Operational performance clearly up; significant net nonrecurring profit

- Pharma - cost savings contributing
- Coatings - clearly up due to growth and acquisitions
- Chemicals - substantially up
- Net nonrecurring profit of EUR 308 million - mainly from divestments
- Further settlement in Remeron (R) court cases
- Divestment program at Chemicals - nearing completion
- Strong financial position
- Interim dividend unchanged - EUR 0.30
- Outlook - net income, excluding nonrecurring items and special benefits, around 2003 level

Edgar Filing: AKZO NOBEL NV - Form 6-K

* 2003 figures have been adjusted for a minor regrouping of activities between Coatings and Chemicals.

** Excluding nonrecurring items.

*** Continued operations.

**** At September 30.

*****At December 31.

*Excluding nonrecurring items.

2

Report for the 3rd quarter of 2004

Operational performance clearly up; significant net nonrecurring profit
Net income excluding nonrecurring items in the third quarter rose 20% to EUR 213 million. Net income* per share was EUR 0.75 (2003: EUR 0.62). All three groups turned in an improved performance. Including a net nonrecurring profit of EUR 308 million, mainly as a result of divestments, third-quarter net income was EUR 521 million (2003: EUR 178 million).

For the first nine months of 2004, net income excluding nonrecurring items amounted to EUR 605 million, up 11% on 2003. Taking into account net nonrecurring profits of EUR 161 million, net income was up 54% to EUR 766 million.

Autonomous sales growth of 2%

Third-quarter sales of EUR 3.2 billion were somewhat below last year. Autonomous growth at Coatings and Chemicals was more than offset by lower Pharma volumes, negative currency translation effects, and divestments. Sales developed as follows:

In %	Total	Volume	Price	Currency translation	Acquisitions/ divestments
-----	-----	-----	-----	-----	-----
Pharma	(9)	(6)	(1)	(2)	-
Coatings	4	3	1	(2)	2
Chemicals	(5)	3	3	(2)	(9)
Akzo Nobel	(2)	1	1	(2)	(2)

Operating income - up 8%

Operating income of EUR 329 million was up 8% on last year. All three groups achieved improved operational performance and benefited from lower pension charges. Currency translation had a decreasing negative effect. Return on sales was 10.3%, against 9.3% in the third quarter of 2003. Earnings developed as follows:

Millions of euros	Operating income* for 3rd quarter of 2004	Change from 3rd quarter of 2003			
		Total	Operational performance	Divestments	Currency translation
-----	-----	-----	-----	-----	-----
Pharma	131	11	11	-	(3)
Coatings	137	12	13	-	(4)
Chemicals	80	4	17	(16)	-

Edgar Filing: AKZO NOBEL NV - Form 6-K

Other**	(19)	(2)	(5)		-
Akzo Nobel	329	25	36	(16)	(7)

* Excluding nonrecurring items.

** "Other" mainly comprises pension costs related to former employees of divested operations and results of the (intermediate) holding companies and the captive insurance companies.

3

Report for the 3rd quarter of 2004

Currency translation effects were mainly caused by the weaker U.S. dollar and various Asian currencies.

Financing charges decreased substantially as a result of significantly reduced net borrowings due to the proceeds from divestments and lower foreign currency exchange rates. Interest coverage in the third quarter jumped to 12.2 (2003: 6.6).

The effective tax rate decreased from 31% to 29%, reflecting changes in the geographic distribution of the Company's results.

Earnings from nonconsolidated companies decreased from EUR 10 million to EUR 7 million, mainly attributable to Eka Polymer Latex and the divested Catalysts joint ventures.

Workforce - down 1,910 from restructurings

At September 30, 2004, the Company had 62,990 employees, compared with 64,580 at year-end 2003. Restructurings at all three groups caused a reduction of 1,910. Acquisitions and divestments on balance resulted in a decrease of 690. Growth of certain businesses caused a workforce expansion of 1,010.

Developments were as follows:

	September 30, 2004	Restructurings	Acquisitions/ divestments	Other changes	December 31, 2003
Pharma	19,680	(1,130)	(60)	190	20,680
Coatings	29,310	(420)	610	780	28,340
Chemicals	12,890	(320)	(1,240)	40	14,410
Other	1,110	(40)			1,150
Akzo Nobel	62,990	(1,910)	(690)	1,010	64,580

Nonrecurring items

In the third quarter of 2004, the Company registered a net nonrecurring profit of EUR 308 million, which breaks down as follows:

Millions of euros

Edgar Filing: AKZO NOBEL NV - Form 6-K

Gain on divestments	458
Remeron (R) court cases	(58)
Restructuring and impairment charges	(42)

Gross	358
Taxes	(42)
Nonconsolidated companies	(8)

Total	308

4

Report for the 3rd quarter of 2004

The gain on divestments primarily relates to the sale of Catalysts and Phosphorus Chemicals in July 2004*

Restructuring and impairment charges pertain to the closure of the chlorine production in Bohus, Sweden, and restructurings at Polymer Chemicals, mainly in Germany.

