NOTES TO INTERIM CONSOLIDATED FINANCIAL STATEMENTS

September 30, 2017

(unaudited)

1 Basis of presentation

These unaudited interim consolidated financial statements of Canadian Pacific Railway Limited ("CP", or "the Company"), expressed in Canadian dollars, reflect management's estimates and assumptions that are necessary for their fair presentation in conformity with generally accepted accounting principles in the United States of America ("GAAP"). They do not include all disclosures required under GAAP for annual financial statements and should be read in conjunction with the 2016 annual consolidated financial statements and notes included in CP's 2016 Annual Report on Form 10-K. The accounting policies used are consistent with the accounting policies used in preparing the 2016 annual consolidated financial statements, except for the newly adopted accounting policies discussed in Note 2.

CP's operations can be affected by seasonal fluctuations such as changes in customer demand and weather-related issues. This seasonality could impact quarter-over-quarter comparisons.

In management's opinion, the unaudited interim consolidated financial statements include all adjustments (consisting of normal and recurring adjustments) necessary to present fairly such information. Interim results are not necessarily indicative of the results expected for the fiscal year.

2 Accounting changes

Implemented in 2017

Compensation - Stock Compensation

In March 2016, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2016-09, Improvements to Employee Share-based Payment Accounting, under FASB Accounting Standards Codification ("ASC") Topic 718. The amendments clarify the guidance relating to treatment of excess tax benefits and deficiencies, acceptable forfeiture rate policies, and treatment of cash paid by an employer when directly withholding shares for tax-withholding purposes and the requirement to treat such cash flows as a financing activity. As a result of this ASU, excess tax benefits are no longer recorded in additional paid-in capital and instead are applied against taxes payable or recognized in the interim consolidated statement of income. This ASU was effective for CP beginning on January 1, 2017. The Company has determined that there were no significant changes to disclosure or financial statement presentation and changes in accounting for excess tax benefits and deficiencies were not material as a result of adoption.

Simplifying the Measurement of Inventory

In July 2015, the FASB issued ASU 2015-11, Simplifying the Measurement of Inventory under FASB ASC Topic 330. The amendments require that reporting entities measure inventory at the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation. The amendments apply to inventory that is measured using the first-in, first-out or average cost basis. This ASU was effective for CP beginning on January 1, 2017 and was applied prospectively. The Company determined there were no changes to disclosure, financial statement presentation, or valuation of inventory as a result of adoption.

Future changes

Leases

In February 2016, the FASB issued ASU 2016-02, Leases under FASB ASC Topic 842 which will supersede the lease recognition and measurement requirements in Topic 840 Leases. This new standard requires recognition of right-of-use assets and lease liabilities by lessees for those leases classified as finance and operating leases with a maximum term exceeding 12 months. For CP this new standard will be effective for interim and annual periods commencing January 1, 2019. Entities are required to use a modified retrospective approach to adopt this new standard meaning there will be no impact to the consolidated statements of income; however, the comparative consolidated balance sheet will be adjusted to reflect the provisions of this standard. The Company has a detailed plan to implement the new standard and is assessing contractual arrangements, through a cross

Edgar Filing: CANADIAN PACIFIC RAILWAY LTD/CN - Form 10-Q

functional team, that may qualify as leases under the new standard. CP is also working with a vendor to implement a lease management system which will assist in delivering the required accounting changes. During the third quarter, CP's cross functional team and the vendor finalized system requirements and developed work flows and testing scenarios that will permit system implementation and parallel testing in 2018 for CP's lease system solution. The impact of the new standard will be a material increase to right of use assets and lease liabilities on the consolidated balance sheet, primarily, as a result of operating leases currently not recognized on the balance sheet. The Company does not anticipate a material impact to the consolidated statement of income and is currently evaluating the impact adoption of this new standard will have on disclosure.

8

Table of Contents**Revenue from Contracts with Customers**

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers under FASB ASC Topic 606. In March 2016, the FASB issued amendment ASU 2016-08, Revenue from Contracts with Customers: Principal versus Agent Considerations as an update under FASB ASC Topic 606. The amendments clarify the principal versus agent guidance in determining whether to recognize revenue on a gross or net basis. The guidance in Topic 606, as amended, will be effective for CP for interim and annual periods commencing January 1, 2018, and CP has the option of adopting the new standard by using either a full retrospective or a modified retrospective approach. CP has decided to adopt this new standard using a modified retrospective approach. CP has analyzed contracts for a significant proportion of the Company's annual rail freight revenue, which represents greater than 95% of CP's annual revenues, and has concluded that recognizing these revenues over time as rail freight services are performed continues to be appropriate. CP continues to perform detailed reviews of a variety of specific contractual terms. These include assessing potential additional performance obligations, certain arrangements in the context of the new guidance on principal versus agent, contract origination and fulfillment costs, variable compensation and an assessment of required new disclosures. At this time CP does not expect a material change to revenue recognition from adopting this standard.

Intangibles - Goodwill and Other

In January 2017, the FASB issued ASU 2017-04, Simplifying the Test for Goodwill Impairment under FASB ASC Topic 350. This is intended to simplify how an entity is required to test goodwill for impairment by eliminating Step 2 from the goodwill impairment test. Step 2 measures a goodwill impairment loss by comparing the implied fair value of a reporting unit's goodwill with the carrying amount of that goodwill. The amendments are effective for CP beginning on January 1, 2020. Entities are required to apply the amendments in this update prospectively from the date of adoption. The Company does not anticipate that the adoption of this ASU will impact CP's financial statements as there is a sufficient excess between the fair value and carrying value of CP's goodwill. Furthermore CP expects to continue to apply the Step 0 qualitative assessment when testing for goodwill impairment.

Compensation - Retirement Benefits

In March 2017, the FASB issued ASU 2017-07, Improving the Presentation of Net Periodic Pension Cost and Net Periodic Post-retirement Benefit Cost under FASB ASC Topic 715. The amendments clarify presentation requirements for net periodic pension cost and net periodic post-retirement benefit cost and require that an employer report the current service cost component in the same line item or items as other compensation costs arising from services rendered by the pertinent employees during the period. The other components of net periodic benefit cost are required to be presented in the consolidated statement of income separately from the current service cost component and outside a subtotal of income from operations if one is presented. The amendments also restrict capitalization to the current service cost component when applicable. The amendments are effective for CP beginning on January 1, 2018. The amendments related to presentation are required to be applied retrospectively and the restrictions on capitalization of the current service cost component are applicable prospectively on the date of adoption. The impacts of the reclassification are detailed as follows:

	For the three months ended September 30	For the nine months ended September 30	Year ended December 31⁽¹⁾	2017	2016	2017	2016	2017	2016
(in millions of Canadian dollars)									
Decrease in operating income	\$ 68	\$ 41	\$ 203	\$ 127	\$ 272	\$ 167			

⁽¹⁾ December 31, 2017 figure is an estimate.

There will be no change to net income or earnings per share as a result of adoption of this new standard. The new guidance restricting capitalization of pensions to the current service cost component of net periodic benefit cost will have no impact to operating income or amounts capitalized because the Company currently only capitalizes an appropriate portion of current service cost for self-constructed properties. CP is currently assessing the disclosure requirements of this ASU.

Derivatives and Hedging

In August 2017, the FASB issued ASU 2017-12, Targeted Improvements to Accounting for Hedging Activities, under FASB ASC Topic 815. This is intended to improve the financial reporting of hedging relationships to better portray the economic results of an

Edgar Filing: CANADIAN PACIFIC RAILWAY LTD/CN - Form 10-Q

entity's risk management activities in its financial statements. These amendments also make targeted improvements to simplify the application of the hedge accounting guidance in current GAAP. The amendments are effective for CP beginning on January 1, 2019, although early adoption is permitted. Entities are required to apply the amendments in this update to hedging relationships existing on the date of adoption, reflected as of the beginning of the fiscal year of adoption. The Company does not anticipate a material impact to the consolidated statement of income and is currently evaluating the impact adoption of this new standard will have on disclosure. The Company is evaluating the possibility of early adopting this standard with a January 1, 2018 effective date.

Table of Contents**4 Disposition of properties**

In March 2016, the Company completed the sale of CP's Arbutus Corridor (the "Arbutus Corridor") to the City of Vancouver for gross proceeds of \$55 million. The agreement allows the Company to share in future proceeds on the eventual development and/or sale of certain parcels of the Arbutus Corridor. The Company recorded a gain on sale of \$50 million (\$43 million after tax) within "Purchased services and other" from the transaction during the first quarter of 2016.

6 Income taxes

	For the three months ended September 30		For the nine months ended September 30	
(in millions of Canadian dollars)	2017	2016	2017	2016
Current income tax expense	\$93	\$73	\$288	\$177
Deferred income tax expense	77	50	168	233
Income tax expense	\$170	\$123	\$456	\$410

During the three months ended September 30, 2017, legislation was enacted to increase the Illinois state income tax rate. As a result of this change, the Company recorded a deferred tax expense of \$3 million in the third quarter of 2017 related to the revaluation of its deferred income tax balances as at January 1, 2017.

During the nine months ended September 30, 2017, the Company recorded a net deferred tax recovery of \$14 million related to the revaluation of its deferred income tax balances as at January 1, 2017. This was due to legislation enacted in the second quarter to decrease the Saskatchewan provincial corporate income tax rate which resulted in a \$17 million recovery, partially offset by the \$3 million expense described above.

The effective tax rates for the three and nine months ended September 30, 2017, were 24.95% and 24.28%, respectively, compared to 26.23% and 25.26%, respectively, for the same periods in 2016.

The estimated 2017 annual effective tax rate for the three months ended September 30, 2017, excluding the discrete items of the foreign exchange gain of \$105 million on the Company's U.S. dollar-denominated debt and the \$3 million tax expense described above, is 26.50%.

Edgar Filing: CANADIAN PACIFIC RAILWAY LTD/CN - Form 10-Q

The estimated 2016 annual effective tax rate for the three months ended September 30, 2016, excluding the discrete items of the foreign exchange loss of \$46 million on the Company's U.S. dollar-denominated debt, and the settlement charge in respect of a corporate legal claim of \$25 million, was 25.17%.

The estimated 2017 annual effective tax rate for the nine months ended September 30, 2017, excluding the discrete items of the management transition recovery of \$51 million related to the retirement of the Company's Chief Executive Officer, the foreign exchange gain of \$200 million on the Company's U.S. dollar-denominated debt, an insurance recovery of \$10 million on a legal settlement, the \$13 million charge associated with the hedge roll and de-designation and the \$14 million net tax recovery due to tax rate changes described above, is 26.50%.

The estimated 2016 annual effective tax rate for the nine months ended September 30, 2016, excluding the discrete items of the foreign exchange gain of \$153 million on the Company's U.S. dollar-denominated debt and the settlement charge in respect of a corporate legal claim of \$25 million, was 26.50%.

Table of Contents**7 Earnings per share**

At September 30, 2017, the number of shares outstanding was 145.0 million (September 30, 2016 - 146.3 million).

Basic earnings per share have been calculated using net income for the period divided by the weighted-average number of shares outstanding during the period.

The number of shares used in earnings per share calculations is reconciled as follows:

	For the three months ended September 30		For the nine months ended September 30	
(in millions)	2017	2016	2017	2016
Weighted-average basic shares outstanding	145.5	147.3	146.2	150.7
Dilutive effect of stock options	0.3	1.0	0.4	0.9
Weighted-average diluted shares outstanding	145.8	148.3	146.6	151.6

For the three and nine months ended September 30, 2017, there were 255,928 options and 342,595 options, respectively, excluded from the computation of diluted earnings per share because their effects were not dilutive (three and nine months ended September 30, 2016 - 331,553 and 405,851, respectively).

8 Debt**Revolving credit facility**

Effective June 23, 2017, the Company extended the maturity date by one year on its existing revolving U.S. \$2.0 billion credit facility, which includes a U.S. \$1.0 billion five-year portion and U.S. \$1.0 billion one-year plus one-year term-out portion. The maturity date on the U.S. \$1.0 billion one-year plus one-year term-out portion has been extended to June 27, 2019; the maturity date on the U.S. \$1.0 billion five-year portion was extended to June 28, 2022.

Commercial paper program

The Company has a commercial paper program which enables it to issue commercial paper up to a maximum aggregate principal amount of U.S. \$1.0 billion in the form of unsecured promissory notes. The commercial paper is backed by the U.S. \$1.0 billion one-year plus one-year term-out portion of the revolving credit facility. As at September 30, 2017 and December 31, 2016, the Company had no commercial paper borrowings.

The Company presents issuances and repayments of commercial paper, all of which have a maturity of less than 90 days, in the Interim Consolidated Statements of Cash Flows on a net basis.

9 Shareholders' equity

On May 10, 2017, the Company announced a new normal course issuer bid ("bid"), commencing May 15, 2017, to purchase up to 4.38 million Common Shares for cancellation before May 14, 2018.

All purchases are made in accordance with the bid at prevalent market prices plus brokerage fees, or such other prices that may be permitted by the Toronto Stock Exchange, with consideration allocated to share capital up to the average carrying amount of the shares, and any excess allocated to retained earnings. The following table provides activities under the share repurchase program:

	For the three months ended September 30		For the nine months ended September 30	
	2017	2016	2017	2016
Number of Common Shares repurchased	1,145,400	1,782,200	1,828,300	6,910,000
Weighted-average price per share ⁽¹⁾	\$196.46	\$192.10	\$201.50	\$175.08
Amount of repurchase (in millions) ⁽¹⁾	\$225	\$342	\$368	\$1,210

⁽¹⁾ Includes brokerage fees.

Table of Contents

10 Financial instruments

A. Fair values of financial instruments

The Company categorizes its financial assets and liabilities measured at fair value into a three-level hierarchy established by GAAP that prioritizes those inputs to valuation techniques used to measure fair value based on the degree to which they are observable. The three levels of the fair value hierarchy are as follows: Level 1 inputs are quoted prices in active markets for identical assets and liabilities; Level 2 inputs, other than quoted prices included within Level 1, are observable for the asset or liability either directly or indirectly; and Level 3 inputs are not observable in the market.

When possible, the estimated fair value is based on quoted market prices and, if not available, estimates from third party brokers. For non-exchange traded derivatives classified in Level 2, the Company uses standard valuation techniques to calculate fair value. Primary inputs to these techniques include observable market prices (interest, foreign exchange ("FX") and commodity) and volatility, depending on the type of derivative and nature of the underlying risk. The Company uses inputs and data used by willing market participants when valuing derivatives and considers its own credit default swap spread as well as those of its counterparties in its determination of fair value.

The carrying values of financial instruments equal or approximate their fair values with the exception of long-term debt which has a fair value of approximately \$9,587 million (December 31, 2016 - \$9,981 million) and a carrying value of \$8,133 million (December 31, 2016 - \$8,684 million) as at September 30, 2017. The estimated fair value of current and long-term borrowings has been determined based on market information where available, or by discounting future payments of interest and principal at estimated interest rates expected to be available to the Company at period end. All derivatives and long-term debt are classified as Level 2.

B. Financial risk management

Derivative financial instruments

Derivative financial instruments may be used to selectively reduce volatility associated with fluctuations in interest rates, FX rates, the price of fuel and stock-based compensation expense. Where derivatives are designated as hedging instruments, the relationship between the hedging instruments and their associated hedged items is documented, as well as the risk management objective and strategy for the use of the hedging instruments. This documentation includes linking the derivatives that are designated as fair value or cash flow hedges to specific assets or liabilities on the Interim Consolidated Balance Sheets, commitments or forecasted transactions. At the time a derivative contract is entered into, and at least quarterly thereafter, an assessment is made as to whether the derivative item is effective in offsetting the changes in fair value or cash flows of the hedged items. The derivative qualifies for hedge accounting treatment if it is effective in substantially mitigating the risk it was designed to address.

It is not the Company's intent to use financial derivatives or commodity instruments for trading or speculative purposes.

FX management

The Company conducts business transactions and owns assets in both Canada and the United States. As a result, the Company is exposed to fluctuations in value of financial commitments, assets, liabilities, income or cash flows due to changes in FX rates. The Company may enter into FX risk management transactions primarily to manage fluctuations in the exchange rate between Canadian and U.S. currencies. FX exposure is primarily mitigated through natural offsets created by revenues, expenditures and balance sheet positions incurred in the same currency. Where appropriate, the Company may negotiate with customers and suppliers to reduce the net exposure.

Net investment hedge

The FX gains and losses on long-term debt are mainly unrealized and can only be realized when U.S. dollar-denominated long-term debt matures or is settled. The Company also has long-term FX exposure on its investment in U.S. affiliates. The majority of the Company's U.S. dollar-denominated long-term debt has been designated as a hedge of the net investment in foreign subsidiaries. This designation has the effect of mitigating volatility on net income by offsetting long-term FX gains and losses on U.S. dollar-denominated long-term debt and gains and losses on its net investment. The effective portion recognized in "Other comprehensive income" for the three and nine months ended September 30, 2017 was an unrealized FX gain of \$180 million and \$342 million, respectively (three and nine months ended September 30, 2016 - an unrealized FX loss of \$72 million and an

unrealized FX gain of \$260 million, respectively). There was no ineffectiveness during the three and nine months ended September 30, 2017 and September 30, 2016.

Interest rate management

The Company is exposed to interest rate risk, which is the risk that the fair value or future cash flows of a financial instrument will vary as a result of changes in market interest rates. In order to manage funding needs or capital structure goals, the Company

13

Table of Contents

enters into debt or capital lease agreements that are subject to either fixed market interest rates set at the time of issue or floating rates determined by on-going market conditions. Debt subject to variable interest rates exposes the Company to variability in interest expense, while debt subject to fixed interest rates exposes the Company to variability in the fair value of debt.

To manage interest rate exposure, the Company accesses diverse sources of financing and manages borrowings in line with a targeted range of capital structure, debt ratings, liquidity needs, maturity schedule, and currency and interest rate profiles. In anticipation of future debt issuances, the Company may enter into forward rate agreements, that are designated as cash flow hedges, to substantially lock in all or a portion of the effective future interest expense. The Company may also enter into swap agreements, designated as fair value hedges, to manage the mix of fixed and floating rate debt.

Forward starting swaps

As at September 30, 2017, the Company had forward starting floating-to-fixed interest rate swap agreements ("forward starting swaps") totaling a notional U.S.\$500 million to fix the benchmark rate on cash flows associated with highly probable forecasted issuances of long-term notes. The effective portion of changes in fair value on the forward starting swaps is recorded in "Accumulated other comprehensive loss", net of tax, as cash flow hedges until the highly probable forecasted notes are issued. Subsequent to the notes issuance, amounts in "Accumulated other comprehensive loss" are reclassified to "Net interest expense".

