ANGLOGOLD ASHANTI : 2004 ABRIDGED ANNUAL REPORT

04

Abridged
Annual
Report

Scope of the report

This Abridged Report 2004 presents a summary of the operating and financial results for the period 1 January 2004 to 31 December 2004. The information has been drawn from the Annual Report 2004, which has been prepared in accordance with International Financial Reporting Standards and US Generally Accepted Accounting Practice. The latter only applies to the financial statements which are prepared in compliance with the New York Stock Exchange regulations. The financial statements have also been prepared in line with the South African Companies Act No. 61 of 1973 and the Listings Requirements of the JSE Securities Exchange South Africa (JSE). The guidelines of the King Report on Corporate Governance, 2002 have also been taken into account. The Annual Report is submitted to the JSE, as well as to the London, New York, Ghana and Australian stock exchanges and the Paris and Brussels bourses. It is also submitted to the US Securities and Exchange Commission (SEC) on a Form 6-K.

The most significant event of the past year was the business combination of AngloGold Limited (AngloGold) with Ashanti Goldfields Company Limited (Ashanti). The establishment of AngloGold Ashanti Limited (AngloGold Ashanti) was effective on 26 April 2004 when the former Ashanti operations were incorporated into the group. For reporting purposes, the effective reporting period for the combined operation began on 1 May 2004. The former Ashanti operations are therefore reported in this report for an eight-month period only, that is, May-December 2004.

Mineral Resources and Ore Reserves are reported in line with the South African Code for Reporting of Mineral Reserves and Resources (SAMREC 2000) and the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC 2004). Competent persons in terms of all these codes have prepared, reviewed and confirmed the Mineral Resources and Ore Reserves as reported in this publication. The Annual Report contains a summary of the Mineral Resources and Ore Reserves. A more detailed breakdown that includes plans is available separately in a supplementary statistics document.

In addition, AngloGold Ashanti has for the second year produced a Report to Society in conjunction with the Annual Report to ensure a comprehensive understanding of all aspects of the group. The Report to Society seeks to explain and assess the economic, social and environmental responsibilities and performance obligations the company believes it has to its stakeholders, who include shareholders, employees, employee representatives and the communities in which it operates, as well as regional and national governments.

Both the Annual Report 2004 and the Report to Society 2004 are available online on the company's website at www.anglogoldashanti.com, as is the supplementary document on group Mineral Resources and Ore Reserves. These documents are also available on CD or in a printed version, and can be requested from the contacts listed at the end of this report.

Throughout this document, US dollar, dollar or \$ refers to US dollars, unless otherwise stated.

Certain forward-looking statements

Certain statements contained in this document including, without limitation, those concerning the economic outlook for the gold mining industry, expectations regarding gold prices, production, cash costs and other operating results, growth prospects and outlook of AngloGold Ashanti's operations, including the completion and commencement of commercial operations of certain of AngloGold Ashanti's exploration and production projects, its liquidity and capital resources and expenditure, contain certain forward-looking statements regarding AngloGold Ashanti's operations, economic performance and financial condition. Although AngloGold Ashanti believes that the expectations and the outcome and consequence of any pending litigation proceedings reflected in such forward-looking statements are reasonable, no assurance can be given that such expectations will prove to have been correct. Accordingly, results could differ materially from those set out in the forward-looking statements as a result of, among other factors, changes in economic and market conditions, success of business and operating initiatives, changes in the regulatory environment and other government action, fluctuations in gold prices and exchange rates, and business and operational risk management. For a discussion of such factors, refer to the risk factors as detailed in the corporate governance section of this Annual Report 2004. In addition to this publication, AngloGold Ashanti has produced an annual report on Form 20-F, which was filed with the US Securities and Exchange Commission (SEC) on or about 30 March 2005, for the year ended 31 December 2004.

Letter from the chairman and the deputy chairman

Dear Shareholder

The year ended 31 December 2004 was operationally generally sound, except for the newly acquired Ashanti mines, but financially challenging. Although gold production was higher than the previous year, largely as a result of the business combination with Ashanti, and the received price of gold increased by \$31 per ounce, lower grades and higher costs driven by the oil price, mining contractor costs and stronger operating currencies pushed adjusted headline earnings 7% lower and, consequently, the dividend was substantially reduced. Additionally, the company's hedge book, which has served us very well in the past during periods of a weaker spot price, presented us with further challenges in the face of a sustained stronger gold price and a restructure of the hedge book was commenced at the end of December and completed in January 2005.

The average spot price for gold of \$409 per ounce for 2004 was \$46 per ounce stronger than the average price for 2003 and the final quarter of the year saw a spot gold price of \$457 per ounce, the highest price in almost 17 years. The driving influence of positive investor sentiment, which appears to be behind this sustained improvement, remained the weakening of the dollar and continued political uncertainty in the Middle East.

The physical market for gold during 2004 showed some encouraging moves in the important markets of Turkey and Vietnam and sustained demand in India. In China, for the first time in several years, sales of gold jewellery grew during 2004 due to the introduction to that market of modern, 18- carat gold jewellery product. With these high population economies achieving growth in the high single digits, there seems good reason for cautious optimism about future demand and pricing for all commodities including gold.

