Form 10-Q
November 08, 2012

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D. C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the quarterly period ended September 30, 2012

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the transition period from _____ to _____
Commission file number 1-9183

Harley-Davidson, Inc.
(Exact name of registrant as specified in its charter)

Wisconsin 39-1382325
(State of organization) (I.R.S. Employer Identification No.)

3700 West Juneau Avenue 53208
Milwaukee, Wisconsin
(Address of principal executive offices) (Zip code)

Registrants telephone number: (414) 342-4680

None
(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company as defined in Rule 12b-2 of the Exchange Act. Yes No

Number of shares of the registrant's common stock outstanding at November 1, 2012: 226,257,911 shares

Table of Contents

HARLEY-DAVIDSON, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. Basis of Presentation and Use of Estimates

The condensed consolidated financial statements include the accounts of Harley-Davidson, Inc. and its wholly-owned subsidiaries (the Company), including the accounts of the group of companies doing business as Harley-Davidson Motor Company (HDMC) and Harley-Davidson Financial Services (HDFS). In addition, certain variable interest entities (VIEs) related to secured financing are consolidated as the Company is the primary beneficiary. All intercompany accounts and material intercompany transactions are eliminated.

In the opinion of management, the accompanying unaudited condensed consolidated financial statements contain all adjustments (consisting only of normal recurring adjustments) necessary to present fairly the condensed consolidated balance sheets as of September 30, 2012 and September 25, 2011, the condensed consolidated statements of operations for the three and nine month periods then ended, the condensed consolidated statements of comprehensive income for the three and nine month periods then ended and the condensed consolidated statements of cash flows for the nine month periods then ended.

Certain information and footnote disclosures normally included in complete financial statements have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission (SEC) and U.S. generally accepted accounting principles (U.S. GAAP) for interim financial reporting. These condensed consolidated financial statements should be read in conjunction with the audited financial statements and notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2011.

The Company operates in two business segments: Motorcycles & Related Products (Motorcycles) and Financial Services (Financial Services).

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and the accompanying notes. Actual results could differ from those estimates.

During 2008, the Company acquired Italian motorcycle manufacturer MV Agusta (MV). On October 15, 2009, the Company announced its intent to divest MV, and the Company completed the sale on August 6, 2010. MV is presented as a discontinued operation for all periods.

2. New Accounting Standards

Accounting Standards Recently Adopted

In May 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2011-4 Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and International Financial Reporting Standards (IFRS.) ASU No. 2011-04 clarifies the application of the existing guidance within Accounting Standards Codification (ASC) Topic 820, Fair Value Measurement, to ensure consistency between U.S. GAAP and IFRS. ASU No. 2011-04 also requires new disclosures about purchases, sales, issuances, and settlements related to Level 3 measurements and also requires new disclosures around transfers into and out of Level 1 and 2 in the fair value hierarchy. The Company adopted ASU No. 2011-04 on January 1, 2012. The required new disclosures are presented in Note 9.

In June 2011, the FASB issued ASU No. 2011-05, "Presentation of Comprehensive Income." ASU No. 2011-05 amends the guidance within ASC Topic 220, "Comprehensive Income," to eliminate the option to present the components of other comprehensive income as part of the statement of shareholders' equity. ASU No. 2011-05 requires that all nonowner changes in shareholders' equity be presented in either a single continuous statement of comprehensive income or in two separate but consecutive statements. The Company decided to present comprehensive income in two separate but consecutive statements. The Company adopted ASU No. 2011-05 on January 1, 2012. The adoption of ASU No. 2011-05 and the Company's decision to present comprehensive income in two separate but consecutive statements required the presentation of an additional financial statement, condensed consolidated statements of comprehensive income, for all periods presented.

Table of Contents

3. Additional Balance Sheet and Cash Flow Information

Marketable Securities

The Company's marketable securities consisted of the following (in thousands):

	September 30, 2012	December 31, 2011	September 25, 2011
Available-for-sale:			
Corporate bonds	\$136,376	\$153,380	\$179,285
U.S. Treasuries	—	—	—
	\$136,376	\$153,380	\$179,285

The Company's available-for-sale securities are carried at fair value with any unrealized gains or losses reported in other comprehensive income. During the first nine months of 2012 and 2011, the Company recognized gross unrealized gains in other comprehensive income of \$1.1 million and \$1.5 million, respectively, or \$0.7 million and \$0.9 million net of taxes, respectively, to adjust amortized cost to fair value. The marketable securities have contractual maturities that generally come due over the next 12 to 48 months.

Inventories

Inventories are valued at the lower of cost or market. Substantially all inventories located in the United States are valued using the last-in, first-out (LIFO) method. Other inventories are valued at the lower of cost or market using the first-in, first-out (FIFO) method. Inventories consist of the following (in thousands):

	September 30, 2012	December 31, 2011	September 25, 2011
Components at the lower of FIFO cost or market			
Raw materials and work in process	\$121,184	\$113,932	\$95,957
Motorcycle finished goods	169,515	226,261	154,273
Parts and accessories and general merchandise	132,789	121,340	131,708
Inventory at lower of FIFO cost or market	423,488	461,533	381,938
Excess of FIFO over LIFO cost	(44,359) (43,527) (35,975
	\$379,129	\$418,006	\$345,963

Total adjustments	159,212	408,167
Net cash provided by operating activities of continuing operations	\$712,498	\$901,601

4. Discontinued Operations

In October 2009, the Company unveiled a new business strategy to drive growth through a focus of efforts and resources on the unique strengths of the Harley-Davidson brand and to enhance productivity and profitability through continuous improvement. The Company's Board of Directors approved and the Company committed to the divestiture of MV as part of this strategy. The Company engaged a third party investment bank to assist with the marketing and sale of MV. During 2009, the Company recorded pre-tax impairment charges of \$115.4 million related to MV and a net tax benefit of \$40 million related to losses estimated in connection with the sale of MV. As of December 31, 2009, the Company estimated the total tax benefit associated with losses related to the sale of MV to be \$66 million of which \$26 million was deemed uncertain and appropriately reserved against.

At each subsequent reporting date in 2010 through the date of sale of MV in August 2010, the fair value less selling costs was re-assessed and additional impairment charges totaling \$111.8 million and additional tax benefits totaling \$18 million were recognized in 2010. As the effort to sell MV progressed into 2010, adverse factors led to decreases in the fair value of MV. During 2010, challenging economic conditions continued to persist, negatively impacting the

appetite of prospective buyers

9

Table of Contents

and the motorcycle industry as a whole. Information coming directly from the selling process, including discussions with the prospective buyers, indicated a fair value that was less than previously estimated.

On August 6, 2010, the Company concluded its sale of MV to MV Agusta Motor Holding S.r.l., a company controlled by the former owner of MV. Under the agreement relating to the sale, (1) the Company received nominal consideration in return for the transfer of MV and related assets; (2) the parties waived their respective rights under the stock purchase agreement and other documents related to the Company's purchase of MV in 2008, which included a waiver of the former owner's right to contingent earn-out consideration; and (3) the Company contributed 20 million Euros to MV as operating capital. The 20 million Euros contributed were factored into the Company's estimate of MV's fair value prior to the sale and was recognized in the 2010 impairment charges discussed above. As a result of the impairment charges recorded in 2009 and 2010 prior to the sale, the Company only incurred an immaterial loss on the date of sale, which was included in the loss from discontinued operations, net of tax, during the year ended December 31, 2010.

As of December 31, 2010, the Company's estimated total tax benefit associated with the loss on the sale of MV was \$101 million, of which \$43.5 million was deemed uncertain and appropriately reserved against. As a result, the total cumulative net tax benefit recognized as of December 31, 2010 was \$57.5 million. The increase in the estimated tax benefit during 2010 was driven by an increase in the losses related to the sale of MV, not a change in the tax position. In determining the tax benefit recognized from October 2009 through December 2010, the Company engaged appropriate technical expertise and considered all relevant available information. In accordance with ASC 740, "Income Taxes," at each balance sheet date during this period, the Company re-evaluated the overall tax benefit, determined that it was at least more likely than not that it would be sustained upon review and calculated the amount of recognized tax benefit based on a cumulative probability basis.

Beginning in 2010, the Company voluntarily elected to participate in a pre-filing agreement process with the Internal Revenue Service (IRS) in order to accelerate their review of the Company's tax position related to MV. The IRS effectively completed its review in late 2011 and executed a Closing Agreement on Final Determination Covering Specific Matters with the Company.

There were no changes to the Company's estimated gross or recognized tax benefit associated with the loss on the sale of MV during the first three quarters of 2011. In the fourth quarter of 2011, given the outcome of the closing agreement, the Company recognized a \$43.5 million tax benefit by reversing the reserve recorded as of September 25, 2011 and recognized an incremental \$7.5 million tax benefit related to the final calculation of the tax basis in the loan to and the stock of MV.

5. Restructuring Expense

2011 Restructuring Plans

In December 2011, the Company made a decision to cease operations at New Castalloy, its Australian subsidiary and producer of cast motorcycle wheels and wheel hubs, and source those components through other existing suppliers (2011 New Castalloy Restructuring Plan). The Company expects the transition of supply from New Castalloy to be complete by mid-2013. The decision to close New Castalloy came as part of the Company's overall long term strategy to develop world-class manufacturing capability throughout the Company by restructuring and consolidating operations for greater competitiveness, efficiency and flexibility. In connection with this decision, the Company will reduce its workforce by approximately 200 employees by mid-2013.

Under the 2011 New Castalloy Restructuring Plan, restructuring expenses consist of employee severance and termination costs, accelerated depreciation and other related costs. The Company expects to incur approximately \$30 million in restructuring charges related to the transition through 2013. Approximately 35% of the \$30 million will be non-cash charges. On a cumulative basis, the Company has incurred \$19.1 million of restructuring expense under the 2011 New Castalloy Restructuring Plan as of September 30, 2012, of which \$9.7 million was incurred during the nine months ended September 30, 2012.

In February 2011, the Company's unionized employees at its facility in Kansas City, Missouri ratified a new seven-year labor agreement. The new agreement took effect on August 1, 2011. The new contract is similar to the labor agreements ratified at the Company's Wisconsin facilities in September 2010 and its York, Pennsylvania facility

in December 2009, and allows for similar flexibility and increased production efficiency. Once the new contract is fully implemented, the production system in Kansas City, like Wisconsin and York, will include the addition of a flexible workforce component.

10

Table of Contents

After taking actions to implement the new ratified labor agreement (2011 Kansas City Restructuring Plan), the Company expects to have about 145 fewer full-time hourly unionized employees in its Kansas City facility than would have been required under the prior contract.

Under the 2011 Kansas City Restructuring Plan, restructuring expenses consist of employee severance and termination costs and other related costs. The Company expects to incur approximately \$13 million in restructuring expenses related to the new contract through 2012, of which approximately 10% are expected to be non-cash. On a cumulative basis, the Company has incurred \$7.8 million of restructuring expense under the 2011 Kansas City Restructuring Plan as of September 30, 2012. During the first nine months of 2012, the Company released a portion of its 2011 Kansas City Restructuring Plan reserve related to severance costs as these costs are no longer expected to be incurred.

For the nine months ended September 25, 2011, restructuring expense included \$0.2 million of non-cash curtailment losses related to the Company's pension plan that covers employees of the Kansas City facility.

The following table summarizes the Motorcycle segment's 2011 Kansas City Restructuring Plan and 2011 New Castalloy Restructuring Plan reserve activity and balances as recorded in accrued liabilities (in thousands):

	Nine months ended September 30, 2012			New Castalloy			Consolidated

2010 Restructuring Plan

In September 2010, the Company's unionized employees in Wisconsin ratified three separate new seven-year labor agreements which took effect in April 2012 when the prior contracts expired. The new contracts are similar to the labor agreement ratified at the Company's York, Pennsylvania facility in December 2009 and allow for similar flexibility and increased production efficiency. Once the new contracts are fully implemented, the production system in Wisconsin, like York, will include the addition of a flexible workforce component.

Based on the new ratified labor agreements (2010 Restructuring Plan), the Company expects to have about 250 fewer full-time hourly unionized employees in its Milwaukee-area facilities when the contracts are fully implemented than would have been required under the prior contracts. In Tomahawk, the Company expects to have about 75 fewer full-time hourly unionized employees when the contract is fully implemented than would have been required under

the prior contract.

Under the 2010 Restructuring Plan, restructuring expenses consist of employee severance and termination costs and other related costs. The Company expects to incur approximately \$63 million in restructuring expenses related to the new contracts

11

Table of Contents

through 2012, of which approximately 45% are expected to be non-cash. On a cumulative basis, the Company has incurred \$61.0 million of restructuring expense under the 2010 Restructuring Plan as of September 30, 2012, of which \$4.0 million was incurred during the first nine months of 2012.

The following table summarizes the Motorcycles segment's 2010 Restructuring Plan reserve activity and balances as recorded in accrued liabilities (in thousands):

	Nine months ended September 30, 2012	Nine months ended September 25, 2011
	Employee Severance and Termination Costs	Employee Severance and Termination Costs
Balance, beginning of period	\$20,361	\$8,652

Balance, end of period	\$10,472	\$17,256

2009 Restructuring Plan

During 2009, in response to the U.S. economic recession and worldwide slowdown in consumer demand, the Company committed to a volume reduction and a combination of restructuring actions (2009 Restructuring Plan) that are expected to be completed at various dates between 2009 and 2012. The actions were designed to reduce administrative costs, eliminate excess capacity and exit non-core business operations. The Company's significant announced actions include the restructuring and transformation of its York, Pennsylvania production facility including the implementation of a new more flexible unionized labor agreement; consolidation of facilities related to engine and transmission production; outsourcing of certain distribution and transportation activities and exiting the Buell product line. In addition, during the third quarter of 2012, the Company implemented projects under this plan involving the outsourcing of select information technology activities and the consolidation of an administrative office in Michigan into its corporate headquarters in Milwaukee, Wisconsin.