During the second quarter of 2017, the Company de-designated the hedging relationship for U.S. \$700 million of forward starting swaps. The Company settled a notional U.S. \$200 million of forward starting swaps for a cash payment of U.S. \$16 million (\$22 million). The Company rolled the remaining notional U.S. \$500 million of forward starting swaps and did not cash settle these swaps. The impact of the U.S. \$200 million settlement and U.S. \$500 million roll of the forward starting swaps was a charge of \$13 million to "Other income and charges" on the Company's Interim Consolidated Statements of Income. Concurrently, the Company re-designated the forward starting swaps totaling U.S. \$500 million to fix the benchmark rate on cash flows associated with highly probable forecasted issuances of long-term notes.

As at September 30, 2017, the total fair value loss of \$59 million (December 31, 2016 - fair value loss of \$69 million) derived from the forward starting swaps was included in "Accounts payable and accrued liabilities". Changes in fair value from the forward starting swaps for the three and nine months ended September 30, 2017 was \$nil and a loss of \$12 million, respectively (three and nine months ended September 30, 2016 - \$nil and a loss of \$84 million, respectively). The effective portion for the three and nine months ended September 30, 2017 was \$nil and a loss of \$11 million, respectively, (three and nine months ended September 30, 2016 - \$nil and a loss of \$82 million, respectively) and is recorded in "Other comprehensive income". In addition to the charge on hedge roll and de-designation, for the three and nine months ended September 30, 2017, an ineffectiveness loss of \$nil and \$1 million, respectively (three and nine months ended September 30, 2016 - \$nil and a loss of \$2 million, respectively) is recorded to "Net interest expense".

For the three and nine months ended September 30, 2017, a loss of \$3 million and \$8 million, respectively, related to previous forward starting swap hedges have been amortized to "Net interest expense" (three and nine months ended September 30, 2016 - a loss of \$3 million and \$8 million, respectively). The Company expects that during the next 12 months \$12 million of losses will be amortized to "Net interest expense".

11 Stock-based compensation

At September 30, 2017, the Company had several stock-based compensation plans, including stock option plans, various cash settled liability plans and an employee stock savings plan. These plans resulted in an expense for the three and nine months ended September 30, 2017 of \$11 million and \$16 million, respectively (three and nine months ended September 30, 2016 - expense of \$31 million and \$46 million, respectively).

Effective January 31, 2017, Mr. E. Hunter Harrison resigned from all positions held by him at the Company, including as the Company's Chief Executive Officer and a member of the Board of Directors of the Company. In connection with Mr. Harrison's resignation, the Company entered into a separation agreement with Mr. Harrison. Under the terms of the separation agreement, the Company has agreed to a limited waiver of Mr. Harrison's non-competition and non-solicitation obligations.

Edgar Filing: CANADIAN PACIFIC RAILWAY LTD/CN - Form 10-Q

Effective January 31, 2017, pursuant to the separation agreement, Mr. Harrison forfeited certain pension and post-retirement benefits and agreed to the surrender for cancellation of 22,514 performance share units ("PSU"), 68,612 deferred share units ("DSU"), and 752,145 stock options.

As a result of this agreement, the Company has recognized a recovery of \$51 million in "Compensation and benefits" in the first quarter of 2017. Of this amount, \$27 million related to a recovery from cancellation of certain pension benefits.

Stock option plan

In the nine months ended September 30, 2017, under CP's stock option plans, the Company issued 369,980 regular options at the weighted average price of \$199.08 per share, based on the closing price on the grant date.

14

Table of Contents

Pursuant to the employee plan, these regular options may be exercised upon vesting, which is between 12 months and 60 months after the grant date, and will expire after 7 years. Certain stock options granted in 2017 vest upon the achievement of specific performance criteria.

Under the fair value method, the fair value of the stock options at the grant date was approximately \$17 million. The weighted average fair value assumptions were approximately:

	For the nine months ended September 30, 2017
Grant price	\$199.08
Expected option life (years) ⁽¹⁾	5.48
Risk-free interest rate ⁽²⁾	1.85%
Expected stock price volatility ⁽³⁾	26.94%
Expected annual dividends per share ⁽⁴⁾	\$2.0010
Expected forfeiture rate ⁽⁵⁾	6.0%
Weighted-average grant date fair value per option granted during the period	\$45.78

(1) Represents the period of time that awards are expected to be outstanding. Historical data on exercise behaviour, or when available, specific expectations regarding future exercise behaviour, were used to estimate the expected life of the option.

(2) Based on the implied yield available on zero-coupon government issues with an equivalent remaining term at the time of the grant.

(3) Based on the historical stock price volatility of the Company's stock over a period commensurate with the expected term of the option.

Determined by the current annual dividend at the time of grant. The Company does not employ different dividend yields throughout the

(4) contractual term of the option. On May 10, 2017, the Company announced an increase in its quarterly dividend to \$0.5625 per share, representing \$2.2500 on an annual basis.

(5) The Company estimated forfeitures based on past experience. This rate is monitored on a periodic basis.

Performance share unit plan

In the nine months ended September 30, 2017, the Company issued 134,991 PSUs with a grant date fair value of approximately \$27 million. These units attract dividend equivalents in the form of additional units based on the dividends paid on the Company's Common Shares. PSUs vest and are settled in cash, or in CP Common Shares, approximately 3 years after the grant date, contingent upon CP's performance ("performance factor"). Grant recipients who are eligible to retire and have provided six months of service during the performance period are entitled to the full award. The fair value of PSUs is measured periodically until settlement, using a lattice-based valuation model.

The performance period for PSUs issued in the nine months ended September 30, 2017 is January 1, 2017 to December 31, 2019. The performance factors for these PSUs are Return on Invested Capital, Total Shareholder Return ("TSR") compared to the S&P/TSX Capped Industrial Index, and TSR compared to S&P 1500 Road and Rail Index.

The performance period for the PSUs issued in 2014 was January 1, 2014 to December 31, 2016. The performance factors for these PSUs were Operating Ratio, Free cash flow, TSR compared to the S&P/TSX 60 index and TSR compared to Class I railways. The resulting payout was 118% of the Company's average share price that was calculated using the last 30 trading days preceding December 31, 2016. In the first quarter of 2017, payouts occurred on the total outstanding awards, including dividends reinvested, totaling \$31 million on 133,728 outstanding awards.

Deferred share unit plan

In the nine months ended September 30, 2017, the Company granted 20,109 DSUs with a grant date fair value of approximately \$4 million. DSUs vest over various periods of up to 48 months and are only redeemable for a specified period after employment is terminated. An expense to income for DSUs is recognized over the vesting period for both the initial subscription price and the change in value between reporting periods.

Table of Contents**12 Pension and other benefits**

In the three and nine months ended September 30, 2017, the Company made contributions of \$11 million and \$35 million, respectively (three and nine months ended September 30, 2016 - \$4 million and \$38 million, respectively), to its defined benefit pension plans. Net periodic benefit costs for defined benefit pension plans and other benefits recognized in the three and nine months ended September 30, 2017 included the following components:

	For the three months ended September 30			
	Pensions		Other benefits	
(in millions of Canadian dollars)	2017	2016	2017	2016
Current service cost (benefits earned by employees in the period)	\$26	\$26	\$ 3	\$ 2
Interest cost on benefit obligation	112	117	5	6
Expected return on fund assets	(223)	(211)	—	—
Recognized net actuarial loss	38	48	1	1
Amortization of prior service costs	(1)	(2)	—	—
Net periodic (recovery) benefit cost	\$(48)	\$(22)	\$ 9	\$ 9

	For the nine months ended September 30			
	Pensions		Other benefits	
(in millions of Canadian dollars)	2017	2016	2017	2016
Current service cost (benefits earned by employees in the period)	\$77	\$79	\$ 9	\$ 8
Interest cost on benefit obligation	338	350	15	16
Expected return on fund assets	(669)	(634)	—	—
Recognized net actuarial loss	114	143	2	3
Amortization of prior service costs	(3)	(5)	—	—
Net periodic (recovery) benefit cost	\$(143)	\$(67)	\$ 26	\$ 27

13 Contingencies

In the normal course of its operations, the Company becomes involved in various legal actions, including claims relating to injuries and damage to property. The Company maintains provisions it considers to be adequate for such actions. While the final outcome with respect to actions outstanding or pending at September 30, 2017 cannot be predicted with certainty, it is the opinion of management that their resolution will not have a material adverse effect on the Company's financial position or results of operations.

Legal proceedings related to Lac-Mégantic rail accident

On July 6, 2013, a train carrying crude oil operated by Montreal Maine and Atlantic Railway ("MMA") or a subsidiary, Montreal Maine & Atlantic Canada Co. ("MMAC" and collectively the "MMA Group") derailed and exploded in Lac-Mégantic, Québec. The derailment occurred on a section of railway owned and operated by the MMA Group. The previous day CP had interchanged the train to the MMA Group, and after the interchange, the MMA Group exclusively controlled the train.

Following the derailment, Québec's Minister of Sustainable Development, Environment, Wildlife and Parks (the "Minister") ordered the named parties to recover the contaminants and to clean up the derailment site. On August 14, 2013, the Minister added CP as a party (the "Amended Cleanup Order"). CP appealed the Amended Cleanup Order to the Administrative Tribunal of Québec. On July 5, 2016, the Minister served a Notice of Claim for nearly \$95 million of compensation spent on cleanup, alleging that CP refused or neglected to undertake the work. On September 6, 2016, CP filed a contestation of the Notice of Claim with the Administrative Tribunal of Québec. In October 2016, CP and the Minister agreed to stay the tribunal proceedings pending the

outcome of the Province of Québec's action, set out below. The Court's decision to stay the tribunal proceedings is pending, but de facto, the file has been suspended. Directly related to that matter, on July 6, 2015, the Province of Québec sued CP in Québec Superior Court claiming \$409 million in derailment damages, including cleanup costs (the "Province's Action"). The Province alleges that CP exercised custody or control over the crude oil lading and that CP was otherwise negligent. Therefore, CP is said to be solidarily (joint and severally) liable with third parties responsible for the accident. On September 14, 2017, the Province was granted leave to amend its claim to allege vicarious liability against CP for the acts and omissions of MMAC. While the amendment asserts a new cause of action it does not increase the amount of damages sought and should not, based on CP's understanding of Quebec and Canadian law, increase the risk of a finding of liability against CP. On September 28, 2017, the Province served a further motion for leave to amend its claim to, among other things, add MMAC as a defendant and to reduce its claim for damages to \$315 million.

Table of Contents

This motion will be heard on October 24, 2017 should CP decide to oppose any of the amendments sought. To date, no timetable governing the conduct of this lawsuit has been ordered by the Quebec Superior Court.

A class action lawsuit has also been filed in the Québec Superior Court on behalf of persons and entities residing in, owning or leasing property in, operating a business in or physically present in Lac-Mégantic at the time of the derailment (the "Class Action"). That lawsuit seeks derailment damages, including for wrongful death, personal injury, and property harm. On August 16, 2013, CP was added as a defendant. On May 8, 2015, the Québec Superior Court authorized (certified) the Class Action against CP, the shipper - Western Petroleum, and the shipper's parent - World Fuel Services (collectively, the "World Fuel Entities"). The World Fuel Entities have since settled.

On October 24, 2016, the Quebec Superior Court authorized proceedings against two additional defendants in the Class Action, i.e. against MMAC and Mr. Thomas Harding. On December 9, 2016, the Quebec Superior Court granted CP's motion seeking to confirm the validity of the opt-outs from this Class Action by the estates of the deceased parties following the train derailment who had opted out to allow them to sue in the United States instead (i.e. the wrongful death cases, filed in the United States, which are further discussed hereinafter). Accordingly, at present, all known wrongful death claimants in the class action have opted out and cannot re-join the Class Action. In accordance with the initial case protocol set by the Superior Court on March 27, 2017, CP's statement of defence was delivered on June 2, 2017. A further case conference was held on July 14, 2017 to review the status of the matter and schedule the next steps in the case protocol. As a result, production of documents, examinations for discovery and the exchange of expert reports by the parties are expected to occur between mid-2017 and the end of 2018. A trial date has yet to be fixed. On September 28, 2017, the Class Action plaintiffs served (i) a motion to consolidate the Class Action with the Province's Action and the two insurance actions (described below); and (ii) a motion to bifurcate the proceedings into a liability phase (first) and a damages phase (afterwards), if necessary. These motions, together with CP's motion relating to document production, will be heard on October 24, 2017.

On July 4, 2016, eight subrogated insurers served CP with claims of approximately \$16 million (the "Promutuel Action"). On July 11, 2016, two additional subrogated insurers served CP with claims of approximately \$3 million, (the "Royal Action"). The lawsuits do not identify the parties to which the insurers are subrogated, and therefore the extent of claim overlap and the extent that claims will be satisfied after proof of claim review and distribution from the Plans, referred to below, is difficult to determine at this stage. On September 28, 2017 the Promutuel Action plaintiffs served (i) a motion to consolidate its proceeding with the Class Action, the Province's Action and the Royal Action; (ii) a motion to bifurcate the proceedings into a liability phase (first) and a damages phase (thereafter), if necessary; and (iii) a motion to amend their claim to add MMAC as a defendant and to reduce the claim for damages to \$15 million. On the same date, the Royal Action plaintiffs served a motion to stay their proceeding pending the outcome in the Class Action, the Province's Action and the Promutuel Action. These motions will be heard on October 24, 2017.

In the event the Class Action, the Province's Action, the Promutuel Action and the Royal Action are consolidated, this procedural step should not increase CP's exposure to a finding of liability or damages.

In the wake of the derailment and ensuing litigation, MMAC filed for bankruptcy in Canada (the "Canadian Proceeding") and MMA filed for bankruptcy in the United States (the "U.S. Proceeding"). Plans of arrangement have been approved in both the Canadian Proceeding and the U.S. Proceeding (the "Plans"). These Plans provide for the distribution of a fund of approximately \$440 million amongst those claiming derailment damages. The Plans also provide settling parties broadly worded third-party releases and injunctions preventing lawsuits against settlement contributors. CP has not settled and therefore will not benefit from those provisions. Both Plans do, however, contain judgment reduction provisions, affording CP a credit for the greater of (i) the settlement monies received by the plaintiff(s), or (ii) the amount, in contribution or indemnity, that CP would have been entitled to charge against third parties other than MMA and MMAC, but for the Plans' releases and injunctions. CP may also have judgment reduction rights, as part of the contribution/indemnification credit, for the fault of the MMA Group. Finally, the Plans provide for a potential re-allocation of the MMA Group's liability among plaintiffs and CP, the only non-settling party.

An Adversary Proceeding filed by the MMA U.S. bankruptcy trustee (now, estate representative) against CP, Irving Oil, and the World Fuel Entities accuses CP of failing to ensure that World Fuel Entities or Irving Oil properly classified the oil lading and of not refusing to ship the misclassified oil as packaged. By that action the estate representative seeks to recover MMA's going concern value supposedly destroyed by the derailment. The estate representative has since settled with the World Fuel Entities and Irving Oil and now bases CP misfeasance on the railroad's failure to abide in North Dakota by a Canadian regulation. That regulation supposedly would have caused the railroads to not move the crude oil train because an inaccurate classification was supposedly suspected. In a recently amended complaint, the estate representative named a CP affiliate, Soo Line Railroad Company ("Soo Line"), and asserts that CP and Soo Line breached terms or warranties allegedly contained in the bill of lading. CP's motion to dismiss this amended complaint was heard on December 20, 2016. On July 7, 2017, the Maine bankruptcy court granted CP's

Edgar Filing: CANADIAN PACIFIC RAILWAY LTD/CN - Form 10-Q

motion in part (by dismissing the contract claim), and denied CP's motion in part (by allowing the negligence claim to proceed). CP's motion for leave to appeal this decision (relating to the negligence claim) was heard on September 28, 2017 and the decision is under reserve.

In response to one of CP's motions to withdraw the Adversary Proceedings bankruptcy reference, the estate representative maintained that Canadian law rather than U.S. law controlled. The Article III court that heard the motion found that if U.S. federal regulations governed, the case was not complex enough to warrant withdrawal. Before the bankruptcy court, CP moved to dismiss for want of personal jurisdiction, but the court denied the motion because CP had participated in the bankruptcy proceedings.

Table of Contents

Lac-Mégantic residents and wrongful death representatives commenced a class action and a mass action in Texas and wrongful death and personal injury actions in Illinois and Maine. CP removed all of these lawsuits to federal court, and a federal court thereafter consolidated those cases in Maine. These actions generally charge CP with misclassification and mis-packaging (that is, using inappropriate DOT-111 tank cars) negligence. On CP's motion, the Maine court dismissed all wrongful death and personal injury actions on several grounds on September 28, 2016. The plaintiffs' subsequent motion for reconsideration was denied on January 9, 2017. The plaintiffs filed a notice of appeal on January 19, 2017. CP filed a motion to dismiss the appeal as untimely on April 20, 2017. Plaintiffs filed their response to the motion to dismiss on May 1, 2017. The decision on this motion is pending, and as a result, appellate briefing on the underlying judgment has not yet commenced. If the ruling is upheld on appeal these cases will be litigated, if anywhere, in Canada. As previously mentioned, these plaintiffs had previously opted-out of the Quebec Class Action in order to bring their claims in the United States. CP brought a motion on December 1, 2016 to seek a declaration from the Quebec Superior Court that the plaintiffs who had opted were precluded from opting back into the Quebec Class Action. CP's motion was successful. Accordingly, if these plaintiffs seek to sue CP, they would have to do so in Quebec in individual actions (they could also join their individual claims in the same individual action).

CP received two damage to cargo notices of claims from the shipper of the oil, Western Petroleum. Western Petroleum submitted U.S. and Canadian notices of claims for the same damages and under the Carmack Amendment (49 U.S.C. Section 11706) Western Petroleum seeks to recover for all injuries associated with, and indemnification for, the derailment. Both jurisdictions permit a shipper to recover the value of damaged lading against any carrier in the delivery chain, subject to limitations in the carrier's tariffs. CP's tariffs significantly restrict shipper damage claim rights. Western Petroleum is part of the World Fuel Services Entities, and those companies settled with the trustee. In settlements with the estate representative the World Fuel Services Entities and the consignee (Irving Oil) assigned all claims against CP, if any, including Carmack Amendment claims. The estate representative has since designated a trust formed for the benefit of the wrongful death plaintiff to pursue those claims.

