WABCO HOLDINGS INC. AND SUBSIDIARIES
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
June 30, 2012
(Unaudited)

NOTE 1. Basis of Financial Statement Presentation

WABCO Holdings Inc. and its subsidiaries (collectively “WABCO” or the “Company”) develops, manufactures and sells advanced braking, stability, suspension and transmission control systems primarily for commercial vehicles. WABCO’s largest selling products are pneumatic anti-lock braking systems (“ABS”), electronic braking systems (“EBS”), automated manual transmission systems, air disk brakes and a large variety of conventional mechanical products such as actuators, air compressors and air control valves for heavy and medium-sized trucks, trailers and buses. WABCO sells its products to four groups of customers around the world: truck and bus original equipment manufacturers (“OEMs”), trailer OEMs, aftermarket distributors of replacement parts and services and automotive OEMs. The accompanying condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with the instructions for Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements. In the opinion of management, all adjustments, including normal recurring items, considered necessary for a fair presentation of financial data have been included. The results of operations for interim periods are not necessarily indicative of the results that may be expected for the entire year. The condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and accompanying notes for the year ended December 31, 2011, included in the Company’s Annual Report on Form 10-K.

Based on the organizational structure, as well as the nature of financial information available and reviewed by the Company’s chief operating decision maker to assess performance and make decisions about resource allocations, the Company has concluded that its total WABCO operations represent one reportable segment and that WABCO’s performance and future net cash flow perspectives are best understood and assessed as such. For purposes of cash flow presentation, the Company has presented both cash flow activities for the revolving credit facilities and short-term debt on a net presentation basis as these items represent cash flow activities where turnover is quick, the amounts are large and the maturities are short. All majority-owned subsidiaries of WABCO are included in the consolidated financial statements and intercompany transactions are eliminated upon consolidation. WABCO’s investments in unconsolidated joint ventures are included at cost plus its equity in undistributed earnings less dividends and changes in foreign currency in accordance with the equity method of accounting and reflected as investments in unconsolidated joint ventures in the consolidated balance sheet. Certain amounts in prior years’ condensed consolidated financial statements have been reclassified to conform to the current year presentation. Preparation of the financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the period. Management believes the most complex and sensitive judgments, because of their significance to the condensed consolidated financial statements, result primarily from the need to make estimates about the effects of matters that are inherently uncertain. Management’s Discussion and Analysis of Financial Condition and Results of Operations and Notes 2 and 14 to the Consolidated Financial Statements for the year ended December 31, 2011, in the Company’s Annual Report on Form 10-K, describe the most significant accounting estimates and policies used in preparation of the Consolidated Financial Statements. Actual results in these areas could differ materially from management’s estimates. There have been no significant changes in the Company’s assumptions regarding critical accounting estimates during the first six months of 2012.

NOTE 2. Recently Issued Accounting Standards

The adoption of recently issued accounting standards did not have a material impact on the condensed consolidated financial statements, nor do we expect the pending adoption of recently issued accounting standards to have a material

impact on the condensed consolidated financial statements.

In 2011, the FASB issued ASU 2011-5, Presentation of Comprehensive Income ("ASU 2011-5") and ASU 2011-12 Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05 ("ASU 2011-12").

ASU 2011-5 improves the comparability, consistency and transparency of financial reporting and increases the prominence of items reported in other comprehensive income. ASU 2011-5 is effective for interim and annual periods

7

Table of Contents

beginning after December 15, 2011. As ASU 2011-5 relates specifically to presentation and disclosures the adoption of these provisions did not have any other impact on our consolidated financial statements.

The main purpose of ASU 2011-12 was to the defer the effective date pertaining to reclassification adjustments out of accumulated other comprehensive income in Accounting Standards Update 2011-05, therefore it did not have an impact on Company's condensed consolidated financial statements.

NOTE 3. Comprehensive Income and Noncontrolling Interests

Total comprehensive income attributable to Company consisted of the following (amounts in millions):

(Amounts in millions)	Three Months Ended		Six Months Ended	
	June 30, 2012	2011	June 30, 2012	2011
Net income	\$78.9	\$89.9	\$170.9	\$208.2
Foreign currency translation (losses) / gains	(40.3)	11.8	(26.1)	29.2
Unrealized gains / (losses) on benefit plans, net	3.3	0.8	2.6	(1.4)
Comprehensive income	41.9	102.5	147.4	236.0
Less: Net income attributable to noncontrolling interests	3.3	1.3	6.1	4.9
Foreign currency translation (losses) / gains, attributable to noncontrolling interests	(3.7)	0.1	(2.7)	0.3
Comprehensive income attributable to Company	\$42.3	\$101.1	\$144.0	\$230.8

Dividends to noncontrolling interest holders for the three and six month periods ending June 30, 2012 were \$1.5 million and \$2.9 million, respectively. Dividends to noncontrolling interest holders for the three and six month periods ending June 30, 2011 were \$1.2 million and \$3.0 million, respectively.

NOTE 4. Accounts Receivable Securitization Program & Financing Receivables

On September 23, 2009, the Company established an accounts receivable securitization program (the "Accounts Receivable Securitization Program") with Société Générale Bank Nederland N.V. The maximum funding from receivables that may be sold into the Accounts Receivable Securitization Program and outstanding at any point in time is €100 million; however, there can be no assurance that the Company will generate sufficient eligible receivables to access the maximum availability. The original term of the Accounts Receivable Securitization Program was for one year, with the possibility of four additional annual extensions, assuming the Company and the participating sellers are in compliance with the applicable covenants. The Company extended the Accounts Receivable Securitization Program in September 2011 for one year.

During the six months ended June 30, 2012, the Company sold all of its eligible receivables into the Accounts Receivable Securitization Program. The receivables were removed from the balance sheet in accordance with the guidance under ASC topic 860, Transfers and Servicing. The total amount of receivables sold under the Accounts Receivable Securitization Program during the six months ended June 30, 2012 was €373.4 million (\$484.5 million at weighted average June 30, 2012 year-to-date exchange rates). The amount of eligible receivables sold and outstanding at June 30, 2012 amounted to €72.7 million (\$90.4 million at June 30, 2012 exchange rates). As a result of the sale, accounts receivable decreased by \$90.4 million and cash and cash equivalents increased by \$53.2 million. The remaining amount of proceeds of \$37.2 million is a subordinated deposit with Société Générale Bank Nederland N.V. at June 30, 2012.

The fair value of the receivables sold equaled the carrying cost at time of sale, and no gain or loss was recorded as a result of the sale. The Company estimated the fair value of sold receivables using Level 3 inputs and based the

estimate on historical and anticipated performance of similar receivables, including historical and anticipated credit losses (if any). As part of the Accounts Receivable Securitization Program, the Company continues to service the receivables. The Company sells the receivables at face value, but receives actual funding net of the subordinated deposit account until collections are received from customers for the receivables sold. The Company is exposed to the credit losses of sold receivables up to the amount of its subordinated deposit account at each settlement date. Credit losses for receivables sold and past due amounts outstanding at

8

Table of Contents

June 30, 2012 were both immaterial. Servicing fees paid for the program were \$0.5 million and \$0.6 million for the six months ended June 30, 2012 and June 30, 2011 respectively.

In addition to the above, the Company has the ability to access cash on a daily basis related to collections on sold receivables, which provided the Company with \$26.9 million of additional cash as of June 30, 2012. Of these cash receipts, \$18.5 million is classified on the consolidated balance sheet as loans payable to bank and \$8.4 million reduced the subordinated deposit to \$28.8 million which is classified as restricted cash on the consolidated balance sheet at June 30, 2012. Also, the Company has pledged unsold receivables under the Accounts Receivable Securitization Program of €11.9 million (\$14.8 million at June 30, 2012 exchange rates).

