CNA Financial Corporation

Notes to Condensed Consolidated Financial Statements (Unaudited)

Note A. General

Basis of Presentation

The Condensed Consolidated Financial Statements include the accounts of CNA Financial Corporation (CNAF) and its subsidiaries. Collectively, CNAF and its subsidiaries are referred to as CNA or the Company. Loews Corporation (Loews) owned approximately 90% of the outstanding common stock of CNAF as of September 30, 2015.

The accompanying Condensed Consolidated Financial Statements have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP). Intercompany amounts have been eliminated. Certain financial information that is normally included in annual financial statements, including certain financial statement notes, prepared in accordance with GAAP, is not required for interim reporting purposes and has been condensed or omitted. These statements should be read in conjunction with the Consolidated Financial Statements and notes thereto included in CNAF's Annual Report on Form 10-K filed with the Securities and Exchange Commission for the year ended December 31, 2014, including the summary of significant accounting policies in Note A. The preparation of condensed consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the date of the Condensed Consolidated Financial Statements and the reported amounts of revenues and expenses during the reporting periods. Actual results may differ from those estimates.

The interim financial data as of September 30, 2015 and for the three and nine months ended September 30, 2015 and 2014 is unaudited. However, in the opinion of management, the interim data includes all adjustments, including normal recurring adjustments, necessary for a fair statement of the Company's results for the interim periods. The results of operations for the interim periods are not necessarily indicative of the results to be expected for the full year.

Sale of Continental Assurance Company (CAC)

On August 1, 2014, the Company completed the sale of the common stock of CAC, the Company's former life insurance subsidiary. The Company elected to include CAC cash flow activity in the comparative Condensed Consolidated Statement of Cash Flows. Further information on discontinued operations is provided in Note K to the Condensed Consolidated Financial Statements.

In connection with the sale of CAC, the Company entered into a 100% coinsurance agreement on a separate small block of annuity business outside of CAC. As a result of the coinsurance agreement, the \$34 million difference between market value and book value of the funds withheld assets at the coinsurance contract's inception was recognized as a loss in Other operating expenses in the third quarter of 2014.

Recently Issued Accounting Standards Update (ASU) - Disclosures about Short-Duration Contracts

In May of 2015, the Financial Accounting Standards Board issued ASU No. 2015-09, Financial Services-Insurance (Topic 944): Disclosures about Short-Duration Contracts. The updated accounting guidance requires enhanced disclosures to provide additional information about insurance liabilities for short-duration contracts. The updated guidance is effective for annual financial statements issued for fiscal years beginning after December 15, 2015, and interim periods within the annual periods beginning after December 15, 2016. The Company is currently evaluating the effect the updated guidance will have on the Company's financial statement disclosures.

Table of Contents

Note B. Earnings Per Share

Earnings per share is based on the weighted average number of outstanding common shares. Basic earnings (loss) per share excludes the effect of dilutive securities and is computed by dividing Net income (loss) by the weighted average number of common shares outstanding for the period. Diluted earnings (loss) per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock.

For the three and nine months ended September 30, 2015, approximately 514 thousand and 545 thousand potential shares attributable to exercises under stock-based employee compensation plans were included in the calculation of diluted earnings per share. For those same periods, approximately 106 thousand and 107 thousand potential shares attributable to exercises under stock-based employee compensation plans were not included in the calculation of diluted earnings per share because the effect would have been antidilutive.

For the three and nine months ended September 30, 2014, approximately 668 thousand and 654 thousand potential shares attributable to exercises under stock-based employee compensation plans were included in the calculation of diluted earnings per share. For those same periods, approximately 180 thousand and 167 thousand potential shares attributable to exercises under stock-based employee compensation plans were not included in the calculation of diluted earnings per share because the effect would have been antidilutive.

Table of Contents

Note C. Investments

The significant components of Net investment income are presented in the following table.

Periods ended September 30 (In millions)	Three Months		Nine Months	
	2015	2014	2015	2014

Total	\$37,545	\$3,544	\$99	\$40,990	

Table of Contents

The net unrealized gains on investments included in the tables above are recorded as a component of Accumulated other comprehensive income (AOCI). When presented in AOCI, these amounts are net of tax and any required Shadow Adjustments. As of September 30, 2015 and December 31, 2014, the net unrealized gains on investments included in AOCI were net of after-tax Shadow Adjustments of \$1,046 million and \$1,288 million. To the extent that unrealized gains on fixed income securities supporting certain products within the Life & Group Non-Core segment would result in a premium deficiency if realized, a related decrease in Deferred acquisition costs and/or increase in Insurance reserves are recorded, net of tax, as a reduction of net unrealized gains through Other comprehensive income (loss) (Shadow Adjustments).

Table of Contents

The following tables present the estimated fair value and gross unrealized losses of fixed maturity and equity securities in a gross unrealized loss position by the length of time in which the securities have continuously been in that position.

Table of Contents

Based on current facts and circumstances, the Company believes the unrealized losses presented in the September 30, 2015 table above are not indicative of the ultimate collectibility of the current amortized cost of the securities, but rather are primarily attributable to changes in interest rates and credit spreads and other factors. The Company has no current intent to sell securities with unrealized losses, nor is it more likely than not that it will be required to sell prior to recovery of amortized cost; accordingly, the Company has determined that there are no additional OTTI losses to be recorded as of September 30, 2015.

The following table presents the activity related to the pretax credit loss component reflected in Retained earnings on fixed maturity securities still held as of September 30, 2015 and 2014 for which a portion of an OTTI loss was recognized in Other comprehensive income (loss).

Periods ended September 30 (In millions)	Three Months		Nine Months	
	2015	2014	2015	2014
Beginning balance of credit losses on fixed maturity securities	\$59	\$66	\$62	\$74
Reductions for securities sold during the period	(2) (2) (5) (7
Reductions for securities the Company intends to sell or more likely than not will be required to sell	—	—	—	(3
Ending balance of credit losses on fixed maturity securities	\$57	\$64	\$57	\$64

Contractual Maturity

The following table presents available-for-sale fixed maturity securities by contractual maturity.

(In millions)	September 30, 2015		December 31, 2014	
	Cost or Amortized Cost	Estimated Fair Value	Cost or Amortized Cost	Estimated Fair Value
Due in one year or less	\$1,406	\$1,425	\$2,479	\$2,511
Due after one year through five years	7,772	8,186	9,054	9,605
Due after five years through ten years	14,149	14,577	12,055	12,584
Due after ten years	14,238	16,010	13,728	16,049
Total	\$37,565	\$40,198	\$37,316	\$40,749

Actual maturities may differ from contractual maturities because certain securities may be called or prepaid with or without call or prepayment penalties. Securities not due at a single date are allocated based on weighted average life.

Table of Contents

Derivative Financial Instruments

The following tables present the aggregate contractual or notional amounts and estimated fair values related to derivative financial instruments.

September 30, 2015	Contractual/ Notional Amount	Estimated Fair Value	
(In millions)		Asset	Liability
Without hedge designation			
Equity warrants	\$5	\$—	\$—
Embedded derivative on funds withheld liability	182	—	(5)
Total		\$—	\$(5)
December 31, 2014	Contractual/ Notional Amount	Estimated Fair Value	
(In millions)		Asset	Liability
Without hedge designation			
Currency forwards	\$9	\$—	\$—
Equity warrants	5	—	—
Embedded derivative on funds withheld liability	184	—	3
Total		\$—	\$3

Derivative financial instruments are presented gross in Other invested assets and Other liabilities on the Condensed Consolidated Balance Sheets. There would be no significant difference in the balance included in such accounts if the estimated fair values were presented net as of September 30, 2015 and December 31, 2014. The embedded derivative on funds withheld liability is accounted for separately and reported with the funds withheld liability in Other liabilities on the Condensed Consolidated Balance Sheets.

Investment Commitments

As of September 30, 2015, the Company had committed approximately \$414 million to future capital calls from various third-party limited partnership investments in exchange for an ownership interest in the related partnerships.

As of September 30, 2015, the Company had mortgage loan commitments of \$29 million representing signed loan applications received and accepted.

The Company invests in various privately placed debt securities, including bank loans, as part of its overall investment strategy and has committed to additional future purchases, sales and funding. As of September 30, 2015, the Company had commitments to purchase or fund additional amounts of \$81 million and sell \$43 million under the terms of such securities.

Table of Contents

Note D. Fair Value

Fair value is the price that would be received upon sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The following fair value hierarchy is used in selecting inputs, with the highest priority given to Level 1, as these are the most transparent or reliable.

Level 1 - Quoted prices for identical instruments in active markets.

Level 2 - Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs are observable in active markets.

Level 3 - Valuations derived from valuation techniques in which one or more significant inputs are not observable. Prices may fall within Level 1, 2 or 3 depending upon the methodology and inputs used to estimate fair value for each specific security. In general, the Company seeks to price securities using third-party pricing services. Securities not priced by pricing services are submitted to independent brokers for valuation and, if those are not available, internally developed pricing models are used to value assets using a methodology and inputs the Company believes market participants would use to value the assets. Prices obtained from third-party pricing services or brokers are not adjusted by the Company.