On April 12, 2016, the Trustee (the "WD Trustee") for a wrongful death trust (the "WD Trust"), as defined and established under the confirmed Plans, sued CP in North Dakota federal court, asserting Carmack Amendment claims. The WD Trustee maintains that the estate representative assigned Carmack Amendment claims to the WD Trustee. The Plan supposedly gave the estate representative Carmack Amendment assignment rights. The WD Trustee seeks to recover amounts for damaged rail cars (approximately \$6 million) and, the settlement amounts the consignor (i.e, the shipper, the World Fuel Entities) and the consignee (Irving Oil) paid to the bankruptcy estates, alleged to be \$110 million and \$60 million, respectively. The WD Trustee maintains that Carmack Amendment liability extends beyond lading losses to cover all derailment related damages suffered by the World Fuel Entities or Irving Oil. CP disputes this interpretation of Carmack Amendment exposure and maintains that CP's tariffs preclude anything except a minimal recovery. CP brought a motion to dismiss the Carmack Amendment claims. On March 24, 2017 the federal court in North Dakota dismissed, with prejudice, these claims. The court determined the claims asserted by the WD Trustee were brought too late. On March 28, 2017, the WD Trustee filed a notice of appeal to the United States Court of Appeals for the Eighth Circuit. On May 19, 2017, the WD Trustee filed his appeal brief. On June 19, 2017, CP filed its responding brief. The appeal is pending and no hearing date has yet been set.

At this early stage of the proceedings, any potential responsibility and the quantum of potential losses cannot be determined. Nevertheless, CP denies liability and intends to vigorously defend against all derailment-related proceedings.

Environmental liabilities

Environmental remediation accruals, recorded on an undiscounted basis unless a reliable, determinable estimate as to an amount and timing of costs can be established, cover site-specific remediation programs.

The accruals for environmental remediation represent CP's best estimate of its probable future obligation and include both asserted and unasserted claims, without reduction for anticipated recoveries from third parties. Although the recorded accruals include CP's best estimate of all probable costs, CP's total environmental remediation costs cannot be predicted with certainty. Accruals for environmental remediation may change from time to time as new information about previously untested sites becomes known, and as environmental laws and regulations evolve and advances are made in environmental remediation technology. The accruals may also vary as the courts decide legal proceedings against outside parties responsible for contamination. These potential charges, which cannot be quantified at this time, may materially affect income in the particular period in which a charge is recognized. Costs related to existing, but as yet unknown, or future contamination will be accrued in the period in which they become probable and reasonably estimable.

Edgar Filing: CANADIAN PACIFIC RAILWAY LTD/CN - Form 10-Q

The expense included in "Purchased services and other" for the three and nine months ended September 30, 2017 was \$1 million and \$3 million, respectively (three and nine months ended September 30, 2016 - \$1 million and \$3 million, respectively). Provisions for environmental remediation costs are recorded in "Other long-term liabilities", except for the current portion which is recorded in "Accounts payable and accrued liabilities". The total amount provided as of September 30, 2017 was \$79 million (December 31, 2016 - \$85 million). Payments are expected to be made over 10 years through 2026.

Table of Contents

14 Condensed consolidating financial information

Canadian Pacific Railway Company, a 100%-owned subsidiary of Canadian Pacific Railway Limited ("CPRL"), is the issuer of certain debt securities, which are fully and unconditionally guaranteed by CPRL. The following tables present condensed consolidating financial information ("CCFI") in accordance with Rule 3-10(c) of Regulation S-X.

Investments in subsidiaries are accounted for under the equity method when presenting the CCFI.

The tables include all adjustments necessary to reconcile the CCFI on a consolidated basis to CPRL's consolidated financial statements for the periods presented.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis should be read in conjunction with the Company's Interim Consolidated Financial Statements and the related notes for the three and nine months ended September 30, 2017 in Item 1. Financial Statements, other information in this report, and Item 8. Financial Statements and Supplementary Data of the Company's 2016 Annual Report on Form 10-K. Except where otherwise indicated, all financial information reflected herein is expressed in Canadian dollars.

For purposes of this report, all references herein to "CP", "the Company", "we", "our" and "us" refer to CPRL, CPRL and its subsidiaries, CPRL and one or more of its subsidiaries, or one or more of CPRL's subsidiaries, as the context may require.

Available Information

CP makes available on or through its website www.cpr.ca free of charge, its annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and all amendments to those reports as soon as reasonably practicable after such reports are filed with or furnished to the Securities and Exchange Commission ("SEC"). Also, filings made pursuant to Section 16 of the Securities Exchange Act of 1934 ("Exchange Act") with the SEC by our executive officers, directors and other reporting persons with respect to the Company's Common Shares are made available free of charge, through our website. Our website also contains charters for our Board of Directors and each of its committees, our corporate governance guidelines and our Code of Business Ethics. SEC filings made by CP are also accessible through the SEC's website at www.sec.gov. The information on our website is not part of this quarterly report on Form 10-Q.

The Company has included the Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO") certifications regarding the Company's public disclosure required by Section 302 of the Sarbanes-Oxley Act of 2002 as an Exhibit to this report.

Executive Summary

Third Quarter of 2017 Results

Financial performance - In the third quarter of 2017, CP reported Diluted earnings per share ("EPS") of \$3.50, an increase of 50% as compared to 2016 primarily due to increased foreign exchange ("FX") gains on U.S. dollar-denominated debt and increased volumes in 2017. Adjusted diluted EPS, which excludes, amongst other factors, these FX gains, was \$2.90 in the third quarter of 2017, an increase of 6% compared to last year.

CP's operating ratio for the third quarter improved by 100 basis points to 56.7%.

Adjusted diluted EPS is defined and reconciled in Non-GAAP Measures and discussed further in Results of Operations of this Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Total revenues - Total revenues increased by 3% in the third quarter of 2017 to \$1,595 million from \$1,554 million in the same period in 2016.

Operating performance - CP's average train weight increased by 1% to 8,990 tons and terminal dwell time improved by 6% to 6.6 hours. Average train speed decreased by 3% to 23.1 miles per hour and average train length decreased by 1% to 7,301 feet, primarily as a result of CP moving proportionately more frac sand and Potash, and decreases in Intermodal traffic compared to the same period in 2016. These metrics are discussed further in Performance Indicators of this Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Recent Developments

- On October 17, 2017, the Board of Directors appointed Nadeem Velani to the position of Executive Vice-President and Chief Financial Officer from the position of Vice-President and Chief Financial Officer, and Laird Pitz to the position of Senior Vice-President and Chief Risk Officer from the position of Vice-President and Chief Risk Officer.
-

Edgar Filing: CANADIAN PACIFIC RAILWAY LTD/CN - Form 10-Q

During the year, CP has become eligible to rely on the "foreign private issuer" exemption pursuant to SEC rules as a result of changes to the Company's Board, as evaluated at June 30, 2017. CP currently intends to continue utilizing U.S. domestic registrant forms 10-K, 10-Q and 8-K for its annual, quarterly and material events filings, respectively, and file its 2018 management proxy circular pursuant to Canadian securities law and regulation. The Company is assessing possible regulatory options with respect to shelf prospectuses and registration statements.

Previous Developments

On July 17, 2017, CP declared a quarterly dividend of \$0.5625 per share on the outstanding Common Shares. The dividend is payable on October 30, 2017 to holders of record at the close of business on September 29, 2017.

Table of Contents

On May 10, 2017, CP announced a new normal course issuer bid ("NCIB") to repurchase, for cancellation, up to 4,384,062 of its Common Shares, which received Toronto Stock Exchange ("TSX") approval on May 10, 2017. As at September 30, 2017, CP had repurchased 1.8 million shares under the NCIB.

- Also on May 10, 2017, CP announced an increase to the Company's quarterly dividend to \$0.5625 per share from \$0.50 per share. The dividend was paid on July 31, 2017 to holders of record at the close of business on June 30, 2017.

On May 16, 2017, the Government of Canada introduced the Transportation Modernization Act (Bill C-49) in Parliament. The bill proposes amendments to the Canada Transportation Act and the Railway Safety Act, among others, to (1) replace the 160 kilometre extended interswitching limit and the competitive line rate provisions with a new long-haul interswitching regime; (2) modify the existing Level of Service remedy for shippers by instructing the Canadian Transportation Agency to determine, upon receipt of a complaint, if a railway company is fulfilling its common carrier obligation to provide "adequate and suitable accommodation" of traffic, if it is satisfied that the service provided is the "highest level of service that is reasonable in the circumstances"; (3) allow the existing Service Level Agreement arbitration remedy to include the consideration of reciprocal financial penalties; (4) increase the threshold for summary Final Offer Arbitrations from \$750,000 to \$2 million; (5) bifurcate the Volume-Related Composite Price Index component of the annual Maximum Revenue Entitlement determination for transportation of regulated grain, to encourage hopper car investment by CP and Canadian National Railway Company ("CN"); and (6) mandate the installation of locomotive voice and video recorders ("LVVRs"), with statutory permission for random access by railway companies and Transport Canada to the LVVR data in order to proactively strengthen railway safety in Canada. The bill is currently being considered by the Parliament of Canada. It is unclear when the proposed legislative amendments will be enacted into law.

2017 Outlook

For the full year 2017, CP expects double-digit percentage growth in Adjusted diluted EPS from full-year 2016 Adjusted diluted EPS of \$10.29. The update in guidance is due to strong year-to-date performance and a constructive volume outlook through the remainder of the year. Assumptions underlying CP's outlook include revenue-ton-miles ("RTM") growth in the mid single-digit percentages and a normalized income tax rate of approximately 26.50% for 2017. As previously disclosed, CP plans to invest approximately \$1.25 billion in capital programs in 2017, an increase of 6% over the \$1.18 billion spent in 2016.

Adjusted diluted EPS is defined and discussed further in Non-GAAP Measures and in Forward-Looking Information of this Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations. Although CP has provided a forward-looking non-GAAP measure, it is not practicable to provide a reconciliation to a forward-looking reported diluted EPS, the most comparable GAAP measure, due to unknown variables and uncertainty related to future results. These unknown variables may include unpredicted transactions of significant value. In past years, CP has recognized significant asset impairment charges and management transition costs related to senior executives. These or other similar, large unforeseen transactions affect diluted EPS but may be excluded from CP's Adjusted diluted EPS. Additionally, the Canadian-to-U.S. dollar exchange rate is unpredictable and can have a significant impact on CP's reported results but may be excluded from CP's Adjusted diluted EPS. In particular, CP excludes the foreign exchange impact of translating the Company's U.S. dollar denominated long-term debt from Adjusted diluted EPS. In 2017, CP has also excluded impacts from changes in income tax rates, insurance recoveries of legal settlements, and charges on hedge roll and de-designations. Please see Forward-Looking Information of this Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations for further discussion.

Table of Contents**Performance Indicators**

The following table lists the key measures of the Company's operating performance:

	For the three months ended September 30			For the nine months ended September 30		
	2017	2016 ⁽¹⁾	% Change	2017 ⁽¹⁾	2016 ⁽¹⁾	% Change
Operations Performance						
Gross ton-miles ("GTMs") (millions)	62,311	60,297	3	186,899	180,461	4
Train miles (thousands)	7,444	7,305	2	22,786	22,626	1

⁽¹⁾ Certain figures have been revised to conform with current presentation or have been updated to reflect new information as certain operating statistics are estimated and can continue to be updated as actuals settle.

Operations Performance**Three months ended September 30, 2017 compared to the three months ended September 30, 2016**

A **GTM** is the movement of one ton of train weight over one mile. GTMs are calculated by multiplying total train weight by the distance the train moved. Total train weight comprises the weight of the freight cars, their contents, and any inactive locomotives. An increase in GTMs indicates additional workload. GTMs for the third quarter of 2017 were 62,311 million, an increase of 3% compared with 60,297 million in the same period of 2016. This increase was primarily due to increased volumes of Energy, chemicals and plastics, frac sand, and Potash, partially offset by decreased volumes of Grain and Intermodal.

Train miles are defined as the sum of the distance moved by all trains operated on the network. Train miles increased by 2% for the third quarter of 2017 compared to the same period of 2016. This reflects the impact of higher volumes partly offset by continuous improvements in train weights.

The **average train weight** is defined as the average gross weight of CP trains, both loaded and empty. This excludes trains in short-haul service, work trains used to move CP's track equipment and materials, and the haulage of other railways' trains on CP's network. Average train weight increased by 1% for the third quarter of 2017 compared to the same period of 2016. This increase was due to continuous improvements in bulk train weights and operating plan efficiency, as well as higher frac sand, crude and Potash volumes compared to the same period in 2016.

The **average train length** is the sum of each car multiplied by the distance travelled, divided by train miles. Local trains are excluded from this measure. Average train length decreased by 1% for the third quarter of 2017 compared to the same period of 2016. This is a result of proportionately more shorter and heavier frac sand and crude trains and proportionately fewer longer and lighter intermodal trains, compared to the same period in 2016.

Edgar Filing: CANADIAN PACIFIC RAILWAY LTD/CN - Form 10-Q

The **average terminal dwell** is defined as the average time a freight car resides within terminal boundaries expressed in hours. The timing starts with a train arriving at the terminal, a customer releasing the car to the Company, or a car arriving at interchange from another railway. The timing ends when the train leaves, a customer receives the car from CP, or the freight car is transferred to another railway. Freight cars are excluded if they are being stored at the terminal or used in track repairs. Average terminal dwell improved by 6% in the third quarter of 2017 compared to the same period of 2016. This favourable decrease was primarily due to continued improvements in yard operating performance and the focus and visibility provided through improved trip planning.

The **average train speed** is defined as a measure of the line-haul movement from origin to destination including terminal dwell hours. It is calculated by dividing the total train miles travelled by the total train hours operated. This calculation does

Table of Contents

not include delay time related to customer or foreign railways and excludes the time and distance travelled by: i) trains used in or around CP's yards; ii) passenger trains; and iii) trains used for repairing track. Average train speed decreased by 3% in the third quarter of 2017 compared to the same period of 2016. This unfavourable decrease was primarily due to increased volumes of heavier and slower frac sand and Potash trains, as well as decreased volumes of lighter and faster Intermodal trains.

Fuel efficiency is defined as U.S. gallons of locomotive fuel consumed per 1,000 GTMs - freight and yard. Fuel efficiency was essentially unchanged in the third quarter of 2017 compared to the same period of 2016.

Nine months ended September 30, 2017 compared to the nine months ended September 30, 2016

GTMs for the first nine months of 2017 were 186,899 million, an increase of 4% compared with 180,461 million in the same period of 2016. This increase was primarily due to increased volumes of frac sand, Potash, and Energy, chemicals and plastics, partially offset by decreased volumes of Intermodal.

Train miles increased by 1% for the first nine months of 2017 compared to the same period of 2016. This reflects the impact of higher volumes partly offset by continuous improvements in train weights.

Average train weight increased by 2% for the first nine months of 2017 compared to the same period of 2016. This increase was due to continuous improvements in bulk train weights and operating plan efficiency, as well as higher frac sand and Potash volumes compared to the same period in 2016.

Average train length decreased by 1% for the first nine months of 2017 from the same period of 2016. This decrease is primarily due to moving proportionately fewer longer and lighter intermodal trains and proportionately more shorter and heavier frac sand trains compared to the same period in 2016.

Average terminal dwell improved by 4% in the first nine months of 2017 compared to the same period of 2016. This favourable decrease was primarily due to continued improvements in yard operating performance and the focus and visibility provided through improved trip planning.

Average train speed decreased by 4% in the first nine months of 2017 compared to the same period of 2016. This unfavourable decrease was primarily due to increased volumes of heavier and slower frac sand and Potash trains, as well as decreased volumes of lighter and faster Intermodal trains, and harsher weather conditions in the first quarter of 2017.

Fuel efficiency was essentially unchanged in the first nine months of 2017 compared to the same period of 2016.

Total Employees and Workforce

An employee is defined as an individual currently engaged in full-time, part-time or seasonal employment with CP. The average number of total employees decreased by 2% in the first nine months of 2017, compared to the same periods of 2016, due to improved operational efficiency in the current year. The average number of total employees increased by 3% in the third quarter versus 2016 to accommodate continuing volume growth.

The workforce is defined as total employees plus contractors and consultants. The Company's total workforce as at September 30, 2017, was 12,219, an increase of 521, or 4%, when compared to 11,698 as at December 31, 2016. As at September 30, 2017, the total workforce increased by 392, or 3%, compared to September 30, 2016. The increase in workforce is to accommodate continuing volume growth.

Safety Indicators

Safety is a key priority and core strategy for CP's management, employees and Board of Directors. The Company's two main safety indicators – personal injuries and train accidents – follow strict U.S. Federal Railroad Administration ("FRA") reporting guidelines.

The FRA personal injuries per 200,000 employee-hours frequency is the number of personal injuries multiplied by 200,000 and divided by total employee hours. Personal injuries are defined as injuries that require employees to lose time away from work,

Edgar Filing: CANADIAN PACIFIC RAILWAY LTD/CN - Form 10-Q

modify their normal duties or obtain medical treatment beyond minor first aid. FRA employee-hours are the total hours worked, excluding vacation and sick time, by all employees, excluding contractors. The FRA personal injuries per 200,000 employee-hours frequency for CP was 1.63 in the third quarter of 2017, a decrease from 1.87 in the same period of 2016. For the first nine months of 2017, the FRA personal injury rate per 200,000 employee-hours for CP was 1.67, an increase from 1.55 in the same period of 2016.

The FRA train accidents per million train miles frequency is the number of train accidents, multiplied by 1,000,000 and divided by total train miles. Train accidents included in this metric meet or exceed the FRA reporting threshold of U.S. \$10,700 (U.S. \$10,500 in 2016) in damage. The FRA train accidents per million train miles was 0.95 in the third quarter of 2017, a decrease from 1.24 in

Table of Contents

the same period of 2016. For the first nine months of 2017, FRA train accidents per million train miles was 1.01, an increase from 0.97 in the same period of 2016.

Financial Highlights

The following table presents selected financial data related to the Company's financial results as of, and for the third quarter ended September 30, 2017 and the comparative figures in 2016. The financial highlights should be read in conjunction with Item 1. Financial Statements and this Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

These measures have no standardized meanings prescribed by accounting principles generally accepted in the United States of America (1) ("GAAP") and, therefore, may not be comparable to similar measures presented by other companies. These measures are defined and reconciled in Non-GAAP Measures of this Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

(2) Operating ratio is defined as operating expenses divided by revenues, further discussed in Results of Operations of this Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

(3) Excludes deferred income taxes: \$3,695 million and \$3,571 million; and other non-financial deferred liabilities of \$873 million and \$940 million at September 30, 2017 and December 31, 2016, respectively.