On April 15, 2009, the Company entered into a €35 million factoring program, which has a term of five years, in respect to accounts receivable from one of our customers. To date, we have not utilized this facility.

Other financing receivables include sales to reputable state owned and public enterprises in China that are settled through notes receivable which are registered and endorsed to the Company. These notes receivable are fully secured and generally have contractual maturities of six months or less. These guaranteed notes are available to be discounted with banking institutions in China or transferred to suppliers to settle liabilities. The total amount of notes receivable discounted or transferred for the first six months of 2012 and 2011 were \$21.3 million and \$37.3 million, respectively, resulting in expenses of \$0.1 million and \$0.6 million for the six months ended June 30, 2012 and 2011, respectively, and are included in "Other non-operating expense, net." The carrying amounts of these guaranteed notes receivable are \$47.8 million and \$23.5 million as of June 30, 2012 and June 30, 2011, respectively. The Company monitors monthly the credit quality of these notes through historical losses and current economic conditions with Chinese banks. As these receivables are guaranteed by banks and the Company has not experienced any historical losses nor is the Company expecting future credit losses, we have not established a loss provision against these receivables as of June 30, 2012 or December 31, 2011.

NOTE 5. Net Income Attributable to Company per Share

Basic net income attributable to Company per share has been computed using the weighted average number of WABCO common shares outstanding. The average number of outstanding shares of common stock used in computing diluted net income attributable to Company per share includes weighted average incremental shares when the impact is not anti-dilutive. The weighted average incremental shares represent the net amount of shares the Company would issue upon the assumed exercise of in-the-money stock options and vesting of restricted stock units ("RSUs") after assuming that the Company would use the proceeds from the exercise of options to repurchase treasury stock. Anti-dilutive options, if applicable, are excluded and represent those options whose exercise price was greater than the average price of the Company's common stock.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
Weighted average incremental shares included	1,336,790	2,318,072	1,542,883	2,530,205
Shares excluded due to anti-dilutive effect	500,765	—	435,080	—

NOTE 6. Capital Stock

The following is a summary of net shares outstanding and shares issued or reacquired during the first six months of 2012.

	Number of Shares of Common Stock		
	Total Shares	Treasury Shares	Net Shares Outstanding
Balance, December 31, 2011	74,242,930	(9,477,275) 64,765,655
Shares issued upon exercise of stock options	777,638	—	777,638
Shares issued upon vesting of RSUs	199,534	—	199,534
Shares purchased for treasury	—	(1,836,755) (1,836,755
Balance, June 30, 2012	75,220,102	(11,314,030) 63,906,072

The Company accounts for purchases of treasury stock under the cost method with the costs of such share purchases reflected in treasury stock in the accompanying condensed consolidated balance sheets. When treasury shares are reissued, they are recorded at the average cost of the treasury shares acquired since the inception of the share buy back programs, net of

9

Table of Contents

shares previously reissued and the Company reflects the difference between the average cost paid and the amount received for the reissued shares in capital surplus. As of June 30, 2012, no shares have been reissued.

The Company's Board of Directors has approved a program to purchase shares of the Company's common stock. The authorization by the Board of Directors on May 26, 2011 approved the purchase of shares in an amount not to exceed \$400 million which expires on May 31, 2013. As of June 30, 2012, the Company had repurchased a total of \$281.6 million of shares leaving an unexpended balance of \$118.4 million available to repurchase shares in the future.

Subsequent to June 30, 2012, the Company has repurchased an additional 272,793 shares for a total of \$13.7 million. The Company plans to continue to purchase shares at prevailing market prices. Timing will vary depending on market conditions and other factors.

NOTE 7. Stock-Based Compensation

The Company records stock-based compensation based on the estimated fair value of the award at the grant date and is recognized as an expense in the condensed consolidated statements of income over the requisite service period.

Total stock-based compensation cost recognized during the three and six month periods ended June 30, 2012 and 2011 were as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
Stock-based compensation	\$4.0	\$3.3	\$7.6	\$6.6

The total number and type of awards granted during the periods presented and the related weighted-average grant-date fair values were as follows:

	Six months ended June 30, 2012			Six months ended June 30, 2011		
	Underlying Shares	Weighted- Average Exercise Price	Weighted Average Grant Date Fair Value	Underlying Shares	Weighted- Average Exercise Price	Weighted Average Grant Date Fair Value
Options Granted	274,505	\$58.72	\$23.11	276,287	\$59.24	\$22.94
RSUs Granted	129,877	\$—	\$58.48	220,181	\$—	\$62.44
Total Awards	404,382			496,468		

In the six months ended June 30, 2012, a total of 274,505 options were granted of which all are exercisable in equal installments over a period of three years. In the six months ended June 30, 2011, a total of 276,287 options were granted of which all are exercisable in equal installments over a period of three years. In 2012, a total of 129,877 RSUs were granted of which 101,722 vest ratably over a period of three years. Of the remaining 28,155 RSUs granted in 2012, 10,027 vest immediately, 3,588 vest after two years and 14,540 vest after three years. In 2011, a total of 220,181 RSUs were granted of which 101,647 vest ratably over a period of three years. Of the remaining 118,534 RSUs granted in 2011, 3,973 vest after two years, 41,064 vest after three years and 73,497 vest after four years. The weighted average grant date fair value was calculated under the Black-Scholes option-pricing model. The following table summarizes the significant assumptions used for the grants during the six month periods ended June 30, 2012 and 2011:

Assumption	June 30, 2012	June 30, 2011	
Risk-free interest rate	0.81	% 2.30	%
Expected volatility	44.48	% 42.82	%
Expected holding period	5 Years	5 Years	
Expected forfeiture rate	2.6	% 2.3	%
Expected dividend yield	—	0.47	%

The risk free interest rate is based on the yield of U.S. Treasury securities that correspond to the expected holding period of the options. WABCO reviewed the historic volatility of its common stock over a four-year period, the common stock of its peer group over a three-year period, and the implied volatility for at the money options to

purchase shares of its common

10

Table of Contents

stock. Based on this data, the Company chose to use a weighted average of the implied volatility of WABCO, the most recent four-year historical volatility of WABCO and the median most recent three-year historical volatility of WABCO's peer group prior to the spin-off date. The expected holding period was calculated by reviewing the historical exercise pattern of all holders that were granted options and the exercise behavior of officers versus non-officers. The results of the analysis support one expected holding period for all groups of employees. The expected forfeiture rate was determined based on the historical stock option forfeiture data of the Company. The dividend yield was based on an expected future dividend amount for the period at the time of grant.

NOTE 8. Debt

On July 8, 2011, the Company entered into a \$400 million multi-currency five-year senior unsecured revolving credit facility (the "Facility") with the lenders and agent banks party thereto, including Banc of America Securities Limited as agent, issuing bank and swingline lender, and Banc of America Securities Limited, Citigroup Global Markets Limited, Fortis Bank S.A./N.V., ING Belgium SA/NV, Société Générale Corporate & Investment Banking, The Bank of Tokyo-Mitsubishi UFJ, Ltd and The Royal Bank of Scotland NV, (Belgium) Branch, as mandated lead arrangers and bookrunners and Credit Lyonnais and Unicredit Bank AG as lead arrangers.

As of June 30, 2012, this is our principal bank credit facility, and the Facility will expire on September 1, 2016. It replaced the \$800 million multi-currency five-year senior unsecured revolving credit facility entered into by WABCO on May 31, 2007 with, among others, J.P. Morgan Securities, Inc. as lead arranger and bookrunner and JPMorgan Chase Bank, N.A., as agent, issuing bank and swingline lender.

