

NATIONAL HOLDINGS CORP
Form 10-K
December 27, 2012

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549
FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the Fiscal Year Ended
September 30, 2012
Commission File No: 001-12629

NATIONAL HOLDINGS CORPORATION
(Exact Name of Registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

36-4128138
(I.R.S. Employer
Identification No.)

120 Broadway, 27th Floor, New York, NY 10271
(Address, including zip code, of principal executive offices)
Registrant's telephone number, including area code: (212) 417-8000

Securities registered pursuant to Section 12(b) of the Act: None
Securities registered pursuant to Section 12(g) of the Act: Common Stock, \$.02 par value
(Title of class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
YESo NOx

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act.
YESo NOx

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YESo NOx

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yesx Noo

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (check one):
Large Accelerated Filero Accelerated Filero Non-Accelerated Filero Smaller Reporting Companyx

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements

incorporated by reference in Part III or any amendment to this Form 10-K. YESx NOo

Indicate by check mark whether the registrant is a shell company (as defined in Exchange Act Rule 12b-2).
YESo NOx

As of December 20, 2012, the aggregate market value of voting and non-voting common equity held by non-affiliates of the registrant, based on the closing sales price of \$0.13 per share for the registrant's common stock, as quoted on the Over-the-Counter Bulletin Board was approximately \$3,118,515 (calculated by excluding shares owned beneficially by directors, officers and 10% stockholders). As of December 20, 2012 there were 26,555,572 shares of the registrant's common stock outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Company's Proxy Statement filed with the Securities and Exchange Commission (the "SEC") in connection with the Company's Annual Meeting of Stockholders to be held on or about March 16, 2013 (the "Company's 2011 Proxy Statement") are incorporated by reference into Part III hereof.

PART I

FORWARD-LOOKING STATEMENTS

The information contained in this Annual Report on Form 10-K includes forward-looking statements as defined in the Private Securities Reform Act of 1995. These forward looking statements are often identified by words such as "may," "will," "expect," "intend," "anticipate," "believe," "estimate," "continue," "plan" and similar expressions. These statements involve estimates, assumptions and uncertainties that could cause actual results to differ materially from those expressed for the reasons described in this Annual Report on Form 10-K. You should not place undue reliance on these forward-looking statements.

You should be aware that our actual results could differ materially from those contained in the forward-looking statements due to a number of factors, including:

- general economic conditions;
- our ability to obtain future financing or funds when needed;
- Our ability to maintain sufficient regulatory net capital;
- the inability of our broker-dealer operations to operate profitably in the face of intense competition from larger full-service and discount brokers;
- a general decrease in financing and merger and acquisition activities and our potential inability to receive success fees as a result of transactions not being completed;
- increased competition from on line and business development portals;
- technological changes;
- our potential inability to implement our growth strategy through recruiting, acquisitions or joint ventures;
- acquisitions, business combinations, strategic partnerships, divestures, and other significant transactions may involve additional uncertainties; and
- our ability to maintain and execute a successful business strategy.

You should also consider carefully the statements under "Risk Factors" and other sections of this Annual Report on Form 10-K, which address additional factors that could cause our actual results to differ from those set forth in the forward-looking statements and could materially and adversely affect our business, operating results and financial condition. All subsequent written and oral forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by the applicable cautionary statements.

The forward-looking statements speak only as of the date on which they are made, and, except to the extent required by federal securities laws, we undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which the statement is made or to reflect the occurrence of unanticipated events. In addition, we cannot assess the impact of each factor on our business or the extent to which any factor, or combination of factors, or factors we are unaware of, may cause actual results to differ materially from those contained in any forward-looking statements.

Item 1. BUSINESS

General

National Holdings Corporation (“National” or the “Company”), a Delaware corporation organized in 1996, is a financial services organization, operating primarily through its wholly owned subsidiaries, National Securities Corporation (“National Securities” or “NSC”), vFinance Investments, Inc. (“vFinance Investments”) and EquityStation, Inc. (“EquityStation”) (collectively, the “Broker-Dealer Subsidiaries”). The Broker-Dealer Subsidiaries conduct a national securities brokerage business through their main offices in New York, New York, Boca Raton, Florida, and Seattle, Washington.

Through our Broker-Dealer Subsidiaries, we (1) offer full service retail brokerage to approximately 39,000 retail, high net worth and institutional clients, (2) provide investment banking, merger, acquisition and advisory services to micro, small and mid-cap high growth companies, and (3) engage in trading securities, including making markets in over 5,000 micro and small-cap, NASDAQ and other exchange listed stocks and (4) providing liquidity in the United States Treasury marketplace. Our Broker-Dealer Subsidiaries are introducing brokers and clear all transactions through clearing organizations on a fully disclosed basis. They are registered with the Securities and Exchange Commission (“SEC”), are members of the Financial Industry Regulatory Authority (“FINRA”) (formerly the National Association of Securities Dealers) and Securities Investor Protection Corporation (“SIPC”). National Securities and vFinance Investments are also members of the National Futures Association (“NFA”).

Our brokers operate primarily as independent contractors. An independent contractor registered representative who becomes an affiliate of a Broker-Dealer Subsidiary typically establishes his own office and is responsible for the payment of expenses associated with the operation of such office, including rent, utilities, furniture, computer and other equipment, stock quotation machines, software and general office supplies. The independent contractor registered representative is entitled to retain a higher percentage of the commissions generated by his sales than an employee registered representative at a traditional employee-based brokerage firm. This arrangement allows us to operate with a reduced amount of fixed costs and lowers the risk of operational losses for lower or non-production.

Our wholly owned subsidiary, National Asset Management, Inc., a Washington corporation (“NAM”), is a federally-registered investment adviser providing asset management advisory services to high net worth clients for a fee based upon a percentage of assets managed.

Our wholly owned subsidiary, National Insurance Corporation, a Washington corporation (“National Insurance”), provides fixed insurance products to its clients, including life insurance, disability insurance, long term care insurance and fixed annuities.

In April 2012, we relinquished our interest in an unconsolidated joint venture, Opus, resulting in a loss of disposition of such investment of \$1,051,000 which was recorded at June 30, 2012.

Recent Developments

In September 2012, EquityStation filed pursuant to NASD Rule 1017, a request to transfer its business assets, primarily its customer accounts and brokers, to its affiliate, vFinance Investments and to withdraw its membership from FINRA. On December 10, 2012, FINRA advised the Company that the request had been approved and the transfer of assets was made accordingly.

In September 2012, vFinance Investments filed pursuant to NASD Rule 1017, a request to transfer its retail business assets, primarily its customer accounts and brokers, to its affiliate, vFinance Investments. On December 13, 2012,

FINRA advised the Company that the request had been approved and the transfer of assets was made accordingly on December 14, 2012.

The effect of these changes is not expected to have a material impact on the revenue or profitability of the Company in future reporting.

Clearing Relationships

Our Broker-Dealer Subsidiaries have clearing arrangements with National Financial Services LLC (“NFS”), Legent Clearing LLC (“Legent”), ICBC (formerly known as Fortis Securities, LLC (“ICBC”), Rosenthal Collins Group, LLC (“Rosenthal”), and R.J. O’Brien (“RJO”).

Financial Information about Industry Segments

The Company realized approximately 83% of its total revenues in fiscal year 2012 from brokerage services, principal and agency transactions, and investment banking. During fiscal year 2012, brokerage services consisting of retail brokerage commissions represented 67% of total revenues, principal and agency transactions consisting of net dealer inventory gains represented 11% of total revenues, and investment banking, consisting of corporate finance commissions and fees, represented 5% of total revenues. For a more detailed analysis of our results by segment, see Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

Brokerage Services

Our Broker-Dealer Subsidiaries are each registered as a broker-dealer with the SEC and are licensed in all 50 states, the District of Columbia and Puerto Rico. The Broker-Dealer Subsidiaries are also members of the FINRA, the Municipal Securities Rulemaking Board ("MSRB") and the SIPC, and National Securities and vFinance Investments are also members of the NFA. Brokerage services to retail clients are provided through our sales force of investment executives at the Broker-Dealer Subsidiaries.

Our goal is to meet the needs of our investment executives and their clients. To foster individual service, flexibility and efficiency and to reduce fixed costs, our investment executives primarily act as independent contractors responsible for providing their own office facilities, sales assistants, telephone, Internet, computer and other equipment, software, quote service, supplies and other items of overhead. Investment executives are given broad discretion to structure their own practices and to specialize in different areas of the securities market subject to supervisory procedures and applicable rules and regulations. In addition, investment executives have direct access to research materials, management, traders, and all levels of support personnel.

The brokerage services provided by our investment executives include execution of purchases and sales of stocks, bonds, mutual funds, annuities and various other securities for individual and institutional customers. In fiscal year 2012, stocks and options represented approximately 69% of our business, bonds represented approximately 12% of our business, and mutual funds and annuities and insurance made up approximately 19% of our business. The percentage of each type of business varies over time as the investment preferences of our customers change based on market conditions.

Typically, our Broker-Dealer Subsidiaries do not recommend particular securities to customers. Rather, recommendations to customers are determined by individual investment executives based upon their own research and analysis, subject to applicable FINRA customer suitability standards. Most investment executives perform fundamental (as opposed to technical) analysis. Solicitations may be by telephone, email, seminars or newsletters.

We generally act as an agent in executing customer orders to buy or sell listed and over-the-counter securities in which we do not make a market, and charge commissions based on the services we provide to our customers. In executing customer orders to buy or sell a security in which we make a market, we may sell to, or purchase from, customers at a price that is substantially equal to the current inter-dealer market price plus or minus a mark-up or mark-down. We may also act as agent and execute a customer's purchase or sale order with another broker-dealer market-maker at the best inter-dealer market price available and charge a commission. We believe our mark-ups, mark-downs and commissions are competitive based on the services we provide to our customers. In each instance the commission charges, mark-ups or mark-downs, are to be in compliance with guidelines established by FINRA. In order to increase revenues generated from these activities, we continuously seek to hire additional registered representatives and work with our current registered representatives to increase their productivity.

Our registered representatives are primarily independent contractors, not salaried employees. As such, payments to these persons are based on commissions generated and represent a variable cost rather than a fixed cost of operating our business. Commission expense represents a significant majority of our total expenses. We work to control our fixed costs in order to achieve profitability based upon our expectation of market conditions and the related level of revenues. Additionally, we require most of our registered representatives to absorb their own overhead and expenses, thereby reducing our share of the fixed costs.

Investment executives in the brokerage industry are traditionally compensated on the basis of set percentages of total commissions and mark-ups generated. Most brokerage firms bear substantially all of the costs of maintaining their sales forces, including providing office space, sales assistants, telephone and Internet service, computers and other

equipment and supplies. The average commission paid to investment executives in the brokerage industry generally ranges from 30% to 50% of total commissions generated.

Since we require most of our investment executives to absorb their own overhead and expenses, we pay a higher percentage of the net commissions and mark-ups generated by our investment executives, as compared to traditional investment executives in the brokerage industry. This arrangement also reduces fixed costs and lowers the risk of operational losses for lower or non-production. Our operations include execution of orders, processing of transactions, internal financial controls, supervision and compliance with regulatory and legal requirements.

As of September 30, 2012, we had a total of 948 associates of which 154 were employees and 794 were independent contractors. Of these approximately 635 were registered representatives. Persons who have entered into independent contractor agreements are not considered employees for purposes of determining our obligations for federal and state withholding, unemployment and social security taxes. Our independent contractor arrangements conform to accepted industry practice, and therefore, we do not believe there is a material risk of an adverse determination from the tax authorities that would have a significant effect on our ability to recruit and retain investment executives or on our current operations and financial results of operations. There is no assurance that the tax status of our independent contractors will not change as a result of regulatory or legislative actions. No employees are covered by collective bargaining agreements and we believe our relations are good with both our employees and independent contractors.

Our business plan includes the growth of our retail and institutional brokerage business, while recognizing the volatility of the financial markets. In response to historical market fluctuations, we have periodically adjusted certain business activities, including proprietary trading and market-making trading. We believe that consolidation within the industry may occur and we may consider strategic acquisitions in the future, but we are focused on generating positive cash flow and achieving profitability of our existing operations.

Periodic reviews of controls are conducted and supervision, administrative and operations personnel meet frequently with management to review operating conditions. Compliance, supervision and operations personnel monitor compliance with applicable laws, rules and regulations.

Principal and Agency Transactions

We buy and maintain inventories in equity securities as a "market-maker" for sale of those securities to other dealers and to our customers. We may also maintain inventories in corporate, government and municipal debt securities for sale to customers. The level of our market-making trading activities will increase or decrease depending on the relative strength or weakness of the broader markets. As of September 30, 2012, we made markets in over 5,000 micro and small-cap, NASDAQ and other exchange-listed stocks.

We anticipate that we will continue market-making trading activity in the future, which may include companies for which we managed or co-managed a public offering.

Our trading departments require a commitment of capital. Most principal transactions place our capital at risk. Profits and losses are dependent upon the skill of the traders, price movements, trading activity and the size of inventories. Since our trading activities occasionally may involve speculative and thinly capitalized stocks, including stabilizing the market for securities which we have underwritten, we impose position limits to reduce our potential for loss.

In executing customer orders to buy or sell a security in which we make a market, we may sell to, or purchase from, customers at a price that is substantially equal to the current inter-dealer market price plus or minus a mark-up or mark-down. We may also act as agent and execute a customer's purchase or sale order with another broker-dealer market-maker at the best inter-dealer market price available and charge a commission. We believe our mark-ups, mark-downs and commissions are competitive based on various factors including the services we provide to our customers.

In executing customer orders to buy or sell listed and over-the-counter securities in which we do not make a market, we generally act as an agent and charge commissions that we believe are competitive, based on the services we provide to our customers.

Investment Banking

We provide corporate finance and investment banking services, including underwriting the sale of securities to the public and arranging for the private placement of securities with investors. Our corporate finance operations provide a broad range of financial and corporate advisory services, including mergers and acquisitions, project financing, capital structure and specific financing opportunities. We also act as an underwriter of equity securities in both initial and secondary public offerings. Corporate finance revenues are generated from capital raising transactions of equity and debt securities and fees for strategic advisory services, and will vary depending on the number of private and public offerings completed by us during a particular fiscal year.

Institutional Services

A critical element of our business strategy is to identify institutional quality investments that offer above market returns. We support that mission by providing institutional investment managers, primarily hedge fund managers, a complete array of services designed to enhance portfolio performance. Hedge funds represent the fastest growing segment of the money management market and by definition are focused on achieving positive returns for their investors while controlling risk. We offer fund managers access to advanced direct market access trading platforms, investment opportunities and independent research products. Additionally, we offer fund managers the ability to reduce their transaction costs by offering them access to our trading desk for illiquid securities and automated trading systems for their liquid transactions as well as special execution services using volume weighted averages and average pricing for micro and small-cap stocks. We believe we have a mutually beneficial relationship with our Investment Banking Division ("IBD") as fund managers looking for investment opportunities fund IBD's corporate clients and our relationships with fund managers may create opportunities to increase the number and quality of IBD clients.

As of September 30, 2012, we employed or had contractual relationships with approximately 10 individuals providing institutional services, approximately six of whom provide hedge fund related services. We service approximately 200 institutional customers, of which approximately 85 are hedge funds. For the fiscal year ended September 30, 2012, hedge fund related services accounted for approximately \$5 million in revenue.

Internet Strategy

Our www.vfinance.com website is available to an audience of entrepreneurs, corporate executives and private and institutional investors in approximately 100 countries. The website provides sales leads to our brokerage and institutional services divisions, giving visitors convenient access to a variety of financial services, proprietary business development tools, searchable databases and daily news. The website features our database of venture capital firms and angel investors accessible with vSearch, a proprietary web-based data mining tool that allows entrepreneurs to search potential funding sources by different criteria, including geography, amount of funds required, industry, stage of corporate development or keyword. Much of the information on the website is provided free of charge, however, we charge nominal fees for the use of proprietary search engines and premium services such as our business planning services.