Results of Operations**Three months ended September 30, 2017 compared to the three months ended September 30, 2016****Income**

Edgar Filing: CANADIAN PACIFIC RAILWAY LTD/CN - Form 10-Q

Operating income was \$690 million in the third quarter of 2017, an increase of \$33 million, or 5%, from \$657 million in the same period of 2016. This increase was primarily due to:

- higher volumes;
- higher defined benefit pension plan income of \$26 million; and
- a decrease in stock-based compensation expense.

36

Table of Contents

This increase was partially offset by an adjustment reducing discontinuance liabilities for certain branch lines in 2016 and by the unfavourable impact of the change in FX of \$12 million.

Net income was \$510 million in the third quarter of 2017, an increase of \$163 million, or 47%, from \$347 million in the same period of 2016. This increase was primarily due to:

the favourable impact of FX translation on U.S. dollar-denominated debt;
higher Operating income; and
a \$25 million pre-tax legal settlement charge in 2016.

This increase was partially offset by higher income tax expense associated with higher pre-tax earnings.

Adjusted income, defined and reconciled in Non-GAAP Measures of this Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations, was \$422 million in the third quarter of 2017, an increase of \$17 million, or 4%, from \$405 million in the same period of 2016. This increase was primarily due to higher Operating income, partially offset by higher income tax expense associated with higher pre-tax earnings.

Diluted Earnings per Share

Diluted earnings per share was \$3.50 in the third quarter of 2017, an increase of \$1.16, or 50%, from \$2.34 in the same period of 2016. Adjusted diluted EPS, defined and reconciled in Non-GAAP Measures of this Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations, was \$2.90 in the third quarter of 2017, an increase of \$0.17, or 6%, from \$2.73 in the same period of 2016. These increases were primarily due to higher Net income and Adjusted income, respectively, and lower average outstanding shares due to the Company's share repurchase program.

Operating Ratio

The Operating ratio provides the percentage of revenues used to operate the railway. A lower percentage normally indicates higher efficiency in the operation of the railway. The Company's Operating ratio was 56.7% in the third quarter of 2017, a 100 basis point improvement from 57.7% in the same period of 2016. This improvement was primarily due to:

higher defined benefit pension plan income;
higher volumes; and
lower stock-based compensation expense.

This improvement was partially offset by an adjustment reducing discontinuance liabilities for certain branch lines in 2016.

Return on Invested Capital (ROIC)

ROIC is a measure of how productively the Company uses its long-term capital investments, representing critical indicators of good operating and investment decisions made by management, and is an important performance criteria in determining certain elements of the Company's long-term incentive plan. ROIC was 15.9% for the twelve months ended September 30, 2017, a 160 basis point increase compared to 14.3% for the twelve months ended September 30, 2016. The increase is due to higher operating and other income, partially offset by higher income taxes, and a higher invested capital base. The capital base increased primarily due higher retained earnings from net income, partially offset by lower long-term debt outstanding.

Adjusted ROIC was 14.6% for the twelve months ended September 30, 2017, a 40 basis point increase compared to 14.2% for the twelve months ended September 30, 2016. This increase was primarily due to higher adjusted operating income, partially offset by the higher invested capital base, as discussed above. ROIC and Adjusted ROIC are defined and reconciled in Non-GAAP Measures of this Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Nine months ended September 30, 2017 compared to the nine months ended September 30, 2016

Income

Edgar Filing: CANADIAN PACIFIC RAILWAY LTD/CN - Form 10-Q

Operating income was \$2,040 million in the first nine months of 2017, an increase of \$179 million, or 10%, from \$1,861 million in the same period of 2016. This increase was primarily due to:

• higher volumes;

• higher defined benefit pension plan income of \$76 million;

• management transition recovery of \$51 million associated with Mr. E. Hunter Harrison's retirement as CEO of CP; and

• efficiencies generated from improved operating performance and asset utilization.

This increase was partially offset by the gain on sale of CP's Arbutus Corridor in 2016 of \$50 million, the impact of wage and benefit inflation and an adjustment reducing discontinuance liabilities for certain branch lines in 2016.

Table of Contents

Adjusted operating income was \$1,989 million in the first nine months of 2017, an increase of \$128 million, or 7%, from \$1,861 million in the same period of 2016. This increase reflects the same factors discussed above except that Adjusted operating income in 2017 excludes the management transition recovery of \$51 million.

Net income was \$1,421 million in the first nine months of 2017, an increase of \$206 million, or 17%, from \$1,215 million in the same period of 2016. This increase was primarily due to higher Operating income and gains from changes in FX translation on U.S. dollar-denominated debt. This increase was partially offset by higher income tax expense associated with higher pre-tax earnings.

Adjusted income was \$1,197 million in the first nine months of 2017, an increase of \$96 million, or 9%, from \$1,101 million in the same period of 2016. This increase was primarily due to higher Adjusted operating income, partially offset by higher income tax expense associated with higher pre-tax earnings.

Diluted Earnings per Share

Diluted earnings per share was \$9.70 in the first nine months of 2017, an increase of \$1.68, or 21%, from \$8.02 in the same period of 2016. Adjusted diluted EPS was \$8.17 in the first nine months of 2017, an increase of \$0.91, or 13%, from \$7.26 in the same period of 2016. These increases were primarily due to higher Net income and Adjusted income, respectively, and lower average outstanding shares due to the Company's share repurchase program.

Operating Ratio

The Company's Operating ratio was 57.9% in the first nine months of 2017, a 160 basis point improvement from 59.5% in the same period of 2016. This decrease was primarily due to:

- higher volumes;
- higher defined benefit pension plan income;
- the management transition recovery; and
- efficiencies generated from improved operating performance and asset utilization.

This decrease was partially offset by the gain on sale of CP's Arbutus Corridor in 2016 and the unfavourable impact of changes in fuel prices.

Adjusted operating ratio was 58.9% in the first nine months of 2017, a 60 basis point improvement from 59.5% in the same period of 2016. This improvement was primarily due to higher volumes, higher defined benefit pension plan income, and efficiencies generated from improved operating performance and asset utilization. This was partially offset by the gain on sale of CP's Arbutus Corridor in 2016.

Impact of FX on Earnings

Fluctuations in FX affect the Company's results because U.S. dollar-denominated revenues and expenses are translated into Canadian dollars. U.S. dollar-denominated revenues and expenses increase (decrease) when the Canadian dollar weakens (strengthens) in relation to the U.S. dollar. The following tables indicate the average and periodic exchange rates when converting U.S. dollars to Canadian dollars for the three and nine months ended September 30, 2017 and the comparative periods in 2016.

Average exchange rates (Canadian dollar/U.S. dollar)	2017	2016
For the three months ended – September 30	\$1.25	\$1.30
For the nine months ended – September 30	\$1.31	\$1.32

Exchange rates (Canadian dollar/U.S. dollar)	2017	2016
Beginning of year – January 1	\$1.34	\$1.38
Beginning of quarter – July 1	\$1.30	\$1.29
End of quarter – September 30	\$1.25	\$1.31

In the third quarter of 2017, the impact of a weaker U.S. dollar resulted in a decrease in total revenues of \$29 million, a decrease in total operating expenses of \$17 million and a decrease in interest expense of \$4 million from the same period in 2016.

Similarly, in the first nine months of 2017, the impact of a weaker U.S. dollar resulted in a decrease in total revenues of \$29 million, an increase in total operating expenses of \$15 million and a decrease in interest expense of \$4 million from the same period in 2016.

Table of Contents

The impact of FX on total revenues and operating expenses is discussed further in [Item 3. Quantitative and Qualitative Disclosures About Market Risk](#), in the Foreign Exchange Risk section.

Impact of Fuel Price on Earnings

Fluctuations in fuel prices affect the Company's results because fuel expense constitutes a significant portion of CP's operating costs. As fuel prices fluctuate, there will be a timing impact on earnings. The following table indicates the average fuel price for the three and nine months ended September 30, 2017 and the comparative periods in 2016.

Average Fuel Price (U.S. dollars per U.S. gallon)	2017	2016
For the three months ended – September 30	\$2.08	\$1.90
For the nine months ended – September 30	\$2.07	\$1.72

Average fuel prices for the nine months ended September 30, 2017 exclude the effects of an \$8 million fuel tax recovery related to prior periods. The impact of fuel price on earnings include the impacts of British Columbia (B.C.) and Alberta carbon taxes and levies recovered and paid, on revenues and expenses, respectively.

In the third quarter of 2017, the impact of higher fuel prices resulted in an increase in total revenues of \$14 million and an increase in total operating expenses of \$9 million from the same period in 2016.

In the first nine months of 2017, the impact of higher fuel prices resulted in an increase in total revenues of \$73 million and an increase in total operating expenses of \$70 million from the same period in 2016. The second quarter results of 2016 had been impacted by wildfires in northern Alberta, which negatively impacted fuel input costs by an estimated \$9 million without triggering a commensurate offsetting impact to benchmark fuel recovery prices.

Impact of Share Price on Earnings

Fluctuations in the Common Share price affect the Company's operating expenses because share-based liabilities are measured at fair value. The following tables indicate the opening and closing CP Common Share Price on the Toronto Stock Exchange ("TSX") and the New York Stock Exchange for the three and nine months ended September 30, 2017 and the comparative periods in 2016.

Toronto Stock Exchange (in Canadian dollars)	2017	2016
Opening Common Share Price, as at January 1	\$191.56	\$176.73
Ending Common Share Price, as at June 30	\$208.65	\$166.33
Ending Common Share Price, as at September 30	\$209.58	\$200.19
Change in Common Share Price for the three months ended September 30	\$0.93	\$33.86
Change in Common Share Price for the nine months ended September 30	\$18.02	\$23.46
New York Stock Exchange (in U.S. dollars)	2017	2016
Opening Common Share Price, as at January 1	\$142.77	\$127.60
Ending Common Share Price, as at June 30	\$160.81	\$128.79
Ending Common Share Price, as at September 30	\$168.03	\$152.70
Change in Common Share Price for the three months ended September 30	\$7.22	\$23.91
Change in Common Share Price for the nine months ended September 30	\$25.26	\$25.10

In the third quarter of 2017, the impact of the change in Common Share prices resulted in an increase in stock-based compensation expense of \$2 million compared to an increase of \$18 million in the same period in 2016.

In the first nine months of 2017, the impact of the change in Common Share prices resulted in an increase in stock-based compensation expense of \$10 million compared to an increase of \$14 million in the same period in 2016.

The impact of share price on stock-based compensation is discussed further in [Item 3. Quantitative and Qualitative Disclosures About Market Risk](#), in the Share Price Impact on Stock-Based Compensation section.

Table of Contents**Operating Revenues**

The Company's revenues are primarily derived from transporting freight. Changes in freight volumes generally contribute to corresponding changes in freight revenues and certain variable expenses, such as fuel, equipment rents and crew costs. Non-freight revenue is generated from leasing of certain assets, switching fees, contracts with passenger service operators, and logistical management services.

For the three months ended September 30	2017	2016	2017 vs. 2016		
			Total % Change	FX Adjusted % Change ⁽²⁾	
Freight revenues (in millions) ⁽¹⁾	\$1,547	\$1,510	\$37	2	4
Non-freight revenues (in millions)	48	44	4	9	9
Total revenues (in millions)	\$1,595	\$1,554	\$41	3	5
Carloads (in thousands) ⁽³⁾	666.4	648.2	18.2	3	N/A
Revenue ton-miles (in millions)	35,170	33,915	1,255		N/A
Freight revenue per carload (dollars)	\$2,321	\$2,328	(\$7)	—	2
Freight revenue per revenue ton-miles (cents)	4.40	4.45	(0.05)	(1)	1

⁽¹⁾ Freight revenues include fuel surcharge revenues of \$52 million in 2017, and \$40 million in 2016. 2017 and 2016 fuel surcharge revenues include B.C. and Alberta carbon taxes and levies recovered.

FX Adjusted % Change does not have any standardized meaning prescribed by GAAP and, therefore is unlikely to be comparable to similar

⁽²⁾ measures presented by other companies. FX adjusted variance is defined and reconciled in Non-GAAP Measures of this Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

⁽³⁾ Certain figures have been revised to conform with current presentation.

Freight revenues were \$1,547 million in the third quarter of 2017, an increase of \$37 million, or 2%, from \$1,510 million in the same period of 2016. This increase was primarily due to higher volumes, as measured by revenue ton-miles, of frac sand, crude, domestic potash, domestic intermodal, Canadian coal and Canadian grain, and the favourable impact of higher fuel surcharge revenue of \$14 million, slightly offset by lower volumes of international intermodal and U.S. grain, and the unfavourable impact of the change in FX of \$29 million.

RTMs are defined as the movement of one revenue-producing ton of freight over a distance of one mile. RTMs measure the relative weight and distance of rail freight moved by the Company. RTMs for the third quarter of 2017 were 35,170 million, an increase of 4% compared with 33,915 million in the same period of 2016. This increase was primarily due to increases in frac sand, crude, domestic potash, domestic intermodal, Canadian coal, energy products and Canadian grain, partially offset by decreases in international intermodal and U.S. grain.

Non-freight revenues were \$48 million in the third quarter of 2017, an increase of \$4 million, or 9%, from \$44 million in the same period of 2016. This increase was primarily due to the recovery of prior costs following the expiration of a passenger service contract in 2017, partially offset by a decrease in passenger and switching revenues.

For the nine months ended September 30	2017	2016	2017 vs. 2016		
			Total % Change	FX Adjusted % Change ⁽²⁾	
Freight revenues (in millions) ⁽¹⁾	\$4,708	\$4,464	\$244	5	6
Non-freight revenues (in millions)	133	131	2	2	2
Total revenues (in millions)	\$4,841	\$4,595	\$246	5	6
Carloads (in thousands) ⁽³⁾	1,955.2	1,876.7	78.5	4	N/A
Revenue ton-miles (in millions)	105,381	100,341	5,040		N/A
Freight revenue per carload (dollars)	\$2,408	\$2,379	\$29	1	2
Freight revenue per revenue ton-miles (cents)	4.47	4.45	0.02	—	1

⁽¹⁾ Freight revenues include fuel surcharge revenues of \$164 million in 2017, and \$90 million in 2016. 2017 and 2016 fuel surcharge revenues include B.C. and Alberta carbon taxes and levies recovered.

⁽²⁾ FX Adjusted % Change does not have any standardized meaning prescribed by GAAP and, therefore is unlikely to be comparable to similar measures presented by other companies. FX adjusted variance is defined and reconciled in Non-GAAP Measures of this Item 2. Management's

Edgar Filing: CANADIAN PACIFIC RAILWAY LTD/CN - Form 10-Q

Discussion and Analysis of Financial Condition and Results of Operations.

⁽³⁾ Certain figures have been revised to conform with current presentation.

Freight revenues were \$4,708 million in the first nine months of 2017, an increase of \$244 million, or 5%, from \$4,464 million in the same period of 2016. This increase was primarily due to an increase in volumes, as measured by RTMs, of frac sand, potash, Canadian grain, and domestic intermodal, and the favourable impact of higher fuel prices on fuel

40

Table of Contents

surcharge revenue of \$73 million partially offset by lower international intermodal, fertilizers, and automotive volumes and the unfavourable impact of the change in FX of \$29 million. In the second quarter of 2016, there was an estimated \$20 million decline in revenues as a direct result of the northern Alberta wildfires.

RTMs for the first nine months of 2017 were 105,381 million, an increase of 5% compared with 100,341 million in the same period of 2016. This increase was primarily due to increases in frac sand, potash, Canadian grain, and domestic intermodal partially offset by decreases in international intermodal, fertilizers, and automotive.

Non-freight revenues were \$133 million in the first nine months of 2017, an increase of \$2 million, or 2%, from \$131 million in the same period of 2016. This increase was primarily due to the recovery of prior costs following the expiration of a passenger service contract in 2017. This increase was partially offset by decreases in transload, switching and passenger revenues.

Fuel Cost Adjustment Program

Freight revenues include fuel surcharge revenues associated with CP's fuel cost adjustment program, which is designed to respond to fluctuations in fuel prices and help reduce exposure to changing fuel prices. The surcharge is applied to shippers through price indices, tariffs and by contract, within agreed-upon guidelines. The Company is also subject to carbon taxation systems and levies in some jurisdictions in which it operates, the costs of which are passed on to the shipper. Freight revenues include fuel surcharge revenues of \$52 million for the third quarter of 2017 and \$40 million for the same period in 2016. The impact of higher fuel prices resulted in an increase in total revenues of \$14 million. Similarly, in the first nine months of 2017, fuel surcharge revenues were \$164 million and \$90 million for the same period of 2016, an increase in total revenues of \$73 million. These figures include carbon tax and levy recoveries.

Lines of Business

In the first quarter of 2017, CP revised the grouping of revenues, and aggregated certain lines of business where: "Canadian Grain" and "U.S. Grain" were aggregated into the line of business "Grain"; "Chemicals and Plastics" and "Crude" were aggregated into the line of business "Energy, Chemicals and Plastics"; and "Domestic Intermodal" and "International Intermodal" were aggregated into the line of business "Intermodal".

Prior period figures have been aggregated accordingly.

Grain

For the three months ended September 30	2017	2016	2017 vs. 2016		
			Total % Change	% Change	FX Adjusted % Change
Freight revenues (in millions)	\$351	\$372	\$(21)(6)	(4)	()
Carloads (in thousands)	108.0	113.6	(5.6)(5)	()	N/A
Revenue ton-miles (in millions)	8,627	9,180	(553)(6)	()	N/A
Freight revenue per carload (dollars)	\$3,251	\$3,272	\$(21)(1)	()	2
Freight revenue per revenue ton-mile (cents)	4.07	4.05	0.02	—	3

Grain revenue was \$351 million in the third quarter of 2017, a decrease of \$21 million, or 6%, from \$372 million in the same period of 2016. The decrease in revenue was primarily due to lower shipments of U.S. grain primarily to the U.S. Pacific North West and the unfavourable impact of the change in FX, partially offset by higher Canadian grain shipments to the U.S. RTMs decreased more than carloads due to the increased proportion of Canadian grain to the U.S. which has a shorter length of haul, and the decreased proportion of U.S. grain to the U.S. Pacific North West, which has a longer length of haul. Freight revenue per revenue ton-mile increased primarily due to the higher proportion of Canadian grain to the U.S.

