

NEPHROS INC  
Form 424B3  
November 13, 2017

**Prospectus Supplement Filed Pursuant to Rule 424(b)(3)**

**Registration No. 333-217318**

**PROSPECTUS SUPPLEMENT NO. 3 DATED november 13, 2017**

**(To Prospectus Dated April 26, 2017)**

**NEPHROS, INC.**

This is a supplement (“Prospectus Supplement No. 3”) to our prospectus, dated April 26, 2017 (the “Prospectus”), relating to up to 8,441,187 shares of our common stock, of which 4,381,193 are issuable upon the exercise of outstanding warrants.

This Prospectus Supplement No. 3 is not complete without, and may not be delivered or utilized except in connection with, the Prospectus, including any amendments or supplements thereto.

**Quarterly Report on Form 10-Q for the Quarter Ended September 30, 2017**

On November 9, 2017, we filed with the Securities and Exchange Commission a quarterly report on Form 10-Q for the quarter ended September 30, 2017 (the “Form 10-Q”). The Form 10-Q, as filed (but without the exhibits filed with the Form 10-Q), is set forth below.

Additionally, the table under the heading “Selling Stockholders” on page 23 of the prospectus inadvertently identified that Joseph Schueller is offering 50,000 shares issuable upon the exercise of warrants. Mr. Schueller is in fact offering 100,000 shares issuable upon the exercise of warrants. The following amends and restates the disclosure for Mr. Schueller in such table and the related footnotes. All other information in such table and the related footnotes remains unchanged.

<b>Selling Stockholder</b>	<b>Shares beneficially owned before offering (1)</b>	<b>Number of outstanding shares offered by stockholder</b>	<b>Number of shares offered by selling stockholder upon exercise of warrants</b>	<b>Beneficial ownership after offering (1) Number of shares</b>	<b>Percent</b>
Joseph Schueller (19)	654,893	100,000	100,000	454,893	*

(1) Beneficial ownership is determined in accordance with Rule 13d-3 under the Exchange Act, and includes any shares as to which the security or stockholder has sole or shared voting power or investment power, and also any shares which the security or stockholder has the right to acquire within 60 days of the date hereof, whether through the exercise or conversion of any stock option, convertible security, warrant or other right. The indication herein that shares are beneficially owned is not an admission on the part of the security or stockholder that he, she or it is a direct or indirect beneficial owner of those shares. Percentage of shares beneficially owned after the resale of all the shares offered by this prospectus assumes there are outstanding 58,541,741 shares of common stock, including all shares offered hereby that are issuable upon exercise of warrants.

(19) In addition to the shares offered hereby, beneficial ownership also includes 354,893 shares of our common stock and warrants to purchase 100,000 shares of our common stock.

The information contained in this Prospectus Supplement No. 3 supplements and supersedes, in relevant part, the information contained in the Prospectus, as amended and supplemented. This Prospectus Supplement No. 3 is incorporated by reference into, and should be read in conjunction with, the Prospectus, as amended and supplemented, and is not complete without, and may not be delivered or utilized except in connection with, the Prospectus, as amended and supplemented.

All references in the Prospectus to “this prospectus” are amended to read “this prospectus (as supplemented and amended).”

**Investing in our common stock involves substantial risks. See “Risk Factors” beginning on page 8 of the Prospectus to read about important factors you should consider before purchasing our common stock.**

**Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or passed upon the adequacy or accuracy of this prospectus SUPPLEMENT NO. 3. Any representation to the contrary is a criminal offense.**

The date of this Prospectus Supplement No. 3 is November 13, 2017

## **NEPHROS, INC. AND SUBSIDIARY**

### **NOTES TO UNAUDITED CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

#### **Note 1 - Organization and Nature of Operations**

Nephros, Inc. (“Nephros” or the “Company”) was incorporated under the laws of the State of Delaware on April 3, 1997. Nephros was founded by health professionals, scientists and engineers affiliated with Columbia University to develop advanced End Stage Renal Disease (“ESRD”) therapy technology and products. The Company has two products in the hemodiafiltration (“HDF”) modality to deliver therapy for ESRD patients. These are the OLpūr mid-dilution HDF filter or “dialyzer,” designed expressly for HDF therapy, and the OLpūr H2H HDF module, an add-on module designed to allow the most common types of hemodialysis machines to be used for HDF therapy.

In 2009, the Company expanded into ultrapure water filtration products as a complement to the ESRD therapy business, introducing its proprietary dual stage ultrafilter architecture. The company has since introduced a variety of ultrafiltration and microfiltration products that address water quality and infection control in both medical and commercial applications.

The Company is currently headquartered at 41 Grand Avenue, River Edge, New Jersey 07661, which houses the Company’s executive offices and research facilities, and has a subsidiary, Nephros International Limited, in Dublin, Ireland.

#### **Note 2 - Basis of Presentation and Going Concern**

##### **Interim Financial Information**

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 8 and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for annual financial statements. Results for the period ended September 30, 2017 are not necessarily indicative of the results that may be expected for the year ending December

31, 2017.

The condensed consolidated financial statements and notes thereto should be read in conjunction with the consolidated financial statements and notes for the year ended December 31, 2016 included in the Company's Annual Report on Form 10-K.

### **Use of Estimates**

The preparation of consolidated financial statements in conformity with generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities, at the date of the financial statements, and the reported amount of revenues and expenses, during the reporting period. Actual results could differ materially from those estimates. Included in these estimates are assumptions about the collection of accounts receivable, value of inventories, useful life of fixed assets and intangible assets, assumptions used in determining stock compensation such as expected volatility and risk-free interest rate and the ability of the Company to continue as a going concern.

### **Going Concern**

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. The Company's recurring losses and inability to generate sufficient cash flow to meet its obligations and sustain its operations raise substantial doubt about its ability to continue as a going concern. The Company's consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

To support the Company's cash needs, management entered into a \$1,000,000 secured revolving credit facility with a commercial lender. In addition, the Company has received approval to sell a portion of its New Jersey net operating loss and research and development tax credits through a program administered by the New Jersey Economic Development Authority ("NJEDA"), which the Company anticipates will result in cash proceeds of over \$1.75 million during the fourth quarter of 2017. Based on the Company's existing cash balances, its current cash flow projections, including projected increases in product sales from the launch of new products, and the anticipated proceeds from the NJEDA tax credit program, the Company believes it will have sufficient cash resources to fund its operations through the first half of 2018, if not longer. The Company's financial projections are subject to a number of uncertainties, including the timing and market acceptance of the Company's new products and the Company's ability to obtain the planned proceeds from the NJEDA tax credit program. There can be no assurance that any of such events will occur, or that the Company's future cash flow will be sufficient to meet its obligations and commitments. If the Company is unable to generate sufficient cash flow from operations in the future to meet its operating requirements and other commitments or obtain the anticipated proceeds from the NJEDA tax credit program, the Company will be required to adopt alternatives, such as seeking to raise debt or equity capital, curtailing its planned activities or ceasing its operations. There can be no assurance that any such actions could be effected on a timely basis or on satisfactory

terms or at all, or that these actions would enable the Company to continue to satisfy its capital requirements.

**NEPHROS, INC. AND SUBSIDIARY**

**NOTES TO UNAUDITED CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

**Note 3 - Major Customers and Concentration of Credit Risk**

For the three months ended September 30, 2017 and 2016, the following customers accounted for the following percentages of the Company's revenues, respectively:

Customer	2017	2016
A	14 %	11 %
B	14 %	11 %
C	12 %	17 %
D	8 %	16 %

For the nine months ended September 30, 2017 and 2016, the following customers accounted for the following percentages of the Company's revenues, respectively:

Customer	2017	2016
A	18 %	14 %
B	13 %	20 %
C	12 %	9 %

As of September 30, 2017 and December 31, 2016, the following customers accounted for the following percentages of the Company's accounts receivable, respectively:

Customer	2017	2016
A	16 %	6 %
B	13 %	36 %
C	1 %	12 %

The Company provides credit terms to customers in connection with purchases of the Company's products. Management periodically reviews customer account activity in order to assess the adequacy of the allowances provided for potential collection issues and returns. Adjustments, if any, are made to reserve balances following the completion of these reviews to reflect management's best estimate of potential losses. The allowance for doubtful accounts was approximately \$2,000 and \$50,000 as of September 30, 2017 and December 31, 2016, respectively.

#### **Note 4 - Revenue Recognition**

Revenue is recognized in accordance with Accounting Standards Codification ("ASC") Topic 605. Four basic criteria must be met before revenue can be recognized: (i) persuasive evidence that an arrangement exists; (ii) delivery has occurred or services have been rendered; (iii) the fee is fixed or determinable; and (iv) collectability is reasonably assured.

The Company recognizes revenue related to product sales when product is shipped via external logistics provider and the other criteria of ASC Topic 605 are met. Product revenue is recorded net of returns and allowances. Shipments for all products are currently received directly by the Company's customers.

#### **License Agreement Revenue**

Deferred revenue was approximately \$295,000 and \$348,000 on the accompanying condensed consolidated balance sheets as of September 30, 2017 and December 31, 2016, respectively, and is related to the Company's License Agreement with Bellco (see Note 14, below), which is being deferred over the remainder of the expected obligation period. The Company has recognized approximately \$2,781,000 of revenue related to the Bellco License Agreement to date and approximately \$18,000 and \$53,000 for the three and nine months ended September 30, 2017, respectively. The Company recognized approximately \$17,000 and \$52,000 of revenue related to this License Agreement for the three and nine months ended September 30, 2016, respectively. Approximately \$17,000 of revenue will be recognized in the remaining three months of fiscal 2017 and approximately \$69,500 of revenue will be recognized in each of the years ended December 31, 2018 through 2021.

**NEPHROS, INC. AND SUBSIDIARY**

**NOTES TO UNAUDITED CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

For the three months ended September 30, 2017 and 2016, the Company recognized royalty revenue from Bellco of approximately \$57,000 and \$27,000, respectively. For the nine months ended September 30, 2017 and 2016, the Company recognized royalty revenue from Bellco of approximately \$115,000 and \$84,000, respectively.