Administration, Operations, Securities Transactions Processing and Customer Accounts

Our Broker-Dealer Subsidiaries do not hold any funds or securities for customers. Instead, they use the services of clearing agents on a fully-disclosed basis. These clearing agents process all securities transactions and maintain customer accounts. Customer accounts are protected through the SIPC for up to \$500,000, of which coverage for cash balances is limited to \$250,000. In addition to SIPC protection, our clearing agent provides brokerage accounts additional "excess of SIPC" coverage from Lloyd's of London, together with other insurers. The "excess of SIPC" coverage would only be used when SIPC coverage is exhausted. Like SIPC protection, "excess of SIPC" protection does not cover investment losses in customer accounts due to market fluctuation. It also does not cover other claims for losses incurred while broker-dealers remain in business. Total aggregate "excess of SIPC" coverage available through our clearing agent "excess of SIPC" policy is \$1 billion. Within the "excess of SIPC" coverage, there is no per account dollar limit on coverage of securities, but there is a per account limit of \$1.9 million on coverage of cash. This is the maximum "excess of SIPC" protection currently available in the brokerage industry.

Competition

The Company is engaged in a highly competitive business. With respect to one or more aspects of our business, our competitors include member organizations of the New York Stock Exchange and other registered securities exchanges in the United States and Canada, the U.K., Europe and members of FINRA. Many of these organizations have substantially greater personnel and financial resources and more sales offices than the Company. Discount brokerage firms affiliated with commercial banks provide additional competition, as well as companies that provide electronic on-line trading. In many instances, the Company is also competing directly for customer funds with investment opportunities offered by real estate, insurance, banking, and savings and loans industries.

The securities industry has become considerably more concentrated and more competitive since we were founded, as numerous securities firms have either ceased operations or have been acquired by or merged into other firms. In addition, companies not engaged primarily in the securities business, but with substantial financial resources, have acquired leading securities firms. These developments have increased competition from firms with greater capital resources than ours.

Since the adoption of the Gramm-Leach-Bliley Act of 1999, commercial banks and thrift institutions have been able to engage in traditional brokerage and investment banking services, thus increasing competition in the securities industry and potentially increasing the rate of consolidation in the securities industry.

We also compete with other securities firms for successful sales representatives, securities traders and investment bankers. Competition for qualified employees in the financial services industry is intense. Our continued ability to compete effectively depends on our ability to attract new employees and to retain and motivate our existing

employees. For a further discussion of risks facing the Company, please see “Risk Factors”.

Government Regulation and Supervision

The securities industry, our Broker-Dealer Subsidiaries, and our investment adviser businesses are subject to extensive regulation by the SEC, FINRA, NFA and state securities regulators and other governmental regulatory authorities. The principal purpose of these regulations is the protection of customers and the securities markets. The SEC is the federal agency charged with the administration of the federal securities laws. Much of the regulation of broker-dealers, however, has been delegated to self-regulatory organizations, such as the FINRA, that adopt rules, subject to approval by the SEC, which govern their members and conduct periodic examinations of member firms' operations. Securities firms are also subject to regulation by state securities commissions in the states in which they are registered. All of our Broker-Dealer Subsidiaries are registered broker-dealers with the SEC and members of FINRA. They are licensed to conduct activities as a broker-dealer in all 50 states, the District of Columbia and Puerto Rico.

In addition, as registered broker-dealers and members of FINRA, our Broker-Dealer Subsidiaries are subject to the SEC's Uniform Net Capital Rule 15c3-1 (the “Rule”), which is designed to measure the general financial integrity and liquidity of a broker-dealer and requires the maintenance of minimum net capital. Net capital is defined as the net worth of a broker-dealer subject to certain adjustments. In computing net capital, various adjustments are made to net worth that exclude assets not readily convertible into cash. Additionally, the regulations require that certain assets, such as a broker-dealer's position in securities, be valued in a conservative manner so as to avoid overstating of the broker-dealer's net capital.

National Securities has elected to use the alternative standard method permitted by the Rule. This requires that National Securities maintain minimum net capital equal to the greater of \$250,000 or a specified amount per security based on the bid price of each security for which National Securities is a market maker. The alternative method precludes National Securities from having to calculate a ratio of aggregate indebtedness to net capital. At September 30, 2012, National Securities had net capital of approximately \$1,394,000 which was approximately \$1,144,000 in excess of its required net capital of \$250,000.

Due to its market maker status, vFinance Investments is required to maintain a minimum net capital of \$1,000,000 and EquityStation is required to maintain \$50,000. In addition to the net capital requirements, each of vFinance Investments and EquityStation is required to maintain a ratio of aggregate indebtedness to net capital, as defined, of not more than 15 to 1 (and the rule of the “applicable” exchange also provides that equity capital may not be withdrawn or cash dividends paid if the resulting net capital ratio would exceed 10 to 1). At September 30, 2012, vFinance Investments had net capital of approximately \$1,639,000, which was approximately \$639,000 in excess of its required net capital of \$1,000,000, and its percentage of aggregate indebtedness to net capital was 132.2%. At September 30, 2012, EquityStation had net capital of approximately \$145,000, which was approximately \$95,000 in excess of its required net capital of \$50,000, and its percentage of aggregate indebtedness to net capital was 87.5%. Each of the Broker-Dealer Subsidiaries qualifies under the exemptive provisions of Rule 15c3-3 which relates to the custody of securities for the account of customers pursuant to Section (k)(2)(ii) of the Rule as none of them carry security accounts of customers or perform custodial functions related to customer securities.

The Securities Exchange Act of 1934, as amended (the “Exchange Act”), and the FINRA Conduct Rules require our Broker-Dealer Subsidiaries to supervise the activities of its investment executives. As part of providing such supervision, these subsidiaries maintain written supervisory procedures. Compliance personnel and outside auditors conduct inspections of branch offices periodically to review compliance with the Company's procedures. A registered principal provides onsite supervision at each of the Broker-Dealer Subsidiaries' larger offices. The other offices (averaging two investment executives per office) are not required by FINRA rules to have a registered principal on site and are therefore supervised by registered principals off site. Designated principals review customer trades to ensure compliance with FINRA Conduct Rules including mark-up guidelines.

The Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the “Dodd-Frank Act”) establishes new and enhanced compensation and corporate governance oversight for the financial services industry, provides a specific framework for payment, clearing and settlement regulation, and empowers the SEC to adopt regulations requiring new fiduciary duties and other more stringent regulation of broker-dealers, investment companies and investment advisers. Our existing policies and procedures already provided for much of the Dodd-Frank Act new requirements.

Application of Laws and Rules to Internet Business and Other Online Services

Due to the increasing popularity and use of the Internet and other online services, various regulatory authorities are considering laws and/or regulations with respect to the Internet or other online services covering issues such as user privacy, pricing, content copyrights and quality of services. In addition, the growth and development of the market for online commerce may prompt more stringent consumer protection laws that may impose additional burdens on those companies conducting business online. When the Securities Act of 1933, as amended (the “Securities Act”) which governs the offer and sale of securities, and the Exchange Act, which governs, among other things, the operation of the securities markets and broker-dealers, were enacted, such Acts did not contemplate the conduct of a securities business through the Internet and other online services. The recent increase in the number of complaints by online traders could lead to more stringent regulations of online trading firms and their practices by the SEC, FINRA and other regulatory agencies.

Although the SEC, in releases and no-action letters, has provided guidance on various issues related to the offer and sale of securities and the conduct of a securities business through the Internet, the application of the laws to the conduct of a securities business through the Internet continues to evolve. Furthermore, the applicability to the Internet and other online services of existing laws in various jurisdictions governing issues such as property ownership, sales and other taxes and personal privacy is uncertain and may take years to resolve. Uncertainty regarding these issues may adversely affect the viability and profitability of our business.

As our services, through our subsidiaries, are available over the Internet in multiple jurisdictions, and as we, through our subsidiaries, have numerous clients residing in these jurisdictions, these jurisdictions may claim that our subsidiaries are required to qualify to do business as a foreign corporation in each such jurisdiction. While our Broker-Dealer Subsidiaries are currently registered as broker-dealers in the jurisdictions described in this Annual Report on Form 10-K, all of our subsidiaries are qualified to do business as corporations in only a few jurisdictions. Failure to qualify as an out-of-state or foreign corporation in a jurisdiction where we are required to do so could subject us to taxes and penalties for the failure to qualify.

Intellectual Property

We own the following federally registered marks: vFinance, Inc.(R), vFinance.com, Inc.(R), AngelSearch(R), Direct2Desk(R) and EquityStation (R).

Employees

As of September 30, 2012, The Company employed the following personnel:

Position	Salaried Employees	Independent Contractors	Total
Officers	8	0	8
Administration	81	224	305
Brokers	25	562	587
Traders	34	1	35
Investment Bankers	6	1	7
Advisors	0	6	6
Totals	154	794	948

None of our personnel are covered by a collective bargaining agreement. We consider our relationships with our employees to be good. Any future increase in the number of employees will depend upon the growth of our business. Our registered representatives are required to take examinations administered by FINRA and state authorities in order to qualify to transact business and are required to enter into agreements with us obligating them, among other things, to adhere to industry rules and regulations, our subsidiaries' supervisory procedures and not to solicit other employees or brokers in the event of termination.

Seasonality and Backlog

Our business is not subject to significant seasonal fluctuations, and there are no material backlogs in our business.

Research and Development and Environmental Matters

We did not incur any research and development expenses during the last two fiscal years. We do not incur any significant costs or experience any significant effects as a result of compliance with federal, state and local environmental laws.

Reports to Security Holders

We maintain a website with the address www.nhldcorp.com. We make available free of charge through our Internet website our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K, and any amendments to these reports, as soon as reasonably practicable after we electronically file such material with, or furnish such material to, the SEC. We are not including the information on our website as a part of, nor incorporating it by reference into, this report. You may read and copy any materials we file at the SEC's Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549 on official business days during the hours of 10:00 a.m. to 3:00 p.m. Please call the SEC at 1-800-SEC-0330 for information on the Public Reference Room. Additionally, the SEC maintains a website that contains annual, quarterly, and current reports, proxy statements, and other information that issuers (including us) file electronically with the SEC. The SEC's website address is <http://www.sec.gov>.

Item 1A. RISK FACTORS

The financial statements contained in this report and the related discussions describe and analyze the Company's financial performance and condition for the periods indicated. For the most part, this information is historical. The Company's prior results, however, are not necessarily indicative of the Company's future performance or financial condition. The Company, therefore, has included the following discussion of certain factors that could affect the Company's future performance or financial condition. These factors could cause the Company's future performance or financial condition to differ materially from its prior performance or financial condition or from management's expectations or estimates of the Company's future performance or financial condition. These factors, among others, should be considered in assessing the Company's future prospects and prior to making an investment decision with respect to the Company's stock. The risks described below are not the only ones facing us. Additional risks not presently known to us or that we currently believe are immaterial may also impair our business operations.

Risks Related to Our Business

There is substantial doubt about our ability to continue as a going concern.

Our independent public accounting firm has issued an opinion on our consolidated financial statements that states that the consolidated financial statements were prepared assuming we will continue as a going concern and further states that our recurring losses from operations, stockholders' deficit and inability to generate sufficient cash flow to meet our obligations and sustain our operations raise substantial doubt about our ability to continue as a going concern. Our future is dependent on our ability to sustain profitability and obtain additional financing. If we fail to do so for any reason, we would not be able to continue as a going concern and could potentially be forced to seek relief through a filing under the U.S. Bankruptcy Code.

Our operating results have resulted in reporting losses.

We reported losses of approximately \$1.9 million and \$4.7 million in fiscal years 2012 and 2011, respectively. There is no assurance that we will be profitable in the future. If we are unable to achieve or sustain profitability, we may need to curtail, suspend or terminate certain operations.

We may require additional financing.

In order for us to have the opportunity for future success and profitability, we periodically may need to obtain additional financing, either through borrowings, public offerings, private offerings, or some type of business combination (e.g., merger, buyout, etc.). We have actively pursued a variety of funding sources, and have consummated certain transactions in order to address our subsidiaries' capital requirements. We may need to seek to raise additional capital through other available sources, including borrowing additional funds from third parties and there can be no assurance that we will be successful in such pursuits. Additionally, the issuance of new securities to raise capital will cause the dilution of shares held by current stockholders. Accordingly, if we are unable to generate adequate cash from its operations, and if we are unable to find sources of funding, such an event would have an adverse impact on our liquidity and operations.

If we are unable to pay our outstanding debt obligations when due, our operations may be materially adversely affected.

At September 30, 2012, National Holdings Corporation had total indebtedness of \$7.8 million. We cannot assure you that our operations will generate funds sufficient to repay our existing debt obligations as they come due. Our failure to repay our indebtedness and make interest payments as required by our debt obligations could have a material

adverse effect on our operations. The Company has issued convertible promissory notes aggregating \$5,000,000 during March, April and September 2012 and a subordinated note of \$1.0 million during September 2012, which may mature as early as August 2013, or, if certain conditions are met, in March 2015. We used a portion of the proceeds from the convertible promissory notes and subordinated notes to satisfy the principal of \$4.2 million convertible promissory notes which matured in March and June 2012. The Company also has a remaining obligation of \$1.8 million convertible promissory note which now matures in January 2013. Such notes are unsecured, are solely the obligation of National Holdings Corporation and not any of our operating subsidiaries, including our Broker-Dealer Subsidiaries. Such notes are payable to entities affiliated to two of the Company's directors. Our plan is to satisfy our remaining obligations under the \$1.8 million convertible note and the \$1.0 million subordinated note by: 1) providing incentives to the holders to either extend the maturity of the notes or convert the notes into our shares of common stock, 2) securing additional financing between now and the maturity dates to repay the notes, 3) repaying the notes in cash and other available current assets at maturity, or 4) a combination of the aforementioned options. Additionally, we intend to satisfy our obligations under the \$5,000,000 convertible promissory notes by either: 1) securing the acceptance of the holder of its capital restructuring, which would allow the Company to firmly extend the maturity of the note to March 2015, or 2) encouraging the holder to convert its note to the Company's Series E Preferred Stock in due course. While the Company believes that it will ultimately satisfy its obligations under such convertible notes, it cannot guarantee that it will be able to do so at favorable terms, or at all. Should the Company default on the convertible notes and the lender forecloses on the debt, the operations of our subsidiaries will not be initially impacted. However, following default, the lender could potentially liquidate the holdings of our operating subsidiaries sometime in the future in accordance with applicable SEC and FINRA rules and regulations.

We are exposed to risks due to investment banking activities.

Participation in an underwriting syndicate or a selling group involves both economic and regulatory risks. An underwriter may incur losses if it is unable to resell the securities it is committed to purchase, or if it is forced to liquidate its commitment at less than the purchase price. In addition, under federal securities laws, other laws and court decisions with respect to underwriters' liabilities and limitations on the indemnification of underwriters by issuers, an underwriter is subject to substantial potential liability for misstatements or omissions of material facts in prospectuses and other communications with respect to such offerings. Acting as a managing underwriter increases these risks. Underwriting commitments constitute a charge against net capital and our ability to make underwriting commitments may be limited by the requirement that it must at all times be in compliance with the Rule.

Our risk management policies and procedures may leave us exposed to unidentified risks or an unanticipated level of risk.

The policies and procedures we employ to identify, monitor and manage risks may not be fully effective. Some methods of risk management are based on the use of observed historical market behavior. As a result, these methods may not accurately predict future risk exposures, which could be significantly greater than the historical measures indicate. Other risk management methods depend on evaluation of information regarding markets, clients or other matters that are publicly available or otherwise accessible by us. This information may not be accurate, complete, up-to-date or properly evaluated. Management of operational, legal and regulatory risks requires, among other things, policies and procedures to properly record and verify a large number of transactions and events. We cannot assure that our policies and procedures will effectively and accurately record and verify this information. We seek to monitor and control our risk exposure through a variety of separate but complementary financial, credit, operational and legal reporting systems. We believe that we are able to evaluate and manage the market, credit and other risks to which it is exposed. Nonetheless, our ability to manage risk exposure can never be completely or accurately predicted or fully assured. For example, unexpectedly large or rapid movements or disruptions in one or more markets or other unforeseen developments could have a material adverse effect on our results of operations and financial condition. The consequences of these developments can include losses due to adverse changes in inventory values, decreases in the liquidity of trading positions, higher volatility in earnings, increases in our credit risk to customers as well as to third parties and increases in general systemic risk.

We depend on senior employees and the loss of their services could harm our business.

