2. PRESENTATION OF FINANCIAL STATEMENTS

Preparation Criteria

The financial statements have been prepared in accordance with accounting practices adopted in Brazil, in compliance with the Brazilian corporate law, rules of the CVM and rules applicable to telephony service concessionaires.

As the Company is registered with the SEC, it is subject to its standards, and it should annually prepare financial statements and other information by using criteria that comply with that agency's requirements. To comply with these requirements and aiming at meeting the market's information needs, the Company adopts, as a principle, the practice of publishing information in both markets in their respective languages.

The notes to the financial statements are presented in thousands of reais, unless otherwise demonstrated. According to each situation, they present information related with the Company and the consolidated statements, identified as PARENT COMPANY and CONSOLIDATED, respectively. When the information is common to both situations, it is indicated as PARENT COMPANY AND CONSOLIDATED.

The accounting estimates were based on objective and subjective factors, based on management's judgment to determine the appropriate amount to be recorded in the financial statements. Significant elements subject to these estimates and assumptions include the residual amount of the fixed assets, provision for doubtful accounts, inventories and deferred income tax assets, provision for contingencies, valuation of derivative instruments, and assets and liabilities related to benefits to employees. The settlement of transactions involving these estimates may result in significant different amounts due to inherent imprecision to the process of determining these amounts. Management reviews its estimates and assumptions at least quarterly.

Consolidated Financial Statements

The consolidation was made in accordance with CVM Instruction 247/96 and includes the companies listed in Note 1.

Some of the main consolidation procedures are:

- Elimination of balances of the asset accounts among the consolidated companies, as well as revenue and expenses of transactions among them;
- Elimination of the balances of the investment accounts and corresponding investor's shareholdings, reserves and accumulated results in the consolidated companies; and
- Segregation of the portions of shareholders' equity and income belonging to minority shareholders, indicated in specific items.

Statements of Cash Flows

The Company presents as supplementary information, jointly with Note 17, the statement of cash flows, prepared in accordance with Accounting Rules and Procedures - NPC 20 of the Brazilian Institute of Independent Auditors - IBRACON.

Report per Segment

The company presents, supplementary to note 41, the report per business segment. A segment is an identifiable component of the company, destined for service rendering (business segment), or provision of products and services which are subject to different risks and compensations different from those other segments.

3.SUMMARY OF SIGNIFICANT ACCOUNTING PRACTICES

The criteria mentioned in this note refer to the practices adopted by the Company and its subsidiaries that are included in the consolidated balance sheet.

a. Cash and Cash Equivalents: Cash equivalents are temporary high-liquid investments, with immediate maturity. They are recorded at cost, plus income registered up to the end of the quarter, and do not exceed market value. The investment fund quotas are valued by the quota value on 3/31/05

b. Trade Accounts Receivable: Receivables from users of telecommunications services are recorded at the amount of the tariff or the service on the date the service is rendered. Accounts receivable from services include credits for services rendered and not billed up to the end of the quarter. Receivables resulting from sales of cell phones and accessories are recorded by the amount of sales made, at the moment in which the goods are delivered and accepted by the customer. The criterion adopted for making the provision for doubtful accounts takes into account the calculation of the actual percentage of losses incurred on each range of accounts receivable. The historic percentages are applied to the current ranges of accounts receivable, also including accounts coming due and the portion yet to be billed, thus composing the amount that could become a future loss, which is recorded as a provision.

c. Inventories: Stated at average acquisition cost, not exceeding replacement cost. Inventories are segregated into inventories for plant expansion and those for maintenance and also, in relation to consolidated statements, goods inventories for resale, mainly composed by cell phones, accessories and electronic cards - chips. The inventories to be used in expansion are classified in property, plant and equipment (construction in progress), and inventories to be used in maintenance are classified as current and long-term assets, in accordance with the period in which they will be used, and the resale inventories are classified as current assets, whose composition is stated in note 19. Obsolete inventories are recorded as allowance for losses. About cell phones and accessories, the subsidiary BrT Celular records the adjustments for the trading prices held as of the balance sheet date, in the cases in which the acquisitions presented higher values.