See Note 14, Commitments and Contingencies, for further discussion of the Bellco License Agreement.

**Note 5 - Fair Value of Financial Instruments**

The carrying amounts of cash, accounts receivable, accounts payable and accrued expenses approximate fair value due to the short-term maturity of these instruments.

The carrying value of the investment in lease, net, approximates fair value as of September 30, 2017.

**Note 6 - Stock Plans and Share-Based Payments**

**Stock Options**

The Company accounts for stock option grants to employees and non-employee directors under the provisions of ASC 718, Stock Compensation. ASC 718 requires the recognition of the fair value of stock-based compensation in the statement of operations. In addition, the Company accounts for stock option grants to consultants under the provisions of ASC 505-50, and as such, these stock options are revalued at each reporting period through the vesting period.

During the three and nine months ended September 30, 2017, the Company granted stock options to purchase 90,000 shares and 1,088,280 shares, respectively, of common stock to employees. These stock options will be expensed over their respective applicable vesting periods, which are based on service conditions and, for one grant, on performance conditions. The fair value of all stock-based awards granted during the three months ended September 30, 2017 was approximately \$20,000. The fair value of all stock-based awards granted during the nine months ended September 30, 2017 was approximately \$341,000.

The fair value of stock-based awards is amortized over the vesting period of the award. For stock-based awards that vest based on performance conditions (e.g., achievement of certain milestones), expense is recognized when it is probable that the condition will be met. The fair value of each option grant is estimated on the date of grant using the Black-Scholes option pricing model. The below weighted average assumptions for the risk-free interest rates, expected dividend yield, expected lives and expected stock price volatility were used for the awards granted during the nine months ended September 30, 2017.

Assumptions for Option Grants	Nine Months Ended September 30, 2017	
Stock Price Volatility	107.7	%
Risk-Free Interest Rates	2.04	%
Expected Life (in years)	6.03	
Expected Dividend Yield	-	%

The Company calculates expected volatility for a stock-based grant based on historic monthly common stock price observations during the period immediately preceding the grant that is equal in length to the expected term of the grant. With respect to grants of options, the risk free rate of interest is based on the U.S. Treasury rates appropriate for the expected term of the grant. As a result of adopting ASU 2016-09, the Company has elected to recognize forfeitures as they occur.

### Stock-Based Compensation

Stock-based compensation expense was approximately \$110,000 and \$104,000 for the three months ended September 30, 2017 and 2016, respectively. For the three months ended September 30, 2017, approximately \$103,000 and approximately \$7,000 are included in Selling, General and Administrative expenses and Research and Development expenses, respectively, on the accompanying condensed consolidated statement of operations and comprehensive loss. For the three months ended September 30, 2016, approximately \$97,000 and approximately \$7,000 are included in Selling, General and Administrative expenses and Research and Development expenses, respectively, on the accompanying condensed consolidated statements of operations and comprehensive loss.

**NEPHROS, INC. AND SUBSIDIARY**

**NOTES TO UNAUDITED CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

**Stock-Based Compensation Related to Stock Options for the Nine Months Ended September 30, 2017**

Stock-based compensation expense was approximately \$323,000 and \$299,000 for the nine months ended September 30, 2017 and 2016, respectively. For the nine months ended September 30, 2017, approximately \$299,000 and approximately \$24,000 are included in Selling, General and Administrative expenses and Research and Development expenses, respectively, on the accompanying condensed consolidated statement of operations and comprehensive loss. For the nine months ended September 30, 2016, approximately \$277,000 and approximately \$22,000 are included in Selling, General and Administrative expenses and Research and Development expenses, respectively, on the accompanying condensed consolidated statements of operations and comprehensive loss.

There was no tax benefit related to expense recognized in the nine months ended September 30, 2017 and 2016, as the Company is in a net operating loss position. As of September 30, 2017, there was approximately \$997,000 of total unrecognized compensation cost related to unvested share-based compensation awards granted under the equity compensation plans. Approximately \$230,000 of the \$997,000 total unrecognized compensation will be recognized at the time that certain performance conditions are met. The remaining unrecognized compensation expense of approximately \$767,000 will be amortized over the weighted average remaining requisite service period of 1.8 years. Such amount does not include the effect of future grants of equity compensation, if any.

**Restricted Stock**

During the nine months ended September 30, 2017, the Company issued 17,756 shares of restricted stock as compensation for services to its Chief Executive Officer in consideration of deferred cash salary of \$7,000. The grant date fair value of the outstanding restricted stock awards was approximately \$7,000.

Total stock-based compensation expense for restricted stock grants was approximately \$3,000 and \$110,000 for the three months ended September 30, 2017 and 2016, respectively, and is included in Selling, General and Administrative expenses on the accompanying condensed consolidated statements of operations and comprehensive loss.

Total stock-based compensation expense for restricted stock grants was approximately \$185,000 and \$189,000 for the nine months ended September 30, 2017 and 2016, respectively, and is included in Selling, General and Administrative expenses on the accompanying condensed consolidated statements of operations and comprehensive loss.

For the three and nine months ended September 30, 2016, approximately \$46,000 of the total stock-based compensation expense recognized for restricted stock grants was related to payment for non-employee services rendered during the respective periods.

As of September 30, 2017, there was no unrecognized compensation expense related to the restricted stock awards.

#### **Note 7 - Warrants**

There were no warrants exercised during the nine months ended September 30, 2017. For the nine months ended September 30, 2016, 19,621 warrants were exercised, resulting in proceeds of approximately \$1,000 and the issuance of 906 shares of the Company's common stock.

#### **Note 8 - Net Income (Loss) per Common Share**

Basic income (loss) per common share is calculated by dividing net income (loss) available to common shareholders by the number of weighted average common shares issued and outstanding. Diluted earnings (loss) per common share is calculated by dividing net income (loss) available to common shareholders, adjusted for the change in the fair value of the warrant liability by the weighted average number of common shares issued and outstanding for the period, plus amounts representing the dilutive effect from the exercise of stock options and warrants, as applicable. The Company calculates dilutive potential common shares using the treasury stock method, which assumes the Company will use the proceeds from the exercise of stock options and warrants to repurchase shares of common stock to hold in its treasury stock reserves.

**NEPHROS, INC. AND SUBSIDIARY****NOTES TO UNAUDITED CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

The following potentially dilutive securities have been excluded from the computations of diluted weighted average shares outstanding as they would be anti-dilutive:

	September 30,	
	2017	2016
Shares underlying warrants outstanding	7,432,342	3,291,149
Shares underlying options outstanding	5,549,015	4,418,160
Unvested restricted stock	-	390,625

**Note 9 – Recent Accounting Pronouncements****Recently Adopted Accounting Pronouncements**

In July 2015, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2015-11, “Simplifying the Measurement of Inventory,” that requires inventory be measured at the lower of cost and net realizable value and options that currently exist for market value be eliminated. The standard defines net realizable value as estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation and is effective for fiscal years beginning after December 15, 2016 and interim periods within those fiscal years with early adoption permitted. The guidance should be applied prospectively. The Company adopted ASU 2015-11 during the three months ended March 31, 2017 and the adoption of this guidance did not have a significant impact on the Company’s consolidated financial statements.

In November 2015, the FASB issued ASU No. 2015-17, “Balance Sheet Classification of Deferred Taxes,” that requires that deferred tax liabilities and assets be classified as noncurrent in a classified statement of financial position. The current requirement that deferred tax liabilities and assets of a tax-paying component of an entity be offset and presented as a single amount is not affected by this amendment. The new guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016. Early adoption was permitted and the standard may be applied either retrospectively or on a prospective basis to all deferred tax assets and liabilities. The Company adopted ASU 2015-17 during the three months ended March 31, 2017 and the adoption of this guidance did not have a

significant impact on the Company's consolidated financial statements.

In March 2016, the FASB issued ASU No. 2016-09, "Improvements to Employee Share-Based Payment Accounting," which simplifies several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. The guidance was effective for the Company beginning in the first quarter of fiscal year 2017. Early adoption was permitted. The Company adopted ASU 2016-09 during the three months ended March 31, 2017 and elected to recognize forfeitures as they occur. Prior to the adoption of ASU 2016-09, the Company recognized stock-based compensation based on the estimated fair value of the award, net of expected forfeitures. As of January 1, 2017, a cumulative effect adjustment of approximately \$12,000 was recognized to reflect the forfeiture rate that had been applied to unvested option awards prior to fiscal year 2017.

### **Recent Accounting Pronouncements, Not Yet Effective**

In May 2014, the FASB issued ASU 2014-09, "Revenue from Contracts with Customers," related to revenue recognition. The underlying principle of the new standard is that a business or other organization will recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects what it expects to be entitled to in exchange for the goods or services. The standard also requires more detailed disclosures and provides additional guidance for transactions that were not addressed completely in prior accounting guidance. ASU 2014-09 provides alternative methods of initial adoption, and was to be effective for fiscal years beginning after December 15, 2016, and interim periods within those annual periods. Early adoption was not permitted. In August 2015, the FASB issued ASU No. 2015-14, "Revenue from Contracts with Customers: Deferral of the Effective Date." The amendment in this ASU defers the effective date of ASU No. 2014-09 for all entities for one year. Public business entities, certain not-for-profit entities, and certain employee benefit plans should apply the guidance in ASU 2014-09 to fiscal years beginning after December 15, 2017, including interim reporting periods within that fiscal year. Earlier application is permitted only as of fiscal years beginning after December 31, 2016, including interim reporting periods with that fiscal year. The Company is currently reviewing the revised guidance and assessing the potential impact on its consolidated financial statements.