Under the Facility, the Company may borrow, on a revolving basis, loans in an aggregate principal amount at any one time outstanding not in excess of \$400 million. Up to \$50 million under this facility may be used for issuing letters of credit, of which \$48.7 million was unused as of June 30, 2012, and up to \$50 million is available in the form of swingline loans, of which \$50.0 million was unused as of June 30, 2012. At June 30, 2012, the carrying amount of this facility approximated fair value. The balance outstanding on this facility as of June 30, 2012, was \$67.0 million in addition to \$1.3 million of letters of credit. The Company has the intent and ability to carry its balance outstanding for at least a continuous twelve month period as of June 30, 2012.

The proceeds of the borrowings under the Facility will be available to repurchase WABCO shares, finance acquisitions, refinance existing indebtedness and meet general financing requirements.

Interest on loans under the Facility will be calculated at a rate per annum equal to an applicable margin, which can vary from 0.80% to 1.55% based on the Company's leverage ratio, plus LIBOR for loans denominated in U.S. Dollars, EURIBOR for loans denominated in Euros, HIBOR for loans denominated in Hong Kong Dollars and SIBOR for loans denominated in Singapore Dollars, plus mandatory costs, if any.

The Facility contains terms and provisions (including representations, covenants and conditions) customary for transactions of this type. Our primary financial covenant is a leverage test which requires net indebtedness not to exceed three times adjusted four quarter trailing EBITDA (earnings before interest, taxes, depreciation and amortization adjusted for certain items). Additional financial covenants include an interest coverage test and a maximum subsidiary indebtedness test. The interest coverage test requires three times interest expense not to exceed adjusted four quarter trailing EBITDA. The maximum subsidiary indebtedness test limits the total aggregate amount of indebtedness of WABCO's subsidiaries, excluding indebtedness under the Facility, to \$400 million, of which not more than \$150 million may be secured. At June 30, 2012 the Company had the ability to borrow an incremental \$331.7 million under our principal credit facility and was in compliance with all the covenants.

Financial covenants, as determined on the date the facility was signed, are not subject to any future changes in U.S. GAAP accounting standards and all cash on the balance sheet can be deducted for net indebtedness purposes. In

addition, expenses and payments related to any streamlining of WABCO's operations are excluded when calculating the four quarter trailing adjusted EBITDA. Other covenants include delivery of financial reports and other information, compliance with laws including environmental laws and permits, ERISA and U.S. regulations, limitations on liens, mergers and sales of assets and change of business.

Also, various subsidiaries had borrowings from banks totaling \$20.7 million, of which \$18.5 million relates to our Accounts Receivable Securitization Program referred to in Note 4 above. The remaining \$2.2 million supports local working capital requirements.

Table of Contents

NOTE 9. Warranties, Guarantees, Commitments and Contingencies

Warranties

Products sold by WABCO are covered by a basic limited warranty with terms and conditions that vary depending upon the product and country in which it was sold. The limited warranty covers the equipment, parts and labor (in certain cases) necessary to satisfy the warranty obligation generally for a period of two years. Estimated product warranty expenses are accrued in cost of goods sold at the time the related sale is recognized. Estimates of warranty expenses are based primarily on warranty claims experience and specific customer contracts. Warranty expenses include accruals for basic warranties for product sold, as well as accruals for product recalls, service campaigns and other related events when they are known and estimable. To the extent WABCO experiences changes in warranty claim activity or costs associated with servicing those claims, its warranty accrual is adjusted accordingly. Warranty accrual estimates are updated based upon the most current warranty claims information available.

The following is a summary of changes in the Company's product warranty liability for the three and six months ended June 30, 2012 and 2011 (amounts in millions).

	Three Months		Six Months	
	Ended June 30,		Ended June 30,	
	2012	2011	2012	2011
Balance of warranty costs accrued, beginning of period	\$57.7	\$50.0	\$52.6	\$44.9
Warranty costs accrued	7.6	11.1	17.5	21.2
Warranty claims settled	(9.9)	(7.4)	(15.9)	(14.7)
Foreign exchange translation effects	(3.3)	1.0	(2.1)	3.3
Balance of warranty costs accrued, end of period	\$52.1	\$54.7	\$52.1	\$54.7
Current liability, included in current portion of warranties	\$41.0	\$51.0	\$41.0	\$51.0
Long-term liability, included in other liabilities	\$11.1	\$3.7	\$11.1	\$3.7

Guarantees and Commitments

The Company has bank guarantees for \$27.2 million which is comprised of uncollateralized bank guarantees, of which \$21.3 million is related to tax and other litigation, \$1.3 million is related to letters of credit and \$4.6 million is related to other items.

The Company has inventory and receivables that are pledged against a local bank facility in India to support local working capital requirements of approximately \$10.0 million. Also, the Company has pledged unsold receivables under the Accounts Receivable Securitization Program of €11.9 million (\$14.8 million at June 30, 2012 exchange rates).

Contingencies

General

We are subject to proceedings, lawsuits and other claims related to products and other matters. We are required to assess the likelihood of any adverse judgments or outcomes to these matters as well as potential ranges of probable and reasonably possible losses. A determination of the amount of liability to be recorded, if any, for these contingencies is made after careful analysis of each individual issue.

Litigation

On June 23, 2010, the European Commission (the "Commission") issued a decision imposing a total of €326.1 million in fines, or approximately \$400 million on the date of assessment (the "EC Fine"), on the former American Standard Companies Inc. (now Trane Inc., hereinafter referred to as "American Standard" or "Trane"), and certain of its European subsidiaries engaged in the Bath and Kitchen business and successor entities for infringements of European Union competition rules relating to the distribution of bathroom fixtures and fittings in a number of European countries. Pursuant to our Indemnification and Cooperation Agreement with Trane, WABCO Europe BVBA (an indirect wholly-owned subsidiary of WABCO) is responsible for, and is liable to indemnify Trane Inc. and Ideal Standard International (representing the successor to the Bath and Kitchen business, and owner of certain of the former American Standard subsidiaries) and their owners against the EC Fine.

Table of Contents

As required by the Indemnification and Cooperation Agreement, WABCO paid the fine amount into escrow on August 30, 2010, using €230.0 million of cash on hand and €96.1 million of additional borrowings. The funds were subsequently released from escrow and paid to the Commission. After reviewing all of the elements of the case, WABCO decided to appeal the decision in order to try to have the fine reduced. On September 8, 2010, WABCO filed its appeal in the General Court of the European Union, located in Luxembourg. On March 27, 2012, the oral hearing for the appeal took place before the court. This was the final step in the procedure before a judgment is handed down. The Company now believes that a decision on the appeal will be made in the next nine months.

Other

In conjunction with the Tax Sharing Agreement, as further discussed in "Note 11. Tax and Indemnification Liabilities Transferred from Trane to WABCO", WABCO is responsible for certain tax and indemnification liabilities. These liabilities include indemnification liabilities to Trane of \$14.6 million as of June 30, 2012. It is reasonably possible that the Company could incur losses in excess of the amount accrued. Although this amount cannot be estimated, we believe that any additional losses would not have a material adverse impact on the condensed consolidated financial statements.

NOTE 10. Income Taxes

The income tax expense for the first six months of 2012 was \$19.0 million on pretax income of \$189.9 million before adjusting for noncontrolling interest. Income tax expense is the net result of taxes on earnings in profitable jurisdictions, income offset by fully valued net operating losses, the accrual of interest on uncertain tax positions, and certain foreign tax planning. The income tax expense for the first six months of 2012 is primarily offset by the release of tax accruals of approximately \$13.6 million due to certain government filings submitted in January 2012, as the Company has previously disclosed in its 2011 Form 10K. During the third quarter of 2012, the Company expects to recognize an additional tax benefit of \$5.2 million related to these government filings as previously disclosed in its 2011 Form 10K.

