

GULFMARK OFFSHORE INC
Form 10-Q
November 09, 2015

UNITED STATES SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-Q

Quarterly Report Pursuant to Section 13 or 15(d)
of the Securities Exchange Act of 1934

For the quarterly period ended **September 30, 2015**

GULFMARK OFFSHORE, INC.

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of incorporation)

001-33607

(Commission file number)

76-0526032

(I.R.S. Employer Identification No.)

842 West Sam Houston Parkway North, Suite 400, Houston, Texas 77024
(Address of principal executive offices) (Zip Code)

(713) 963-9522

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days.

YES NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

YES NO

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

YES NO

Number of shares of Class A Common Stock, \$0.01 par value, outstanding as of November 6, 2015: 25,732,335

Forward-Looking Statements

This Quarterly Report on Form 10-Q (this “Form 10Q”) contains certain forward-looking statements and other statements that are not historical facts concerning, among other things, market conditions, the demand for marine and transportation support services and future capital expenditures. Certain statements and information in this Form-10-Q may constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. The words “believe,” “expect,” “anticipate,” “plan,” “intend,” “foresee,” “should,” “would,” “could” or other similar expressions are intended to identify forward-looking statements, which are generally not historical in nature. These statements are subject to certain risks, uncertainties and assumptions, including, without limitation:

- operational risk,
- volatility in oil and natural gas prices,
- catastrophic or adverse sea or weather conditions,
- dependence on the oil and natural gas industry,
- delay or cost overruns on construction projects or insolvency of the shipbuilders,
- lack of shipyard or equipment availability,
- unplanned customer suspensions, cancellations, rate reductions or non-renewals,
- further reductions in capital expenditure budgets by customers,
- ongoing capital expenditure requirements,
- changes in tax laws,
- uncertainties surrounding environmental and government regulation,
- uncertainties surrounding deep water permitting and exploration and development activities,
- risks relating to compliance with the Jones Act,
- risks relating to leverage,
- risks of foreign operations, risk of war, sabotage, piracy, cyber-attack or terrorism,
- assumptions concerning competition, and
- risks of currency fluctuations.

These statements are based on certain assumptions and analyses made by us in light of our experience and perception of historical trends, current conditions, expected future developments and other factors we believe are appropriate under the circumstances. Such forward-looking statements are subject to risks and uncertainties, including the risk factors discussed above and those discussed in our Annual Report on Form 10-K for the year ended December 31, 2014 (the “2014 Form 10-K”), filed with the Securities and Exchange Commission (“SEC”), general economic and business conditions, the business opportunities that may be presented to and pursued by us, changes in law or regulations and other factors, many of which are beyond our control.

We cannot assure you that we have accurately identified and properly weighed all of the factors which affect market conditions and demand for our vessels, that the information upon which we have relied is accurate or complete, that our analysis of the market and demand for our vessels is correct, or that the strategy based on that analysis will be successful. Readers are cautioned not to place undue reliance on forward-looking statements, which speak only as of the date hereof. We undertake no obligation to publicly update or revise any forward-looking statements after the date

they are made, whether as a result of new information, future events or otherwise.

GULFMARK OFFSHORE, INC. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED

FINANCIAL STATEMENTS

(1) GENERAL INFORMATION

Organization and Nature of Operations

The condensed consolidated financial statements of GulfMark Offshore, Inc. and its subsidiaries included herein have been prepared by us without audit, pursuant to the rules and regulations of the SEC. Unless otherwise indicated, references to “we”, “us”, “our” and the “Company” refer collectively to GulfMark Offshore, Inc. and its subsidiaries and predecessors. Certain information relating to our organization and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles, or U.S. GAAP, has been condensed or omitted in this Form 10-Q pursuant to such rules and regulations. However, we believe that the disclosures herein are adequate to make the information presented not misleading. The consolidated balance sheet as of December 31, 2014, has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by U.S. GAAP for complete financial statements. It is recommended that these financial statements be read in conjunction with our consolidated financial statements and notes thereto included in our 2014 Form 10-K.

In the opinion of management, all adjustments, which include reclassification and normal recurring adjustments necessary to present fairly the unaudited condensed consolidated financial statements for the periods indicated, have been made. All significant intercompany accounts have been eliminated. Certain reclassifications of previously reported information may be made to conform with current year presentation.

We provide offshore marine support and transportation services primarily to companies involved in the offshore exploration and production of oil and natural gas. Our vessels transport materials, supplies and personnel to offshore facilities, as well as move and position drilling structures. The majority of our operations are conducted in the North Sea, offshore Southeast Asia and the Americas. We also operate our vessels in other regions to meet our customers' requirements.

Earnings Per Share

Basic Earnings Per Share, or EPS, is computed by dividing net income by the weighted average number of shares of Class A Common Stock outstanding during the period. Diluted EPS is computed using the treasury stock method for Class A Common Stock equivalents. The reconciliation between basic and diluted earnings per share from income attributable to Class A Common Stock stockholders, including allocation to participating securities, is as follows:

	Three Months Ended September 30, 2015		Nine Months Ended September 30, 2015	
	2014		2014	
<i>(In thousands, except per share amounts)</i>

Diluted	\$(7.48) \$0.92	\$(8.04) \$2.09

(2) IMPAIRMENT CHARGES*Reduction in Value of Long-Lived Assets and Goodwill*

Our tangible long-lived assets consist primarily of vessels and construction-in-progress. Our intangible asset is associated with customer relationships in the U.S. Gulf of Mexico acquired in our 2008 acquisition of Rigdon Marine Corporation and Rigdon Marine Holdings, LLC. Our goodwill relates to the 2001 acquisition of Sea Truck Holding AS and the 1998 acquisition of Brovig Supply AS. In assessing potential impairment related to our long-lived assets, the carrying values of the assets are compared with undiscounted expected future cash flows. If the carrying value of any long-lived asset is greater than the related undiscounted expected future cash flows, we measure impairment by comparing the fair value of the asset with its carrying value. At least annually, we assess whether goodwill is impaired

based on certain qualitative factors.

In late 2014, the oil and gas industry experienced a significant decline in the price of oil causing an industry-wide downturn which has continued into 2015. The oil price recovered to almost \$60 per barrel in the second quarter but continued its decline in the third quarter bottoming at near \$40 per barrel. This downturn has impacted the operational plans for oil companies and consequently has affected the drilling and support service sector. We have experienced a negative impact on day rates and utilization in 2015 which is expected to continue into 2016.

As of December 31, 2014, we performed a full assessment of goodwill that did not indicate impairment. We performed another assessment in the second quarter of 2015 that did not indicate impairment, but the margin of coverage, given our assumptions, had narrowed since December 31, 2014. In the second quarter, we also performed a Step 1 assessment of our long-lived assets, including the intangible asset, for impairment and concluded that no impairment was indicated. These assessments were performed as a result of the triggering events described in the preceding paragraph.

Industry conditions continued to deteriorate in the third quarter and we again performed full assessments. For the quarter ended September 30, 2015, we recorded in our condensed consolidated statements of operations \$152.1 million of impairment charges related to reduction in value of assets due to impairment. The components of reduction in value of assets are as follows (in thousands):

Goodwill impairment	\$22,554
Long-lived assets impairment	115,489
Intangible asset impairment	13,695
Vessel component impairment	365
Total reduction in value of assets	\$ 152,103

Goodwill Impairment

Goodwill is tested for impairment in the third quarter each year or on an interim basis if events or circumstances indicate that the fair value of goodwill has decreased below its carrying value. We completed a qualitative analysis of goodwill in the third quarter of 2015 and determined that further testing was necessary. Our goodwill impairment evaluation indicated that the carrying value of the North Sea segment exceeded its fair value so that goodwill was potentially impaired. We then performed the second step of the goodwill impairment test, which involved calculating the implied fair value of our goodwill by allocating the fair value of the North Sea segment to all of the assets and liabilities (other than goodwill) and comparing it to the carrying amount of goodwill. To estimate the fair value of the reporting unit we used a 50% weighting of the discounted cash flow method and a 50% weighting of the public company guideline method in determining fair value of the North Sea reporting unit.

We determined that the implied fair value of our goodwill for the North Sea segment was less than its carrying value and recorded a \$22.6 million impairment of the North Sea segment's goodwill.