For the nine months ended September 30	2017	2016	2017 vs. 2016		
			Total % Change	% Change	FX Adjusted % Change

Edgar Filing: CANADIAN PACIFIC RAILWAY LTD/CN - Form 10-Q

Freight revenues (in millions)	\$1,107	\$1,041	\$666	7
Carloads (in thousands)	325.6	312.2	13.44	N/A
Revenue ton-miles (in millions)	27,274	26,404	870.3	N/A
Freight revenue per carload (dollars)	\$3,402	\$3,336	\$662	3
Freight revenue per revenue ton-mile (cents)	4.06	3.94	0.123	4

41

Edgar Filing: CANADIAN PACIFIC RAILWAY LTD/CN - Form 10-Q

Table of Contents

Grain revenue was \$1,107 million in the first nine months of 2017, an increase of \$66 million, or 6%, from \$1,041 million in the same period of 2016. This increase was primarily due to increased Canadian grain volumes and higher fuel surcharge revenue. Carloads increased more than RTMs due to the decreased proportion of U.S. grain to the U.S. Pacific North West, which has a longer length of haul. The increase in freight revenue per revenue ton-mile is primarily due to increased regulated Canadian grain rates.

Coal

For the three months ended September 30	2017	2016	2017 vs. 2016		FX Adjusted % Change
			Total Change	% Change	
Freight revenues (in millions)	\$165	\$160	\$5	3	4
Carloads (in thousands)	81.3	80.0	1.3	2	N/A
Revenue ton-miles (in millions)	6,009	5,798	211	4	N/A
Freight revenue per carload (dollars)	\$2,021	\$2,007	\$14	1	1
Freight revenue per revenue ton-mile (cents)	2.73	2.77	(0.04)	(1)	(1)

Coal revenue was \$165 million in the third quarter of 2017, an increase of \$5 million, or 3%, from \$160 million in the same period of 2016. This increase was primarily due to higher Canadian export volumes and higher fuel surcharge revenue. The decrease in freight revenue per revenue ton-mile was primarily due to the increased proportion of Canadian export coal volumes, which have a lower freight revenue per revenue ton-mile.

For the nine months ended September 30	2017	2016	2017 vs. 2016		FX Adjusted % Change
			Total Change	% Change	
Freight revenues (in millions)	\$478	\$454	\$24	5	6
Carloads (in thousands)	233.3	226.7	6.6	3	N/A
Revenue ton-miles (in millions)	17,230	16,540	690	4	N/A
Freight revenue per carload (dollars)	\$2,047	\$2,003	\$44	2	2
Freight revenue per revenue ton-mile (cents)	2.77	2.75	0.02	1	1

Coal revenue was \$478 million in the first nine months of 2017, an increase of \$24 million, or 5%, from \$454 million in the same period of 2016. This increase was primarily due to an increase in Canadian export and U.S. thermal coal volumes and an increase in fuel surcharge revenue. The increase in freight revenue per ton-mile was primarily due to the increased proportion of U.S. thermal coal volumes, which have a higher freight revenue per revenue ton-mile.

Potash

For the three months ended September 30	2017	2016	2017 vs. 2016		FX Adjusted % Change
			Total Change	% Change	
Freight revenues (in millions)	\$103	\$81	\$22	27	29
Carloads (in thousands)	34.6	29.0	5.6	19	N/A
Revenue ton-miles (in millions)	4,083	3,651	432	12	N/A
Freight revenue per carload (dollars)	\$2,978	\$2,782	\$196	7	9
Freight revenue per revenue ton-mile (cents)	2.53	2.21	0.32	14	16

Potash revenue was \$103 million in the third quarter of 2017, an increase of \$22 million, or 27%, from \$81 million in the same period of 2016. This increase was primarily due to higher domestic potash volumes, an increase in export potash volumes to the U.S. Pacific North West, and higher fuel surcharge revenue, partially offset by the unfavourable impact of the change in FX. The increase in freight revenue per revenue ton-mile was primarily due to the increased proportion of export potash to the U.S. Pacific North West, which has a shorter length of haul.

Edgar Filing: CANADIAN PACIFIC RAILWAY LTD/CN - Form 10-Q

Table of Contents

For the nine months ended September 30	2017	2016	2017 vs. 2016		FX Adjusted % Change
			Total Change	% Change	
Freight revenues (in millions)	\$310	\$242	\$68	28	29
Carloads (in thousands)	102.9	84.2	18.7	22	N/A
Revenue ton-miles (in millions)	11,919	10,333	1,586	15	N/A
Freight revenue per carload (dollars)	\$3,013	\$2,878	\$135	5	5
Freight revenue per revenue ton-mile (cents)	2.60	2.35	0.25	11	12

Potash revenue was \$310 million in the first nine months of 2017, an increase of \$68 million, or 28%, from \$242 million in the same period of 2016. This increase was primarily due to higher domestic potash volumes, higher export potash volumes to the U.S. Pacific North West, and higher fuel surcharge revenue. The increase in freight revenue per revenue ton-mile was due to the increased proportion of export potash to the U.S. Pacific North West, which has a shorter length of haul.

Fertilizers and Sulphur

For the three months ended September 30	2017	2016	2017 vs. 2016		FX Adjusted % Change
			Total Change	% Change	
Freight revenues (in millions)	\$52	\$64	\$(12)	(19)	(17)
Carloads (in thousands)	13.8	14.3	(0.5)	(3)	N/A
Revenue ton-miles (in millions)	864	958	(94)	(10)	N/A
Freight revenue per carload (dollars)	\$3,814	\$4,476	\$(662)	(15)	(13)
Freight revenue per revenue ton-mile (cents)	6.08	6.68	(0.60)	(9)	(7)

Fertilizers and sulphur revenue was \$52 million in the third quarter of 2017, a decrease of \$12 million, or 19%, from \$64 million in the same period of 2016. This decrease was primarily due to a decline in fertilizer volumes, which have a higher freight revenue per revenue ton-mile, and to the unfavourable impact of the change in FX, partially offset by higher sulphur volumes and higher fuel surcharge revenue. Carloads decreased less than RTMs due to the increased proportion of fertilizers to the U.S. Pacific North West, which has a shorter length of haul.

For the nine months ended September 30	2017	2016	2017 vs. 2016		FX Adjusted % Change
			Total Change	% Change	
Freight revenues (in millions)	\$181	\$218	\$(37)	(17)	(17)
Carloads (in thousands)	43.2	45.2	(2.0)	(4)	N/A
Revenue ton-miles (in millions)	2,837	3,144	(307)	(10)	N/A
Freight revenue per carload (dollars)	\$4,198	\$4,825	\$(627)	(13)	(13)
Freight revenue per revenue ton-mile (cents)	6.39	6.93	(0.54)	(8)	(7)

Fertilizers and sulphur revenue was \$181 million in the first nine months of 2017, a decrease of \$37 million, or 17%, from \$218 million in the same period of 2016. This decrease was primarily due to lower volumes, particularly fertilizers which have a higher freight revenue per revenue ton-mile. This decrease was partially offset by higher fuel surcharge revenue. Carloads decreased less than RTMs due to the increased proportion of fertilizers to the U.S. Pacific North West, which has a shorter length of haul.

Forest Products

For the three months ended September 30	2017	2016	2017 vs. 2016		FX Adjusted

43

Edgar Filing: CANADIAN PACIFIC RAILWAY LTD/CN - Form 10-Q

Table of Contents

Forest products revenue was \$67 million in the third quarter of 2017, a decrease of \$4 million, or 6%, from \$71 million in the same period of 2016. This decrease was due to lower volumes of lumber and panel products, due to U.S. tariffs on Canadian softwood lumber in 2017, and the unfavourable impact of the change in FX. Carloads increased while RTMs decreased due to an increase in traffic with a shorter length of haul.

For the nine months ended September 30	2017	2016	2017 vs. 2016		
			Total Change	% Change	FX Adjusted % Change

Freight revenue per carload (dollars)	\$4,056	\$4,160	\$(104)	(3)	(2)
Freight revenue per revenue ton-mile (cents)	5.96	5.87	0.09	2	3

Forest products revenue was \$202 million in the first nine months of 2017, a decrease of \$10 million, or 5%, from \$212 million in the same period of 2016. This decrease was due to lower volumes of lumber and panel products, due to U.S. tariffs on Canadian softwood lumber in 2017, partially offset by higher fuel surcharge revenue. Carloads decreased less than RTMs due to an increase in traffic with a shorter length of haul.

Energy, Chemicals and Plastics

For the three months ended September 30	2017	2016	2017 vs. 2016		
			Total Change	% Change	FX Adjusted % Change
Freight revenues (in millions)	\$208	\$187	\$21	11	15
Carloads (in thousands)	64.7	57.4	7.3	13	N/A
Revenue ton-miles (in millions)	4,992	3,971	1,021	26	N/A
Freight revenue per carload (dollars)	\$3,227	\$3,254	\$(27)	(1)	2
Freight revenue per revenue ton-mile (cents)	4.18	4.71	(0.53)	(11)	(9)

Energy, chemicals and plastics revenue was \$208 million in the third quarter of 2017, an increase of \$21 million, or 11%, from \$187 million in the same period of 2016. This increase was primarily due to higher volumes of crude, liquefied petroleum gas ("L.P.G."), plastics and fuel oil and higher fuel surcharge revenue, partly offset by the unfavourable impact of the change in FX. The decrease in freight revenue per revenue ton-mile is primarily due to volume gains in longer length of haul lanes for crude and L.P.G. through Kansas City, and higher plastics and fuel oil volumes, which have a lower freight revenue per revenue ton-mile.

For the nine months ended September 30	2017	2016	2017 vs. 2016		
			Total Change	% Change	FX Adjusted % Change
Freight revenues (in millions)	\$651	\$638	\$13	2	3
Carloads (in thousands)	194.0	185.1	8.9	5	N/A
Revenue ton-miles (in millions)	15,302	14,295	1,007	7	N/A
Freight revenue per carload (dollars)	\$3,357	\$3,448	\$(91)	(3)	(2)
Freight revenue per revenue ton-mile (cents)	4.26	4.47	(0.21)	(5)	(3)

Energy, chemicals and plastics revenue was \$651 million in the first nine months of 2017, an increase of \$13 million, or 2%, from \$638 million in the same period of 2016. This increase was primarily due to higher volumes of fuel oil, plastics, and L.P.G. shipments and higher fuel surcharge revenue, partially offset by the unfavourable change in FX. The decrease in freight revenue

Edgar Filing: CANADIAN PACIFIC RAILWAY LTD/CN - Form 10-Q

per revenue ton-mile is primarily due to volume gains in longer length of haul lanes for crude and L.P.G. through Kansas City, and higher fuel oil and plastics volumes, which have a lower freight revenue per revenue ton-mile.

Table of Contents*Metals, Minerals and Consumer Products*

For the three months ended September 30	2017	2016	2017 vs. 2016		
			Total Change	% Change	FX Adjusted % Change
Freight revenues (in millions)	\$192	\$142	\$50	35	39
Carloads (in thousands)	68.2	50.3	17.9	36	N/A
Revenue ton-miles (in millions)	3,030	2,171	859	40	N/A
Freight revenue per carload (dollars)	\$2,806	\$2,821	\$(15)	(1)	2
Freight revenue per revenue ton-mile (cents)	6.32	6.53	(0.21)	(3)	—

Metals, minerals and consumer products revenue was \$192 million in the third quarter of 2017, an increase of \$50 million, or 35%, from \$142 million in the same period of 2016. This increase was primarily due to higher frac sand, steel and aggregates volumes and higher fuel surcharge revenue, partially offset by the unfavourable impact of the change in FX. RTMs increased more than carloads due to an increased length of haul for frac sand traffic.

For the nine months ended September 30	2017	2016	2017 vs. 2016		
			Total Change	% Change	FX Adjusted % Change
Freight revenues (in millions)	\$552	\$415	\$137	33	34
Carloads (in thousands)	191.1	144.9	46.2	32	N/A
Revenue ton-miles (in millions)	8,512	6,067	2,445	40	N/A
Freight revenue per carload (dollars)	\$2,888	\$2,862	\$26	1	2
Freight revenue per revenue ton-mile (cents)	6.49	6.83	(0.34)	(5)	(4)

Metals, minerals and consumer products revenue was \$552 million in the first nine months of 2017, an increase of \$137 million, or 33%, from \$415 million in the same period of 2016. This increase was primarily due to higher frac sand, aggregates and steel volumes and higher fuel surcharge revenue. The decrease in freight revenue per revenue ton-mile is primarily due to higher volumes of frac sand, which have a lower freight revenue per revenue ton-mile. RTMs increased more than carloads due to an increased length of haul for frac sand traffic.

Automotive

For the three months ended September 30	2017	2016	2017 vs. 2016		
			Total Change	% Change	FX Adjusted % Change
Freight revenues (in millions)	\$68	\$86	\$(18)	(21)	(18)
Carloads (in thousands)	25.0	28.9	(3.9)	(13)	N/A
Revenue ton-miles (in millions)	316	393	(77)	(20)	N/A
Freight revenue per carload (dollars)	\$2,737	\$2,985	\$(248)	(8)	(5)
Freight revenue per revenue ton-mile (cents)	21.62	21.91	(0.29)	(1)	2

Automotive revenue was \$68 million in the third quarter of 2017, a decrease of \$18 million, or 21%, from \$86 million in the same period of 2016. This decrease was primarily due to a decline in volume and the unfavourable impact of the change in FX. The freight revenue per carload decrease was more than the decrease in freight revenue per revenue ton-mile due to reduced volumes of traffic with lower freight rates.

For the nine months ended September 30	2017	2016	2017 vs. 2016		
			Total Change	% Change	FX Adjusted % Change

Freight revenue per revenue ton-mile (cents)	21.92	20.68	1.24	6	7	

45

Table of Contents

Automotive revenue was \$223 million in the first nine months of 2017, a decrease of \$47 million, or 17%, from \$270 million in the same period of 2016. This decrease was primarily due to a decline in volume, partially offset by higher fuel surcharge revenue. The increase in freight revenue per revenue ton-mile was primarily due to a decrease in volumes with a longer length of haul and lower freight rates per revenue ton-mile.

Intermodal

For the three months ended September 30	2017	2016	2017 vs. 2016		FX Adjusted % Change
			Total Change	% Change	
Freight revenues (in millions)	\$341	\$347	\$(6)	(2)	(1)
Carloads (in thousands)	253.6	257.8	(4.2)	(2)	N/A
Revenue ton-miles (in millions)	6,092	6,576	(484)	(7)	N/A
Freight revenue per carload (dollars)	\$1,343	\$1,345	\$(2)	—	1
Freight revenue per revenue ton-mile (cents)	5.59	5.27	0.32	6	7

Intermodal revenue was \$341 million in the third quarter of 2017, a decrease of \$6 million, or 2%, from \$347 million in the same period of 2016. This decrease was primarily due to a decline in international volumes associated with the loss of a contract, partially offset by higher domestic traffic and fuel surcharge revenue. Freight revenue per revenue ton-mile increased due to more revenue generating moves of empty customer containers.

For the nine months ended September 30	2017	2016	2017 vs. 2016		FX Adjusted % Change
			Total Change	% Change	
Freight revenues (in millions)	\$1,004	\$974	\$30	3	3
Carloads (in thousands)	735.4	730.2	5.2	1	N/A
Revenue ton-miles (in millions)	17,901	18,634	(733)	(4)	N/A
Freight revenue per carload (dollars)	\$1,364	\$1,333	\$31	2	3
Freight revenue per revenue ton-mile (cents)	5.61	5.23	0.38	7	8

Intermodal revenue was \$1,004 million in the first nine months of 2017, an increase of \$30 million, or 3%, from \$974 million in the same period of 2016. This increase was primarily due to higher domestic traffic and higher fuel surcharge revenue, partially offset by a decline in international volumes associated with the loss of a contract. Freight revenue per revenue ton-mile increased due to more revenue generating moves of empty customer containers.

Operating Expenses

For the three months ended September 30 (in millions)	2017	2016	2017 vs. 2016		FX Adjusted % Change ⁽¹⁾
			Total Change	% Change	
Compensation and benefits	\$256	\$294	\$(38)	(13)	(11)
Fuel	150	138	12	9	12

FX adjusted variance is defined and reconciled in Non-GAAP Measures of this Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Edgar Filing: CANADIAN PACIFIC RAILWAY LTD/CN - Form 10-Q

Operating expenses were \$905 million in the third quarter of 2017, an increase of \$8 million, or 1%, from \$897 million in the same period of 2016. This increase was primarily due to:

- an adjustment reducing discontinuance liabilities for certain branch lines in 2016;
- higher volume variable expenses;
- the unfavourable impact of increases in fuel price of \$9 million;
- the unfavourable impact of wage and benefit inflation;
- higher depreciation expenses;

Table of Contents

higher casualty costs; and
higher incentive based compensation.

This increase was partially offset by:
higher defined benefit pension plan income of \$26 million;
lower stock based compensation expense; and
the favourable impact of the change in FX of \$17 million.

For the nine months ended September 30 (in millions)	2017	2016	2017 vs. 2016		FX Adjusted % Change ⁽¹⁾
			Total Change	% Change	
Compensation and benefits	\$766	\$907	\$(141)	(16)	(15)
Fuel	480	394	86	22	23
Materials	142	133	9	7	8
Equipment rents	108	132	(24)	(18)	(18)
Depreciation and amortization	493	478	15	3	3
Purchased services and other	812	690	122	18	19
Total operating expenses	\$2,801	\$2,734	\$67	2	3

⁽¹⁾ FX Adjusted % Change does not have any standardized meaning prescribed by GAAP and, therefore is unlikely to be comparable to similar measures presented by other companies. FX adjusted variance is defined and reconciled in Non-GAAP Measures of this Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Operating expenses were \$2,801 million in the first nine months of 2017, an increase of \$67 million, or 2%, from \$2,734 million in the same period of 2016. This increase was primarily due to:

the unfavourable impact of increases in fuel price of \$70 million;
the gain on sale of CP's Arbutus Corridor in 2016 of \$50 million;
higher volume variable expenses;
the impact of wage and benefit inflation;
an adjustment reducing discontinuance liabilities for certain branch lines in 2016;
the gain on sale of surplus freight cars in 2016 of \$17 million; and
higher depreciation expense.

This increase was partially offset by:

higher defined benefit pension plan income of \$76 million;
management transition recovery of \$51 million associated with Mr. E. Hunter Harrison's retirement as CEO of CP;
efficiencies generated from improved operating performance and asset utilization; and
the favourable impact of the change in FX of \$15 million.