**NEPHROS, INC. AND SUBSIDIARY**

**NOTES TO UNAUDITED CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

In January 2016, the FASB issued ASU No. 2016-01, “Recognition and Measurement of Financial Assets and Financial Liabilities,” that modifies certain aspects of the recognition, measurement, presentation, and disclosure of financial instruments. The accounting standard update is effective for fiscal years, and interim periods within those years, beginning after December 15, 2017, and early adoption is permitted. The Company is currently assessing the impact that adopting this new accounting guidance will have on its consolidated financial statements.

In February 2016, the FASB issued ASU No. 2016-02, “Leases”, that discusses how an entity should account for lease assets and lease liabilities. The guidance specifies that an entity who is a lessee under lease agreements should recognize lease assets and lease liabilities for those leases classified as operating leases under previous FASB guidance. Accounting for leases by lessors is largely unchanged under the new guidance. The guidance is effective for the Company beginning in the first quarter of 2019. Early adoption is permitted. In transition, lessees and lessors are required to recognize and measure leases at the beginning of the earliest period presented using a modified retrospective approach. The Company is assessing the impact of adopting this guidance on its consolidated financial statements.

In March 2016, the FASB issued ASU 2016-08, “Principal versus Agent Considerations (Reporting Revenue Gross versus Net),” which clarifies the implementation guidance on principal versus agent considerations. The amendments in this update do not change the core principle of ASU 2014-09. The effective date and transition requirements for the amendments in this update are the same as the effective date and transition requirements of ASU 2014-09. As discussed above, ASU 2015-14 defers the effective date of ASU 2014-09 by one year. The Company is assessing the impact that adopting this new accounting guidance will have on its consolidated financial statements.

In April 2016, the FASB issued ASU 2016-10, “Identifying Performance Obligations and Licensing,” which clarifies the implementation guidance for performance obligations and licensing. The amendments in this update do not change the core principle of ASU 2014-09. The effective date and transition requirements for the amendments in this update are the same as the effective date and transition requirements of ASU 2014-09. As discussed above, ASU 2015-14 defers the effective date of ASU 2014-09 by one year. The Company is currently assessing the impact that adopting this new accounting guidance will have on its consolidated financial statements.

In May 2016, the FASB issued ASU 2016-12, “Narrow Scope Improvements and Practical Expedients,” which clarifies the accounting for certain aspects of guidance issued in ASU 2014-09, including assessing collectability and noncash

consideration. The clarifications in this update do not change the core principle of ASU 2014-09. The effective date and transition requirements for the amendments in this update are the same as the effective date and transition requirements of ASU 2014-09. As discussed above, ASU 2015-14 defers the effective date of ASU 2014-09 by one year. The Company is currently assessing the impact that adopting this new accounting guidance will have on its consolidated financial statements.

In June 2016, the FASB issued ASU 2016-13, “Measurement of Credit Losses on Financial Instruments,” which replaces the incurred loss impairment methodology in current GAAP with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates. The guidance is effective for the Company beginning in the first quarter of fiscal year 2020. Early adoption is permitted beginning in the first quarter of fiscal year 2019. The Company is assessing the impact of adopting this guidance on its consolidated financial statements.

In August 2016, the FASB issued ASU 2016-15, “Classification of Certain Cash Receipts and Cash Payments,” which clarifies how certain cash receipts and cash payments are presented and classified in the statement of cash flows in order to reduce diversity in practice. The guidance is effective for the Company beginning in the first quarter of fiscal year 2018. Early adoption is permitted. The Company is assessing the impact of adopting this guidance on its consolidated financial statements.

In November 2016, the FASB issued ASU 2016-17, “Restricted Cash,” which clarifies how restricted cash is presented and classified in the statement of cash flows. The guidance is effective for the Company beginning in the first quarter of fiscal year 2018. Early adoption is permitted. The Company is assessing the impact of adopting this guidance on its consolidated financial statements.

In January 2017, the FASB issued ASU 2017-01, “Clarifying the Definition of a Business,” which clarifies the definition of a business in a business combination. The guidance is effective for the Company beginning in the first quarter of fiscal year 2018. Early adoption is permitted. The Company is assessing the impact of adopting this guidance on its consolidated financial statements.

In January 2017, the FASB issued ASU 2017-04, “Simplifying the Test for Goodwill Impairment,” which simplifies the test for goodwill impairment. The guidance is effective for the Company beginning in the first quarter of fiscal year 2020. Early adoption is permitted for interim or annual goodwill impairments tests after January 1, 2017. The Company is assessing the impact of adopting this guidance on its consolidated financial statements.

**NEPHROS, INC. AND SUBSIDIARY****NOTES TO UNAUDITED CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

In May 2017, the FASB issued ASU 2017-09, “Scope of Modification Accounting,” which clarifies the application of stock based accounting guidance when a change is made to the terms or conditions of a share-based payment award. The guidance is effective for the Company beginning in the first quarter of fiscal year 2018. Early adoption is permitted. The Company is assessing the impact of adopting this guidance on its consolidated financial statements.

**Note 10 - Inventory, net**

Inventory is stated at the lower of cost or net realizable value using the standard cost method and consists of raw materials and finished goods. The Company’s inventory as of September 30, 2017 and December 31, 2016 was as follows:

	September 30, 2017 (Unaudited)	December 31, 2016 (Audited)
Finished goods	\$ 559,000	\$ 528,000
Raw materials	53,000	\$ 0
Less: inventory reserve	(31,000 )	(49,000 )
Total inventory, net	\$ 581,000	\$ 479,000

**Note 11 – Secured Revolving Credit Facility**

On August 17, 2017, the Company entered into a Loan and Security Agreement (the “Loan Agreement”) with Tech Capital, LLC (the “Lender”). The Loan Agreement provides for a secured asset-based revolving credit facility of up to \$1,000,000, which the Company may draw upon and repay from time to time during the term of the Loan Agreement (the “Credit Facility”). As of September 30, 2017, the principal balance of the Credit Facility was approximately \$563,000. The Company is using these proceeds for working capital and general corporate purposes.

The Loan Agreement has a term of 12 months, which will automatically renew for successive 12-month periods unless cancelled. Availability under the Credit Facility will be based upon periodic borrowing base certifications valuing certain of the Company's accounts receivable and inventory. Outstanding borrowings under the Credit Facility accrue interest, which shall be payable monthly based on the average daily outstanding balance, at a rate equal to 3.5% plus the prime rate per annum, provided that such prime rate shall not be less than 4.25% per annum. As of September 30, 2017, the current interest rate was 7.75% per annum.

The Company also granted to the Lender a first priority security interest in its assets, including its accounts receivable and inventory, to secure all of its obligations under the Credit Facility. In addition, Nephros International Limited, the Company's wholly-owned subsidiary, unconditionally guaranteed the Company's obligations under the Credit Facility.

In connection with the Loan Agreement, the Company incurred fees of approximately \$12,000 related to the issuance of the revolving credit facility. For the three and nine months ended September 30, 2017, approximately \$18,000 was recognized as interest expense on the condensed consolidated interim statement of operations and comprehensive loss, which includes the debt issuance costs of approximately \$12,000 in addition to interest expense incurred of approximately \$6,000 on the revolving facility. As of September 30, 2017, approximately \$3,000 of the \$6,000 of interest expense incurred is included in accrued expenses on the condensed consolidated interim balance sheet.

#### **Note 12 – Unsecured Promissory Notes and Warrants**

On June 7, 2016, the Company entered into a Note and Warrant Purchase Agreement (the "2016 Purchase Agreement") with certain accredited investors identified therein under which the Company issued and sold unsecured promissory notes ("Notes") and common stock warrants ("Warrants") resulting in total gross proceeds to the Company of approximately \$1,187,000 over multiple closings under the 2016 Purchase Agreement during June 2016. The outstanding principal under the Notes accrues interest at a rate of 11% per annum. The Company is required to make interest only payments on a semi-annual basis, and all outstanding principal under the Notes is repayable in cash in June 2019, the third anniversary of the date of issuance. In connection with the transactions contemplated by the 2016 Purchase Agreement, the Company incurred approximately \$13,000 in legal fees.

In addition to the Notes, the Company issued Warrants to purchase approximately 2.4 million shares of the Company's common stock to the Note investors. The Warrants are exercisable at \$0.30 per share for a period of 5 years from the issuance date. The Warrants issued under the 2016 Purchase Agreement are indexed to the Company's common stock, therefore, the Company is accounting for the Warrants as a component of equity.

**NEPHROS, INC. AND SUBSIDIARY**

**NOTES TO UNAUDITED CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

The approximately \$1,187,000 in gross proceeds from the 2016 Purchase Agreement, along with the legal fees of approximately \$13,000, were allocated between the Notes and Warrants based on their relative fair values. The portion of the gross proceeds allocated to the Warrants of approximately \$393,000 was accounted for as additional paid-in capital. Approximately \$4,000 of the legal fees were allocated to the Warrants and recorded as a reduction to additional paid-in capital. The remainder of the gross proceeds of approximately \$794,000, net of the remainder of the fees of approximately \$9,000, was allocated to the Notes with the fair value of the Warrants resulting in a debt discount. The debt discount is being amortized to interest expense using the effective interest method in accordance with ASC 835 over the term of the 2016 Purchase Agreement.

For the three and nine months ended September 30, 2017, approximately \$30,000 and \$84,000, respectively, was recognized as amortization of debt discount and is included in interest expense on the condensed consolidated interim statement of operations and comprehensive loss. Approximately \$23,000 and \$29,000 was recognized as amortization of debt discount during the three and nine months ended September 30, 2016, respectively, and is included in interest expense on the condensed consolidated interim statement of operations and comprehensive loss.

For the three and nine months ended September 30, 2017, approximately \$33,000 and \$99,000, respectively, of interest expense has been incurred related to the Notes. For the three and nine months ended September 30, 2016, approximately \$33,000 and \$43,000, respectively, of interest expense has been incurred related to the Notes. As of September 30, 2017, approximately \$45,000 is included in accrued expenses on the condensed consolidated interim balance sheet. As of September 30, 2017 and December 31, 2016, the portion of the outstanding Notes due to entities controlled by a member of management and to the majority shareholder amounted to \$30,000 and \$300,000, respectively.