Long-Lived Asset Impairment

Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Recoverability of assets to be held and used is assessed by a comparison of the carrying amount of such assets to their fair value. Cash flow estimates are based upon, among other things, historical results adjusted to reflect the best estimate of operating performance. If an asset group's fair value is less than the carrying amount of that asset groups, impairment losses are recorded in the amount by which the carrying amount of such assets exceeds the fair value. The estimates of fair value of our vessels and intangible asset were obtained from fair value appraisals performed at our request by third party appraisal firms.

At September 30, 2015, we recorded \$129.2 million in expense in connection with the impairment of our long-lived assets in the U.S. Gulf of Mexico, which is a part of our Americas segment. The impairment consisted of \$115.5 million related to our vessels and \$13.7 million related to our intangible asset. The impairment in value of long-lived assets in the U.S. Gulf of Mexico was primarily driven by the disproportionately higher decline in day rates and utilization in the U.S. Gulf of Mexico compared to the other areas in which we provide offshore supply vessel services. We will continue to monitor the industry and our asset groups for indications of impairment and will perform additional assessments as conditions and circumstances warrant.

Vessel Component Impairment

We have certain vessel components in our North Sea region fixed asset base that were intended to be used in our new-build program. In second quarter 2014, we evaluated the use of these components and determined that they would not be used in our new-build fleet. We are actively pursuing a sale of the equipment, but there is a limited market. We adjusted the carrying value at June 30, 2014 to reflect the net realizable value. These assets are included in deferred costs and other assets on our balance sheet. The total charge to impairment expense related to these components at June 30, 2014 was \$7.0 million. The adjustment value was based on an appraisal prepared by a third party appraisal firm. We obtained an updated appraisal at the end of each quarter since June 30, 2014 with no indications of material additional impairment until the third quarter 2015. We have charged an additional \$0.4 million to impairment expense as of September 30, 2015 based on the updated appraisal.

(3) VESSEL ACQUISITIONS AND DISPOSITIONS

Interest is capitalized in connection with the construction of vessels. During the three and nine month periods ended September 30, 2015, we capitalized \$1.4 million and \$3.9 million of interest, respectively. During the three and nine month periods ended September 30, 2014, we capitalized \$1.7 million and \$6.6 million of interest, respectively.

At December 31, 2014, we classified a North Sea vessel as an asset held for sale and determined that its carrying value was less than our estimate of the amount we would realize in a sale. As a result, we reduced the carrying value by \$1.5 million which was included in our results of operations as impairment. The adjusted carrying value of this vessel was based on a purchase and sale agreement. In January 2015, we completed the sale of the asset at approximately its carrying value. In July 2015, we sold one of our North Sea vessels and recorded a gain on sale of approximately \$0.7 million. In November 2015, we entered into a letter of intent to sell one of our North Sea region vessels and we expect to record a loss on sale in the fourth quarter of approximately \$2.1 million.

In 2011, our Board of Directors approved the initiation of a new-build construction program. We began the program in the North Sea region where we contracted with three shipyards to build a total of six platform supply vessels ("PSVs"). In late 2011, we exercised an option with one of the shipyards to build an additional PSV. The original estimated cost of these seven PSVs was \$288.0 million. The first four of these vessels were delivered in the third quarter of 2013, a fifth vessel was delivered in the fourth quarter of 2013 and the sixth and seventh vessels were delivered in the first quarter of 2014.

In 2012, we signed agreements with two U.S. shipyards (Thoma-Sea and BAE Systems) contracting the two shipyards to build two U.S. flagged PSVs each for the U.S. Gulf of Mexico region. The original estimated total cost of these four PSVs was approximately \$168.0 million. The Thoma-Sea vessels have been delivered. The first was delivered in the second quarter of 2014, while the second vessel was delivered in January 2015. Neither of the BAE vessels has been delivered. In addition, both vessels are significantly past the delivery date in the original contract. The current schedule anticipates delivery of these remaining vessels in the first and second quarters of 2016 and additional delays may occur. Given the significant delays and other technical problems associated with the construction and delivery of these vessels, to preserve our rights, we have initiated arbitration proceedings with BAE as provided for under our contract.

Also in 2012, we placed \$52.4 million in escrow related to the two Thoma-Sea new-builds described above and in the table below. Progress payments were drawn from escrow as they became due. There was \$3.7 million remaining in escrow, which was presented in long-term assets in the balance sheet as of December 31, 2014, and which was released to Thoma-Sea upon the delivery of the second vessel in January 2015. Funds in the escrow account were invested in U.S. government securities.

In April 2014, we approved the construction of an additional North Sea PSV by Simek with an estimated total cost of 359.0 million NOK and an expected delivery date in the first quarter of 2016.

The following tables illustrate the details of the vessels under construction, including original contract cost, and the vessels added or acquired:

Vessels Under Construction as of November 6, 2015

Construction Yard	Region	Type ⁽¹⁾	Expected Length		BHP ⁽²⁾	DWT ⁽³⁾	Expected Cost (millions)
			Delivery	(feet)			
BAE Systems	Americas	LgPSV	Q1 2016	286	10,960	5,300	\$ 48.0

(1) LgPSV - Large Platform Supply Vessel

(2) BHP - Brake Horsepower

(3) DWT - Deadweight Tons

4) LONG-TERM DEBT

Our long-term debt at September 30, 2015 and December 31, 2014 consisted of the following:

	September 30,	December 31,
	2015	2014
	(In thousands)	
Senior Notes Due 2022	\$500,000	\$ 500,000
Multicurrency Facility Agreement	23,000	44,000
	523,000	544,000
Debt Premium	638	732
Total	\$523,638	\$ 544,732

The following is a summary of scheduled debt maturities by year:

Year	Debt Maturity (In thousands)
2015	\$ -
2016	-
2017	-
2018	-
2019	23,000
Thereafter	500,000
Total	\$ 523,000

Senior Notes Due 2022

On March 12, 2012, we issued \$300.0 million aggregate principal amount of 6.375% senior notes due 2022. On December 5, 2012, we issued an additional \$200.0 million of senior notes with substantially the same terms as the previous \$300.0 million issuance (together with the original issue, the “Senior Notes”). The Senior Notes pay interest semi-annually on March 15 and September 15. Prior to March 15, 2017, we may redeem some or all of the Senior Notes for cash at a redemption price equal to 100% of their principal amount plus an applicable make-whole premium

and accrued and unpaid interest to the redemption date. The make-whole premium is based on U.S. treasuries plus 50 basis points. On and after March 15, 2017, we may redeem some or all of the Senior Notes at the redemption prices (expressed as percentages of principal amount) equal to 103.188% for the twelve-month period beginning March 15, 2017, 102.125% for the twelve-month period beginning March 15, 2018, 101.063% for the twelve-month period beginning March 15, 2019 and 100.000% beginning March 15, 2020, plus accrued and unpaid interest to the redemption date. In conjunction with the Senior Notes offering, we incurred \$12.7 million in debt issuance costs which are included in our balance sheet under deferred costs and other assets and are being amortized into interest cost over the life of the Senior Notes using the effective interest method.

At September 30, 2015, the fair value of the Senior Notes, based on quoted market prices, was approximately \$306.3 million, compared to a carrying amount of \$500.6 million.

Multicurrency Facility Agreement

On September 26, 2014, we entered into a Multicurrency Facility Agreement (the “Multicurrency Facility Agreement”) among us, as guarantor, one of our indirect wholly-owned subsidiaries, as borrower (the “Borrower”), and a group of financial institutions, as lenders (the “Lenders”). This facility has a scheduled maturity date of September 26, 2019 and commits the Lenders to provide revolving loans up to \$300.0 million at any one time outstanding, subject to certain terms and conditions, and contains sublimits for swingline loans and the issuance of letters of credit. The Borrower has the option to request increases in the aggregate commitments under the facility to an aggregate principal amount not to exceed \$400.0 million, also subject to certain terms and conditions. Revolving loans under the Multicurrency Facility Agreement will accrue interest at LIBOR, plus an applicable margin, and swingline loans will accrue interest at the alternate base rate margin. The applicable margin will be based on our most recent capitalization ratio. The fee for unused commitments is 37.5 basis points per annum.

In February 2015, we entered into an amendment to the Multicurrency Facility Agreement that reduced the requirement under the interest coverage ratio covenant. In return for the reduction, the Lenders imposed certain financial restrictions, including limiting our ability make certain payments for dividends, acquisitions or share repurchases. We paid an additional \$1.0 million in fees and our unused commitment fee rate increased to 50 basis points.

