FORM 10-Q

(Mark One)

☒ QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2015

OR

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For transition period from _____ to _____
Commission File Number 001-36773

WORKIVA INC.

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of
incorporation or organization)

2900 University Blvd

Ames, IA 50010

(888) 275-3125

(Address of principal executive offices and zip code)

(888) 275-3125

(Registrant's telephone number, including area code)

47-2509828

(I.R.S. Employer Identification
Number)

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the Registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☐

Accelerated filer ☐

Non-accelerated filer ☒ (Do not check if a smaller reporting company)

Smaller reporting company ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act):
Yes ☐ No ☒

Edgar Filing: WORKIVA INC - Form 10-Q

As of May 1, 2015, there were approximately 27,762,714 shares of the registrant's Class A common stock and 12,426,947 shares of the registrant's Class B common stock outstanding.

EXPLANATORY NOTE

On December 10, 2014, Workiva LLC was converted into a Delaware corporation and renamed Workiva Inc. For convenience, except as the context otherwise requires, all information included in this report on Form 10-Q is presented giving effect to the conversion of the company into a corporation.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

Certain statements in this Quarterly Report on Form 10-Q are “forward-looking statements” within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, and are subject to the safe harbor created thereby. All statements contained in this Quarterly Report on Form 10-Q other than statements of historical facts, including statements regarding our future results of operations and financial position, our business strategy and plans and our objectives for future operations, are forward-looking statements. The words “believe,” “may,” “will,” “estimate,” “continue,” “anticipate,” “intend,” “expect” and similar expressions are intended to identify forward-looking statements. We have based these forward-looking statements largely on our current expectations and projections about future events and financial trends that we believe may affect our financial condition, results of operations, business strategy, short-term and long-term business operations and objectives, and financial needs. These forward-looking statements are subject to a number of risks, uncertainties and assumptions, including those described in “Item 1A. Risk Factors” of our Annual Report on Form 10-K for the year ended December 31, 2014, in “Item 1A. Risk Factors” in Part II of this Quarterly Report on Form 10-Q and in any subsequent filing we make with the SEC, as well as in any documents incorporated by reference that describe risks and factors that could cause results to differ materially from those projected in these forward-looking statements.

Moreover, we operate in a very competitive and rapidly changing environment. New risks emerge from time to time. It is not possible for our management to predict all risks, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements we may make. In light of these risks, uncertainties and assumptions, the future events and trends discussed in this Quarterly Report on Form 10-Q may not occur and actual results could differ materially and adversely from those anticipated or implied in the forward-looking statements.

Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance, achievements or events and circumstances reflected in the forward-looking statements will occur. We are under no duty to update any of these forward-looking statements after completion of this Quarterly Report on Form 10-Q to conform these statements to actual results or revised expectations.

WORKIVA INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. Organization and Significant Accounting Policies

Organization

Workiva Inc., a Delaware corporation, and its wholly-owned subsidiaries created Wdesk, a cloud-based platform for enterprises to collect, manage, report and analyze data in real time. Our secure software platform, Wdesk, allows users to integrate and control all of their business data, regardless of format or location, with innovative live-linking technology. We offer our customers solutions for compliance, risk, sustainability, management reporting, data collection, and enterprise risk management that are delivered through our Wdesk platform. Our operational headquarters are located in Ames, Iowa, with additional offices located in the United States, Europe and Canada.

Basis of Presentation and Principles of Consolidation

The financial information presented in the accompanying unaudited condensed consolidated financial statements has been prepared in accordance with U.S. generally accepted accounting principles ("U.S. GAAP") and in accordance with rules and regulations of the U.S. Securities and Exchange Commission ("SEC") regarding interim financial reporting. Accordingly, the financial statements do not include all of the information and footnotes required by US GAAP for complete financial statements. The condensed consolidated balance sheet data as of December 31, 2014 was derived from audited financial statements, but does not include all disclosures required by GAAP. The condensed consolidated financial information should be read in conjunction with the consolidated financial statements and notes included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2014 filed with the SEC on March 11, 2015. In the opinion of management, the accompanying unaudited condensed consolidated financial statements reflect all adjustments, consisting primarily of normal recurring accruals, necessary for a fair presentation of our financial position and results of operations. The operating results for the three months ended March 31, 2015 are not necessarily indicative of the results expected for the full year ending December 31, 2015.

The unaudited condensed consolidated financial statements include the accounts of Workiva Inc. and its wholly-owned subsidiaries. All intercompany accounts and transactions have been eliminated in consolidation.

Use of Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States requires us to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. We base our estimates on historical experience and various other assumptions believed to be reasonable. These estimates include, but are not limited to, the determination of the relative selling prices of our services, self-insurance liability for claims incurred but not yet reported, collectability of accounts receivable, useful lives of intangible assets and property and equipment, income taxes and certain assumptions used in the valuation of equity awards. While these estimates are based on our best knowledge of current events and actions that may affect us in the future, actual results may differ materially from these estimates.

Fair Value of Financial Instruments

Our financial assets, which include cash equivalents and marketable securities, are measured and recorded at fair value on a recurring basis. Our other current financial assets and our other current financial liabilities have fair values that approximate their carrying value due to their short-term maturities.

