1.97	\$ 1.80

Note 3. Recently Adopted and Issued Accounting Standards*Recently Adopted Accounting Standards And Other Standards*

In July 2013, the FASB issued ASU No. 2013-11, Income Taxes (Topic 740): Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists (a

consensus of the FASB Emerging Issues Task Force), which provides guidance on financial statement presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. ASU 2013-11 is effective for fiscal periods beginning after December 15, 2013. The implementation of this guidance did not have a material impact on the Company's consolidated financial statements.

Table of Contents

Recently Issued Accounting Pronouncements And Other Standards

In April 2014, the FASB issued ASU No. 2014-08, *Presentation of Financial Statements (Topic 205) and Property, Plant, and Equipment (Topic 360): Reporting Discontinued Operations and Disclosures of Disposals of an Entity*, which amends the guidance for reporting discontinued operations and disposals of components of an entity. The amended guidance requires that a disposal representing a strategic shift that has (or will have) a major effect on an entity's financial results or a business activity classified as sale should be reported as discontinued operations. The amendments also expand the disclosure requirements for discontinued operations and add new disclosures for individually significant dispositions that do not qualify as discontinued operations. ASU 2014-08 is effective prospectively for fiscal periods beginning after December 15, 2014 (early adoption is permitted only for disposals that have not been previously reported). The implementation of this guidance is not expected to have a material impact on the Company's consolidated financial statements.

In May 2014, the FASB issued ASU No. 2014-09, *Revenue from Contracts with Customers (Topic 606)*, which provides guidance that revenue should be recognized to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. ASU 2014-09 is effective for fiscal periods beginning after December 15, 2016 and may be applied either (i) retrospectively to each prior reporting period presented with an election for certain specified practical expedients, or (ii) retrospectively with the cumulative effect of initially applying the ASU recognized at the date of initial application, with additional disclosure requirements. Early application is not permitted. The Company is currently evaluating the impact of the implementation of this guidance on the Company's consolidated financial statements. The Company's management has not yet determined the method by which it will adopt the standard in 2017.

In June 2014, the FASB issued ASU No. 2014-12, *Compensation - Stock Compensation (Topic 718): Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period* (a consensus of the FASB Emerging Issues Task Force), which requires a reporting entity to treat a performance target that affects vesting and that could be achieved after the requisite service period as a performance condition. ASU 2014-12 is effective for fiscal periods beginning after December 15, 2015. Earlier application is permitted. The implementation of this guidance is not expected to have a material impact on the Company's consolidated financial statements.

In November 2014, the FASB issued ASU No. 2014-16, *Derivatives and Hedging (Topic 815): Determining Whether the Host Contract in a Hybrid Financial Instrument Issued in the Form of a Share Is More Akin to Debt or to Equity* (a consensus of the FASB Emerging Issues Task Force), which clarifies how current guidance should be interpreted in evaluating the economic characteristics and risks of a host contract in a hybrid financial instrument that is issued in the form of a share. The amendments require that an entity should consider all relevant terms and features, including the embedded derivative feature being evaluated for bifurcation, in evaluating the nature of a host contract. ASU 2014-16 is effective for fiscal periods beginning after December 15, 2015. Earlier adoption is permitted. The implementation of this guidance is not expected to have a material impact on the Company's consolidated financial statements.

Table of Contents

In November 2014, the FASB issued ASU No. 2014-17, Business Combinations (Topic 805): Pushdown Accounting (a consensus of the FASB Emerging Issues Task Force), which gives acquired companies the option to apply pushdown accounting to its separate financial statements upon a change-in-control event. ASU 2014-15 is effective on November 18, 2014. The implementation of this guidance did not have a material impact on the Company's consolidated financial statements.

Note 4. Discontinued Operations

The results of total income from discontinued operations for the years ended December 31, 2014, December 31, 2013, and December 31, 2012 were as follows:

	2014	December 31, 2013	2012
	(in thousands)		
Income (loss) from discontinued operations before income taxes:			
Divested operations - RFL	\$ 8,215	\$ 2,852	\$ 2,797
Environmental costs	(896)	(1,620)	(2,151)
Total income from discontinued operations before income taxes	\$ 7,319	\$ 1,232	\$ 646
Income (loss) from discontinued operations, net of tax:			
Divested operations - RFL	\$ 5,338	\$ 1,854	\$ 1,818
Environmental costs	(623)	(1,092)	(1,580)
Total income from discontinued operations, net of tax	\$ 4,715	\$ 762	\$ 238

The loss from discontinued operations due to environmental costs in 2014, 2013, and 2012 is related to remediation costs, consulting fees, and legal expenses associated with the past operations of the Company's five environmental sites (See Note 16 - Commitments and Contingencies for further information concerning the environmental sites).