In July 2015, we entered into an amendment to the Multicurrency Facility Agreement that, among other changes, (a) reduced the interest coverage ratio requirements applicable to certain periods, (b) changed the required collateral to lenders’ commitments ratio for certain periods, (c) added a new mechanism for curing defaults on financial covenants and (d) removed a requirement that we take delivery of certain vessels. In return for the amendment, the lenders required that we agree to certain changes, including (u) increasing the commitment fee during certain periods to 75 basis points, (v) reducing commitments under the facility from \$300.0 million to \$200.0 million, (w) increasing the rate of interest accruing under the facility to LIBOR plus a margin, which is currently 2.75%, (x) adding a new covenant that liquidity not be less than \$50.0 million, (y) reducing the amounts of business acquisitions, collateral dispositions, capital expenditures, joint ventures, distributions to equity holders and indebtedness permitted during certain periods and (z) subjecting certain affiliate parties that are not obligors to the Multicurrency Facility Agreement’s limitations on business acquisitions, capital expenditures and joint ventures during certain periods. We paid an additional \$1.0 million in fees to close this amendment which is being capitalized and amortized over the remaining term of the Multicurrency Facility Agreement. In addition, since we reduced our overall borrowing capacity under the Multicurrency Facility Agreement, we were required to expense a portion of the debt issue costs that were being deferred on our consolidated balance sheet. In conjunction with closing the amendment, we charged \$1.8 million to interest expense in the third quarter of 2015.

We have unamortized fees paid to the arrangers, the agent and the security trustee totaling \$4.4 million at September 30, 2015, which fees are being amortized into interest cost on a straight-line basis over the life of the Multicurrency Facility Agreement. The weighted average interest rate applicable to amounts outstanding at September 30, 2015 was 2.95%.

The Multicurrency Facility Agreement, as amended, is secured by certain vessels of the Borrower. The collateral that secures the loans under the Multicurrency Facility Agreement may also secure all of the Borrower's obligations under any hedging agreements between the Borrower and any Lender or other hedge counterparty to the Multicurrency Facility Agreement.

We unconditionally guaranteed all existing and future indebtedness and liabilities of the Borrower arising under the Multicurrency Facility Agreement and other related loan documents. Such guarantee may also cover obligations of the Borrower arising under any hedging arrangements. The Multicurrency Facility Agreement is subject to certain financial covenants. At September 30, 2015, we were in compliance with all the covenants and had \$23.0 million borrowed and outstanding. The unused borrowing capacity under the Multicurrency Facility Agreement, after giving effect to standby letters of credit, was \$175.1 million.

If the current industry conditions remain the same, it is possible that we will not be in compliance with certain covenants by mid-year 2016. We intend to work with the Lenders to negotiate amendments or waivers, if required, before we actually breach any covenants. A likely result of any amendment or waiver would be additional restrictions from the Lenders and a potential reduction in the amounts available for borrowing under the facility. There can be no assurance that we would be able to negotiate acceptable terms in the facility agreements should a breach occur.

Norwegian Facility Agreement

On June 20, 2013, we entered into an amendment to our December 27, 2012 agreement (the "Norwegian Facility Agreement") among us, as guarantor, one of our indirect wholly-owned subsidiaries, as borrower (the "Norwegian Borrower"), and a Norwegian bank as lead lender (the "Norwegian Lender"). The amendment was established to adjust certain covenants and to allow us to begin to draw on available credit. The Norwegian Facility Agreement has a scheduled maturity date of September 30, 2017 and commits the Norwegian Lender to provide loans up to an aggregate principal amount of 600.0 million NOK (approximately \$70.4 million at September 30, 2015) at any one time outstanding, subject to certain terms and conditions. We paid fees to the Norwegian Lender totaling \$1.3 million, which are being amortized into interest cost over the life of the Norwegian Facility Agreement using the effective interest method. On October 23, 2014, we entered into an additional amendment to the Norwegian Facility Agreement which extended the scheduled maturity date from September 30, 2017 to September 30, 2019 and revised certain financial covenants. Loans under the Norwegian Facility Agreement accrue interest at Norwegian InterBank Offered Rate, plus an applicable margin based on our capitalization ratio. The fee for unused commitments is 50 basis points per annum.

In February 2015, we entered into an amendment to the Norwegian Facility Agreement that reduced the requirement under the covenant governing the interest coverage ratio. In return for the reduction, the lenders required that we agree to certain financial restrictions, including limiting our ability make certain payments for dividends, acquisitions or share repurchases. We paid an additional \$0.2 million in fees.

In July 2015, we entered into an amendment to the Norwegian Facility Agreement that, among other changes, (a) modified the interest coverage ratio requirements applicable to certain periods to conform to the interest coverage ratio requirements applicable to the same periods as set forth in the Multicurrency Facility Agreement, as amended and described above, (b) added a new covenant that liquidity not be less than \$50.0 million and (c) increased the commitment fee. The borrowing capacity under Norwegian Facility Agreement did not change. We paid an additional \$0.1 million in fees. Our unused commitment fee rate increased to 65 basis points.

The Norwegian Facility Agreement, as amended, is secured by certain vessels of the Norwegian Borrower. The collateral that secures the loans under the Norwegian Facility Agreement may also secure all of the Norwegian Borrower's obligations under any hedging agreements between the Norwegian Borrower and the Norwegian Lender or other hedge counterparty to the Norwegian Facility Agreement.

We unconditionally guaranteed all existing and future indebtedness and liabilities of the Norwegian Borrower arising under the Norwegian Facility Agreement and other related loan documents. Such guarantee may also cover obligations of the Norwegian Borrower arising under any hedging arrangements described above. The Norwegian Facility Agreement is subject to certain financial covenants. At September 30, 2015, we had no amounts borrowed and outstanding and were in compliance with all the covenants under this agreement.

If the current industry conditions remain the same, it is possible that we will not be in compliance with certain covenants by mid-year 2016. We intend to work with the Lenders to negotiate an amendments or waivers, if required, before we actually breach any covenants. A likely result of any amendment or waiver would be additional restrictions from the Lenders and a potential reduction in the amounts available for borrowing under the facility. There can be no assurance that we would be able to negotiate acceptable terms in the facility agreements should a breach occur.

(5) INCOME TAXES

Our estimated annual effective tax rate, adjusted for discrete tax items, is applied to interim periods' pretax income (loss). We consider a portion of the earnings of our foreign subsidiaries to be permanently reinvested, and as such, we have not provided for any U.S. federal or state income taxes on the permanently reinvested earnings.

Due to the reduction in our revenues this quarter, we have determined to repatriate all future foreign earnings and \$200 million of prior earnings of our non-U.S. subsidiaries, thereby reducing our total permanently reinvested earnings. This has resulted in a non-cash tax charge, due to our cumulative net operating loss position, of approximately \$70.0 million in the third quarter of 2015. We have not provided for U.S. deferred taxes on the remaining permanently reinvested earnings of approximately \$800.0 million at September 30, 2015. If these amounts were repatriated we would owe U.S. income taxes at the U.S. statutory tax rate minus applicable foreign tax credits. As of September 30, 2015 we had approximately \$30 million of cash held by our foreign subsidiaries which would be subject to U.S. tax upon repatriation.

(6) STOCKHOLDERS' EQUITY

Repurchases of Equity Securities

On December 11, 2012, our Board of Directors approved a stock repurchase program for up to a total of \$100 million of our issued and outstanding Class A common stock. The stock may be repurchased from time to time on the open market or in privately negotiated transactions. Repurchases can be made from time to time using a variety of methods, which may include open market purchases or purchases through a Rule 10b5-1 trading plan, all in accordance with SEC and other applicable legal requirements. The specific timing, price and size of purchases will be determined by our management based on prevailing stock prices, general economic and market conditions and other considerations. The repurchase program does not obligate us to acquire any particular amount of common stock and may be suspended or discontinued at any time. In the third quarter 2014, we repurchased 264,354 shares of common stock under this plan at an average price of \$36.53 per share. In February 2015, we entered into an amendment to our revolving credit agreements that reduced the requirement under the covenant governing the interest coverage ratio. In return for the reduction, the lenders required that we agree to certain financial restrictions, including limiting our ability make certain payments for dividends, acquisitions or share repurchases.