The Company performs control procedures over information obtained from pricing services and brokers to ensure prices received represent a reasonable estimate of fair value and to confirm representations regarding whether inputs are observable or unobservable. Procedures include i) the review of pricing service or broker pricing methodologies, ii) back-testing, where past fair value estimates are compared to actual transactions executed in the market on similar dates, iii) exception reporting, where period-over-period changes in price are reviewed and challenged with the pricing service or broker based on exception criteria, iv) deep dives, where the Company performs an independent analysis of the inputs and assumptions used to price individual securities and v) pricing validation, where prices received are compared to prices independently estimated by the Company.

Table of Contents

Net realized and unrealized gains and losses, including those shown above, are reported in Net income (loss) as follows:

Major Category of Assets and Liabilities	Condensed Consolidated Statements of Operations Line Items
Fixed maturity securities available-for-sale	Net realized investment gains (losses)
Fixed maturity securities trading	Net investment income
Equity securities	Net realized investment gains (losses)
Other invested assets - Derivative financial instruments held in a trading portfolio	Net investment income
Other invested assets - Derivative financial instruments not held in a trading portfolio	Net realized investment gains (losses)
Other invested assets - Overseas deposits	Net investment income
Life settlement contracts	Other revenues
Other liabilities - Derivative financial instruments	Net realized investment gains (losses)

Securities shown on the previous pages may be transferred in or out of levels within the fair value hierarchy based on the availability of observable market information and quoted prices used to determine the fair value of the security. The availability of observable market information and quoted prices varies based on market conditions and trading volume. During the three and nine months ended September 30, 2015 there were \$10 million of transfers from Level 2 to Level 1 and no transfers from Level 1 to Level 2. During the three months ended September 30, 2014 there were no transfers between Level 1 and Level 2. During the nine months ended September 30, 2014, there were \$24 million of transfers from Level 2 to Level 1 and \$1 million from Level 1 to Level 2. The Company's policy is to recognize transfers between levels at the beginning of quarterly reporting periods.

Valuation Methodologies and Inputs

The following section describes the valuation methodologies and relevant inputs used to measure different financial instruments at fair value, including an indication of the level in the fair value hierarchy in which the instruments are generally classified.

Fixed Maturity Securities

Level 1 securities include exchange traded bonds, highly liquid U.S. and foreign government bonds and redeemable preferred stock, valued using quoted market prices. Level 2 securities include most other fixed maturity securities as the significant inputs are observable in the marketplace. All classes of Level 2 fixed maturity securities are valued using a methodology based on information generated by market transactions involving identical or comparable assets, a discounted cash flow methodology, or a combination of both when necessary. Common inputs for all classes of fixed maturity securities include prices from recently executed transactions of similar securities, marketplace quotes, benchmark yields, spreads off benchmark yields, interest rates and U.S. Treasury or swap curves. Specifically for asset-backed securities, key inputs include prepayment and default projections based on past performance of the underlying collateral and current market data. Fixed maturity securities are generally assigned to Level 3 in cases where broker/dealer quotes are significant inputs to the valuation and there is a lack of transparency as to whether these quotes are based on information that is observable in the marketplace. Level 3 securities also include private placement debt securities whose fair value is determined using internal models with inputs that are not market observable.

Equity Securities

Level 1 equity securities include publicly traded securities valued using quoted market prices. Level 2 securities are primarily non-redeemable preferred stocks and common stocks valued using pricing for similar securities, recently executed transactions and other pricing models utilizing market observable inputs. Level 3 securities are priced using internal models with inputs that are not market observable.

Table of Contents

Derivative Financial Investments

Level 2 securities primarily include the embedded derivative on funds withheld liability and currency forwards. The embedded derivative on funds withheld liability is valued using the change in fair value of the assets supporting the funds withheld liability, which are fixed maturity securities valued with observable inputs. Currency forwards are valued using observable market forward rates.

Overseas Deposits

Overseas deposits, which can be redeemed at net asset value in 90 days or less, are classified as Level 2.

Short Term Investments

Securities that are actively traded or have quoted prices are classified as Level 1. These securities include money market funds and treasury bills. Level 2 primarily includes commercial paper, for which all inputs are market observable. Fixed maturity securities purchased within one year of maturity are classified consistent with fixed maturity securities discussed above. Short term investments as presented in the tables above differ from the amounts presented on the Condensed Consolidated Balance Sheets because certain short term investments, such as time deposits, are not measured at fair value.

Life Settlement Contracts

The fair values of life settlement contracts are determined as the present value of the anticipated death benefits less anticipated premium payments based on contract terms that are distinct for each insured, as well as the Company's own assumptions for mortality, premium expense and the rate of return that a buyer would require on the contracts, as no comparable market pricing data is available.

Significant Unobservable Inputs

The following tables present quantitative information about the significant unobservable inputs utilized by the Company in the fair value measurements of Level 3 assets. Valuations for assets and liabilities not presented in the table below are primarily based on broker/dealer quotes for which there is a lack of transparency as to inputs used to develop the valuations. The quantitative detail of these unobservable inputs is neither provided nor reasonably available to the Company.

September 30, 2015	Estimated Fair Value (In millions)	Valuation Technique(s)	Unobservable Input(s)	Range (Weighted Average)
Fixed maturity securities	\$121	Discounted cash flow	Credit spread	2% - 31% (3%)
Life settlement contracts	74	Discounted cash flow	Discount rate risk premium Mortality assumption	9% 55% - 1676% (164%)
December 31, 2014	Estimated Fair Value (In millions)	Valuation Technique(s)	Unobservable Input(s)	Range (Weighted Average)
Fixed maturity securities	\$101	Discounted cash flow	Credit spread	2% - 13% (3%)
Equity securities	16	Market approach	Private offering price	\$12 - \$4,391 per share (\$600)
Life settlement contracts	82	Discounted cash flow	Discount rate risk premium Mortality assumption	9% 55% - 1676% (163%)

For fixed maturity securities, an increase to the credit spread assumptions would result in a lower fair value measurement. For equity securities, an increase in the private offering price would result in a higher fair value measurement. For life settlement contracts, an increase in the discount rate risk premium or decrease in the mortality assumption would result in a lower fair value measurement.

Table of Contents

Financial Assets and Liabilities Not Measured at Fair Value

The carrying amount and estimated fair value of the Company's financial assets and liabilities which are not measured at fair value on the Condensed Consolidated Balance Sheets are presented in the following tables.

September 30, 2015 (In millions)	Carrying Amount	Estimated Fair Value			Total
		Level 1	Level 2	Level 3	
Assets					
Mortgage loans	\$640	\$—	\$—	\$660	\$660
Liabilities					
Short term debt	\$350	\$—	\$366	\$—	\$366
Long term debt	2,211	—	2,478	—	2,478

December 31, 2014 (In millions)	Carrying Amount	Estimated Fair Value			Total
		Level 1	Level 2	Level 3	
Assets					
Notes receivable for the issuance of common stock	\$1	\$—	\$—	\$1	\$1
Mortgage loans	588	—	—	608	608
Liabilities					
Long term debt	\$2,559	\$—	\$2,883	\$—	\$2,883

The following methods and assumptions were used to estimate the fair value of these financial assets and liabilities.

The fair values of Mortgage loans were based on the present value of the expected future cash flows discounted at the current interest rate for origination of similar quality loans, adjusted for specific loan risk.

The Company's senior notes and debentures were valued based on observable market prices. The fair value for other debt was estimated using discounted cash flows based on current incremental borrowing rates for similar borrowing arrangements.

The carrying amounts reported on the Condensed Consolidated Balance Sheets for Cash, Short term investments not carried at fair value, Accrued investment income and certain Other assets and Other liabilities approximate fair value due to the short term nature of these items. These assets and liabilities are not listed in the tables above.

Table of Contents

Note E. Claim and Claim Adjustment Expense Reserves

The Company's property and casualty insurance claim and claim adjustment expense reserves represent the estimated amounts necessary to resolve all outstanding claims, including incurred but not reported (IBNR) claims as of the reporting date. The Company's reserve projections are based primarily on detailed analysis of the facts in each case, the Company's experience with similar cases and various historical development patterns. Consideration is given to such historical patterns as field reserving trends and claims settlement practices, loss payments, pending levels of unpaid claims and product mix, as well as court decisions, economic conditions including inflation and public attitudes. All of these factors can affect the estimation of claim and claim adjustment expense reserves.

Establishing claim and claim adjustment expense reserves, including claim and claim adjustment expense reserves for catastrophic events that have occurred, is an estimation process. Many factors can ultimately affect the final settlement of a claim and, therefore, the necessary reserve. Changes in the law, results of litigation, medical costs, the cost of repair materials and labor rates can all affect ultimate claim costs. In addition, time can be a critical part of reserving determinations since the longer the span between the incidence of a loss and the payment or settlement of the claim, the more variable the ultimate settlement amount can be. Accordingly, short-tail claims, such as property damage claims, tend to be more reasonably estimable than long-tail claims, such as workers' compensation, general liability and professional liability claims. Adjustments to prior year reserve estimates, if necessary, are reflected in the results of operations in the period that the need for such adjustments is determined. There can be no assurance that the Company's ultimate cost for insurance losses will not exceed current estimates.

