PRELIMINARY PROSPECTUS

15,000,000 Shares

Berry Plastics Group, Inc.

Common Stock

This is a public offering of shares of common stock of Berry Plastics Group, Inc. The selling stockholders identified in this prospectus are selling 15,000,000 shares. Berry Plastics Group, Inc. will not receive any of the proceeds from the sale of shares in this offering. Our common stock is listed on the New York Stock Exchange (the NYSE) under the symbol BERY. The last reported closing sale price of our common stock on July 12, 2013 was \$22.21 per share.

Investing in our common stock involves risks that are described in the Risk Factors section beginning on page 13 of this prospectus.

	Per Share	Total
Public offering price	\$	\$
Underwriting discount	\$	\$
Proceeds, before expenses, to the selling stockholders	\$	\$

The underwriters may also purchase up to an additional 2,250,000 shares from the selling stockholders, at the public offering price less the underwriting discount, within 30 days of the day of this prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The underwriters expect to deliver the shares of common stock against payment on or about , 2013.

Table of Contents

INDUSTRY AND MARKET DATA

This prospectus includes industry and trade association data, forecasts and information that we have prepared based, in part, upon data, forecasts and information obtained from independent trade associations, industry publications and surveys and other information available to us. Some data are also based on our good-faith estimates, which are derived from management's knowledge of the industry and independent sources. Industry publications and surveys and forecasts generally state that the information contained therein has been obtained from sources believed to be reliable. Although we believe these sources are reliable, we have not independently verified the information. In certain of the markets in which we operate, it may be difficult to directly ascertain industry or market data. Unless otherwise noted, statements as to our market share and market position are approximated and based on management experience and estimates using the above-mentioned third-party data combined with our internal analysis and estimates. While we are not aware of any misstatements regarding our industry data presented herein, our estimates involve risks and uncertainties and are subject to change based on various factors, including those discussed under the heading "Risk Factors" in this prospectus. Similarly, while we believe our internal research is reliable, such research has not been verified by any independent sources.

Table of Contents

NON-GAAP FINANCIAL MEASURES

Adjusted EBITDA and Adjusted Free Cash Flow, as presented in this prospectus, are supplemental financial measures that are not required by, or presented in accordance with, accounting principles generally accepted in the United States (GAAP). Adjusted EBITDA and Adjusted Free Cash Flow are not GAAP financial measures and should not be considered as an alternative to operating or net income or cash flows from operating activities, in each case determined in accordance with GAAP.

We define Adjusted Free Cash Flow as cash flow from operating activities less additions to property, plant and equipment. We use Adjusted Free Cash Flow as a measure of liquidity because it assists us in assessing our company's ability to fund its growth through its generation of cash. We believe Adjusted Free Cash Flow is useful to an investor in evaluating our liquidity because Adjusted Free Cash Flow and similar measures are widely used by investors, securities analysts and other interested parties in our industry to measure a company's liquidity without regard to revenue and expense recognition, which can vary depending upon accounting methods. Although we use Adjusted Free Cash Flow as a liquidity measure to assess our ability to generate cash, the use of Adjusted Free Cash Flow has important limitations, including that: (1) Adjusted Free Cash Flow does not reflect the cash requirements necessary to service principal payments on our indebtedness; and (2) Adjusted Free Cash Flow removes the impact of accrual basis accounting on asset accounts and non-debt liability accounts.

We define Adjusted EBITDA as net income (loss) before depreciation and amortization, income tax expense (benefit), interest expense (net) and certain restructuring and business optimization charges and as adjusted for unrealized cost reductions and acquired businesses, including unrealized synergies, which are more particularly defined in our credit documents and the indentures governing our notes. Adjusted EBITDA is used by our lenders for debt covenant compliance purposes and by our management as one of several measures to evaluate management performance. Adjusted EBITDA eliminates certain charges that we believe do not reflect operations and underlying operational performance. Although we use Adjusted EBITDA as a financial measure to assess the performance of our business, the use of Adjusted EBITDA has important limitations, including that (1) Adjusted EBITDA does not represent funds available for dividends, reinvestment or other discretionary uses, or account for one-time expenses and charges; (2) Adjusted EBITDA does not reflect cash outlays for capital expenditures or contractual commitments; (3) Adjusted EBITDA does not reflect changes in, or cash requirements for, working capital; (4) Adjusted EBITDA does not reflect the interest expense or the cash requirements necessary to service interest or principal payments on indebtedness; (5) Adjusted EBITDA does not reflect income tax expense or the cash necessary to pay income taxes; (6) Adjusted EBITDA excludes depreciation and amortization and, although depreciation and amortization are non-cash charges, the assets being depreciated and amortized will often have to be replaced in the future, and Adjusted EBITDA does not reflect cash requirements for such replacements; and (7) Adjusted EBITDA does not reflect the impact of earnings or charges resulting from matters we consider not to be indicative of our ongoing operations.

Adjusted EBITDA and Adjusted Free Cash Flow may be calculated differently by other companies, including other companies in our industry, limiting their usefulness as comparative measures. Because of these limitations, you should consider Adjusted EBITDA and Adjusted Free Cash Flow alongside other performance measures and liquidity measures, including operating income, various cash flow metrics, net income and our other GAAP results.

Table of Contents

PROSPECTUS SUMMARY

The following summary highlights information contained elsewhere in this prospectus and is qualified in its entirety by the more detailed information and consolidated financial statements included elsewhere in this prospectus. This summary is not complete and may not contain all of the information that may be important to you. You should carefully read the entire prospectus, including the Risk Factors section and our consolidated financial statements and notes to those statements, before making an investment decision. As used in this prospectus, Berry, the company, we, our and us mean Berry Plastics Group, Inc. and its subsidiaries on a consolidated basis.

