Copies of the code of business conduct and ethics and our corporate governance guidelines are posted on the Corporate Governance section of our website, which is located at www.agtc.com. If we make any substantive amendments to, or grant any waivers from, the code of business conduct and ethics for any officer or director, we will disclose the nature of such amendment or waiver on our website.

Section 16(a) Beneficial Ownership Reporting Compliance

Section 16(a) of the Securities Exchange Act of 1934 requires our directors and executive officers, and persons who beneficially own more than ten percent of a registered class of our equity securities, to file reports of ownership of, and transactions in, our securities with the Securities and Exchange Commission. These directors, executive officers and ten-percent stockholders are also required to furnish us with copies of all Section 16(a) forms they file.

Based solely on a review of the copies of such forms received by us, and on written representations from certain reporting persons, we believe that during fiscal year 2016 our directors, executive officers and ten-percent stockholders complied with all applicable Section 16(a) filing requirements, with the following exceptions:

The board of directors has also determined that each of Ms. VanLent and Mr. Peacock (until his resignation in August 2016) qualifies as an “audit committee financial expert,” as defined by applicable rules of the NASDAQ Stock Market and the SEC.

ITEM 11. EXECUTIVE COMPENSATION

Executive Summary

The compensation of our executive officers is determined by the compensation committee of our Board of Directors, and discussed by the committee throughout the year. Our formal annual compensation review process generally takes place during the first quarter of each fiscal year, after the results of the previous fiscal year are known. Annual variable compensation and discretionary cash bonuses for the completed fiscal year, if any, and long-term equity-based incentive compensation, if any, are awarded by the committee on a discretionary basis, generally during the first fiscal quarter, after a review of the previous fiscal year’s results.

Our compensation committee is comprised entirely of non-employee Directors, each of whom our Board of Directors has determined is independent within the meaning of the rules of The NASDAQ Stock Market. The members of the compensation committee have substantial managerial experience and wide contacts in the biotechnology and biopharmaceutical industries and in the broader healthcare industry, upon which they rely in making their determinations. The committee also takes into account publicly available information concerning the compensation practices of other companies in the biotechnology industry. This information is used by the committee informally and primarily for purposes of comparison to ascertain whether our compensation practices for our executive officers are broadly competitive.

Our Chief Executive Officer makes recommendations with regard to the compensation of our executive officers other than herself, which are reviewed by the compensation committee. Executive officers do not participate in the process of establishing their own annual compensation.

The committee does not have a formal benchmarking policy or a practice of establishing the amount of any element of our executive officers' compensation by reference to a fixed range of percentages or percentiles of the compensation of any peer or comparison group. As a result, the determinations made by the members of our compensation committee are guided to a significant degree by their collective judgment and experience. During fiscal year 2016, the committee retained a compensation consultant, Aon Consulting's Radford Surveys + Consulting, or Radford, to assist the committee in assessing the form and amount of compensation paid to our executives.

Our compensation committee has reviewed our compensation programs and believes that our compensation programs have not encouraged or rewarded excessive or inappropriate risk taking.

Narrative Disclosure to Summary Compensation Table

We review compensation annually for all of our employees, including our executives. In setting executive base salaries and bonuses and granting equity incentive awards, we consider compensation for comparable positions in the market, the historical compensation levels of our executives, individual performance as compared to our expectations and objectives, our desire to motivate our employees to achieve short- and long-term results that are in the best interests of our stockholders, and a long-term commitment to our company. We do not target a specific competitive position or a specific mix of compensation among base salary, bonus or long-term incentives.

Our compensation committee reviews and discusses management's proposed compensation with the chief executive officer for all executives other than our chief executive officer. Based on those discussions and its discretion, the compensation committee then determines the compensation and benefits of our executive officers.

In fiscal year 2016, our compensation committee engaged Radford to assist us with the identification of an appropriate peer group of companies for purposes of benchmarking the competitiveness of our executive compensation. Our compensation committee will evaluate the need for revisions to our executive compensation program to ensure that our program is competitive with the companies with which we compete for executive talent and that it is appropriate for a public company.

INDEPENDENCE

Policies and Procedures for Related-Person Transactions

We have adopted a written related-person transactions policy that sets forth our policies and procedures regarding the identification, review, consideration, approval and oversight of “related-person transactions.” For purposes of our policy only, a “related-person transaction” is a past, present or future transaction, arrangement or relationship (or any series of similar transactions, arrangements or relationships) in which we and any “related person” are participants involving an amount that exceeds \$120,000.

Transactions involving compensation for services provided to us by an employee, consultant or director are not considered related-person transactions under this policy. A “related person,” as determined since the beginning of our last fiscal year, is any executive officer, director or a holder of more than five percent of our common stock, including any of their immediate family members and any entity owned or controlled by such persons.

The policy imposes an affirmative duty upon each director and executive officer to identify any transaction involving them, their affiliates or immediate family members that may be considered a related party transaction before such person engages in the transaction. Under the policy, where a transaction has been identified as a related-person transaction, management must present information regarding the proposed related-person transaction to our audit committee (or, where review by our audit committee would be inappropriate, to another independent body of our board of directors) for review. The presentation must include a description of, among other things, the material facts, the direct and indirect interests of the related persons, the benefits of the transaction to us and whether any alternative transactions are available.

