**América Móvil's third quarter of
2015 financial and operating report**

Mexico City, October 19, 2015 - América Móvil, S.A.B. de C.V. (“América Móvil”) [BMV: AMX] [NYSE: AMX] [NASDAQ: AMOV] [LATIBEX: XAMXL], announced today its financial and operating results for the third quarter of 2015.

We ended September with 368.2 million access lines, 1.0% more than a year before. This figure includes 288.4 million wireless subscribers, 34.9 million landlines, 23.4 million broadband accesses and 21.6 million PayTV units.

Our wireless postpaid base was up 5.1% year-on-year to 61.5 million subscribers. Postpaid net additions were 836 thousand, the majority came from Mexico, Brazil and our European operations.

Third quarter revenues were up 1.2% from the prior year to 223.6 billion pesos, bringing the total through September to 663.6 billion pesos. Year to date, EBITDA totaled 203 billion pesos, 5.5% less than a year before in Mexican peso terms.

After depreciation and amortization charges that were equivalent to 16% of service revenues—4.9% higher than in the prior year—we obtained an operating profit of 35.2 billion pesos, which was down 17.5% in Mexican peso terms.

Our comprehensive financing costs grew to 38.9 billion pesos, mostly reflecting the sharp depreciation that took place in the quarter of the Mexican peso and the Brazilian real relative to the U.S. dollar. Net interest expenses came down by 2.4% year on year and by 10.1% year to date.

Our net debt increased by 61.3 billion pesos since December allowing for the reclassification of our stake in KPN from a long term investment valued at cost to an available for sale asset valued at market prices. Our net debt represented 1.8 times LTM EBITDA. It must be noted that upon the spin-off of Telesites our net debt is to be reduced by 21 billion pesos.

Through September we funded capital expenditures in the amount of 105.7 billion pesos and shareholder distributions totaling 59.5 billion pesos, including both dividends and share buybacks.

Relevant Events

On August 25th, our subsidiary Telmex, was notified of the initial phase of certain proceedings initiated by the Federal Telecommunications Institute (“IFT”), to determine alleged violations to its concession and the must-offer rules. The proceedings initiated by the IFT are related to the commercial agreements Telmex has with Dish México and to the internet content provider known as “Uno TV”. Telmex has provided response to the IFT disputing the alleged violations. AMX strongly believes that Telmex is in full compliance with the terms of its concessions.

We issued a mandatory exchangeable bond in the amount of 750 million euros on September 9th. The transaction has a 3 year tenor and carries a coupon of 5.5%. Upon maturity the bond will be exchanged for KPN shares at a price of 3.34 euros per share. America Movil will get the full benefit of any price increase up to 27.5% of the above-mentioned price (4.26 euros per share).

Access Lines

We ended September with 368.2 million access lines, 1.0% more than a year before. This figure includes 288.4 million wireless subscribers, 34.9 million landlines, 23.4 million broadband accesses and 21.6 million PayTV units.

We registered net disconnections of 401 thousand wireless subscribers in the third quarter resulting in a 0.4% decline of our subscriber base relative to 2014. Our fixed RGUs have increased 1.8% driven by the growth of broadband accesses, which expanded 3.6% relative to December of last year.

Brazil and Mexico make up almost 55% of the total base; the former reached 107.1 million access lines while the latter had 94.7 million access lines at the end of September.

Wireless Subscribers

We finished September with 288.4 million subscribers after net disconnections of 401 thousand clients in the quarter, having disconnected 849 thousand prepaid subscribers in Brazil—partly as a result of the economic downturn—, 650 thousand in Ecuador and 439 thousand in Colombia that were not generating traffic. Net additions came in at 399 thousand in Central America, 361 thousand in Mexico, 413 thousand in Argentina and 147 thousand in Chile.

Our wireless postpaid base was up 5.1% year-on-year to 61.5 million subscribers. Postpaid net additions were 836 thousand—17.9% more than a year before— of which 344 thousand came from Mexico and 181 thousand from Brazil.