Compensation and Benefits

Compensation and benefits expense includes employee wages, salaries, fringe benefits and stock-based compensation. Compensation and benefits expense was \$256 million in the third quarter of 2017, a decrease of \$38 million, or 13%, from \$294 million in the same period of 2016. This decrease was primarily due to:

higher defined benefit pension plan income of \$26 million;
lower stock-based compensation driven primarily by the change in stock price;
the favourable impact of the change in FX of \$5 million; and
lower labour expense due to operational efficiencies.

This decrease was partially offset by:

wage and benefit inflation;
higher incentive based compensation, and

higher volume variable expenses as a result of an increase in workload as measured in GTMs.

Table of Contents

Compensation and benefits expense was \$766 million in the first nine months of 2017, a decrease of \$141 million, or 16%, from \$907 million in the same period of 2016. This decrease was primarily due to:

- higher defined benefit pension plan income of \$76 million;
- management transition recoveries of \$51 million associated with Mr. E. Hunter Harrison's retirement as CEO of CP;
- lower labour expense due to operational efficiencies;
- lower stock-based compensation driven primarily by the change in stock price; and
- the favourable impact of the change in FX of \$4 million.

This decrease was partially offset by wage and benefit inflation and higher volume variable expenses as a result of an increase in workload as measured in GTMs.

Fuel

Fuel expense consists mainly of fuel used by locomotives and includes provincial, state and federal fuel taxes. Fuel expense was \$150 million in the third quarter of 2017, an increase of \$12 million, or 9%, from \$138 million in the same period of 2016. This increase was primarily due to the unfavourable impact of \$9 million from higher fuel prices and an increase in workload, as measured by GTMs. This increase was partially offset by the favourable impact of the change in FX of \$4 million.

Fuel expense was \$480 million in the first nine months of 2017, an increase of \$86 million, or 22%, from \$394 million in the same period of 2016. This increase was primarily due to the unfavourable impact of \$70 million from higher fuel prices and an increase in workload, as measured by GTMs. This increase was partially offset by an \$8 million fuel tax recovery related to prior periods in the second quarter of 2017 and the favourable impact of the change in FX of \$3 million.

Materials

Materials expense includes the cost of material used for track, locomotive, freight car and building maintenance and software sustainment. Materials expense was \$45 million in the third quarter of 2017, an increase of \$6 million, or 15%, from \$39 million in the same period of 2016. This increase was primarily due to higher right of way maintenance activities and higher locomotive maintenance and overhaul costs.

Materials expense was \$142 million in the first nine months of 2017, an increase of \$9 million or 7%, from \$133 million in the same period of 2016. This increase was due to higher right of way maintenance activities and higher locomotive maintenance and overhaul costs. This increase was partially offset by lower freight car repairs.

Equipment Rents

Equipment rents expense includes the cost associated with using other railways' freight cars, intermodal equipment, and locomotives, net of rental income received from other railways for the use of CP's equipment. Equipment rents expense was \$35 million in the third quarter of 2017, a decrease of \$8 million, or 19%, from \$43 million in the same period of 2016. This decrease was primarily due to the purchase and return of leased freight cars and locomotives and to a decrease in CP's use of other railroads' equipment.

Equipment rents expense was \$108 million in the first nine months of 2017, a decrease of \$24 million, or 18%, from \$132 million in the same period of 2016. This decrease was primarily due to the purchase and return of leased freight cars and locomotives, and an increase in receipts from other railroads' use of CP's equipment.

Depreciation and Amortization

Depreciation and amortization expense represents the charge associated with the use of track and roadway, buildings, rolling stock, information systems and other depreciable assets. Depreciation and amortization expense was \$162 million in the third quarter of 2017, an increase of \$7 million, or 5%, from \$155 million in the same period of 2016. This increase was primarily due to a higher depreciable asset base partially offset by the favourable impact of the change in FX of \$2 million.

Edgar Filing: CANADIAN PACIFIC RAILWAY LTD/CN - Form 10-Q

Depreciation and amortization expense was \$493 million in the first nine months of 2017, an increase of \$15 million, or 3%, from \$478 million in the same period of 2016. This increase was primarily due to a higher depreciable asset base.

Table of Contents*Purchased Services and Other*

For the three months ended September 30 (in millions)	2017	2016 ⁽¹⁾	2017 vs. 2016	
			Total % Change	Change
Support and facilities	\$65	\$62	\$3	5
Track and operations	58	54	4	7
Intermodal	49	44	5	11
Equipment	35	39	(4)	(10)
Casualty	20	15	5	33
Property taxes	31	29	2	7
Other	1	(10)	11	(110)
Land sales	(2)	(5)	3	(60)
Total Purchased services and other	\$257	\$228	\$29	13

(1) Certain comparative figures have been revised to conform with current presentation.

Purchased services and other expense encompasses a wide range of third-party costs, including expenses for joint facilities, personal injuries and damage, environmental remediation, property and other taxes, contractor and consulting fees, insurance, and gains on land sales. Purchased services and other expense was \$257 million in the third quarter of 2017, an increase of \$29 million, or 13%, from \$228 million in the same period of 2016. This increase was primarily due to:

- an adjustment reducing discontinuance liabilities for certain branch lines in 2016, reported in Other;
- higher casualty costs, primarily due to higher rolling stock costs associated with major incidents;
- higher intermodal expenses related to pickup and delivery and terminal costs, reported in Intermodal;
- lower gains on fewer land sales; and
- higher right of way maintenance and dismantling costs, reported in Track and operations.

This increase was partially offset by the favourable impact of the change in FX of \$5 million and fewer engine overhauls, reported in Equipment.

For the nine months ended September 30 (in millions)	2017	2016 ⁽¹⁾	2017 vs. 2016	
			Total % Change	Change
Support and facilities	\$201	\$200	\$1	1
Track and operations	193	184	9	5
Intermodal	144	132	12	9
Equipment	120	122	(2)	(2)
Casualty	55	49	6	12
Property taxes	95	88	7	8
Other	9	(25)	34	(136)
Land sales	(5)	(60)	55	(92)
Total Purchased services and other	\$812	\$690	\$122	18

(1) Certain comparative figures have been revised to conform with current presentation.

Purchased services and other expense was \$812 million in the first nine months of 2017, an increase of \$122 million, or 18%, from \$690 million in the same period of 2016. This increase was primarily due to:

- lower gains on land sales of \$55 million;
- the gain on sale of surplus freight cars in 2016 of \$17 million, reported in Other;
- an adjustment reducing discontinuance liabilities for certain branch lines in 2016, reported in Other;
- higher right of way maintenance and dismantling costs, reported in Track and operations;
- higher third-party snow removal services, reported in Track and operations;
- higher expenses related to pickup and delivery services, reported in Intermodal;

higher property taxes due to tax rate increases; and
higher casualty costs, primarily due to higher rolling stock costs associated with major incidents.

Table of Contents

As part of optimizing its assets, the Company may identify and dispose of property used or formerly used in operating activities. The Company includes as part of operating expenses the gains and losses that arise on disposal of such long-lived assets. The following disposals have impacted Purchased services and other during the comparative periods: in the second quarter of 2016, the Company disposed of 1,000 surplus freight cars that had reached or were nearing the end of their useful life, in a non-monetary exchange for new freight cars. The Company recognized a gain on sale of \$17 million from the transaction and the sale did not impact cash from investing activities; and in the first quarter of 2016, the Company completed the sale of CP's Arbutus Corridor to the City of Vancouver for gross proceeds of \$55 million and a gain on sale of \$50 million. The agreement allows the Company to share in future proceeds on the eventual development and/or sale of certain parcels of the Arbutus Corridor.

Other Income Statement Items

Other Income and Charges

Other income and charges consists of gains and losses from the change in FX on long-term debt and working capital, various costs related to financing activities, shareholder costs, equity income and other non-operating expenditures. Other income and charges was a gain of \$105 million in the third quarter of 2017, compared to an expense of \$71 million in the same period of 2016, a change of \$176 million, or 248%. This change was primarily due to the favourable impact of FX translation of \$105 million on U.S. dollar-denominated debt during the third quarter of 2017, compared to the unfavourable impact of FX translation of \$46 million in the same period of 2016, and a legal settlement charge of \$25 million in the third quarter of 2016. These items are discussed further in Non-GAAP Measures of this Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Other income and charges was a gain of \$194 million in the first nine months of 2017, compared to a gain of \$119 million in the same period of 2016, a change of \$75 million, or 63%. This change was primarily due to higher FX translation gains of \$47 million on U.S. dollar-denominated debt, compared to the same period of 2016, and a \$10 million insurance recovery of legal costs in 2017, compared to a legal settlement charge of \$25 million in 2016. These favourable changes were partially offset by a \$13 million charge on the settlement and roll of the forward starting swaps in 2017.

Net Interest Expense

Net interest expense includes interest on long-term debt and capital leases. Net interest expense was \$115 million in the third quarter of 2017, a decrease of \$1 million, or 1%, from \$116 million in the same period of 2016. This decrease was primarily due to the favourable impact from the change in FX of \$4 million, partially offset by lower capitalized interest.

Net interest expense was \$357 million in the first nine months of 2017, an increase of \$2 million, or 1%, from \$355 million in the same period of 2016. This increase was primarily due to lower capitalized interest, partially offset by the favourable impact from the change in FX of \$4 million.

Income Tax Expense

Income tax expense was \$170 million in the third quarter of 2017, an increase of \$47 million, or 38%, from \$123 million in the same period of 2016. This increase was due to higher taxable earnings partially offset by a lower effective tax rate in 2017.

Income tax expense was \$456 million in the first nine months of 2017, an increase of \$46 million, or 11%, from \$410 million in the same period of 2016. This increase was due to higher taxable earnings, partially offset by a lower effective tax rate in 2017.

During the three months ended September 30, 2017, an Illinois state income tax rate increase was enacted and resulted in a \$3 million deferred tax expense on the revaluation of deferred income tax balances as at January 1, 2017.

During the nine months ended September 30, 2017, the Company recorded a net deferred tax recovery of \$14 million related to the revaluation of its deferred income tax balances as at January 1, 2017. This was due to legislation enacted in the second quarter to decrease the Saskatchewan provincial corporate income tax rate which resulted in a \$17 million recovery, partially offset by the \$3 million expense described above.

Edgar Filing: CANADIAN PACIFIC RAILWAY LTD/CN - Form 10-Q

The effective tax rate in the third quarter of 2017, including discrete items was 24.95%, compared with 26.23% in the same period of 2016. The effective tax rate in the third quarter of 2017, excluding discrete items, was 26.50% compared to 25.17% in 2016.

The effective tax rate in the first nine months of 2017, including discrete items was 24.28%, compared with 25.26% in the same period of 2016. The effective tax rate in the first nine months of 2017, excluding discrete items, was 26.50% compared to 26.50% in 2016.

The Company expects an annualized effective tax rate in 2017 of approximately 26.50%. The Company's 2017 outlook for its annualized effective income tax rate is based on certain assumptions about events and developments that may or may not materialize or that may be offset entirely or partially by new events and developments. This is discussed further in Item 1A. Risk Factors of CP's [2016 Annual Report on Form 10-K](#).

Table of Contents

Liquidity and Capital Resources

The Company believes adequate amounts of Cash and cash equivalents are available in the normal course of business to provide for ongoing operations, including the obligations identified in the Contractual Commitments of this Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations. The Company is not aware of any trends or expected fluctuations in the Company's liquidity that would create any deficiencies. The Company's primary sources of liquidity include its Cash and cash equivalents, its bilateral letters of credit facility, and its revolving credit facility.

As at September 30, 2017, the Company had \$142 million of Cash and cash equivalents, U.S. \$2.0 billion available under its revolving credit facility and up to \$286 million available under its letters of credit (December 31, 2016 - \$164 million of Cash and cash equivalents, U.S. \$2.0 billion available under its revolving credit facility and up to \$280 million available under its letters of credit).

As at September 30, 2017, the Company's U.S. \$2.0 billion revolving credit facility, which includes a U.S. \$1.0 billion five-year portion and U.S. \$1.0 billion one-year plus one-year term-out portion, was undrawn (December 31, 2016 - undrawn). Effective June 23, 2017, the maturity date on the U.S. \$1.0 billion one-year plus one-year term-out portion was extended to June 27, 2019, and the maturity date on the U.S. \$1.0 billion five-year portion was extended to June 28, 2022. The Company did not draw from its revolving credit facility during the three and nine months ended September 30, 2017. The revolving credit facility agreement requires the Company not to exceed a maximum debt to earnings before interest, tax, depreciation, and amortization ratio. As at September 30, 2017, the Company was in compliance with the threshold stipulated in this financial covenant.

The Company has a commercial paper program that enables it to issue commercial paper up to a maximum aggregate principal amount of U.S. \$1.0 billion in the form of unsecured promissory notes. The commercial paper is backed by the U.S. \$1.0 billion one-year plus one-year term-out portion of the revolving credit facility. As at September 30, 2017, total commercial paper borrowings were \$nil (December 31, 2016 - \$nil).

As at September 30, 2017, under its bilateral letters of credit facility, the Company had letters of credit drawn of \$314 million from a total available amount of \$600 million. This compares to letters of credit drawn of \$320 million from a total available amount of \$600 million as at December 31, 2016. Under the bilateral letters of credit facility, the Company has the option to post collateral in the form of Cash or cash equivalents, equal at least to the face value of the letters of credit issued. Collateral provided may include highly liquid investments purchased three months or less from maturity and is stated at cost, which approximates market value. As at September 30, 2017, the Company had no collateral posted on its bilateral letters of credit facility (December 31, 2016 - \$nil).

The following discussion of operating, investing and financing activities describes the Company's indicators of liquidity and capital resources.

Operating Activities

Cash provided by operating activities was \$527 million in the third quarter of 2017, a decrease of \$64 million compared to \$591 million in the same period of 2016. This decrease was primarily due to higher income taxes paid in 2017, partially offset by higher cash generating income.

Cash provided by operating activities was \$1,449 million in the first nine months of 2017, an increase of \$128 million from \$1,321 million in the same period of 2016. This increase was primarily due to higher cash generating income and improvements in non-cash working capital.

Investing Activities

Cash used in investing activities was \$306 million in the third quarter of 2017, an increase of \$28 million compared to \$278 million in the same period of 2016. This increase was primarily due to higher additions to properties compared to the same period in 2016.

Cash used in investing activities was \$861 million in the first nine months of 2017, an increase of \$44 million from \$817 million in the same period of 2016. This increase was primarily due to lower proceeds from the sale of properties and other assets compared to the same period in 2016.

Financing Activities

Cash used in financing activities was \$310 million in the third quarter of 2017, an increase of \$6 million from \$304 million in the same period of 2016. This increase was primarily due to the net issuance of commercial paper during the third quarter in 2016, partially offset by lower repurchases of CP common shares.

Cash used in financing activities was \$597 million in the first nine months of 2017, a decrease of \$438 million from \$1,035 million in the same period of 2016. This decrease was primarily due to lower repurchases of CP common shares, partially offset by the net issuance of commercial paper during the first nine months of 2016 and the increase in dividends paid of \$47 million.

Table of Contents*Interest Coverage Ratio*

For the twelve months ended September 30, 2017, the Company's interest coverage ratio was 6.1, compared with 5.4 for the twelve months ended September 30, 2016. This increase was primarily due to a year over year increase in Earnings before interest and taxes ("EBIT").

Excluding significant items from EBIT, Adjusted interest coverage ratio was 5.7 for the twelve months ended September 30, 2017, compared with 5.3 for the twelve months ended September 30, 2016. This increase was primarily due to a year over year increase in Adjusted EBIT. Interest coverage ratio, Adjusted interest coverage ratio, and EBIT are defined and reconciled in Non-GAAP Measures of this Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Credit Measures

Credit ratings provide information relating to the Company's financing costs, liquidity and operations and affect the Company's ability to obtain short-term and long-term financing and/or the cost of such financing.

A mid-investment grade credit rating is an important measure in assessing the Company's ability to maintain access to public financing and to minimize the cost of capital. It also affects the ability of the Company to engage in certain collateralized business activities on a cost-effective basis.

Credit ratings and outlooks are based on the rating agencies' methodologies and can change from time to time to reflect their views of CP. Their views are affected by numerous factors including, but not limited to, the Company's financial position and liquidity along with external factors beyond the Company's control.

As at September 30, 2017, CP's credit ratings from Standard & Poor's Rating Services ("Standard & Poor's"), Moody's Investor Service ("Moody's"), and Dominion Bond Rating Service Limited ("DBRS") remain unchanged from December 31, 2016. However, during the second quarter of 2017, Moody's changed the outlook on CP's Senior unsecured debt to stable from negative.

Credit ratings as at September 30, 2017⁽¹⁾

Long-term debt		Outlook
Standard & Poor's		
Long-term corporate credit	BBB+	stable
Senior secured debt	A	stable
Senior unsecured debt	BBB+	stable
Moody's		
Senior unsecured debt	Baa1	stable
DBRS		
Unsecured debentures	BBB	stable
Medium-term notes	BBB	stable

\$1 billion Commercial paper program

Standard & Poor's	A-2	N/A
Moody's	P-2	N/A
DBRS	R-2 (middle)	N/A

⁽¹⁾ Credit ratings are not recommendations to purchase, hold or sell securities and do not address the market price or suitability of a specific security for a particular investor. Credit ratings are based on the rating agencies' methodologies and may be subject to revision or withdrawal at any time by the rating agencies.

The Adjusted net debt to Adjusted earnings before interest, tax, depreciation and amortization ("EBITDA") ratio for the twelve months ended September 30, 2017 and September 30, 2016 was 2.7 and 3.0, respectively. This decrease was primarily due to lower adjusted net debt for the twelve months ended September 30, 2017 as a result of the repayment of commercial paper outstanding as at September 30, 2016. Adjusted net debt to Adjusted EBITDA ratio is defined and reconciled in Non-GAAP Measures of this

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations. Over the long term, CP targets an Adjusted net debt to Adjusted EBITDA ratio of 2.0 to 2.5.

Table of Contents

Free Cash

CP generated positive Free cash of \$214 million in the third quarter of 2017, a decrease of \$101 million from positive Free cash of \$315 million in the same period of 2016. This decrease was primarily due to a decrease in cash provided by operating activities as well as an increase in cash used in investing activities compared to the same period of 2016. For the first nine months of 2017, CP generated positive Free cash of \$575 million, an increase of \$87 million from positive Free cash of \$488 million in the same period of 2016. This increase was primarily due to an increase in cash provided by operating activities slightly offset by an increase in cash used in investing activities compared to the same period of 2016.

