Notes to Condensed Consolidated Financial Statements

1. Basis of Presentation

The condensed consolidated financial statements included herein are unaudited and have been prepared by Build-A-Bear Workshop, Inc. and its subsidiaries (collectively, the Company) pursuant to the rules and regulations of the U.S. Securities and Exchange Commission (SEC). Certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles (GAAP) have been condensed or omitted pursuant to such rules and regulations. The condensed consolidated balance sheet of the Company as of December 29, 2012 was derived from the Company's audited consolidated balance sheet as of that date. All other condensed consolidated financial statements contained herein are unaudited and reflect all adjustments which are, in the opinion of management, necessary to summarize fairly the financial position of the Company and the results of the Company's operations and cash flows for the periods presented. All of these adjustments are of a normal recurring nature. All significant intercompany balances and transactions have been eliminated in consolidation. As a toy retailer, the Company's sales are highest in the fourth quarter, followed by the first quarter. The timing of holidays and school vacations can impact quarterly results. Because of the seasonal nature of the Company's operations, results of operations of any single reporting period should not be considered as indicative of results for a full year. These condensed consolidated financial statements should be read in conjunction with the Company's audited consolidated financial statements for the fiscal year ended December 29, 2012 that were included in the Company's annual report on Form 10-K filed with the SEC on March 14, 2013.

In the first quarter of fiscal 2013, the Company adopted new accounting guidance with regard to the presentation and disclosure of accumulated other comprehensive income (loss) in accordance with Accounting Standards Update 2013-02. The adoption of this guidance impacted only the presentation and disclosure of accumulated other comprehensive income (loss).

2. Prepaid Expenses and Other Assets

Prepaid expenses and other current assets consist of the following (in thousands):

June 29,	December 29,	June 30,
2013	2012	2012

Prepaid rent	\$7,964	\$ 8,736	\$8,038
Prepaid income taxes	237	-	692
Other	4,914	5,480	4,874
	\$13,115	\$ 14,216	\$13,604

3. Property and Equipment

In 2012, the Company initiated a turnaround plan that includes the closure of a number of stores. The Company considers a more likely than not assessment that an individual location will close as a triggering event to review the store asset group for recoverability. As a result of this review for the first and second quarters of fiscal 2013, it was determined that certain stores would not be able to recover the carrying value of store leasehold improvements through expected undiscounted cash flows over the shortened remaining life of the related assets. Accordingly, the carrying value of the assets was reduced to fair value, calculated as the estimated future cash flows for each asset group, and asset impairment charges of \$0.2 million and \$0.6 million were recorded in the thirteen weeks and twenty-six ended June 29, 2013, respectively, which are included in selling, general and administrative expenses as a component of loss before income taxes in the Retail segment. The inputs used to determine the fair value of the assets are Level 3 inputs as defined by ASC section 820-10. Any remaining net book value is depreciated over the shortened expected life. The thirteen and twenty-six weeks ended June 30, 2012, included similar impairment charges of \$0.2 million.

4. Stock-based Compensation

The following table is a summary of the balances and activity for restricted stock and stock options for the twenty-six weeks ended June 29, 2013:

	Restricted Options	
	Stock	
Outstanding, December 29, 2012	860,325	1,155,239
Granted	321,540	195,512
Vested	395,614	—
Exercised	—	19,327
Forfeited	21,078	14,967
Canceled or expired	—	41,150
Outstanding, June 29, 2013	765,173	1,275,307

For the thirteen and twenty-six weeks ended June 29, 2013, selling, general and administrative expense includes \$0.8 million and \$1.6 million, respectively, of stock-based compensation expense. For the thirteen and twenty-six weeks ended June 30, 2012, selling, general and administrative expense includes \$1.0 million and \$2.0 million, respectively, of stock-based compensation expense. As of June 29, 2013, there was \$4.7 million of total unrecognized compensation expense related to nonvested restricted stock and option awards which is expected to be recognized over a weighted-average period of 1.7 years.

The total fair value of shares vested during the twenty-six weeks ended June 29, 2013 and June 30, 2012 was \$2.2 million and \$4.0 million, respectively.

5. Earnings (Loss) per Share

The Company uses the two-class method to compute basic and diluted earnings or loss per common share. In periods of net loss, no effect is given to the Company's participating securities as they do not contractually participate in losses of the Company. The following table sets forth the computation of basic and diluted loss per share (in thousands, except share and per share data):

	Thirteen weeks ended		Twenty-six weeks ended	
	June 29,	June 30,	June 29,	June 30,
	2013	2012	2013	2012
NUMERATOR:				
Net loss before allocation of earnings to participating securities	\$(6,218) \$(7,551) \$(6,205) \$(8,568
Less: Earnings allocated to participating securities	-	-	-	-

Edgar Filing: BUILD A BEAR WORKSHOP INC - Form 10-Q

Net loss after allocation of earnings to participating securities	\$ (6,218)	\$ (7,551)	\$ (6,205)	\$ (8,568)
---	-------------	-------------	-------------	-------------

DENOMINATOR:

Weighted average number of common shares outstanding - basic	16,460,474	16,458,889	16,345,882	16,248,884
Dilutive effect of share-based awards:	-	-	-	-
Weighted average number of common shares outstanding - dilutive	16,460,474	16,458,889	16,345,882	16,248,884
Basic loss per common share attributable to Build-A-Bear Workshop, Inc. stockholders:	\$ (0.38)	\$ (0.46)	\$ (0.38)	\$ (0.53)
Diluted loss per common share attributable to Build-A-Bear Workshop, Inc. stockholders	\$ (0.38)	\$ (0.46)	\$ (0.38)	\$ (0.53)

In calculating diluted earnings per share for the thirteen and twenty-six week periods ended June 29, 2013, options to purchase 1,275,307 shares of common shares that were outstanding at the end of the period were not included in the computation of diluted earnings per share due to their anti-dilutive effect. For the thirteen and twenty-six week periods ended June 30, 2012, the number of options to purchase common shares that were excluded from the calculation was 1,184,189.

Due to the net loss for the thirteen and twenty-six week periods ended June 29, 2013 and June 30, 2012, the denominator for diluted loss per common share is the same as the denominator for basic loss per common share for those periods because the inclusion of stock options and unvested restricted shares would be anti-dilutive.

6. Income Taxes

In prior years, the Company recorded a valuation allowance on substantially all of its deferred tax assets. The effective tax rate was (1.7)% and (3.4)% for the thirteen and twenty-six weeks ended June 29, 2013, respectively compared to 9.1% and 9.2% for the thirteen and twenty-six weeks ended June 30, 2012, respectively.

7. Comprehensive Loss

The difference between comprehensive income or loss and net income or loss results from foreign currency translation adjustments on the balance sheets of subsidiaries whose functional currency is not the US Dollar. The accumulated other comprehensive loss balance at June 29, 2013 and December 29, 2012 is comprised entirely of foreign currency translation. For the thirteen and twenty-six weeks ended June 29, 2013 and June 30, 2012, there were no reclassifications out of accumulated other comprehensive loss.

8. Segment Information

The Company's operations are conducted through three operating segments consisting of retail, commercial and international franchising. The retail segment includes the operating activities of company-owned stores in the United States, Canada, the United Kingdom and Ireland and other retail delivery operations, including the Company's web store, pop-up stores and non-traditional store locations such as baseball stadiums. The commercial segment includes the Company's transactions with other businesses, mainly comprised of licensing the Company's intellectual properties for third party use and wholesale activities. The international franchising segment includes the licensing activities of the Company's franchise agreements with store locations in Europe, outside of the United Kingdom and Ireland; Asia; Australia; the Middle East; Africa; Mexico and South America. Each operating segments has discrete sources of revenue, different capital and cost structures. These operating segments represent the basis on which the Company's chief operating decision maker regularly evaluates the business in assessing performance, determining the allocation of resources and the pursuit of future growth opportunities. Accordingly, the Company has determined that each of its operating segments represents one reportable segment. The reportable segments follow the same

accounting policies used for the Company's consolidated financial statements.

The Company's reportable segments are primarily determined by the types of products and services that they offer. Each reportable segment may operate in many geographic areas. The Company allocates revenues to geographic areas based on the location of the customer or franchisee. The following schedule is a summary of the Company's sales to external customers and long-lived assets by geographic area (in thousands):

	North	Europe	Other	Total

For purposes of this table only:

- (1) North America includes the United States, Canada, Puerto Rico and franchise business in Mexico
- (2) Europe includes the United Kingdom, Ireland and franchise businesses in Europe
- (3) Other includes franchise businesses outside of North America and Europe

9. Contingencies

In the normal course of business, the Company is subject to regular examination by various taxing authorities for years not closed by the statute of limitations, including an ongoing customs audit in the United Kingdom in which the Company is contesting audit findings. The Company accrues a liability for this type of contingency when it believes that it is both probable that a liability has been incurred and that it can reasonably estimate the amount of the loss. In 2012, the Company received notification from the customs authority that it intended to assess approximately £1.2 million, or approximately USD\$2 million, for unpaid duty, penalties and interest. The assessment was made in 2013. The Company has appealed this determination and continues to believe that the ultimate outcome of these matters will

not have a material adverse impact on the results of operations, liquidity or financial position of the Company. However, if one or more of these examinations has an unfavorable resolution, it is possible that the results of operation, liquidity or financial position of the Company could be materially affected in any particular period. Since the date of the notification in the third quarter of fiscal 2012, the Company has been required to pay the disputed duty, pending resolution of the appeal. As of June 29, 2013, \$0.7 million had been paid in respect of the disputed duty and is included in receivables.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Cautionary Notice Regarding Forward-Looking Statements

The following Management's Discussion and Analysis of Financial Condition and Results of Operations contains forward-looking statements that involve risks and uncertainties. Our actual results may differ materially from the results discussed in the forward-looking statements, and we undertake no obligation to update these statements except as required by federal securities laws. These risks and uncertainties include, without limitation, those detailed under the captions "Risk Factors" and "Forward-Looking Statements" in our annual report on Form 10-K for the year ended December 29, 2012, as filed with the SEC on March 14, 2013, and the following:

- general global economic conditions may continue to deteriorate, which could lead to disproportionately reduced consumer demand for our products, which represent relatively discretionary spending;
- customer traffic may decrease in the shopping malls where we are located, on which we depend to attract guests to our stores;
- we may be unable to generate interest in and demand for our interactive retail experience, or to identify and respond to consumer preferences in a timely fashion;
- our marketing and on-line initiatives may not be effective in generating sufficient levels of brand awareness and guest traffic;
- we may be unable to generate comparable store sales growth;
- we may be unable to effectively operate or manage the overall portfolio of our company-owned stores;
- we may not be able to operate our company-owned stores in the United Kingdom and Ireland profitably;
- we may be unable to renew or replace our store leases, or enter into leases for new stores on favorable terms or in favorable locations, or may violate the terms of our current leases;
- the availability and costs of our products could be adversely affected by risks associated with international manufacturing and trade, including foreign currency fluctuation;
- our products could become subject to recalls or product liability claims that could adversely impact our financial performance and harm our reputation among consumers;
- we may lose key personnel, be unable to hire qualified additional personnel, or experience turnover of our management team;
- we are susceptible to disruption in our inventory flow due to our reliance on a few vendors;
- high petroleum products prices could adversely affect our profitability;
- we may be unable to effectively manage our international franchises or laws relating to those franchises may change;
- we may improperly obtain or be unable to adequately protect customer information in violation of privacy or security laws or customer expectations;
- we may suffer negative publicity or be sued due to violations of labor laws or unethical practices by manufacturers of our merchandise;
- we may suffer negative publicity or negative sales if the non-proprietary toy products we sell in our stores do not meet our quality or sales expectations;

we may be unable to operate our company-owned distribution center efficiently or our third-party distribution center providers may perform poorly;
our market share could be adversely affected by a significant, or increased, number of competitors;
we may fail to renew, register or otherwise protect our trademarks or other intellectual property and may be sued by, third parties for infringement or misappropriation of their proprietary rights;
poor global economic conditions could have a material adverse effect on our liquidity and capital resources;
fluctuations in our quarterly results of operations could cause the price of our common stock to substantially decline;
we may be unable to repurchase shares of our common stock at the times or in the amounts we currently anticipate or the results of the share repurchase program may not be as beneficial as we currently anticipate; and
our corporate structure and Delaware law may prevent or frustrate attempts to replace or remove our current management by our stockholders.

Overview

We are the leading, and only international, company providing a “make your own stuffed animal” interactive entertainment experience under the Build-A-Bear Workshop brand, in which our guests stuff, fluff, dress, accessorize and name their own teddy bears and other stuffed animals. Our concept, which we developed primarily for mall-based retailing, capitalizes on what we believe is the relatively untapped demand for experience-based shopping as well as the widespread appeal of stuffed animals. The Build-A-Bear Workshop experience appeals to a broad range of age groups and demographics, including children, teens, their parents and grandparents.

Build-A-Bear Workshop is in a turnaround phase as we work to improve store productivity and profitability. We are taking actions to change our business dynamics with a reinvented store design, aggressive repositioning of our portfolio of stores, including closures and remodels that will reduce square footage, and a rebalancing of our marketing to include higher levels of brand advertising. We currently expect our optimal consolidated store count to be 285 to 310 company-owned stores. This includes 225 to 250 stores in North America and approximately 60 stores in the United Kingdom and Ireland. We believe the actions we are taking will result in improvements in productivity and profitability and, ultimately, stakeholder value. We also believe there are additional international growth opportunities, primarily through existing and new franchises.

As of June 29, 2013, we operated 257 traditional stores and six non-traditional stores in United States, Canada and Puerto Rico (collectively, North America), 60 traditional stores in the United Kingdom and Ireland (collectively, Europe) and had 90 franchised stores operating internationally under the Build-A-Bear Workshop brand. Non-traditional store locations include stores in a Major League Baseball® stadium, a zoo and an airport, as well as temporary pop-up locations. In order to capitalize on short-term opportunities in specific locations, we have selectively opened temporary, pop-up locations. In addition to our stores, we market our products and build our brand through our Web sites.

We operate in three reportable segments (retail, commercial and international franchising) that share the same infrastructure, including management, systems, merchandising and marketing, and generate revenues as follows:

• Retail – Company-owned retail stores located in the United States, Canada, Puerto Rico, the United Kingdom, and Ireland, all non-traditional store locations and e-commerce websites or “web stores”;

• Commercial – Transactions with other business partners, mainly comprised of licensing our intellectual property, including entertainment properties, for third-party use and wholesale product sales; and

- International Franchising – International stores operated under franchise agreements.

Selected financial data attributable to each segment for the thirteen and twenty-six weeks ended June 29, 2013 and June 30, 2012 are set forth in the notes to our condensed consolidated financial statements included elsewhere in this quarterly report on Form 10-Q.