We depend on the continued services of our management team, particularly Mr. Goldwasser, Mr. Fagenson and Mr. Klein, as well as our ability to hire additional members of management, and to retain and motivate other officers and key employees. We may not be able to find an appropriate replacement for any or all of the aforementioned or any other executive officer if the need should arise. We are currently required to maintain a \$6,000,000 life insurance policy on Mr. Goldwasser pursuant to the 2008 financings transactions with St. Cloud Capital Partners II, L.P. ("St. Cloud"). Due to the regulated nature of some of our businesses, some of our executive officers, or other key personnel could become subject to suspensions or other limitations on the scope of their services to the Company from time to time. If we lose the services of any executive officers or other key personnel, we may not be able to manage and grow our operations effectively, enter new brokerage markets or develop new products.

Our Broker-Dealer Subsidiaries are subject to various risks associated with the securities industry.

As securities broker-dealers, our Broker-Dealer Subsidiaries are subject to uncertainties that are common in the securities industry. These uncertainties include:

- o the volatility of domestic and international financial, bond and stock markets;

- o extensive governmental regulation;
- o litigation;
- o intense competition;
- o substantial fluctuations in the volume and price level of securities; and
- o dependence on the solvency of various third parties.

As a result, revenues and earnings may vary significantly from quarter to quarter and from year to year. In periods of low volume, profitability is impaired because certain expenses remain relatively fixed. In the event of a market downturn, our business could be adversely affected in many ways. Our revenues are likely to decline in such circumstances and, if the Company is unable to reduce expenses at the same pace, our profit margins will erode.

Failure to comply with the net capital requirements could subject us to sanctions imposed by the SEC or FINRA.

Our Broker-Dealer Subsidiaries are subject to the SEC's net capital rule, which requires the maintenance of minimum net capital. National Securities, vFinance Investments, and EquityStation are each required to maintain \$250,000, \$1,000,000 and \$50,000 in minimum net capital, respectively. Due to its market maker status, vFinance Investments is required to maintain a specified amount of capital for each security that it makes a market in, based on the bid price of each stock. This required amount can exceed the minimum net capital requirement, and in the case of vFinance Investments, the minimum net capital requirement has been \$1,000,000 (the limit) in recent years. The net capital rule is designed to measure the general financial integrity and liquidity of a broker-dealer. Compliance with the net capital rule limits those operations of broker-dealers that require the intensive use of their capital, such as underwriting commitments and principal trading activities. The rule also limits the ability of securities firms to pay dividends or make payments on certain indebtedness, such as subordinated debt, as it matures. FINRA may enter the offices of a broker-dealer at any time, without notice, and calculate the firm's net capital. If the calculation reveals a deficiency in net capital, FINRA may immediately restrict or suspend certain or all of the activities of a broker-dealer. Our Broker-Dealer Subsidiaries may not be able to maintain adequate net capital, or their net capital may fall below requirements established by the SEC, and subject us to disciplinary action in the form of fines, censure, suspension, expulsion or the termination of business altogether. In addition, if these net capital rules are changed or expanded, or if there is an unusually large charge against net capital, operations that require the intensive use of capital would be limited. A large operating loss or charge against net capital could adversely affect our ability to expand or even maintain present levels of business, which could have a material adverse effect on our business. In addition, our Broker-Dealer Subsidiaries may become subject to net capital requirements in other foreign jurisdictions in which we currently operate or which we may enter. We cannot predict our future capital needs or our ability to obtain additional financing.

Our business could be adversely affected by a breakdown in the financial markets.

As a securities broker-dealer, the business of each of our Broker-Dealer Subsidiaries is materially affected by conditions in the financial markets and economic conditions generally, both in the United States and elsewhere around the world. Many factors or events could lead to a breakdown in the financial markets including war, terrorism, natural catastrophes and other types of disasters. These types of events could cause people to begin to lose confidence in the financial markets and their ability to function effectively. If the financial markets are unable to effectively prepare for these types of events and ease public concern over their ability to function, our revenues are likely to decline and our operations are likely to be adversely affected.

Our revenues may decline in adverse market or economic conditions.

Unfavorable financial or economic conditions may reduce the number and size of the transactions in which we provide underwriting services, merger and acquisition consulting and other services. Our investment banking revenues, in the form of financial advisory, placement agent and underwriting fees, are directly related to the number and size of the transactions in which we participate and would therefore be adversely affected by a sustained market downturn. Additionally, a downturn in market conditions could lead to a decline in the volume of transactions that we execute for our customers and, therefore, to a decline in the revenues we receive from commissions and spreads. We must review customer relationships for impairment whenever events or circumstances indicate that impairment may be present, which may result in a material, non-cash write down of customer relationships. A significant decrease in revenues or cash flows derived from acquired customer relationships could result in a material, non-cash write-down of customer relationships. Such impairment would have a material adverse impact on our results of operations and stockholders' equity.

Market fluctuations and volatility may reduce our revenues and profitability.

Financial markets are susceptible to severe events evidenced by rapid depreciation in asset values accompanied by a reduction in asset liquidity, such as the asset price deterioration in the subprime residential mortgage market.

Our revenue and profitability may be adversely affected by declines in the volume of securities transactions and in market liquidity. Additionally, our profitability may be adversely affected by losses from the trading or underwriting of securities or failure of third parties to meet commitments. We act as a market maker in publicly traded common stocks. In market making transactions, we undertake the risk of price changes or being unable to resell the common stock it holds or being unable to purchase the common stock it has sold. These risks are heightened by the illiquidity of many of the common stocks we trade and/or make a market. Any losses from our trading activities, including as a result of unauthorized trading by our employees, could have a material adverse effect on our business, financial condition, results of operations or cash flows.

Lower securities price levels may also result in a reduced volume of transactions, as well as losses from declines in the market value of common stocks held for trading purposes. During periods of declining volume and revenue, our profitability would be adversely affected. Declines in market values of common stocks and the failure of issuers and third parties to perform their obligations can result in illiquid markets.

We generally maintain trading and investment positions in the equity markets. To the extent that we own assets, i.e., have long positions, a downturn in those markets could result in losses from a decline in the value of such long positions. Conversely, to the extent that we have sold assets that we do not own, i.e., have short positions in any of those markets, an upturn could expose it to potentially unlimited losses as we attempt to cover our short positions by acquiring assets in a rising market.

We may, from time to time, have a trading strategy consisting of holding a long position in one asset and a short position in another from which we expect to earn revenues based on changes in the relative value of the two assets. If, however, the relative value of the two assets changes in a direction or manner that we did not anticipate or against which we have not hedged, we might realize a loss in those paired positions. In addition, we maintain trading positions that can be adversely affected by the level of volatility in the financial markets, i.e., the degree to which trading prices fluctuate over a particular period, in a particular market, regardless of market levels.

We are a holding company and depend on payments from our subsidiaries.

We depend on dividends, distributions and other payments from our subsidiaries to fund our obligations. Regulatory and other legal restrictions may limit our ability to transfer funds freely, either to or from our subsidiaries. In particular, our Broker-Dealer Subsidiaries are subject to laws and regulations that authorize regulatory bodies to block or reduce the flow of funds to the parent holding company, or that prohibit such transfers altogether in certain circumstances. These laws and regulations may hinder our ability to access funds that we may need to make payments on our obligations. In addition, because our interests in the firm's subsidiaries consist of equity interests, our rights may be subordinated to the claims of the creditors of these subsidiaries.

Competition with other financial firms may have a negative effect on our business.

We compete directly with national and regional full-service broker-dealers and a broad range of other financial service firms, including banks and insurance companies. Competition has increased as smaller securities firms have either ceased doing business or have been acquired by or merged into other firms. Mergers and acquisitions have increased competition from these firms, many of which have significantly greater financial, technical, marketing and other resources than the Company. Many of these firms offer their customers more products and research than currently offered by us. These competitors may be able to respond more quickly to new or changing opportunities, technologies and client requirements. We also face competition from companies offering discount and/or electronic brokerage services, including brokerage services provided over the Internet, which we are currently not offering and do not intend to offer in the foreseeable future. These competitors may have lower costs or provide more services, and may offer their customers more favorable commissions, fees or other terms than those offered by the Company. To the extent that issuers and purchasers of securities transact business without our assistance, our operating results could be adversely affected.

If we do not continue to develop and enhance our services in a timely manner, our business may be harmed.

Our future success will depend on our ability to develop and enhance our services and add new services. We operate in a very competitive industry in which the ability to develop and deliver advanced services through the Internet and other channels is a key competitive factor. There are significant risks in the development of new or enhanced services, including the risks that we will be unable to:

- o effectively use new technologies;
- o adapt our services to emerging industry or regulatory standards; or
- o market new or enhanced services.

If we are unable to develop and introduce new or enhanced services quickly enough to respond to market or customer requirements or to comply with emerging industry standards, or if these services do not achieve market acceptance, our business could be seriously harmed.

We are currently subject to extensive securities regulation and the failure to comply with these regulations could subject us to penalties or sanctions.

The securities industry and our business are subject to extensive regulation by the SEC, state securities regulators and other governmental regulatory authorities. We are also regulated by industry self-regulatory organizations, including FINRA, the MSRB and the NFA. Our Broker-Dealer Subsidiaries are registered broker-dealers with the SEC and member firms of FINRA. Broker-dealers are subject to regulations which cover all aspects of the securities business, including sales methods and supervision, trading practices among broker-dealers, use and safekeeping of customers' funds and securities, capital structure of securities firms, record keeping, and the conduct of directors, officers and employees. Changes in laws or regulations or in governmental policies could cause us to change the way we conduct our business, which could adversely affect the Company.

Compliance with many of the regulations applicable to the Company's subsidiaries involves a number of risks, particularly in areas where applicable regulations may be subject to varying interpretation. These regulations often serve to limit our activities, including through net capital, customer protection and market conduct requirements. If we are found to have violated an applicable regulation, administrative or judicial proceedings may be initiated against us that may result in a censure, fine, civil penalties, issuance of cease-and-desist orders, the deregistration or suspension of our regulated activities, the suspension or disqualification of our officers or employees, or other adverse consequences. The imposition of any of these or other penalties could have a material adverse effect on our operating results and financial condition.

We rely on clearing brokers and unilateral termination of the agreements with these clearing brokers could disrupt our business.

Our Broker-Dealer Subsidiaries are introducing brokerage firms, using third party clearing brokers to process our securities transactions and maintain customer accounts. The clearing brokers also provide billing services, extend credit and provide for control and receipt, custody and delivery of securities. We depend on the operational capacity and ability of the clearing brokers for the orderly processing of transactions. In addition, by engaging the processing services of a clearing firm, we are exempt from some capital reserve requirements and other regulatory requirements imposed by federal and state securities laws. If the clearing agreements are unilaterally terminated for any reason, we would be forced to find alternative clearing firms without adequate time to negotiate the terms of a new clearing agreement and without adequate time to plan for such change. There can be no assurance that if there were a unilateral termination of a clearing agreement that we would be able to find an alternative clearing firm on acceptable terms to it or at all.

We permit our clients to purchase securities on a margin basis or sell securities short, which means that the clearing firm extends credit to the client secured by cash and securities in the client's account. During periods of volatile markets, the value of the collateral held by the clearing brokers could fall below the amount borrowed by the client. If margin requirements are not sufficient to cover losses, the clearing brokers sell or buy securities at prevailing market prices, and may incur losses to satisfy client obligations. We have agreed to indemnify the clearing brokers for losses they incur while extending credit to our clients.

Credit risk exposes us to losses caused by financial or other problems experienced by third parties.

We are exposed to the risk that third parties that owe us money, securities or other assets will not perform their obligations. These parties include trading counterparts, customers, clearing agents, exchanges, clearing houses, and other financial intermediaries as well as issuers whose securities we hold. These parties may default on their obligations owed to us due to bankruptcy, lack of liquidity, operational failure or other reasons. This risk may arise, for example, from holding securities of third parties, executing securities trades that fail to settle at the required time due to non-delivery by the counterparty or systems failure by clearing agents, exchanges, clearing houses or other financial intermediaries, and extending credit to clients through bridge or margin loans or other arrangements. Significant failures by third parties to perform their obligations owed to us could adversely affect our revenues and perhaps our ability to borrow in the credit markets.

Adverse results of current litigation and potential securities law liability would result in financial losses and divert management's attention from our business.

Many aspects of our business involve substantial risks of liability. There is a risk of litigation and arbitration within the securities industry, including class action suits seeking substantial damages. We are subject to actual and potential claims by dissatisfied customers, including claims alleging they were damaged by improper sales practices such as unauthorized trading, sale of unsuitable securities, use of false or misleading statements in the sale of securities,

mismanagement and breach of fiduciary duty. We may be liable for the unauthorized acts of our retail brokers if we fail to adequately supervise their conduct. As an underwriter, we may be subject to substantial potential liability under federal and state law and court decisions, including liability for material misstatements and omissions in securities offerings. We may be required to contribute to a settlement, defense costs or a final judgment in legal proceedings or arbitrations involving a past underwriting and in actions that may arise in the future. We carry "Errors and Omissions" insurance to protect against such legal actions, however, the policy is limited in items and amounts covered and there can be no assurance that it will cover a particular complaint. The adverse resolution of any legal proceeding involving us and/or our subsidiaries could have a material adverse effect on our business, financial condition, results of operations or cash flows.

We face significant competition for registered representatives.

We are dependent upon the independent contractor model for our retail brokerage business. A significant percentage of our retail registered representatives are independent contractors. We are exposed to the risk that a large group of independent contractors could leave the firm or decide to affiliate with another firm and that we will be unable to recruit suitable replacements. A loss of a large group of our independent contractors could have a material adverse impact on our ability to generate revenue in the retail brokerage business.

The precautions we take to prevent and detect employee misconduct may not be effective, and we could be exposed to unknown and unmanaged risks or losses.

We run the risk that employee misconduct could occur. Misconduct by employees could include:

- o employees binding us to transactions that exceed authorized limits or present unacceptable risks to us;
- o employees hiding unauthorized or unsuccessful activities from us; or
- o the improper use of confidential information.

These types of misconduct could result in unknown and unmanaged risks or losses to us including regulatory sanctions and serious harm to our reputation. The precautions we take to prevent and detect these activities may not be effective. If employee misconduct does occur, our business operations could be materially adversely affected.

Internet and internal computer system failures or compromises of our systems or security could damage our reputation and harm our business.

Although a significant portion of our business is conducted using traditional methods of contact and communications such as face-to-face meetings, a portion of our business is conducted through the Internet. We could experience system failures and degradations in the future.

We cannot assure you that we will be able to prevent an extended and/or material system failure if any of the following events occur:

- o human error;
- o subsystem, component, or software failure;
- o a power or telecommunications failure;
- o an earthquake, fire, or other natural disaster or act of God;
- o hacker attacks or other intentional acts of vandalism; or
- o terrorist acts or war.

Failure to adequately protect the integrity of our computer systems and safeguard the transmission of confidential information could harm our business.

The secure transmission of confidential information over public networks is a critical element of our operations. We rely on encryption and authentication technology to provide the security and authentication necessary to effect secure transmission of confidential information over the Internet. We do not believe that we have experienced any security breaches in the transmission of confidential information, however we cannot assure you that advancements in computer capabilities, new discoveries in the field of cryptography or other events or developments will not result in a compromise of the technology or other algorithms used by our vendors and us to protect client transaction and other data. Any compromise of our systems or security could harm our business.

Risks Related to our Common Stock

Our common stock has low trading volume and any sale of a significant number of shares is likely to depress the trading price.

Our common stock is quoted on the OTC Bulletin Board. Traditionally, the trading volume of the common stock has been limited. For example, for the 30 trading days ending on September 30, 2012, the average daily trading volume was approximately 1,327 shares per day and on certain days there was no trading activity. During such 30-day period the closing price of the National common stock ranged from a high of \$0.36 to a low of \$0.22. Because of this limited trading volume, holders of our securities may not be able to sell quickly any significant number of such shares, and any attempted sale of a large number of our shares will likely have a material adverse impact on the price of our common stock. Because of the limited number of shares being traded, the price per share is subject to volatility and may continue to be subject to rapid price swings in the future.

The conversion or exercise of our outstanding convertible securities stock may result in dilution to our common stockholders.

Dilution of the value per share of our common shares could result from the conversion of most or all of the currently outstanding shares of our preferred stock and from the exercise of the currently outstanding convertible securities.

Preferred Stock – At September 30, 2012, we had shares of Series C and D Preferred Stock outstanding, which are convertible, in total, into 13,100,692 shares of common stock.