The charge for the Remeron (R) court cases in the United States mainly concerns the settlements and legal fees to resolve alleged claims brought by state attorneys general and by a class of consumers and third party payers (the "indirect purchaser class"). The latter settlement is still subject to certain conditions. The charge also relates to claims brought by nine large chain store and grocery store pharmacies having opted out of a class of direct purchasers. This class action brought by direct purchasers remains pending in the Federal District Court of New Jersey, for which no provision has been recognized**.

The loss for nonconsolidated companies predominantly relates to antitrust cases of Flexsys.

Divestment program at Chemicals - nearing completion

In September 2003, the Company announced its plan to sell Catalysts, Coating Resins, and Phosphorus Chemicals from its Chemicals portfolio in order to strengthen the balance sheet and to create more financial room to maneuver. In the mean time, Catalysts and Phosphorus Chemicals have been divested. Early in October 2004, the agreement for the sale of the Ultra Violet/Electron Beam (UV/EB) Resins activities, part of the Coating Resins business, was announced. Recently, Nuplex Industries Limited, New Zealand, made an offer of EUR 110 million, for the other (major) part of the Coating Resins business, free of cash and debt. Completion of this transaction is foreseen in the last quarter of 2004. At closing the total divestment program will have generated some EUR 1 billion.

Interim dividend unchanged - EUR 0.30

Akzo Nobel will declare an interim dividend for 2004 of EUR 0.30 per common share, unchanged from last year. Starting October 20, 2004, Akzo Nobel shares will trade ex-dividend. The interim dividend will be made payable on November 1, 2004.

Outlook - net income, excluding nonrecurring items and special benefits, around 2003 level

The Company has turned in a clearly improved performance in the first three quarters of 2004. However, we are facing steeply increasing raw material and

Edgar Filing: AKZO NOBEL NV - Form 6-K

energy prices and there are increasing uncertainties due to softening macroeconomic conditions. In addition, we do not expect that Pharma will be able to match its very strong fourth quarter of 2003, also in view of the developments at Diosynth.

Taking all this into account, we now expect that full-year net income, excluding nonrecurring items, will be around the 2003 level. The special benefit in 2003 from the asenapine cooperation of EUR 70 million, after taxes, is excluded in this comparison.

* It should be noted that no final settlement has been reached yet for these divestments, so that the amounts recognized at this moment are best estimates and could change at a later stage, once the final settlement has been reached.

** Reference is made to the disclosures on pages 98 and 99 in the Akzo Nobel Annual Report 2003.

5

Report for the 3rd quarter of 2004

Pharma - cost savings contributing

			Number of employees	19,680	20,680**	

* Excluding nonrecurring items.

Edgar Filing: AKZO NOBEL NV - Form 6-K

** At December 31.

- Sales down - due to lower volumes at Organon and Diosynth and currencies
- Organon
 - cost saving programs - successful
 - Remeron(R)- major decline due to generic competition in U.S.; still holding up in rest of world
 - HT products - sales under pressure
 - contraceptives - NuvaRing (R) continuous growth
- Diosynth - severely suffering from overcapacity; restructurings progressing well
- Integration of Organon and Diosynth announced
- Intervet - improved performance

6

Report for the 3rd quarter of 2004

Sales in the third quarter decreased 9% to EUR 0.8 billion, due to generic competition in the United States for Remeron (R) weaker key currencies, and lower sales for HT products. The Company is actively pursuing restructuring and cost saving measures, which are now clearly paying off. Including incidental benefits of some EUR 15 million, operating income rose 9% to EUR 131 million. Return on sales was 16.4% (2003: 13.7%). In the first nine months of 2004, the workforce was reduced by 1,130 due to restructuring.

The main products in Organon (Human Healthcare) developed as follows:

Millions of euros	Sales 3rd quarter 2004	Autonomous growth relative to, in %	
		3rd quarter 2003	2nd quarter 2004
Remeron (R) in U.S.	10	(74)	(32)
Remeron (R) in rest of world	77	(2)	(2)
Contraceptives	132	4	-
- of which NuvaRing (R)	23	100	21
Puregon (R)/Follistim (R)	70	(3)	(3)
Livial (R)	39	(20)	(2)

In the United States, the effects of the generic competition for antidepressants Remeron (R) and Remeron (R) SolTab (R) have virtually bottomed out. In the rest of the world, Remeron volumes were somewhat below the third quarter of 2003 and the second quarter of 2004, but on balance still holding up. Sales for contraceptives were up, as NuvaRing (R) (contraceptive ring) continues to grow. The launch of Follistim (R)-AQ (TM) cartridge in the United States is progressing well. Livial (R) sales were impacted by the ongoing discussions about the results of studies on hormone therapies.

