1Q14 Earnings Release

São Paulo, Brazil, April 29, 2014 - GPA [BM&FBOVESPA: PCAR4 (PN); NYSE: CBD] announces its results for the first quarter of 2014. The comments refer to the consolidated results of the Group or of its business units.

GPA Consolidated

Gross revenue of R\$16.597 billion, increasing 10.8%

Net Income advances 22.9% to R\$338 million

- ◆ Gross revenue growth driven by the Company's accelerated organic expansion, with 124 stores opened in the last 12 months. On a same-store basis, gross sales revenue grew 6.3%, despite the negative calendar effect.
- ♦ EBITDA grew 21.7% to R\$1.050 billion (EBITDA margin of 7.0%), driven by the stronger operations at Via Varejo and Nova Pontocom and negatively impacted by the Easter effect at GPA Food.

GPA Food

EBITDA up 3.2% to R\$534 million, with EBITDA margin of 6.5%

- ♦ Gross revenue growth of 9.1% to R\$8.893 billion, despite the calendar effects in the quarter, which had a negative impact of 240 basis points on same-store sales growth.
- ◆ Gross margin was adversely affected by the investments in competitiveness and the higher contribution from Assaí to sales at GPA Food. In the Multivarejo business unit, the reduction in gross margin is gradually being offset by operational efficiency gains;

- ♦ Gross sales revenue growth of 12.7% to R\$7.704 billion;

Sales Performance - Consolidated

Gross sales revenue amounted to R\$16.597 billion in the first quarter, increasing 10.8% on the prior-year period. One of the main factors contributing to this growth was the opening of 124 stores in the last 12 months, 21 of which were inaugurated in the first quarter of 2014.

The same-store sales growth of 6.3% was adversely affected by the calendar effect in the period.

Performance by category:

- ü **Food:** same-store sales growth of 3.0%, which was impacted by the calendar effect. Adjusted for this effect, same-store sales growth was 6.0%.
- ü **Non-food:** growth of 8.9%, with the highlight the electronics categories, particularly video, smartphones, air conditioners and fans. Sales growth in the e-commerce segment accelerated further from the growth rates recorded in prior periods.

GPA Food

ü Gross sales revenue grew 9.1%, with 13 new stores opened in the period (6 Minimercados Extra, 2 Assaí and 3 Extra Hiper, as well as 2 drugstores). Same-store sales growth stood at 2.6% and was adversely affected by the calendar effect. Adjusted for this effect, same-store sales grew 5.0% in the quarter.

2

ü Assaí continued to post strong sales growth (38.2%), driven by solid same-store sales growth and the significant contribution from the expansion in the store network. Organic expansion remains the focus of the format, whose strategy centers on strengthening the banner nationwide. In the last 12 months, 13 new stores were opened, nine of which were inaugurated in four states in which the Group previously did not have operations.

ü The Pão de Açúcar and Extra banners performed in line with the Company's expectations and continued to capture market share gains. By category, the period highlights were the same-store sales performances in meat and poultry and in beverages. Certain categories, such as grocery and seafood, were adversely affected by Easter falling in the second quarter this year. Private-label brands continued to register robust growth to account already for over 9% of sales in the Multivarejo business unit.

ü At the end of March, the Brazilian Supermarkets Association (ABRAS) reported data for 2013. The report shows that sales at GPA outperformed the overall industry, which reinforces the success of the competitiveness strategy implemented during the year.

Nova Pontocom

ü Gross sales revenue in the quarter grew by 54.1%, supported by strong growth in customer traffic, better conversion rates and the higher contribution to sales by the marketplace business. Gross sales revenue growth was driven by the excellent moment for sales of smartphones, which surpassed the growth rate registered in 4Q13, and of air conditioners and fans, which were driven by the exceptionally hot weather in the first quarter.

Via Varejo

ü Gross sales revenue amounted to R\$6.237 billion, with same-store sales growth of 3.6% and total-store sales growth of 6.0%. Eight new stores were opened in the period, all under the Casas Bahia banner.

ü Sales performance in the first quarter was in line with our expectations for the period, which was not marked by any significant sales event.

Gross margin in the Multivarejo business contracted by 130 basis points, reflecting the ongoing strategy to improve sales competitiveness, which is gradually being offset by the operational efficiency gains captured by the initiatives already implemented.

Selling expenses increased by 3.7%, lower than the inflation rate in the period. General and administrative expenses decreased by 17.5%, reflecting the greater discipline employed in the control of corporate expenses. Selling, general and administrative expenses as a percentage of net sales decreased from 19.9% in 1Q13 to 18.9% in 1Q14. Note that with Easter falling in the second quarter this year, fixed expenses were less diluted than in 1Q13. Excluding this effect, the reduction in expenses in the period would have been even stronger.

Despite the negative Easter effect, **EBITDA reached the same level of R\$481 million registered in 1Q13. EBITDA margin stood at 7.5%**.

Operating expenses as a percentage of net sales improved by 20 basis points in 1Q14 (10.4%) compared to 1Q13 (10.6%). The reduction was positively influenced by economies of scale resulting from the strategy to open stores in states in which the banner was already present.

EBITDA amounted to R\$53 million, increasing by 47.1% on the prior-year period to outpace gross sales revenue growth in the quarter. EBITDA margin was 2.9%, expanding by 10 basis points from 1Q13.