Our Company

We are a leading provider of value-added plastic consumer packaging and engineered materials with a 30-year track record of delivering high-quality customized solutions to our customers. Our products utilize our proprietary research and development platform, which includes a continually evolving library of Berry-owned molds, patents, manufacturing techniques and technologies. We sell our solutions predominantly into consumer-oriented end markets, such as food and beverage, healthcare and personal care, which together represented approximately 76% of our sales in the 12 months ended March 30, 2013. We believe our customers look to us for solutions that have high consumer impact in terms of form, function and branding. Representative examples of our products include thermoform drink cups, thin-wall containers, blow-molded bottles, specialty closures, prescription vials, specialty plastic films, adhesives and corrosion protection materials. We have also been one of the most active acquirers of plastic packaging businesses globally, having acquired more than 30 businesses since 1988, including 13 acquisitions completed in the past seven years. We believe our focus on delivering unique and customized solutions to our customers and our ability to successfully integrate strategic acquisitions have enabled us to grow at rates in excess of our industry peers, having achieved a compound annual net sales growth rate over the last 12 years of 22%.

We believe that we have created one of the largest product libraries in our industry, allowing us to be a comprehensive solution provider to our customers. We have more than 13,000 customers, which consist of a diverse mix of leading national, mid-sized regional and local specialty businesses. The size and scope of our customer network allow us to introduce new products we develop or acquire to a vast audience that is familiar with, and we believe partial to, our brand. In fiscal year 2012, no single customer represented more than 3% of net sales and our top ten customers represented less than 17% of net sales. We currently supply our customers through 84 strategically located manufacturing facilities throughout the United States (70 locations) and select international locations (14 locations). We believe our manufacturing processes and our ability to leverage our scale to reduce expenses on items, such as raw materials, position us as a low-cost manufacturer relative to our competitors. For example, we believe based on management estimates that we are one of the largest global purchasers of plastic resins, at approximately 2.5 billion pounds per year, which gives us both unique insight into this market as well as scale purchasing savings.

We enjoy market leadership positions in many of our markets, with approximately 76% of net sales during the 12 months ended March 30, 2013 in markets in which management estimates we held the #1 or #2 market position. We look to build leadership in markets where we have a strategic angle and can achieve attractive profit margins through technology and design leadership and a competitive cost position such as highly decorated plastic packaging. We believe that our product and technology development capabilities are best-in-class, supported by a newly built research and design facility located in Evansville, Indiana (which we refer to in this prospectus as the Berry Research and Design Center) and a network of more than 200 engineers and material scientists. We seek to have our product and technology development efforts provide a meaningful impact on sales. An example of our focused new product development is our thermoform plastic drink cup technology. We

Table of Contents

identified an unfulfilled need in the market with an opportunity for significant return on invested capital and ultimately introduced the technology to the market in 2001. This product line has grown steadily since introduction and generated \$382 million of net sales during the 12 months ended March 30, 2013.

Our success is driven by our more than 15,000 employees. Over the past 30 years, we have developed a culture that incorporates both loyalty to best practices and acceptance of new perspectives, which we have often identified from the companies we have acquired. Our employees hold themselves accountable to exceed the expectations of our customers and to create value for our stakeholders.

We believe the successful execution of our business strategy has enabled us to outperform the growth of our industry over the past decade with Adjusted EBITDA increasing from \$80 million in December 2000 to \$810 million for the 12 months ended March 30, 2013, representing a compound annual growth rate (which we refer to in this prospectus as a CAGR) of 21%. For the 12 months ended March 30, 2013, Berry had net sales of \$4.7 billion, Adjusted EBITDA of \$810 million, net income of \$22 million and Adjusted Free Cash Flow of \$283 million. For a reconciliation of Adjusted EBITDA and Adjusted Free Cash Flow to the nearest GAAP measures, see Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources.

Our Businesses

We organize our business into: Rigid Packaging, Engineered Materials and Flexible Packaging. We strive to leverage the talents, technologies and resources of each segment for the benefit of Berry as a whole. We believe this practice has enabled us to cross-fertilize technologies, materials and manufacturing processes across our entire platform to create unique solutions for our customers, developing a partnership approach and strong long-term relationships.

The table below is a summary of our business and some of our key product lines:

(\$ in millions)	Rigid Packaging	Engineered Materials	Flexible Packaging
Adjusted EBITDA for			
the 12 months ended March 30, 2013			
Operating Income for	\$267	\$104	\$13
the 12 months ended March 30, 2013			
Product Examples	Foodservice Items	Tapes	Personal Care Films
	Containers	CPG	Barrier/ Sealant Films
	Tubes	FIBC	Medical Films
	Overcaps	Food Wrap	Printed Films
	Closures	Shrink Films	Coated and Laminated Packaging
	Bottles	Trash Bags	
	Prescription Vials	Stretch Film	
		Home and Party	
Rigid Packaging (66% of Adjusted EBITDA for 12 months ended March 30, 2013)			

Edgar Filing: BERRY PLASTICS GROUP INC - Form S-1/A

Our Rigid Packaging business primarily consists of containers, foodservice items, housewares, closures, overcaps, bottles, prescription vials, and tubes. The largest end uses for these products are consumer-oriented end

-2-

Table of Contents

markets such as food and beverage, retail mass marketers, healthcare, personal care and household chemical. We believe that we offer the broadest line of rigid packaging products among industry participants and, according to management estimates, we maintained the #1 or #2 market positions in markets representing approximately 78% of the Rigid Packaging business net sales for the 12 months ended March 30, 2013. Many of our products are manufactured from proprietary molds that we develop and own, which we believe would result in significant costs to our customers to switch to a different supplier. In addition to a complete product line, we have sophisticated decorating capabilities and in-house graphic arts and tooling departments, which allow us to integrate ourselves into, and, we believe, add significant value to, our customers packaging design processes. For the 12 months ended March 30, 2013, our Rigid Packaging business had net sales and Adjusted EBITDA of \$2.6 billion and \$533 million, respectively.