On November 17, 2014, SL Delaware Holdings, a wholly-owned subsidiary of the Company, entered into the Purchase Agreement with Hubbell pursuant to which SL Delaware Holdings sold all of the issued and outstanding capital stock of RFL to Hubbell for aggregate cash consideration of \$20,000,000, subject to a post-closing working capital adjustment which amounted to \$299,000 and was received in February 2015. A portion of the cash consideration (\$2,000,000, subject to adjustment after nine months), is being held in escrow to secure the indemnification obligations of SL Delaware Holdings. As a result, the Company recognized a pre-tax gain of \$6,650,000 (\$4,322,000 net of tax).

The Company concluded that the accounting requirements for reporting the results of operations and cash flows of the divested business as discontinued operations were met at November 17, 2014. As a result, the consolidated statements of income for 2013 and 2012 and the consolidated statements of cash flows for 2013 and 2012 have been recast to reflect the formerly owned RFL businesses as discontinued operations.

Table of Contents

The results of the discontinued operations for RFL for the years ended December 31, 2014, December 31, 2013, and December 31, 2012 were as follows:

	2014	December 31, 2013	2012
	(in thousands)		
Net sales	\$ 17,093	\$ 20,030	\$ 21,202
Costs and expenses			
Cost of products sold	8,287	9,405	10,479
Engineering and product development	1,829	1,714	1,728
Selling, general and administrative	5,027	5,839	5,750
Depreciation and amortization	352	396	415
Restructuring charges			67
Total cost and expenses	15,495	17,354	18,439
Income from operations	1,598	2,676	2,763
Other income (expense):			
Interest expense	(33)	(26)	(25)
Other gain (loss), net		202	59
Gain on disposal	6,650		
Income from discontinued operations before income taxes	8,215	2,852	2,797
Income tax provision	2,877	998	979
Income from discontinued operations, net of tax	\$ 5,338	\$ 1,854	\$ 1,818

In the Consolidated Statements of Cash Flows, environmental costs and the financial results of the RFL segment were included in net cash (used in) operating activities from discontinued operations, net cash provided by (used in) investing activities from discontinued operations, and net cash (used in) financing activities from discontinued operations.

Note 5. Receivables

Receivables consist of the following:

	2014	December 31, 2013
	(in thousands)	
Trade receivables	\$ 34,025	\$ 30,766
Less: allowance for doubtful accounts	(281)	(581)
Trade receivables, net	33,744	30,185
Recoverable income taxes	81	344

Edgar Filing: SL INDUSTRIES INC - Form 10-K

Other	141	236
Receivables, net	\$ 33,966	\$ 30,765

F-16

Table of Contents**Note 6. Concentrations Of Credit Risk**

Financial instruments that potentially subject the Company to concentrations of credit risk consist principally of temporary cash investments and trade receivables. The Company places its temporary cash investments with high credit quality financial institutions. Concentrations of credit risk with respect to trade receivables are limited due to the large number of customers comprising the Company's customer base, and their dispersion across many industries and geographic regions. The Company seeks to limit its exposure to credit risks in any single country or region. The Company performs periodic credit evaluations of its customers' financial condition and generally requires no collateral from its customers. The Company provides an allowance for potential credit losses based upon collectability of such receivables. Losses have not been significant for any of the periods presented. All financial investments inherently expose holders to market risks, including changes in currency and interest rates. The Company manages its exposure to these market risks through its regular operating and financing activities.

Note 7. Inventories

Inventories consist of the following:

	December 31,	
	2014	2013
	(in thousands)	
Raw materials	\$ 16,865	\$ 16,198
Work in process	4,584	4,842
Finished goods	4,232	4,124
Gross inventory	25,681	25,164
Less: allowances	(2,084)	(2,201)
Inventories, net	\$ 23,597	\$ 22,963

The above includes certain inventories that are valued using the LIFO method, which aggregated \$8,722,000 and \$5,789,000 as of December 31, 2014 and December 31, 2013, respectively. The excess of FIFO cost over LIFO cost as of December 31, 2014 and December 31, 2013 was approximately \$160,000 and \$495,000, respectively.

Note 8. Property, Plant And Equipment

Property, plant and equipment consist of the following:
