Description of Notes

Interest will be payable on the Notes quarterly in arrear, on August 10, November 10, February 10 and May 10 in each year (each, an **interest payment date**), commencing on November 10, 2016, to the person in whose name such note is registered at the close of business on the business day immediately preceding the applicable date on which interest will be paid (or, if the Notes are held in definitive form, the 15th business day preceding the applicable date on which interest will be paid). The Notes will bear interest from (and including) August 10, 2016 to (but excluding) November 10, 2016, at a rate per annum equal to the initial interest rate and thereafter at an interest rate that will be reset as described below to a rate per annum equal to LIBOR (as defined in the Original Prospectus Supplement) plus 2.11% per annum.

If any interest payment date, other than the maturity date, for the Notes would fall on a day that is not a business day, the interest payment date will be postponed to the next succeeding business day, except that if that business day falls in the next succeeding calendar month, the interest payment date will be the immediately preceding business day. If the maturity date for the Notes would fall on a day that is not a business day, the payment of interest and principal will be made on the next succeeding business day, and no interest will accrue after such maturity date. For the Notes, **business day** means any day, other than a Saturday or Sunday, that is neither a legal holiday nor a day on which banking institutions in the City of New York or London, England are authorized or required by law, regulation or executive order to close.

Each interest period on the notes will begin on, and include, an interest payment date and end on, but not include, the following interest payment date (each, an **interest period**); provided that the first interest period will begin on August 10, 2016 and will end on, but not include the first interest payment date. The rate of interest on the Notes will be reset quarterly on August 10, November 10, February 10 and May 10 in each year, commencing on November 10, 2016 (each, an **interest reset date**); provided that the interest rate in effect from (and including) August 10, 2016 to (but excluding) the first interest reset date will be the initial interest rate of 2.9165% per annum. If any interest reset date would fall on a day that is not a business day, the interest reset date will be postponed to the next succeeding business day, except that if that business day falls in the next succeeding calendar month, the interest reset date will be the immediately preceding business day.

The Issuer has appointed The Bank of New York Mellon as initial calculation agent for the Notes (the **calculation agent**). The calculation agent will determine the interest rate for each interest reset period by reference to LIBOR on the second London banking day preceding the applicable interest reset date (each an **interest determination date**). Promptly upon such determination, the calculation agent will notify the Issuer and the trustee (if the calculation agent is not the trustee) of the new interest rate. Upon the request of the holder of any Note, the calculation agent will provide the interest rate then in effect and, if determined, the interest rate that will become effective on the next interest reset date.

London banking day means any day on which dealings in U.S. dollars are transacted in the London interbank market.

The Issuer has filed a registration statement (including a prospectus dated May 2, 2014 (the Prospectus) and the Original Prospectus Supplement) with the U.S. Securities and Exchange Commission (SEC) for this offering.
