**Commodity Futures Trading Commission Registration.** Effective December 31, 2012, the Commodity Futures Trading Commission ( CFTC ) adopted certain regulatory changes that subject registered investment companies and advisers to regulation by the CFTC if a fund invests more than a prescribed level of its assets in certain CFTC-regulated instruments (including futures, certain options and swap agreements) or markets itself as providing investment exposure to such instruments. Each Fund has claimed an exclusion from the definition of the term commodity pool operator under the Commodity Exchange Act. Accordingly, neither the Funds nor the adviser with respect to the operation of the Funds is subject to CFTC regulation. Because of its management of other strategies, each Fund s adviser is registered with the CFTC as a commodity pool operator and a commodity trading advisor.

#### Management's Discussion of Fund Performance

##### Economic and Market Conditions

As the period opened on October 1, 2015, U.S. Treasuries, along with municipal bonds, were about two months into a rally that would continue for most of the period.

In the closing months of 2015, concerns about the Chinese economy, falling commodity prices and uncertainty about the Federal Reserve Board's (the Fed) interest rate decisions led many asset classes to experience dramatic volatility. But the municipal market, a high quality asset class with a generally improving credit landscape, continued its steady rally despite a Fed rate hike in December 2015. A combination of lower than expected new issue supply and strong inflows into municipal mutual funds in the final quarter of 2015 was an additional tailwind for the asset class.

In January of 2016, the municipal rally accelerated as U.S. equities experienced what was widely reported as their worst-ever start to a new year. The combination of plummeting oil prices and slowing economic growth in China helped drive a global flight to quality, with investors fleeing asset classes regarded as risky for the perceived safety of U.S. Treasuries and municipal bonds. Falling government interest rates around the world, driven by actions such as quantitative easing in Japan and the European Union, put many sovereign rates into negative territory and made Treasuries look attractive by comparison.

Great Britain's June 2016 vote to leave the European Union, ongoing Fed caution, and mixed U.S. economic reports continued to fuel the municipal rally in the summer of 2016. Even the Commonwealth of Puerto Rico's July 1, 2016 default on over \$1 billion in municipal bond and debt service payments—its second default in 2016 and its largest to date—failed to put a dent in the municipal rally, as the market had expected the defaults for some time.

In the final month of the period, however, remarks by three central banks—the European Central Bank, the Bank of Japan and the Fed—seemed to indicate that rates might begin to rise sooner than markets had anticipated. As a result, municipal rates crept upward in September of 2016 and prices declined modestly for the month.

For the one-year period as a whole, the yield curve flattened for municipal AAA-rated<sup>7</sup> issues. Rates rose in the one- to three-year area of the curve—driven in part by new

money market regulations set to take effect in mid-October 2016—but fell for maturities of four to 30 years. In general, longer maturities saw greater rate declines and thus better price performance. Across the yield curve, municipal bonds outperformed U.S. Treasuries for the period.

##### Fund Performance

For the fiscal year ended September 30, 2016, Municipal Bond Fund II, Massachusetts Municipal Bond Fund, Michigan Municipal Bond Fund, New Jersey Municipal Bond Fund, Ohio Municipal Bond Fund and Pennsylvania Municipal Bond Fund shares at net asset value (NAV) outperformed the 8.72% return of the Funds' benchmark, the Bloomberg Barclays Long (22+) Year Municipal Bond Index (the Index). During the same 12-month period, California Municipal Bond Fund II and New York Municipal Bond Fund II shares at NAV underperformed the Index.

The Funds' overall strategy is to invest primarily in higher-quality bonds (rated A or higher).

## Edgar Filing: EATON VANCE PENNSYLVANIA MUNICIPAL BOND FUND - Form N-CSR

In managing the Funds, management employs leverage through Residual Interest Bond (RIB) financing, Auction Preferred Shares (APS) and Institutional MuniFund Term Preferred (iMTP) Shares<sup>6</sup> to seek to enhance the Funds' tax-exempt income. The use of leverage has the effect of achieving additional exposure to the municipal market, and thus magnifying a Fund's exposure to its underlying investments in both up and down market environments. During this period of generally falling rates and rising prices in the medium- and long-maturity areas of the municipal yield curve, the use of leverage contributed to performance versus the Index which does not employ leverage for all eight Funds.

By using Treasury futures and/or interest-rate swaps, management hedges to various degrees against the greater potential risk of volatility caused by the use of leverage and investing in bonds at the long end of the yield curve. As a risk management tactic within the Funds' overall strategy, interest rate hedging is intended to moderate performance on both the upside and the downside of the market. During this period of generally positive performance by municipal bonds, the Funds' Treasury futures hedge mitigated some of the upside and thus detracted modestly from performance relative to the unhedged Index for all Funds except the Michigan and Ohio Funds, which did not use a hedging strategy during the period.