Warrants and Options - We currently have outstanding warrants to purchase 14,717,941 shares of common stock at exercise prices ranging from \$0.50 to \$2.50 per share and options to purchase 1,312,002 shares of common stock at exercise prices ranging from \$0.70 to \$2.10 per share.

Convertible Notes - We currently have outstanding \$6,800,000 principal amount of convertible promissory notes which are convertible into an aggregate of 11,125,000 shares of common stock (after further conversion from shares of Series E) and 10,000,000 warrants at a conversion price of \$0.50 per share.

The exercise of these warrants and options, and conversion of the Series C and D preferred shares and convertible notes, and the sale of the underlying common stock, or even the potential of such conversion or exercise and sale, may have a depressive effect on the market price of our securities and the exercise or conversion of such securities will cause dilution to our stockholders. Moreover, the terms upon which we will be able to obtain additional equity capital may be adversely affected, since the holders of the outstanding convertible securities can be expected to convert or exercise them at a time when we would, in all likelihood, be able to obtain any needed capital on terms more favorable to us than the exercise terms provided by the outstanding options and warrants. Dilution could create significant downward pressure on the trading price of our common stock if the conversion or exercise of these securities encouraged short sales. Even the mere perception of eventual sales of common shares issued on the conversion of these securities could lead to a decline in the trading price of our common stock.

The price of our common stock is volatile.

The price of our common stock has fluctuated substantially. The market price of our common stock may be highly volatile as a result of factors specific to us and the securities markets in general. Factors affecting volatility may include: variations in our annual or quarterly financial results or those of our competitors; economic conditions in general; and changes in applicable laws or regulations, or their judicial or administrative interpretations affecting us or our subsidiaries or the securities industry. In addition, volatility of the market price of our common stock is further affected by its thinly-traded nature.

We have restricted shares outstanding that may depress the price of our common stock.

As of September 30, 2012, of the 26,555,572 outstanding shares of our common stock, approximately 5,794,000 shares may be deemed restricted shares and, in the future, may be sold in compliance with Rule 144 under the Securities Act. Rule 144, as amended, provides that a person who is not affiliated with the Company holding restricted securities for six months may sell such shares without restriction. A person who is affiliated with us and who has held restricted securities for six months may sell such shares in brokerage transactions, subject to limitations based on the number of shares outstanding and trading volume. Such sales may have a depressive effect on the price of our common stock in the open market.

Our principal stockholders, including our directors and officers, control a large percentage of shares of our common stock and can significantly influence our corporate actions.

As of September 30, 2012, our executive officers, directors and/or entities that these individuals are affiliated with, owned approximately 39% of our outstanding common stock, including shares of common stock issuable upon conversion of our Series C, D and E Preferred Stock, and excluding stock options, warrants, or approximately 50% on a fully-diluted basis. Accordingly, these individuals and entities will be able to significantly influence most, if not all, of our corporate actions, including the election of directors, the appointment of officers, and potential merger or acquisition transactions

Because our common stock may be subject to "penny stock" rules, the market for our common stock may be limited.

If our common stock becomes subject to the SEC's penny stock rules, broker-dealers may experience difficulty in completing customer transactions and trading activity in our securities may be adversely affected. If at any time the common stock has a market price per share of less than \$5.00, and we do not have net tangible assets of at least \$2,000,000 or average revenue of at least \$6,000,000 for the preceding three years, transactions in the common stock may be subject to the "penny stock" rules promulgated under the Exchange Act. Under these rules, broker-dealers that recommend such securities to persons other than institutional accredited investors:

- o must make a special written suitability determination for the purchaser;
- o receive the purchaser's written agreement to a transaction prior to sale;
- o provide the purchaser with risk disclosure documents which identify certain risks associated with investing in "penny stocks" and which describe the market for these "penny stocks" as well as a purchaser's legal remedies; and
- o obtain a signed and dated acknowledgment from the purchaser demonstrating that the purchaser has actually received the required risk disclosure document before a transaction in a "penny stock" can be completed.

If our common stock becomes subject to these rules, broker-dealers may find it difficult to effectuate customer transactions and trading activity in our securities may be adversely affected. As a result, the market price of our securities may be depressed, and stockholders may find it more difficult to sell our securities.

There are risks associated with our common stock trading on the OTC Bulletin Board rather than on a national exchange.

There may be significant consequences associated with our common stock trading on the OTC Bulletin Board rather than a national exchange. The effects of not being able to list our common stock securities on a national exchange include:

- o limited release of the market price of our securities;
- o limited news coverage;
- o limited interest by investors in our securities;
- o volatility of our common stock price due to low trading volume;
- o increased difficulty in selling our securities in certain states due to "blue sky" restrictions; and
- o limited ability to issue additional securities or to secure additional financing.

Our board of directors can issue shares of "blank check" preferred stock without further action by our stockholders.

Our board of directors has the authority, without further action by our stockholders, to issue up to 10,000,000 shares of preferred stock in one or more series and to fix the rights, preferences, privileges and restrictions in each series of the preferred stock, including:

- o dividend rights;
- o conversion rights;
- o voting rights, which may be greater or lesser than the voting rights of our common stock;
- o rights and terms of redemption;
- o liquidation preferences; and
- o sinking fund terms.

At September 30, 2012, there are currently 50,000, 34,500 and 100,000 shares of Series A, C and D Preferred Stock authorized respectively, with 0, 34,167 and 60,000 of each such shares issued and outstanding respectively. The issuance of additional shares of preferred stock could adversely affect the voting power of holders of our common stock and the likelihood that these holders will receive dividends and payments upon our liquidation and could have the effect of delaying, deferring or preventing a change in control of the Company. We have no current plans to issue any additional preferred stock in the next 12 months, although the issuance of preferred stock may be necessary in order to raise additional capital.

We do not expect to pay any dividends on our common stock in the foreseeable future.

We do not anticipate that we will pay any dividends to holders of our common stock in the foreseeable future. We expect to retain all future earnings, if any, for investment in our business. In addition, the Certificates of Designations

setting forth the relative rights and preferences of our Series A, C, D and E Preferred Stock, as well as our outstanding convertible notes, may limit our ability to pay dividends to the holders of our common stock.

Item 2. PROPERTIES

The Company owns no real property. Its corporate headquarters are in space leased by National Securities in New York, New York. The Company also leases office space through its subsidiaries in Boca Raton, Florida, New York, New York, Seattle, Washington and Tinton Falls, New Jersey. Independent contractors individually lease the Company's branch offices that are operated by those independent contractors.

Leases expire at various times through June 2017. The Company believes the rent at each of its locations is reasonable based on current market rates and conditions. We consider the facilities of our company and those of our subsidiaries to be reasonably insured and adequate for the foreseeable needs of the Company and its subsidiaries.

The Company leases office space in the following locations. The following chart provides information related to these lease obligations:

Address	Approximate Square Footage	Approximate Annual Lease Rental	Lease Termination Date
120 Broadway New York, NY	19,872	\$ 813,268	August 31, 2013
1001 Fourth Ave Seattle, WA	9,739	\$ 338,436	June 30, 2017
4000 Rt. 66 Tinton Falls, NJ	4,258	\$ 104,321	November 30, 2015
131 Gaither Drive Mount Laurel, NJ	1,400	\$ 19,600	Month to Month

Item 3. LEGAL PROCEEDINGS

The Company and its subsidiaries are defendants in arbitrations and administrative proceedings, lawsuits and claims, which are routine and incidental to our business, alleging specified damages of approximately \$16,800,000. The Company estimates, to the extent that it can, that based on discussions with legal counsel and prior experience, its aggregate liability from these pending actions may exceed \$300,000 (exclusive of fees, costs and unspecified punitive damages related to certain claims and inclusive of expected insurance coverage). These matters arise in the normal course of business. The Company intends to vigorously defend itself in these actions, and based on discussions with counsel believes that the eventual outcome of these matters will not have a material adverse effect on the Company. However, the ultimate outcome of these matters cannot be determined at this time. The amounts related to such matters that are reasonably estimable and which have been accrued at September 30, 2012 and 2011, are \$338,000 and \$310,000 (inclusive of legal fees and estimated claims), respectively, and have been included in "Accounts Payable, Accrued Expenses and Other Liabilities" in the accompanying consolidated statements of financial condition. The Company has included in "Professional fees" litigation and FINRA related expenses of \$1,158,000 and \$1,169,000 for fiscal years 2012 and 2011, respectively.

PART II

Item 5. MARKET FOR THE REGISTRANT'S COMMON STOCK, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market Information

Our common stock trades under the symbol "NHLD" on the OTCBB. Quotations on the OTCBB reflect inter-dealer prices, without retail mark-up, mark-down or commission and may not necessarily represent actual transactions.

The following table sets forth the high and low closing sales prices for the common stock as reported on the OTCBB for the period from October 1, 2010 to September 30, 2012.

Period	High	Low
October 1, 2010/December 31, 2010	\$0.40	\$0.18
January 1, 2011/March 31, 2011	\$0.50	\$0.34
April 1, 2011/June 30, 2011	\$0.50	\$0.28
July 1, 2011/September 30, 2011	\$0.44	\$0.21
Period	High	Low
October 1, 2011/December 31, 2011	\$0.40	\$0.17
January 1, 2012/March 31, 2012	\$0.39	\$0.15
April 1, 2012/June 30, 2012	\$0.42	\$0.18
July 1, 2012/September 30, 2012	\$0.37	\$0.12

The closing price of the common stock on December 20, 2012, as quoted on the OTCBB, was \$0.13 per share.

Stockholders

As of September 30, 2012, the Company had approximately 167 stockholders of record and estimates its total number of beneficial stockholders at approximately 1,010.

Dividends

Delaware law authorizes the Company's Board of Directors to declare and pay dividends with respect to the common stock either out of its surplus (as defined in the Delaware Corporation Law) or, in case there is no such surplus, out of its net profits for the fiscal year in which the dividend is declared and/or the preceding fiscal year; provided, however, that no dividend may be paid out of net profits unless the Company's capital exceeds the aggregate amount represented by the issued and outstanding stock of all classes having a preference in the distribution of assets. The Company's ability to pay dividends in the future also may be restricted by its operating subsidiaries' obligations to comply with the net capital requirements imposed on broker-dealers by the SEC and FINRA. We do not anticipate that we will pay any dividends to holders of our common stock in the foreseeable future. No cash dividends have been declared or paid by the Company with respect to its common stock during the past two fiscal years.

Securities Authorized for Issuance under Equity Compensation Plans

The following table sets forth information as of September 30, 2012 with respect to compensation plans under which equity securities of the Company are authorized for issuance.

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a) (c)
Equity compensation plans approved by security holders	1,312,002 (1)	\$1.64	3,344,835 (2)
Equity compensation plans not approved by security holders	0		0
Total	1,312,002	\$1.64	3,344,835

(1) Includes options issued and outstanding under the 2001 and 2006 Stock Option Plans.

(2) Includes options available for issuance under the 2006 and 2008 Stock Option Plans

Issuer Purchases of Equity Securities

We have not announced any currently effective authorization to repurchase shares of our common stock.

Item 6. SELECTED FINANCIAL DATA

Not applicable.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements. This Report may contain certain statements of a forward-looking nature relating to future events or future business performance. Any such statements that refer to the Company's estimated or anticipated future results or other non-historical facts are forward-looking and reflect the Company's current perspective of existing trends and information. These statements involve risks and uncertainties that cannot be predicted or quantified and, consequently, actual results may differ materially from those expressed or implied by such forward-looking statements. Such risks and uncertainties include, among others, risks and uncertainties detailed in Item 1 above. Any forward-looking statements contained in or incorporated into this Annual Report on Form 10-K speak only as of the date of this Report. The Company undertakes no obligation to update publicly any forward-looking statement, whether as a result of new information, future events or otherwise.

OVERVIEW

We are engaged in investment banking, equity research, institutional sales and trading, independent brokerage and advisory services and asset management services through our principal subsidiaries, National Securities Corporation ("National Securities" or "NSC"), vFinance Investments, Inc. ("vFinance Investments") and EquityStation, Inc. ("EquityStation", and collectively with National Securities and vFinance Investments, the "Broker-Dealer Subsidiaries"). We are committed to establishing a significant presence in the financial services industry by meeting the varying investment needs of our retail, corporate and institutional clients.

Each of National Securities, vFinance Investments and EquityStation is subject to regulation by, among others, the Securities and Exchange Commission ("SEC"), the Financial Industry Regulatory Authority ("FINRA"), the Municipal Securities Rulemaking Board ("MSRB") and are members of the Securities Investor Protection Corporation ("SIPC"). National Securities and vFinance Investments are also subject to regulation by the National Futures Association ("NFA"). In addition, each of the Broker-Dealer Subsidiaries is licensed to conduct its brokerage activities in all 50 states, plus the District of Columbia and Puerto Rico, with National Securities and vFinance Investments also being licensed in the U.S. Virgin Islands.

National formed a wholly owned subsidiary, National Asset Management, Inc., a Washington corporation ("NAM"). NAM is a federally-registered investment adviser providing asset management advisory services to high net worth clients for a fee based upon a percentage of assets managed.

As of September 30, 2012, we had approximately 948 associated personnel serving retail and institutional customers, trading and investment banking clients. With the exception of our New York, New Jersey, Florida, Washington and Illinois branches, our approximately 80 other registered offices are owned and operated by independent owners who maintain all appropriate licenses and are responsible for all office overhead and expenses. Because these independent operators, many of whom are financial planners, are required to pay their own expenses, we generally pay them a much greater percentage of the commissions and fee income they generate, typically 70% - 90%.

Our registered representatives offer a broad range of investment products and services. These products and services allow us to generate both commissions (from transactions in securities and other investment products) and fee income (for providing investment advisory services, namely managing clients' accounts). The investment products and services offered include but are not limited to stocks, bonds, mutual funds, annuities, insurance, and managed money accounts.

Business Environment in Fiscal 2012

The market conditions which negatively impacted our retail activities during fiscal 2012 were as follows:

- The market's lack of confidence in the repayment of certain sovereign debts held by a number of financial institutions and other investors;
- High US unemployment, tax, regulatory and economic uncertainties which impacted the operating results and financing opportunities for companies in the micro, small and midcap market in which we are active; and
- Lack of predictability in the global economic recovery resulted in declining interest in various sectors and the market as a whole in which our retail activities are focused. This translated into unusual volatility and lack of liquidity in the capital markets. This caused a decline in brokerage activity, and accordingly, our revenues during fiscal 2012.

It is not practical to determine to what extent such market conditions will continue, or whether they will improve or worsen. It is also difficult to predict which future events will impact the market conditions in the future. Accordingly, we are unable to determine any particular trend in our revenues and certain expenses, such as commission expenses, to the extent that they are correlated to revenues.

Growth Strategy

We continue to evaluate opportunities to grow our businesses, including potential acquisitions or mergers with other securities, investment banking and investment advisory firms, and by adding to our base of independent representatives organically. These acquisitions may involve payments of material amounts of cash, the incurrence of a significant amount of debt or the issuance of significant amounts of our equity securities, which may be dilutive to our existing stockholders and/or may increase our leverage. We cannot assure you that we will be able to consummate any such potential acquisitions at all or on terms acceptable to us or, if we do, that any acquired business will be profitable. There is also a risk that we will not be able to successfully integrate acquired businesses into our existing business and operations.

Key Indicators of Financial Performance for Management

Management periodically reviews and analyzes our financial performance across a number of measurable factors considered to be particularly useful in understanding and managing our business. Key metrics in this process include productivity and practice diversification of representatives, top line commission and advisory services revenues, gross margins, operating expenses, legal costs, taxes and earnings per share.

Critical Accounting Policies and Estimates

The SEC recently issued proposed guidance for disclosure of critical accounting policies and estimates. The Company's most critical accounting policies relate to income recognition, income taxes, and stock-based compensation. The SEC defines "critical accounting estimates" as those that require application of management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effects of matters that are inherently uncertain and may change in subsequent periods.