It is against this background that AngloGold Ashanti took the decision to lower its mandate for hedging from 50% to 30% of the next five years of production spread over ten years and to restructure its hedge book. The effect of these moves was to increase the proportion of the company's anticipated 6.5 million ounces of gold production that is exposed to the spot price to 90% in 2005 and 83% in 2006 and to improve the value of remaining forward sales contracts in future years.

Concern that the International Monetary Fund (IMF) might sell part of its substantial gold reserves in order to write down the debt of heavily indebted poorer countries has recently given rise to a degree of uncertainty in the gold market. Such a scheme was previously proposed in 1999; then it seemed to us perverse that an international body such as the IMF should act in a way that would negatively affect gold markets in order to reduce the debt burden of certain developing countries, many of which are significant gold producers. Leading figures in the United States Congress have already indicated their opposition to any sale of IMF gold and, without the support of the United States at the IMF, such a sale would not be permitted. However, in 1999, a means was derived to realise value from the IMF gold reserves through the revaluation of a

portion of the IMF gold holdings, from their low balance sheet value of \$42 per ounce to the spot price for the metal at that time. This achieved the IMF purpose without impacting either the gold market or the price and we urge the IMF to act in a way on this occasion which will achieve its certainly worthwhile objective without severe and negative consequences for gold producing developing economies.

The positive trends in the gold market have also led gold companies to extend their efforts to find and turn to account, tomorrow's production ounces. In the case of AngloGold Ashanti, this has given rise to a "new frontier" strategy of looking for exploration and acquisition targets outside of the world's recognised and mature gold regions and to dispose of properties which are unlikely to yield real shareholder returns. In Russia, AngloGold Ashanti has acquired a share in London-based Trans-Siberian Gold as an entry point to this region. In China, strategic alliances are being sought to allow the company successfully to extract value from what may well be a prospective region. During the year the company announced joint venture arrangements giving it interests in Laos and the Philippines. In Mongolia, the company continued to acquire land positions in several prospective areas. In the DRC, exploration drilling has commenced in the gold-rich Ituri region of the north-east of the country. Finally, faced with the combination of improving physical demand for the product, the likelihood of a sustained higher spot gold price, stronger currencies against the dollar and higher operating costs, the major challenge facing management is to grow margins, improve returns on capital and to continue to reward shareholders. We are confident that the company has strategies in place to meet these challenges during the rest of 2005 and in the years beyond.

ANGLOGOLD ASHANTI ABRIDGED ANNUAL REPORT 2004

Letter from the chief executive officer and the president

Dear Shareholder

The most pleasing features of 2004 from an operational point of view were the dramatic improvements in workplace safety in all of our operating regions – lost-time injuries came down by 26% for the year and the rate of fatal accidents by 34%. These numbers are a tribute to the hard work and dedication to a safe working environment on the part of our operating management.

The key strategic event in 2004 for us was the completion of the AngloGold Ashanti business combination. From the outset, our objective had been to combine the two companies into a long-life, low-cost, high-margin investment opportunity, bringing together the best that both had to offer, by way of ore bodies, capital and human resources. The business combination was endorsed by the executive, legislative and judicial branches of the Ghanaian government – a critical requirement for a company which is likely to be operating profitably in that country fifty years from now.

Immediately following the completion of the business combination, we reported on the difficulties we were experiencing at Siguiri, our operation in the Republic of Guinea. Discussions between AngloGold Ashanti management and senior government officials on the underlying principles and details of the Convention de Base governing the relationship between the company and the government are proceeding well and we anticipate a workable agreement in the near future.

The positive relationship between ourselves and government here at home in South Africa is also proving to be an advantage in converting our mining rights in terms of the new Act. We realise that we are dealing with unprecedented areas of law and regulation in this process and we continue to have constructive interactions with the Department of Minerals and Energy to deal with uncertainties which the process reveals. AngloGold Ashanti has developed a comprehensive education, counselling and health care response to HIV/AIDS in South Africa. Education about the nature of this disease and its patterns of transmission is a continuing and comprehensive part of workplace communication. Every AngloGold Ashanti employee has access to several convenient and confidential voluntary counselling and testing (VCT) facilities. During 2004, some 4,000 employees made use of these centres and some 10,000 employees since the VCT programme began. 700 employees who have tested positive for HIV as part of the VCT programme have enrolled in wellness clinics and participate in an HIV/AIDS treatment programme and 706 employees are participating in anti-retroviral therapy programmes. The improvement in their state of health and their immune systems is impressive. AngloGold Ashanti hopes to participate in a major vaccine trial during the course of 2005. Looking ahead to the rest of this year and beyond, we face three key challenges.

First, we must manage our production costs in the face of strong operating currencies, rising mining contractor costs, higher energy prices and high transport charges. The global cost management project

underway has already yielded savings in excess of \$50 million, with a similar level anticipated for 2005.

Secondly, against a background of what seems now to be a sustained stronger spot gold price, we will continue actively to manage our hedge book in the way which we have effectively done over the past three years and particularly in the last quarter of 2004, when we reduced our level of cover by some 2.2 million ounces, giving us greater exposure to the spot price in the future.

Thirdly, the integration of AngloGold and Ashanti is now effectively complete and we continue to hold the view that the combination will allow us to unlock the potential of both companies. The current operations at Obuasi continue to present us with a significant challenge but we are confident that we have the strategies and plans in place to ensure a gradual but steady improvement in performance, which we anticipate becoming evident during the course of the year.