d. Investments: Investments in subsidiaries are valued using the equity method. Goodwill is calculated based on the expectation of future results and its amortization is based on the expected realization/timing over an estimated period of not more than ten years. Other investments are recorded at cost less allowance for losses, when applicable. The investments resulting from income tax incentives are recognized at the date of investment, and result in shares of companies with tax incentives or investment fund quotas. In the period between the investment date and receipt of shares or quotas of funds, they remain recognized in long-term assets. The Company adopts the criterion of using the maximum percentage of tax allocation. These investments are periodically valued and the result of the comparison between its original and market costs, when the latter is lower, results in the constitution of allowances for probable losses.

e. Property, Plant and Equipment: Stated at cost of acquisition and/or construction, less accumulated depreciation. Financial charges for financing assets and construction in progress are capitalized.

The costs incurred, when they represent improvements (increase in installed capacity or useful life) are capitalized. Maintenance and repair are charged to the profit and losses accounts, on an accrual basis.

Depreciation is calculated under the straight-line method. Depreciation rates used are based on expected useful lives of the assets and in accordance with the standards of the Public Telecommunications Service. The main rates used are set forth in Note 25.

f. Deferred Charges: Segregated between deferred charges on amortization and formation. Their breakdown is shown in Note 26. Amortization is calculated under the straight-line method in accordance with the legislation in force. When benefits are not expected from an asset, it is written off against non-operating income.

g. Income and Social Contribution Taxes: Income and social contribution taxes are accounted for on an accrual basis. These taxes levied on temporary differences, tax losses and the negative social contribution base are recorded under assets or liabilities, as applicable, according to the assumption of realization or future demand.

h. Loans and Financing: Updated to the balance sheet date for monetary and/or exchange variations and interest incurred as of the balance sheet date. Equal restatement is applied to the guarantee contracts to hedge the debt.

i. Provision for Contingencies: Recognized based on management's risk assessment and measured based on economic grounds and legal counselor's opinions on the lawsuits and other contingency factors known as of the balance sheet date. The basis and nature of the provisions are described in Note 7.

j. Revenue Recognition: Revenues from services rendered are recognized when provided. Local and long distance calls are charged based on time measurement according to the legislation in force. Revenues from sales of payphone cards (Public Use Telephony - TUP), cell phones and accessories are recorded upon sale. For prepaid services linked to mobile telephony, the revenue is recognized in accordance with the utilization of services. A non-recognized revenue is recognized if there is a significant uncertainty in its realization.

k. Recognition of Expenses: Expenses are recognized on an accrual basis, considering their relation with revenue realization. Expenses related to other periods are deferred.

l. Financial Income (Expense), Net: Financial income comprises interest earned on overdue accounts settled after the term, gains on financial investments and hedges. Financial expenses comprise interest incurred and other charges on loans, financing and other financial transactions.

Interest on Shareholders' Equity is included in the financial expenses balance, and for financial statement presentation purposes, the amounts are reversed to profit and loss accounts and reclassified as a deduction of retained earnings, in the shareholders' equity.

m. Research and Development: Costs for research and development are recorded as expenses when incurred, except for expenses with projects linked to the generation of future revenue, which are recorded under deferred assets and amortized over a five-year period from the beginning of the operations.

n. Benefits to Employees: Private pension plans and other retirement benefits sponsored by the Company and its subsidiaries for their employees are managed under three foundations. Contributions are determined on an actuarial basis, when applicable, and accounted for on an accrual basis.

As of December 31, 2001, the Company recorded its actuarial deficit on the balance sheet date against shareholders equity, net of its tax effects. As from 2002, as new actuarial revaluations show the necessity for adjustments to the provision, they are recognized in the profit and loss accounts.

Complementary information on private pension plans is described in Note 6.

o. Profit Sharing: The provisions for employees profit sharing are recognized on an accrual basis. The calculation of the amount, which is paid in the subsequent year after the provision is recognized, is based on the target program established with the labor union, by means of collective labor agreement, in accordance with Law 10,101/00 and the Company's bylaws.

p. Earnings per thousand shares: Calculated based on the number of shares outstanding at the balance sheet date, which comprises the total number of shares issued, minus shares held in treasury.