Catastrophes are an inherent risk of the property and casualty insurance business and can contribute to material period-to-period fluctuations in the Company's results of operations and/or equity. The Company reported catastrophe losses, net of reinsurance, of \$14 million and \$103 million for the three and nine months ended September 30, 2015.

Catastrophe losses in 2015 related primarily to U.S. weather-related events. The Company reported catastrophe losses, net of reinsurance, of \$17 million and \$147 million for the three and nine months ended September 30, 2014.

Three Months
2015

Favorable development in medical professional liability was related to lower than expected severity in accident years 2008 through 2013.

Favorable development in other professional liability and management liability related to better than expected large loss emergence in financial institutions in accident years 2012 and prior. Additional favorable development related to lower than expected severity in accident years 2009 through 2013 for directors and officers liability.

Favorable development for surety coverages was primarily due to lower than expected frequency of large losses in accident years 2013 and prior.

2014

Unfavorable development for medical professional liability was primarily related to increased frequency of large medical products liability class action lawsuits in accident years 2012 and prior.

Favorable development for surety coverages was primarily due to lower than expected frequency of large losses in accident years 2012 and prior.

Table of Contents

Nine Months

2015

Overall, favorable development for medical professional liability was related to lower than expected severity in accident years 2008 through 2013. Unfavorable development was recorded related to increased claim frequency in the aging services business for accident years 2013 and 2014.

Overall, favorable development in other professional liability and management liability related to better than expected large loss emergence in financial institutions in accident years 2012 and prior. Additional favorable development related to lower than expected severity in accident years 2009 through 2013 for directors and officers liability and lower than expected severity in accident years 2010 and prior for professional services. Unfavorable development was related to increased claim frequency on public company management liability in accident years 2012 through 2014. Favorable development for surety coverages was primarily due to lower than expected frequency of large losses in accident years 2013 and prior.

Favorable development for other coverages was due to better than expected claim frequency in property coverages provided to Specialty customers in accident year 2014.

2014

Unfavorable development for medical professional liability was primarily related to increased frequency of large medical products liability class action lawsuits in accident years 2012 and prior.

Favorable development for other professional liability and management liability was primarily related to favorable outcomes on individual large claims in accident years 2009 and prior, which contributed to a lower estimate of ultimate severity. Additionally, there was better than expected severity in accident years 2008 through 2011.

Favorable development for surety coverages was primarily due to lower than expected frequency of large losses in accident years 2012 and prior.

Table of Contents

Commercial

The following table presents further detail of the development recorded for the Commercial segment. A significant amount of the unfavorable development for the nine months ended September 30, 2014 relates to business classes which the Company has exited, but also includes Small Business where the Company has taken underwriting actions in an effort to improve profitability.

Periods ended September 30 (In millions)	Three Months		Nine Months	
	2015	2014	2015	2014
Pretax (favorable) unfavorable net prior year claim and allocated claim adjustment expense reserve development:				
Commercial Auto	\$—	\$13	\$7	\$52
General Liability	3	44	8	76
Workers' Compensation	(1) 25	22	75
Property and Other	(13) (11) (37) (24
Total pretax (favorable) unfavorable net prior year claim and allocated claim adjustment expense reserve development	\$ (11) \$71	\$—	\$179

Three Months

2015

Favorable development for property and other was primarily due to better than expected loss emergence on catastrophe events in accident year 2014.

2014

Overall, unfavorable development for general liability coverages was primarily related to higher than expected severity in accident years 2010, 2011 and 2013. Favorable development was recorded primarily related to lower than expected frequency of large losses in accident years 2005 through 2008.

Overall, unfavorable development for workers' compensation was primarily related to increased medical severity in accident years 2010 and prior and higher than expected severity related to Defense Base Act (DBA) contractors in accident years 2010 through 2013. Favorable development of \$26 million was recorded in accident years 1996 and prior related to the commutation of a workers' compensation reinsurance pool.

Favorable development for property and other first-party coverages was recorded in accident years 2010 and prior, primarily related to lower than expected frequency and favorable individual claim settlements.

Table of Contents

Nine Months

2015

Unfavorable development for workers' compensation was primarily due to higher than expected severity related to Defense Base Act contractors in accident years 2008 through 2013.

Favorable development for property and other was primarily due to better than expected loss emergence from 2012 and 2014 catastrophe events and better than expected frequency of large claims in accident year 2014.

The nine months also included unfavorable loss development related to an extra contractual obligation loss and losses associated with premium development.

2014

Unfavorable development for commercial auto was primarily related to increased claim frequency of large losses in accident years 2010 through 2013.

Overall, unfavorable development for general liability was primarily related to higher than expected severity in accident years 2009 through 2011. In addition, there was higher than expected severity in accident year 2013 related to Small Business. Favorable development was recorded primarily related to lower than expected frequency of large losses in accident years 2005 through 2008.

Overall, unfavorable development for workers' compensation was primarily due to increased medical severity in accident years 2010 and prior, higher than expected severity related to DBA contractors in accident years 2010 through 2013 and the recognition of losses related to favorable premium development in accident year 2013.

Favorable development of \$26 million was recorded in accident years 1996 and prior related to the commutation of a workers' compensation reinsurance pool.

Overall, favorable development for property and other coverages in accident years 2011 and prior primarily related to lower than expected frequency and favorable individual claim settlements. Additionally, there was favorable development due to better than expected loss emergence in catastrophe losses in accident year 2013. Unfavorable development was recorded in accident year 2012 primarily related to higher than expected loss emergence in catastrophe losses.

Three Months

2015

Favorable development in medical professional liability was due to better than expected loss emergence on accident years 2011 to 2013.

Favorable development in other professional liability was due to better than expected large loss emergence in accident years 2011 and prior.

Favorable development in liability was due to better than expected large loss emergence in accident years 2012 and prior.

Favorable development in property and marine was due to better than expected individual large loss emergence and favorable settlements on large claims in accident years 2013 and 2014.

2014

Favorable development for property and marine coverages was primarily related to better than expected severity in accident year 2013.

Table of Contents

Nine Months

2015

Favorable development in medical professional liability was due to better than expected loss emergence on accident years 2011 to 2013.

Favorable development in other professional liability was due to better than expected large loss emergence in accident years 2011 and prior.

Favorable development in liability was due to better than expected large loss emergence in accident years 2012 and prior.

Favorable development in property and marine was due to better than expected individual large loss emergence and favorable settlements on large claims in accident years 2013 and 2014.

Unfavorable development in other is due to higher than expected large losses in financial institutions and political risk, primarily in accident year 2014.

2014

Favorable development for other professional liability was primarily related to lower than expected severity in accident years 2011 and prior.

Favorable development for property and marine coverages was primarily related to better than expected severity in accident year 2013.

Reinsurance commutations in the first quarter of 2014 reduced ceded losses from prior years. Overall the commutations increased net operating income because of the release of the related allowance for uncollectible reinsurance.

Table of Contents

Asbestos and Environmental Pollution (A&EP) Reserves

In 2010, Continental Casualty Company (CCC) together with several of the Company's insurance subsidiaries completed a transaction with National Indemnity Company (NICO), a subsidiary of Berkshire Hathaway Inc., under which substantially all of the Company's legacy A&EP liabilities were ceded to NICO (Loss Portfolio Transfer or LPT). At the transaction effective date, the Company ceded approximately \$1.6 billion of net A&EP claim and allocated claim adjustment expense reserves to NICO under a retroactive reinsurance agreement with an aggregate limit of \$4 billion. The \$1.6 billion of claim and allocated claim adjustment expense reserves ceded to NICO was net of \$1.2 billion of ceded claim and allocated claim adjustment expense reserves under existing third-party reinsurance contracts. The NICO aggregate reinsurance limit also covers credit risk on the existing third-party reinsurance related to these liabilities. The Company paid NICO a reinsurance premium of \$2 billion and transferred to NICO billed third-party reinsurance receivables related to A&EP claims with a net book value of \$215 million, resulting in total consideration of \$2.2 billion.

Through December 31, 2013, the Company recorded \$0.9 billion of additional amounts ceded under LPT. As a result, the cumulative amounts ceded under the Loss Portfolio Transfer exceeded the \$2.2 billion consideration paid, resulting in a deferred retroactive reinsurance gain. This deferred gain is recognized in earnings in proportion to actual recoveries under the Loss Portfolio Transfer. Over the life of the contract, there is no economic impact as long as any additional losses are within the limit under the contract. In a period in which the estimate of ceded losses is changed, the required change to the deferred gain is cumulatively recognized in earnings as if the revised estimate was available at the inception of the LPT.

The following table displays the impact of the Loss Portfolio Transfer on the Condensed Consolidated Statements of Operations.

Periods ended September 30 (In millions)	Three Months		Nine Months	
	2015	2014	2015	2014
Net A&EP adverse development before consideration of LPT	\$—	\$—	\$150	\$—
Provision for uncollectible third-party reinsurance on A&EP	—	—	—	—
Additional amounts ceded under LPT	—	—	150	—
Retroactive reinsurance benefit recognized	(4) (4) (75) (9
Pretax impact of deferred retroactive reinsurance benefit	\$(4) \$(4) \$75	\$(9

The fourth quarter of 2014 A&EP reserve review was not completed in 2014 because additional information and analysis on inuring third-party reinsurance recoveries were needed to finalize the review. The review was finalized in the second quarter of 2015. Unfavorable development was due to a decrease in anticipated future reinsurance recoveries related to asbestos claims and higher than expected severity on pollution claims. The effect of the deferred retroactive reinsurance benefit is recorded in Insurance claims and policyholders' benefits in the Condensed Consolidated Statement of Operations.