Table of Contents

New Accounting Pronouncements

In May 2014, the FASB issued guidance codified in ASC 606, Revenue Recognition - Revenue from Contracts with Customers, which amends the guidance in former ASC 605, Revenue Recognition. The effective date of January 1, 2017 is currently under review based on the FASB's recent decision to propose a one-year deferral. We are currently evaluating the impact of the provisions of ASC 606.

In April 2015, the FASB issued ASU 2015-05, Intangibles-Goodwill and Other-Internal-Use Software (Subtopic 350-40): Customer's Accounting for Fees Paid in a Cloud Computing Arrangement. The amendments in this update provide guidance to customers about whether a cloud computing arrangement includes a software license. The amendment is effective for interim and annual periods beginning after December 15, 2015 with early adoption permitted. The implementation of this standard is not expected to have a significant impact on our consolidated financial statements.

In April 2015, the FASB issued ASU 2015-03, Interest - Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs. The standard requires debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs are not affected. The standard will become effective for interim and annual periods beginning after December 15, 2015. The implementation of this standard is not expected to have a significant impact on our consolidated financial statements.

2. Supplemental Consolidated Balance Sheet Information

Accrued Expenses and Other Current Liabilities

Accrued expenses and other current liabilities as of March 31, 2015 and December 31, 2014 consisted of (in thousands):

	March 31, 2015	December 31, 2014
Accrued vacation	\$3,274	\$2,949
Accrued commissions	1,566	1,649
Accrued bonuses	2,208	6,336
Self-insurance liability	775	800
Accrued other liabilities	4,372	5,031
	\$12,195	\$16,765

3. Fair Value Measurements

We determine the fair values of our financial instruments based on the fair value hierarchy, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value assumes that the transaction to sell the asset or transfer the liability occurs in the principal or most advantageous market for the asset or liability and establishes that the fair value of an asset or liability shall be determined based on the assumptions that market participants would use in pricing the asset or liability. The classification of a financial asset or liability within the hierarchy is based upon the lowest level input that is significant to the fair value measurement. The fair value hierarchy prioritizes the inputs into three levels that may be used to measure fair value:

Table of Contents

Level 1 - Inputs are unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2 - Inputs are quoted prices for similar assets and liabilities in active markets or inputs that are observable for the asset or liability, either directly or indirectly through market corroboration, for substantially the full term of the financial instrument.

Level 3 - Inputs are unobservable inputs based on our assumptions.

The fair value of our money market funds reported in cash and cash equivalents at March 31, 2015 and December 31, 2014 was \$85.2 million and \$97.1 million, respectively. These assets are classified as Level 1 on the fair value hierarchy.

Other Fair Value Measurements

At March 31, 2015, the fair value of our debt obligations approximated the carrying amount of \$0.2 million. The estimated fair value was based in part on our consideration of incremental borrowing rates for similar types of borrowing arrangements. We have generally classified the fair value of our debt obligations as Level 3 due to the lack of relevant observable market data over fair value inputs.

4. Commitments and Contingencies

Lease Commitments

There have been no material changes in our future estimated minimum lease payments under non-cancelable operating, capital and financing leases, as disclosed in our Annual Report on Form 10-K for the year ended December 31, 2014.

Government Grants

In connection with a February 2011 grant agreement with the Iowa Department of Economic Development, we were awarded a grant that provides for reimbursement of costs incurred in connection with the construction of the first phase of the Ames office building. In March 2015, we received proceeds of \$313,000 in connection with this grant which is included in "Deferred government grant obligation" on the consolidated balance sheet at March 31, 2015. At March 31, 2015, this amount is presented as a non-current liability as we anticipate offsetting it against the carrying value of our property and equipment once all contingencies are resolved in December 2015 and the grant is determined to be realized.

Litigation

From time to time we may become involved in legal proceedings or be subject to claims arising in the ordinary course of our business. Although the results of litigation and claims cannot be predicted with certainty, we currently believe that the final outcome of any currently pending legal proceedings to which we are a party will not have a material adverse effect on our business, operating results, financial condition or cash flows. Regardless of the outcome, litigation can have an adverse impact on us because of defense and settlement costs, diversion of management resources and other factors.

Table of Contents

5. Stock-Based Compensation

We grant stock-based incentive awards to attract, motivate and retain qualified employees, non-employee directors and consultants, and to align their financial interests with those of our stockholders. Prior to our corporate conversion in December 2014, awards were provided under the 2009 Unit Incentive Plan (the “2009 Plan”). We utilized equity-based compensation in the form of restricted participation units, appreciation units and options to purchase common units. We determined these forms of equity-based compensation were substantive classes of equity for accounting purposes. All outstanding options to purchase common units under the 2009 Plan automatically converted into options to purchase shares of Class A common stock following the corporate conversion. No other unvested award types were outstanding at the time of our corporate conversion.

Immediately prior to our initial public offering, the 2009 Plan was amended to provide that no further awards will be issued thereunder, and our board of directors and stockholders adopted and approved our 2014 Equity Incentive Plan (the “2014 Plan” and, together with the 2009 Plan, the “Plans”).

Subsequent to our corporate conversion, we utilize stock-based compensation in the form of restricted stock and options to purchase Class A common stock. Options to purchase Class A common stock generally vest over a four-year period and are generally granted for a term of ten years.

As of March 31, 2015, awards outstanding under the 2009 Plan consisted of stock options, and awards outstanding under the 2014 Plan consisted of stock options and restricted stock awards.