The Company's critical accounting policies are as follows:

Revenue Recognition - Customer security transactions and the related commission income and expense are recorded as of the trade date. Investment banking revenues include gains, losses, and fees, net of syndicate expenses, arising from securities offerings in which the Company acts as an underwriter or agent. Investment banking revenues also include fees earned from providing financial advisory services. Investment banking management fees and sales concessions are recorded on the offering date and underwriting fees at the time the underwriting is completed and the income is reasonably determinable. Customers who are financing their transaction on margin are charged interest. The Company's margin requirements are in accordance with the terms and conditions mandated by its clearing firms, NFS, Legent, ICBC Rosenthal and RJO. The interest is billed based on the customer's average daily balance of the margin account.

Net dealer inventory gains result from securities transactions entered into for the account and risk of the Company. Net dealer inventory gains are recorded on a trade date basis. Transfer fees are charged for each customer's security transaction, and are recognized as of the trade date. Investment advisory fees are account management fees for high net worth clients based on the amount of the assets under management. These fees are billed quarterly and recognized at such time that the service is performed and collection is probable.

The Company generally acts as an agent in executing customer orders to buy or sell listed and over-the-counter securities in which it does not make a market, and charges commissions based on the services the Company provides to its customers. In executing customer orders to buy or sell a security in which the Company makes a market, the Company may sell to, or purchase from, customers at a price that is substantially equal to the current inter-dealer market price plus or minus a mark-up or mark-down. The Company may also act as agent and execute a customer's purchase or sale order with another broker-dealer market-maker at the best inter-dealer market price available and charge a commission. Mark-ups, mark-downs and commissions are generally priced competitively based on the services it provides to its customers. In each instance the commission charges, mark-ups or mark-downs, are in compliance with guidelines established by FINRA.

Common Stock Purchase Warrants - The Company accounts for the issuance of common stock purchase warrants issued in connection with capital financing transactions in accordance with the provisions of Accounting Standard Codification 815- Derivatives and Hedging ("ASC 815"). Based on such provisions, the Company classifies as equity any contracts that (i) require physical settlement or net-share settlement or (ii) gives the Company a choice of net-cash settlement or settlement in its own shares (physical settlement or net-share settlement). The Company classifies as assets or liabilities any contracts that (i) require net-cash settlement (including a requirement to net-cash settle the contract if an event occurs and if that event is outside the control of the Company) or (ii) gives the counterparty a choice of net-cash settlement or settlement in shares (physical settlement or net-share settlement).

The Company assessed the classification of its derivative financial instruments as of September 30, 2012, which consist of common stock purchase warrants, and determined that such derivatives meet the criteria for equity classification under ASC 815.

Convertible Instruments - The Company evaluates and accounts for conversion options embedded in its convertible instruments in accordance with ASC 815.

ASC 815 generally provides three criteria that, if met, require companies to bifurcate conversion options from their host instruments and account for them as free standing derivative financial instruments in accordance with Emerging Issues Task Force ("EITF") 00-19. These three criteria include circumstances in which (a) the economic characteristics and risks of the embedded derivative instrument are not clearly and closely related to the economic characteristics and risks of the host contract, (b) the hybrid instrument that embodies both the embedded derivative instrument and the host contract is not re-measured at fair value under otherwise applicable generally accepted accounting principles with changes in fair value reported in earnings as they occur and (c) a separate instrument with the same terms as the embedded derivative instrument would be considered a derivative instrument subject to the requirements of ASC 815. ASC 815 also provides an exception to this rule when the host instrument is deemed to be conventional (as that term is described).

The Company accounts for convertible instruments (when it has determined that the embedded conversion options should not be bifurcated from their host instruments) in accordance with the provisions of Accounting Standard Codification 470 20 Debt with Conversion Options. Accordingly, the Company records, when necessary, discounts to convertible notes for the intrinsic value of conversion options embedded in debt instruments based upon the differences between the fair value of the underlying common stock at the commitment date of the note transaction and the effective conversion price embedded in the note. Debt discounts under these arrangements are amortized over the term of the related debt to their earliest date of redemption. The Company also records when necessary deemed dividends for the intrinsic value of conversion options embedded in preferred shares based upon the differences between the fair value of the underlying common stock at the commitment date of the note transaction and the effective conversion price embedded in the note.

The Company evaluated the conversion option embedded in the -Series A Preferred Stock and determined, in accordance with the provisions of these statements, that such conversion option does not meet the criteria requiring bifurcation of these instruments. The characteristics of the common stock that is issuable upon a holder's exercise of the conversion option embedded in the convertible preferred stock are deemed to be clearly and closely related to the characteristics of the preferred shares (as that term is defined under ASC 815). Additionally, the Company's conversion options, if free standing, would not be considered derivatives subject to the accounting guidelines prescribed under ASC 815.

However, the Company believes that certain conversion features embedded in its Series C and Series D Preferred Stock and the related warrants issued in connection with such instruments were not clearly and closely related to the economic characteristics of the Company's stock price prior to March 31, 2011. Accordingly, the Company recognized derivative liabilities in connection with such instruments. The Company uses judgment in determining the fair value of derivative liabilities at the date of issuance at every Statement of Financial Condition thereafter. The Company uses judgment in determining which valuation is most appropriate for the instrument (e.g., Black Scholes), the expected volatility, the implied risk free interest rate, as well as the expected dividend rate. As of March 31, 2011, the Series C and Series D Preferred Stock and the warrants associated with such Preferred Stock are accounted for as equity contracts.

Other Receivables - The Company extends unsecured credit in the normal course of business to its registered representatives. The determination of the amount of uncollectible accounts is based on the amount of credit extended and the length of time each receivable has been outstanding, as it relates to each individual registered representative. The allowance for doubtful accounts reflects the amount of loss that can be reasonably estimated by management, and is included in other expenses in the accompanying consolidated statements of operations.

The Company has historically used the Black-Scholes option valuation model to estimate the fair value of any options granted. The model includes subjective input assumptions that can materially affect the fair value estimates. The model was developed for use in estimating the fair value of traded options that have no vesting restrictions and that are fully transferable. For example, the expected volatility is estimated based on the most recent historical period of time equal to the weighted average life of the options granted. Options issued under the Company's option plans have characteristics that differ from traded options. In the Company's opinion, this valuation model does not necessarily provide a reliable single measure of the fair value of its employee stock options.

Fiscal Year 2012 Compared with Fiscal Year 2011

The Company's fiscal year 2012 resulted in a decrease in revenues, and a correlated decrease in variable expenses as well as cost savings in compensation and other fixed costs as implemented by management, compared with fiscal year 2011. As a result, the Company reported a net loss of \$1,937,000 compared with a net loss of \$4,713,000 for the fiscal years 2012 and 2011, respectively.

Revenues

	Fiscal Year		Increase (Decrease)		
	2012	2011	Amount	Percent	
Commissions	\$ 70,301,000	\$ 85,296,000	\$ (14,995,000)	-18	%
Net dealer inventory gains	14,427,000	14,261,000	166,000	1	%
Investment banking	15,390,000	6,930,000	8,460,000	122	%
Interest and dividends	2,996,000	3,586,000	(590,000)	-16	%
Transfer fees and clearing services	7,196,000	8,528,000	(1,332,000)	-16	%
Investment advisory fees	8,092,000	7,567,000	525,000	7	%
Other	246,000	353,000	(107,000)	-30	%
	\$ 118,648,000	\$ 126,521,000	\$ (7,873,000)	-6	%

Total revenues decreased \$7,873,000, or 6%, in fiscal year 2012 to \$118,648,000 from \$126,521,000 in fiscal year 2011. The decrease in revenues is primarily due to less favorable market conditions in retail brokerage offset by an increase in investment banking as described in our overview of the business environment.

- Commissions revenues decreased by \$14,995,000, or 18%, to \$70,301,000 from \$85,296,000 during fiscal 2012 when compared to the prior year, primarily due to less favorable general market conditions resulting in lower volume of transactions made on behalf of our clients;
- Net dealer inventory gains, which includes profits on proprietary trading, market making activities, and customer mark-ups and mark-downs increased by \$166,000, or 1%, to \$14,427,000 from \$14,261,000 during fiscal 2012 when compared to fiscal 2011, primarily due to slightly more favorable trading conditions affecting our market making and fixed income trading activities in the year ended September 30, 2012, as compared to the prior year period;
- Investment banking fees increased \$8,460,000, or 122%, to \$15,390,000 from \$6,930,000, during fiscal 2012 when compared to the prior year, primarily from a larger number of and generally larger average size of successful capital raising events for clients, and advisory and consulting services provided during the year;
- Interest and dividend revenue primarily consists of interest on customer margin account balances. Interest and dividends decreased by \$590,000, or 16% to \$2,996,000 from \$3,586,000 during fiscal 2012 when compared to the prior year. The decrease is primarily due to somewhat lower customer margin account balances, lower customer

free cash balances, and slightly lower prevailing interest rates during the year.

- Transfer fees and clearing service revenue, which primarily consists of fees charged to our registered representatives to execute on their behalf, decreased by \$1,332,000, or 16%, to \$7,196,000 from \$8,528,000 during fiscal 2012 when compared to the prior year. The decrease is primarily due to a lower number of transactions made on behalf of our clients during the most recent year.
- Investment advisory fees, which primarily consists of fees charged to our clients in our asset based money management group, increased by \$525,000, or 7%, to \$8,092,000 from \$7,567,000 during fiscal 2012 when compared to the prior year. The increase is primarily due to an increase in assets under management during the most recent year.
- Other revenue which consists of transaction fees charged to our customers and other investment income decreased by \$107,000, or 30% during fiscal 2012 when compared to the prior year. The decrease is primarily due to a lower number of these transactions made on behalf of our clients during the most recent year.

Operating expenses

	Fiscal Year		Increase (Decrease)	
	2012	2011	Amount	Percent
Commissions, compensation, and fees	\$ 103,800,000	\$ 113,325,000	\$ (9,525,000)	-8 %
Clearing fees	1,662,000	2,107,000	(445,000)	-21 %
Communications	4,731,000	4,571,000	160,000	4 %
Occupancy and equipment costs	4,189,000	5,052,000	(863,000)	-17 %
Professional fees	2,714,000	1,831,000	883,000	48 %
Interest	916,000	1,147,000	(231,000)	-20 %
Taxes, licenses and registration	1,536,000	1,639,000	(103,000)	-6 %
	\$ 119,548,000	\$ 129,672,000	\$ (10,124,000)	-8 %

In comparison with the 6% decrease in total revenues, total expenses decreased 8%, or \$10,124,000, to \$119,548,000 for fiscal year 2012 compared to \$129,672,000 in fiscal year 2011. The decrease in total expenses is primarily the result of decreased commission expense which is consistent with the decrease in commission revenues combined with a decrease in occupancy and equipment costs resulting from managements' cost cutting efforts and the reduction of space in our New York office.

Commission, compensation, and fees expenses, which includes expenses based on commission revenue, net dealer inventory gains and investment banking, as well as base compensation to our employees, brokers, and support staff, decreased by \$9,525,000, or 8%, to \$103,800,000 from \$113,325,000 during fiscal year 2012 when compared to the prior year. The decrease is primarily attributable to a decrease in commission expense related to retail commission revenues, savings in salaries and other expenses as a result of cost cutting efforts by management, offset by a smaller increase in commission expense related to investment banking revenue and net dealer inventory gains. Commission expense also includes the amortization of advances to registered representatives aggregating \$265,000 and \$392,000 for fiscal 2012 and 2011, respectively. These amounts fluctuate based upon the amounts of advances outstanding and the time period for which the registered representatives have agreed to be affiliated with National Securities. Employee compensation includes the amortization of the fair value associated with stock based compensation of \$10,000 and \$265,000 in fiscal 2012 and 2011, respectively.

Clearing fees decreased \$445,000 or 21% to \$1,662,000 from \$2,107,000 during fiscal 2012 when compared to the prior year. The decrease is commensurate with a decrease in transaction volumes and clearance service revenues in fiscal 2012.

Communication expenses increased \$160,000 or 4%, to \$4,731,000 from \$4,571,000 during fiscal 2012 when compared to the prior year. This increase is primarily due to a temporary duplication in costs necessitated by the replacement of our primary phone system in our headquarters in New York due to fire damage, which occurred during the first quarter of fiscal 2012. Occupancy, equipment and other administrative expenses decreased \$863,000, or 17%, to \$4,189,000 from \$5,052,000 during fiscal 2012 when compared to the prior year. This decrease is primarily due to the reduction of space rented in our New York office after the fire which occurred in the first quarter of fiscal 2012 and other savings on rental costs due to renegotiated leases and the consolidation of some of the Company's smaller offices upon lease expiration.

Professional fees increased \$883,000, or 48% to \$2,714,000 from \$1,831,000 during fiscal 2012 when compared to the prior year. The increase in professional fees is primarily a result of litigation costs associated with the New York

City office rental abatement issue coupled with generally higher legal costs associated with arbitrations and civil matters and the consulting fees related to the trading group that joined the Company in fiscal 2012. The rental abatement issue was resolved in fiscal 2012. Additionally, in fiscal 2011 the Company received reimbursements from its insurance company primarily for legal fees in conjunction with two settlements of approximately \$350,000.

Interest expense decreased by \$231,000, or 20%, to \$916,000 from \$1,147,000 during fiscal 2012 when compared to the prior year. The decrease is primarily due to the payoff of \$4.2 million of debt in March and September 2012, lower amortization of debt discount and lower rates on the remaining interest bearing debt. There was no amortization of debt discount during the second half of fiscal 2012, as it had been fully recorded by the second quarter of 2012 and we satisfied principal aggregating \$4.2 million in a note bearing interest at 10% with a \$5.0 million note bearing interest at 6% and a \$1.0 million note bearing interest at 10% during fiscal 2012.

Taxes, licenses and registration decreased \$103,000, or 6%, to \$1,536,000 from \$1,639,000 during fiscal 2012 compared to 2011. This decrease is not material.

Loss on disposition of unconsolidated joint venture

In April 2012, we relinquished our interest in an unconsolidated joint venture, Opus, resulting in a loss of disposition of such investment of \$1,051,000 which was recorded at June 30, 2012. We did not incur such losses during fiscal 2011.

Increase in fair value of derivative liabilities

We did not have any derivative liabilities outstanding during fiscal year 2012. The fair value of derivative liabilities, as computed between measurement dates, increased by approximately \$1.6 million during fiscal year 2011. The increase in fair value of derivative liabilities in 2011 was primarily due to an increase in our quoted price per share between measurement dates, which is one of the main assumptions in our computation of derivative liabilities.

The Company reported a net loss of \$1,937,000 in fiscal year 2012 compared to a net loss of \$4,713,000 in fiscal year 2011. The net loss attributable to common stockholders in fiscal year 2012 was \$2,030,000 or \$0.08 per common share, as compared to a net loss attributable to common stockholders of \$5,127,000, or \$0.18 per common share in fiscal year 2011. The net loss attributable to common stockholders for fiscal years 2012 and 2011 reflects \$93,000 and \$414,000, respectively, of cumulative preferred stock dividends on the Company's preferred stock.

NON-G.A.A.P. INFORMATION

Management considers earnings before interest, taxes, depreciation and amortization, or EBITDA, as adjusted, an important indicator in evaluating our business on a consistent basis across various periods. Due to the significance of non-recurring items, EBITDA, as adjusted, enables our board of directors and management to monitor and evaluate our business on a consistent basis. We use EBITDA, as adjusted, as a primary measure, among others, to analyze and evaluate financial and strategic planning decisions regarding future operating investments and potential acquisitions. We believe that EBITDA, as adjusted, eliminates items that are not part of our core operations, such as interest expense and amortization expense associated with intangible assets, or items that do not involve a cash outlay, such as stock-related compensation and changes in fair value of derivative liabilities. EBITDA, as adjusted should be considered in addition to, rather than as a substitute for, pre-tax income, net income and cash flows from operating activities. For fiscal year 2012 and 2011, EBITDA, as adjusted, was \$1,529,000 and \$119,000, respectively. This improvement of \$1,410,000 during fiscal 2012 when compared to 2011 resulted from a general decrease in operating expenses partially offset by a lower decrease in revenues.

The following table presents a reconciliation of EBITDA, as adjusted, to net loss as reported in accordance with generally accepted accounting principles, or GAAP.