As of September 30, 2015 and December 31, 2014, the cumulative amounts ceded under the LPT were \$2.6 billion and \$2.5 billion. The unrecognized deferred retroactive reinsurance benefit was \$251 million and \$176 million as of September 30, 2015 and December 31, 2014.

NICO established a collateral trust account as security for its obligations to the Company. The fair value of the collateral trust account was \$2.8 billion and \$3.4 billion as of September 30, 2015 and December 31, 2014. In addition, Berkshire Hathaway Inc. guaranteed the payment obligations of NICO up to the full aggregate reinsurance limit as well as certain of NICO's performance obligations under the trust agreement. NICO is responsible for claims handling and billing and collection from third-party reinsurers related to the Company's A&EP claims.

Table of Contents

Note F. Legal Proceedings and Contingent Liabilities

The Company is a party to routine litigation incidental to its business, which, based on the facts and circumstances currently known, is not material to the Condensed Consolidated Financial Statements.

Note G. Benefit Plans

The components of net periodic cost (benefit) are presented in the following table.

Periods ended September 30 (In millions)	Three Months		Nine Months	
	2015	2014	2015	2014
Pension cost (benefit)				
Service cost	\$—	\$3	\$4	\$7
Interest cost on projected benefit obligation	29	33	85	99
Expected return on plan assets	(44) (48) (131) (144
Amortization of net actuarial loss	7	6	26	19
Net periodic pension cost (benefit)	\$(8) \$(6) \$(16) \$(19
Postretirement cost (benefit)				
Interest cost on projected benefit obligation	\$—	\$—	\$—	\$1
Amortization of prior service credit	(1) —	(2) (9
Amortization of net actuarial loss	—	—	1	—
Curtailment gain	—	—	—	(86
Net periodic postretirement cost (benefit)	\$(1) \$—	\$(1) \$(94

In the second quarter of 2015, the Company eliminated future benefit accruals associated with the CNA Retirement Plan (Plan) effective June 30, 2015. Employees who were continuing to accrue under this Plan up until that date are entitled to an accrued benefit payable based on their eligible compensation and accrued service through June 30, 2015, in accordance with the terms of the Plan. Starting with the first pay period after July 1, 2015, affected employees began receiving enhanced employer contributions in the CNA 401(k) Plus Plan similar to employees who elected to cease accruals effective December 31, 1999. Employees who elected to cease accruals effective December 31, 1999 are not affected by this curtailment. This curtailment resulted in a \$55 million decrease in the Plan benefit obligation liability and a reduction of the unrecognized actuarial losses included in AOCI. In connection with the curtailment, the Company remeasured the plan benefit obligation which resulted in an increase in the discount rate used to determine the benefit obligation from 3.85% to 4.00%.

In the second quarter of 2014, the Company eliminated certain postretirement medical benefits associated with the CNA Health and Group Benefits Program. This change was a negative plan amendment that resulted in an \$86 million curtailment gain which was included in Other operating expenses within the Corporate & Other Non-Core segment. In connection with the plan amendment, the Company remeasured the plan benefit obligation which resulted in a decrease in the discount rate used to determine the benefit obligation from 3.60% to 3.10%.

Table of Contents

Note H. Commitments, Contingencies and Guarantees

Commitments and Contingencies

The Company holds an investment in a real estate joint venture. In the normal course of business, the Company, on a joint and several basis with other unrelated insurance company shareholders, has committed to continue funding the operating deficits of this joint venture. Additionally, the Company and the other unrelated shareholders, on a joint and several basis, have guaranteed an operating lease for an office building, which expires in 2016. The guarantee of the operating lease is a parallel guarantee to the commitment to fund operating deficits; consequently, the separate guarantee to the lessor is not expected to be triggered as long as the joint venture continues to be funded by its shareholders which provide liquidity to make its annual lease payments.

In the event that the other parties to the joint venture are unable to meet their commitments in funding the operations of this joint venture, the Company would be required to assume the obligation for the entire office building operating lease. The Company does not believe it is likely that it will be required to do so. However, as of September 30, 2015, the maximum potential future lease payments and other related costs that the Company could be required to pay under this guarantee, in excess of amounts already recorded, were approximately \$28 million. If the Company were required to assume the entire lease obligation, the Company would have the right to pursue reimbursement from the other shareholders and the right to all sublease revenues.

Guarantees

As of September 30, 2015 and December 31, 2014, the Company had recorded liabilities of \$5 million related to guarantee and indemnification agreements. Management believes that it is not likely that any future indemnity claims will be significantly greater than the amounts recorded.

In the course of selling business entities and assets to third parties, the Company agreed to guarantee the performance of certain obligations of a previously owned subsidiary and to indemnify purchasers for losses arising out of breaches of representation and warranties with respect to the business entities or assets being sold, including, in certain cases, losses arising from undisclosed liabilities or certain named litigation. Such guarantee and indemnification agreements in effect for sales of business entities, assets and third-party loans may include provisions that survive indefinitely. As of September 30, 2015, the aggregate amount related to quantifiable guarantees was \$375 million and the aggregate amount related to indemnification agreements was \$260 million. Should the Company be required to make payments under the guarantee, it would have the right to seek reimbursement in certain cases from an affiliate of the previously owned subsidiary.

In addition, the Company has agreed to provide indemnification to third-party purchasers for certain losses associated with sold business entities or assets that are not limited by a contractual monetary amount. As of September 30, 2015, the Company had outstanding unlimited indemnifications in connection with the sales of certain of its business entities or assets that included tax liabilities arising prior to a purchaser's ownership of an entity or asset, defects in title at the time of sale, employee claims arising prior to closing and in some cases losses arising from certain litigation and undisclosed liabilities. Certain provisions of the indemnification agreements survive indefinitely while others survive until the applicable statutes of limitation expire or until the agreed-upon contract terms expire.

In the normal course of business, the Company also provided guarantees, if the primary obligor fails to perform, to holders of structured settlement annuities provided by a previously owned subsidiary, which are estimated to mature through 2120. The potential amount of future payments the Company could be required to pay under these guarantees was approximately \$2.0 billion as of September 30, 2015. The Company does not believe a payable is likely under these guarantees, as the Company is the beneficiary of a trust that must be maintained at a level that approximates the discounted reserves for these annuities.

Table of Contents

Note J. Business Segments

The Company's core property and casualty commercial insurance operations are aggregated and reported in three business segments: Specialty, Commercial and International. The Company's non-core operations are managed and reported in two segments: Life & Group Non-Core and Corporate & Other Non-Core.

The accounting policies of the segments are the same as those described in Note A to the Consolidated Financial Statements within CNAF's Annual Report on Form 10-K for the year ended December 31, 2014. The Company manages most of its assets on a legal entity basis, while segment operations are generally conducted across legal entities. As such, only Insurance and Reinsurance receivables, Insurance reserves, Deferred acquisition costs and Goodwill are readily identifiable for all individual segments. Distinct investment portfolios are not maintained for every individual segment; accordingly, allocation of assets to each segment is not performed. Therefore, a significant portion of Net investment income and Realized investment gains or losses are allocated primarily based on each segment's net carried insurance reserves, as adjusted. All significant intersegment income and expense has been eliminated. Income taxes have been allocated on the basis of the taxable income of the segments.

In the following tables, certain financial measures are presented to provide information used by management to monitor the Company's operating performance. Management utilizes these financial measures to monitor the Company's insurance operations and investment portfolio. Net operating income (loss), which is derived from certain income statement amounts, is used by management to monitor performance of the Company's insurance operations. The Company's investment portfolio is monitored by management through analysis of various factors including unrealized gains and losses on securities, portfolio duration and exposure to market and credit risk. Based on such analyses, the Company may recognize an OTTI loss on an investment security in accordance with its policy, or sell a security, which may produce realized gains and losses.

Net operating income (loss) is calculated by excluding from net income (loss) the after-tax effects of 1) net realized investment gains or losses, 2) income or loss from discontinued operations and 3) any cumulative effects of changes in accounting guidance. The calculation of net operating income excludes net realized investment gains (losses) because net realized investment gains (losses) are largely discretionary, except for some losses related to OTTI, and are generally driven by economic factors that are not necessarily consistent with key drivers of underwriting performance and are therefore not considered an indication of trends in insurance operations.

Table of Contents

The Company's results of continuing operations and selected balance sheet items by segment are presented in the following tables.

Three months ended September 30, 2015

Item 2. Management's Discussion and Analysis (MD&A) of Financial Condition and Results of Operations
Overview

The following discussion highlights significant factors affecting the Company. References to “we,” “our,” “us” or like terms refer to the business of CNA. Based on 2014 statutory net written premiums, we are the eighth largest commercial insurance writer and the 14th largest property and casualty insurance organization in the United States of America. The following discussion should be read in conjunction with the Condensed Consolidated Financial Statements included under Part I, Item 1 of this Form 10-Q and Item 1A Risk Factors and Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations, which are included in our Annual Report on Form 10-K filed with the Securities and Exchange Commission for the year ended December 31, 2014.