The 2009 Restructuring Plan includes an estimated reduction of approximately 2,700 to 2,900 hourly production positions and approximately 800 non-production, primarily salaried positions within the Motorcycles segment and approximately 100 salaried positions in the Financial Services segment.

Under the 2009 Restructuring Plan, restructuring expenses consist of employee severance and termination costs, accelerated depreciation on the long-lived assets that will be exited as part of the 2009 Restructuring Plan and other related costs. The Company expects total costs related to the 2009 Restructuring Plan to result in restructuring and impairment expenses of approximately \$384 million to \$404 million from 2009 to 2012, of which approximately 30% are expected to be non-cash. On a cumulative basis, the Company has incurred \$394.7 million of restructuring and impairment expense under the 2009 Restructuring Plan as of September 30, 2012, of which \$14.1 million was incurred during the first nine months of 2012.

Table of Contents

The following table summarizes the Company's 2009 Restructuring Plan reserve activity and balances recorded in accrued liabilities (in thousands):

	Nine months ended September 30, 2012			Total
	Motorcycles & Related Products	Employee Severance and Termination Costs	Accelerated Depreciation	
Balance, beginning of period	\$10,089	\$—	\$—	\$10,089
Restructuring expense	4,166	—	11,987	16,153

Utilized—non-cash	—	—	—	—
Balance, end of period	\$16,750	\$—	\$183	\$16,933

Other restructuring costs under the 2009 Restructuring Plan include items such as the exit costs for terminating supply contracts, lease termination costs and moving costs. During the first nine months of 2012, the Company released a portion of its 2009 Restructuring Plan reserve related to employee severance costs as these costs are no longer expected to be incurred.

6. Finance Receivables

HDFS provides retail financial services to customers of the Company's independent dealers in the United States and Canada. The origination of retail loans is a separate and distinct transaction between HDFS and the retail customer, unrelated to the Company's sale of product to its dealers. Retail finance receivables consist of secured promissory notes and installment loans. HDFS holds either titles or liens on titles to vehicles financed by promissory notes and installment loans.

HDFS offers wholesale financing to the Company's independent dealers. Wholesale loans to dealers are generally secured by financed inventory or property and are originated in the U.S. and Canada.

Finance receivables, net, including finance receivables held by VIEs, consisted of the following (in thousands):

	September 30, 2012	December 31, 2011	September 25, 2011
Retail	\$5,243,470	\$5,087,490	\$5,321,403
Wholesale	785,323	824,640	717,044
	6,028,793	5,912,130	6,038,447
Allowance for credit losses	(113,126)) (125,449)) (132,619)
	\$5,915,667	\$5,786,681	\$5,905,828

At September 30, 2012, December 31, 2011 and September 25, 2011, the Company's Condensed Consolidated Balance Sheet included \$2.42 billion, \$2.86 billion and \$2.71 billion, respectively, of finance receivables net of a related allowance for credit losses, which were restricted as collateral for the payment of debt held by VIEs and other

related obligations as discussed in Note 7. These receivables are included in retail finance receivables in the table above.

13

Table of Contents

A provision for credit losses on finance receivables is charged or credited to earnings in amounts that the Company believes are sufficient to maintain the allowance for credit losses on finance receivables at a level that is adequate to cover losses of principal inherent in the existing portfolio. The allowance for credit losses on finance receivables represents management's estimate of probable losses inherent in the finance receivable portfolio as of the balance sheet date. However, due to the use of projections and assumptions in estimating the losses, the amount of losses actually incurred by the Company could differ from the amounts estimated.

Changes in the allowance for credit losses on finance receivables by portfolio were as follows (in thousands):

	Three months ended September 30, 2012		
	Retail	Wholesale	Total
Balance, beginning of period	\$106,180	\$8,068	\$114,248

Recoveries	41,243	15	41,258
Balance, end of period	\$124,980	\$7,639	\$132,619

Included in the \$105.9 million and \$125.0 million retail allowance for credit losses on finance receivables is \$49.5 million and \$64.7 million, respectively, related to finance receivables held by VIEs.

Portions of the allowance for credit losses on finance receivables are specified to cover estimated losses on finance receivables specifically identified for impairment. The unspecified portion of the allowance for credit losses on finance receivables covers estimated losses on finance receivables which are collectively reviewed for impairment. Finance receivables are considered impaired when management determines it is probable that the Company will be unable to collect all amounts due according to the terms of the loan agreement.

The retail portfolio primarily consists of a large number of small balance, homogeneous finance receivables. HDFFS performs a periodic and systematic collective evaluation of the adequacy of the retail allowance for credit losses. HDFFS utilizes loss forecast models which consider a variety of factors including, but not limited to, historical loss trends, origination or vintage analysis, known and inherent risks in the portfolio, the value of the underlying collateral, recovery rates and current economic conditions including items such as unemployment rates. As retail finance

receivables are collectively and not individually reviewed for impairment, this portfolio does not have finance receivables specifically impaired.

Table of Contents

The wholesale portfolio is primarily composed of large balance, non-homogeneous loans. The Company's evaluation for the wholesale allowance for credit losses is first based on a loan-by-loan review. A specific allowance for credit losses is established for wholesale finance receivables determined to be individually impaired when management concludes that the borrower will not be able to make full payment of the contractual amounts due based on the original terms of the loan agreement. The impairment is determined based on the cash that the Company expects to receive discounted at the loan's original interest rate or the fair value of the collateral, if the loan is collateral-dependent. Finance receivables in the wholesale portfolio that are not considered impaired on an individual basis are segregated, based on similar risk characteristics, according to the Company's internal risk rating system and collectively evaluated for impairment. The related allowance for credit losses is based on factors such as the specific borrower's financial performance and ability to repay, the Company's past loan loss experience, current economic conditions, and the value of the underlying collateral.

Generally, it is the Company's policy not to change the terms and conditions of finance receivables. However, to minimize the economic loss, the Company may modify certain finance receivables in troubled debt restructurings. Total restructured finance receivables are not significant.

The allowance for credit losses and finance receivables by portfolio, segregated by those amounts that are individually evaluated for impairment and those that are collectively evaluated for impairment, was as follows (in thousands):

	September 30, 2012		
	Retail	Wholesale	Total

Total finance receivables	\$5,321,403	\$717,044	\$6,038,447

Table of Contents

There were no wholesale finance receivables at September 30, 2012, December 31, 2011, or September 25, 2011 that were individually deemed to be impaired under ASC Topic 310, "Receivables."

Retail finance receivables are contractually delinquent if the minimum payment is not received by the specified due date. Retail finance receivables are generally charged off at 120 days contractually past due. Interest accrues on retail finance receivables until either collected or charged off. Accordingly, as of September 30, 2012, December 31, 2011 and September 25, 2011, all retail finance receivables were accounted for as interest-earning receivables, of which \$19.4 million, \$27.5 million and \$23.3 million, respectively, were 90 days or more past due.

Wholesale finance receivables are delinquent if the minimum payment is not received by the contractual due date. A specific allowance for credit losses is established once management determines that the borrower does not have the ability to repay the loan in full. Interest continues to accrue on past due wholesale finance receivables until the date the collection of the finance receivables becomes doubtful, at which time the finance receivable is placed on non-accrual status. The Company will resume accruing interest on these wholesale finance receivables when payments are current according to the terms of the loan agreements and future payments are reasonably assured. While on non-accrual status, all cash received is applied to principal or interest as appropriate. There were no wholesale receivables on non-accrual status at September 30, 2012, December 31, 2011 or September 25, 2011. At September 30, 2012, December 31, 2011 and September 25, 2011, \$0.5 million, \$0.9 million, and \$0.6 million of wholesale finance receivables were 90 days or more past due and accruing interest, respectively.

An analysis of the aging of past due finance receivables, which includes non-accrual status finance receivables, was as follows (in thousands):

	September 30, 2012					Total	Total
	Current	31-60 Days Past Due	61-90 Days Past Due	Greater than 90 Days Past Due	Total Past Due	Finance Receivables

Total	\$5,863,944	\$112,878	\$37,688	\$23,937	\$174,503	\$6,038,447	

A significant part of managing HDFS' finance receivable portfolios includes the assessment of credit risk associated with each borrower. As the credit risk varies between the retail and wholesale portfolios, HDFS utilizes different credit risk indicators for each portfolio.

HDFS manages retail credit risk through its credit approval policy and ongoing collection efforts. HDFS uses FICO scores, a standard credit rating measurement, to differentiate the expected default rates of retail credit applicants enabling the Company to better evaluate credit applicants for approval and to tailor pricing according to this assessment. Retail loans with a FICO score of 640 or above at origination are considered prime, and loans with a FICO score below 640 are considered sub-prime. These credit quality indicators are determined at the time of loan origination and are not updated subsequent to the loan origination date.

The recorded investment of retail finance receivables, by credit quality indicator, was as follows (in thousands):

16

Table of Contents

	September 30, 2012	December 31, 2011	September 25, 2011
Prime	\$4,178,726	\$4,097,048	\$4,280,000
Sub-prime	1,064,744	990,442	1,041,403
Total	\$5,243,470	\$5,087,490	\$5,321,403

HDFS' credit risk on the wholesale portfolio is different from that of the retail portfolio. Whereas the retail portfolio represents a relatively homogeneous pool of retail finance receivables that exhibit more consistent loss patterns, the wholesale portfolio exposures are less consistent. HDFS utilizes an internal credit risk rating system to manage credit risk exposure consistently across wholesale borrowers and capture credit risk factors for each borrower.

HDFS uses the following internal credit quality indicators, based on the Company's internal risk rating system, listed from highest level of risk to lowest level of risk for the wholesale portfolio: Doubtful, Substandard, Special Mention, Medium Risk and Low Risk. Based upon management's review, the dealers classified in the Doubtful category are the dealers with the greatest likelihood of being charged off, while the dealers classified as Low Risk are least likely to be charged off. The internal rating system considers factors such as the specific borrowers' ability to repay and the estimated value of any collateral. Dealer risk rating classifications are reviewed and updated on a quarterly basis. The recorded investment of wholesale finance receivables, by internal credit quality indicator, was as follows (in thousands):

	September 30, 2012	December 31, 2011	September 25, 2011
Doubtful	\$10,072	\$13,048	\$8,260
Substandard	3,689	5,052	9,115
Special Mention	2,446	14,361	6,652
Medium Risk	6,035	3,032	4,305
Low Risk	763,081	789,147	688,712
Total	\$785,323	\$824,640	\$717,044

7. Asset-Backed Financing

HDFS participates in asset-backed financing through both term asset-backed securitization transactions and through asset-backed commercial paper conduit facilities. HDFS treats these transactions as secured borrowing because they either are transferred to consolidated VIEs or HDFS maintains effective control over the assets and does not meet the accounting sale requirements under ASC Topic 860, "Transfers and Servicing". In HDFS' asset-backed financing programs, HDFS transfers retail motorcycle finance receivables to special purpose entities (SPE), which are considered VIEs under U.S. GAAP. Each SPE then converts those assets into cash, through the issuance of debt. HDFS is required to consolidate any VIEs in which it is deemed to be the primary beneficiary through having power over the significant activities of the entity and having an obligation to absorb losses or the right to receive benefits from the VIE which are potentially significant to the VIE.

HDFS is considered to have the power over the significant activities of its term asset-backed securitization and asset-backed U.S. commercial paper conduit facility VIEs due to its role as servicer. Servicing fees are typically not considered potentially significant variable interests in a VIE. However, HDFS retains a residual interest in the VIEs in the form of a debt security, which gives HDFS the right to receive benefits that could be potentially significant to the VIE. Therefore, the Company is the primary beneficiary and consolidates all of these VIEs within its consolidated financial statements. Servicing fees paid by VIEs to HDFS are eliminated in consolidation and therefore are not recorded on a consolidated basis.

HDFS is not required, and does not currently intend, to provide any additional financial support to its VIEs. Investors and creditors only have recourse to the assets held by the VIEs.

The Company's term asset-backed securitization and asset-backed U.S. commercial paper conduit facility VIEs have been aggregated on the balance sheet due to the similarity of the nature of the assets involved as well as the purpose and design of the VIEs.

HDFS is not the primary beneficiary of the asset-backed Canadian commercial paper conduit facility VIE; therefore, HDFS does not consolidate the VIE. However, HDFS treats the conduit facility as a secured borrowing as it maintains effective control over the assets transferred to the VIE and therefore cannot meet the requirements for sale accounting under ASC Topic 860. The transferred receivables are included in Finance Receivables, net, in the Consolidated Balance Sheet.

Table of Contents

Term Asset-Backed Securitization VIEs

The Company transfers U.S. retail motorcycle finance receivables to SPEs which in turn issue secured notes to investors, with various maturities and interest rates, secured by future collections of the purchased U.S. retail motorcycle finance receivables. Each term asset-backed securitization SPE is a separate legal entity and the U.S. retail motorcycle finance receivables included in each term asset-backed securitization are only available for payment of that secured debt and other obligations arising from the term asset-backed securitization transaction and are not available to pay other obligations or claims of the Company's creditors until the associated secured debt and other obligations are satisfied. Cash and cash equivalent balances held by the SPEs are used only to support the securitizations. There are no amortization schedules for the secured notes; however, the debt is reduced monthly as available collections on the related U.S. retail motorcycle finance receivables are applied to outstanding principal. The secured notes' contractual lives have various maturities ranging from 2012 to 2019.