Engineered Materials (24% of Adjusted EBITDA for 12 months ended March 30, 2013)

Our Engineered Materials business primarily consists of pipeline corrosion protection solutions, specialty tapes and adhesives, polyethylene-based film products, and can liners served to a variety of end markets including oil, water and gas infrastructure, industrial and consumer-oriented end markets. We believe that we offer one of the broadest product lines among industry participants and, according to management estimates, we maintained the #1 or #2 market position in markets representing approximately 67% of Engineered Materials net sales for the 12 months ended March 30, 2013. For the 12 months ended March 30, 2013, our Engineered Materials business had net sales and Adjusted EBITDA of \$1.4 billion and \$199 million, respectively.

Flexible Packaging (10% of Adjusted EBITDA for 12 months ended March 30, 2013)

Our Flexible Packaging business consists of high barrier, multilayer film products as well as finished flexible packages such as printed bags and pouches. The largest end uses for our flexible products are consumer-oriented end markets such as food and beverage, medical and personal care. We believe that we offer one of the broadest product lines among industry participants and, according to management estimates, we maintained the #1 or #2 market position in markets representing approximately 88% of Flexible Packaging business net sales for the 12 months ended March 30, 2013. For the 12 months ended March 30, 2013, our Flexible Packaging segment had net sales and Adjusted EBITDA of \$737 million and \$78 million, respectively.

Our Strengths

We believe our strong financial performance is the direct result of the following competitive strengths:

Leading market positions in profitable product lines. Our profitability is enhanced by what we believe are our market-leading positions in high value-added product lines, such as thermoform drink cups, pharmaceutical packaging and thin-wall containers, among others. We have focused on achieving #1 or #2 positions in product lines in which we can realize attractive margins through (1) product innovation, differentiated technology and quality manufacturing processes; (2) leveraging our broad customer network; (3) our low-cost manufacturing platform; and (4) superior customer service. For the 12 months ended March 30, 2013, approximately 76% of our net sales were derived from products in which management estimates we held a #1 or #2 market position.

Leader in developing and commercializing new technologies. We believe our product and technology development capabilities are best-in-class. Our research efforts focus on projects with the potential to deliver unique performance characteristics that add value for our customers, command a sustainable premium price, develop customer loyalty and support the overall profitability of our company. We believe we have a track record of commercializing new products that generate incremental organic profitability well in excess of our company and industry averages. Our thermoformed plastic drink cups are an example of a successful commercialization of a new technology that we internally developed to address an unfilled need of our customers. Since introducing this technology to the market, we have developed the product line into a business which delivered \$382 million of net sales for the 12 months ended March 30, 2013.

Table of Contents

Large and diversified customer base in attractive end markets. We sell our packaging solutions to more than 13,000 customers spanning a diverse mix of leading national, mid-sized regional and local specialty businesses. In fiscal year 2012, no single customer represented more than 3% of net sales and our top ten customers in total represented less than 17% of net sales. We believe the size and diversity of our customer network gives us a competitive advantage as we are able to market new products we develop or acquire seamlessly to a large customer base. Furthermore, our customer network is primarily involved in consumer-oriented end markets, such as food and beverage, healthcare and personal care, which we believe are growth end markets.

Scale and low-cost operations drive profitability. We believe that our proprietary tools and technologies, manufacturing capabilities, operating expertise and purchasing scale provide us with a competitive advantage in the marketplace. Our competitive success is due, in part, to our having capitalized on economies of scale to lower costs in a number of critical functions:

Our large, high-volume equipment, longer production runs and flexible, cross-facility manufacturing capabilities result in lower unit-production costs than many of our competitors;

Our position as one of the largest purchasers of packaging-grade resins globally at approximately 2.5 billion pounds per year provides considerable purchasing power and enhances the reliability of our supply of resins; and

Our global network of 84 strategically located manufacturing facilities provides increased opportunities to optimize transportation costs and realize distribution efficiencies and allows for quick turnaround times to our customers.

Track record in mergers and acquisitions. We have successfully integrated over 30 acquisitions since 1988, including 13 over the past seven years. These acquisitions have enabled us to (1) develop new business platforms; (2) add products to market to our customer network; (3) create incremental profitability by achieving synergies; (4) acquire manufacturing processes and technologies; and (5) capitalize on the best practices of acquired companies. Our management team seeks to acquire companies at attractive, value-enhancing multiples, utilizing what we believe is our flexible, low-cost capital structure to fund the transactions.

Outsized earnings growth, attractive margins and strong free cash flow generation. We believe our earnings growth has exceeded the growth of our industry, with Adjusted EBITDA growing from \$80 million in December 2000 to \$810 million for the 12 months ended March 30, 2013, representing a CAGR of 21%. We also believe we maintain attractive profit margins and generate significant Adjusted Free Cash Flow for our stockholders relative to our peers. For the 12 months ended March 30, 2013, our Adjusted EBITDA margin was 17%, and we generated Adjusted Free Cash Flow of \$283 million. We believe our profit margins and Adjusted Free Cash Flow generation are stable and increasing, driven by new product launches, market share gains, stable input cost pass-through, cost improvement actions, disciplined capital spending, prudent working capital management, minimal contingent liabilities and strategic investments in new projects and acquisitions with synergies.