We utilize the net operating income financial measure to monitor our operations. Net operating income (loss) is calculated by excluding from net income (loss) the after-tax effects of 1) net realized investment gains or losses, 2) income or loss from discontinued operations and 3) any cumulative effects of changes in accounting guidance. See further discussion regarding how we manage our business in Note J to the Condensed Consolidated Financial Statements included under Part I, Item 1.

In the evaluation of the results of our core Specialty, Commercial and International segments, we utilize the loss ratio, the expense ratio, the dividend ratio and the combined ratio. These ratios are calculated using GAAP financial results. The loss ratio is the percentage of net incurred claim and claim adjustment expenses to net earned premiums. The expense ratio is the percentage of insurance underwriting and acquisition expenses, including the amortization of deferred acquisition costs, to net earned premiums. The dividend ratio is the ratio of policyholders' dividends incurred to net earned premiums. The combined ratio is the sum of the loss, expense and dividend ratios. Rate represents the average change in price on policies that renew excluding exposure change. Retention represents the expiring premium dollars renewed in comparison to the renewal premium dollars available to renew.

Changes in estimates of claim and allocated claim adjustment expense reserves and premium accruals, net of reinsurance, for prior years are defined as net prior year development within this MD&A. These changes can be favorable or unfavorable. Net prior year development does not include the effect of related acquisition expenses. Further information on our reserves is provided in Note E to the Condensed Consolidated Financial Statements included under Part I, Item 1.

Table of Contents

CONSOLIDATED OPERATIONS

The following table presents the consolidated results of our operations. For more detailed components of our business operations and the net operating income financial measure, see the segment discussions within this MD&A. See the Investments section of this MD&A for further discussion of Net investment income and Net realized investment results.

Three Month Comparison

Income from continuing operations decreased \$31 million for the three months ended September 30, 2015 as compared with the same period in 2014. Improved net operating income was more than offset by a \$59 million decrease in net realized investment results, after tax, in the current period.

Net operating income improved \$28 million for the three months ended September 30, 2015 as compared with the same period in 2014, driven by our core property and casualty segments. Net operating income increased \$22 million for our core segments due to improved underwriting results, partially offset by lower limited partnership results. Catastrophe losses were \$10 million after tax for the three months ended September 30, 2015 and 2014. Net operating results for our non-core segments improved \$6 million. Results in 2014 included a \$34 million loss on the coinsurance transaction, as further discussed in Note A to the Condensed Consolidated Financial Statements included under Part I, Item 1, and a \$9 million reduction in the allowance for uncollectible reinsurance receivables. Excluding these items, the decline in results for our non-core segments for the three months ended September 30, 2015 was driven by our long term care business.

Favorable net prior year development of \$180 million and \$23 million was recorded for the three months ended September 30, 2015 and 2014 in our Specialty, Commercial, International and Corporate & Other Non-Core segments. Further information on net prior year development is in Note E to the Condensed Consolidated Financial Statements included under Part I, Item 1.

Table of Contents

Nine Month Comparison

Income from continuing operations decreased \$141 million for the nine months ended September 30, 2015 as compared with the same period in 2014. The decrease was due to lower net operating income and net realized investment results, after tax, in the current period.

Loss from discontinued operations, net of tax, for the nine months ended September 30, 2014 included a loss of \$211 million related to the sale of CAC. Further information on discontinued operations is provided in Note K to the Condensed Consolidated Financial Statements included under Part I, Item 1.

Net operating income decreased \$77 million for the nine months ended September 30, 2015 as compared with the same period in 2014. Net operating income increased \$68 million in our core property and casualty segments due to improved underwriting results, partially offset by lower limited partnership results. Catastrophe losses were \$68 million after tax for the nine months ended September 30, 2015 as compared to \$95 million after tax for the same period in 2014. Net operating loss for our non-core segments increased \$145 million. Results in 2015 for our non-core segments were negatively affected by decreased results in our long-term care business and a \$54 million after-tax charge related to the application of retroactive reinsurance accounting to adverse reserve development ceded under the 2010 A&EP Loss Portfolio Transfer, as further discussed in Note E to the Condensed Consolidated Financial Statements included under Part I, Item 1. Results in 2014 for our non-core segments benefited from a \$56 million after-tax curtailment gain related to a change in postretirement benefits, as further discussed in Note G to the Condensed Consolidated Financial Statements included under Part I, Item 1. Results in 2014 also included the \$34 million loss on the coinsurance transaction, as further discussed in Note A to the Condensed Consolidated Financial Statements included under Part I, Item 1.

Favorable net prior year development of \$198 million and \$7 million was recorded for the nine months ended September 30, 2015 and 2014 in our Specialty, Commercial, International and Corporate & Other Non-Core segments. Further information on net prior year development is in Note E to the Condensed Consolidated Financial Statements included under Part I, Item 1.

Table of Contents

CRITICAL ACCOUNTING ESTIMATES

The preparation of the Condensed Consolidated Financial Statements in conformity with GAAP requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the date of the Condensed Consolidated Financial Statements and the amounts of revenues and expenses reported during the period. Actual results may differ from those estimates.

Our Condensed Consolidated Financial Statements and accompanying notes have been prepared in accordance with GAAP applied on a consistent basis. We continually evaluate the accounting policies and estimates used to prepare the Condensed Consolidated Financial Statements. In general, our estimates are based on historical experience, evaluation of current trends, information from third-party professionals and various other assumptions that are believed to be reasonable under the known facts and circumstances.

The accounting estimates below are considered by us to be critical to an understanding of our Condensed Consolidated Financial Statements as their application places the most significant demands on our judgment.

Insurance Reserves

Reinsurance and Insurance Receivables

Valuation of Investments and Impairment of Securities

Long Term Care Policies

Pension and Postretirement Benefit Obligations

Income Taxes

Due to the inherent uncertainties involved with these types of judgments, actual results could differ significantly from estimates and may have a material adverse impact on our results of operations or equity. See the Critical Accounting Estimates section of our Management's Discussion and Analysis of Financial Condition and Results of Operations included under Item 7 of our Annual Report on Form 10-K for the year ended December 31, 2014 for further information.

Table of Contents

SEGMENT RESULTS

The following discusses the results of continuing operations for our operating segments. Our core property and casualty commercial insurance operations are aggregated and reported in three business segments: Specialty, Commercial and International. Our non-core operations are managed and reported in two segments: Life & Group Non-Core and Corporate & Other Non-Core.

Specialty

The following table presents the results of operations.

Periods ended September 30 (In millions, except ratios, rate and retention)	Three Months		Nine Months		
	2015	2014	2015	2014	
Net written premiums	\$707	\$736	\$2,077	\$2,150

Retention	86	% 87	% 86	% 87	%
New Business	\$67	\$87	\$206	\$239	

Three Month Comparison

Net written premiums for Specialty decreased \$29 million for the three months ended September 30, 2015 as compared with the same period in 2014, driven by lower new business. The decrease in net earned premiums was consistent with the trend in net written premiums.

Net operating income decreased \$5 million for the three months ended September 30, 2015 as compared with the same period in 2014. Improved underwriting results were more than offset by lower net investment income.

The combined ratio improved 6.4 points for the three months ended September 30, 2015 as compared with the same period in 2014. The loss ratio improved 7.2 points driven by higher favorable net prior year development. Catastrophe losses were \$3 million, or 0.5 points of the loss ratio for the three months ended September 30, 2015, as compared to \$5 million, or 0.7 points of the loss ratio for the three months ended September 30, 2014. The expense ratio increased 1.0 point for the three months ended September 30, 2015, as compared with the same period in 2014, due to the unfavorable effect of lower net earned premiums.

Favorable net prior year development of \$132 million and \$83 million was recorded for the three months ended September 30, 2015 and 2014. Further information on net prior year development is in Note E to the Condensed Consolidated Financial Statements included under Part I, Item 1.

Table of Contents

Nine Month Comparison

Net written premiums for Specialty decreased \$73 million for the nine months ended September 30, 2015 as compared with the same period in 2014, due to lower new business and retention. The decrease in net earned premiums was consistent with the trend in net written premiums.

Net operating income decreased \$29 million for the nine months ended September 30, 2015 as compared with the same period in 2014, primarily due to lower net investment income.

The combined ratio improved 0.8 points for the nine months ended September 30, 2015 as compared with the same period in 2014. The loss ratio improved 1.6 points due to higher favorable net prior year development and an improved current accident year loss ratio. Catastrophe losses were \$15 million, or 0.7 points of the loss ratio for the nine months ended September 30, 2015, as compared to \$21 million, or 1.0 point of the loss ratio for the nine months ended September 30, 2014. The expense ratio increased 0.8 points for the nine months ended September 30, 2015 as compared with the same period in 2014, primarily driven by increased underwriting expenses and the unfavorable effect of lower net earned premiums.

Favorable net prior year development of \$151 million and \$135 million was recorded for the nine months ended September 30, 2015 and 2014. Further information on net prior year development is in Note E to the Condensed Consolidated Financial Statements included under Part I, Item 1.

The following table presents the gross and net carried reserves.