During the third quarter of 2012, the Company issued \$675.3 million of secured notes through one term asset-backed securitization transaction. In addition, during the second quarter of 2012, the Company issued \$89.5 million of secured notes through the sale of notes that had been previously retained as part of certain 2009 and 2011 term asset-backed securitization transactions. These notes were sold at a premium, which will be recognized over the term of the notes. At September 30, 2012, the unaccreted premium associated with these notes was \$1.5 million. During the third quarter of 2011, the Company issued \$573.4 million of secured notes through one term asset-backed securitization transaction.

The following table presents the assets and liabilities of the consolidated term asset-backed securitization SPEs that were included in the Company's financial statements (in thousands):

	September 30, 2012	December 31, 2011	September 25, 2011
Assets:			
Finance receivables	\$2,466,871	\$2,916,219	\$2,754,409
Allowance for credit losses	(49,490) (65,735) (64,292
Restricted cash	205,760	228,776	237,030
Other assets	5,531	6,772	7,394
Total assets	\$2,628,672	\$3,086,032	\$2,934,541
Liabilities			
Term asset-backed securitization debt	\$1,692,065	\$2,087,346	\$1,995,073

Asset-Backed U.S. Commercial Paper Conduit Facility VIE

In September 2012, the Company amended and restated its third-party bank sponsored asset-backed commercial paper conduit facility ("U.S. Conduit") which provides for a total aggregate commitment of \$600 million based on, among other things, the amount of eligible U.S. retail motorcycle loans held by the SPE as collateral. The amended agreement has terms that are similar to those of the prior agreement and is for the same amount. Under the facility, HDFS may transfer U.S. retail motorcycle finance receivables to a SPE, which in turn may issue debt to third-party bank-sponsored asset-backed commercial paper conduits. The assets of the SPE are restricted as collateral for the payment of the debt or other obligations arising in the transaction and are not available to pay other obligations or claims of the Company's creditors. The terms for this debt provide for interest on the outstanding principal based on prevailing commercial paper rates, or LIBOR plus a specified margin to the extent the advance is not funded by a conduit lender through the issuance of commercial paper. The U.S. Conduit also provides for an unused commitment fee based on the unused portion of the total aggregate commitment of \$600 million. There is no amortization schedule; however, the debt is reduced monthly as available collections on the related finance receivables are applied to outstanding principal. Upon expiration of the U.S. Conduit, any outstanding principal will continue to be reduced monthly through available collections. Unless earlier terminated or extended by mutual agreement of HDFS and the lenders, the U.S. Conduit has an expiration date of September 13, 2013.

The following table presents the assets of the U.S. Conduit SPEs that were included in our financial statements (in thousands):

Table of Contents

	September 30, 2012	December 31, 2011	September 25, 2011
Finance receivables	\$—	\$13,455	\$16,193
Allowance for credit losses	—	(302) (377
Restricted cash	—	879	1,178
Other assets	542	449	549
Total assets	\$542	\$14,481	\$17,543

The SPEs had no borrowings outstanding under the U.S. Conduit at September 30, 2012, December 31, 2011 or September 25, 2011; therefore, these assets are restricted as collateral for the payment of fees associated with the unused portion of the total aggregate commitment of \$600 million. During the third quarter of 2012, all outstanding finance receivables that remained in the U.S. Conduit SPEs were transferred back to HDFS.

Asset-Backed Canadian Commercial Paper Conduit Facility

In August 2012, HDFS entered into an agreement with a Canadian bank-sponsored asset-backed commercial paper conduit facility (“Canadian Conduit”). Under the agreement, the Canadian Conduit is contractually committed, at HDFS' option, to purchase from HDFS eligible Canadian retail motorcycle finance receivables for proceeds up to C\$200 million. In August 2012, HDFS transferred \$209.1 million of Canadian retail motorcycle finance receivables for proceeds of \$183.0 million. HDFS maintains effective control over the transferred assets and therefore does not meet sale accounting requirements under ASC Topic 860. As such, this transaction is treated as a secured borrowing, and the transferred assets are restricted as collateral for payment of the debt.

The terms for this debt provide for interest on the outstanding principal based on prevailing market interest rates plus a specified margin. The Canadian Conduit also provides for a program fee and an unused commitment fee based on the unused portion of the total aggregate commitment of C\$200 million. There is no amortization schedule; however, the debt is reduced monthly as available collections on the related finance receivables are applied to outstanding principal. Upon expiration of the Canadian Conduit, any outstanding principal will continue to be reduced monthly through available collections. Unless earlier terminated or extended by mutual agreement of HDFS and the lenders, the Canadian Conduit expires on August 30, 2013. The contractual maturity of the debt is approximately 5 years. At September 30, 2012, \$194.0 million of finance receivables and \$11.6 million of cash were restricted as collateral for the payment of \$176.9 million of debt.

8. Fair Value Measurements

Certain assets and liabilities are recorded at fair value in the financial statements; some of these are measured on a recurring basis while others are measured on a non-recurring basis. Assets and liabilities measured on a recurring basis are those that are adjusted to fair value each time a financial statement is prepared. Assets and liabilities measured on a non-recurring basis are those that are adjusted to fair value when a significant event occurs. In determining fair value of assets and liabilities, the Company uses various valuation techniques. The availability of inputs observable in the market varies from instrument to instrument and depends on a variety of factors including the type of instrument, whether the instrument is actively traded, and other characteristics particular to the transaction. For many financial instruments, pricing inputs are readily observable in the market, the valuation methodology used is widely accepted by market participants, and the valuation does not require significant management discretion. For other financial instruments, pricing inputs are less observable in the market and may require management judgment.

The Company assesses the inputs used to measure fair value using a three-tier hierarchy. The hierarchy indicates the extent to which inputs used in measuring fair value are observable in the market. Level 1 inputs include quoted prices for identical instruments and are the most observable.

Level 2 inputs include quoted prices for similar assets and observable inputs such as interest rates, foreign currency exchange rates, commodity rates and yield curves. The Company uses the market approach to derive the fair value for its level 2 fair value measurements. Foreign currency exchange contracts are valued using publicly quoted spot and forward prices; commodity contracts are valued using publicly quoted prices, where available, or dealer quotes;

interest rate swaps are valued using publicized swap curves; and investments in marketable debt and equity securities are valued using publicly quoted prices.

Table of Contents

Level 3 inputs are not observable in the market and include management's judgments about the assumptions market participants would use in pricing the asset or liability. The use of observable and unobservable inputs is reflected in the hierarchy assessment disclosed in the following tables.

Recurring Fair Value Measurements

The following tables present information about the Company's assets and liabilities measured at fair value on a recurring basis (in thousands):

	September 30, 2012			
	Balance as of September 30, 2012	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)

Table of Contents

9. Fair Value of Financial Instruments

The Company's financial instruments consist primarily of cash and cash equivalents, marketable securities, trade receivables, finance receivables, net, trade payables, debt, foreign currency contracts and interest rate swaps (derivative instruments are discussed further in Note 10). Under U.S. GAAP, certain of these items are required to be recorded in the financial statements at fair value, while others are required to be recorded at historical cost.

The following table summarizes the fair value and carrying value of the Company's financial instruments (in thousands):

	September 30, 2012		December 31, 2011		September 25, 2011	
	Fair Value	Carrying Value	Fair Value	Carrying Value	Fair Value	Carrying Value
Assets:						
Cash and cash equivalents	\$ 1,795,141	\$ 1,795,141	\$ 1,526,950	\$ 1,526,950	\$ 1,428,753	\$ 1,428,753
Marketable securities	\$ 136,376	\$ 136,376	\$ 153,380	\$ 153,380	\$ 179,285	\$ 179,285
Accounts receivable, net	\$ 256,193	\$ 256,193	\$ 219,039	\$ 219,039	\$ 285,332	\$ 285,332
Derivatives	\$ 1,639	\$ 1,639	\$ 16,443	\$ 16,443	\$ 10,343	\$ 10,343
Finance receivables, net	\$ 5,993,713	\$ 5,915,667	\$ 5,888,040	\$ 5,786,681	\$ 6,008,081	\$ 5,905,828
Restricted cash held by variable interest entities	\$ 217,400	\$ 217,400	\$ 229,655	\$ 229,655	\$ 238,208	\$ 238,208
Liabilities:						
Accounts payable	\$ 293,710	\$ 293,710	\$ 255,713	\$ 255,713	\$ 289,490	\$ 289,490
Derivatives	\$ 2,458	\$ 2,458	\$ 5,136	\$ 5,136	\$ 6,834	\$ 6,834
Unsecured commercial paper	\$ 404,693	\$ 404,693	\$ 874,286	\$ 874,286	\$ 813,571	\$ 813,571
Credit facilities	\$ —	\$ —	\$ 159,794	\$ 159,794	\$ 159,438	\$ 159,438
Asset-backed Canadian commercial paper conduit facility	\$ 176,855	\$ 176,855	\$ —	\$ —	\$ —	\$ —
Medium-term notes	\$ 3,623,082	\$ 3,297,687	\$ 2,561,458	\$ 2,298,193	\$ 2,530,834	\$ 2,303,567
Senior unsecured notes	\$ 357,328	\$ 303,000	\$ 376,513	\$ 303,000	\$ 384,110	\$ 303,000
Term asset-backed securitization debt	\$ 1,702,320	\$ 1,692,065	\$ 2,099,060	\$ 2,087,346	\$ 2,015,261	\$ 1,995,073

Cash and Cash Equivalents, Restricted Cash, Accounts Receivable, Net and Accounts Payable – With the exception of certain money-market investments, these items are recorded in the financial statements at historical cost. The historical cost basis for these amounts is estimated to approximate their respective fair values due to the short maturity of these instruments.

Marketable Securities – Marketable securities are recorded in the financial statements at fair value. The fair value of marketable securities is based primarily on quoted market prices of similar financial assets. Changes in fair value are recorded, net of tax, as other comprehensive income and included as a component of shareholders' equity. Fair Value is based on Level 1 or Level 2 inputs.

Finance Receivables, Net – Finance receivables, net includes finance receivables held for investment, net and restricted finance receivables held by VIEs, net. Retail and wholesale finance receivables are recorded in the financial statements at historical cost less a provision for credit losses. The fair value of retail finance receivables is generally calculated by discounting future cash flows using an estimated discount rate that reflects current credit, interest rate and prepayment risks associated with similar types of instruments. Fair value is determined based on Level 3 inputs. The historical cost basis of wholesale finance receivables approximates fair value because they either are short-term or have interest rates that adjust with changes in market interest rates.

Derivatives – Interest rate swaps, foreign currency exchange contracts and commodity contracts are derivative financial instruments and are carried at fair value on the balance sheet. The fair value of interest rate swaps is determined using pricing models that incorporate quoted prices for similar assets and observable inputs such as interest rates and yield curves. The fair value of foreign currency exchange and commodity contracts are determined using publicly quoted

prices. Fair value is calculated using Level 2 inputs.

21

Table of Contents

Debt – Debt is generally recorded in the financial statements at historical cost. The carrying value of debt provided under credit facilities approximates fair value since the interest rates charged under the facilities are tied directly to market rates and fluctuate as market rates change. The carrying value of unsecured commercial paper approximates fair value due to its short maturity. Fair value is calculated using Level 2 inputs.

The carrying value of debt provided under the Canadian Conduit approximates fair value since the interest rates charged under the facility are tied directly to market rates and fluctuate as market rates change. Fair value is calculated using Level 2 inputs.

The fair values of the medium-term notes maturing in December 2012, December 2014, September 2015, March 2016, March 2017 and June 2018 are estimated based upon rates currently available for debt with similar terms and remaining maturities. Fair value is calculated using Level 2 inputs.

The fair value of the senior unsecured notes is estimated based upon rates currently available for debt with similar terms and remaining maturities. Fair value is calculated using Level 2 inputs.

The fair value of the debt related to term asset-backed securitization transactions is estimated based on pricing currently available for transactions with similar terms and maturities. Fair value is calculated using Level 2 inputs.

10. Derivative Instruments and Hedging Activities

The Company is exposed to certain risks such as foreign currency exchange rate risk, interest rate risk and commodity price risk. To reduce its exposure to such risks, the Company selectively uses derivative financial instruments. All derivative transactions are authorized and executed pursuant to regularly reviewed policies and procedures, which prohibit the use of financial instruments for speculative trading purposes.

All derivative instruments are recognized on the balance sheet at fair value (see Note 9). In accordance with ASC Topic 815, “Derivatives and Hedging,” the accounting for changes in the fair value of a derivative instrument depends on whether it has been designated and qualifies as part of a hedging relationship and, further, on the type of hedging relationship. Changes in the fair value of derivatives that are designated as fair value hedges, along with the gain or loss on the hedged item, are recorded in current period earnings. For derivative instruments that are designated as cash flow hedges, the effective portion of gains and losses that result from changes in the fair value of derivative instruments is initially recorded in other comprehensive income (OCI) and subsequently reclassified into earnings when the hedged item affects income. The Company assesses, both at the inception of each hedge and on an on-going basis, whether the derivatives that are used in its hedging transactions are highly effective in offsetting changes in cash flows of the hedged items. Any ineffective portion is immediately recognized in earnings. No component of a hedging derivative instrument’s gain or loss is excluded from the assessment of hedge effectiveness. Derivative instruments that do not qualify for hedge accounting are recorded at fair value and any changes in fair value are recorded in current period earnings.