AngloGold Ashanti chief operating officer Dave Hodgson and chief financial officer Jonathan Best have indicated their wish to retire during 2005. The board, on the recommendation of its Nominations Committee, will appoint Srinivasan Venkatakrishnan (Venkat) as chief financial officer from 1 August when Jonathan leaves at the end of July. In view of the company's size, the board believes that it is necessary to appoint two chief operating officers (COO), one responsible for operations in Africa, and the other leading those in the Americas and Australia. Thus when Dave leaves at the end of April, Neville Nicolau will be appointed COO (Africa) and Roberto Carvalho Silva COO (Americas and Australia) from 1 May.

Dave and Jonathan have made an invaluable contribution to this company over the last ten years. In Venkat, Neville and Roberto, we are fortunate to have three experienced executives to assume these key positions.

The year 2004 was an exciting but challenging one for your company. We remain fully committed to our promise to you to generate competitive returns through the continuous improvement of AngloGold Ashanti's resources – its people, assets and product.

Business overview

Profile and corporate information

AngloGold Ashanti, headquartered in Johannesburg, South Africa, is a global gold company with a portfolio of long-life, relatively low-cost assets and differing orebody types in key gold producing regions. The company's 22 operations are located in 10 countries (Argentina, Australia, Brazil, Ghana, Guinea, Mali, Namibia, South Africa, Tanzania and the United States of America), and are supported by extensive exploration activities. The combined Proved and Probable Ore Reserves of the group amounted to 79 million ounces as at 31 December 2004.

AngloGold Ashanti is listed on stock exchanges world wide – in Johannesburg (ANG), New York (AU), Australia (AGG) and Ghana (AGA and AADS), as well as the London Stock Exchange (AGD), Euronext Paris (VA) and Euronext Brussels (ANG).

Summary of performance in 2004

The group's gold production in 2004 rose by 8% to 6.052 million ounces, following the combination of the AngloGold and Ashanti operations, and in line with the company's geographic and orebody diversification strategy. Output from operations outside South Africa, principally from low-cost surface and shallow mines, rose by 27% to 2.973 million ounces.

Capital expenditure for the year rose to \$585 million. Of this, \$329 million (56%) was for maintenance capital expenditure and \$256 million (44%) for new projects. Adjusted headline earnings decreased by 7% to \$263 million.

The market in 2004

The return of investor interest in gold resulted in a sustained rise in the gold price during the latter half of 2004. The gold price rose almost uninterrupted for three months to early December to \$456.75 per ounce, the highest price in almost 17 years. There was a measure of correction after the price failed to rise above \$460 per ounce, and the price ended the year at \$435 per ounce, up by 6% from the beginning of 2004. The market has since corrected further to a low of \$410 per ounce, but buying interest has returned and the price rally of the past three years appears intact.

The driving influence on investor sentiment was the weakening dollar, particularly against the euro, but also against the Japanese yen. This has been the case also for the past three and a half years and the correlation between the rising dollar spot price of gold and the weakening dollar against the euro reached a remarkable 97% over the three months to December. While this does not mean that other factors do not influence the gold market and the price of gold from time to time, it does underline the primary influence of the health of the US currency on the gold price in the current market cycle.

In this respect, the gold market differs from the parallel cycle of rising base metal and commodity prices, which has also been influenced to some extent by investor buying on the back of a weakening US currency. However, prices of industrial metals are being driven mainly by Chinese demand at present. The correlation between the gold price and the weak dollar is an important one for the year ahead. With market commentators and analysts uniformly forecasting a weaker dollar at the end of 2005, these forecasts have translated to a forecast for higher spot prices of gold as well. Any stabilisation or recovery in the US currency would have the opposite effect on the gold price in the current market.

7

ANGLOGOLD ASHANTI ABRIDGED ANNUAL REPORT 2004

Investment demand remains the instrument through which this influence on the gold price is manifested. The role played by investors and speculators in gold on the New York Comex has been supplemented by the launch in the USA of the gold exchange-traded fund, the streetTRACKS Gold Shares. The fund was created by the World Gold Council in partnership with State Street Global Markets and by early 2005 this fund had purchased on behalf of its investors over 140 tons of physical gold in the market. This level of investment is equal to over 25% of the net long position in gold on the New York Comex. On the Comex itself, during the year the total open position in gold reached a record high of over 22 million ounces, or 685 tons. The net long position remained consistently strong throughout the final quarter of 2004, although it failed to reach the record high levels seen in early April.

The average spot price of \$409 per ounce for the year was \$46 per ounce or 13% stronger than the average for the previous year.

However, the rand strengthened against the dollar by some 15% during this period, and the rand gold price enjoyed no benefit from the higher dollar prices. The gold price in rands at the end of 2004 of R79,442 per kilogram was over 10% (or R9,000 per kilogram) lower than the local gold price at the beginning of 2004, and the average local price of R84,400 per kilogram for 2004 was 4% lower than the average price in 2003.