As of March 31, 2015, 3,332,931 shares of Class A common stock were available for grant under the 2014 Plan. Stock-based compensation expense for the three months ended March 31, 2015 was \$1.6 million and \$542,000 for options to purchase common stock and restricted stock, respectively. Stock-based compensation expense for the three months ended March 31, 2014 was \$32,000 for restricted participation and appreciation units and \$1.9 million for options to purchase common units.

Stock-based compensation expense associated with restricted participation and appreciation units, stock options and restricted stock was recorded in the following cost and expense categories consistent with the respective employee or service provider’s related cash compensation (in thousands):

	Three months ended March 31,	
	2015	2014
Cost of revenue		
Subscription and support	\$96	\$230
Professional services	72	170
Operating expenses		
Research and development	334	765
Sales and marketing	350	350
General and administrative	1,322	441
Total	\$2,174	\$1,956

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option-pricing model. Expected volatility is based on historical volatilities for publicly traded stock options of comparable companies over the estimated expected life of the options. The expected term represents the period of time the options are expected to be outstanding and is based on the “simplified method.” We use the “simplified method” due to the lack of sufficient historical exercise data to provide a reasonable basis

Table of Contents

upon which to otherwise estimate the expected life of the options. The risk-free interest rate is based on yields on U.S. Treasury STRIPS with a maturity similar to the estimated expected term of the options. The fair value of our participation and appreciation units and options was estimated assuming no expected dividends and the following weighted-average assumptions:

	Three months ended March 31,	
	2015	2014
Expected term (in years)	6.1	5.0 - 10.0
Risk-free interest rate	1.35% - 1.74%	1.52% - 2.68%
Expected volatility	42.35% - 44.08%	45.84% - 52.50%
Forfeiture rate	5.12% - 5.21%	0% - 5.94%

Stock Options

The following table summarizes the option activity under the Plans for the three months ended March 31, 2015:

	Options	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
				(in thousands)
Outstanding at December 31, 2014	6,089,938	\$9.63	7.80	\$30,066
Granted	42,719	12.90		
Forfeited	26,433	12.99		
Exercised	14,393	5.48		
Outstanding at March 31, 2015	6,091,831	\$9.65	7.65	\$33,124
Exercisable at March 31, 2015	3,248,657	\$5.28	6.48	\$30,350

The total intrinsic value of options exercised during the three months ended March 31, 2015 and 2014 was \$114,000 and \$30,000, respectively.

The weighted-average grant-date fair value of options granted during the three months ended March 31, 2015 and 2014 was \$5.50 and \$7.93, respectively. The total fair value of options vested during the three months ended March 31, 2015 and 2014 was approximately \$2.2 million and \$1.7 million, respectively. Total unrecognized compensation expense of \$16.6 million related to options will be recognized over a weighted-average period of 3.02 years. Total compensation expense recognized during the three months ended March 31, 2015 and 2014 for outstanding options granted to service providers was \$77,000 and \$228,000, respectively, based on the fair value on the vesting date or the fair value on the reporting date if unvested.

Restricted Stock

During the three months ended March 31, 2015, we granted 530,000 shares of restricted stock to our executive officers with vesting in three equal annual installments from the date of grant. The fair value for restricted stock awards is calculated based on the stock price on the date of grant. The weighted-average grant-date fair value of restricted stock granted during the three months ended March 31, 2015 was \$13.40.

Table of Contents

Compensation expense associated with unvested restricted stock is recognized on a straight-line basis over the vesting period. The expense recognized each period is dependent upon our estimate of the number of shares that will ultimately be issued. At March 31, 2015, there was approximately \$7.3 million of total unrecognized compensation expense related to restricted stock, which is expected to be recognized over a weighted-average period of 2.69 years.

Restricted participation and appreciation units

The total fair value of participation and appreciation units vested during the three months ended March 31, 2014 was approximately \$51,000. At December 10, 2014, all participation and appreciation units converted into Class A common stock as part of the corporate conversion.

Table of Contents

6. Net Loss Per Share

Basic net loss per share attributable to common stockholders is computed by dividing the net loss attributable to common stockholders by the weighted-average number of shares of common stock outstanding during the period. Diluted net loss per share is computed by giving effect to all potential shares of common stock, including our outstanding stock options and stock related to unvested restricted stock awards to the extent dilutive. All historical share counts used in the calculation have been adjusted for the corporate conversion.

The net loss per share attributable to common stockholders is allocated based on the contractual participation rights of the Class A and Class B common shares as if the loss for the year has been distributed. As the liquidation and dividend rights are identical, the net loss attributable to common stockholders is allocated on a proportionate basis. We consider unvested restricted stock awards granted under the 2014 Equity Incentive Plan to be participating securities because holders of such shares have non-forfeitable dividend rights in the event of our declaration of a dividend for common shares. In future periods to the extent we are profitable, we will subtract earnings allocated to these participating securities from net income to determine net income attributable to common stockholders. A reconciliation of the denominator used in the calculation of basic and diluted loss per share is as follows (in thousands, except share and per share data):

	Three months ended March 31, 2015		March 31, 2014	
	Class A	Class B	Class A	Class B
Numerator				
Net loss	\$(5,110	) \$(2,337	) \$(2,776	) \$(1,776
Denominator				
Weighted-average common shares outstanding - basic and diluted	27,166,753	12,426,947	19,372,730	12,394,783
Basic and diluted net loss per share	\$(0.19	) \$(0.19	) \$(0.14	) \$(0.14
The anti-dilutive securities excluded from the weighted-average shares used to calculate the diluted net loss per common share were as follows:				