Free cash is affected by seasonal fluctuations and by other factors including the size of the Company's additions to properties. Capital additions were \$319 million in the third quarter of 2017, \$25 million higher than in the same period of 2016. In the first nine months of 2017, capital additions were \$895 million, \$7 million lower than in the same period of 2016. Free cash is defined and reconciled in Non-GAAP Measures of this Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations. The definition of Free cash has been revised to exclude the deduction of dividends paid. As a result of this change, Free cash was increased by \$75 million and \$182 million for the three and nine months ended September 30, 2016, respectively.

Share Capital

At October 16, 2017, the latest practicable date, there were 144,967,167 Common Shares and no preferred shares issued and outstanding, which consists of 14,703 holders of record of the Company's Common Shares. In addition, CP has a Management Stock Option Incentive Plan ("MSOIP"), under which key officers and employees are granted options to purchase CP Common Shares. Each option granted can be exercised for one Common Share. At October 16, 2017, 1.5 million options were outstanding under the Company's MSOIP and stand-alone option agreements entered into with Mr. Keith Creel. There are 1.5 million options available to be issued by the Company's MSOIP in the future.

CP has a Director's Stock Option Plan ("DSOP"), under which directors are granted options to purchase CP Common Shares. There are no outstanding options under the DSOP, which has 0.3 million options available to be issued in the future.

Non-GAAP Measures

The Company presents non-GAAP measures and cash flow information to provide a basis for evaluating underlying earnings and liquidity trends in the Company's business that can be compared with the results of operations in prior periods. In addition, these non-GAAP measures facilitate a multi-period assessment of long-term profitability allowing management and other external users of the Company's consolidated financial information to compare profitability on a long-term basis, including assessing future profitability, with that of the Company's peers.

These non-GAAP measures have no standardized meaning and are not defined by GAAP and, therefore, may not be comparable to similar measures presented by other companies. The presentation of these non-GAAP measures is not intended to be considered in isolation from, as a substitute for, or as superior to, the financial information presented in accordance with GAAP.

Adjusted Performance Measures

The Company uses Adjusted income, Adjusted diluted earnings per share, Adjusted operating income and Adjusted operating ratio to evaluate the Company's operating performance and for planning and forecasting future business operations and future profitability. These non-GAAP measures are presented in Financial Highlights and discussed further in other sections of this Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations. These non-GAAP measures provide meaningful supplemental information regarding operating results because they exclude certain significant items that are not considered indicative of future financial trends either by nature or amount. As a result, these items are excluded for management assessment of operational performance, allocation of resources and preparation of annual budgets. These significant items may include, but are not limited to, restructuring and asset impairment charges, individually significant gains and losses from sales of assets, and certain items outside the control of management. These items may not be non-recurring. However, excluding these significant items from GAAP results allows for a consistent understanding of the Company's consolidated financial performance when performing a multi-period assessment including assessing the likelihood of future results. Accordingly, these non-GAAP financial measures may provide insight to investors and other external users of the Company's consolidated financial information.

Edgar Filing: CANADIAN PACIFIC RAILWAY LTD/CN - Form 10-Q

In 2017, there were five significant items included in Net income as follows:

• in the second quarter, a charge on hedge roll and de-designation of \$13 million (\$10 million after deferred tax) that unfavourably impacted Diluted EPS by 7 cents;

• in the second quarter, an insurance recovery of a legal settlement of \$10 million (\$7 million after current tax) that favourably impacted Diluted EPS by 5 cents;

• in the first quarter, a management transition recovery of \$51 million related to the retirement of Mr. E. Hunter Harrison as CEO of CP (\$39 million after deferred tax) that favourably impacted Diluted EPS by 27 cents;

53

Table of Contents

during the course of the year, a net deferred tax recovery of \$14 million as a result of the change in income tax rates as follows:
in the third quarter, a deferred tax expense of \$3 million as a result of the change in the Illinois state corporate income tax rate change that unfavourably impacted Diluted EPS by 2 cents;

in the second quarter, a deferred tax recovery of \$17 million as a result of the change in the Saskatchewan provincial corporate income tax rate that favourably impacted Diluted EPS by 12 cents; and

during the course of the year, a net non-cash gain of \$200 million (\$174 million after deferred tax) due to FX translation of the Company's U.S. dollar-denominated debt as follows:

in the third quarter, a \$105 million gain (\$91 million after deferred tax) that favourably impacted Diluted EPS by 62 cents;

in the second quarter, a \$67 million gain (\$59 million after deferred tax) that favourably impacted Diluted EPS by 40 cents; and

in the first quarter, a \$28 million gain (\$24 million after deferred tax) that favourably impacted Diluted EPS by 16 cents.

In 2016, there were two significant items included in Net income as follows:

in the third quarter, a \$25 million expense (\$18 million after current tax) related to a legal settlement that unfavourably impacted Diluted EPS by 12 cents; and

during the course of the year, a net non-cash gain of \$79 million (\$68 million after deferred tax) due to FX translation of the Company's U.S. dollar-denominated debt as follows:

in the fourth quarter, a \$74 million loss (\$64 million after deferred tax) that unfavourably impacted Diluted EPS by 43 cents;

in the third quarter, a \$46 million loss (\$40 million after deferred tax) that unfavourably impacted Diluted EPS by 27 cents;

in the second quarter, an \$18 million gain (\$16 million after deferred tax) that favourably impacted Diluted EPS by 10 cents; and

in the first quarter, a \$181 million gain (\$156 million after deferred tax) that favourably impacted Diluted EPS by \$1.01.

In the three months ended December 31, 2015, there was one significant item included in Net income as follows:

in the fourth quarter, a net non-cash loss of \$115 million loss (\$100 million after deferred tax) due to FX translation of the Company's U.S. dollar-denominated debt that unfavourably impacted Diluted EPS by 64 cents.

Reconciliation of GAAP Performance Measures to Non-GAAP Performance Measures

The following tables reconcile the most directly comparable measures presented in accordance with GAAP to the non-GAAP measures presented in [Financial Highlights](#) and discussed further in other sections of this Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations for the three and nine months ended September 30, 2017 and 2016:

Adjusted income is calculated as Net income reported on a GAAP basis less significant items.

	For the three months ended September 30		For the nine months ended September 30	
(in millions)	2017	2016	2017	2016
Net income as reported	\$510	\$347	\$1,421	\$1,215
Less significant items (pretax):				
Management transition recovery	—	—	51	—
Impact of FX translation on U.S. dollar-denominated debt	105	(46)	200	153
Charge on hedge roll and de-designation	—	—	(13)	—
Legal settlement charge	—	(25)	—	(25)
Insurance recovery of legal settlement	—	—	10	—
Income tax rate change	(3)	—	14	—
Tax effect of adjustments ⁽¹⁾	14	(13)	38	14
Adjusted income	\$422	\$405	\$1,197	\$1,101

⁽¹⁾ The tax effect of adjustments was calculated as the pretax effect of the adjustments multiplied by the effective tax rate for each of the above items for the periods presented.

Adjusted diluted earnings per share is calculated using Adjusted income, as defined above, divided by the weighted-average diluted shares outstanding during the period as determined in accordance with GAAP.

Table of Contents

	For the three months ended September 30		For the nine months ended September 30	
	2017	2016	2017	2016
Diluted earnings per share as reported	\$3.50	\$2.34	\$9.70	\$8.02

Income tax rate change	(0.02)	—	0.10	—
Tax effect of adjustments ⁽¹⁾	0.10	(0.09)	0.26	0.09
Adjusted diluted earnings per share	\$2.90	\$2.73	\$8.17	\$7.26

(1) The tax effect of adjustments was calculated as the pretax effect of the adjustments multiplied by the effective tax rate for each of the above items for the periods presented.

Adjusted operating income is calculated as Operating income reported on a GAAP basis less significant items.

	For the three months ended September 30		For the nine months ended September 30	
(in millions)	2017	2016	2017	2016
Operating income as reported	\$ 690	\$ 657	\$2,040	\$1,861
Less significant item:				
Management transition recovery	—	—	51	—
Adjusted operating income	\$ 690	\$ 657	\$1,989	\$1,861

Adjusted operating ratio excludes those significant items that are reported within Operating income.

	For the three months ended September 30		For the nine months ended September 30	
	2017	2016	2017	2016
Operating ratio as reported	56.7%	57.7%	57.9 %	59.5%
Less significant item:				
Management transition recovery	— %	— %	(1.0)%	— %
Adjusted operating ratio	56.7%	57.7%	58.9 %	59.5%

ROIC and Adjusted ROIC

ROIC is calculated as Operating income less Other income and charges, tax effected at the Company's annualized effective tax rate, on a rolling twelve-month basis, divided by the sum of Total shareholders' equity, Long-term debt, Long-term debt maturing within one year and Short-term borrowing, as presented in the Company's Consolidated Financial Statements, averaged between the beginning and ending balance over a rolling twelve-month period. Adjusted ROIC excludes significant items reported in Operating income and Other income and charges in the Company's Consolidated Financial Statements, as these significant items are not considered indicative of future financial trends either by nature or amount. ROIC and Adjusted ROIC are all-encompassing performance measures that measure how productively the Company uses its long-term capital investments, representing critical indicators of good operating and investment decisions made by management and are important performance criteria in determining

certain elements of the Company's long-term incentive plan. ROIC and Adjusted ROIC are presented in [Financial Highlights](#) and discussed further in [Results of Operations](#) of this Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Table of Contents**Calculation of ROIC and Adjusted ROIC**

	For the twelve months ended September 30	
(in millions, except for percentages)	2017	2016
Operating income	\$2,757	\$2,538
Less:		
Other income and charges	(120)	(20)
Tax ⁽¹⁾	716	679
	\$2,161	\$1,879
Average of total shareholders' equity, long-term debt, long-term debt maturing within one year and short-term borrowing	13,623	13,109
ROIC	15.9	%14.3 %

⁽¹⁾ Tax was calculated at the annualized effective tax rate of 24.89% for 2017 and 26.56% for 2016 for each of the above items for the periods presented.

	For the twelve months ended September 30	
(in millions, except for percentages)	2017	2016
Operating income	\$2,757	\$2,538
Less significant item:

Less:		
Other income and charges	(120)	(20)
Add significant items (pretax):		
Charge on hedge roll and de-designation	13	—
Legal settlement charge	—	25
Insurance recovery of legal settlement	(10)	—
Impact of FX translation on U.S. dollar-denominated debt	(126)	(38)
Less:		
Tax ⁽¹⁾	708	680
	\$1,995	\$1,865
Average of total shareholders' equity, long-term debt, long-term debt maturing within one year and short-term borrowing	13,623	13,109
Adjusted ROIC	14.6	%14.2 %

⁽¹⁾ Tax was calculated at the adjusted annualized effective tax rate of 26.18% for 2017 and 26.71% for 2016 for each of the above items for the periods presented.

Free Cash

Free cash is calculated as Cash provided by operating activities, less Cash used in investing activities, adjusted for changes in cash and cash equivalents balances resulting from FX fluctuations. Free cash is a measure that management considers to be an indicator of liquidity. Free cash is useful to investors and other external users of the consolidated financial statements as it assists with the evaluation of the Company's ability to generate cash from its operations without incurring additional external financing. Positive Free cash indicates the amount of cash available for reinvestment in the business, or cash that can be returned to investors through dividends, stock repurchase programs, debt retirements or a combination of these. Conversely, negative Free cash indicates the amount of cash that must be raised from investors through new debt or equity issues, reduction in available cash balances or a combination of these. Free cash should be considered in addition to, rather than as a substitute for, Cash provided by operating activities. Free cash is presented in Financial Highlights and discussed further in Liquidity and Capital Resources of this Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Table of Contents**Reconciliation of Cash Provided by Operating Activities to Free Cash**

	For the three months ended September 30		For the nine months ended September 30	
(in millions)	2017	2016	2017	2016
Cash provided by operating activities	\$527	\$591	\$1,449	\$1,321
Cash used in investing activities	(306)	(278)	(861)	(817)
Effect of foreign currency fluctuations on U.S. dollar-denominated cash and cash equivalents	(7)	2	(13)	(16)
Free cash⁽¹⁾	\$214	\$315	\$575	\$488

⁽¹⁾ The definition of Free cash has been revised to exclude the deduction of dividends paid. As a result of this change, Free cash was increased by \$75 million and \$182 million for the three and nine months ended September 30, 2016, respectively.

FX Adjusted Variance

FX adjusted variance allows certain financial results to be viewed without the impact of fluctuations in foreign currency exchange rates, thereby facilitating period-to-period comparisons in the analysis of trends in business performance. Financial result variances at constant currency are obtained by translating the comparable period of the prior year results denominated in U.S. dollars at the foreign exchange rates of the current period. FX adjusted variances are discussed in Operating Revenues and Operating Expenses of this Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

	For the three months ended September 30				
(in millions)	Reported 2017	Reported 2016	Variance due to FX	FX Adjusted 2016	FX Adjusted % Change

57

Table of Contents**Reconciliation of Net Income to EBIT, Adjusted EBIT and Adjusted EBITDA**

EBIT is calculated as Operating income, less Other income and charges. Adjusted EBIT excludes significant items reported in Operating income and Other income and charges. Adjusted EBITDA is calculated as Adjusted EBIT plus Depreciation and amortization, net periodic pension and other benefit cost other than current service costs, and operating lease expense.

(in millions)	For the twelve months ended	
	September 30 2017	2016
Net income as reported	\$1,805	\$1,534
Add:		
Net interest expense	473	477
Income tax expense	599	547
EBIT	2,877	2,558
Less significant items (pretax):		
Charge on hedge roll and de-designation	(13)	—
Management transition recovery	51	—
Legal settlement charge	—	(25)
Insurance recovery of legal settlement	10	—
Impact of FX translation on U.S. dollar-denominated debt	126	38
Adjusted EBIT	2,703	2,545
Less:		
Net periodic pension and other benefit cost other than current service costs	243	141
Operating lease expense	(107)	(115)
Depreciation and amortization	(655)	(633)
Adjusted EBITDA	\$3,222	\$3,152

Interest Coverage Ratio

Interest coverage ratio is measured, on a rolling twelve-month basis, as EBIT divided by Net interest expense. This ratio provides investors, analysts, and lenders with useful information on how the Company's debt servicing capabilities have changed, period over period and in comparison to the Company's peers. Interest coverage ratio is discussed further in Liquidity and Capital Resources of this Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Adjusted interest coverage ratio is calculated as Adjusted EBIT divided by Net interest expense. By excluding significant items which affect EBIT, Adjusted interest coverage ratio assists management in comparing the Company's performance over various reporting periods on a consistent basis. Adjusted interest coverage ratio is discussed further in Liquidity and Capital Resources of this Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Calculation of Interest Coverage Ratio and Adjusted Interest Coverage Ratio

(in millions, except for ratios)	For the twelve months ended	
	September 30 2017	2016
EBIT	\$2,877	\$2,558
Adjusted EBIT	2,703	2,545
Net interest expense	473	477
Interest coverage ratio	6.1	5.4
Adjusted interest coverage ratio	5.7	5.3

Adjusted Net Debt to Adjusted EBITDA Ratio

Adjusted net debt is defined as Long-term debt, Long-term debt maturing within one year and Short-term borrowing as reported on the Company's Consolidated Balance Sheets adjusted for pension plans deficit, the net present value of operating leases, which is discounted by the Company's effective interest rate for each of the periods presented, and Cash and cash equivalents. Adjusted net debt to adjusted EBITDA ratio is calculated as Adjusted net debt divided by Adjusted EBITDA.

Table of Contents

The Adjusted net debt to adjusted EBITDA ratio is one of the key metrics used by credit rating agencies in assessing the Company's financial capacities and constraints and determining the credit rating of the Company. By excluding the impact of certain items that are not considered by management in developing a minimum threshold, Adjusted net debt to Adjusted EBITDA ratio provides a metric that management uses to evaluate the Company's financial discipline with respect to capital markets credit sensitivities from management's perspective and communicates it publicly with investors, analysts and credit rating agencies.

Adjusted net debt to Adjusted EBITDA ratio is discussed further in Liquidity and Capital Resources of this Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Reconciliation of Long-term Debt to Adjusted Net Debt

(in millions)	2017	2016
Long-term debt including long term debt maturing within one year as at September 30	\$8,133	\$8,879
Less:		
Pension plans in deficit	(266)	(292)
Net present value of operating leases ⁽¹⁾	(284)	(352)
Cash and cash equivalents	142	103
Adjusted net debt as at September 30	\$8,541	\$9,420

⁽¹⁾ Operating leases were discounted at the Company's effective interest rate for each of the periods presented.

Calculation of Adjusted Net Debt to Adjusted EBITDA Ratio

(in millions, except for ratios)	2017	2016
Adjusted net debt as at September 30	\$8,541	\$9,420
Adjusted EBITDA for the twelve months ended September 30	3,222	3,152
Adjusted net debt to Adjusted EBITDA ratio	2.7	3.0

Off-Balance Sheet Arrangements**Guarantees**

At September 30, 2017, the Company had residual value guarantees on operating lease commitments of \$15 million, compared to \$19 million at December 31, 2016. The maximum amount that could be payable under these and all of the Company's other guarantees cannot be reasonably estimated due to the nature of certain guarantees. All or a portion of amounts paid under certain guarantees could be recoverable from other parties or through insurance. As at September 30, 2017, the fair value of these guarantees recognized as a liability was \$11 million, compared to \$5 million at December 31, 2016.

Contractual Commitments

The accompanying table indicates the Company's obligations and commitments to make future payments for contracts, such as debt, capital lease and commercial arrangements, as at September 30, 2017.

Payments due by period (in millions)	Total	2017	2018 & 2019	2020 & 2021	2022 & beyond
Contractual commitments					
Interest on long-term debt and capital lease	\$11,322	\$90	\$833	\$752	\$9,647
Long-term debt	8,067	7	1,199	414	6,447
Capital leases	158	7	9	11	131
Operating lease ⁽¹⁾	369	24	124	80	141
Supplier purchase	1,914	135	1,050	170	559
Other long-term liabilities ⁽²⁾	472	26	108	102	236
Total contractual commitments	\$22,302	\$289	\$3,323	\$1,529	\$17,161

million are not included in the minimum payments shown above. Where management believes that CP will be required to make payments under these residual value guarantees, the fair value of these guarantees as at September 30, 2017 of \$6 million has been recognized as a liability.