Currencies

The recovery in the dollar which began early in the first quarter of 2004 lasted well into the third quarter of the year. For over six months, the US currency traded mostly between \$1.20 and \$1.25 to the euro, and reached ¥115 during May 2004. The dollar's strength during this time was a result largely of purchases of dollar instruments by monetary authorities in China and Japan. As this Asian intervention ended, so did the recovery in the US currency, and the dollar's devaluation resumed late in the third quarter, and continued unbroken for four months, to close 2004 at almost \$1.36 to the euro and at ¥102. By the end of the year, the euro had gained 8% and the yen 5% against the dollar compared to their exchange rates at the beginning of 2004.

The cycle of dollar weakness continued as the market took the view that the challenge of the US budget deficit was unlikely to be resolved and the US currency would have to weaken in order to set in train the economic corrections necessary to reduce the US deficits. This market view was reinforced by the public announcement in mid-November by Alan Greenspan, Chairman of the US Federal Reserve Bank, that the current account deficit of the US was unsustainable and that the willingness of foreign investors to finance that deficit through investments in the US currency was finite. After this announcement, the US currency went on to touch a record low of over \$1.37 to the euro, and also to lose ground against the yen. With the weaker dollar came a stronger gold price, and the behaviour of gold as a currency trade against the dollar was reinforced. Since the end of 2004, the dollar has recovered somewhat against both the euro and the yen.

The South African rand has strengthened against the dollar by significantly more than the dollar has weakened against other major currencies. At its strongest point against the dollar (at the end of 2004), the rand had gained 17% since the beginning of 2004. The local currency also showed significant volatility during the year. While the rand has been helped in 2004 by the weakening dollar, it has also benefited from strong commodity prices and from sustained investor interest in the South African economy. In addition, sound economic policies have translated to sustained growth in the country and to a further upgrading of the country's sovereign risk rating by international ratings agencies. While the value of the rand remains vulnerable to a recovery in the dollar, or to specific event-driven reactions, it is otherwise likely to sustain its strength against major currencies into 2005.

AngloGold Ashanti believes that the primary driver in gold continues to be strong speculator and investor interest in the metal, driven by a number of fundamental economic circumstances. Among these is the anticipated further decline of the dollar.

The physical market for gold in the first half of 2004 showed some positive adjustment, and some acceptance of higher gold prices. This resulted in a slight recovery in demand and some slippage in supply, and a physical market more in balance for that. In particular, in the important area of demand for gold in jewellery, latest reports show improved offtake in the Middle East (particularly in Turkey) and in South East Asia (particularly Vietnam), and sustained demand in India. Set against this demand performance, official sales of gold were lower in 2004, due in part to the process of renegotiation and extension of the Washington Agreement for a further five years, and lower scrap sales. A further contribution to an improved supply/demand balance is likely to come from rising gold offtake in jewellery in China this year, the first time in several years. This improvement has come with the completion in 2003 of the deregulation of the gold jewellery market in China, and the subsequent introduction by the World Gold Council of modern, 18-carat gold jewellery to metropolitan markets in China. This new product is able to compete with platinum jewellery on price, colour and design and it has been interesting to see growing sales of this new product and a simultaneous fall in platinum jewellery sales in the China mainland market during 2004.

Hedging

As at 31 December 2004, the net delta hedge position of AngloGold Ashanti was 10.49 million ounces or 326.2 tons, valued at the spot price of gold on that date of \$434.70 per ounce. This net delta position reflects a decrease over the year of 4.2 million ounces or 130 tons in the net combined size of the AngloGold Ashanti hedge since the beginning of 2004 and the take-on of the Ashanti hedge in April 2004. This decrease has been achieved by the active management of hedge positions quarter by quarter, and a restructuring and reduction of hedge commitments during the final quarter of 2004. The marked-to-market value of the hedge position as at 31 December 2004 was negative \$1.16 billion. The group continues to manage its hedged positions actively and to reduce overall levels of pricing commitments in respect of future gold

production by the group.

Outlook for 2005

Production in 2005 is expected to grow to some 6.5 million ounces. Capital expenditure is expected to be \$655 million in 2005, mainly at the South Africa, South America and former Ashanti operations in Ghana and Guinea.

8

for the year ended 31 December 2004

Directors and executive management

Executive directors

Mr RM Godsell (52)

BA, MA

Chief Executive Officer

Bobby Godsell was appointed to the AngloGold board as chief executive officer in April 1998 and as chairman in December 2000. He relinquished his role as chairman of AngloGold in May 2002. He is a non-executive director of Anglo American plc. He is also a past chairman of the World Gold Council.

Mr JG Best (56)

ACIS, ACIMA, MBA

Executive Director: Finance (Chief Financial Officer)

Jonathan Best was appointed finance director of AngloGold in April 1998. He has had 36 years of service with companies associated with the mining industry.

Mr DL Hodgson (57)

BSc (Mining Engineering), BSc (Civil Engineering), BCom, AMP (Harvard)

Chief Operating Officer

Dave Hodgson was appointed to the AngloGold board in November 2001 as chief operating officer. He was previously executive officer responsible for AngloGold's South Africa region. He has more than 31 years of mining experience.

Dr SE Jonah KBE (55)

Hon D Sc (Exeter), MSc (Mineral Production Management)

President

Dr Sam Jonah was appointed to the position of chief executive officer of Ashanti Goldfields Company Limited in 1986. Dr Jonah had an honorary knighthood conferred on him by Her Majesty, Queen Elizabeth II of Great Britain, in 2003. He became president of AngloGold Ashanti in May 2004.