4.RELATED-PARTY TRANSACTIONS

Related party transactions refer to operations with Brasil Telecom Participações S.A., the Company's parent company, and with the subsidiaries mentioned in Note 1.

5.MARKET VALUE OF FINANCIAL ASSETS AND LIABILITIES (FINANCIAL INSTRUMENTS) AND RISK ANALYSIS

The Company and its subsidiaries assessed the book value of its assets and liabilities as compared to market or realizable values (fair value), based on information available and valuation methodologies applicable to each case. The interpretation of market data regarding the choice of methodologies requires considerable judgment and determination of estimates to achieve an amount considered adequate for each case. Accordingly, the estimates presented may not necessarily indicate the amounts, which can be obtained in the current market. The use of different assumptions for calculation of market value or fair value may have material effect on the obtained amounts. The selection of assets and liabilities presented in this note took place based on their materiality. Instruments whose values approximate their fair values, and whose risk assessment is not significant, are not mentioned.

In accordance with their natures, the financial instruments may involve known or unknown risks, and the potential of such risks is important for the best judgment. Thus, there may be risks with or without guarantees, depending on circumstantial or legal aspects. Among the principal market risk factors which can affect the Company's business are the following:

a. Credit Risk

The majority of the services provided by Brasil Telecom S.A. are related to the Concession Agreement, and a significant portion of these services is subject to the determination of tariffs by the regulatory agency. The credit policy, in its turn, in case of telecommunications public services, is subject to legal standards established by the concession authority. The risk exists since the Company may incur losses arising from the difficulty in receiving amounts billed to its customers. In the quarter, the Company's default was 2.94% of the gross revenue (3.01% in 2004). By means of internal controls, the level of accounts receivable is constantly monitored, thus limiting the risk of past due accounts by cutting the access to the service (out phone traffic) if the bill is overdue for over 30 days. Exceptions are made for telephone services, which should be maintained for national security or defense.

Concerning mobile telephony, credit risk in cell phones sales and in service rendering in the postpaid category postpaid is minimized with the adoption of a credit pre-analysis of eligible customers. Still in relation to postpaid service, whose client base at the end of the quarter was 32.1% (33.1% in 12/31/04), the receivable accounts are also monitored in order to limit default and to cut the access to the service (out of phone traffic) if the bill is overdue for over fifteen days.

b. Exchange Rate Risk

Assets

The Company has asset loans in foreign currency subject to exchange rate fluctuations on 12/31/04. The assets exposed to exchange rate risk, resulting from loans in US dollars granted to BrT SCS Bermuda, were received in January 2005.

	Market and Book Value	Market and Book Value
Assets		
Loans with Parent Company	-	88,619
Total	-	88,619
Current	-	88,619

Liabilities

The Company has loans and financing contracted in foreign currency. The risk related to these liabilities arises from possible exchange rate fluctuations, which may increase these liabilities balances. Loans subject to this risk represent approximately 25.6% (25.6% on 12/31/04) of the total liabilities of borrowings and consolidated financing, minus the contracted hedge balances. In order to minimize this kind of risk, the Company enters into exchange hedge agreements with financial institutions. 66.2% of the debt portion in foreign currency is covered by hedge agreements (50.2% on 12/31/04). Unrealized positive or negative effects of these operations are recorded in the profit and loss as gain or loss. Up to the balance sheet date, the negative adjustments of these operations amounted R\$ 47,771 (net gains of R\$ 1,082 in 2004).

Net exposure as per book and market values, at the exchange rate prevailing on the balance sheet date, is as follows:

The method used for calculation of market value (fair value) of loans and financing in foreign currency and hedgeinstruments was future cash flows associated to each contracted instruments, minus the market rates in force on the balance sheet date.

c. Interest Rate Risk

Assets

The Company has loans with a telephone directory company, with interest indexed to the IGP-DI (a national index price) and loans resulting from the sale of fixed assets to other telephone service companies, bearing interest rate indexed to the Column 27 of the FGV (a national index price). The consolidated financial statements also present a loan agreement with Freelance S.A., whose balance is R\$ 1,511 (R\$ 1,475 in 12/31/04), indexed to IGP-M.