	Three months ended	
	March 31, 2015	March 31, 2014
Shares subject to outstanding common stock options	2,266,783	2,534,438
Shares subject to unvested appreciation units and participation units	—	20,308
Shares subject to unvested restricted stock awards	584,350	—

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of our financial condition and results of our operations should be read in conjunction with the condensed consolidated financial statements and related notes included elsewhere in this report and in our Annual Report on Form 10-K filed with the Securities and Exchange Commission on March 11, 2015. In addition to historical consolidated financial information, this discussion contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those discussed below. Factors that could cause or contribute to these differences include, but are not limited to, those identified below, and those discussed in “Item 1A. Risk Factors” of our Annual Report on Form 10-K for the year ended December 31, 2014, in “Item 1A. Risk Factors” in Part II of this Quarterly Report on Form 10-Q and in any subsequent filing we make with the SEC.

Overview

Workiva created Wdesk, a cloud-based platform for enterprises to collect, manage, report and analyze business data in real time. Our secure software platform, Wdesk, allows users to integrate and control all of their business data, regardless of format or location, with innovative live-linking technology. Our proprietary word processing, spreadsheet and presentation applications are fully integrated and built upon the Workiva data management engine, allowing thousands of users to collaborate simultaneously on data-linked reports and documents. Wdesk empowers our customers to dynamically define their business processes and optimize workflows so that critical data can be reported and analyzed more efficiently. Our customers can gain insights based on their trusted data, which enables better real-time decision-making. Additionally, our customers deploy our solutions to serve as a single system of record for critical data, to reduce risk and operational costs, and to increase efficiency in business reporting. As of March 31, 2015, we provided our solutions to more than 2,200 enterprise customers, including more than 65% of both the Fortune 500 and Fortune 100.

Our Wdesk product platform allows multiple users to simultaneously create, review and publish data-linked documents and reports with greater control, accuracy and productivity than ever before. We offer our customers solutions for compliance, risk, sustainability and management reporting, and enterprise risk management. Underlying these solutions is our scalable, enterprise-grade data engine that collects, aggregates and manages our customers’ unstructured and structured data.

We operate our business on a software-as-a-service (SaaS) model. Customers enter into quarterly, annual and multi-year subscription contracts to utilize Wdesk. Our subscription fee includes the use of our service and technical support. Our pricing is based primarily on the number of corporate entities, number of users, level of customer support, and length of contract. Our pricing model is scaled to the number of users, so the subscription price per user typically decreases as the number of users increases. We charge customers additional fees primarily for document setup and XBRL tagging services. We generate sales primarily through our direct sales force and, to a lesser extent, customer success and professional services teams.

Our integrated platform, subscription-based model, and exceptional customer support have contributed to a low rate of customer turnover while achieving strong revenue growth. Our subscription and support revenue retention rate was 95.9% for the twelve months ended March 31, 2015.

We continue to invest in the development of our solutions, infrastructure and sales and marketing to drive long-term growth. Our full-time employee headcount expanded to 946 at March 31, 2015 from 825 at March 31, 2014, an increase of 14.7%.

We have achieved significant revenue growth in recent periods. Our revenue grew to \$35.2 million in the three months ended March 31, 2015 from \$28.1 million in the three months ended March 31, 2014, an increase of 25.0%. We incurred net losses of \$7.4 million and \$4.6 million during the three months ended March 31, 2015 and 2014, respectively.

We are an “emerging growth company,” as defined in the JOBS Act. We will cease to be an “emerging growth company” upon the earliest of (i) December 31, 2019, (ii) the last day of the first fiscal year in which

Table of Contents

our annual gross revenue are \$1 billion or more, (iii) the date on which we have, during the previous rolling three-year period, issued more than \$1 billion in nonconvertible debt securities or (iv) the date on which we qualify as a “large accelerated filer” with at least \$700 million of equity securities held by non-affiliates.

Key Factors Affecting Our Performance

New customers. We employ a “land-and-expand” sales strategy that focuses on acquiring new customers through our direct sales model and building our relationships with existing customers over time. Acquiring new customers is a key component of our continued success in the marketplace, growth opportunity and future revenue. We have aggressively invested in and intend to continue to invest in our direct sales force.

Further penetration of existing customers. Our account management teams seek to generate additional revenue from our customers by adding seats to existing subscriptions and by signing new subscriptions for additional business solutions on our platform. We believe a significant opportunity exists for us to sell additional subscriptions to current customers as they become more familiar with our platform and adopt our solutions to address additional business use cases.

Investment in growth. We are expanding our operations, increasing our headcount and developing software to both enhance our current offerings and build new features. We expect our total operating expenses to increase, particularly as we continue to expand our sales operations, marketing activities and development staff. We continue to invest in our sales, marketing and customer success organizations to drive additional revenue and support the growth of our customer base. Investments we make in our sales and marketing and research and development organizations will occur in advance of experiencing any benefits from such investments. In the quarter ended March 31, 2015, we hired additional employees in sales and marketing and plan to continue to do so each of the next several quarters.