Proven management and employee culture with significant equity ownership. We believe that our management team is among the deepest and most experienced in the packaging industry. Our management team has been responsible for developing and executing our strategy that has generated consistent year-over-year sales growth and the successful integration of more than 30 acquisitions. We believe our employees have developed a unique culture in which each employee throughout the entire company is aligned, focused and holds each other accountable to achieve goals that drive value creation for our stakeholders.

Table of Contents

Our Strategy

We intend to capitalize on our market-leading position in high value-added plastic consumer packaging and highly engineered materials to increase revenues and profits and maximize cash flow. We seek to achieve this objective by executing on the following strategies:

Develop and commercialize new product technologies. We intend to continue to focus our product and technology development efforts on projects that we believe have significant profit potential. We have several projects in various stages of development that we believe can be commercialized into attractive organic growth and profit opportunities. Certain projects in development involve leveraging what we believe is our unique expertise in both rigid and flexible packaging technologies and manufacturing processes to create unique hybrid packaging solutions that address a need in the market that is not addressable by either technology on its own. We also have certain projects underway that we are developing in close collaboration with specific customers, which upon successful commercialization would allow us to enter into a new market backed by the strength of both our products and our broad existing customer base.

Continue to make acquisitions in our industry. Given the breadth of our product offering, multiple business platforms in rigid and flexible packaging and scale of our customer network, we believe we have the broadest opportunity set for acquisitions in our industry. Furthermore, we believe we have a competitive advantage over our peers in mergers and acquisitions due to our (1) historical acquisition track record; (2) flexibility to utilize purchase price funding sources with attractive cost of capital; and (3) ability to leverage our scale to generate incremental synergies versus our peers. We intend to continue to apply a selective and disciplined acquisition strategy, focused on enhancing our scale, product diversity and geographic reach, while bolstering our financial performance through synergies and additional cash generation. We continue to evaluate acquisition opportunities on an ongoing basis and may at any time be in preliminary discussions with third parties.

Continue to drive Adjusted Free Cash Flow generation. We continually focus on ways to increase our Adjusted Free Cash Flow through new business generation and also disciplined capital and cost management strategies. We intend to further increase profitability and Adjusted Free Cash Flow generation with a continued emphasis on operational excellence, including (1) leveraging our scale to reduce material costs; (2) efficiently reinvesting capital into our manufacturing processes to enhance technological leadership and achieve productivity gains; (3) focusing on ways to streamline operations through overhead rationalization; and (4) working with our engineering and research and development teams to replace existing materials with lower cost alternatives. Furthermore, we believe there are significant incremental opportunities to improve Adjusted EBITDA margins in our Engineered Materials and Flexible Packaging businesses through increased focus on utilizing our asset base on more value-added products.

Increase sales to existing customers. We believe we have significant opportunities to increase our share of packaging sales made to our network of more than 13,000 existing customers. We believe our ability to offer our customers a comprehensive solution through our breadth of product offering yields economic benefits to our customers that cannot be matched by many of our competitors. We will also continue to develop and acquire new products that we can distribute through our customer network, which we believe will allow these products to gain instant scale and traction. We are also working with several customers to expand internationally.

Realize value from recent capital investments and acquisitions. In fiscal 2012, we invested \$160 million of capital in new growth projects. In fiscal 2012, we also undertook a number of cost saving actions including three plant consolidations and the implementation of numerous cost-reduction initiatives.

Table of Contents**Recent Developments***Estimated June 2013 Quarter Results*

For the June 2013 quarter, we estimate that net sales declined to a range of \$1,217 to \$1,227 million from \$1,242 million in the June 2012 quarter. This decrease of 1% to 2% is primarily related to soft customer demand. Also, we estimate that Adjusted EBITDA will be \$206 to \$211 million for the June 2013 quarter compared to \$203 million in the June 2012 quarter. This increase of 1% to 4% is primarily related to cost reduction efforts and productivity improvements partially offset by additional costs associated with organic growth initiatives. Estimated net debt at June 29, 2013 was \$3,917 million. Assuming our initial public offering and 2013 debt refinancing occurred at the beginning of the period, our interest expense for the four quarter period ended June 29, 2013 would be approximately \$48 million lower. Adjusted EBITDA is a non-GAAP measure. The following tables reconcile the company's estimated net income to the company's estimate of Adjusted EBITDA for the June 2013 quarter and four quarter period ended June 29, 2013:

<i>(in millions) (Unaudited)</i>	Quarter Ended June 29, 2013		Four Quarters Ended June 29, 2013	
	Low	High	Low	High
Adjusted EBITDA^(a)	\$ 206	\$ 211	\$ 808	\$ 813
Pro forma acquisitions			4	4
Unrealized cost reductions	1	1	15	15
Operating EBITDA^(a)	\$ 205	\$ 210	\$ 789	\$ 794
Net interest expense	57	57	269	269
Depreciation and amortization	86	86	351	351
Income taxes	22	24	29	31
Restructuring, business optimization and other	3	3	25	25
Debt extinguishment			64	64
Net income	\$ 37	\$ 40	\$ 51	\$ 54

- (a) Adjusted EBITDA and Operating EBITDA should not be considered in isolation or construed as an alternative to our net income (loss) or other measures as determined in accordance with GAAP. In addition, other companies in our industry or across different industries may calculate Adjusted EBITDA and Operating EBITDA and the related definitions differently than we do, limiting the usefulness of our calculation of Adjusted EBITDA and Operating EBITDA as comparative measures. Operating EBITDA and Adjusted EBITDA are among the indicators used by the company's management to measure the performance of the company's operations and thus the company's management believes such information may be useful to investors. Such measures are also among the criteria upon which performance-based compensation may be based.