(In millions)	September 30, 2015	December 31, 2014
Gross Case Reserves	\$2,108	\$2,136
Gross IBNR Reserves	4,091	4,093
Total Gross Carried Claim and Claim Adjustment Expense Reserves	\$6,199	\$6,229
Net Case Reserves	\$1,882	\$1,929
Net IBNR Reserves	3,706	3,726
Total Net Carried Claim and Claim Adjustment Expense Reserves	\$5,588	\$5,655

Table of Contents

Commercial

The following table presents the results of operations.

Periods ended September 30 (In millions, except ratios, rate and retention)	Three Months		Nine Months		
	2015	2014	2015	2014	
Net written premiums	\$642	\$634	\$2,118	\$2,133

Retention	76	% 74	% 77	% 72	%
New Business	\$135	\$116	\$422	\$396	

Three Month Comparison

Net written premiums for Commercial increased \$8 million for the three months ended September 30, 2015 as compared with the same period in 2014. Higher new business and retention as well as positive rate were substantially offset by the residual effect of previous underwriting actions undertaken in certain business classes. Net earned premiums decreased \$16 million for the three months ended September 30, 2015 as compared with the same period in 2014, consistent with the trend in net written premiums in recent quarters.

Net operating income increased \$23 million for the three months ended September 30, 2015 as compared with the same period in 2014, due to improved underwriting results partially offset by lower net investment income.

The combined ratio improved 14.9 points for the three months ended September 30, 2015 as compared with the same period in 2014. The loss ratio improved 15.3 points, due to favorable net prior year development for the three months ended September 30, 2015 as compared to unfavorable net prior year development for the same period in 2014 and an improved current accident year loss ratio. Catastrophe losses were \$10 million, or 1.4 points of the loss ratio for the three months ended September 30, 2015, as compared to \$14 million, or 2.0 points of the loss ratio for the three months ended September 30, 2014. The expense ratio increased 0.6 points for the three months ended September 30, 2015 as compared with the same period in 2014, due to the unfavorable effect of lower net earned premiums.

Favorable net prior year development of \$16 million was recorded for the three months ended September 30, 2015, as compared with unfavorable net prior year development of \$71 million for the three months ended September 30, 2014. Further information on net prior year development is in Note E to the Condensed Consolidated Financial Statements included under Part I, Item 1.

Table of Contents

Nine Month Comparison

Net written premiums for Commercial decreased \$15 million for the nine months ended September 30, 2015 as compared with the same period in 2014, driven by the residual effect of previous underwriting actions undertaken in certain business classes, partially offset by positive rate and higher retention and new business. Net earned premiums decreased \$102 million for the nine months ended September 30, 2015 as compared with the same period in 2014, consistent with the trend in net written premiums.

Net operating income increased \$98 million for the nine months ended September 30, 2015 as compared with the same period in 2014, due to improved underwriting results, partially offset by lower net investment income.

The combined ratio improved 11.3 points for the nine months ended September 30, 2015 as compared with the same period in 2014. The loss ratio improved 12.4 points, due to favorable net prior year development and an improved current accident year loss ratio. Catastrophe losses were \$83 million, or 4.0 points of the loss ratio for the nine months ended September 30, 2015, as compared to \$121 million, or 5.6 points of the loss ratio for the nine months ended September 30, 2014. The expense ratio increased 1.2 points for the nine months ended September 30, 2015 as compared with the same period in 2014, due to the unfavorable effect of lower net earned premiums.

Favorable net prior year development of \$17 million was recorded for the nine months ended September 30, 2015, as compared with unfavorable net prior year development of \$155 million for the nine months ended September 30, 2014. Further information on net prior year development is in Note E to the Condensed Consolidated Financial Statements included under Part I, Item 1.

The following table presents the gross and net carried reserves.

(In millions)	September 30, 2015	December 31, 2014
Gross Case Reserves	\$5,105	\$5,298
Gross IBNR Reserves	4,178	4,216
Total Gross Carried Claim and Claim Adjustment Expense Reserves	\$9,283	\$9,514
Net Case Reserves	\$4,740	\$4,947
Net IBNR Reserves	3,909	3,906
Total Net Carried Claim and Claim Adjustment Expense Reserves	\$8,649	\$8,853

Three Month Comparison

Net written premiums for International decreased \$10 million for the three months ended September 30, 2015 as compared with the same period in 2014. The decrease was driven by the unfavorable effect of foreign currency exchange rates. Excluding the effect of foreign currency exchange rates, net written premiums increased 5% for the three months ended September 30, 2015 as compared with the same period in 2014 driven by higher new business. Net earned premiums decreased \$22 million for the three months ended September 30, 2015 as compared with the same period in 2014, consistent with the trend in net written premiums.

Net operating income increased \$4 million for the three months ended September 30, 2015 as compared with the same period in 2014 due to improved underwriting results driven by higher favorable net prior year development.

The combined ratio improved 8.6 points for the three months ended September 30, 2015 as compared with the same period in 2014. The loss ratio improved 7.3 points. This improvement was due to higher favorable net prior year development, partially offset by a higher current accident year loss ratio. The deterioration in the current accident year loss ratio was driven by large losses, including losses related to the explosion in Tianjin, China. The expense ratio improved 1.3 points for the three months ended September 30, 2015 as compared with the same period in 2014 due to lower expenses, partially offset by the unfavorable effect of lower net earned premiums.

Favorable net prior year development of \$32 million and \$10 million was recorded for the three months ended September 30, 2015 and 2014. Further information on net prior year development is in Note E to the Condensed Consolidated Financial Statements included under Part I, Item 1.

Table of Contents

Nine Month Comparison

Net written premiums for International decreased \$57 million for the nine months ended September 30, 2015 as compared with the same period in 2014. The decrease was driven by the unfavorable effect of foreign currency exchange rates, the 2014 termination of a specialty product managing general underwriter relationship in Canada and unfavorable premium development at Hardy. Net earned premiums decreased \$96 million for the nine months ended September 30, 2015 as compared with the same period in 2014, consistent with the trend in net written premiums. The combined ratio improved 0.6 points for the nine months ended September 30, 2015 as compared with the same period in 2014. The loss ratio increased 1.1 points, primarily due to an increase in the non-catastrophe current accident year loss ratio driven by large losses. Catastrophe losses were \$5 million, or 0.8 points of the loss ratio for the nine months ended September 30, 2015, as compared to \$5 million, or 0.7 points of the loss ratio for the nine months ended September 30, 2014. The expense ratio improved 1.7 points for the nine months ended September 30, 2015 as compared with the same period in 2014 due to lower expenses, partially offset by the unfavorable effect of lower earned premiums.

Favorable net prior year development of \$30 million and \$26 million was recorded for the nine months ended September 30, 2015 and 2014. Further information on net prior year development is in Note E to the Condensed Consolidated Financial Statements included under Part I, Item 1.

The following table presents the gross and net carried reserves.

(In millions)	September 30, 2015	December 31, 2014
Gross Case Reserves	\$611	\$752
Gross IBNR Reserves	754	689
Total Gross Carried Claim and Claim Adjustment Expense Reserves	\$1,365	\$1,441
Net Case Reserves	\$503	\$598
Net IBNR Reserves	711	663
Total Net Carried Claim and Claim Adjustment Expense Reserves	\$1,214	\$1,261

Life & Group Non-Core

The following table presents the results of operations.

Periods ended September 30 (In millions)	Three Months		Nine Months		
	2015	2014	2015	2014	
Net earned premiums	\$137	\$139	\$412	\$417	
Net investment income	182	177	540	521	
Net operating loss	(30) (42) (71) (35)
Net realized investment gains (losses), after tax	2	21	6	28	
Net loss	(28) (21) (65) (7)

Three Month Comparison

Net earned premiums for Life & Group Non-Core were consistent for the three months ended September 30, 2015 as compared with the same period in 2014, as the effect of policy lapses was substantially offset by rate increases.

Net operating loss decreased \$12 million for the three months ended September 30, 2015 as compared with the same period in 2014. Results in 2014 included a \$34 million after-tax loss on the coinsurance transaction, as further discussed in Note A to the Condensed Consolidated Financial Statements included under Part I, Item 1. The net operating loss for our long term care business increased \$23 million. Long term care results in 2014 benefited from unusually favorable morbidity experience in our long term care business as compared to unfavorable morbidity experience in the current year period.

Nine Month Comparison

Net earned premiums for Life & Group Non-Core were consistent for the nine months ended September 30, 2015 as compared with the same period in 2014, due to the same reasons discussed in the three month comparison.

Net operating loss increased \$36 million for the nine months ended September 30, 2015 as compared with the same period in 2014. The net operating loss for our long term care business increased \$64 million. Long term care results in 2014 benefited from unusually favorable morbidity experience in our long term care business as compared to unfavorable morbidity experience in the current year period. Results in 2014 included the coinsurance transaction discussed above.

Table of Contents

Corporate & Other Non-Core

The following table presents the results of operations.

Periods ended September 30 (In millions)	Three Months		Nine Months	
	2015	2014	2015	2014
Net investment income	\$1	\$5	\$12	\$17
Interest expense	39	48	117	138
Net operating loss	(23) (17) (126) (17
Net realized investment gains (losses), after tax	1	—	2	6
Net loss	(22) (17) (124) (11

Three Month Comparison

Net operating loss increased \$6 million for the three months ended September 30, 2015 as compared with the same period in 2014. Results in 2015 included lower interest expense due to maturity of higher coupon debt in the fourth quarter of 2014. Results in 2014 were favorably affected by a \$9 million after-tax reduction in the allowance for uncollectible reinsurance receivables arising from a change in estimate.