We use comparable store sales as one of the performance measures for our business. Comparable store sales percentage changes are based on net retail sales, excluding our web store and temporary, seasonal and event-based locations. Stores are considered comparable beginning in their thirteenth full month of operation. Stores with relocations or remodels that result in a significant change in square footage are excluded from the comparable stores

sales calculation until the thirteenth full month of operation after the change. The percentage change in comparable store sales for the periods presented below is as follows:

	Thirteen Weeks Ended June		Twenty-Six Weeks Ended June	
	2013	2012	2013	2012
North America	8.6 %	(1.8)%	9.7 %	1.1 %
Europe	1.7 %	(1.3)%	5.9 %	(6.0)%
Consolidated	7.3 %	(1.7)%	9.0 %	(0.1)%

We believe the changes in comparable store sales for the periods presented are primarily attributable to the following factors:

We believe our brand building marketing campaign and intensified communication with moms along with a good balance of proprietary and licensed product drove improved comparable store sales across the Company in both the second quarter and first half of 2013;

We believe that our strategic closures, primarily in North American multi-store markets, have transferred approximately 20% of their sales to remaining stores in the market in both the second quarter and first half of 2013; and

Additionally, the 30% increase in the issuance of gift cards on a consolidated basis during the 2012 fourth quarter, followed by a 20% increase in the first six months of 2013, contributed to increased retail sales in the first half of 2013 as the cards were redeemed.

The Company is working to build on this positive trend in comparable store sales with the following key initiatives:

We are aggressively working to increase store traffic and the destination appeal of our stores by:

enhancing our experience with a new store design;

increasing productivity and profitability of our existing stores through strategic closures, primarily in multi-store markets where we expect to transfer a portion of the closed stores' sales to remaining stores in the market and the relocation of select other stores with a reduction in square footage thereby improving their productivity; and

increasing shopping frequency by increasing new and repeat guest traffic to our stores through a rebalanced marketing message to include both product and brand.

We plan to capitalize on our brand advertising to increase gift card purchases by reminding consumers about the gift of the experience.

Our long term store real estate goal is to bring our stores back to best in class productivity and profitability. Today we believe that the optimal number of Build-A-Bear Workshop stores in North America is between 225 to 250 and approximately 60 stores in the United Kingdom and Ireland for a total of 285 to 310 stores. The Company currently expects to reach this level with the closure of 60 to 70 stores in fiscal 2012 through 2014, primarily in North America, along with limited, opportunistic store openings. Locations to close and the timing of the closures are subject to ongoing negotiations and overall economic considerations as market repositioning and optimization plans are continually reevaluated.

Integral to the success of this strategy is the opening of our new store design which gives certain stores destination appeal and increases productivity in the market. The new design merges Build-A-Bear Workshop's iconic hands-on bear-making process with the power of technology to provide a new, highly interactive experience for our guests. We opened the first store with the new design in the third quarter of fiscal 2012. As of August 5, 2013, we have opened 16 of these stores. On average, sales at these locations have increased by approximately 20%. We plan to have approximately 30 locations in the new design operating by the end of 2013 with an additional 20 to 25 locations planned in 2014.

We have been aggressively renegotiating rents and executing short term extensions to line up lease dates within markets as part of an overall strategic plan to optimize our store locations and market positioning. As part of this strategy, we will continue to close underperforming stores in conjunction with natural lease expirations and kick out clauses, primarily in multi-store markets. In these markets, we have transferred, on average, approximately 20% of the sales from closing stores to other locations in the same market. As of August 5, 2013, we have closed 31 stores in fiscal 2013.

Non-Traditional Store Locations

In fiscal 2004, we began offering merchandise in seasonal, event-based locations such as Major League Baseball® ballparks. As of June 29, 2013, we had one location each in a ballpark, a zoo and an airport. In 2010, we opened our first pop-up stores, which generally have lease terms of six to eighteen months and are included in our non-traditional store count. These locations are intended to capitalize on short-term opportunities in specific locations. As of June 29, 2013, three pop-up stores were open.

International Franchise Locations:

Our first franchised location opened in November 2003. The number of international, franchised stores for the periods presented below are summarized as follows:

	Twenty-Six Weeks Ended	
	June	June
	29, 2013	30, 2012
Beginning of period	91	79
Opened	6	6
Closed	(7)	(1)
End of period	90	84

As of June 29, 2013, we had master franchise agreements, which typically grant franchise rights for a particular country or countries, covering an aggregate of 16 countries. In the ordinary course of business, we anticipate signing additional master franchise agreements in the future and terminating other such agreements. We expect our current franchisees to open eight to twelve stores in fiscal 2013 which are likely to be offset by select closures. We believe there is a market potential for current and future franchisees to operate approximately 300 franchised stores outside of the United States, Canada, Puerto Rico, the United Kingdom and Ireland.

Results of Operations

(1) Cost of merchandise sold is expressed as a percentage of net retail sales and commercial revenue.

Retail gross margin represents net retail sales less cost of retail merchandise sold, which excludes cost of wholesale merchandise sold. Retail gross margin was \$29.6 million and \$72.3 million for the thirteen and (2) twenty-six weeks ended June 29, 2013, respectively, and \$27.7 million and \$65.7 million for the thirteen and twenty-six weeks ended June 30, 2012, respectively. Retail gross margin percentage represents retail gross margin divided by net retail sales.