Mr KH Williams (56)

BA (Hons)

Executive Director: Marketing

Kelvin Williams was appointed marketing director of AngloGold in April 1998. He has 29 years of service in the gold mining industry. He is a director and the immediate past chairman of Rand Refinery and is a director of the World Gold Council.

Non-executive directors

Mr RP Edey (62)

FCA

Chairman and independent non-executive director

Russell Edey was appointed to the AngloGold board in April 1998 and as deputy chairman in December 2000. In May 2002, he was appointed chairman when Bobby Godsell relinquished this office.

Based in the United Kingdom, he is deputy chairman of NM Rothschild Corporate Finance and a director of a number of other companies.

Dr TJ Motlatsi (53)

Hon D Soc Sc (Lesotho)

Deputy Chairman and independent non-executive director

James Motlatsi was appointed to the AngloGold board in April 1998 and as deputy chairman in May 2002 upon Russell Edey being appointed chairman. He has been associated with the South African mining industry since 1970, and is a past president of the National Union of Mineworkers (NUM). He is also chief executive officer of TEBA Ltd.

Mr FB Arisman (60)

MSc (Finance)

Independent non-executive director

Frank Arisman was appointed to the AngloGold board in April 1998. He resides in New York and recently retired, after 32 years of service, from JP Morgan Chase, where he held the position of managing director.

Mrs E le R Bradley (66)

BSc, MSc

Independent non-executive director

Elisabeth Bradley was appointed to the AngloGold board in April 1998. She is non-executive chairman of Wesco Investments Ltd, Metair Investments Ltd and Toyota South Africa (Pty) Ltd and a director of a number of other companies. She is also deputy chairman of the South African Institute of International Affairs.

Mr CB Brayshaw (69)

CA(SA), FCA

Independent non-executive director

Colin Brayshaw was appointed to the AngloGold board in April 1998. He is a retired managing partner and chairman of Deloitte & Touche and is a non-executive director of a number of other companies including Anglo American Platinum Corporation Ltd, Datatec Ltd and Johnnic Holdings Ltd.

Mr AW Lea (56)

BA (Hons)

Tony Lea was appointed to the AngloGold board in July 2001. He is finance director of Anglo American plc.

Mr WA Nairn (60)

BSc (Mining Engineering)

Bill Nairn has been a member of the AngloGold board since January 2000. He was re-appointed to the board in May 2001, having previously been alternate director to Tony Trahar. He is a former group technical director of Anglo American plc.

Mr SR Thompson (45)

BA (Hons) (Geology)

Simon Thompson is the chief executive of Anglo American Base Metals Division. He is also a director of the Anglo American Corporation of South Africa Ltd, a member of the executive board of Anglo American plc, chairman of the Exploration Division and a member of the executive committee of the Industrial Minerals Division. Simon joined the AngloGold Ashanti board in 2004.

Mr AJ Trahar (55)

BCom, CA(SA)

Tony Trahar was appointed to the AngloGold board in October 2000. He is chief executive officer of Anglo American plc.

Mr PL Zim (44)

MCom

Lazarus Zim is chief executive officer of Anglo American Corporation of South Africa Limited. He is also chairman of Anglo Operations Limited and serves on a number of boards in the Anglo American Group including Anglo American Platinum Corporation Ltd. Lazarus joined the AngloGold Ashanti board in 2004.

9

ANGLOGOLD ASHANTI ABRIDGED ANNUAL REPORT 2004

Neville Nicolau became the executive officer responsible for AngloGold's South Africa region in November 2001 and was appointed a deputy chief operating officer in January 2005. He has 26 years of mining experience.

Ms YZ Simelane (39)

BA LLB, FILPA, MAP

Managing Secretary

Yedwa Simelane joined AngloGold in November 2000 from the Mineworkers' Provident Fund where she was the senior manager of the Fund. Yedwa was appointed to the position of executive officer in May 2004.

Mr NW Unwin (52)

BA

Human Resources and Information Technology

Nigel Unwin has had many years of experience in the field of human resources. He has been an executive officer since 1999.

Mr S Venkatakrishnan (39)

BCom, A.C.A (ICAI)

Deputy Chief Financial Officer

Srinivasan Venkatakrishnan (Venkat) was the finance director of Ashanti Goldfields Company Limited from 2000 until the business combination with AngloGold in 2004. Prior to joining Ashanti, Venkat worked as a director in the Reorganisation Services division of Deloitte & Touche

in London.

Mr GF Wylie (52)

BSc Honours (Geology), MSc (Mining Engineering), Dip Mgmt

Exploration

Gordon Wylie began his career at Iscor in 1976 before moving to Anglo American Corporation. In 1998 he became manager, Exploration and Geology for AngloGold's global operations. Gordon was appointed to the position of executive officer in May 2004.

Company secretary

Mr CR Bull (58)

BCom

Chris Bull has been employed by the Anglo American Corporation group for 39 years in various company secretarial positions. He was appointed company secretary of AngloGold in 1998 and is responsible for ensuring compliance with statutory and corporate governance requirements and the regulations of the stock exchanges on which AngloGold Ashanti is listed.