The accompanying June 30, 2012 condensed consolidated balance sheet continues to reflect a full valuation allowance for certain foreign tax losses as it has been determined as of June 30, 2012 that it is more likely than not that the losses will not be utilized in the foreseeable future.

Unrecognized tax benefits at June 30, 2012 amounted to \$53.2 million related to the WABCO business and \$6.1 million related to WABCO obligations directly to tax authorities for Trane's Bath and Kitchen business as further discussed in "Note 11. Tax and Indemnification Liabilities Transferred from Trane to WABCO". The Company believes that it is reasonably possible that certain unrecognized tax benefits will be recognized within the next 12 months. As a result, \$53.3 million of the unrecognized tax benefits are classified as long-term liabilities and \$6.0 million are classified as short-term liabilities. Approximately \$0.1 million of these long-term unrecognized tax benefits and \$6.0 million of the short-term unrecognized tax benefits relate to WABCO's obligations to tax authorities for Trane's Bath and Kitchen business. The Company recognizes interest and penalties accrued related to unrecognized tax benefits in income tax expense. No significant penalties have been accrued related to these unrecognized tax benefits.

The Company is subject to taxation in the U.S. and various states and foreign jurisdictions. With no material exceptions, the Company is no longer subject to U.S. federal, state, local or foreign examinations by tax authorities for years before 2007.

NOTE 11. Tax and Indemnification Liabilities Transferred from Trane to WABCO

Pursuant to the Tax Sharing Agreement between Trane and WABCO, entered into on July 16, 2007, and other agreements with Trane as filed in WABCO's Form 10 prior to its spin-off from Trane, WABCO is responsible for certain tax contingencies and indemnification liabilities. As noted in "Note 10. Income Taxes", the liabilities as of June 30, 2012 include \$6.1 million related to non-U.S. entities of Trane's former Bath and Kitchen business but for which WABCO entities have obligations directly to non-U.S. tax authorities. In addition, as of June 30, 2012, the Company had indemnification liabilities of \$14.6 million, of which \$3.3 million is classified within long-term liabilities on the balance sheet and \$11.3 million is classified within short-term liabilities.

Under an indemnification agreement, WABCO Brazil is responsible for certain claims related to its business for periods prior to the spin-off of WABCO from American Standard. In particular, there are tax claims pending in various stages of the Brazilian legal process related to income, social contribution and/or value added taxes for which a contingency exists and which may or may not ultimately be incurred by the Company. The estimated total amount of the contingency as of June 30, 2012 is \$38.0 million including interest. However, based on management's assessment and advice of our external legal counsel, the Company believes that it has valid arguments in all of these cases and thus no accrual is required at this time.

Table of Contents

NOTE 12. Streamlining Expenses

The Company accounts for employee-related streamlining charges as either a one-time benefit arrangement or an ongoing benefit arrangement as appropriate. From time to time the Company also has streamlining charges that are not related to employees, such as facility exit costs.

Based on market declines occurring in the fourth quarter of 2008, we commenced a streamlining program on October 28, 2008 (the "2008/2009 Program"), which began with a consultative process with works councils and employee representatives globally. The 2008/2009 Program reduced our global workforce by approximately 1,800 employees. This level of reduction in workforce brought our capacity in line with market demand, while still allowing us to continue our focus on core strategies, including technology, new products, globalization, and quality and productivity initiatives. We believe the completion of these actions created sufficient flexibility in production and helped us to cope with anticipated demand volatility. The Company does not expect to incur any further charges on the 2008/2009 Program.

Based on the Company's efforts to maintain our global footprint, the Company will periodically enter into other streamlining programs as deemed necessary ("Other Programs").

The following is a summary of changes in the Company's streamlining program liabilities for the six months ended June 30, 2012 (amounts in millions). Activity for the period consisted of termination payments and employee-related charges. Non-employee-related charges, such as facility exit costs, were not incurred during the period.

2008 / 2009 Program

Balance as of December 31, 2011	\$17.5
Charges during the first six months of 2012	—
Payments during the first six months of 2012	(2.4)
Balance as of June 30, 2012	\$15.1
Other Programs	
Balance as of December 31, 2011	\$2.3
Charges during the first six months of 2012	4.8
Payments during the first six months of 2012	(2.3)
Balance as of June 30, 2012	\$4.8
Foreign exchange translation effects	\$(0.8)
Total streamlining liability as of June 30, 2012	\$19.1

A balance of \$11.8 million is included in other liabilities and \$7.3 million is included in other accrued liabilities as of June 30, 2012.

The following is a summary of current and cumulative streamlining costs (including employee-related costs shown above as well as asset write-offs and other charges).

	Charges for Quarter Ended June 30, 2012		Charges for Six Months Ended June 30, 2012		Cumulative Charges as of June 30, 2012

NOTE 13. Post-retirement Benefits

Post-retirement pension, health and life insurance costs had the following components for the three and six months ended June 30, 2012 and 2011 (amounts in millions):

	Three Months Ended June 30,				Six Months Ended June 30,			
	2012	2012	2011	2011	2012	2012	2011	2011
	Pension Benefits	Health & Life Ins. Benefits	Pension Benefits	Health & Life Ins. Benefits	Pension Benefits	Health & Life Ins. Benefits	Pension Benefits	Health & Life Ins. Benefits
Service cost-benefits earned during period	\$2.3	\$—	\$2.1	\$—	\$4.5	\$—	\$4.2	\$—
Interest cost on the projected benefit obligation	5.9	0.1	6.1	0.2	11.9	0.2	12.2	0.4
Plan amendments	(4.3)	—	—	—	(4.3)	—	—	—
Less assumed return on plan assets	(2.2)	—	(2.1)	—	(4.4)	—	(4.3)	—
Amortization of net loss	0.6	0.1	0.6	0.2	1.2	0.2	1.2	0.5
Defined benefit plan cost	\$2.3	\$0.2	\$6.7	\$0.4	\$8.9	\$0.4	\$13.3	\$0.9
Accretion expense as reflected in selling and administrative expenses and cost of sales	3.7	0.1	4.0	0.2	7.5	0.2	7.9	0.4

The plan amendment of \$4.3 million during the second quarter of 2012 related to an adjustment to our UK pension obligation.

The Company makes contributions to funded pension plans that, at a minimum, meet all statutory funding requirements. Contributions in 2012, as well as payments of benefits incurred by unfunded plans were in line with the expectations for 2012 and also in line with the contributions made during 2011.

NOTE 14. Derivative Instruments and Hedging Activities

ASC topic 815, Derivatives and Hedging, requires a company to recognize all of its derivative instruments as either assets or liabilities on the balance sheet at fair value. The accounting for changes in the fair value of a derivative instrument depends on whether it qualifies and has been designated as a relationship hedge. For those derivative instruments that are designated and qualify as hedging instruments, a company must designate the hedging instrument, based upon the exposure being hedged, as a fair value hedge, cash flow hedge, or a hedge of a net investment in a foreign operation.

The Company recognizes all derivative financial instruments in the consolidated balance sheet at fair value using Level 2 inputs and these are classified as “other current assets,” “other assets,” “other accrued liabilities” or “other liabilities” on the consolidated balance sheet. Level 2 inputs used by the Company in valuing its derivative instruments include model-based valuation techniques for which all significant assumptions are observable in the market. The earnings impact resulting from changes in the fair value of derivative instruments is recorded in the same line item in the consolidated statement of operations as the underlying exposure being hedged or in accumulated other comprehensive income (AOCI) for derivatives that qualify and have been designated as cash flow hedges or hedges of a net investment in a foreign operation. Any ineffective portion of a financial instrument's change in fair value is recognized in earnings together with changes in the fair value of any derivatives not designated as relationship hedges.