Key Performance Indicators

	Three months ended March 31,		
	2015	2014	
	(dollars in thousands)		
Financial metrics			
Total revenue	\$35,154	\$28,132	
Percentage increase in total revenue	25.0	% 32.1	%
Subscription and support revenue	\$26,269	\$20,648	
Percentage increase in subscription and support revenue	27.2	% 53.5	%
Subscription and support as a percent of total revenue	74.7	% 73.4	%
	As of March 31,		
	2015	2014	
Operating metrics			
Number of customers	2,290	1,993	
Subscription and support revenue retention rate	95.9	% 97.8	%
Subscription and support revenue retention rate including add-ons	105.8	% 111.3	%

Total customers. We believe total number of customers is a key indicator of our financial success and future revenue potential. We define a customer as an entity with an active subscription contract as of

Table of Contents

the measurement date. Our customer is typically a parent company or, in a few cases, a significant subsidiary that works with us directly. Companies with publicly listed securities account for a substantial majority of our customers. Subscription and support revenue retention rate. We calculate our subscription and support revenue retention rate by annualizing the subscription and support revenue recorded in the first month of the measurement period for only those customers in place throughout the entire measurement period, thereby excluding any attrition. We divide the result by the annualized subscription and support revenue in the first month of the measurement period for all customers in place at the beginning of the measurement period. The measurement period is based on the trailing twelve months. Our subscription and support revenue retention rate was 95.9% at the March 2015 measurement date, down slightly from March 2014. We believe that our success in maintaining a high rate of revenue retention is attributable primarily to our robust technology platform and strong customer service. Customers being acquired or ceasing to file SEC reports has been the largest contributing factor to our revenue attrition.

Subscription and support revenue retention rate including add-ons. Add-on revenue includes the change in both seats purchased and seat pricing for existing customers. We calculate our subscription and support revenue retention rate including add-ons by annualizing the subscription and support revenue recorded in the last month of the measurement period for only those customers in place throughout the entire measurement period. We divide the result by the annualized subscription and support revenue in the first month of the measurement period for all customers in place at the beginning of the measurement period. The measurement period is based on the trailing twelve months.

Our subscription and support revenue retention rate including add-ons was 105.8% at the March 2015 measurement date, down from 111.3% as of March 2014. The launch of our Wdesk platform in March 2013 had a positive impact on add-on revenue for several of the quarters that followed. In 2014, we shifted the focus of our existing customer sales team towards new use cases with larger target deal sizes. As we expected, the time devoted to training and the redirection of the team's attention toward new decision-makers at our customers impacted add-on revenue in 2014 and the first quarter of 2015.

Components of Results of Operations

Revenue

We generate revenue through the sale of subscriptions to our cloud-based software and the delivery of professional services. We serve a wide range of customers in many industries, and our revenue is not concentrated with any single customer or small group of customers. For the three months ended March 31, 2015 and 2014, no single customer represented more than 2% of our revenue, and our largest ten customers accounted for approximately 5% of our revenue in the aggregate.

We generate sales directly through our sales force. We also identify some sales opportunities with existing customers through our customer success and professional services teams.

Our customer contracts typically range in length from three to 36 months. Our arrangements do not contain general rights of return. We typically invoice our customers for subscription fees in advance on a quarterly, annual, two-year or three-year basis, with payment due at the start of the subscription term. Unpaid invoice amounts for services starting in future periods are excluded from accounts receivable and deferred revenue. Invoiced amounts are reflected as accounts receivable once we have initiated services with an offset to deferred revenue or revenue depending on whether the revenue recognition criteria have been met.

Subscription and Support Revenue. We recognize the aggregate minimum subscription and support fees ratably on a straight-line basis over the subscription term, provided that an enforceable contract has

Table of Contents

been signed by both parties, access to our SaaS solutions has been granted to the customer, the fee for the subscription and support is fixed or determinable, and collection is reasonably assured.

Professional Services Revenue. We believe our professional services facilitate the sale of our subscription service to certain customers. To date, most of our professional services relate to document set up and XBRL tagging, which are activities that we have undertaken hundreds of times. When requested by our new or existing customers, we typically set up their documents by importing a prior version and formatting the document using best practice methods in our solution. Our XBRL tagging services include applying XBRL tagging to a customer filing document using Wdesk XBRL tools, reviewing existing tags for correctness, identifying any necessary revisions to be consistent with newly provided requirements or guidance from the SEC or FASB, as well as rolling forward XBRL tags from a prior filing to a current filing document.

Our professional services are not required for customers to utilize our solution. Our pricing for professional services has been predominantly on a fixed-fee basis, and we recognize revenue after the services have been performed.

Document set up services are typically completed in less than two weeks. XBRL tagging services are offered for each filing document, and revenue is recognized upon a successful submission to the SEC.

We are beginning to provide professional services on new solutions, including our risk reporting, data collection and Sarbanes-Oxley compliance solutions, which may involve a different mix of subscription, support and services than we have experienced to date. The contribution of this new revenue mix may impact our gross margins in ways that we cannot predict.

Cost of Revenue

Cost of revenue consists primarily of personnel and related costs directly associated with our professional services, customer success teams and training personnel, including salaries, benefits, bonuses and stock-based compensation; the costs of contracted third-party vendors; the costs of server usage by our customers; information technology costs and facility costs. Costs of server usage are comprised primarily of fees paid to Google Cloud Platform and Amazon Web Services.