	Fiscal Year Ended	
	2012	2011
Net loss, as reported	\$ (1,937,000)	\$ (4,713,000)
Interest expense	916,000	1,147,000
Taxes	153,000	148,000
Depreciation	533,000	633,000
Amortization	538,000	644,000
EBITDA	203,000	(2,141,000)
Non-cash compensation expense	10,000	265,000
Forgivable loan write-down	265,000	392,000
	1,051,000	-

Loss on disposition of unconsolidated joint venture		
Change in fair value of derivative liabilities	-	1,603,000
EBITDA, as adjusted	\$ 1,529,000	\$ 119,000

EBITDA, as adjusted for, non-cash compensation expense, forgivable loan write-down and changes in fair value of derivative liabilities, is a key metric we use in evaluating our business. EBITDA is considered a non-GAAP financial measure as defined by Regulation G promulgated by the SEC.

Liquidity and Capital Resources

Sources of liquidity and capital resources

	Ending Balance September 30,		Average Balance during fiscal	
	2012	2011	2012	2011
Cash	\$ 7,934,000	\$ 6,698,000	\$ 7,316,000	\$ 6,044,000

Notes payable	-	-	-	250,000
Subordinated borrowings	1,000,000	100,000	550,000	425,000

At September 30, 2012 and 2011, 74% and 60%, respectively, of our total assets consisted of cash and cash equivalents, marketable securities owned and receivables from clearing brokers and other broker-dealers. The level of cash used in each asset class is subject to fluctuation based on market volatility, revenue production and trading activity in the marketplace.

Our Broker-Dealer Subsidiaries are subject to the SEC's Uniform Net Capital Rule 15c3-1, which is designed to measure the general financial integrity and liquidity of a broker-dealer and requires the maintenance of minimum net capital. Net capital is defined as the net worth of a broker-dealer subject to certain adjustments. In computing net capital, various adjustments are made to net worth that exclude assets not readily convertible into cash. Additionally, the regulations require that certain assets, such as a broker-dealer's position in securities, be valued in a conservative manner so as to avoid over-inflation of the broker-dealer's net capital. National Securities has elected to use the alternative standard method permitted by the Rule. This requires that National Securities maintain minimum net capital equal to the greater of \$250,000 or a specified amount per security based on the bid price of each security for which National Securities is a market maker. At September 30, 2012, National Securities' net capital exceeded the requirement by approximately \$1,144,000. Due to its market maker status, vFinance Investments is required to maintain a minimum net capital of \$1,000,000 and EquityStation is required to maintain \$50,000, and at September 30, 2012 the firms had excess net capital of approximately \$639,000 and \$95,000, respectively.

Advances, dividend payments and other equity withdrawals from the Broker-Dealer Subsidiaries are restricted by the regulations of the SEC and other regulatory agencies. These regulatory restrictions may limit the amounts that a subsidiary may dividend or advance to the Company. During 2012 and 2011, the Broker-Dealer Subsidiaries were in compliance with the rules governing dividend payments and other equity withdrawals.

The Company extends unsecured credit in the normal course of business to its brokers. The determination of the appropriate amount of the reserve for uncollectible accounts is based upon a review of the amount of credit extended, the length of time each receivable has been outstanding, and the specific individual brokers from whom the receivables are due.

The objective of liquidity management is to ensure that the Company has ready access to sufficient funds to meet commitments, fund deposit withdrawals and efficiently provide for the credit needs of customers.

Our primary sources of liquidity include the sale of our securities and other financing activities and our cash flow from operations. We believe that we have sufficient funds from operations to fund our ongoing operating requirements through at least 2013. However, we may need to raise funds to enhance our working capital and for strategic purposes.

At September 30, 2012, National Holdings Corporation had total indebtedness of \$7.8 million. We cannot assure you that our operations will generate funds sufficient to repay our existing debt obligations as they come due. Our failure to repay our indebtedness and make interest payments as required by our debt obligations could have a material adverse effect on our operations. The Company issued secured convertible promissory notes aggregating \$5,000,000 during March, April and September 2012 and a subordinated note of \$1.0 million during September 2012, which may mature as early as August 2013, or, if certain conditions are met, in March 2015. We used a portion of the proceeds from the convertible promissory notes and subordinated notes to satisfy the principal of \$4.2 million convertible promissory notes which matured in March and June 2012. The Company also has a remaining obligation of \$1.8 million convertible promissory note which now matures in January 2013. Such notes are unsecured, are solely the obligation of National Holdings Corporation and not any of its operating subsidiaries, including our Broker-Dealer Subsidiaries. Such notes are due to entities affiliated to two of the Company's directors. Our plan is to satisfy our remaining obligations under the \$1.8 million convertible note and the \$1.0 million subordinated note by either: 1) providing incentives to the holders to either extend the maturity of the notes or convert the notes into our shares of common stock, 2) securing additional financing between now and the maturity dates to repay the notes, 3) repaying the notes in cash and other available current assets at maturity, or 4) a combination of the aforementioned options. Additionally, we intend to satisfy our obligations under the \$5,000,000 convertible promissory notes by: 1) securing the acceptance of the holder of its capital restructuring, which would allow the Company to firmly extend the maturity of the note to March 2015, or 2) encouraging the holder to convert its note to the Company's Series E Preferred Stock in due course. While the Company believes that it will ultimately satisfy its obligations under such convertible notes, it cannot guarantee that it will be able to do so at favorable terms, or at all. Should the Company default on the convertible notes and the lender forecloses on the debt, the operations of our subsidiaries will not be initially impacted. However, following default, the lender could potentially liquidate the holdings of our operating subsidiaries sometime in the future in accordance with applicable SEC and FINRA rules and regulations.

Edgar Filing: NATIONAL HOLDINGS CORP - Form 10-K

We do not have any material commitments for capital expenditures. We routinely purchase computer equipment and technology to maintain or enhance the productivity of our employees and such capital expenditures have ranged between \$221,000 and \$480,000 during fiscal 2012 and 2011.

Net increase in cash	\$ 1,236,000	\$ 1,308,000

Year ended September 30, 2012

The increase in receivables from clearing organizations, broker-dealers and others at September 30, 2012 as compared to September 30, 2011 is primarily due to the higher revenues in September 2012 as compared to September 2011 revenues. These receivables are typically received within 30 days of the close of the month. Changes in securities owned are primarily due to a general increase in securities held for trading as well as increase in the valuation of

non-marketable warrants and securities held, which the Company received as compensation for investment banking deals. The increase in accounts payable, accrued expenses and other liabilities at September 30, 2012 as compared to September 30, 2011 is primarily due to the higher commissions payable consistent with the revenues in September 2012 as compared to September 2011 revenues.

Cash used in investing activities during fiscal 2012 amounted to \$771,000 and primarily consisted of funds used to complete an investment in an unconsolidated joint venture of \$550,000, resulting from prior obligations and by recurring purchases of computer equipment of \$221,000.

Cash provided by financing activities during fiscal 2012 amounted to \$1,700,000 and was comprised of an issuance of convertible notes payable and subordinated debt of \$6,000,000 which partly satisfied our obligations under outstanding convertible notes payable of \$4,200,000. Additionally, we made net repayments of \$100,000 of our subordinated borrowings during the same period.

Year ended September 30, 2011

The decrease in receivables during fiscal 2011 of \$1,420,000 is primarily due to a decrease in receivables from clearing firms resulting from lower revenues during the month of September year over year, and the decrease in payables during fiscal 2011 of \$690,000 is primarily due to a decrease in commissions payable corresponding to the lower sales during the month of September year over year.

Cash used in investing activities during fiscal 2011 amounted to \$481,000 which was primarily due to the redemption of a note receivable of \$500,000, offset by recurring purchases of computer equipment of \$480,000 and an investment in an unconsolidated joint venture of \$501,000.

Cash provided by financing activities of \$1,631,000 during fiscal 2011 and was primarily due to net proceeds from the issuance of Series D Preferred Stock and our shares of common stock aggregating \$2,750,000, offset by principal repayments aggregating \$1,150,000 of subordinated borrowings and notes payable.

Operating cash flows from period to period

Our cash flows from operating activities increased to \$307,000 from \$158,000 for fiscal years 2012 and 2011, respectively. Such increase is primarily attributable to the following:

- Aforementioned changes in assets and liabilities during the respective periods, and;
- Overall greater decrease in operating expenses offset by lower revenues.

Going Concern

The accompanying consolidated financial statements have been prepared on a going concern basis. For fiscal 2012, the Company had a net loss of \$1,937,000 and a working capital deficit of \$5.4 million. For the fiscal year ended September 30, 2011 the Company had a net loss of \$4,713,000 and a working capital deficit of \$4.6 million.

At September 30, 2012, National Holdings Corporation had total indebtedness of \$7.8 million. We cannot assure you that our operations will generate funds sufficient to repay our existing debt obligations as they come due. Our failure to repay our indebtedness and make interest payments as required by our debt obligations could have a material adverse effect on our operations. The Company issued secured convertible promissory notes aggregating \$5,000,000 during March, April and September 2012 and a subordinated note of \$1.0 million during September 2012, which may mature as early as August 2013, or, if certain conditions are met, in March 2015. We used a portion of the proceeds from the convertible promissory notes and subordinated notes to satisfy the principal of \$4.2 million convertible promissory notes which matured in March and June 2012. The Company also has a remaining obligation of \$1.8 million convertible promissory note which now matures in January 2013. Such notes are unsecured, are solely the obligation of National Holdings Corporation and not any of its operating subsidiaries, including our Broker-Dealer Subsidiaries. Such notes are due to entities affiliated to two of the Company's directors. Our plan is to satisfy our remaining obligations under the \$1.8 million convertible note and the \$1.0 million subordinated note by either: 1) providing incentives to the holders to either extend the maturity of the notes or convert the notes into our shares of common stock, 2) securing additional financing between now and the maturity dates to repay the notes, 3) repaying

the notes in cash and other available current assets at maturity, or 4) a combination of the aforementioned options. Additionally, we intend to satisfy our obligations under the \$5,000,000 convertible promissory notes by: 1) securing the acceptance of the holder of its capital restructuring, which would allow the Company to firmly extend the maturity of the note to March 2015, or 2) encouraging the holder to convert its note to the Company's Series E Preferred Stock in due course. While the Company believes that it will ultimately satisfy its obligations under such convertible notes, it cannot guarantee that it will be able to do so at favorable terms, or at all. Should the Company default on the convertible notes and the lender forecloses on the debt, the operations of our subsidiaries will not be initially impacted. However, following default, the lender could potentially liquidate the holdings of our operating subsidiaries sometime in the future in accordance with applicable SEC and FINRA rules and regulations.

Inflation

The Company believes that the effect of inflation on its assets, consisting of cash, securities, office equipment, leasehold improvements and computers has not been significant.

Off-Balance Sheet Arrangements

The Company does not have any off-balance-sheet arrangements (as defined in Regulation S-K 303(a)(4)(ii)) that have or are reasonably likely to have a current or future effect on its financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors.

Recently Adopted Accounting Guidance

In September 2011, the FASB issued Accounting Standard Update (“ASU”) No. 2011-08, Testing Goodwill for Impairment. The new guidance provides an entity the option to first perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If an entity determines that this is the case, it is required to perform the currently prescribed two-step goodwill impairment test to identify potential goodwill impairment and measure the amount of goodwill impairment loss to be recognized for that reporting unit (if any). If an entity determines that the fair value of a reporting unit is less than its carrying amount, the two-step goodwill impairment test is not required. The new guidance was effective for the Company beginning October 1, 2012 and did not have material impact on our financial statements upon adoption.

In June 2011, the FASB issued ASU No. 2011-05, Presentation of Comprehensive Income. The guidance eliminated a prior option to report other comprehensive income and its components in the statement of changes in equity. Instead, an entity will be required to present either a continuous statement of net income and other comprehensive income or in two separate but consecutive statements. The new guidance was effective for the Company beginning January 1, 2012 and did not have material impact on our financial statements upon adoption.

In May 2011, the FASB issued ASU No. 2011-04, Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs. The guidance amends the accounting and disclosure requirements on fair value measurements. The new guidance limits the highest-and-best-use measure to nonfinancial assets, permits certain financial assets and liabilities with offsetting positions in market or counterparty credit risks to be measured at a net basis, and provides guidance on the applicability of premiums and discounts. Additionally, the new guidance expands the disclosures on Level 3 inputs by requiring quantitative disclosure of the unobservable inputs and assumptions, as well as description of the valuation processes and the sensitivity of the fair value to changes in unobservable inputs. The new guidance was effective for the Company beginning January 1, 2012 and did not have material impact on our financial statements upon adoption.

In January 2010, the FASB issued ASU No. 2010-06, Improving Disclosures about Fair Value Measurements. ASU No. 2010-06 provides amendments to ASC Subtopic 820-10 that requires new disclosures as follows:

- Transfers in and out of Level 1 and 2. A reporting entity should disclose separately the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements and describe the reasons for the transfers.
- Activity in Level 3 fair value measurements. In the reconciliation for fair value measurements using significant unobservable inputs (Level 3), a reporting entity should present separately information about purchases, sales, issuances, and settlements (that is, on a gross basis rather than as one net number.)

ASU No. 2010-06 provides amendments to ASC Subtopic 820-10 that clarifies existing disclosures as follows:

- Level of disaggregation. A reporting entity should provide fair value measurement disclosures for each class of assets and liabilities. A class is often a subset of assets or liabilities within a line item in the statement of financial position. A reporting entity needs to use judgment in determining the appropriate classes of assets and liabilities.

- Disclosures about inputs and valuation techniques. A reporting entity should provide disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements. Those disclosures are required for fair value measurements that fall in either Level 2 or Level 3.

The new guidance was effective for the Company beginning October 1, 2011 and resulted in immaterial financial statement presentation changes only.

Recent Accounting Guidance Not Yet Adopted

In July 2012, the FASB issued ASU No. 2012-02, Testing indefinite-lived intangible assets for impairment. The update aims to reduce the cost and complexity of performing an impairment test for indefinite-lived intangible assets by simplifying how an entity tests those assets for impairment and to improve consistency in impairment testing guidance among long-lived asset categories. This guidance is effective for the Company prospectively beginning on October 1, 2012. The adoption of this accounting guidance is not expected to have a material impact on the Company's financial statements.

In December 2011, the FASB issued ASU No. 2011-11, Disclosures about offsetting assets and liabilities, an accounting update that creates new disclosure requirements requiring entities to disclose both gross and net information for derivatives and other financial instruments that are either offset in the statement of financial condition or subject to an enforceable master netting arrangement or similar arrangement. The disclosure requirements are effective for the Company beginning on or after January 1, 2013. Since these amended principles require only additional disclosures concerning offsetting and related arrangements, adoption will not affect the Company's condensed consolidated statements of income or financial condition.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company's primary market risk arises from the fact that it engages in proprietary trading and makes dealer markets in equity securities. Accordingly, the Company may be required to maintain certain amounts of inventories in order to facilitate customer order flow. The Company may incur losses as a result of price movements in these inventories due to changes in interest rates, foreign exchange rates, equity prices and other political factors. The Company is not subject to direct market risk due to changes in foreign exchange rates. However, the Company is subject to market risk as a result of changes in interest rates and equity prices, which are affected by global economic conditions. The Company manages its exposure to market risk by limiting its net long or short positions. Trading and inventory accounts are monitored daily by management and the Company has instituted position limits.

Credit risk represents the amount of accounting loss the Company could incur if counterparties to its proprietary transactions fail to perform and the value of any collateral proves inadequate. Although credit risk relating to various financing activities is reduced by the industry practice of obtaining and maintaining collateral, the Company maintains more stringent requirements to further reduce its exposure. The Company monitors its exposure to counterparty risk on a daily basis by using credit exposure information and monitoring collateral values. The Company maintains a credit committee, which reviews margin requirements for large or concentrated accounts and sets higher requirements or requires a reduction of either the level of margin debt or investment in high-risk securities or, in some cases, requiring the transfer of the account to another broker-dealer.

The Company monitors its market and credit risks daily through internal control procedures designed to identify and evaluate the various risks to which the Company is exposed. There can be no assurance, however, that the Company's risk management procedures and internal controls will prevent losses from occurring as a result of such risks.

The following table shows the market values of the Company's marketable and non-marketable securities owned and securities sold, but not yet purchased as of September 30, 2012:

	Securities owned	Securities sold, but not yet purchased
Corporate stocks –marketable	\$ 18,000	\$ 1,000
Municipal bonds - marketable	678,000	0
Restricted stock and warrants – non-marketable	56,000	-
Total	\$ 752,000	\$ 1,000

Item 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

See Part IV, Item 15(a)(1) for a list of financial statements filed as part of this Report.