**Note 13 – Stockholders' Equity**

**March 2017 Private Placement**

On March 22, 2017, the Company entered into a Securities Purchase Agreement with certain accredited investors identified therein pursuant to which the Company issued and sold in a private placement 4,059,994 units of its

securities resulting in gross proceeds to the Company of approximately \$1,218,000. Each unit consisted of one share of the Company's common stock and a five-year warrant to purchase one additional share of common stock. The purchase price for each unit was \$0.30. The warrants are exercisable at a price of \$0.30 per share and are indexed to the Company's common stock; therefore, the Company is accounting for the warrants as a component of equity. The portion of the gross proceeds received from certain members of management and existing shareholders amounted to \$315,000. Proceeds, net of equity issuance costs of \$152,000, recorded as a result of the private placement were approximately \$1,066,000. In addition to the equity issuance costs incurred as a result of the private placement, the Company also issued a warrant to purchase 81,199 shares of its common stock to the placement agent engaged in connection with the private placement. The form and terms of the placement agent warrant is substantially the same as the form of warrants issued to the investors under the Securities Purchase Agreement, except that the exercise price is \$0.33 per share.

### **July 2015 Purchase Agreement and Registration Rights Agreement**

On July 24, 2015, the Company entered into both a securities purchase agreement and registration rights agreement with Lincoln Park Capital Fund, LLC ("Lincoln Park"), an Illinois limited liability company. Under the terms and subject to the conditions of the securities purchase agreement, the Company has the right to sell to Lincoln Park, and Lincoln Park is obligated to purchase, up to \$10.0 million in shares of the Company's common stock, subject to certain limitations, from time to time, over the 36-month period commencing on September 4, 2015. Pursuant to the securities purchase agreement, in January 2017, the Company issued and sold 300,000 shares of common stock to Lincoln Park resulting in gross proceeds of \$113,000.

### **Note 14 – Commitments and Contingencies**

#### **Manufacturing and Suppliers**

The Company has not, and does not intend in the foreseeable future, to manufacture any of its products and components. The Company entered into a license agreement (the "License Agreement"), effective July 1, 2011, with Bellco S.r.l., an Italy-based supplier of hemodialysis and intensive care products, for the manufacturing, marketing and sale of the Company's patented mid-dilution dialysis filters, the OLpur MD 190 and MD 220 (the "Products"). Under the License Agreement, the Company granted Bellco a license to manufacture, market and sell the Products under its own name, label and CE mark in Italy, France, Belgium, Spain and Canada on an exclusive basis, and to do the same on a non-exclusive basis in the United Kingdom and Greece and, upon the Company's written approval, other European countries where the Company does not sell the Products, as well as non-European countries (referred to as the "Territory").

**NEPHROS, INC. AND SUBSIDIARY****NOTES TO UNAUDITED CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

On February 19, 2014, the Company entered into the First Amendment to License Agreement (the “First Amendment”) with Bellco. Pursuant to the First Amendment, the Company and Bellco agreed to extend the term of the License Agreement from December 31, 2016 to December 31, 2021. The First Amendment also expands the Territory covered by the License Agreement to include, on an exclusive basis, Sweden, Denmark, Norway and Finland, and, on a non-exclusive basis, Korea, Mexico, Brazil, China and the Netherlands. The First Amendment further provides new minimum sales targets which, if not satisfied, will, at the discretion of the Company, result in conversion of the license to non-exclusive status. The Company has agreed to reduce the fixed royalty payment payable to the Company for the period beginning on January 1, 2015 through and including December 31, 2021. Beginning on January 1, 2015 through and including December 31, 2021, Bellco will pay the Company a royalty based on the number of units of Products sold per year in the Territory as follows: for the first 125,000 units sold in total, €1.75 (approximately \$1.87 using current exchange rates) per unit; thereafter, €1.25 (approximately \$1.34 using current exchange rates) per unit. In addition, the Company received a total of €450,000 (approximately \$612,000) in upfront fees in connection with the First Amendment, half of which was received on February 19, 2014 and the remaining half was received on April 4, 2014. In addition, the First Amendment provides that, in the event that the Company pursues a transaction to sell, assign or transfer all right, title and interest to the licensed patents to a third party, the Company will provide Bellco with written notice thereof and a right of first offer with respect to the contemplated transaction for a period of thirty (30) days.

**License and Supply Agreement**

On April 23, 2012, the Company entered into a License and Supply Agreement (the “License and Supply Agreement”) with Medica S.p.A. (“Medica”), an Italy-based medical product manufacturing company, for the marketing and sale of certain filtration products based upon Medica’s proprietary Medisulfone ultrafiltration technology in conjunction with the Company’s filtration products, and to engage in an exclusive supply arrangement for the filtration products. Under the License and Supply Agreement, Medica granted to the Company an exclusive license, with right of sublicense, to market, promote, distribute, offer for sale and sell the filtration products worldwide, excluding Italy for the first three years, during the term of the License and Supply Agreement. In addition, the Company granted to Medica an exclusive license under the Company’s intellectual property to make the filtration products during the term of the License and Supply Agreement. In exchange for the rights granted, the Company agreed to make minimum annual aggregate purchases from Medica of €300,000 (approximately \$400,000), €500,000 (approximately \$700,000) and €750,000 (approximately \$880,000) for the years 2012, 2013 and 2014, respectively. The Company’s aggregate purchase commitments totaled approximately €1,200,000 (approximately \$1,300,000) and €999,000 (approximately \$1,119,000) for the years ended December 31, 2016 and 2015, respectively. In exchange for the license, the Company paid Medica a total of €1,500,000 (approximately \$2,000,000) in three installments: €500,000 (approximately \$700,000) on April 23, 2012, €600,000 (approximately \$800,000) on February 4, 2013, and €400,000 (approximately \$500,000) on

May 23, 2013.

As further consideration for the license and other rights granted to the Company, the Company granted Medica options to purchase 300,000 shares of the Company's common stock. The fair value of these stock options was approximately \$273,000 at the time of their issuance, calculated as described in Note 6 under Stock-Based Compensation. Together with the total installment payments described above, the fair value of the options has been capitalized as license and supply agreement, net. The gross value of the intangible asset capitalized was approximately \$2,250,000. License and supply agreement, net, on the consolidated balance sheet is approximately \$1,105,000 and \$1,262,000 as of September 30, 2017 and December 31, 2016, respectively. Accumulated amortization is approximately \$1,145,000 and \$988,000 as of September 30, 2017 and December 31, 2016, respectively. The asset is being amortized as an expense over the life of the License and Supply Agreement. Approximately \$53,000 has been charged to amortization expense for each of the three-month periods ended September 30, 2017 and 2016 on the condensed consolidated statement of operations and comprehensive loss. Approximately \$157,000 and \$158,000 has been charged to amortization expense for the nine months ended September 30, 2017 and 2016, respectively, on the condensed consolidated statement of operations and comprehensive loss.

As of September 2013, the Company has an understanding with Medica whereby the Company has agreed to pay interest to Medica at a 12% annual rate calculated on the principal amount of any outstanding invoices that are not paid pursuant to the original payment terms. For the three and nine months ended September 30, 2017, approximately \$7,000 and \$17,000 of interest, respectively, was recognized as interest expense. For the three and nine months ended September 30, 2016, approximately \$9,000 and \$37,000 of interest, respectively, was recognized as interest expense.

On May 5, 2017, the Company entered into a Third Amendment to License and Supply Agreement (the "Third Amendment") with Medica. Pursuant to the Third Amendment, Medica expanded the products covered by the original License and Supply Agreement to include both certain filtration products based on Medica's proprietary Versatile microfiber technology and certain filtration products based on Medica's proprietary Medisulfone ultrafiltration technology (collectively, the "Filtration Products"). The Third Amendment also limits the territory in which Medica granted the Company an exclusive license, with right of sublicense, to market, promote, distribute, offer for sale, and sell the Filtration Products to North America, Central America, Columbia, Venezuela, Chile, Ecuador, Peru, Ireland, the United Kingdom, Australia and New Zealand. The Company's multinational distributors retain the right to market certain of the products worldwide, other than in Italy, on a non-exclusive basis.

**NEPHROS, INC. AND SUBSIDIARY**

**NOTES TO UNAUDITED CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

In exchange for the rights granted, the Company has agreed to make minimum annual aggregate purchases from Medica of €1,600,000 (approximately \$1,700,000 using current exchange rates), €2,500,000 (approximately \$2,700,000 using current exchange rates), €3,000,000 (approximately \$3,300,000 using current exchange rates), €3,150,000 (approximately \$3,400,000 using current exchange rates), €3,300,000 (approximately \$3,600,000 using current exchange rates), and €3,475,000 (approximately \$3,800,000 using current exchange rates) in each of calendar years 2017, 2018, 2019, 2020, 2021 and 2022, respectively. For the nine months ended September 30, 2017, the Company's purchase commitments totaled €1,400,000 (approximately \$1,650,000 using current exchange rates).

On September 26, 2017, the Company entered into a Fourth Amendment to the License and Supply Agreement with Medica which extended the term of the License and Supply Agreement from December 31, 2022 to December 31, 2025, unless earlier terminated by either party in accordance with the terms of the License and Supply Agreement. As a result of the amendment, approximately \$33,000 of amortization expense will be recognized in the remainder of 2017 and approximately \$134,000 will be recognized in each of the years ended December 31, 2018 through 2025.

In exchange for the rights granted, the Company has agreed to make minimum annual aggregate purchases from Medica of €3,625,000 (approximately \$4,300,000 using current exchange rates), €3,825,000 (approximately \$4,500,000 using current exchange rates), and €4,000,000 (approximately \$4,700,000 using current exchange rates) in each of calendar years 2023, 2024, and 2025, respectively.

In addition, for the period beginning April 23, 2014 through December 31, 2025, the Company will pay Medica a royalty rate of 3% of net sales of the Filtration Products sold, subject to reduction as a result of a supply interruption pursuant to the terms of the License and Supply Agreement. Approximately \$7,000 and \$18,000 in royalties are included in accrued expenses as of September 30, 2017 and December 31, 2016, respectively.