Sales and Marketing Expenses

Sales and marketing expenses consist primarily of personnel and related costs, including salaries, benefits, bonuses, commissions, travel, and stock-based compensation. Other costs included in this expense are marketing and promotional events, our annual user conference, online marketing, product marketing, information technology costs, and facility costs. We capitalize and amortize sales commissions that are directly attributable to a contract over the lesser of twelve months or the non-cancelable term of the customer contract based on the terms of our commission arrangements.

Research and Development Expenses

Research and development expenses consist primarily of personnel and related costs, including salaries, benefits, bonuses, and stock-based compensation; costs of server usage by our developers; information technology costs; and facility costs.

Table of Contents

General and Administrative Expenses

General and administrative expenses consist primarily of personnel and related costs for our executive, finance, legal, human resources, and administrative personnel, including salaries, benefits, bonuses, and stock-based compensation; legal, accounting, and other professional service fees; other corporate expenses; information technology costs; and facility costs.

Income Taxes

Prior to our conversion to a corporation on December 10, 2014, we were organized as a limited liability company, and therefore, as a pass-through entity for income tax purposes. Effective upon the corporate conversion, we became a corporation subject to federal, state and foreign income taxes.

Results of Operations

The following table sets forth selected consolidated statement of operations data for each of the periods indicated:

	Three months ended March 31,

Table of Contents

Comparison of Three Months Ended March 31, 2015 and 2014

Revenue

	Three months ended March 31, 2015	2014	Period-to-period change Amount	% Change
--	--------------------------------------	------	-----------------------------------	----------

(dollars in thousands)

Revenue

Subscription and support	\$26,269	\$20,648	\$5,621	27.2%
Professional services	8,885	7,484	1,401	18.7%
Total revenue	\$35,154	\$28,132	\$7,022	25.0%

Total revenue increased \$7.0 million for the three months ended March 31, 2015 compared to the three months ended March 31, 2014 due primarily to a \$5.6 million increase in subscription and support revenue. Of the total increase in subscription and support revenue, 65.4% represented revenue from new customers acquired after March 31, 2014 and 34.6% represented revenue from existing customers at or prior to March 31, 2014. The total number of our customers increased 14.9% from March 31, 2014 to March 31, 2015.

Cost of Revenue

	Three months ended March 31, 2015	2014	Period-to-period change Amount	% Change
--	--------------------------------------	------	-----------------------------------	----------

(dollars in thousands)

Cost of revenue

Subscription and support	\$5,885	\$4,669	\$1,216	26.0%
Professional services	3,777	2,798	979	35.0%
Total cost of revenue	\$9,662	\$7,467	\$2,195	29.4%

Cost of revenue increased \$2.2 million during the three months ended March 31, 2015 compared to the three months ended March 31, 2014, attributable primarily to increased employee compensation, benefits and travel costs of \$2.4 million, offset partially by a decrease of stock-based compensation of \$0.2 million. Headcount growth in the customer success and professional services teams was the primary driver of these personnel-related costs. In anticipation of seasonal demand for professional services in the first quarter of 2015, we increased hiring and training in the second half of 2014 with the goal of maintaining a more sustainable utilization rate. The decrease in stock-based compensation was attributable primarily to a one-time grant of stock options with immediate vesting in January 2014.

Table of Contents

Operating Expenses

	Three months ended March 31,		Period-to-period change	
	2015	2014	Amount	% Change
	(dollars in thousands)			
Operating expenses				
Research and development	\$12,008	\$10,287	\$1,721	16.7%
Sales and marketing	13,705	10,440	3,265	31.3%
General and administrative	6,734	4,228	2,506	59.3%
Total operating expenses	\$32,447	\$24,955	\$7,492	30.0%

Research and Development

Research and development expenses increased \$1.7 million during the three months ended March 31, 2015 compared to the three months ended March 31, 2014, due primarily to increased employee compensation, benefits, and travel costs of \$2.2 million offset by a decrease in stock-based compensation of \$0.4 million. The increase in personnel-related costs was driven primarily by an increase in headcount in research and development, while the decrease in stock-based compensation was attributable primarily to a one-time grant of stock options with immediate vesting in January 2014.

Sales and Marketing

Sales and marketing expenses increased \$3.3 million during the three months ended March 31, 2015 compared to the three months ended March 31, 2014, due primarily to the expansion of our sales and marketing team and increases in marketing programs. Employee compensation, benefits, and travel costs rose \$2.5 million due primarily to higher headcount in sales and marketing. In addition, other costs to support our salesforce accounted for \$0.5 million of the increase.

General and Administrative

General and administrative expenses increased \$2.5 million during the three months ended March 31, 2015 compared to the three months ended March 31, 2014, due primarily to an increase in employee compensation, benefits, and travel costs of \$0.7 million and additional stock-based compensation of \$0.8 million. The increase in personnel-related costs was driven primarily by a rise in total headcount in general and administrative to support the growth of our business. In addition, outside service fees increased \$0.8 million due primarily to increased accounting fees and insurance coverage requirements due to operating as a public company.