Item 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

There were no disagreements with accountants on accounting and financial disclosure for the fiscal year ended September 30, 2012.

Item 9A. CONTROLS AND PROCEDURES

Evaluation of disclosure controls and procedures: Disclosure controls and procedures are our controls and other procedures that are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act, are recorded, processed, summarized and reported within the time period specified by the SEC's rules and forms. Disclosure and control procedures are also designed to ensure that such information is accumulated and communicated to management, including the chief executive officer and principal accounting officer, to allow timely decisions regarding required disclosures. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act, is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding disclosure.

Based on the evaluation of the Company's disclosure controls and procedures (as defined in the Exchange Act Rules 13a-15(e) and 15d-15(e)) required by the Exchange Act Rules 13a-15(b) or 15d-15(b), the Company's Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were adequate and effective to ensure that material information relating to the Company and its consolidated subsidiaries would be made known to them by others within those entities.

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a - 15(f) of the Exchange Act.

The Company's management conducted an evaluation of the effectiveness of its internal control over financial reporting, as of September 30, 2012, based on the framework and criteria established in Internal Control - Integrated Framework, issued by the Committee of Sponsoring Organizations of the Treadway Commission. This evaluation included review of the documentation of controls, evaluation of the design effectiveness of controls, testing of the operating effectiveness of controls and a conclusion on this evaluation. Based on this evaluation, the Company's principal executive officer and principal financial officer concluded that the Company's internal control over financial reporting was effective as of September 30, 2012.

Management believes that a controls system, no matter how well designed and operated, cannot provide absolute assurance that the objectives of the controls system are met, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

This management report on internal control over financial reporting shall not be deemed to be filed for purposes of Section 18 of the Exchange Act or otherwise subject to the liabilities of that Section.

This Annual Report on Form 10-K does not include an attestation report of our registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by our registered public accounting firm pursuant to SEC rules that permit us to provide only management's report in this Annual Report on Form 10-K.

Changes in internal controls: We have continually had in place systems relating to internal controls over financial reporting. There were no significant changes in the Company's internal controls over financial reporting identified with the evaluation thereof during the fiscal year ended September 30, 2012 or in other factors that could significantly affect those controls and procedures subsequent to the date of our evaluation nor any significant deficiencies or material weaknesses in such controls and procedures requiring corrective actions with the exception of the following:

Item 9B. OTHER INFORMATION

There is no other information to be disclosed by the Company during the fourth quarter of fiscal year 2012 that has not been reported on a current report on Form 8-K.

PART III

Item 10. DIRECTORS EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information required by this Item will be included in the Company's 2012 Proxy Statement and is incorporated herein by reference.

Code of Ethics

The Company has adopted a Code of Ethics that applies to its principal executive officer, principal financial officer, and persons performing similar functions. The Code of Ethics is incorporated herein by reference.

Nomination Procedures

There have been no material changes to the procedures by which stockholders may recommend nominees to the Company's Board of Directors.

Item 11. EXECUTIVE COMPENSATION

The information required by this Item will be included in the Company's 2012 Proxy Statement and is incorporated herein by reference.

Item 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information required by this Item will be included in the Company's 2012 Proxy Statement and is incorporated herein by reference.

Item 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by this Item will be included in the Company's 2012 Proxy Statement and is incorporated herein by reference.

Item 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

The information required by this Item will be included in the Company's 2012 Proxy Statement and is incorporated herein by reference.

PART IV

Item 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

(a) The following financial statements are included in Part II, Item 8:

1. Financial Statements

Report of Independent Registered Accounting firm

Consolidated Financial Statements

Statements of Financial Condition, September 30, 2012 and September 30, 2011

Statements of Operations for the Years ended September 30, 2012 and September 30, 2011

Statement of Changes in Stockholders' Deficit for the Years ended September 30, 2012 and September 30, 2011

Statements of Cash Flows for the Years ended September 30, 2012 and September 30, 2011

Notes to Consolidated Financial Statements

2. Financial Statement Schedules

Schedules not listed above have been omitted because they are not applicable or have been included in notes to the consolidated financial statements.

(b) See Exhibit Index.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders
National Holdings Corporation

We have audited the accompanying consolidated statements of financial condition of National Holdings Corporation and Subsidiaries (the "Company") as of September 30, 2012 and 2011, and the related consolidated statements of operations, changes in stockholders' deficit and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of National Holdings Corporation and Subsidiaries as of September 30, 2012 and 2011, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. The Company has incurred significant losses and has a working capital deficit as of September 30, 2012, as more fully described in Note 1. These issues raise substantial doubt about the Company's ability to continue as a going concern. Management's plans in regard to these matters are also described in Note 1. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

SEPTEMBER 30, 2012 and SEPTEMBER 30, 2011

NOTE 1. ORGANIZATION AND GOING CONCERN

National Holdings Corporation (“National” or the “Company”), a Delaware corporation organized in 1996, is a financial services organization, operating primarily through its wholly owned subsidiaries, National Securities Corporation (“National Securities” or “NSC”), vFinance Investments, Inc. (“vFinance Investments”) and EquityStation, Inc. (“EquityStation”) (collectively, the “Broker-Dealer Subsidiaries”). The Broker-Dealer Subsidiaries conduct a national securities brokerage business through their main offices in New York, New York, Boca Raton, Florida, and Seattle, Washington.

Through its Broker-Dealer Subsidiaries, the Company offers (1) full service retail brokerage to approximately 39,000 high net worth individual and institutional clients, (2) provides investment banking, merger, acquisition and advisory services to micro, small and mid-cap high growth companies, and (3) engages in trading securities, including making markets in over 5,000 micro and small-cap, NASDAQ and other exchange listed stocks and (4) provides liquidity in the United States Treasury marketplace. The Broker-Dealer Subsidiaries are introducing brokers and clear all transactions through clearing organizations on a fully disclosed basis. They are registered with the Securities and Exchange Commission (“SEC”), are members of the Financial Industry Regulatory Authority (“FINRA”) and Securities Investor Protection Corporation (“SIPC”). National Securities and vFinance Investments are also members of the National Futures Association (“NFA”).

National also has a wholly owned subsidiary, National Asset Management, Inc., a Washington corporation (“NAM”). NAM is a federally-registered investment adviser providing asset management advisory services to high net worth clients for a fee based upon a percentage of assets managed.

National also has a wholly owned subsidiary, National Insurance Corporation, a Washington corporation (“National Insurance”). National Insurance provides fixed insurance products to its clients, including life insurance, disability insurance, long term care insurance and fixed annuities.

Going Concern

The accompanying consolidated financial statements have been prepared on a going concern basis. The Company had a net loss of approximately \$1,937,000 during the fiscal year ended September 30, 2012 and has a working capital deficit of approximately \$5,378,000 as of September 30, 2012.

At September 30, 2012, National Holdings Corporation had total indebtedness of \$7.8 million. We cannot assure you that our operations will generate funds sufficient to repay our existing debt obligations as they come due. Our failure to repay our indebtedness and make interest payments as required by our debt obligations could have a material adverse effect on our operations. The Company issued secured convertible promissory notes aggregating \$5,000,000 during March, April and September 2012 and a subordinated note of \$1.0 million during September 2012, which may mature as early as August 2013, or, if certain conditions are met, in March 2015. We used a portion of the proceeds from the convertible promissory notes and subordinated notes to satisfy the principal of \$4.2 million convertible promissory notes which matured in March and June 2012. The Company also has a remaining obligation of \$1.8 million convertible promissory note which now matures in January 2013. Such notes are unsecured, are solely the obligation of National Holdings Corporation and not any of its operating subsidiaries, including our Broker-Dealer Subsidiaries. Such notes are due to entities affiliated to two of the Company’s directors. Our plan is to satisfy our remaining obligations under the \$1.8 million convertible note and the \$1.0 million subordinated note by either: 1)

providing incentives to the holders to either extend the maturity of the notes or convert the notes into our shares of common stock, 2) securing additional financing between now and the maturity dates to repay the notes, 3) repaying the notes in cash and other available current assets at maturity, or 4) a combination of the aforementioned options. Additionally, we intend to satisfy our obligations under the \$5,000,000 convertible promissory notes by: 1) securing the acceptance of the holder of its capital restructuring, which would allow the Company to firmly extend the maturity of the note to March 2015, or 2) encouraging the holder to convert its note to the Company's Series E Preferred Stock in due course. While the Company believes that it will ultimately satisfy its obligations under such convertible notes, it cannot guarantee that it will be able to do so at favorable terms, or at all. Should the Company default on the convertible notes and the lender forecloses on the debt, the operations of our subsidiaries will not be initially impacted. However, following default, the lender could potentially liquidate the holdings of our operating subsidiaries sometime in the future in accordance with applicable SEC and FINRA rules and regulations.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation

The consolidated financial statements include the accounts of National and its' wholly owned and majority owned subsidiaries. All significant inter-company accounts and transactions have been eliminated in consolidation.

Estimates

The preparation of financial statements in conformity with generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. Furthermore, the Company has been named as a defendant in various customer arbitrations. These claims result from the actions of brokers affiliated with the Company. The Company may have established liabilities for potential losses from such complaints, legal actions, government investigations, and proceedings where necessary in accordance with GAAP. In establishing these liabilities, management uses judgment to determine the probability that losses have will be incurred and a reasonable estimate of the amount of losses. In making these decisions, management bases its judgments on our knowledge of the situations, consultations with legal counsel and our historical experience in resolving similar matters. In many lawsuits, arbitrations and regulatory proceedings, it is not possible to determine whether a liability has been incurred or to estimate the amount of that liability until the matter is close to resolution. However, accruals are reviewed regularly and are adjusted to reflect our estimates of the impact of developments, rulings, advice of counsel and any other information pertinent to a particular matter. Because of the inherent difficulty in predicting the ultimate outcome of legal and regulatory actions, we cannot predict with certainty the eventual loss or range of loss related to such matters. If managements judgment proves to be incorrect, our liability for losses and contingencies may not accurately reflect actual losses that result from these actions, which could materially affect results in the period other expenses are ultimately determined. As of September 30, 2012, the Company accrued approximately \$338,000 for these matters. These claims may be covered by our errors and omissions insurance policy. While we will vigorously defend ourselves in these matters, and will assert insurance coverage and indemnification to the maximum extent possible, there can be no assurance that these lawsuits and arbitrations will not have a material adverse impact on our financial position.

Revenue Recognition

The Company generally acts as an agent in executing customer orders to buy or sell listed and over-the-counter securities in which it may or may not make a market, and charges commissions based on the services the Company provides to its customers. In executing customer orders to buy or sell a security in which the Company makes a market, the Company may sell to, or purchase from, customers at a price that is substantially equal to the current inter-dealer market price plus or minus a mark-up or mark-down. The Company may also act as agent and execute a customer's purchase or sale order with another broker-dealer market-maker at the best inter-dealer market price available and charge a commission. Mark-ups, mark-downs and commissions are generally priced competitively based on the services it provides to its customers. In each instance the commission charges, mark-ups or mark-downs, are in compliance with guidelines established by FINRA.

Customer security transactions and the related commission income and expense are recorded on a trade date basis. Customers who are financing their transaction on margin are charged interest. The Company's margin requirements are in accordance with the terms and conditions mandated by its clearing firms, National Financial Services LLC ("NFS"), Legent Clearing LLC ("Legent"), ICBC, formerly known as Fortis Securities, LLC ("ICBC"), Rosenthal Collins Group, LLC. ("Rosenthal") and R.J. O'Brien ("RJO"). The interest is billed on the average daily balance of the margin account.

Investment banking revenues include gains, losses, and fees, net of syndicate expenses, arising from securities offerings in which the Company acts as an underwriter or agent. Investment banking revenues also include fees earned from providing financial advisory services. Investment banking management fees are recognized on the offering date, sales concessions on the trade date, and underwriting fees at the time the underwriting is completed and the income is reasonably determinable.

Net trading profits result from mark-ups and mark-downs in securities transactions entered into for the account of the Company. Some of these transactions may involve the Company taking a position in securities that may expose the Company to losses. Net trading profits are recorded on a trade date basis.

Clearing and other brokerage income are fees charged to the broker on customer's security transactions, and are recognized as of the trade date.

Investment advisory fees are derived from account management and investment advisory services provided to high net worth clients. These fees are determined based on a percentage of the customers assets under management, may be billed monthly or quarterly and recognized when collected.

Other revenue consists of miscellaneous fees charged to both customer and our independent contractors for services rendered.

Cash and Cash Equivalents

The Company considers all highly liquid temporary cash investments with an original maturity of three months or less when purchased, to be cash equivalents.

Fixed Assets

Fixed assets are recorded at cost. Depreciation is calculated using the straight-line method based on the estimated useful lives of the related assets, which range from three to five years. Leasehold improvements are amortized using the straight-line method over the shorter of the estimated useful lives of the assets or the terms of the leases. Maintenance and repairs are charged to expense as incurred; costs of major additions and betterments that extend the useful life of the asset are capitalized. When assets are retired or otherwise disposed of, the costs and related accumulated depreciation or amortization are removed from the accounts and any gain or loss on disposal is recognized.

Income Taxes

The Company recognizes deferred tax assets and liabilities based on the difference between the financial statements carrying amounts and the tax basis of assets and liabilities, using the effective tax rates in the years in which the differences are expected to reverse. A valuation allowance related to deferred tax assets is also recorded when it is more likely than not that some or all of the deferred tax asset may not be realized.

Fair Value of Financial Instruments

Effective January 1, 2008, the Company adopted FASB Accounting Standards Codification 820-Fair Value Measurements and Disclosures, or ASC 820, for assets and liabilities measured at fair value on a recurring basis. ASC 820 establishes a common definition for fair value to be applied to existing generally accepted accounting principles that require the use of fair value measurements, establishes a framework for measuring fair value, and expands disclosure about such fair value measurements.

ASC 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Additionally, ASC 820 requires the use of valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. These inputs are prioritized below:

Level 1: Observable inputs such as quoted market prices in active markets for identical assets or liabilities

Level 2: Observable market-based inputs or unobservable inputs that are corroborated by market data

Level 3: Unobservable inputs for which there is little or no market data, which require the use of the reporting entity's own assumptions.

The Company had securities owned- nonmarketable including warrants it received as partial compensation from clients for investment banking services and subordinated borrowings as Level 2 assets and liabilities as of September 30, 2012 and 2011. The carrying amounts of the convertible promissory notes at September 30, 2012 and 2011 approximate their respective fair value based on the Company's incremental borrowing rate.

Cash and cash equivalents include money market securities that are considered to be highly liquid and easily tradable as of September 30, 2012 and 2011, respectively. These securities are valued using inputs observable in active markets for identical securities and are therefore classified as Level 1 within our fair value hierarchy. The fair value of the derivative liabilities is based on the quoted market prices of the Company's stock.

The warrants issued by the clients to the Company as partial compensation for banking services are not readily convertible to cash pursuant to ASC 605-10-20. Accordingly, they are classified as non-marketable securities. Once the securities underlying the warrants have quoted prices available in an active market that can rapidly absorb the quantity held by the Company without significantly affecting the price, the Company attributes a value to the warrants using the Black-Scholes method based on the respective price of the warrants and the quoted prices of the securities underlying the warrants and other key inputs.

In addition, FASB ASC 825-10-25 Fair Value Option, or ASC 825-10-25, was effective for January 1, 2008. ASC 825-10-25 expands opportunities to use fair value measurements in financial reporting and permits entities to choose to measure many financial instruments and certain other items at fair value. The Company did not elect to use the fair value measurements for any of its qualifying financial instruments.

Impairment of Long-Lived Assets

The Company reviews long-lived assets for impairment at least once a year or earlier if circumstances and situations change such that there is an indication that the carrying amounts may not be recovered, in accordance with professional standards. In such circumstances, the Company will estimate the future cash flows expected to result from the use of the asset and its eventual disposition. Future cash flows are the future cash inflows expected to be generated by an asset less the future outflows expected to be necessary to obtain those inflows. If the sum of the expected future cash flows (undiscounted and without interest charges) is less than the carrying amount of the asset, the Company will recognize an impairment loss to adjust to the fair value of the asset.