Dividends

In December 2012, our Board of Directors declared an annual cash dividend on our Class A common stock of \$1.00 per share. At the beginning of 2013 our Board of Directors announced that we intend to pay a recurring quarterly cash dividend of \$0.25 per share. In February 2015, our Board of Directors resolved to suspend the dividend payments indefinitely. Also in February 2015, we entered into an amendment to our revolving credit agreements that reduced the requirement under the covenant governing the interest coverage ratio. In return for the reduction, the lenders required that we agree to certain financial restrictions, including limiting our ability to make certain payments for dividends, acquisitions or share repurchases. The Board of Directors declared the following dividends for the nine months and quarters ended September 30, 2015 and September 30, 2014:

	Nine Months Ended September 30, 2015	Nine Months Ended September 30, 2014	Quarter Ended September 30, 2015	Quarter Ended September 30, 2014
Dividends Declared (in thousands)	\$ -	\$ 19,982	\$ -	\$ 6,644
Dividend per share	\$ -	\$ 0.75	\$ -	\$ 0.25

(7) COMMITMENTS AND CONTINGENCIES

We have contingent liabilities and future claims for which we have made estimates of the amount of the eventual cost to liquidate these liabilities or claims. These liabilities and claims may involve threatened or actual litigation where damages have not been specifically quantified but we have made an assessment of our exposure and recorded a provision in our accounts for the expected loss. Other claims or liabilities, including those related to taxes in foreign jurisdictions, may be estimated based on our experience in these matters and, where appropriate, the advice of outside counsel or other outside experts. Upon the ultimate resolution of the uncertainties surrounding our estimates of contingent liabilities and future claims, our future reported financial results will be impacted by the difference, if any, between our estimates and the actual amounts paid to settle the liabilities. In addition to estimates related to litigation and tax liabilities, other examples of liabilities requiring estimates of future exposure include contingencies arising out of acquisitions and divestitures. Our contingent liabilities are based on the most recent information available to us regarding the nature of the exposure. Such exposures change from period to period based upon updated relevant facts and circumstances, which can cause the estimate to change. In the recent past, our estimates for contingent liabilities have been sufficient to cover the actual amount of our exposure.

In 2012, a Brazilian state in which we have operated vessels asserted that certain companies could be assessed state import taxes with respect to vessels that have operated within Brazilian coastal waters. We have neither been formally

assessed nor threatened with this tax. No accrual has been recorded as of September 30, 2015 for any liabilities associated with a possible future assessment. We cannot predict whether any such tax assessment may be made in the future.

(8) NEW ACCOUNTING PRONOUNCEMENTS

On May 28, 2014, the Financial Accounting Standards Board (the “FASB”) issued Accounting Standards Update (“ASU”) No. 2014-09, “Revenue from Contracts with Customers.” These amendments require an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. The ASU will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. The new standard is effective on January 1, 2017. Early application as of January 1, 2017 is allowed. The standard permits the use of either the retrospective or cumulative effect transition method. We are evaluating the effect that ASU 2014-09 will have on our consolidated financial statements and related disclosures. We have not yet selected a transition method nor have we determined the effect of the standard on our ongoing financial reporting. Subsequently, the FASB met in early 2015 and delayed the effective date until January 1, 2018.

In January 2015, the FASB issued ASU No. 2015-01, “Income Statement - Extraordinary and Unusual Items (Subtopic 225-20)”, which eliminates the concept of extraordinary items from U.S. GAAP as part of its simplification initiative. The ASU does not affect disclosure guidance for events or transactions that are unusual in nature or infrequent in their occurrence. The ASU is effective for interim and annual periods in fiscal years beginning after December 15, 2015. The ASU allows prospective or retrospective application. Early adoption is permitted if applied from the beginning of the fiscal year of adoption. We are currently evaluating the impact this ASU will have on our ongoing financial reporting, if any.

In February 2015, the FASB issued ASU No. 2015-02, “Consolidation (Topic 810) - Amendments to the Consolidation Analysis”, which changes the way reporting enterprises evaluate whether (a) they should consolidate limited partnerships and similar entities, (b) fees paid to a decision maker or service provider are variable interests in a variable interest entity (VIE), and (c) variable interests in a VIE held by related parties of the reporting enterprise require the reporting enterprise to consolidate the VIE. The new consolidation guidance is effective for annual and interim periods in fiscal years beginning after December 15, 2015. At the effective date, all previous consolidation analyses that the guidance affects must be reconsidered. This includes the consolidation analyses for all VIEs and for all limited partnerships and similar entities that previously were consolidated by the general partner even though the entities were not VIEs. Early adoption is permitted, including early adoption in an interim period. We are currently evaluating the impact this ASU will have on our ongoing financial reporting, if any.

In April 2015, the FASB issued ASU No. 2015-03, “Interest - Imputation of Interest (Subtopic 835-30) - Simplifying the Presentation of Debt Issuance Costs”, which requires debt issuance costs related to a recognized debt liability to be presented in the balance sheet as a direct deduction from the debt liability rather than as an asset. Upon adoption, an entity must apply the new guidance retrospectively to all prior periods presented in the financial statements. We will adopt the standard effective January 1, 2016 which will result in the netting of our deferred financing costs against long-term debt balances in the consolidated balance sheets for the periods presented and related disclosure. There will be no impact to the manner in which deferred financing costs are amortized in our consolidated financial statements.

(9) OPERATING SEGMENT INFORMATION

We operate three segments: the North Sea, Southeast Asia and the Americas, each of which is considered a reportable segment under FASB ASC 280, "*Segment Reporting*". Our management evaluates segment performance primarily based on operating income. Cash and debt are managed centrally. Because the regions do not manage those items, the gains and losses on foreign currency remeasurements associated with these items are excluded from operating income. Our management considers segment operating income to be a good indicator of each segment's operating performance from its continuing operations, as it represents the results of the ownership interest in operations without regard to financing methods or capital structures. Each operating segment's operating income (loss) is summarized in the following table, and detailed discussions below.

Operating Income (Loss) by Operating Segment

	North Sea	Southeast Asia	Americas	Other	Total
<i>(In thousands)</i>					
Quarter Ended September 30, 2015					
Revenue	\$33,743	\$ 7,185	\$19,740	\$-	\$60,668

At December 31, 2014, we had \$519.8 million and at September 30, 2015, we had \$426.3 million in long-lived assets attributable to the United States, our country of domicile.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

We provide marine support and transportation services to companies involved in the offshore exploration and production of oil and natural gas. Our vessels transport drilling materials, supplies and personnel to offshore facilities, as well as move and position drilling structures. A substantial portion of our operations are international. Our fleet has grown in both size and capability, to our present number of 74 active vessels, through strategic acquisitions and new construction of technologically advanced vessels, partially offset by dispositions of certain older, less profitable vessels. At November 6, 2015, our active fleet includes 71 owned vessels and three managed vessels.

Our results of operations are affected primarily by day rates, fleet utilization and the number and type of vessels in our fleet. Utilization and day rates, in turn, are influenced principally by the demand for vessel services from the offshore exploration and production sectors of the oil and natural gas industry. The supply of vessels to meet this fluctuating demand is related directly to the perception of future activity in both the drilling and production phases of the oil and natural gas industry as well as the availability of capital to build new vessels to meet the changing market requirements. The recent and sustained decline in the price of oil has materially and negatively impacted our results of operations as described in greater detail below.

We also provide management services to other vessel owners for a fee. We do not include charter revenue and vessel expenses of these vessels in our operating results; however, management fees are included in operating revenue. These vessels are excluded for purposes of calculating fleet rates per day worked and utilization in the applicable periods.

The operations of our fleet may be subject to seasonal factors. Operations in the North Sea are often at their highest levels from April to August and at their lowest levels from November to February. Operations in our other areas, although involving some seasonal factors, tend to remain more consistent throughout the year.

Our operating costs are primarily a function of fleet configuration. The most significant direct operating cost is wages paid to vessel crews, followed by repairs and maintenance. Generally, fluctuations in vessel utilization have little effect on direct operating costs in the short term and, as a result, direct operating costs as a percentage of revenue may vary substantially due to changes in day rates and utilization.

In addition to direct operating costs, we incur fixed charges related to (i) the depreciation of our fleet, (ii) costs for routine drydock inspections, (iii) modifications designed to ensure compliance with applicable regulations, and (iv) maintaining certifications for our vessels with various international classification societies. The number of drydockings and other repairs undertaken in a given period generally determines our repair and maintenance expenses. The demands of the market, the expiration of existing contracts, the start of new contracts, seasonal factors and customer preferences influence the timing of drydocks. During the three and nine month periods ended September 30,

2015, we completed 66 and 331 drydock days compared to 87 and 373 drydock days in the same periods last year. As a result of the current market downturn we have taken some vessels out of service (also referred to as stacking) and deferred a number of drydocks as part of our cost cutting initiatives. The deferred drydocks will eventually be required to return the vessels to active service.