10

Corporate governance

Details on the company's corporate governance practices are available in the comprehensive Annual Report 2004, which is available in print and in electronic format on the company's website, www.anglogoldashanti.com. AngloGold Ashanti is a controlled company with its parent company, Anglo American, holding more than 50% of the company's issued share capital. The board comprises a unitary board structure of 15 directors who assume complete responsibility for the activities of the company, including the total risk management framework of the company. The board has a written charter that governs its powers, functions and responsibilities. The board contains the mix of skills, experience and knowledge required of a multinational gold company.

Non-executive directors provide the board with invaluable and balanced advice and experience that is independent of management and the executive. The presence of five independent directors on the board, and the critical role they play through representation on key committees such as the Audit and Corporate Governance, Nominations, Political Donations and Remuneration committees, together with their calibre, experience and standing within the company, ensures that the company's interests are served by impartial views that are separate of management and shareholders. The five independent directors are: Mr Russell Edey (Board Chairman), Dr James Motlatsi (Deputy Board Chairman), Mr Frank Arisman, Mrs Elisabeth Bradley and Mr Colin Brayshaw.

In terms of board policy, a director will qualify as being independent provided AngloGold Ashanti has not, over the preceding year, done business in excess of \$10 million or 5% of the company's treasury business with the employer of that director. Furthermore, in compliance with the Listings Requirements of the JSE Securities Exchange South Africa (JSE), an independent director must not be a representative of a shareholder who has the ability to control or materially influence management and/or the board; not have been employed by the company or be the spouse of a person employed by the company in an executive role in the past three years; not been an adviser to the company other than in the capacity as a director of the company; not be a material supplier, customer or have a material contractual relationship with the company; and be free of any relationship that could be seen to materially interfere with the independence of that person. All five independent directors complied with these requirements in 2004 and the board determined that such directors have no material relationship with AngloGold Ashanti.

Audit and Corporate Governance Committee

The Audit and Corporate Governance Committee, inclusive of its chairman, comprises four independent non-executive directors. The committee comprises: Mr Colin Brayshaw (Committee Chairman), Mr Frank Arisman, Mrs Elisabeth Bradley and Mr Russell Edey. The board has determined the chairman of the committee, Mr Brayshaw, to be a financial expert as required by the Sarbanes-Oxley Act. All members of the committee have considerable financial knowledge and experience to help oversee and guide the board and the company in

respect of the audit and corporate governance disciplines.

The committee and the executive committee consider it unnecessary for the group internal audit manager to report administratively to the chief executive officer, and that she should rather report administratively to the finance director and functionally to the committee. The group internal audit manager has unrestricted access to the chief executive, the board chairman and the chairman of the committee, and is invited to attend and report on her department's activities at all committee meetings. The board is confident that the unfettered access of the group internal audit manager to key board members, and the direct and regular reporting to the committee, together with her calibre, experience and integrity, enables her to discharge her duties as required by law and in fulfilment of her obligations to the company. The function, duties and powers of the internal audit function, for which the group internal audit manager is responsible, is governed by a formal internal audit charter that has been approved by the committee.

The committee meets regularly with the external audit partner, the group's internal audit manager, the head of legal services and the corporate accounting manager, to review the audit plans of the internal and external auditors, to ascertain the extent to which the scope of the audit can be relied upon to detect weaknesses in internal controls and to review the quarterly and half-yearly financial results, significant legal matters affecting the company, the preliminary announcement of the annual results and the annual financial statements, as well as all statutory submissions of a financial nature, prior to approval by the board.

The committee is, furthermore, responsible for:

- the appointment and dismissal of the external auditors; determining and approving external auditors' fees; overseeing the work of the external auditors; determining all non-audit work of the external auditors including consulting work, and approving non-audit fees to be paid to the external auditors; and ensuring that the external auditors report regularly to the committee;
- overseeing the internal audit function; receiving regular report back from the group internal audit manager; appointment and dismissal of the group internal audit manager;
- assessing and reviewing the company's risk management framework; and
- monitoring the group's corporate governance practices in relation to regulatory requirements and guidelines.

The external auditors also meet with the committee members in the absence of management and the chief executive officer and chief financial officer.

11

ANGLOGOLD ASHANTI ABRIDGED ANNUAL REPORT 2004

The New York Stock Exchange (NYSE) rules require that the board determine whether a member of the committee's simultaneous service on more than three public companies' audit committees impairs the ability of such a member to effectively serve on a listed company's audit committee. Mr Brayshaw, the chairman of the committee, is a member of nine other public companies' audit committees and is chairman of seven of them. Mrs Bradley is a member of four other public companies' audit committees and is the chairman of one of them. Mr Brayshaw is a retired managing partner and chairman of Deloitte & Touche, while Mrs Bradley, who is semi-retired, has considerable financial and accounting experience. The board is confident that the experience, calibre and integrity of both Mr Brayshaw and Mrs Bradley, together with their regular attendance and active contribution at meetings of the committee, demonstrate their commitment to the company's affairs and particularly to the deliberations of the committee.

The Nominations Committee

The committee is responsible for determining and recommending eligible candidates for board appointments. The appointment of directors is a matter for the board as a whole but the committee is responsible for determining and recommending suitable candidates to the board. The fit and proper standards policy for directors guides this process. The committee is also responsible for establishing and reviewing succession plans for members of the board, and particularly that of the chief executive officer and board chairman. The committee comprises six members, five of whom are independent and is chaired by the board chairman. The members are: Mr Russell Edey (Committee chairman), Mr Frank Arisman, Mrs Elisabeth Bradley, Mr Colin Brayshaw, Dr James Motlatsi and Mr Tony Trahar.