Foreign exchange contracts are used by the Company to offset the earnings impact relating to the variability in exchange rates on certain assets and liabilities denominated in non-functional currencies and have not been designated as relationship hedges. As of June 30, 2012, forward contracts for an aggregate notional amount of €167.2 million (\$208.1 million at June 30, 2012 exchange rates) were outstanding with an average duration of one month. These foreign exchange contracts have offset the revaluation of assets and liabilities. The combined net non-operating loss for the six months ended June 30, 2012 was \$0.2 million. The majority of these exchange contracts were entered into on June 28, 2012, the fair value of the derivatives was \$0.9 million.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
Executive Overview

In the second quarter of 2012, the commercial vehicle industry experienced declines in most markets. Based on our estimates in Europe, WABCO's largest market, the production of new trucks and buses declined by 7% year on year, while markets in South America, China and India experienced double-digit declines versus the same period in 2011. Both Japan and North America experienced double-digit growth versus the same period in 2011. The Company's worldwide sales in the second quarter of 2012 decreased by 13.9% (4.5% decrease excluding foreign currency translation effects) compared with the same period a year ago.

Continuing to demonstrate the importance of emerging markets, China, India and Brazil accounted for more than half of the world's truck and bus production in the second quarter of 2012. The Company continued to benefit from its well anchored position in these emerging markets, and has successfully maintained an increasing level of adoption of WABCO technologies and systems, resulting in a higher value of WABCO content per vehicle.

During the second quarter of 2012, WABCO's Operating System continued to enable fast and flexible responses to major market changes, delivering \$18.0 million of materials and conversion productivity. Gross materials productivity represented 5.4% of total materials cost but, as expected, the impact of commodity inflation reduced net materials productivity to 4.3%. Conversion productivity represented 7.3%, a new record achievement.

Results of Operations

Approximately 90% of our sales are outside the U.S., and therefore changes in exchange rates can have a significant impact on the reported results of our operations, which are presented in U.S. dollars. Quarter-over-quarter changes in sales, gross profit, expenses, pre-tax income and net income attributable to Company for 2012 compared with 2011 are presented both with and without the effects of foreign currency translation. Changes in sales, gross profit, expenses, pre-tax income and net income attributable to Company excluding foreign exchange effects are calculated using current year sales, gross profit, expenses, pre-tax income and net income attributable to Company translated at prior year exchange rates. Presenting changes in sales, gross profit, expenses, pre-tax income and net income attributable to Company excluding the effects of foreign currency translation is not in conformity with U.S. GAAP, but management analyzes the data in this manner because it is useful to us in understanding the operating performance of our business. We believe this data is also useful to shareholders for the same reason. The changes in sales, gross profit, expenses, pre-tax income and net income attributable to Company excluding the effects of foreign exchange translation are not meant to be a substitute for measurements prepared in conformity with U.S. GAAP, nor to be considered in isolation. Management believes that presenting these non-U.S. GAAP financial measures is useful to shareholders because it enhances their understanding of how management assesses the operating performance of the Company's business.

Table of ContentsSecond Quarter Results of Operations for 2012 Compared with 2011
(amounts in millions)

	Three Months Ended June 30,			Excluding foreign exchange translation (a)

(a) The 2012 amounts adjusted for foreign currency translation were calculated using average exchange rates for the three month period ending June 30, 2011.

Sales

Our sales for the second quarter of 2012 were \$635.2 million, a decrease of 13.9% (4.5% excluding foreign currency translation effects) from \$737.7 million in 2011. The decrease, excluding foreign currency translation effects, was driven by lower levels of commercial vehicle production, that was evident in most markets. Total sales in Europe, our largest market, decreased approximately 18.4% (8.9% excluding foreign currency translation effects) for the second quarter of 2012, driven mainly by lower levels of truck, bus and trailer production. Total sales increased 27.8% in North America, which continues to benefit from increased commercial vehicle production. Total sales in Asia decreased 8.1% (1.8% excluding foreign currency translation effects). The sales reduction in Asia included primarily a decrease in total sales in India of 20.6% (4.4% excluding foreign currency translation effects), a decrease in total sales in Korea of 28.4% (23.4% excluding foreign currency translation effects), a decrease in total sales in China of 4.4% (7% excluding foreign currency translation effects), partially offset by an increase of sales in Japan of 28.8% (27.3% excluding foreign currency translation effects). Total sales in South America decreased 33.5% (18.6% excluding foreign currency translation effects) driven by the anticipated decline in production of new trucks and buses in Brazil resulting from higher levels of production in 2011 ahead of the 2012 emission mandate as well as the termination of a government sponsored incentive program at the end of 2011. WABCO's aftermarket sales, included in the geographic numbers provided above, decreased by 9.8% at reported rates, but the growth was 0.9% excluding foreign currency translation effects.

Table of Contents

Cost of Sales and Gross Profit

Our cost of sales for the second quarter of 2012 was \$441.5 million, a decrease of \$78.5 million (a decrease of \$31.4 million excluding foreign currency translation effects) from \$520.0 million in 2011. Within cost of sales, our largest expense is material costs, which mainly represents the purchase of components and parts. Our continued focus on productivity generated 5.4% of material savings before the impact of commodity inflation, which had a negative impact of 1.1%, bringing net materials productivity to 4.3% for the quarter. This productivity achievement resulted in \$11.0 million of material cost savings. Our second largest expense within the cost of sales is for labor and other costs associated with converting our purchased components and parts into finished goods. Labor and other cost escalations increased conversion costs by approximately \$4.9 million, while our productivity efforts generated \$7.0 million of savings, or 7.3% of the conversion costs. Warranty expenses were lower compared to the second quarter of 2011 by \$4.9 million, driven by an improvement in warranty claims experience and lower sales versus prior year. Absorption of overhead costs and other indirect costs were unfavorable by \$13.9 million versus the prior year. Volume and mix reduced cost of sales by \$12.8 million, but contributed \$12.5 million to decline of gross profit. Sales price reductions had a negative impact of \$4.4 million on gross profit, or 0.6% of sales, which is a very low level for the quarter. Foreign currency translational effects decreased cost of sales by \$47.1 million and combined with translational effects on sales they negatively affected gross profit in the amount of \$21.9 million. Foreign currency transactional impacts decreased cost of sales by \$13.4 million and positively affected gross profit in the amount of \$10.7 million. The net result of all these changes was a decrease in gross profit of \$24.0 million (or \$2.1 million excluding foreign currency translation effects).

Operating Expenses

Operating expenses, which include selling and administrative expenses, product engineering expenses and other operating expenses, decreased by \$17.8 million (\$7.0 million excluding foreign currency translation effects). The decrease comprises a reduction in incentive compensation of \$8.1 million, a reduction in our UK pension obligation of \$4.3 million partially offset by an increase in research and development investments of \$1.6 million, an increase in labor and other cost inflation of \$2.1 million and increase in streamlining expenses of \$1.7 million.

Equity Income of Unconsolidated Joint Ventures

Equity in net income of unconsolidated joint ventures increased by \$1.0 million to \$4.8 million in 2012 as compared to \$3.8 million in 2011.

Income Taxes

The income tax provision for the second quarter of 2012 was \$17.6 million on pre-tax income of \$96.5 million before adjusting for noncontrolling interest, compared with a provision of \$10.6 million on a pre-tax income of \$100.5 million before adjusting for noncontrolling interest in the second quarter of 2011.