*Past performance is no guarantee of future results. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) or market price (as applicable) with all distributions reinvested and include management fees and other expenses. Fund performance at market price will differ from its results at NAV due to factors such as changing perceptions about the Fund, market conditions, fluctuations in supply and demand for Fund shares, or changes in Fund distributions. Investment return and principal value will fluctuate so that shares, when sold, may be worth more or less than their original cost. Performance less than or equal to one year is cumulative. Performance is for the stated time period only; due to market volatility, current Fund performance may be lower or higher than the quoted return. ### Municipal Bond Funds

September 30, 2016

#### Management's Discussion of Fund Performance *continued*

##### Fund-specific Results

Eaton Vance Municipal Bond Fund II shares at NAV returned 9.27%, outperforming the 8.72% return of the Index. Significant contributors to relative results versus the Index included leverage, as noted above; security selection in the special tax sector, which was the best-performing sector in the Index during the period; and security selection and an overweight, relative to the Index, in zero-coupon bonds, which were the best-performing coupon structure in the Index during the period. The main detractors from performance relative to the Index were the Fund's hedging strategy, an underweight in BBB-rated bonds, and an overweight in prerefunded, or escrowed, bonds.

Eaton Vance California Municipal Bond Fund II shares at NAV returned 8.18%, underperforming the 8.72% return of the Index. Detractors from results versus the Index included the Fund's hedging strategy, an overweight in prerefunded bonds, and an underweight in A-rated and BBB-rated bonds. In contrast, performance versus the Index was helped by leverage, an overweight in zero-coupon bonds, and an overweight and security selection in insured Puerto Rico bonds. The majority of the Fund's Puerto Rico holdings were insured by various municipal bond insurers. It should be noted that most uninsured bonds issued by the Commonwealth of Puerto Rico and its various conduit issuers were no longer included in the Index. As Puerto Rico continued to deal with an ongoing fiscal crisis, bonds issued by its various legal entities were impacted by a number of factors throughout the period. As the period ended, the situation in Puerto Rico was continuing to evolve.

Eaton Vance Massachusetts Municipal Bond Fund shares at NAV returned 11.32%, outperforming the 8.72% return of the Index. Key contributors to performance relative to the Index included leverage, an overweight in insured Puerto Rico bonds, an overweight in the education sector, and an overweight in general obligation bonds. In contrast, the Fund's hedging strategy, an overweight in prerefunded bonds, and an underweight in BBB-rated bonds detracted from performance versus the Index.

Eaton Vance Michigan Municipal Bond Fund shares at NAV returned 11.59%, outperforming the 8.72% return of the Index. Leverage, an overweight in insured Puerto Rico bonds, security selection in the electric utility sector, and security

selection in the water and sewer sector all contributed to results versus the Index. Detractors from Fund performance versus the Index included an overweight in prerefunded bonds; an underweight in the transportation sector, which was the second-best-performing sector in the Index during the period; and an underweight in BBB-rated bonds.

Eaton Vance New Jersey Municipal Bond Fund shares at NAV returned 12.67%, outperforming the 8.72% return of the Index. Contributors to performance versus the Index included leverage, an overweight in zero-coupon bonds, and an overweight in A-rated bonds. Detractors from results relative to the Index included the Fund's hedging strategy, an overweight in prerefunded bonds, and an underweight in bonds with 22 or more years remaining to maturity.

Eaton Vance New York Municipal Bond Fund II shares at NAV returned 8.28%, underperforming the 8.72% return of the Index. Fund performance versus the Index was hurt by the Fund's hedging strategy, an overweight in prerefunded bonds, and an underweight in A-rated and BBB-rated bonds. Contributors to results versus the Index included leverage, an overweight in the special tax sector, and an overweight and security selection in insured Puerto Rico bonds.

Eaton Vance Ohio Municipal Bond Fund shares at NAV returned 11.24%, outperforming the 8.72% return of the Index. Key contributors to results versus the Index included leverage, an overweight in insured Puerto Rico bonds, and an overweight in zero-coupon bonds. In contrast, an

overweight in prerefunded bonds, an underweight in the transportation sector, and an underweight in bonds with 22 or more years remaining to maturity all detracted from performance relative to the Index.

Eaton Vance Pennsylvania Municipal Bond Fund shares at NAV returned 12.08%, outperforming the 8.72% return of the Index. Leverage contributed to performance versus the Index, as did an overweight and security selection in insured Puerto Rico bonds and an overweight in zero-coupon bonds. In contrast, the Fund's hedging strategy, an overweight in prerefunded bonds, and an underweight in the transportation sector detracted from performance relative to the Index during the period.