At the balance sheet date, these assets are represented as follows:

Current	1,172	1,065	2,683	2,540
Long-term	8,254	8,204	8,254	8,204

Liabilities

Brasil Telecom S.A. has loans and financing contracted in local currency subject to interest rates linked to indexing units TJLP, UMBNDES, CDI (Rate DI - CETIP) and IGP-M. The inherent risk in these liabilities arises from possible variations in these rates. The Company has contracted derivative contracts to hedge 39.9% (38% on 12/31/04) of the liabilities subject to the UMBNDES rate, using exchange rate swap contracts. However, the other market rates are continually monitored to evaluate the need to contract derivatives to protect against the risk of volatility of these rates.

In addition to the loans and financing, the Company issued non-convertible private and public debentures, non-convertible or tradable for shares. These liabilities were contracted at interest rates linked to the CDI, and the risk associated with this liability results from the possible increase of the rate.

The above mentioned liabilities at the balance sheet date are as follows:

	PARENT COMPANY

Book value is equivalent to market values where the current contractual conditions for these types of financial instruments are similar to those in which they were originated or they did not present parameters for quotation or contraction.

d. Risk of Not Linking Monetary Restatement Indexes to Accounts Receivable

Loan and financing rates contracted by the Company are not linked to amounts of accounts receivable. Telephony tariff adjustments do not necessarily follow increases in local interest rates, which affect the company's debts. Consequently, a risk arises from this potential lapse of correlation.

e. Contingency Risks

Contingency risks are assessed according to loss hypotheses, as probable, possible or remote. Contingencies considered as probable risks are recorded as liabilities. Details of these risks are presented in Note 7.

f. Risks Related to Investments

The Company has investments, which are valued using the equity method and stated at acquisition cost. The investments valued by the equity method are presented in Note 24, for which no market value exists, as they are represented by non-listed companies or private limited companies. Provisions are recorded for losses when the future cash flows expected from an investment lead to expectations of losses.

In this quarter, a provision for losses was recorded with respect to the unsecured liability of VANT, which amounted to R\$ 20,441 (R\$ 16,946 on 31/12/04).

The investments valued at cost are immaterial in relation to total assets. Their associated risks would not cause significant impacts to the Company in case of loss of part of these investments.

g. Temporary Cash Investment Risks

The company has temporary cash investments in exclusive financial investment funds (FIFs), whose assets comprise federal securities based on floating, fixed and foreign exchange rates, all subject to CDI, by means of the own backing of these securities or through futures contracts traded at the Futures and Commodities Exchange - BM&F, federal public securities (NBC-E) referred to commercial dollar variation plus exchange coupon, foreign currency and own portfolio investment funds, backed in American treasury bonds and overnight operations. The Company maintains cash investments in the amount of R\$ 1,537,602 (R\$ 1,906,781 on 12/31/04). Income accrued to the balance sheet date is recorded in financial income and amounts to R\$ 53,239 (R\$ 49,639 in 2004). Amounts recognized in the consolidated financial statements are R\$ 1,782,559 (R\$ 2,326,497 on 12/31/04), related to investments, and R\$ 59,693 (R\$ 51,382 in 2004), related to income accrued.

i. Risk Related to Rules

On June 20, 2003, ANATEL ratified the Resolution 341, which forecasts new types of concession agreements, in force as from January 1, 2006 up to 2025. The new kind of concession agreement forecasts changes in how tariffs are adjusted, such as the General Price Index – Internal Supply (IGP-DI), would no more be used to set forth the tariff adjustments based on the annual inflation rate. Consequently, the Company's operations and competitive position can be affected by these changes.