⁽²⁾ Includes expected cash payments for restructuring, environmental remediation, post-retirement benefits, workers' compensation benefits, long-term disability benefits, pension benefit payments for the Company's non-registered supplemental pension plan and certain other long-term liabilities. Projected payments for post-retirement benefits, workers' compensation benefits and long-term disability benefits include the anticipated

Edgar Filing: CANADIAN PACIFIC RAILWAY LTD/CN - Form 10-Q

payments for years 2017 to 2026. Pension contributions for the Company's registered pension plans are not included due to the volatility in calculating them. Pension payments are discussed further in [Critical Accounting Estimates](#) of this Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Table of Contents***Certain Other Financial Commitments***

In addition to the financial commitments mentioned previously in Off-Balance Sheet Arrangements and Contractual Commitments of this Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations, the Company is party to certain other financial commitments discussed below.

Letters of Credit

Letters of credit are obtained mainly to provide security to third parties under the terms of various agreements, including the supplemental pension plan. CP is liable for these contractual amounts in the case of non-performance under these agreements. Letters of credit are accommodated through a revolving credit facility and the Company's bilateral letter of credit facilities.

Capital Commitments

The Company remains committed to maintaining the current high level of plant quality and renewing the franchise. As part of this commitment, CP has entered into contracts with suppliers to make various capital purchases related to track programs. Payments for these commitments are due in 2017 through 2020. These expenditures are expected to be financed by cash generated from operations or by issuing new debt.

The accompanying table indicates the Company's commitments to make future payments for letters of credit and capital expenditures as at September 30, 2017.

		2018	2020
Payments due by period (in millions)	Total	2017 &	&
		2019	2021
Certain other financial commitments			
Letters of credit	\$314	\$314	\$—
Capital commitments	316	181	122
Total certain other financial commitments	\$630	\$495	\$122

Critical Accounting Estimates

To prepare consolidated financial statements that conform with GAAP, the Company is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reported periods. Using the most current information available, the Company reviews estimates on an ongoing basis, including those related to environmental liabilities, pensions and other benefits, property, plant and equipment, deferred income taxes, and legal and personal injury liabilities.

The development, selection and disclosure of these estimates, and this MD&A, have been reviewed by the Board of Directors' Audit Committee, which is composed entirely of independent directors.

Pensions and Other Benefits***Pension Liabilities and Pension Assets***

The Company included pension benefit liabilities of \$256 million in "Pension and other benefit liabilities" (December 31, 2016 - \$263 million) and \$10 million (December 31, 2016 - \$10 million) in "Accounts payable and accrued liabilities" on the Company's Interim Consolidated Balance Sheets at September 30, 2017. The Company also included post-retirement benefits accruals of \$381 million (December 31, 2016 - \$383 million) in "Pension and other benefit liabilities" and \$21 million (December 31, 2016 - \$21 million) in "Accounts payable and accrued liabilities" on the Company's Interim Consolidated Balance Sheets as at September 30, 2017.

The Company included pension benefit assets of \$1,356 million in "Pension assets" on the Company's Interim Consolidated Balance Sheets as at September 30, 2017, compared to \$1,070 million as at December 31, 2016.

Pension Plan Contributions

The Company made contributions of \$11 million to the defined benefit pension plans in the third quarter of 2017, compared with \$4 million in the same period of 2016. In the first nine months of 2017, the Company made contributions of \$35 million to the defined benefit pension plans, compared with \$38 million in the same period of 2016. The Company's main Canadian defined benefit pension plan accounts for 96% of CP's pension obligation and can produce significant volatility in pension funding requirements, given the pension fund's size, the many factors that drive the pension plan's funded status, and Canadian statutory pension funding requirements. The Company made voluntary prepayments of \$600 million in 2011, \$650 million in 2010 and \$500 million in 2009 to the Company's main Canadian defined benefit pension plan. CP has applied \$1,281 million of these voluntary prepayments to reduce its pension funding requirements in 2012–2016, leaving \$469 million of the voluntary prepayments still available at September 30, 2017 to reduce CP's pension funding requirements in the remainder of 2017 and future years. CP continues to have

Table of Contents

significant flexibility with respect to the rate at which the remaining voluntary prepayments are applied to reduce future years' pension contribution requirements, which allows CP to manage the volatility of future pension funding requirements. At this time, CP estimates it will apply \$42 million of the remaining voluntary prepayments against its 2017 pension funding requirements.

CP estimates its aggregate pension contributions, including its defined benefit and defined contribution plans, to be in the range of \$50 million to \$60 million in 2017, and in the range of \$30 million to \$80 million per year from 2018 to 2020. These estimates reflect the Company's current intentions with respect to the rate at which CP will apply the remaining voluntary prepayments against contribution requirements in the next few years.

Future pension contributions will be highly dependent on the Company's actual experience with such variables as investment returns, interest rate fluctuations and demographic changes, on the rate at which previous years' voluntary prepayments are applied against pension contribution requirements, and on any changes in the regulatory environment. CP will continue to make contributions to the pension plans that, at a minimum, meet pension legislative requirements.

Property, Plant and Equipment

The Company follows the group depreciation method under which a single depreciation rate is applied to the total cost in a particular class of property, despite differences in the service life or salvage value of individual properties within the same class. CP performs depreciation studies of each property asset class approximately every three years to update depreciation rates. The studies are conducted by third-party specialists and analyzed and reviewed by the Company's management. Depreciation studies for U.S. assets are reviewed and approved by the Surface Transportation Board ("STB"). Depreciation studies for Canadian assets are provided to the Canadian Transportation Agency (the "Agency"), but the Agency does not approve depreciation rates. In determining appropriate depreciation rates, management is required to make judgements and assumptions about a variety of key factors that are subject to future variability due to inherent uncertainties. These include the following:

Key Assumptions	Assessments
	<ul style="list-style-type: none"> • Statistical analysis of historical retirement patterns; • Evaluation of management strategy and its impact on operations and the future use of specific property assets; • Assessment of technological advances;
• Whole and remaining asset lives	<ul style="list-style-type: none"> • Engineering estimates of changes in current operations and analysis of historic, current and projected future usage; • Additional factors considered for track assets: density of traffic and whether rail is new or has been relaid in a subsequent position; • Assessment of policies and practices for the management of assets including maintenance; and • Comparison with industry data.
• Salvage values	<ul style="list-style-type: none"> • Analysis of historical, current and estimated future salvage values.

CP depreciates the cost of properties, net of salvage, on a straight-line basis over the estimated useful life of the class of property. When depreciable property is retired or otherwise disposed of in the normal course of business, the book value, less net salvage proceeds, is charged to accumulated depreciation and if different than the assumptions under the depreciation study could potentially result in adjusted depreciation expense over a period of years. For certain asset classes, the historical cost of the asset is separately recorded in the Company's property records. This amount is retired from the property records upon retirement of the asset. For assets for which the historical cost cannot be separately identified the amount of the gross book value to be retired is estimated using either an indexation methodology, whereby the current replacement cost of the asset is indexed to the estimated year of installation for the asset, or a first-in, first-out approach, or statistical analysis is used to determine the age of the retired asset. CP uses indices that closely correlate to the principal costs of the assets.

Edgar Filing: CANADIAN PACIFIC RAILWAY LTD/CN - Form 10-Q

There are a number of estimates inherent in the depreciation and retirement processes and as it is not possible to precisely estimate each of these variables until a group of property is completely retired, CP regularly monitors the estimated service lives of assets and the associated accumulated depreciation for each asset class to ensure depreciation rates are appropriate. If the recorded amounts of accumulated depreciation are greater or less than the amounts indicated by the depreciation studies then the excess or deficit is amortized as a component of depreciation expense over the remaining service lives of the applicable asset classes.

For the sale or retirement of larger groups of depreciable assets that are unusual and were not considered in the Company's depreciation studies, CP records a gain or loss for the difference between net proceeds and net book value of the assets sold or retired. The accumulated depreciation to be retired includes asset specific accumulated depreciation, when known, and an appropriate portion of the accumulated depreciation recorded for the relevant asset class as a whole, calculated using a cost-based allocation.

Revisions to the estimated useful lives and net salvage projections constitute a change in accounting estimate and are addressed prospectively by amending depreciation rates. It is anticipated that there will be changes in the estimates of weighted average useful

Table of Contents

lives and net salvage for each property asset class as assets are acquired, used and retired. Substantial changes in either the useful lives of properties or the salvage assumptions could result in significant changes to depreciation expense. For example, if the estimated average life of track assets, including rail, ties, ballast and other track material, increased (or decreased) by one year, annual depreciation expense would decrease (or increase) by approximately \$6 million.

Deferred Income Taxes

A deferred income tax expense of \$77 million was included in "Income tax expense" for the third quarter of 2017 compared to \$50 million for the same period of 2016. For the first nine months of 2017, deferred income tax expense of \$168 million was included in "Income tax expense" compared to \$233 million the same period of 2016.

The increase in deferred income tax expense in the third quarter of 2017 was primarily due to a change in the estimated timing of recognition of certain temporary differences that correspondingly decreased current tax expense, and the \$3 million tax expense in the third quarter on the revaluation of the deferred income tax balances as at January 1, 2017 for the increase to the Illinois state income tax rate.

The decrease in deferred income tax expense for the nine months ended September 30, 2017 was primarily due to a change in the estimated timing of recognition of certain temporary differences that correspondingly increased current tax expense, the deferred income tax recovery of \$17 million in the second quarter partially offset by the \$3 million tax expense in the third quarter on the revaluation of the deferred income tax balances as at January 1, 2017 for the decrease to the Saskatchewan provincial corporate income tax rate and the increase to the Illinois state income tax rate, respectively.

At September 30, 2017, deferred income tax liabilities of \$3,695 million were recorded as a long-term liability and are composed largely of temporary differences related to accounting for properties, compared to \$3,571 million as at December 31, 2016.

Legal and Personal Injury Liabilities

Provisions for incidents, claims and litigation charged to income, which were included in "Purchased services and other expense", amounted to \$24 million in the third quarter of 2017 compared with \$14 million included in "Purchased services and other expense" and \$25 million in "Other charges", totalling \$39 million for the same period of 2016. For the first nine months of 2017, these provisions amounted to \$64 million compared with \$72 million for the same period of 2016.

Forward-Looking Information

This MD&A and Quarterly Report on Form 10-Q contains certain forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995 and other relevant securities legislation. These forward-looking statements include, but are not limited to, statements concerning the Company's operations, anticipated financial performance, business prospects and strategies, including statements concerning the anticipation that cash flow from operations and various sources of financing will be sufficient to meet debt repayments and obligations in the foreseeable future and concerning anticipated capital programs, statements regarding future payments including income taxes and pension contributions, and capital expenditures. Forward-looking information typically contains statements with words such as "financial expectations", "key assumptions", "anticipate", "believe", "expect", "plan", "will", "outlook", "should" or similar words suggesting future outcomes. To the extent that CP has provided guidance using non-GAAP financial measures, the Company may not be able to provide a reconciliation to a GAAP measure, due to unknown variables and uncertainty related to future results as described above under the heading "2017 Outlook" of this Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Readers are cautioned not to place undue reliance on forward-looking information because it is possible that CP will not achieve predictions, forecasts, projections and other forms of forward-looking information. Current economic conditions render assumptions, although reasonable when made, subject to greater uncertainty. In addition, except as required by law, CP undertakes no obligation to update publicly or otherwise revise any forward-looking information, whether as a result of new information, future events or otherwise.

By its nature, forward-looking information involves numerous assumptions, inherent risks and uncertainties, including but not limited to the following factors: changes in business strategies; general North American and global economic, credit and business conditions; risks in agricultural production such as weather conditions and insect populations; the availability and price of energy commodities; the effects of competition and pricing pressures; industry capacity; shifts in market demand; inflation; changes in laws

Edgar Filing: CANADIAN PACIFIC RAILWAY LTD/CN - Form 10-Q

and regulations, including regulation of rates; changes in taxes and tax rates; potential increases in maintenance and operating costs; uncertainties of investigations, proceedings or other types of claims and litigation; labour disputes; risks and liabilities arising from derailments; transportation of dangerous goods; timing of completion of capital and maintenance projects; currency and interest rate fluctuations; effects of changes in market conditions on the financial position of pension plans and investments; and various events that could disrupt operations, including severe weather, droughts, floods, avalanches and earthquakes as well as security threats and the governmental response to them, and technological changes.

There are more specific factors that could cause actual results to differ materially from those described in the forward-looking statements contained in this MD&A. These more specific factors are identified and discussed in Item 1A. Risk Factors of CP's 2016

Table of Contents

Annual Report on Form 10-K. Other risks are detailed from time to time in reports filed by CP with securities regulators in Canada and the United States.

63

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no material changes to market risk during the three and nine months ended September 30, 2017 from the information provided in Item 7A. Quantitative and Qualitative Disclosure about Market Risk of CP's 2016 Annual Report on Form 10-K other than foreign exchange risk and share price impact on stock-based compensation discussed below:

Foreign Exchange Risk

Although CP conducts business primarily in Canada, a significant portion of its revenues, expenses, assets and liabilities including debt are denominated in U.S. dollars. The value of the Canadian dollar is affected by a number of domestic and international factors, including, without limitation, economic performance, and Canadian, U.S. and international monetary policies. Consequently, the Company's results are affected by fluctuations in the exchange rate between these currencies. On an annualized basis, a \$0.01 weakening (or strengthening) of the Canadian dollar positively (or negatively) impacts Total revenues by approximately \$25 million and negatively (or positively) impacts Operating expenses by approximately \$13 million.

CP uses U.S. dollar-denominated debt to hedge its net investment in U.S. operations. As at September 30, 2017, the net investment in U.S. operations is less than the total U.S. denominated debt. Consequently, FX translation on the Company's undesignated U.S. dollar-denominated long-term debt causes additional impacts on earnings in Other income and charges. For further information, please refer to Item 8. Financial Statements and Supplementary Data, Note 17 Financial Instruments, in CP's 2016 Annual Report on Form 10-K.

To manage this exposure to fluctuations in exchange rates between Canadian and U.S. dollars, CP may sell or purchase U.S. dollar forwards at fixed rates in future periods. In addition, changes in the exchange rate between the Canadian dollar and other currencies (including the U.S. dollar) make the goods transported by the Company more or less competitive in the world marketplace and may in turn positively or negatively affect revenues.

Share Price Impact on Stock-Based Compensation

For every \$1.00 change in share price, stock-based compensation expense has a corresponding change of approximately \$0.4 million to \$0.5 million based on information available at September 30, 2017. This excludes the impact of changes in share price relative to the S&P/TSX 60 Index, the S&P/TSX Capped Industrial Index, the S&P 1500 Road and Rail Index, and to Class I railways, which may trigger different performance share unit payouts. Share based compensation may also be impacted by non-market performance conditions.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

As of September 30, 2017, an evaluation was carried out under the supervision of and with the participation of CP's management, including its CEO and CFO, of the effectiveness of the design and operation of the Company's disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act. Based on that evaluation, the CEO and CFO concluded that these disclosure controls and procedures were effective as of September 30, 2017, to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified by the SEC rules and forms and (ii) accumulated and communicated to the Company's management, including the CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

During the third quarter of 2017, the Company has not identified any changes in internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II

ITEM 1. LEGAL PROCEEDINGS

For further details refer to Item 1. Financial Statements, Note 13 Contingencies.

ITEM 1A. RISK FACTORS

There have been no material changes to the risk factors from the information provided in Item 1A. Risk Factors of CP's 2016 Annual Report on Form 10-K other than the governmental legislation and regulation risk factor discussed below:

The Company is subject to significant governmental legislation and regulation over commercial, operating and environmental matters. The Company's railway operations are subject to extensive federal laws, regulations and rules in both Canada and the U.S. Operations are subject to economic and safety regulations in Canada primarily by the Agency and Transport Canada. The Company's U.S. operations are subject to economic and safety regulation by the Surface Transportation Board ("STB") and the Federal Railroad Administration ("FRA"). Various other regulators directly and indirectly affect the Company's operations in areas such as health, safety, security, environmental and other matters. Additional economic regulation of the rail industry by these regulators or the Canadian and U.S. legislatures, whether under new or existing laws, including Bill C-49, if passed, which is described under the heading "Previous Developments" in Part I of this Quarterly Report on Form 10-Q, could have a significant negative impact on the Company's ability to determine prices for rail services and result in a material adverse effect in the future on the Company's financial position, results of operations, and liquidity in a particular year or quarter. This potential material adverse effect could also result in reduced capital spending on the Company's rail network or in abandonment of lines.

The Company's compliance with safety and security regulations may result in increased capital expenditures and operating costs. For example, compliance with the Rail Safety Improvement Act of 2008 will result in additional capital expenditures associated with the statutorily mandated implementation of Positive Train Control ("PTC"). In addition to increased capital expenditures, implementation of such regulations may result in reduced operational efficiency and service levels, as well as increased operating expenses.

The Company's operations are subject to extensive federal, state, provincial and local environmental laws concerning, among other matters, emissions to the air, land and water and the handling of hazardous materials and wastes. Violation of these laws and regulations can result in significant fines and penalties as well as other potential impacts on CP's operations. These laws can impose strict, and in some circumstances, joint and several liability on both current and former owners and on operators of facilities. Such environmental liabilities may also be raised by adjacent landowners or third parties. In addition, in operating a railway, it is possible that releases of hazardous materials during derailments or other accidents may occur that could cause harm to human health or to the environment. Costs of remediation, damages and changes in regulations could materially affect the Company's operating results and reputation. The Company has been, and may in the future be, subject to allegations or findings to the effect that it has violated, or is strictly liable under, environmental laws or regulations. The Company currently has obligations at existing sites for investigation, remediation and monitoring, and will likely have obligations at other sites in the future. The actual costs associated with both current and long-term liabilities may vary from The Company's estimates due to a number of factors including, but not limited to changes in: the content or interpretation of environmental laws and regulations; required remedial actions; technology associated with site investigation or remediation; and the involvement and financial viability of other parties that may be responsible for portions of those liabilities.

Table of Contents**ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS****Issuer Purchase of Equity Securities**

On May 10, 2017, CP announced a new normal course issuer bid ("NCIB") to repurchase, for cancellation, up to 4,384,062 of its Common Shares, which received Toronto Stock Exchange ("TSX") approval on May 10, 2017. The NCIB commenced on May 15, 2017 and will expire on May 14, 2018. During the third quarter of 2017, CP repurchased 1.1 million Common Shares in total for \$225 million at a weighted average price of \$196.46. The following table presents Common Shares repurchased during each month for the third quarter of 2017.

2017	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid per Share ⁽²⁾	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs
July 1 to July 31	528,500	193.73	528,500	3,172,662
August 1 to August 31	521,200	191.46	521,200	2,651,462
September 1 to September 30	95,700	193.20	95,700	2,555,762
Ending Balance	1,145,400	196.46	1,145,400	N/A