The preliminary financial and operating results for the June 2013 quarter are forward-looking statements based on preliminary estimates and reflect the best judgment of our management but involve a number of risks and uncertainties which could cause actual results to differ materially from those set forth in our estimates and from past results, performance or achievements. Such preliminary results are subject to finalization of our quarterly financial and accounting procedures and should not be viewed as a substitute for full interim financial statements prepared in accordance with GAAP and reviewed by our auditors. Consequently, there can be no assurances that the actual financial and operating results for the third quarter ended June 29, 2013 will be identical to the preliminary estimates set forth above, and any variation between our actual results and the estimates set forth above may be material. In addition, such results do not purport to indicate our results of operations for any future period beyond the quarter ended June 29, 2013. Ernst & Young LLP has not audited, reviewed, compiled or performed any procedures with respect to the accompanying preliminary financial data. Accordingly, Ernst & Young LLP does not express an opinion or any other form of assurance with respect thereto.

Table of Contents

Interest Rate Swap

In February 2013, the company entered into an interest rate swap transaction to protect \$1 billion of outstanding variable rate term loan debt from future interest rate volatility. The agreement swaps the greater of a three-month variable LIBOR contract or 1.00% for a fixed three-year rate of 2.355%, with an effective date in May 2016 and expiration in May 2019. In June 2013, the company elected to settle this derivative instrument and received \$16 million as a result of this settlement. The offset will be included in Accumulated Other Comprehensive Loss and will be amortized to Interest Expense beginning in May 2016 through May 2019.

Secondary Public Offering

In April 2013, we completed a secondary public offering (the April 2013 public offering) in which the Apollo Funds and the Graham Fund (each as defined in Prospectus Summary Principal Stockholders) sold 18,975,000 shares of common stock at \$17.00 per share, which included 2,475,000 shares purchased by the underwriters upon the exercise in full of their option to purchase additional shares. The selling stockholders received all of the proceeds from the April 2013 public offering, which, net of underwriting fees, totaled \$311 million. The Company received no proceeds and incurred fees of approximately \$1 million related to the April 2013 public offering.

Risk Factors

Participating in this offering involves substantial risk. Our ability to execute our strategy also is subject to certain risks. The risks described under the heading Risk Factors immediately following this summary may cause us not to realize the full benefits of our strengths or may cause us to be unable to successfully execute all or part of our strategy. Some of the more significant challenges and risks include the following:

our substantial indebtedness;

the risk of increases in prices or unavailability of key inputs, such as plastic resins, for our products;

the intense competition we face in the sale of our products;

the risks associated with potential acquisitions that we have completed and that we may pursue as part of our growth strategy;

our reliance on patent and trademark rights and unpatented proprietary know-how and trade secrets; and

the impact of current and future environmental and other governmental requirements and regulations.

Before you participate in this offering, you should carefully consider all of the information in this prospectus, including matters set forth under the heading Risk Factors.

Table of Contents

Principal Stockholders

Our principal stockholders are Apollo Investment Fund VI, L.P., Apollo Investment Fund V, L.P. and their parallel investment funds (collectively, the Apollo Funds), as well as investment funds affiliated with or managed by Graham Partners, Inc. and investment entities affiliated with Donald C. Graham (collectively, the Graham Fund).

The Apollo Funds are affiliated with or indirectly managed by Apollo Global Management, LLC, which, together with its subsidiaries, we refer to in this prospectus as Apollo. Founded in 1990, Apollo is one of the world's largest alternative investment managers, with total assets under management of \$114.3 billion as of March 31, 2013, and a team of 252 investment professionals located in ten offices around the world.

The committed capital of the Graham Partners private investment funds and Graham led co-investments totals approximately \$1.7 billion. Graham Partners is a member of The Graham Group, an alliance of independently owned and operated industrial and investment management businesses, which all share in the common legacy of entrepreneur Donald C. Graham. We refer to Graham Partners, Inc. and The Graham Group in this prospectus as Graham Partners.

Additional Information

Berry Plastics Group, Inc. was incorporated in Delaware on November 18, 2005. The principal executive offices of Berry Plastics Group, Inc. are located at 101 Oakley Street, Evansville, Indiana 47710, and the telephone number there is (812) 424-2904. We also maintain an Internet site at <http://www.berryplastics.com>. Our website and the information contained therein or connected thereto shall not be deemed to be incorporated into this prospectus or registration statement of which this prospectus forms a part and you should not rely on any such information in making your decision whether to purchase our securities.

Table of Contents

The Offering

Common stock offered by the selling stockholders	15,000,000 shares.
Option to Purchase Additional Shares	The selling stockholders have agreed to allow the underwriters to purchase up to an additional 2,250,000 shares, at the public offering price less the underwriting discount, within 30 days from the date of this prospectus.
Common stock to be outstanding after this offering	115,079,207 shares.
Listing	Our common stock is listed on the NYSE under the symbol BERY.
Use of proceeds	We will not receive any of the proceeds from the sale of shares in this offering. The selling stockholders will receive all of the net proceeds and bear all commissions and discounts, if any, from the sale of our common stock pursuant to this prospectus. See Use of Proceeds and Principal and Selling Stockholders.
Dividends	We historically have not paid dividends on our common stock and do not currently anticipate paying dividends on our common stock following this offering. Any declaration and payment of future dividends to holders of our common stock may be limited by restrictive covenants in our debt agreements, and will be at the sole discretion of our Board of Directors and will depend on many factors, including our financial condition, earnings, capital requirements, level of indebtedness, statutory and contractual restrictions applying to the payment of dividends and other considerations that our Board of Directors deems relevant. See Dividend Policy, Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources, and Description of Capital Stock Common Stock.
Conflicts of Interest	Apollo Global Securities, LLC, an underwriter of this offering, is an affiliate of Apollo, our controlling stockholder. Since Apollo beneficially owns more than 10% of our outstanding common stock, a conflict of interest is deemed to exist under Rule 5121(f)(5)(B) of the Conduct Rules of the Financial Industry Regulatory Authority, or FINRA. In addition, because Apollo, as a selling stockholder, will receive more than 5% of the net proceeds of this offering, a conflict of interest also exists under Rule 5121(f)(5)(C)(ii). Accordingly, this offering will be made in compliance with the applicable provisions of Rule 5121. Since Apollo is not primarily responsible for managing this offering and the securities have a bona fide public market, as defined in FINRA Rule 5121(f)(3), the appointment of a qualified independent underwriter is not required pursuant to Rule 5121(a)(1). As such, any underwriter that has a conflict of interest pursuant to Rule 5121 will not confirm sales to accounts in which it exercises