In the three months ended June 30, 2012 the income tax expense is primarily the net result of taxes on earnings in profitable jurisdictions offset by fully valued net operating losses, a tax charge of \$2.2 million as a consequence of the settlement of a foreign tax audit and the accrual of interest on uncertain tax positions. The tax charge for the second quarter 2011 was partially offset by a release of tax accruals of approximately \$1.9 million. The tax charge for 2012 as well as for 2011 are the net result of taxes on earnings in profitable jurisdictions offset by fully valued net operating losses and the accrual of interest on uncertain tax positions.

(a) The 2012 amounts adjusted for foreign currency translation were calculated using average exchange rates for the six month period ending June 30, 2011.

Sales

Our sales for the first six months of 2012 were \$1,292.5 million, a decrease of 8.7% (2.1% excluding foreign currency translation effects) from \$1,415.9 million in 2011. The decrease, excluding foreign currency translation effects, was driven by lower levels of commercial vehicle production that was evident in most markets. This decrease was partially offset by increased WABCO content per vehicle on trucks, buses and trailers globally, as well as expansion of our aftermarket and car businesses. Total sales in Europe, our largest market, decreased approximately 12.3% (5.4% excluding foreign currency translation effects) for the first six months of 2012, driven mainly by lower levels of truck, bus and trailer production. Total sales increased 24.9% in North America, which continues to benefit from increased commercial vehicle production. Total sales in Asia decreased 4.9% (0.9% excluding foreign currency translation effects). The sales reduction in Asia included a decrease in total sales in India of 12% (increase of 1.4% excluding foreign currency translation effects), a decrease in Korea of 19.4% (16% excluding foreign currency translational effects), and a decrease in China of 12.5% (15.6% excluding foreign currency translational effects), partially offset by an increase in total sales in Japan of 36% (32.9% excluding foreign currency translation effects). Total sales in South America decreased 26.2% (15.9% excluding foreign currency translation effects) driven by the anticipated decline in production of new trucks and buses in Brazil resulting from higher levels of production in 2011 ahead of the 2012 emission mandate as well as the termination of a government sponsored incentive program at the end of 2011. Based on our analysis, we estimate that WABCO's sales growth for the six months ended June 30, 2012 has outperformed the aggregate global market growth. WABCO's aftermarket sales, included in the geographic numbers provided above, decreased by 5% at reported rates, but the growth was 2.4% excluding foreign currency translation effects.

Table of Contents

Cost of Sales and Gross Profit

Our cost of sales for the first six months of 2012 was \$902.6 million, a decrease of \$99.3 million (a decrease of \$35.9 million excluding foreign currency translation effects) from \$1,001.9 million in 2011. Within cost of sales, our largest expense is material costs, which mainly represents the purchase of components and parts. Our continued focus on productivity generated 5.3% of material savings before the impact of commodity inflation, which had a negative impact of 1.2%, bringing net materials productivity to 4.1% for the first six months of 2012. This productivity achievement resulted in \$21.0 million of material cost savings. Our second largest expense within the cost of sales is for labor and other costs associated with converting our purchased components and parts into finished goods. Labor and other cost escalations increased conversion costs by approximately \$4.6 million, while our productivity efforts generated \$12.9 million of savings, or 6.4% of the conversion costs. Warranty expenses were lower compared to the first six months of 2011 by \$4.9 million, driven by an improvement in warranty claims experience and lower sales versus prior year. Absorption of overhead costs and other indirect costs were unfavorable by \$20.5 million versus the prior year. Volume and mix decreased cost of sales by \$2.8 million and contributed \$16.5 million to decline in gross profit. Sales price reductions had a negative impact of \$6.5 million on gross profit, or 0.5% of sales, which is at the lowest level we have historically seen. Foreign currency translational effects decreased cost of sales by \$63.4 million and combined with the translational effects on sales they negatively affected gross profit in the amount of \$29.7 million. Foreign currency transactional impacts decreased cost of sales by \$18.4 million and positively affected gross profit in the amount of \$14.9 million. The net result of all these changes was a decrease in gross profit of \$24.1 million (an increase of \$5.6 million excluding foreign currency translation effects).

Operating Expenses

Operating expenses, which include selling and administrative expenses, product engineering expenses and other operating expenses, decreased by \$19.4 million (\$4.7 million increase excluding foreign currency translation effects). The decrease comprises a reduction in incentive compensation of \$13.3 million and a reduction in our UK pension obligation of \$4.3 million partially offset by an increase in research and development investments of \$4.5 million, increase in labor and other cost inflation of \$3.7 million, increase in streamlining expenses of \$2.9 million and net investment in global expansion of \$1.8 million.

Equity Income of Unconsolidated Joint Ventures

Equity in net income of unconsolidated joint ventures increased by \$1.1 million to \$9.7 million in 2012 as compared to \$8.6 million in 2011.

Income Taxes

The income tax provision for the first six months of 2012 was \$19.0 million on pre-tax income of \$189.9 million before adjusting for noncontrolling interest, compared with a provision of \$7.5 million on a pre-tax income of \$215.7 million before adjusting for noncontrolling interest in the first six months of 2011.

In the six months ended June 30, 2012 the income tax expense is primarily offset by the release of tax accruals of approximately \$13.6 million, due to certain government filings submitted in January 2012, as the Company has previously disclosed in its 2011 Form 10K. The tax charge for the first six months 2011 was partially offset by release of tax accruals of approximately \$26.8 million. The tax charge for 2012 as well as for 2011 are the net result of taxes on earnings in profitable jurisdictions offset by fully valued net operating losses and the accrual of interest on uncertain tax positions.

Liquidity and Capital Resources

We employ several means to manage our liquidity, and we are not dependent upon any one source of funding. Our sources of financing include cash flows from operations, cash and cash equivalents, the Revolving Credit Facility, the Accounts Receivable Securitization Program and the use of operating leases.

Cash Flows for the six months ended June 30, 2012

Net cash provided by operating activities was \$169.5 million for the first six months of 2012. This compared with net cash provided by operating activities of \$142.3 million for the first six months of 2011.

The Company recorded net income of \$170.9 million for the first six months of 2012 compared with net income of \$208.2 million for the first six months of 2011. Net income attributable to Company for the first six months of 2012

included

20

Table of Contents

noncash elements such as depreciation and amortization of \$38.7 million. Our working capital increased as a result of seasonal activity fluctuation which was primarily driven by increased levels of accounts receivable and inventory, partially offset by accounts payable. However the working capital increase for the six months ended June 30, 2012 of \$27.5 million was significantly below the increase of \$109.6 million for the six months ended June 30, 2011, when our business had strong growth.

The change in other accrued liabilities and taxes was a decrease of \$9.1 million for the first six months of 2012 compared to an increase of \$38.2 million for the first six months of 2011. The major drivers of this change were fluctuations of bonus accruals under our annual incentive plan driven by payments and additions to the accruals, partially offset by payroll and net tax related items. The change in other current and long-term assets for the first six months of 2012 was a decrease of \$14.4 million compared to a decrease of \$12.6 million for the first six months of 2011. The main drivers of this change were a decrease in net tax related items, partially offset by an increase in notes receivable from our Chinese operations. The change in other long-term liabilities for the first six months of 2012 was a decrease of \$20.2 million compared to a decrease of \$15.5 million for the first six months of 2011. The main driver of this change was the release of tax accruals submitted in January and related to certain government filings.