6.BENEFITS TO EMPLOYEES

The benefits described in this note are offered to the employees of the Company and its direct or indirect subsidiaries. These companies are better described together, and can be referred to as Brasil Telecom (group) and for the purpose of the supplementary pension plan mentioned in this note, are also denominated Sponsor.

a. Supplementary Pension Plan

The Company sponsors supplementary pension plans related with retirement for its employees and assisted members, and, in the case of the latter, medical assistance in some cases. These plans are managed by the following foundations: (i) Fundação 14 de Previdência Privada (Fundação 14); (ii) Fundação BrTPREV (FBrTPREV) former CRT, a company merged by the Company on 12/28/00; and (iii) Fundação de Seguridade Social (SISTEL), originated from certain companies of the former Telebrás System.

The Company's bylaws stipulate approval of the supplementary pension plan policy, and the joint liability attributed to the defined benefit plans is linked to the acts signed with the foundations, with the agreement of the National Supplementary Pension Department - SPC, where applicable to the specific plans.

The plans sponsored are annually valued by independent actuaries on the balance sheet date. In the case of the defined benefit plans described in this explanatory note, immediate recognition of the actuarial gains and losses is adopted. Liabilities are provided for plans which show deficits. This measure has been applied since the 2001 financial year, when the regulations of CVM Deliberation 371/00 were adopted. In cases that show positive actuarial situations, no assets are recorded due to the legal impossibility of reimbursing these surpluses.

The characteristics of the supplementary pension plans sponsored by the Company are described below.

FUNDAÇÃO 14

Since the split of the only pension plan managed by SISTEL, PBS, in January 2000, the evolution tendency for a new stage was already forecasted. Such stage would result in an own and independent management model for TCSPREV pension plan, by means of a specific entity to manage and to operate them, and this fact has become more and more evident throughout the years. This tendency also occurred in the main SISTEL pension plan sponsoring companies, which created their respective supplementary pension plan foundations. In this scenario, Fundação 14 de Previdência Privada was created in 2004, with the purpose of taking over the management and operation of the TCSPREV pension plan, which started as from March 10, 2005, whose process was backed by the segment's specific legislation and properly approved by the National Supplementary Pension Plan Superintendence – PREVIC.

The plan authorizes a maximum limit of 10% of the shares of each kind of Company stock. Shares derived from exercising options guarantee the beneficiaries the same rights granted to other Company shareholders. The administration of this plan was entrusted to a management committee appointed by the Board of Directors, which decided only to grant preferred stock options. The plan is divided into two separate programs:

Program A

This program is granted as an extension of the performance objectives of the Company established by the Board of Directors for a five-year period. Up to March 31, 2005, no stock had been granted.

Program B

The price of exercising is established by the management committee based on the market price of 1000 shares at the date of the grant of option and will be monetarily restated by the IGP-M between the date of signing the contracts and the payment date.

The right to exercise the option is given in the following way and within the following periods:

	First Grant		Second Grant		Third Grant	
	From	End of Period	From	End of Period	From	End of Period
33%	1/1/04	12/31/08	12/19/05	12/31/10	12/21/05	12/31/11
33%	1/1/05	12/31/08	12/19/06	12/31/10	12/21/06	12/31/11
34%	1/1/06	12/31/08	12/19/07	12/31/10	12/21/07	12/31/11

The acquisition periods can be anticipated as a result of the occurrence of events or special conditions established in the option contract.

The information related with the general plan to grant stock options is summarized below:

	3/31/05	
	Preferred stock options (thousand)	Average exercise price R\$
Balance as of 12/31/04	1,415,119	13.00
Balance as of 3/31/05	1,415,119	13.00

Material Facts

Brasil Telecom S.A. (BrT) and Brasil Telecom Participações S.A. (BrTP) published material facts, dates and texts of which are shown as follows:

I April 28, 2005, joint material fact of BrT and BrTP:

1 Brasil Telecom S.A. and Brasil Telecom Participações S.A. (hereinafter jointly referred to as Brasil Telecom Group), in compliance with Instruction 358 of January 3, 2002, of the Brazilian Securities and Exchange Commission (CVM), announce that, on April 28, 2005, TIM International N.V. (TIMINT) and TIM Brasil Serviços e Participações S.A. (TIMB)(collectively referred to as TIM Group) on one side and Brasil Telecom S.A. (BrT) and 14 Brasil Telecom Celular S.A. (BTC)(collectively referred to Brasil Telecom) on the other side entered into a Merger Agreement and a Merger Justification Protocol with respect to the merger of BTC into TIMB.