The Remuneration Committee

The Remuneration Committee is responsible for evaluating the performance of the executive directors and executive officers, and setting appropriate remuneration for such officers of the company. Full details of the company's remuneration philosophy, the committee's deliberations during 2004, the remuneration payments for all directors and information on the share incentive scheme is available in the Remuneration Report on page 84 of the full Annual Report which is available on the company website. The performances of the executive directors are considered relative to the prevailing business climate. Bonuses paid to executive directors are a reflection of the performance of each of the directors and the company as a whole. Executive directors have elected to receive no remuneration as directors of the company. The fees of non-executive directors are fixed by shareholders at the annual general meeting, and other than the fees they receive for their participation on board committees and an allowance for travelling internationally to attend board meetings, non-executive directors receive no further payments from the company. The committee comprises three members, two of whom are independent and is chaired by the board chairman. The members are: Mr Russell Edey

(Committee chairman), Mr Colin Brayshaw and Mr Tony Trahar.

Disclosures Policy

AngloGold subscribes to a policy of full, accurate and consistent communication in respect of both its financial and operating affairs. To this end the company has adopted a Disclosures Policy, the object of which is to ensure compliance with the rules of the various exchanges on which it is listed and provide timely, accurate and reliable information fairly to all stakeholders including investors (and potential investors), regulators and analysts.

As the merger with Ashanti Goldfields was completed during the course of 2004, the policy was only adopted in December 2004 in order to align the practices of the merged company. The policy is publicly available from the company website.

Compliance with Section 303A.11 of the NYSE Rules

Section 303A.11 of the NYSE Rules requires a foreign-listed company on the exchange to identify significant differences between its corporate governance practices and those of a domestic company listed on the NYSE. The board does not comprise a majority of independent directors as the company is a controlled company and has adopted a different standard of director independence as compared with the NYSE standard. The JSE rules only require a sufficient number of independent directors. The NYSE rules require fully independent nominations and remuneration committees. In compliance with JSE rules the company has a Nominations Committee and a Remuneration Committee. Both committees comprise solely of non-executive directors, the majority of whom are independent and are chaired by the independent board chairman.

Codes of ethics and whistle-blowing policy

In order to comply with the company's obligations in terms of the United States' Sarbanes-Oxley Act and the South African King Code on Corporate Governance, and in the interests of good governance, the company has adopted a code of ethics for employees, a code of ethics for senior financial officers, and a whistle-blowing policy that encourages employees and other stakeholders to confidentially report acts of an unethical or illegal nature affecting the company's interests. Both codes and the whistle-blowing policy are available on the company website.

Risk management and risk factors

The board of directors assume responsibility for the complete risk management framework of the company and management reports regularly to the various board sub-committees on significant risk factors affecting the company. Full details of the company's risk management practices, internal controls and a complete list of the risk factors affecting the company is available under the corporate governance section of the Annual Report 2004, which is available on the company website.

ANGLOGOLD ASHANTI ABRIDGED ANNUAL REPORT 2004

Report of the independent auditors
to the members of AngloGold Ashanti Limited

The summarised group financial statements of AngloGold Ashanti Limited set out on pages 16 to 21 have been derived from the annual financial statements of the group for the year ended 31 December 2004.

We have audited the annual financial statements in accordance with statements of South African Auditing Standards. In our report dated 10 March 2005, we expressed an unqualified opinion on the financial statements from which the summarised annual financial statements were derived.

Audit opinion

In our opinion, the accompanying summarised financial statements are consistent, in all material respects, with the annual financial statements from which they were derived.

For a better understanding of the scope of our audit and the company's financial position, the results of its operations and cash flows for the period, the summarised financial statements should be read in conjunction with our audit report and the annual financial statements from which the summarised financial statements were derived.

US GAAP condensed consolidated financial statements

Condensed consolidated financial statements prepared

in accordance with US GAAP

AngloGold Ashanti provides to all shareholders, condensed consolidated financial statements derived from and presented in the manner detailed

below. These condensed consolidated financial statements reflect those which appear in the Annual Report 2004.

Basis of presentation

The condensed consolidated financial statements have been derived from the group's consolidated financial statements as prepared in accordance

with accounting principles generally accepted in the United States (US GAAP). US GAAP differs in certain material respects from International Financial

Reporting Standards (IFRS). The condensed consolidated financial statements do not include notes in support of the financial information presented

therein. The group's audited consolidated financial statements prepared in accordance with US GAAP from which the condensed consolidated

financial statements have been derived, contain detailed notes prepared in accordance with US GAAP. The audited consolidated financial statements

prepared in accordance with US GAAP, together with related notes, are included under Item 18 in AngloGold Ashanti's annual report on Form 20-F

filed with the United States Securities and Exchange Commission on or about 30 March 2005. The AngloGold Ashanti annual report on Form 20-F

for the year ended 31 December 2004 as filed with the United States Securities and Exchange Commission on or about 30 March 2005 is available

free of charge on EDGAR at www.sec.gov.