Chile was our fastest growing operation in relative terms with an 8.4% annual growth rate followed by Central America, which increased 5.7%, and Mexico with 3.6%.

(1) Includes total subscribers of all companies in which América Móvil holds an economic interest; does not consider the date in which the companies started being consolidated. *Central America includes Panama and Costa Rica in every table.

Fixed Revenue Generating Units

We had 79.8 million RGUs, 2.9% more than in the same period of last year after net additions of 945 thousand net RGUs in the quarter, which include 591 thousand broadband accesses and 262 thousand fixed lines. The fixed broadband base increased 5.4% over the year and the number of fixed lines rose 2.4%. PayTV was up 1.0% in annual terms after adding 92 thousand new units in the period.

Altogether, our operations in South America posted an annual growth of 4.3%, with Colombia growing 10.2% and Ecuador and Peru rising 11.4% and 12.0% respectively, although from a small base.

Brazil concentrates nearly half of our fixed RGUs, 46%, Mexico accounts for 27%, Colombia 7%, and both Central America and Europe approximately 6%.

América Móvil Consolidated Results

The expectation throughout much of the third quarter that the Fed would lift interest rates before the end of September brought about renewed volatility in the capital markets. The fear that such move would lead to more capital flowing back to the U.S. from emerging markets caused a new wave of currency depreciations in the region and partly curtailed the access that emerging markets issuers had to the debt capital markets in the U.S. Signs of renewed economic weakness in China, while dispensing with some of the fears regarding an interest rate increase by the Fed, spooked markets further, particularly when China decided to depreciate slightly its currency.

Against this backdrop, third quarter revenues were up 1.2% from the prior year to 223.6 billion pesos, bringing the total through September to 663.6 billion pesos. At constant exchange rates service revenues were down 0.6% from the year-earlier quarter, a figure that was almost identical to the one observed in the second quarter. Voice revenues—both mobile and fixed—continued to decline in relation to service revenues. Data revenue growth accelerated in the third quarter in relation to the precedent one: it was 10.7% and 7.0% in the mobile and fixed platforms, respectively.

EBITDA amounted to 66.7 billion pesos in the quarter; it was down 8.2% year-on-year in Mexican peso terms, which partly reflects the depreciation of certain currencies, including the Brazilian real and the Colombian peso, in relation to the Mexican peso. Year to date, EBITDA totaled 203 billion pesos, 5.5% less than a year before in Mexican peso terms. Part of the reduction in EBITDA was due to certain extraordinary items in Puerto Rico and Ecuador and the fact that the prior year Austria had booked an extraordinary revenue.

Central America has emerged as the fastest growing region followed by the South American block and has actually increased its rate of growth over the last few quarters in contrast to the experience of South America, that has seen a declining one on account of the economic slowdown and the fall of commodity prices.

n.m. Not meaningful

After depreciation and amortization charges that were equivalent to 16% of service revenues—slightly higher than in the prior year—we obtained an operating profit of 35.2 billion pesos. Our comprehensive financing costs grew to 38.9 billion pesos, mostly reflecting the sharp depreciation that took place in the quarter of the Mexican peso and the Brazilian real relative to the U.S. dollar. Net interest expenses came down by 2.4% year on year and by 10.1% year to date.

Notwithstanding the negative income tax provision in the quarter of 1.6 billion pesos we posted a net loss of 2.9 billion pesos.

The foreign exchange losses incurred have not had an impact on cash flows. They partly originate in intercompany financing positions. In relation to the debt of the company, it is to be said that it has a long term profile with an average life of more than ten years. It poses limited refinancing requirements.

n.m. Not meaningful

Our net debt increased by 61.3 billion pesos since December allowing for the reclassification of our stake in KPN from a long term investment valued at cost to an available for sale asset valued at market prices. Our net debt represented 1.8 times LTM EBITDA. It must be noted that upon the spin-off of Telesites our net debt is to be reduced by 21 billion pesos. At the end of September we had already deducted 14.2 billion pesos from the “other short term investments” line item on account of the sale of KPN shares that took place through the mandatory bond placed in September.