The Company sells its products internationally and in most markets those sales are made in the foreign country’s local currency. As a result, the Company’s earnings can be affected by fluctuations in the value of the U.S. dollar relative to foreign currency. The Company’s most significant foreign currency risk relates to the Euro, the Australian dollar and the Japanese yen. The Company utilizes foreign currency contracts to mitigate the effects of these currencies’ fluctuations on earnings. The foreign currency contracts are entered into with banks and allow the Company to exchange a specified amount of foreign currency for U.S. dollars at a future date, based on a fixed exchange rate. The Company utilizes commodity contracts to hedge portions of the cost of certain commodities consumed in the Company’s motorcycle production and distribution operations.

The Company’s foreign currency contracts and commodity contracts generally have maturities of less than one year. The Company’s earnings are affected by changes in interest rates. HDFS utilizes interest rate swaps to reduce the impact of fluctuations in interest rates on its unsecured commercial paper by converting a portion from a floating rate basis to a fixed rate basis. The fair value of HDFS’s interest rate swaps is determined using pricing models that incorporate quoted prices for similar assets and observable inputs such as interest rates and yield curves.

Table of Contents

The following table summarizes the fair value of the Company's derivative financial instruments (in thousands):

Derivatives Designated As Hedging Instruments Under ASC Topic 815	September 30, 2012			December 31, 2011			September 25, 2011		
	Notional Value	Asset Fair Value (a)	Liability Fair Value (b)	Notional Value	Asset Fair Value (a)	Liability Fair Value (b)	Notional Value	Asset Fair Value (a)	Liability Fair Value (b)

(a) Included in other current assets

(b) Included in accrued liabilities

(c) Derivative designated as a cash flow hedge

The following tables summarize the amount of gains and losses related to derivative financial instruments designated as cash flow hedges (in thousands):

Cash Flow Hedges	Amount of Gain/(Loss) Recognized in OCI			
	Three months ended		Nine Months Ended	
	September 30, 2012	September 25, 2011	September 30, 2012	September 25, 2011
Foreign currency contracts	\$1,704	\$9,051	\$5,799	\$(7,870)
Commodity contracts	32	(200)	(393)	(464)
Interest rate swaps—unsecured commercial paper	(19)	(237)	(43)	(642)
Total	\$1,717	\$8,614	\$5,363	\$(8,976)

Cash Flow Hedges	Amount of Gain/(Loss) Reclassified from AOCI into Income				Expected to be Reclassified Over the Next Twelve Months
	Three months ended		Nine Months Ended		
	September 30, 2012	September 25, 2011	September 30, 2012	September 25, 2011	
Foreign currency contracts ^(a)	\$7,742	\$(5,058)	\$19,846	\$(25,846)	\$ 876
Commodity contracts ^(a)	(81)	(41)	(737)	(465)	(80)
	(327)	(1,254)	(2,262)	(3,940)	674

Interest rate swaps—unsecured
commercial paper^(b)

Total	\$7,334	\$(6,353)	\$16,847	\$(30,251)	\$	1,470
-------	---------	----------	---	----------	-----------	---	----	-------

(a) Gain/(loss) reclassified from accumulated other comprehensive income (AOCI) to income is included in cost of goods sold.

(b) Gain/(loss) reclassified from AOCI to income is included in financial services interest expense.

Table of Contents

The following tables summarize the amount of gains and losses related to derivative financial instruments not designated as hedging instruments (in thousands):

	Amount of Gain/(Loss)			
	Recognized in Income on Derivative			
	Three months ended		Nine Months Ended	
Derivatives	September 30, 2012	September 25, 2011	September 30, 2012	September 25, 2011
Commodity contracts	\$ 603	\$—	\$ 603	\$—
Total	\$ 603	\$—	\$ 603	\$—

For the three and nine months ended September 30, 2012 and September 25, 2011, the cash flow hedges were highly effective and, as a result, the amount of hedge ineffectiveness was not material. No amounts were excluded from effectiveness testing.

For the three and nine months ended September 30, 2012 and September 25, 2011, there were no gains or losses recognized in income related to derivative financial instruments designated as fair value hedges.

The Company is exposed to credit loss risk in the event of non-performance by counterparties to these derivative financial instruments. Although no assurances can be given, the Company does not expect any of the counterparties to these derivative financial instruments to fail to meet its obligations. To manage credit loss risk, the Company selects counterparties based on credit ratings and, on a quarterly basis, evaluates each hedge's net position relative to the counterparty's ability to cover its position.

11. Income Taxes

The Company's 2012 income tax rate for the three and nine months ended September 30, 2012 was 35.3% compared to 21.5% and 30.4%, respectively, for the same periods last year. The Company's third quarter 2011 effective tax rate was favorably impacted by discrete tax items totaling \$29.7 million which consisted of a favorable settlement of an Internal Revenue Service (IRS) audit for tax years 2005 through 2008 and a favorable change in Wisconsin income tax law associated with certain net operating losses, partially offset by increases in certain income tax reserves.

12. Product Warranty and Safety Recall Campaigns

The Company currently provides a standard two-year limited warranty on all new motorcycles sold worldwide, except for Japan, where the Company currently provides a standard three-year limited warranty on all new motorcycles sold. In addition, the Company started offering a one-year warranty for Parts & Accessories (P&A) in 2012. The warranty coverage for the retail customer generally begins when the product is sold to a retail customer. The Company maintains reserves for future warranty claims using an estimated cost, which is based primarily on historical Company claim information. Additionally, the Company has from time to time initiated certain voluntary safety recall campaigns. The Company reserves for all estimated costs associated with safety recalls in the period that the safety recalls are announced.

Changes in the Company's warranty and safety recall liability were as follows (in thousands):

	Three months ended		Nine months ended	
	September 30, 2012	September 25, 2011	September 30, 2012	September 25, 2011
	Balance, beginning of period	\$67,801	\$55,407	\$54,994
Warranties issued during the period	10,228	10,210	42,846	33,770
Settlements made during the period	(19,799)	(15,016)	(52,885)	(37,882)
Recalls and changes to pre-existing warranty liabilities	4,980	759	18,255	1,338
Balance, end of period	\$63,210	\$51,360	\$63,210	\$51,360

The liability for safety recall campaigns was \$5.0 million, \$10.7 million and \$2.2 million as of September 30, 2012, December 31, 2011 and September 25, 2011, respectively.

Table of Contents

13. Earnings Per Share

The following table sets forth the computation for basic and diluted earnings per share from continuing operations (in thousands, except per share amounts):

	Three months ended		Nine months ended	
	September 30, 2012	September 25, 2011	September 30, 2012	September 25, 2011
Numerator:				
Income from continuing operations used in computing basic and diluted earnings per share	\$ 134,001	\$ 183,594	\$ 553,286	\$ 493,434
Denominator:				
Denominator for basic earnings per share-weighted-average common shares	226,020	233,800	227,953	233,989
Effect of dilutive securities—employee stock compensation plan	1,969	2,061	2,117	1,992
Denominator for diluted earnings per share-adjusted weighted-average shares outstanding	227,989	235,861	230,070	235,981
Earnings per common share from continuing operations:				
Basic	\$0.59	\$0.79	\$2.43	\$2.11
Diluted	\$0.59	\$0.78	\$2.40	\$2.09

Outstanding options to purchase 2.2 million and 3.8 million shares of common stock for the three months ended September 30, 2012 and September 25, 2011, respectively, and 2.3 million and 3.7 million shares of common stock for the nine months ended September 30, 2012 and September 25, 2011, respectively, were not included in the Company's computation of dilutive securities because the exercise price was greater than the market price and therefore the effect would have been anti-dilutive.

The Company has a share-based compensation plan under which employees may be granted share-based awards including shares of restricted stock and restricted stock units (RSUs). Non-forfeitable dividends are paid on unvested shares of restricted stock and non-forfeitable dividend equivalents are paid on unvested RSUs. As such, shares of restricted stock and RSUs are considered participating securities under the two-class method of calculating earnings per share as described in ASC Topic 260, "Earnings per Share." The two-class method of calculating earnings per share did not have a material impact on the Company's earnings per share calculation for the three and nine month periods ending September 30, 2012 and September 25, 2011, respectively.

Table of Contents

14. Employee Benefit Plans

The Company has defined benefit pension plans and postretirement healthcare benefit plans, that cover substantially all employees of the Motorcycles segment. The Company also has unfunded supplemental employee retirement plan agreements (SERPA) with certain employees which were instituted to replace benefits lost under the Tax Revenue Reconciliation Act of 1993. Components of net periodic benefit costs were as follows (in thousands):

	Three months ended		Nine months ended	
	September 30, 2012	September 25, 2011	September 30, 2012	September 25, 2011
Pension and SERPA Benefits				
Service cost	\$8,420	\$9,274	\$25,260	\$27,819
Interest cost	20,816	20,147	62,448	60,441
Expected return on plan assets	(29,277)	(26,652)	(87,832)	(79,959)
Amortization of unrecognized:				
Prior service cost	740	746	2,219	2,235
Net loss	10,969	7,550	32,906	22,659
Curtailment loss	—	—	—	236
Net periodic benefit cost	\$11,668	\$11,065	\$35,001	\$33,431
Postretirement Healthcare Benefits				
Service cost	\$1,854	\$1,907	\$5,560	\$5,721
Interest cost	4,578	4,911	13,733	14,733
Expected return on plan assets	(2,356)	(2,346)	(7,068)	(7,038)
Amortization of unrecognized:				
Prior service credit	(963)	(969)	(2,890)	(2,907)
Net loss	1,855	1,798	5,566	5,394
Net periodic benefit cost	\$4,968	\$5,301	\$14,901	\$15,903

During the first nine months of 2012 and 2011, the Company voluntarily contributed \$200 million in cash to further fund its pension plans. No additional pension contributions are required in 2012. The Company expects it will continue to make on-going contributions related to current benefit payments for SERPA and postretirement healthcare plans.

15. Business Segments

The Company operates in two business segments: Motorcycles and Financial Services. The Company's reportable segments are strategic business units that offer different products and services. They are managed separately based on the fundamental differences in their operations. Selected segment information is set forth below (in thousands):

	Three months ended		Nine months ended	
	September 30, 2012	September 25, 2011	September 30, 2012	September 25, 2011
Motorcycles net revenue	\$1,089,268	\$1,232,699	\$3,931,684	\$3,635,487
Gross profit	377,904	415,391	1,398,231	1,235,525
Selling, administrative and engineering expense	223,982	222,258	709,015	660,890
Restructuring expense	9,170	12,429	26,841	49,022
Operating income from Motorcycles	144,752	180,704	662,375	525,613
Financial services income	161,027	164,557	477,962	492,296
Financial services expense	88,677	102,573	256,264	280,322
Operating income from Financial Services	72,350	61,984	221,698	211,974
Operating income	\$217,102	\$242,688	\$884,073	\$737,587

Table of Contents

16. Commitment and Contingencies

The Company is subject to lawsuits and other claims related to environmental, product and other matters. In determining required reserves related to these items, the Company carefully analyzes cases and considers the likelihood of adverse judgments or outcomes, as well as the potential range of possible loss. The required reserves are monitored on an ongoing basis and are updated based on new developments or new information in each matter.

Environmental Protection Agency Notice

In December 2009, the Company received formal, written requests for information from the United States Environmental Protection Agency (EPA) regarding: (i) certificates of conformity for motorcycle emissions and related designations and labels, (ii) aftermarket parts, and (iii) warranty claims on emissions related components. The Company promptly submitted written responses to the EPA's inquiry and engaged in discussions with the EPA. It is possible that a result of the EPA's investigation will be some form of enforcement action by the EPA that will seek a fine or other relief. However, at this time the Company does not know and cannot reasonably estimate the impact of any remedies the EPA might seek.

York Environmental Matters:

The Company is involved with government agencies and groups of potentially responsible parties in various environmental matters, including a matter involving the cleanup of soil and groundwater contamination at its York, Pennsylvania facility. The York facility was formerly used by the U.S. Navy and AMF prior to the purchase of the York facility by the Company from AMF in 1981. Although the Company is not certain as to the full extent of the environmental contamination at the York facility, it has been working with the Pennsylvania Department of Environmental Protection (PADEP) since 1986 in undertaking environmental investigation and remediation activities, including an ongoing site-wide remedial investigation/feasibility study (RI/FS). In January 1995, the Company entered into a settlement agreement (the Agreement) with the Navy. The Agreement calls for the Navy and the Company to contribute amounts into a trust equal to 53% and 47%, respectively, of future costs associated with environmental investigation and remediation activities at the York facility (Response Costs). The trust administers the payment of the Response Costs incurred at the York facility as covered by the Agreement.

In February 2002, the Company was advised by the EPA that it considers some of the Company's remediation activities at the York facility to be subject to the EPA's corrective action program under the Resource Conservation and Recovery Act (RCRA) and offered the Company the option of addressing corrective action under a RCRA facility lead agreement. In July 2005, the York facility was designated as the first site in Pennsylvania to be addressed under the "One Cleanup Program." The program provides a more streamlined and efficient oversight of voluntary remediation by both PADEP and EPA and will be carried out consistent with the Agreement with the Navy. As a result, the RCRA facility lead agreement has been superseded.

The Company estimates that its share of the future Response Costs at the York facility will be approximately \$1.8 million and has established a reserve for this amount which is included in accrued liabilities in the Condensed Consolidated Balance Sheets. As noted above, the RI/FS is still underway and given the uncertainty that exists concerning the nature and scope of additional environmental investigation and remediation that may ultimately be required under the RI/FS or otherwise at the York facility, we are unable to make a reasonable estimate of those additional costs, if any, that may result.