Thirteen weeks ended June 29, 2013 compared to thirteen weeks ended June 30, 2012

Total revenues. Total revenues increased to \$81.9 million for the thirteen weeks ended June 29, 2013 compared to \$80.4 million for the thirteen weeks ended June 30, 2012, an increase of \$1.5 million, or 1.9%. Net retail sales were \$80.4 million for the thirteen weeks ended June 29, 2013 compared to \$79.0 million for the thirteen weeks ended June 30, 2012, an increase of \$1.4 million, or 1.8%. This increase was primarily attributable to a \$5.0 million increase in comparable store sales, a \$1.0 million increase in sales from pop-up and other non-store locations and a \$0.4 million increase in sales from new stores. This was partially offset by a \$4.5 million decline in sales from non-comparable store locations, primarily closures and relocations. Other changes in net retail sales, which included the impact of foreign currency, totaled \$0.5 million.

We believe the increase in comparable store sales was attributed primarily to the following factors:

- We believe our brand building marketing campaign and intensified communication with moms along with a good balance of proprietary and licensed product drove improved comparable store sales across the Company in the second quarter of 2013;
- We believe that our strategic closures, primarily in North American multi-store markets, have transferred approximately 20% of their sales to remaining stores in the market in the second quarter of 2013.

Commercial revenue was \$0.8 million and \$0.7 million for the thirteen weeks ended June 29, 2013 and June 30, 2012, respectively. Revenue from franchise fees was also \$0.8 million and \$0.7 million for the thirteen weeks ended June 29, 2013 and June 30, 2012, respectively.

Gross margin. Total gross margin increased to \$30.0 million for the thirteen weeks ended June 29, 2013, compared to \$28.0 million for the thirteen weeks ended June 30, 2012, an increase of \$2.0 million, or 7.1%. Retail gross margin was \$29.6 million for the thirteen weeks ended June 29, 2013 compared to \$27.7 million for the thirteen weeks ended June 30, 2012, an increase of \$1.9 million, or 6.9%. As a percentage of net retail sales, retail gross margin increased to 36.8% for the thirteen weeks ended June 29, 2013 from 35.0% for the thirteen weeks ended June 30, 2012. This 180 basis points as a percentage of net retail sales (bps) improvement was primarily driven by leverage in occupancy cost and reduced promotional activity.

Selling, general and administrative. Selling, general and administrative expenses decreased to \$36.9 million for the thirteen weeks ended June 29, 2013 compared to \$37.1 million for the thirteen weeks ended June 30, 2012, a decrease of \$0.2 million, or 0.5%. As a percentage of total revenues, selling, general and administrative expenses decreased to 45.1% for the thirteen weeks ended June 29, 2013 as compared to 46.1% for the thirteen weeks ended June 30, 2012, a decrease of 100 bps. The 2013 second quarter included \$0.5 million in one-time management transition costs and \$0.3 million in store closing costs. Excluding these costs, selling, general and administrative expenses as a percent of revenue decreased 190 bps, primarily due to decreases in store payroll costs and other operational cost savings resulting from store closures and our cost reduction efforts that were partially offset by higher incentive compensation.

Interest expense (income), net. Interest income, net of interest expense, was \$55,000 for the thirteen weeks ended June 29, 2013 as compared to \$63,000 for the thirteen weeks ended June 30, 2012.

Provision for income taxes. Income tax expense was \$0.1 million for the thirteen weeks ended June 29, 2013 as compared to the income tax benefit of \$0.8 million for the thirteen weeks ended June 30, 2012. The effective tax rate was (1.7)% for the thirteen weeks ended June 29, 2013 compared to 9.1% for the thirteen weeks ended June 30, 2012. The change in the effective tax rate was primarily attributable to the impact of recording valuation allowances on both foreign and domestic deferred tax assets in prior periods.

Twenty-six weeks ended June 29, 2013 compared to twenty-six weeks ended June 30, 2012

Total revenues. Total revenues increased to \$186.2 million for the twenty-six weeks ended June 29, 2013 from \$176.8 million for the twenty-six weeks ended June 30, 2012. Net retail sales were \$183.3 million for the twenty-six weeks

ended June 29, 2013 compared to \$174.2 million for the twenty-six weeks ended June 30, 2012, an increase of \$9.1 million, or 5.2%. This increase was primarily attributable to a \$13.9 million increase in comparable store sales, a \$2.4 million increase in sales from pop-up and other non-store locations and a \$0.8 million increase in sales from new stores. These were partially offset by a \$7.5 million decline in sales from non-comparable store locations, primarily closures and relocations. Other changes in net retail sales, which included the impact of foreign currency, totaled \$0.5 million.