No net prior year development was recorded for the three months ended September 30, 2015, as compared with favorable net prior year development of \$1 million for three months ended September 30, 2014.

Nine Month Comparison

Net operating loss increased \$109 million for the nine months ended September 30, 2015 as compared with the same period in 2014. Results in 2015 were negatively affected by a \$54 million after-tax charge related to the application of retroactive reinsurance accounting to adverse reserve development ceded under the 2010 A&EP Loss Portfolio Transfer, as further discussed in Note E to the Condensed Consolidated Financial Statements included under Part I, Item 1. Results in 2014 benefited from a \$56 million after-tax curtailment gain related to a change in postretirement benefits, as further discussed in Note G to the Condensed Consolidated Financial Statements included under Part I, Item 1. Additionally, 2015 benefited from lower interest expense due to the maturity of higher coupon debt in the fourth quarter of 2014, and results in 2014 were favorably affected by the reduction in the allowance for uncollectible reinsurance receivables arising from a change in estimate.

No net prior year development was recorded for the nine months ended September 30, 2015, as compared with favorable net prior year development of \$1 million for the nine months ended September 30, 2014.

The following table presents the gross and net carried reserves.

(In millions)	September 30, 2015	December 31, 2014
Gross Case Reserves	\$1,555	\$1,189
Gross IBNR Reserves	1,179	1,715
Total Gross Carried Claim and Claim Adjustment Expense Reserves	\$2,734	\$2,904
Net Case Reserves	\$135	\$144
Net IBNR Reserves	163	171
Total Net Carried Claim and Claim Adjustment Expense Reserves	\$298	\$315

Table of Contents

INVESTMENTS

Net Investment Income

The significant components of Net investment income are presented in the following table.

Periods ended September 30 (In millions, except yields)	Three Months		Nine Months		
	2015	2014	2015	2014	
Fixed maturity securities:					
Taxable	\$346	\$352	\$1,040	\$1,054	
Tax-Exempt	103	101	304	302	
Total fixed maturity securities	449	453	1,344	1,356	
Limited partnership investments	(93) 29	69	199	
Other, net of investment expense	(2) (2) (1) 1	
Pretax net investment income	\$354	\$480	\$1,412	\$1,556	
After-tax net investment income	\$265	\$346	\$1,015	\$1,108	
Effective income yield for the fixed maturity securities portfolio, pretax	4.8	% 4.8	% 4.8	% 4.9	%
Effective income yield for the fixed maturity securities portfolio, after tax	3.5	% 3.5	% 3.5	% 3.5	%

After-tax net investment income for the three months ended September 30, 2015 decreased \$81 million as compared with the same period in 2014. The decrease was driven by limited partnership investments, which returned (3.2)% as compared with 1.0% in the prior year period.

After-tax net investment income for the nine months ended September 30, 2015 decreased \$93 million as compared with the same period in 2014. The decrease was driven by limited partnerships, which returned 2.2% as compared with 7.4% in the prior year period. Income from fixed maturity securities was unfavorably affected by a decline in the effective income yield, partially offset by favorable changes in estimates for prepayments for asset-backed securities.

Table of Contents

Net Realized Investment Gains (Losses)

The components of Net realized investment gains (losses) are presented in the following table.

Periods ended September 30 (In millions)	Three Months		Nine Months		
	2015	2014	2015	2014	
Fixed maturity securities:					
Corporate and other bonds	\$(27) \$21	\$(11) \$43	
States, municipalities and political subdivisions	(7) 20	(27) 38	
Asset-backed	5	(2) 8	(25)
Foreign government	—	—	1	2	
Total fixed maturity securities	(29) 39	(29) 58	
Equity securities	(18) (3) (19) 2	
Derivative financial instruments	(1) —	9	1	
Short term investments and other	(1) 1	—	8	
Net realized investment gains (losses)	(49) 37	(39) 69	
Income tax (expense) benefit on net realized investment gains (losses)	17	(10) 21	(23)
Net realized investment gains (losses), after tax	\$(32) \$27	\$(18) \$46	

Net realized investment results, after tax, decreased \$59 million for the three months ended September 30, 2015 as compared with the same period in 2014. This decrease was driven by higher OTTI losses recognized in earnings and lower net realized investment gains on sales of securities.

Net realized investment results, after tax, decreased \$64 million for the nine months ended September 30, 2015 as compared with the same period in 2014, driven by the same reasons as discussed above.

Further information on our realized gains and losses, including our OTTI losses and derivative gains, is included in Note C to the Condensed Consolidated Financial Statements included under Part I, Item 1.

Table of Contents

Portfolio Quality

The following table presents the estimated fair value and net unrealized gains (losses) of our fixed maturity securities by ratings distribution.

(In millions)	September 30, 2015		December 31, 2014	
	Estimated Fair Value	Net Unrealized Gains (Losses)	Estimated Fair Value	Net Unrealized Gains (Losses)
U.S. Government, Government agencies and Government-sponsored enterprises	\$3,718	\$140	\$3,882	\$144
AAA	2,531	157	2,850	203
AA	9,709	948	9,404	1,016
A	9,749	836	10,594	1,064
BBB	11,363	495	11,093	889
Non-investment grade	3,131	57	2,945	117
Total	\$40,201	\$2,633	\$40,768	\$3,433

As of September 30, 2015 and December 31, 2014, only 1% of our fixed maturity portfolio was rated internally.

The following table presents available-for-sale fixed maturity securities in a gross unrealized loss position by ratings distribution.

(In millions)	September 30, 2015	
	Estimated Fair Value	Gross Unrealized Losses
U.S. Government, Government agencies and Government-sponsored enterprises	\$45	\$1
AAA	252	8
AA	783	16
A	1,045	17
BBB	2,851	146
Non-investment grade	1,214	63
Total	\$6,190	\$251

The following table presents the maturity profile for these available-for-sale fixed maturity securities. Securities not due to mature on a single date are allocated based on weighted average life.

(In millions)	September 30, 2015	
	Estimated Fair Value	Gross Unrealized Losses
Due in one year or less	\$114	\$4
Due after one year through five years	934	29
Due after five years through ten years	3,588	132
Due after ten years	1,554	86
Total	\$6,190	\$251

Table of Contents

Duration

A primary objective in the management of the investment portfolio is to optimize return relative to corresponding liabilities and respective liquidity needs. Our views on the current interest rate environment, tax regulations, asset class valuations, specific security issuer and broader industry segment conditions and the domestic and global economic conditions, are some of the factors that enter into an investment decision. We also continually monitor exposure to issuers of securities held and broader industry sector exposures and may from time to time adjust such exposures based on our views of a specific issuer or industry sector.

A further consideration in the management of the investment portfolio is the characteristics of the corresponding liabilities and the ability to align the duration of the portfolio to those liabilities and to meet future liquidity needs, minimize interest rate risk and maintain a level of income sufficient to support the underlying insurance liabilities. For portfolios where future liability cash flows are determinable and typically long term in nature, we segregate investments for asset/liability management purposes. The segregated investments support the long term care and structured settlement liabilities in the Life & Group Non-Core segment.

The effective durations of fixed maturity securities and short term investments are presented in the following table. Amounts presented are net of payable and receivable amounts for securities purchased and sold, but not yet settled.

(In millions)	September 30, 2015		December 31, 2014	
	Estimated Fair Value	Effective Duration (In years)	Estimated Fair Value	Effective Duration (In years)
Investments supporting Life & Group Non-Core	\$14,714	10.3	\$14,668	10.5
Other interest sensitive investments	26,877	4.4	27,748	4.0
Total	\$41,591	6.5	\$42,416	6.3

The investment portfolio is periodically analyzed for changes in duration and related price risk. Additionally, we periodically review the sensitivity of the portfolio to the level of foreign exchange rates and other factors that contribute to market price changes. A summary of these risks and specific analysis on changes is included in the Quantitative and Qualitative Disclosures About Market Risk in Item 7A of our Annual Report on Form 10-K for the year ended December 31, 2014.

Short Term Investments

The carrying values of the components of Short term investments are presented in the following table.

(In millions)	September 30, 2015	December 31, 2014
Short term investments:		
Commercial paper	\$747	\$922
U.S. Treasury securities	453	466
Money market funds	129	206
Other	153	112
Total short term investments	\$1,482	\$1,706

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

Cash Flows

Our primary operating cash flow sources are premiums and investment income from our insurance subsidiaries. Our primary operating cash flow uses are payments for claims, policy benefits and operating expenses, including interest expense on corporate debt. Cash receipts and cash payments resulting from purchases and sales of trading securities are reported as cash flows related to operating activities. Additionally, cash may be paid or received for income taxes. For the nine months ended September 30, 2015, net cash provided by operating activities was \$1,045 million as compared with \$1,047 million for the same period in 2014. Lower premiums collected and decreased receipts relating to returns on limited partnerships were offset by lower net claim payments and lower taxes paid.