The estimate of the Company's future Response Costs that will be incurred at the York facility is based on reports of independent environmental consultants retained by the Company, the actual costs incurred to date and the estimated costs to complete the necessary investigation and remediation activities. Response Costs related to the remediation of soil are expected to be incurred primarily over a period of several years ending in 2015. Response Costs related to ground water remediation may continue for some time beyond 2015.

Product Liability Matters:

The Company is involved in product liability suits related to the operation of its business. The Company accrues for claim exposures that are probable of occurrence and can be reasonably estimated. The Company also maintains insurance coverage for product liability exposures. The Company believes that its accruals and insurance coverage are adequate and that product liability will not have a material adverse effect on the Company's consolidated financial

statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Harley-Davidson, Inc. is the parent company of the groups of companies doing business as Harley-Davidson Motor Company (HDMC) and Harley-Davidson Financial Services (HDFS). HDMC produces heavyweight cruiser and touring

Table of Contents

motorcycles. HDMC manufactures five families of motorcycles: Touring, Dyna[®], Softail[®], Sportster[®] and V-Rod[®]. HDFS provides wholesale and retail financing and insurance programs primarily to Harley-Davidson dealers and customers.

The Company operates in two business segments: Motorcycles & Related Products (Motorcycles) and Financial Services (Financial Services). The Company's reportable segments are strategic business units that offer different products and services. They are managed separately based on the fundamental differences in their operations.

The "% Change" figures included in the "Results of Operations" section were calculated using unrounded dollar amounts and may differ from calculations using the rounded dollar amounts presented.

Overview

The Company's income from continuing operations was \$134.0 million, or \$0.59 per fully diluted share, for the third quarter of 2012 compared to \$183.6 million, or \$0.78 per fully diluted share, in the third quarter of 2011. Operating income from the Motorcycles segment was down \$36.0 million or 19.9 % from last year's third quarter on a 14.5% decrease in wholesale shipments of Harley-Davidson motorcycles. The decrease in motorcycle shipments was primarily due to a previously announced plan for lower third-quarter shipments during the launch of an Enterprise Resource Planning (ERP) system at the Company's York, Pennsylvania (York) assembly plant. Operating income from Financial Services in the third quarter of 2012 was \$72.4 million compared to \$62.0 million in the year-ago quarter reflecting continued credit loss performance improvement and lower interest expense.

During the third quarter of 2012, worldwide independent dealer retail sales of new Harley-Davidson motorcycles decreased 1.3% compared to 2011, including a 5.2% decrease in the U.S. and a 7.6% increase in international markets. Through nine months of 2012, retail sales grew 6.0%, including increases of 6.2% and 5.4% in the U.S. and international markets, respectively. The Company believes U.S. third-quarter retail sales were adversely affected by a limited availability of new motorcycles in July, August and early September resulting from the ERP implementation. The Company also believes third-quarter U.S. and, to a lesser extent, international retail sales were impacted by the re-timing of the Company's annual new model launch from late July to late August. In September, as U.S. dealer inventory returned to more appropriate levels and the new 2013 motorcycles became more available, retail sales responded positively and gained momentum as the Company exited the quarter. The Company continues to remain cautious about its expectations for retail sales globally in an environment of greater economic uncertainty, including in Europe where retail sales have been affected by the challenging Eurozone economy.

(1) Note Regarding Forward-Looking Statements

The Company intends that certain matters discussed in this report are "forward-looking statements" intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. These forward-looking statements can generally be identified as such by reference to this footnote or because the context of the statement will include words such as the Company "believes," "anticipates," "expects," "plans," or "estimates" or words of similar meaning. Similarly, statements that describe future plans, objectives, outlooks, targets, guidance or goals are also forward-looking statements. Such forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those anticipated as of the date of this report. Certain of such risks and uncertainties are described in close proximity to such statements or elsewhere in this report, including under the caption "Cautionary Statements" and in Item 1A "Risk Factors" of the Company's Annual Report on Form 10-K for the year ended December 31, 2011. Shareholders, potential investors, and other readers are urged to consider these factors in evaluating the forward-looking statements and cautioned not to place undue reliance on such forward-looking statements. The forward-looking statements included in this report are made only as of the date of the filing of this report (November 8, 2012), and the Company disclaims any obligation to publicly update such forward-looking statements to reflect subsequent events or circumstances.

Table of Contents

Outlook⁽¹⁾

On October 23, 2012, the Company reaffirmed its expectation to ship 245,000 to 250,000 Harley-Davidson motorcycles to dealers and distributors worldwide in 2012. In addition, the Company announced that its full-year shipment estimate includes expected shipments of 44,500 to 49,500 motorcycles in the fourth quarter of 2012, down 2% to 12% from the prior year. The Company expects that 2012 fourth quarter shipments and production will be down compared to the prior year due to the implementation of flexible production capabilities at one of its facilities. As previously disclosed, beginning in early 2013, the Company expects to implement flexible production capabilities at York by adding flexible workers thus enabling the Company to increase manufacturing capacity in the first half of 2013 to more closely match retail demand. The Company expects to achieve the ability to maximize flexibility in the entire manufacturing system during 2014 when it expects that the same capability will be in place for the Kansas City, Missouri (Kansas City) operations. Consequently the Company expects U.S. retail inventory to be slightly lower on a year over year basis at the end of 2012 and 2013 which will be aligned with the seasonal low point for retail sales. Also on October 23, 2012, the Company announced that it continues to expect 2012 full-year gross margin to be between 34.75% and 35.75%. The Company also expects 2012 fourth quarter gross margin percent to be roughly in line with the prior year's fourth quarter gross margin. The Company expects gross margin in the fourth quarter will include productivity gains and improved mix, which will be offset by unfavorable foreign currency exchange rates and significantly lower production levels as compared to the prior year. The Company expects fourth-quarter production to be down compared to prior year due to the planned implementation of flexible production as discussed above, as approximately 7,000 additional motorcycles produced in the fourth quarter of 2011 to support the ERP launch will not be repeated and there is a decrease of five days in the fiscal fourth quarter of 2012 as compared to last year's fourth quarter.

In addition, the Company announced on October 23, 2012 that it expects HDFS 2012 full-year operating profit to be slightly higher than 2011 as a result of continued strong credit performance and a more favorable cost of funds. The Company also announced on October 23, 2012 that it continues to expect its full-year 2012 effective tax rate from continuing operations to be approximately 35.5%. This guidance excludes the effect of any potential future nonrecurring adjustments such as changes in tax legislation or audit settlements which are recorded as discrete items in the period in which they are settled.

Finally, on October 23, 2012, the Company confirmed its full-year capital expenditure estimate of \$190 million to \$210 million which includes approximately \$35 million of capital expenditures related to restructuring.

Restructuring Activities⁽¹⁾

2011 Restructuring Plan

In December 2011, the Company made a decision to cease operations at New Castalloy, its Australian subsidiary and producer of cast motorcycle wheels and wheel hubs, and source those components through other existing suppliers. The Company expects the transition of supply from New Castalloy to be complete by mid-2013. The decision to close New Castalloy came as part of the Company's overall long term strategy to develop world-class manufacturing capability throughout the Company by restructuring and consolidating operations for greater competitiveness, efficiency and flexibility. In connection with this decision, the Company will reduce its workforce by approximately 200 employees by mid-2013.

In February 2011, the Company's unionized employees at its Kansas City ratified a new seven-year labor agreement. The new agreement took effect on August 1, 2011. The new contract is similar to the labor agreements ratified at the Company's Wisconsin facilities in September 2010 and its York facility in December 2009, and allows for similar flexibility and increased production efficiency. Once the new contract is fully implemented, the production system in Kansas City, like Wisconsin and York, will include the addition of a flexible workforce component.

After taking actions to fully implement the new ratified labor agreement, the Company expects to have about 145 fewer full-time hourly unionized employees in its Kansas City facility than would be required under the prior contract.

2010 Restructuring Plan

In September 2010, the Company's unionized employees in Wisconsin ratified three separate new seven-year labor agreements which took effect in April 2012 when the prior contracts expired. The new contracts are similar to the labor agreement ratified at York in December 2009 and allow for similar flexibility and increased production efficiency. Once the

Table of Contents

new contracts are fully implemented, the production system in Wisconsin, like York, will include the addition of a flexible workforce component.

After taking actions to fully implement the new ratified labor agreements, the Company expects to have about 250 fewer full-time hourly unionized employees in its Milwaukee-area facilities when the contracts are fully implemented in 2012 than would be required under the previous contract. In Tomahawk, the Company expects to have about 75 fewer full-time hourly unionized employees when the contract is fully implemented than would be required under the previous contract.

2009 Restructuring Plan

During 2009, in response to the U.S. economic recession and worldwide slowdown in consumer demand, the Company committed to a volume reduction and a combination of restructuring actions that were expected to be completed at various dates between 2009 and 2012. The actions were designed to reduce administrative costs, eliminate excess capacity and exit non-core business operations. The Company's significant announced actions include the restructuring and transformation of its York production facility including the implementation of a new more flexible unionized labor agreement; consolidation of facilities related to engine and transmission production; outsourcing of certain distribution and transportation activities and exiting the Buell product line. In addition, during the third quarter of 2012, the Company implemented projects under this plan involving the outsourcing of select information technology activities and the consolidation of an administrative office in Michigan into its corporate headquarters in Milwaukee, Wisconsin.

The 2009 restructuring plan includes an estimated reduction of approximately 2,700 to 2,900 hourly production positions and approximately 800 non-production, primarily salaried positions within the Motorcycles segment and approximately 100 salaried positions in the Financial Services segment.

Restructuring Costs and Savings

During the first nine months of 2012, the Company incurred \$26.8 million in restructuring expense related to its combined restructuring plan activities. This is in addition to \$455.8 million in restructuring and impairment expense incurred in prior years since the restructuring activities were initiated in 2009. On October 23, 2012, the Company reaffirmed its estimate for restructuring expenses related to its combined restructuring plan activities that it expects to incur from 2009 to 2013 of \$490 million to \$510 million. The Company continues to expect approximately 35% of those amounts to be non-cash. The estimated restructuring expense includes estimated restructuring expenses of \$35 million to \$45 million in 2012, which was revised down from the previous estimate of \$40 million to \$50 million reflecting a \$5 million shift in expected expense from 2012 to 2013. The Company has realized or estimates that it will realize cumulative savings from these restructuring activities, measured against 2008, as follows:

- 2009—\$91 million (91% operating expense and 9% cost of sales) (actual);
- 2010—\$172 million (64% operating expense and 36% cost of sales) (actual);
- 2011—\$217 million (51% operating expense and 49% cost of sales) (actual);
- 2012—\$275 million to \$295 million (35-45% operating expense and 55-65% cost of sales) (estimated);
- 2013—\$300 million to \$320 million (30-40% operating expense and 60-70% cost of sales) (estimated); and
- Ongoing annually upon completion—\$315 million to \$335 million (30-40% operating expense and 60-70% cost of sales) (estimated).

Diluted earnings per share	\$0.59	\$0.78	\$(0.19)	(24.4)

Operating income for the Motorcycles segment during the third quarter of 2012 declined by \$36.0 million compared to the third quarter 2011. The decrease was primarily due to a planned reduction in motorcycle shipments related to the ERP implementation at York, partially offset by higher gross margin percentage and lower restructuring costs. Operating income for the Financial Services segment was higher during the third quarter of 2012 compared to the third quarter of 2011, driven by lower interest expense. Please refer to the “Motorcycles and Related Products Segment” and “Financial Services Segment” discussions following for a more detailed discussion of the factors affecting operating income.

The effective income tax rate for the third quarter of 2012 was 35.3% compared to 21.5% for the third quarter of 2011. The Company's third quarter 2011 effective tax rate was favorably impacted by discrete tax items totaling \$29.7 million which consisted of a favorable settlement of an Internal Revenue Service (IRS) audit for tax years 2005 through 2008 and a favorable change in Wisconsin income tax law associated with certain net operating losses, partially offset by increases in certain income tax reserves.

Harley-Davidson motorcycle units	52,793	100.0	% 61,745	100.0	% (8,952) (14.5)%

(a) Custom motorcycle units, as used in this table, include Dyna, Softail, VRSC and CVO models.

Table of Contents

The Company shipped 52,793 Harley-Davidson motorcycles worldwide during the third quarter of 2012, which was 14.5% lower than the third quarter of 2011 and in line with Company expectations. During the third quarter of 2012 shipments were lower as a result of lower production due to the implementation of a new ERP system at the York facility. The ERP implementation and lower production also impacted motorcycle product mix during the third quarter resulting in a decrease in touring and custom motorcycle shipments, which are the families of motorcycles manufactured at York, as a percent of total shipments compared to the prior year. U.S. dealer inventories of new Harley-Davidson motorcycles finished the third quarter up approximately 3,100 units compared to the end of the year ago period.