In 2014, the banner will maintain its focus on expanding its national footprint through organic growth. In 1Q14, two stores were opened in states where the banner was already present and another 12 should be delivered by year-end.

Gross sales revenue at Via Varejo and Nova Pontocom grew by 12.7% to R\$7.7 billion. This performance was driven by the *e-commerce* business (Nova Pontocom), where growth accelerated from the pace of prior periods to reach 54.1% in the quarter. Gross margin declined 50 basis points due to the higher contribution made by Nova Pontocom to total sales.

Selling, general and administrative expenses as percentage of net sales improved by 240 basis points in 1Q14 (19.1%) compared to 1Q13 (21.5%), especially at Via Varejo, driven by the efficiency gains in logistics operations, reduction in corporate and IT expenses, among others.

EBITDA amounted to R\$516 million, growing by 49.6% from 1Q13, while EBITDA margin improved from 5.7% to 7.6%. This improvement was supported primarily by lower operating expenses and by the efficiency gains captured in logistics costs and in assembly processes at Via Varejo. The operational improvement at Nova Pontocom also contributed to EBITDA margin expansion in the period.

Net debt declined by R\$966 million in relation to the balance at the end of March 2013, resulting in a deleverage in the quarter. This reduction is related to higher cash flow from operating activities (R\$ 370 million), even with the negative effect from Easter; and the positive nonrecurring impact in cash position due to the public offering of Via Varejo's shares, among others factors, in the amount of R\$600 million. As a consequence, Net Debt/EBITDA ratio decreased from 0.42x to 0.15x.

Net debt including the payment book operation amounted to R\$3.410 billion, a reduction of R\$759 million compared to March 2013. Net Debt/EBITDA ratio considering the payment book operation ended the quarter at 0.85x, down significantly from the ratio at the end of 1Q13.

Net financial expenses were R\$339 million, increasing 33.3% from 1Q13, below the cumulative increase of 48% of the CDI in the period. Net financial expenses as a percentage of net sales increased from 1.9% in 1Q13 to 2.3% in 1Q14.

The main variations in net financial (income) expenses were:

- The reduction of R\$7 million in net debt charges due to the lower debt position in the period;
- The increase of R\$20 million in the cost of sales of payment book receivables, which corresponded to 0.5% of net sales, the same ratio registered in 1Q13, despite the rise in interest rates between the periods;
- The R\$63 million increase in the cost of sales of credit card receivables, of which R\$54 million was related to the interest rate hikes between 1Q13 and 1Q14, and R\$9 million was related to the higher volume of receivables sold due to the higher revenue in the period.

Total sale of receivables (cards and payment books) increased approximately 17%, from R\$7.6 billion in 1Q13 to R\$8.9 billion in 1Q14, reflecting the revenue growth in all of the Company's business units.

Net Income

Net income amounted to R\$338 million in 1Q14, increasing 22.9% on the prior-year period, with net margin of 2.3%. The result is explained by the sales revenue growth in the period, which was driven by the organic expansion in recent quarters, coupled with the significant improvement in selling, general and administrative expenses.

On March 31, 2014, the cash position stood at R\$5.350 billion, down R\$3.017 billion from the start of the period, mainly due to the following reasons.

Cash Flow from Operating Activities

• The impact on cash flow in 1Q14 from the Easter calendar effect;

• The consumption of R\$2.287 billion in working capital resulting from the Easter calendar and World Cup effects that generated an increase in inventory levels from 53 days⁽¹⁾ in 1Q13 to 58 days⁽¹⁾ in 1Q14.

Cash Flow from Financing Activities

• The payment of approximately R\$814 million related to the debenture maturity (principal and interest), which contributed to reducing the debt balance in 1Q14.

Appendix I - Definitions used in this document

Company's Business Units: The Company's business is divided into four units – food retail, cash and carry, electronics and home appliance retail (brick and mortar) and e-commerce – grouped as follows:

Same-store sales: The basis for calculating same-store sales is defined by the sales registered in stores open for at least 12 consecutive months. Acquisitions are not included in the same-store calculation base in the first 12 months of operation.

Growth and changes: The growth and changes presented in this document refer to variations in comparison with the same period of the previous year, except where stated otherwise.

EBITDA: As of 4Q12, the results of Equity Income and Other Operating Income (Expenses) were included together with Total Operating Expenses in the calculation of EBITDA. This means that the calculation of EBITDA complies with Instruction 527 issued by the Securities and Exchange Commission of Brazil (CVM) on October 4, 2012. As from 1Q13, the depreciation recognized in the cost of goods sold, which essentially consists of the depreciation of distribution centers, began to be specified in the calculation of EBITDA.

Adjusted EBITDA: Measure of profitability calculated by excluding Other Operating Income and Expenses from EBITDA. Management uses this measure because it believes it eliminates nonrecurring expenses and revenues and other nonrecurring items that could compromise the comparability and analysis of results.

Adjusted net income: Measure of profitability calculated as net income excluding Other Operating Income and Expenses and discounting the effects from Income and Social Contribution Taxes. Management uses this measure because it believes it eliminates nonrecurring expenses and revenues and other nonrecurring items that could compromise the comparability and analysis of results.