Through September we funded capital expenditures in the amount of 105.7 billion pesos and shareholder distributions totaling 59.5 billion pesos, including both dividends and share buybacks.

***Pro-forma for the spin-off of Telesites the total debt would be 40,903 million dollars.*

Mexico

Our Mexican operations ended the quarter with 73 million wireless subscribers and 21.7 million fixed-RGUs. We gained 361 thousand new wireless subscribers in the quarter, substantially all of which were postpaid subs, and added 103 thousand RGUs on the fixed-line platform on the back of an 122 thousand increase in the number of broadband accesses. Our postpaid subscriber base was up 10.9% from the year before to 10.9 million subs.

Third quarter revenues from our Mexican operation came in at 68.1 billion pesos. Although service revenues were down 5.7% from the year-earlier quarter, the rate of decline was smaller than in the prior quarter (-7.5%). The acceleration of mobile data revenues was key in the stabilization of Mexico's service revenues and is being driven by an increase in smartphone penetration. The expansion of data revenues on both the fixed and mobile platforms has brought about a lower share of voice revenues in our service revenues: it stands now at approximately 46%.

EBITDA was down 9.5% to 27.4 billion pesos, with the EBITDA margin falling to 40.3% from 44.8% a year before. We remain focused on cost contention and reduction.

The Mexican telecommunications market has undergone significant change as a consequence of the Telecommunications Reform. A major one has to do with the competitive landscape, with two major international players—AT&T, the largest in the world, and Telefónica, the largest in Iberoamérica—drumming up their investment efforts and presence in the market. There is more intense and effective competition in the Mexican market, as our competitors themselves have asserted. On this account America Movil should not be in a position to subsidise our competitors by way of asymmetric interconnection rates and other regulatory asymmetries. In addition it is of the essence that AMX be granted the concession to offer PayTV services to continue to increase competitiveness in the market.

We have upgraded significant parts of our network to the newest technologies, and have continued to expand our 4G LTE footprint and fiber-optic networks throughout the country. We have today more than 213 thousand kilometers of fiber across Mexico. Our fiber-optic network is closer to the home and to the nodes to ensure higher data speeds and a greater variety of services.

We have introduced new commercial plans that address our client's needs for connectivity. It is the case, among others, of our Sin Fronteras plan introduced in July that enables Telcel's clients to call the US with no long distance fees and to use their mobile phone while in the US as if they were in Mexico, without roaming charges and

long distance tariffs. The market has followed our lead and this type of plan is becoming widely used by Mexican consumers.

Argentina, Paraguay and Uruguay

After adding 413 thousand clients in the third quarter we ended September with 22.1 million wireless subscribers. On the fixed line platform we had 579 thousand fixed RGUs.

Third quarter revenues, 7.2 billion Argentinean pesos, were 12.9% higher than in the prior year. Wireless service revenues rose 22.5% and equipment revenues declined 9.9%. Smartphone sales and data plans continued to drive mobile data revenues, up 33.5% year-on-year; they now account for 50.2% of our service revenues. Fixed line revenues of 440 million Argentinean pesos were up 5.2%.

EBITDA rose by 21.7% to 2.6 billion Argentinean pesos. The EBITDA margin stood at 35.3% of revenues, 2.5 percentage points more than a year before on the back of operational efficiencies.

We continued with the rollout of our 4G LTE network in the main cities to provide higher data speeds and a better connectivity experience for our clients.

Brazil

We added 181 thousand postpaid subscribers and disconnected 1.0 million prepaid subscribers in the third quarter to finish the period with 70.3 million subscribers, 16.1 million of which are postpaid clients. Our postpaid subscriber base was up 6.0% year-on-year. On the fixed-line platform we increased our RGUs by 250 thousand clients to 36.8 million, 3.4% more than a year before.