Segment Results

The following table includes the condensed statements of operations for the Motorcycles segment (in thousands):

	Three months ended			
	September 30, 2012	September 25, 2011	Increase (Decrease)	% Change
Revenue:				
Motorcycles	\$773,979	\$922,469	\$(148,490)	(16.1)%
Parts & Accessories	233,749	235,676	(1,927)	(0.8)
General Merchandise	75,632	69,333	6,299	9.1
Other	5,908	5,221	687	13.2
Total revenue	1,089,268	1,232,699	(143,431)	(11.6)
Cost of goods sold	711,364	817,308	(105,944)	(13.0)
Gross profit	377,904	415,391	(37,487)	(9.0)
Selling & administrative expense	192,351	188,935	3,416	1.8
Engineering expense	31,631	33,323	(1,692)	(5.1)
Restructuring expense	9,170	12,429	(3,259)	(26.2)
Operating expense	233,152	234,687	(1,535)	(0.7)
Operating income from motorcycles	\$144,752	\$180,704	\$(35,952)	(19.9)%

The following table includes the estimated impact of significant factors affecting the comparability of net revenue, cost of goods sold and gross profit from the third quarter of 2011 to the third quarter of 2012 (in millions):

	Net Revenue	Cost of Goods Sold	Gross Profit
September 25, 2011	\$1,232.7	\$817.3	\$415.4
Volume	(128.9)	(81.4)	(47.5)
Price	5.7	—	5.7
Foreign currency exchange rates and hedging	(27.9)	(29.1)	1.2
Product mix	7.7	20.4	(12.7)
Raw material prices	—	(2.5)	2.5
Manufacturing costs	—	(13.3)	13.3
Total	(143.4)	(105.9)	(37.5)
September 30, 2012	\$1,089.3	\$711.4	\$377.9

The following factors affected the comparability of net revenue, cost of goods sold and gross profit from the third quarter of 2011 to the third quarter of 2012:

• On average, wholesale prices on the Company's 2013 model-year motorcycles are higher than the prior model year resulting in the favorable impact on revenue and gross profit during the period.

• Foreign currency exchange rates during the third quarter of 2012 resulted in a negative impact on net revenue, which was more than offset by the favorable impact of gains associated with foreign currency hedging (included in cost of goods sold) and the positive impact of lapping year-ago foreign currency losses. Over the next several quarters, the

Company expects downward pressure on gross margins as a result of the devaluation the Company is experiencing in most of its key foreign currencies. The Company believes that

43

Table of Contents

the adverse financial impact of devaluation will be somewhat tempered in the near-term by foreign currency hedges.⁽¹⁾

Shipment mix changes positively impacted net revenue and resulted primarily from product mix changes within the Company's General Merchandise and Parts & Accessories products. However, the impact of mix changes between motorcycle families on cost of goods sold more than offset the positive impact to revenue.

Raw material prices were lower in the third quarter of 2012 relative to the third quarter of 2011 primarily due to lower metals and lower fuel prices.

Manufacturing costs benefited from restructuring savings, partially offset by inflation and a higher fixed cost per unit as a result of lower production volumes. Temporary inefficiencies related to restructuring activities due in part to the ERP implementation were approximately \$11 million in the third quarter of 2012 compared to approximately \$7 million in the third quarter of 2011. The Company now expects temporary inefficiencies to be approximately \$5 million to \$8 million in the fourth quarter of 2012 for a total of approximately \$32 million to \$35 million for 2012.⁽¹⁾ Operating expenses were relatively flat during the third quarter of 2012 compared to the third quarter of 2011. Lower restructuring expense and lower engineering expense was partially offset by higher selling and administrative expense. For further information regarding the Company's previously announced restructuring activities, refer to Note 5 of Notes to Condensed Consolidated Financial Statements. The Company expects selling and administrative expenses in the fourth quarter of 2012 to be modestly lower than the same period last year due to the five fewer days in the 2012 fiscal quarter and the \$12 million recall charge incurred in the fourth quarter of 2011.⁽¹⁾ The favorability from these items will be partially offset by a moderate increase in spending in the fourth quarter to support the Company's growth initiatives. The Company continues to expect its 2012 full-year selling and administrative expense will be higher than full-year 2011 expense as it invests in its growth initiatives, but it will be lower as a percent of revenue.⁽¹⁾

Financial Services Segment

Segment Results

The following table includes the condensed statements of operations for the Financial Services segment (in thousands):

	Three months ended				%	%
	September 30, 2012	September 25, 2011	(Decrease) Increase	Change		
Interest income	\$147,638	\$150,861	\$(3,223)	(2.1)))%
Other income	13,389	13,696	(307)	(2.2)))
Financial services revenue	161,027	164,557	(3,530)	(2.1)))
Interest expense	46,231	61,907	(15,676)	(25.3)))
Provision for credit losses	9,069	6,189	2,880	46.5))
Operating expenses	33,377	34,477	(1,100)	(3.2)))
Financial services expense	88,677	102,573	(13,896)	(13.5)))
Operating income from financial services	\$72,350	\$61,984	\$10,366	16.7))%

Interest income for the three months ended September 30, 2012 decreased due to lower average finance receivables outstanding. Interest expense was lower primarily due to a more favorable cost of funds and the non-recurrence of an \$8.7 million loss incurred in the prior year related to the extinguishment of medium-term notes.

The provision for credit losses was unfavorable in the third quarter of 2012 compared to the third quarter of 2011. The provision for credit losses related to wholesale motorcycle finance receivables increased by \$4.8 million primarily due to an allowance release during the third quarter of 2011 resulting from favorable wholesale account performance. The provision for credit losses related to retail motorcycle finance receivables decreased by \$1.3 million in the third quarter of 2012 compared to the third quarter of 2011 as retail credit loss performance continues to trend favorably. Changes in the allowance for credit losses on finance receivables were as follows (in thousands):

Table of Contents

	Three months ended	
	September 30, 2012	September 25, 2011
Balance, beginning of period	\$ 114,248	\$ 144,404
Provision for finance credit losses	9,069	6,189
Charge-offs	(19,873) (28,809
Recoveries	9,682	10,835
Balance, end of period	\$ 113,126	\$ 132,619

At September 30, 2012, the allowance for credit losses on finance receivables was \$7.3 million for wholesale receivables and \$105.9 million for retail receivables, which included \$49.5 million related to finance receivables held by VIEs. See Note 7 of Notes to Condensed Consolidated Financial Statements for more information on the Company's VIEs. At September 25, 2011, the allowance for credit losses on finance receivables was \$7.6 million for wholesale receivables and \$125.0 million for retail receivables, which included \$64.7 million related to receivables held by VIEs.

HDFS' periodic evaluation of the adequacy of the allowance for credit losses on finance receivables is generally based on HDFS' past loan loss experience, known and inherent risks in the portfolio, current economic conditions and the estimated value of any underlying collateral.

Operating income for the Motorcycles segment during the first nine months of 2012 improved by \$136.8 million compared to the first nine months of 2011 primarily due to increased motorcycle shipments, increased gross margin percent and lower restructuring costs, partially offset by increased selling, general and administrative expenses. Operating income for the Financial Services segment improved by \$9.7 million during the first nine months of 2012 compared to the first nine months of 2011 primarily due to lower interest expense, partially offset by lower interest income. Please refer to the “Motorcycles and Related Products Segment” and “Financial Services Segment” discussions following for a more detailed discussion of the factors affecting operating income.

The effective income tax rate for the first nine months of 2012 was 35.3% compared to 30.4% for the first nine months of 2011. The Company's effective tax rate for the first nine months of 2011 was favorably impacted by discrete tax items totaling \$29.7 million which consisted of a favorable settlement of an Internal Revenue Service (IRS) audit for tax years 2005 through 2008 and a favorable change in Wisconsin income tax law associated with certain net operating losses, partially offset by increases in certain income tax reserves.

Motorcycles & Related Products Segment

Harley-Davidson Motorcycle Worldwide Retail Sales

Worldwide independent dealer retail sales of Harley-Davidson motorcycles increased 6.0% during the first nine months of 2012 compared to the first nine months of 2011. Retail sales of Harley-Davidson motorcycles increased 6.2% in the United States and 5.4% internationally in the first nine months of 2012. On an industry-wide basis, the heavyweight (651+cc) portion of the market was up 3.8% in the United States and down 8.0% in Europe for the nine months ended September 30, 2012 when compared to the same period in 2011. The following table includes retail unit sales of Harley-Davidson motorcycles:

Harley-Davidson motorcycle units	200,558	100.0	%	182,387	100.0	%	18,171	10.0	%

(a) Custom motorcycle units, as used in this table, include Dyna, Softail, VRSC and CVO models.

The Company shipped 200,558 Harley-Davidson motorcycles worldwide during the first nine months of 2012, which was 10.0% higher than the first nine months of 2011. This was in line with Company expectations and resulted in slightly higher U.S. dealer inventory at the end of the first nine months of 2012 compared to the end of the first nine months of 2011.

Segment Results

The following table includes the condensed statements of operations for the Motorcycles segment (in thousands):

	Nine months ended		Increase (Decrease)	% Change	
	September 30, 2012	September 25, 2011

Operating income from motorcycles	\$662,375	\$525,613	\$136,762	26.0	%

Table of Contents

The following table includes the estimated impact of significant factors affecting the comparability of net revenue, cost of goods sold and gross profit from the first nine months of 2011 to the first nine months of 2012 (in millions):

	Net Revenue	Cost of Goods Sold	Gross Profit
September 25, 2011	\$3,635.5	\$2,400.0	\$1,235.5
Volume	338.7	233.1	105.6
Price	23.8	—	23.8
Foreign currency exchange rates and hedging	(64.0)) (60.5) (3.5
Product mix	(2.3)) 9.9	(12.2
Raw material prices	—	(5.6) 5.6
Manufacturing costs	—	(43.4) 43.4
Total	296.2	133.5	162.7
September 30, 2012	\$3,931.7	\$2,533.5	\$1,398.2

The following factors affected the comparability of net revenue, cost of goods sold and gross profit from the first nine months of 2011 to first nine months of 2012:

On average, wholesale prices on the Company's 2012 and 2013 model-year motorcycles are higher than the prior model years resulting in the favorable impact on revenue and gross profit during the period.

Foreign currency exchange rates during the first nine months of 2012 resulted in a negative impact on net revenue and were mostly offset by the favorable impact of gains associated with foreign currency hedging (included in cost of goods sold) when compared to the same period last year.

Shipment mix changes negatively impacted revenue and cost of goods sold. The decrease in gross profit resulted primarily from product mix changes both between and within the Company's motorcycle families.

Raw material prices were lower in the first nine months of 2012 relative to the first nine months of 2011 primarily due to lower metals costs and lower fuel prices.

Manufacturing costs benefited from restructuring savings and a lower fixed cost per unit as a result of higher production volumes. Temporary inefficiencies related to restructuring activities due in part to the ERP implementation were approximately \$27 million in the first nine months of 2012 in line with temporary inefficiencies in the first nine months of 2011.

The net increase in operating expense was primarily due to higher selling and administrative expense driven by incremental investments to support the Company's growth initiatives, higher warranty and recall costs and six more days in the first nine fiscal months of 2012 compared to the first nine fiscal months of 2011. The higher selling and administrative expenses were partially offset by lower restructuring expense related to the Company's previously announced restructuring activities as well as lower engineering expense. For further information regarding the Company's previously announced restructuring activities, refer to Note 5 of Notes to Condensed Consolidated Financial Statements.

Financial Services Segment

Segment Results

The following table includes the condensed statements of operations for the Financial Services segment (in thousands):

	Nine months ended			
	September 30, 2012	September 25, 2011	(Decrease) Increase	% Change
Interest income	\$436,447	\$450,826	\$(14,379)	(3.2)%

49

Table of Contents

Interest income for the nine months ended September 30, 2012 decreased due to lower average finance receivables outstanding. Interest expense was lower primarily due to a more favorable cost of funds and the non-recurrence of an \$8.7 million loss incurred in the prior year related to the extinguishment of medium-term notes.

The provision for credit losses related to retail motorcycle finance receivables increased by \$6.1 million in the first nine months of 2012 compared to the first nine months of 2011. During the first nine months of 2012, there was an \$8.7 million allowance release as compared to a \$33.0 million allowance release in the first nine months of 2011. Both releases were the result of our favorable credit loss performance. The provision for credit losses related to wholesale motorcycle finance receivables increased by \$5.6 million primarily due to smaller allowance releases during the first nine months of 2012 compared to the first nine months of 2011 as a result of significant favorable shifts in risk classification in 2011.

Annualized losses on HDFS' retail motorcycle loans were 0.65% during the first nine months of 2012 compared to 1.11% in the first nine months of 2011. The decrease in credit losses from 2011 was primarily due to a lower frequency of loss. The 30-day delinquency rate for retail motorcycle loans at September 30, 2012 decreased to 3.24% from 3.73% at September 25, 2011.

Changes in the allowance for finance credit losses on finance receivables were as follows (in thousands):

	Nine months ended	
	September 30, 2012	September 25, 2011
Balance, beginning of period	\$ 125,449	\$ 173,589
Provision for finance credit losses	12,823	5,005
Charge-offs	(62,779) (87,233
Recoveries	37,633	41,258
Balance, end of period	\$ 113,126	\$ 132,619
Other Matters		

Contractual Obligations

The Company has updated its Contractual Obligations table as of September 30, 2012 to reflect the new projected principal and interest payments for the remainder of 2012 and beyond as follows (in thousands):

	2012	2013 - 2014	2015 - 2016	Thereafter	Total
Principal payments on debt	\$933,743	\$ 1,620,413	\$ 1,874,194	\$ 1,445,950	\$ 5,874,300
Interest payments on debt	55,105	343,972	195,530	97,567	692,174
	\$988,848	\$ 1,964,385	\$ 2,069,724	\$ 1,543,517	\$ 6,566,474

Interest obligations include the impact of interest rate hedges outstanding as of September 30, 2012. Interest for floating rate instruments, as calculated above, assumes rates in effect at September 30, 2012 remain constant.

As of September 30, 2012, there have been no other material changes to the Company's summary of expected payments for significant contractual obligations under the caption "Contractual Obligations" in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations of the Company's Annual Report on Form 10-K for the year ended December 31, 2011.