The condensed consolidated financial statements set forth below for each of the three years in the period ended 31 December 2004, and as at

31 December 2004 and 2003, have been derived from, and should be read in conjunction with the US GAAP financial statements included under

Item 18 in AngloGold Ashanti's annual report on Form 20-F as filed with the United States Securities and Exchange Commission on or about

30 March 2005.

Stock split

Throughout the condensed consolidated financial statements presented herein, the number of AngloGold Ashanti ordinary shares and the calculation

of basic and diluted (loss) earnings per share information for AngloGold Ashanti have been adjusted retroactively to reflect AngloGold's two-for-one

stock split and the issuance of a total of 278,196 AngloGold ordinary shares under AngloGold's odd lot offer as approved at the general meeting of

AngloGold's shareholders held on 5 December 2002.

Condensed reconciliation between IFRS and US GAAP

Results for the year ended and as at 31 December 2004

AngloGold Ashanti provides, supplemental to the condensed consolidated financial statements, a reconciliation from its IFRS to US GAAP results.

This reconciliation is provided for illustrative purposes only, as AngloGold Ashanti prepares consolidated financial statements prepared in accordance

with US GAAP, together with related notes, which are included under Item 18 in AngloGold Ashanti's annual report on Form 20-F filed with the United

States Securities and Exchange Commission on or about 30 March 2005.

ANGLOGOLD ASHANTI ABRIDGED ANNUAL REPORT 2004

Condensed reconciliation between IFRS and US GAAP

Results for the year ended and as at 31 December 2004

Differences in accounting treatment between IFRS and US GAAP which have a significant effect on AngloGold Ashanti are noted below:

I Business combinations (including acquired properties and goodwill)

Under IFRS at the formation of AngloGold on 29 June 1998, the acquisition of the participating companies and the interests in the share interest

companies were accounted for using the pooling of interest method. Under US GAAP the original formation of AngloGold did not qualify as a “pooling

of interest” and therefore the formation transaction was accounted for as a business combination. Subsequent acquisitions have been accounted for

as business combinations under both IFRS and US GAAP.

Both IFRS and US GAAP require the purchase consideration to be allocated to the net assets acquired at their fair value on the date of acquisition.

Under IFRS any excess of the purchase price over the fair value of the attributable mineral reserves and net assets is recognised as goodwill. Goodwill

which represents resources is amortised on a systematic basis which recognises the depletion of resources over the lesser of the LOM or 20 years.

Under US GAAP, the purchase consideration is allocated to the net assets acquired according to the assets and liabilities respective fair value,

including acquired properties which is amortised over the LOM. Where the purchase price cannot be attributed to the assets acquired, it is allocated

to goodwill and amortised on a straight line basis over the lesser of the LOM or 20 years until 31 December 2001. In accordance with the provisions

of SFAS 142, goodwill is no longer amortised but reviewed annually for impairment effective from 1 January 2002.

In cases where traded equity securities are exchanged as consideration, IFRS requires the fair value of the consideration to be determined based on

market value at the date of the exchange transaction. The date of acquisition is considered to be when effective control over the acquired assets and

liabilities is obtained.

US GAAP requires that the fair value of such transactions be determined by the average trading price of a few days before and after the date at which

the terms and conditions of the transaction are agreed to and announced.

II IFRS exceptional loss reversed

Represents the reversal of the loss on disposal of the Free State assets recorded in IFRS in 2002. Under US GAAP, the value of the Free State assets

were written down in 2001 to the net selling price per the sale agreement.

III Pension and other post-retirement medical benefits

Under IFRS, pension and other post-retirement medical benefits are accounted for in accordance with the provisions of IAS 19. Under US GAAP

these benefits are accounted for in accordance with the provisions of SFAS 87 and SFAS 106.

Under IFRS, only the contractual liability for post-retirement is accounted for. Under US GAAP, both the contractual and the liability in excess of

contributions made by plan members are accounted for. The adjustment to post-retirement medical benefits refers to the actuarial valuation as

calculated by independent actuaries.

IV Normandy transaction costs

Under IFRS, the transaction costs relating to the Normandy bid were charged to share premium. Under US GAAP, these expenses are expensed as

an aborted business combination.

V Stock compensation expense

Under US GAAP performance-related options are accounted for as variable compensation awards in accordance with Accounting Principles Board

Opinion No. 25 (APB No. 25). A compensation expense is calculated at the end of each reporting period until the performance obligation has been

met or waived. Compensation expense will vary based on the fluctuations of the underlying stock price in excess of the exercise price.

VI Convertible bonds

Under IFRS, convertible bonds are initially recognised as compound financial instruments, with a portion classified as equity and the rest as a liability.

Under US GAAP, the entire instrument is recorded as a liability and the amortisation of the discount is limited to the amortisation of issue costs.

VII Other

Other consists of other differences between IFRS and US GAAP that are considered too insignificant to be quantified individually.

VIII Income taxes

Reflects the tax impact of the differences between IFRS and US GAAP.

IX Cumulative effect of accounting changes

Asset retirement obligations

The \$3m (net of provision for deferred taxation) cumulative effect of change in accounting policy represents the transitional adjustment resulting from

the adoption of SFAS 143 on 1 January 2003. Under IFRS, accounting for provisions and contingencies is dealt with in IAS 37.