Table of Contents

discretionary authority without the prior written consent of the customer. See Underwriting (Conflicts of Interest).

Risk Factors

You should carefully read and consider the information set forth under Risk Factors beginning on page 13 of this prospectus and all the other information set forth in this prospectus before investing in our stock.

Except as otherwise indicated, all information in this prospectus:

assumes no exercise of the underwriters' option to purchase additional shares to buy up to 2,250,000 additional shares from the selling stockholders;

assumes a public offering price of \$22.21 per share, the closing price of our common stock on the NYSE on July 12, 2013; and

does not give effect to the exercise of outstanding options or shares reserved for issuance under the 2006 Equity Incentive Plan or the 2012 Long-Term Incentive Plan.

Table of Contents**SUMMARY HISTORICAL CONSOLIDATED FINANCIAL DATA**

The following table sets forth certain historical financial data for Berry Plastics Group, Inc. Our fiscal year is the 52- or 53-week period ending generally on the Saturday closest to September 30. Fiscal 2010 represents a 53-week period. The summary historical financial data as of and for the fiscal years ended September 29, 2012, October 1, 2011 and October 2, 2010 have been derived from our audited consolidated financial statements and related notes included in this prospectus. The summary historical financial data set forth below should be read in conjunction with and is qualified in its entirety by reference to the audited consolidated financial statements and the related notes included in this prospectus.

The summary historical financial data as of and for the two quarterly periods ended March 30, 2013 and March 31, 2012 have been derived from our unaudited financial statements included in this prospectus. The unaudited interim consolidated financial statements have been prepared on the same basis as the audited consolidated financial statements and reflect all adjustments, consisting only of normal recurring adjustments, necessary for a fair presentation of the financial information set forth in those statements.

The unaudited financial data for the last twelve months ending March 30, 2013 has been calculated by subtracting the data for the two quarterly periods ended March 31, 2012 from the data for the year ended September 29, 2012, and adding the data for the two quarterly periods ended March 30, 2013.

Our historical results are not necessarily indicative of results to be expected in any future period, and results for the quarterly periods ended March 30, 2013, are not necessarily indicative of results to be expected for the full year.

The following financial information should be read in conjunction with Selected Historical Consolidated Financial Data, Management's Discussion and Analysis of Financial Condition and Results of Operations, and our historical consolidated financial statements and the related notes included in this prospectus.

(a) Year ended October 1, 2011 includes a \$165 non-cash goodwill impairment.

(b) Represents total current assets less total current liabilities.

(c) Represents pro forma interest expense assuming the following occurred at the beginning of the respective periods: (i) Berry Plastics Corporation's incurrence of \$1.4 billion of additional incremental term loans and (ii) repayment of Berry Plastics Corporation's (a) Second Priority Senior Secured Floating Rate Notes due 2014, (b) First Priority Senior Secured Floating Rate Notes due 2015, (c) 10¹/₄% Senior Subordinated Notes due 2016, (d) 8¹/₄% First Priority Senior Secured Notes due 2015 and (e) 11% Senior Subordinated Notes due 2016. See Management's Discussion and Analysis of Financial Condition and Results of Operations - Recent Developments.

(d) Year ended September 29, 2012 represents the pro forma income (loss) per share and weighted average shares outstanding assuming our initial public offering and the 2013 debt refinancing occurred at the beginning of the period.

Table of Contents

RISK FACTORS

Investing in our common stock involves a high degree of risk. You should carefully consider the risk factors set forth below as well as the other information contained in this prospectus before investing in our common stock. Any of the following risks could materially and adversely affect our business, financial condition or results of operations. In such a case, you may lose part or all of your original investment.

Risks Related to Our Business

Our substantial indebtedness could affect our ability to meet our obligations and may otherwise restrict our activities.

We have a significant amount of indebtedness. As of March 30, 2013, we had total indebtedness (including current portion) of \$3,999 million, with cash and cash equivalents totaling \$16 million. We would have been able to borrow a further \$518 million under the revolving portion of our senior secured credit facilities, subject to the solvency of our lenders to fund their obligations and our borrowing base calculations. We are permitted by the terms of our debt instruments to incur substantial additional indebtedness, subject to the restrictions therein. Our inability to generate sufficient cash flow to satisfy our debt obligations, or to refinance our obligations on commercially reasonable terms, would have a material adverse effect on our business, financial condition and results of operations.

Our substantial indebtedness could have important consequences. For example, it could:

limit our ability to borrow money for our working capital, capital expenditures, debt service requirements or other corporate purposes;

require us to dedicate a substantial portion of our cash flow to payments on our indebtedness, which would reduce the amount of cash flow available to fund working capital, capital expenditures, product development and other corporate requirements;

increase our vulnerability to general adverse economic and industry conditions; and

limit our ability to respond to business opportunities, including growing our business through acquisitions.