Table of Contents

Liquidity and Capital Resources

	Three months ended March 31,	
	2015	2014
	(in thousands)	
Cash flow provided by (used in) operating activities	\$ (9,229	) \$ 1,546
Cash flow used in investing activities	(954	) (1,768
Cash flow provided by (used in) financing activities	(1,083	) 1,939
Net increase (decrease) in cash and equivalents, net of impact on exchange rates	\$ (11,238	) \$ 1,742

As of March 31, 2015, our cash and cash equivalents totaled \$89.9 million. To date, we have financed our operations primarily through the proceeds of our initial public offering, private placements of preferred units, debt that was settled in preferred units and cash from operating activities. We have generated significant operating losses and negative cash flows from operating activities as reflected in our accumulated deficit and consolidated statements of cash flows. We expect to continue to incur operating losses and have negative cash flows from operations in the future and may require additional capital resources to continue to grow our business. We believe that current cash and cash equivalents, cash to be received from existing and new customers, and availability under our credit facility will be sufficient to fund our operations for at least the next twelve months.

In August 2014, we entered into a \$15.0 million credit facility with Silicon Valley Bank. Borrowing capacity is equal to the most recent month's subscription and support revenue multiplied by a percentage that adjusts based on the prior quarter's customer retention rate. The credit facility can be used to fund working capital and general business requirements and matures in August 2016. The credit facility is secured by all of our assets, has first priority over our other debt obligations, and requires us to maintain certain financial covenants, including the maintenance of at least \$5.0 million of cash on hand or unused borrowing capacity. The credit facility contains certain restrictive covenants that limit our ability to transfer or dispose of assets, merge with other companies or consummate certain changes of control, acquire other companies, pay dividends, incur additional indebtedness and liens, experience changes in management and enter into new businesses. We amended the credit facility in February 2015 to reduce the borrowing rate to prime. No amount was outstanding under the credit facility as of March 31, 2015.

Pursuant to the credit facility, letters of credit totaling \$2.3 million and \$4.3 million were outstanding at March 31, 2015 and December 31, 2014, respectively. These letters of credit, which do not reduce availability under the credit facility, were issued as security for a forgivable loan. A \$2.0 million letter of credit was canceled in the first quarter of 2015, as one of the forgivable loans was repaid in December 2014 with the proceeds of our initial public offering.

Operating Activities

For the three months ended March 31, 2015, cash used in operating activities was \$9.2 million. The primary factors affecting our operating cash flows during the period were our net loss of \$7.4 million, adjusted for non-cash charges of \$1.2 million for depreciation and amortization of our property and equipment and intangible assets and \$2.2 million of stock-based compensation. The primary drivers of the changes in operating assets and liabilities were a \$0.7 million decrease in deferred revenue, a \$3.9 million decrease in accrued expenses and other liabilities and a \$0.9 million increase in accounts receivable. The decrease in deferred revenue was attributable in part to recognition of professional services upon completion during the three months ended March 31, 2015 that were previously deferred at December 31, 2014. In addition, reduced incentives for customers to sign multi-year prepayment agreements resulted in an expected decline in cash

Table of Contents

generated from long term prepayments, a trend that we expect to continue. The increase in accounts receivable was primarily attributable to the timing of our billings and cash collections, while the decrease in accrued expenses and other was attributable primarily to the timing of our cash payments including payment of annual bonuses and remaining fees related to our initial public offering.

For the three months ended March 31, 2014, cash provided by operating activities was \$1.5 million. The primary factors affecting our operating cash flows during this period were our net loss of \$4.6 million, adjusted for non-cash charges of \$0.8 million for depreciation and amortization of our property and equipment and intangible assets and \$2.0 million of stock-based compensation. The primary drivers of the changes in operating assets and liabilities were a \$1.4 million decrease in accrued expenses and other liabilities, a \$0.8 million increase in prepaid expenses and other assets and a \$2.4 million decrease in accounts payable, offset by a \$7.2 million increase in deferred revenue. The increase in deferred revenue was attributable primarily to overall increases in the average length of our customer contracts. The decrease in accounts payable and accrued expenses and other liabilities were attributable primarily to the timing of our cash payments including payment of annual bonuses. The increase in prepaid expenses and other assets was attributable primarily to purchasing additional subscriptions to cloud-based software to support business growth.

Investing Activities

Cash used in investing activities of \$1.0 million for the three months ended March 31, 2015 was due primarily to \$0.9 million of capital expenditures. Our capital expenditures were associated primarily with leasehold improvements and furniture and fixtures in support of expanding our infrastructure and work force.

Cash used in investing activities of \$1.8 million for the three months ended March 31, 2014 was due primarily to \$1.8 million of capital expenditures. Our capital expenditures were associated primarily with leasehold improvements, building costs under our build-to-suit lease arrangement, computer equipment, and furniture and fixtures in support of expanding our infrastructure and work force.

Financing Activities

Cash used in financing activities of \$1.1 million for the three months ended March 31, 2015 was due primarily to \$1.1 million in payments of issuance costs related to our initial public offering and \$0.7 million in repayments on long-term debt and payments on capital lease and financing obligations.

Cash provided by financing activities of \$1.9 million for the three months ended March 31, 2014 was due primarily to \$2.0 million in proceeds from a government grant awarded in December 2013.

Table of Contents

Contractual Obligations and Commitments

There were no material changes in our contractual obligations and commitments from those disclosed in the Annual Report on Form 10-K for the year ended December 31, 2014 filed with the SEC on March 11, 2015.

Off-Balance Sheet Arrangements

During the three months ended March 31, 2015 we did not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. As a result, we are not exposed to any financing, liquidity, market or credit risk that could arise if we had engaged in those types of relationships.