Critical Accounting Policies

There have been no changes to the critical accounting policies used in our reporting of results of operations and financial position. For a discussion of our critical accounting policies see Management's Discussion and Analysis of Financial Condition and Results of Operations in our 2014 Form 10-K.

Long-Lived Assets and Goodwill

Our tangible long-lived assets consist primarily of vessels and construction-in-progress. Our intangible asset is associated with customer relationships in the U.S. Gulf of Mexico acquired in our 2008 acquisition of Rigdon Marine Corporation and Rigdon Marine Holdings, LLC. Our goodwill relates to the 2001 acquisition of Sea Truck Holding AS and the 1998 acquisition of Brovig Supply AS. In assessing potential impairment related to our long-lived assets, the carrying values of the assets are compared with undiscounted expected future cash flows. If the carrying value of any long-lived asset is greater than the related undiscounted expected future cash flows, we measure impairment by comparing the fair value of the asset with its carrying value. At least annually, we assess whether goodwill is impaired based on certain qualitative factors.

In late 2014, the oil and gas industry experienced a significant decline in the price of oil causing an industry-wide downturn which has continued into 2015. The oil price recovered to almost \$60 per barrel in the second quarter but continued its decline in the third quarter bottoming at near \$40 per barrel. This downturn has impacted the operational plans for oil companies and consequently has affected the drilling and support service sector. We have experienced a negative impact on day rates and utilization in 2015 which is expected to continue into 2016.

As of December 31, 2014, we performed a full assessment of goodwill that did not indicate impairment. We performed another assessment in the second quarter of 2015 that did not indicate impairment, but the margin of coverage, given our assumptions, had narrowed since December 31, 2014. In the second quarter, we also performed a Step 1 assessment of our long-lived assets, including the intangible asset, for impairment and concluded that no impairment was indicated. These assessments were performed as a result of the triggering events described in the preceding paragraph.

Goodwill Impairment

Goodwill is tested for impairment in the third quarter each year or on an interim basis if events or circumstances indicate that the fair value of goodwill has decreased below its carrying value. We completed a qualitative analysis of

goodwill in the third quarter of 2015 and determined that further testing was necessary. Our goodwill impairment evaluation indicated that the carrying value of the North Sea segment exceeded its fair value so that goodwill was potentially impaired. We then performed the second step of the goodwill impairment test, which involved calculating the implied fair value of our goodwill by allocating the fair value of the North Sea segment to all of the assets and liabilities (other than goodwill) and comparing it to the carrying amount of goodwill. To estimate the fair value of the reporting unit we used a 50% weighting of the discounted cash flow method and a 50% weighting of the public company guideline method in determining fair value of the North Sea reporting unit.

We determined that the implied fair value of our goodwill for the North Sea segment was less than its carrying value and recorded a \$22.6 million impairment of the North Sea segment's goodwill.

Long-Lived Asset Impairment

Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Recoverability of assets to be held and used is assessed by a comparison of the carrying amount of such assets to their fair value. Cash flow estimates are based upon, among other things, historical results adjusted to reflect the best estimate of operating performance. If an asset group's fair value is less than the carrying amount of that asset groups, impairment losses are recorded in the amount by which the carrying amount of such assets exceeds the fair value. The estimates of fair value of our vessels and intangible asset were obtained from fair value appraisals performed at our request by third party appraisal firms.

At September 30, 2015, we recorded \$129.2 million in expense in connection with the impairment of our long-lived assets in the U.S. Gulf of Mexico, which is a part of our Americas segment. The impairment consisted of \$115.5 million related to our vessels and \$13.7 million related to our intangible asset. The impairment in value of long-lived assets in the U.S. Gulf of Mexico was primarily driven by the disproportionately higher decline in day rates and utilization in the U.S. Gulf of Mexico compared to the other areas in which we provide offshore supply vessel services. We will continue to monitor the industry and our asset groups for indications of impairment and will perform additional assessments as conditions and circumstances warrant.

Vessel Component Impairment

We have certain vessel components in our North Sea region fixed asset base that were intended to be used in our new-build program. In second quarter 2014, we evaluated the use of these components and determined that they would not be used in our new-build fleet. We are actively pursuing a sale of the equipment, but there is a limited market. We adjusted the carrying value at June 30, 2014 to reflect the net realizable value. These assets are included in deferred costs and other assets on our balance sheet. The total charge to impairment expense related to these components at June 30, 2014 was \$7.0 million. The adjustment value was based on an appraisal prepared by a third party appraisal firm. We obtained an updated appraisal at the end of each quarter since June 30, 2014 with no indications of material additional impairment until the third quarter 2015. We have charged an additional \$0.4 million to impairment expense as of September 30, 2015 based on the updated appraisal.

Results of Operations

The table below sets forth, by region, the average day rates and utilization for our vessels and the average number of vessels owned or chartered during the periods indicated. This fleet generates substantially all of our revenues and operating profit. We use the information that follows to evaluate the performance of our business.

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2015	2014	2015	2014
Revenues by Region (000's) (a):				
North Sea Based Fleet (c)	\$33,743	\$61,781	\$110,521	\$172,658
Southeast Asia Based Fleet	7,185	13,930	31,503	49,665
Americas Based Fleet	19,740	52,975	82,197	157,328
Rates Per Day Worked (b):				
North Sea Based Fleet (c)	\$15,985	\$23,974	\$17,155	\$23,151
Southeast Asia Based Fleet	10,331	15,419	12,209	15,329
Americas Based Fleet	15,310	23,969	17,919	23,286
Overall Utilization (b):				
North Sea Based Fleet	83.5 %	90.9 %	83.2 %	89.9 %
Southeast Asia Based Fleet	59.4 %	66.8 %	71.5 %	78.0 %
Americas Based Fleet	47.0 %	83.2 %	56.4 %	87.1 %
Average Owned Vessels (d):				
North Sea Based Fleet	28.1	31.0	28.8	30.4
Southeast Asia Based Fleet	13.0	15.1	13.0	15.7
Americas Based Fleet	30.0	29.0	30.0	28.6
Total	71.1	75.1	71.7	74.7

(a) Includes owned and managed vessels.

(b) Rate per day worked is defined as total charter revenues divided by number of days worked. Utilization rate is defined as the total days worked divided by total days of availability in the period.

Revenues for vessels in the North Sea based fleet are primarily earned in Pound Sterling (GBP), Norwegian Kroner (c)(NOK) and Euros, and have been converted to U.S. Dollars (US\$) at the average exchange rate for the period. See *Currency Fluctuations and Inflation* below for exchange rates.

Average number of vessels is calculated based on the aggregate number of vessel days available during each period (d)divided by the number of calendar days in such period. Includes owned vessels only, and is adjusted for vessel additions and dispositions occurring during each period.

Comparison of the Three Months Ended September 30, 2015 with the Three Months Ended September 30, 2014

For the quarter ended September 30, 2015, we had a net loss of \$185.2 million, or \$7.48 per diluted share, on revenues of \$60.7 million. For the same period in 2014, net income was \$24.3 million, or \$0.92 per diluted share, on revenues of \$128.7 million.

Our revenues for the quarter ended September 30, 2015 decreased \$68.0 million, or 52.9%, compared to the quarter ended September 30, 2014. In late 2014, the oil and natural gas market experienced a downturn which was precipitated by a substantial decline in the price of crude oil which, in turn, had a significant negative effect on the demand for offshore supply vessels. This continued downturn is the primary reason for the decline in revenue. Average day rates decreased from \$22,587 during the third quarter of 2014 to \$14,810 during the third quarter of 2015 resulting in a \$29.5 million decline in revenue. In addition, a utilization decrease of 19.4 percentage points reduced revenue by \$30.9 million. The continuing strength of the U.S. dollar also decreased revenue by \$6.7 million, as a large portion of our revenue is earned in foreign currencies. In addition, revenue decreased \$0.9 million as a result of the sale of four vessels during the fourth quarter of 2014 and the sale of a vessel in third quarter of 2015, partially offset by the delivery of one new-build vessel in the first quarter of 2015.