In addition, the credit agreements and indentures governing our current indebtedness contain, and any future debt instruments would likely contain, financial and other restrictive covenants, which will impose significant operating and financial restrictions on us, including restrictions on our ability to, among other things:

incur or guarantee additional debt;

pay dividends and make other restricted payments;

create or incur certain liens;

make certain investments;

engage in sales of assets and subsidiary stock;

enter into transactions with affiliates;

transfer all or substantially all of our assets or enter into merger or consolidation transactions; and

make capital expenditures.

As a result of these covenants, we will be limited in the manner in which we conduct our business, and we may be unable to engage in favorable business activities or finance future operations or capital needs. Furthermore, a failure to comply with these covenants could result in an event of default, which, if not cured or waived, could have a material adverse effect on our business, financial condition, and results of operations.

Table of Contents

Increases in resin prices or a shortage of available resin could harm our financial condition and results of operations.

To produce our products, we use large quantities of plastic resins. Plastic resins are subject to price fluctuations, including those arising from supply shortages and changes in the prices of natural gas, crude oil and other petrochemical intermediates from which resins are produced. Over the past several years, we have at times experienced rapidly increasing resin prices. If rapid increases in resin prices continue, our revenue and profitability may be materially and adversely affected, both in the short term as we attempt to pass through changes in the price of resin to customers under current agreements and in the long term as we negotiate new agreements or if our customers seek product substitution.

We source plastic resin primarily from major industry suppliers. We have long-standing relationships with certain of these suppliers but have not entered into a firm supply contract with any of them. We may not be able to arrange for other sources of resin in the event of an industry-wide general shortage of resins used by us, or a shortage or discontinuation of certain types of grades of resin purchased from one or more of our suppliers. In addition, the largest supplier of the company's total resin material requirements represented approximately 20% of purchases for the twelve months ended March 30, 2013. Any such shortage may materially negatively impact our competitive position versus companies that are able to better or more cheaply source resin.

We may not be able to compete successfully and our customers may not continue to purchase our products.

We face intense competition in the sale of our products and compete with multiple companies in each of our product lines. We compete on the basis of a number of considerations, including price, service, quality, product characteristics and the ability to supply products to customers in a timely manner. Our products also compete with metal, glass, paper and other packaging materials as well as plastic packaging materials made through different manufacturing processes. Some of these competitive products are not subject to the impact of changes in resin prices which may have a significant and negative impact on our competitive position versus substitute products. Our competitors may have financial and other resources that are substantially greater than ours and may be better able than us to withstand higher costs. In addition, our success may depend on our ability to adapt to technological changes, and if we fail to enhance existing products and develop and introduce new products and new production technologies in a timely fashion in response to changing market conditions and customer demands, our competitive position could be materially and adversely affected. Furthermore, some of our customers do and could in the future choose to manufacture the products they require for themselves. Each of our product lines faces a different competitive landscape. Competition could result in our products losing market share or our having to reduce our prices, either of which would have a material adverse effect on our business and results of operations and financial condition. In addition, since we do not have long-term arrangements with many of our customers, these competitive factors could cause our customers to shift suppliers and/or packaging material quickly.

We may pursue and execute acquisitions, which could adversely affect our business.

As part of our growth strategy, we plan to consider the acquisition of other companies, assets and product lines that either complement or expand our existing business and create economic value. We cannot assure you that we will be able to consummate any such transactions or that any future acquisitions will be consummated at acceptable prices and terms.

We continually evaluate potential acquisition opportunities in the ordinary course of business, including those that could be material in size and scope. Acquisitions involve a number of special risks, including:

the diversion of management's attention and resources to the assimilation of the acquired companies and their employees and to the management of expanding operations;

the incorporation of acquired products into our product line;

Table of Contents

problems associated with maintaining relationships with employees and customers of acquired businesses;

the increasing demands on our operational systems;

ability to integrate and implement effective disclosure controls and procedures and internal controls for financial reporting within the allowable time frame as permitted by Sarbanes-Oxley Act;

possible adverse effects on our reported operating results, particularly during the first several reporting periods after such acquisitions are completed; and

the loss of key employees and the difficulty of presenting a unified corporate image.

We may become responsible for unexpected liabilities that we failed or were unable to discover in the course of performing due diligence in connection with historical acquisitions and any future acquisitions. We have typically required selling stockholders to indemnify us against certain undisclosed liabilities. However, we cannot assure you that indemnification rights we have obtained, or will in the future obtain, will be enforceable, collectible or sufficient in amount, scope or duration to fully offset the possible liabilities associated with the business or property acquired. Any of these liabilities, individually or in the aggregate, could have a material adverse effect on our business, financial condition and results of operations.

In addition, we may not be able to successfully integrate future acquisitions without substantial costs, delays or other problems. The costs of such integration could have a material adverse effect on our operating results and financial condition. Although we conduct what we believe to be a prudent level of investigation regarding the businesses we purchase, in light of the circumstances of each transaction, an unavoidable level of risk remains regarding the actual condition of these businesses. Until we actually assume operating control of such businesses and their assets and operations, we may not be able to ascertain the actual value or understand the potential liabilities of the acquired entities and their operations. Furthermore, we may not realize all of the cost savings and synergies we expect to achieve from our current strategic initiatives due to a variety of risks, including, but not limited to, difficulties in integrating shared services with our business, higher than expected employee severance or retention costs, higher than expected overhead expenses, delays in the anticipated timing of activities related to our cost-saving plans and other unexpected costs associated with operating our business. If we are unable to achieve the cost savings or synergies that we expect to achieve from our strategic initiatives, it could adversely affect our business, financial condition and results of operations.