Our revenues totaled 9.1 billion reais, with service revenues rising 1.7% year-on-year. The rate of growth of service revenues has exhibited a declining trend over the last quarter very much driven by the economic downturn in the country. Service revenue growth continued to be led by mobile data services, at 24%, with fixed-broadband revenues expanding 8.9% and PayTV revenues climbing 8.1% from the prior year. Voice revenues (fixed and mobile) stabilized in relation to service revenues, at approximately 34%.

Supported by a 2.6 point margin expansion, EBITDA rose 12.4%, as the EBITDA margin topped 27%. Year-to-date EBITDA totaled 7.3 billion reais; it was up 8.9% year-on-year. Several initiatives on cost reduction, the integration of the three entities operating in Brazil and the completion of several of the investment works that had been in process for some time are behind many of the EBITDA gains.

Chile

After adding 147 thousand wireless subscribers in the third quarter, our base reached 6.2 million subs at the end of September, 8.4% more than in the prior year. On the fixed platform we had 1.2 million RGUs.

Total revenues remained practically unchanged at 185.5 billion Chilean pesos, with service revenues increasing 2.3% year-on-year on the back of fixed data revenues that expanded 28.7% and wireless data revenues, up 13.5%. Voice revenues fell on both platforms and now represent approximately 41% of service revenues, down from 50% 18 months before. It is noteworthy that the annual comparison of wireless revenues is affected by regulatory changes implemented in the last quarter of 2014 related to the way we account for voice and data revenues from postpaid contracts.

EBITDA declined 23.8% from the prior year to 11.2 billion Chilean pesos, and was equivalent to 6.0% of revenues.

In the third quarter we were handed 20MHz of spectrum in the 700MHz frequency that we won in an auction in February 2014 to continue with our 4G LTE rollout.

Colombia

We finished the quarter with 28.9 million wireless subscribers after net disconnections of 439 thousand subs in the period, all of which were prepaid clients. In the contract segment we had a slight increase of our client base, which reached 5.8 million subs. On the fixed platform RGUs were up 10.2% year-on-year to 5.7 million, of which 1.9 million are broadband accesses, up 17.0% annually; 1.5 million are landlines, 14.5% more than a year before; and 2.2 million are PayTV units, 2.5% more than in 2014.

Total revenues of 2.8 billion Colombian pesos were 1.7% greater than in the year-earlier quarter, although service revenues declined 4.2%. Every business line other than wireless voice is posting double-digit revenue growth. On the fixed line platform data revenues rose 22.8% followed by PayTV revenues that expanded 15.8% and fixed-voice revenues that were up 12.8%. On the mobile platform data revenues rose 10.6% in a market with tight smartphone penetration but voice revenues fell as a result of more competition and as subscribers migrated to lower-priced plans in light of the economic downturn.

EBITDA was 2.7% lower than a year before at 1.1 trillion Colombian pesos. The EBITDA margin stood at 38.2% of revenues, slightly lower than in the precedent quarter but 1.7 percentage points lower than a year before.

Ecuador

Our subscriber base was down 24.5% over the year to 9.3 million subs following a clean-up of 650 thousand prepaid subscribers that were not generating traffic. Our postpaid base increased 3.9% relative to the prior year and reached 2.5 million contract lines. On the fixed platform we ended the quarter with 374 thousand RGUs, 11.4% more than a year before.

The quarter's revenues were down 7.7% to 396 million dollars, with service revenues falling 9.0% relative to the year-earlier quarter. Wireless voice revenues came down 12.7% as a consequence of promotions that resulted in a sharp decline in voice prices of almost 30% in annual terms, as the economic downturn in the country has sharply curtailed consumer spending. Mobile data revenues fell 5.8% while fixed-line revenues were 0.8% lower as fixed data and PayTV revenues failed to compensate for the decline in fixed voice revenues.