Critical Accounting Policies and Estimates

Our condensed consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States. The preparation of these condensed consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, costs and expenses, income taxes and related disclosures. On an ongoing basis, we evaluate our estimates and assumptions. Our actual results may differ from these estimates under different assumptions or conditions.

During the three months ended March 31, 2015, there were no significant changes to our critical accounting policies and estimates as described in financial statements contained in the Annual Report on Form 10-K for the year ended December 31, 2014 filed with the SEC on March 11, 2015.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

For quantitative and qualitative disclosures about market risk, see Item 7A, “Quantitative and Qualitative Disclosures About Market Risk” of our Annual Report on Form 10-K for the year ended December 31, 2014. Our exposures to market risk have not changed materially since December 31, 2014.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our principal executive officer and principal financial officer, our management conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, as of the end of the period covered by this report. Our disclosure controls and procedures are intended to provide assurance at a reasonable level that the information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures.

In designing and evaluating our disclosure controls and procedures, management recognizes that any disclosure controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures must reflect the fact that there are resource constraints and that management is required to apply its judgment in evaluating the benefits of possible controls and procedures relative to their costs.

Table of Contents

Based on management's evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures are designed to, and are effective to, provide assurance at a reasonable level that the information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures.

Changes in Internal Control Over Financial Reporting

As disclosed in our Annual Report on Form 10-K for the year ended December 31, 2014, our management evaluated and concluded that our disclosure controls and procedures were ineffective as of December 31, 2014 due to the identification of a material weakness in our internal controls over financial reporting related to our accounting for government grants.

Since December 31, 2014, with the oversight of senior management and our audit committee, we have taken steps to remediate the underlying causes of the identified material weakness, primarily through the performance of a risk assessment process; the development and implementation of formally documented policies and procedures; improved processes and control activities; and the hiring of additional finance personnel.

We believe that our remediation measures and our continuing plan have remediated the material weakness and management concluded that our disclosure controls and procedures are effective as of March 31, 2015.

Part II. Other Information

Item 1. Legal Proceedings

From time to time we may become involved in legal proceedings or be subject to claims arising in the ordinary course of our business. We are not presently a party to any legal proceedings that in the opinion of our management, if determined adversely to us, would have a material adverse effect on our business, financial condition, operating results or cash flows. Regardless of the outcome, litigation can have an adverse impact on us because of defense and settlement costs, diversion of management resources and other factors.

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, “Item 1A. Risk Factors” in our 2014 Annual Report on Form 10-K, which could materially affect our business, financial condition or future results. Other than the item noted below, there have been no material changes during fiscal 2015 to the risk factors that were included in the Form 10-K.

Risks Related to Ownership of Our Class A Common Stock

We have previously identified material weaknesses in our internal control over financial reporting, and any inability to maintain effective internal control over financial reporting could have a material adverse effect on our business. During the course of preparing for our initial public offering, we determined that it was appropriate to restate our audited consolidated financial statements for the year ended December 31, 2013 to revise our method of accounting for a forgivable loan arrangement. In connection with this restatement, we, in conjunction with our independent registered public accounting firm, concluded that a lack of adequate controls surrounding the review and recognition of forgivable loan arrangements constituted a material weakness in our internal control over financial reporting. Subsequently, during the course of preparing our audited consolidated financial statements for the year ended December 31, 2014, we identified and corrected an immaterial error in our prior period accounting for reimbursements received pursuant to a government jobs training program. In connection with the correction of this immaterial error, we, in conjunction with our independent registered public accounting firm, concluded that a lack of adequate controls surrounding the review and evaluation of accounting for government grant arrangements constituted a material weakness in our internal control over financial reporting. As a result of the identification of these material weaknesses, we have implemented measures designed to improve our internal control over financial reporting. While we believe that these measures have remediated the previously identified material weaknesses and our management has concluded that our disclosure controls and procedures are effective as of March 31, 2015, we cannot be certain that these efforts will be sufficient to prevent future material weaknesses or significant deficiencies from occurring.

Item 2. Unregistered Sales of Securities and Use of Proceeds

Sales of Unregistered Securities

Not applicable.

Use of Proceeds from Public Offerings of Common Stock

On December 17, 2014, we closed our initial public offering of 7,200,000 shares of Class A common stock at a price to the public of \$14.00 per share. The offer and sale of all of the shares in the initial public offering were registered under the Securities Act pursuant to a registration statement on Form S-1 (File No. 333-199459), which was declared effective by the SEC on December 11, 2014. The offering commenced on December 12, 2014 and closed on December 17, 2014. Morgan Stanley & Co. LLC, Credit Suisse Securities (USA) LLC, Robert W. Baird & Co. Incorporated, Raymond James & Associates, Inc., and Stifel, Nicolaus & Company, Incorporated acted as the underwriters. The aggregate offering price for shares sold in the offering was approximately \$100.8 million. We raised approximately \$90.4 million in net proceeds from the offering, after deducting underwriter discounts and commissions of approximately \$7.1 million and other offering expenses of approximately \$3.3 million.

There has been no material change in the planned use of proceeds from our initial public offering as described in our final prospectus filed with the SEC pursuant to Rule 424(b) under the Securities Act on December 12, 2014. Pending the uses described in our prospectus, we have invested the net proceeds in money market funds. We have also repaid a \$2.0 million forgivable loan with proceeds from our initial public offering, allowing us to cancel letters of credit totaling that served as security for the forgivable loan.