Commitments and Contingencies

The Company is subject to lawsuits and other claims related to environmental, product and other matters. In determining required reserves related to these items, the Company carefully analyzes cases and considers the likelihood of adverse judgments or outcomes, as well as the potential range of possible loss. The required reserves are monitored on an ongoing basis and are updated based on new developments or new information in each matter.

Environmental Protection Agency Notice

Table of Contents

In December 2009, the Company received formal, written requests for information from the United States Environmental Protection Agency (EPA) regarding: (i) certificates of conformity for motorcycle emissions and related designations and labels, (ii) aftermarket parts, and (iii) warranty claims on emissions related components. The Company promptly submitted written responses to the EPA's inquiry and engaged in discussions with the EPA. It is possible that a result of the EPA's investigation will be some form of enforcement action by the EPA that will seek a fine or other relief. However, at this time the Company does not know and cannot reasonably estimate the impact of any remedies the EPA might seek.

York Environmental Matters:

The Company is involved with government agencies and groups of potentially responsible parties in various environmental matters, including a matter involving the cleanup of soil and groundwater contamination at its York, Pennsylvania facility. The York facility was formerly used by the U.S. Navy and AMF prior to the purchase of the York facility by the Company from AMF in 1981. Although the Company is not certain as to the full extent of the environmental contamination at the York facility, it has been working with the Pennsylvania Department of Environmental Protection (PADEP) since 1986 in undertaking environmental investigation and remediation activities, including an ongoing site-wide remedial investigation/feasibility study (RI/FS). In January 1995, the Company entered into a settlement agreement (the Agreement) with the Navy. The Agreement calls for the Navy and the Company to contribute amounts into a trust equal to 53% and 47%, respectively, of future costs associated with environmental investigation and remediation activities at the York facility (Response Costs). The trust administers the payment of the Response Costs incurred at the York facility as covered by the Agreement.

In February 2002, the Company was advised by the EPA that it considers some of the Company's remediation activities at the York facility to be subject to the EPA's corrective action program under the Resource Conservation and Recovery Act (RCRA) and offered the Company the option of addressing corrective action under a RCRA facility lead agreement. In July 2005, the York facility was designated as the first site in Pennsylvania to be addressed under the "One Cleanup Program." The program provides a more streamlined and efficient oversight of voluntary remediation by both PADEP and EPA and will be carried out consistent with the Agreement with the Navy. As a result, the RCRA facility lead agreement has been superseded.

The Company estimates that its share of the future Response Costs at the York facility will be approximately \$1.8 million and has established a reserve for this amount which is included in accrued liabilities in the Condensed Consolidated Balance Sheets⁽¹⁾. As noted above, the RI/FS is still underway and given the uncertainty that exists concerning the nature and scope of additional environmental investigation and remediation that may ultimately be required under the RI/FS or otherwise at the York facility, we are unable to make a reasonable estimate of those additional costs, if any, that may result.

The estimate of the Company's future Response Costs that will be incurred at the York facility is based on reports of independent environmental consultants retained by the Company, the actual costs incurred to date and the estimated costs to complete the necessary investigation and remediation activities. Response Costs related to the remediation of soil are expected to be incurred primarily over a period of several years ending in 2015. Response Costs related to ground water remediation may continue for some time beyond 2015.

Product Liability Matters:

The Company is involved in product liability suits related to the operation of its business. The Company accrues for claim exposures that are probable of occurrence and can be reasonably estimated. The Company also maintains insurance coverage for product liability exposures. The Company believes that its accruals and insurance coverage are adequate and that product liability will not have a material adverse effect on the Company's consolidated financial statements.

Table of ContentsLiquidity and Capital Resources as of September 30, 2012⁽¹⁾

Over the long-term, the Company expects that its business model will continue to generate cash that will allow it to invest in the business, fund future growth opportunities and return value to shareholders. The Company believes the Motorcycles operations will continue to be primarily funded through cash flows generated by operations. The Company's Financial Services operations have been funded with unsecured debt, unsecured commercial paper, asset-backed commercial paper conduit facilities and committed unsecured bank facilities and through the term asset-backed securitization market.

The Company's strategy is to maintain a minimum of twelve months of its projected liquidity needs through a combination of cash and marketable securities and availability under credit facilities. The following table summarizes the Company's cash and marketable securities and availability under credit facilities (in thousands):

	September 30, 2012
Cash and cash equivalents	\$1,795,141
Marketable securities	136,376
Total cash and cash equivalents and marketable securities	1,931,517
Global credit facilities	945,307
Asset-backed U.S. commercial paper conduit facility ^(a)	600,000
Asset-backed Canadian commercial paper conduit facility ^(b)	26,445
Total availability under credit facilities	1,571,752
Total	\$3,503,269

(a) The U.S. commercial paper conduit facility expires on September 13, 2013.

(b) The Canadian commercial paper conduit facility expires on August 30, 2013 and is limited to Canadian denominated borrowings.

The Company recognizes that it must continue to monitor and adjust to changes in the lending environment for its Financial Services operations. The Company intends to continue with a diversified funding profile through a combination of short-term and long-term funding vehicles and to pursue a variety of sources to obtain cost-effective funding. The Financial Services operations could be negatively affected by higher costs of funding and increased difficulty of raising, or potential unsuccessful efforts to raise, funding in the short-term and long-term capital markets. These negative consequences could in turn adversely affect the Company's business and results of operations in various ways, including through higher costs of capital, reduced funds available through its Financial Services operations to provide loans to independent dealers and their retail customers, and dilution to existing shareholders through the use of alternative sources of capital.

Cash Flow Activity

The following table summarizes the cash flow activity of continuing operations for the periods indicated (in thousands):

	Nine months ended	
	September 30, 2012	September 25, 2011
Net cash provided by operating activities	\$712,498	\$901,601
Net cash used by investing activities	(274,904)	(177,568)
Net cash used by financing activities	(162,795)	(305,282)
Effect of exchange rate changes on cash and cash equivalents	(6,608)	(11,857)
Net increase in cash and cash equivalents of continuing operations	\$268,191	\$406,894
Operating Activities of Continuing Operations		

The decrease in cash provided by operating activities for the first nine months of 2012 compared to the first nine months of 2011 was due to increased HDFS wholesale lending activity driven by the timing of motorcycle shipments in the third quarter of 2012 and changes in working capital primarily due to a decrease in accrued liabilities. The

Company made a voluntary \$200.0 million contribution to the Company's pension plans in the first quarter of 2012 and in the first quarter of 2011. No additional pension contributions are required in 2012. The Company expects it will continue to make on-going contributions related to current benefit payments for SERPA and postretirement healthcare plans.

Table of Contents

Investing Activities of Continuing Operations

The Company's investing activities consist primarily of capital expenditures, net changes in finance receivables and short-term investment activity. Capital expenditures were \$95.3 million in the first nine months of 2012 compared to \$106.1 million in the same period last year. Net cash flows from finance receivables, net for the first nine months of 2012 were \$163.9 million lower than in the same period last year as a result of an increase in retail motorcycle loan originations during 2012. A net decrease in net cash out-flows related to marketable securities during the first nine months of 2011 resulted in higher investing cash flows of approximately \$56 million in 2012.

Financing Activities of Continuing Operations

The Company's financing activities consist primarily of share repurchases, dividend payments and debt activity. Cash outflows from share repurchases were \$258.0 million in the first nine months of 2012 compared to \$97.5 million for the same period last year. Share repurchases during the first nine months of 2012 included 5.5 million shares of common stock related to discretionary share repurchases as well as shares of common stock that employees surrendered to satisfy withholding taxes in connection with the vesting of restricted stock awards. Share repurchases during the first nine months of 2011 included 2.8 million shares of common stock related to discretionary share repurchases as well as shares of common stock that employees surrendered to satisfy withholding taxes in connection with the vesting of restricted stock awards. As of September 30, 2012, there were 15.3 million shares remaining on a board-approved share repurchase authorization.

The Company paid dividends of \$0.465 and \$0.350 per share totaling \$106.6 million and \$82.6 million during the first nine months of 2012 and 2011, respectively.

Financing cash flows related to debt activity resulted in net cash inflows of \$136.8 million in the first nine months of 2012 compared to net cash outflows of \$186.4 million in the first nine months of 2011. The Company's total outstanding debt consisted of the following (in thousands):

	September 30, 2012	September 25, 2011
Global credit facilities	\$—	\$159,438
Unsecured commercial paper	404,693	813,571
Asset-backed Canadian commercial paper conduit facility	176,855	—
Medium-term notes	3,297,687	2,303,567
Senior unsecured notes	303,000	303,000
	4,182,235	3,579,576
Term asset-backed securitization debt held by VIEs	1,692,065	1,995,073
Total debt	\$5,874,300	\$5,574,649

To access the debt capital markets, the Company relies on credit rating agencies to assign short-term and long-term credit ratings. Generally, lower credit ratings result in higher borrowing costs and reduced access to debt capital markets. A credit rating agency may change or withdraw the Company's ratings based on its assessment of the Company's current and future ability to meet interest and principal repayment obligations. The Company's short-term debt ratings affect its ability to issue unsecured commercial paper. The Company's short-and long-term debt ratings as of September 30, 2012 were as follows:

	Short-Term	Long-Term	Outlook
Moody's	P2	Baa1	Positive
Standard & Poor's	A2	BBB+	Positive
Fitch	F2	A-	Stable

Global Credit Facilities – On April 13, 2012, the Company and HDFS entered into a new \$675.0 million five-year credit facility to refinance and replace a \$675.0 million three-year credit facility that was due to mature in April 2013. The new five-year credit facility matures in April 2017. The Company and HDFS also have a \$675.0 million four-year credit facility which matures in April 2015. The new five-year credit facility and the four-year credit facility (together,

the "Global Credit Facilities") bear interest at various variable interest rates, which may be adjusted upward or downward depending on certain criteria, such as credit ratings. The Global Credit Facilities also require the Company to pay a fee based upon the average daily

Table of Contents

unused portion of the aggregate commitments under the Global Credit Facilities. The Global Credit Facilities are committed facilities and primarily used to support HDFS' unsecured commercial paper program.

Unsecured Commercial Paper – Subject to limitations, HDFS could issue unsecured commercial paper of up to \$1.35 billion as of September 30, 2012 supported by Global Credit Facilities discussed above. Outstanding unsecured commercial paper may not exceed the unused portion of the Global Credit Facilities. Maturities may range up to 365 days from the issuance date. HDFS intends to repay unsecured commercial paper as it matures with additional unsecured commercial paper or through other means, such as borrowing under the Global Credit Facilities, borrowing under its asset-backed U.S. commercial paper conduit facility or through the use of operating cash flow.⁽¹⁾

Medium-Term Notes – The Company had the following medium-term notes (collectively, the Notes) issued and outstanding at September 30, 2012 (in thousands):

Principal Amount	Rate	Issue Date	Maturity Date
\$400,000	5.25%	December 2007	December 2012
\$500,000	5.75%	November 2009	December 2014
\$600,000	1.15%	September 2012	September 2015
\$450,000	3.875%	March 2011	March 2016
\$400,000	2.70%	January 2012	March 2017
\$950,131	6.80%	May 2008	June 2018

The Notes provide for semi-annual interest payments and principal due at maturity. In September 2012, HDFS issued \$600.0 million of medium-term notes which mature in 2015 and have an annual interest rate of 1.15%. During the three months ended September 25, 2011, HDFS repurchased an aggregate \$44.4 million of its \$1.0 billion 6.80% medium-term notes which mature in June 2018. As a result, HDFS recognized an \$8.7 million loss on the extinguishment of debt in Financial services interest expense including unamortized discounts and fees. Unamortized discounts on the Notes reduced the balance by \$2.4 million and \$2.1 million at September 30, 2012 and September 25, 2011, respectively.

The Company plans to fund the repayment of the \$400 million medium-term notes that mature in December 2012 with cash on hand.⁽¹⁾

Senior Unsecured Notes – In February 2009, the Company issued \$600.0 million of senior unsecured notes in an underwritten offering. The senior unsecured notes provide for semi-annual interest payments and principal due at maturity. The senior unsecured notes mature in February 2014 and have an annual interest rate of 15%. During the fourth quarter of 2010, the Company repurchased \$297.0 million of the \$600.0 million senior unsecured notes at a price of \$380.8 million.

Asset-Backed U.S. Commercial Paper Conduit Facility VIE – In September 2012, HDFS amended and restated its revolving asset-backed U.S. commercial paper conduit facility ("U.S. Conduit") which provides for a total aggregate commitment of \$600.0 million. The agreement has terms that are similar to those of prior agreement and is for the same amount. At September 30, 2012, HDFS had no outstanding borrowings under the U.S. Conduit.

HDFS is considered to have the power over the significant activities of the U.S. Conduit VIE due to its role as servicer. Servicing fees are typically not considered potentially significant variable interests in a VIE. However, HDFS retains a residual interest in the VIE in the form of a debt security, which gives HDFS the right to receive benefits that could be potentially significant to the VIE. Therefore, the Company is the primary beneficiary and consolidates this VIE within its consolidated financial statements.

This debt provides for interest on outstanding principal based on prevailing commercial paper rates, or LIBOR plus a specified margin to the extent the advance is not funded by a conduit lender through the issuance of commercial paper. The U.S Conduit also provides for an unused commitment fee based on the unused portion of the total aggregate commitment of \$600.0 million. There is no amortization schedule; however, the debt is reduced monthly as available collections on the related finance receivable collateral are applied to outstanding principal. Upon expiration of the U.S. Conduit, any outstanding principal will continue to be reduced monthly through available collections. Unless earlier terminated or extended by mutual agreement of HDFS and the lenders, as of September 30, 2012, the U.S. Conduit expires September 13, 2013.