The quarter's EBITDA came in at 115 million dollars, a contraction of 43.4% year-on-year mostly to do with the booking of a new tax levied on wireless service revenues that amounted to 40 million dollars for the period February-August and was all booked in the quarter. (The tax rate is a function of market share and we are currently obliged to pay 5% of service revenues.) The EBITDA decline also reflected a more competitive environment in the midst of an economic recession that brought about revenue declines and also higher subscriber acquisition costs. The EBITDA margin was equivalent to 29.0% of revenues.

We launched a 4GLTE network in the main cities in Ecuador. The new platform will allow us to be much more competitive in terms of quality and speeds for data.

Peru

During the third quarter we had 72 thousand net disconnections on the prepaid platform and 56 thousand net additions in the postpaid one, ending the period with 12.4 million wireless subscribers. Our postpaid base was up 5.2% from the year-earlier quarter. In addition to our wireless clients we had 1.3 million fixed-RGUs, 12.0% more than a year before.

Third quarter revenues, up 0.4% year-on-year, totaled 1.3 billion soles with service revenues practically flat. Data revenues increased 17.6% on the wireless platform having accelerated from the prior two quarters, with fixed-data revenues expanding 19.5% (from a lower base) and PayTV revenues 9.9%. Wireless voice revenues fell 12.4%: aggressive airtime promotions and a 63% cut in termination rates effective April 1st brought down the average price per minute of voice by 22.0% year-on-year. Although they have declined somewhat, voice revenues (fixed and mobile) still represent approximately 55% of service revenues.

EBITDA came in at 353 million soles. It was down 26.9% relative to the prior year but up 7.5% sequentially. EBITDA has been hit by the mobile termination rate cut, by the competitive dynamics that led to higher subscriber acquisition and retention costs and by the depreciation of the peruvian sol versus the US dollar.

Central America

Our operations in the Central American block ended the quarter with 15.1 million wireless subscribers after net additions of 400 thousand subs—a fifth of which were postpaid—that brought about an annual increase of 5.7% of our wireless base. On the fixed platform we had 4.9 million RGUs, 7.1% more than a year before, having added 89 thousand new fixed RGUs in the quarter including 70 thousand broadband accesses.

Total revenues were up 8.3% year-on-year to 548 million dollars. Wireless voice is the main driver of growth, with an annual increase of 15.2%, followed by wireless data at 5.9%, while PayTV and wireline data were up 5.4% and 5.3% respectively.

The quarter's EBITDA, 182 million dollars continued with its double-digit growth increasing 14.1% on an annual basis, and the EBITDA margin was up 1.7 percentage points to 33.3%.

Caribbean

We ended September with 5.2 million wireless subs, an increase of 4.1% compared to the prior year. Although from a small base, our postpaid segment increased 8.0% annually, while the prepaid one was up 2.5%. On the fixed platform, we had net additions of 45 thousand RGUs in the quarter, with PayTV representing almost half of them and growing 24.2% year over year.

Third quarter revenues of 464 million dollars were down 3.8% year-on-year. On the wireless segment, revenues decreased 6.5% mostly due to a lower consumption in the voice side, while increasing data consumption at a lower cost. Fixed line revenues remained almost flat compared to the year before, stood at 215 million dollars.

EBITDA was down 27.2% to 134 million dollars, due to one-offs in Puerto Rico, while the increase in Dominican Republic was not enough to offset the decline.

United States

Tracfone ended September with 25.7 million clients, slightly less, 0.7%, than a year before. Our brands StraightTalk, SafeLink and our new brand Total Wireless have shown solid growth whereas our legacy brands registered client disconnections.

The quarter's revenues, 1.7 billion dollars were down 0.2% with service revenues practically flat year-on-year. Our EBITDA came in at 105 million dollars having dropped 33.1% relative to the year before as a result of higher subscriber acquisition and retention costs in what has been a more competitive environment.