Diosynth (active pharmaceutical ingredients) is severely suffering from overcapacity in the industry and lower (captive) demand, with performance around break-even level. The earlier announced restructuring program affecting 350 jobs is nearly completed.

Edgar Filing: AKZO NOBEL NV - Form 6-K

Akzo Nobel intends to integrate Organon and Diosynth into one human healthcare business unit. The new organization will leverage its combined know-how, technologies, people, and facilities to capitalize on market opportunities. The integration will also reduce complexity and thus support the strategy of partnerships in development and marketing and sales. In addition, it will allow the Company to combine biotechnology activities into one platform. A new biotechnology research facility in Cambridge, Massachusetts, United States, will also be created.

Akzo Nobel will invest EUR 60 million in Oss, the Netherlands, to build a state-of-the-art parenteral production facility.

Akzo Nobel's animal healthcare activities Intervet turned in an improved performance, especially in Europe. Business in Asia remains somewhat under pressure from the impact of avian influenza.

7

Report for the 3rd quarter of 2004

			Invested capital	2,193	2,043***	
			Number of employees	29,310	28,340***	

* 2003 figures have been adjusted for a minor regrouping of activities between Coatings and Chemicals.

** Excluding nonrecurring items.

*** At December 31.

Edgar Filing: AKZO NOBEL NV - Form 6-K

- Autonomous growth 4% - mainly Asia Pacific and United States
- Steep increase of raw material prices - pressure on margins
- Decorative Coatings - improved performance from cost savings
- Marine & Protective and industrial activities - still going strong
- Car Refinishes - major worldwide restructuring set in motion
- Capital expenditures focused on high-growth markets
- Various bolt-on acquisitions to improve distribution in Europe

8

Report for the 3rd quarter of 2004

In the third quarter, sales grew 4% to EUR 1.4 billion. Autonomous sales growth was 4%, mainly attributable to volume growth. The negative currency impact was 2%, while acquisitions, mainly relating to the German coatings distributor Timpe & Mock, added 2%.

Operating income rose 10% to EUR 137 million. Return on sales was 9.9% (2003: 9.4%). The contributions from cost savings, acquisitions, and lower pension charges more than offset the negative impact of higher raw material prices and weaker currencies. Raw material prices are now steeply increasing.

Marine & Protective Coatings, Industrial Finishes, and Powder Coatings improved further, albeit that they are increasingly affected by higher raw material costs. The performance of Decorative Coatings improved, mainly due to cost savings. Car Refinishes' earnings are under pressure. To address this situation, a major worldwide restructuring program at this business unit, affecting 600 jobs, has been set in motion.

The restructuring programs continue to make good progress, resulting in a workforce reduction of 420 during January-September 2004. In high-growth areas, such as Asia and Eastern Europe, the workforce was expanded by 780.

Capital expenditures of EUR 33 million (115% of depreciation) were up compared to last year's level. Expenditures are especially directed toward participation in the high-growth markets in Asia and Eastern Europe.

Akzo Nobel has signed an agreement to take a 30%-stake in one of the leading German decorative paint distributors, Peters, while this company will take over the Akzo Nobel owned distributors Beissel and Kerstin. As a result, Akzo Nobel will have access to 17 additional outlets in the western part of Germany and improve its position in this strategic market.

Akzo Nobel has agreed to divest part of its liquid coatings activities in the agricultural and construction equipment (ACE) segment to BASF. In a separate deal, Akzo Nobel will acquire BASF Coatings' Wood Construction business (joinery).

** Excluding nonrecurring items.

*** Continued operations.

**** At December 31.

- Continued operations - autonomous growth 8%; operating income up 36%
- All units benefiting from improved business climate
- Cost saving programs paying off
- Increasing raw material and energy prices - increasing pressure on margins
- Divestment program - nearing completion

Edgar Filing: AKZO NOBEL NV - Form 6-K

For the continued operations, third-quarter sales of EUR 1.0 billion were 5% higher than last year. Autonomous growth was 8%; volumes and prices were both up 4% from last year. Currency translation had a negative effect of 3%.

Operating income jumped 36%, from EUR 56 million to EUR 76 million. Return on sales was 7.6% (2003: 5.9%). The contributions from autonomous growth and cost savings as well as lower pension costs more than offset the negative effects of higher raw material and energy prices.

Almost all units turned in improved performances, benefiting from the restructuring and cost saving programs as well as from growth of their activities. This especially goes for Polymer Chemicals, Functional Chemicals, and Base Chemicals.