Our audit committee is responsible for reviewing and approving in advance any related-person transactions. In determining whether to approve a related-person transaction, the audit committee will take into account, among other factors it deems appropriate, whether the related-person transaction is on terms no less favorable than terms generally available to an unaffiliated third-person under the same or similar circumstances and the extent of the related person's interest in the transaction.

Agreements with Our Stockholders

Biogen Collaboration and License Agreement

On July 1, 2015, we entered into a Collaboration and License Agreement, which we refer to as the collaboration agreement, with Biogen MA Inc., a wholly owned subsidiary of Biogen Inc. ("Biogen"), pursuant to which we and Biogen agreed to collaborate to develop, seek regulatory approval for and commercialize gene therapy products to treat X-linked juvenile retinoschisis ("XLRs"), X-linked retinitis pigmentosa ("XLRP") and discovery programs targeting three indications based on our adeno-associated virus vector technologies. The collaboration agreement became effective in August 2015.

Under the collaboration agreement, we will be eligible to receive upfront payments, option exercise fees and milestone payments aggregating over \$1 billion, including an upfront license fee of \$94.0 million which we received on August 19, 2015 and a portion of which was allocated to fund our costs incurred in connection with budgeted research and development activities for the XLRs and XLRP programs as well as the discovery programs. During fiscal year 2016, we also earned and received a \$5.0 million milestone payment from Biogen for the XLRs program and we recorded other revenue of \$585,000, primarily comprised of reimbursable costs for post-funding development activities that we conducted pursuant to the terms of this collaboration agreement with Biogen. In the event that Biogen exercises its option to obtain an exclusive commercial license for one or more discovery products that are designated as clinical candidates, we are eligible to receive an option exercise fee for each drug candidate. In addition, we are eligible to receive development milestone payments upon the achievement of specified regulatory, clinical development and commercialization milestones of up to \$472.5 million collectively for the two lead programs and, together with option exercise fees, up to \$592.5 million across the discovery programs. Biogen also has the right to substitute up to two discovery programs, with a limited ability to reinstate such substituted programs within six months. In the event Biogen elects to reinstate such substituted programs, we are eligible to receive additional option exercise fees and potential development, regulatory and sales milestone payments.

Budgeted development expenses for the programs are funded by Biogen through an allocation of the upfront license fee described below, subject to cost sharing for budget overruns and additional clinical trials that may be required prior to a pivotal trial for each of the XLRs and XLRP programs. During our development of the XLRs and XLRP products, Biogen retains the right to step in and take over the remaining development activities under specified circumstances. When Biogen assumes development responsibility, budgeted development expenses are paid by Biogen, subject to cost sharing for additional development activities. For each of the XLRs and XLRP programs, we have an option to share in development costs and resulting profits as well as an option to co-promote the second product approved in the United States. The collaboration agreement also provides for discovery programs targeting three indications whereby we will conduct discovery, research and development activities for those additional drug candidates through the stage of clinical candidate designation, after which, Biogen may exercise an option to continue

to develop, seek regulatory approval for and commercialize the designated clinical candidate.

Under the collaboration agreement, we granted Biogen an exclusive, royalty-bearing license, with the right to grant sublicenses, to use adeno-associated virus vector technology and other technology controlled by us for the purpose of researching, developing, manufacturing and commercializing licensed products developed under the agreement. We also granted Biogen a non-exclusive, worldwide, royalty-free, fully paid license, with the right to grant sublicenses, of our interest in other intellectual property developed pursuant to the collaboration agreement. Biogen agreed to pay royalties for each licensed product at tiered rates ranging from high single digit to mid-teen percentages of annual net sales of the XLRS or XLRP products and rates ranging from mid-single digit to low-teen percentages of annual net sales for the discovery products.

Biogen Manufacturing Agreement

In connection with the collaboration agreement, we also entered into a Manufacturing License and Technology Transfer Agreement, or manufacturing license, on July 1, 2015 under which Biogen will receive an exclusive license to use AGTC's proprietary technology platform to make AAV vectors for up to six genes based on the selection process specified in the manufacturing license. For each gene selected, we are eligible to receive a selection fee, clinical and regulatory development milestones, and commercial sales milestones. Biogen will also pay us incremental royalties for each licensed product that are a low single digit percentage of annual net sales of each product containing a gene of interest.

Biogen Equity Agreement

We also entered into a Common Stock Purchase Agreement with Biogen, or equity agreement, on July 1, 2015 pursuant to which Biogen purchased 1,453,957 shares of our common stock, at a purchase price equal to \$20.63 per share, for an aggregate purchase price in cash equal to \$30 million. The closing of the share purchase occurred contemporaneously with the effectiveness of the collaboration agreement on August 19, 2015. As a result of this stock purchase, Biogen beneficially owns approximately 8.1% of our total shares of common stock outstanding as of October 18, 2016.

We believe that the terms obtained and the consideration that we received, as applicable, in connection with the transactions with Biogen described above were comparable to terms available or the amounts that would be paid or received, as applicable, in arm's-length transactions.

Director Independence

Our Board of Directors has determined that, with the exception of Ms. Washer who is our employee, all of the members of our Board of Directors are "independent directors" under the applicable rules of the Nasdaq Stock Market. Our Board of Directors has also determined that each member of our Audit Committee, Compensation Committee and Nominating and Corporate Governance Committee is an "independent director" under the rules of the Nasdaq Stock Market applicable to such committees.