**Contractual Obligations**

The Company has an operating lease that expires on November 30, 2018 for the rental of its U.S. office and research and development facilities with a monthly cost of approximately \$9,000. The Company intends to terminate this lease on or about December 15, 2017, and to pay an early termination fee of approximately \$5,000 during the fourth quarter

of 2017. Included in prepaid expenses and other current assets on the condensed consolidated balance sheet as of September 30, 2017 and in other assets as of December 31, 2016 is approximately \$21,000 related to a security deposit for the U.S. office facility. Rent expense was approximately \$32,000 and \$31,000 for the three months ended September 30, 2017 and 2016, respectively. Rent expense was approximately \$91,000 and \$98,000 for the nine months ended September 30, 2017 and 2016, respectively.

The Company has entered into a five-year lease that will commence on or about December 15, 2017 for a new headquarters facility in South Orange, New Jersey, with a monthly cost of \$11,000. Included in other assets on the condensed consolidated balance sheet as of September 30, 2017 is \$11,000 for a security deposit on this lease. Included in prepaid expenses and other current assets on the condensed consolidated balance sheet as of September 30, 2017 is \$11,000 for prepaid rent for this lease.

### **Investment in Lease, net**

On October 8, 2015, the Company entered into an equipment lease agreement with Biocon 1, LLC. The lease commenced on January 1, 2016 with a term of 60 months and monthly rental payments of approximately \$1,800 will be paid to the Company. At the completion of the lease term, Biocon 1, LLC will own the equipment provided under the agreement. An investment in lease was established for the direct financing lease receivable at the present value of the future minimum lease payments. Interest income will be recognized monthly over the lease term using the effective-interest method. Cash received will be applied against the direct financing lease receivable and will be presented within changes in operating assets and liabilities in the operating section of the Company's consolidated statement of cash flows. At lease inception, an investment in lease of approximately \$92,000 was recorded, net of unearned interest of approximately \$14,000. During the three and nine months ended September 30, 2017, approximately \$1,000 and \$3,000, respectively, was recognized in interest income. During the three and nine months ended September 30, 2016, approximately \$1,000 and \$4,000, respectively, was recognized in interest income. As of September 30, 2017, investment in lease, current is approximately \$20,000, net of unearned interest of \$3,000. As of September 30, 2017, investment in lease, noncurrent, is approximately \$50,000, net of unearned interest of \$3,000.

As of September 30, 2017, scheduled maturities of minimum lease payments receivable were as follows:

2017	\$11,000
2018	18,000
2019	19,000
2020	22,000
	70,000
Less: Current portion	(20,000)
Investment in sales-type lease, noncurrent	\$50,000

Included in the above scheduled maturities of minimum lease payments receivable, approximately \$7,000 was due as of September 30, 2017.

## NEPHROS, INC. AND SUBSIDIARY

### Management's Discussion and Analysis of Financial Condition and Results of Operations

#### Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

*This discussion should be read in conjunction with our consolidated financial statements included in this Quarterly Report on Form 10-Q and the notes thereto, as well as the other sections of this Quarterly Report on Form 10-Q, including the "Forward-Looking Statements" section hereof, and our Annual Report on Form 10-K for the year ended December 31, 2016, including the "Risk Factors" and "Business" sections thereof. This discussion contains a number of forward-looking statements, all of which are based on our current expectations and could be affected by the uncertainties and risk factors described in this Quarterly Report on Form 10-Q and our Annual Report on Form 10-K for the year ended December 31, 2016. Our actual results may differ materially.*

#### Business Overview

Nephros is a commercial stage medical device and commercial products company that develops and sells high performance liquid purification filters and hemodiafiltration ("HDF") systems. Our filters, which are generally classified as ultrafilters, are primarily used in dialysis centers for the removal of biological contaminants from water and bicarbonate concentrate and are used in hospitals for the prevention of infection from water-borne pathogens, such as legionella and pseudomonas. Because our ultrafilters capture contaminants as small as 0.005 microns in size, they minimize exposure to a wide variety of bacteria, viruses, fungi, parasites and endotoxins.

Our OLPur H2H Hemodiafiltration System, used in conjunction with a standard hemodialysis machine, is the only FDA 510(k) cleared medical device that enables nephrologists to provide hemodiafiltration treatment to patients with end stage renal disease ("ESRD"). Additionally, we sell hemodiafilters, which serve the same purpose as dialyzers in a hemodialysis treatment, and other disposables used in the hemodiafiltration treatment process.

We were founded in 1997 by healthcare professionals affiliated with Columbia University Medical Center/New York-Presbyterian Hospital to develop and commercialize an alternative method to hemodialysis. We have extended our filtration technologies to meet the demand for liquid purification in other areas, in particular water purification.

To support our cash needs, we have entered into a \$1,000,000 secured revolving credit facility with a commercial lender. In addition, we have also received approval to sell a portion of our New Jersey net operating loss and research and development tax credits through a program administered by the New Jersey Economic Development Authority (“NJEDA”), which we anticipate will result in cash proceeds of over \$1.75 million during the fourth quarter of 2017. Based on our existing cash balances, our current cash flow projections, including projected increases in product sales from the launch of new products, and the anticipated proceeds from the NJEDA tax credit program, we believe we will have sufficient cash resources to fund our operations through the first half of 2018, if not longer. However, our financial projections are subject to a number of uncertainties, including the timing and market acceptance of our new products and our ability to obtain the planned proceeds from the NJEDA tax credit program. There can be no assurance that any of such events will occur or that our future cash flow will be sufficient to meet our obligations and commitments. See “ – Liquidity and Capital Resources,” below.

## **Our Products**

Presently, we produce two core product lines: HDF systems and water ultrafiltration products. The ultrafiltration technology was originally developed as a component of the HDF system and emerged as a separate business unit in 2009. HDF is a long-term investment that we expect to grow as we develop a second-generation system and as the U.S. dialysis market reimbursement environment migrates to full capitation. Water ultrafiltration is a near-term market opportunity that we expect to continue to grow rapidly as we launch new products and further penetrate the market.

Since 2014, we have focused on expanding our product portfolio to include standardized form factors to better “plug and play” into existing filtration infrastructure and on developing relationships with value-added resellers (“VARs”) to rapidly expand access to our target customers. While currently we primarily focus on customers in medical markets, our VARs who support our medical market customers also support a wide range of commercial and industrial customers. We believe that our existing VAR relationships will facilitate growth in filter sales outside of the medical industry.

### ***HDF Systems***

The current standard of care in the United States for patients with chronic renal failure is hemodialysis (“HD”), a process in which toxins are cleared via diffusion. Patients typically receive HD treatments at least 3 times weekly for 3-4 hours per treatment. HD is most effective in removing smaller, easily diffusible toxins. For patients with acute renal failure, the current standard of care in the United States is hemofiltration (“HF”), a process where toxins are cleared via convection. HF offers a much better removal of larger sized toxins when compared to HD. However, HF treatment is more challenging for patients, as it is performed on a daily basis, and typically takes 12-24 hours per treatment.

## NEPHROS, INC. AND SUBSIDIARY

### Management's Discussion and Analysis of Financial Condition and Results of Operations

Hemodiafiltration ("HDF") is an alternative dialysis modality that combines the benefits of HD and HF into a single therapy by clearing toxins using both diffusion and convection. Though not widely used in the United States, HDF is prevalent in Europe and is performed for a growing number of patients. Clinical experience and literature show the following clinical and patient benefits of HDF:

Enhanced clearance of middle and large molecular weight toxins

Improved survival - up to a 35% reduction in mortality risk

Reduction in the occurrence of dialysis-related amyloidosis

Reduction in inflammation

Reduction in medication such as EPO and phosphate binders

Improved patient quality of life

Reduction in number of hospitalizations and overall length of stay

However, like HF, HDF can be resource-intensive and can require a significant amount of time to deliver one course of treatment.

We have developed a modified approach to HDF that we believe is more patient-friendly, less resource-intensive, and can be used in conjunction with current HD machines. We refer to our approach as an on-line mid-dilution hemodiafiltration ("mid-dilution HDF") system. Our solution consists of our OLpür H2H Hemodiafiltration Module ("H2H Module"), our OLpür MD 220 Hemodiafilter ("HDF Filter") and our H2H Substitution Filter ("Dialysate Filter").

Our H2H Module attaches to a standard HD machine to perform on-line hemodiafiltration therapy. The HD machine controls and monitors the basic treatment functions, as it would normally when providing HD therapy. The H2H Module is a free-standing, movable device that is placed next to either side of an HD machine. The H2H Module is connected to the clinic's water supply, drain, and electricity.

The H2H Module utilizes the HDF Filter, and is very similar to a typical hollow fiber dialyzer assembled with a single hollow fiber bundle made with a high-flux (or high-permeability) membrane. The fiber bundle is separated into two discrete, but serially connected, blood paths. Dialysate flows in one direction that is counter-current to blood flow in Stage 1 and co-current to blood flow in Stage 2.

In addition to the HDF Filter, the H2H Module also utilizes a Dialysate Filter during patient treatment. The Dialysate Filter is a hollow fiber, ultrafilter device that consists of two sequential (redundant) ultrafiltration stages in a single housing. During on-line HDF with the H2H Module, fresh dialysate is redirected by the H2H Module's hydraulic (substitution) pump and passed through this dual-stage ultrafilter before being infused as substitution fluid into the extracorporeal circuit. Providing ultrapure dialysate is crucial for the success of on-line HDF treatment.

Our HDF system conforms with current ANSI/AAMI/ISO standards and is cleared by the FDA for the treatment of patients with chronic renal failure in the United States. Our solution is the only on-line mid-dilution HDF system cleared by the FDA to date.