The restructuring programs are progressing well and resulted in a workforce decrease of 320 in the first nine months of 2004, while divestments resulted in a reduction of 1,240.

Capital expenditures were up to EUR 69 million, equivalent to 110% of depreciation. The increase in expenditures primarily relates to major investment projects in Brazil and the Netherlands.

At the end of July 2004, Catalysts and Phosphorus Chemicals were divested.

Early in October 2004, Akzo Nobel announced that it had signed an agreement to sell its Ultra Violet/Electron Beam (UV/EB) Resins activities, part of the Coating Resins business. The transaction is expected to be closed in the final quarter of 2004.

Recently, Akzo Nobel announced that it had received an offer of EUR 110 million from Nuplex Industries Limited, New Zealand, for the other (major) part of the Coating Resins business, free of cash and debt. Completion of this transaction is foreseen in the last quarter of 2004.

This transaction would complete the major divestment program in Chemicals, which was initiated in 2003 to strengthen the Company's balance sheet and to create more financial room to maneuver. The program will, at closing, have generated some EUR 1 billion.

12

Report for the 3rd quarter of 2004

Funds balance of EUR 1.0 billion - mainly proceeds from divestments
The funds balance for January-September 2004 was EUR 1.0 billion (2003: EUR 0.4 billion).

Cash flow from operations decreased from EUR 0.9 billion to EUR 0.8 billion in 2004, mainly due to higher payments for restructurings. The seasonal increase of working capital was lower than last year.

Capital expenditures of EUR 379 million (90% of depreciation) were virtually unchanged from last year.

Proceeds from divestments primarily concern the sale of Catalysts and Phosphorus Chemicals.

Report for the 3rd quarter of 2004

CHANGES IN EQUITY

Millions of euros	Capital and reserves	Minimum pension liability	Shareholders' equity	Minority interest	Equity
Balance at December 31, 2003	3,326	(824)	2,502	140	2,
Income	766		766	28	
Dividend	(257)		(257)	(16)	(

Edgar Filing: AKZO NOBEL NV - Form 6-K

Changes in exchange rates	42	(10)	32	2	
Changes in minority interest in subsidiaries					(10)
Balance at September 30, 2004	3,877	(834)	3,043	144	3,

Strong financial position

Invested capital at September 30, 2004, amounted to EUR 7.7 billion, EUR 0.4 billion lower than at December 31, 2003, mainly due to the divestments of Catalysts and Phosphorus Chemicals.

Equity was up EUR 0.5 billion, because January-September income more than offset dividends paid. Net interest-bearing borrowings were down EUR 1.0 billion. Gearing improved strongly to 0.46 (December 31, 2003: 0.92; September 30, 2003: 1.09).

Arnhem, October 19, 2004

The Board of Management

15

Report for the 3rd quarter of 2004

The final results for 2004 will be published on February 4, 2005.

Note

The data in this report are unaudited.

(R) or (TM) indicates trademarks in one or more countries.

The 2003 comparative figures for Coatings and Chemicals have been adjusted for a minor regrouping of activities between these two segments.

Unless indicated otherwise, discussions in this report, such as on earnings developments, exclude nonrecurring items.

Nonrecurring items relate to income and expenses resulting from normal business operations, which, because of their size or nature, are disclosed separately to give a better understanding of the underlying result for the period. These include items such as restructurings and impairment charges, significant gains and losses on the disposal of businesses, and costs related to law suits and antitrust cases, not meeting the requirements for extraordinary items. Operating income before nonrecurring items is one of the key figures management uses to assess the performance of the Company, as these figures better reflect the underlying trends in the results of the activities.

Autonomous sales growth is defined as the change in sales attributable to changed volumes and selling prices. It excludes currency, acquisition, and divestment effects.

Safe Harbor Statement*

This report contains statements which address such key issues as Akzo Nobel's growth strategy, future financial results, market positions, product development, pharmaceutical products in the pipeline, and product approvals.

Edgar Filing: AKZO NOBEL NV - Form 6-K

Such statements, including but not limited to the "Outlook", should be carefully considered, and it should be understood that many factors could cause forecasted and actual results to differ from these statements. These factors include, but are not limited to price fluctuations, currency fluctuations, developments in raw material and personnel costs, pensions, physical and environmental risks, legal issues, and legislative, fiscal, and other regulatory measures. Stated competitive positions are based on management estimates supported by information provided by specialized external agencies. For a more complete discussion of the risk factors affecting our business please refer to our Annual Report on Form 20-F filed with the United States Securities and Exchange Commission, a copy of which can be found on the Company's website www.akzonobel.com.

* Pursuant to the U.S. Private Securities Litigation Reform Act 1995
