Outlook

Ternium anticipates that steel demand in Latin America, driven by solid economic growth, will continue to recover. However, as a result of normal seasonal patterns, the company's shipments in the coming quarters are expected to remain relatively stable compared to shipment levels in the third quarter 2010.

The company anticipates a decrease in operating margin in the fourth quarter 2010 compared to the third quarter 2010 as a result of lower prices and higher cost per ton. The increased raw material and purchased slabs prices during the second and third quarter 2010 are expected to continue being gradually reflected in Ternium's cost of sales during the fourth quarter 2010.

Flat and long product sales in the South & Central America Region were US\$822.4 million during the third quarter 2010, an increase of 80% versus the same period in 2009. This increase was due to higher shipments and revenue per ton. Shipments in the region totaled 821,000 tons during the third quarter 2010, or 52% higher than in the third quarter 2009, mainly due to a recovery from the 2009 global economic downturn. Revenue per ton shipped was US\$1,002 in the third quarter 2010, an increase of 19% compared to the same quarter in 2009, mainly due to higher prices.

The third quarter 2010 gain was primarily due to the impact of the Mexican Peso's 1.23% revaluation on Ternium's Mexican subsidiary's US dollar denominated debt. This result is non-cash when measured in US dollars and is offset by changes in Ternium's net equity position in the currency

translation adjustments line, as the value of Ternium Mexico's US dollar denominated debt is not altered by the Mexican Peso's fluctuation when stated in US dollars in Ternium's consolidated financial statements. While operating results were US\$840.0 million higher in the first nine months of 2010 compared to the first nine months of 2009, there was a US\$485.0 million increase in working capital in the first nine months of 2010 compared with a US\$847.4 million decrease in working capital during the

The decrease in working capital in the first nine months of 2009 included a US\$660.5 million inventory reduction, reflecting a decrease in inventory volume as Ternium implemented a de-stocking process in response to lower demand for steel products, and lower costs of finished goods, goods in process and raw materials.

Capital expenditures in the first nine months of 2010 were US\$220.0 million, compared to US\$145.8 million in the first nine months of 2009. During the first nine months of 2010 Ternium carried out, among other projects, the relining of a blast furnace, the expansion of the hot strip mill and enhancements in the coking facilities in Argentina, and the upgrading of a cold strip mill and the development of Ternium's mining activities in Mexico.

In the first nine months of 2010, Ternium generated free cash flow⁴ of US\$361.4 million, compared to free cash flow of US\$943.4 million in the first nine months of 2009. In addition, proceeds from the transfer of shares of Sidor to Venezuela totaled US\$767.4 million in the 2010 period. The increase in working capital in the third quarter 2010 included an increase of US\$304.8 million in inventory, reflecting higher inventory volume as a result of higher operating rates, and higher costs of finished goods, goods in process and raw materials. The decrease in working capital in the third quarter 2009 was mainly due to a US\$38.9 million inventory reduction, a US\$38.5 million decrease in other receivables, mainly tax credits, and a US\$25.8 million increase in accounts payable, partially offset by a US\$29.9 million decrease in other liabilities, mainly labor liabilities.