We may not be successful in protecting our intellectual property rights, including our unpatented proprietary know-how and trade secrets, or in avoiding claims that we infringed on the intellectual property rights of others.

In addition to relying on patent and trademark rights, we rely on unpatented proprietary know-how and trade secrets, and employ various methods, including confidentiality agreements with employees and consultants, customers and suppliers to protect our know-how and trade secrets. However, these methods and our patents and trademarks may not afford complete protection and there can be no assurance that others will not independently develop the know-how and trade secrets or develop better production methods than us. Further, we may not be able to deter current and former employees, contractors and other parties from breaching confidentiality agreements and misappropriating proprietary information and it is possible that third parties may copy or otherwise obtain and use our information and proprietary technology without authorization or otherwise infringe on our intellectual property rights. Additionally, we have licensed, and may license in the future, patents, trademarks, trade secrets, and similar proprietary rights to third parties. While we attempt to ensure that our intellectual property and similar proprietary rights are protected when entering into business relationships, third parties may take actions that could materially and adversely affect our rights or the value of our intellectual property, similar proprietary rights or reputation. In the future, we may also rely on litigation to enforce our intellectual property rights and contractual rights, and, if not successful, we may not be able to protect the value of our intellectual property. Any litigation could be protracted and costly and could have a material adverse effect on our business and results of operations regardless of its outcome.

Table of Contents

Our success depends in part on our ability to obtain, or license from third parties, patents, trademarks, trade secrets and similar proprietary rights without infringing on the proprietary rights of third parties. Although we believe our intellectual property rights are sufficient to allow us to conduct our business without incurring liability to third parties, our products may infringe on the intellectual property rights of such persons. Furthermore, no assurance can be given that we will not be subject to claims asserting the infringement of the intellectual property rights of third parties seeking damages, the payment of royalties or licensing fees and/or injunctions against the sale of our products. Any such litigation could be protracted and costly and could have a material adverse effect on our business, financial condition and results of operations.

Current and future environmental and other governmental requirements could adversely affect our financial condition and our ability to conduct our business.

Our operations are subject to federal, state, local, and foreign environmental laws and regulations that impose limitations on the discharge of pollutants into the air and water, establish standards for the treatment, storage and disposal of solid and hazardous wastes and require cleanup of contaminated sites. While we have not been required historically to make significant capital expenditures in order to comply with applicable environmental laws and regulations, we cannot predict with any certainty our future capital expenditure requirements because of continually changing compliance standards and environmental technology. Furthermore, violations or contaminated sites that we do not know about (including contamination caused by prior owners and operators of such sites or newly discovered information) could result in additional compliance or remediation costs or other liabilities, which could be material. We have limited insurance coverage for potential environmental liabilities associated with historic and current operations and we do not anticipate increasing such coverage in the future. We may also assume significant environmental liabilities in acquisitions. In addition, federal, state, local, and foreign governments could enact laws or regulations concerning environmental matters that increase the cost of producing, or otherwise adversely affect the demand for, plastic products. Legislation that would prohibit, tax or restrict the sale or use of certain types of plastic and other containers, and would require diversion of solid wastes such as packaging materials from disposal in landfills, has been or may be introduced in the U.S. Congress, state legislatures, and other legislative bodies. While container legislation has been adopted in a few jurisdictions, similar legislation has been defeated in public referenda in several states, local elections and many state and local legislative sessions. Although we believe that the laws promulgated to date have not had a material adverse effect on us, there can be no assurance that future legislation or regulation would not have a material adverse effect on us. Furthermore, a decline in consumer preference for plastic products due to environmental considerations could have a negative effect on our business.

The Food and Drug Administration, which we refer to as the FDA, regulates the material content of direct-contact food and drug packages we manufacture pursuant to the Federal Food, Drug and Cosmetic Act. Furthermore, some of our products are regulated by the Consumer Product Safety Commission, which we refer to as the CPSC, pursuant to various federal laws, including the Consumer Product Safety Act and the Poison Prevention Packaging Act. Both the FDA and the CPSC can require the manufacturer of defective products to repurchase or recall these products and may also impose fines or penalties on the manufacturer. Similar laws exist in some states, cities and other countries in which we sell products. In addition, laws exist in certain states restricting the sale of packaging with certain levels of heavy metals and imposing fines and penalties for noncompliance. Although we use FDA-approved resins and pigments in our products that directly contact food and drug products and we believe our products are in material compliance with all applicable requirements, we remain subject to the risk that our products could be found not to be in compliance with these and other requirements. A recall of any of our products or any fines and penalties imposed in connection with noncompliance could have a materially adverse effect on us. See Business Environmental Matters and Government Regulation.

Table of Contents

In the event of a catastrophic loss of one of our key manufacturing facilities, our business would be adversely affected.

While we manufacture our products in a large number of diversified facilities and maintain insurance covering our facilities, including business interruption insurance, a catastrophic loss of the use of all or a portion of one of our key manufacturing facilities due to accident, labor issues, weather conditions, natural disaster or otherwise, whether short or long-term, could have a material adverse effect on us.

Goodwill and other intangibles represent a significant amount of our net worth, and a future write-off could result in lower reported net income and a reduction of our net worth.

As of March 30, 2013, the net value of our goodwill and other intangibles was \$2,579 million. We are no longer required or permitted to amortize goodwill reflected on our balance sheet. We are, however, required to evaluate goodwill reflected on our balance sheet when circumstances indicate a potential impairment, or at least annually, under the imp