Common Stock Purchase Warrants

The Company accounts for the issuance of common stock purchase warrants issued in connection with capital financing transactions in accordance with professional standards for "Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company's Own Stock". In accordance with professional standards, the Company classifies as equity any contracts that (i) require physical settlement or net-share settlement or (ii) gives the Company a choice of net-cash settlement or settlement in its own shares (physical settlement or net-share settlement). The Company classifies as assets or liabilities any contracts that (i) require net-cash settlement (including a requirement to net-cash settle the contract if an event occurs and if that event is outside the control of the Company) or (ii) gives the counterparty a choice of net-cash settlement or settlement in shares (physical settlement or net-share settlement).

The Company assessed the classification of its derivative financial instruments as of September 30, 2011, which consist of common stock purchase warrants, and determined that such warrants were equity contracts.

Convertible Instruments

The Company evaluates and accounts for conversion options embedded in its convertible instruments in accordance with professional standards for "Accounting for Derivative Instruments and Hedging Activities".

Professional standards generally provides three criteria that, if met, require companies to bifurcate conversion options from their host instruments and account for them as free standing derivative financial instruments. These three criteria include circumstances in which (a) the economic characteristics and risks of the embedded derivative instrument are not clearly and closely related to the economic characteristics and risks of the host contract, (b) the hybrid instrument that embodies both the embedded derivative instrument and the host contract is not re-measured at fair value under otherwise applicable generally accepted accounting principles with changes in fair value reported in earnings as they occur and (c) a separate instrument with the same terms as the embedded derivative instrument would be considered a derivative instrument. Professional standards also provide an exception to this rule when the host instrument is deemed to be conventional as defined under professional standards as "The Meaning of Conventional Convertible Debt Instrument".

The Company accounts for convertible instruments (when it has determined that the embedded conversion options should not be bifurcated from their host instruments) in accordance with professional standards when "Accounting for Convertible Securities with Beneficial Conversion Features," as those professional standards pertain to "Certain Convertible Instruments." Accordingly, the Company records, when necessary, discounts to convertible notes for the intrinsic value of conversion options embedded in debt instruments based upon the differences between the fair value of the underlying common stock at the commitment date of the note transaction and the effective conversion price embedded in the note. Debt discounts under these arrangements are amortized over the term of the related debt to their earliest date of redemption. The Company also records when necessary deemed dividends for the intrinsic value of

conversion options embedded in preferred shares based upon the differences between the fair value of the underlying common stock at the commitment date of the note transaction and the effective conversion price embedded in the note.

The Company evaluated the conversion option embedded in the Series A Preferred Stock and determined, in accordance with the provisions of these statements, that such conversion option does not meet the criteria requiring bifurcation of these instruments. The characteristics of the common stock that is issuable upon a holder's exercise of the conversion option embedded in the convertible preferred stock are deemed to be clearly and closely related to the characteristics of the preferred shares. Additionally, the Company's conversion options, if free standing, would not be considered derivatives subject to the accounting guidelines prescribed in accordance with professional standards.

ASC 815-40 provides that, among other things, generally, if an event is not within the entity's control could require net cash settlement, then the contract shall be classified as an asset or a liability.

Pursuant to ASC 815-40-25-22, if the number of currently authorized but unissued shares, less the maximum number of shares that could be required to be delivered during the contract period under existing commitments, including outstanding convertible debt or instruments, outstanding stock options and warrants, exceeds the maximum number of shares that could be required to be delivered under share settlement of the contract. The warrants issued pursuant to the Series D transactions, even if not all vested, triggered this excess, at the date of issuance. Accordingly, the share settlement of the exercise of such warrants was not within the control of the Company and was classified as liability.

Additionally, the Company needs to determine whether the instruments issued in the transactions are considered indexed to the Company's own stock. While the Series C and Series D Preferred Stock transactions do not provide variability involving sales volume, stock index, commodity price, revenue targets, among other things, they do provide for variability involving future equity offerings and issuance of equity-linked financial instruments. While the instruments do not contain an exercise contingency, other than the passage of time for the warrants, the settlement of the warrants associated with Series C and D and the Series C and D Preferred Stock would not equal the difference between the fair value of a fixed number of the Company's common stock and a fixed stock price. Accordingly, they were not indexed to the Company's stock price.

The Company accounted for the embedded conversion features included in its Series C and Series D Preferred Stock as well as the related warrants and the warrants issued in connection with the issuance of the Company's shares of common stock during 2010 as derivative liabilities through March 31, 2011. At March 31, 2011, all such financial instruments were reclassified as equity contracts.

Net Loss per Common Share

Basic net loss per share is computed on the basis of the weighted average number of common shares outstanding. Diluted net loss per share is computed on the basis of the weighted average number of common shares outstanding plus the potential dilution that could occur if securities or other contracts to issue common shares were exercised or converted.

	Years Ended September 30,	
	2012	2011
Numerator:		
Net loss	\$ (1,937,000)	\$ (4,713,000)
Preferred stock dividends	(93,000)	(414,000)
Increase in fair value of derivative liabilities	-	1,603,000
Numerator for basic earnings per share- loss attributable to common stockholders - as adjusted	(2,030,000)	(3,524,000)
Numerator for diluted earnings per share-net loss attributable to common stockholders - as adjusted	\$ (2,030,000)	\$ (3,524,000)
Denominator:		
Denominator for basic earnings per share--weighted average shares	25,014,166	19,697,033
Effect of dilutive securities:		
Assumed conversion of Series A, C, and D preferred stock	-	-
Stock options	-	-
Warrants	-	-
Assumed conversion of convertible notes payable	-	-
Denominator for diluted earnings per share--adjusted weighted-average shares and assumed conversions	25,014,166	19,697,033
Loss per share:		
Net loss available to common stockholders		
Basic	\$ (0.08)	\$ (0.18)
Diluted	\$ (0.08)	\$ (0.18)

The weighted-average anti-dilutive common share equivalents are as follows:

	September 30,	
	2012	2011
Series A Preferred Stock	921,000	3,684,000
Series C Preferred Stock	3,416,692	3,416,692
Series D Preferred Stock	6,000,000	6,000,000
Convertible notes payable	6,712,123	3,375,000
Options	2,561,137	4,403,556
Warrants	14,842,941	14,329,942
	34,453,893	35,209,190

The anti-dilutive common shares outstanding at September 30, 2012 and 2011 are as follows:

	September 30,	
	2012	2011
Series A Preferred Stock	-	3,684,000
Series C Preferred Stock	-	3,416,692
Series D Preferred Stock	-	6,000,000
Convertible notes payable	11,125,000	3,375,000
Options	1,312,002	3,810,271
Warrants	14,717,941	14,967,941
	27,154,943	35,253,904

Stock-Based Compensation

ASC Topic 718 accounting for “Share Based Payment” addresses all forms of share based payment (“SBP”) awards including shares issued under employee stock purchase plans, stock options, restricted stock and stock appreciation rights. Under Topic 718, SBP awards result in a charge to operations measured at fair value on the awards grant date, based on the estimated number of awards expected to vest over the service period.

The Company has historically used the Black-Scholes option valuation model to estimate the fair value of any options granted. The model includes subjective input assumptions that can materially affect the fair value estimates. The model was developed for use in estimating the fair value of traded options that have no vesting restrictions and that are fully transferable. For example, the expected volatility is estimated based on the most recent historical period of time equal to the weighted average life of the options granted. Options issued under the Company's option plans have characteristics that differ from traded options.

Concentrations of Credit Risk

The Company is engaged in trading and providing a broad range of securities brokerage and investment services to a diverse group of retail and institutional clientele, as well as corporate finance and investment banking services to corporations and businesses. Counterparties to the Company's business activities include broker-dealers and clearing organizations, banks and other financial institutions. The Company primarily uses clearing brokers to process transactions and maintain customer accounts on a fee basis for the Company. The Company uses three clearing brokers for substantially all of its business. The Company permits the clearing firms to extend credit to its clientele

secured by cash and securities in the client's account. The Company's exposure to credit risk associated with the non-performance by its customers and counterparties in fulfilling their contractual obligations can be directly impacted by volatile or illiquid trading markets, which may impair the ability of customers and counterparties to satisfy their obligations to the Company. The Company has agreed to indemnify the clearing brokers for losses they incur while extending credit to the Company's clients. It is the Company's policy to review, as necessary, the credit standing of its customers and counterparties. Amounts due from customers that are considered uncollectible by the clearing broker are charged back to the Company by the clearing broker when such amounts become determinable. Upon notification of a charge back, such amounts, in total or in part, are then either (i) collected from the customers, (ii) charged to the broker initiating the transaction and included in other receivables in the accompanying consolidated statements of financial condition, and/or (iii) charged as an expense in the accompanying consolidated statements of financial condition, based on the particular facts and circumstances.

The Company maintains cash with major financial institutions. All interest bearing accounts are insured up to \$250,000. On October 14, 2008 the FDIC announced its temporary Transaction Account Guarantee Program, which provides full coverage for non-interest bearing transaction deposit accounts at FDIC-insured institutions that agree to participate in the program. The transaction account guarantee applies to all personal and business checking deposit accounts that do not earn interest at participating institutions. This unlimited insurance coverage is temporary and will remain in effect for participating institutions until December 31, 2012. As a result of this coverage the Company believes it is not exposed to any significant credit risks for cash.

Other Receivables

The Company extends unsecured credit in the normal course of business to its registered representatives. The determination of the amount of uncollectible accounts is based on the amount of credit extended and the length of time each receivable has been outstanding, as it relates to each individual registered representative. The allowance for doubtful accounts reflects the amount of loss that can be reasonably estimated by management, and if any, is included in Occupancy, equipment and other administrative costs in the accompanying consolidated statements of operations.

Advances to Registered Representatives

Advances are given to certain registered representatives as an incentive for their affiliation with the Broker-Dealer Subsidiaries. The representative signs an independent contractor agreement with the Broker-Dealer Subsidiaries for a specified term, typically a three-year period. The advance is then amortized on a straight-line basis or based on a percentage of production over the life of the broker's agreement with the Broker-Dealer Subsidiaries, and is included in commission expense in the accompanying consolidated statements of operations. In the event a representative's affiliation terminates prior to the fulfillment of their contract, the representative is required to repay the unamortized balance.

Securities Owned

Marketable securities which consist of publicly traded unrestricted common stock and bonds are valued at the closing price on the valuation date. Non-marketable securities which consist partly of restricted common stock and of non-tradable warrants exercisable into freely trading common stock of public companies are carried at market value or as required, at fair value as determined in good faith by management.

Other Assets

Other assets consist primarily of prepaid expenses and lease deposits.

Legal and Other Contingencies

The outcomes of legal proceedings and claims brought against the Company are subject to significant uncertainty. ASC 450-10, Accounting for Contingencies, requires that an estimated loss from a loss contingency such as a legal proceeding or claim should be accrued by a charge to income if it is probable that an asset has been impaired or a liability has been incurred and the amount of the loss can be reasonably estimated. Disclosure of a contingency is required if there is at least a reasonable possibility that a loss has been incurred. In determining whether a loss should be accrued we evaluate, among other factors, the degree of probability of an unfavorable outcome and the ability to make a reasonable estimate of the amount of loss. Changes in these factors could materially impact our results of operations, financial position, or our cash flows.

Recently Adopted Accounting Guidance

In September 2011, the FASB issued Accounting Standard Update (“ASU”) No. 2011-08, Testing Goodwill for Impairment. The new guidance provides an entity the option to first perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If an entity determines that this is the case, it is required to perform the currently prescribed two-step goodwill impairment test to identify potential goodwill impairment and measure the amount of goodwill impairment loss to be recognized for that reporting unit (if any). If an entity determines that the fair value of a reporting unit is less than its carrying amount, the two-step goodwill impairment test is not required. The new guidance was effective for the Company beginning October 1, 2012 and did not have material impact on our financial statements upon adoption.

In June 2011, the FASB issued ASU No. 2011-05, Presentation of Comprehensive Income. The new guidance eliminates the current option to report other comprehensive income and its components in the statement of changes in equity. Instead, an entity will be required to present either a continuous statement of net income and other comprehensive income or in two separate but consecutive statements. The new guidance was effective for the Company beginning January 1, 2012 and did not have material impact on our financial statements upon adoption.

In May 2011, the FASB issued ASU No. 2011-04, Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs. The guidance amends the accounting and disclosure requirements on fair value measurements. The new guidance limits the highest-and-best-use measure to nonfinancial assets, permits certain financial assets and liabilities with offsetting positions in market or counterparty credit risks to be measured at a net basis, and provides guidance on the applicability of premiums and discounts. Additionally, the new guidance expands the disclosures on Level 3 inputs by requiring quantitative disclosure of the unobservable inputs and assumptions, as well as description of the valuation processes and the sensitivity of the fair value to changes in unobservable inputs. The new guidance was effective for the Company beginning January 1, 2012 and did not have material impact on our financial statements upon adoption.

In January 2010, the FASB issued ASU No. 2010-06, Improving Disclosures about Fair Value Measurements. ASU No. 2010-06 provides amendments to ASC Subtopic 820-10 that requires new disclosures as follows:

- Transfers in and out of Level 1 and 2. A reporting entity should disclose separately the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements and describe the reasons for the transfers.
- Activity in Level 3 fair value measurements. In the reconciliation for fair value measurements using significant unobservable inputs (Level 3), a reporting entity should present separately information about purchases, sales, issuances, and settlements (that is, on a gross basis rather than as one net number.)

ASU No. 2010-06 provides amendments to ASC Subtopic 820-10 that clarifies existing disclosures as follows:

- Level of disaggregation. A reporting entity should provide fair value measurement disclosures for each class of assets and liabilities. A class is often a subset of assets or liabilities within a line item in the statement of financial position. A reporting entity needs to use judgment in determining the appropriate classes of assets and liabilities.
- Disclosures about inputs and valuation techniques. A reporting entity should provide disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements. Those disclosures are required for fair value measurements that fall in either Level 2 or Level 3.

The new guidance was effective for the Company beginning October 1, 2011 and has financial statement presentation changes only.

Recent Accounting Guidance Not Yet Adopted

In July 2012, the FASB issued ASU No. 2012-02, Testing indefinite-lived intangible assets for impairment. The update aims to reduce the cost and complexity of performing an impairment test for indefinite-lived intangible assets by simplifying how an entity tests those assets for impairment and to improve consistency in impairment testing guidance among long-lived asset categories. This guidance is effective for the Company prospectively beginning on October 1, 2012. The adoption of this accounting guidance is not expected to have a material impact on the Company's financial statements.

In December 2011, the FASB issued ASU No. 2011-11, Disclosures about offsetting assets and liabilities, an accounting update that creates new disclosure requirements requiring entities to disclose both gross and net information for derivatives and other financial instruments that are either offset in the statement of financial condition or subject to an enforceable master netting arrangement or similar arrangement. The disclosure requirements are effective for the Company beginning on or after January 1, 2013. Since these amended principles require only additional disclosures concerning offsetting and related arrangements, adoption will not affect the Company's consolidated statements of income or financial condition.

NOTE 3. CLEARING AGREEMENTS

National Securities Corporation and vFinance Investments, Inc. have separate but coterminous clearing agreements with National Financial Services, LLC with a termination date of February 1, 2015. The clearing agreement includes a termination fee if either broker dealer terminates the agreement without cause. The Broker Dealer Subsidiaries currently have clearing agreements with NFS, Legent, ICBC and Rosenthal and RJO.

NOTE 4. BROKER-DEALERS AND CLEARING ORGANIZATIONS RECEIVABLES AND PAYABLES

At September 30, 2012 and 2011, the receivables of \$3,650,000 and \$2,714,000, respectively, from broker-dealers and clearing organizations represent net amounts due for fees and commissions. At September 30, 2012 and 2011, the amounts payable to broker-dealers and clearing organizations of \$119,000 and \$139,000, respectively, represent amounts owed to clearing firms or other broker dealers for fees on transactions and payables to other broker dealers associated with tri-party clearing agreements.

NOTE 5. OTHER RECEIVABLES

At September 30, 2012 and 2011, the Company had other receivables of \$147,000 and \$299,000, respectively, primarily from underwriting and management fees from investment banking transactions that the Company participated in.

NOTE 6. ADVANCES TO REGISTERED REPRESENTATIVES

An analysis of advances to registered representatives for the fiscal years ended September 30, 2012 and 2011 is as follows:

	Advances to Registered Representative
Balance, September 30, 2010	\$ 1,441,000
Advances	78,000