Operating income decreased \$201.9 million, from \$34.8 million in the third quarter of 2014 to a loss of \$167.1 million during the third quarter of 2015. As a result of the ongoing downturn in the industry, during the third quarter of 2015, we recognized impairment charges of \$152.1 million related to the write-down of certain assets as described above. Excluding these charges, the decrease in operating income was \$49.8 million with lower revenue the primary contributor. In an effort to mitigate the decrease in revenue we have implemented aggressive cost saving initiatives, including stacking vessels. The major cost saving attributable to stacking vessels is the reduction of crew wages and travel expense. In addition, we have deferred drydock costs on these vessels, which deferred cost will eventually be required to return the vessels to active service. These reductions have significantly decreased our operating costs. We have also reduced our onshore staffing levels globally which has decreased our general and administrative costs. As a result, we experienced decreases from the third quarter of 2014 compared to the third quarter of 2015 in direct operating expenses of \$21.7 million and general and administrative expenses of \$1.7 million. Depreciation and amortization decreased \$0.5 million and drydock expense decreased \$0.4 million due to a lower number of drydock days during the third quarter of 2015. A decrease in gain on sale of assets of \$6.1 million from the third quarter of 2014 to the third quarter of 2015 partially offset the decreases in expenses.

North Sea

Revenues in the North Sea decreased \$28.0 million, or 45.4%, in the third quarter of 2015 compared to the third quarter of 2014. Utilization decreased from 90.9% in the third quarter of 2014 to 83.5% in the current quarter, causing a decrease in revenue of \$3.8 million. Day rates decreased from \$23,974 in the third quarter of 2014 to \$15,985 in the third quarter of 2015, decreasing revenue by \$15.2 million. A stronger U.S. dollar contributed \$6.4 million to the

decline in revenue, and the sale of three vessels during the fourth quarter of 2014 and first quarter of 2015 caused a decrease in revenue of \$2.6 million. Operating income decreased \$39.9 million from the third quarter of 2014 to the third quarter of 2015. We recognized goodwill impairment charge of \$22.9 million during the third quarter of 2015 which, along with the decrease in revenue, were primarily responsible for the decrease in operating income. Partially offsetting the above were decreases in direct operating expenses of \$7.9 million, general and administrative expenses of \$1.1 million, and depreciation and amortization of \$1.2 million. In addition drydock expense decreased slightly. The decreases in operating expenses and general and administrative expenses were the direct result of cost saving initiatives implemented in 2015. In addition, during the third quarter of 2015 we recognized a gain on sale of an asset of \$0.7 million.

Southeast Asia

Revenues for our Southeast Asia based fleet decreased by \$6.7 million, or 48.4%, in the third quarter of 2015 compared to the third quarter of 2014. Utilization decreased by 7.4 percentage points causing a decrease in revenue of \$3.4 million from the third quarter of 2014. Day rates decreased from \$15,419 during the third quarter of 2014 to \$10,331 for the third quarter of 2015, decreasing revenue by \$2.9 million. In addition, the sale of an older vessel late in 2014 caused a decrease in revenue of \$0.4 million. Operating income decreased \$11.7 million, from \$8.5 million during the third quarter of 2014 to a loss of \$3.2 million during the third quarter of 2015. The decrease was due primarily to lower revenue and an increase of \$2.1 million in drydock expenses. In addition, during the third quarter of 2014 we recognized a gain on sale of asset of \$5.5 million, which contributed to the decrease in operating income. Partially offsetting these decreases were lower direct operating expenses of \$2.1 million due to the lower number of vessels operating and cost cutting efforts. In addition we experienced lower general and administrative expenses of \$0.4 million and lower depreciation and amortization expense of \$0.1 million.

Americas

The Americas region revenues decreased by \$33.2 million, or 62.7%, in the third quarter of 2015 compared to the third quarter of 2014. Utilization decreased from 83.2% during the third quarter of 2014 to 47.0% during the third quarter of 2015, causing a decrease in revenue of \$23.7 million. Average day rates in the region decreased from \$23,969 in the third quarter of 2014 to \$15,310 in the third quarter of 2015, decreasing revenue by an additional \$11.3 million. The continued strength of the U.S. dollar had an impact on our Brazil operation, decreasing revenue by \$0.3 million. Partially offsetting these decreases was an increase in capacity that increased revenue by \$2.1 million due to the full quarter effect of a new-build delivered during the first quarter of this year. Operating income for the region decreased from \$15.0 million during the third quarter of 2014 to a loss of \$134.8 million during the third quarter of 2015. The third quarter of 2015 included impairment charges of \$129.2 million related to the write-downs of our U.S. long-lived and intangible assets. Excluding these charges, operating income decreased \$20.6 million. This decrease was largely related to the decrease in revenue, partially offset by an \$11.7 million decrease in direct operating expenses due to the continuing cost cutting initiatives. Drydock expense decreased by \$2.4 million and general and administrative expense decreased by \$0.5 million. Depreciation and amortization increased by \$0.6 million resulting from the addition of one vessel. In the 2014 quarter, we recognized a gain on sale of asset of \$1.4 million with no significant gain recognized in the third quarter of 2015.

Other

Other expenses in the third quarter of 2015 increased by \$0.5 million, to \$10.2 million due to higher interest expense related to the acceleration of the amortization of debt issue costs resulting from the modification of our debt facility agreements during the third quarter of 2015. Offsetting this increase, during the same quarter, we experienced a decrease in foreign currency losses.

Tax Rate

Our effective tax rate for the third quarter of 2015 was negative (4.7)%. This compares to a 3.2% effective tax rate for the third quarter of 2014. The change in rate from the prior year is primarily attributable to the change in the permanent investment assertion for the earnings of the non-U.S. subsidiaries of (\$70.0) million, tax related to the impairment charges of \$48.4 million and a decrease in the balance of uncertain tax positions of \$4.4 million.

Comparison of the Nine Months Ended September 30, 2015 with the Nine Months Ended September 30, 2014

For the nine months ended September 30, 2015, we had a net loss of \$198.6 million, or \$8.04 per diluted share, on revenues of \$224.2 million. During the nine months ended September 30, 2014, net income was \$55.1 million, or \$2.09 per diluted share, on revenues of \$379.7 million.

Revenue decreased \$155.4 million, or 40.9%, period over period. Utilization decreased by 16.5 percentage points, from 86.4% in 2014 to 69.9% in 2015, decreasing revenue by \$80.0 million. In addition, a decrease in day rates, from \$21,716 in 2014 to \$16,495 during the current year, further decreased revenue by \$55.8 million. A stronger U.S. dollar caused a decrease in revenue of \$20.7 million, as a large portion of our revenue is earned in foreign currencies. We sold six older, less profitable vessels during 2014 and 2015, replacing them with one acquired vessel and three new-build vessels. The net result of the sales and purchases was an increase in revenue of \$1.1 million.

We had an operating loss of \$171.8 million for the nine-month period ended September 30, 2015 compared to operating income of \$80.9 million during the same period in 2014. In 2015 and 2014, we had impairment charges of \$152.1 million and \$7.5 million, respectively. Excluding charges for impairment, the decrease in operating income year over year was \$108.1 million. Offsetting the revenue decrease were decreases in all our expense categories, resulting from aggressive cost saving initiatives implemented early this year, including stacking vessels. The major cost saving attributable to stacking vessels is the reduction of crew wages and travel expense. In addition, we have deferred drydock costs on these vessels, which deferred cost will eventually be required to return the vessels to active service. These reductions have significantly decreased our operating costs. We have also reduced our onshore staffing levels globally which has decreased also our general and administrative costs. Direct operating expenses decreased \$40.6 million and drydock expense decreased \$0.9 million. General and administrative costs decreased by \$11.1 million, and depreciation and amortization decreased \$0.8 million. Gain on sale of assets decreased by \$6.1 million year over year.

North Sea

North Sea revenue decreased \$62.1 million, or 36.0%, for the first nine months of 2015 compared to the same period in 2014. Utilization decreased from 89.9% in 2014 to 83.2% in 2015, causing a decrease in revenue of \$14.0 million. Day rates decreased from \$23,151 last year to \$17,155 this year, reducing revenue by \$26.7 million, while the strong U.S. dollar caused a decrease in revenue of \$18.8 million. In addition, lower capacity resulting from the sale of older vessels decreased revenue by \$2.6 million. Operating income decreased by \$40.7 million. This amount includes a goodwill impairment charge of \$22.6 million during 2015 and vessel components impairment charge of \$7.0 during 2014. Excluding these charges, operating income decreased \$34.8 million resulting directly from the decrease in revenue. Partially offsetting the revenue decrease were decreases in direct operating expenses of \$16.8 million, drydock expense of \$1.2 million, general and administrative expenses of \$5.7 million all related to cost cutting measures. Depreciation and amortization also decreased by \$2.9 million. During the third quarter of 2015, we recognized a gain on sale of assets of \$0.7 million.