The net cash used in investing activities amounted to \$40.6 million in the first six months of 2012 compared to net cash used in investing activities of \$36.5 million in the first six months of 2011. The net cash usage for 2012 includes capital expenditures of \$19.5 million of investments in tooling, \$16.5 million on plant and equipment and \$4.6 million in software. This compared with \$15.9 million of investments in tooling, \$16.7 million on plant and equipment and \$3.9 million in software during the first six months of 2011.

The net cash used by financing activities during the first six months of 2012 amounted to \$77.8 million compared to net cash used by financing activities of \$69.2 million during the first six months of 2011.

Our total third party debt was \$87.7 million as of June 30, 2012 compared to \$64.3 million as of June 30, 2011. This consisted primarily of \$67.0 million of long-term debt borrowed under our \$400 million five-year credit facility. Also, subsidiaries in other countries had borrowings from banks totaling \$20.7 million classified as short term debt. The increase during the first six months of 2012 is driven by an increase of \$15 million under our long term credit facility offset by a reduction in our loan under a short term borrowing with Société Générale Bank Nederland N.V related to the Accounts Receivable Securitization Program.

We received \$14.2 million of stock option proceeds during 2012 compared with \$34.7 million in 2011. The number of stock options exercised in the first six months of 2012 and 2011 were 777,638 and 1,521,220, respectively.

The Company's Board of Directors has approved a \$400 million program to purchase shares of the Company's common stock. During the first six months of 2012, the Company repurchased \$101.1 million of shares of which \$3.0 million was not settled until after June 30, 2012. At June 30, 2012, the Company had the authority to make an additional \$118.4 million of share repurchases.

Credit Facility

On July 8, 2011, the Company entered into a \$400 million multi-currency five-year senior unsecured revolving credit facility (the "Facility") with the lenders and agent banks party thereto, including Banc of America Securities Limited as agent, issuing bank and swingline lender, and Banc of America Securities Limited, Citigroup Global Markets Limited, Fortis Bank S.A./N.V., ING Belgium SA/NV, Société Générale Corporate & Investment Banking, The Bank of Tokyo-Mitsubishi UFJ, Ltd and The Royal Bank of Scotland NV, (Belgium) Branch, as mandated lead arrangers and bookrunners and Credit Lyonnais and Unicredit Bank AG as lead arrangers.

As of June 30, 2012, this is our principal bank credit facility, and the Facility will expire on September 1, 2016. It replaces the \$800 million multi-currency five-year senior unsecured revolving credit facility entered into by WABCO on May 31, 2007 with, among others, J.P. Morgan Securities, Inc. as lead arranger and bookrunner and JPMorgan Chase Bank, N.A., as agent, issuing bank and swingline lender.

Under the Facility, the Company may borrow, on a revolving basis, loans in an aggregate principal amount at any one time outstanding not in excess of \$400 million. Up to \$50 million under this facility may be used for issuing letters of credit, of which \$48.7 million was unused as of June 30, 2012, and up to \$50 million is available in the form of

swingline loans, of which \$50.0 million was unused as of June 30, 2012. At June 30, 2012, the carrying amount of this facility approximated fair value. The balance outstanding on this facility as of June 30, 2012, was \$67.0 million in addition to \$1.3 million of letters of credit. The Company has the intent and ability to carry its balance outstanding for at least a continuous twelve month period as of June 30, 2012.

Table of Contents

The proceeds of the borrowings under the Facility will be available to repurchase WABCO shares, finance acquisitions, refinance existing indebtedness and meet general financing requirements.

Interest on loans under the Facility will be calculated at a rate per annum equal to an applicable margin, which can vary from 0.80% to 1.55% based on the Company's leverage ratio, plus LIBOR for loans denominated in U.S. Dollars, EURIBOR for loans denominated in Euros, HIBOR for loans denominated in Hong Kong Dollars and SIBOR for loans denominated in Singapore Dollars, plus mandatory costs, if any.

The Facility contains terms and provisions (including representations, covenants and conditions) customary for transactions of this type. Our primary financial covenant is a leverage test which requires net indebtedness not to exceed three times adjusted four quarter trailing EBITDA (earnings before interest, taxes, depreciation and amortization adjusted for certain items). Additional financial covenants include an interest coverage test and a maximum subsidiary indebtedness test. The interest coverage test requires three times interest expense not to exceed adjusted four quarter trailing EBITDA. The maximum subsidiary indebtedness test limits the total aggregate amount of indebtedness of WABCO's subsidiaries, excluding indebtedness under the Facility, to \$400 million, of which not more than \$150 million may be secured. At June 30, 2012 the Company had the ability to borrow an incremental \$331.7 million under our principal credit facility and was in compliance with all the covenants.

Financial covenants are not subject to any future changes in U.S. GAAP accounting standards and all cash on the balance sheet can be deducted for net indebtedness purposes. In addition, expenses and payments related to any streamlining of WABCO's operations are excluded when calculating the four quarter trailing adjusted EBITDA. Other covenants include delivery of financial reports and other information, compliance with laws including environmental laws and permits, ERISA and U.S. regulations, limitations on liens, mergers and sales of assets and change of business.

Also, various subsidiaries had borrowings from banks totaling \$20.7 million, of which \$18.5 million relates to our Accounts Receivable Securitization Program referred to in Note 4 above. The remaining \$2.2 million supports local working capital requirements.

Accounts Receivable Securitization Program

As discussed above, we have the ability to use our Accounts Receivable Securitization Program as one of several means to manage our liquidity. Under the terms of the Accounts Receivable Securitization Program that we entered into with Société Générale on September 23, 2009, we have the ability to sell our accounts receivable directly to Société Générale. The maximum funding from receivables that may be sold into the Accounts Receivable Securitization Program and outstanding at any point in time is €100 million; however, there can be no assurance that the Company will generate sufficient eligible receivables to access the maximum availability. The original term of the Accounts Receivable Securitization Program was for one year, with the possibility of four additional annual extensions, assuming the Company and the participating sellers are in compliance with the applicable covenants. The Company extended the Receivables Program in September 2011 for one year.

During the six months ended June 30, 2012, the Company sold all of its eligible receivables into the Accounts Receivable Securitization Program. The receivables were removed from the balance sheet in accordance with the guidance under ASC topic 860, Transfers and Servicing. The total amount of receivables sold under the Accounts Receivable Securitization Program during the six months ended June 30, 2012 was €373.4 million (\$484.5 million at weighted average June 30, 2012 year-to-date exchange rates). The amount of eligible receivables sold and outstanding at June 30, 2012 amounted to €72.7 million (\$90.4 million at June 30, 2012 exchange rates). As a result of the sale, accounts receivable decreased by \$90.4 million and cash and cash equivalents increased by \$53.2 million. The remaining amount of proceeds of \$37.2 million is a subordinated deposit with Société Générale Bank Nederland N.V. at June 30, 2012.

The fair value of the receivables sold equaled the carrying cost at time of sale, and no gain or loss was recorded as a result of the sale. The Company estimated the fair value of sold receivables using Level 3 inputs and based the estimate on historical and anticipated performance of similar receivables, including historical and anticipated credit losses (if any). As part of the Accounts Receivable Securitization Program, the Company continues to service the receivables. The Company sells the receivables at face value, but receives actual funding net of the subordinated deposit account until collections are received from customers for the receivables sold. The Company is exposed to the credit losses of sold receivables up to the amount of its subordinated deposit account at each settlement date. Credit losses for receivables sold and past due amounts outstanding at June 30, 2012 were both immaterial. Servicing fees for the program were \$0.5 million for the six months ended June 30, 2012.

Table of Contents

Factoring Program

On April 15, 2009, we entered into a €35 million factoring program, which has a term of five years, with respect to accounts receivable from one of our customers. To date, we have not utilized this program.