Telekom Austria Group

We finished September with 20.2 million wireless clients, an annual increase of 1.4% stemming from Bulgaria and Serbia. Our postpaid division expanded 2.7% in an annual basis to 14.3 million contract clients. As regards fixed line, we had 4.8 million RGUs, 9.2% more than a year before. This figure includes 68 thousand RGUs that were added with the acquisition of Amis in Slovenia. The organic growth rate of our fixed segment was 7.8% year on year showing solid growth in Austria, Bulgaria and Croatia.

The quarter's revenues topped one billion euros; at constant exchange rates they were slightly lower, -0.2%, than in the precedent year. The decline in revenues is linked, for the most part, to stronger competition in Bulgaria and termination rate cuts in Croatia. On the other hand, in Austria, revenues increased 1.6% relative to last year's quarter mostly on account of higher equipment sales.

EBITDA declined 2.6% year-on-year at constant exchange rates to 379 million euros. Moreover, excluding the effect of one-offs from the merger in Lichtenstein, EBITDA would have risen 4.1%. EBITDA from our Austrian operation was up 9.1% in annual terms as a result of revenue growth as well as strict cost controls. The EBITDA margin was equivalent to 36.6% of revenues.

Glossary of Terms

ARPU	Average Revenue per User. The ratio of service revenues in a given period to the average number of wireless subscribers in the same period. It is presented on a monthly basis.
ARPM	Average Revenue per Minute. The ratio of service revenues to airtime traffic.
Capex	Capital Expenditure. Accrued capital expenditures related to the expansion of the telecommunications infrastructure.
Churn	Disconnection Rate. The ratio of wireless subscribers disconnected during a given period to the number of wireless subscribers at the beginning of that period.
EBIT	Earnings Before Interest and Taxes, also known as Operating Profit.
EBIT margin	The ratio of EBIT to total operating revenue.
EBITDA	Earnings Before Interest, Taxes, Depreciation, and Amortization.
EBITDA margin	The ratio of EBITDA to total operating revenue.
EPS (Mexican pesos)	Earnings per share. Total earnings in Mexican pesos divided by total shares.
Earnings per ADR (US\$)	Total earnings in U.S. dollars divided by total ADRs equivalent.
Equity subscribers	Subscribers weighted by the economic interest held in each company.
GPRS	General Packet Radio Service. Enables GSM networks to offer higher capacity, Internet-based-content and packet-based data services. It is a second generation technology.
Gross additions	Total number of subscribers acquired during the period.

Licensed pops	Licensed population. Population covered by the licenses that each of the companies manage.
LTE	Long-term evolution is a 4th generation standard for wireless communication of high-speed data for mobile phones and data terminals.
Market share	A company's subscriber base divided by the total number of subscribers in that country.
MOU	Minutes of Use per subscriber. The ratio of wireless traffic in a given period to the average number of wireless subscribers in that same period. It is presented on a monthly basis.
Net subscriber additions	The difference in the subscriber base from one period to another. It is the different between gross additions and disconnections.
Net debt	Total short and long term debt minus cash and marketable securities.
Net debt / EBITDA	The ratio of total short and long term debt minus cash and securities to trailing 12-month income before interest, taxes, depreciation and amortization.
Prepaid	Subscriber that may purchase airtime to recharge a cellular phone. The client does not hold a contract with the company for voice and data services.
Postpaid	Subscriber that has a contract for the use of airtime. The client has no need of activating airtime, it is done so immediately.
SMS	Short Message Service.
SAC	Subscriber Acquisition Cost. The sum of handset subsidies, marketing expenses and commissions to distributors for handset activation. Handset subsidy is calculated as the difference between equipment cost and equipment revenues.
Wireless penetration	The ratio of total wireless subscribers in any given country divided by the total population in that country.