Southeast Asia

Revenue decreased by \$18.2 million, or 36.6%, for the first nine months of 2015. Utilization declined from 78.0% in the first nine months of 2014 to 71.5% in the first nine months of 2015, decreasing revenue by \$8.6 million. Day rates decreased from \$15,329 in the first nine months of 2014 to \$12,209 in 2015 decreasing revenue by \$5.5 million. Furthermore, the sale of three older vessels caused a decline in revenue of \$4.1 million for the first nine months of 2015. Operating income decreased by \$18.1 million, from \$20.9 million in the first nine months of 2014 to \$2.8 million in the same period of 2015. The decrease in revenue coupled with a year over year decrease in gain on sale of assets of \$5.5 million and a slight increase in drydock expense of \$0.2 million contributed to the decrease in operating income. Partially offsetting this was a decrease in direct operating expenses of \$3.8 million due mainly to the lower number of vessels operating in the region and the continuing cost cutting efforts. General and administrative expenses decreased by \$0.8 million, and depreciation and amortization expenses decreased by \$0.7 million.

Americas

Revenue decreased \$75.1 million, or 47.8%, in the first nine months of 2015 compared to the first nine months of 2014. Utilization decreased from 87.1% during the first nine months of 2014 to 56.4% in 2015, causing a decrease of \$57.9 million in revenue. Average day rates decreased from \$23,286 in the first nine months of 2014 to \$17,919 in the current year, which decreased revenue by \$23.0 million. The stronger U.S. dollar caused a further decrease in revenue of \$2.0 million. Offsetting these decreases was an increase in capacity related to two new-build vessels delivered into the region in 2014 and early 2015 which increased revenue by \$7.8 million. We had an operating loss of \$141.1 million during the first nine months of 2015, compared to operating income of \$45.4 million during the first nine months of 2014. Included in the operating loss were impairment charges of \$129.2 million related to the write down of U.S. long lived and intangible assets. Excluding these charges, the decrease in operating income was \$57.4 million. The decrease in revenue was the main contributor to the reduction in operating income. Offsetting the decrease in revenue was the decrease in direct operating expenses of \$19.9 million and general and administrative expenses of \$1.7 million, both resulting from the aggressive cost cutting initiatives implemented in 2015. Depreciation expenses increased \$2.3 million mainly due to the addition of the two new vessels. In addition, during 2014 we recognized a gain on sale of assets of \$1.4 million which was not duplicated in 2015.

Other

Other expenses in the first nine months of 2015 increased by \$4.8 million, to \$27.1 million due to higher interest expense related to higher outstanding debt balance and lower capitalized interest during the first nine months of 2015. In 2015 we also modified our credit facility agreements that accelerated the amortization of debt issue costs. In addition, during the first nine months of 2015, we experienced foreign currency losses that contributed to the higher cost.

Tax Rate

Our effective tax rate for the first nine months of 2015 was less than 1%. This compares to a 6.1% effective tax rate for the same 2014 period. The change in the effective tax rate from the prior year was primarily attributable to the change in the permanent investment assertion for the earnings of the non-U.S. subsidiaries of (\$70.0) million, tax related to impairment charges of \$48.4 million and a decrease in the balance of uncertain tax positions of \$4.0 million.

Liquidity, Capital Resources and Financial Condition

Our ongoing liquidity requirements are generally associated with our need to service debt, fund working capital, maintain our fleet, and, when market conditions are favorable, finance the construction of new vessels and acquire or improve equipment or vessels. Bank financing, equity capital and internally generated funds have historically provided funding for these activities. Internally generated funds are directly related to fleet activity and vessel day rates, which are generally dependent upon the demand for our vessels which is ultimately determined by the supply and demand for offshore drilling for crude oil and natural gas.

Industry conditions

The recent and sustained decline in the price of oil has materially and negatively impacted our results of operations. These lower commodity prices have negatively impacted revenues, earnings and cash flows, and sustained low oil and natural gas prices could have a material and adverse effect on our liquidity position. This downturn has also impacted the operational plans for the major oil companies and consequently has affected the drilling and support service sector. As a result, we have experienced a negative impact on day rates and utilization in the first nine months of 2015. In response to the downturn and the lower day rates, we have made changes to our cost structure, particularly to our onshore and offshore compensation and staffing. We are continuing to adjust staffing and compensation levels and more closely control maintenance and outside services costs. We have stacked some vessels virtually eliminating variable costs.

Due to the reduction in our revenues this quarter, we have determined to repatriate all future foreign earnings and \$200.0 million of prior earnings of our non-US subsidiaries, thereby reducing our total permanently reinvested earnings. This has resulted in a non-cash tax charge, due to our cumulative net operating loss position, of approximately \$70.0 million in the third quarter of 2015. We have not provided for U.S. deferred taxes on the remaining permanently reinvested earnings of approximately \$800.0 million at September 30, 2015. If these amounts were repatriated we would owe U.S. income taxes at the U.S. statutory tax rate minus applicable foreign tax credits. As of September 30, 2015 we had approximately \$30.0 million of cash held by our foreign subsidiaries which would be subject to U.S. tax upon repatriation.

We are required to make expenditures for the certification and maintenance of our vessels. We expect to have no further drydocking expenditures during 2015.

Construction of new vessels

We are currently in the latter stages of a 12 vessel new-build program that was initiated in 2011. Beginning in the second quarter of 2013, we have delivered seven vessels to our North Sea region and two vessels to our Americas region. We currently have two remaining vessels under construction in the U.S. and one vessel, with Arctic capabilities, under construction in Norway. Neither of two remaining U.S. vessels have been delivered. In addition, both vessels are significantly past the delivery date in the original contract. The current schedule anticipates delivery of these remaining vessels in the first and second quarters of 2016 and additional delays may occur. Given the significant delays and other technical problems associated with the construction and delivery of these vessels, to preserve our rights, we have initiated arbitration proceedings with BAE as provided for under our contract. The Norway vessel is scheduled to deliver during the first quarter 2016. In total, we are contracted to pay approximately \$61.3 million through the second quarter of 2016 to complete these new-build vessels.

Long-term debt and revolving credit facilities

We have issued \$500.0 million aggregate principal amount of our Senior Notes. The Senior Notes pay interest semi-annually on March 15 and September 15.

We also have line of credit financing available under our Multicurrency Facility Agreement, as amended, that provides us with \$200.0 million of borrowing capacity, secured by our Americas region vessels, through September 2019 and under our Norwegian Facility Agreement, as amended, that provides us with 600.0 million NOK (approximately \$70.4 million at September 30, 2015) of borrowing capacity, secured by our Norwegian flagged vessels, through September 2019. In February 2015, we entered into amendments to our Multicurrency and Norwegian Facility Agreements that reduced the requirement under the covenants governing the interest coverage ratio. In return for the reduction, the lenders required that we agree to certain financial restrictions, including limiting our ability make certain payments for dividends, acquisitions or share repurchases.

On July 2, 2015, we entered into an additional amendment to the Multicurrency Facility Agreement that, among other changes, (a) reduced the interest coverage ratio requirements applicable to certain periods, (b) changed the required collateral to lenders' commitments ratio for certain periods, (c) added a new mechanism for curing defaults on financial covenants and (d) removed a requirement that we take delivery of certain vessels. In return for the amendment, the lenders required that we agree to certain changes, including (u) increasing the commitment fee during certain periods, (v) reducing commitments under the facility from \$300.0 million to \$200.0 million, (w) increasing the rate of interest accruing under the facility, (x) adding a new covenant that liquidity not be less than \$50.0 million, (y) reducing the amounts of business acquisitions, collateral dispositions, capital expenditures, joint ventures, distributions to equity holders and indebtedness permitted during certain periods and (z) subjecting certain affiliate parties that are not obligors to the Multicurrency Facility Agreement's limitations on business acquisitions, capital expenditures and joint ventures during certain periods.