2 This transaction allows Brasil Telecom Group to settle, on a business manner, the overlapping of regulatory licenses and authorizations among Brasil Telecom and TIM Group arising from ANATEL s Act No. 41,780 dated January 16, 2004, published in the Official Gazette dated January 19, 2004, and also preventing ANATEL from imposing severe sanctions and penalties.

3 BTC is a wholly-owned subsidiary of BrT and holds authorizations to exploit mobile services in Lots 4, 5 and 6 of Region II under the General Licensing Plan and the relevant radiofrequencies of sub-bands E . BTC s commercial operation begun in September 2004. After 8 months of full commercial operation, BTC reached over 1.000.000 clients.

4 TIMINT is the controlling shareholder of TIMB, which, in turn, is the direct or indirect controlling shareholder of certain companies that hold mobile services and domestic and international long distance authorizations in Regions I, II and III under the General Licensing Plan. TIM Group has approximately 14.6 million clients.

5 The closing of this transaction will result in other material benefits to the Brasil Telecom Group, such as:

(i) Maintenance of Brasil Telecom Group s valuable and unique clients base through proposals of national coverage and added value services, with focus in convergence;

- (ii) Merger of the mobile operations of both BTC and TIMB;
- (iii) BrT's participation in the shareholding structure of TIMB;
- (iv) Execution of a national roaming services agreement between BTC and TIMB, as well as the facilitation for the entering into international roaming services agreements for the benefit of BTC with companies/partners of TIM Group outside of Brazil, in order to allow the increase of coverage for the clients and the reduction of investments for the existing network's capacity increase;
- (v) Substantial increase of scale and revenues of the Brasil Telecom Group through TIM Group's use of Brasil Telecom Group's long distance services;
- (vi) Elimination of new capital expenses as well as initial losses relating to the mobile operations;
- (vii) Increase of Brasil Telecom's Group commercial presence's capillarity in TIM Group's sales/distribution points;
- (viii) Equal competition possibilities between Brasil Telecom Group and other players in the rendering of national coverage services within the Brazilian telecommunications market; and
- (ix) Final solution of all pending claims among entities of the Brasil Telecom Group and the Telecom Italia Group;

6 The appraisals to determine the intrinsic equity value of each of BTC and TIMB, to define the value of TIMB's capital increase, will be prepared by a top-tier financial institution of international reputation selected by BrT.

7 - Closing of this transaction is subject to usual conditions precedent for transactions of similar nature and legal requirements, including the approval of ANATEL. Brasil Telecom Group will keep its shareholders and the market in general informed about any material fact regarding this transaction.

8 The Brasil Telecom Group reinforces its positioning in the telecommunications market.

With the merger, the superimposed licenses will be given back to ANATEL. The completion of this instrument is subject to the approval of the qualified agencies of Brasil Telecom S.A., as well as ANATEL. It is not possible, at this moment, to foresee possible effects in the Companies' financial statements, resulting from the consummation of this agreement.

II April 29, 2005, joint material fact of BrT and BrTP:

1 - Brasil Telecom S.A. (BrT) and Brasil Telecom Participações S.A. (BTP), in compliance with Instruction 358, dated January 3, 2002, of the Brazilian Securities and Exchange Commission (CVM), announce that the companies took notice that Techold Participações S.A. (Techold), alongside Timepart Participações Ltda. (Timepart) and Telecom Itália International N.V. (Telecom Italia), as shareholders of Solpart Participações S.A. (Solpart), company which controls, directly, BTP, and, indirectly, BrT and 14 Brasil Telecom Celular S.A. (BTC) (BTC, in conjunction with BTP and BrT, hereafter denominated Brasil Telecom Group), entered into an Agreement on April 28, 2005, seeking the reestablishment of Telecom Italia's original position in the controlling group of Brasil Telecom Group, condition which was temporarily suspended until pertinent regulatory issues were resolved, through the restoration of political rights and the repurchase of the shareholding interest sold to Techold and Timepart in August of 2002. On April 29, 2005, a copy of the 2nd Amendment to the Shareholders' Agreement Consolidated on August 27, 2002 was filed at the headquarters of BrT and BTP.