Both DaVita Healthcare Partners and the Renal Research Institute (a research division of Fresenius Medical Care) have conducted evaluations of our hemodiafiltration system in their clinics. We gathered direct feedback from these evaluations, and, in January 2016, updated our training procedures and rolled out a software update focused on improving the system's alignment with nurse work flow.

Vanderbilt University began treating patients with our HDF systems early in 2017. Our goal during 2017 and 2018 is to develop a better understanding of how our system best fits into the current clinical and economic ESRD treatment paradigm, with the ultimate goals of (a) improving the quality of life for the patient, (b) reducing overall expenditure compared to other dialysis modalities, (c) minimizing the impact on nurse work flow at the clinic, and (d) demonstrating the pharmacoeconomic benefit of the HDF technology to the U.S. healthcare system, as has been done in Europe with other HDF systems. In addition, we are in the process of developing version 2.0 of our HDF system, which will enable us to manufacture at scale, as well as potentially reduce the per treatment cost of performing HDF. We filed a provisional patent on our new system design in June 2017 and intend to invest in the development of this new system upon achieving positive cash flow.

## NEPHROS, INC. AND SUBSIDIARY

### Management's Discussion and Analysis of Financial Condition and Results of Operations

#### *Ultrafiltration Products*

Our ultrafilters are used in both medical and non-medical applications. Like competing filters, they purify by passing liquids through the pores of polysulfone hollow fiber. Our filters' pores are significantly smaller than those of competing products, resulting in highly effective elimination of water borne pathogens, including legionella bacteria (the cause of legionnaires disease). Additionally, the fiber structure and pore density in our hollow fiber enables significantly higher flow rates than in other polysulfone hollow fiber.

During 2016 and 2017, we developed several ultrafilter cartridge products that are designed to fit directly into existing water filtration systems, eliminating the need for plumbing modifications during installation and replacement. These "plug and play" systems are an important part of our strategy to penetrate the water filtration market.

#### Target Markets

Our ultrafiltration products currently target the following markets:

*Hospitals and Other Healthcare Facilities:* Filtration of water for washing and drinking as an aid in infection control. The filters produce water that is suitable for wound cleansing, cleaning of equipment used in medical procedures, and washing of surgeons' hands.

*Dialysis Centers – Water/Bicarbonate:* Filtration of water or bicarbonate concentrate used in HD devices.

*Commercial Facilities:* Filtration of water for washing and drinking, including use in ice machines and soft drink dispensers.

*Military and Outdoor Recreation:* Individual water purification devices used by soldiers and backpackers to produce drinking water in the field, as well as filters customized to remote water processing systems.

Hospitals and Other Healthcare Facilities. According to the American Hospital Association, approximately 5,700 hospitals, with approximately 915,000 beds, treated over 35 million patients in the United States in 2013. The U.S. Centers for Disease Control and Prevention estimates that healthcare associated infections (“HAI”) occurred in approximately 1 out of every 25 hospital patients, or about 1.4 million patients in 2013. HAIs affect patients in a hospital or other healthcare facility and are not present or incubating at the time of admission. They also include infections acquired by patients in the hospital or facility, but appearing after discharge, and occupational infections among staff. Many HAIs are caused by waterborne bacteria and viruses that can thrive in aging or complex plumbing systems often found in healthcare facilities.

The Affordable Care Act, passed in March 2010, puts in place comprehensive health insurance reforms that aim to lower costs and enhance quality of care. With its implementation, healthcare providers have substantial incentives to deliver better care or be forced to absorb the expenses associated with repeat medical procedures or complications like HAIs. As a consequence, hospitals and other healthcare facilities are proactively implementing strategies to reduce the potential for HAIs. Our ultrafilters are designed to aid in infection control in the hospital and healthcare setting by treating facility water at the point of delivery, for example, from sinks and showers.

In June 2017, the Center for Clinical Standards and Quality at the Centers for Medicare and Medicaid Services (“CMS”) announced the addition of requirements for facilities to develop policies and procedures that inhibit the growth and spread of legionella and other opportunistic pathogens in building water systems. Going forward CMS surveyors will review policies, procedures, and reports documenting water management implementation results to verify that facilities are compliant with their requirements. We believe that these CMS regulations may have a positive impact on the sale of our HAI-inhibiting ultrafilters.

We currently have 510(k) clearance on the following portfolio of medical device products for use in the hospital setting to aid in infection control:

The DSU-H is an in-line, 0.005 micron ultrafilter that provides dual-stage protection from water borne pathogens. The DSU-H is primarily used to filter potable water feeding ice machines, sinks and medical equipment, such as endoscope washers and surgical room humidifiers. The DSU-H has an up to 6 month product life when used in the hospital setting.

The SSU-H is an in-line, 0.005 micron ultrafilter that provides single-stage protection from water borne pathogens. The SSU-H is primarily used to filter potable water feeding sinks, showers and medical equipment. The SSU-H has an up to 3 month product life when used in the hospital setting.

The S100 is a Point of Use, 0.01 micron microfilter that provides protection from water borne pathogens. The S100 is primarily used to filter potable water at sinks and showers. The S100 has an up to 3 month product life when used in the hospital setting.

## NEPHROS, INC. AND SUBSIDIARY

### Management's Discussion and Analysis of Financial Condition and Results of Operations

The HydraGuard™ and HydraGuard™ - Flush are 0.005 micron cartridge ultrafilters that provide single-stage protection from water borne pathogens. The HydraGuard™ ultrafilters are primarily used to filter potable water feeding ice machines and medical equipment, such as endoscope washers and surgical room humidifiers. The HydraGuard™ has an up to 6 month product life and the HydraGuard™ – Flush has an up to 12 month product life when used in the hospital setting.

The S100 and HydraGuard™ were both designed to work with existing plumbing infrastructure. We received 510(k) clearance from the FDA to market the HydraGuard™ in December 2016, began shipping the HydraGuard™ in July 2017, and began shipping the HydraGuard™ – Flush in September 2017.

The complete hospital infection control product line, including in-line, point of use and cartridge filters, can be viewed on our website at <http://www.nephros.com/infection-control/>. We are not including the information on our website as a part of, or incorporating it by reference into, this Quarterly Report on Form 10-Q.

*Dialysis Centers - Water/Bicarbonate.* To perform hemodialysis, all dialysis clinics have dedicated water purification systems to produce water and bicarbonate concentrate, two essential ingredients for making dialysate, the liquid that removes waste material from the blood. According to the American Journal of Kidney Diseases, there are approximately 6,300 dialysis clinics in the United States servicing approximately 430,000 patients annually. We estimate that there are over 100,000 hemodialysis machines in operation in the United States.

Medicare is the main payer for dialysis treatment in the United States. To be eligible for Medicare reimbursement, dialysis centers must meet the minimum standards for water and bicarbonate concentrate quality set by the Association for the Advancement of Medical Instrumentation (“AAMI”), the American National Standards Institute (“ANSI”) and the International Standards Organization (“ISO”). We anticipate that the stricter standards approved by these organizations in 2009 will be adopted by Medicare in the near future.

We currently have 510(k) clearance on the following portfolio of medical device products for use in the dialysis setting to aid in bacteria, virus and endotoxin retention:

The DSU-D, SSU-D and SSUmini are in-line, 0.005 micron ultrafilters that provide protection from bacteria, viruses, and endotoxins. All of these products have an up to 12 month product life in the dialysis setting, and are used to filter water following treatment with a reverse osmosis (“RO”) system and to filter bicarbonate concentrate. These ultrafilters are primarily used in the water lines and bicarbonate concentrate lines leading into dialysis machines, and as a polish filter for portable RO machines.

EndoPur is a 0.005 micron cartridge ultrafilter that provides single-stage protection from bacteria, viruses and endotoxins. The EndoPur has an up to 12 month product life in the dialysis setting, and is used to filter water following treatment with an RO system. Specifically, the EndoPur is primarily used to filter water in large RO systems designed to provide ultrapure water to an entire dialysis clinic.

The EndoPur is a cartridge-based, “plug and play” market entry that requires no plumbing at installation or replacement. In March 2017, we received 510(k) clearance from the FDA to market the EndoPur 10” filter. We began shipping the EndoPur 10” filter in July of 2017, and the 20” and 30” versions in September of 2017.

Commercial and Industrial Facilities. We currently market the following portfolio of proprietary products for use in the commercial, industrial and food service settings:

The NanoGuard-D is an in-line, 0.005 micron ultrafilter that provides dual-stage retention of any organic or inorganic particle larger than 15,000 Daltons. The NanoGuard-D is primarily used to filter potable water feeding ice machines, sinks and equipment that requires or benefits from ultrafiltered water, and filters up to 10,000 gallons of potable water, depending upon the particle load.

The NanoGuard-S is an in-line, 0.005 micron ultrafilter that provides single-stage retention of any organic or inorganic particle larger than 15,000 Daltons. The NanoGuard-S is primarily used to filter potable water feeding ice machines, sinks, showers and equipment that requires or benefits from ultrafiltered water, and filters up to 3,000 gallons of potable water, depending upon the particle load.

The NanoGuard-E is a 0.005 micron ultrafilter cartridge that plugs into an Everpure® filter manifold and provides single-stage retention of any organic or inorganic particle larger than 15,000 Daltons. The NanoGuard-E is primarily used to filter potable water feeding ice machines, beverage dispensers, and other equipment that requires or benefits from ultrafiltered water, and filters up to 10,000 gallons of potable water, depending upon the particle load.

## NEPHROS, INC. AND SUBSIDIARY

### Management's Discussion and Analysis of Financial Condition and Results of Operations

The NanoGuard-C is a 0.005 micron cartridge ultrafilter that fits with most 10", 20", 30" and 40" cartridge housings and provides single-stage retention of any organic or inorganic particle larger than 15,000 Daltons. The NanoGuard-C is primarily used to filter potable water feeding ice machines and equipment that requires or benefits from ultrafiltered water, and filters up to 10,000 gallons of potable water per 10" of length, depending upon the particle load.