On July 7, 2015, we entered into an amendment to the Norwegian Facility Agreement that incorporated the same changes in covenants as the Multicurrency Facility Agreement amendment. The Norwegian Facility Agreement amendment did not reduce borrowing capacity. At September 30, 2015, we were in compliance with all covenants associated with our loan agreements and all covenants associated with the indenture that governs the Senior Notes. Refer to Note 4 “Long-Term Debt” in our Notes to Unaudited Condensed Consolidated Financial Statements for more information on our Senior Notes, Multicurrency Facility Agreement and Norwegian Facility Agreement.

If the current industry conditions remain the same, it is possible that we will not be in compliance with certain covenants by mid-year 2016. We intend to work with the lenders to negotiate amendments or waivers, if required, before we breach any covenants. A likely result of any amendment or waiver would be additional restrictions from the respective lenders and potential reductions in amounts available for borrowing under the facilities. There can be no assurance that we would be able to negotiate acceptable changes in the facility agreements should a breach occur.

Cash and working capital

Net working capital at September 30, 2015, was \$70.7 million. The following table shows cash from operating, investing and financing activities:

	Nine Months Ended September 30, 2015 2014	
Net cash provided by operating activities	\$25.3	\$105.3
Net cash used in investing activities	(20.0)	(122.1)
Net cash used in financing activities	(22.9)	(10.6)
Net decrease in cash and cash equivalents	\$(17.6)	\$(27.4)

Operating Activities

Net cash provided by operating activities for the nine months ended September 30, 2015 was \$25.3 million compared to \$105.3 million provided by operating activities for the nine months ended September 30, 2014. The decrease was due primarily to lower revenue in 2015.

Investing Activities

Net cash used in investing activities for the nine months ended September 30, 2015 was \$20.0 million compared to \$122.1 million used in investing activities for the nine months ended September 30, 2014. The decrease in cash used in investing activities in the first nine months of fiscal 2015 was primarily due to less activity in our new build program. In 2014, we purchased one vessel, delivered three vessels from our new build program and had four vessels under construction that did not deliver in 2014. In 2015, we delivered one vessel early in the year and have three vessels under construction.

Financing Activities

Net cash used in financing activities for the nine months ended September 30, 2015 was \$22.9 million compared to \$10.6 million used in financing activities for the nine months ended September 30, 2014. The increase in cash used in financing activities in 2015 was due to greater repayments of borrowings in 2015 than amounts borrowed.

Resources and liquidity

At September 30, 2015, we had approximately \$31.2 million of cash on hand, approximately \$23.0 million drawn under our Multicurrency Facility Agreement, and \$500.0 million outstanding under our Senior Notes. We have approximately \$245.5 million of borrowing capacity, net of amounts currently borrowed and standby letters of credit, under our recently amended Multicurrency and Norwegian Facility Agreements.

We anticipate that cash on hand, future cash flows from operations for 2015 and 2016, access to our revolving credit facilities, assuming no significant changes in amounts available under the facilities, and limited vessel sales will be adequate to fund our new-build construction program, to repay our debts due and payable during such period, to complete scheduled drydockings, to make normal recurring capital additions and improvements and to meet operating and working capital requirements. As noted above, we were able to defer payment of \$22.9 million to the shipyard for the construction of a North Sea PSV from the first quarter of 2016 until the first quarter of 2017.

Off-Balance Sheet Arrangements

We have evaluated our off-balance sheet arrangements, and have concluded that we do not have any material relationships with unconsolidated entities or financial partnerships that have been established for the purpose of facilitating off-balance sheet arrangements (as that term is defined in Item 303(a)(4)(ii) of Regulation S-K). Based on this evaluation, we believe that no disclosures relating to off-balance sheet arrangements are required.

Currency Fluctuations and Inflation

A majority of our operations are international; therefore we are exposed to currency fluctuations and exchange rate risks. In areas where currency risks are potentially high, we normally accept only a small percentage of charter hire in local currency, with the remainder paid in U.S. Dollars. Operating costs are substantially denominated in the same

currency as charter hire in order to reduce the risk of currency fluctuations. Charters for vessels in our North Sea fleet are denominated in Pounds Sterling (GBP), Norwegian Kroner (NOK) or Euros. The North Sea fleet generated 55.5% of our total consolidated revenue for the three months ended September 30, 2015, and 49.2% of our total consolidated revenue for the nine months ended September 30, 2015. Charters in our Americas fleet can be denominated in Brazilian Reals and charters in our Southeast Asia fleet can be denominated in Singapore Dollars.

For the three and nine months ended September 30, 2015 and 2014, the exchange rates of GBP, NOK, Euros, Brazilian Reais and Singapore Dollar against the U.S. Dollar averaged as follows:

	Three Months Ended September 30, 2015		Nine Months Ended September 30, 2015	
	2015	2014	2015	2014
	1 US\$=		1 US\$=	
GBP	0.646	0.599	0.653	0.599
NOK	8.217	6.251	7.900	6.109
Euro	0.899	0.755	0.897	0.738
BRL	3.520	2.276	3.123	2.287
SGD	1.391	1.252	1.363	1.258

A substantial portion of our outstanding debt is denominated in U.S. Dollars, but a substantial portion of our revenue is generated in currencies other than the U.S. Dollar. We have evaluated these conditions and have determined that it is not in our best interest to use any financial instruments to hedge this exposure under present conditions. Our strategy is in part based on a number of factors including the following:

- the cost of using hedging instruments in relation to the risks of currency fluctuations;
- the propensity for adjustments in these foreign currency denominated vessel day rates over time to compensate for changes in the purchasing power of these currencies as measured in U.S. Dollars;
- the level of U.S. Dollar-denominated borrowings available to us; and
- the conditions in our U.S. Dollar-generating regional markets.

One or more of these factors may change and, in response, we may use financial instruments to hedge risks of currency fluctuations. We will from time to time hedge known liabilities denominated in foreign currencies to reduce the effects of exchange rate fluctuations on our financial results. We do not use foreign currency forward contracts for trading or speculative purposes.

Reflected in the accompanying consolidated balance sheet at September 30, 2015, is a loss of \$79.9 million in accumulated other comprehensive income (“accumulated OCI”) primarily relating to the change in exchange rates at September 30, 2015 in comparison with the exchange rates when we invested capital in these markets. Changes in accumulated OCI are non-cash items that are primarily attributable to investments in vessels and U.S. Dollar based capitalization between our parent company and our foreign subsidiaries. The current year activity reflects the changes in the U.S. Dollar compared to the functional currencies of our major operating subsidiaries, particularly in the U.K.

and Norway.

To date, general inflationary trends have not had a material effect on our operating revenues or expenses.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no material changes to the market risk disclosures contained in Item 7A in our Annual Report on Form 10-K for the year ended December 31, 2014.

ITEM 4. CONTROLS AND PROCEDURES

- (a) Evaluation of disclosure controls and procedures.

We maintain disclosure controls and procedures that are designed to provide reasonable assurance that information required to be disclosed in our reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, including our Principal Executive Officer and Principal Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. Our management, with the participation of our Principal Executive Officer and Principal Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures as of the end of the period covered by this Quarterly Report on Form 10-Q. Our Principal Executive Officer and Principal Financial Officer have concluded that, as of the end of the period covered by this Quarterly Report on Form 10-Q, our disclosure controls and procedures were effective at the reasonable assurance level.

- (b) Evaluation of internal controls and procedures.

As of December 31, 2014, our management determined that our internal controls over financial reporting were effective. There were no changes in our internal controls over financial reporting that occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

General

Various legal proceedings and claims that arise in the ordinary course of business may be instituted or asserted against us. Although the outcome of litigation cannot be predicted with certainty, we believe, based on discussions with legal counsel and in consideration of reserves recorded, that an unfavorable outcome of these legal actions would not have a material adverse effect on our consolidated financial position and results of operations. We cannot predict whether any such claims may be made in the future.

ITEM 1A. RISK FACTORS

In addition to the other information set forth in this Form 10-Q, you should carefully consider the factors discussed in Part I, “Item 1A. Risk Factors” in our 2014 Form 10-K, which could materially affect our business, financial condition or future results. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition or future results.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable

ITEM 5. OTHER INFORMATION

As previously disclosed, on August 12, 2015, Mr. Richard M. Safier, Senior Vice President, General Counsel and Secretary of the Company, notified the Company of his intent to leave the Company, effective August 31, 2015. In connection with his resignation, Mr. Safier was paid or will receive the payments and benefits that are payable pursuant to his employment agreement in the event of his termination by the company without cause, as previously disclosed.