Cash flows from investing activities include the purchase and disposition of available-for-sale financial instruments and may include the purchase and sale of businesses, land, buildings, equipment and other assets not generally held for resale. Net cash used by investing activities was \$254 million for the nine months ended September 30, 2015, as compared with net cash used of \$1,087 million for the same period in 2014. The cash flow from investing activities is affected by various factors such as the anticipated payment of claims, financing activity, asset/liability management and individual security buy and sell decisions made in the normal course of portfolio management.

Cash flows from financing activities may include proceeds from the issuance of debt and equity securities, outflows for stockholder dividends or repayment of debt and outlays to reacquire equity instruments. For the nine months ended September 30, 2015, net cash used by financing activities was \$739 million as compared with net cash provided of \$95 million for the same period in 2014. Cash used by financing activities reflected an increased special stockholder dividend in the first quarter of 2015 as compared to the same period in 2014. Additionally, in the first quarter of 2014, we issued \$550 million of senior notes.

Common Stock Dividends

Dividends of \$2.75 per share of our common stock, including a special dividend of \$2.00 per share, were declared and paid during the nine months ended September 30, 2015. On October 30, 2015, our Board of Directors declared a quarterly dividend of \$0.25 per share, payable December 2, 2015 to stockholders of record on November 16, 2015. The declaration and payment of future dividends to holders of our common stock will be at the discretion of our Board of Directors and will depend on many factors, including our earnings, financial condition, business needs and regulatory constraints.

Liquidity

We believe that our present cash flows from operating, investing and financing activities are sufficient to fund our current and expected working capital and debt obligation needs and we do not expect this to change in the near term. During the third quarter of 2015, we entered into a new credit agreement with a syndicate of banks and simultaneously terminated our previous credit agreement. The new credit agreement established a five-year \$250 million senior unsecured revolving credit facility which may be used for general corporate purposes. At our election, the commitments under the new credit agreement may be increased from time to time up to an additional aggregate amount of \$100 million and the new credit agreement includes two optional one-year extensions prior to the first and second anniversary of the closing date, subject to applicable consents. Under the new credit agreement, we are required to pay a facility fee which would adjust automatically in the event of a change in our financial ratings. The new credit agreement includes several covenants, including maintenance of a minimum consolidated net worth and a defined ratio of consolidated indebtedness to consolidated total capitalization.

There are currently no amounts outstanding under our new \$250 million senior unsecured revolving credit facility and no borrowings outstanding through our membership in the Federal Home Loan Bank of Chicago.

Table of Contents

Dividends from Continental Casualty Company (CCC) are subject to the insurance holding company laws of the State of Illinois, the domiciliary state of CCC. Under these laws, ordinary dividends, or dividends that do not require prior approval by Illinois Department of Insurance (the Department), are determined based on statutory net income and surplus as well as timing of dividends paid in the preceding twelve months. Ordinary dividends may only be paid from earned surplus, which is calculated by removing unrealized gains from unassigned surplus. During the nine months ended September 30, 2015, CCC paid a dividend of \$800 million to its parent. As of September 30, 2015, CCC is able to pay approximately \$216 million of dividends that would not be subject to the prior approval of the Department. We have an effective automatic shelf registration statement under which we may issue debt, equity or hybrid securities.

ACCOUNTING STANDARDS UPDATE

For discussion of an accounting standards update that will be adopted in the future, see Note A to the Condensed Consolidated Financial Statements.

FORWARD-LOOKING STATEMENTS

This report contains a number of forward-looking statements which relate to anticipated future events rather than actual present conditions or historical events. These statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 and generally include words such as “believes,” “expects,” “intends,” “anticipates,” “estimates,” and similar expressions. Forward-looking statements in this report include any and all statements regarding expected developments in our insurance business, including losses and loss reserves for A&EP and other mass tort claims which are more uncertain, and therefore more difficult to estimate than loss reserves respecting traditional property and casualty exposures; the impact of routine ongoing insurance reserve reviews we are conducting; our expectations concerning our revenues, earnings, expenses and investment activities; volatility in investment returns; expected cost savings and other results from our expense reduction activities; and our proposed actions in response to trends in our business. Forward-looking statements, by their nature, are subject to a variety of inherent risks and uncertainties that could cause actual results to differ materially from the results projected in the forward-looking statement. We cannot control many of these risks and uncertainties. These risks and uncertainties include, but are not limited to, the following:

Company-Specific Factors

the risks and uncertainties associated with our insurance reserves, as outlined in the Critical Accounting Estimates and the Reserves - Estimates and Uncertainties sections of our Annual Report on Form 10-K, including the sufficiency of the reserves and the possibility for future increases, which would be reflected in the results of operations in the period that the need for such adjustment is determined;

- the risk that the other parties to the transaction in which, subject to certain limitations, we ceded our legacy A&EP liabilities will not fully perform their obligations to CNA, the uncertainty in estimating loss reserves for A&EP liabilities and the possible continued exposure of CNA to liabilities for A&EP claims that are not covered under the terms of the transaction;

the performance of reinsurance companies under reinsurance contracts with us; and

the risks and uncertainties associated with potential acquisitions and divestitures, including the consummation of such transactions, the successful integration of acquired operations and the potential for subsequent impairment of goodwill or intangible assets.

Industry and General Market Factors

the impact of competitive products, policies and pricing and the competitive environment in which we operate, including changes in our book of business;

product and policy availability and demand and market responses, including the level of ability to obtain rate increases and decline or non-renew underpriced accounts, to achieve premium targets and profitability and to realize growth and retention estimates;

general economic and business conditions, including recessionary conditions that may decrease the size and number of our insurance customers and create additional losses to our lines of business, especially those that provide management and professional liability insurance, as well as surety bonds, to businesses engaged in real estate, financial services and professional services and inflationary pressures on medical care costs, construction costs and other economic sectors that increase the severity of claims;

conditions in the capital and credit markets, including continuing uncertainty and instability in these markets, as well as the overall economy, and their impact on the returns, types, liquidity and valuation of our investments;

conditions in the capital and credit markets that may limit our ability to raise significant amounts of capital on favorable terms; and

the possibility of changes in our ratings by ratings agencies, including the inability to access certain markets or distribution channels and the required collateralization of future payment obligations as a result of such changes, and changes in rating agency policies and practices.

Table of Contents

Regulatory Factors

regulatory initiatives and compliance with governmental regulations, judicial interpretations within the regulatory framework, including interpretation of policy provisions, decisions regarding coverage and theories of liability, trends in litigation and the outcome of any litigation involving us and rulings and changes in tax laws and regulations; regulatory limitations, impositions and restrictions upon us, including with respect to our ability to increase premium rates, and the effects of assessments and other surcharges for guaranty funds and second-injury funds, other mandatory pooling arrangements and future assessments levied on insurance companies; and regulatory limitations and restrictions, including limitations upon our ability to receive dividends from our insurance subsidiaries, imposed by regulatory authorities, including regulatory capital adequacy standards.

Impact of Catastrophic Events and Related Developments

weather and other natural physical events, including the severity and frequency of storms, hail, snowfall and other winter conditions, natural disasters such as hurricanes and earthquakes, as well as climate change, including effects on global weather patterns, greenhouse gases, sea, land and air temperatures, sea levels, rain, hail and snow; regulatory requirements imposed by coastal state regulators in the wake of hurricanes or other natural disasters, including limitations on the ability to exit markets or to non-renew, cancel or change terms and conditions in policies, as well as mandatory assessments to fund any shortfalls arising from the inability of quasi-governmental insurers to pay claims; man-made disasters, including the possible occurrence of terrorist attacks, the unpredictability of the nature, targets, severity or frequency of such events and the effect of the absence or insufficiency of applicable terrorism legislation on coverages; and the occurrence of epidemics.

Our forward-looking statements speak only as of the date on which they are made and we do not undertake any obligation to update or revise any forward-looking statement to reflect events or circumstances after the date of the statement, even if our expectations or any related events or circumstances change.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There were no material changes in our market risk components for the nine months ended September 30, 2015. See the Quantitative and Qualitative Disclosures About Market Risk included in Item 7A on our Annual Report on Form 10-K filed with the Securities and Exchange Commission for the year ended December 31, 2014 for further information. Additional information related to portfolio duration is discussed in the Investments section of our Management's Discussion and Analysis of Financial Condition and Results of Operations included in Part I, Item 2.

Item 4. Controls and Procedures

The Company maintains a system of disclosure controls and procedures which are designed to ensure that information required to be disclosed by the Company in reports that it files or submits to the Securities and Exchange Commission under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), including this report, is recorded, processed, summarized and reported on a timely basis. These disclosure controls and procedures include controls and procedures designed to ensure that information required to be disclosed under the Exchange Act is accumulated and communicated to the Company's management on a timely basis to allow decisions regarding required disclosure.

As of September 30, 2015, the Company's management, including the Company's Chief Executive Officer (CEO) and Chief Financial Officer (CFO), conducted an evaluation of the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Exchange Act Rules 13a-15(e) and 15d-15(e)). Based on this evaluation, the CEO and CFO have concluded that the Company's disclosure controls and procedures are effective as of September 30, 2015.

There has been no change in the Company's internal control over financial reporting (as defined in Rules 13a-15 (f) and 15d-15(f) under the Exchange Act) during the quarter ended September 30, 2015 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.