The NanoGuard-F is a 0.005 micron flushable cartridge ultrafilter, available in 10" or 20" sizes and provides single-stage retention of any organic or inorganic particle larger than 15,000 Daltons. The NanoGuard-F is primarily used to filter potable water feeding ice machines, sinks and equipment that requires or benefits from ultrafiltered water. The NanoGuard-F has an up to 12 month product life and can filter up to 2.5 gallons per minute per 10" length, depending upon the particle load.

In April 2017, we announced a partnership with WorldWater & Solar Technology to provide ultrafiltration capabilities to their drinking water systems. This partnership centers on our NanoGuard-F product line.

In the fourth quarter of 2017, we expect to launch a lead filtration system that will address both soluble and particulate lead in potable water, with the ability to treat up to 9,000 gallons of water between filter change-outs.

*Military and Outdoor Recreation.* We developed our individual water treatment device ("IWTD") in both in-line and point-of-use configurations. Our IWTD allows a soldier in the field to derive drinking water from any fresh water source. This enables the soldier to remain hydrated, which will maintain mission effectiveness and unit readiness and extend mission reach. Our IWTD is one of the few portable filters that has been validated by the military to meet the NSF Protocol P248 standard. It has also been approved by the U.S. Army Public Health Command and the U.S. Army Test and Evaluation Command for deployment.

In May 2015, we entered into a Sublicense Agreement with CamelBak Products, LLC ("CamelBak"). Under this Sublicense Agreement, we granted CamelBak an exclusive, non-transferable, worldwide (with the exception of Italy) sublicense and license, in each case solely to market, sell, distribute, import and export the IWTD. In exchange for the rights granted to CamelBak, CamelBak agreed, through December 31, 2022, to pay us a percentage of the gross profit on any sales made to a branch of the U.S. military, subject to certain exceptions, and to pay us a fixed per-unit fee for any other sales made. CamelBak is also required to meet or exceed certain minimum annual fees payable to us, and, if such fees are not met or exceeded, we may convert the exclusive sublicense to a non-exclusive sublicense with respect to non-U.S. military sales. During the nine months ended September 30, 2017, we recognized royalty revenue of

\$25,000 related to this Sublicense Agreement. During the nine months ended September 30, 2016, we recognized royalty revenue of \$10,000 related to this Sublicense Agreement.

In 2015, we began working with multiple companies developing portable water purification systems designed to provide potable water in remote locations based on our filter's ability to meet the NSF Protocol P248 standard. Specifically, we have provided flushable filter prototypes to these companies for validation as one potential component in systems that employ multiple technologies to purify water from streams, lakes and rivers.

### **Critical Accounting Policies**

For the nine-month period ended September 30, 2017, there were no significant changes to our critical accounting policies as identified in our Annual Report on Form 10-K for the year ended December 31, 2016.

### **Recent Accounting Pronouncements**

We are subject to recently issued accounting standards, accounting guidance and disclosure requirements. For a description of these new accounting standards, see Note 9, "Recent Accounting Pronouncements," of the Notes to our Unaudited Condensed Consolidated Interim Financial Statements contained in Item 1 of Part I of this Quarterly Report on Form 10-Q, which is incorporated herein by reference.

### **Results of Operations**

#### *Fluctuations in Operating Results*

Our results of operations have fluctuated significantly from period to period in the past and are likely to continue to do so in the future. We anticipate that our quarterly results of operations will be impacted for the foreseeable future by several factors including the progress and timing of expenditures related to our research and development efforts, as well as marketing expenses related to product launches. Due to these fluctuations, period-to-period comparisons of our operating results may not be a reliable indication of future performance.

## NEPHROS, INC. AND SUBSIDIARY

### Management's Discussion and Analysis of Financial Condition and Results of Operations

#### *Three Months Ended September 30, 2017 Compared to the Three Months Ended September 30, 2016*

##### *Revenues*

Total net revenues for the three months ended September 30, 2017 were approximately \$916,000 compared to approximately \$475,000 for the three months ended September 30, 2016, an increase of approximately \$441,000, or 93%. Total product revenues for the three months ended September 30, 2017 were approximately \$841,000 compared to approximately \$407,000 for the three months ended September 30, 2016, an increase of approximately \$434,000, or 107%. These increases were primarily driven by an increase in the number of filters sold in 2017 versus in 2016, which we believe indicates early success of our strategy to provide dialysis-quality water filtration into the water-borne infection control market within the hospital sector.

##### *Cost of Goods Sold*

Cost of goods sold was approximately \$384,000 for the three months ended September 30, 2017 compared to approximately \$159,000 for the three months ended September 30, 2016, an increase of approximately \$225,000, or 142%. The increase in cost of goods sold was related to an increase in number of filters sold and exceeded the revenue growth rate due to the effects of foreign exchange, the timing of certain purchases, and the mix of products sold during the period.

##### *Research and Development Expenses*

Research and development expenses were approximately \$237,000 and \$241,000 for the three months ended September 30, 2017 and September 30, 2016, respectively. This decrease of approximately \$4,000, or 2%, reflects a minor reduction due to increased focus on new product launches during the three months ended September 30, 2017 compared to the three months ended September 30, 2016.

*Depreciation and Amortization Expenses*

Depreciation and amortization expense was approximately \$60,000 for each of the three-month periods ended September 30, 2017 and 2016. Amortization expense related to the asset recognized in conjunction with the License and Supply Agreement with Medica S.p.A was \$53,000 for each of the three-month periods ended September 30, 2017 and 2016. The remaining \$7,000 recognized in each of the three months ended September 30, 2017 and 2016 was depreciation on equipment and tools.

*Selling, General and Administrative Expenses*

Selling, general and administrative expenses were approximately \$753,000 for the three months ended September 30, 2017 compared to approximately \$652,000 for the three months ended September 30, 2016, an increase of approximately \$101,000, or 15%. The increase is primarily due to increased salary, commission and benefit expenses for increased selling, general and administrative personnel.

*Interest Expense*

Interest expense of approximately \$88,000 for the three months ended September 30, 2017 consisted of approximately \$33,000 of interest accruing under the promissory notes that we issued in June 2016, approximately \$30,000 related to the amortization of debt discount under the promissory notes, approximately \$12,000 of debt issuance costs related to the issuance of the secured revolving credit facility, approximately \$6,000 of interest accruing on the secured revolving credit facility, and approximately \$7,000 of interest due on outstanding payables to a vendor. Interest expense of approximately \$65,000 for the three months ended September 30, 2016 consisted of approximately \$33,000 of interest related to the promissory notes that we issued in June 2016, approximately \$23,000 related to the amortization of debt discount under the promissory notes, and approximately \$9,000 of interest due on outstanding payables to a vendor.

*Interest Income*

Interest income of approximately \$1,000 for each of the three months ended September 30, 2017 and 2016 relates to interest income recognized on a lease receivable.

*Other Expense*

Other expense of approximately \$27,000 and \$5,000 for the three months ended September 30, 2017 and 2016, respectively, related to foreign currency losses on invoices paid to an international supplier.

## NEPHROS, INC. AND SUBSIDIARY

### Management's Discussion and Analysis of Financial Condition and Results of Operations

#### *Nine Months Ended September 30, 2017 Compared to the Nine Months Ended September 30, 2016*

##### *Revenues*

Total net revenues for the nine months ended September 30, 2017 were approximately \$2,509,000 compared to approximately \$1,575,000 for the nine months ended September 30, 2016, an increase of approximately \$934,000, or 59%. This increase was primarily driven by an increase in the number of filters sold in 2017 versus in 2016, which we believe indicates early success of our strategy to provide dialysis-quality water filtration into the water-borne infection control market within the hospital sector.

##### *Cost of Goods Sold*

Cost of goods sold was approximately \$1,005,000 for the nine months ended September 30, 2017 compared to approximately \$667,000 for the nine months ended September 30, 2016, an increase of approximately \$338,000, or 51%. The increase was related to the increase in filters sold.

##### *Research and Development Expenses*

Research and development expenses were approximately \$744,000 and \$763,000 for the nine months ended September 30, 2017 and September 30, 2016, respectively. This decrease of approximately \$19,000, or 2%, reflects a minor reduction due to increased focus on new product launches during the nine months ended September 30, 2017 compared to the nine months ended September 30, 2016.

##### *Depreciation and Amortization Expenses*

Depreciation and amortization expense was approximately \$178,000 for the nine months ended September 30, 2017 compared to approximately \$171,000 for the nine months ended September 30, 2016. Amortization expense related to the asset recognized in conjunction with the License and Supply Agreement with Medica S.p.A was \$157,000 and \$158,000 for the nine months ended September 30, 2017 and 2016, respectively. The remaining \$21,000 and \$13,000 recognized in the nine months ended September 30, 2017 and 2016, respectively, was depreciation on equipment and tools.

#### *Selling, General and Administrative Expenses*

Selling, general and administrative expenses were approximately \$2,405,000 for the nine months ended September 30, 2017 compared to approximately \$2,234,000 for the nine months ended September 30, 2016, an increase of approximately \$171,000, or 8%. The increase is primarily due to salary, commission, and benefit expenses for increased selling, general and administrative personnel.

#### *Interest Expense*

Interest expense of approximately \$218,000 for the nine months ended September 30, 2017 consisted of approximately \$99,000 of interest accruing under the promissory notes that we issued in June 2016, approximately \$84,000 related to the amortization of debt discount under the promissory notes, approximately \$12,000 of debt issuance costs related to the issuance of the secured revolving credit facility, approximately \$6,000 of interest accruing on the secured revolving credit facility, and approximately \$17,000 of interest due on outstanding payables to a vendor. Interest expense of approximately \$109,000 for the nine months ended September 30, 2016 consisted of approximately \$43,000 of interest accruing under the promissory notes that we issued in June 2016, approximately \$29,000 related to the amortization of debt discount under the promissory notes, and approximately \$37,000 of interest due on outstanding payables to a vendor.

#### *Interest Income*

Interest income of approximately \$3,000 and \$4,000 for each of the nine months ended September 30, 2017 and 2016, respectively, relates to interest income recognized on a lease receivable.