Derivative Instruments and Hedging Activities

The Company recognizes all derivative financial instruments in the consolidated balance sheet at fair value using Level 2 inputs and these are classified as “other current assets,” “other assets,” “other accrued liabilities” or “other liabilities” on the consolidated balance sheet. Level 2 inputs used by the Company in valuing its derivative instruments include model-based valuation techniques for which all significant assumptions are observable in the market. The earnings impact resulting from changes in the fair value of derivative instruments is recorded in the same line item in the consolidated statement of operations as the underlying exposure being hedged or in accumulated other comprehensive income (“AOCI”) for derivatives that qualify and have been designated as cash flow hedges or hedges of a net investment in a foreign operation. Any ineffective portion of a financial instrument's change in fair value is recognized in earnings together with changes in the fair value of any derivatives not designated as relationship hedges.

Foreign exchange contracts are used by the Company to offset the earnings impact relating to the variability in exchange rates on certain assets and liabilities denominated in non-functional currencies and have not been designated as relationship hedges. As of June 30, 2012, forward contracts for an aggregate notional amount of €167.2 million (\$208.1 million at June 30, 2012 exchange rates) were outstanding with an average duration of one month. These foreign exchange contracts have offset the revaluation of assets and liabilities and result in a net non-operating loss of \$0.2 million as per June 30, 2012. As the majority of these exchange contracts were entered into on June 28, 2012, the fair value of the derivative assets or liabilities was \$0.9 million.

Off-Balance Sheet Arrangements

Please see the disclosure above in “Accounts Receivable Securitization Program.”

Aggregate Contractual Obligations

The Company has contractual obligations for debt, operating leases, tax indemnifications, purchase obligations, unfunded pension and post-retirement benefit plans and tax liabilities that were summarized in a table of aggregate contractual obligations for the year ended December 31, 2011 disclosed in the Annual Report on Form 10-K. As disclosed in Note 10. Income Taxes, the Company released tax accruals of approximately \$13.6 million in the first quarter of 2012, reducing our overall tax liability obligation, as previously disclosed in our 2011 Form 10-K. There have been no other material changes to those obligations since December 31, 2011.

Information Concerning Forward Looking Statements

Certain of the statements contained in this report (other than the historical financial data and other statements of historical fact), including, without limitation, statements as to management’s expectations and beliefs, are forward-looking statements. These forward-looking statements were based on various facts and were derived utilizing numerous important assumptions and other important factors, and changes in such facts, assumptions or factors could cause actual results to differ materially from those in the forward-looking statements. Forward-looking statements include the information concerning our future financial performance, financial condition, liquidity, business strategy, projected plans and objectives. Statements preceded by, followed by or that otherwise include the words “believes,” “expects,” “anticipates,” “strategies,” “prospects,” “intends,” “projects,” “estimates,” “plans,” “may increase,” “may fluctuate,” expression or future or conditional verbs such as “will,” “should,” “would,” “may” and “could” are generally forward looking in nature and not historical facts. This report includes important information as to risk factors in “Item 1A. Risk Factors,” and “Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations.” Many important factors could cause actual results to differ materially from management’s expectations, including:

• the actual level of commercial vehicle production in our end-markets;

Table of Contents

adverse developments in the business of our key customers;
periodic changes to contingent liabilities, including those associated with litigation matters and government investigations;
our ability to access credit markets or capital markets on a favorable basis or at all;
adverse developments in general business, economic and political conditions or any outbreak or escalation of hostilities on a national, regional or international basis;
changes in international or U.S. economic conditions, such as inflation, interest rate fluctuations, foreign exchange rate fluctuations or recessions in our markets;
unpredictable difficulties or delays in the development of new product technology;
pricing changes to our supplies or products or those of our competitors, and other competitive pressures on pricing and sales;
our ability to receive component parts from our suppliers;
changes in the environmental regulations that affect our current and future products;
competition in our existing and future lines of business and the financial resources of competitors;
our failure to comply with regulations and any changes in regulations;
our failure to complete potential future acquisitions or to realize benefits from completed acquisitions;
our inability to implement our growth plan;
the loss of any of our senior management;
difficulties in obtaining or retaining the management and other human resource competencies that we need to achieve our business objectives;
labor relations; and
risks inherent in operating in foreign countries, including exposure to local economic conditions, government regulation, currency restrictions and other restraints, changes in tax laws, expropriation, political instability and diminished ability to legally enforce our contractual rights.

We undertake no obligation to release publicly any revisions to any forward-looking statements, to report events or to report the occurrence of unanticipated events unless we are required to do so by law.

Critical Accounting Policies and Estimates

Preparation of the financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the period. Management believes the most complex and sensitive judgments, because of their significance to the consolidated financial statements, result primarily from the need to make estimates about the effects of matters that are inherently uncertain. Management's Discussion and Analysis and Notes 2 and 13 to the Consolidated Financial Statements for the year ended December 31, 2011 in the Company's Annual Report on Form 10-K, describe the most significant accounting estimates and policies used in preparation of the Consolidated Financial Statements. Actual results in these areas could differ materially from management's estimates. There have been no significant changes in the Company's assumptions regarding critical accounting estimates during the first six months of 2012.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

There were no material changes to the disclosure on this matter for the year ended December 31, 2011 made in the Company's Annual Report on Form 10-K.

Table of Contents

Item 4. Controls and Procedures

The Company has established a Disclosure Controls Committee that assists the Chief Executive Officer and Chief Financial Officer in their evaluation of the Company's disclosure controls and procedures. Our Chief Executive Officer and Chief Financial Officer have concluded, based on their evaluation as of the end of the period covered by this report, that our disclosure controls and procedures, as defined in the Securities Exchange Act of 1934, as amended (the "Exchange Act"), Rule 13a-15(e), are effective to ensure that the information required to be disclosed in the reports that the Company files or submits under the Exchange Act (i) is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and (ii) is accumulated and communicated to the Company's management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

There have been no changes in the Company's internal control over financial reporting during the fiscal quarter to which this report relates that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

These are further described in "Note 9. Warranties, Guarantees, Commitments and Contingencies."

Item 1A. Risk Factors

There have been no new material risks identified that were not disclosed in the Company's risk factor disclosure in its Annual Report on Form 10-K for the fiscal year ended December 31, 2011.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The Company's Board of Directors has approved a program to purchase shares of the Company's common stock. A summary of the repurchase activity for the first six months of 2012 follows:

ISSUER PURCHASES OF EQUITY SECURITIES

Period	Total Number of Shares Purchased	Average price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Dollar Value of shares that May Yet Be Purchased Under the Plans or Programs (a)
Total through December 31, 2011	3,520,469	51.27	3,520,469	
January 1 - January 31	279,409	48.95	279,409	\$205,828,135
February 1 - February 29	273,085	59.84	273,085	\$189,485,456
March 1 - March 31	321,134	59.45	321,134	\$170,393,651
Total first quarter	873,628	56.22	873,628	
Total through March 31, 2012	4,394,097	52.25	4,394,097	
April 1 - April 30	292,900	\$58.28	292,900	\$153,323,494
May 1 - May 31	230,185	\$55.14	230,185	\$140,630,005
June 1 - June 30	440,042	\$50.48	440,042	\$118,415,837
Total second quarter	963,127	53.97	963,127	
Total through June 30, 2012	5,357,224	52.56	5,357,224	

(a) On May 26, 2011, the Board of Directors approved the purchase of shares in an amount not to exceed \$400 million, which expires on May 31, 2013. The unexpended balance of \$118.4 million under that authorization as of June 30, 2012 will continue to be used to repurchase shares in the future.

All share repurchases were effected in accordance with the safe harbor provisions of Rule 10b-18 of the Exchange Act.