Prior to August 24, 2016, Bloomberg Barclays Long (22+) Year Municipal Bond Index was named Barclays Long (22+) Year Municipal Bond Index. Unless otherwise stated, index returns do not reflect the effect of any applicable sales charges, commissions, expenses, taxes or leverage, as applicable. It is not possible to invest directly in an index.
- <sup>3</sup> Performance results reflect the effects of leverage. Performance since inception for an index, if presented, is the performance since the Fund's or oldest share class inception, as applicable. Included in the average annual total return at NAV is the impact of the tender and repurchase of a portion of the Fund's APS at 95.5% of the Fund's APS per share liquidation preference. Had this transaction not occurred, the total return at NAV would be lower for the Fund.
- <sup>4</sup> The shares of the Fund often trade at a discount or premium from their net asset value. The discount or premium of the Fund may vary over time and may be higher or lower than what is quoted in this report. For up-to-date premium/discount information, please refer to <http://eatonvance.com/closedend>.
- <sup>5</sup> The Distribution Rate is based on the Fund's last regular distribution per share in the period (annualized) divided by the Fund's NAV or market price at the end of the period. The Fund's distributions may be comprised of amounts characterized for federal income tax purposes as tax-exempt income, qualified and non-qualified ordinary dividends, capital gains and nondividend distributions, also known as return of capital. The Fund will determine the federal income tax character of distributions paid to a shareholder after the end of the calendar year. This is reported on the IRS form 1099-DIV and provided to the shareholder shortly after each year-end. For information about the tax character of distributions made in prior calendar years, please refer to Performance-Tax Character of Distributions on the Fund's webpage available at [eatonvance.com](http://eatonvance.com).  
The Fund's distributions are determined by the investment adviser based on its current assessment of the Fund's long-term return potential. Fund distributions may be affected by numerous factors including changes in Fund performance, the cost of financing for Funds that employ leverage, portfolio holdings, realized and projected returns, and other factors. As portfolio and market conditions change, the rate of distributions paid by the Fund could change. Taxable-equivalent performance is based on the highest combined federal and state income tax rates, where applicable. Lower tax rates would result in lower tax-equivalent performance. Actual tax rates will vary depending on your income, exemptions and deductions. Rates do not include local taxes.
- <sup>6</sup> Fund employs RIB financing and/or APS and iMTP Shares leverage. The leverage created by RIB investments, APS and iMTP Shares provides an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater price volatility). The cost of leverage rises and falls with changes in short-term interest rates. See Floating Rate Notes Issued in Conjunction with Securities Held in the notes to the financial statements for more information about RIB financing. RIB leverage represents the amount of Floating Rate Notes outstanding at period end as a percentage of Fund net assets applicable to common shares plus APS, iMTP Shares and Floating Rate Notes. APS leverage represents the liquidation value of the Fund's APS outstanding at period end as a percentage of Fund net assets applicable to common shares plus APS, iMTP Shares and Floating Rate Notes. iMTP Shares leverage represents the liquidation value of the Fund's iMTP Shares outstanding at period end as a percentage of Fund net assets applicable to common shares plus APS, iMTP Shares and Floating Rate Notes. The Fund may be required to maintain prescribed asset coverage for its leverage and may be required to reduce its leverage at an inopportune time.

<sup>7</sup> Ratings are based on Moody's, S&P or Fitch, as applicable. If securities are rated differently by the ratings agencies, the higher rating is applied. Ratings, which are subject to change, apply to the creditworthiness of the issuers of the underlying securities and not to the Fund or its shares. Credit ratings measure the quality of a bond based on the issuer's creditworthiness, with ratings ranging from AAA, being the highest, to D, being the lowest based on S&P's measures. Ratings of BBB or higher by S&P or Fitch (Baa or higher by Moody's) are considered to be investment-grade quality. Credit ratings are based largely on the ratings agency's analysis at the time of rating. The rating assigned to any particular security is not necessarily a reflection of the issuer's current financial condition and does not necessarily reflect its assessment of the volatility of a security's market value or of the liquidity of an investment in the security. Holdings designated as "Not Rated" are not rated by the national ratings agencies stated above.

<sup>8</sup> The chart includes the municipal bonds held by a trust that issues residual interest bonds, consistent with the Portfolio of Investments.

(2) Returns are historical and are calculated by determining the percentage change in net asset value or market value with all distributions reinvested. Distributions are assumed to be reinvested at prices obtained under the Fund's dividend reinvestment plan.

(3) The total return based on net asset value reflects the impact of the tender and repurchase by the Fund of a portion of its APS at 95.5% of the per share liquidation preference. Absent this transaction, the total return based on net asset value would have been 7.89%.

(4) Ratios do not reflect the effect of dividend payments to APS shareholders.

(5) Excludes the effect of custody fee credits, if any, of less than 0.005%. Effective September 1, 2015, custody fee credits, which were earned on cash deposit balances, were discontinued by the custodian.

(6) Interest and fee expense relates to the liability for floating rate notes issued in conjunction with residual interest bond transactions (see Note 1G) and, for the year ended September 30, 2016, Institutional MuniFund Term Preferred Shares issued to redeem a portion of the Fund's APS (see Note 3).

(7) Preferred shares represent Institutional MuniFund Term Preferred Shares and APS as of September 30, 2016 and APS as of September 30, 2015, 2014, 2013 and 2012.