#### *Other Expense*

Other expense of approximately \$60,000 for the nine months ended September 30, 2017 related to foreign currency losses on invoices paid to an international supplier. Other expense for the nine months ended September 30, 2016 consisted of approximately \$12,000 related to foreign currency losses of approximately \$14,000 on invoices paid to an international supplier offset partially by miscellaneous other income of approximately \$2,000.

**NEPHROS, INC. AND SUBSIDIARY****Management's Discussion and Analysis of Financial Condition and Results of Operations****Liquidity and Capital Resources**

The following table summarizes our liquidity and capital resources as of September 30, 2017 and December 31, 2016 and is intended to supplement the more detailed discussion that follows. The amounts stated are expressed in thousands.

Liquidity and capital resources	September 30, 2017	December 31, 2016
Cash	\$ 150	\$ 275
Other current assets	1,459	989
Working capital surplus	197	369
Stockholders' equity	265	667

At September 30, 2017, we had an accumulated deficit of approximately \$122,395,000 and we expect to incur additional operating losses in the foreseeable future at least until such time, if ever, that we are able to increase product sales or license revenue. We have financed our operations since inception primarily through the private placements of equity and debt securities, our initial public offering, license revenue, and rights offerings.

Our future liquidity sources and requirements will depend on many factors, including:

availability of additional financing, through the sale of equity securities or otherwise, on commercially reasonable terms or at all;

market acceptance of our products, and our ability to effectively and efficiently produce and market our products;

continued progress in, and the costs of, clinical studies and other research and development programs;

costs involved in filing and enforcing patent claims and the status of competitive products; and

cost of litigation, including potential patent litigation and any other actual or threatened litigation.

We expect to put our current capital resources to the following uses:

marketing and sales of our water filtration products;

business development opportunities with respect to our chronic renal treatment system; and

working capital purposes.

At September 30, 2017, we had cash totaling approximately \$150,000 and total assets of approximately \$1,719,000, excluding other intangible assets (related to the License and Supply Agreement with Medica S.p.A.) of approximately \$1,105,000.

We have pursued two different sources of additional, non-dilutive financing. First, we entered into a \$1,000,000 secured revolving credit facility with Tech Capital, LLC (the "Credit Facility"). As of September 30, 2017, the principal balance of the Credit Facility was approximately \$563,000 and we are using these proceeds for working capital and general corporate purposes. See Note 11, "Secured Revolving Credit Facility," of the Notes to our Unaudited Condensed Consolidated Interim Financial Statements contained in Item 1 of Part I of this Quarterly Report on Form 10-Q for additional information on the Credit Facility.

Second, we have received approval to sell a portion of our New Jersey net operating losses and research and development tax credits through a program administered by the New Jersey Economic Development Authority ("NJEDA"), which we anticipate will result in cash proceeds of over \$1.75 million during the fourth quarter of 2017.

Based on our existing cash balances, our current cash flow projections, including projected increases in product sales from the launch of new products, and the anticipated proceeds from the NJEDA tax credit program, we believe that we will have sufficient cash resources to fund our operations at least through the first half of 2018, if not longer. However, our financial projections are subject to a number of uncertainties, including the timing and market acceptance of our new products and our ability to obtain the planned proceeds from the NJEDA tax credit program. There can be no assurance that any of such events will occur or that our future cash flow will be sufficient to meet our obligations and commitments. If we are unable to generate sufficient cash flow from our operations in the future to meet our operating requirements and other commitments or obtain the anticipated proceeds from the NJEDA tax credit program, we will be required to adopt alternatives, such as seeking to raise debt or equity capital, curtailing our planned activities, or ceasing our operations. There can be no assurance that any such actions could be effected on a timely basis or on satisfactory terms or at all or that these actions would enable us to continue to satisfy our capital requirements.

## NEPHROS, INC. AND SUBSIDIARY

### Management's Discussion and Analysis of Financial Condition and Results of Operations

Net cash used in operating activities was approximately \$1,871,000 for the nine months ended September 30, 2017 compared to approximately \$1,584,000 for the nine months ended September 30, 2016. Our net loss was approximately \$2,098,000 for the nine months ended September 30, 2017 compared to approximately \$2,377,000 for the nine months ended September 30, 2016, a decrease of approximately \$279,000.

Offsetting the decrease in the net loss, the most significant items contributing to the net increase of approximately \$287,000 in cash used in operating activities during the nine months ended September 30, 2017 compared to the nine months ended September 30, 2016 are highlighted below:

our accounts receivable increased by approximately \$341,000 during the 2017 period compared to a decrease of approximately \$62,000 during the 2016 period primarily as a result of increased revenue and timing of payments;

our inventory increased by approximately \$102,000 during the 2017 period compared to a decrease of approximately \$241,000 during the 2016 period as a result of managing inventory levels to accommodate increase in revenue; and

Partially offsetting the above changes:

our accounts payable decreased by approximately \$166,000 during the 2017 period compared to a decrease of approximately \$226,000 during the 2016 period primarily as a result of timing of payments; and

our accrued expenses increased by approximately \$105,000 during the 2017 period compared to a decrease of approximately \$18,000 during the 2016 period primarily as a result of timing of payments.

There was no cash used in investing activities for the nine months ended September 30, 2017. Net cash used in investing activities was approximately \$45,000 for the nine months ended September 30, 2016 as a result of the purchase of property, plant and equipment.

Net cash provided by financing activities for the nine months ended September 30, 2017 was approximately \$1,742,000 resulting from the net proceeds from the issuance of common stock of approximately \$1,179,000 and net

proceeds from our revolving credit facility of approximately \$563,000. Net cash provided by financing activities for the nine months ended September 30, 2016 of \$1,188,000 resulted from net proceeds of approximately \$1,187,000 resulting from the issuance of unsecured promissory notes and approximately \$1,000 of proceeds resulting from the exercise of warrants.

### **Off-Balance Sheet Arrangements**

We did not have any off-balance sheet arrangements as of September 30, 2017 or December 31, 2016.

### **Forward-Looking Statements**

Certain statements in this Quarterly Report on Form 10-Q constitute “forward-looking statements.” Such statements include statements regarding the efficacy and intended use of our technologies under development, the timelines for bringing such products to market and the availability of funding sources for continued development of such products and other statements that are not historical facts, including statements which may be preceded by the words “intends,” “may,” “will,” “plans,” “expects,” “anticipates,” “projects,” “predicts,” “estimates,” “aims,” “believes,” “hopes,” “potential” or “may be.” Forward-looking statements are not guarantees of future performance, are based on certain assumptions, and are subject to various known and unknown risks and uncertainties, many of which are beyond our control. Actual results may differ materially from the expectations contained in the forward-looking statements. Factors that may cause such differences include, but are not limited to, the risks that:

we may not be able to continue as a going concern;

we face significant challenges in obtaining market acceptance of our products, which could adversely affect our potential sales and revenues;

product-related deaths or serious injuries or product malfunctions could trigger recalls, class action lawsuits and other events that could cause us to incur expenses and may also limit our ability to generate revenues from such products;

## NEPHROS, INC. AND SUBSIDIARY

### Management's Discussion and Analysis of Financial Condition and Results of Operations

we face potential liability associated with the production, marketing and sale of our products and the expense of defending against claims of product liability, could materially deplete our assets and generate negative publicity which could impair our reputation;

to the extent our products or marketing materials are found to violate any provisions of the U.S. Food, Drug and Cosmetic Act or any other statutes or regulations, then we could be subject to enforcement actions by the FDA or other governmental agencies;

we may not be able to obtain funding if and when needed or on terms favorable to us in order to continue operations;

we may not have sufficient capital to successfully implement our business plan;

we may not be able to effectively market our products;

we may not be able to sell our water filtration products or chronic renal failure therapy products at competitive prices or profitably;

we may encounter problems with our suppliers, manufacturers and distributors;

we may encounter unanticipated internal control deficiencies or weaknesses or ineffective disclosure controls and procedures;

we may not obtain appropriate or necessary regulatory approvals to achieve our business plan;

products that appeared promising to us in research or clinical trials may not demonstrate anticipated efficacy, safety or cost savings in subsequent pre-clinical or clinical trials;

we may not be able to secure or enforce adequate legal protection, including patent protection, for our products; and

we may not be able to achieve sales growth in key geographic markets.

More detailed information about us and the risk factors that may affect the realization of forward-looking statements, including the forward-looking statements in this Quarterly Report on Form 10-Q, is set forth in our filings with the SEC, including our Annual Report on Form 10-K for the fiscal year ended December 31, 2016 and our other periodic reports filed with the SEC. We urge investors and security holders to read those documents free of charge at the SEC's web site at [www.sec.gov](http://www.sec.gov). We do not undertake to publicly update or revise our forward-looking statements as a result of new information, future events or otherwise, except as required by law.

**NEPHROS, INC. AND SUBSIDIARY**

**Quantitative and Qualitative Disclosures About Market Risk**

**Item 3. Quantitative and Qualitative Disclosures About Market Risk.**

Not required for smaller reporting companies.

## **NEPHROS, INC. AND SUBSIDIARY**

### **Controls and Procedures**

#### **Item 4. Controls and Procedures.**

##### **Evaluation of Disclosure Controls and Procedures**

We maintain a system of disclosure controls and procedures, as defined in Rule 13a-15(e) or Rule 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), which is designed to provide reasonable assurance that information required to be disclosed in our reports filed pursuant to the Exchange Act is accumulated and communicated to management in a timely manner. Management recognizes that any disclosure controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives. Because there are inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud have been or will be detected.

At the end of the period covered by this Quarterly Report on Form 10-Q, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, regarding the effectiveness of our disclosure controls and procedures pursuant to Exchange Act Rule 13a-15(b). Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures as of the end of the period covered by this report were effective.

##### **Changes in Internal Control Over Financial Reporting**

There were no changes in our internal control over financial reporting that occurred during our most recent fiscal quarter that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