Asset-Backed Canadian Commercial Paper Conduit Facility – In August 2012, HDFS entered into an agreement with a Canadian bank-sponsored asset-backed commercial paper conduit facility (“Canadian Conduit”). Under the agreement, the Canadian Conduit is contractually committed, at HDFS' option, to purchase from HDFS eligible Canadian retail motorcycle finance receivables for proceeds up to C\$200 million. In August 2012, HDFS transferred \$209.1 million of Canadian retail motorcycle finance receivables for proceeds of \$183.0 million. HDFS maintains effective control over the transferred assets

Table of Contents

and therefore the transaction does not meet accounting sale requirements under ASC Topic 860, "Transfers and Servicing". As such, this transaction is treated as a secured borrowing. The transferred assets are restricted as collateral for the payment of the debt. At September 30, 2012, \$194.0 million of finance receivables and \$11.6 million of cash were restricted as collateral for the payment of \$176.9 million of debt.

The terms for this debt provide for interest on the outstanding principal based on prevailing market interest rates plus a specified margin. The Canadian Conduit also provides for a program fee and an unused commitment fee based on the unused portion of the total aggregate commitment of C\$200 million. There is no amortization schedule; however, the debt is reduced monthly as available collections on the related finance receivables are applied to outstanding principal. Upon expiration of the Canadian Conduit, any outstanding principal will continue to be reduced monthly through available collections. Unless earlier terminated or extended by mutual agreement of HDFS and the lenders, the Canadian Conduit has an expiration date of August 30, 2013. The contractual maturity of the debt is approximately 5 years. Approximately \$38.0 million of the debt was classified as current at September 30, 2012.

Term Asset-Backed Securitization VIEs – During the third quarter of 2012, the Company issued \$675.3 million of secured notes through one term asset-backed securitization transaction. Additionally, during the second quarter of 2012, the Company issued \$89.5 million of secured notes through the sale of notes that had been previously retained as part of certain 2009 and 2011 term asset-backed securitization transactions. These notes were sold at a premium, and at September 30, 2012, the unaccreted premium associated with these notes was \$1.5 million. During the third quarter of 2011, the Company issued \$573.4 million of secured notes through one term asset-backed securitization transaction.

For all of the term asset-backed securitization transactions, HDFS transferred U.S. retail motorcycle finance receivables to separate VIEs, which in turn issued secured notes, with various maturities and interest rates to investors. All of the notes held by the VIEs are secured by future collections of the purchased U.S. retail motorcycle finance receivables. The U.S. retail motorcycle finance receivables included in the term asset-backed securitization transactions are not available to pay other obligations or claims of HDFS' creditors until the associated debt and other obligations are satisfied. Cash and cash equivalent balances held by the VIEs are used only to support the securitizations. There is no amortization schedule for the secured notes; however, the debt is reduced monthly as available collections on the related retail motorcycle finance receivables are applied to outstanding principal. The secured notes' contractual lives have various maturities ranging from 2012 to 2019.

HDFS is considered to have the power over the significant activities of its term asset-backed securitization VIEs due to its role as servicer. Servicing fees are typically not considered potentially significant variable interests in a VIE. However, HDFS retains a residual interest in the VIEs in the form of a debt security, which gives HDFS the right to receive benefits that could be potentially significant to the VIE. Therefore, the Company is the primary beneficiary and consolidates all of these VIEs within its consolidated financial statements.

As of September 30, 2012, the assets of the VIEs totaled \$2.63 billion, of which \$2.42 billion of finance receivables and \$205.8 million of cash were restricted as collateral for the payment of \$1.69 billion of obligations under the secured notes. Approximately \$559.3 million of the obligations under the secured notes were classified as current at September 30, 2012, based on the contractual maturities of the restricted finance receivables.

Intercompany Borrowing –HDFS has a revolving credit line with the Company whereby HDFS may borrow up to \$210.0 million from the Company at a market interest rate. As of September 30, 2012 and September 25, 2011, HDFS had no outstanding borrowings owed to the Company under this agreement.

During the second quarter of 2012, HDFS and the Company entered into a \$200.0 million Term Loan Agreement which provided for monthly interest payments based on the prevailing commercial paper rates and principal due at maturity in August 2012 or upon earlier demand by the Company. HDFS repaid the \$200.0 million Term Loan Agreement in July 2012. During the second quarter of 2011, HDFS and the Company entered in a \$200.0 million Term Loan Agreement, which was outstanding at June 26, 2011, and matured and was repaid by HDFS during the third quarter of 2011. The Term Loan balances and related interest are eliminated in the Company's consolidated financial statements.

The Company has a support agreement with HDFS whereby, if required, the Company agrees to provide HDFS with financial support to maintain HDFS' fixed-charge coverage at 1.25 and minimum net worth of \$40.0 million. Support may be provided at the Company's option as capital contributions or loans. Accordingly, certain debt covenants may restrict the Company's ability to withdraw funds from HDFS outside the normal course of business. No amount has ever been provided to HDFS under the support agreement.

Table of Contents

Operating and Financial Covenants – HDFS and the Company are subject to various operating and financial covenants related to the Global Credit Facilities and various operating covenants under the Notes and the U.S. and Canadian asset-backed commercial paper conduit facilities. The more significant covenants are described below.

The covenants limit the Company's and HDFS' ability to:

- incur certain additional indebtedness;
- assume or incur certain liens;
- participate in certain mergers, consolidations, liquidations or dissolutions; and
- purchase or hold margin stock.

Under the financial covenants of the Global Credit Facilities, the consolidated debt to equity ratio of HDFS cannot exceed 10.0 to 1.0. In addition, the Company must maintain a minimum interest coverage ratio of at least 2.25 to 1.0 for each fiscal quarter through June 2013 and 2.5 to 1.0 for each fiscal quarter thereafter. No financial covenants are required under the Notes or the U.S. or Canadian asset-backed commercial paper conduit facilities.

At September 30, 2012, HDFS and the Company remained in compliance with all of the then existing covenants.

Cash Flows from Discontinued Operations

There were no significant cash flows from discontinued operations during the nine months ended September 30, 2012 and September 25, 2011, respectively.

Cautionary Statements

The Company's ability to meet the targets and expectations noted depends upon, among other factors, the Company's ability to:

- (i) execute its business strategy,
- (ii) effectively execute the Company's restructuring plans within expected costs and timing,
- (iii) implement and manage enterprise-wide information technology solutions, including solutions at its manufacturing facilities, and secure data contained in those systems,
- (iv) adjust to fluctuations in foreign currency exchange rates, interest rates and commodity prices,
- (v) anticipate the level of consumer confidence in the economy,
- (vi) manage through inconsistent economic conditions, including changing capital, credit and retail markets,
- (vii) continue to realize production efficiencies at its production facilities and manage operating costs including materials, labor and overhead,
- (viii) manage production capacity and production changes,
- (ix) manages changes and prepare for requirements in legislative and regulatory environments for its products, services and operations,
- (x) successfully implement with our labor unions the agreements that we have executed with them that we believe will provide flexibility and cost-effectiveness to accomplish restructuring goals and long-term competitiveness,
- (xi) manage risks that arise through expanding international operations and sales,
- (xii) manage supply chain issues, including any unexpected interruptions or price increases caused by raw material shortages or natural disasters,
- (xiii) provide products, services and experiences that are successful in the marketplace,
- (xiv) develop and implement sales and marketing plans that retain existing retail customers and attract new retail customers in an increasingly competitive marketplace,
- (xv) manage the risks that our independent dealers may have difficulty obtaining capital and managing through changing economic conditions and consumer demand,
- (xvi) continue to have access to reliable sources of capital funding and adjust to fluctuations in the cost of capital,
- (xvii) manage the credit quality, the loan servicing and collection activities, and the recovery rates of HDFS' loan portfolio,
- (xviii) sell all of its motorcycles and related products and services to its independent dealers,
- (xix) continue to develop the capabilities of its distributor and dealer network,

- (xx) adjust to healthcare inflation and reform, pension reform and tax changes,
- (xxi) retain and attract talented employees, and
- (xxii) detect any issues with our motorcycles or manufacturing processes to avoid delays in new model launches, recall campaigns, increased warranty costs or litigation.

Table of Contents

In addition, the Company could experience delays or disruptions in its operations as a result of work stoppages, strikes, natural causes, terrorism or other factors. Other factors are described in risk factors that the Company has disclosed in documents previously filed with the Securities and Exchange Commission. Many of these risk factors are impacted by the current changing capital, credit and retail markets and the Company's ability to manage through inconsistent economic conditions.

The Company's ability to sell its motorcycles and related products and services and to meet its financial expectations also depends on the ability of the Company's independent dealers to sell its motorcycles and related products and services to retail customers. The Company depends on the capability and financial capacity of its independent dealers and distributors to develop and implement effective retail sales plans to create demand for the motorcycles and related products and services they purchase from the Company.

In addition, the Company's independent dealers and distributors may experience difficulties in operating their businesses and selling Harley-Davidson motorcycles and related products and services as a result of weather, economic conditions or other factors.

HDFS has experienced historically low levels of retail credit losses and has no assurance that this will continue. The Company believes that HDFS' retail credit losses may increase over time due to changing consumer credit behavior and HDFS' efforts to increase prudently structured loan approvals in the near-prime and sub-prime lending environment.

Refer to "Risk Factors" under Item 1A of the Company's Annual Report on Form 10-K for the year ended December 31, 2011 for a discussion of additional risk factors and a more complete discussion of some of the cautionary statements noted above.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Refer to the Company's Annual Report on Form 10-K for the year ended December 31, 2011 for a complete discussion of the Company's market risk. There have been no material changes to the market risk information included in the Company's Annual Report on Form 10-K for the year December 31, 2011.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

In accordance with Rule 13a-15(b) of the Securities Exchange Act of 1934 (the Exchange Act), as of the end of the period covered by this Quarterly Report on Form 10-Q, the Company's management evaluated, with the participation of the Company's Chairman, President and Chief Executive Officer and the Senior Vice President and Chief Financial Officer, the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act). Based upon their evaluation of these disclosure controls and procedures, the Chairman, President and Chief Executive Officer and the Senior Vice President and Chief Financial Officer have concluded that the disclosure controls and procedures were effective as of the end of the period covered by this Quarterly Report on Form 10-Q to ensure that information required to be disclosed by the Company in the reports it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time period specified in the Securities and Exchange Commission rules and forms, and to ensure that information required to be disclosed by the Company in the reports it files or submits under the Exchange Act is accumulated and communicated to the Company's management, including its Chairman, President and Chief Executive Officer and Senior Vice President and Chief Financial Officer, as appropriate, to allow timely decisions regarding disclosure.

Changes in Internal Controls

During the quarter ended September 30, 2012, the Company implemented a new ERP system at its York manufacturing facility. The implementation included sales order processing, procurement, manufacturing, costing, general ledger and financial reporting processes. The Company followed a system development process that required significant pre-implementation planning, design and testing to ensure an ongoing effective control environment. There were no other changes in the Company's internal control over financial reporting during the quarter ended September 30, 2012 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II – OTHER INFORMATION

Item 1 – Legal Proceedings

The information required under this Item 1 of Part II is contained in Item 1 of Part I of the Quarterly report on Form 10-Q in Note 16 of the Notes to Condensed Consolidated Financial Statements, and such information is incorporated herein by reference in this Item 1 of Part II.

Item 2 – Unregistered Sales of Equity Securities and Use of Proceeds

The following table contains detail related to the repurchase of common stock based on the date of trade during the quarter ended September 30, 2012:

2012 Fiscal Month	Total Number of Shares Purchased (a)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
July 2 to August 5	791,769	\$45	791,769	16,414,882
August 6 to September 2	643,902	\$42	643,902	15,807,383
September 3 to September 30	518,200	\$44	518,200	15,298,437
Total	1,953,871	\$44	1,953,871	

(a) Includes discretionary share repurchases and shares of common stock that employees surrendered to satisfy withholding taxes in connection with the vesting of restricted stock awards

The Company has an authorization (originally adopted in December 1997) by its Board of Directors to repurchase shares of its outstanding common stock under which the cumulative number of shares repurchased, at the time of any repurchase, shall not exceed the sum of (1) the number of shares issued in connection with the exercise of stock options occurring on or after January 1, 2004 plus (2) one percent of the issued and outstanding common stock of the Company on January 1 of the current year, adjusted for any stock split. The Company made discretionary share repurchases of 1,944,950 shares during the quarter ended September 30, 2012 under this authorization. As of September 30, 2012, no shares remained under this authorization.

In December 2007, the Company's Board of Directors separately authorized the Company to buy back up to 20.0 million shares of its common stock with no dollar limit or expiration date. As of September 30, 2012, 15.3 million shares remained under this authorization.

From time to time, the Company may enter into a Rule 10b5-1 trading plan for the purpose of repurchasing shares under the 1997 authorization.

The Harley-Davidson, Inc. 2009 Incentive Stock Plan and predecessor stock plans permit participants to satisfy all or a portion of the statutory federal, state and local withholding tax obligations arising in connection with plan awards by electing to (a) have the Company withhold shares otherwise issuable under the award, (b) tender back shares received in connection with such award or (c) deliver other previously owned shares, in each case having a value equal to the amount to be withheld. During the third quarter of 2012, the Company acquired 8,921 shares of common stock that employees presented to the Company to satisfy withholding taxes in connection with the vesting of restricted stock awards.