We believe our comparable store sales were impacted by the following factors:

We believe our brand building marketing campaign and intensified communication with moms along with a good balance of proprietary and licensed product drove improved comparable store sales across the Company in the first half of 2013;

We believe that our strategic closures, primarily in North American multi-store markets, have transferred approximately 20% of their sales to remaining stores in the market in the first half of 2013; and

Additionally, the 30% increase in the issuance of gift cards on a consolidated basis during the 2012 fourth quarter, followed by a 20% increase in the first six months of 2013, contributed to increased retail sales in the first half of 2013 as the cards were redeemed.

Commercial revenue was \$1.2 million for the twenty-six weeks ended June 29, 2013 compared to \$1.1 million for the twenty-six weeks ended June 30, 2012, an increase of \$0.1 million. Revenue from franchise fees increased to \$1.6 million for the twenty-six weeks ended June 29, 2013 from \$1.5 million for the twenty-six weeks ended June 30, 2012, an increase of \$0.1 million.

Gross margin. Total gross margin increased to \$72.9 million for the twenty-six weeks ended June 29, 2013 from \$66.1 million for the twenty-six weeks ended June 30, 2012, an increase of \$6.8 million, or 10.3%. Retail gross margin increased to \$72.3 million for the twenty-six weeks ended June 29, 2013 from \$65.7 million for the twenty-six weeks ended June 30, 2012, an increase of \$6.6 million, or 10.0%. As a percentage of net retail sales, retail gross margin increased to 39.4% for the twenty-six weeks ended June 29, 2013 from 37.7% for the twenty-six weeks ended June 30, 2012. This 170 bps improvement was primarily driven by leverage in occupancy cost and reduced promotional activity, partially offset by higher product costs in the 2013 first quarter.

Selling, general and administrative. Selling, general and administrative expenses were \$80.6 million for the twenty-six weeks ended June 29, 2013 as compared to \$77.2 million for the twenty-six weeks ended June 30, 2012, an increase of \$3.4 million, or 4.4%. As a percentage of total revenues, selling, general and administrative expenses decreased to 43.3% for the twenty-six weeks ended June 29, 2013 as compared to 43.7% for the twenty-six weeks ended June 30, 2012, a decrease of 40 bps. The dollar increase was primarily attributable to (i) \$2.3 million in one-time management transition costs, (ii) additional investment in marketing initiatives in the first quarter, (iii) \$0.9 million in store closing costs, and (iv) transactional foreign currency losses in the first quarter related to foreign payables denominated in US dollars. As a percent of revenue, these costs were offset by improved leverage on increased revenue. Excluding the management transition and store closing costs, selling, general and administrative expenses as a percent of revenue decreased 200 bps, primarily due to the overall decrease in expenses from store closures and our cost reduction efforts.

Interest expense (income), net. Interest income, net of interest expense, was \$0.1 million for the twenty-six weeks ended June 29, 2013 and June 30, 2012.

Provision for income taxes. The income tax expense was \$0.2 million for the twenty-six weeks ended June 29, 2013 as compared to the income tax benefit of \$0.9 million for the twenty-six weeks ended June 30, 2012. The effective tax rate was (3.4)% for the twenty-six weeks ended June 29, 2013 compared to 9.2% for the twenty-six weeks ended June 30, 2012. The change in the effective tax rate was primarily attributable to the impact of recording valuation allowances on both foreign and domestic deferred tax assets in prior periods.

Seasonality and Quarterly Results

Our operating results for one period may not be indicative of results for other periods, and may fluctuate significantly because of a variety of factors, including, but not limited to: (1) seasonal shopping patterns and holiday and vacation schedules; (2) the timing and frequency of our marketing initiatives, including national media and other public relations events; (3) the timing of our store openings and closings and related expenses; (4) changes in general economic conditions and consumer spending patterns; (5) increases or decreases in our comparable store sales; (6) fluctuations in the profitability of our stores; (7) changes in foreign currency exchange rates; (8) the actions of our competitors or mall anchors and co-tenants; (9) changes in consumer preferences; (10) the effectiveness of our inventory management; and (11) weather conditions.

The timing of store closures, remodels and openings may result in fluctuations in quarterly results based on the revenues and expenses associated with each store location. Expenses related to store closings are typically incurred in stages: when the decision is made to close the store, when the closure is communicated to store associates; and at the time of closure. We typically incur most preopening costs for a new store in the three months immediately preceding

the store's opening.

As a toy retailer, our sales are highest in our fourth quarter, followed by the first quarter. The timing of holidays and school vacations can impact our quarterly results. We cannot ensure that this will continue to be the case. In addition, for accounting purposes, the quarters of each fiscal year consist of 13 weeks, although we will have a 14-week quarter approximately once every six years. The 2008 fiscal fourth quarter had 14 weeks.

Liquidity and Capital Resources

Our cash requirements are primarily for the relocation and remodeling of existing stores in our new design, opening of new stores, information systems and working capital. Over the past several years, we have met these requirements through capital generated from cash flow provided by operations. We have access to additional cash through our revolving line of credit that has been in place since 2000.

Operating Activities. Cash used in operating activities was \$7.5 million for the twenty-six weeks ended June 29, 2013 as compared with \$15.0 million for the twenty-six weeks ended June 30, 2012, a decrease of \$7.5 million. Generally, changes in cash from operating activities are driven by changes in net income or loss and changes in operating assets and liabilities. This decrease in cash used in operating activities over the year ago period was primarily due to increased store contribution and the timing of inventory receipts and payments.