2 The aforementioned notice informs that Techold and Telecom Italia converted the totality of their preferred shares issued by Solpart into voting shares on April 28, 2005, pursuant to the bylaws of Solpart. Telecom Italia will nominate

members of the Board of Directors of Solpart, BTP and BT, in accordance with the abovementioned shareholders agreement. This agreement was reached considering that the Merger Agreement and the Merger's Protocol entered into with TIM Brasil Serviços e Participações S.A. (TIM Brasil) allow for the removal of legal issues that obstructed the restoration of Telecom Italia's right of returning to the controlling group of Brasil Telecom Group.

3 - Techold, Timepart, Solpart, BTP, and BrT entered into an Agreement ending lawsuits and disputes between the companies, including reciprocal settlements, with respect to the return of Telecom Italia to the controlling group of Brasil Telecom Group.

4 - Brasil Telecom Group is to keep its shareholders and the general public informed about any material facts concerning current developments.

III April 29, 2005, material fact of BrTP:

In compliance with Instruction 358/02 of the Brazilian Securities and Exchange Commission (CVM), Brasil Telecom Participações S.A. (Company) announce that, according to the agreement entered into by Techold Participações S.A. (Techold), Timepart Participações Ltda. (Timepart) and Telecom Italia International N.V. 	Solpart's Total Capital
Techold Participações S.A.	61.98%
Telecom Italia International N.V.	38.00%

Traffic

OPERATING DATA	1Q05	4Q04	1Q05/4Q04 (%)
Exceeding Local Pulses (Million)	2,305	2,773	(16.9)
Long Distance Minutes (Million)	1,334	1,437	(7.1)
Inter-Network Minutes (Million)	1,089	1,238	(12.0)
Exceeding Pulses/ LMES /Month	80.8	96.7	(16.5)
DLD Minutes/LMES/Month	46.8	50.1	(6.7)
Fixed-Mobile Minutes/LMES/Month	38.2	43.2	(11.6)

Exceeding Local Pulses Due to the seasonality characteristic of the first quarter of each year, the local traffic showed a **16.9% reduction**. In addition to that, cell phone record sales in December 2004, aligned to the increase in ADSL access number in service, contributed to the reduction in the local traffic.

Lon-Distance Traffic In the 1Q05, the LD traffic decreased by 7.1% compared to the previous quarter. The seasonality in the period also affected long-distance traffic. **In the intra-sector segment, Anatel's determination on commuting areas explains the traffic variation compared to the 1Q04.**

LD Market Share **Brasil Telecom closes the 1Q05 well positioned in the long-distance market, having reached a 51.0% share in the inter-regional segment and a 29.1% share in the international segment** (quarterly average). This result reflects the success of our marketing campaigns - Viaje com 14 (Travel with 14) and Aniversário das Cidades (Cities Birthday) and of the Brasil Telecom brand in the Region.

In the 1Q05, the quarterly average of **Brasil Telecom's LDN (domestic long-distance) market share increased by 0.6 p.p. in the intra-regional segment** compared to the previous quarter, reaching 82.9%. In the intra-sector segment, Brasil Telecom reached a 91.0% market share.

Inter-Network Traffic The inter-network traffic had a 12.0% reduction compared to the previous quarter. **Brasil Telecom has implemented measures in order to increase its operations profitability.** In this sense, the Company has been offering prepaid and hybrid plans which, for their nature, enable a reduction in the fixed-mobile traffic. Additionally, customers of residential plans are trying to control this type of traffic. Besides, seasonality is also a factor which influences reduction of this traffic.