Investing Activities. Cash used in investing activities was \$9.0 million for the twenty-six weeks ended June 29, 2013 as compared to \$6.1 million for the twenty-six weeks ended June 30, 2012, an increase of \$2.9 million. Cash used in investing activities during the twenty-six weeks ended June 29, 2013 primarily related to construction costs for new and remodeled stores, investments in central office information technology systems and the acquisition of trademarks and other intellectual property. Cash used in investing activities during the twenty-six weeks ended June 30, 2012 primarily related to construction costs for new and remodeled stores, investments in central office information technology systems and the acquisition of trademarks and other intellectual property, offset by the maturity of short-term investments.

Financing Activities. Cash provided by financing activities was \$0.1 million in the twenty-six weeks ended June 29, 2013 and \$-0- in the twenty-six weeks ended June 30, 2012. In 2013, the cash from financing activities related to the exercise of employee stock options. No borrowings were made under our line of credit in either the twenty-six weeks ended June 29, 2013 or June 30, 2012.

Capital Resources. As of June 29, 2013, we had a consolidated cash balance of \$28.1 million over half of which was domiciled outside of the United States. We also have a line of credit, which we can use for liquidity purposes, including to finance capital expenditures and working capital needs throughout the year. The credit agreement is with U.S. Bank, National Association and was amended effective April 30, 2013. The bank line provides availability of \$35 million. Borrowings under the credit agreement are secured by our assets and a pledge of 65% of our ownership interest in our foreign subsidiaries. The credit agreement expires on December 31, 2014 and contains various restrictions on indebtedness, liens, guarantees, redemptions, mergers, acquisitions or sale of assets, loans, transactions with affiliates and investments. It also prohibits us from declaring dividends without the bank's prior consent, unless such payment of dividends would not violate any terms of the credit agreement. We are also prohibited from repurchasing shares of our common stock unless such repurchase of shares would not violate any terms of the credit agreement; we may not use the proceeds of the line of credit to repurchase shares. Borrowings bear interest at LIBOR plus 1.8%. Financial covenants include maintaining a minimum tangible net worth, maintaining a minimum fixed charge coverage ratio (as defined in the credit agreement) and not exceeding a maximum funded debt to earnings before interest, depreciation and amortization ratio. As of June 29, 2013: (i) we were in compliance with these covenants; (ii) there were no borrowings under our line of credit; (iii) there was a standby letter of credit of approximately \$1.1 million outstanding under the credit agreement; and (iv) there was approximately \$33.9 million available for borrowing under the line of credit.

Most of our retail stores are located within shopping malls and all are operated under leases classified as operating leases. Our leases in North America typically have a ten-year term and contain provisions for base rent plus percentage rent based on defined sales levels. Many of the leases contain a provision whereby either we or the landlord may terminate the lease after a certain time, typically in the third to fourth year of the lease, if a certain minimum sales volume is not achieved. In addition, some of these leases contain various restrictions relating to change of control of our company. Our leases also subject us to risks relating to compliance with changing mall rules and the exercise of discretion by our landlords on various matters, including rights of termination in some cases.

Our leases in the U.K. and Ireland typically have terms of 10 to 15 years and generally contain a provision whereby every fifth year the rental rate can be adjusted to reflect the current market rates. The leases typically provide the lessee with the first right for renewal at the end of the lease. We may also be required to make deposits and rent guarantees to secure new leases as we relocate existing stores and open new stores. Real estate taxes also change according to government time schedules to reflect current market rental rates for the locations we lease. Rents are charged quarterly and paid in advance.

In fiscal 2013, we expect to spend a total of \$19 to \$22 million on capital expenditures. Capital spending through the twenty-six weeks ended June 29, 2013 totaled \$9.0 million, on track with our full year plans. Capital spending in fiscal 2013 is primarily for the remodeling of approximately 21 stores and opening of four new stores in our new design and the continued installation and upgrades of central office information technology systems.

We believe that cash generated from operations and available borrowings under our credit agreement will be sufficient to fund our working capital and other cash flow requirements for the near future. Our credit agreement expires on December 31, 2014.

On February 20, 2007, we announced that our board of directors had authorized a \$25 million share repurchase program of our outstanding common stock. On March 10, 2008, we announced an expansion of our share repurchase program to \$50 million. On February 28, 2013, we announced that our share repurchase program had been extended to March 31, 2014. We currently intend to purchase up to an aggregate of \$50 million of our common stock in the open market (including through 10b5-1 plans), through privately negotiated transactions or through an accelerated repurchase transaction. The primary source of funding for the program is expected to be cash on hand. The timing and amount of share repurchases, if any, will depend on price, market conditions, applicable regulatory requirements, and other factors. The program does not require us to repurchase any specific number of shares and may be modified, suspended or terminated at any time without prior notice. Shares repurchased under the program have been, and will continue to be, subsequently retired. As of August 5, 2013, approximately 5.9 million shares at an average price of \$7.24 per share have been repurchased under this program for an aggregate amount of \$42.6 million, leaving \$7.4 million of availability under the program.

Critical Accounting Estimates

The preparation of financial statements in conformity with U.S. GAAP requires the appropriate application of certain accounting policies, which require us to make estimates and assumptions about future events and their impact on amounts reported in our financial statements and related notes. Since future events and their impact cannot be determined with certainty, the actual results will inevitably differ from our estimates. Such differences could be material to the financial statements.

We believe application of accounting policies, and the estimates inherently required therein, are reasonable. These accounting policies and estimates, including those related to inventory, long-lived assets, goodwill, revenue recognition and income taxes, are reevaluated on an ongoing basis, and adjustments are made when facts and circumstances dictate a change. Historically, we have found our application of accounting policies to be appropriate, and actual results have not differed materially from those determined using necessary estimates.

Our critical accounting policies and estimates are discussed in and should be read in conjunction with our annual report on Form 10-K, as filed with the Securities and Exchange Commission (SEC) on March 14, 2013, which includes audited consolidated financial statements for our 2012, 2011 and 2010 fiscal years. There have been no material changes to the critical accounting estimates disclosed in the 2012 Form 10-K.

Recent Accounting Pronouncements

There are no new accounting pronouncements for which adoption is expected to have a material effect on the Company's financial statements in future accounting periods.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

Our market risks relate primarily to changes in interest rates, and we bear this risk in two specific ways. First, our revolving credit facility carries a variable interest rate that is tied to market indices and, therefore, our results of operations and our cash flows can be impacted by changes in interest rates. Outstanding balances under our credit facility bear interest at LIBOR plus 1.8%. We had no borrowings outstanding during the first half of fiscal 2013. Accordingly, a 100 basis point change in interest rates would result in no material change to our annual interest expense. The second component of interest rate risk involves the investment of excess cash in short term, investment grade interest-bearing securities. These investments are considered to be cash equivalents or short-term investments, based on their original maturity and are classified accordingly on our balance sheet. If there are changes in interest rates, those changes would affect the investment income we earn on these investments and, therefore, impact our cash flows and results of operations.

We conduct operations in various countries, which expose us to changes in foreign exchange rates. The financial results of our foreign subsidiaries and franchisees may be materially impacted by exposure to fluctuating exchange rates. Reported sales, costs and expenses at our foreign subsidiaries, when translated into U.S. dollars for financial

reporting purposes, can fluctuate due to exchange rate movement. While exchange rate fluctuations can have a material impact on reported revenues, costs and expenses, and earnings, this impact is principally the result of the translation effect and does not materially impact our short-term cash flows.

Although we enter into a significant amount of purchase obligations outside of the U.S., these obligations are settled primarily in U.S. dollars and, therefore, we believe we have only minimal exposure at present to foreign currency exchange risks for our purchase obligations. Historically, we have not hedged our currency risk and do not currently anticipate doing so in the future.

We do not engage in financial transactions for trading or speculative purposes.

Item 4. Controls and Procedures.

Our management, with the participation of our Chief Executive Officer and President Bear and Chief Operations and Financial Bear, has evaluated the effectiveness of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")), as of the end of the period covered by this report. Our disclosure controls and procedures are designed to ensure that information required to be disclosed by us in the reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and is accumulated and communicated to management, including our certifying officers, as appropriate to allow timely decisions regarding required disclosure. Based on the foregoing evaluation, our management, including the Chief Executive Officer and President Bear and Chief Operations and Financial Bear, concluded that our disclosure controls and procedures were effective as of June 29, 2013, the end of the period covered by this Quarterly Report.

It should be noted that our management, including the Chief Executive Officer and President Bear and the Chief Operations and Financial Bear, does not expect that our disclosure controls and procedures or internal controls will prevent all error and all fraud. A control system, no matter how well conceived or operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Changes in Internal Control Over Financial Reporting. The Company's management, with the participation of the Company's Chief Executive Officer and President Bear and Chief Operations and Financial Bear, also conducted an evaluation of the Company's internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) to determine whether any changes occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting. Based on that evaluation, there has been no such change during the period covered by this report.

PART II – OTHER INFORMATION

Item 1A. Risk Factors

There have been no material changes to our Risk Factors as disclosed in our Annual Report on Form 10-K for the year ended December 29, 2012 as filed with the SEC on March 14, 2013.

(1) Includes shares of our common stock delivered to us in satisfaction of the tax withholding obligation of holders of restricted shares which vested during the applicable period. Our equity incentive plans provide that the value of shares delivered to us to pay the withheld to cover tax obligations is calculated at the closing trading price of our common stock on the date the relevant transaction occurs.

(2) On February 28, 2013, we announced the further extension of our \$50 million share repurchase program of our outstanding common stock until March 31, 2014. The program was authorized by our board of directors. Purchases may be made in the open market or in privately negotiated transactions, with the level and timing of activity depending on market conditions, applicable regulatory requirements, and other factors. Purchase activity may be increased, decreased or discontinued at any time without notice. Shares purchased under the program are subsequently retired.
